BIOMEDICAL ENGINEERING, B.A.

Learning Outcomes

1. Ability to understand and apply basic science and perform technical skills to solve problems related to health and healthcare.
2. Ability to communicate effectively with a range of audiences.
3. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
4. Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Ability to recognize ethical and professional responsibilities in healthcare, and understand societal and global impact of biomedical engineering solutions.

Academic Standards
Program GPA

Program GPA requirement policies are described in the College of Engineering and Computing section of this bulletin. For the purpose of these policies, the following courses are used to determine the Program GPA for the Biomedical Engineering B.S. program: all Biomedical Engineering Major courses and all courses used to satisfy Biomedical Engineering Electives.
