The nurse anesthetist is a highly trained medical care specialist who, under the supervision of a physician, is responsible for the anesthesia requirements of patients in all areas of surgery. The nurse anesthetist develops, implements, and evaluates the anesthetic plan of care for individual patients and is a vital part of the health care team. The nurse anesthesia program at the University of South Carolina is accredited for the maximum 10-year period by the Council on Accreditation of Nurse Anesthesia Education Programs and prides itself on a very high graduation rate and excellent pass success on the certification exam. Through careful selection of applicants, quality instruction, and supportive environment, 95% of our admitted students succeed in completing the program and earning their Master’s degree. All of the program graduates have passed the National Certification Examination of the Council on Certification of Nurse Anesthetists and have scored at or above the national average. The first-time rate for passing the Certification Exam has been 92% for the past five years. To date all graduates have found appropriate employment as Nurse Anesthetists.

The Masters of Nurse Anesthesia program is a cooperative program between the School of Medicine and its clinical training partner institutions, Palmetto Richland Hospital (PRH) in Columbia, SC and Greenville Hospital System University Medical Center (GHSUMC) in Greenville, SC. PRH began training nurse anesthetists in 1969 at the School of Nurse Anesthesia with involvement of School of Medicine faculty since 1986. A program leading to a Master of Nurse Anesthesia from University of South Carolina was accredited in 1993, and in 2010 GHSUMC was approved as an additional primary clinical site. Students may now complete their entire educational program either in Columbia or Greenville, with didactic educational content shared by two-way interactive videoconferencing between Columbia and Greenville classrooms.

Learning Outcomes

- Knowledge of human anatomy, physiology, pathophysiology and pharmacology.
- Demonstrate knowledge of all the indications, contraindications, pharmacokinetics and pharmacodynamics of currently available anesthetic agents and drugs.
- Demonstrate knowledge of the anesthetic related indications in the care of specialties (Advanced Principles of Anesthesia) such as neurosurgery, pediatrics, obstetrics, and cardio-thoracic anesthesia.

Admission Standards

1. a Bachelor of Science in Nursing degree from an NLN-accredited program or Bachelor of Science degree in a related science (official transcripts from each school or college previously attended with degrees posted are required); a GPA of 3.00 or higher on a 4.00 scale is preferred; the average GPA for students admitted for the Class of 2013 was 3.56;
2. current licensure as a registered nurse in one of the 50 states; South Carolina licensure is required for matriculation;
3. GRE - a combined minimum verbal and quantitative score of 1000 of preferred; the average GRE for students admitted for the Class of 2013 was 518 verbal and 613 quantitative;
4. a minimum of one year full-time critical care nursing experience prior to the application deadline of May 1; clinical experience within the past three years is preferred and must be direct hands-on patient care in an intensive or critical care unit; alternate clinical experiences to substitute shall be evaluated upon request;
5. satisfactory completion and current documentation of Basic Life Support, Pediatric Advanced Life Support, and Advanced Cardiac Life Support;
6. letters of recommendation from two health care professionals familiar with the applicant's clinical experience; a letter from an immediate manager or supervisor is preferred;
7. a current resume.

Prerequisites must be met prior to an offer for interview. Admission is competitive and students are chosen on the basis of their academic record, employment history and performance, character, and general fitness for the study of nurse anesthesia. To be accepted, the applicant must interview and demonstrate evidence of good physical health, emotional stability, and personality considered necessary for successful performance as a nurse anesthetist. Applicants to the Master of Nurse Anesthesia program are recommended by an interview admissions
committee composed of faculty from the USC School of Medicine, clinical coordinators, and nurse anesthesia students.

Final decision for admission is made by program faculty in conjunction with the University of South Carolina Graduate School.

Application Information
Application deadline is May 1. Selected applicants will be scheduled for a personal interview with the admissions committee to be held in July and/or August of the year prior to the January orientation and start of the program in spring semester. Letters of appointment will be sent in August; these notified applicants are required to send a reply with their intentions concerning matriculation within two weeks of the letter of appointment. A $250 nonrefundable deposit must accompany the letter of acceptance. This deposit will be applied to the first-year clinical fees when the student matriculates. For further questions pertaining to a career in nurse anesthesia, please contact Winston King, clinical director of the USC/PRMH Graduate Program in Nurse Anesthesia, at 803-434-6344 or e-mail winston.king@uscmed.sc.edu.

For more detailed information on the application process and the Anesthesia program, visit our Web site at http://anesthesia.med.sc.edu.

Curriculum and Degree Requirements (64 Hours)
Integration of clinical training with coursework is a key feature of the program with students beginning supervised clinical experience in the first semester. A state-of-art simulation laboratory provides an interactive system to teach both psychomotor clinical skills and crisis resource management. The curriculum consists of a 27-month course of study including clinical training and didactic courses in physiology, pharmacology, principles of anesthesia, and others. To meet the criteria for graduation and to meet the requirements to write the Certification Exam from the Council on Certification, students participate in a minimum of 550 anesthesia cases covering a variety of clinical experiences, including general and regional anesthesiatics for pediatrics, obstetrics, geriatrics, cardiovascular-thoracic, neurological, plastic otolaryngology, ophthalmology, urology, orthopedics, and radiological procedures. The majority of clinical training occurs at PRH and GHSUMC, however clinical affiliations currently exist at several additional enrichment sites where students may rotate to gain more diverse clinical experience. Enrichment sites for PRH include Providence Hospital/Providence Heart Institute, Lexington Medical Center, Moncrief Army Hospital, Bon Secours St. Francis Hospital, Providence Northeast Hospital, Palmetto Health Baptist-Columbia, Kershaw County Medical Center, Anderson Area Medical Center, Oconee Memorial Hospital, Springs Hospital, and Conway Medical Center. Enrichment sites for GHSUMC include Cross Creek Surgery Center, Patewood Memorial Hospital, Patewood Outpatient Surgery Center, Hillcrest Memorial Hospital, and Greer Memorial Hospital.

Total Credit Hours 31-42

Self Evaluation Exam
Within the final 12 months of the program, all students complete the Self Evaluation Exam offered by the Council on Certification of Nurse Anesthetists. A minimum score of 350 on the SEE qualifies as satisfactory completion of the Comprehensive Exam.

Nursing Anesthesia, D.N.A.P.

Effective Summer 2020

The nurse anesthetist is a highly trained medical care specialist who, under the supervision of a physician, is responsible for the anesthesia requirements of patients in all areas of surgery. The nurse anesthetist develops, implements, and evaluates the anesthetic plan of care for individual patients and is a vital part of the health care team. The nurse anesthesia program at the University of South Carolina is an accredited program by the Council on Accreditation of Nurse Anesthesia Education Programs and prides itself on a very high graduation rate and excellent pass success on the certification exam. Through careful selection of applicants, quality instruction, and supportive environment, 95% of our admitted students succeed in completing the program and earning their Doctoral degree. All of the program graduates have passed the National Certification Examination of the Council on Certification of Nurse Anesthetists and have consistently scored at or above the national average. The first-time rate for passing the Certification Exam remains significantly above the national average. To date all graduates have found appropriate employment as Nurse Anesthetists.

The Doctorate of Nursing Practice program is a cooperative program between the School of Medicine Columbia and its clinical training partner institutions, Palmetto Health Richland (PHR) in Columbia, SC and Greenville Health System (GHS) in Greenville, SC. PHR began training nurse anesthetists in 1969 at the School of Nurse Anesthesia with involvement of School of Medicine (Columbia) faculty since 1986. A program leading to a Doctorate of Nursing Practice from University of South Carolina was accredited in 1993, and in 2010 GHS was approved as an additional required (primary) clinical site. Students may complete their entire educational program either in Columbia or Greenville sites, with didactic educational content shared by two-way synchronous interactive videoconferencing between Columbia and Greenville classrooms.

Learning Outcomes

- Integrate understanding of concepts in human anatomy, physiology, pathophysiology and pharmacology to clinical practice.
- Exhibit evidence of knowledge of all the indications, contraindications, pharmacokinetics and pharmacodynamics of currently available anesthetic agents and drugs.
- Utilize knowledge of the anesthetic related indications in the care of specialties such as neurosurgery, pediatrics, obstetrics, and cardiothoracic anesthesia.
Anesthesia:
The following courses are required in the Graduate Program in Nurse
Required Courses
of the The National Board of Certification and Recertification for Nurse
In addition to the below requirements, all students must maintain a RN
Spartanburg Regional Medical Center.
Center, Hillcrest Memorial Hospital, Greer Memorial Hospital and
Enrichment sites for GHSUMC include Cross Creek Surgery
Hospital, Lexington Medical Center, Bon Secours St. Francis Hospital,
diverse clinical experience. Enrichment sites for PRH include Providence
PHR and GHS, however clinical affiliations currently exist at several
radiological procedures. The majority of clinical training occurs at
PHR and GHS, however clinical affiliations currently exist at several
additional enrichment sites where students may rotate to gain more
diverse clinical experience. Enrichment sites for PRH include Providence
Hospital, Lexington Medical Center, Bon Secours St. Francis Hospital,
Palmetto Health Parkridge Hospital, Palmetto Health Baptist-Columbia,
Aiken Regional Medical Center, Anderson Area Medical Center, Oconee
Memorial Hospital, Orangeburg Regional Hospital, and Conway Medical
Center. Enrichment sites for GHSUMC include Cross Creek Surgery
Center, Patwood Memorial Hospital, Patwood Outpatient Surgery
Center, Hillcrest Memorial Hospital, Greer Memorial Hospital and
Spartanburg Regional Medical Center.

In addition to the below requirements, all students must maintain a RN
license in good standing, and ACLS, BLS, and PALS training must be
current at the time of graduation. Students must meet all the requirement
of the The National Board of Certification and Recertification for Nurse
Anesthetists (NBCRNA) to be eligible to take the Certification exam upon
graduation. These requirements can be found on the NBCRNA website.

Final decision for admission is made by program faculty in conjunction
with the University of South Carolina Graduate School.

Curriculum and Degree Requirements
(110 Hours)
Integration of clinical training with coursework is a key feature of the
program with students beginning supervised clinical experience in the third semester. A state-of-art simulation laboratory provides
an interactive system to teach both psychomotor clinical skills and
crisis resource management. The curriculum consists of a 36-month
course of study including clinical training and didactic courses in
physiology, pharmacology, principles of anesthesia, and others. To
meet the criteria for graduation and to meet the requirements to sit
for the Certification Exam from the Council on Certification, students
participate in a minimum of 600 anesthesia cases covering a variety of
clinical experiences, including general and regional anesthesias for
pediatrics, obstetrics, geriatrics, geriatrics, cardiovascular-thoracic, neurological, plastic otolaryngology, ophthalmology, urology, orthopedics, and
radiological procedures. The majority of clinical training occurs at
PHR and GHS, however clinical affiliations currently exist at several
addition enrichment sites where students may rotate to gain more
diverse clinical experience. In addition to the below requirements, all students must maintain a RN
license in good standing, and ACLS, BLS, and PALS training must be
current at the time of graduation. Students must meet all the requirement
of the The National Board of Certification and Recertification for Nurse
Anesthetists (NBCRNA) to be eligible to take the Certification exam upon
graduation. These requirements can be found on the NBCRNA website.

Admissions
Prerequisites must be met prior to an offer for an interview. Admission
is competitive and students are chosen on the basis of their academic
record, employment history and performance, character, and general
fitness for the study of nurse anesthesia. To be accepted, the applicant
must interview and demonstrate evidence of good physical health,
emotional stability, and personality considered necessary for successful
performance as a nurse anesthetist. Applicants to the Graduate Program
in Nurse Anesthesia are recommended by an interview admissions
committee composed of faculty from the USC School of Medicine, clinical
coordinators, and nurse anesthesia students.

Total Credit Hours 110-111

Physician Assistant Studies, MSPAS
The University of South Carolina School of Medicine (USCSOM)-Columbia
is the academic home of the Master's degree program for Physician
Assistant (PA) education. Students will earn a Master of Science in
Physician Assistant Studies, and graduates are prepared to become
practicing Physician Assistants, once they successfully graduate and
pass the national board certification exam (PANCE). Physician Assistants
(PAs) are needed to address the growing needs for primary care in South
Carolina and throughout the nation, especially in rural and underserved
areas. In addition, PAs are able to assist with medical and surgical
procedures in a cost-effective manner. The role of PAs is expanding
as the population ages, and there is an increased need for additional
healthcare providers. PA Programs are accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA).

The Master of Science in Physician Assistant Studies program is a collaboration with USCSOM’s clinical partners at Palmetto Health (PH) and the Dorn VA Medical Center (Dorn VAMC) in addition to numerous other healthcare organizations throughout the state. These clinical partners will be providing training in both eight core medical disciplines as well as providing several elective clinical rotation options in medical subspecialties.

**UofSC PA Program Competency List**

**Knowledge**

1. Possess medical knowledge to evaluate and manage medical and surgical conditions of patients of all ages.
2. Possess pharmacology knowledge to prescribe medications appropriately bearing in mind patient safety, cost, and potential for abuse.

**Interpersonal Skills**

1. Elicit an accurate and appropriate problem-focused or comprehensive medical history using appropriate patient-centered interpersonal communication (verbal and non-verbal).
2. Utilizing the clinical presentation and diagnostic testing results, provide clear, concise oral presentations to other healthcare professionals and document accurate patient notes and orders.
3. Professionally exhibit interprofessional teamwork to improve patient care.
4. Provide relevant education to patients and families including treatment, compliance, available resources, and activity/lifestyle modification.

**Clinical and Technical Skills**

1. Perform a problem-focused or comprehensive physical exam directly related to the medical history and be able to recognize normal and abnormal health states.
2. Practice strategies to improve patient safety and decrease medical errors in patient care.
3. Demonstrate entry-level proficiency for technical skills and clinical procedures common to primary care practice.

**Professional Behaviors**

1. Reflect cultural awareness through exposure to diverse patient populations.
2. Develop life-long learning skills by using evidence-based medicine strategies and staying current with clinical practice guidelines.
3. Demonstrate the attributes of professional and ethical behavior to include resiliency, flexibility, adaptability, altruism, and ability to overcome adversity when evaluating and managing patients.

**Clinical Reasoning and Problem Solving**

1. Order and interpret appropriate, cost-effective laboratory or diagnostic studies to determine the differential diagnosis.
2. Demonstrate clinical reasoning, critical thinking, and problem-solving to develop differential diagnoses and select the most likely diagnosis.

---

**Program Goals**

1. Enroll diverse and highly-qualified students who reflect the dynamic population of South Carolina and the nation.
2. Encourage life-long professional involvement, scholarly activity, leadership and service.
3. Maintain a level of first-time PANCE pass rates that meets or exceeds the national average.
4. Maintain an overall graduation rate of 94 percent (current Physician Assistant Education Association national average) or better for entering University of South Carolina Physician Assistant students.
5. Maintain an accredited program with an innovative curriculum that prepares entry-level graduates for the contemporary practice of medicine.

View and download the full version of the Physician Assistant Program Goals and Outcomes [here](https://sc.edu/study/colleges_schools/medicine/education/graduate_programs/physician_assistant/documents/PA_program_goals_2020_2.pdf).

**Admission Standards**

An applicant must have a baccalaureate degree from a regionally accredited college or university located within the United States. Undergraduate coursework should include:

<table>

Admission is determined by the PA Program Admissions Committee which consists of the PA Program Director, Medical Director and program faculty. Criteria examined include an appraisal of courses taken, grades achieved, letters of recommendation, research experience, scores on the GRE and the applicant’s personal narrative. Preference in admittance is given to SC residents, USC alumni and US veterans.

An overall GPA average and an overall science GPA of 3.00 or better is required for consideration of admittance. GRE scores of 300 or higher are considered competitive for program admittance.

**Application Information**

Inquiries concerning admission and requests for printed program information should be directed to:

University of South Carolina School of Medicine
Columbia Physician Assistant Program
Columbia, SC 29208
Telephone: 803-216-3950
email: paprogram@uscmed.sc.edu
Curriculum (114 Hours)

The Masters Degree Program for Physician Assistants is a 27-month medical model curricular plan (7 semesters) with 114 total credit hours. The 27-month curricular plan includes a strong basic science foundation in physiology, human gross anatomy and genetics with a systems-based instructional approach to clinical medicine which includes instruction in the pathophysiology of diseases, ordering and interpretation and of diagnostic studies, as well as pharmacological and nonpharmacological treatment options. The final 12 months of the program consists of clinical training under experienced preceptors. The required practicums are derived from those used for training medical students in these venues, with a strong focus on primary care training. There are also many elements associated with professional development for PAs and interprofessional interactions, as well as understanding population health, quality care, and using evidenced-based practices. Some of the foundational content will be taught with other health professional (graduate or medical) students to forge interprofessional team concepts. Many of the courses involve hands-on preparation for clinical practice, including clinical skills training and training in new technologies using the USCSOM Simulation Center and Ultrasound Institute.

Psychiatric Rehabilitation, Certificate

The Certificate of Graduate Study in Psychiatric Rehabilitation is an 18 credit-hour graduate certificate that is designed for post-bachelor's degree students and helping professionals who want to gain more knowledge and skills in working with individuals with severe mental illnesses. This program will give you the skills you need to provide superior client care.

The Certificate of Graduate Study in Psychiatric Rehabilitation is designed to meet the needs of students seeking a rehabilitation counseling or other related graduate degree, individuals seeking a specialty certificate (pre- or post-master’s), and non-degree seeking students needing courses in psychiatric or mental health areas for continuing education credit. Courses within the certificate program are appropriate for rehabilitation counselors; counselors; social workers; educational psychologists; marriage and family counselors; majors in psychology, public health, sociology, nursing, or education; or individuals pursuing vocational or personal interests in the area of psychiatric rehabilitation or mental health.

Program Goal

Students will be able to demonstrate specialized knowledge, skills, and values in working with individuals with psychiatric disabilities to help them achieve their personal, vocational, social, and independent living goals through counseling activity.

Student Learning Outcomes

- Students will demonstrate knowledge, skills, and values related to the recovery-focused philosophy of psychiatric rehabilitation.
- Students will be able to describe the nature, course, and impact of psychiatric disorders and co-occurring substance use disorders.
- Students will be able to design individualized rehabilitation strategies that enhance an individual’s ability to find and maintain satisfying employment.
- Students will be able to compare and contrast classroom-based learning of theory and principles to actual rehabilitation settings.

Admission Standards

Applicants to the Certificate of Graduate Study in Psychiatric Rehabilitation must have earned a baccalaureate degree from an accredited institution. Admissions decisions are made on the basis of an overall evaluation of the applicant’s preparation and ability to complete advanced study. Particular attention is paid to the applicant’s work experience, practice interests, leadership ability, and motivation. Appropriate supporting documentation for admissions include: GRE scores or MAT scores, transcripts of all undergraduate and graduate course work, written statement of goals for graduate study, work and volunteer experience, and references. Applications are made electronically through the Graduate School and, when all materials are received, are reviewed by the Rehabilitation Counseling/Psychiatric Rehabilitation program faculty.
Application Information

Certificate Requirements (18 Hours)

All course work is available on campus or online in distance education format. Students electing a distance education option must have a computer with Internet access and be willing to attend an orientation meeting on campus at the beginning of study. Periodic in-person meetings, if requested by the course instructor, are also required.

The Certificate of Graduate Study in Psychiatric Rehabilitation requires 18 graduate credit hours. The curriculum includes three (3) required classes, two (2) electives, and one (1) field study.

School of Music

Tayloe Harding, Dean

Clifford Leaman, Associate Dean and Director of Graduate Studies

With approximately 350 undergraduate and 150 graduate students, the School of Music is a comprehensive professional school that offers the Certificate of Graduate Study in Music Performance; the Master of Music degree in performance, composition, conducting, jazz studies, music history, opera theatre, or piano pedagogy; the Master of Music Education degree; the Doctor of Musical Arts degree in performance, composition, conducting, or piano pedagogy; and the Doctor of Philosophy degree in music education. The Master of Arts in Teaching is offered in conjunction with the College of Education.

The Certificate of Graduate Study and all master’s programs are available to applicants who have developed skills or knowledge in the major area beyond that expected of a typical undergraduate student. Both doctoral degrees are appropriate for those who desire to teach at the college level. The D.M.A. is a practice-oriented degree available to applicants who evidence not only exceptional abilities in the major area but well-developed musical intelligence and ongoing scholarly interest as well. The Ph.D. in music education is a research-oriented program, and applicants are expected to demonstrate a record of successful teaching experience in elementary or secondary schools, to offer evidence of academic excellence and ongoing scholarly inquiry, and to demonstrate the ability to conduct independent research. All master’s and doctoral programs require a comprehensive, functional knowledge of music history, music literature, and music theory. Specific requirements for graduate music programs, as well as the policies and procedures that govern those programs, can be found in the document Graduate Studies in Music, which is available online. To contact the music graduate office, please e-mail gradmusic@mozart.sc.edu or call 803-777-4106. The School of Music is accredited by the National Association of Schools of Music.

Music Education, M.M.Ed.

Learning Outcomes

- Candidates will be able to demonstrate masters-level ability to develop logical arguments and conclusions in written form, and base their positions on findings in relevant research literature.
- Candidates will be able to demonstrate masters-level knowledge of music history, music theory, and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
- Candidates will be able to demonstrate masters-level knowledge by identifying, describing, and comparing specific methods of teaching and predominant educational theories, and the uses of these approaches in the area of specialty (band, orchestra, choir, elementary, Pre-K/early childhood).

Admission

The general requirements for admission include the completion of an undergraduate degree in music education with a grade point average of 3.0 (4.0 scale) on relevant courses; valid teacher certificate; an interview; and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. A list of additional admission materials specific to this program is available on the School of Music website. Unless they have completed an undergraduate degree at an English-speaking institution, applicants whose native language is not English must submit a TOEFL score of at least 80 (internet-based score) or 570 (paper-based). Admission decisions are based upon the applicant’s total portfolio with particular weight being
given to knowledge of and experience in elementary or secondary music teaching, the audition (for those desiring to present a recital), or research/writing abilities (for those desiring to write a thesis).

Degree Requirements (32 Hours)

Prior to taking any graduate music study, all M.M.Ed. students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Degree candidates must complete a prescribed program of 32 hours of graduate work and successfully pass an oral comprehensive examination. In addition, candidates must complete a written thesis or present one full recital. Another option requires 35 hours but no thesis or recital.

Music Education, Ph.D.

Learning Outcomes

- Candidates will be able to identify, describe, and compare advanced elements of quantitative and qualitative research methods, including procedures for data collection, analysis and research design.
- Candidates will be able to identify and describe a pertinent research problem in music education, then develop and execute a research plan that includes a rationale, review of literature, methods for data collection, analysis, and interpretation of results, all of which will culminate in a completed dissertation.
- Candidates will be able to demonstrate doctoral-level knowledge of music history, music theory, and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
- Candidates will be able to identify, describe, and compare specific methods of teaching and predominant educational theories, as well as their use in modern music teaching settings.

Admission

The general requirements for admission are: a master’s degree in music education (or the equivalent); satisfactory score on the general section (verbal/quantitative/analytical) of the GRE or the Miller Analogies Test; master’s thesis or equivalent demonstration of the ability to undertake and complete significant, original scholarly work; evidence of successful full-time teaching at the elementary or secondary level (a minimum of three years and an expectation of five years); an interview; and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations preferably written on School of Music forms. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 100 (internet-based) or 600 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 7. Applicants for the Doctor of Music Arts degree in composition, conducting, or performance whose TOEFL score is below the minimum acceptable score will be considered on an individual basis for conditional admission. Such applicants must demonstrate exceptional abilities in the major area and evidence through past academic or professional activities strong promise for future professional success. Additional admission requirements for specific areas are listed online. Admission decisions are based upon the applicant’s total portfolio with particular weight being given to a record of successful music teaching at the elementary or secondary level and documented evidence of an ability to undertake and complete significant, independent research and writing.

Degree Requirements (60 Post-Master’s Hours)

Prior to taking any graduate music study, all doctoral students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies or courses resulting from the exam. Ph.D. students must be admitted to degree candidacy no later than the completion of the equivalent of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 60 credit hours of graduate work past the master’s degree. At least 18 of the credit hours must be completed as part of doctoral residency (18 approved credits taken within a span of three consecutive semesters, with at least one semester being spent in full-time study on the Columbia campus). Prior to the scheduling of the comprehensive examination, degree candidates must have satisfied the proficiency in research methods by successfully completing MUED 795, MUED 796, EDRM 710, and EDRM 711. Doctoral candidates in music education must also complete written comprehensive examinations in music education (and any minor area) as well as an oral comprehensive examination that covers music education, music history/literature, music theory, and any doctoral minor. In addition, degree candidates must complete a written dissertation. The final doctoral requirement is the successful oral defense of the dissertation.

three of which must be full-time study on the Columbia campus). The residency requirement for three consecutive semesters, with at least one semester being spent in part of doctoral residency (18 approved credits taken within a span of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 48 credit hours of graduate work past the master's degree. At least 18 of the credit hours must be completed as part of doctoral residency (18 approved credits taken within a span of three consecutive semesters, with at least one semester being spent in full-time study on the Columbia campus). The residency requirement for D.M.A. students in composition consists of a minimum of four full-time semesters of study on the Columbia campus, three of which must be consecutive. Prior to the scheduling of the comprehensive examination, degree candidates must have satisfied reading proficiency in a foreign language or completed an advisor-approved research course. Candidates for the D.M.A. must also complete written comprehensive examinations in the major area (and any minor area) as well as an oral comprehensive examination that covers the major area, music history/literature, music theory, and any doctoral minor. In addition, degree candidates must complete a dissertation or dissertation requirement, as follows: those in conducting or performance must present four full recitals and submit a research document; candidates in composition must complete a dissertation consisting of a musical work of major proportions and a research document; and candidates in piano pedagogy must complete a written dissertation or present two recitals and complete a written treatise. The final doctoral requirement is the successful oral defense of the dissertation or dissertation requirement.

**Admission**

Applicants must have earned an undergraduate degree (or the equivalent) in music performance, complete an on-campus audition (a recorded audition may be sufficient for consideration of provisional admission), and fulfill the general requirements for admission to The Graduate School, including the submission of three recommendations.

Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 100 (internet-based) or 600 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 5.5. The program requires the completion of at least 18 approved graduate credits in music. Specific program requirements are listed online.

**Certificate Requirements (18 Hours)**

Prior to taking any graduate music study, all doctoral students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Doctoral students must be admitted to degree candidacy no later than the completion of the equivalent of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 48 credit hours of graduate work past the master's degree. At least 18 of the credit hours must be completed as part of doctoral residency (18 approved credits taken within a span of three consecutive semesters, with at least one semester being spent in full-time study on the Columbia campus). The residency requirement for D.M.A. students in composition consists of a minimum of four full-time semesters of study on the Columbia campus, three of which must be
Performance is offered in selected areas. Admission decisions are based upon the applicant's total portfolio with particular weight being given to the audition (for those applying in the area of conducting, performance, or piano pedagogy).

Degree Requirements (48 Post-Masters Hours)

Prior to taking any graduate music study, all doctoral students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Doctoral students must be admitted to degree candidacy no later than the completion of the equivalent of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 48 credit hours of graduate work past the master's degree. At least 18 of the credit hours must be completed as part of doctoral residency (18 approved credits taken within a span of three consecutive semesters, with at least one semester being spent in full-time study on the Columbia campus). The residency requirement for D.M.A. students in composition consists of a minimum of four full-time semesters of study on the Columbia campus, three of which must be consecutive. Prior to the scheduling of the comprehensive examination, degree candidates must have satisfied reading proficiency in a foreign language or completed an advisor-approved research course. Candidates for the D.M.A. must also complete written comprehensive examinations in the major area (and any minor area) as well as an oral comprehensive examination that covers the major area, music history/literature, music theory, and any doctoral minor. In addition, degree candidates must complete a dissertation or dissertation requirement, as follows: those in conducting or performance must present four full recitals and submit a research document; candidates in piano pedagogy must complete a research document; and candidates in composition must complete a thesis consisting of a musical work of major proportions and a research document; and candidates in music history or music theory must complete a written thesis; and candidates in musicology must complete a written dissertation or present two recitals and complete a written research document; and candidates in piano pedagogy must complete a research document; and candidates in composition must complete a thesis consisting of a musical work of major proportions and a research document; and candidates in musicology must complete a written dissertation or present two recitals and complete a written research document; and candidates in music history or music theory must complete a written thesis; and candidates in musicology must complete a written dissertation or present two recitals and complete a written research document; and candidates in musicology must complete a written dissertation.

Degree Requirements (32 Hours)

Prior to taking any graduate music study, all master's students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Degree candidates must complete a prescribed program of 32 hours of graduate work and successfully pass an oral comprehensive examination. In addition, candidates in conducting or performance must present one full recital, and guitarists must also perform a concerto. The minimum acceptable score on the TOEFL is 80 (internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5. Applicants for the Master of Music degree whose TOEFL/IELTS score is below the normal minimum standard will be considered on an individual basis for conditional admission. Such applicants must demonstrate exceptional abilities in the major area and evidence through past academic or professional activities strong promise for future professional success. Admission decisions are based upon the applicant's total application portfolio.

Music Performance, M.M.

Learning Outcomes

• Candidates will demonstrate the ability to perform musical works representative of a wide array of music styles and genres, and do so in a manner commensurate with masters-degree level musicianship.
• Candidates will be able to demonstrate masters-level knowledge of music history, music theory, and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
• Candidates will be able to demonstrate masters-level knowledge of their primary instrument or voice (including instrument history, repertoire, notable composers, and renowned pedagogues) by identifying, describing, comparing, and contrasting these elements in relation to contemporary practice.

Admission

The general requirements for admission include the completion of an undergraduate degree in music (or the equivalent) with a grade point average of 3.0 (4.0 scale) on relevant courses, demonstration of excellent music performance skills through audition, and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. A list of additional admission materials specific to this program is available on the School of Music website. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. Normally, the minimum acceptable score on the TOEFL is 80 (internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5. Applicants for the Master of Music degree whose TOEFL/IELTS score is below the normal minimum standard will be considered on an individual basis for conditional admission. Such applicants must demonstrate exceptional abilities in the major area and evidence through past academic or professional activities strong promise for future professional success. Admission decisions are based upon the applicant's total application portfolio.

Music, D.M.A., Composition

**Learning Outcomes**

- Candidates will create original works of significant duration and scope, reflective of doctoral-level compositional ability.
- Candidates will be able to demonstrate doctoral-level knowledge of music history, music theory, and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
- Candidates will demonstrate mastery of skills need to generate, write, and produce original research suitable for publication in their area of specialty.

**Admission**

The general requirements for admission are: completion of a master's degree in music (or the equivalent); evidence of an ability to pursue doctoral study in the desired area (see information online); and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. Normally, the minimum acceptable score on the TOEFL is 100 (internet-based test) or 600 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 7. Additional admission requirements for specific areas are listed online. The D.M.A. in Performance is offered in selected areas. Admission decisions are based upon the applicant's total portfolio with particular weight being given to composing experience.

**Degree Requirements (48 Post-Masters Hours)**

Prior to taking any graduate music study, all doctoral students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Doctoral students must be admitted to degree candidacy no later than the completion of the equivalent of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 48 credit hours of graduate work past the master's degree. At least 18 of the credit hours must be completed as part of doctoral residency (18 approved credits taken within a span of three consecutive semesters, with at least one semester being spent in full-time study on the Columbia campus). The residency requirement for D.M.A. students in composition consists of a minimum of four full-time semesters of study on the Columbia campus, three of which must be consecutive. Prior to the scheduling of the comprehensive examination, degree candidates must have satisfied reading proficiency in a foreign language or completed an advisor-approved research course. Candidates for the D.M.A. must also complete written comprehensive examinations in the major area (and any minor area) as well as an oral comprehensive examination that covers the major area, music history/literature, music theory, and any doctoral minor. In addition, degree candidates must complete a dissertation or dissertation requirement, as follows: those in conducting or performance must present four full recitals and submit a research document; candidates in composition must complete a dissertation consisting of a musical work of major proportions and a research document; and candidates in piano pedagogy must complete...
a written dissertation or present two recitals and complete a written treatise. The final doctoral requirement is the successful oral defense of the dissertation or dissertation requirement.

### Music, D.M.A., Conducting

#### Learning Outcomes

- Candidates will demonstrate ability to conduct ensembles performing a wide array of musical styles reflective of doctoral-level work.
- Candidates will be able to demonstrate doctoral-level knowledge of music history, music theory, and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
- Candidates will demonstrate understanding of research methods and scholarly writing.

#### Admission

The general requirements for admission are: completion of master’s degree in music (or the equivalent); evidence of an ability to pursue doctoral study in the desired area (see information online); and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. Normally, the minimum acceptable score on the TOEFL is 100 (internet-based) or 600 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 7. Additional admission requirements for specific areas are listed online. The D.M.A. in Performance is offered in selected areas. Admission decisions are based upon the applicant’s total portfolio with particular weight being given to the audition (for those applying in the area of conducting, performance, or piano pedagogy).

### Degree Requirements (48 Post-Masters Hours)

Prior to taking any graduate music study, all doctoral students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Doctoral students must be admitted to degree candidacy no later than the completion of the equivalent of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 48 credit hours of graduate work past the master’s degree. The residency requirement for D.M.A. students in composition consists of a minimum of four full-time semesters of study on the Columbia campus, three of which must be consecutive. Prior to the scheduling of the comprehensive examination, degree candidates must have satisfied reading proficiency in a foreign language or completed an advisor-approved research course. Candidates for the D.M.A. must also complete written comprehensive examinations in the major area (and any minor area) as well as an oral comprehensive examination that covers the major area, music history/literature, music theory, and any doctoral minor. In addition, degree candidates must complete a dissertation or dissertation requirement, as follows: those in conducting or performance must present four full recitals and submit a research document; candidates in composition must complete a dissertation consisting of a musical work of major proportions and a research document; and candidates in piano pedagogy must complete a written dissertation or present two recitals and complete a written treatise. The final doctoral requirement is the successful oral defense of the dissertation or dissertation requirement.

### Admission

The general requirements for admission are: completion of master's degree in music (or the equivalent); evidence of an ability to pursue doctoral study in the desired area (see information online); and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. Normally, the minimum acceptable score on the TOEFL is 100 (internet-based) or 600 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 7. Additional admission requirements for specific areas are listed online. The D.M.A. in Performance is offered in selected areas. Admission decisions are based upon the applicant's total portfolio with particular weight being given to the audition (for those applying in the area of conducting, performance, or piano pedagogy).

### Degree Requirements (48 Post-Masters Hours)

Prior to taking any graduate music study, all doctoral students must take the Graduate Music Diagnostic Examination and, early in their studies, complete all deficiencies and required courses resulting from the exam. Doctoral students must be admitted to degree candidacy no later than the completion of the equivalent of two semesters of full-time study (12 credits total for graduate assistants and 18 credits total for others) and must complete a minimum of 48 credit hours of graduate work past the master's degree. At least 18 of the credit hours must be completed as part of doctoral residency (18 approved credits taken within a span of three consecutive semesters, with at least one semester being spent in full-time study on the Columbia campus). The residency requirement for D.M.A. students in composition consists of a minimum of four full-time semesters of study on the Columbia campus, three of which must be consecutive. Prior to the scheduling of the comprehensive examination,
Music, M.M. (Composition Concentration)

Learning Outcomes

- Candidates will demonstrate compositional ability of significant duration and scope.
- Candidates will be able to demonstrate masters-level knowledge of music history, music theory, and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
- Candidates will be able to demonstrate masters-level knowledge of compositional techniques by identifying, describing, comparing, and contrasting specific methods of composition and their uses in musical works from the Antiquity through modern times.

Admission

The general requirements for admission include the completion of an undergraduate degree in music (or the equivalent) with a grade point average of 3.0 (4.0 scale) on relevant courses and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. The Master of Music with concentration in Music Theory requires submission of a satisfactory score on the Graduate Record Examination General Test or the Miller Analogies Test. A list of additional admission materials specific to each degree program is available on the School of Music website. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. Normally, the minimum acceptable score on the TOEFL is 80 (internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5. Applicants for the Master of Music degree whose TOEFL/IELTS score is below the normal minimum standard will be considered on an individual basis for conditional admission. Such applicants must demonstrate exceptional abilities in the major area and evidence through past academic or professional activities strong promise for future professional success. Admission decisions are based upon the applicant’s total application portfolio.

Degree Requirements (32 Hours)

Master of Music with concentrations in composition, conducting, jazz studies, music history, music theory, opera theatre, and piano pedagogy

Prior to taking any graduate music study, all master’s students must take the Graduate Music Diagnostic Examination, and, early in their studies, complete all deficiencies and required courses resulting from the exam. Degree candidates must complete a prescribed program of 32 hours of graduate work and successfully pass an oral comprehensive examination. In addition, candidates in conducting or performance must present one full recital, and those whose performance medium is an orchestral instrument must also perform a concerto; candidates in composition must complete a thesis consisting of a musical work of major proportions; candidates in music history or music theory must complete a written thesis; and candidates in piano pedagogy must present a solo recital or complete a written thesis. Specific program requirements are listed online.

Music, M.M. (Music History Concentration)

Learning Outcomes

- Candidates will demonstrate mastery of skills need to generate, write, and produce original research reflective of masters-level work in music history.
- Candidates will be able to demonstrate masters-level knowledge of music theory and compositional styles by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.
- Candidates will be able to demonstrate masters-level knowledge of music history by identifying, describing, comparing, and contrasting musical works from the Antiquity through modern times.

Admission

The general requirements for admission include the completion of an undergraduate degree in music (or the equivalent) with a grade point average of 3.0 (4.0 scale) on relevant courses and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. The Master of Music with concentration in Music History requires submission of a satisfactory score on the Graduate Record Examination General Test or the Miller Analogies Test. A list of additional admission materials specific to each degree program is available on the School of Music website. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. Normally, the minimum acceptable score on the TOEFL is 80 (internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5. Applicants for the Master of Music degree whose TOEFL/IELTS score is below the normal minimum standard will be considered on an individual basis for conditional admission. Such applicants must demonstrate exceptional abilities in the major area and evidence through past academic or professional activities strong promise for future professional success. Admission decisions are based upon the applicant’s total application portfolio.

Degree Requirements (32 Hours)

Master of Music with concentrations in composition, conducting, jazz studies, music history, music theory, opera theatre, and piano pedagogy.

Prior to taking any graduate music study, all master's students must take the Graduate Music Diagnostic Examination, and, early in their studies, complete all deficiencies and required courses resulting from the exam. Degree candidates must complete a prescribed program of 32 hours of graduate work and successfully pass an oral comprehensive examination. Reading proficiency in at least one foreign language (French, German, or Italian) is required for the Master of Music degree with concentrations in Music History and Opera Theatre (see the respective degree requirements). This proficiency, which must be demonstrated prior to registration for thesis credit or the comprehensive exam, may be satisfied by earning a grade of “S” in a foreign language reading course (e.g., GERM 615) or by successfully completing an examination given by the appropriate USC foreign language faculty. In addition, candidates in conducting or performance must present one full recital, and those whose performance medium is an orchestral instrument must also perform a concerto; candidates in composition must complete a thesis consisting of a musical work of major proportions; candidates in music history or music theory must complete a written thesis; and candidates in piano pedagogy must present a solo recital or complete a written thesis. Specific program requirements are listed in the Academic Bulletin.

Degree Requirements (32 Hours)
Master of Music with concentrations in composition, conducting, jazz studies, music history, music theory, opera theatre, and piano pedagogy.

Prior to taking any graduate music study, all master’s students must take the Graduate Music Diagnostic Examination, and, early in their studies, complete all deficiencies and required courses resulting from the exam. Degree candidates must complete a prescribed program of 32 hours of graduate work and successfully pass an oral comprehensive examination. In addition, candidates in conducting or performance must present one full recital, and those whose performance medium is an orchestral instrument must also perform a concerto; candidates in composition must complete a thesis consisting of a musical work of major proportions; candidates in music history or music theory must complete a written thesis; and candidates in piano pedagogy must present a solo recital or complete a written thesis. Specific program requirements are listed online.

Music, M.M. (Violin/Viola Pedagogy Concentration)
Admission
The general requirements for admission are the following: completion of an undergraduate degree in music (or the equivalent) with a grade point average of 3.0 (on a 4.0 scale) on relevant courses, strong violin performance skills as evidenced through an audition, and fulfillment of the general requirements for admission to The Graduate School, including the submission of three recommendations. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 80 (internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5. Applicants whose scores fall below the published minimum must demonstrate exceptional abilities in the major area and evidence of past academic or professional activities strong promise for future professional success in order to be admitted. Admission decisions are based upon the applicant’s total application portfolio.

Degree Requirements (32 Hours)
Prior to taking any graduate music study, all master’s students must take the Graduate Music Diagnostic Examination, and, early in their studies, complete all deficiencies and required courses resulting from the exam. Degree candidates must complete a prescribed program of 32 hours of graduate work and successfully pass an oral comprehensive examination. In addition, candidates in violin/viola pedagogy must complete a final project. Specific program requirements are listed online. Candidates must begin matriculation in Fall semester.

College of Nursing
Jeannette O. Andrews, Dean
Alicia K. Ribar, Associate Dean for Academics and Graduate Director
Karen Worthy, Assistant Dean for Undergraduate Studies
Robin Dail, Associate Dean for Faculty Affairs
Bernardine Pinto, Associate Dean for Research
Coretta M. Jenerette, Associate Dean for Diversity, Equity, and Inclusivity
Joy P. Deupree, Associate Dean for Practice and Strategic Partnerships

The College of Nursing offers the degrees of Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP), and the PhD in Nursing Science. Post-Master Certificates of Graduate Study (CGS) in Advanced
Practice Nursing and in Nursing Administration and Nursing Informatics are available.

The master’s degree programs in nursing and Doctor of Nursing Practice program at The University of South Carolina are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).

Courses are offered through various distance education formats as well as on the Columbia campus. A computer with broadband Internet capability is required.

The frequency with which courses are offered will depend upon projected enrollments and faculty availability. Students and prospective students should meet with an advisor for the respective program to project a curriculum plan of study.

Graduate students in other divisions of the University may enroll in nonclinical courses in the College of Nursing (CON) with the approval of the graduate director of the college and the consent of the course professor.

**General Admission Requirements**

Regulations governing admission to graduate study in nursing include those established by both The Graduate School and the College of Nursing. Applicants must complete an application to The Graduate School and a College of Nursing supplement. Specific requirements for admission to each of the academic programs in nursing are listed below in that program’s section.

Admission Deadlines are as follows:

- PhD priority admission: February 15
- Fall admissions: March 1
- Spring admissions: August 1
- Summer admissions: October 31

**Financial Aid**

Applicants requiring financial assistance should review additional information about financial aid provided on The Graduate School’s Web site.

Information about financial aid opportunities is shared with all students via the CON website and announcements from the CON Office of Student Affairs. Federal loan and scholarship opportunities as well as private scholarships are a few of the financial aid offerings available for graduate students in the CON after admission.

**General Requirements**

Residence, credit transfer, length of time allowed to complete the program, and other general requirements for graduate degrees in nursing are the same as those established by The Graduate School, except where otherwise noted. CGS students are expected to complete their programs of study in 3 years or fewer; MSN and Post-MSN DNP students are expected to complete their programs of study in 4 years or fewer; Post-BSN DNP students are expected to complete their program of study in 6 years or fewer; and PhD students are expected to complete their program of study in 10 years or fewer.

Current authorization to practice as SC Registered Nurse or possession of an unencumbered license in the state in which clinical practice will occur is required for all graduate clinical courses. The RN license must be issued on the basis of the National Council Licensure Examination (NCLEX-RN® exam). Full-time students (9 credit hours or more), graduate assistants, and international students are required to carry health insurance coverage and will be automatically enrolled in the University Plan unless comparable alternative health insurance coverage is on file in the Health Insurance Assistance Office at the Thomson Student Health Center. Part-time students are encouraged to carry health insurance throughout the course of their studies and all students must carry professional liability insurance through the College of Nursing, purchased each semester in conjunction with direct or indirect clinical courses at a cost of approximately $50 per course. Maintenance of current CPR certification by the American Heart Association (BLS) is required for enrollment in clinical courses.

In addition to meeting the health requirements of the University, students enrolled in direct or indirect clinical nursing courses are required to provide evidence of meeting contractual health requirements and must pass a drug screen and background check. Information on all clinical requirements is available in the College of Nursing Office of Academic Affairs. Maintenance of clinical requirements via CastleBranch is mandatory for enrollment in clinical courses.

**Academic Progression and Dismissal Policy**

The College of Nursing abides by the same probation policies outlined by the Graduate School at the University of South Carolina. Additionally, other detailed requirement for progression and academic standing/dismissal are outlined in the College of Nursing Graduate Student program specific handbooks here (https://www.sc.edu/study/colleges_schools/nursing/internal/current_students/).

**Progression in Thesis or Dissertation Work**

Satisfactory progress in thesis, DNP project, or PhD dissertation work results in a grade of T; unsatisfactory progress results in a grade of U. The accumulation of two U grades in NURS 799, NURS 897, or NURS 899, regardless of credit hours enrolled, is grounds for dismissal from the program.

**Programs**

- Adult Gerontology-Acute Care Nurse Practitioner, M.S.N.
- Advanced Practice Nursing, Certificate
- Family Nurse Practitioner, M.S.N.
- Master’s Entry to Practice, M.S.N.
- Nursing Administration, Certificate
- Nursing Administration, M.S.N.
- Nursing Informatics, Certificate
- Nursing Informatics, M.S.N.
- Nursing Practice, D.N.P.
- Nursing Science, Ph.D.
- Psychiatric Mental Health Nurse Practitioner, M.S.N.
Adult Gerontology-Acute Care Nurse Practitioner, M.S.N.

The Adult Gerontology Acute Care Nurse Practitioner program (AGACNP) prepares registered nurses to provide direct patient management in acute and complex care settings. Graduates are employed in a variety of acute care settings ranging from critical care, trauma, cardiology, pulmonary, nephrology, gastroenterology, and surgery.

This curriculum prepares nurses to sit for national certification as an Adult-Gerontology Acute Care Nurse Practitioner.

Learning Outcomes

• Apply theoretical knowledge to the practice of advanced nursing roles.
• Utilize evidence to address population health problems.
• Demonstrate professionalism at the advanced nursing level in the clinical setting.
• Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements for Earning the M.S.N.

Degree Include the Following

1. Completion of an approved program of study;
2. Completion of an applied research course, NURS 791, or a thesis, NURS 799;
3. A GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. A GPA of 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. Passing a comprehensive assessment during the last semester of the program.

Advanced Practice Nursing, Certificate

The Certificate of Graduate Study in Advanced Practice Nursing (nurse practitioner) is restricted to students who hold a master's degree in nursing. The program of study is designed to augment the student's prior graduate study through advanced practice preparation in one of three emphasis areas: Family Nurse Practitioner, Adult Gerontological Acute Care Nurse Practitioner or Psychiatric Mental Health Nurse Practitioner.

Students who complete the program of study are eligible to apply to take a national certification examination in the applicable nurse practitioner specialty area.

Learning Outcomes

• Demonstrate professionalism at the advanced nursing level in the clinical setting.
• Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Entry Options

The Advanced Practice Nursing, Certificate program offers two entry points for students:

1. M.S.N. certified and practicing as an APRN (please note after admission a GAP analysis will be done to determine specific plan of study based on the National Organization of Nurse Practitioner Faculties LACE components).
2. M.S.N. not certified as Advanced Practice Nurses

Requirements for earning the Certificate include:

1. Completion of an approved program of study;
2. A GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
3. A GPA of a 3.00 (on a 4.00 scale) on all courses on the approved program of study
4. Minimum 18 Hours for students already certified for advanced practice nursing who need to obtain additional certification.

Course Requirements

All Advanced Practice Nursing, CGS students will take the following courses* and one of the following concentration areas (Total APRN Core 14 credit hours)
<table>

### Family Nurse Practitioner, M.S.N.

The Family Nurse Practitioner program (FNP) program prepares registered nurses to provide direct patient management in primary care across many settings. Graduates are employed in a variety of primary care settings ranging from emergency departments, federally qualified health centers, urban and rural family practice/primary care practices.

This curriculum prepares nurses to sit for national certification as Family Nurse Practitioner.

**Learning Outcomes**

- Apply theoretical knowledge to the practice of advanced nursing roles.
- Utilize evidence to address population health problems.
- Demonstrate professionalism at the advanced nursing level in the clinical setting.
- Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

**Requirements for Earning the M.S.N. Degree Include the Following**

1. Completion of an approved program of study;
2. Completion of an applied research course, NURS 791 (3), or a thesis, NURS 799 (6);
3. A GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. A GPA of 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. Passing a comprehensive assessment during the last semester of the program.

Master's Entry to Practice, M.S.N.

The Master's Entry to Practice (MEPN) program is an entry into practice master’s degree that provides students with a previously earned bachelor's degree the opportunity to gain education and experience as a direct care provider of nursing in a variety of settings. The degree also provides an advantage to adult learners choosing nursing as a second career allowing them to become a nurse in a shorter amount of time and to earn a higher degree as opposed to a second baccalaureate degree.

Graduates of this program are eligible to apply to sit for the National Council Licensure Examination (NCLEX-RN), examination in order to obtain a registered nurse license.

Learning Outcomes

- Apply theoretical knowledge to the practice of advanced nursing roles.
- Utilize evidence to address population health problems.
- Demonstrate professionalism at the advanced nursing level in the clinical setting.
- Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements for Earning the M.S.N. Degree Include the Following:
1. Completion of an approved program of study;
2. Completion of an applied research course, NURS 791;
3. A GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. A GPA of 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. Passing a comprehensive assessment during the last semester of the program.

Nursing Administration, Certificate

The Certificate of Graduate Study in Nursing Administration is for students who hold a master’s degree in nursing and choose to pursue additional knowledge in the area of nursing administration. The program’s curriculum is designed to prepare professional nurses to enter leadership roles and work within interdisciplinary teams to improve system and population health services in a variety of health care settings.
Graduates of the program may be eligible to sit for certification examination as a nurse manager or nurse executive.

Learning Outcomes

- Demonstrate professionalism at the advanced nursing level in the clinical setting.
- Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements for Earning the Certificate Include the Following

- Completion of an approved program of study;
- a GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
- a GPA of 3.00 (on a 4.00 scale) on all courses on the approved program of study

Nursing Administration, M.S.N.

The program's curriculum is designed to prepare professional nurses to enter leadership roles and work within interdisciplinary teams to improve system and population health services in a variety of health care settings.

Graduates of the program may be eligible to sit for certification examination as a nurse manager or nurse executive.

Learning Outcomes

At the conclusion of the program, the master's graduate will be able to:

- Apply theoretical knowledge to the practice of advanced nursing roles.
- Utilize evidence to address population health problems.
- Demonstrate professionalism at the advanced nursing level in the clinical setting.
- Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements for Earning the M.S.N. Degree Include the Following

1. Completion of an approved program of study;
2. Completion of an applied research course, NURS 791 (3), or a thesis, NURS 799 (6);
3. A GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. A GPA of a 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. Passing a comprehensive assessment during the last semester of the program.

Nursing Informatics, Certificate

The Certificate of Graduate Study in Nursing Informatics (N.I.) is for students who hold a master’s degree in nursing and seek additional preparation in the management of information and technology to improve health care quality, patient safety, efficiency, and patient outcomes.

Nursing informatics integrates nursing science, computer science, and informatics science to manage and communicate data, information, knowledge and wisdom in nursing practice. Graduates of the program may be eligible to sit for certification examination in nursing informatics.

Learning Outcomes

- Demonstrate professionalism at the advanced nursing level in the clinical setting.
- Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.
Requirements for Earning the Certificate
Include the Following
• completion of an approved program of study;
• a GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
• a GPA of a 3.00 (on a 4.00 scale) on all courses on the approved program of study

Nursing Informatics, M.S.N.
The Masters in Nursing Informatics (N.I.) prepares nurses in the management of information and technology to improve health care quality, patient safety, efficiency, and patient outcomes. Nursing informatics integrates nursing science, computer science, and informatics science to manage and communicate data, information, knowledge, and wisdom in nursing practice. Graduates of the program may be eligible to sit for certification examination in nursing informatics.

Learning Outcomes
• Apply theoretical knowledge to the practice of advanced nursing roles.
• Utilize evidence to address population health problems.
• Demonstrate professionalism at the advanced nursing level in the clinical setting.
• Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements
1. Completion of an approved program of study;
2. Completion of an applied research course, NURS 791 (3), or a thesis, NURS 799 (6);
3. A GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. A GPA of a 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. Passing a comprehensive assessment during the last semester of the program.

Total Credit Hours 33-36

Nursing Practice, D.N.P.
Objectives
The Doctor of Nursing Practice D.N.P. is a practice degree designed to prepare nurses as clinical practitioners/scholars to assume advanced practice clinical and leadership roles. The D.N.P. program has two entry points, depending upon prior educational experience. The curricular plan is designed for the student who has a B.S.N. or a master’s degree in nursing. The curriculum consists of course work equivalent to that of a master’s degree in nursing plus additional course work (beyond the master’s degree requirements) that extends the leadership skills and provides preparation for a variety of leadership roles in the health care arena.

Doctor of Nursing Practice graduates may be eligible to apply to take national certification examinations in at least one area of advanced practice or leadership areas based on major concentration.

Learning Outcomes
1. Identify direct and indirect clinical problems in complex health settings and work with interprofessional teams to address them.
2. Differentiate theoretical knowledge as it applies to direct or indirect clinical care.
3. Translate evidence to address population health problems.
4. Integrate data bases and information literacy in designing interventions for advanced practice.
5. Execute evidence-based interventions to improve health care outcomes.

Entry Options
The DNP program offers two entry points for students:
B.S.N. entry- a bachelor of science in nursing degree from a program that is nationally accredited;
M.S.N. entry- a bachelor of science in nursing degree and a master’s in nursing degree from nationally accredited programs.
Requirements for Earning the D.N.P. Degree Include

1. Doctoral residency of at least 18 graduate credit hours for three consecutive major semesters. Enrollment in a summer term is not required to maintain continuity, but credits earned during summer terms (including May session) will count toward the 18 hours required for Residency. The residency requirement may be met only after admission to the D.N.P. program;
2. Completion of an approved program of study;
3. Comprehensive assessment through defense of project proposal;
4. Completion of a research utilization / evidence-based practice project and oral defense.

Course Requirements

All DNP students will take the following courses and one of the following concentration areas (Total DNP Core 27 credits hours):

<table>

Nursing Science, Ph.D.

The Ph.D. degree is designed to prepare graduates for a lifetime of intellectual inquiry through creative scholarship and research. Students in this doctoral program acquire the knowledge and skills to conduct research that will contribute to furthering nursing science, practice, education, and administration.

Learning Outcomes

1. Utilize a biobehavioral scientific approach in collaboration with an interdisciplinary team in advancing knowledge to improve health for diverse populations.

2. Demonstrate, through the comprehensive examination, an understanding of the history, theory, and philosophy of science that serve as a foundation for a substantive research area.

3. Generate and communicate new knowledge to public and professional audiences to advance nursing and health.

4. Demonstrate conceptual, methodological, analytical and dissemination skills to advance nursing science within the context of planning, implementing, and evaluating research aimed at improving health and healthcare.

5. Incorporate, through program deliverables and the dissertation proposal, concepts of diversity and inclusion in research, advocacy, and policy to promote health equity.

Admission

The Ph.D. program offers four entry points for students:

- B.S.N. entry - a Bachelor of Science in nursing degree from a program that is nationally accredited (Total 75 credit hours);
- M.S.N. entry - a Bachelor of Science in nursing degree and a master’s in nursing degree from nationally accredited programs (Total 57 credit hours);
• non-M.S.N. master’s entry-a Bachelor of Science in nursing degree from a nationally accredited program and a master’s degree in another discipline (Total minimum 57 credit hours);
• D.N.P. entry - a Doctor of Nursing practice degree from a nationally accredited program (Total 39 credit hours).

Requirements for earning the Ph.D. degree include:

1. doctoral residency of at least 18 graduate credit hours for three consecutive major semesters. Enrollment in a summer term is not required to maintain continuity, but credits earned during summer terms (including May session) will count toward the 18 hours required for residency. The residency requirement may be met only after admission to the PhD program;
2. completion of an approved program of study totaling not less than 39 credits for D.N.P. entry options (at least 30 credits must be earned at the University of South Carolina); not less than 57 credit hours for master’s entry options and not less than 75 credit hours for B.S.N. entry option;
3. completion of the admission-to-candidacy examination at least one full academic year prior to the date on which the degree is to be granted;
4. completion of a foreign language and/or research methods requirement, met through a reading knowledge of a foreign language or competency in statistics/research methods specific to the student’s proposed course of study;
5. completion of a mentored research experience under the supervision of College of Nursing faculty (NURS 898);
6. completion of a comprehensive examination taken after admission to candidacy and completion of all course requirements except those courses in which the student is currently enrolled;
7. completion of an oral defense of a doctoral dissertation.

Course Requirements

Select a minimum of 15 hours of elective courses as required by advisement of Program of Study committee

Total Credit Hours 18

1 B.S.N. entry students need to complete 18 credit hours of master’s level courses which may be from one of the existing nursing majors or emphasis areas or in an individualized program of study. Typically, enrollment in the master’s courses occurs before enrollment in the Ph.D. core courses and includes courses in nursing theory, research methods and entry level statistics.
2 non-M.S.N. master’s entry students who do not have beginning level graduate courses in nursing theory, research, or statistics equivalent to those required in the UofSC College of Nursing Master of Science in Nursing degree program will need to complete these courses prior to beginning the Ph.D. core courses.

Psychiatric Mental Health Nurse Practitioner, M.S.N.

The Psychiatric Mental Health Nurse Practitioner (PMHNP) program is designed to prepare graduates to provide holistic, mental health care integrating neuroscientific principles of behavior, experience and psychopharmacology with psychotherapy, consultation and trauma-related care across the lifespan. The PMHNP will be prepared to practice in diverse settings including nurse-managed clinics, inpatient psychiatric facilities, home health, private psychiatric practices, addiction centers, general ambulatory clinics and schools.

This curriculum prepares nurses to sit for national certification as Psychiatric Mental Health Nurse Practitioner.

Learning Outcomes

• Apply theoretical knowledge to the practice of advanced nursing roles.
• Utilize evidence to address population health problems.
• Demonstrate professionalism at the advanced nursing level in the clinical setting.
• Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements for Earning the M.S.N. Degree Include the Following

1. completion of an approved program of study;
2. completion of an applied research course, NURS 791 (3), or a thesis, NURS 799 (6);
3. a GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. a GPA of 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. and passing a comprehensive assessment during the last semester of the program.
Course Requirements

Total program 47-50 credit hours.

College of Pharmacy

The University of South Carolina College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education and the Southern Association of Colleges and Schools.

The College of Pharmacy offers the M.S. and Ph.D. degrees in pharmaceutical sciences and is composed of two Departments. The Department of Drug Discovery and Biomedical Sciences (http://www.sc.edu/study/colleges_schools/pharmacy/departments/drug_discovery_and_biomedical_sciences/) offers advanced degrees with specialization in the areas of medicinal chemistry, pharmaceutics, and pharmacology. The Department of Clinical Pharmacy and Outcomes Sciences (http://www.sc.edu/study/colleges_schools/pharmacy/departments/clinical_pharmacy_and_outcomes_sciences/) offers advanced degrees with specialization in the area of Pharmacy Administration.

A graduate admissions committee reviews all applicants to the M.S. and Ph.D. programs. Review of complete applications begins by March 1st. The application deadline is April 15th. Preference will be given to applicants with a minimum overall grade point average equivalent of 3.0 on a 4.0 scale, and minimum GRE score of 294 (verbal and quantitative sections combined) and a 4 on the analytical section. Applicants whose native language is not English are also required to submit a satisfactory score on an approved test of English language proficiency.

For advanced degrees in the disciplines of medicinal chemistry, pharmaceutics, or pharmacology, an undergraduate degree in pharmacy or in related physical sciences, such as chemistry, biochemistry, or biology, is recommended. For advanced degrees in pharmacy administration, an undergraduate or professional degree in pharmacy or a health-related discipline is recommended. Requests for information regarding programs, policies, and the admission process can be submitted electronically via the website of the University of South Carolina at http://www.gradschool.sc.edu/ (http://www.gradschool.sc.edu/).

Programs

- Pharmaceutical Sciences, M.S.
- Pharmaceutical Sciences, Ph.D.

Pharmaceutical Sciences, M.S.

The University of South Carolina College of Pharmacy offers the MS in Pharmaceutical Sciences with an emphasis in either:

- Drug Discovery and Biomedical Sciences through the Department of Drug Discovery and Biomedical Sciences (DDBS), or
- Pharmacy Administration through the Department of Clinical Pharmacy and Outcomes Sciences (CPoS).

The learning outcomes are similar for both options in that students will demonstrate a proficiency in their respective fields. Specifically, students will be able to:

1. Demonstrate a basic knowledge of the theories, principles and methods underlying the pharmaceutical sciences as they relate to the area of emphasis.
2. Identify a research problem, formulate a research plan, analyze data and communicate findings through oral presentations, abstracts, and papers.
3. Critically analyze and synthesize relevant literature.

Drug Discovery and Biomedical Sciences

The MS track in Drug Discovery and Biomedical Sciences requires a minimum of 30 hours beyond the baccalaureate degree, including at least 9 credit hours of thesis preparation. The MS degree requirements include an admission-to-candidacy examination, a comprehensive examination, and a thesis.

Pharmacy Administration

Students who enter the MS program in Pharmacy Administration with a post-baccalaureate degree (BS or PharmD) must successfully complete at least 35 hours of graduate course work, including at least 6 credit hours of thesis. The MS degree requirements include an admission-to-candidacy examination, a comprehensive examination, and a thesis.
**MS Degree, Drug Discovery and Biomedical Sciences Option**

1. A research advisor must be chosen by the end of the first year.
2. Admission to candidacy must occur by the end of the third semester, and includes the following: a.) Submission of a program of study form. Satisfactory completion of all coursework taken in the first three semesters will be evaluated by the committee. b.) Submission of a written initial research proposal, followed by an oral presentation and defense of the proposal to the thesis committee.
3. The comprehensive written and oral examination must be completed.
4. A written thesis, along with an oral presentation and defense, is required for the completion of the MS degree.

In addition to the general requirements listed above, candidates for the MS degree are required to complete two departmental seminar courses.

Select 11 hours of electives ²

1 A maximum of 2 hours credit can be earned for PHAR 712.  
2 Electives will be chosen based on the needs of the graduate student. Areas of emphasis include Biomedical Chemistry, Synthetic Medicinal Chemistry, Pharmacoeconomics, and Pharmacology. Electives will be chosen based on the area of emphasis and must be approved by the advisory committee and the Graduate Program Director. Electives must be 700 level and above, or any course approved by the Graduate School for Graduate Credit.

**MS Degree, Pharmacy Administration Option**

All students must successfully complete at least 35 hours of graduate course work. In addition to the general requirements listed above, candidates for the MS degree are required to complete two departmental seminar courses (PHAR 711 A-B). All students must submit a thesis based upon original research, meeting all requirements of The Graduate School prior to award of the degree. No more than six hours of credit for PHAR 799 will be allowed for thesis research and writing. Further degree requirements are listed below.

¹ BIOS 757 Intermediate Biostatistics 3
PHAR 799 Thesis Preparation 1-6

¹ STAT 515/516 may be substituted for BIOS 701/757

**Pharmaceutical Sciences, Ph.D.**

**Learning Outcomes**

- Students will demonstrate proficiency in understanding principles of medicinal chemistry, pharmacology, and pharmacoeconomics. Students will also demonstrate knowledge in techniques of biochemistry, molecular biology, and physiology as applied to pharmaceutical research.
- Students will be able to identify pertinent research problems, and formulate a research plan.
- Students will be able to critically analyze relevant literature, and to communicate scientific findings with oral presentations.
- Students will be able to generate and analyze original research results, and to communicate these results to the scientific community.
- Within five years of graduation with their PhD degree, students will be engaged in professional careers and/or postdoctoral fellowship.
- Over time, graduates of our program will be successful in professional careers.

**Degree Requirements (60-61 Hours Post-baccalaureate)**

**Drug Discovery and Biomedical Sciences**

The Ph.D. track in Drug Discovery and Biomedical Sciences requires a minimum of 60 hours beyond the baccalaureate degree, or a minimum of 30 hours beyond the master's degree as approved by advisement, including at least 12 credit hours of dissertation preparation. The Ph.D. degree requirements include an admission-to-candidacy examination, a comprehensive examination, and a dissertation.

**Pharmacy Administration**

Students who enter the Ph.D. program in Pharmacy Administration with a post-baccalaureate degree (BS or PharmD) must successfully complete at least 61 hours of graduate course work. Students who enter the Ph.D. program in Pharmacy Administration with a Masters of Science (MS) degree in a health-related field must successfully complete at least 37 hours of graduate course work beyond the MS as approved by the advisor, including at least 12 credit hours of dissertation preparation. The Ph.D. degree requirements include an admission-to-candidacy examination, a comprehensive examination, and a dissertation.

**In the Department of Drug Discovery and Biomedical Sciences**

1. A research advisor must be chosen by the end of the first year.
2. Admission to candidacy must occur by the end of the second year, and includes the following:
   a. Submission of a doctoral program of study form. Satisfactory completion of all coursework taken in the first two years will be evaluated by the committee.
   b. Submission of a written initial research proposal, followed by an oral presentation and defense of the proposal to the thesis committee.
3. The comprehensive written and oral examination must be completed by the end of the third year.
4. A written dissertation, along with an oral presentation and defense, is required for the completion of the Ph.D. degree

In addition to the general requirements listed above, candidates for the Ph.D. degree are required to complete four departmental seminar courses:

**Ph.D., Pharmaceutical Sciences (60 Hours)**

**Total Credit Hours** 24

¹ A maximum of 4 hours credit can be earned for PHAR 712. ² Electives will be chosen based on the needs of the graduate student.

Areas of emphasis include Biomedical Chemistry, Synthetic Medicinal Chemistry, Pharmaceutics, and Pharmacology. Electives will be based on the area of emphasis and must be approved by the Ph.D. advisory committee and the Graduate Program Director. Electives must be 700 level and above, or any course approved by the Graduate School for Graduate Credit.

**Doctoral Directed Research (24 Hours)**

**Concurrent Pharm.D. and Ph.D. (60 Hours minimum)**

In addition to the general requirements listed above, students pursuing the Pharm.D. and Ph.D. concurrently will take elective courses that are approved for graduate credit and fulfill requirements for the Ph.D. program. Electives in the Pharm.D. curriculum: up to nine credit hours can count toward both degrees, with the following stipulations. The student must have completed at least 90 hours of undergraduate course work, have a minimum GPA of 3.40, and have form GS-59 on file in The Graduate School. A grade of B or higher must be earned for the course to count for graduate credit. At least half of the electives must be numbered 700 or above. Courses numbered 500-699 are acceptable only if they have been approved for graduate credit. Graduate courses taught in units other than pharmacy must be approved by the graduate faculty of pharmacy as appropriate for a Ph.D. degree in pharmaceutical sciences. Registration for each course requires approval of the student’s advisor, the chair of the student’s department, the graduate director of the Ph.D. program, and the dean of The Graduate School. Form GS-59A must be processed for each graduate credit course at the time of registration to permit the registrar’s office to properly enroll the student for graduate credit.

**In the Department of Clinical Pharmacy and Outcomes Sciences**

The Ph.D. in Pharmaceutical Sciences with an emphasis in Pharmacy Administration prepares the graduate for many careers in academia and the pharmaceutical industry. The program is designed to meet the specific needs and objectives of the student and provide a strong foundation of course work and experiences in the areas of pharmaceutical outcomes research. In addition to the core coursework, students select a minor field to develop additional expertise in economics, pharmacoepidemiology, biostatistics, marketing or health policy. The program has a strong emphasis on developing quantitative, analytical and data management skills and uses a multidisciplinary approach in teaching and research activities.

Students who enter the Pharm.D. program in Pharmacy Administration with a post-baccalaureate degree (BS or PharmD) must successfully complete at least 61 hours of graduate course work. Students who enter the Ph.D. program in Pharmacy Administration with a Masters degree in a related field must successfully complete at least 37 hours of graduate course work.

After enrolling in the program, the student must choose a research advisor by the end of the first year of enrollment. Admission to candidacy must occur by the end of the second year after passing a qualifying
examination based on all courses completed in the business and analytical core. The comprehensive written and oral examination must be completed by the end of the third year of the program. A written dissertation, along with an oral presentation and defense, is required for the completion of the Ph.D. degree.

**Ph.D. Pharmacy Administration Option (61 Hours Minimum Post-Baccalaureate)**

**Minor/Cognate (9 Hours Minimum)**

Students in the Ph.D. in Pharmacy Administration must also take at least 9 hours of minor/cognate graduate level courses in one of the following areas: biostatistics, marketing, health policy, economics, or epidemiology. Minor/cognate coursework will be determined by the advisor and graduate director in consultation with the student.

All students are required to submit a dissertation based upon original research, meeting all requirements of The Graduate School prior to award of the degree.

**Required Courses (28 hours)**

**Total Credit Hours** 28

Additional coursework may be required as part of the program of study for post-MS entrants. Additional coursework will be determined by the advisor and graduate director after considering the skills, competencies and experiences of the post-MS student.

**Minor/Cognate (9 Hours Minimum)**

Students in the Ph.D. in Pharmacy Administration must also take at least 9 hours of minor/cognate graduate level courses in one of the following areas: biostatistics, marketing, health policy, economics, or epidemiology. Minor/cognate courses will be identified and approved by the major advisor and graduate director in consultation with the student.

**Arnold School of Public Health**

G. Thomas Chandler, Dean
Alan Decho, Associate Dean for Research
James Hardin, Associate Dean for Faculty Affairs and Curriculum and Interim Chair, Department of Health Services Policy and Management
Lee Pearson, Associate Dean for Operations and Accreditation
Toni Torres-McGehee, Associate Dean for Diversity, Equity and Inclusion
Sara J. Corwin, Associate Dean for Undergraduate Student Affairs
Jean Nells-Strunjas, Chair, Department of Communication Sciences and Disorders
Geoff Scott, Chair, Department of Environmental Health Sciences
Anthony Alberg Chair, Department of Epidemiology and Biostatistics
Shawn M. Arent, Chair, Department of Exercise Science
Daniela Friedman, Chair, Department of Health Promotion, Education, and Behavior

Public Health is an exciting and growing field of study. The field challenges its professionals to confront complex health issues, such as improving access to health care, controlling infectious disease, and reducing environmental hazards, violence, substance abuse, and injury. Professionals in Public Health come from varying educational backgrounds and can specialize in an array of fields. A host of specialists, including teachers, journalists, researchers, administrators, environmentalists, demographers, social workers, laboratory scientists, physicians, and attorneys, work to protect the health of the public. This is a field geared toward serving local, national, and international communities. Public Health professionals are leaders who meet the many
exciting challenges in protecting the public’s health today and in the future. The Arnold School of Public Health was established by legislative action in 1974 and has been fully accredited by the Council on Education for Public Health (CEPH) since 1979.

The mission of the Arnold School of Public Health is to improve population health and well-being by fostering innovative education and research that promotes health and healthy environments and will use that knowledge to prevent and effectively respond to disease, disability, and environmental degradation in diverse communities. An integral part of the training of students at the school is participation in research activities. Since the state is experiencing rapid demographic and industrial changes, health problems range from those of a traditional rural setting (infectious diseases, infant mortality, access to health care) to those of a modern industrial setting (impact of new industries on air and water quality and the safety of the workplace). The school has been committed to “action research” since its inception. The importance of dealing with operating programs and defined problems has led to close working relationships with human service programs, health care facilities, and governmental agencies throughout the state and region.

The school contains the Prevention Research Center, the Core for Applied Research and Evaluation, the Nutrition Consortium, the Cancer Prevention and Control Program, the Office for the Study of Aging, the Rural and Minority Health Research Center, the Consortium for the Latino Immigration Studies, the Center for Community Health Alignment, the PASOs Program, the Community Health Worker Institute and the Montgomery Speech-Language-Hearing Clinic.

Degrees Offered
The Arnold School of Public Health offers graduate programs of study leading to the degrees of Doctor of Philosophy (Ph.D.), Master of Public Health (M.P.H.), Master of Science (M.S.), and Master of Science in Public Health (M.S.P.H.). The Department of Exercise Science also offers the Doctor of Physical Therapy (D.P.T.); the Department of Communication Sciences and Disorders offers study that leads to the Master of Science (M.S.) in Speech-Language Pathology in two modalities, full-time face-to-face/residential (MS-Res) and part-time via distance-education (MS-DE); and the Department of Health Services Policy and Management also offers a Master of Health Administration (M.H.A.).

A Master of Social Work/M.P.H. dual degree is offered in cooperation with the College of Social Work. A dual Juris Doctor/M.H.A. is offered in cooperation with the School of Law. Within the Arnold School, a student can earn a dual PhD in Epidemiology and Environmental Health Sciences. The Certificate of Graduate Study in Health Communication is administered by the Department of Health Promotion, Education, and Behavior; the School of Journalism and Mass Communications; and the School of Library and Information Science. The Department of Health Promotion, Education, and Behavior also offers graduate certificates in Global Health and in Aging. The Department of Environmental Health Sciences offers a graduate certificate in Environmental Nanoscience and Risk.

Admission Requirements
Requirements for admission conform to the general regulations of The Graduate School of the University of South Carolina including satisfactory scores on the Graduate Record Examination, unless otherwise indicated in the program documentation. In addition, applicants must submit official transcripts of their entire academic record, evidence of academic performance at a B or better level, a curriculum vitae or resume, a brief statement of professional goals and objectives, and at least two letters of recommendation. Programs may have additional admission requirements.

- Environmental Health Sciences (p. 1161)
- Epidemiology and Biostatistics (p. 1166)
- Exercise Science (p. 1184)
- Health Promotion, Education, and Behavior (p. 1196)
- Health Services Policy and Management (p. 1202)
- Public Health Programs (Division of Academic Affairs) (p. 1210)

Communication Sciences Disorders
Department Website (http://www.sph.sc.edu/comd/)
Jean Neils-Strunjas, Chair

The Department of Communication Sciences and Disorders offers graduate training leading to the master’s and doctoral degrees. The master’s program is a professional degree program intended to prepare students for the clinical practice of speech-language pathology. The program has been continuously accredited for more than 30 years by the Council for Academic Accreditation of the American Speech-Language-Hearing Association (ASHA). Graduates of the master’s program are eligible for their state license to practice speech-language pathology, a teaching certificate from the South Carolina State Department of Education, and board certification from ASHA (the Certification for Clinical Competence in Speech-Language Pathology). The Department provides two paths to the master’s degree in speech-language pathology. The Master of Science (M.S.) in Speech-Language Pathology degree in the residential modality (MS-Res) is the traditional, on-campus program in which students are continuously enrolled on a full-time basis for two calendar years. The Master of Science (M.S.) in Speech-Language Pathology degree in the distance-education modality (MS-DE) is a part-time degree program, offered through distance education, requiring three to four years of study, depending on a student’s prior academic training. The Doctor of Philosophy (Ph.D.) degree in Communication Sciences and Disorders is designed to prepare individuals for careers in research and the scholarly study of the science of human communication and its disorders. Doctoral students, under the director of a mentor, regularly participate in laboratory activities and pursue a program of scholarly research leading to publication in scientific journals and grant writing. The Ph.D. is an academic degree and focuses on providing students with the skills necessary to be successful university professors at research-1 institutions.

Academic Requirements for Progression
Students pursuing a graduate degree in the Department of Communication Sciences and Disorders may not receive more than 11 semester hours of grades below B. Upon receipt of the twelfth semester hour of C+ or below, the student becomes academically ineligible to continue in the program. It should be noted that this academic requirement is more stringent than that of The Graduate School, which requires only that students maintain an overall graduate grade point average of 3.0.
Montgomery Speech-Language-Hearing Clinic

The Montgomery Speech-Language-Hearing Clinic is one of more than 600 practicum sites where students pursuing their master’s degree in speech-language pathology receive supervised clinical experience. Clinical services include speech, language, and hearing evaluations and treatment for persons of all ages, including University students and faculty members. The Clinic is located at 1705 College Street, Suite 220, Columbia, SC 29208 and employs three audiologists, nine speech-language pathologists, and four staff members.

Department Admissions Requirements

Due to the large number of applications received each year, admission to the master’s degree programs in speech-language pathology is highly competitive. The mean four-year undergraduate GPA for those admitted during the previous year was 3.75 (on a 4.0-point scale), while the average Verbal and Quantitative scores on the Graduate Record Exam were 154 and 15, respectively. Admission is holistic, and for 2021, submission of GRE scores is not required, but optional.

All applicants to the graduate programs in Communication Sciences and Disorders must have completed college-level coursework in the following four areas before entering our program:

1. a biological science,
2. a social/behavioral science,
3. statistics, and
4. chemistry or physics.

Under no circumstances will a student be permitted to begin our master’s degree program unless all four of these prerequisite courses have been completed. Previous coursework in speech-language pathology is not a requirement for admission to the master’s degree program and only affects the point of entry into the program.

While students’ undergraduate major and post baccalaureate courses are not a consideration for admission, they do affect when students begin their master’s program. Students in the MS-Res program begin course work during the fall semester while students in the MS-DE program begin in the summer, provided they have completed a minimum of 25 clock hours of supervised observation plus three semester hours of coursework in each of the following:

- anatomy and physiology of the speech and hearing mechanism
- phonetics
- language development
- articulation disorders.

MS-Res students who have not met these requirements enter the program in the summer; MS-DE students who have not met these requirements enter the program in the fall.

Since the purpose of the Ph.D. program is to prepare communication scientists to fill faculty positions at Research I institutions, applicants should demonstrate an interest in pursuing a career in scholarly teaching and research. Completion of a masters thesis, research presentations at professional meetings, published abstracts and peer review articles are examples of items on an applicant’s resume that show evidence of a research interest.

Applicants to the Ph.D. program should specify, in the personal statement accompanying their application, their area of research interest. The department currently has laboratories supporting research in neuroimaging, adult neurogenics, voice disorders and instrumentation, and child language. For information on this research and these laboratories, go to the department’s research web sites: http://www.sph.sc.edu/comd/research.htm.

Programs

- Communication Sciences and Disorders, Ph.D. (p. 1160)
- Speech-Language Pathology, M.S. (p. 1160)

Courses

COMD 500 - Introduction to Speech-Language Pathology and Audiology (3 Credits)
Human communication disorders with an overview of prevention and treatment programs.

COMD 501 - Anatomy and Physiology of Speech and Hearing Mechanisms (3 Credits)
An intensive study of the anatomy and physiology of the speech and hearing mechanisms.

COMD 507 - Language Theory and Phonetics (3 Credits)
Study of language theory and international phonetics alphabet transcription.

COMD 521 - Introduction to Clinical Procedures in Speech Pathology (1 Credit)
Diagnostic and therapeutic programs for the communicatively handicapped will be observed in the public school and various rehabilitative settings. Discussion and study of basic therapeutic theories and procedures utilized in speech therapy. Introduction to phonetics or equivalent or permission of instructor.

COMD 525 - Selected Topics (1-3 Credits)
Presentation of current experimental or innovative programs in diagnosis and treatment of the communicatively impaired. Course is designed to update the practicing clinician in specific areas of expertise. May be repeated for credit. Individual topics to be announced by title. Permission of instructor.

COMD 526 - Disorders of Articulation: Evaluation and Therapy (3 Credits)
The diagnosis and treatment of articulation problems in children and adults, including analysis of current research in testing and therapy for articulation disorders.

Prerequisites: COMD 501 and COMD 507 or equivalents.

COMD 560 - Observation of Speech Language Pathology (1-3 Credits)
Introduction to the clinical process through observation of various diagnostic reports and intervention programs included.

COMD 570 - Introduction to Language Development (3 Credits)
The language acquisition process in normal children, including the development of semantics, morphology, syntax, phonology, and pragmatics; American dialects and bilingualism.

Prerequisites: COMD 501 and COMD 507.

Cross-listed course: LING 570

COMD 700 - Advanced Seminars in Speech Sound Disorders (3 Credits)
Study of advanced alternative procedures for the evaluation and management of individuals with significant phonological disturbances.
COMD 701 - Stuttering: Evaluation and Therapy (1-3 Credits)
An introduction to the problem of stuttering; its possible causes; the management and training of clients.

COMD 702 - Cleft Palate-Craniofacial Disorders: Evaluation and Management (1-3 Credits)

COMD 703 - Genetics of Communication Disorders (1 Credit)
Genetic factors that contribute to disorders of speech, language, and hearing.

COMD 704 - Disorders of Voice: Evaluation and Therapy (1-3 Credits)
The diagnosis and treatment of voice disorders in children and adults. The neurological, physiological, and psychological bases of voice disorders will be considered.

COMD 705 - Adult Speech, Language, and Cognitive Disorders (3 Credits)
Neuropathological bases for language disorders in adults; includes differential diagnosis and remediation techniques. 
Prerequisite or Corequisite: COMD 744.

COMD 706 - Preschool Language Development and Disorders (3 Credits)
Components of communication, oral language, and speech in preschool children with diverse problems across all aspects of language learning, including factors that serve as precursors to literacy skills as well as evidence-based approaches to language assessment and intervention.

COMD 707 - Clinical Evaluation in Communicative Disorders (1-3 Credits)
Assigned readings and reports combined with clinical practice in the evaluation of cases in areas such as aphasia, cerebral palsy, voice disorders, articulation problems, stuttering, or cleft palate.

COMD 708 - Directed Study in Speech Pathology (3 Credits)
Directed readings and/or research in speech pathology. May be repeated for credit.

COMD 709 - Laryngectomy Clinical Management (1-3 Credits)
Pre- and postoperative clinical management of the laryngeal patient with emphasis on communication and related problems.

COMD 710 - Selected Topics in Speech Pathology (1-3 Credits)
Individually assigned directed readings in speech pathology. May be repeated for credit when the topics covered or subject matter is different.

COMD 711 - Seminar in Speech Pathology (1-3 Credits)
An in-depth study of selected issues. May be repeated for credit when the topics covered or subject matter is different.

COMD 712 - Management and Coordination of Programs in Speech Pathology and Audiology (1-3 Credits)
A study of management systems in funding, scheduling, and case load.

COMD 713 - Neurogenic Disorders of Speech (1-3 Credits)
Clinical management of the neurogenic speech disorders. Major emphasis on neuroanatomy and pathophysiology; sign and symptoms, etiology, and the diagnosis and treatment of the major disorders. 
Prerequisite or Corequisite: COMD 502, COMD 700, AND COMD 724 or equivalent course.

COMD 714 - Gerontology and Communicative Disorders (1-3 Credits)
Aging, communicative processes and problems associated with aging, and specific communicative disorders associated with aging. Methods of assessment and rehabilitation will be considered.

COMD 715 - Augmentative Communication: Assessment and Intervention (1-3 Credits)
A study of historical perspectives, current issues, assessment, intervention techniques, and training strategies in augmentative communication.

COMD 716 - Public Health Perspectives in Communication Sciences and Disorders (1 Credit)
Public health issues and historical context related to speech, language, and hearing from local, national and global perspectives.

COMD 717 - Professional Issues in Speech-Language Pathology (1 Credit)
Issues affecting speech-language pathologists including professional education, certification, licensure, legislation, standards, and ethics. 
Prerequisites: COMD 521 and COMD 712.

COMD 720 - School-Age Language & Literacy Development and Disorders (3 Credits)
The relationship between oral and written language and factors that impact reading and writing (phonological awareness, phonics, vocabulary). Reading (word-level, comprehension, fluency) and writing (composition, spelling) development, assessment, intervention and issues related to delivery of literacy services in the schools.

COMD 721 - Cognitive Rehabilitation (1-3 Credits)
Traumatic brain injury and implications for speech and language function including diagnostic evaluation and remediation. 
Prerequisite or Corequisite: COMD 502 or equivalent course.

COMD 722 - Dysphagia (1-3 Credits)
Normal function and pathologic changes of the swallowing mechanism, including evaluation and therapeutic techniques.

COMD 723 - Language Disorders in Adolescents (1-3 Credits)
Diagnosis and treatment of communication problems in adolescent children, including educational psychosocial sequelae.

COMD 724 - Introduction to Medical Speech-Language Pathology (1 Credit)
Practical application skills for speech-language pathology in the medical setting.

COMD 725 - Pediatric Dysphagia (1-3 Credits)
Anatomical and physiological orientation to oral-pharyngeal swallowing disorders in young children. 
Prerequisite or Corequisite: COMD 502, COMD 722, AND COMD 724 or equivalent course.

COMD 726 - Advanced Cognitive Retraining (3 Credits)
Issues in traumatic brain injury and implications for speech and language function.

COMD 727 - Advanced Study of Literacy for Speech-Language Pathologists (2 Credits)
Theories of reading development with regard to their implications for assessment and intervention. Connections between oral and written language skills, including vocabulary as a link between word level and text-level skills. Overall framework for thinking about literacy as a multi-component language skill.

COMD 735 - Counseling in Speech-Language Pathology (2 Credits)
The use of counseling skills by speech-language pathologists regarding the impact of communication disorders on the family system, the importance of interpersonal communication in counseling, and the principles and processes of counseling in facilitating behavior change.
COMD 738 - The Speech Pathologists Role in Working with Children with Autism Spectrum Disorders (2 Credits)
Speech-language pathologists (SLPs) are key team members in the assessment and treatment of individuals with Autism Spectrum Disorders (ASD), with 90% of school-based SLPs serving children with ASD. This course is intended to prepare students for the assessment and interventions targeting language and communication skills for children with ASD.

COMD 744 - Neurocognitive Bases of Language Behavior (3 Credits)
Neurocognitive bases for speech and language in the central nervous system including anatomy and physiology and theoretical constructs of language.
Prerequisites: COMD 501.

COMD 745 - Introduction to Speech Science and Acoustic Measurement (3 Credits)
The physical and related psychological attributes of speech. Use of electronic instruments and laboratory practices in measurement of acoustic variables. Introduction to information theory.
Prerequisites: COMD 501 and COMD 507.

COMD 748 - Speech Pathology Management of Patients with Tracheostomy & Ventilator Dependency (2 Credits)
Communication options and dysphagia management for speech-language pathologists working with tracheostomized patients.
Prerequisites: COMD 722.

COMD 750 - Introduction to Audiology and Aural Habilitation (3 Credits)
Basic anatomy and psycho-physics of hearing, pathologies of hearing loss, introduction to identification procedures including hearing screening and pure-tone audiometry, impact of hearing loss on preschool and school-aged children, and educational, psychological, and medical aspects of auditory habilitation.
Prerequisites: COMD 507 and COMD 504.

COMD 754 - Aural (Re)Habilitation of Children and Adults (3 Credits)
Effects of hearing loss on a child’s development and also on adult function and quality of life (linguistic, intellectual, social, and educational). Communication assessment and case management, including parent and patient training, education, and counseling.
Prerequisite or Corequisite: COMD 501, COMD 745, and COMD 750 or their equivalent.

COMD 755 - Aural Rehabilitation of Adults (3 Credits)
Comprehensive rehabilitation of hearing-impaired adults with emphasis upon amplification, auditory training, and speech reading in developing communication skills.

COMD 760 - Cochlear Implants (3 Credits)
Anatomy and physiology of the normal cochlea and the eighth cranial nerve. Evoked otoacoustic emissions as a diagnostic medium. Cochlear pathology with emphasis on candidacy for cochlear implantation.

COMD 761 - Habilitation of Individuals with Cochlear Implants (1-3 Credits)
Clinical techniques for the communication assessment and habilitation of the child post cochlear implantation.

COMD 762 - Aural Habilitation: Manual Communication (1-3 Credits)
Basic sign vocabulary for speech-language pathologists’ professional use with hearing-impaired clients. Focus on the nature and components of manual language systems.

COMD 772 - Practicum in Speech Language Pathology and Audiology (1-13 Credits)
Supervised clinical practice in screening, diagnosis, and therapy.

COMD 774 - Internship in Speech Pathology (3-13 Credits)
Supervised internship in diagnosis and treatment of children and adults with communicative disorders in clinical and public school settings in field situations.

COMD 790 - Introduction to Research in Speech Pathology and Audiology (3 Credits)
An introduction to research methods applicable to and utilized in speech pathology and audiology. An analysis of basic and applied research.

COMD 791 - Research Methodology (3 Credits)
Preparation of research designs, procedures of sampling and use of statistical measures.

COMD 799 - Thesis Preparation (1-9 Credits)

COMD 800 - Seminar in Speech Pathology (3 Credits)
An in-depth exploration of problems, theories, and research in a specific area of speech pathology. May be repeated for credit when the topic(s) covered is different. Individual topics to be announced with title.

COMD 801 - Advanced Topics in Speech Pathology (3 Credits)
A series of lectures, presentations, and discussion sessions in a selected area of speech pathology. May be repeated for credit when the topic(s) covered is different. Individual topics to be announced with title.

COMD 802 - Contemporary Issues In Speech Pathology (3 Credits)
Issues of local, state, and national import related to the prevention or solution of problems in speech pathology.

COMD 803 - Advanced Study of Clinical Phonology (3 Credits)
Introduction to nonlinear phonological theory (e.g., autosegmental, metrical) and its application for assessment and intervention of children with phonological disorders.

COMD 805 - Advanced Study of Language Disorders in Adults (3 Credits)
Theories of language processing, language development, and the effects of neural pathology on the normal language process.

COMD 820 - Advanced Speech Science (3 Credits)
Advanced study of the physical and related psychological attributes of sound and measurement of acoustic variables of sound and speech. Review of current research in speech science.

COMD 821 - Advanced Hearing Science (3 Credits)
The normal auditory system; middle ear and cochlear physiology as determiners of auditory psychophysics.

COMD 822 - Normal Bases of Speech Production (3 Credits)
Processes underlying speech production, including neural control, respiration, phonation, and articulation; theories explaining the processes; measurements of physical properties of speech.

COMD 823 - Normal Bases of Language (3 Credits)
Advanced study of the effects of pathology on the normal language processes. Theories of language processing and development over the life span. Effects of focal and diffuse neutral pathologies on language processes.

COMD 899 - Doctoral Research and Dissertation Preparation (1-12 Credits)
Communication Sciences and Disorders, Ph.D.

The Ph.D. degree in Communication Sciences and Disorders prepares professionals for academic careers, and therefore its emphasis is on research and the scholarly study of the science of human communication and its disorders. All students in the doctoral program must pursue their studies on a full-time basis, conducting scientific experiments in one or more of the department’s laboratories under the guidance of a research mentor. Ph.D. students also gain experience in curriculum development and classroom teaching.

Learning Outcomes

- Doctoral students will demonstrate entry level competency skills (for university teaching) in principles and methods of teaching college-level coursework.
- Doctoral students will demonstrate entry level competency skills (for university-level research) in the principles and methods of conducting and disseminating research.

Degree Requirements (57 Post-Masters Hours)

Doctoral students must complete a minimum of 45 semester hours of graduate course work beyond the master’s degree in speech-language pathology plus 12 semester hours of dissertation preparation (COMD 899). Students who are nationally certified by the American Speech-Language-Hearing Association generally pursue two years of academic/research preparation followed by one or more years to complete the dissertation. Master’s-level speech-language pathologists who are wishing to pursue their ASHA certification while enrolled in the doctoral program will take slightly longer. Finally, students with bachelor’s degrees from other related scientific disciplines (e.g., psychology, linguistics, engineering, exercise science), who aspire to become speech-language-hearing scientists with no interest in clinical practice, take three years of course work (up to 18 additional semester hours, as determined by their doctoral planning committee) prior to the dissertation year. In addition to the courses listed below, all Ph.D. students must take PUBH 700.

Additional Information

Upon the completion of a program of study, approved by both the student’s academic program committee and The Graduate School, and prior to embarking upon a dissertation, doctoral students must successfully pass written and oral comprehensive examinations. The doctoral program culminates in the successful defense of the dissertation, consisting of the collection and analysis of original scientific data.

Speech-Language Pathology, M.S.

Learning Outcomes

- Students will demonstrate knowledge of basic human communication and swallowing processes across the life span.
- Students will demonstrate knowledge of human communication and swallowing disorders and differences across the life span.
- Students will collaborate with other professionals in case management and provide counseling regarding communication and swallowing disorders to clients/patients, family, caregivers, and relevant others. They will adhere to the ASHA Code of Ethics and behave professionally, meeting additional departmental standards for professional responsibility, interactions, and attitude.
- Students will demonstrate knowledge of processes used in research and of the integration of research principles into evidence-based clinical practice.

Degree Requirements (Minimum 76 Hours)

Course Work and Clinical Experiences

The Department of Communication Sciences and Disorders offers the Master of Science degree (M.S.) in Speech-Language Pathology in a full-time face-to-face/residential format (MS-Res), as well as in a part-time distance education format (MS-DE). The M.S. degree offered in two pathways (MS-Res and MS-DE) is designed to ensure that its graduates obtain the academic course work and clinical experiences
necessary to meet the American Speech-Language-Hearing Association (ASHA) standards for the Certification of Clinical Competence in Speech-Language Pathology (CC-SLP). As such, the curricula require a minimum of 76 semester hours of academic course work plus the completion of 375 clock hours of supervised clinical practicum. Virtually all master's degree graduates, however, exceed these minimums, with most completing as much as 80 semester hours of study. Courses comprising the master's degree curriculum fall within three basic content areas: Basic Communication Sciences, Professional Coursework, and Clinical Practicum. In addition, the following courses have been verified by the State of South Carolina, Department of Education, Office of Educator Services, to meet the South Carolina Literacy Competencies (Administrators/Speech Language Therapist) for the Read to Succeed pre-service 6-credit requirements:

### Professional Course Work

Of the minimum 45 semester hours of professional course work, a minimum of 36 semester hours must be within the area of Speech-Language Pathology. MS-Res and MS-DE students must also take PUBH 700.

- Speech Disorders (Minimum 6 semester hours at the graduate level, with 9 semester hours overall at the undergraduate and graduate levels)
- Language Disorders (Minimum 9 semester hours)
- Other Speech Pathology Courses (Minimum 15 semester hours)
- Audiology (Minimum 6 semester hours at the graduate level)
- Cochlear Implants (Minimum 3 semester hours)

### Clinical Practicum

Minimum 24 semester hours.

### Environmental Health Sciences

**Department Website** (http://www.sph.sc.edu/enhs/default.htm)

**Geoffrey L. Scott, Chair**

**Dwayne E. Porter, Associate Chair and Director of Graduate Studies**

The environmental health sciences examine the interactions between humans and their environment. Human activities impact on environmental quality and environmental factors, and, in turn, are principal determinants of human health. Exploration of these complex interactions often combines elements of both pure and applied sciences, e.g., biology, chemistry, marine sciences, geology, engineering, public health, and medicine.

Faculty members of the Department of Environmental Health Sciences (ENHS) have expertise in a broad range of disciplines necessary to solving the vexing and complex problems in environmental health sciences. Our expertise includes air pollution, nanosciences, mammalian toxicology, environmental and health-related microbiology, aquatic ecology, marine ecotoxicology, ecosystem modeling, risk and impact assessment, exposure analysis, environmental planning and engineering, environmental physiology, industrial hygiene, occupational epidemiology, landscape ecology, remote sensing and GIS, water quality and wastewater treatment, wetlands ecology, resource management, and environmental justice.

The mission of the Department of Environmental Health Sciences is founded on the philosophy that healthy environments enhance the health and well-being of individuals and the communities in which they live. Thus the broader goals of the department are to:

- develop improved methods for assessing the health and quality of the environment
- promote a clearer understanding of interactions between humans and their natural, home, and work environments
- achieve molecular to landscape levels of resolution for understanding health/environment interactions
- protect the natural resources upon which life depends
- provide scientifically sound information for policymakers to encourage social awareness of and societal actions toward sustaining a healthy relationship with the environment.

The Department of Environmental Health Sciences offers the following degrees: Master of Public Health (MPH), Master of Science (MS), and Doctor of Philosophy (PhD). A common level of core public health training is completed prior to undertaking advanced study and research.

### Programs Overview

#### Master’s Degrees

**Master of Public Health (MPH)**

The MPH degree is oriented toward development of a broad background in public health and preparation for professional practice. The MPH degree requires 42 credit hours of study and is practice-oriented. MPH students complete a supervised internship (practicum) in lieu of a thesis.

**Master of Science (MS)**

The MS degree is an academic research degree which may be tailored to individual interests and job market needs. The MS degree requires a minimum of 36 graduate hours and combines real-world problem solving and research skills with other technical, health, and related skills to
prepare effective environmental health researchers for the public and private sectors. Students complete a research thesis.

**Doctoral Degree**

**Doctor of Philosophy (PhD)**

Doctoral students complete a program of study that emphasizes professional development, scientific competence, and research expertise. The PhD requires a minimum of 60 hours of course work beyond the baccalaureate and includes 12 credit hours of dissertation preparation. Those students entering without a master’s degree are required to take additional foundation course work in environmental health sciences equivalent to the master’s degree. To achieve doctoral candidate status, students must pass a qualifying examination after the first year of study. Upon completion of all course and language requirements, doctoral candidates must pass an oral and/or written comprehensive examination. All doctoral candidates must prepare and defend a dissertation that represents significant research in their area of advanced study. Doctoral students must demonstrate a reading proficiency in a modern foreign language if deemed necessary by the doctoral advisory committee.

### Department Admission Requirements

**General**

Application forms for admission to the MPH, MS and PhD graduate programs in Environmental Health Sciences may be obtained at [http://gradschool.sc.edu/gap/](http://gradschool.sc.edu/gap/). Applicants should submit an application packet through the School of Public Health Application Service (http://www.sophas.org). Individuals who wish to pursue graduate work in the Department of Environmental Health Sciences must meet or exceed the general admission requirements of The Graduate School and the following departmental requirements:

- grade point average of at least 3.00 on a 4.00 scale
- evidence of previous training/experience in a pure or applied scientific discipline
- minimum score of 310 (new scoring) or 1050 (old scoring) (verbal plus quantitative) on the Graduate Record Examination
- completion of a minimum of 24 hours of science-based courses to include the following for the MPH degree: college algebra, pre-calculus, chemistry (general; quantitative-organic chemistry also desirable), biology (general, plus advanced courses)
- completion of a baccalaureate degree with 120 hours of science-based courses or equivalent for the MS, MPH, and PhD degrees to include:
  a. a minimum of 60 hours in physical or life sciences, mathematics, engineering, and/or technology
  b. at least 15 hours of the 60 hours in upper level junior, senior, or graduate level courses
  c. 21 or more semester hours in communication, humanities, and social sciences.

Applicants must submit the following:

- Graduate Record Examination scores
- official transcripts
- brief statement (maximum of two pages) that describes professional and educational objectives, work experiences, and activities applicable to the proposed plan for graduate study
- three letters of recommendation.

Applicants who do not meet all of the above requirements but who possess overall potential may be considered for conditional admission. Applicants should submit an application packet through the School of Public Health Application Service (www.sophas.org) unless advised otherwise by the Office of Academic Affairs.

**Doctor of Philosophy**

Applicants to the Ph.D. program must meet the above requirements and in addition must have at least baccalaureate degree in a pure or applied scientific discipline applicable to the environmental health sciences and from a university-accredited by a regional accrediting agency. Individuals with prior performance at the master’s level are preferred. A personal interview may also be required.

### Programs

- Environmental Health Sciences, M.P.H. (p. 1165)
- Environmental Health Sciences, M.S. (p. 1166)
- Environmental Health Sciences, Ph.D. (p. 1166)

### Courses

- **ENHS 515 - Introduction to Public Health and Emergency Preparedness and Response** (3 Credits)
  Introduction to emergency preparedness and response in relation to environmental and public health. Historical context for the emergence of public health emergency preparedness and demonstration of articulation with community response partner agencies in the post-9/11 era.
- **ENHS 592 - Advanced Special Topics in Environmental Health** (1-3 Credits)
  Emerging issues and topics concerning environmental health. May be repeated as content varies by title up to a total of 9 credit hours.
- **ENHS 625 - Medical Mycology** (3 Credits)
  Advanced study of infectious diseases caused by fungi. Etiology, symptoms, and treatment of fungi related illnesses.

**Cross-listed course:** BIOL 625

- **ENHS 660 - Concepts of Environmental Health Science** (3 Credits)
  Environmental health sciences presenting the earth as a complex system in which people, plants, animals, and non-living physical-chemical components interact.
- **ENHS 661 - Parasitology** (4 Credits)
  Parasites of biological, economic, and public health importance.
  **Prerequisites:** 300 level Biology course or equivalent.

**Cross-listed course:** BIOL 531, EPID 661

- **ENHS 662 - Industrial Health Programs** (3 Credits)
  Analysis, planning, and implementation of programs to protect workers’ health in industry; legislative and regulatory background.
- **ENHS 664 - Environmental Genomics** (3 Credits)
  “State of the art” molecular techniques that elucidate mechanisms of environmental contaminants in model systems.
- **ENHS 665 - Biofilms in Environmental Health and Disease** (3 Credits)
  Effect of bacterial biofilm process on many diverse areas. Recognition, prevention, and control of biofilm-related problems in the environment, health care, industry, and engineering.
ENHS 666 - Metals and Human Health (3 Credits)
Trace metal(loid)s, their fate and transport in the environment and their potential impacts on human health.
Prerequisites: BIOL 101 or BIOL 110; CHEM 101 and CHEM 102, or equivalent.

ENHS 670 - Environmental Pollutants and Human Health (3 Credits)
Overview of environmental pollutants and their impact on human health; case studies of environmental catastrophes; principles of ecotoxicology; air, water, and land pollution associated with neurotoxicity, toxicology, and carcinogenesis.
Prerequisites: BIOL 101 or BIOL 110; CHEM 101 and CHEM 102.

ENHS 671 - From Air to Alveoli: Exposure Science (3 Credits)
A receptor-oriented approach for assessing human exposure to environmental contaminants by inhalation, dermal and ingestion routes. Covers methods for estimating exposures to protect health and well-being, to relate adverse effects to exposures, and to comply with regulations and guidelines.

ENHS 675 - Infectious Disease Ecology (3 Credits)
Ecological theories as the basis for environmental change and the (re)emergence of infectious agents that ultimately impact human and ecosystem health.

ENHS 681 - Occupational Ergonomics I (3 Credits)
Introduction to ergonomics: hazards identification and analysis; solution design and implementation; human musculoskeletal characteristics, injuries; effects of work on performance, safety, and health. Application to manufacturing and office environments.

ENHS 740 - Environmental Nanoscience (3 Credits)
Fundamental principles of environmental nanoscience: unique properties of nanomaterials, synthesis and characterization of nanomaterials, and key processes determining their environmental fate and behavior of nanomaterials.

ENHS 750 - MPH Capstone Course (2 Credits)
Synthesis of foundational and ENHS MPH competencies in preparing high quality grant proposal to address a public health issue.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, ENHS 660.

ENHS 755 - Marine Conservation and Environmental Health (3 Credits)
Explores the intersection between conservation and environmental health with a particular focus on coastal and marine case studies. 03: 07/05/2019.

ENHS 760 - Fundamentals of Air Pollution (3 Credits)
Chemical and physical aspects of air pollution and their regulatory problems. An examination of air pollution sources; physical and chemical processes affecting pollutants after emission; pollutants and their effects and the ultimate fate of pollutants. Attention is also given to the legal, administrative, and technical aspects of air pollution control.
Prerequisite or Corequisite: ENHS 660.

ENHS 761 - Ecotoxicology of Aquatic Systems (3 Credits)
Lethal and sublethal effects of environmental stressors on organisms living in the water column and in sediments of aquatic systems. Practical techniques of aquatic toxicology, risk assessment and modeling.

ENHS 762 - Fundamentals of Industrial Hygiene (3 Credits)
Industrial hygiene, including health effects, occupational health standards, and the evaluation and control of occupational health hazards.

ENHS 763 - Medical Aspects of Occupational Health (3 Credits)
Emphasizes the medical aspects of exposure to hazardous materials, accidents, and mental and physical stresses on the job. Clinical spectrum of occupational illness with some emphasis on industrial toxicology.

ENHS 764 - Principles, Methods, and Issues in Air Quality (3 Credits)
Fate, transformation, and behavior of pollutants in the atmosphere. Exposure and human health impacts of atmospheric particles.
Prerequisite or Corequisite: ENHS 660.

ENHS 765 - Applied Research in the Environmental Health Sciences (3 Credits)
Current and prospective research associated with the multi-disciplinary areas of environmental health sciences. Critical evaluation of scientific research, and technical writing and oral presentations.

ENHS 766 - Applied Aquatic Sciences (3 Credits)
The quantitative application of principles of basic physical, biological, and geochemical principles in assessing and solving environmental problems in lakes, streams, and wetlands. Emphasis on watershed-water quality interactions, trophic state analyses, wastewater impact prediction, toxic chemical fate and transport, wetland values, and classification.
Prerequisites: ENHS 660, pre-calculus math, general ecology.

ENHS 766L - Applied Aquatic Sciences Laboratory (1 Credit)
Sampling and analysis of the interacting parameters used in assessing water quality and the functioning of aquatic systems.
Corequisite: ENHS 766.

ENHS 767 - Ecological Modeling and Environmental Planning (4 Credits)
Concepts in systems ecology and ecological modeling. Emphasis on the use of models and computer simulations in examining environmental interactions, predicting environmental impact, and facilitating the process of environmental planning. Lab practice in model development and computer simulation analysis.
Prerequisites: MATH 111 or equivalent, ecology, ENHS 660.
Cross-listed course: BIOL 768, MSCI 767

ENHS 768 - Industrial Ventilation and Hazard Control (3 Credits)
Control of chemical and physical hazards in the occupational environment. Course covers principles and design of health protection systems such as ventilation systems, collection mechanisms, control of physical factors (excluding radioactivity).
Prerequisites: college math and ENHS 762 or consent of instructor

ENHS 769 - Exposure and Risk Assessment (3 Credits)
Designing, implementing, and analyzing environmental exposures in the field; error analysis; computation of the value of improved information; hazard identification; dose-response evaluation; and risk characterization.
Prerequisites: MATH 141, CHEM 111 and CHEM 112, and BIOS 700 or STAT 701.

ENHS 770 - Microbial Processes and Pollution (3 Credits)
Microbial processes which alter the fate, bioavailability, and toxicity of environmental pollutants: biotransformations of metals and organic pollutants; resistance mechanisms and roles of microbial biofilms in toxin transfer.
ENHS 771 - Environmental Health Sciences Seminar (1 Credit)
Environmental Health Sciences Seminar is a one credit course that provides the opportunity for graduate students within the department and other related departments/programs to enhance and broaden their knowledge in environmental health by exploring current research and case studies.

ENHS 772 - Human and Ecological Risk Assessment (3 Credits)
Focuses on history, theory, and practice of predicting, managing, and communicating potential human health and environmental risks of hazardous chemicals. Reviews fundamental components and explores uncertainties, probabilistic approaches, and 'real-world' challenges of risk analysis.

ENHS 773 - Radiation Health Physics (3 Credits)
Physics of radiation and associated health hazards; hazard evaluation and measurements; radiation content and protection of the individual. Course covers ionizing radiation, ultraviolet, microwave, lasers, R.F. field, and ultra-sound.
Prerequisites: ENHS 660.

ENHS 774 - Risk Assessment and Interactions of Environmental Toxicants (3 Credits)
A study of biological interactions and transformation of environmental toxicants at the cellular and subcellular levels, and assessment of cellular damage as it relates to health hazards and risks. Topics to include: environmental toxicants; exposure measurements; factors affecting interactions and toxicity; metabolism of xenobiotics: types and levels of effects and interactions; and human health risks.
Prerequisites: ENHS 660.

ENHS 775 - Resource Management and Environmental Impact Assessment (3 Credits)
Prerequisites: BIOL 102 and BIOL 570.

ENHS 776 - Environmental Regulation and Planning (3 Credits)
Introduction to environmental planning. Survey of major federal environmental legislation. Review of processes and techniques of environmental planning including zoning, permits, management plans, assessments, and evaluation methods. Case studies of significant environmental projects.

ENHS 777 - Radiation Biology (3 Credits)
Fundamentals on the biological effects of ionizing radiation on living systems, especially man; basic biological mechanisms which bring about somatic and genetic effects.
Prerequisites: ENHS 660, ENHS 773.

ENHS 778 - Air Pollution Monitoring and Modeling (3 Credits)
Sources, sinks, transport, and transformation of air pollutants. Health effects that occur directly or by intermediate transport. Current monitoring methods and modeling techniques for air pollution.
Prerequisites: one year each of general chemistry and physics.

ENHS 779 - Applied Environmental Physiology (4 Credits)
Lecture and laboratory investigations concerning sublethal and lethal physiological responses of aquatic organisms to a variety of environmental pollutants. Stresses the in-depth understanding of the effects of: bacterial and thermal pollution, pesticides/herbicides, industrial chemicals, hazardous materials, and petroleum hydrocarbons on different physiological mechanisms.
Prerequisites: ENHS 660, ENHS 761.

ENHS 780 - Advanced Seminar in Environmental Modeling (1-2 Credits)
A critical review of recent advances and case histories in the formulation and use of ecological/ environmental models. Ecosystems analysis and environmental planning.

ENHS 781 - Occupational Ergonomics II (3 Credits)
Literature reviews and applications in evaluation of hazards and design of ergonomic interventions including human factors in information processing, design of displays and controls, vibration, macroergonomics, fatigue, and shiftwork.
Prerequisites: ENHS 681.

ENHS 787 - Analytical Concepts for Environmental Health Sciences (3 Credits)
Physical and chemical principles of environmental qualitative and quantitative analysis with emphasis on atmospheric, aquatic, and terrestrial samples. Includes use and limitations of instrumental techniques, sampling strategies, data management and reduction, and quality assurance programs.

ENHS 788 - Concepts of Hazardous Materials Management I (3 Credits)
Chemical and physical principles of multimedia contaminant transport, environmental effects of hazardous materials, statutes and regulations classification, treatment and disposal of hazardous materials.

ENHS 789 - Concepts of Hazardous Materials Management II (3 Credits)
Chemical and physical properties of hazardous materials; use and storage; disposal options; transportation requirements; site safety considerations; management systems involving hazardous materials.
Prerequisites: ENHS 788.

ENHS 790 - Independent Study (1-6 Credits)

ENHS 793 - Special Topics in Environmental Health Sciences (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

ENHS 794 - Introduction to Environmental Science Research (3 Credits)
The course is intended to develop theoretical and practical knowledge in environmental science research. The learning formats will permit focus on areas of interest as a means to develop the research skills for later projects. Guided by focus, students may work in the laboratory, field, and/ or use existing data.

ENHS 795 - Issues in Coastal Environmental Health (3 Credits)
Problems associated with coastal population growth and development. Emphasis is on the working group approach to ameliorating impacts on ecosystem and human health. 03: 07/05/2019.
ENHS 796 - Introduction to Nanoanalytics (3 Credits)
Laboratory based course aimed at developing theoretical and practical knowledge in regards to nanoscience in toxicology and in the environment. Students will perform nanoparticle syntheses, characterization, fate and behavior studies or toxicology exposures. Learning formats will permit focus on areas of interest aimed at developing research skills.

ENHS 797 - Global Environmental Health and Food Security (3 Credits)
Global environmental health with a focus on food security in developing nations, including crop responses to warming, soil changes, more variable precipitation inputs and expanding geographical range of pests.

ENHS 798 - Public Health Practice (1-6 Credits)
Performance of a limited work or service project in a public need setting, pursuit of planned learning objectives related to previously identified aspects of the student’s chosen role. Self-monitoring and regular seminars focusing on learning accomplishments.
Prerequisites: 9-10 hours of specified courses including BIOS 700, EPID 700.

ENHS 799 - Thesis Preparation (1-9 Credits)

ENHS 860 - Environmental Radiation Surveillance (4 Credits)
Technical coverage relevant to a practical evaluation of radiation sources and contaminants in the environment.
Prerequisites: ENHS 773.

ENHS 861 - Aerosol Science (3 Credits)
Physical and chemical principles applied to the behavior and properties of particles suspended in air. Course covers motion under applied forces, electrical properties, diffusion, removal from gas, cloud dynamics, and optical properties.

ENHS 862 - Special Research Topics in Environmental Health Sciences (3 Credits)
Discussion and/or laboratory participation involving techniques used in multidisciplinary research areas of environmental health sciences that have not been covered by other courses. May be repeated for credit on different topics.
Prerequisites: BIOS 700, EPID 700, ENHS 660.

ENHS 863 - Advanced Topics in Environmental Planning (3 Credits)
Detailed analyses of techniques, especially computer simulation modeling, used in environmental assessment and planning. Emphasis will be on the prediction of the ecological effects of development projects. Students will collectively construct a simulation model for the purpose of environmental assessment.
Prerequisites: ENHS 767, ENHS 775.

ENHS 864 - Advanced Graduate Seminar (3 Credits)
Seminar presentation and group discussion by students, faculty, and guest speakers on current topics in environmental health sciences. May be repeated for credit.
Prerequisites: Complete at least two semesters in environmental health sciences and courses to include ENHS 660, ENHS 765.

ENHS 880 - Ethics & Research Prep (1 Credit)
Overview of skills and standards, including ethics and research preparation, for Environmental Health Sciences doctoral students.

ENHS 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: one full year (18 hrs) of graduate study beyond the master's level.

Environmental Health Sciences, M.P.H.

Learning Outcomes

- Define environmental stressors and hazards, and identify sources, pathways of exposure, and ecosystem components and human populations most susceptible to exposure, as well as reasons for community vulnerabilities and disparities in environmental hazard exposure.
- Apply principles of toxicology to identify and quantify acute and chronic hazards associated with individual compounds and contaminant mixtures in terms of ecotoxicology and human health.
- Discuss the basic principles of the environmental fate of contaminants and how they are introduced into the air, water, soil, sediments and food and then transported through the environment and how these processes define exposure.
- Apply toxicological hazard and exposure assessment and statistical techniques in assessing the risks associated with environmental stressor in the home, workplace and community environments and natural settings.
- Express knowledge of important local, state and federal laws that regulate and protect environmental quality and health, and explain the responsibilities of agencies, organizations, communities and individuals for protecting, maintain and enhancing the environment.
- Identify approaches for preventing, mitigating and remediating environmental hazards, protecting populations from environmental hazards, and working with communities to address issues of environmental hazards via pollution source identification and management, health promotion, education, ecological forecasting and behavior modification.
- Review, critique, evaluate and synthesize the scientific merit of environmental health research articles, presentations and evaluate the scientific merit and feasibility of environmental health study designs.
- Apply findings, methods and approaches from case studies to contemporary environmental issues
- Develop assessment tools to measure the effectiveness of environmental or risk management approaches used to prevent or minimize exposure or to reduce the environmental hazard.

Degree Requirements (42-43 Hours)

Environmental Health Sciences, M.S.

Learning Outcomes

- Students are expected to demonstrate an overall mastery of the major concepts and applications of public health principles in environmental health sciences.
- Students are expected to understand and be able to discuss the major concepts and applications of environmental health practice specific to their respective research interest.
- Student will identify major issues and knowledge gaps in a specific area of the environmental health sciences, develop original hypotheses, design a research program, and defend research findings that make significant contributions to the identified issues and knowledge gaps.

Total Credit Hours 31-39

Environmental Health Sciences, Ph.D.

The Ph.D. program in Environmental Health Sciences is designed to prepare students for research careers in the environmental health sciences; graduates are trained for entry into positions in universities, colleges, research institutes and research-oriented settings. Areas of research emphasis correspond to those of the departmental faculty.

Doctoral students complete a program of study that emphasizes professional development, scientific competence, and research expertise. The Ph.D. requires a minimum of 60 hours of course work beyond the baccalaureate and includes 12 credit hours of dissertation preparation. A limited number of graduate course-work hours from a graduate program may be applied toward the Ph.D. with advisory committee approval. A minimum of 30 hours, including 12 hours of dissertation preparation must be unique to the doctoral program of study. Those students entering without a master's degree are required to take additional foundation course work in environmental health sciences equivalent to the master's degree. To achieve doctoral candidate status, students must pass a qualifying examination after the first year of study. Upon completion of all course and language requirements, doctoral candidates must pass an oral and/or written comprehensive examination. All doctoral candidates must prepare and defend a dissertation that represents significant research in their area of advanced study. Doctoral students must demonstrate a reading proficiency in a modern foreign language if deemed necessary by the doctoral advisory committee.

The specific curriculum for the doctoral degree varies with the discipline and some programs require additional credit hours. Students enrolled in a doctoral program have eight years from the first term of enrollment in which to complete the degree. Students must be enrolled for at least one (1) credit during the term of graduation.

Learning Outcomes

- Students are expected to demonstrate an overall mastery of the core concepts of public health as it relates to environmental health sciences and display the ability to extend this understanding to relevancy and application to real-world environmental health sciences issues.
- Students will demonstrate an ability to write competitive research grant proposals.
- Students will demonstrate proficiency in effectively communicating technical and scientific information in oral, written, and web-based formats to scientific and public audience.
- Students will clarify critical gaps in scientific knowledge on environmental health issues and develop and perform original research that will lead to solutions.
- Students are expected to promote and actively participate in the dissemination of environmental health science research results in to further the overall knowledge of the field and broaden and diversify their communication skills.

Degree Requirements (60 Hours)

Specific curriculum requirements for the Ph.D. in the Department of Environmental Health Sciences are listed below.

Total Credit Hours 10-21

Other Program Requirements

Doctoral degree students must complete at least half of the hours on the Program of Study (D-POS) in courses numbered 700 or higher. A dissertation of original research is required. A period of residency, a foreign language or research methods proficiency, a comprehensive examination, and a dissertation defense and examination are also required. The specific curriculum for the doctoral degree varies with the discipline and some programs require additional credit hours. Students enrolled in a doctoral program have eight years from the first term of enrollment in which to complete the degree. Students must be enrolled for at least 1 credit during the term of graduation.

Epidemiology and Biostatistics

Department Website (http://www.sph.sc.edu/epid_bios/default.htm)

Anthony Alberg, Chair

Achieving gains in improving the public's health depends on the ability to identify and solve community health problems. As measurement and research sciences, epidemiology and biostatistics are critical disciplines for the ascertainment and characterization of public health problems.
and generating public health action. Combining epidemiology and biostatistics in the same department creates synergies in education and research. However, the two disciplines are unique and thus the Department is comprised of two divisions: the Division of Biostatistics and the Division of Epidemiology.

The Department of Epidemiology and Biostatistics offers the following degrees: Master of Public Health (M.P.H.) (Epidemiology only), Master of Science (M.S.)*, and Doctor of Philosophy (Ph.D.).

**Program in Epidemiology**

The major in epidemiology is designed for students pursuing careers in the study of patterns of diseases, disabling conditions, and other indicators of health in human populations. The field of epidemiology involves the study of the distribution and determinant of health and disease in human populations, and the application of this knowledge to better prevent and treat disease. Epidemiologists attempt to establish the causes of disease by describing the biological, environmental, social, and behavioral factors affecting illness and premature death, as well as factors that contribute to health and well-being. The evidence generated from epidemiologic research is translated into developing health promotion/disease prevention programs, and formulating health policy. Being an effective epidemiologist requires skills in working in interdisciplinary teams, both in leadership and collaborative roles, whether these teams are focused on advancing research or public health practice.

**Master of Public Health (M.P.H.) in Epidemiology (43 Hours)**

Our Master of Public Health (M.P.H.) degree students learn in a multi-faceted educational program; this includes an integrated core curriculum, epidemiologic and biostatistical methods, and experience and training in a public health practice setting.

**Master of Science (M.S.) in Epidemiology (43 Hours)**

The Master of Science in Public Health (M.S.) degree is designed for those who wish to acquire skills necessary for doing public health or biomedical research and want to focus on developing research skills for clinical research or the study of determinants of disease and other health-related outcomes. If you intend to further your study by pursuing a Ph.D. in Epidemiology, you will want to choose the M.S. rather than the M.P.H. degree.

**Program in Biostatistics**

The program in biostatistics is designed for individuals who wish to pursue careers in community health measurement, design and management of health data systems, and the development and application of quantitative methods to health problems. Biostatisticians apply statistical theory, methods, and techniques to the planning, development, and evaluation of health programs and problems. They collect and analyze various types of information; these include demographic and vital statistics, social and business data, health resources statistics, and other forms of social and economic data which are relevant to modern health problems. Biostatisticians design experiments and observational studies, use various computer operating systems and software packages to store and analyze data, develop methods to compare population groups, and prepare inferential and probabilistic statements based on biological, social, and environmental data. Biostatisticians are the theoretical researchers and applied statisticians of public health.

**Programs Overview**

Doctoral and master’s students in programs in the Department of Epidemiology and Biostatistics gain state-of-the-art knowledge and skills that empower them to function effectively and appropriately in identifying, evaluating, and solving public health problems. Upon completion of the program, the students demonstrate:

- knowledge base of the etiology of disease, disability, and other health conditions
- application of epidemiologic and biostatistical methods in identifying the determinants of disease, disability, and other health conditions
- understanding of the design and conduct of research in public health
- skill in data management and analysis and interpretation of research results in studies to describe the distribution of disease, determinants of disease, and clinical trials to advance disease prevention, screening, and treatment.

Departmental faculty are actively involved in research projects funded by the federal government and other sources. Faculty also contribute their expertise to address public health challenges and contribute to health policy at the local, state, national, and global level. Our degree programs are designed to help students achieve their career goals, whether the goals are an academic research career or a career in public health practice, and whether the preferred setting is in the public sector or in the private sector (such as health systems, pharmaceutical industry, etc.).

**Master’s Degrees**

**Epidemiology**

The broad objective of the M.P.H. with a major in epidemiology is to prepare an individual to apply epidemiologic skills in a public health setting. The M.S.P.H. with a major in epidemiology focuses on the development of basic research skills for the study of correlates and determinants of disease and other health conditions. Students in both M.P.H. and MSPH programs:

- develop an understanding of the integration of epidemiologic research methods into the principles and philosophy of public health
- develop knowledge of the basic epidemiology of commonly studied diseases and other health conditions and health promoting behaviors
- describe the natural history, biology/pathophysiology, risk factors, methods unique to the specific situation, and strategies for disease prevention and control for several diseases or health conditions or health promoting behaviors
- apply descriptive and analytic epidemiologic methods to investigate and identify factors associated with various health conditions
- understand statistical procedures commonly used in public health research and evaluation
- develop expertise in computer applications and usage necessary for successfully managing or conducting epidemiologic studies
- demonstrate ability to manage and summarize health-related data and statistics and to calculate and appropriately interpret associations and their relevance to public health
- develop skills in presenting demographic, statistical, programmatic, and scientific data accurately and effectively for professional and lay audiences.

In addition, the M.P.H. student will develop an understanding of concepts, methods of implementation, and evaluation of health surveillance systems and demonstrate the ability to integrate epidemiologic concepts
and analytic approaches to the study of a specific health problem by working with a mentor in a practice setting, preparing a written report, and giving an oral presentation to professionals who will be using the information generated. The MSPH student will demonstrate the ability to synthesize the current state of knowledge of a specific problem, critically evaluate findings, develop appropriate research questions to advance the field, and develop and implement a simple research protocol aimed at testing an epidemiologic hypothesis or estimating an effect of a risk factor on a health outcome and report results in a form suitable for dissemination to the scientific community. Both the M.P.H. and the MSPH require a minimum of 43 hours.

Biostatistics
The broad objective of the M.P.H. with a major in biostatistics is to provide opportunities for experienced professionals to expand their analytic and investigative skills in the application of biostatistical principles and techniques. The MSPH with a major in biostatistics provides the biostatistical concepts, principles, and skills necessary for scientific inquiry into health conditions and related methodological developments. Students in both programs develop the capacity to:

1. demonstrate the ability to evaluate a given health-related problem and to identify the most appropriate statistical technique for analysis
2. display mastery of a variety of traditional and newly developed statistical techniques, including multivariable methods for continuous and categorical data analysis
3. demonstrate the ability to interpret the results of a statistical analysis and to communicate such interpretations in an easily comprehensible manner
4. demonstrate knowledge of academic and non-academic issues and problems in epidemiology and biostatistics
5. demonstrate the ability to structure available data in an easily usable form using a variety of data management software tools
6. demonstrate the ability to use a variety of statistical software packages, to create and maintain databases, and to analyze data

In addition, students in the M.P.H. program will demonstrate the ability to apply analytic epidemiologic methods used to investigate health conditions, gain exposure to a wide variety of public health topics, and develop a basic understanding of the philosophy of public health practice, display the ability to apply an existing statistical technique to a current problem or question faced by a health agency, and demonstrate the ability to interpret the results of a statistical analysis, and to explain those results in understandable terms to public health practitioners. Students in the MSPH program will demonstrate the ability to work independently in a research problem outside of the classroom setting, and demonstrate the ability to modify and extend existing statistical techniques to answer questions posed by health related situations, and to synthesize such research results into acceptable research papers. The M.P.H. requires a minimum of 54 credit hours.

Master of Public Health (M.P.H.) in Epidemiology (43 Hours)
Our Master of Public Health (MPH) degree students learn in a multi-faceted educational program; this includes an integrated core curriculum, epidemiologic and biostatistical methods, and experience and training in a public health practice setting. In Fall 2019, the Arnold School of Public Health will launch our exciting redesigned MPH programs integrated across the public health disciplines. More details are available at - http://sph.sc.edu/mph.

Master of Science in Public Health (M.S.P.H) in Epidemiology (43 Hours)
The Master of Science in Public Health (MSPH) degree is designed for those who wish to acquire skills necessary for doing public health or biomedical research and want to focus on developing research skills for clinical research or the study of determinants of disease and other health-related outcomes. If you intend to further your study by pursuing a Ph.D. in Epidemiology, you will want to choose the MSPH rather than the MSPH degree.

Master of Public Health (M.P.H.) in Biostatistics
This program is not accepting applications at this time.

Master of Science in Public Health (M.S.P.H) in Biostatistics (45 Hours)
The Master of Science in Public Health (MSPH) degree in Biostatistics prepares students for involvement in biostatistical research, including applying statistical theory to health problems, formulation of designed population and clinical intervention trials, and adapting existing statistical theory to address newly emerging health-related problems.

Doctoral Degrees
The Doctor of Philosophy is an advanced graduate research degree designed for those who intend to pursue teaching and research careers. The major objective of the Ph.D. degree with a concentration in epidemiology is to prepare an individual to pursue original epidemiologic investigation of diseases of unknown etiology and other health conditions or health behaviors and develop novel methodological approaches. The major objective of the Ph.D. program with a concentration in biostatistics is to prepare an individual to develop and apply biostatistical principles and methods to public health problems.

Doctor of Philosophy (Ph.D.) in Epidemiology (54 Hours)
The Doctor of Philosophy (Ph.D.) is an advanced graduate degree for those who intend to pursue teaching and research careers. The major objectives are to prepare you to:

1. pursue original epidemiologic research,
2. develop novel methodological approaches,
3. teach epidemiologic methods courses, and
4. consult with non-epidemiologists in a collaborative research setting.

Doctor of Philosophy (Ph.D.) in Biostatistics (54 Hours)
The Doctor of Philosophy (Ph.D.) degree in Biostatistics prepares students for involvement in teaching and independent and collaborative biostatistical research; trains researchers to teach and to pursue original research on analytical approaches to investigating health conditions; and to develop novel biostatistical approaches.

Doctor of Public Health (Dr.P.H.) in Biostatistics (60 Hours)
The Doctor of Public Health degree in biostatistics is an advanced degree for experienced health professionals. It is designed to prepare practicing professionals in the application of research methods and to provide them with a broad knowledge base for solving public health problems. Students in this degree program will have an application area in which to apply biostatistical methods.

Dual Ph.D. Degree Program in Epidemiology and Environmental Health Sciences
The Department of Epidemiology and Biostatistics and the Department of Environmental Health Sciences jointly offer a dual Doctor of Philosophy (Ph.D.). Students explore the unique set of requirements in relation to study design, bias, measurement of environmental exposures,
and measurement of environmental-related health outcomes. The dual Ph.D. requires course work in epidemiology and environmental health sciences selected by the student in consultation with a joint epidemiology/environmental health sciences advisory committee, and successful completion of dissertation research on a topic spanning both disciplines. The successful applicant will have a faculty member in both departments who has agreed to be his/her mentor, and he/she will have a research area of Interest for which we have faculty expertise in both departments. Detailed program requirements for this highly competitive, rigorous dual degree program are available upon request.

Program Requirements for Epidemiology Degree Programs
A graduate student handbook and a list of specific courses needed to meet these requirements are available in the department.

Program Requirements for Biostatistics Degree Programs
A graduate student handbook and a list of specific courses needed to meet these requirements are available in the department.

Department Admission Requirements

**General Admission Requirements for Epidemiology**
Admissions decisions are based on an evaluation of the applicants’ entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources. We review master’s degree applications once/year for fall matriculation, and we review doctoral student applications twice/year for fall and spring matriculation.

Applicants for graduate degree programs in Epidemiology must meet all requirements of The Graduate School (https://www.sc.edu/study/colleges_schools/public_health/apply/graduate_applicants/) for admission and the Arnold School of Public Health (https://www.sc.edu/study/colleges_schools/public_health/apply/graduate_applicants/). All applications are submitted through SOPHAS (http://www.sophas.org/), with the following required documents:

- Resume or CV
- Three letters of recommendation from academic and/or professional sources
- Official transcripts from all schools or colleges previously attended
- GPA 3.0 or higher (4.0 scale)
- GRE scores 50% or higher for each: Verbal, Quantitative, Analytical Writing
  - MCAT scores may not be substituted for GRE scores.
  - The percentiles above are general guidelines not cut points.
- Personal statement describing your academic and research interests and professional goals.
  - Master’s applicants should discuss how they became interested in epidemiology as a career choice.
  - Doctoral applicants must discuss their research area of interest along with the faculty member who has agreed to mentor them.
- Non-US institution transcripts must be verified by World Education Services (WES) or equivalent service. Submit course-by-course evaluation (WES ICAP).
- For those whose native language is not English, we require either a TOEFL (minimum 80) or IELTS (minimum 7.0) score.

**Masters Admission Requirements**
The Master of Public Health (M.P.H.) program and the Master of Science (M.S.)* program matriculate one cohort of students every fall. Admission requirements include a four-year baccalaureate degree or its equivalent from an accredited institution, preferably in the arts, sciences, or medicine. Prior professional work experience is considered an asset but is not a requirement.

Students admitted to either the M.P.H. or the M.S. program who do not have academic or professional experience that provides a strong understanding of the biological basis of public health are strongly encouraged to select courses that will provide this understanding.

*Note: The Master of Science in Public Health degree in epidemiology will undergo a name change. Effective Fall 2021, the new name for the degree program is Master of Science (M.S.). The curriculum remains the same.

**Doctoral Admission Requirements**
For the Doctor of Philosophy (Ph.D.) program, applicants must have a master’s degree in public health from an approved school of public health or related field or an equivalent advanced professional degree.

Before an application is reviewed, students must find an epidemiology faculty member in their research area of interest who agrees to be their mentor. This agreement should be mentioned in the personal statement. A holistic approach to application review process is utilized.

Research experience and publications are not required; however, prior experience is highly encouraged along with publications, including first author.

**Admission Requirements for Biostatistics**
Applicants for a graduate degree in Biostatistics must have a degree from an approved college or university. Applicants must meet all requirements of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

When we make our admissions decisions, we evaluate the applicant’s entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources.

The admission criteria for all degree programs follow those of The Graduate School and the Arnold School of Public Health. Before you can be considered for admission, you must submit an Online Application via http://www.sophas.org. Your application must include:

- Completed Application submitted through SOPHAS — http://www.sophas.org
- At least two letters of recommendation for the MPH and MSPH programs and at least three letters of recommendation for the PhD program
- An updated Résumé or CV
- Official transcripts for all undergraduate and graduate work previously undertaken
- Official copies of Graduate Record Examination (GRE) scores
- A personal statement that addresses research or practice interests and long-term objectives

Candidates for all graduate programs in Biostatistics must demonstrate proficiency in communicating in English, working with mathematical
concepts, and in thinking analytically. While we do not set absolute cut points for grade point average and GRE scores (in part because of variability in test-taking ability that may not reflect competence to do well in the programs, and the fact that the percentile scores vary by year) we value their ability to provide us with global comparative criteria. Therefore, we provide the following as a general guideline for all our programs:

- Grade point average of 3.0
- GRE Verbal score > 151 (International students whose GRE Verbal score is > 146, and whose TOEFL score is at least the minimum defined below, will also be considered)
- GRE Quantitative score > 157 for the M.S.P.H. program and > 161 for the Ph.D. program

Committee members review the entire files carefully. Clear demonstration of competence in one or more domain(s) can supersede specific GRE score(s)

An electronic application packet should be submitted to SOPHAS as early as possible, and will not be processed until all the required credentials have been received and verified. Electronic applications can be submitted online. For information on how to apply electronically see the Arnold School of Public Health's admissions website.

International applicants whose native language is not English and who have not earned a degree in an English-speaking country are also required to submit a satisfactory score on the Test of English as a Foreign Language (TOEFL) or the University of Cambridge's International English Language Testing System (IELTS) Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 230 (computer-based) or 570 (paper-based) or 75 (Internet-based). The minimum acceptable overall band score on the IELTS Academic Course Type 2 exam is 6.5. Proficiency in English sufficient to undertake graduate study is expected upon entry. Students who do not meet proficiency levels established by the Graduate School and the department will be expected to take additional work to raise their level of performance. Also, any transcript from a non-US institution will need to be verified by World Education Services (WES). WES is an organization that provides international credential evaluation and checks documents for validity and accuracy. WES also offers an analysis of an individual's degrees and transcripts and will provide equivalents for each credential. For more information contact WES at http://www.wes.org or 212-219-7330.

Masters Admission Requirements

Departmental courses are sequenced so that students may begin their program of study in the fall semester. However, applications for spring admission will be accepted.

Applicants to the Master of Science in Public Health (M.S.P.H.) program must have a baccalaureate degree in arts, science or medicine. Applicants should also have completed with a B or greater Calculus-2 and Matrix or Linear Algebra. Prior professional work experience is considered an asset but is not a requirement.

Students admitted to the M.S.P.H. program who do not have academic or professional experience that provides a strong understanding of the biological basis of public health are strongly encouraged to select courses that will provide this understanding.

‡Note: Master of Science in Public Health degrees in biostatistics will undergo a name change. Effective Fall 2021, the new name for the degree program is Master of Science (M.S.). The curriculum remains the same.

Doctoral Admission Requirements

Departmental courses are sequenced so that students may begin their program of study in the fall or spring semester. Applications for summer admission will also be accepted.

For the Doctor of Philosophy (Ph.D.) program, preference for admission is given to applicants with breadth and depth of academic preparation in Biostatistics, Statistics, or a closely related field. Applicants must have a master's degree in one of these areas, or a master's degree in some other field and experience in these areas. Applicants should also have completed with a B or greater Vector Calculus and Matrix or Linear Algebra.

Programs

- Biostatistics, M.P.H. (p. 1176)
- Biostatistics, M.S.P.H. (p. 1179)
- Biostatistics, Ph.D. (p. 1180)
- Epidemiology, M.P.H. (p. 1182)
- Epidemiology, M.S.P.H. (p. 1183)

Courses

BIOS 650 - Quantitative Methods in the Health Sciences (3 Credits)
Designed for professionals and pre-professionals who wish to utilize quantitative methods in public and private decision-making; exploratory data analysis, research methods in natural and controlled environments, and elementary biostatistical methods.
Prerequisites: STAT 201.

BIOS 700 - Introduction to Biostatistics (3 Credits)
Health-related statistical applications. Descriptive statistics, probability, confidence intervals, hypothesis testing, regression, correlation, ANOVA. May not be used as part of a degree program in epidemiology or biostatistics. Three lecture hours and one laboratory hour per week.

BIOS 701 - Concepts and Methods of Biostatistics (3 Credits)
Descriptive and inferential statistical applications to public health. Probability, interval estimation, hypothesis testing, measures of association. Three lecture hours and one laboratory hour per week. Intended for those who will be involved in research applications of biostatistics.

BIOS 709 - Basic Software for Public Health (1 Credit)
Working with public health data using statistical software. Effective ways to store, clean, merge, and format public health data for analysis.

BIOS 710 - Effective Data Management for Public Health (3 Credits)
Statistical data management techniques. Microcomputer applications, communication between microcomputers and mainframe, tape and disk storage, access of large health-related databases.
Prerequisite or Corequisite: BIOS 700.
BIOS 711 - Introduction to R Programming (1 Credit)
Students will learn the software program R for performing data management. The course covers basic to advanced commands for properly formatting output, merging data, working with functions, graphing, using programming loops for preparing data for analysis for public health data.

BIOS 712 - Introduction to Stata Software (1 Credit)
Students will learn the software program Stata for performing data management. The course covers basic to advanced commands for properly formatting output, merging data, working with functions, graphing, using programming loops for preparing data for analysis for public health data.

BIOS 714 - Introduction to MS Access for Public Health (1 Credit)
This course focuses the uses of Microsoft Access for data management in public health. The course takes the student through building tables, forms, queries, reports and finishes with automated scripts for each of use with Access.

BIOS 719 - Advanced SAS Methods for Public Health (1 Credit)
This course focuses on advanced programming for managing and analyzing data using SAS. Building upon skills learned in BIOS 709 (Introduction to SAS), students will learn data management using PROC SQL. Students will also become familiar with the SAS Macro Language which prepares data for conducting efficient statistical analysis.

BIOS 745 - Seminar in Biostatistics (1-2 Credits)
Analysis of current and prospective issues in biostatistics, including historical foundations. Includes student exploration of unsolved problems and examination of central issues in biostatistics.

BIOS 746 - Introduction to Complex Survey Data Analysis (1 Credit)
Students will learn the basics of data collection methods, sampling design for linear, logistic, and survival analysis complex models using survey data. Students will also learn about weight adjustments, imputation methods with an emphasis on both applied models and the theory behind them.
Prerequisites: BIOS 701 and BIOS 709 or equivalent.

BIOS 748 - Surgery and Emergency Medicine (2 Credits)
Specialized medical topics in emergency and surgical medicine.

BIOS 751 - Health Data Systems (3 Credits)
Origin and operation of databases serving governmental and institutional policy and management of programs.
Prerequisites: BIOS 700, HSPM 700.

BIOS 752 - Vital Record and Health Survey Data Analysis (3 Credits)
Accessing, managing, analyzing, and interpreting results from state and national vital records and health survey data sets. Common problems, programming techniques, and analytic considerations.
Prerequisites: BIOS 700, BIOS 710, EPID 700.

BIOS 753 - Community Health Studies (3 Credits)
Process, skills, and management of undertaking health studies in the human community.
Prerequisites: BIOS 700, EPID 700.

BIOS 754 - Discrete Data Analysis (3 Credits)
Analysis of discrete data in public health studies. Relative risk, odds ratio, rates and proportions, contingency tables, logistic regression, introduction to other advanced topics. Not for biostatistics majors.
Prerequisites: EPID 701, BIOS 710, BIOS 757.

BIOS 755 - Introduction to Longitudinal Data Analysis (3 Credits)
Introduction to principles and methods for longitudinal & multi-level modeling. Focus on data analysis and interpretation.
Prerequisites: BIOS 757.

BIOS 757 - Intermediate Biostatistics (3 Credits)
Public health applications of correlation, regression, multiple regression, single and multi-factor analysis of variance and analysis of covariance.
Prerequisites: a course in introductory statistics.

BIOS 758 - Advanced Linear Models in Biostatistics (3 Credits)
Public health applications of correlation, regression, multiple regression, single and multi-factor analysis of variance and analysis of covariance. Additional topics in analysis of health data including regression diagnostics, multi-collinearity of observational data, ridge/nonlinear regression, principal components, random/mixed effects, unbalanced designs, repeated measures and sampling and design effects.
Prerequisites: BIOS 701.

BIOS 759 - Theory and Methods of Discrete Data Analysis (3 Credits)
The concepts, principles, and biostatistical techniques necessary to analyze categorical epidemiological data including dose response curves, life tables, and discrete measures of association. Estimation of parameters for logistic and other commonly used epidemiological models.
Prerequisites: EPID 701, BIOS 757.

BIOS 760 - Biostatistical Methods in Clinical Trials (3 Credits)
The basic and advanced statistical techniques necessary for the design, conduct, analysis, and interpretation of results of clinical trials.
Prerequisites: EPID 741, BIOS 757.

BIOS 761 - Survival Analysis (3 Credits)
Methods for the analysis of survival data in the biomedical setting. Underlying concepts; standard parametric and nonparametric methods for one or several samples; concomitant variables and the proportional hazards model.
Prerequisites: BIOS 757 or BIOS 758.

BIOS 762 - Biostatistical Modeling of Genomic Data (3 Credits)
This course is an introduction to important topics and key concepts in statistical genetics, with emphasis on statistics methods and their applications to human complex diseases. The course will cover major concepts and classical statistical methods for the analysis of family and population based human genetic data.
Prerequisites: BIOS 757 or equivalent.

BIOS 765 - Research Design in the Biomedical Sciences (3 Credits)
Fundamentals of constructing, analyzing, and interpreting biomedical studies; internal and external validity, sample size determination, completely random designs, blocking crossover designs, factorial designs, confounding, nested designs, repeated measure designs.
Prerequisites: EPID 741, BIOS 757.

BIOS 770 - Applied Longitudinal Data Analysis (3 Credits)
Modern methods for the analysis of repeated measures, correlated outcomes, and longitudinal data, including repeated measures ANOVA, generalized linear models, random effects, and generalized estimating equations.
Prerequisites: BIOS 757 or STAT 701 or STAT 705.

Cross-listed course: STAT 771
BIOS 775 - Biostatistical Aspects of Bioinformatics (3 Credits)
Bioinformatics analyses related to public health and biomedical research. Gene-gene and gene-environment interaction, phylogeny analysis in disease classification, and clustering for expression data. Data analyses, simulation studies, algorithms, and interpretation of health data.
Prerequisites: BIOS 757.

BIOS 780 - Introduction to Quantile Regression (3 Credits)
Principles and methods of quantile regression, a robust and distribution-free statistical approach that extends the classical mean regression to the analysis of complex treatment effects.
Prerequisites: BIOS 757.

BIOS 790 - Independent Study (1-6 Credits)
Directed research on a topic to be developed by M.P.H. or M.S.P.H. student and instructor. May be repeated.

BIOS 794 - Selected Topics in Biostatistics (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

BIOS 798 - Public Health Practice (1-6 Credits)
Performance of a limited work or service project in a public need setting, pursuit of planned learning objectives related to previously identified aspects of the student's chosen role. Self-monitoring and regular seminars focusing on learning accomplishments.
Prerequisites: 9-10 hours of specified courses including EPID 700, BIOS 700.

BIOS 799 - Thesis Preparation (1-9 Credits)
BIOS 805 - Categorical Data Analysis (3 Credits)
Prerequisites: BIOS 759 or STAT 704.

Cross-listed course: STAT 770

BIOS 808 - Environmetrics (3 Credits)
Statistical methods for environmental and ecological sciences, including nonlinear regression, generalized linear models, spatial analyses/kriging, temporal analyses, meta-analysis, quantitative risk assessment.
Prerequisites: BIOS 757 or BIOS 701 or STAT 705.

Cross-listed course: STAT 708

BIOS 809 - Environmetrics II (3 Credits)
Theoretical underpinnings of environmetrics. Spatial statistics, temporal and longitudinal analysis, hierarchical modeling, and Bayesian inferences for environmental data.
Prerequisites: STAT 708 or BIOS 808; STAT 714.

Cross-listed course: STAT 709

BIOS 811 - Survival Analysis II (3 Credits)
Parametric survival analysis, accelerated failure time model, frailty model, competing risk mode and multi-state model. Techniques motivated by applications in epidemiology and clinical medicine research, applications demonstrated using public health data sets.

BIOS 815 - Generalized Linear Models (3 Credits)
Statistical theory and applications extending regression and analysis of variance to non-normal data. An integrated treatment encompassing logistic and other binary regressions, log-linear models, and gamma regression models.
Prerequisites: STAT 713 or STAT 513 and STAT 705 or BIOS 757.

Cross-listed course: STAT 775

BIOS 816 - Advanced R Programming in Public Health (3 Credits)
R is a free and open source software environment for statistical computing and graphics. This course provides the principles and techniques to efficiently design, implement, and execute simulation and data analysis routines in quantitative fields like biostatistics, statistics, engineering, finance, and data science.
Prerequisites: BIOS 711.

BIOS 820 - Bayesian Biostatistics and Computation (3 Credits)
Bayesian statistical methods including hierarchical modeling and the use of the Markov Chain Monte Carlo (MCMC) methods.
Prerequisites: STAT 705 or BIOS 757.

BIOS 822 - Statistical Methods in Spatial Epidemiology (3 Credits)
A comprehensive introduction to the statistical methods used in the analysis of geo-referenced spatial health data. Topics range from disease mapping to prospective surveillance.
Prerequisites: BIOS 757 and BIOS 759.

BIOS 825 - Multivariate Biostatistics (3 Credits)
Analysis of multivariate data as found in biomedical studies: multivariate linear models, principal component analysis, factor analysis, discriminant and cluster analysis. Other special multivariate topics such as principal component regression.
Prerequisites: STAT 516 or BIOS 757.

BIOS 845 - Doctoral Seminar (1-3 Credits)
May be repeated for credit.
Prerequisites: complete at least one semester of course work and consent of instructor.

BIOS 850 - Binary Dose Response Theory and Methods (3 Credits)
Threshold, mass action and target theory; empirical dose response functions; methods in current use among health science researchers.
Prerequisites: STAT 512.

BIOS 890 - Independent Study (1-3 Credits)
Directed research on a topic to be developed by doctoral student and instructor. May be repeated.

BIOS 894 - Selected Topics in Biostatistics (3 Credits)
Discussion on current and emerging issues in biostatistics.

BIOS 898 - Doctor of Public Health Practicum (1-6 Credits)
Students are required to conduct applied public health methods and strategies as a part of their practicum experience. In particular, the student should successfully implement and interpret the results of biostatistical methods in the organization.

BIOS 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: one full year (18 hours) of graduate study beyond the master's level.
EPID 594 - Special Topics in Epidemiology (1-6 Credits)
This course will introduce epidemiologic concepts and methods using cases studies examining current global health challenges. Students will gain an understanding of the role of epidemiology in understanding the distribution of disease and risk factors, and developing, implementing and evaluating public health interventions globally.

EPID 661 - Parasitology (4 Credits)
Parasites of biological, economic, and public health importance. Three lecture and three laboratory hours per week.
Prerequisites: 300 level Biology course or equivalent.

Cross-listed course: BIOL 531, ENHS 661

EPID 700 - Introduction to Epidemiology (3 Credits)
Principles of epidemiology with examples of selected health problems. Health status of populations and conceptual tools for translating epidemiologic findings into public health action. May not be used as part of a degree program in epidemiology or biostatistics.

EPID 701 - Concepts and Methods of Epidemiology (3 Credits)
Conceptual foundation of epidemiologic research, quantitative methods, and epidemiologic study design. Intended for those who will be involved in epidemiologic research.
Prerequisite or Corequisite: BIOS 701.

EPID 707 - Ethical Issues in Health Care and Research (3 Credits)
The ethical dimensions of decision making in health care delivery, administration and epidemiologic research. Provides ethical foundations for discussion of topics in health-related research and practice.
Cross-listed course: HSPM 707

EPID 711 - Epidemiologic Research Methods (3 Credits)
Theoretical and practical aspects of epidemiologic research methods.
Prerequisites: EPID 700

EPID 720 - Comprehensive Microbiology (6 Credits)
Prerequisites: consent of the instructor.

EPID 721 - Clinical and Population Research Protocol Development and Implementation (2 Credits)
The purpose of this course is to develop applied research skills related to the development of appropriate data collection protocols for a given public health issue and context.

EPID 722 - Scientific Writing and Appraisal of Epidemiologic Studies (2 Credits)
This course will familiarize students with techniques used to critically assess, interpret, evaluate, and synthesize epidemiologic literature. Students will be introduced to research databases, reference management software, reporting guidelines, and methods for systematic reviews. Students will learn how to effectively communicate research findings via manuscript and oral or poster format.
Prerequisites: EPID 700, EPID 701 or PUBH 725.

EPID 725 - Biologic Basis of Public Health (3 Credits)
Survey of the biology of human disease processes at cellular, tissue and body system levels: application of biological principles to contemporary public health problems.

EPID 730 - Public Health Surveillance Systems (3 Credits)
Introduction to the concepts, implementation, and evaluation of surveillance systems to monitor the health of human populations.
Prerequisites: EPID 701, PUBH 725, or equivalent course

EPID 741 - Intermediate Epidemiologic Methods (3 Credits)
Application of epidemiologic methods to current health problems through analysis of secondary data. Strategies for investigating etiologic hypotheses, assessment and control of confounding.
Prerequisites: EPID 701, PUBH 725, or equivalent.

Prerequisite or Corequisite: BIOS 757, BIOS 758 and BIOS 709, BIOS 710.

EPID 742 - Epidemiological Concepts in Selected Disease or Health Conditions (3 Credits)
The study of selected disease or health conditions illustrative of the interaction between host/agent/environment and the factors involved; and the application of epidemiologic methods to the investigation of such events. Two lecture and three laboratory hours per week.
Prerequisites: EPID 701.

EPID 743 - Nosocomial Disease Control (3 Credits)
Specialization in the identification of potential or existing health hazards in institutional settings of the health care system; and includes instruction in the application of scientific knowledge to the daily routines in the implementation of appropriate control behaviors. Two lecture and three laboratory hours per week.
Prerequisites: BIOS 700, EPID 700, EPID 742.

EPID 744 - Cardiovascular Disease Epidemiology (3 Credits)
Epidemiology of selected groups of cardiovascular diseases (CVD) including etiology, pathophysiology, identification and description of events of CVD, and outcomes.
Prerequisites: EPID 701, PUBH 725.

EPID 745 - Seminar in Epidemiology (1-2 Credits)
Analysis of current and prospective issues in epidemiology, including historical foundations. Includes student exploration and critical consideration of current research and unsolved problems in epidemiology.

EPID 746 - Cancer Epidemiology (3 Credits)
Epidemiology of selected cancers in humans, including etiology, pathophysiology, identification and description of events of cancer and outcomes.
Prerequisites: EPID 700.

EPID 747 - Environmental Epidemiology (3 Credits)
Emphasis on the epidemiology of selected environmental factors which may affect human health including the identification of health hazards and methods of investigation. Two lecture and three laboratory hours per week.
Prerequisites: EPID 700, BIOS 700.

EPID 748 - Epidemiologic Evaluation of Preventive and Personal Health Care (3 Credits)
Emphasis is on the use of epidemiologic methods and principles in the selection, design, and implementation of evaluation strategies in preventive and personal health service practice areas. Current models and strategies of evaluation appropriate to public health practice will be analyzed and compared. The student is expected to develop and implement an evaluation design. Two lecture and three laboratory hours per week.
Prerequisites: EPID 700, BIOS 700.
EPID 749 - Infectious Diseases Epidemiology (3 Credits)
Emphasis on epidemiological principles and methods basic to investigation, prevention and control of a variety of bacterial, viral, parasitic, and fungal diseases of public health importance.
Prerequisites: EPID 700 and BIOS 700.

EPID 750 - Methods in Infectious Disease Epidemiology (3 Credits)
Quantitative methods for the study of infectious disease dynamics, including study design and analysis, mathematical modeling, computer simulation, and phylogenetic inference.
Prerequisites: EPID 741 and EPID 749.

EPID 751 - Sexually Transmitted Diseases: Their Epidemiology and Control (3 Credits)
A study of the epidemiology of the various sexually transmitted diseases and their complications, with emphasis on their prevention and control.
Prerequisites: EPID 700 and BIOS 700.

EPID 752 - Epidemiology and Control of Parasitic Diseases of Public Health Importance (3 Credits)
Study of major parasitic diseases of public health importance. Emphasis on epidemiologic principles and patterns of human morbidity and mortality. Analyzes and evaluates various approaches in prevention and control programs.
Prerequisites: EPID 700, BIOS 700, and ENHS 661.

EPID 753 - AIDS: Epidemiology and Control (3 Credits)
A study of the epidemiology of Acquired Immunodeficiency Syndrome (AIDS) and its various implications and issues with emphasis on its prevention and control.

EPID 754 - AIDS Seminar (1 Credit)
Critical analysis of current scientific literature on various aspects and issues on Acquired Immunodeficiency Syndrome (AIDS).

EPID 755 - Emerging Infectious Diseases: Epidemiology and Pathobiology (3 Credits)
Principles and factors in emerging infectious diseases with emphasis on epidemiology, pathobiology, prevention, and control.
Prerequisites: EPID 749.

EPID 757 - Epidemiologic Applications to Occupational Health (3 Credits)
Introduction to clinical and epidemiologic aspects of occupational health and recognition and prevention of occupational diseases and injury. Epidemiologic applications to occupational health are highlighted and stressed, including design and implementation.
Prerequisites: EPID 700 or EPID 701.

EPID 758 - Application of Epidemiology in Public Health (3 Credits)
The course consists of the development of research skills in epidemiology in the context of public health.
Prerequisites: EPID 701, EPID 741.

EPID 760 - Epidemiological Methods in Clinical Trials (3 Credits)
Fundamental and practical issues related to the design, conduct, analysis, and interpretation of results of clinical trials.
Prerequisites: EPID 700, BIOS 700, EPID 741.

EPID 763 - Nutritional Epidemiology (3 Credits)
Covers methodology for investigating nutrition’s role in health, including nutritional assessment and the design and interpretation of research studies. Substantive issues emphasize major public health concerns of the 21st century.
Prerequisites: EPID 701, PUBH 725, or equivalent.

EPID 765 - Reproductive and Perinatal Epidemiology (3 Credits)
Epidemiology of reproductive and perinatal health with emphasis on current research, controversial issues and methodological approaches.
Prerequisites: EPID 701, PUBH 725, or equivalent course, BIOS 701.

EPID 767 - GIS and Public Health Applications (3 Credits)
Principles and application of basic and intermediate-level GIS technologies in public health practice and research.

EPID 768 - Psychiatric Epidemiology (3 Credits)
Methodologic issues in the epidemiologic study of psychiatric disorder, the epidemiology of major psychiatric outcomes, and issues in the study of special populations.
Prerequisites: EPID 701, PUBH 725, or equivalent course.

EPID 770 - Social Epidemiology (3 Credits)
Influence of social factors and the distribution of those factors on patterns of health and disease. Including individual-level examinations of the role of social determinants in producing health, as well as more macro-level examinations of patterns of social disparities in health status.
Prerequisites: EPID 701, PUBH 725, or equivalent course.

EPID 777 - Genetic and Epigenetic Epidemiology (3 Credits)
An introduction to genetic and epigenetic epidemiology and application of epidemiological tools, including statistical analyses, to the study of the genome and the epigenome in human populations.

EPID 785 - Laboratory Practice in Clinical Microbiology (3-6 Credits)
Laboratory practice in the subdisciplines of clinical microbiology. May be repeated for a total of 18 hours.
Prerequisites: EPID 700, EPID 742, BIOS 700, MBIM 720.

EPID 788 - Practical Methods for Secondary Data Analysis (3 Credits)
Introduction to data sources and methods commonly used by epidemiologists and health analysts in state or federal health departments and research settings. Methods include data management and analysis using SAS, data interpretation, survey designs, and innovative record linkages. Instructor reserves the right to waive course requirements.
Prerequisites: BIOS 700 BIOS 701; EPID 700 EPID 701; BIOS 757 BIOS 758, BIOS 754.

Prerequisite or Corequisite: EPID 741 or other equivalent research methods class.

EPID 790 - Independent Study (1-6 Credits)
Directed research on a topic to be developed by M.P.H. or M.S.P.H. student and instructor. May be repeated.

EPID 794 - Selected Topics in Epidemiology (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

EPID 796 - Integrated Learning Experience (1 Credit)
Demonstrate synthesis of MPH foundational and concentration competencies to address a public health issue in the form of a high-quality written product.
EPID 798 - Epidemiology Applied Practicum (2 Credits)
Apply and test public health concepts, theories, and analytical tools learned in the classroom to real-world public health issues outside of the classroom in any one of a variety of settings.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, and PUBH 735.

EPID 799 - Thesis Preparation (1-9 Credits)

EPID 800 - Advanced Methodological Theory in Epidemiology (3 Credits)
Advanced epidemiologic methods in the design of epidemiologic studies, with emphasis on causal inference. Theories and frameworks of causation and interactions between causes and graphical visualization tools.
Prerequisites: EPID 741.

EPID 801 - Advanced Analytic Methods in Epidemiology (3 Credits)
Extension of research design and development issues with focus on grant writing.
Prerequisites: EPID 800.

EPID 802 - Grant Writing for Epidemiologists (3 Credits)
Extension of research design and development issues with focus on writing a major research grant application.
Prerequisites: EPID 741.

EPID 810 - Seminar in the Epidemiology of Trauma (3 Credits)
Seminar presentation and group discussion on the major issues in the study of trauma associated with accidents, injuries, or violence.
Prerequisites: EPID 741, BIOS 759.

EPID 820 - Seminar in the Epidemiology of Health Effects of Physical Activity (3 Credits)
Seminar presentation and group discussion on the major issues in the study of physical activity and exercise and their impact on health.
Prerequisites: EPID 700.

EPID 830 - Seminar in the Epidemiology of Aging (3 Credits)
Exploration in depth of theories, current health problems, research, and methodological issues in the epidemiology of aging.

EPID 844 - Advanced Cardiovascular Disease Epidemiology: Evidence Synthesis and Evaluation (3 Credits)
Epidemiology of cardiovascular disease and its risk factors, with a focus on evidence synthesis through systematic reviews.
Prerequisites: EPID 701.

EPID 845 - Doctoral Seminar (1-3 Credits)
May be repeated for credit.
Prerequisites: complete at least one semester of course work.

EPID 847 - Advanced Environmental Factors and Human Health (3 Credits)
Advanced methods encompassing the investigation of environmental factors and how they affect human health. Emphasis on reading and interpreting the peer reviewed scientific literature and developing a systematic literature review and grant proposal.
Prerequisites: EPID 700 EPID 701 and BIOS 700 BIOS 701.

EPID 865 - Methods in Reproductive & Perinatal Epidemiology (3 Credits)
This course provides an overview of reproductive and perinatal epidemiology and the applications in the field of Maternal and Child Health. It covers the current and emerging topics in this area. Designed for doctoral students with interests in conducting research related to reproductive and perinatal epidemiology.
Prerequisites: EPID 700 EPID 701 and BIOS 700 BIOS 701.

EPID 867 - Geographic Information Systems for Public Health Research (3 Credits)
Principles and application of basic and intermediate-level GIS technologies in public health research. Designed for doctoral students with interest in conducting health-related research using GIS methods.

EPID 869 - Clinical Effectiveness (3 Credits)
Clinical Effectiveness is a broad term that includes clinical trials and interventional study designs. The purpose of this course is to develop skills in the application of epidemiologic methods to clinical effectiveness research, by conceptualizing and designing an intervention study. Students will actively participate in teaching and learning through in-class activities and developing a protocol to test an intervention in a clinical trial design.
Prerequisites: EPID 701, PUBH 725, or equivalent course.

EPID 877 - Advanced Methods and Concepts in Nutrition Research (3 Credits)
Advanced Methods and Concepts in Nutrition Research addresses aspects of nutrition ranging from nutritional biochemistry to dietetics and community nutrition education. It covers disciplinary breadth encompassing the study of effects of dietary exposures on inflammation, epigenetics, immune function, psychological states and traits, physiologic states, and pathophysiologic processes, including carcinogenesis.
Prerequisites: EPID 763.

EPID 890 - Independent Study (1-3 Credits)
Directed research on a topic to be developed by doctoral student and instructor. May be repeated.

EPID 894 - Selected Topics in Epidemiology for Doctoral Students (1-3 Credits)
Variable credit doctoral level epidemiology course (1-3). The specific epidemiologic topic to be taught is determined by the course instructor in consultation with the department.

EPID 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: one full year (18 hrs) of graduate study beyond the master's level.

PUBH 678 - Transforming Health Care for the Future (1 Credit)
Foundation for beginning health professions students to gain an understanding of the complexities of the health care system through experiential activities conducted in interprofessional teams and the importance of interprofessional collaboration in order to improve the system.
Cross-listed course: SOWK 678

PUBH 700 - Perspectives in Public Health (3 Credits)
Seminar format orientation to history, mission, and core services and disciplines of public health to develop understanding of current public health practice and how many health-related disciplines contribute to achieving public health goals.
Biostatistics, M.P.H.

The goal of the Master of Public Health degree in Biostatistics is to prepare students with prior public health experience, through quality lecture and field practice experiences and other research opportunities, to apply analytical and investigative biostatistical skills in a public health setting.

Learning Outcomes

- Students will evaluate a public health surveillance system and identify salient gaps and methods to address them.
- Students will determine the appropriate study designs for a given public health problem and context.
- Students will compare and contrast the strengths and limitations of epidemiologic study designs (randomized trials and observational studies), including biases and methods to minimize bias.
- Students will formulate a research question and manage and analyze data from public health administrative or surveillance data or electronic health data repositories.
- Students will develop appropriate data collection protocols for a given public health issue and context.
- Students will critically evaluate epidemiologic scientific literature.

Admission Requirements for Biostatistics

Applicants for a graduate degree in Biostatistics must have a degree from an approved college or university. Applicants must meet all requirements of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

When we make our admissions decisions, we evaluate the applicant’s entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources.

The admission criteria for all degree programs follow those of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

Admission Requirements for Biostatistics

Applicants for a graduate degree in Biostatistics must have a degree from an approved college or university. Applicants must meet all requirements of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

When we make our admissions decisions, we evaluate the applicant’s entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources.

The admission criteria for all degree programs follow those of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

When we make our admissions decisions, we evaluate the applicant’s entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources.

Applicants for a graduate degree in Biostatistics must have a degree from an approved college or university. Applicants must meet all requirements of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

When we make our admissions decisions, we evaluate the applicant’s entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources.
Therefore, we provide the following as a general guideline for all our programs:

- Grade point average of 3.0
- GRE Verbal score > 151 (International students whose GRE Verbal score is > 146, and whose TOEFL score is at least the minimum defined below, will also be considered)
- GRE Quantitative score > 157 for the M.S.P.H. program and > 161 for the Ph.D. program

Committee members review the entire files carefully. Clear demonstration of competence in one or more domain(s) can supersede specific GRE score(s)

An electronic application packet should be submitted to SOPHAS as early as possible, and will not be processed until all the required credentials have been received and verified. Electronic applications can be submitted online. For information on how to apply electronically see the Arnold School of Public Health's admissions website.

International applicants whose native language is not English and who have not earned a degree in an English-speaking country are also required to submit a satisfactory score on the Test of English as a Foreign Language (TOEFL) or the University of Cambridge's International English Language Testing System (IELTS) Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 230 (computer-based) or 570 (paper-based) or 75 (Internet-based). The minimum acceptable overall band score on the IELTS Academic Course Type 2 exam is 6.5. Proficiency in English sufficient to undertake graduate study is expected upon entry. Students who do not meet proficiency levels established by The Graduate School and the department will be expected to take additional work to raise their level of performance. Also, any transcript from a non-US institution will need to be verified by World Education Services (WES). WES is an organization that provides international credential evaluation and checks documents for validity and accuracy. WES also offers an analysis of an individual's degrees and transcripts and will provide equivalents for each credential. For more information contact WES at http://www.wes.org or 212-219-7330.

Masters Admission Requirements

Departmental courses are sequenced so that students should begin their program of study in the fall semester. However, applications for spring admission will be accepted.

Applicants to the Master of Science in Public Health (M.S.P.H.) program must have a baccalaureate degree in arts, science or medicine. Applicants should also have completed with a B or greater Calculus-2 and Matrix or Linear Algebra. Prior professional work experience is considered an asset but is not a requirement.

Students admitted to the M.S.P.H. program who do not have academic or professional experience that provides a strong understanding of the biological basis of public health are strongly encouraged to select courses that will provide this understanding.

‡Note: Master of Science in Public Health degrees in biostatistics will undergo a name change. Effective Fall 2021, the new name for the degree program is Master of Science (M.S.). The curriculum remains the same.

Degree Requirements (45 Hours)

A minimum of 45 credit hours is required for the Master of Public Health with a major in Biostatistics. Students are required to have two semesters of calculus or will be expected to make up the deficit beyond the minimum program of study. Additional courses may be required to meet prerequisites or to accommodate electives. All department core courses must be passed with a grade of “B” or better. Failure to do so will necessitate repeating the course; these courses can only be repeated once. Course requirements are given below.

**Practicum Requirements for the M.P.H.**

Public Health in the United States is practiced in diverse settings that include both public and private agencies. Regardless of the type of agency in which it is practiced, public health includes a philosophy of social justice, concepts of community, and population perspectives. The range of public health activities in populations include preventing epidemics and the spread of disease, preventing injuries, protecting against environmental hazards, promoting and encouraging healthy behaviors, responding to disasters and assisting communities in recovery and assuring quality and accessibility of health services (Public Health in America, APHA, 1995). For epidemiologists and biostatisticians, one important aspect of public health practice is learning to bridge the gap between data collection/analysis and decision-making in addressing the goals of public health.

**Prerequisites**

Minimum course prerequisites for the practice experience: completion of at least one of the School of Public Health core courses and the department core. Students must pass the progression examination before beginning the practice.

**Selection of Appropriate Practice Setting, Mentor and Faculty**

A variety of public agencies offer practice opportunities for students. Mentors for the practice experience are in most instances individuals whose daily activity focuses primarily on public health practice, such as those who develop, manage, or evaluate programs at the SC Department of Health and Environmental Control. Faculty research projects are not appropriate for the practice experience. Faculty with joint appointments in the School of Public Health and a practice setting may serve as Mentors as long as the practice experience is clearly situated in the practice setting and has a practice focus, and the Mentor is functioning for the purposes of the student’s practice experience, primarily in his or her practice capacity. See 7 below: Developing a Work Task. Assistantships will not be offered to satisfy any academic requirements, including practice requirements and thesis/dissertation research.

**Academic Credit**

Students in the M.P.H. program must satisfactorily complete a total of six credit hours in Public Health Practice. Practice can be taken in more than one semester, and credit hours assigned are variable depending upon the nature and extent of the work tasks undertaken. Three hours of practice work in a regular semester (Fall or Spring terms) requires an average of 10 hours of actual work each week including writing the final report, or 20 hours per week for six credits. In a summer term, three hours of credit would require 20 hours per week and six hours of credit would require 40 hours per week.

**Ethics and Professional Standards**

Public Health Practice combines the accomplishment of a task with intentional learning on the part of a student. In Public Health Practice, students are responsible for initiating their work and establishing learning objectives. In Public Health Practice, the student's work is for the host organization's benefit, and must not be used outside its purview without specific permission, usually in writing. The results of this work are “controlled” by the host organization or its representative.

Professional conditions of confidentiality are to be honored according to prevailing practice of the sponsoring organization. In general, information received from an individual or organization belongs to that individual or organization and recipients (i.e., students) are not free to pass along this information to other parties without the consent of the individual or organization.

All practice projects involving human subjects must be reviewed and approved by the appropriate ethics review committee. Research qualifying for exemption (typically secondary data analysis of existing data, observational studies with adults, or evaluation of service/public activities) can be approved by the University Institutional Review Board. The IRB application must be completed online (https://sc.edu/about/offices_and_divisions/research_compliance/irb/). It will be necessary to register the first time you enter the site. Some projects must also be approved by the agency review committee at which the practicum is conducted. Any necessary approvals must be obtained prior to beginning work on the defined practicum tasks. Some practicum activities related to an ongoing research project may be covered under that project's IRB approval; this should be discussed with the project PI and/or practicum advisor; in most situations, notification of the IRB of a change in protocol is sufficient.

**Financial Support**

If financial resources are required for doing a Public Health Practice activity, the responsibility for negotiating these arrangements rests with the sponsoring agency and the student. These costs and responsibilities for coverage are included in the practice proposal. Responsibilities of a graduate assistantship cannot be used to satisfy practice requirements.

**Participant Roles in BIOS 798**

Students are expected to:

- Take initiative and responsibility in defining competence to be developed, arranging or selecting an appropriate setting for practice activity, developing clear work and learning objectives and completing work and learning tasks by the dates agreed upon.
- Arrange appropriate meetings with Faculty Advisor and Mentor, including the final oral presentation.

Faculty Advisors are expected to:

- Advise students in developing work and learning proposals.
- Advise students regarding ethics review required of the practice project.
- Participate in meetings with student and Mentor at the location of student's practice.
- Provide ongoing expert advice and guidance as needed or requested.
- Assess learning outcomes and assign pass/fail grade at appropriate times.
- Attend final oral presentation by student.

Mentors are expected to:

- Assist SPH staff and students to define short-term tasks of potential use to his or her organization.
- Review student's "proposal" for usefulness to organization, determine limits of Mentor's role with student, and provide on-site direction to the work component of the practice.
- Provide student logistical support (arranging space, equipment, use of phones, use of computer and/or computer software, secretarial
help, making introductions, providing data or helping gain access to it, and general advice within the organization.

• Attend the student’s required final oral presentation.
• Assist with assessment of student's work and growth in competence during the practice.

Developing a Work Task
For some students, a work task may be defined and negotiated for a practice activity prior to establishing specific learning objectives. In this case, discovering the learning potential of a given work task is required. For others who have developed and articulated learning objectives, the requirement is to locate and determine experiences that will enable the student to develop the specified skills.

There is no single proper way to find the “right” setting and task. The challenge is to locate something that needs to be done that some organization and persons within the organization care about, and then determine if that task can be done in the time you have available and if it allows you to pursue your learning objectives.

Experience with organizations that have sponsored SPH students suggests that if six major conditions are present, a sound practice activity can be developed. The conditions are:

• An organization wants or needs something done, and it “controls” or “owns” the work results.
• The student has some previously developed competence or experience that indicates the potential for contributions to the organization and citizenry. This includes knowledge gained in prerequisite courses.
• The student has well thought out and communicated learning objectives that can be pursued in the framework of doing the task.
• The student demonstrates a comprehensive understanding of what is to be done and is able to identify a supportive network of people.
• A Mentor is identified who both wants the work done and wants to assist the student in pursuing the designated learning objectives.
• The student seeks advice and monitoring from his/her Faculty Advisor.

The draft Work Task Proposal contains a minimal checklist of items that are considered important in preparing a work task proposal for Public Health Practice. Complete this draft first and discuss it with your Practice Faculty Advisor. The Public Health Practice Agreement form should be completed before the start of the practicum.

Individual sessions should be arranged by the student as needed with the Faculty Advisor or Mentor. It is recommended that the student schedule regular conferences with the Faculty Advisor.

Final Report and Oral Presentation
The student must write a final report on his/her practice experience and give an oral presentation based on this report. The report should address the objectives set down in the student’s practice plan. The faculty and the Mentor must approve the final version of the Practice Report. The student should provide a spiral bound copy of the report to the faculty, Mentor, and the department (a formal copy is not submitted to the Graduate School).

The student is responsible for arranging the time and place of the oral presentation. The Faculty Advisor and Mentor must be present at the presentation. The student should make a general announcement in the School of Public Health at least a week before the presentation so that anyone who wishes can attend the oral presentation.

Biostatistics, M.S.P.H.
A minimum of 44 credit hours is required for the Master of Science with a major in Biostatistics. Students are required to have two semesters of calculus or will be expected to make up the deficit beyond the minimum program of study. Additional courses may be required to meet prerequisites or to accommodate electives. All department core courses must be passed with a grade of “B” or better. Failure to do so will necessitate repeating the course; these courses can only be repeated once. Course requirements are given below.

Learning Outcomes
• Students will demonstrate the ability to evaluate a given health related problem and to identify the most appropriate statistical technique (e.g., t-test, contingency table, correlation) for analysis.
• Students will demonstrate the ability to interpret the results of a statistical analysis and to communicate such interpretations in an easily comprehensible manner.
• Display a mastery of traditional and newly developed statistical techniques, including multi-variable methods for continuous and categorical data analysis.
• Students will demonstrate the ability to use statistical software packages to obtain, manage, and analyze public health data.
• Students will demonstrate the ability to finish a thesis and communicate the results.

### Biostatistics, Ph.D.

The Doctor of Philosophy prepares students, through quality lecture and practical experiences and other research opportunities, for involvement in teaching and independent and collaborative biostatistical research; and trains researchers to teach and to pursue original research on analytical approaches to investigating health conditions, and to develop novel biostatistical approaches. The following objectives are premised upon having successfully met all of the objectives delineated previously that are common to the M.P.H. and M.S. degrees.

**Learning Outcomes**

- Students will display a mastery of advanced biostatistical techniques.
- Students will demonstrate the ability to teach topics in biostatistics in a formal classroom setting.
- Students will demonstrate the ability to consult with clients outside of the university setting and provide them with statistical assistance on a health-related problem.
- Students will demonstrate the ability to finish a dissertation and communicate the results.

**Admissions**

Applicants for a graduate degree in Biostatistics must have a degree from an approved college or university. Applicants must meet all requirements of The Graduate School for admission and be recommended to the Graduate School for acceptance by the Department of Epidemiology and Biostatistics.

When we make our admissions decisions, we evaluate the applicant’s entire file in relation to the pool of applicants that year. We also evaluate whether the applicant’s needs and goals fit well with our department’s strengths and resources.

The admission criteria for all degree programs follow those of The Graduate School and the Arnold School of Public Health. Before you can be considered for admission, you must submit an Online Application via [http://www.sophas.org](http://www.sophas.org). Your application must include:

- Completed Application submitted through SOPHAS — [http://www.sophas.org](http://www.sophas.org)
- At least two letters of recommendation for the MPH and MSPH programs and at least three letters of recommendation for the PhD program
- An updated Résumé or CV
- Official transcripts for all undergraduate and graduate work previously undertaken
- Official copies of Graduate Record Examination (GRE) scores
- A personal statement that addresses research or practice interests and long-term objectives

Candidates for all graduate programs in Biostatistics must demonstrate proficiency in communicating in English, working with mathematical concepts, and in thinking analytically. While we do not set absolute cut points for grade point average and GRE scores (in part because of variability in test-taking ability that may not reflect competence to do well in the programs, and the fact that the percentile scores vary by year) we value their ability to provide us with global comparative criteria. Therefore, we provide the following as a general guideline for all our programs:

- Grade point average of 3.0
- GRE Verbal score > 151 (International students whose GRE Verbal score is > 146, and whose TOEFL score is at least the minimum defined below, will also be considered)
- GRE Quantitative score > 157 for the M.S.P.H. program and > 161 for the Ph.D. program

Committee members review the entire files carefully. Clear demonstration of competence in one or more domain(s) can supersede specific GRE score(s)

An electronic application packet should be submitted to SOPHAS as early as possible, and will not be processed until all the required credentials have been received and verified. Electronic applications can be submitted online. For information on how to apply electronically see the Arnold School of Public Health’s admissions website.

International applicants whose native language is not English and who have not earned a degree in an English-speaking country are also required to submit a satisfactory score on the [Test of English as a Foreign Language (TOEFL)](http://www.toefl.org) or the University of Cambridge’s [International English Language Testing System (IELTS)](http://www.ielts.org) Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 230 (computer-based) or 570 (paper-based) or 75 (Internet-based). The minimum acceptable overall band score on the IELTS Academic Course Type 2 exam is 6.5. Proficiency in English sufficient to undertake graduate study is expected upon entry. Students who do not meet proficiency levels established by The Graduate School and the department will be expected to take additional work to raise their level of performance. Also, any transcript from a non-US institution will need to be verified by [World Education Services (WES)](http://www.wes.org). WES is an organization that provides international credential evaluation and checks documents for validity and accuracy. WES also offers an analysis of an individual’s degrees and transcripts and
will provide equivalents for each credential. For more information contact WES at http://www.wes.org or 212-219-7330.

Doctoral Admission Requirements

Departmental courses are sequenced so that students may begin their program of study in the fall or spring semester. Applications for summer admission will also be accepted.

For the Doctor of Philosophy (Ph.D.) program, preference for admission is given to applicants with breadth and depth of academic preparation in Biostatistics, Statistics, or a closely related field. Applicants must have a master’s degree in one of these areas, or a master’s degree in some other field and experience in these areas. Applicants should also have completed with a B or greater Vector Calculus and Matrix or Linear Algebra.

Total Credit Hours 12

Note: With the exception of Master's core courses (EPID 701, BIOS 701, BIOS 710, and BIOS 757, and their equivalents), up to 12 hours may be transferred from previous graduate coursework, with the approval of the student’s advisor and the Graduate Director.

To fulfill the Graduate School’s requirement that all doctoral programs have a minimum of 60 hours post-baccalaureate, an additional 9 hours must appear on the program of study. These may include the Master’s core courses listed above.

The requirement to take PUBH 700 may be waived with Graduate Director approval if a student has taken a similar course during his/her master’s degree program. If this requirement is waived, the student will be required to take 3 additional Biostatistics/Statistics credit hours to replace this course.

Dissertation Requirements for the Ph.D.

Dissertation Proposal

All doctoral students must complete a research project culminating in a dissertation. The dissertation must be based on original research, typically addressing a basic research problem. The first step in that process is the development of the dissertation proposal, and its oral defense before the student’s doctoral committee. The committee must approve the proposal in writing before the student can proceed with the research.

Ethics and Professional Standards

All dissertation research involving human subjects must be reviewed and approved by the appropriate ethics review committee. Research qualifying for exemption (typically secondary data analysis of existing data, observational studies with adults, or evaluation of service/public activities) can be approved by the University Institutional Review Board. The IRB application must be completed online at http://www.orc.research.sc.edu/eIRB_migration_info.html (https://sc.edu/about/offices_and_divisions/research_compliance/irb/). It will be necessary to register the first time you enter the site. Some projects must also be approved by the review committee at the agency where the dissertation research is conducted. Any necessary approvals must be obtained prior to beginning work on the defined research. Some dissertation activities related to an ongoing research project may be covered under that project’s IRB approval; this should be discussed with
the project PI and/or dissertation advisor; in most situations, notification of the IRB of a change in protocol is sufficient.

**Deadlines**

The dissertation must be read, critically evaluated, and approved by all members of the Dissertation Committee. In accordance with graduate School guidelines, the following deadlines must be met. The specific dates for a semester are available on the U.S.C. Graduate School home page [http://www.gradschool.sc.edu](http://www.gradschool.sc.edu).

1. The first complete draft of the dissertation must be in the hands of the Dissertation Committee at least 60 days before the end of the semester (Graduate Studies Bulletin); the approximate dates are October 15, March 15, and June 15 for fall, spring and summer sessions respectively. This is approximately six weeks before the filing date for the dissertation, and should be at least one month before the scheduled defense. The dissertation defense should be scheduled at this time; the Graduate Director must approve the scheduled time (see guidelines for scheduling in section 4 below).

2. The final copy is to be submitted to each committee member at least 30 days prior to the end of the semester (Graduate Studies Bulletin) or at least one week prior to the dissertation defense, whichever is earlier.

3. The dissertation defense must be held at least one week before the Graduate School filing date, which is 20 days before the end of the semester.

4. The student must file the final dissertation, with the designated number of copies, by the filing date. The Graduate Director of the student’s program, or the administrative assistant for education, will give preliminary approval to title page and general format. Final approval is given by the Graduate School when the thesis is filed at a scheduled appointment.

**Dissertation Defense and Examination**

1. The candidate must publically present the dissertation in a 45-60 minute presentation. Announcements of this presentation should be posted and sent to the EPID-BIOS listserv at least one week before the defense; at least one announcement must be posted on the seminar bulletin board outside the Department Office. The dissertation defense should be scheduled in an available classroom and not during the scheduled class time of any department core course. Department faculty are strongly encouraged to attend dissertation defenses.

2. The dissertation defense should be scheduled in an available classroom and not during the scheduled class time of any department core course. Department faculty are strongly encouraged to attend dissertation defenses.

3. The candidate must pass an oral comprehensive examination that shall be administered immediately following the presentation and evaluated by his/her Dissertation Examination Committee. This examination will focus on the technical and scientific aspects and the scholarly delineation of the dissertation topic, and may cover any other subject matter relevant to the student’s field of study.

**Final Version and Copies**

All Dissertation Committee members must approve the final version of the dissertation and sign the title page before the student submits it to the Graduate School. The student should provide each Dissertation Committee member a copy of the dissertation as submitted to the Graduate School, bound in a manner acceptable to the committee. These copies are in addition to the minimum number required by the Graduate School and any personal copies. Students are responsible to make sure the dissertation meets the Graduate School requirements (see: [http://gradschool.sc.edu/thesisdissertation/dissertation.htm](http://gradschool.sc.edu/thesisdissertation/dissertation.htm)).

**Epidemiology, M.P.H.**

**Overview**

The mission of the Master of Public Health (M.P.H.) degree in epidemiology is to prepare students to apply epidemiologic skills in a practice setting. Students will learn and develop skills in planning and conducting epidemiological studies; developing and evaluating surveillance programs; developing culturally appropriate protocols for data collection; performing data analysis and presenting results orally and in writing. Upon graduation, students will be competitive for positions available at state health or governmental health departments, private industry, clinical, or university settings.

Upon completion of the M.P.H. degree program, students will have successfully mastered:

- CEPH † M.P.H. foundational public health knowledge competencies (n=12)
- The 22 CEPH M.P.H. foundational competencies (n=22)
- Epidemiology learning outcomes listed below (n=6)

**Learning Outcomes**

- Students will evaluate a public health surveillance system, identify salient gaps, and methods to address them.
- Students will determine the appropriate study designs for a given public health problem and context.
- Students will compare and contrast the strengths and limitations of epidemiologic study designs (randomized trials and observational studies), including biases and methods to minimize bias.
- Students will formulate a research question and manage and analyze data from public health administrative or surveillance data, or electronic health data repositories.
- Students will develop appropriate data collection protocols for a given public health issue and context.
- Students will critically evaluate epidemiologic scientific literature.

† CEPH Council of Education for Public Health is the accrediting body for all schools and programs in public health.

### Learning Outcomes

- Students will formulate research questions and develop evidence-based hypotheses that are testable with quantitative data.
- Students will develop protocols for primary data collection and for documentation of secondary data analyses.
- Students will synthesize and critically evaluate public health literature.
- Students will choose and apply appropriate quantitative analysis methods to answer a specific research question using a public health dataset.
- Students will communicate epidemiological findings effectively in oral and written formats.
- Students will demonstrate proficiency in at least one software package (SAS, R, etc.) to manage a public health dataset.
- Students will demonstrate proficiency in quantitative analysis of health disparities and health inequities.

---

### Epidemiology, M.S.P.H.

**Overview**

The mission of the M.S.* degree program in epidemiology is to prepare students for involvement in epidemiologic research that addresses the distribution and determinants of disease and other health-related conditions and behaviors. Students will develop a working knowledge in epidemiologic methods and in identifying the determinants of disease and other health conditions. Students will gain skills conducting ethical population-based research, analyzing data, interpreting results of data analyses, and effectively communicating public health information and epidemiologic data both orally and in writing. Upon graduation, students will be competitive for doctoral programs and master’s level trained positions in epidemiology available at state health or governmental health departments, clinical, private industry, or university settings.

### Electives (6 Hours)

- Electives may be chosen from epidemiology courses or courses in the University that support the overall educational goals of the student. The Faculty Advisor must approve all elective courses.

### Epidemiology, Ph.D.

The Doctor of Philosophy prepares students, through quality instruction, practical experiences and other research opportunities, for involvement in teaching and independent and collaborative epidemiological research; and trains researchers to teach and to pursue original research for investigating health-related conditions. Students will develop comprehensive knowledge in epidemiologic methods, applied biostatistics and at least one content area of epidemiology. Students will develop advanced skills in designing and conducting ethical population-based research, analyzing complex data, interpreting results of in-depth data analyses, effectively communicating results to scientific and lay audiences both orally and in writing, teaching, and grant writing.

Upon graduation, our students will have a solid foundation in epidemiologic research to improve health and be competitive for
positions as postdoctoral fellows, principal investigators, instructors, and leading epidemiologists to be employed by organizations in academia, government (state or federal), private industry, or clinical settings.

The Ph.D. requires 54 credit hours beyond a master’s degree, which includes 12 credit hours of dissertation preparation. A limited amount of graduate course work from a graduate program may be applied toward the Ph.D. with advisory committee and Graduate Director approval. A minimum of 30 hours must be unique to the University of South Carolina on the doctoral program of study, excluding 12 credits of dissertation preparation.

The following learning outcomes are premised upon having successfully met all the objectives previously that are common to the M.P.H. and M.S.* degrees.

**Learning Outcomes**

- Students will demonstrate in-depth expertise in at least one substantive content area of epidemiology.
- Students will formulate hypotheses of scientific significance, and design a study employing appropriate epidemiologic methods to address the hypotheses.
- Students will apply knowledge of relevant mechanistic pathways (e.g., physiological, genetic, behavioral, and social) to advance understanding of disease etiology.
- Students will critically appraise epidemiologic studies for internal and external validity and develop skills to synthesize published epidemiologic evidence.
- Students will apply a broad range of advanced statistical approaches to analyze epidemiological data.
- Students will apply the methods and principles of sound epidemiologic and ethical practice (including those related to data collection, processing, management, documentation, and security) in the design and conduct of epidemiologic research.
- Students will demonstrate the ability to prepare a competitive research grant application in the format specified by relevant government agencies and/or private foundations.
- Students will effectively communicate epidemiologic concepts methods results and implications to diverse audiences in oral and written formats.
- Students will effectively teach epidemiologic concepts and methods.

*Note: The Master of Science in Public Health degree in epidemiology will undergo a name change. Effective Fall 2021, the new name for the degree program is Master of Science (M.S.). The curriculum remains the same.

**Degree Requirements (54 Hours)**

**Prerequisites**

Coursework for the Ph.D. in epidemiology assumes that the applicant has taken sufficient courses in the biological or social sciences and has solid preparation at the master’s level in epidemiology. For students holding a master’s degree in a discipline other than epidemiology, preparatory course requirements are set by the Academic Advisor, in consultation with the Graduate Director and Admissions Committee. At a minimum, applicants must master the content and skills taught in the following master’s level courses: EPID 701, BIOS 701, EPID 741, BIOS 757, and BIOS 709. Other courses are required on a case-by-case basis.

**Exercise Science**

Department Website (http://www.sph.sc.edu/exsc/)

Shawn M. Arent, Ph.D., Chair

The mission of the Department of Exercise Science is to expand and disseminate the body of knowledge concerning the relationship between physical activity and human health. A key objective of the Department of Exercise Science is to expand the body of knowledge in the exercise sciences by conducting and publishing research that contributes to an understanding of the following:

- effects of acute and chronic exercise on human function and health
- physiologic and biochemical mechanisms that underlie responses and adaptations to exercise
- physiologic responses to acute and chronic exercise in special populations including children, females, the elderly, chronic disease patients, and those with neurological and/or orthopedic impairments
- neuromuscular and neurophysiological processes associated with motor skill development
- developmental and aging aspects of motor function
- appropriate methods of designing and delivering physical activity programs for purposes of health enhancement, neuromuscular rehabilitation, and perceptual-motor functioning
- behavioral and psychosocial aspects of physical activity.

The Department of Exercise Science offers the following degrees: Master of Science in Athletic Training, Master of Science in Advanced Athletic Training, Master of Public Health, Master of Science, Doctor of Philosophy, and Doctor of Physical Therapy.

**Program Overviews**

**Master’s Degrees**

**Master of Science in Athletic Training/Advanced Athletic Training**

The UofSC AT Program is housed in the Department of Exercise Science in the Arnold School of Public Health. The UofSC AT Program has maintained its accreditation through the Commission on Accreditation of Athletic Training Education (CAATE) since 1996.

The UofSC AT Program provides students with the theoretical knowledge and understanding of the athletic training profession in the context
of the larger health care system as well as its current procedures and techniques in sport injury management. Students gain this knowledge through required coursework and clinical experiences as they prepare to make successful contributions to the athletic training profession. The program combines formal classroom instruction and clinical experiences in a process that culminates in the student graduating with eligibility to sit for the Board of Certification (BOC) examination. Students who graduate from the program and subsequently pass the BOC examination will be qualified to be employed as an athletic trainer in a variety of settings, including NFL, MLB, NBA, professional soccer, Division 1 (FBS) colleges, secondary schools, youth sports, orthopedic clinics, hospitals, wellness centers, industry, NASCAR, Cirque du Soleil, US Military, performing arts, and many other places/settings.

Master of Public Health in Physical Activity and Public Health (MPH-PAPH)
The Master of Public Health in Physical Activity and Public Health is the first academic program in the nation designed to prepare professionals to increase physical activity and improve health in populations. The MPH-PAPH program provides students with the essential knowledge, skills and experiences to design, implement and evaluate physical activity interventions. With the MPH-PAPH degree, there are many career opportunities in the areas of: health and wellness, active transportation to school, corporate wellness, transportation and community design, parks and recreation, chronic disease prevention, community-based physical activity interventions, policy and environmental change, and preparation for working in local and state health departments.

Master of Science (M.S.)
The Master of Science (JO1) (p. ) (MS) degree in Exercise Science provides students with foundational content in exercise physiology, research methods and statistics and offers flexibility to select coursework in specific areas of interest, including: applied physiology, neuro-rehabilitation, and sports performance. With the MS in Exercise Science, there are many career opportunities in the areas of: strength and conditioning, sport science, performance nutrition, clinical exercise physiology, cardiovascular rehabilitation, physical rehabilitation, corporate fitness, health and wellness, research and preparation for additional graduate training (e.g., PhD, DPT, MD, PA). There are many opportunities to participate in ongoing research through assistantships and independent study courses. Students have the option of completing a thesis (focus on research training) or a project (focus on clinical or applied skills training).

Doctoral Degrees
Doctor of Philosophy (Ph.D.)
The Ph.D. program in exercise science is designed to prepare students for research careers in the exercise sciences; graduates are trained for entry into positions in universities, colleges, research institutes and research-oriented clinical settings. Areas of research emphasis correspond to those of the departmental faculty. The Ph.D. degree requires an approved program of up to 60 hours beyond the baccalaureate degree. Students with a master’s or DPT degree admitted to the PhD program in Exercise Science, may complete the PhD program in Exercise Science by completing a minimum of 30 additional credit hours (including 12 credit hours of dissertation preparation). Students completing the PhD must meet minimum core requirements including at least 6 hours in Department of Exercise Science or specific area of emphasis, 6 hours in statistics and research design and 12 hours of dissertation preparation. Programs of study are developed by the student’s advisory committee and must conform to requirements described in the Graduate Studies Bulletin. Additional information may be found in the Handbook for Graduate Students in Exercise Science.

Doctor of Physical Therapy (D.P.T.)
The Physical Therapy Program at the University of South Carolina offers students a unique opportunity to develop clinical physical therapy skills in an intimate learning environment. The 3 year Clinical Doctoral program starts in August of each year and admits a small class size that allows students an opportunity to get individualized instruction and closely interact with instructors. Students complete a research project focused on clinical practice and learn the value of evidence-based practice. Following completion of the DPT, students are eligible to sit for the national physical therapy licensure exam.

Program Requirements for Exercise Science Degree Programs
A listing of specific courses needed to meet these requirements is available in the department’s Handbook for Graduate Students in Exercise Science. Areas of research emphasis in all degree programs correspond to those of the departmental faculty.

Department Admission Requirements
Admission to the MS in AT program must be completed through ATCAS: http://atcas.liaisoncas.org/

Application forms for admission to the M.S. and Ph.D. graduate programs in Exercise Science may be obtained at http://gradschool.sc.edu/gap/

Applicants to the D.P.T. Program should submit an application through the Physical Therapy Centralized Application Service (http://www.ptcas.org).

Applicants to the MPH program should submit an application packet through the School of Public Health Application Service (http://www.sophas.org).

Graduate assistantships are not ordinarily available to students enrolled in the Doctor of Physical Therapy program. In some instances students may be offered a graduate assistantship during their final two years of study. All graduate assistantships must be related to the student’s research and approved by the program director.

Master of Public Health (MPH) in Physical Activity and Public Health
Applicants to the MPH-PAPH must meet the general requirements of the University of South Carolina Graduate School. Applicants must also have completed an undergraduate program with appropriate preparation in the field in which graduate work is to be undertaken. A demonstration of a broad educational background reinforced with public health interests and experiences in physical activity must be included.

International applicants to the Master of Public Health in Physical Activity program are required to take the Graduate Record Examination (GRE) in order to meet admission requirements. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 230 (computer-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5.

Applicants must include an official transcript from each school or college previously attended (all prior postsecondary school study
must be represented). In addition, there must be at least three letters of recommendation and a detailed written statement indicating the applicant's area of interest and career goals, along with a current and complete resume.

Other requirements include:

- graduated with a rank in the upper half of the class (GPA>3.00)
- acceptable GRE score of at least 900, combined verbal and quantitative sections (the 2004-05 incoming class averaged 460 on the verbal section and 562 on the quantitative section)
- an official transcript from each school or college previously attended (all prior postsecondary school study must be represented)
- a minimum of three letters of recommendation
- a detailed written statement describing the area of interest and specific career goals.

Master of Science (M.S.)

Admission Requirements

- A four-year baccalaureate degree or its equivalent in exercise science, kinesiology, biology, chemistry, pre-med, nutrition, health sciences, psychology, public health, physical therapy, medical doctor, from an accredited institution
- Academic prerequisites: Human Anatomy and Physiology
- Grade point average of 3.00/4.00 or higher
- Satisfactory GRE scores
- For international applicants, a satisfactory score on the Test of English as a Foreign Language (TOEFL) - minimum score of 80 internet-based, 230 computer-based, or 570 paper-based or the International English Language Testing System (IELTS) Academic Course Type 2 exam - minimum overall band score of 6.5. This requirement may be waived for applicants that have earned a prior degree from a US institution.

Application Requirements

- Resume or CV
- Statement of Purpose and Objectives describing your academic and research interests, relevant work experiences, academic/professional goals and objectives
- At least three letters of recommendation from academic and/or professional sources (at least one of these letters must be from an academic source)
- Official transcripts from all schools or colleges previously attended
- Non-US institution transcripts must be verified by World Education Services (WES) or equivalent evaluation service. Please submit a comprehensive course-by-course evaluation (WES ICAP)
- GRE scores
- TOEFL or IELTS scores are required for those whose native language is not English

Doctor of Philosophy (Ph.D.)

Applicants for the Ph.D. program in exercise science must have an earned baccalaureate degree in exercise science or related discipline from an accredited institution and should participate in a personal interview with the departmental admissions committee. A comprehensive academic profile is used in arriving at admission decisions. The following materials and standards are required:

- Graduate School application with stated desired area of research emphasis with the required, nonrefundable application fee
- Graduate Record Examination scores of 50th percentile or better on all three sections
- transcripts of all previous college/university work
- letters of recommendation from at least three professors with knowledge of the applicant's academic work
- a writing sample addressing future professional goals and specific research interests
- current curriculum vitae.

Doctor of Physical Therapy (D.P.T.)

Applicants for the D.P.T. degree in the Department of Exercise Science must have an earned baccalaureate degree from an accredited institution. Applicants are reviewed for admission by a faculty committee and are formally approved by the Graduate School. The following materials and standards are required:

- Completed PTCAS Application
- Graduate Record Examination scores of 300 or better required on combined verbal and quantitative sections, and 3.5 on the writing section.
- Two letters of recommendation from individuals familiar with the applicant's academic and/or clinical skills
- Official transcripts from all previous college/university work (upon acceptance to the DPT Program)
- $80 supplemental application fee paid through the USC Marketplace

The applicant’s transcripts, regardless of major, must demonstrate successful completion or enrollment in the following prerequisites:

Programs

- Advanced Athletic Training, M.S. (p. 1192)
- Athletic Training, M.S. (p. 1193)
- Exercise Science, M.S. (p. 1194)
- Exercise Science, Ph.D. (p. 1194)
- Physical Activity and Public Health, M.P.H. (p. 1194)
- Physical Therapy, D.P.T. (p. 1195)

Courses

ATEP 700 - Introduction to Therapeutic Interventions in Athletic Training (3 Credits)
This course is designed to address the basic knowledge and techniques needed to plan, operate, document, and evaluate therapeutic interventions used in treatment of athletic injuries/illnesses. Includes basic knowledge and techniques of therapeutic interventions; modalities and rehabilitation used by athletic trainers.
ATEP 701 - Principles of Evidenced-Based Medicine (3 Credits)
Development of essential skills for integrating evidence into healthcare practice. Students will learn how to explore critical questions by accessing, interpreting, evaluating, and integrating relevant research literature in healthcare.

ATEP 702L - Principles of Athletic Training Lab (1 Credit)
Foundational knowledge and skills for athletic trainers in injury prevention, care and recognition, emergency management and their role as a healthcare provider within the larger context of a changing healthcare system.

ATEP 711 - Clinical Experiences in Athletic Training I (3 Credits)
A 350-hour clinical education experience to develop clinical skills of the practicing Athletic Training professional in a mentor guided model. Improvement in a selected area of clinical practice, specifically assessment, treatment and rehabilitation of lower/upper extremity injuries will be measured via formative and summative assessment that employs quantitative measures.

Prerequisites: ATEP 711.

ATEP 712 - Clinical Experiences in Athletic Training II (3 Credits)
A 150-hour clinical education experience to develop the clinical skills of the practicing Athletic Training professional in a mentor guided model. Improvement in a selected area of clinical practice, specifically assessment, treatment and rehabilitation of non-orthopedic conditions will be measured via formative and summative assessment that employs quantitative measures.

Prerequisites: ATEP 712.

ATEP 713 - Clinical Experiences in Athletic Training III (3 Credits)
A 150-hour clinical education experience to develop the clinical skills of practicing Athletic Training professionals in a mentor guided model. Improvement in selected areas of clinical practice, specifically prevention and management of medical emergencies in athletic settings will be measured via formative and summative assessment that employs quantitative measures.

Prerequisites: ATEP 713.

ATEP 714 - Clinical Experiences in Athletic Training IV (3 Credits)
A 350-hour clinical education experience to develop the clinical skills of the practicing Athletic Training professional in a mentor guided model. Improvement in a selected area of clinical practice, specifically behavioral health and wellness of patients will be measured via formative and summative assessment that employs quantitative measures.

Prerequisites: ATEP 713.

ATEP 715 - Clinical Experiences in Athletic Training V (6 Credits)
A 450-hour clinical education immersive experience to develop clinical skills of the practicing Athletic Training professional in a setting preferred by the student. Improvement in a selected area of clinical practice will be measured via formative and summative assessment that employs quantitative measures.

Prerequisites: ATEP 714.

ATEP 730 - Behavioral Health and Wellness (3 Credits)
Integration of physiological, psychological, and social constructs in relationship to physical performance and clinical decision making to enhance patient care. Specific focus will be on understanding individual differences in behavior in the areas of physical fitness, nutrition, and mental health.

ATEP 732 - Emergency Management Practices in Athletic Training (3 Credits)
Examination of common injuries and illnesses that can cause medical emergencies in sport and physical activity. The majority of the class will be analyzing research related to these conditions to determine prevention and treatment strategies. Education, gender issues, politics, and media will also be a platform for class discussions.

ATEP 733 - Evidence Based Practice in Medical Emergencies (3 Credits)
Examination of common injuries and illnesses that lead to medical emergencies (e.g., sudden death) in sport and physical activity. Critical analysis of research to determine prevention and treatment strategies.

ATEP 734 - Evidence-Based Approach to Evaluation, Treatment, and Rehabilitation (3 Credits)
Advanced study of principles of evidence-based medicine and the interpretation of clinical research that assesses evaluation, treatment, and rehabilitation of injuries.

ATEP 735 - Contemporary Issues in Athletic Training (3 Credits)
Examination of issues shaping the athletic training profession with an emphasis on practical application and professional development.

ATEP 736 - Advanced Treatment and Rehabilitation of Athletic Injuries (3 Credits)
Advanced study of the treatment of athletic injuries focusing on the concepts and principles of a comprehensive rehabilitation program, including therapeutic exercise and therapeutic modalities.

ATEP 737 - Current Research in Athletic Training Education (3 Credits)
Examination of current literature in athletic training education as it pertains to the clinical and didactic experiences of athletic training students, clinical instructors, and practicing professionals.

ATEP 738 - Advanced Athletic Training Practicum I (1-3 Credits)
Provides advanced practical experience and the integration of evidence-based practice in the sports medicine settings. Course content will focus on graduate research project and topics related to athletic training education.

ATEP 739 - Advanced Clinical Practicum in Athletic Training II (1-3 Credits)
Provides advanced practical experience and the integration of evidence-based practice on the sports medicine settings. Course content will focus on graduate research project and topics related to athletic training administration and management.

ATEP 740 - Evidence Based Practice in Weight Management Assessment (3 Credits)
Critical analysis of the current literature on weight control and health, metabolism, energy balance, and roll of diet and exercise in prevention and/or treatment in weight management in the physically active population.

ATEP 741 - Advanced Clinical Skills in Athletic Training (3 Credits)
This course is designed to assess the advanced clinical skills of graduate athletic training students in their ability to evaluate, manage and prevent athletic injuries. The content of this course will focus on advanced athletic training clinical skills and evidence-based practice.

ATEP 748 - Evaluation and Therapeutic Intervention of Lower Extremity Injuries (4 Credits)
Study of the lower extremities as they relate to the prevention; recognition, evaluation and assessment; immediate care; and treatment, rehabilitation and reconditioning of injuries and illnesses to athletes and others engaged in physical activity.
ATEP 748L - Evaluation & Therapeutic Intervention of Lower Extremity Injuries Lab (1 Credit)
Integration of knowledge and skills for orthopedic/physical assessment of common injuries to the lower body.
Corequisite: ATEP 748.

ATEP 749 - Evaluation and Therapeutic Intervention of Head, Neck and Spine Injuries (4 Credits)
Study of the Head, Neck and Spine as they relate to the prevention; recognition, evaluation and assessment; immediate care; and treatment, rehabilitation and reconditioning of injuries and illnesses to athletes and others engaged in physical activity.

ATEP 749L - Evaluation & Therapeutic Intervention of Head, Neck, & Spine Injuries Lab (1 Credit)
Integration of knowledge and skills for orthopedic/physical assessment of common injuries to the head, neck and spine.
Corequisite: ATEP 749.

ATEP 750 - Evaluation and Therapeutic Intervention of Upper Extremity Injuries (4 Credits)
Study of the upper extremities as they relate to the prevention; recognition, evaluation and assessment; immediate care; and treatment, rehabilitation and reconditioning of injuries and illnesses to athletes and others engaged in physical activity.

ATEP 750L - Evaluation & Therapeutic Intervention of Upper Extremity Injuries Lab (1 Credit)
Integration of knowledge and skills for orthopedic/physical assessment of common injuries to the upper body.
Corequisite: ATEP 750.

ATEP 770 - Research Methods & Prospectus Writing in Athletic Training (3 Credits)
The study of applicable methods and tools of research in athletic training. Introduction of methods of research in athletic training, encompassing aspects of study planning, research design, participant sampling, measurement, data analysis, ethics, and reporting in sports medicine.

ATEP 796 - Athletic Training Administration (3 Credits)
Examination of fundamental principles of administration and assessment of the delivery of athletic training services in the context of the larger health care system. Specific focus business management principles associated with athletic training clinical practice and as well as leadership and professional development to achieve the best patient outcomes.

ATEP 797 - Clinical Pathology and Pharmacology in Athletic Training (2 Credits)
Examination of injury, illness and/or disease of various body systems; specific understanding of medical diagnostics, interventions (including pharmacology) and participation considerations for the athletic population are addressed.

ATEP 797L - Clinical Pathology & Pharmacology in Athletic Training Lab (1 Credit)
Integration of knowledge and skills for athletic trainers in the physical assessment of common injury, illness and/or disease of various body systems.
Corequisite: ATEP 797.

ATEP 798 - Project in Athletic Education (3 Credits)
Independently executed project designed to expand the student's knowledge of athletic training.

ATEP 799 - Thesis Preparation (1-9 Credits)

EXSC 507 - Exercise, Sport, and Nutrition (3 Credits)
The relationship between exercise, sport performance, and nutrient metabolism.
Prerequisites: EXSC 223, EXSC 224, EXSC 330, EXSC 330L.

EXSC 531 - Clinical Exercise Physiology (3 Credits)
Scientific bases of clinical exercise programming. The fitness instructor's role in encouraging changes in exercise behavior.
Prerequisites: EXSC 223, EXSC 224, EXSC 330, EXSC 330L.

EXSC 531L - Clinical Exercise Physiology Lab (0 Credits)
Prerequisite: EXSC 223, EXSC 224, EXSC 330, EXSC 330L.

EXSC 541 - Physiological Basis for Strength and Conditioning (3 Credits)
Investigation on the physiological basis for strength and conditioning. Principles of strength and conditioning through lecture based learning, demonstrations, and through laboratory activities.
Prerequisites: C or better in EXSC 330.

EXSC 555 - Current Topics in Exercise Science (1-3 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

EXSC 562 - Impairments of the Human Motor System (3 Credits)
Role of motor development in the growth and development of individuals exhibiting impaired motor control.
Prerequisites: biology, anatomy, physiology, or the equivalent.

EXSC 563 - Physical Activity and the Physical Dimensions of Aging (3 Credits)
The effects of age and physical activity on physical and motor functions of elderly individuals.
Prerequisites: EXSC 223, EXSC 224, EXSC 351, EXSC 330, EXSC 330L.

EXSC 585 - Women's Health and Physical Activity (3 Credits)
Sex differences in diseases, physiological function of sex hormones, hormonal changes in a woman's life, specific women's health issues, and role of physical activity and exercise in prevention and treatment of conditions and diseases specific to women or related to sex hormones. Restricted to 30 students, Special Permission by Instructor.

EXSC 608 - Apps, Wearables and Technology for Lifestyle Behavior Change and Weight Loss (3 Credits)
The course will increase students’ understanding of the theoretical foundations, scientific evidence and practical application of technology-assisted lifestyle interventions, with an emphasis on behavioral weight control for adults.
Prerequisites: C or better in EXSC 410.

EXSC 620 - Nutrition and Immunology (3 Credits)
Examination of the interrelationships that link human nutrition to the immune system in health and disease. Topics will include basic immunology, overview of nutritional sources, deficiencies and excesses, and the impact on public health issues such as exercise, disease and aging.
Prerequisites: EXSC 330.

EXSC 626 - Cardiorespiratory Exercise Physiology (3 Credits)
Examination of the anatomy and function of the cardiovascular and respiratory systems of the exercising human organism, including acute adjustments and chronic adaptations to the systems.
Prerequisites: EXSC 330.
EXSC 666 - Cardiorespiratory Exercise Physiology (3 Credits)
Examination of the anatomy and function of the cardiovascular and respiratory systems of the exercising human organism, including acute adjustments and chronic adaptations to the systems.
Prerequisites: EXSC 330.

EXSC 669 - Skeletal Muscle Physiology: Form and Function (3 Credits)
Skeletal muscle physiology and exercise through select laboratory experiences and discussion of related research literature.
Prerequisites: C or better in both EXSC 330 and EXSC 330L.

EXSC 695 - Writing and Presenting in Research (3 Credits)
The research process in Exercise Science through participation, presentation, and discussion of current research.
Prerequisites: EXSC 224.

EXSC 700 - Physical Activity and Health: Epidemiology, Research and Practice (3 Credits)
An introduction to exercise science with emphasis on the relationships between exercise and health for promotion of physical activity in clinical and public health settings.

EXSC 706 - Assessment of Motor Behavior (3 Credits)
Assessment of infant, child, adolescent, and adult motor behavior.

EXSC 710 - Behavioral Aspects of Physical Activity (3 Credits)
Psychosocial and behavioral factors in physical activity. Topics include mental health effects of exercise, behavior change theories applied to mental health effects of exercise, behavior change theories applied to physical activity, and physical activity determinants and interventions.
Cross-listed course: HPEB 713

EXSC 723 - Genetics in Health Sciences (3 Credits)
The part lecture and part discussion course will explore genetic research in the health sciences, with emphasis on human genetic association studies, clinical utility for personalized medicine, direct-to-consumer genetic testing, and ethical issues. Students will receive hands-on experience searching, interpreting, and summarizing genetic studies on a topic of their choice.

EXSC 727 - Controlled Trials in Exercise Science (3 Credits)
This course covers planning, organizing and implementing randomized controlled trials of physical activity or exercise interventions. It is primarily aimed to meet the needs of graduate students in exercise science and others in related fields.

EXSC 731 - Mechanisms of Motor Skill Performance (3 Credits)
A study of theories and mechanisms involved in human movement. Focus is on analysis of principles and systems of gross motor control and learning.

EXSC 732 - Measurement of Body Composition and Associated Health Behaviors (3 Credits)
Overview of measurement theory and measures to assess body composition and associated health behaviors (i.e., physical activity, sedentary behavior, sleep, diet).
Prerequisites: BIOS 700, BIOS 701, or PUBH 725; for MPH-PAPH students, EXSC 700.

EXSC 742 - Clinical Exercise Testing (1 Credit)
Study of the procedures involved in screening and testing persons with varying levels of functional work capacity.

EXSC 743 - Laboratory Measurements for Exercise Testing (1 Credit)
Biological and physiological assessment of exercise responses and adaptation.
Prerequisites: EXSC 742.

EXSC 744 - Administration of Exercise Programs (1 Credit)
Study of the procedures necessary for proper administration of exercise testing, fitness, and rehabilitation programs.
Prerequisites: EXSC 531.

EXSC 754 - Community-Based Physical Activity Interventions (3 Credits)
Role of the physical activity specialist within the community health department. Development, initiation, and evaluation of campaigns, resources, community capacity building, and coalitions to promote physical activity.
Prerequisites: EXSC 700 or HPEB 700.

EXSC 755 - Special Topics in Exercise Science (3 Credits)
A study of selected issues in exercise science. Content varies by title.

EXSC 771 - Data Acquisition in Exercise Science (3 Credits)
Fundamental concepts of computerized data acquisition in the exercise science laboratory.

EXSC 775 - Neural Basis of Skilled Motor Behavior (3 Credits)
Current and historical perspectives on the neural basis of skilled motor behavior.
Prerequisites: EXSC 731.

EXSC 777 - Endocrinology of Exercise and Health (3 Credits)
The course examines the endocrine system, its interaction with the nervous system, and how they affect human biology before, during, and after exercise. Special attention will be paid to this system's influence on the relationship between physical activity and health.
Prerequisites: At least one undergraduate or graduate course in statistics and molecular or cellular biology.

EXSC 778 - Exercise and Childhood Obesity (3 Credits)

EXSC 779 - Exercise Physiology of Children and Youth (3 Credits)
Principles of exercise physiology applied specifically to children and youth. Particular emphasis on physiological foundations of physical fitness and methods for teaching physical fitness concepts.

EXSC 780 - Physiology of Exercise (3 Credits)
Physiological responses to exercise: skeletal muscle structure and function, cardiorespiratory function, physiological determinants of exercise performance, and training adaptations. Didactic and laboratory included.

EXSC 781 - Physiology, Exercise, and Disease (3 Credits)
The input and response to exercise in diseased populations. Diseases to be examined include cardiovascular disease, age-related diseases, pulmonary, renal, and other conditions.
Prerequisites: EXSC 780.

EXSC 782 - Mechanical Analysis of Motor Skills (4 Credits)
Biomechanical principles underlying motor control and selected techniques used to quantify human movement.

EXSC 783 - Research Seminar in Exercise Physiology (1-3 Credits)
Presentation and discussion of current research topics in exercise physiology.
EXSC 784 - Cardiovascular/Pulmonary Testing and Programming (3 Credits)
Techniques used in exercise testing (including principles of electrocardiology) and in design and delivery of exercise programs for enhancing the health of normal and cardiopulmonary-diseased populations.
Prerequisites: EXSC 781.

EXSC 785 - Advanced Exercise Physiology Laboratory (3 Credits)
Laboratory procedures for measurement of physiological, biochemical, and molecular responses to exercise.
Prerequisites: EXSC 780.

EXSC 786 - Experimental Design for Translational Laboratory Science (3 Credits)
This course establishes the framework for experimental projects in molecular biology and physiology that impact human health: how to set up a molecular system, design experiments within that system, determine and use the correct set of controls, and ultimately how to interpret molecular data in light of human/public health.
Prerequisites: At least one undergraduate or graduate course in statistics and molecular or cellular biology.

EXSC 787 - Research Methods and Design for Exercise Science (3 Credits)
The major goal of this course is to provide an in-depth examination of research concepts, terminology, experimental, non-experimental, and epidemiological designs, internal and external validity, methods for establishing causality investigating associations, and application of designs to test hypotheses in research of exercise science-related outcomes.

EXSC 790 - Independent Study (1-3 Credits)
Topics to be assigned and approved by advisor, graduate director, and department head.

EXSC 795 - Internship in Exercise Science (3 Credits)
Clinical practice in an applied area of exercise science. Requirements include at least 20 hours fieldwork per week with intensive supervision.

EXSC 796 - MPH Capstone Course (2 Credits)
This course is designed to provide students with a culminating seminar focused on the synthesis of foundational and MPH-PAPH competencies in preparing a high quality grant proposal to address a public health problem.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, B or better in EXSC 700, EXSC 710, EXSC 780.

EXSC 797 - Public Health Practice (1-5 Credits)
The focus of this course is the performance of a limited work or service project in an approved public need setting and the demonstration of at least 5 competencies related to previously identified aspects of the student's chosen role.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, B or better in EXSC 700, EXSC 710, EXSC 780.

EXSC 798 - Project in Exercise Science (3 Credits)
Independently executed project designed to expand the student's knowledge of exercise science.

EXSC 799 - Thesis Preparation (1-9 Credits)
EXSC 801 - Ethical Conduct in Public Health Research (1 Credit)
The course will provide an overview of ethical issues scientists encounter conducting and disseminating public health research. Topics include the history of ethics in public health, working with human participants, conflicts of interests, spin, and creating safe and healthy workplaces.

EXSC 802 - Predoctoral Fellowship Writing Course with Special Emphasis on NIH F31 (1 Credit)
The course is designed to enable predoctoral students to gain grant writing experience, develop into productive, independent research scientists, and to obtain mentored research training while conducting dissertation research.

EXSC 808 - Neuro Repair - Rehabilitation (3 Credits)
Examination of neural repair and rehabilitation from a clinical perspective. 03: 07/05/2019.

EXSC 831 - Mechanisms of Motor Skill Performance II (3 Credits)
Advanced study of the theories and mechanisms of human movement and motor performance. Focus is on analysis of principles and systems regulating gross motor control and learning.

EXSC 832 - Research Practicum in Motor Learning/Motor Performance (3 Credits)
Scientific investigation of specific research problems in motor learning/motor performance.

EXSC 862 - Analysis of Motor Impairments (3 Credits)
The study of neuromuscular bases of movement and associated impairments of motor function. Current assessment and programming techniques designed to assist in remediating motor impairment will be emphasized.

EXSC 863 - Physical Activity and the Aging Process (3 Credits)
The study of the aging process and its effects upon the physical activity patterns of the adult. Emphasis is on the mechanisms of aging as they directly influence movement.

EXSC 871 - Data Acquisition in Exercise Science II (3 Credits)
Advanced techniques of interfacing data acquisition equipment to the laboratory computer.

EXSC 880 - Myology and Exercise (3 Credits)
Study of muscle contraction mechanics, energetics, and metabolism and the relationship of these processes to physical training, athletics, and rehabilitation.

EXSC 881 - Advanced Cardiorespiratory Exercise Physiology (3 Credits)
Study of mechanisms for cardiovascular and respiratory responses to acute exercise and adaptations to these systems with chronic physical activity.

EXSC 882 - Physical Activity and Health: Epidemiology and Research Methods (3 Credits)
An examination of physical activity/exercise habit patterns as they relate to health status. Emphasis on the chronic effects of exercise.

EXSC 883 - Chronic Disease Rehabilitation Through Exercise (3 Credits)
The study of the treatment of chronic diseases with special reference to exercise as a mode of therapy.
Prerequisites: EXSC 531 and EXSC 780 or the equivalent.

EXSC 899 - Dissertation Preparation (1-12 Credits)

PHYT 701 - Human Musculoskeletal and Gross Anatomy (5 Credits)
Intensive study and analysis of the morphologic, functional and imaging anatomy of the human body. Emphasis on the relationship of form and function as a basis for understanding of human movement.
PHYT 702 - Musculoskeletal and Gross Anatomy Dissection (3 Credits)
In depth, hands on study and analysis of the major gross anatomical structures, their relationships to each other and the clinical importance through cadaveric dissection.

PHYT 720 - Fundamentals of Physical Therapy (4 Credits)
An overview of the profession and basic skills needed by the physical therapist related to patient evaluation and management.

PHYT 721 - Health Promotion & Wellness in Physical Therapy (2 Credits)
Presents the role of the physical therapist in health promotion and wellness for patients/clients and the community.

PHYT 731 - Mechanisms of Motor Skill Performance (3 Credits)
A study of theories and mechanisms involved in human movement. Focus is on analysis of principles and systems of gross motor control and learning.

PHYT 740 - Professional Issues in Physical Therapy (2 Credits)
PHYT 740 is designed to allow you to enhance patient interaction through the development of professional communication skills, to explore professional ethics and the APTA Core Values, and to foster a professional identity.

PHYT 741 - Clinical Documentation in Physical Therapy (1 Credit)
Enhance patient interaction through the development of professional communication skills, to develop appropriate documentation skills, and to foster a professional identity.

PHYT 750 - Orthopedic Physical Therapy I (4 Credits)
Principles of physical therapy evaluation and treatment of people with orthopedic disorders involving the cervical spine and/or upper extremity.

PHYT 751 - Orthopedic Physical Therapy II (3 Credits)
Principles of physical therapy evaluation and treatment of people with orthopedic disorders involving the lumbar spine and/or lower extremity.

PHYT 752 - Orthopedic Integration in Physical Therapy (4 Credits)
An advanced course to enhance physical therapy students' knowledge of orthopedic examination tests and manual therapy interventions. Emphasis will be placed on diagnostic accuracy of special tests (sensitivity, specificity, likelihood ratios, reliability and validity), interpretation of the results, proper execution, and integration of manual techniques into clinical practice.

PHYT 753 - Research Proposal Development (1 Credit)
Fundamentals of developing a research proposal.

PHYT 754 - Manual Therapy I (3 Credits)
Joint and soft tissue mobilization and manipulation techniques.

PHYT 755 - Manual Therapy II (3 Credits)
Techniques will include spinal mobilization, mobilization with movement, manipulation, muscle energy, taping, soft tissue mobilization and integration of techniques into clinical practice.

PHYT 756 - Integumentary Physical Therapy (2 Credits)
Physical therapy management of patients with integumentary disorders.

PHYT 757 - Pharmacology for the Physical Therapist (2 Credits)
Management of the physical therapy patient on selected medications.

PHYT 758 - Patient Education in Physical Therapy (1 Credit)
Role of the physical therapist in professional and patient education.

PHYT 759 - Therapeutic Exercise (2 Credits)
Therapeutic exercise for the orthopedic patient: selection of techniques, rate of progression and modification.

PHYT 760 - Orthotics and Prosthetics (2 Credits)
Management of patients with amputations, prosthetics, and orthotics.

PHYT 761 - Pain Mechanisms and Treatment (2 Credits)
This course will address the theoretical models for understanding the basis for pain. Pain assessment and physical therapy pain management will be addressed. Emphasis will be placed on the development of clinical decision-making and problem solving.

PHYT 763 - Biophysical Agents in Physical Therapy (1 Credit)
This course studies theoretical and practical applications for safe, effective use of biophysical agents commonly used in physical therapy settings using evidence based practice.

PHYT 764 - Cultural Competence in Health Care (3 Credits)
Cultural competencies necessary for the delivery of health care to patients of diverse ethnic-cultural heritages.

PHYT 765 - Geriatric Physical Therapy (2 Credits)
Fundamental principles for assessment, treatment and overall foundations of geriatric physical therapy based upon the best available evidence.

PHYT 766 - Essentials of Cardiopulmonary Physical Therapy (3 Credits)
Physical therapy management of patients/clients with acute and chronic cardiac and/or pulmonary dysfunction.

PHYT 770 - Acute Care Physical Therapy (3 Credits)
Cognitive and motor skills required in the management of the acute care physical therapy patient.

PHYT 777 - Special Topics in Physical Therapy (1-3 Credits)
A study of selected issues in the field of physical therapy. Course content varies by title. May be repeated for credit as topics vary for a maximum of 6 credit hours total.

PHYT 782 - Functional Anatomy (4 Credits)
Biomechanical principles underlying motor control and selected techniques used to quantify human movement.

PHYT 785 - Seminar in Physical Therapy (1 Credit)
Critical review of professional literature pertaining to clinical practice in physical therapy. Repeatable for credit.

PHYT 786 - Seminar in Physical Therapy (1 Credit)
Presentation and discussion of current research topics in physical therapy.

PHYT 787 - Seminar and Research in Physical Therapy (1 Credit)
Presentation of physical therapy research, article reviews, and clinical in-services. This course deals with the scientific research process with direct application to the discipline of Physical Therapy.

PHYT 788 - Evidence-Based Practice in Physical Therapy (2 Credits)
Research design and analysis techniques necessary for applying evidence-based practice to the clinical physical therapy setting.

PHYT 790 - Independent Study (1-3 Credits)
Topics to be approved by advisor and graduate director. Pass/fail grading.

PHYT 806 - Differential Diagnosis and Clinical Reasoning for Physical Therapists (2 Credits)
Students will gain knowledge and expertise to competently screen for systemic diseases, interpret clinical findings and differentially diagnose movement related impairments from medical conditions that can mimic symptoms of neuromusculoskeletal problems. Emphasis will be placed on Skills necessary to identify patient/client problems that require referral to another health professional.
Advanced Athletic Training, M.S.

The masters program in advanced athletic training (AT) is designed to offer advanced studies and clinical experiences in athletic training to BOC certified athletic trainers, while also providing health care to student-athletes and physical active populations in the state of South Carolina.

The USC AT Program provides students with the theoretical knowledge and understanding of the allied health profession of athletic training as well as current procedures and techniques in sport injury management. Students gain this knowledge through required coursework and clinical experiences as they prepare to make successful contributions to the athletic training profession. The program combines formal classroom instruction and clinical experiences to enhance a certified athletic trainer’s clinical skills.

Learning Outcomes

- **Patient Centered Care:** Students demonstrate the ability to serve as an advocate for a patient’s best interest, to educate the patient about health-related concerns and intervention options, to recognize any conflicts of interests that could adversely affect the patient’s health, and to facilitate collaboration among the patient, physician, family and other members of the patient’s social network or healthcare system to develop an effective treatment plan that includes agreed-upon implementation steps, short-term goals and long-term goals.
- **Interprofessional Education & Collaborative Practice:** Students demonstrate the ability to interact with other health professionals in a manner that optimizes the quality of care provided to individual patients.
- **Evidence-Based Practice:** Students demonstrate the ability to integrate the best available research evidence with clinical expertise and consideration of patient values and circumstances to optimize patient outcomes. Students will demonstrate an overall mastery of concepts related to their respective area of research; and display the ability to extend this understanding to relevancy and clinical application.
- **Quality Improvement & Overall Professionalism:** Students demonstrate the ability to identify a quality improvement objective, specify changes that are expected to produce an improvement, and quantitatively confirm that an improvement resulted from implementation of the change (e.g., improved patient outcomes from administration of a specific intervention or utilization of a specific protocol). Students demonstrate an ability to adhere to the NATA Code of Ethics and the Board of Certification Standards of Practice and exhibit professionalism in all aspects of clinical practice and personal conduct.

Admission

In addition to The Graduate School's application requirements, applicants must submit a sample of expository writing to include future goals and specific research interests.

Degree Requirements (33-36 Hours)

**Athletic Training (24 Hours)**

Successful completion of 24 graduate hours in athletic training selected from the following:

Athletic Training, M.S.

The Masters of Science in Athletic Training is a CAATE-accredited professional program that culminates in students eligible to sit for the BOC examination. The mission of the MS in Athletic Training program is to:

1. provide interdisciplinary approaches to medicine through designed clinical educational experiences for students in a variety of settings and interactions with different health care professionals,
2. teach students to access, interpret, and integrate relevant research into their clinical decision making through didactic and clinical education that focuses on evidence-based medicine, and
3. enhance professional development of students through community engagement and recognize the role of the athletic trainer as a healthcare provider within the larger context of a changing healthcare system.

Learning Outcomes

- Students will demonstrate diagnostic skills, create care plans, and incorporate interventions for patients with health conditions commonly seen in athletic training practice to maximize the patient’s participation and health-related quality of life.
- Students will demonstrate the knowledge and skills necessary to evaluate and immediately manage acute conditions and emergency situations.
- Students will demonstrate the ability to recognize, refer, and support patients with behavioral health conditions.
- Students will demonstrate an understanding of health care administration and quality improvement.
- Students will develop the skills to become a lifelong learner guided by professional competence, professional development, and advocates of the profession.
- Students will develop their ability to provide patient education to patients, support systems, and stakeholders.

Program Admission Requirements
Program admission requirements include the successful completion of a bachelor of science degree in a related field from an accredited institution and the following coursework:

Credit Hours 11
Exercise Science, M.S.

Learning Outcomes

- Master of Science students will evaluate scientific literature, create a research plan and analyze and interpret research results.
- Master of Science students will explain, analyze and evaluate physiological changes that occur during exercise and how environmental conditions influence these responses.
- Master of Science students will explain, analyze, and evaluate the relationships between physical activity, behavior, and health.

Degree Requirements (33 Hours)

Required Courses (18-21 Hours)

Electives (12 or 15 Hours)

Exercise Science, Ph.D.

Learning Outcomes

- PhD students will demonstrate mastery of research germane to their area(s) of specialization.
- PhD students will develop skills in conducting and disseminating research.

Degree Requirements (60 Post-Baccalaureate Hours or a minimum of 30 graduate hours)

- Exercise Science
- School of Public Health Core
- Research/Statistical Methods
- Electives
- Dissertation

Physical Activity and Public Health, M.P.H.

Learning Outcomes

- Students will be able to explain the physiological responses to an acute bout of exercise and the physiological adaptations to chronic aerobic and resistance exercise.
- Students will be able to explain the health effects of physical activity and the scientific basis for current public health physical activity guidelines for persons in varying demographic groups.
- Students will be able to apply evidence-based strategies to develop a physical activity intervention.
- Students will be able to evaluate an evidence-based physical activity intervention.
- Students will be able to differentiate among and appropriately use measurement and surveillance techniques to assess physical activity at the population level.
Degree Requirements (45 Hours)

Physical Therapy, D.P.T.

Learning Outcomes

- Students and graduates practice in a safe manner that supports accurate analysis of individual patient and group outcomes.
- Students and graduates demonstrate professional behaviors in all situations and practices in a manner consistent with established legal and professional standards and ethical guidelines.
- Students and graduates are able to: 1) communicate in ways that are congruent with situational needs; 2) adapt delivery of physical therapy services with consideration for patients’ differences, values, preferences, and needs; 3) participate in self assessment to improve clinical and professional performance; and 4) apply current knowledge, theory, clinical reasoning, and the patient’s values and perspectives in patient management.
- Students and graduates are able to: 1) determine with each patient encounter the patient’s need for further examination or consultation by a physical therapist or referral to another health care professional (screening); 2) perform a physical therapy examination using evidence-based tests and measures; 3) evaluate data from the patient examination (history, systems review, and tests-measures) to make clinical judgments; 4) determine a diagnosis and prognosis that guides future patient management; 5) establish a physical therapy plan of care that is safe, effective, patient centered, and evidence-based; 6) perform physical therapy interventions in a competent manner; and 7) educate others using relevant and effective teaching methods.
- Students and graduates will produce quality documentation in a timely manner to support the delivery of physical therapy services and collect and analyzes data from selected outcomes measures in a manner that supports accurate analysis of individual patient and group outcomes.

Health Promotion, Education, and Behavior

Department Website (http://www.sph.sc.edu/hpeb/default.htm)

Daniela B. Friedman, Chair

Programs leading to degrees in health promotion, education, and behavior focus on understanding how policy, environmental, institutional, and individual actions can improve the public’s health. This work, usually done in partnership with organizations and communities, uses principles and methods from the social and behavioral sciences to promote health in diverse settings across South Carolina, the US, and the globe. Health promotion, education, and behavior is an activist field with a deep commitment to improving the health and welfare of the most disadvantaged people in our world. The field recognizes the importance of learning not just what should and can be done to improve the public’s health, but also how it can be done in a way that is cost-effective, embedded in community structures and culture, and at a large enough scale to have real impact. Programs in health promotion, education, and behavior prepare practice and research professionals through...
courses, practical experiences, and research projects that emphasize understanding of learning, motivation, behavior change, program planning and evaluation, community development, organizational behavior, applied communications, and socio-political processes at multiple levels of societal organization. Students are prepared to engage in professional activities that will:

- influence individuals to adopt or maintain healthful practices through skill development, social support enhancement, and environmental and policy change
- foster teaching and communication skills in all those engaged in health promotion
- advocate changes in organizations and the environment which will facilitate healthful practices
- develop appropriate and effective programs aimed at promoting good health through change in behaviors at the intrapersonal, interpersonal, organizational, community, and public-policy levels
- enhance the health promoter's role as a model, advocate, and leader in public health
- evaluate health promotion programs to ensure they are meeting societal goals and program objectives
- develop and disseminate new knowledge through systematic research and evaluation
- inform people about health, wellness, illness, and disability, and ways in which they can protect and improve their health, including more efficient use of the health care delivery system.

The Department of Health Promotion, Education, and Behavior offers programs that Professional Online Master of Public Health, lead to the degrees of Master of Public Health, combined degree Master of Social Work/Master of Public Health (in cooperation with the College of Social Work (p. 1212)), Doctor of Philosophy, and to the Graduate Certificate in Health School of Journalism and Mass Communication (p. 1099) in cooperation with the Communications School of Library and Information Science (p. 1106)), Graduate and the Certificate in Global Health, and Graduate Certificate in Aging.

**Department Admission Requirements**

See the Arnold School's website for details: http://www.sph.sc.edu/futuresstudents/index.htm. (https://www.sc.edu/study/colleges_schools/public_health/) Admission requirements follow those of The Graduate School (p. 771) and include:

- a completed application
- official transcripts from all post-secondary schools and colleges previously attended, including non-degree courses taken
- evidence of academic performance at a B or better level on academic transcripts
- satisfactory GRE scores, within the last five years. While there is no minimum guideline for the master’s programs, the average GRE (combined verbal and quantitative) for incoming students is approximately 300. For the M.S.P.H., a minimum verbal score of 150 is required. For the doctoral programs, a minimum of 300 (combined verbal and quantitative) is required
- three letters of recommendation from academic and/or professional sources
- a letter of intent which describes professional goals and objectives. Master's degree applicants should describe how the applicant became interested in the field of health promotion, education, and behavior. Doctoral applicants should describe research interests and professional goals.

- satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam for applicants whose native language is not English. The minimum acceptable score on the TOEFL is 80 (Internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5.
- current resume or curriculum vitae.
- Doctoral and MSPH applicants should be supported by at least two HPEB faculty members willing to serve as mentors in order to be admitted into the program.

**Graduate Certificate Programs**

Applicants to the Graduate Certificate programs must have, at a minimum, a bachelor's degree and meet the general requirements of The Graduate School. Applicants may request that significant professional experience be substituted for standardized test scores.

**Programs**

- Aging, Certificate (p. 1198)
- Global Health, Certificate (p. 1199)
- Health Communication, Certificate (Public Health) (p. 1199)
- Health Promotion, Education, and Behavior, M.P.H. (p. 1200)
- Health Promotion, Education, and Behavior, Ph.D. (p. 1201)

The Certificate of Graduate Study in Aging program addresses the educational needs of full-time and part-time students who will be engaged in the planning, administration, and provision of services for older adults. Students earning master's or doctoral degrees in related disciplines are offered the opportunity to obtain specialized preparation for career paths in the expanding fields of gerontology and geriatrics.

The certificate provides graduate students with opportunities to learn from gerontology educators within several USC academic units. The program is administered by HPEB in the Arnold School of Public Health.

All programs of study are approved by The Graduate School.

**Learning Outcomes**

- Students will be able to interpret the impact of biological, social, and psychological changes on the physical, psychological, and social well-being of older adults.

**Program Benefits**

The Certificate in Gerontology distinguishes you as a knowledgeable, skilled, and committed professional in the field of gerontology. The program

- enhances professional marketability,
- builds skills and competencies,
- fulfills continuing education requirements for many professionals, and
- develops an interdisciplinary perspective on aging.

**Career Opportunities**

This certificate program provides you with the knowledge and skills to effectively meet the needs of the aging population in a wide range of careers. There are opportunities in nursing, teaching, service, social work, public health, mental health administration, and research that focus on the needs and interests of older adults. These opportunities also exist within government programs and agencies; public and private institutions that provide health, education, and social services; research centers; special interest groups; colleges and universities; and corporate human services divisions.

Global Health, Certificate

Overview

Modern society operates in a global environment with increasing intercontinental travel, trade, and communication. The great frequency of everyday interactions with people from different parts of the world has increased the need for clinical and public health professionals to understand health environments and policy that extend beyond local borders. Certificate of Graduate Study in Global Health (CGSGH) will prepare students with the knowledge and skills that are necessary to conduct international work, by focusing on topics such as comparative health systems and policies; health care administration, finance and services; sociocultural perspectives on health; and development and evaluation of health promotion programs that are sensitive to local context.

Learning Outcomes

- Students will demonstrate understanding of global health issues and efforts to alleviate shortfalls through various methods of in-depth investigation and research.
- Students will demonstration of an understanding of environmental stressors and pollution; their sources in the natural, home and workplace environments; their modes of transport and transformation; their ecological and public health effects; and, methods of prevention/remediation.

Health Communication, Certificate (Public Health)

This is an 18-hour post-bachelor’s program that provides students the opportunities to strengthen their knowledge in health communication content, research methods, and application. Qualified individuals can take the certificate as a stand-alone program or in conjunction with another degree.

Learning Outcomes

- Students will be able to interpret the impact of biological, social, and psychological changes on the physical, psychological, and social well-being of older adults.

Total Credit Hours 9

Electives (6 Hours)

Select six directed elective hours from an approved list, depending on the student’s interests as approved by the faculty advisor 6

Total Credit Hours 6

Practicum (3 Hours)

Select a three credit-hour practicum or project in the student’s home department 3

Total Credit Hours 3

Examples of practica/internships include appointments with local agencies involved with health communication, or work on an active research project. Faculty members work closely with students to help them secure the practicum.

Health Promotion, Education, and Behavior, M.P.H.

The M.P.H. is designed for individuals with aspirations to be practitioners in health department, community, school or worksite settings. The program requires 45 hours of course work, including public health and health promotion, education, and behavior core courses and a 5-hour applied practice experience. The public health core is designed to develop competencies in using epidemiology and biostatistics to understand distributions and causes of diseases in populations; using qualitative research methods to understand attitudes and behaviors; and managing and administering health organizations. The health promotion, education, and behavior core is designed to develop competencies in planning implementing, and evaluating programs which promote informed decision-making and health behavior change in individuals, and communities. Candidates must successfully complete a comprehensive examination at or near the conclusion of program requirements.

Learning Outcomes

- Students will demonstrate the ability to apply social and behavioral theories and models to the development, implementation, and evaluation of public health programs.
- Students will demonstrate the ability to utilize multi-level approaches in understanding the importance of context in addressing public health issues.
- Students will articulate how multi-sectoral, collaborative engagement advances health equity and improves health outcomes.
- Students will demonstrate the ability to develop sound and feasible methods to evaluate public health programs, interpret results, and communicate those results effectively.
- Students will demonstrate understanding of how to make informed study design decisions and be able to articulate the strengths and weaknesses of a research study.

Admission

See the department website for details: http://www.sph.sc.edu/futurestudents/index.htm. Admission requirements follow those of The Graduate School and include:

- a completed application
- official transcripts from all post-secondary schools and colleges previously attended, including non-degree courses taken
- evidence of academic performance at a B or better level on academic transcripts
- satisfactory GRE scores. While there is no minimum guideline for the master’s programs, the average GRE (combined verbal and quantitative) for incoming students is approximately 300.
- three letters of recommendation from academic and/or professional sources
- a letter of intent which describes professional goals and objectives, and how the applicant became interested in the field of health promotion, education, and behavior.
- satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam for applicants whose native language is not English. The minimum acceptable score on the TOEFL is 80 (Internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5.
- current resume or curriculum vitae.

Admissions process information and links can be found at the Arnold School of Public Health webpage: http://www.sph.sc.edu/futurestudents/index.htm.

Applications for the MPH program are made through the new Schools of Public Health Application System (SOPHAS). Please go to http://www.sophas.org/ for further details. Applications for the Professional Online MPH program in HPEB and the combined MSW/MPH programs are made through the Graduate School. Please go to: https://www.applyweb.com/uscred/index.ftl.

Only single program applications are accepted, so you may only apply to one program at a time (unless you are applying to the MSW/MPH program or certificate program). Once received, your application and credentials are sent for review by the HPEB faculty. After reviewing your credentials, the department makes a recommendation to The Graduate School which officially grants admission. We will inform you of the department’s recommendation regarding admission, but official notice of admission comes from the USC Graduate School.

You are encouraged to review carefully the information provided on the above websites before beginning the application process. If you have further questions, you may contact:

Health Promotion, Education, and Behavior, Ph.D.

The Ph.D. program prepares graduates for leadership and skills in research, teaching, and professional service. The Ph.D. prepares graduates to assume leadership roles that emphasize research and teaching activities; these positions are often located in academic or other research settings. The degree requires 48 hours of post-masters course work (60 hours of post-baccalaureate course work), including 12 hours of dissertation preparation. Students may request transfer of a limited number of graduate courses not part of a completed degree program into the doctoral program of study. All doctoral students' programs of study must meet the university and departmental requirements and are subject to approval by the student's program advisory committee and the department's Graduate Director. In addition, the following are required: a written qualifying examination, a written and oral comprehensive examination, and an oral defense of the dissertation. Experience as a member of a research team is also part of the program requirements.

Learning Outcomes

- Students will be able to identify individual, organizational, community, and socio-cultural influences on health and health behavior.
- Students will be able to develop, implement and evaluate interventions at multiple levels to promote health.
- Students will be able to design and conduct rigorous and innovative social and behavioral science research relevant to public health.
- Student will be able to exhibit professional skills including scientific writing, oral communication, grant-writing, teaching, scientific service, and collaboration.

Admission

Admissions requirements follow those of The Graduate School and include the following:

- a completed application.
- official transcripts from all post-secondary schools and colleges previously attended, including non-degree courses taken.
- evidence of academic performance at a B or better level on academic transcripts.
- satisfactory GRE scores. For the Ph.D. program, a minimum of 300 (combined verbal and quantitative) is required.
- three letters of recommendation from academic and/or professional sources.
- a letter of intent which describes research interests and professional goals.
- satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam for applicants whose native language is not English. The minimum acceptable overall band score on the TOEFL is 80 (Internet-based) or 570 (paper-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5.
- current resume or curriculum vitae.
- Doctoral applicants should be supported by at least two HPEB faculty members willing to serve as mentors in order to be admitted into the program.

Admissions process information and links can be found at the Arnold School of Public Health webpage: [http://www.sph.sc.edu/futurestudents/index.htm](http://www.sph.sc.edu/futurestudents/index.htm) or [https://www.sc.edu/study/colleges_schools/public_health/](https://www.sc.edu/study/colleges_schools/public_health/)

Applications for the Ph.D. program in HPEB are made through the Schools of Public Health Application System (SOPHAS). Please go to http://www.sophas.org for further details.

Only single program applications are accepted, so you may only apply to one program at a time (unless you are applying to a certificate program). Once received, your application and credentials are sent for review by the HPEB faculty. After reviewing your credentials, the department makes a recommendation to The Graduate School which officially grants admission. We will inform you of the department's recommendation.

Health Services Policy and Management

Department Website (http://www.sph.sc.edu/hspm/)

James Hardin, Interim Chair

The Department of Health Services Policy and Management promotes individual and community health through improvements in the organization and management of public health and health care delivery. The department offers the Master of Public Health (M.P.H.), the Master of Health Administration (M.H.A.), and three dual degrees: the Master of Social Work/Master of Public Health (M.S.W./M.P.H.), the Master of Public Health/Master of Public Administration (M.P.H./M.P.A.) and the Juris Doctor/Master of Health Administration (J.D./M.H.A.) (see Graduate Dual Degree Programs (https://academicbulletins.sc.edu/graduate/dual-degree-programs/)). At the doctoral level, the department offers the Doctor of Philosophy (Ph.D.).

The Master’s programs prepare students to assume leadership positions in public, nonprofit, and for-profit organizations in public health, health services, health policy, and related fields. The M.P.H. emphasizes preparation for a career in the public health sector. The program includes full public health foundation courses, taught in an interdisciplinary format, in the five core areas of biostatistics, epidemiology, environmental health sciences, administration, and health promotion, education and behavior. The M.H.A. emphasizes preparation for a career in management in the private health care sector. The program has a substantial emphasis on accounting and finance. A professional M.H.A. is also available for practicing professionals with courses held on weekends. All programs may be taken part-time. The M.P.H. may be taken by distance education via synchronous and/or asynchronous broadcast. A Certificate of Graduate Study in Gerontology may be combined with any degree program (see bulletin section for the College of Social Work).

The Ph.D. program prepare students to make a substantive impact in health services policy and management through teaching, research and policy leadership in university settings and in the public and private health care sector. For experienced health care managers and physicians, the Ph.D. program prepares them for senior policy and management positions in public and private health-focused organizations.

Admission

Applicants should submit an application packet through the School of Public Health Application Service (http://www.sophas.org) unless advised otherwise by the department.
Master’s Programs
Health Services Policy and Management, M.P.H. and Health Services Policy and Management, M.H.A.
Applicants for a master's degree must submit the following:

- transcripts of all college-level academic work
- three letters of recommendation
- scores for the Graduate Record Examination (GRE) or the Graduate Management Aptitude Test (GMAT)
- a statement of professional goals
- a personal resume
- Test of English as a Foreign Language (TOEFL) or IELTS Intl.
  Academic Course Type 2 exam scores, if the applicant's native language is not English

International applicants should contact the program director before applying to the program.

An interview with departmental faculty is highly recommended.

Graduate Assistantship
All full-time M.H.A. and M.P.H. students are expected to work as graduate assistants in health service or public health organizations in the community to acquire work experience and enrich the learning process through on-the-job application of concepts and techniques learned in the classroom. To qualify for an assistantship, a student must be fully admitted to a degree program, be enrolled as a full-time student, and maintain a 3.00 GPA.

Dual Degrees
Students seeking admission to dual degree programs must meet the admissions requirements of both programs. Our requirements are listed above. The College of Social Work, School of Law and the Department of Political Science specify the admission requirements for their programs.

The Department of Health Services Policy and Management and the College of Social Work, School of Law and Department of Political Science offer coordinated programs that lead to a dual degree. The requirements for the M.P.H. or M.H.A. portion of each dual degree program are the same as shown above. The M.P.A., M.S.W. and J.D. portions of the dual degree programs are determined by the respective schools and college. Some courses do fulfill requirements for both portions of the dual degree. A dual degree program thus typically requires fewer semester hours in total than if the two programs were taken separately.

Profiles of Admitted Master’s Students
M.P.H.
For Fall 2016, there were 44 applicants. Thirty-five were accepted. Their mean GRE score was 297 in combined verbal & quantitative on the new scoring scale. Their mean undergraduate GPA was 3.33 (on a 4.00 point scale).

M.H.A.
For Fall 2016, there were 103 applicants; 44 were accepted while 18 enrolled. Their mean GRE score was 301 in combined verbal & quantitative based on the new scoring scale. The mean GMAT score was 490 on the new scale. Overall mean undergraduate GPA was 3.3 on a 4.0 scale.

Doctoral Programs
Health Services Policy and Management, Ph.D.
Applicants for the PhD program must submit:

- transcripts of prior undergraduate and graduate work
- scores for the Graduate Record Examination (GRE) or the Graduate Management Aptitude Test (GMAT). This requirement may be waived for applicants with a terminal clinical degree or other advanced degrees (such as M.D., M.B.B.S., D.D.S., J.D., or Ph.D.) on a case by case basis.
- three letters of recommendation
- a statement of professional goals
- a personal resume
- copies of publications, if any
- Test of English as a Foreign Language (TOEFL) or IELTS Intl.
  Academic Course Type 2 exam scores, if the applicant’s native language is not English

International applicants are strongly encouraged to contact the program director before applying to the program.

An interview with departmental faculty is highly recommended.

Admission criteria for the Doctor of Philosophy program include:

- Master's degree in health administration, business administration, public health, or public administration is strongly preferred. Exceptional applicants with baccalaureate degrees will also be considered.
- A grade point average of at least 3.00 (on a 4.00 scale) is required on previous undergraduate and graduate course work. Exceptions to this requirement will be considered on a case-by-case basis by the faculty.

The Ph.D. degree requires an approved program of 60 hours beyond the baccalaureate degree. Students with a relevant master's degree may complete the PhD in Health Services Policy and Management by completing a minimum of 42 additional credit hours (including 12 credit hours of dissertation preparation). A student without a prior master's degree will be required to complete a minimum of 60 graduate credit hours to graduate.

Health Services Policy and Management, Dr.P.H.
Admission criteria for the Doctor of Public Health program include:

- Applicants should have a master's degree in health administration, business administration, public health, or public health administration. Exceptions will be considered by petition to the faculty. Applicants must have worked in a health-related midlevel management or policy position for at least four years.
- Previous graduate-level course work should include health care finance, statistics, organizational behavior, health economics, and epidemiology. Students lacking one or more of these will be required to make up the deficiency. Courses taken to make up deficiencies do not count toward the Dr.P.H. program. Students with three deficiencies will have a conditional admission contingent on successful completion of make-up courses.
• A grade point average of at least 3.00 (on a 4.00 scale) is required on previous graduate course work.

Applicants must submit:

• transcripts of prior undergraduate and graduate work
• scores for the Graduate Record Examination (GRE) or the Graduate Management Aptitude Test (GMAT). This requirement may be waived for applicants with a terminal clinical degree or other advanced degrees (such as M.D., M.B.B.S., D.D.S., J.D., or Ph.D.) on a case by case basis.
• three letters of recommendation from persons who can reflect upon the applicant’s prior academic and professional performance
• a statement of career goals
• a personal resume
• copies of publications, if any
• Test of English as a Foreign Language (TOEFL) or IELTS Intl.

Academic Course Type 2 exam scores, if the applicant’s native language is not English (may be waived, by petition to the faculty, if academic experience in the U.S. demonstrates English proficiency).

International applicants are strongly encouraged to contact the program director before applying to the program.

An interview with the departmental faculty is highly recommended.

Profile of Admitted Doctoral Students
Ph.D.
For Fall, 2016, there were 39 applicants to the Ph.D. program, of whom 26 were accepted and 13 matriculated. The mean GRE scores of accepted applicants were 152 (verbal) and 153 (quantitative). Their mean graduate GPA was 3.62 (on a 4.0 scale).

Dr.P.H.
For Fall, 2016, the Department did not admit any student in the program.

Programs
• Health Services Policy and Management, M.H.A. (p. 1206)
• Health Services Policy and Management, M.P.H. (p. 1207)
• Health Services Policy and Management, Ph.D. (p. 1208)

Courses
HSPM 500 - Introduction to Health Care Management and Organization (3 Credits)
Provide students with overview of health services management, management techniques and the different roles and functions of the different health care services. Use of field trips and guest speakers from different health care providers.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

HSPM 509 - Fundamentals of Rural Health (3 Credits)
Overview of the delivery and financing of health care in the rural U.S., with emphasis on vulnerable rural populations and access to care.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HSPM 510 - Comparative Health Systems and Health System Efficiency, Effectiveness, Sustainability and Equity (3 Credits)
Comparative health systems of the world including health system organization, management, financing, resource use and health outcomes.

HSPM 513 - Issues in Health Care Information Management (3 Credits)
An introduction to data management in healthcare institutions for undergraduate students and non-HSPM major graduate students. Topics include the nature of medical data, legal protections surrounding such information, and basis strategies for managing information technology resources.

Prerequisites: HSPM 500.

HSPM 514 - Introduction to Health Services Delivery and Policy (3 Credits)
Overview of health services delivery in the United States, including organization and financing of health care, health insurance practices, primary and long-term care among other topics.

HSPM 530 - Finance in Health Administration (3 Credits)
Introduction to health care finance. Course will teach reimbursement structures, regulatory mechanisms, cost control, and related factors unique to healthcare organizations.

Prerequisites: BADM 225.

HSPM 700 - Approaches and Concepts for Health Administration (3 Credits)
An interdisciplinary perspective on the field of health administration. Philosophy concepts, and skills of implementation, management, and evaluation are presented and discussed. Principles in the practice of health administration are applied to identified problems and situations.

HSPM 706 - Health and Economic Development: Interrelationships among health, poverty and economic progress (3 Credits)
Linkages among economic development, poverty, inequality and health. Direct and indirect effects of health in economic development.

HSPM 707 - Ethical Issues in Health Care and Research (3 Credits)
The ethical dimensions of decision-making in health care delivery, administration and epidemiologic research. Provides ethical foundations for discussion of topics in health-related research and practice.

Cross-listed course: EPID 707

HSPM 708 - Methods of Economic Evaluation of Health Projects, Policies and Programs (3 Credits)
Concepts and principles of economic evaluation and applications of evaluation techniques (e.g., cost-effectiveness, cost-utility, cost-benefits, decision modeling) to the real-world issues and problems.

HSPM 709 - Perspectives in Rural Health (3 Credits)
Analysis of issues and demographic, economic, and political forces affecting health care delivery systems in rural America. Examines structure of federal and state public health programs that impact rural health.

HSPM 711 - Health Politics (3 Credits)
Analysis of issues and forces affecting health delivery through the public sector; major models of political decision-making; and current health legislation. 03: 07/05/2019.

HSPM 712 - Health Economics (3 Credits)
A critical introduction to the application of economic analysis to problems in the health care field. Related scientific literature.
HSPM 713 - Information Systems in Health Administration (3 Credits)
Understanding and optimizing the use of health information systems and allied technologies including electronic medical records to improve healthcare organizations' performance in the areas of care delivery, operations management, quality, safety, and accessibility of healthcare services.

HSPM 714 - Perspectives in Community Health Organizations (3 Credits)
Origins/functions of public health and the U.S. health-care system; special attention to public health perspectives, social/behavioral determinants of health and environmental health issues.

HSPM 715 - Community Assessment and the Delivery of Health Care Services (3 Credits)
An introduction to the concepts of community assessment and managerial epidemiology, and their use in the population-based planning and management of integrated health systems.

HSPM 716 - Quantitative Methods for Health Administration (3 Credits)
An introduction to quantitative methods and analytical techniques with application to health administration. The course includes the use of models and simulation for decision making and control in health administration.
Prerequisites: HSPM 775 or BIOS 700.

HSPM 717 - Health Services Research Methods I (3 Credits)
Evaluation of the efficiency and effectiveness of health programs. Different research designs will be discussed in terms of their relevance to specific evaluation problems.

HSPM 718 - Health Planning (3 Credits)
Strategy and tactics of state, regional, institutional health services planning. Special attention to the role of marketing.
Prerequisites: HSPM 733 or equivalent.

HSPM 719 - Health Services Research Methods II (3 Credits)
The role and methods of sample surveys in health administration; development of survey designs; survey procedures; questionnaire design; interviewing procedures; codebook design; utilization of computer program packages in data analysis.
Prerequisites: BIOS 700.

HSPM 720 - Health Services Research Methods III (3 Credits)
Econometric methods for making proper statistical inferences using estimates for observational data.

HSPM 722 - Sociology of Health for Health Services Managers I (1 Credit)
Sociological approaches to the study of health and the decision to seek health care.

HSPM 723 - Sociology of Health for Health Services Managers II (1 Credit)
Sociological approaches to the study of health care institutions.

HSPM 724 - Health Law (3 Credits)
Legal basis for health care activities; health care provider laws, regulations, antitrust and organizational governance.

HSPM 725 - Human Resources Issues in Health Care Sector (3 Credits)
A study of the current problems, theories, models, and strategies associated with managing human resources in the health care sector.

HSPM 726 - Applied Public Health Law for Administrators (3 Credits)
Course addresses the significant legal and ethical issues in Public Health practice; basis for Public Health actions, authorities and limitations; role of the three branches of government in Public Health protection.

HSPM 727 - Advancing Public Health Policy (3 Credits)
Advancing public health policy through design and implementation of a policy change campaign.
Prerequisites: PUBH 730.

HSPM 730 - Financing of Health Care (3 Credits)
Application of the principles of financial management to the systems involved in the delivery of health care. 03: 07/05/2019.
Prerequisites: BADM 660 or equivalent.

HSPM 731 - Health Care Finance I (3 Credits)
Provides working knowledge of financial management techniques for managers in the health care sector.
Prerequisites: HSPM 733.

HSPM 732 - Health Care Finance II (3 Credits)
Provides knowledge base and decision-making tools for financial management in health care organizations using financial management tools and principles.
Prerequisites: HSPM 731.

HSPM 733 - Health Care Management Accounting (3 Credits)
Financial accounting and internal accounting for management decision-making, including cost determination, cost control, performance evaluation and financial planning.
Prerequisites: Undergraduate course in accounting or competency in accounting through personal study of an undergraduate accounting text.

HSPM 764 - Long-Term Care Administration (3 Credits)
An overview of management and policy concepts and issues pertaining to long-term care facilities and programs.

HSPM 765 - Leadership in Health Care Organizations (1 Credit)
Seminar on theory of and practice of leadership as a manager in the health care industry.

HSPM 766 - Health Services Administration I (3 Credits)
Human Resources Management in health care and allied topics.
Prerequisites: HSPM 769.

HSPM 768 - Health Services Administration II (3 Credits)
Operations management in health care, supply chain management and logistics processes, health services process improvement.
Prerequisites: HSPM 716.

HSPM 769 - Organizational Behavior (3 Credits)
To explore organizational behavior at the micro level (individuals, motivation, leadership, conflict management) and macro level (social systems, inter-organizational relationships, change and innovation, performance and strategy, organizational design), with particular focus on health care environments.

HSPM 770 - Decision Making For Health Care Executives (3 Credits)
Case study format where students identify problems, evaluate alternatives and make decisions using health care leaders in the community to prepare cases. Integration of principles learned in other health care theory and management courses.
Prerequisites: HSPM 732, HSPM 718, and HSPM 769.

HSPM 772 - International Health (3 Credits)
Overview of international health status, demographics; communicable/noncommunicable diseases; health care needs, financing, and infrastructure delivery; and maternal and child health, family planning, and public health programs.
HSPM 774 - Quality Management in Healthcare (3 Credits)
Systems approach to quality management focusing on Lean and other quality management methods that can be directly applied in a healthcare setting. Group projects in local acute care settings allow students to practice quality management skills.
**Prerequisites:** HSPM 716, HSPM 731 or equivalent.

HSPM 775 - Managerial Epidemiology and Statistics in Healthcare (3 Credits)
Principles and tools of epidemiology applied to decision-making in a health care environment. Knowledge and skills useful to health services managers related to statistics, population health management and assessment of medical care processes/outcomes are taught.

HSPM 776 - Physician Practice Management (3 Credits)
Builds on prior MHA coursework on health care management to focus on specific knowledge and skills applicable to the management of physician practices.
**Prerequisites:** HSPM 731 and HSPM 769.

HSPM 777 - Healthcare Policy and Principles of Health Insurance (3 Credits)
Demand, supply, employment-based coverage, government-sponsored programs and managed care.

HSPM 778 - Health Care Marketing (3 Credits)
The principles of marketing applied to the health care setting. 03: 07/05/2019.

HSPM 788 - Public Health Practice Experience (3 Credits)
Applied public health practice experience addressing management or policy need in public health setting.
**Prerequisites:** PUBH 725, PUBH 726, PUBH 730, PUBH 735 and 6 additional hours HSPM courses.

HSPM 790 - Independent Study (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

HSPM 791 - Selected Topics (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

HSPM 796 - Health Services Policy and Management MPH Capstone Course (2 Credits)
Synthesis of foundational and HSPM MPH competencies in preparing a high quality grant proposal to address a public health problem.
**Prerequisites:** PUBH 725, PUBH 726, PUBH 730, PUBH 735, HSPM 712, HSPM 730, HSPM 768.

HSPM 797 - Management Residency (1-3 Credits)
On-site management project in a health care setting.

HSPM 798 - Public Health Residency (3 Credits)
Practicum in approved public health, community health, or health care setting emphasizing evaluation and service delivery planning or a project such as resolution of a management problem or evaluation of a program component.
**Prerequisites:** EPID 700, BIOS 700 and three additional hours in the major.

HSPM 800 - Doctoral Seminar (1 Credit)
Format for presentation of faculty research, doctoral student dissertation proposals and guest lecturers on timely issues in health care policy and management.

HSPM 818 - Economic Evaluation and Policy Analysis of Health Services (3 Credits)
The course foci is on theories and techniques used in conducting economic evaluations and policy analyses to ascertain the efficacy and effectiveness of public health and health care programs, services, and policies. Enrollment is restricted to DrPH or PhD students.
**Prerequisites:** HSPM 711, HSPM 712, HSPM 845 and HSPM 846.

HSPM 820 - Public Health Leadership (3 Credits)
The course is designed to give students knowledge and skills necessary to demonstrate leadership in a variety of public health venues. Course content will focus specifically on theories, skills, styles, and techniques used in providing leadership to public health and healthcare programs, services, and policy development, and research. Enrollment Restrictions: Students must be accepted into a PhD, DrPH, or MPH program.

HSPM 845 - Advanced Study in Health Policy Management I (3 Credits)
Readings and discussion of topics relevant to research in health administration/health sciences.

HSPM 846 - Advanced Topics in Health Policy and Management II (3 Credits)
Readings and discussion of major topics, including institutionally based issues, in research in health administration/health sciences.
**Prerequisites:** HSPM 845.

HSPM 890 - Independent Study (1-3 Credits)
Directed research on a topic to be developed by doctoral student and instructor. May be repeated for credit.

HSPM 898 - Doctor of Public Health Practicum (6 Credits)
Students are required to conduct applied public health methods and strategies as a part of their practicum experience. Examples of practicum include, but not limited to development, implementation, and evaluation of public health or healthcare services, policies, organizational development, and regulatory activities.

HSPM 899 - Dissertation Preparation (1-12 Credits)
One full year, 18 hrs, of graduate study beyond the master's level.

**Health Services Policy and Management, M.H.A.**

The M.H.A. program prepares students for a career in the management of the full range of programs, organizations, and facilities in health services and medical care: acute, post-acute, long-term, and managed care, in the public and private sectors. The M.H.A. is offered in a full-time format for regular students. Working professionals may complete the program on a part-time basis.

**Learning Outcomes**
- Students will be able to apply Critical Thinking, Analysis, and Problem-Solving competencies to health services organizations.
- Students will be able to apply Management and Leadership competencies to health services/organizations.
- Students will be able to apply Communications and Interpersonal Effectiveness competencies to health services organizations.
- Students will be able to apply Professionalism and Ethics competencies to health services organizations.
- Students will be able to apply Population Health Management competencies to health services planning and management, including social determinants of health.

Total Credit Hours: 56-58

Final Examination

M.H.A. candidates must complete and submit an acceptable written report on the residency. Approval of the report must be by the faculty advisor, a second reader, and the preceptor at the residency site. An oral presentation of the report is required after the approval of the document. The student must also complete and submit departmental and school evaluations.

Graduate Assistantship

All full-time M.H.A. and M.P.H. students are expected to work as graduate assistants in health service organizations in the community to acquire work experience and enrich the learning process through on-the-job application of concepts and techniques learned in the classroom. To qualify for an assistantship, a student must be fully admitted to a degree program, be enrolled as a full-time student, and maintain a 3.00 GPA.

Dual Degrees

The Department of Health Services Policy and Management and the College of Social Work, School of Law and Department of Political Science offer coordinated programs that lead to a dual degree. The requirements for the M.P.H. or M.H.A. portion of each dual degree program are the same as shown above. The M.P.A., M.S.W. and J.D. portions of the dual degree programs are determined by the respective schools and college. Some courses do fulfill requirements for both portions of the dual degree. A dual degree program thus typically requires fewer semester hours in total than if the two programs were taken separately.

Health Services Policy and Management, M.P.H.

The M.P.H. program prepares students for management in the public health sector, such as federal, state, and local health agencies. Some M.P.H. graduates work in the private sector.

Learning Outcomes

- Students will be able to apply operations management concepts to address organizational performance issues in health service organizations.
- Students will be able to describe legal perspectives on health policy and management issues, including assessment of legal and regulatory environments in the context of public health.
- Students will be able to apply economic principles for allocating and mobilizing resources for public health interventions and programs.
- Students will be able to apply the principles and tools of budgeting, resource management, and financial analysis to improve efficiency of public health and health care delivery organizations.
- Students will be able to develop policy options for the achievement of an agency’s or program’s objectives.

Final Examination

The final grant proposal and grant proposal presentation included in the HSPM MPH Capstone Course (HSPM 799) which is required for all HSPM MPH students will serve as the comprehensive final exam assessment for the HSPM MPH degree. The final grant proposal will be reviewed by at least two HSPM faculty members. The grant proposal presentations in face-to-face classes will be attended and reviewed by at least two HSPM faculty members. Distance students' presentations will be recorded and reviewed by at least two HSPM faculty members. Faculty reviewers will be provided with a comprehensive assessment rubric which will identify the essential required elements for both the grant proposal and presentation.

Graduate Assistantship

All full-time M.P.H. students are encouraged to work as graduate assistants in health service organizations in the community to acquire work experience and enrich the learning process through on-the-job application of concepts and techniques learned in the classroom. To qualify for an assistantship, a student must be fully admitted to a degree program, be enrolled as a full-time student, and maintain a 3.00 GPA.

Dual Degrees

The Department of Health Services Policy and Management and the College of Social Work, and Department of Political Science offer coordinated programs that lead to a dual degree. The requirements for the M.P.H. portion of each dual degree program are the same as shown above. The M.P.A. and M.S.W. portions of the dual degree programs are determined by the respective schools and college. Some courses do fulfill requirements for both portions of the dual degree. A dual degree program thus typically requires fewer semester hours in total than if the two programs were taken separately.

Health Services Policy and Management, Ph.D.

The Ph.D. program prepares students to conduct health services research and to teach in a university setting. The program is individualized for each student, taking into account the individual’s interests, academic training, and professional experience. The emphasis is on research methods, statistics, and advanced concepts in health policy and management. Students must complete a doctoral dissertation and demonstrate the ability to conduct original research.

Learning Outcomes

- Students will understand health care policy development and implementation and its relationship to management of health care organizations.
- Students will demonstrate skills in analysis and interpretation of health services research data.
- Students will demonstrate the ability to conduct health services research and communicate the findings through professional written communications and oral presentations.

Note: All doctoral students are expected to complete courses on statistical software packages like STATA and SAS by the end of first year if not proficient in the use of the softwares. These hours can be counted towards electives.

Health Services Policy and Management Concentration (9 Hours)

Approved Electives (14 Hours)

Dissertation (12 Hours)

Examinations

The qualifying examination must be taken following the completion of course requirements listed under Advanced Topics in Health Policy and Management and Research Method Cognate. Qualifying examination is a cumulative exam that tests students on the content areas of five departmental courses in these two core areas. The examination will be given as two separate sections: (i) Research method and data and (ii) Health policy and management. The qualifying examination is offered twice per year, in late early spring (January) and early fall (August prior to start of classes).

A comprehensive examination is arranged in consultation with the major professor of the concentration area, Doctoral Program Director and the Graduate Director of the Department. Students must pass qualifying examination, complete all doctoral seminar and concentration area courses prior to taking the comprehensive examination. This examination has two components: a written component and an oral presentation component. The written component is a take-home examination in which the student is required to write an NIH R03 type proposal on a specific research topic.

Proposal and Dissertation defense:

Each student must prepare and defend a dissertation proposal consisting of minimum of three chapters describing importance of research topic chosen, literature review and methodology to be used.

Each student must prepare and defend a dissertation that contributes significantly to knowledge regarding the organization, financing, or delivery of health services.

Health Services Policy and Management Concentration Area (9 Hours)

Dissertation (12 Hours)

Examinations

The qualifying examination must be taken following the completion of course requirements listed under Advanced Topics in Health Policy and Management and Research Method Cognate. Qualifying examination is a cumulative exam that tests students on the content areas of five departmental courses in these two core areas. The examination will be given as two separate sections: (i) Research method and data and (ii) Health policy and management. The qualifying examination is offered twice per year, in late early spring (January) and early fall (August prior to start of classes).

A comprehensive examination is arranged in consultation with the major professor of the concentration area, Doctoral Program Director and the Graduate Director of the Department. Students must pass qualifying examination, complete all doctoral seminar and concentration area courses prior to taking the comprehensive examination. This examination has two components: a written component and an oral presentation component. The written component is a take-home examination in which the student is required to write an NIH R03 type proposal on a specific research topic.
Proposal and Dissertation defense:

Each student must prepare and defend a dissertation proposal consisting of minimum of three chapters describing importance of research topic chosen, literature review and methodology to be used.

Each student must prepare and defend a dissertation that contributes significantly to knowledge regarding the organization, financing, or delivery of health services.

Teaching Requirements

All doctoral students in the PhD program are required to participate in teaching activities of the department. The requirements must be completed between the time of matriculation and the dissertation proposal. The requirements can be fulfilled by completing the following items:

- Teaching Assistant training course offered by Center for Teaching Excellence (CTE),
- Presenting at least once in the doctoral student seminar series arranged by the department

Research experience requirement

As part of research experience, all PhD students are required to:

- complete the CITI training;
- give at least one poster or oral presentation as the lead author at a state, regional, national, or international conference; or publish an article in a reputable peer-reviewed journal.

These requirement must be completed prior to dissertation defense.

Public Health Programs (Division of Academic Affairs)

James Hardin, Associate Dean for Faculty Affairs and Curriculum

The Arnold School Division of Academic Affairs administers the Master of Public Health in General Public Health, the Doctor of Medicine/Master of Public Health degree program, and the Certificate of Graduate Study in Public Health. Committees for the above programs make decisions regarding policy, procedures, admission criteria, and other matters concerning program implementation. Additional information regarding the M.P.H. in General Public Health and the dual degree program organization and management is available in the program handbooks. Copies are available through the Division of Academic Affairs.

Program Admission Requirements

Public Health, Certificate

Applicants to the Certificate of Graduate Study in Public Health must have, at a minimum, a bachelor's degree. While students currently enrolled in master of public health degree programs are not eligible for the C.G.S.P.H. program, students working on other graduate degree programs are eligible.

Requirements include:

- baccalaureate degree from an accredited college or university with a minimum GPA of 3.00 on a 4.00 scale; baccalaureate degree transcripts required;
- completed University of South Carolina application form and fee;
- letter of intent describing your interest in the certificate and specific career goals;
- curriculum vitae/resume;
- two letters of recommendation.

General Public Health, M.P.H.

Applicants for the Master of Public Health in General Public Health must meet the general requirements of the University of South Carolina Graduate School. MCAT, DAT, GRE, or other equivalent test scores are required for all applicants. Among those offered admission in 2009 and 2010, the average GRE verbal score was 495 and the average GRE quantitative score was 625; the average undergraduate GPA was 3.51. Successful applicants for this program are expected to have an academic foundation in public health or health-related sciences, and substantive post-baccalaureate experience in clinical or public health settings.

International applicants to the Master of Public Health in General Public Health program are required to take the Graduate Record Examination (GRE) in order to meet admission requirements. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL or the IELTS Intl. Academic Course Type 2 exam. The minimum acceptable score on the TOEFL is 80 (internet-based). The minimum acceptable overall band score on the IELTS Intl. Academic Course Type 2 exam is 6.5.

Applicants must include an official transcript from each school or college previously attended (all prior post-secondary school study must be represented). Transcripts from any non-U.S. institution will need to be verified by World Education Services (WES, http://www.wes.org or telephone: 212-219-7330). In addition, there must be at least three letters of recommendation and a detailed written statement indicating the applicant's area of interest and career goals, along with a current and complete resume.

Admissions process information and links can be found at the Arnold School of Public Health webpage: http://www.sph.sc.edu/futurestudents/index.htm. (https://www.sc.edu/study/colleges_schools/public_health/) Applications for the MPH program are made through the Schools of Public Health Application System (SOPHAS). Please go to http://www.sophas.org for further details. An applicant who has applied to the USC Preventive Medicine Residency program should apply through the Graduate School. All admissions applications are reviewed by a faculty committee representing the Departments of Environmental Health Sciences; Epidemiology and Biostatistics; Health Promotion, Education, and Behavior; and Health Services Policy and Management.

General Public Health / Medicine, M.P.H. / M.D.

To be admitted to the Doctor of Medicine/Master of Public Health dual degree program, potential students must make application to and be accepted by both degree programs prior to matriculation. Therefore, applicants for the Doctor of Medicine/Master of Public Health must meet all entrance requirements for the Doctor of Medicine (M.D.) in either the USC School of Medicine or the Medical University of South Carolina College of Medicine and the Master of Public Health in General Public Health in the Arnold School of Public Health.

All academic requirements for the University of South Carolina Graduate School, School of Medicine, and the Arnold School of Public Health are applicable to students applying to the dual degree program. For admission requirements for the Doctor of Medicine degree program, please contact the USC School of Medicine. Degree requirements for the Master of Public Health in General Public Health are described above.
Applicants to the dual degree program should submit an application for the M.P.H. to the Graduate School.

Any student holding the M.D. or M.P.H. in General Public Health degree is not eligible for admission to the dual degree program.

**General Public Health / Pharmacy, M.P.H. / Pharm.D.**

To be admitted to the Doctor of Pharmacy/Master of Public Health dual degree program, potential students must make application to and be accepted by both degree programs. To be admitted to the M.P.H. program, applicants must either have a completed bachelor’s degree or have completed at least 90 hours in the Pharm.D. program. Degree requirements for the Master of Public Health in General Public Health are described above. Applicants to the dual degree program should submit an application for the M.P.H. to the Graduate School.

Additional information can be found on the Graduate Dual Degree Programs (p. 1217) page.

**Programs**

- General Public Health, M.P.H. (p. 1211)
- Public Health, Certificate (p. 1212)

**Courses**

**PUBH 678 - Transforming Health Care for the Future (1 Credit)**
Foundation for beginning health professions students to gain an understanding of the complexities of the health care system through experiential activities conducted in interprofessional teams and the importance of interprofessional collaboration in order to improve the system.

*Cross-listed course: SOWK 678*

**PUBH 700 - Perspectives in Public Health (3 Credits)**
Seminar-format orientation to history, mission, and core services and disciplines of public health to develop understanding of current public health practice and how many health-related disciplines contribute to achieving public health goals.

**PUBH 710 - Ethics and the Health Sciences (1-4 Credits)**
Students are introduced to formal and informal codes of professional conduct of various health science disciplines and understand the implications of these distinctions for interdisciplinary research, clinical practice, and administration. 03: 07/05/2019.

**PUBH 725 - Quantitative Methods for Public Health Practice (5 Credits)**
Introduction to epidemiology and biostatistics and their application to public health issues and practice. Covers basic epidemiologic, biostatistical, and data management techniques used to analyze and interpret data in the field of public health.

**PUBH 726 - Qualitative Methods for Public Health Practice (3 Credits)**
An introductory course on why, when, and how to apply qualitative data collection and analysis methods to public health activities with a focus on practice-based application. Identifying, working with, and communicating with a range of community stakeholders are also discussed.

**PUBH 730 - Public Health Systems, Policy, and Leadership (3 Credits)**
A course on public health management and policy process and advocacy to develop effective public health leaders. Included is an emphasis on the relationships between people and their environment and the impact of the environment on human health and well-being.

*Prerequisites: PUBH 725 and PUBH 726.*

**PUBH 735 - Practical Applications of Public Health Planning (4 Credits)**
A practical approach to planning public health programs through the application of planning frameworks and the exploration of fundamental issues in planning, implementing and evaluating programs in various settings addressing diverse populations and issues.

*Prerequisites: PUBH 725 and PUBH 726.*

**PUBH 743 - Foundations of Health Disparities (3 Credits)**
Evolution of health disparities from historical, public, social, economic, and political perspectives.

**PUBH 791 - Special Topics Public Health (1-3 Credits)**
The purpose of this course is to provide the student of public health a clear understanding of public health history as a key component of the environment in which the any health professional must function. The course content will begin in prehistory and have a worldwide perspective through the 1700s. It will then shift to the history of the United States. In the historical, social, economic, and political context that the US public health and health care systems evolved are lessons and understandings that are necessary for this generation of health administrators and health policy makers to advance health for all. The first part of the course will examine the impact of disease on world history through the 18th century. The second and third parts of the course will present, from a historical perspective, the evolution of public health and health care delivery in the United States.

**PUBH 798 - Public Health Practice (1-6 Credits)**
Limited work experience or service project in an approved public health setting.

*Prerequisites: BIOS 700 or BIOS 701 and EPID 700 or EPID 701.*

**PUBH 810 - Ethics in Public Health Research and Practice (1 Credit)**
Foundations of public health ethics with application to practice and to responsible conduct of research in public health disciplines. Enrollment restricted to Doctoral students & post-docs, master’s students by permission of instructor.

**General Public Health, M.P.H.**

Please note that this program is not accepting applications at this time.

The Master of Public Health in General Public Health degree provides students with the academic experiences to understand and appreciate the broad range of public health issues. Combined with understanding of the basic principles of public health, the student will develop a knowledge base and skill set across the public health disciplines.

**Learning Outcomes**

- Students will demonstrate an understanding of a) fundamental principles and practices in health promotion, education, and behavior; b) organization, principles, and practices in health administration; c) principles and practices in epidemiology, and tools for translating epidemiological findings into public health action; d) public health statistical applications; and e) environmental health from the perspective of the earth as a complex, dynamic system.
- The student will demonstrate at least three of the following: a) the ability to evaluate a given health related problem, and to identify the most appropriate statistical technique for analysis; b) understanding of and ability to discuss specific applications of environmental health sciences; c) ability to apply descriptive and analytic epidemiology methods including approaches and study designs to identify and investigate factors associated with various health conditions; d) understanding of and ability to apply proven social science, health...
and behavior theories in the planning, implementation, and evaluation of health education and promotion programs; and e) ability to apply the principles of program planning, development, budgeting, management and evaluation to organizational and community initiatives.

- Students completing the MPH program will demonstrate integration of the MPH core competencies and an understanding of the philosophy of public health practice through the Public Health Practicum.

### College of Social Work

Department Website (https://www.sc.edu/study/colleges_schools/socialwork/)

Ronald Pitner, Interim Dean
Terry Wolfer, Interim Associate Dean for Curriculum
Kirk Foster, Associate Dean for Diversity, Equity, & Inclusion
Teri Browne, Interim Associate Dean for Faculty and Research
Melissa Freedman, Assistant Dean for Curriculum and Assessment
Sonya Singleton, Assistant Dean for Students
Rhonda DiNovo, MSW Program Coordinator
Melissa Reitmeier, Director of Field Education
Kristen Seay, Interim Ph.D. Program Coordinator

The College of Social Work has offered graduate professional education at the master’s level at the University since 1969. The doctoral program admitted its first class in fall 1987. The college has offered its master’s degree in Seoul, South Korea, since 1992. The Master of Social Work degree is accredited by the Commission on Accreditation of the Council on Social Work Education.

### Mission

To promote social well-being and social justice with vulnerable populations through dynamic teaching, research, and service conducted in collaboration with diverse people of South Carolina, the nation, and the international community.

### Vision

To become a leading institution for innovative, interdisciplinary approaches to educating social work practitioners and scholars, conducting research, and serving as a catalyst for positive social change.

### Goals

#### Goal 1
The College prepares M.S.W. graduates to work effectively and ethically within public and private agencies, including interdisciplinary settings, where they will serve primarily those vulnerable populations who
experience problems related to economic and social deprivation and the consequences of institutional discrimination and oppression.

The College also produces Ph.D. graduates who are able to perform all the role expectations of academicians within social work degree-granting colleges and universities. Graduates are effective in transdisciplinary, community-engaged social work research and education and possess a commitment and a capacity to meet University and community service expectations through both graduate and undergraduate courses.

The College prepares BSW graduates for ethical, competent, and culturally relevant generalist practice with individuals, families, groups, organizations, and communities. The College’s social work minor prepares University undergraduate students from other academic programs for responsible citizenship by introducing them to social work as a means to helping people enhance their well-being.

**Goal 2**
The College advances the knowledge base of the profession and translates research into practice in order to reduce poverty and oppression and promote social and economic justice in global society.

**Goal 3**
The College provides faculty consultation and service to local, state, national and international organizations; student provision of services to consumers in supervised field agency settings; and leadership as a catalyst in positive social change.

### Drug and Addiction Studies, Certificate

#### Introduction
The Graduate Certificate in Drug and Addiction Studies is a cross-disciplinary program offered by the College of Social Work for post baccalaureate students interested in advanced education in addictions. The purpose of the program is to expand professional capacity in prevention, intervention, treatment, and recovery for individuals and families impacted by the disease of addiction.

#### Learning Outcomes
- Students will be able to recognize the development and impact of addiction as being based in neurobiological, sociological, and psychological processes.
- Students will demonstrate knowledge in current, relevant evidence-based approaches in prevention, intervention, assessment, diagnosis, treatment, and recovery for substance use disorders and addictions.
- Students will be able to identify unique properties of various substances included in the DSM 5 classifications of substance-related disorders, including alcohol, caffeine, cannabis, hallucinogens, inhalants, opioids, sedatives, hypnotics, stimulants, tobacco, and other substances.
- Students will be able to accurately diagnose substance use disorders and describe how these disorders impact individuals, families and communities.
- Students will demonstrate knowledge of co-occurring disorders and risk and protective factors for special at-risk populations, including but not limited to, adolescents, women, veterans, ethnic groups, older adults, and the LGBTQIA+ community.

#### Admissions Criteria
It is each applicant’s responsibility to ensure that all required application materials are received. Applicants should list the Graduate Certificate in Drug and Addiction Studies on the application under degree pursued. The program accepts applications on a rolling basis.

#### Currently Enrolled Students in the Master of Social Work Program
Students in good academic standing may request concurrent enrollment. Interested students must contact the program coordinator to review the application process.

#### Other Applicants
Applicants must follow the Application Requirements listed in the Degree-Seeking Admissions page in the Graduate Bulletin.

Electives (6 Hours)
Select six credit hours of electives approved by the program coordinator.

Note: Courses taken as part of another graduate degree program may, if appropriate, be applied to the certificate program. The Graduate Certificate in Drug and Addiction Studies is awarded upon completion of the student’s approved program of courses.

### Social and Behavioral Health with Military Members, Veterans, and Military Families, Certificate

#### Introduction
The Graduate Certificate for Social and Behavioral Health with Military Members, Veterans, and Military Families is administered by the College
of Social Work. It provides MSW students with specific knowledge and skills necessary to interact in military and community settings where the needs of veterans and their families are met. The program is designed to develop competency in knowledge about the military and military culture, understand the signature injuries associated with different military conflicts and those associated with military life, and understand intervention and rehabilitation strategies that are effective when working with this diverse population.

**Learning Outcomes**

- Students will have knowledge about military culture, values of duty, courage, and selflessness associated with military service.
- Students will understand the impact of resilience on soldiers and families. Students will demonstrate their understanding of the connection between resilience and prevention of combat related problems such as PTSD.
- Students will demonstrate knowledge of the differential impacts of military service for unique military populations.

**Admissions Criteria**

It is each applicant's responsibility to ensure that all required application materials are received. Applicants should list the Graduate Certificate for Social and Behavioral Health with Military Members, Veterans and Military Families on the application under degree pursued. The program accepts applications on a rolling basis.

**Currently Enrolled Students in the Master of Social Work Program**

Students in good academic standing may request concurrent enrollment. Interested students must contact the program coordinator to review the application process.

**Other Applicants**

Applicants must follow the Application Requirements listed in the Degree-Seeking Admissions ([https://academicbulletins.sc.edu/graduate/policies-regulations/graduate-admissions/degree-seeking-admissions/](https://academicbulletins.sc.edu/graduate/policies-regulations/graduate-admissions/degree-seeking-admissions/)) page in the Graduate Bulletin.

**Certificate Requirements (18 Hours)**

The Certificate requires 18 credit hours of coursework. Four courses are required and two are electives chosen based on the student's personal interests. These electives can be taken within the College of Social Work, or may be taken in other university units as approved by the Program Director.

### Required Courses (12 Hours)

**Electives (6 Hours)**

Select 6 credit hours of electives approved by the program coordinator.

---

Note: Courses taken as part of another graduate degree program may, if appropriate, be applied to the certificate program. The Certificate of Social and Behavioral Health with Military Members, Veterans and Military Families is awarded upon completion of the student's approved program of courses.

**Social Work, MSW**

**Mission**

The College of Social Work MSW Program prepares graduates to become advanced practitioners who serve diverse communities in South Carolina and beyond through specialized practice competencies in one or more of the following areas: Children, Youth, and Families; Health and Mental Health; and/or Community, Social, and Economic Development. The MSW Program will provide students essential knowledge, skills, and values to practice effectively, ethically, and collaboratively to promote social well-being and social justice for vulnerable populations.

**Program Goals and Learning Outcomes**

**Goal 1**

The program produces Master's-level social workers who provide competent and ethical practice with, and on behalf of, diverse and vulnerable populations.

- Learning Outcome 1: Apply social work ethical principles to guide professional practice (2.1.2)
- Learning Outcome 2: Engage diversity and difference in practice (2.1.4)
- Learning Outcome 3: Engage, assess, intervene, and evaluate with individuals, families, groups, organizations, and communities (2.1.10)

**Goal 2**

The program produces Master's-level social workers who demonstrate a strong professional identity and ability to advance human rights and social and economic justice.

- Learning Outcome 4: Engage in policy practice to advance social and economic well-being and to deliver effective social work services (2.1.8)
- Learning Outcome 5: Identify as a professional social worker and conduct oneself accordingly (2.1.1)
- Learning Outcome 6: Advance human rights and social and economic justice (2.1.5)

**Goal 3**

The program produces Master's-level social workers whose professional judgment demonstrates an understanding that person-in-environment perspective requires a critical analysis of practice contexts and research findings.

- Learning Outcome 7: Apply critical thinking to inform and communicate professional judgments (2.1.3)
- Learning Outcome 8: Engage in research-informed practice and practice-informed research (2.1.6)
- Learning Outcome 9: Apply knowledge of human behavior and the social environment (HBSE) (2.1.7)
- Learning Outcome 10: Respond to contexts that shape practice (2.1.9)
Admission

The admission policy for the M.S.W. degree program applies to every applicant. All applicants must fulfill the general admission requirements of both The Graduate School and the College of Social Work. Applicants must be recommended to The Graduate School for acceptance by the MSW Program. Acceptance by The Graduate School and the M.S.W. Program is based on the evaluation of an applicant's total academic profile. The M.S.W. Program is committed to diversity in its student body. Admission is limited and competitive. Admission to the College of Social Work is contingent upon admission to The Graduate School. (p. 1457)

Deadlines

• The deadline for Advanced Standing Program admissions is March 1. Classes begin in the summer.
• The deadline for Full-time and Part-time Program admissions is April 1. Classes begin in the fall.

Minimal requirements for admission include:

• A bachelor’s degree from an accredited institution.
  • Applicants to the Advanced Standing program option must have earned a bachelor’s degree in social work from a Council on Social Work Education (CSWE)-accredited institution within the last 5 years.
  • A cumulative undergraduate GPA of 3.00 (on a 4.00 scale).
  • Applicants to the Advanced Standing program option must have also earned a B or better GPA in the last 60 credit hours of an accredited bachelor’s degree and a B or better in all required undergraduate social work classes.
• Official transcripts of all college and university credits earned
• Autobiographical statement stating the applicant’s desire to enter the degree program and outlining long-term professional goals, motivation and capacity to work with people.
• At least two letters of recommendation should come from individuals who can address characteristics such as maturity, self-discipline, commitment, cooperativeness and professionalism. The M.S.W. program requires letters be written by individuals who can attest to an applicant's potential for graduate study and social work practice (e.g., professor, supervisor or community leader). Letters from those an applicant has a personal relationship with (e.g., relative, friend or neighbor) will not be adequate.
  • Applicants to the Advanced Standing program option are required to submit three letters of recommendation. Of the three letters of recommendation, one must be from the B.S.W. program director or faculty advisor recommending readiness for Advanced Standing and one be must from the undergraduate field supervisor or current social work supervisor if employed.
  • A current CV or resume that demonstrates evidence of service and/or work experiences congruent with social work values, skills, and knowledge.

Note: An interview may also be required.

Applicants to the Advanced Standing program option should be aware that meeting the minimal requirements does not guarantee admission to this program option.

Transfer of Course Credit

The MSW Program follows the Transfer of Course Credit (p. 1449) policy in the Graduate Academic Regulations Bulletin (p. 1449). Students may request transfer of graduate course credits from other programs accredited by the Council on Social Work Education.

Credit for Life Experience

In accordance with the mandates of the Council on Social Work Education, no credit is given for life experiences. Students will not receive academic credit for life experience or previous volunteer, service learning activities or assignments, or work experience in social work.

Academic credit will not be granted for life experience or previous work experience, and such experience will not be substituted for any of the courses in the professional foundation areas or the field practicum.

Degree Requirements (42-60 Hours)

The College of Social Work Offers Five Master of Social Work Degree Pathways

1. Full-time in Columbia - 60 hours over two years.
2. Advanced Standing in Columbia - 42 hours over 11 months.
3. Part-time program in Columbia - 60 hours over three years.
4. Part-time program in Charleston or Greenville with one specialization - 60 hours over three years.
5. Part-time program in Korea with one specialization - 60 hours

MSW Students Must Select One of the Following Specialization Options in the Advanced Year

1. Community, Social, and Economic Development
2. Health and Mental Health
3. Children, Youth, and Families

Foundation Year (30 Hours)

Full-time and Part-time Students must successfully complete the following courses in order to move to the Advanced Year:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOWK 712</td>
<td>Human Behavior and the Social Environment I</td>
<td>3</td>
</tr>
<tr>

Total Credit Hours 30

Social Work, Ph.D.

The PhD Program in the College of Social Work develops scholars who generate and disseminate new knowledge to drive social change and create a more equitable, just, and inclusive society. Our graduates are:

- Emerging experts in a self-determined specialized substantive area, making unique contributions to knowledge advancement in the pursuit of social change.
- Skilled in diverse theoretical and methodological approaches, with deep expertise for pursuing the scientific exploration of their specialized substantive area.
- Equipped with the knowledge, skills, and experience to teach the next generation of social work practitioners and scholars.
- Productive scholars, with records of scholarly publications, national presentations, and applications for independent research funding.

The degree requires 52 hours of post-masters course work, including 12 hours of dissertation preparation. Students must earn a grade of “B” or better in all required courses. In addition to meeting university and program requirements, all doctoral students’ programs of study are subject to approval by the student’s advisory committee and the College’s PhD Program Coordinator. The following are also required: an oral examination, a comprehensive examination, and a defense of the dissertation.

Learning Outcomes

- Students will demonstrate capacity to use empirical and theoretical knowledge across disciplines to analyze human behavior that is relevant to social work and social welfare.
- Students will apply appropriately a range of methods in the design and implementation of community-engaged social and behavioral research.
- Students will demonstrate the ability to define appropriate research questions that are theoretically based.
- Students will demonstrate knowledge and skills in curriculum development, course planning, classroom management and principles of professional education.
- Students will demonstrate knowledge and skills in pedagogy.
- Students will demonstrate knowledge and skills in communicating and disseminating knowledge distinct from university teaching.

Course of Study

The PhD program in social work is designed so that students can complete course requirements in two to three years. Students must enroll full-time during the first calendar year in residence.

The foreign language requirement (or its statistics or computer equivalent) may be met at any time during the student’s course of study, but not less than 60 days prior to the date at which the student expects to receive the degree. Academic regulations are consistent with those that apply to other doctoral programs within The Graduate School.

Admission-to-Candidacy Examinations

Following successful completion of required course work, the student will take a qualifying examination in order to be admitted to candidacy. Examinations typically will take place after the second year of course work. While not course specific, the examination will require the student to demonstrate competence in the integration and application of content drawn from courses.

Dissertation

Within seven years following successful completion of the comprehensive examination, the student must present a dissertation based on research that has been approved by a committee of professors in the major field and by the dean of The Graduate School. The dissertation must be successfully defended before an examining committee appointed by the dean of the college and approved by the dean of The Graduate School. The examining committee will consist of at least four members, one of whom must be from a department or college other than Social Work.

Admission

Admissions requirements are consistent with those of The Graduate School and include:

- a completed application;
- transcripts from all post-secondary schools previously attended, including non-degree courses taken;
• a master's degree in social work from a CSWE accredited graduate program (a master's degree in a related field may be considered on a case-by-case basis);
• a grade point average of 3.5 or above for graduate-level work;
• evidence of scholarly potential as indicated by three letters of reference;
• a detailed personal statement;
• submission of GRE general scores or Miller Analogies Test scores;
• a sample of the applicant's scholarly writing;
• satisfactory score on TOEFL or IELTS for international applicants for whom English is not their primary language. (https://academicbulletins.sc.edu/graduate/policies-regulations/graduate-admissions/degree-seeking-admissions/#text)

Graduate Combination, Dual-Degree and Joint Degree Programs

Combination Degree Programs

A combination degree is a situation where the same institution awards more than one degree from an overlapping course of study. Combination degrees often allow a shorter time for completion due to the “double-counting” of some coursework.

• Accelerated Master of Business Administration (A.M.B.A.) / J.D.
• Accountancy / Law, M.A.C.C. / J.D.
• Biomedical Sciences / Medicine, Ph.D. / M.D. (Medical Scientist Training Program)
• Business Administration / English, M.S. / M.A.
• Criminology and Criminal Justice / Law, M.A. / J.D.
• Earth and Environmental Resources Management / Law, M.E.E.R.M. / J.D.
• Economics / Law, M.A. / J.D.
• English / Library and Information, M.A. / M.L.I.S.
• Epidemiology / Environmental Health Sciences, Ph.D. / Ph.D.
• General Public Health / Medicine, M.P.H. / M.D.
• General Public Health / Pharmacy, M.P.H. / Pharm.D.
• Health Services Policy and Management / Law, M.H.A. / J.D.
• Human Resources / Law M.H.R. / J.D.
• International Business / ESCP Paris Master of Management, M.I.B / M.I.M.
• International Business / Koc University Master of International Management, M.I.B. / M.I.M.
• International Business / Law, I.M.B.A. / J.D.
• Journalism and Mass Communications / Law, M.M.C. / J.D.
• Public Administration / Law, M.P.A. / J.D.
• Public Administration / Social Work, M.P.A. / M.S.W.
• Public History / Library and Information Science, M.A. / M.L.I.S.
• Social Work / Health Promotion, Education, and Behavior, M.S.W. / M.P.H.
• Social Work / Health Service Policy and Management, M.S.W. / M.P.H.
• Social Work / Law, M.S.W. / J.D.

Dual-Degree Programs

A dual-degree (or a dual academic award) is one whereby students study at two or more institutions, and each institution awards a separate program completion credential bearing only its own name, seal, and signature.

• Environmental Law and Policy / Law, M.E.L.P. / J.D. (Dual Degree Program with the Vermont Law School)
• International Business / Shanghai Jiao Tong University Master of International Business, M.I.B./M.I.B.
• International Business / Tec de Monterrey Master of International Business, M.I.B. / M.I.B.
• International Business / Università Bocconi Master of International Management, M.I.B. / M.I.M.
• International Business / University of Mannheim, M.I.B. / Mannheim Master of Management
• Sport and Entertainment Management with National Taiwan Normal University, Ph.D.
• International Hospitality and Tourism Management with National Taiwan Normal University, Sport, Leisure and Hospitality Mgmt with focus on Sport Mgmt M.H.I.T.M. / M.S.
• Sport and Entertainment Management with National Taiwan Normal University, Sport, Leisure and Hospitality Mgmt with focus on Sport Mgmt M.S.E.M. / M.S.
• Business Administration / Management with EMLYON Ph.D. / Ph.D.

**Joint Degree Programs**

A joint degree program (or joint academic award) is one whereby students study at two or more institutions and are awarded a single program completion credential bearing the names, seals, and signatures of each of the participating institutions.

- ME.d. Educational Technology with UofSC Aiken
- Ph.D. Pharmaceutical Sciences with MUSC
- M.S.E.M. Sport and Entertainment Management with Qatar (pending approval)
- M.S. Exercise Science with Qatar

**Accelerated Master of Business Administration (A.M.B.A.) / J.D.**

The Darla Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and Accelerated Master of Business Administration (A.M.B.A.) degrees in approximately three and one-half years. Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the business administration program. Students in the M.A.C.C. program may use up to 9 hours of law course credit as electives. Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Moore School of Business.

**Accountancy / Law, M.A.C.C. / J.D.**

The Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and Master of Accountancy (M.A.C.C.) degrees in approximately four years.

**Biomedical Sciences / Medicine, Ph.D. / M.D. (Medical Scientist Training Program)**

**Degree Requirements Ph.D. (62 Hours) / M.D. (161 Hours)**

The School of Medicine is dedicated to the goals of preparing students in the art and science of medicine and providing students with a background for further postgraduate training in a variety of fields of medicine. The curriculum is designed to promote professional growth and a compassionate response to patients’ needs, to assist students in understanding the complexity of patient care, and to provide students with a perspective on the role of medicine in society.

The seven-year MD-PhD curriculum consists of basic science courses and clerkships in applied clinical medicine, together with three years of laboratory research. All students are required to complete a specific set of courses during the seven years. Elective opportunities are presented throughout the curriculum to assist students in pursuing their individual interests and career goals.

For more information visit: [http://pathmicro.med.sc.edu/graduate/md-phd.htm](http://pathmicro.med.sc.edu/graduate/md-phd.htm)

**Business Administration / English, M.S. / M.A.**

**Degree Requirements (51 Hours)**

This is a 51-hour program leading to an M.A. in English and M.S. in Business Administration. Interested students will normally be expected to have met the following requirements: 24 hours of successfully completed English courses beyond the lower-division level and/or completion of the major or cognate in business administration, satisfactory scores on the GRE subject test in English and the GMAT examination for business administration, and a personal interview or letter explaining why the student wishes to enroll in the program. Admission is only to the joint program; neither degree will be awarded separately.

**Business Administration/Management, Ph.D. (Dual Degree Program with EMLYON)**

This is a dual degree PhD program between the University of South Carolina, Darla Moore School of Business and EMLYON Business School. EMLYON is a highly regarded business school in Europe and is accredited.
by AACSB, EQUIS, and AMBA. The program structure leverages distinct research and scholarly capabilities of each institution.

The program is designed as a dual degree whereby students pursue degrees at both institutions. Each institution confers its own degree for work done to meet the graduation standards of the doctoral program of that institution. The program will give selected students from both institutions the opportunity to acquire the Ph.D. in Business Administration from USC and the Ph.D. in Management from EMLYON.

Dual degree students must meet all eligibility requirements for admission to each doctoral program. Each institution will be the sole judge of whether a student has completed the requirement for the degree that it awards. The intended length of study for the dual degree program is four years (60 credit hours). Dual degree students will spend their first two semesters at EMLYON taking foundational courses. They will then spend three semesters at USC taking specialized courses in international business. Dual degree students are required to complete at least 30 hours of credit while enrolled at South Carolina. Up to twelve hours of academic credit from EMLYON may be accepted and applied toward the South Carolina Ph.D. degree requirements. Faculty from both institutions will supervise the dissertation.

Criminology and Criminal Justice / Law, M.A. / J.D.

Admission

Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Department of Criminology and Criminal Justice. Upon admission to the combined degree program, the student will be assigned courses to be elected in both programs.

Degree Requirements M.A. (30 Hours) / J.D. (90 Hours)

The Department of Criminology and Criminal Justice, in cooperation with the University of South Carolina School of Law, offers a combined degree program which permits a student to obtain both the Juris Doctor and the Master of Arts in Criminal Justice degrees in approximately four years. Through the combined program, the total course load may be reduced by as many as 18 credit hours from that required if the two degrees were earned separately, since up to 9 hours of electives toward the M.A. degree may be taken in approved law courses and 9 hours of electives toward the J.D. may be earned in the M.E.E.R.M. program.

Economics / Law, M.A. / J.D.

The Department of Economics, in cooperation with the University of South Carolina School of Law, offers a combined degree program that permits a student to obtain both the Juris Doctor and the Master of Arts in Economics degree in approximately four years.

Degree Requirements M.A. (30 Hours) / J.D. (90 Hours)

Through the combined program the total course load may be reduced by as many as 18 credit hours from that required if the two degrees were earned separately. The student must meet admission requirements, and satisfy degree requirements, of both degree programs.

English / Library and Information, M.A. / M.L.I.S.

The joint master's program in English and library and information science prepares students for careers as subject specialists in academic or public libraries. Subject specialists typically work in such areas as collection development, reference, and bibliographic instruction.

Admission Criteria

Persons applying to the joint master's program in English and library and information science must meet the admissions requirements of both the Department of English and the School of Library and Information Science.

Degree Requirements M.A. (28 Hours) / M.L.I.S. (27 Hours)

The joint master’s program is a 55-hour program leading to an M.A. in English and a Master of Library and Information Science. It is administered by a joint committee, which recommends students for admission and approves their programs. Admission is only to the joint program. Neither degree will be awarded separately. If students wish to change from the joint program to the regular degree program in English or library and information science, they must reapply to the particular program they wish to enter.

Environmental Law and Policy / Law, M.E.L.P. / J.D. (Dual Degree Program with the Vermont Law School)

Accreditation

The University of South Carolina is accredited by the Southern Association of Colleges and Schools’ Commission on Colleges to award Juris Doctor degrees. Because of its geographic location, Vermont Law School is accredited by a different body, and has no relationship with the Commission on Colleges. Both law schools are fully accredited by the American Bar Association. The Southern Association of Colleges and Schools’ Commission on Colleges accreditation of the University of South Carolina does not extend to or include the Vermont Law School or its students. Although the University of South Carolina has faculty-approved regulations and accepts certain course work in transfer toward a credential from Vermont Law School, or collaborates in other ways for generation of course credits or program credentials, other colleges and universities may or may not accept this work in transfer, even if it appears on a transcript from the University of South Carolina. Such a decision would be made by the institution subsequently considering the possibility of accepting such credits.

Admission and Degree Requirements

M.E.L.P. (30) / J.D. (90)

Application deadline is January 21, 2011. Applications will be available Fall 2010.

Students in the program may earn both degrees by completing 90 hours of J.D. study and 30 hours of M.E.L.P. study. Up to 9 hours of law study at South Carolina may be applied toward the M.E.L.P. degree and 9 hours of graduate study at Vermont may be applied toward the J.D. degree.

1. Students who enter the program must:
   b. Be admitted to the University of South Carolina (USC) School of Law.
      (a & b mean that the student must meet all entrance requirements of each school and be accepted as a student therein.)
   c. Be admitted to the Dual Degree Program. Admission to the dual degree program must be made by application to both programs and both programs must approve the student’s admission to the dual degree program.
   d. Each program shall maintain appropriate records on each student in the program.

2. The program is prospective in operation.
   a. Those students already holding a M.E.L.P. degree or a law degree will not be eligible for admission to the program.
   b. Students currently enrolled in either school may enter the program and appropriate credit will be granted by both schools with due care exercised to effect the transition to insure the closest compliance with these regulations as the individual situation of each student permits.

3. Students will often complete the dual degree program in three years (including full-time summer study). Students shall begin the program by completing the first full year in USC’s School of Law. At the end of that year, a student will enroll in the 1-credit USC course entitled Introductory Environmental Law and Policy. A student will thereafter enroll in Vermont M.E.L.P. courses via summer school, distance learning, and internships. A minimum of six (6) M.E.L.P. credits through distance learning must be earned during the course of the second and third years of study at USC’s School of Law. The entire program for both degrees must be completed within a period of five academic years unless substantial reasons acceptable to the Joint Committee are given. In such event, each case will be judged on its individual merits and decisions in the case of other students will not serve as precedent.

4. Students must maintain the academic requirements presently in effect or as may be placed in effect to remain in the program.
   a. Failure to maintain the requisite academic standing requirements of either school will preclude the student’s continuation in the program in the semester he or she becomes ineligible.
   b. The student may continue to complete the degree requirements in the school whose academic standing he or she has met.
   c. A student dropped from the program for academic deficiency may not re-enter.

5. a. The University of South Carolina School of Law will grant up to 9 hours credit toward the J.D. degree for work completed on the Vermont Law School campus toward the M.E.L.P. Degree with a minimum grade of C. The student must take the course for a
letter grade if the course is offered on this basis. A grade of C or better shall be recorded on the student’s USC transcript as a pass. No degree credit will be granted by the School of Law when the candidate earns a grade of less than C in the Vermont Law School course. Several courses published in the M.E.L.P. Program may be excluded as courses available for credit in the M.E.L.P.-J.D. dual degree program. These courses duplicate courses taught through the University of South Carolina’s School of the Environment. This will be handled on a case-by-case basis as the program progresses.

b. Vermont Law School will grant up to 9 hours of credit toward the M.E.L.P. degree for specified course work completed in the USC School of Law. No credit will be granted when a candidate earns less than a C grade in the School of Law. All Graduate School academic requirements will be applicable to students participating in the Dual Degree Program. VLS will award credit toward the M.E.L.P. degree for up to nine hours earned in the following School of Law courses: LAWS 731; LAWS 651; LAWS 709. It may be possible to earn M.E.L.P. credit through other USC School of Law courses, as approved by the Joint Committee on a case-by-case basis.

6. Students enrolled in this program must take the one-credit LAWS 816, Introductory Environmental Law and Policy, at the end of their first year.

7. Students enrolled in this program must have completed the requirements for both degrees to come within the provisions of paragraph 5.

8. The School of Law will assign a P, F, or W grade as may be appropriate for purposes of determining the Law School G.P.R. with respect to non-Law School courses taken in the M.E.L.P. Program.
   a. The Joint Committee assigned to administer the program will take appropriate action to insure that each school is notified of the grades earned so that the proper entries are made on the student’s record.
   b. The Joint Committee will adopt any forms necessary to carry out the objectives of this program.

9. The Joint Committee shall consist of one or two designees from Vermont Law School appointed by the Director of the Vermont Law School Environmental Law Center, one or two faculty members from the USC Law School appointed by the Dean of the Law School, and the USC Law School Associate Dean for Academics. They shall each endorse all applications to the J.D.-M.E.L.P. program and take all necessary administrative action to insure that the purposes, spirit, and intent of the program are fulfilled. The student may not take courses for credit under the dual degree program in one program where there is substantial duplication of material with a course which the student has taken in the other program.
   a. The Committee shall decide all questions of duplication or preemption of courses the student desires to take. It is understood that each committee member will confer with the member of his or her faculty whose course or seminar the student desires to take for credit in this program where it appears that there is substantial duplication of material or preemption of the course by a similar course in the other program.
   b. If the Joint Committee shall be in disagreement with regard to the duplication of material or preemption then each shall confer as follows:

i. Vermont Law School’s representative(s) of the Joint Committee shall confer with and abide by the decision reached by the Director of the Environmental Law Center.

ii. The USC School of Law’s representative(s) on the Joint Committee shall confer with and abide by the decision reached by the Curriculum Committee of the School of Law.

iii. Each member of the Joint Committee shall be permitted to present and discuss the matter on which there is disagreement with the Committee of each program.

iv. In the event a student is aggrieved by a decision of the Joint Committee denying him or her permission to take a course in either program he or she desires to take under this Dual Degree Program, the student may appeal the decision to the Committee of the school in which he or she seeks to undertake such work.

10. The Joint Committee shall make every effort to accommodate the needs of the student consistent with the aims and objectives of the program. The Committee members shall counsel with the student, recommend alternative courses and otherwise assist him or her in furthering his or her career objectives through the Dual Degree Program.

11. A Program of Study shall be approved by the Joint Committee prior to attending the Summer Session at Vermont Law School. Each student must submit his or her proposed schedule to the Joint Committee in sufficient time prior to registration to permit the Joint Committee to act on it. Therefore, students in the program should confer with the Joint Committee at regular and frequent intervals when schedules become available.

12. The Joint Committee may make other such regulations concerning matters not contained herein which have not been anticipated and which are in keeping with the objectives of the program and the desires of both faculties, keeping always in mind the wishes of the student and his or her career objectives.

13. Any student withdrawing from one of the programs in the Dual Degree Program will be required to satisfy all of the requirements of the degree program in which he or she retains candidacy.

14. Enrollment in the J.D.-M.E.L.P. Dual Degree Program will not preclude simultaneous enrollment in the J.D.-M.E.R.M. Dual Degree Program.

15. The University of South Carolina is accredited by the Southern Association of Colleges and Schools’ Commission on Colleges to award Juris Doctor degrees. Because of its geographic location, Vermont Law School is accredited by a different body, and has no relationship with the Commission on Colleges. Both law schools are fully accredited by the American Bar Association. The Southern Association of Colleges and Schools’ Commission on Colleges accreditation of the University of South Carolina does not extend to or include the Vermont Law School or its students. Although the University of South Carolina has faculty-approved regulations and accepts certain course work in transfer toward a credential from Vermont Law School, or collaborates in other ways for generation of course credits or program credentials, other colleges and universities may or may not accept this work in transfer, even if it appears on a transcript from the University of South Carolina. Such a decision would be made by the institution subsequently considering the possibility of accepting such credits.
Epidemiology / Environmental Health Sciences, Ph.D. / Ph.D.

The Department of Epidemiology and Biostatistics and the Department of Environmental Health Sciences jointly offer a dual Ph.D. in Environmental Health Sciences and Epidemiology. Epidemiology is a core discipline in public health and represents the methodologic basis for investigating the distribution and determinants of health outcomes. Environmental health sciences, another core discipline of public health, represents a major area of research and practice in measurement of environmental factors and their impact on health outcomes. The dual Ph.D. in epidemiology and environmental health equips the student to function more effectively at the intersection of these two related but distinct disciplines, with a deeper and broader understanding of the intricate relationships between human health and the environment.

Degree Requirements Epidemiology (54 Hours) / (Environmental Health Sciences (45 Hours)

The dual Ph.D. requires course work in epidemiology and environmental health sciences selected by the student in consultation with a joint epidemiology/environmental health sciences advisory committee, and successful completion of dissertation research on a topic spanning both disciplines. Detailed program requirements are available upon request.

General Public Health / Medicine, M.P.H. / M.D.

Please note that this program is not accepting applications at this time.

The M.P.H./M.D. degree is designed for future physicians who want to prepare for meeting the challenges of managed care practicing evidence-based medicine, ensuring effective preventive medicine for their patients, and administering medical offices and/or community, state, and federal health organizations. Students in the dual degree program must complete the total program in six academic years.

The M.P.H./M.D. dual degree student completes the M.D. degree at either the USC School of Medicine or the MUSC College of Medicine.

Degree Requirements

M.P.H. (42 Hours) / USC School of Medicine, M.D. (161 Hours)

M.P.H. (42 Hours) / MUSC College of Medicine, M.D. (227.5 Hours)

Requirements for the M.D. Degree

See the UofSC School of Medicine Academic Bulletin for more information.

General Public Health / Pharmacy, M.P.H. / Pharm.D.

Please note that this program is not accepting applications at this time.

PharmD/MPH dual programs address the need for pharmacist who understand public health principles as well as direct patient care activities. The dual degree is considered desirable for persons seeking careers in local, state, and national agencies. Additionally, this dual degree option presents opportunities for individuals to excel professionally in practice settings such as hospitals and health systems, managed-care, community health settings, and county and state health agencies.

The PharmD degree currently requires a total of 8 elective course credit hours in the professional program curriculum. The South Carolina College of Pharmacy (SCCP) curriculum committee has approved the acceptance of any Master of Public Health courses (core or elective) for any or all of the 8 hours of required electives for the PharmD degree.

The Masters of Public Health (General) program requires a total of 42 credit hours, of which 15 hours are core courses, 15 hours are special interest in Public Health courses, 6 hours are electives, and 6 hours are practicum in a Public Health discipline. The Arnold School of Public Health curriculum committee has approved a total of 6 elective course hours from select SCCP courses that can be applied towards electives in the MPH program.
The Current Approved List of SCCP Courses That May Count for MPH Elective Credit Include

In addition, PharmD students may be able to obtain 3 credit hours toward the 6 hours required for PUBH 798. Credit will be granted if the student completes an advanced pharmacy practice experiential rotation (during the 4th professional year of the PharmD program) in an approved public health discipline site (examples may include but would not be limited to: AHEC, DHEC, Indian Health Services, and other Public Health service entities).

Health Services Policy and Management / Law, M.H.A. / J.D.

Degree Requirements M.H.A. (58 Hours) / J.D. (90 Hours)

The Department of Health Services Policy and Management and the School of Law offer a coordinated program that leads to a dual degree. Some courses do fulfill requirements for both portions of the dual degree. A dual degree program typically requires fewer semester hours in total than if the two programs were taken separately.

Health Services Policy and Management / Public Administration, M.P.H. / M.P.A.

The Department of Health Services Policy and Management in the Arnold School of Public Health and Department of Political Science in the College of Arts and Sciences offer a coordinated program that leads to the Master of Public Health (MPH) in Health Services Policy and Management and the Master of Public Administration (MPA). Some courses fulfill requirements for both portions of the dual degree. Through academic advisement, specific courses are chosen for each individual student to satisfy both sets of program requirements. The MPA requires 18 credit hours in core courses completed in the first year of study; the MPH has 16 hours of required sequenced core courses completed in the second year of study.

Requirements

Two courses (6 credit hours) from the MPA can be applied to the MPH program of study. POLI 774 satisfies the HSPM Policy Elective Requirement and POLI 775 satisfies the required HSPM Management Course HSPM 730.

Completion of HSPM 788 satisfies the MPA internship requirement. One HSPM Management Elective (3 credit hours) approved by the advisor can be applied to the MPA program of study. Thus the 39 credit hours required for the MPA and 45 credit hours required for the MPH can both be completed with a total of 72 credit hours.

The table below reflects the plan of study for a full-time student who begins the dual degree program with the MPA. This plan may be adjusted in consultation with HSPM and POLI advisors.

1 Students may elect to take these courses during summer sessions to meet curriculum requirements.

2 HSPM 788 requires coordination with an MPA advisor to meet the MPA internship requirements.

Human Resources / Law M.H.R. / J.D.

The Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and Master of Human Resources (M.H.R.) degrees in approximately four years.

Degree Requirements M.H.R. (45 Hours) / J.D. (90 Hours)

Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the business administration program. Students in the M.H.R./J.D. program may use up to 12 hours of employment-related law courses from the law school to fulfill requirements within the M.H.R. program. Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Moore School of Business.

International Business / ESCP Paris
Master of Management, M.I.B / M.I.M.

International Business / Koc
University Master of International Management, M.I.B. / M.I.M.

International Business / Law,
I.M.B.A. / J.D.

The Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and International Master of Business Administration (I.M.B.A.) degrees in approximately four years. Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the business administration program.

Students in the I.M.B.A./J.D. program must take 9 credit hours of electives in the Moore School. An additional 12 credit hours in the School of Law will be used to satisfy the 21 elective credit hours required for the I.M.B.A. degree. All of these elective courses must be included in the I.M.B.A. program of study. Upon approval of the graduate director and dean of The Graduate School, business-related law school electives may be substituted for Moore School electives. Such substitution is permissible only if the business-related law school electives are not counting toward the J.D. degree. Students must supply the I.M.B.A. office with a letter from the law school registrar stating that any substitute business-related law school electives are not also being used to satisfy the J.D. degree.

Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Moore School of Business.

Degree Requirements I.M.B.A. (68 Hours) / J.D. (90 Hours)

Students in the I.M.B.A./J.D. program must take 9 credit hours of electives in the Moore School. An additional 12 credit hours in the School of Law will be used to satisfy the 21 elective credit hours required for the I.M.B.A. degree. All of these elective courses must be included in the I.M.B.A. program of study. Upon approval of the graduate director and dean of The Graduate School, business-related law school electives may be substituted for Moore School electives. Such substitution is permissible only if the business-related law school electives are not counting toward the J.D. degree. Students must supply the I.M.B.A. office with a letter from the law school registrar stating that any substitute business-related law school electives are not also being used to satisfy the J.D. degree.

International Business/Aalto University, M.I.B/M.Sc.

Admission

Candidates who do not hold a degree from a U.S. institution, or have not graduated from a program with English as the instructional language, must submit a valid (two years old or less) test score demonstrating their command of the English language. The minimum score for the Test of English as a Foreign Language (TOEFL) is 90 (Internet-based) and 6.5 for the International English Language Testing System (IELTS) prior to beginning the program at South Carolina.

Candidates must meet the admission criteria of both institutions to complete the double degree course of study.
Sharing Credits

Each institution will determine if, and the amount of, credit hours or ETCS that may be transferred towards its degree. Recognition of coursework will be based on the transcripts of records provided by each partner institution. Students are required to sign a transcript release form as part of their participation in the program, allowing the Registrar to release their transcripts.

Note: Three courses (9 hours) may count for dual credit. Therefore, a student enrolled in the dual program will have a Program of Study for the School of Law showing a total of 91 credit hours, and a Program of Study for the School of Journalism and Mass Communications showing a total of 36 credit hours.

Public Administration / Social Work, M.P.A. / M.S.W.

Admissions

The College of Social Work (http://www.sc.edu/study/colleges_schools/socialwork/) and the Master of Public Administration program (http://sc.edu/study/colleges_schools/artsandsciences/political_science/study/graduate/masters/) in the Department of Political Science (http://sc.edu/study/colleges_schools/artsandsciences/political_science/), participate in a dual degree program that allows individuals to complete both the Master of Social Work and Master of Public Administration degrees in less time than if the degrees are completed separately.

Students apply to the dual degree program option through the USC Graduate School (http://www.gradschool.sc.edu/prospective/apply-grad.asp?page=apply). Application reviews, including required supplemental application materials required by the programs, and admission recommendations are made independently by the College of Social Work and by the Department of Political Science. Official notification of the admission decisions comes from the Graduate School.

Students enrolled in both Master of Social Work and Master of Public Administration courses in any term may be subject to fees for both programs.

Students enrolled in either the social work or public administration program beyond their first year of graduate study cannot apply for the dual degree program. Part-time social work or public administration students may enroll in the dual degree program. Advanced-standing social work students enrolled beyond the summer bridge term cannot apply for the dual degree program.

Degree Requirements M.P.A. (39 Hours) / M.S.W. (60 Hours)

Students may complete the dual degree program by starting in either the Master of Social Work program or the Master of Public Administration program. Each program offers a typical sequence of courses; through academic advisement with a dual degree coordinator in each program, students select specific courses to satisfy the requirements for each degree. All curriculum and hour requirements must be satisfied in order to graduate from the dual degree program. Students in the dual degree program must complete the program within six academic years. See the Social Work, MSW (p. 1214) and the Public Administration, M.P.A. (p. 882) bulletin entries or student handbook for additional information.

Two (2) SOWK elective courses can be satisfied by successfully completing POLI 770 and POLI 774 (6 credit hours total). SOWK 732 and SOWK 784 (6 credit hours total) may satisfy the MPA requirements. SOWK 784 requires coordination and contract with a MPA advisor to meet the terms of the internship. Thus the 60-credit hour MSW degree and 39-credit hour MPA degree can both be completed with a total of 87 credit hours.

The table below reflects the plan of study for a full-time student who begins the dual degree program in social work. Note that some of the courses beyond the first year of MPA and SOWK studies may be adjusted due to program or accreditation changes.
### Public History / Library and Information Science, M.A. / M.L.I.S.

One of only a few such programs in the United States, the joint master's program in public history and library and information science has been designed to prepare students for careers in historic agency administration, archives, records management, and library administration in such areas as manuscripts, rare books, government information, and reference.

#### Admissions

Persons applying to the joint master's program in public history and library and information science must meet the entrance requirements of both the Department of History and the School of Library and Information Studies. Note: The Department of History admits students only once a year, for the spring semester; contact the Department of History for details.

#### Degree Requirements M.A. (30 Hours) / M.L.I.S. (30 Hours)

Students earn both the Master of Arts in Public History and the Master of Library and Information Science upon successful completion of 60 hours of course work consisting of 30 hours in each area (earning both degrees separately would require 72 hours of graduate credit).

#### Courses Required for the Library and Information Science, M.L.I.S.

**Social Work / Health Promotion, Education, and Behavior, M.S.W. / M.P.H.**

**Admissions**

The College of Social Work (http://www.sc.edu/study/colleges_schools/socialwork/) and the Department of Health Promotion, Education, and Behavior (HPEB) (http://www.sc.edu/study/colleges_schools/public_health/study/areas_of_study/health_promotion_education_and_behavior/) in the Arnold School of Public Health (http://www.sc.edu/study/colleges_schools/public_health/) participate in a dual degree program that allows individuals to complete both the Social Work, MSW (p. 1214) and Master of Public Health degrees in less time than if the degrees are completed separately. Students apply to the dual degree program option through the USC Graduate School (http://www.gradschool.sc.edu/prospective/apply-grad.asp). Application reviews, including required supplemental application materials required by the programs, and admission recommendations are made independently by the College of Social Work and by the Arnold School of Public Health. Official notification of the admission decisions comes from the Graduate School. Students enrolled in both Master of Social Work and Master of Public Health courses in any term may be subject to fees for both programs.

Students enrolled in either the social work or public health program beyond their first year of graduate study cannot apply for the dual degree program. Part-time social work students may enroll in the dual degree program. Advanced Standing social work students enrolled beyond the summer bridge term cannot apply for the dual degree program. Students in the Online Master of Public Health (MPH) in Health Promotion, Education, and Behavior - Professional Program are not eligible for the dual MSW/MPH program.

**Degree Requirements M.S.W. (60 Hours) / M.P.H. (45 Hours)**

Students may complete the dual degree program by starting in either the Master of Social Work program or the Master of Public Health program. Each program offers a typical sequence of courses; through academic advisement with a dual degree coordinator in each program, students select specific courses to satisfy the requirements for each degree. All curriculum and hour requirements must be satisfied in order to graduate from the dual degree program. Students in the dual degree program must complete the program within six academic years. See the MSW bulletin and the MPH student handbook for additional information.

Two (2) SOWK elective courses can be satisfied by successfully completing two HPEB elective courses (6 credit hours total). SOWK 783 and SOWK 784 (6 credit hours total) satisfy the HPEB 797 requirement. The Fieldwork courses require coordination and contract with a HPEB advisor to meet the terms of the MPH Applied Practice Experience. Thus the 60-credit hour MSW degree and 45-credit hour MPH degree can both be completed with a total of 93 credit hours.

The table below reflects the plan of study for a full-time student who begins the dual degree program in social work. Note that some of the courses beyond the first year of MPH and SOWK studies may be adjusted due to program or accreditation changes.

students select specific courses to satisfy the requirements for each degree. All curriculum and hour requirements must be satisfied in order to graduate from the dual degree program. Students in the dual degree program must complete the program within six academic years. See the Social Work, MSW (p. 1214) and the MPH student handbook for additional information.

Two (2) social work elective courses can be satisfied by successfully completing HSPM 726 and an elective HSPM management courses (6 credit hours total). One HSPM elective policy course (3 hours) may be satisfied by successfully completing SOWK 778. HSPM 788 may be satisfied by completing SOWK 784 (coordination and contract with HSPM advisor required). Thus the 60-credit hour MSW degree and 45-credit hour MPH degree can both be completed with a total of 93 credit hours.

The table below reflects the plan of study for a full-time student who begins the dual degree program in social work. Note that some of the courses beyond the first year of MPH and SOWK studies may be adjusted due to program or accreditation changes.

### Degree Requirements M.S.W. (60 Hours)/M.P.H. (45 Hours)

Students may complete the dual degree program by starting in either the Master of Social Work program or the Master of Public Health program. Each program offers a typical sequence of courses; through academic advisement with a dual degree coordinator in each program, students select specific courses to satisfy the requirements for each degree. All curriculum and hour requirements must be satisfied in order to graduate from the dual degree program. Students in the dual degree program must complete the program within six academic years. See the Social Work, MSW (p. 1214) and the MPH student handbook for additional information.

Two (2) social work elective courses can be satisfied by successfully completing HSPM 726 and an elective HSPM management courses (6 credit hours total). One HSPM elective policy course (3 hours) may be satisfied by successfully completing SOWK 778. HSPM 788 may be satisfied by completing SOWK 784 (coordination and contract with HSPM advisor required). Thus the 60-credit hour MSW degree and 45-credit hour MPH degree can both be completed with a total of 93 credit hours.

The table below reflects the plan of study for a full-time student who begins the dual degree program in social work. Note that some of the courses beyond the first year of MPH and SOWK studies may be adjusted due to program or accreditation changes.

### Social Work / Health Service Policy and Management, M.S.W. / M.P.H.

#### Admissions

The College of Social Work (http://www.sc.edu/study/colleges_schools/socialwork/) and the Department of Health Services Policy and Management (http://www.sc.edu/study/colleges_schools/public_health/study/areas_of_study/health_services_policy_and_management/) (HSPM) in the Arnold School of Public Health (http://www.sc.edu/study/colleges_schools/public_health/), participate in a dual degree program that allows individuals to complete both the Master of Social Work and Master of Public Health degrees in less time than if the degrees are completed separately. Students apply to the dual degree program option through the USC Graduate School (http://www.gradschool.sc.edu/). Application reviews, including required supplemental application materials required by the programs, and admission recommendations are made independently by the College of Social Work and by the Arnold School of Public Health. Official notification of the admission decisions comes from the Graduate School. Students enrolled in both Master of Social Work and Master of Public Health courses in any term may be subject to fees for both programs.

Students enrolled in either the social work or public health program beyond their first year of graduate study cannot apply for the dual degree program. Part-time social work students may enroll in the dual degree program. Advanced-standing social work students enrolled beyond the summer bridge term cannot apply for the dual degree program. Students in the Distance Master of Public Health (MPH) in Health Services Policy and Management are not eligible for the dual MSW/MPH program.

</tbody>
</table>
is not offered as a part-time program; therefore, students enrolled in the Part-time social work students are not eligible for the dual degree program.

**Degree Requirements M.S.W (60 Hours) / J.D. (90 Hours)**

Students must complete the dual degree program by starting in the Juris Doctor program. Each program offers a typical sequence of courses; through academic advisement with a dual degree coordinator in each program, students select specific courses to satisfy the requirements for each degree. All curriculum and hour requirements must be satisfied in order to graduate from the dual degree program. Students in the dual degree program must complete the program within seven academic years. See the Social Work, M.S.W. and the J.D. bulletin (p. 1476) for additional information.

The law program accepts up to nine (9) hours of social work courses as electives in its program and the MSW Program accepts up to six (6) hours of law courses towards the MSW degree. Thus the 60-credit hour MSW degree and 90-credit hour J.D. degree can both be completed with a total of 135 credit hours. However, according to the American Bar Association (ABA), the Juris Doctor program cannot accept any social work credits earned prior to matriculating in the law program. The first year of law studies must be completed at one time. Students enrolled in the dual degree MSW/JD program must be enrolled concurrently in SOWK courses and at least three (3) credit hours of LAWS courses in the semester during which they plan to share SOWK credit hours toward the J.D. degree.

The table below reflects the plan of study for a full-time student who begins the dual degree program in law. Note that the courses beyond the first year of law studies may be adjusted due to program or accreditation changes.

Law course descriptions are found in the School of Law Bulletin (p. 1476)

Social Work / Law, M.S.W. / J.D.

**Admissions**

The College of Social Work (http://www.sc.edu/study/colleges_schools/socialwork/) and the School of Law (http://sc.edu/study/colleges_schools/law/) participate in a dual degree program that allows individuals to complete both the Master of Social Work and Juris Doctor degrees in less time than if the degrees are completed separately. Application to the MSW program is made through the USC Graduate School (http://www.gradschool.sc.edu/) and application to the law program is made through the Law School Admission Council (LSAC). Application reviews, including required supplemental application materials required by the programs, and admission recommendations are made independently by the College of Social Work and by the School of Law. Official notification of admission into the MSW Program will be made by the Graduate School. Students enrolled in both Master of Social Work and Juris Doctor courses in any term may be subject to fees for both programs.

Students enrolled in either the social work or law program beyond their first year of graduate study cannot apply for the dual degree program. The Juris Doctor degree is not offered as a part-time program; therefore, students enrolled in
Sport and Entertainment Management with National Taiwan Normal University, Ph.D.

The Sport and Entertainment Management with National Taiwan Normal University, Ph.D. program offers a comprehensive curriculum that prepares students for careers in the sport and entertainment industry. The program includes courses in human behavior and social environment, diversity and social justice, field instruction, and social work research methodologies. Students also have the opportunity to take electives in law and other related fields. The required courses provide a solid foundation in the principles and practices of social work, while the research core and cognates allow students to specialize in their areas of interest. The dissertation requirement prepares students for advanced research in the field. The Sport and Entertainment Management/ Sport, Leisure and Hospitality Management graduate program offers a similar curriculum, focusing on business analytics and related fields.

Other Graduate Courses and Programs

- Health Care Compliance, Certificate (p. 1233)
- Masters of Studies in Law, Health Systems Law (p. 1233)

Health Care Compliance, Certificate

Students who earn a compliance certificate will have the knowledge and skills necessary to work in a compliance position for a health care entity. Students will understand the various governmental entities which govern the U.S. health system and regulate health care entities. Students will begin to understand the role of law and the legal profession in that system. Students will develop skills necessary to help health care providers and entities comply with a variety of dynamic legal requirements. This certificate does not qualify a student to take a bar examination or prepare a student for the practice of law.

Admission Requirements

Successful completion of undergraduate degree from a regionally accredited institution or the equivalent.

Masters of Studies in Law, Health Systems Law

Students who earn a Master’s of Law in Health Systems Law will have the knowledge of legal principles and skills necessary to work in a position of significant responsibility within a health care industry. This degree, however, does not qualify a student to take a bar examination or prepare a student for the practice of law. Students will understand the various governmental entities which govern the U.S. health system and regulate health care entities. Students will understand the role of law and the legal profession in that system. Students will develop the skills necessary to identify relevant legal rules affecting health care entities. Students will develop skills necessary to help health care providers and entities comply with a variety of legal requirements. Students will develop the ability to adapt to a dynamic legal and market environment and apply skills learned in the Master’s Program as regulations and market forces change.

Requirements for Admission:

- Successful completion of undergraduate degree from a regionally accredited institution or the equivalent.
- Statement of interest and resume.
- Two professional or academic letters of recommendation.
• Qualifying scores on either the GRE or LSAT. Competitive applicants will have a combined GRE score or an LSAT score that is consistent with the prevailing admitted applicant profile for the JD program.

**Comprehensive Assessment**

All candidates for a Master's degree must complete a comprehensive assessment in the major field of study that is distinct from program course requirements. A comprehensive assessment is one that requires a student to synthesize and integrate knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice or research in the discipline. It must be used as a means by which faculty judge whether the student has mastered the body of knowledge and can demonstrate proficiency in the required competencies. Many different models are possible, including written and oral comprehensive examinations, portfolios, supervised practice placements with comprehensive evaluation, a major written paper such as a thesis or an applied research project, or development of case studies. Students may complete a project related to an elective course of their choice or an externship (if externships are a part of the program). Projects must reflect significant work in addressing a hypothetical or real issue involving legal compliance or health law or policy.

**Course Descriptions**

**A**

- Accounting (ACCT) (p. 1236)
- African Amer Studies (AFAM) (p. 1237)

- Anesthesia for Nurses (ASNR) (p. 1237)
- Anthropology (ANTH) (p. 1239)
- Arabic (ARAB) (p. 1242)
- Art Education (ARTE) (p. 1242)
- Art History (ARTH) (p. 1243)

Accounting (ACCT)

ACCT 501 - Financial Accounting III (3 Credits)
Advanced topics in accounting theory and practice as it relates to preparation of financial statements.
Prerequisites: ACCT 405.

ACCT 502 - Managerial Accounting for Decision Making (3 Credits)
Advanced topics in the use of accounting information for managerial decisions.
Prerequisites: ACCT 402.

ACCT 503 - Tax II (3 Credits)
Advanced tax topics. Emphasis is on the taxation of partnerships and corporations.
Prerequisites: ACCT 403.

ACCT 504 - Legal Issues for Accountants & Managers (3 Credits)
The study of legal issues affecting accountants and managers.
Prerequisites: ACCT 324.

ACCT 505 - Governmental and Nonprofit Accounting (3 Credits)
Accounting principles and procedures for local, state, and federal governmental units and for private nonprofit organizations.
Prerequisites: ACCT 405.

ACCT 506 - International Financial Reporting (3 Credits)
Study of the principles and application of international financial reporting standards.
Prerequisites: ACCT 405.

Graduation with Leadership Distinction: GLD: Global Learning

ACCT 590 - Special Topics in Accounting (3 Credits)
Analysis of current topics, issues and practices in various areas of accounting. May be repeated as content varies by title.

ACCT 700 - Master of Accountancy Student Development (0-1 Credits)
Skills and strategies for Master of Accountancy students at the University of South Carolina.

ACCT 702 - Application of Advanced Databases to Accounting and Business (3 Credits)
The integration, configuration, and operation of accounting information within enterprise resource planning and other databases as applied to current business practices.

ACCT 725 - Financial Accounting for Professional MBA Students (3 Credits)
Accounting concepts and practices necessary to understand and use the information in corporate financial statements.

ACCT 726 - Managerial Accounting for Professional MBA Students (3 Credits)
Explores the types of decisions managers make and the types of accounting information that are helpful in making these decisions. Emphasizes the techniques and data used for planning, controlling, and evaluating operations.
Prerequisites: C or better in ACCT 725.

ACCT 728 - Financial Accounting (3 Credits)
Directs attention to accounting concepts, conventions, and assumptions for an understanding of the content and underlying principles of financial statements.

ACCT 729 - Managerial Accounting (3 Credits)
Directs attention to an understanding of the manner in which accounting aids management by providing information for decision-making and control of operations.
Prerequisites: ACCT 728.

ACCT 730 - International Accounting (3 Credits)
A study of the international dimensions of accounting, including such topics as the patterns of accounting development found in other nations, the promulgation of worldwide accounting standards, and the accounting problems associated with multinational corporate operations.
Prerequisites: ACCT 728 and ACCT 729.

ACCT 731 - Federal Taxes and Management Decisions (3 Credits)
Fundamentals of taxation with attention upon federal income tax provisions and the consequences of business decisions.
Prerequisites: ACCT 728 and ACCT 729.

ACCT 732 - Auditing II (3 Credits)
Advanced topics in independent, internal, and governmental auditing.

ACCT 733 - Accounting Regulation and Financial Reporting Issues (3 Credits)
Examination of the theoretical, practical, economic, and political aspects of accounting regulation and financial reporting issues.

ACCT 734 - Accounting Research and Communication (3 Credits)
Research on accounting and auditing issues, and the oral and written communication of accounting and auditing processes and research results.

ACCT 735 - Cost/Managerial Accounting III (3 Credits)
A critical examination of contemporary cost accounting theory and practice.

ACCT 736 - Information Technology Assurance, Control, and Security (3 Credits)
Governance, control, and audit of information technology.

ACCT 737 - Accounting Information Systems from a Strategic Perspective (3 Credits)
Design and implement of accounting information systems to achieve strategic objectives.
Prerequisites: ACCT 435.

ACCT 738 - Financial Statement Analysis (3 Credits)
Analysis of financial statements for profitability and risk assessment and for firm and segment valuation.
Prerequisites: DMSB 717 or ACCT 729 or equivalent.

Cross-listed course: FINA 756

ACCT 739 - Enterprise Resource Planning (3 Credits)
Business process integration within Enterprise Resource Planning systems including the use and management of the enterprise core modules within ERP software implemented companies.

ACCT 741 - Special Topics in Accounting (3 Credits)
A study of selected accounting topics.

ACCT 742 - Independent Study in Professional Accounting (1-6 Credits)
Individually arranged studies in specialized areas of professional accounting.
**ACCT 743 - Accounting for Management Control (3 Credits)**
Concepts and techniques of accounting and budgeting for management control in the modern organization. Topics include cost control, budgetary control, and performance and evaluation.
**Prerequisites:** ACCT 729.

**ACCT 745 - Auditing and Information Technology (3 Credits)**
The use of information technology for auditing business entities and other organizations.

**ACCT 746 - Data Analytics for Accounting and Auditing (3 Credits)**
Analysis of data in a variety of methods and formats to produce accounting and auditing information to improve decision-making.
**Prerequisites:** C or better in ACCT 745.

**ACCT 747 - Accounting Information Systems for Strategic Management (3 Credits)**
Understand, design, and implement accounting information systems to effectively control and protect information for strategic management decision making.

**ACCT 750 - Tax Research and Communication (3 Credits)**
Techniques of tax research focusing on advanced tax topics, tax administration, and procedures before the Internal Revenue Service, including oral and written communication of research results.

**ACCT 751 - Business Entity Tax Issue (3 Credits)**
Basic concepts of taxation of C Corporations, S Corporations, partnerships, Gift and Estates, and tax administration procedures.

**ACCT 752 - Advanced Business Entity Tax Issues (3 Credits)**
Advanced concepts of taxation of Corporations and partnerships.
**Prerequisites:** ACCT 751.

**ACCT 753 - Advanced Individual Tax Issues (3 Credits)**
Estate and gift tax, Estate planning, trust taxation, executive compensation, stock options, retirement accounts, AMT, and other individual tax issues.

**ACCT 754 - Multijurisdictional Tax Issues (3 Credits)**
Global, State, and local taxation issues, including (but not limited to) transfer pricing, foreign tax credits, subpart F, tax treaties, different types of taxes, nexus, and corporate income tax.

**ACCT 755 - Taxation of Corporate Reorganizations (3 Credits)**
An examination of the tax aspects of corporate mergers and reorganizations.
**Prerequisites:** ACCT 750.

**ACCT 756 - Advanced Estate and Income Planning (3 Credits)**
Advanced estate planning techniques, including executive compensation.

**ACCT 757 - Seminar in Special Tax Topics (3 Credits)**
Addresses current tax problems and tax planning opportunities.
**Prerequisites:** ACCT 750.

**ACCT 832 - Doctoral Seminar in Accounting Research (3 Credits)**
Seminar for beginning doctoral students that provides an overview of research topic areas, methods, and designs currently used in accounting.

**ACCT 833 - Doctoral Seminar in Financial Accounting (3 Credits)**
Research methods and issues related to financial accounting topics.

**ACCT 834 - Doctoral Seminar in Managerial Accounting (3 Credits)**
Research methods and issues related to managerial accounting topics.

**ACCT 835 - Doctoral Seminar in Auditing and Accounting Information Systems (3 Credits)**
Research methods and issues related to auditing and accounting information systems topics.

**ACCT 836 - Doctoral Seminar in Contemporary Accounting Topics (1-3 Credits)**
Research methods and issues related to contemporary accounting topics.

**ACCT 837 - Directed Doctoral Research Project in Accounting (3 Credits)**
Formulation of concepts, synthesis of literature, development of a research design, and conduct of any appropriate empirical tests.

---

**African Amer Studies (AFAM)**

**AFAM 515 - Race, Gender, and Graphic Novels (3 Credits)**
Representations of race and gender in comics with a special emphasis on the experiences of African Americans.
**Cross-listed course:** WGST 515
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

**AFAM 517 - An Anthropological View of Blacks in Film (3 Credits)**
Cultural representations, constructions, production, and consumption of African-American identity in the popular culture medium of feature films.
**Cross-listed course:** ANTH 517
**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**AFAM 556 - African American Theatre (3 Credits)**
The major movements, figures, plays, and critical strategies that have marked the development of African American theatre in the 19th, 20th, and 21st centuries.
**Prerequisites:** ENGL 101, ENGL 102, and one course between ENGL 270 - ENGL 292.
**Cross-listed course:** ENGL 556, THEA 556
**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

**AFAM 580 - Culture and Identity in the African Diaspora (3 Credits)**
Students will explore the African Diaspora as a social, cultural, and historical formation with Africa at its center, focusing on US, Latin American, and Caribbean African-descended communities.
**Cross-listed course:** ANTH 580
**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

**AFAM 798 - Advanced Topics in African American Studies (3 Credits)**
Reading and research on selected topics in African American Studies. May be repeated as content varies by title.

---

**Anesthesia for Nurses (ASNR)**

**ASNR 700 - Introduction to Nurse Anesthesia Practice (2 Credits)**
Introduction to foundational concepts in nurse anesthesia and the role of the nurse anesthetist.
ASNR 750 - Health Policy, Ethics, and Legal Concepts for the DNP Nurse Anesthetist (3 Credits)
Historical and current concepts in health policy, ethics, and legal concepts for the DNP Nurse Anesthetist.

ASNR 760 - Clinical Topics in Nurse Anesthesia Practice I (2 Credits)
Introduction to pain management concepts and the use of ultrasound guided techniques in treatment.
Corequisite: ASNR 801.

ASNR 761 - Basic Anesthesia Principles I (4 Credits)
Application of basic anesthesia principles to the practice of nurse anesthesia.
Prerequisites: ASNR 700.

ASNR 762 - Basic Anesthesia Principles II (4 Credits)
This course is a continuation of Basic Principles in Anesthesia I, covering beginning concepts in nurse anesthesia practice.
Prerequisites: ASNR 761.
Corequisite: ASNR 771.

ASNR 763 - Advanced Principles in Nurse Anesthesia Practice (4 Credits)
This course covers advanced concepts in nurse anesthesia practice.
Prerequisites: ASNR 762.
Corequisite: ASNR 773.

ASNR 771 - Introduction to Nurse Anesthesia Practicum (1 Credit)
This course provides a thorough orientation to the clinical area and application of beginning anesthesia concepts to patients through simulation and precepted in-hospital assignments.
Corequisite: ASNR 762.

ASNR 772 - Seminar in Nurse Anesthesia I (2 Credits)
Students will present a critique of anesthetic management of selected cases or topics related to their doctoral project in anesthesia for peer review. A review of the literature and application of the current research is to be included in the presentations.
Prerequisites: ASNR 763.

ASNR 773 - Clinical Practicum I (2 Credits)
The first of five clinical practicums focusing on general anesthesia.
Prerequisites: ASNR 771.
Corequisite: ASNR 763.

ASNR 775 - Clinical Practicum II (6 Credits)
The second of five clinical field experiences including general and specialty anesthesia rotations.
Prerequisites: ASNR 773.

ASNR 777 - Clinical Practicum III (6 Credits)
The third of five clinical field experiences including general and specialty anesthesia rotations.
Prerequisites: ASNR 775.

ASNR 779 - Clinical Practicum IV (6 Credits)
The fourth of five clinical field experiences including general and specialty anesthesia rotations.
Prerequisites: ASNR 777.

ASNR 781 - Clinical Practicum V (6 Credits)
The fifth of five clinical field experiences including general and specialty anesthesia rotations.
Prerequisites: ASNR 779.

ASNR 795 - Application of Physical and Chemical Concepts in Nurse Anesthesia Practice (3 Credits)
Application of physical and chemical concepts to the practice of nurse anesthesia.
Prerequisites: ASNR 700.

ASNR 797 - Professional Role of the DNP Nurse Anesthetist I (3 Credits)
This course addresses the professional role responsibilities, challenges and issues for nurse anesthetists.

ASNR 798 - Application of Biomedical Concepts in Nurse Anesthesia Practice (3 Credits)
Application of physiology and pathophysiology to nurse anesthesia practice.
Prerequisites: ASNR 763 and PPHP 701.

ASNR 800 - Integration of Concepts Across Nurse Anesthesia Practice (2 Credits)
Review of concepts with the purpose of creating broad view connections of anesthesia principles.
Prerequisites: ASNR 761, ASNR 762, ASNR 763, ASNR 795, ASNR 798.

ASNR 801 - Specialty Focus Simulation I (1 Credit)
Use of simulation to learn and practice various peripheral nerve blocks and airway block placement with ultrasound and nerve stimulator techniques. Preparatory work outside of simulation time is required.
Corequisite: ASNR 760.

ASNR 802 - Specialty Focus Simulation II (1 Credit)
High fidelity simulation activities to practice response to critical events in nurse anesthesia practice. Preparatory work outside of simulation is required.
Corequisite: ASNR 860.

ASNR 860 - Clinical Topics in Nurse Anesthesia Practice II (2 Credits)
Exploring the contributors to patient safety – including systems and human factors – and how to safely manage critical events in the perioperative period.
Corequisite: ASNR 802.

ASNR 872 - Seminar in Nurse Anesthesia II (2 Credits)
Students will present for peer review and critique their completed doctoral project. Presentation of project will meet the requirement for dissemination of their terminal project.
Prerequisites: ASNR 772 and ASNR 899.

ASNR 896 - Professional Role of the DNP Nurse Anesthetist II (3 Credits)
Education, management, and business principles, as they relate to the DNP Nurse Anesthetist, will be explored and practiced.

ASNR 897 - DNP Project I (2 Credits)
DNP Project Preparation for Nurse Anesthesia Students.

ASNR 898 - DNP Project II (1-2 Credits)
DNP Project Preparation for Nurse Anesthesia Students.
Prerequisites: ASNR 897.
Anthropology (ANTH)

ANTH 512 - Gender Issues in China (3 Credits)

ANTH 513 - Anthropological Ethnobotany (3 Credits)
Survey of how each anthropological subfield studies the interrelationships between plants and peoples. Application of methods, including interviewing and data analysis.

ANTH 515 - Tradition and Transformations in Islamic Cultures (3 Credits)
Islam as a dynamic cultural tradition: emphasis on the tension between Islamization and the larger Islamic tradition.
Cross-listed course: RELG 551
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

ANTH 517 - An Anthropological View of Blacks in Film (3 Credits)
Cultural representations, constructions, production, and consumption of African-American identity in the popular culture medium of feature films.
Cross-listed course: AFAM 517
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 518 - Visual Cultures (3 Credits)
Survey of visual anthropology including theoretical frameworks of ways of seeing, ethnographic photography and filmmaking, contemporary technologies, and their effects on culture.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 520 - Field Problems in Ethnology (6 Credits)
A two-semester class and field session. Research design, field methods, interpretation of data, and the development of theory from the data.

ANTH 525 - Ethnoecology (3 Credits)
Seminar exploring human-plant-animal-natural interactions within an anthropological framework.

ANTH 533 - North American Archaeology (3 Credits)
Prehistoric and historic archaeology.

ANTH 534 - Prehistoric Archaeology of South America (3 Credits)
Prehistoric archaeology of the South American continent.
Cross-listed course: LASP 425

ANTH 535 - Conflict Archaeology (3 Credits)
Anthropological and archaeological theories and methods in the study of conflict, war, and warfare. Causes, effects, outcomes of sustained social acts of violence of groups, tribes, states, and nations. Evolutionary, biological, social origins of warfare. History, strategy, and tactics, battlefield archaeology.

ANTH 536 - Public Archaeology (3 Credits)
Philosophy and mechanics of modern archaeological Cultural Resource Management (CRM). CRM legislation, regulation, and process. Contemporary issues and problems in Public Archaeology including Native American reburial negotiations, conflict resolution, ethics, looting, business practices, standards, contexts and protection.

ANTH 541 - Field Problems in Archaeology (3 Credits)
Archaeological field methods and techniques such as excavation, flotation, sampling, surveying, photography, and remote sensing.
Prerequisites: ANTH 320.

ANTH 546 - Forensic Archaeological Recovery (FAR) (3 Credits)

ANTH 550 - Archaeological Laboratory Methods (3 Credits)
Laboratory on basic prehistoric and historic artifact analysis, including analytical methods, laboratory equipment, and data interpretation. May be repeated.
Prerequisites: ANTH 319 or ANTH 322.

ANTH 551 - Medical Anthropology: Fieldwork (3 Credits)
Application of observation techniques, field notes, informant interviewing, and secondary data analysis to interpreting differential perceptions of health problem solving in the community and clinic.

ANTH 552 - Medical Anthropology (3 Credits)
Socio-cultural factors in health, illness, healing, and in medical systems. Cross-cultural and ethnographic evidence for public health research and program applications.
Cross-listed course: HPEB 552
Graduation with Leadership Distinction: GLD: Research

ANTH 553 - Anthropological Approaches to Narrative and Performance (3 Credits)
The ways people from various cultures reflect on, reinforce, and construct their social realities through narrating, which will be considered as both artistic expression and social action.
Cross-listed course: LING 545

ANTH 555 - Language and Gender (3 Credits)
Approaches to gender and language emphasizing the social grounding of both; how language reflects sociocultural values and is a tool for constructing different types of social organization.
Cross-listed course: LING 541, WGST 555
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 556 - Language and Globalization (3 Credits)
Anthropological approach to issues of language and globalization. Linguistic consequences of globalization under consideration include communicative patterns, linguistic change, and language and political economy.
Cross-listed course: LING 556
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 557 - Psychological Anthropology (3 Credits)
Psychological aspects of behavior from a cross-cultural perspective.

ANTH 561 - Human Osteology (4 Credits)
An intensive examination of the human skeleton and techniques for anthropological interpretation.

ANTH 565 - Health and Disease in the Past (3 Credits)
Varieties and effects of disease patterns among past populations illustrating biological, environmental, and cultural interrelationships.

ANTH 567 - Human Identification in Forensic Anthropology (3 Credits)
Theories and methodologies necessary for the identification of human skeletal remains in a forensic setting.

ANTH 568 - Nutritional Anthropology (3 Credits)
ANTH 569 - International Development and the Environment (3 Credits)
Intersections of international development and environmental change; study of general theoretical perspectives balanced with case studies from the Global South.
Cross-listed course: GEOG 569
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

ANTH 570 - Ethnographic Film (3 Credits)
Problems in conveying and interpreting ethnographic information on film or tape. Includes syntax, suitability of subject matter to the medium, irrelevant or distracting information, and observer bias.

ANTH 572 - Temporal Processes in Culture (3 Credits)
Clocks, cycles, and contingencies as they affect human societies now and have done so in the past. Theories and models from biology and the other natural sciences will be used to interpret the history of culture.

ANTH 575 - Economic Anthropology (3 Credits)
A cross-cultural study of the economic behavior of pre-literate and literate societies.

ANTH 576 - Archaeology of the African Diaspora (3 Credits)
Foodways, architecture, crafts, and narrative of African-American cultures.

ANTH 577 - Advanced Topics in the Anthropological Study of Social Organization (3 Credits)
Selected recent theoretical and methodological developments in the study of social organization.

ANTH 579 - Cultural Ecology (3 Credits)
An interdisciplinary approach to prehistoric, historic, and contemporary relationships between the development of socio-cultural configurations and ecosystems.

ANTH 580 - Culture and Identity in the African Diaspora (3 Credits)
Students will explore the African Diaspora as a social, cultural, and historical formation with Africa at its center, focusing on US, Latin American, and Caribbean African-descended communities.
Cross-listed course: AFAM 580
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 581 - Globalization and Cultural Questions (3 Credits)
This course examines cultural understandings of and responses to globalization, examining topics such as its history and theories, migration, economic integration and inequality, identity, social movements, and the environment.
Cross-listed course: GEOG 581
Graduation with Leadership Distinction: GLD: Global Learning

ANTH 586 - Discourse, Gender and Politics of Emotion (3 Credits)
Anthropological approach to issues of discourse, gender and emotion. Issues under consideration include the social control, force, and forms of emotional discourse and the relationship between emotion and culture from gender-oriented perspectives.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 591 - Selected Topics (1-3 Credits)
Topics of special interest. May be taken more than once as topics change.

ANTH 600 - Survey of Linguistics (3 Credits)
Survey of core areas of linguistics and extensions to closely related disciplines. Introduction to the linguistic component of human cognition. Formal description and analysis of the general properties of speech and language, the organization of language in the mind/brain, and cross-linguistic typology and universals.
Cross-listed course: ENGL 680, LING 600

ANTH 699 - Reading and Research (3-6 Credits)

ANTH 701 - Physical Anthropology and Archaeology for Teachers (3 Credits)
Human origins, human evolution, human prehistory, and cultural existence from its less complex forms to early civilizations. An introduction to the concepts, methods, and data of physical, biological, and archaeological anthropology primarily for teachers. May be taken with, or independently of, ANTH 702.

ANTH 702 - Social and Linguistic Anthropology for Teachers (3 Credits)
Selected contemporary cultures, including their languages. An introduction to the concepts, methods, and data of sociocultural anthropology and anthropological linguistics, primarily for teachers. May be taken with, or independently of, ANTH 701.

ANTH 703 - Anthropological Inquiry (3 Credits)
A discussion of the general topics of anthropological inquiry, theories, and methods.

ANTH 704 - Anthropological Connections (3 Credits)
Faculty representing subdisciplines of anthropology will explore with students the connections between subfields, theoretical and regional perspectives, and analyses of the past and present.
Prerequisites: ANTH 703.

ANTH 706 - Engendering Global Capitalism (3 Credits)
The origins of global capitalism, the nature of money and debt, the roles of gender, race and class in social formations, and the relationship between production and reproduction.
Cross-listed course: WGST 706

ANTH 711 - Professionalism and Ethics (3 Credits)
Presentations of critical skills to achieve career goals in a variety of anthropological applications, develop portfolios, prepare competitive job applications, and produce effective grant proposals. Ethics issues in anthropological research publishing and teaching.

ANTH 712 - Thesis Skills Seminar (1-3 Credits)
Skills needed for writing a master's thesis in anthropology, including literature review, current theory, research design, data analysis, and written presentation.

ANTH 714 - Teaching Practicum in Anthropology (1 Credit)
Uses the context of leading discussions in ANTH 101 and 102 to introduce and explore issues relating to pedagogy. Restricted to TA's for ANTH 101 and ANTH 102.

ANTH 718 - Seminar in European Archaeology (3 Credits)
Consideration and critique of current research in European archaeology.

ANTH 719 - Field Problems in Ethnology (3 Credits)
Advanced graduate seminar on methods of ethnology, including research design, field methods, and interpretation of data, and the development of theory from data. Includes class and field sessions.

ANTH 720 - Development of Anthropological Archaeology (3 Credits)
Anthropological archaeology: history, theory, contemporary issues, and relationship to other disciplines.
ANTH 721 - Community Anthropology for Professionals (3 Credits)
Those skills of social/cultural anthropology and anthropological linguistics which can aid practitioners in health, law, education, and other professional fields to function in community settings. Emphasis on cultural and sub-cultural differences in South Carolina, the Southeast, and the United States.

ANTH 722 - Summer Field School in Archaeology (3-6 Credits)
Experience in supervising archaeological research, making field decisions, and directing the collection, processing, and interpretation of archaeological data in the field.

ANTH 723 - Summer Field School in Ethnography (3-6 Credits)
Experience in designing and carrying out ethnographic research including project design, data collection, analysis, and description.

ANTH 724 - Visual Anthropology Research (3 Credits)
Exploring the range of anthropological research utilizing visual records (still photographs and video/film) including theoretical underpinnings and hands-on practice: how and why to use visual records in research.

ANTH 730 - Cultural Theory through Ethnography (3 Credits)
Theories of culture presented through ethnographies from different parts of the world. Issues in writing, reading, and interpreting ethnographic information.

ANTH 733 - Seminar in North American Prehistory (3 Credits)
Consideration and critique of current research in North American archaeology.

ANTH 740 - Current Issues in Archaeology (3 Credits)
Review of theoretical trends in American archaeology.

ANTH 741 - Ethnology for Archaeologists (3 Credits)
Ethnographic data important to archaeological thinking; archaeological models resting on ethnographic data. Emphasis on variation of ethnographic data.

ANTH 742 - Public Archaeology (3 Credits)
The legal, philosophical, and ethical foundations of archaeology in the United States. Considerations on relating archaeology to the non-professional.

ANTH 743 - Research Practicum in Archaeology (1 Credit)
Observation and participation in the ongoing management of archaeological resources.

ANTH 744 - Research Practicum in Conservation Archaeology (1 Credit)
Observation and participation in the ongoing management of archaeological resources.

ANTH 745 - Seminar in Historical Archaeology (3 Credits)
Advanced seminar on theoretical considerations and methodological approaches to the study of historical archaeological materials.

ANTH 747 - Language as Social Action (3 Credits)
Examines language as a social, cultural, and political matrix. Topics include ideology, gender, race, power, agency, and resistance. Students will apply linguistic theories in their own analyses of everyday speech.

Cross-listed course: LING 747

ANTH 748 - Introduction to Linguistic Anthropology (3 Credits)
A comprehensive introduction to linguistic anthropology, its relationship(s) to sociolinguistics, discourse analysis, and conversation analysis. Contributions made to social theory and theories of language and discourse will be understood.
Prerequisites: LING 600.

Cross-listed course: LING 748

ANTH 750 - Archaeological Laboratory Analysis (4 Credits)
Methods and techniques necessary to operationalize and test archaeological hypotheses in a laboratory context.

ANTH 751 - Archaeological Research Design and Analysis (3 Credits)
An overview of skills required to design and organize archaeological field and laboratory research.

ANTH 756 - Analysis of Conversation (3 Credits)
Types of interactive organization found within conversation and the methods and procedures used by participants to achieve order.

Cross-listed course: LING 743

ANTH 760 - Biocultural Adaptation (3 Credits)
Approaches to human adaptation emphasizing the interaction of biology and culture. Studies of biocultural adaptation to environmental, social, and economic constraints. Research design and methodology in adaptation studies.

ANTH 761 - Bioarchaeology Principles (3 Credits)
Methods and theories of application of physical anthropological data to archaeological problems.

ANTH 762 - Biological Anthropology Principles and Theory (3 Credits)
Major theories and principles of biological anthropology.

ANTH 771 - Migration and Culture (3 Credits)
Theories of migration; peopling of the earth; family structure and migration in different economic regimes and cultures; seasonal and cyclical patterns.

ANTH 772 - Gender and Culture (3 Credits)
Different cultures’ ideas about gender and use of gender to organize social groups in a wide range of societies, including American subcultures.

Cross-listed course: WGST 772

ANTH 773 - Exploring Ethnohistory (3 Credits)
Cross-cultural study of history. Includes theoretical perspectives and cases from the Americas, Europe, Africa, and Asia.

Cross-listed course: HIST 773

ANTH 774 - Seminar in Environmental Anthropology and Development (3 Credits)
Findings of ecological and economic anthropology applied to problems of contemporary development. Emphasis on less developed countries.

ANTH 775 - Anthropology of Art (4 Credits)
Anthropological examination of the art of small-scale societies with attention, where appropriate, to the art of more complex societies.

ANTH 777 - Cinema and Archaeology (1 Credit)
Critical examination of films dealing with archaeological subjects.

ANTH 780 - Ethnography of Communication (3 Credits)
Ethnographic analysis of communication in groups and institutions in different cultures.

ANTH 781 - Human Interaction (3 Credits)
Introduction to basic research on how human beings interact with each other and an historically constituted material world.

ANTH 782 - Language Ideology: The Political Economy of Language Beliefs and Practices (3 Credits)
Linguistic anthropological approaches that examine how ideological systems mediate social structures and linguistic/discursive forms and functions. Topics range from language and political economy, identity and identifications, institutions, and nation-building/nationalism.

Cross-listed course: LING 782
ANTH 787 - Material Culture Studies (3 Credits)
Seminar in historical study of material culture; principal disciplinary and theoretical perspectives; emphasis on material culture of North America.
Cross-listed course: HIST 787

ANTH 791 - Special Topics in Anthropology (3 Credits)
Seminar for advanced students. Topics vary according to student and instructor interest. May be repeated for different topics.

ANTH 797 - Reading and Research (3 Credits)
Independent study course designed to facilitate student’s research. An independent study contract with content approved by instructor is required.

ANTH 798 - Research Practicum in Anthropology (3-6 Credits)
Participation under faculty supervision of anthropological research. Development of the research project, collecting, recording, analyzing, and reporting on the data.

ANTH 799 - Thesis Preparation (1-9 Credits)

ANTH 899 - Dissertation Preparation (1-12 Credits)
T/U grading.

Arabic (ARAB)

ARAB 615 - Intensive Readings in Arabic (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language requirement with successful completion of the course. Undergraduates may take the course as an elective only. Grades S/U for graduates and undergraduates.

ARAB 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the MA or PhD degree.

Art Education (ARTE)

ARTE 520 - Art for Elementary Schools (3 Credits)
Methods of teaching art to elementary and preschool children. Major emphasis will be given to relevant studio experiences.

ARTE 525 - Elementary Methods for K-12 Art Certification (3 Credits)
Curriculum, methods, and materials for teaching art to elementary and preschool children.

ARTE 525P - Elementary Methods for K-12 Art Certification Practicum (1 Credit)
Experiential practice and learning in elementary schools.
Corequisite: ARTE 525.

ARTE 530 - Art of Children (3 Credits)
A study of prominent theories of the artistic development of children from infancy through adolescence. Students will examine children's art from various age groups and apply theoretical explanations to these observations.

ARTE 540 - The School Art Program (3 Credits)
An introduction to art education as a profession. The history, curricular development, and current issues are examined. Students practice proven teaching techniques.
Prerequisites: ARTE 520.

ARTE 540P - Practicum in Art Education (1 Credit)
A sequence of supervised practicum experiences in middle and secondary school art education settings. Seminars and group discussions.
Corequisite: ARTE 540.

ARTE 550 - Incorporating New Media in Art Education (3 Credits)
Applications new media such as digital photography, sound, and other interactive hypermedia for the art classroom. Emphasis on integrating art production with art history, criticism, and aesthetics.

ARTE 560 - Secondary Methods for K-12 Art Certification (3 Credits)
Curriculum, methods, and materials for teaching art to secondary school students.
Corequisite: ARTE 560P.

ARTE 560P - Secondary Methods for K-12 Art Certification Practicum (1 Credit)
Experiential curriculum, methods, and materials for teaching secondary schoolchildren.
Corequisite: ARTE 560.

ARTE 565 - Field Experience Seminar (3 Credits)
Corequisite: EDSE 471.

ARTE 595 - Art Education Workshop (1-6 Credits)
A workshop especially for teachers and prospective teachers, featuring practical art experiences and projects for elementary and secondary school. Topic varies by title.

ARTE 701 - Seminar in Art Education (3 Credits)
Research methods used in art education and related areas.

ARTE 702 - Problems in the Teaching of Art (3 Credits)
Problems in teaching a discipline-based approach to art education; examination of the lives and works of famous artists and production of teaching materials.

ARTE 703 - Issues and Trends in Art Education (3 Credits)
Subject-centered approach to art history; the interrelationship of art and society, and the significance of art in social change.

ARTE 705 - Program Development in Art (3 Credits)
Comprehensive studies of curriculum designs and methods, methods and technologies from modernist to postmodernist assumptions in elementary and high school art education programs.

ARTE 725 - Elementary Pedagogy Methods for Art Instruction (3 Credits)
Art methods for elementary schools.
Corequisite: ARTE 725P.

ARTE 725P - Elementary Pedagogy Methods for Art Instruction Practicum (1 Credit)
Art methods for elementary schools practicum.
Corequisite: ARTE 725.

ARTE 740 - Art Program for Schools (3 Credits)
An introduction to the art education profession. Curriculum development and current issues are examined.
Prerequisites: ARTE 725 and ARTE 725P.
Corequisite: ARTE 741.
ARTE 740P - Art Program for Schools Practicum (1 Credit)
An introduction to the art education profession through practical experience.
Prerequisites: ARTE 725 and ARTE 725P.
Corequisite: ARTE 740.

ARTE 750 - Interactive Technology for Art Teachers (3 Credits)
Interactive technology in art programs using the computer as a creative tool in art education.

ARTE 760 - Secondary Pedagogy Methods for Art Instruction (3 Credits)
Secondary methods of art instruction.
Corequisite: ARTE 760P.

ARTE 760P - Secondary Pedagogy Methods for Art Instruction Practicum (1 Credit)
Practical experience in secondary methods of art instruction.
Corequisite: ARTE 760P.

ARTE 765 - Art Education Internship Seminar (3 Credits)
Seminar for art education internship. Students will be guided through practical field experience and the ADEPT evaluation system.
Corequisite: ARTE 771.

ARTE 771 - Art Education Internship (12 Credits)
Internship in art education.

ARTE 790 - Problems in Art Education (3 Credits)
May be repeated up to a maximum of nine hours.

ARTE 799 - Thesis Preparation (1-9 Credits)

Art History (ARTH)

ARTH 501 - Methodologies of Art History (3 Credits)
A seminar for art history majors and graduate students in the history and various methodologies of the discipline.

ARTH 503 - Internship in Art History (1-6 Credits)
Supervised experience in the field of art history, including museums, galleries, art dealers and auction houses. Requires a university internship contract and is subject to approval by advisor. May be repeated.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ARTH 511 - Etruscan Art and Archaeology (3 Credits)
Seminar in the art and civilization of the pre-Roman Etruscan peoples of Italy. Slide lectures, discussion sessions, and some examination of archaeological field methods and pottery classification.

ARTH 514 - Topics in Ancient Art (3 Credits)
Topic varies by title.

ARTH 519 - Topics in Medieval Art (3 Credits)
Topic varies by title.

ARTH 520 - History of Renaissance Painting (3 Credits)
An analysis of the paintings and painters of importance during the period of the Renaissance in Europe.

ARTH 521 - History of Renaissance Sculpture (3 Credits)
A survey of the major developments in the art of sculpture associated with the European Renaissance.

ARTH 522 - History of Renaissance Architecture (3 Credits)
European architecture and architectural theory during the 15th and 16th centuries.

ARTH 523 - Florentine Art (3 Credits)
The artistic development of Florence from the age of Giotto to that of Michelangelo as seen in the context of social and cultural developments.

ARTH 524 - Topics in Renaissance Art (3 Credits)
Topic varies by title.

ARTH 525 - History of Baroque Painting (3 Credits)
17th-century European painting.
Prerequisites: ARTH 106 or ARTH 325 or ARTH 326.

ARTH 526 - History of Baroque Sculpture (3 Credits)
17th and 18th-century European sculpture.
Prerequisites: ARTH 106 or ARTH 325 or ARTH 326.

ARTH 527 - History of Baroque Architecture (3 Credits)
The architecture of Europe in the 17th century with special attention to the major architects of Italy, France, Germany, and England. Topics to be included are: the church, the palace, the garden, and city planning.
Prerequisites: ARTH 106 or ARTH 325 or ARTH 326.

ARTH 529 - Topics in 18th-Century Art (3 Credits)
Topic varies by title.
Prerequisites: ARTH 106 or ARTH 327.

ARTH 534 - Topics in 19th-Century Art (3 Credits)
Topic varies by title.
Prerequisites: ARTH 106 or ARTH 330.

ARTH 535 - History of Modern Painting (3 Credits)
A detailed examination of 20th century painting.

ARTH 536 - History of Modern Sculpture (3 Credits)
The development of sculpture in the 19th and 20th centuries with special attention to contemporary tendencies.

ARTH 537 - Topics in Modern Architecture (3 Credits)
Topic varies by title.
Prerequisites: ARTH 106 or ARTH 337.

ARTH 539 - Topics in Modern Art (3 Credits)
Topic varies by title.

ARTH 540 - History of American Painting (3 Credits)
Important aspects of American painting with emphasis on the 19th and 20th centuries.

ARTH 542 - History of American Architecture (3 Credits)
A consideration of the evolution of architecture in America including aspects of town and city planning.

ARTH 543 - The History of American Antiques and Decorative Arts (3 Credits)
A survey of our material culture concentrating upon the evolution of styles.

ARTH 544 - Topics in American Art (3 Credits)
Topic varies by title.

ARTH 545 - Special Topics in Modern Chinese Art (3 Credits)
Topics in modern Chinese art selected for specialized study. May be repeated as content varies by title.

ARTH 546 - Special Topics in Asian Art (3 Credits)
Topics in Asian art selected for specialized study. May be repeated as content varies by title.

ARTH 549 - Topics in Non-Western Art (3 Credits)
Topic varies by title.
ARTH 550 - Trends in Art History (3 Credits)
A critical examination of the development of the discipline of art history and an analysis of its major trends and theoretical positions.

ARTH 551 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.

Prerequisites: FAMS 240.

Cross-listed course: FAMS 511, MART 591

ARTH 557 - History of Printmaking (3 Credits)
Technical, aesthetical, and historical study of the development of printmaking.

ARTH 560 - Museology I (3 Credits)
The history and theory of museums and an introduction to museum practices in the setting of a multi-disciplinary institution. Practical experience provided through the various units of the University Museums.

ARTH 561 - Museology II (3 Credits)
Museum practices emphasizing the conservation, installation, and interpretation of the object in the context of an art museum. Practical experience provided through the Columbia Museum of Art.

ARTH 562 - Art Conservation (3 Credits)
History, theory, practices, ethics, and procedures of modern art conservation. Practical experience provided through the South Carolina Institute of Archaeology and Anthropology.

ARTH 569 - Special Topics in Film and Media Histories (3 Credits)
Intensive study of a specific topic in film and media history. May be repeated as content varies by title.

Prerequisites: FAMS 300.

ARTH 590 - Topics in Art History (3 Credits)
Topic varies by title.

Prerequisites: ARTH 105 or ARTH 106 or any ARTH 300.

ARTH 599 - Independent Study (1-6 Credits)
Independent study for advanced undergraduate majors and graduate students in art history. Approved independent study contract required for enrollment. May be repeated, but no more than 12 credits of Independent Study may be applied to the degree.

ARTH 701 - Methodologies and Practices of Art History (3 Credits)
Critical study of the discipline of art history and scholarly approaches to practices of the discipline.

ARTH 720 - Problems in Renaissance Art (3 Credits)

ARTH 725 - Problems in Baroque and Rococo Art (3 Credits)
Prerequisite: A course in baroque or 18th-century art.

ARTH 730 - Problems in 19th-Century Art (3 Credits)

ARTH 735 - Problems in 20th-Century Art (3 Credits)

ARTH 737 - Contemporary Trends in Visual Arts (3 Credits)
A history of art seminar focusing on contemporary trends in the visual arts.

ARTH 739 - Special Topics: Problems in Modern Art (3 Credits)
Selected problems in the visual arts from c.1780 to the present. May be repeated as content varies by title.

ARTH 745 - Special Topics - Problem in Modern Chinese Art (3 Credits)
Selected problems in modern Chinese art. May be repeated as content varies by title.

ARTH 746 - Special Topics: Problems in Asian Art (3 Credits)
Selected problems in Asian art. May be repeated as content varies by title.

ARTH 769 - Problems in Film History (3 Credits)
Topic varies with title.

Prerequisites: FAMS 240, or MART 270, or ENGL 565, or ENGL 566, or THEA 580.

ARTH 790 - Problems in Art History (3 Credits)

ARTH 798 - Master’s Project Planning (1-9 Credits)
Independent final project in art history.

ARTH 799 - Thesis Preparation (1-9 Credits)

Art Studio (ARTS)

ARTS 500 - Visual Meaning (4 Credits)
The analysis, structuring, and production of individual works of art using traditional and non-traditional approaches.

ARTS 501 - Art Business (3 Credits)
Business practices for the studio artist. Contracts, portfolio preparation, promotion, alternate professions, museums, galleries, copyright, and shipping will be discussed.

ARTS 510 - Painting I (6 Credits)
BFA Painting Capstone course stressing focus on further development of individual approaches to painting culminating in a cohesive body of work and a written thesis defense.

Prerequisites: ARTS 210, ARTS 211, ARTS 310, and ARTS 311.

ARTS 511 - Painting II (6 Credits)
BFA Painting Capstone course focusing on further development of individual approaches to painting culminating in a BFA Senior Thesis Exhibition and defense.

Prerequisites: ARTS 510.

ARTS 512 - Introduction to Watercolor (3 Credits)
Introduction to traditional and experimental transparent watercolor technique. Encompasses field work at off campus locations.

ARTS 513 - Advanced Watercolor (3 Credits)
Advanced study of watercolor and water-based media with emphasis on individual creative expression. Encompasses field work at off campus locations.

ARTS 514 - Workshop: Painting (4 Credits)
Advanced study in various painting problems, content varies by title.

ARTS 515 - Printmaking I (3 Credits)
Further development of individual approaches to printmaking.

Prerequisites: ARTS 416.

ARTS 516 - Capstone Printmaking I: Professional Practices (3-6 Credits)
Professional development practices including preparing a portfolio and oral presentation of work, researching career options, and preparing applications for exhibition and funding opportunities.

Prerequisites: ARTS 215 and one ARTS 300 - ARTS 400 level print course.

ARTS 517 - Capstone Printmaking II: Exhibition (3-6 Credits)
Preparing for an exhibition.

Prerequisites: ARTS 215 and one ARTS 300 - ARTS 400 level print course.
ARTS 519 - Workshop: Printmaking (3 Credits)
Advanced investigation and analysis of various printmaking techniques. Topic varies by title.

ARTS 520 - Ceramics I (6 Credits)
Further development of a personal approach to the ceramic process, supported by an investigation of ceramic history.
Prerequisites: ARTS 421.

ARTS 521 - Ceramics II (6 Credits)
Further development of a personal approach to the ceramic process, supported by an investigation of ceramic history.
Prerequisites: ARTS 520.

ARTS 524 - Workshop: Ceramics (3 Credits)
Advanced investigation and analysis of problems and methods in ceramics. Topics vary by title.

ARTS 525 - Three-Dimensional Studies I (3-6 Credits)
Personal concepts and expressions in various three-dimensional media.
Prerequisites: C or Better in ARTS 425 or ARTS 426.

ARTS 526 - Three-Dimensional Studies II (3-6 Credits)
Personal concepts and expressions in various three-dimensional media.
Prerequisites: C or better in ARTS 425 or ARTS 426.

ARTS 529 - Workshop: Three-Dimensional Studies (3 Credits)
Investigation and analysis of various three-dimensional concepts, processes, and techniques. Content varies by title.

ARTS 530 - Drawing Capstone I (3-6 Credits)
Further development of individual approaches to drawing with emphasis on intellectual and visual perception as content.
Prerequisites: ARTS 431.

ARTS 531 - Drawing Capstone II (6 Credits)
Further development of individual drawing with emphasis on intellectual and emotive approaches.
Prerequisites: ARTS 530.

ARTS 532 - Advanced Life Drawing (3 Credits)
Human anatomy and instruction in drawing and painting the model from life in a variety of media.
Prerequisites: ARTS 232 or ARTS 233.

ARTS 535 - Fiber Arts I (3 Credits)
Advanced study in the processes and materials of fiber arts.
Prerequisites: ARTS 436.

ARTS 536 - Fiber Arts II (3 Credits)
Advanced study in the processes and materials of fiber arts.
Prerequisites: ARTS 535.

ARTS 537 - Papermaking (3 Credits)
The art and techniques of handmade paper.

ARTS 539 - Workshop: Fiber Arts (3 Credits)
Advanced study in various technical aspects of fiber arts. Topic varies by title.

ARTS 545 - Internship in Graphic Design (4 Credits)
Work experience at a visual communication place of business.
Prerequisites: C or better in ARTS 346.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ARTS 546 - Graphic Design II (3 Credits)
Advanced individual projects in graphic design.
Prerequisites: ARTS 545.

ARTS 555 - Jewelrymaking I (4 Credits)
The development of individual directions in jewelrmyaking.
Prerequisites: C or better in ARTS 456.

ARTS 556 - Jewelrymaking II (3 Credits)
The development of individual directions in jewelrmyaking.
Prerequisites: ARTS 555.

ARTS 558 - Crafts (3 Credits)
Contemporary applications of traditional craft media, emphasizing the design and conceptual development of works of art.

ARTS 559 - Workshop: Jewelrymaking (3 Credits)
Advanced study in various technical aspects of jewelrmyaking. Topic varies by title.

ARTS 560 - Photography Thesis: Portfolio (6 Credits)
Further development of individual approaches to photography.
Prerequisites: ARTS 460.

ARTS 561 - Photography Thesis: Exhibition (6 Credits)
Further development of individual approaches to photography.
Prerequisites: ARTS 461.

ARTS 564 - Workshop: Photography (4 Credits)
Advanced investigation and analysis of problems in photography. Topic varies by title.

ARTS 570 - Visual Arts Computing (3 Credits)
Advanced visual arts computing techniques on using software such as Photoshop, Studio Pro, and Netscape.
Prerequisites: ARTS 102.

ARTS 590 - Video Art: Theory and Practice (3 Credits)
Television as a medium; small format video systems are used in the creation of individual projects.

ARTS 595 - Independent Study (3 Credits)
Independent study for advanced undergraduate majors and graduate students in art studio. Approved independent study contract required for enrollment.

ARTS 710 - Painting (3 Credits)
A multi-level graduate painting class focusing on field work and studio practice through both individual tutorial and group exercises with a painting area faculty member. May be repeated up to a maximum of 15 hours.

ARTS 715 - Printmaking (3 Credits)
May be repeated up to a maximum of 15 hours.

ARTS 720 - Ceramics (3 Credits)
May be repeated up to a maximum of 15 hours.

ARTS 725 - Three-Dimensional Studies (3 Credits)
May be repeated up to a maximum of 15 hours.

ARTS 730 - Drawing (3 Credits)
May be repeated up to a maximum of 15 hours.

ARTS 735 - Fiber Arts (3 Credits)
May be repeated up to a maximum of 15 hours.

ARTS 760 - Photography (3 Credits)
May be repeated up to a maximum of 15 hours.
Prerequisites: ARTS 561.
ARTS 790 - Special Topics in Art (3 Credits)
Individually directed studies in art. Content varies with instructor. May be repeated up to a maximum of 9 hours.

ARTS 795 - Independent Study (3 Credits)
Independent study for advanced graduate students in art studio. Approved independent study contract required for enrollment.

ARTS 799 - Thesis Preparation (1-9 Credits)
May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 810 - Painting (3 Credits)
A multi-level graduate level painting class that includes both group seminar and individual tutorial under the direction of a painting area faculty member. The course will address student’s individual initiatives in context of issues in the medium. May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 815 - Printmaking (3 Credits)
May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 820 - Ceramics (3 Credits)
May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 825 - Three-Dimensional Studies (3 Credits)
May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 830 - Drawing (3 Credits)
May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 835 - Fiber Arts (3 Credits)
May be repeated up to a maximum of 18 hours.
Prerequisites: MFA degree candidate status.

ARTS 860 - Photography (3 Credits)
May be repeated up to a maximum of 15 hours.
Prerequisites: MFA degree candidate status.

ARTS 890 - Special Topics in Art (3 Credits)
May be repeated up to a maximum of 9 hours.
Prerequisites: MFA degree candidate status.

ARTS 896 - Project (3 Credits)
Formulation of a proposal for a creative terminal project and initiation of that project.
Prerequisites: MFA degree candidate status.

ARTS 897 - Project (3-6 Credits)
Creation of creative terminal project.
Prerequisites: ARTS 896 and MFA degree candidate status.

Astronomy (ASTR)

ASTR 533 - Advanced Observational Astronomy (1-3 Credits)
Development of a combination of observational techniques and facility at reduction of data. A maximum of eight hours per week of observation, data reduction, and consultation. Offered each semester by arrangement with the department.

ASTR 534 - Advanced Observational Astronomy (1-3 Credits)
A continuation of ASTR 533. Up to eight hours per week of observation, data reduction, and consultation.

ASTR 599 - Topics in Astronomy (1-3 Credits)
Readings and research on selected topics in astronomy. Course content varies and will be announced in the schedule of classes by title.

Astronomy (ASTR)

ASTR 533 - Advanced Observational Astronomy (1-3 Credits)
Development of a combination of observational techniques and facility at reduction of data. A maximum of eight hours per week of observation, data reduction, and consultation. Offered each semester by arrangement with the department.

ASTR 534 - Advanced Observational Astronomy (1-3 Credits)
A continuation of ASTR 533. Up to eight hours per week of observation, data reduction, and consultation.

ASTR 599 - Topics in Astronomy (1-3 Credits)
Readings and research on selected topics in astronomy. Course content varies and will be announced in the schedule of classes by title.

Astronomy (ASTR)

ASTR 533 - Advanced Observational Astronomy (1-3 Credits)
Development of a combination of observational techniques and facility at reduction of data. A maximum of eight hours per week of observation, data reduction, and consultation. Offered each semester by arrangement with the department.

ASTR 534 - Advanced Observational Astronomy (1-3 Credits)
A continuation of ASTR 533. Up to eight hours per week of observation, data reduction, and consultation.

ASTR 599 - Topics in Astronomy (1-3 Credits)
Readings and research on selected topics in astronomy. Course content varies and will be announced in the schedule of classes by title.
ATEP 715 - Clinical Experiences in Athletic Training V (6 Credits)
A 450-hour clinical education immersive experience to develop clinical skills of the practicing Athletic Training professional in a setting preferred by the student. Improvement in a selected area of clinical practice will be measured via formative and summative assessment that employs quantitative measures.
Prerequisites: ATEP 714.

ATEP 730 - Behavioral Health and Wellness (3 Credits)
Integration of physiological, psychological, and social constructs in relationship to physical performance and clinical decision making to enhance patient care. Specific focus will be on understanding individual differences in behavior in the areas of physical fitness, nutrition, and mental health.

ATEP 732 - Emergency Management Practices in Athletic Training (3 Credits)
Examination of common injuries and illnesses that can cause medical emergencies in sport and physical activity. The majority of the class will be analyzing research related to these conditions to determine prevention and treatment strategies. Education, gender issues, politics, and media will also be a platform for class discussions.

ATEP 733 - Evidence Based Practice in Medical Emergencies (3 Credits)
Examination of common injuries and illnesses that lead to medical emergencies (e.g., sudden death) in sport and physical activity. Critical analysis of research to determine prevention and treatment strategies.

ATEP 734 - Evidence-Based Approach to Evaluation, Treatment, and Rehabilitation (3 Credits)
Advanced study of principles of evidence-based medicine and the interpretation of clinical research that assesses evaluation, treatment, and rehabilitation of injuries.

ATEP 735 - Contemporary Issues in Athletic Training (3 Credits)
Examination of issues shaping the athletic training profession with an emphasis on practical application and professional development.

ATEP 736 - Advanced Treatment and Rehabilitation of Athletic Injuries (3 Credits)
Advanced study of the treatment of athletic injuries focusing on the concepts and principles of a comprehensive rehabilitation program, including therapeutic exercise and therapeutic modalities.

ATEP 737 - Current Research in Athletic Training Education (3 Credits)
Examination of current literature in athletic training education as it pertains to the clinical and didactic experiences of athletic training students, clinical instructors, and practicing professionals.

ATEP 738 - Advanced Athletic Training Practicum I (1-3 Credits)
Provides advanced practical experience and the integration of evidence-based practice in the sports medicine settings. Course content will focus on graduate research project and topics related to athletic training education.

ATEP 739 - Advanced Clinical Practicum in Athletic Training II (1-3 Credits)
Provides advanced practical experience and the integration of evidence-based practice on the sports medicine settings. Course content will focus on graduate research project and topics related to athletic training administration and management.

ATEP 740 - Evidence Based Practice in Weight Management Assessment (3 Credits)
Critical analysis of the current literature on weight control and health, metabolism, energy balance, and role of diet and exercise in prevention and/or treatment in weight management in the physically active population.

ATEP 741 - Advanced Clinical Skills in Athletic Training (3 Credits)
This course is designed to assess the advanced clinical skills of graduate athletic training students in their ability to evaluate, manage and prevent athletic injuries. The content of this course will focus on advanced athletic training clinical skills and evidence-based practice.

ATEP 748 - Evaluation and Therapeutic Intervention of Lower Extremity Injuries (4 Credits)
Study of the lower extremities as they relate to the prevention; recognition, evaluation and assessment; immediate care; and treatment, rehabilitation and reconditioning of injuries and illnesses to athletes and others engaged in physical activity.

ATEP 748L - Evaluation & Therapeutic Intervention of Lower Extremity Injuries Lab (1 Credit)
Integration of knowledge and skills for orthopedic/physical assessment of common injuries to the lower body.
Corequisite: ATEP 748.

ATEP 749 - Evaluation and Therapeutic Intervention of Head, Neck and Spine Injuries (4 Credits)
Study of the Head, Neck and Spine as they relate to the prevention; recognition, evaluation and assessment; immediate care; and treatment, rehabilitation and reconditioning of injuries and illnesses to athletes and others engaged in physical activity.

ATEP 749L - Evaluation & Therapeutic Intervention of Head, Neck, & Spine Injuries Lab (1 Credit)
Integration of knowledge and skills for orthopedic/physical assessment of common injuries to the head, neck and spine.
Corequisite: ATEP 749.

ATEP 750 - Evaluation and Therapeutic Intervention of Upper Extremity Injuries (4 Credits)
Study of the upper extremities as they relate to the prevention; recognition, evaluation and assessment; immediate care; and treatment, rehabilitation and reconditioning of injuries and illnesses to athletes and others engaged in physical activity.

ATEP 750L - Evaluation & Therapeutic Intervention of Upper Extremity Injuries Lab (1 Credit)
Integration of knowledge and skills for orthopedic/physical assessment of common injuries to the upper body.
Corequisite: ATEP 750.

ATEP 770 - Research Methods & Prospectus Writing in Athletic Training (3 Credits)
The study of applicable methods and tools of research in athletic training. Introduction of methods of research in athletic training, encompassing aspects of study planning, research design, participant sampling, measurement, data analysis, ethics, and reporting in sports medicine.

ATEP 796 - Athletic Training Administration (3 Credits)
Examination of fundamental principles of administration and assessment of the delivery of athletic training services in the context of the larger health care system. Specific focus business management principles associated with athletic training clinical practice and as well as leadership and professional development to achieve the best patient outcomes.
ATEP 797 - Clinical Pathology and Pharmacology in Athletic Training (2 Credits)
Examination of injury, illness and/or disease of various body systems; specific understanding of medical diagnostics, interventions (including pharmacology) and participation considerations for the athletic population are addressed.

ATEP 797L - Clinical Pathology & Pharmacology in Athletic Training Lab (1 Credit)
Integration of knowledge and skills for athletic trainers in the physical assessment of common injury, illness and/or disease of various body systems.
Corequisite: ATEP 797.

ATEP 798 - Project in Athletic Education (3 Credits)
Independently executed project designed to expand the student's knowledge of athletic training.

ATEP 799 - Thesis Preparation (1-9 Credits)

Biology (BIOL)

BIOL 502 - Environmental Microbiology (3 Credits)
An overview of the microbial world including a survey of the distribution, functioning, and diversity of microorganisms in natural systems. Discusses the crucial roles that microorganisms play in ecosystem function, biogeochemical cycles, and environmental quality.
Prerequisites: MSCI 102 or BIOL 102, CHEM 112.

Cross-listed course: MSCI 503

BIOL 505 - Developmental Biology (3 Credits)
An introduction to the descriptive and experimental embryology of animals. Living and preserved specimens will be used to demonstrate the basic processes of embryogenesis. Three lecture hours per week.
Prerequisites: or Corequisite: BIOL 302.

BIOL 505L - Developmental Biology Laboratory I (1 Credit)
Descriptive and experimental exercises related to embryology. One three-hour laboratory per week.
Corequisite: BIOL 505.

BIOL 506 - Developmental Biology II (3 Credits)
Molecular aspects of development from gamete formation through tissue and organ differentiation in plants and animals. Three lecture hours per week.
Prerequisites: BIOL 505.

BIOL 506L - Developmental Biology Laboratory II (1 Credit)
A series of experimentally oriented laboratory exercises will be performed. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 506.

BIOL 510 - Invertebrate Zoology (4 Credits)
Phylogenetic and comparative aspects of anatomy, physiology, reproduction, and embryology of the invertebrates.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: MSCI 510
Graduation with Leadership Distinction: GLD: Research

BIOL 523 - Plant Development (3 Credits)
Descriptive and molecular examination of the processes and mechanisms used by plants in organogenesis, differentiation, and morphogenesis. Three lecture hours per week.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 523L - Plant Developmental Laboratory (1 Credit)
Experiments utilizing a genetic approach to the study of plant development. Three laboratory hours per week.
Corequisite: BIOL 523.

BIOL 524 - Mycology (4 Credits)
Taxonomy and morphology of fungi; cultivation, life histories, and economic importance; all classes and major orders considered. Three lecture hours per week.
Prerequisites: BIOL 301.

BIOL 525 - Marine Plants (4 Credits)
Diversity, distribution, physiology, ecology, evolution, and economic importance of marine algal, seagrass, and mangrove communities. Three lecture and three laboratory hours per week. Scheduled field trips are required.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: MSCI 525

BIOL 526 - The Fall Flora (4 Credits)
Two lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

BIOL 527 - The Spring Flora (4 Credits)
Two lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

BIOL 528 - The Summer Flora (4 Credits)
Two lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

BIOL 530 - Histology (4 Credits)
An introduction to the tissues that make up the human body. The microscopic anatomy of tissues is examined and discussed in terms of function and physiology. Three lecture hours and four laboratory hours per week.

BIOL 531 - Parasitology (4 Credits)
Parasites of biological, economic, and public health importance. Three lecture and three laboratory hours per week.
Prerequisites: 300 level Biology course or equivalent.

Cross-listed course: ENHS 661, EPID 661

BIOL 534 - Animal Behavior (3 Credits)
A comparative survey of behavior patterns of animals from protists to humans and the physiological mechanisms underlying behavior.
Prerequisites: BIOL 301 or MSCI 311.

BIOL 534L - Animal Behavior Laboratory (1 Credit)
Observational and experimental methods used in classifying animal behavior patterns and in determining underlying control mechanisms. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 534.

</tbody>
</table>
BIOL 572 - Freshwater Ecology (3 Credits)
Quantitative study of the population, community and evolutionary ecology of freshwater habitats (lakes, ponds, rivers, streams, wetlands). Includes mandatory field trips.
Prerequisites: BIOL 301.

Cross-listed course: ENVR 572

BIOL 574 - Marine Conservation Biology (3 Credits)
Exploration of how human activities affect marine natural populations, species, communities and ecosystems, including threats to biodiversity; approaches to marine conservation; and ecological and evolutionary responses to anthropogenic disturbance. 03: 07/05/2019.
Prerequisites: BIOL 301.

Cross-listed course: MSCI 574

BIOL 575 - Marine Ecology (3 Credits)
Structure, dynamics, and interactions between populations and communities in marine ecosystems. Attendance at designated departmental seminars is required. Three lecture hours per week.
Prerequisites: CHEM 111 and BIOL 301 or MSCI 311.

Cross-listed course: MSCI 575

BIOL 575L - Marine Ecology Laboratory (1 Credit)
Laboratory and field exercises in coastal environments.
Prerequisite or Corequisite: BIOL 575.

Cross-listed course: MSCI 575L

BIOL 576 - Marine Fisheries Ecology (3 Credits)
Interdisciplinary examination of the distribution, reproduction, survival, and historical variation of the principal commercial marine fisheries. 03: 07/05/2019.
Prerequisites: BIOL 301.

Cross-listed course: MSCI 576

BIOL 577 - Ecology of Coral Reefs (4 Credits)
Structure, productivity, and biodiversity of coral reefs, emphasizing their sensitivity, stability, and sustainability. Taught as an extended field experience with daily lectures and guided research activities.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: MSCI 577

BIOL 588 - Genomic Data Science (3 Credits)
This course focuses on quantitative knowledge for interdisciplinary applications in genetics as well as hands-on experience in analyzing genetic data. In this course, students will have programming exercises in using analysis tools to conduct genome-wide analysis, annotation, and interpretation of genetic data using R/Bioconductor packages.
Prerequisites: C or better in STAT 201 or higher.

Cross-listed course: STAT 588

BIOL 599 - Topics in Biology (1-3 Credits)
Current developments in biological sciences. Readings and research on selected topics. Course content varies and will be announced in the schedule of classes by title.

BIOL 610 - Hallmarks of Cancer (3 Credits)
Survey of current concepts regarding the molecular and genetic factors that regulate the origin and progression of cancer. Readings based on current primary literature.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 612 - Virology - Classical and Emerging Concepts (3 Credits)
Advanced study of viruses with regard to biochemical, molecular, pathological, epidemiological, and biotechnological aspects. Focus on animal viruses with particular emphasis on human pathogens.
Prerequisites: BIOL 302.

BIOL 614 - Stem Cell Biology (3 Credits)
Focuses on the understanding of how stem cells can be used to make fundamental biological discoveries with a special focus in neuroscience.
Prerequisites: C or better in BIOL 302.

BIOL 620 - Immunobiology (3 Credits)
Basic immunological concepts including antibody structure, function, and genetics; cellular immunology; transplantation; hypersensitivity; autoimmunity; and immunity to infectious diseases.
Prerequisites: BIOL 302.

BIOL 625 - Medical Mycology (3 Credits)
Advanced study of infectious diseases caused by fungi. Etiology, symptoms, and treatment of fungi related illnesses.
Cross-listed course: ENHS 625

BIOL 627 - Marine Phytoplankton (3 Credits)
Examines the physiology and ecology of phytoplankton, including environmental controls on community composition, primary productivity, and detection and characterization of water quality (eutrophication) and harmful algal blooms.
Prerequisites: MSCI 102 or MSCI 450 or BIOL 450.

Cross-listed course: MSCI 627

BIOL 630 - Biology of Birds (3 Credits)
Biology of birds at molecular, organismal, and population levels, emphasizing unique adaptations of the class of Aves.
Prerequisites: BIOL 301, BIOL 302, and BIOL 303.

BIOL 634 - Biology of Neurological Diseases (3 Credits)
Advances in molecular and cellular neurobiology that bring new understanding for human neurological disease.
Prerequisites: BIOL 302 and SCHC 330 or BIOL 405.

BIOL 635 - Neurophysiology (4 Credits)
Descriptive and experimental aspects of the neural basis of behavior, emphasizing cellular and molecular mechanisms. Two lecture and six laboratory hours per week. Three lecture hours per week.
Prerequisites: BIOL 302.

BIOL 640 - Microbial Ecology (3 Credits)
Interactions of microorganisms with each other, with more complex organisms, and with their environments. Three lecture hours per week.
Prerequisites: BIOL 550 and either BIOL 301 or MSCI 311.

BIOL 641 - Biophysical Ecology (3 Credits)
This course examines how the mechanisms by which animals and plants interact with their physical environments influence organismal physiology.
Prerequisites: BIOL 301, MATH 141 or MATH 122.

BIOL 650 - Biochemical Evolution (3 Credits)
Advanced study of related aspects of biological evolution. Rose of life from physical and chemical precursors, biochemical basis of adaptation to ecological pressures, and biochemical aspects of the origins and maintenance of biodiversity.
Prerequisites: BIOL 301, BIOL 302, BIOL 303.
BIOL 651 - Limnology (4 Credits)
A study of the aquatic environment and its biota. Three lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

BIOL 652 - Evolutionary Biology (3 Credits)
An advanced course in evolutionary biology, including natural selection, neutral evolution, molecular evolution, population genetics, quantitative genetics, sexual selection, speciation, human evolution, and the evolution of disease.
Prerequisites: BIOL 301 and BIOL 303.

BIOL 653 - Bioinformatics (3 Credits)
Studies of the principles of genetics and molecular biology as applied to adaptive evolution of genes and genomes.
Prerequisites: BIOL 302, BIOL 303.

BIOL 654 - Speciation (3 Credits)
Speciation as the source of biological diversity. Historical and biological viewpoints. Analysis of concepts of species and models of speciation. Two lectures and one recitation per week.
Prerequisites: BIOL 301 or BIOL 652.

BIOL 655 - Biotechnology (3 Credits)
Studies in molecular biology and genetics with emphasis on the use of newly developed techniques in biotechnology. Three lecture hours per week.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 656 - Experimental Biotechnology (4 Credits)
Techniques used in biotechnology will be employed in the context of an experimental project. Twelve laboratory hours per week.
Prerequisites: BIOL 302, BIOL 302L.

BIOL 660 - Biology of Mammals (4 Credits)
Evolution, systematics, genetics, ecology, and adaptation of mammals. Emphasis on native South Carolina species. Two lectures and one two-hour laboratory per week, plus five field trips to be arranged.
Prerequisites: BIOL 301 or MSCI 311.

BIOL 662 - Signal Transduction and Pathogenesis (3 Credits)
Signaling pathways involved in human diseases, such as cancer, AIDS, autoimmune diseases and diabetes, and cellular processes involving apoptosis, cell cycle, cell-cell adhesion, growth factors, hormones, G protein-coupled receptors, cytokines and immune response.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 665 - Human Molecular Genetics (3 Credits)
Molecular mechanisms underlying gene action and differentiation in man; the genetic bases for human variability and inborn metabolic errors leading to inherited diseases.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 667 - Molecular and Genetic Mechanisms of Disease Pathogenesis (3 Credits)
An advanced examination of the molecular mechanisms underlying gene action in humans. Current literature illustrating the genotype-phenotype relationship in human disease pathogenesis will be discussed.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 668 - Metabolic Biochemistry of Human Disease (3 Credits)
Core concepts of biochemistry as applied to human health and disease.
Prerequisites: C or higher in CHEM 555/BIOL 545 or CHEM 550/BIOL 541.

Cross-listed course: CHEM 655

BIOL 670 - Plant Ecology (3 Credits)
Structure and dynamics of plant populations and communities, including life histories, adaptations, and plant interactions. Three lecture hours per week.
Prerequisites: BIOL 301.

BIOL 670L - Plant Ecology (1 Credit)
Laboratory and field exercises in plant ecology. Four hours per week.
Prerequisite or Corequisite: BIOL 670.

BIOL 671 - Plant Responses to the Environment (3 Credits)
Physiological, molecular, and genetic examination of induced plant responses to various biotic and abiotic environmental stresses.
Prerequisites: BIOL 302.

BIOL 690 - Ultramicroscopy (3 Credits)
Theoretical and practical aspects of scanning and transmission electron microscopy, digital image acquisition and energy dispersive x-ray spectroscopy. Two lecture and one laboratory hour per week, plus a research project to be arranged.
Prerequisites: BIOL 302 or MSCI 311.

BIOL 701 - Selected Topics in Biochemistry (1-3 Credits)
Selected biochemical topics emphasizing research literature. One lecture hour per credit per week.
Prerequisites: two semesters of biochemistry.

BIOL 702 - Selected Topics in Plant Biology (1-3 Credits)
Selected botanical topics emphasizing research literature. One lecture hour per credit per week.
Prerequisites: two semesters of botany.

BIOL 703 - Selected Topics in Ecology (1-3 Credits)
Selected ecology topics emphasizing research literature. One lecture hour per credit per week.
Prerequisites: two semesters of ecology.

BIOL 704 - Selected Topics in Genetics and Developmental Biology (1-3 Credits)
Selected genetic and developmental biology topics emphasizing research literature. One lecture hour per credit per week.

BIOL 705 - Selected Topics in Zoology (1-3 Credits)
Selected zoological topics emphasizing research literature. One lecture hour per credit per week.

BIOL 711 - Structure and Function of Nucleic Acids (3 Credits)
A detailed study of nucleic acids including their structure/chemistry, biosynthesis, processing, and biological functions.

BIOL 712 - DNA Transactions and Gene Expression (3 Credits)
Advanced topics in Mendelian genetics, DNA repair/recombination, and mechanisms of gene expression. Three lecture hours per week.
Prerequisites: BIOL 303 or equivalent and BIOL 711.
BIOL 714 - Advanced Cell Biology (3 Credits)
Problems of cellular organization, interactions, and control. Cell growth and death, cell-cell recognition and communication, intracellular transport, the structure and assembly of cellular organelles, somatic cell genetics, and evolution of cells. Three lecture hours per week.
Prerequisites: BIOL 541 or equivalent.

BIOL 717 - Biological Chemistry (3 Credits)
A comprehensive treatment of the chemistry, metabolism, regulation, and function of biological systems.

BIOL 718 - Biological Chemistry II (3 Credits)
A continuation of BIOL 717. Three lecture hours per week.
Prerequisites: BIOL 717.

BIOL 722 - Aquatic Bacteriology (3 Credits)
The ecology and physiology of freshwater and marine bacteria. The functions of bacteria in aquatic habitats and the public health aspects of pollution as they relate to microbiology. Three lecture hours per week.
Prerequisites: BIOL 330 or equivalent.

BIOL 722L - Aquatic Bacteriology Laboratory (1 Credit)
Three laboratory hours per week.
Prerequisite or Corequisite: BIOL 722.

BIOL 725 - Embryology of Angiosperms (3 Credits)
Two lectures and two laboratory periods per week.

BIOL 726 - Soil-Plant Relationships (3 Credits)
Two lecture and three laboratory hours per week.
Prerequisites: BIOL 102.

BIOL 727 - Marine Phytoplankton (3 Credits)
Three lecture hours and one three-hour laboratory per week.
Prerequisites: BIOL 627.

BIOL 728 - Advanced Phycology (3 Credits)
Three lecture hours and one three-hour laboratory per week.
Prerequisites: BIOL 627.

BIOL 729 - The Biology of Fish (3 Credits)
Three lecture hours per week.

BIOL 730 - The Biology of Fish (3 Credits)
One seminar and six laboratory hours per week.
Prerequisite or Corequisite: BIOL 729.

BIOL 731 - Advanced Invertebrate Zoology I (3 Credits)
Principles of systematics and an in-depth study of invertebrate phylogeny and ecology. Two lecture and three laboratory hours per week.
Prerequisites: invertebrate zoology.

BIOL 734 - The Vertebrates (3 Credits)
Three lectures or conferences per week.

BIOL 736 - Advanced Developmental Biology (3 Credits)
The biochemical and molecular mechanisms by which a variety of organisms develop. Three lecture hours per week.
Prerequisites: BIOL 340 or BIOL 505, or equivalent.

BIOL 741 - Fungal Physiology (3 Credits)
Three lecture and three laboratory hours per week.

BIOL 748 - Molecular Endocrinology (3 Credits)
A brief introduction to general endocrinology followed by an in-depth examination of the molecular mechanisms of hormone action, including receptors, second messengers, and hormonal control of transcription/translation. The evolution of hormone-receptor systems will also be examined.
Prerequisites: CHEM 332.

BIOL 749 - Methods in Molecular and Cell Biology (3 Credits)
Team-taught course on the theory and practice of laboratory techniques for investigating the structure and function of cellular components, especially organelles, proteins, and nucleic acids. Three lecture hours per week. Lectures will be supplemented with laboratory demonstrations.
Prerequisites: one semester of biochemistry.

BIOL 750 - Advanced Biological Oceanography (3 Credits)
Three lecture hours per week.
Prerequisites: BIOL 450/MSCI 450.

BIOL 752 - Marine Biogeochemistry (3 Credits)
Biological, chemical, geological, and physical processes that influence the cycling of major bioactive elements (C, O, N, P, S) in marine waters and sediments.
Cross-listed course: MSCI 752

BIOL 753 - Developmental Genetics (3 Credits)
The action of genes in development and differentiation at the molecular, cellular, and organ (tissue) levels, with examples taken from microorganisms, plants, animals, and man. Three lecture hours per week.
Prerequisites: BIOL 350 and two semesters of biochemistry or equivalents.

BIOL 754 - Oceanographic Techniques (1 Credit)
Shipboard experience with basic techniques used by geological, physical, chemical, and biological oceanographers.
Cross-listed course: GEOL 754

BIOL 755 - Quantitative Ecology (3 Credits)
An intensive field course centered around field problems in a variety of habitats (freshwater, terrestrial, estuarine). Students will use a variety of quantitative sampling methods to test ecological hypotheses on several two-day field trips.
Prerequisites: BIOL 570.

BIOL 757 - Special Topics in Biology (1-4 Credits)
An intensive consideration of topics of current interest in biology. One lecture hour per credit per week.

BIOL 758 - Research (1-3 Credits)
Appropriate designation will be made for the particular program in any given semester.

BIOL 759 - Physiological Ecology (3 Credits)
Two lecture and three laboratory hours per week.

BIOL 760 - Electron Microscopy (3 Credits)
Theory and design of modern electron microscopes; advancement in the theory and practice of specimen preparation of biological materials; interpretation of ultrastructure of cells and tissues. Three lecture hours a week.

BIOL 760L - Electron Microscopy Laboratory (1 Credit)
Four laboratory hours per week.
Prerequisite or Corequisite: BIOL 760.
BIOL 762 - Wetlands Ecology (3 Credits)
A survey of the structure and function of wetland ecosystems emphasizing the current literature.
Prerequisites: BIOL 549.

BIOL 763 - Biology of Populations (3 Credits)
Three lecture and two laboratory hours per week.

BIOL 764 - Advanced Plant Physiology (3 Credits)
Study of modern advances in plant physiology. Plant biotechnology topics, such as tissue culture, nitrogen fixation, photosynthesis, weed and pest control, molecular cloning, and genetic manipulation. Three lecture hours per week.
Prerequisites: BIOL 549.

BIOL 765 - Theoretical Ecology (3 Credits)
Theoretical bases of ecology are explored from current literature with topics from organizational, population, community, and ecosystem approaches. Principles for the construction and testing of hypotheses and models.
Prerequisites: BIOL 570.

BIOL 766 - Evolutionary Biology (3 Credits)
Theoretical and empirical studies of the evolutionary process. Historical perspective of major developments in evolution as well as modern quantitative and ecological genetic studies.

BIOL 768 - Ecological Modeling and Environmental Planning (4 Credits)
Concepts in systems ecology and ecological modeling. Emphasis on the use of models and computer simulations in examining environmental interactions, predicting environmental impact, and facilitating the process of environmental planning.
Cross-listed course: ENHS 767, MSCI 767

BIOL 769 - Reproductive Ecology (3 Credits)
Theoretical aspects and examples of the variety of reproductive and life history patterns found in animals and plants as adaptations to various environmental constraints. Three lecture hours per week.
Prerequisites: BIOL 570.

Cross-listed course: MSCI 769

BIOL 770 - Current Topics in Molecular Biology (3 Credits)
Recent developments in cellular and molecular biology including genetic mechanisms, ultrastructure, and function of organelles and membranes. Lectures supplemented with readings from current literature. Primarily for the MAT program. Not available for MS or Ph.D. credit in biology.

BIOL 771 - Current Topics in Developmental Biology (3 Credits)
Concepts of growth, differentiation, and morphogenesis of organisms in light of recent advances in biological knowledge. Lectures supplemented with readings from current literature. Primarily for the M.A.T. program. Not available for M.S. or Ph.D. credit in biology.

BIOL 772 - Current Topics in Ecology (3 Credits)
Ecological concepts with reference to recent advances in environmental sciences. Special attention to the ecology of the coast, swamps, and other habitats of importance in the Southeast. Primarily for the M.A.T. program. Not available for M.S. or Ph.D. credit in biology.

BIOL 775 - Plants of South Carolina (4 Credits)
Introduction to the major forms of plant life in the state. Includes fungi, algae, bryophytes, and vascular plants. Lecture-laboratory-field course primarily for the M.A.T. program. Not available for M.S. or Ph.D. credit in biology.

BIOL 776 - Animals of South Carolina (4 Credits)
Introduction to the major forms of animal life in the state. Animals will be studied and/or collected in their native habitat. Includes identification, behavior, and ecology of animals with emphasis on vertebrates. Lecture-laboratory-field course primarily for the M.A.T. program. Not available for M.S. or Ph.D. credit in biology.

BIOL 777 - Statistical Phylogenetics and Molecular Evolution (3 Credits)
Theory and applications of phylogenetics; estimation via Markov models, likelihood, distances and parsimony; hypothesis testing of evolutionary trees and parameters; related topics including molecular divergence time inference.
Prerequisites: B or better in MATH 241 or STAT 510.

BIOL 796 - Research in Biology (1-9 Credits)
Directed laboratory research and readings in the biological sciences for M.S. and Ph.D. students prior to preparation of theses and dissertations.

BIOL 799 - Thesis Preparation (1-9 Credits)

BIOL 801 - Directed Readings in Molecular, Cellular, and Developmental Biology (1 Credit)
Assigned readings in special topics in molecular, cellular, and developmental biology followed by classroom discussions. Designed to teach critical analysis of the scientific literature.

BIOL 802 - Seminar in Plant Biology (1-2 Credits)
A review of current literature in plant biology involving student presentations of seminars. One discussion hour per credit per week. The course may be repeated for credit.

BIOL 803 - Seminar in Ecology (1-2 Credits)
A review of current literature in ecology involving student presentations of seminars. One discussion hour per credit per week.

BIOL 804 - Seminar in Molecular, Cellular, and Developmental Biology (1 Credit)
Student presentations of papers from the current literature in molecular, cellular, and developmental biology. Designed to give experience in oral presentations. May be repeated.

BIOL 805 - Seminar in Zoology (1-2 Credits)
A review of current literature in zoology involving student presentations of seminars. One discussion hour per credit per week.

BIOL 806 - Perspectives in Biological Research (1 Credit)
Recent trends in biological research from the perspective of individual faculty members in the department. May be repeated.

BIOL 899 - Dissertation Preparation (1-12 Credits)

Biomedical Engineering (BMEN)

BMEN 532 - Micro/nanofluidics and Lab-on-a-Chip (3 Credits)
Basic fluid mechanics, capillary, drop and micro/nanoparticle, electrokinetics; micropump, mixer, preconcentrator, electrophoresis, microactuator and particle manipulator; sensors for pressure, velocity, concentration, temperature in environmental monitoring/biodefence, clinical diagnostics, drug discovery/delivery.
Prerequisites: D or better in CHEM 112 and CHEM112L or CHEM 142; D or better in PHYS 212.
BMEN 537 - Bio Nano/Micro Electro-Mechanical Systems (3 Credits)
Fundamentals of nano- and microfabrication, metrology and their applications in biomedical engineering and science. The fabrication covers photolithography, nano/microfabrication for nano/microstructures, etching and additive techniques, MEMS integration and packaging, etc. Metrology focuses on characterization of nanostructures with imaging technologies.
Prerequisites: D or better in CHEM 112 and CHEM 112L or CHEM 142; D or better in PHYS 212.

BMEN 546 - Delivery of Bioactive Agents (3 Credits)
Routes of administration; mechanisms of drug absorption and biological barriers; pharmacokinetic modeling of drug distribution; drug excretion and biotransformation; design and evaluation of controlled release systems, targeted release systems, and responsive release systems.
Prerequisites: BIOL 302, CHEM 333, MATH 142.

BMEN 547 - Immunoengineering (3 Credits)
Engineering approaches to study and control immune reactions and their applications in therapy and diagnostics for infectious disease, cancer, allergy, autoimmunity, and transplantation.
Prerequisites: C or better in BMEN 240 or BIOL 302.

BMEN 548 - Cardiovascular System: From Development to Disease (3 Credits)
Survey of cardiovascular development, anatomy, physiology and pathology. Recent advances in our understanding of the basic mechanisms of congenital cardiovascular defects and cardiovascular disease. Engineering principles, detection and treatment of cardiovascular defects.
Prerequisites: BMEN 240 or BIOL 302.

BMEN 549 - Advanced Biomechanics (3 Credits)
Mathematical and theoretical analysis of the mechanical properties and functions of soft biological tissues to include arterial vessels.
Prerequisites: BMEN 260 or BMEN 263.

BMEN 572 - Tissue Engineering (3 Credits)
Molecular basis of bioregenerative engineering; biomaterial design; biocompatibility assessment; cell isolation and characterization; rapid prototyping, scaffold fabrication, and biofabrication; protein and gene delivery; bioreactor design; transport in biological tissues; applications of tissue engineering in regenerative medicine.

BMEN 589 - Special Topics in Biomedical Engineering (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as topic varies.

BMEN 710 - Modeling and Simulation of Biomedical System (3 Credits)
Analytical and quantitative techniques applied to engineering problems in biomedical transport, tissue mechanics, cellular and organ physiology, and control of medical devices.
Prerequisites: MATH 242.

BMEN 713 - Human Cell and Molecular Biology for Biomedical Engineers (3 Credits)
Advanced examination of the organization and function of the cell with emphasis on the biophysical and quantitative aspects of cellular function. Emphasis will be on the biomedical engineering applications of regulation of cell division, protein transcription and translation within the cell, cellular energetics, and intracellular networks for cell signaling and cell function. 03: 07/05/2019.

BMEN 720 - Transport Phenomena in Biomedical Systems (3 Credits)
Conservation of momentum, energy, mass, physico-chemical properties of biofluids, blood rheology, circulation models and cardiovascular regulation, solute and oxygen transport in tissues, gas transport in lungs and respiratory gas exchange models, kinetics and compartmental modeling, modeling of artificial organs.
Prerequisites: D or better in BMEN 354.

BMEN 723 - Anatomy and Physiology for Biomedical Engineers (3 Credits)
An examination of human biological structure and function from an engineering perspective. Engineering principles will be used to analyze anatomical structures and physiological functions at the tissue, organ, and systems levels.
Prerequisites: EXSC 224 or BIOL 244.

BMEN 795 - Biomedical Engineering Literature (1 Credit)
Critical reading and literacy in the biomedical engineering discipline as it relates to students' research. Graduate Standing in the Biomedical Engineering Program.

BMEN 797 - Biomedical Engineering Doctoral Research (1-12 Credits)
Individual research to be arranged with the instructor. Graduate Standing in the Biomedical Engineering Program.

BMEN 798 - Graduate Seminar in Biomedical Engineering (1 Credit)
Graduate seminar on current topics in biomedical engineering. Instruction on critical analysis and communication in the discipline.

BMEN 799 - Biomedical Engineering Masters Thesis Preparation (1-12 Credits)

BMEN 898 - Doctoral Seminar in Biomedical Engineering (1 Credit)
Seminar for doctoral students on current biomedical engineering topics and instruction in professional preparation in the discipline. Graduate Standing in the Biomedical Engineering Program.

BMEN 899 - Biomedical Engineering Doctoral Dissertation Preparation (1-12 Credits)
Dissertation preparation for the Ph.D. Program. Graduate standing in the Biomedical Engineering program.

Biostatistics (BIOS)

BIOS 650 - Quantitative Methods in the Health Sciences (3 Credits)
Designed for professionals and pre-professionals who wish to utilize quantitative methods in public and private decision-making; exploratory data analysis, research methods in natural and controlled environments, and elementary biostatistical methods.
Prerequisites: STAT 201.

BIOS 700 - Introduction to Biostatistics (3 Credits)
Health-related statistical applications. Descriptive statistics, probability, confidence intervals, hypothesis testing, regression, correlation, ANOVA. May not be used as part of a degree program in epidemiology or biostatistics. Three lecture hours and one laboratory hour per week.

BIOS 701 - Concepts and Methods of Biostatistics (3 Credits)
Descriptive and inferential statistical applications to public health. Probability, interval estimation, hypothesis testing, measures of association. Three lecture hours and one laboratory hour per week. Intended for those who will be involved in research applications of biostatistics.
BIOS 709 - Basic Software for Public Health (1 Credit)
Working with public health data using statistical software. Effective ways to store, clean, merge, and format public health data for analysis.

BIOS 710 - Effective Data Management for Public Health (3 Credits)
Statistical data management techniques. Microcomputer applications, communication between microcomputers and mainframe, tape and disk storage, access of large health-related databases. 
**Prerequisite or Corequisite:** BIOS 700.

BIOS 711 - Introduction to R Programming (1 Credit)
Students will learn the software program R for performing data management. The course covers basic to advanced commands for properly formatting output, merging data, working with functions, graphing, using programming loops for preparing data for analysis for public health data.

BIOS 712 - Introduction to Stata Software (1 Credit)
Students will learn the software program Stata for performing data management. The course covers basic to advanced commands for properly formatting output, merging data, working with functions, graphing, using programming loops for preparing data for analysis for public health data.

BIOS 714 - Introduction to MS Access for Public Health (1 Credit)
This course focuses the uses of Microsoft Access for data management in public health. The course takes the student through building tables, forms, queries, reports and finishes with automated scripts for each of use with Access.

BIOS 719 - Advanced SAS Methods for Public Health (1 Credit)
This course focuses on advanced programming for managing and analyzing data using SAS. Building upon skills learned in BIOS 709 (Introduction to SAS), students will learn data management using PROC SQL. Students will also become familiar with the SAS Macro Language which prepares data for conducting efficient statistical analysis.

BIOS 745 - Seminar in Biostatistics (1-2 Credits)
Analysis of current and prospective issues in biostatistics, including historical foundations. Includes student exploration of unsolved problems and examination of central issues in biostatistics.

BIOS 746 - Introduction to Complex Survey Data Analysis (1 Credit)
Students will learn the basics of data collection methods, sampling design for linear, logistic, and survival analysis complex models using survey data. Students will also learn about weight adjustments, imputation methods with an emphasis on both applied models and the theory behind them. 
**Prerequisites:** BIOS 701 and BIOS 709 or equivalent.

BIOS 748 - Surgery and Emergency Medicine (2 Credits)
Specialized medical topics in emergency and surgical medicine.

BIOS 751 - Health Data Systems (3 Credits)
Origin and operation of databases serving governmental and institutional policy and management of programs. 
**Prerequisites:** BIOS 700, HSPM 700.

BIOS 752 - Vital Record and Health Survey Data Analysis (3 Credits)
Accessing, managing, analyzing, and interpreting results from state and national vital records and health survey data sets. Common problems, programming techniques, and analytic considerations. 
**Prerequisites:** BIOS 700, BIOS 710, EPID 700.

BIOS 753 - Community Health Studies (3 Credits)
Process, skills, and management of undertaking health studies in the human community. 
**Prerequisites:** BIOS 700, EPID 700.

BIOS 754 - Discrete Data Analysis (3 Credits)
Analysis of discrete data in public health studies. Relative risk, odds ratio, rates and proportions, contingency tables, logistic regression, introduction to other advanced topics. Not for biostatistics majors. 
**Prerequisites:** EPID 701, BIOS 710, BIOS 757.

BIOS 755 - Introduction to Longitudinal Data Analysis (3 Credits)
Introduction to principles and methods for longitudinal & multi-level modeling. Focus on data analysis and interpretation. 
**Prerequisites:** BIOS 757.

BIOS 757 - Advanced Linear Models in Biostatistics (3 Credits)
Public health applications of correlation, regression, multiple regression, single and multi-factor analysis of variance and analysis of covariance. 
**Prerequisites:** a course in introductory statistics.

BIOS 758 - Advanced Data Analysis (3 Credits)
Public health applications of correlation, regression, multiple regression, single and multi-factor analysis of variance and analysis of covariance. Additional topics in analysis of health data including regression diagnostics, multi-collinearity of observational data, ridge/nonlinear regression, principal components, random/mixed effects, unbalanced designs, repeated measures and sampling and design effects. 
**Prerequisites:** BIOS 701.

BIOS 759 - Theory and Methods of Discrete Data Analysis (3 Credits)
The concepts, principles, and biostatistical techniques necessary to analyze categorical epidemiological data including dose response curves, life tables, and discrete measures of association. Estimation of parameters for logistic and other commonly used epidemiological models. 
**Prerequisites:** EPID 701, BIOS 757.

BIOS 760 - Biostatistical Methods in Clinical Trials (3 Credits)
The basic and advanced statistical techniques necessary for the design, conduct, analysis, and interpretation of results of clinical trials. 
**Prerequisites:** EPID 741, BIOS 757.

BIOS 761 - Survival Analysis (3 Credits)
Methods for the analysis of survival data in the biomedical setting. Underlying concepts; standard parametric and nonparametric methods for one or several samples; concomitant variables and the proportional hazards model. 
**Prerequisites:** BIOS 757 or BIOS 758.

BIOS 762 - Biostatistical Modeling of Genomic Data (3 Credits)
This course is an introduction to important topics and key concepts in statistical genetics, with emphasis on statistics methods and their applications to human complex diseases. The course will cover major concepts and classical statistical methods for the analysis of family and population based human genetic data. 
**Prerequisites:** BIOS 757 or equivalent.
BIOS 765 - Research Design in the Biomedical Sciences (3 Credits)
Fundamentals of constructing, analyzing, and interpreting biomedical studies; internal and external validity, sample size determination, completely random designs, blocking crossover designs, factorial designs, confounding, nested designs, repeated measure designs.
Prerequisites: EPID 741, BIOS 757.

BIOS 770 - Applied Longitudinal Data Analysis (3 Credits)
Modern methods for the analysis of repeated measures, correlated outcomes, and longitudinal data, including repeated measures ANOVA, generalized linear models, random effects, and generalized estimating equations.
Prerequisites: BIOS 757 or STAT 701 or STAT 705.

Cross-listed course: STAT 771
BIOS 775 - Biostatistical Aspects of Bioinformatics (3 Credits)
Bioinformatics analyses related to public health and biomedical research. Gene-gene and gene-environment interaction, phylogeny analysis in disease classification, and clustering for expression data. Data analyses, simulation studies, algorithms, and interpretation of health data.
Prerequisites: BIOS 757.

BIOS 780 - Introduction to Quantile Regression (3 Credits)
Principles and methods of quantile regression, a robust and distribution-free statistical approach that extends the classical mean regression to the analysis of complex treatment effects.
Prerequisites: BIOS 757.

BIOS 790 - Independent Study (1-6 Credits)
Directed research on a topic to be developed by M.P.H. or M.S.P.H. student and instructor. May be repeated.

BIOS 794 - Selected Topics in Biostatistics (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

BIOS 798 - Public Health Practice (1-6 Credits)
Performance of a limited work or service project in a public need setting, pursuit of planned learning objectives related to previously identified aspects of the student's chosen role. Self-monitoring and regular seminars focusing on learning accomplishments.
Prerequisites: 9-10 hours of specified courses including EPID 700, BIOS 700.

BIOS 799 - Thesis Preparation (1-9 Credits)

BIOS 805 - Categorical Data Analysis (3 Credits)
Prerequisites: BIOS 759 or BIOS 701 or STAT 705.

Cross-listed course: STAT 770
BIOS 808 - Environmetrics (3 Credits)
Statistical methods for environmental and ecological sciences, including nonlinear regression, generalized linear models, spatial analyses/kriging, temporal analyses, meta-analysis, quantitative risk assessment.
Prerequisites: BIOS 757 or BIOS 701 or STAT 705.

Cross-listed course: STAT 708
BIOS 809 - Environmetrics II (3 Credits)
Theoretical underpinnings of environmetrics. Spatial statistics, temporal and longitudinal analysis, hierarchical modeling, and Bayesian inferences for environmental data.
Prerequisites: STAT 708 or BIOS 808; STAT 714.

Cross-listed course: STAT 709
BIOS 811 - Survival Analysis II (3 Credits)
Parametric survival analysis, accelerated failure time model, frailty model, competing risk mode and multi-state model. Techniques motivated by applications in epidemiology and clinical medicine research, applications demonstrated using public health data sets.

BIOS 815 - Generalized Linear Models (3 Credits)
Statistical theory and applications extending regression and analysis of variance to non-normal data. An integrated treatment encompassing logistic and other binary regressions, log-linear models, and gamma regression models.
Prerequisites: STAT 713 or STAT 513 and STAT 705 or BIOS 757.

Cross-listed course: STAT 775
BIOS 816 - Advanced R Programming in Public Health (3 Credits)
R is a free and open source software environment for statistical computing and graphics. This course provides the principles and techniques to efficiently design, implement, and execute simulation and data analysis routines in quantitative fields like biostatistics, statistics, engineering, finance, and data science.
Prerequisites: BIOS 711.

BIOS 820 - Bayesian Biostatistics and Computation (3 Credits)
Bayesian statistical methods including hierarchical modeling and the use of the Markov Chain Monte Carlo (MCMC) methods.
Prerequisites: STAT 705 or BIOS 757.

BIOS 822 - Statistical Methods in Spatial Epidemiology (3 Credits)
A comprehensive introduction to the statistical methods used in the analysis of geo-referenced spatial health data. Topics range from disease mapping to prospective surveillance.
Prerequisites: BIOS 757 and BIOS 759.

BIOS 825 - Multivariate Biostatistics (3 Credits)
Analysis of multivariate data as found in biomedical studies: multivariate linear models, principal component analysis, factor analysis, discriminant and cluster analysis. Other special multivariate topics such as principal component regression.
Prerequisites: STAT 516 or BIOS 757.

BIOS 845 - Doctoral Seminar (1-3 Credits)
May be repeated for credit.
Prerequisites: complete at least one semester of course work and consent of instructor.

BIOS 850 - Binary Dose Response Theory and Methods (3 Credits)
Threshold, mass action and target theory; empirical dose response functions; methods in current use among health science researchers.
Prerequisites: STAT 512.

BIOS 890 - Independent Study (1-3 Credits)
Directed research on a topic to be developed by doctoral student and instructor. May be repeated.

BIOS 894 - Selected Topics in Biostatistics (3 Credits)
Discussion on current and emerging issues in biostatistics.
Prerequisites:
and DNA dynamics.

Nucleic acid structure and function, methodology, genome organization

Theory and practice of molecular biology as applied to medical research.

BMSC 710

networks.

and translation within the cell, cellular energetics, and intracellular

Emphasis will be on the regulation of cell division, protein transcription

on the biophysical and quantitative aspects of cellular function.

Examination of the organization and function of the cell with emphasis

Sciences

BMSC 708

catalysis and the influence of the cellular environment on catalysis. The

carbohydrates. Special emphasis will be on the mechanisms of enzyme

This course will cover the structure and function of proteins, lipids and

BMSC 707

Discussion of major ethical issues related to biomedical research. Two

BMSC 706

The structure and assembly of eucaryotic cells, mechanisms of gene

expression, and the cell biology of the immune system. Methods in cell

biology are also discussed.

Prerequisites: basic biochemistry.

BMSC 705

A continuation of BMSC 702, this course will cover cell-cell

communication, cell motility, extracellular matrices, stem cells, cellular

embryology, and the interactions of viruses with cells. Relevant methods

will also be presented.

Prerequisites: BMSC 702.

BMSC 704

Human Cell and Molecular Biology for Biomedical

Sciences (3 Credits)

Examination of the organization and function of the cell with emphasis

on the biophysical and quantitative aspects of cellular function.

Emphasis will be on the regulation of cell division, protein transcription

and translation within the cell, cellular energetics, and intracellular

networks.

BMSC 710

Medical Molecular Biology (4 Credits)

Theory and practice of molecular biology as applied to medical research.

Nucleic acid structure and function, methodology, genome organization

and DNA dynamics.

Prerequisites: BMSC 754, BMSC 755.

BMSC 720

Signal Transduction (4 Credits)

Transmembrane signaling processes and regulatory mechanisms

involved in neurotransmission and drug action. Emphasis on membrane

receptors linked to ion channels, guanine nucleotide binding proteins,
tyrosine kinase activity and intracellular receptors.

Prerequisites: BMSC 755.

BMSC 730

Cardiovascular Science (4 Credits)

Anatomy, pathology, pharmacology and physiology of the cardiovascular

system taught from a research-oriented perspective.

BMSC 740

Human Anatomy for Health Sciences (6 Credits)

Instruction in normal human anatomy and embryology, as well

as pathological variations during disease states, to include

advanced anatomical imaging techniques such as radiography and

ultrasonography.

BMSC 741

Pathophysiology for Health Sciences (6 Credits)

Pathophysiologic mechanisms that underlie common diseases related to
different organ systems.

BMSC 742

Summative Experience for Physician Assistants (1 Credit)

Assessing the Physician Assistant student’s readiness for clinical

practice. The course will consist of a series of summative evaluations

and board preparation.

BMSC 743

Clinical Immersion for PAs (2 Credits)

Introduction to the clinical setting to include HIPAA training, shadowing

clinicians, and basic life support training.

BMSC 744

Interprofessional Seminar for Health Professionals (1 Credit)

Formal and informal codes of interprofessional conduct of the

health science disciplines. Group discussion of implications for

interprofessional research, clinical practice, and administration.

BMSC 745

Medical Interviewing (2 Credits)

Instruction in medical interviewing, medical documentation, patient

assessment, and patient management.

BMSC 746

Physical Diagnosis (6 Credits)

Instruction in developing the techniques necessary to begin the

evaluation of patients by ascertaining symptoms and evaluating physical

signs of disease.

BMSC 747

Diagnostic Testing (2 Credits)

Analysis, utilization and interpretation of diagnostic testing modalities in

medicine.

BMSC 748

Surgery and Emergency Medicine (2 Credits)

Specialized medical topics in emergency and surgical medicine.

BMSC 749

Clinical Medicine-Across the Lifespan (2 Credits)

Instruction in clinical skills and knowledge required in primary care

practices, including patients of all ages.

BMSC 750

Population Health and Health Policy (3 Credits)

Instruction in patient-centered health care delivery systems to include

patient safety, patient education, and preventive medicine with a focus on

population health.

BMSC 751

Behavioral Health (2 Credits)

Instruction in clinical skills and knowledge to understand the

presentation and mechanisms of mental health problems, emphasizing a

psychopathology approach to the patient.

BMSC 752

Medical Law and Ethics (2 Credits)

Ethical issues and legal implications in patient-centered health care

delivery systems.
BMSC 753 - Physician Assistant Professional Practice (1 Credit)
Instruction related to PA professional issues.

BMSC 754 - Biomedical Biochemistry I (4 Credits)
First of a two-semester sequence covering the major areas of biochemistry in a biomedical context. Chemistry of amino acids and proteins, enzymology, metabolism of carbohydrates and lipids. Emphasis is on biomedical research applications. Four lecture hours per week.

BMSC 755 - Medical Genetics and Laboratory Diagnostics (2 Credits)
Fundamental genetics, the role of human genetic factors in clinical medicine, and interpretation of laboratory data.

BMSC 756 - Advancing Medical Practice through Research (3 Credits)
Instruction in critical thinking skills and research methods to prepare students to search, interpret and evaluate the medical literature and perform clinical research.

BMSC 758 - Internal Medicine (4 Credits)
Supervised clinical practicum for physician assistant students in Internal Medicine.

BMSC 759 - Women's Health (4 Credits)
Supervised clinical practicum for physician assistant students in OB/GYN.

BMSC 760 - Pediatrics (4 Credits)
Supervised clinical practicum for physician assistant students in Pediatrics.

BMSC 761 - Behavioral Medicine (4 Credits)
Supervised clinical practicum for physician assistant students in Behavioral Medicine.

BMSC 762 - General Surgery (4 Credits)
Supervised clinical practicum for physician assistant students in General Surgery.

BMSC 763 - Emergency Medicine (4 Credits)
Supervised clinical practicum for physician assistant students in Emergency Medicine.

BMSC 764 - Orthopedics (4 Credits)
Supervised clinical practicum for physician assistant students in Orthopedics.

BMSC 765 - Practicum Elective (4 Credits)
Supervised clinical practicum for physician assistant students in area of student's choice with approval of the Director of Clinical Education. Elective can be in a specialty or a core area.

BMSC 766 - PA Clinical Medicine and Therapeutics I (7 Credits)
Examines diseases related to different organ systems including review of pathophysiological basis of disease, resulting clinical signs/symptoms and overview of treatment strategies.
Prerequisites: BMSC 740 and PHPH 701.

BMSC 767 - PA Clinical Medicine and Therapeutics II (6 Credits)
Examines diseases related to different organ systems including review of pathophysiological basis of disease, resulting clinical signs/symptoms and an overview of treatment strategies.
Prerequisites: BMSC 766.

BMSC 768 - PA Clinical Medicine and Therapeutics III (6 Credits)
Examines diseases related to different organ systems including a review of pathophysiological basis of disease, resulting clinical signs/symptoms and an overview of treatment strategies.
Prerequisites: BMSC 767.

BMSC 769 - PA Clinical Medicine and Therapeutics IV (7 Credits)
Examines disease related to different organ systems including review of pathophysiological basis of disease, resulting clinical signs/symptoms and overview of treatment strategies.
Prerequisites: BMSC 766, BMSC 767, BMSC 768.

BMSC 770 - Clinical Skills Lab (3 Credits)
Performing clinical procedures and using technology such as ultrasonography in clinical practice.

BMSC 780 - Biomedical Research (1-2 Credits)
Research project conducted with mentor focused on advancing medical practice.

BMSC 781 - Family Medicine PA Program Practicum (4 Credits)
First of two supervised clinical practicums for physician assistant students in Family and Preventive Medicine.
Prerequisites: Successful completion of the didactic PA program coursework during the first year.

BMSC 782 - Family Medicine PA Program Practicum 2 (4 Credits)
2nd of two four-week supervised clinical rotations for physician assistant students in Family and Preventive Medicine.
Prerequisites: BMSC 781.

BMSC 783 - Physician Assistant Capstone Portfolio (1 Credit)
Portfolio project conducted with faculty mentor focused on community service, continuing medical education, evidence-based medicine, research, and advancing medical practice.

BMSC 799 - Thesis Preparation (1-9 Credits)

BMSC 801 - Seminar in Biomedical Science (2 Credits)
Professional development and scientific update by attending Biomedical Science Seminar Series and meeting with speakers in section one for one credit. Section two for two credits also includes student presentations of literature review topics and current research. May be repeated for credit.

Business Administration (BADM)

BADM 700 - Master of Science Project (1-15 Credits)
Preparation of an applied research project in a functional area of business administration under the supervision of a graduate faculty member.

BADM 780 - Readings and Research (1-3 Credits)

BADM 790 - Special Topics in Business (1-6 Credits)
Analysis of current topics, issues, and practices in business. May be repeated as content varies by title for a maximum of 9 credit hours per program of study.

BADM 799 - Thesis Preparation (1-9 Credits)
To be arranged by candidates for the Master of Science degree with the instructor under whose direction the master's thesis is being written.

BADM 880 - Readings and Research (1-6 Credits)

BADM 881 - Readings and Research (3 Credits)

BADM 899 - Dissertation Preparation (1-12 Credits)

Chemical Engineering (ECHE)

ECHE 520 - Chemical Engineering Fluid Mechanics (3 Credits)
Multi-phase pressure drop, phase contacting, flow through porous media, fluidization, mixing, and turbulence.
Prerequisites: ECHE 320 or ENCP 360.
ECHE 521 - Computational Fluid Dynamics for Engineering Applications (3 Credits)
Introduction to the use of computational fluid dynamics codes to analyze flow, heat, and mass transfer problems of practical engineering applications.
Prerequisites: ECHE 320 or EMCH 360 or ECIV 360 or ENCP 360 or AESP 265.

ECHE 530 - Intermediate Chemical Engineering Kinetics (3 Credits)
Intermediate concepts of chemical kinetics, batch and flow reactors, catalysts and reactor design, including non-ideal systems.
Prerequisite or Corequisite: C or better in ECHE 311.

ECHE 540 - Intermediate Separation Process Design (3 Credits)
Intermediate level design of stagewise chemical separation cascades; analysis of binary and ternary systems; multicomponent separations, plate and column specification procedures; distillation, crystallization, extraction, and leaching.
Prerequisites: C or better in ECHE 300.
Prerequisite or Corequisite: D or better in ECHE 321.

ECHE 550 - Chemical Process Dynamics and Control (3 Credits)
Fundamental physical and chemical principles in mathematically modeling the dynamic response of chemical processes; feedforward and feedback control systems; design of control schemes for selected chemical processes.
Prerequisites: C or better in ECHE 300 and MATH 242; D or better in ECHE 456.

ECHE 567 - Process Safety, Health and Loss Prevention (3 Credits)
Reliability, availability, and fault-tree analyses, risk indices, hazard evaluation, vapor cloud modeling, toxicology, material safety classification and regulations, individual/corporate ethical responsibilities.
Prerequisite or Corequisite: ECHE 466.

ECHE 571 - Corrosion Engineering (3 Credits)
Basic principles of corrosion engineering developed from a chemical engineering approach to thermodynamics, kinetics, mass transfer, and potential theory.
Prerequisites: ECHE 311.

ECHE 572 - Polymer Processing (3 Credits)
Industrial polymers with emphasis on their characterization and on the modeling of the major polymer fabrication processes.

ECHE 573 - Next Energy (3 Credits)
An examination of energy technologies that will enable society to move from an economy based on fossil fuels to one based on sustainable energy.

ECHE 574 - Combustion (3 Credits)
Fundamental process and applications related to the broad field of combustion and energy generation including emissions control technologies.
Prerequisites: ECHE 430.

ECHE 589 - Special Advanced Topics in Chemical Engineering (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as topic varies.

ECHE 700 - Chemical Process Analysis (3 Credits)
Quantitative analysis of industrial chemical operations. Equilibrium relations, material and energy balances, and reaction kinetics principles are used to analyze a variety of chemical processes and systems.

ECHE 709 - Selected Topics in Industrial Stoichiometry (3 Credits)
Special topics in industrial stoichiometry with emphasis on current research.

ECHE 710 - Advanced Chemical Engineering Thermodynamics (3 Credits)
Mass, energy, and entropy balance analysis of complex systems; evaluation of thermodynamic property changes of pure materials; solution thermodynamics of single-phase multicomponent systems; phase and chemical reaction equilibrium.
Prerequisites: ECHE 311.

ECHE 719 - Selected Topics in Chemical Engineering Thermodynamics (3 Credits)
Special topics in chemical engineering thermodynamics with emphasis on current research.

ECHE 720 - Advanced Fluid Flow Analysis (3 Credits)
Theory and application of fluid flow phenomena; momentum equations, conformal mapping, empirical methods, boundary layers, dimensional analysis.
Prerequisites: ENCP 360 and MATH 242.

ECHE 721 - Advanced Heat Flow Analysis (3 Credits)
Theory and application of heat flow phenomena; classical techniques and finite-difference numerical methods; conduction, convection, radiation, boiling.
Prerequisites: ECHE 321 and ECHE 720.

ECHE 722 - Advanced Mass Transfer (3 Credits)
Diffusive and convective mass transfer. Applications of the Stefan-Maxwell equations, prediction of diffusion coefficients, convective mass transport, correlations for mass transfer coefficients, and combined mass transfer and reaction modeling.
Prerequisite or Corequisite: ECHE 720.

ECHE 725 - Rheology (3 Credits)
Rheological characteristics of viscous, elastic, viscoelastic, and plastic substances; non-Newtonian fluid flow, viscometry, and rheogoniometry; rheological equations of state; engineering applications.

ECHE 728 - Selected Topics in Fluid Mechanics (3 Credits)
Special topics in fluid mechanics with emphasis on current research.

ECHE 729 - Selected Topics in Heat and Mass Transfer (3 Credits)
Special topics in heat and mass transfer with emphasis on current research.

ECHE 730 - Chemical Reactor Design (3 Credits)
Optimum temperature sequencing. Modeling of non-ideal reactors. Theories of catalysis with emphasis on the rate of diffusion. Interpretation of experimental catalytic data and use of these data in reactor design.

ECHE 739 - Selected Topics in Kinetics and Reactor Design (3 Credits)
Special topics in kinetics and reactor design with emphasis on current research.

ECHE 740 - Distillation (3 Credits)
Analytical, shortcut, and computer techniques for plate contacting of multicomponent systems. Review of binary separations, V-L-E models, azeotropic and extractive distillation, effects of non-key components, computational schemes, and convergence criteria.
ECHE 741 - Liquid-Liquid Extraction (3 Credits)
Principles of modeling liquid-liquid extraction cascades. Evaluation of L-L-E, ternary systems, design applications for hydrometallurgical systems, interlinked cascade structures for multiple solute systems, efficiency of process equipment, and synergism.

ECHE 742 - Adsorption Fundamentals and Processes (3 Credits)
Advanced principles of adsorption and adsorption processes including adsorbents, thermodynamics, kinetics, fixed bed adsorption and cyclic adsorption processes.

ECHE 749 - Selected Topics in Separations (3 Credits)
Special topics in separations with emphasis on current research.

ECHE 750 - Process Dynamics and Control (3 Credits)
Advanced topics in chemical process dynamics and control. Multivariate analysis, system identification, sampling, optimal process control.
Prerequisites: ECHE 550.

ECHE 759 - Selected Topics in Process Control (3 Credits)
Special topics in process control with emphasis on current research.

ECHE 769 - Selected Topics in Chemical Engineering Design (3 Credits)
Special topics in chemical engineering design with emphasis on current research.

ECHE 770 - Electrochemical Engineering (3 Credits)
Electrochemical engineering principles developed from thermodynamic, kinetic, mass transfer, and potential theory. Numerical analysis and design of electrochemical systems. Statistical analysis of experimental data and industrial experimental designs.

ECHE 771 - Corrosion Engineering (3 Credits)
Corrosion engineering principles developed from thermodynamic, kinetic, mass transfer, and potential theory. Numerical analysis of corroding systems, statistical analysis of experimental data, and industrial experimental designs.

ECHE 772 - Principles of Polymer Systems (3 Credits)
Theory and applications of polymer systems. Structure, physical properties, rheological, and mechanical behavior of polymers. Polymerization reactions and industrial polymerization processes. Fabrication techniques.

ECHE 789 - Selected Topics in Chemical Engineering (3 Credits)
Approved for special topic offerings.

ECHE 797 - Research (1-12 Credits)
Individual research to be arranged with instructor.

ECHE 798 - Graduate Seminar in Chemical Engineering (1-2 Credits)
Seminar on current topics in chemical engineering. Includes oral presentations by students on research projects.

ECHE 799 - Thesis Preparation (1-12 Credits)
To be arranged by candidates for the master's degree with the thesis advisor.

ECHE 865 - Chemical Process Safety and Loss Prevention (3 Credits)
Chemical process quantitative risk analysis, consequence modeling, risk estimation, and hazards assessment; design principles including inherent safety and mitigation techniques; elements of process safety management.
Prerequisites: ECHE 720.

ECHE 899 - Dissertation Preparation (1-12 Credits)
CHEM 619 - Special Topics in Inorganic Chemistry (1-3 Credits)
Current developments in inorganic chemistry. Readings and research on selected topics. Course content varies by title and will be announced in the schedule of classes. May be repeated for credit.

CHEM 621 - Instrumental Analysis (3 Credits)
Chemical instrumentation including electronics, signal processing, statistical analysis, molecular/atomic spectroscopy, electrochemical methods, chromatography, and mass spectrometry. Three lecture hours per week.
Prerequisites: C or higher in CHEM 321 or CHEM 322.

CHEM 621L - Instrumental Analysis Lab (1 Credit)
Methods, principles and strategies for chemical instrumentation in analysis. Chemical instrumentation laboratory with environmental, forensic, and biotechnology applications. Three laboratory hours per week.
Corequisite: CHEM 621.

CHEM 622 - Forensic Analytical Chemistry (3 Credits)
Analytical chemical methods in forensic science, including gathering of evidence, toxicology, drug identification, analysis of trace evidence, arson analysis, and DNA/serology.
Prerequisites: C or higher in CHEM 321, CHEM 321L and in CHEM 334, CHEM 332L or CHEM 334L.

CHEM 623 - Introductory Environmental Chemistry (3 Credits)
Study of the chemical reactions and processes that affect the fate and transport of organic chemicals in the environment. Three lecture hours per week.
Prerequisites: C or higher in CHEM 321, in CHEM 333, and in MATH 142.

CHEM 624 - Aquatic Chemistry (3 Credits)
Study of the chemical reactions and processes affecting the distribution of chemical species in natural systems. Three lecture hours per week.
Prerequisite or Corequisite: CHEM 321, MATH 142.

Cross-listed course: MSCI 624

CHEM 629 - Special Topics in Analytical Chemistry (1-3 Credits)
Current developments in inorganic chemistry. Readings and research on selected topics. Course content varies by title and will be announced in the schedule of classes. May be repeated for credit.

CHEM 633 - Introduction to Polymer Synthesis (3 Credits)
Special emphasis on the modern synthesis of polymeric materials. Definitions, characterization, and applications of polymers will be briefly presented.
Prerequisites: C or higher in CHEM 334.

CHEM 639 - Special Topics in Organic Chemistry (3 Credits)
Current developments in organic chemistry. Readings and research on selected topics. May be repeated as content varies by title.

CHEM 643 - Computational Chemistry (3 Credits)
This course is designed to familiarize students with theory and use of modern electronic structure codes, as well as to develop critical thinking and problem-solving skills and to improve computer literacy.
Prerequisites: C or higher in CHEM 541 or CHEM 542.

CHEM 644 - Materials Chemistry (3 Credits)
Introduction to materials science; structural and electronic description of inorganic-based solids; experimental techniques in materials chemistry; interfacial energetics and optoelectronic processes at metal and semiconductor surfaces.
Corequisite: CHEM 542 (unless a grade of C or higher earned previously).

CHEM 649 - Special Topics in Physical Chemistry (1-3 Credits)
Current developments in physical chemistry. Readings and research on selected topics. Course content varies by title and will be announced in the schedule of classes. May be repeated for credit.

CHEM 655 - Metabolic Biochemistry of Human Disease (3 Credits)
Core concepts of biochemistry as applied to human health and disease.
Prerequisites: C or higher in CHEM 555/BIOL 545 or CHEM 550/BIOL 541.

Cross-listed course: BIOL 668

CHEM 659 - Special Topics in Biochemistry (3 Credits)
Selected topics in the field of biochemistry. May be repeated as content varies by title.
Prerequisites: C or higher in CHEM 555/BIOL 545 or CHEM 550/BIOL 541.

CHEM 700 - Methods of Solving Problems in Chemistry (3 Credits)
Various approaches to solving problems in gas laws, solution chemistry, and equilibrium. Comparison of the pedagogical merits of the different approaches. For teachers of chemistry. M.A.Students. Three lectures per week.

CHEM 701 - Seminar (1 Credit)
Required of all graduate students. Fall or Spring limit of 2 credits.

CHEM 701A - Seminar (1 Credit)
A survey of chemical research at the University of South Carolina. Required of all first-year degree candidates in chemistry.

CHEM 702 - Structure and Bonding in Covalent Molecules (4 Credits)
Covalent bonding in compounds of the first short period elements, with emphasis on those of boron, carbon, and nitrogen. Structure of molecules, some important functional groups, resonance in unsaturated compounds, stereochemistry, and organometallic compounds. For teachers of chemistry, M.A.T., or M.Ed. students. Three lectures and one discussion period per week.

CHEM 703 - Molecular Reactions (4 Credits)
General types of organic reactions, including those of biochemistry. Industrial preparations of both organic and inorganic compounds of major importance. For teachers of chemistry, M.A.T., or M.Ed. students. Three lectures and one discussion period per week.

CHEM 704 - Energy, Equilibrium, and Chemical Change (4 Credits)
The basic laws of chemical thermodynamics, chemical kinetics, and equilibrium, with emphasis on the practical and theoretical importance of the interconversion of chemical energy with other forms of energy. For teachers of chemistry, M.A.T., or M.Ed. students. Three lectures and one discussion period per week.

CHEM 705 - Modern Instrumental Methods in Chemistry (4 Credits)
A survey of the applications of modern instrumental techniques to the solution of chemical problems, with emphasis on development of a basic understanding of the experiment and on interpretation of data. For teachers of chemistry, M.A.T., or M.Ed. students. Three lectures and one discussion period per week.
CHEM 706 - Chemistry in Living Systems (4 Credits)
The structures and functions of proteins, nucleic acids, lipids, enzymes, and other biologically important molecules; the role of these molecules in the major metabolic pathways. For teachers of chemistry, M.A.T., or M.Ed. students. Three lectures and one discussion period per week.

CHEM 709 - Special Topics in Chemical Education (1-6 Credits)
Selected chemical topics with emphasis on modern chemical concepts. For teachers of chemistry, M.A.T., I.M.A. and M.Ed. students. Lectures, discussion, laboratories, depending on credit offered.

CHEM 711 - Physical-Inorganic Chemistry (3 Credits)
The use and interpretation of modern physical measurements of particular application to inorganic chemistry, including X-ray, ESR, magnetic measurements, Mössbauer spectra, ligand field theory, and reaction mechanisms.

CHEM 712 - The Chemistry of Transition Elements (3 Credits)
Systematic study of the reactions and bonding of the d and f transition elements.

CHEM 713 - The Chemistry of the Representative Elements (3 Credits)
Systematic study of the structure and bonding of the inorganic compounds of main group elements.

CHEM 719 - Special Topics in Inorganic Chemistry (3 Credits)
May be repeated as content varies by title.

CHEM 721 - Electroanalytical Chemistry (3 Credits)
Theory and application of classical and modern electrochemical techniques.

CHEM 722 - Spectrochemical Methods of Analysis (3 Credits)
A comprehensive study of the theory, instrumentation, methodology, and analytical applications of modern atomic and quantitative molecular spectrometry.

CHEM 723 - Separation Methods in Analytical Chemistry (3 Credits)
Modern techniques for analytical separations including distillation, extraction, gas chromatography, and liquid chromatography. Basic theory and practical applications. Three lecture hours per week.

CHEM 729 - Special Topics in Analytical Chemistry (3 Credits)
May be repeated as content varies by title.

CHEM 735 - Structural and Mechanistic Organic Chemistry (3 Credits)
Basic concepts of structure, bonding, stereochemistry, and reaction mechanisms as applied to organic compounds and synthetic transformations.

CHEM 736 - Mechanistic and Synthetic Organic Chemistry (3 Credits)
A continuation of CHEM 735 with special emphasis on organic synthesis. Prerequisites: CHEM 735.

CHEM 739 - Special Topics in Organic Chemistry (3 Credits)
May be repeated as content varies by title.

CHEM 741 - Chemical Thermodynamics (3 Credits)
A development of classical thermodynamics and its application to chemical changes. Prerequisites: CHEM 542.

CHEM 742 - Surface Science (3 Credits)
The principles of surface processes – structure and electronic properties, adsorption and reactions, surface characterization using spectroscopy and microscopy.

CHEM 743 - Quantum Chemistry (3 Credits)
An introduction to the application of quantum mechanics to problems in chemistry. Prerequisites: CHEM 542; differential equations.

CHEM 744 - Statistical Mechanics (3 Credits)
Calculations of the thermodynamic properties of chemical systems from molecular properties. Theory and applications. Prerequisites: CHEM 542; differential equations.

CHEM 745 - Introductory Crystallography (3 Credits)
Point and space groups. Matrix representation and the derivation of the space groups. Significance of general and special positions. Powder and single crystal methods. Limitation imposed upon molecules by space group considerations. Introduction to structure analysis. Patterson and electron density functions. Refinement techniques.

CHEM 747 - Spectroscopy and Molecular Structure (3 Credits)
Study of the rotational, vibrational, and electronic spectra of polyatomic molecules for the elucidation of molecular structures.

CHEM 749 - Special Topics in Physical Chemistry (3 Credits)
May be repeated as content varies by title.

CHEM 751 - Biosynthesis of Macromolecules (3 Credits)
A detailed consideration of the enzymological basis for the synthesis of DNA, RNA, and protein including mechanisms for the regulation of these processes. Focus will be on eucaryotic mechanisms though procaryotic systems will be covered as necessary for background.

CHEM 752 - Regulation and Integration of Metabolism (3 Credits)

CHEM 753 - Enzymology and Protein Chemistry (3 Credits)
An analysis of the isolation, composition, structure, and function of enzymes emphasizing their kinetic, mechanistic, and regulatory features. Protein chemistry: amino acid and protein sequence analysis; chemical modification methodologies; analysis of higher order structures of proteins.

CHEM 754 - Biomedical Biochemistry I (4 Credits)
First of a two-semester sequence covering the major areas of biochemistry in a biomedical context. Chemistry of amino acids and proteins, enzymology, metabolism of carbohydrates and lipids. Emphasis is on biomedical research applications. Four lecture hours per week. 03-07/05/2019.

CHEM 755 - Biomedical Biochemistry II (4 Credits)
A continuation of CHEM 754. Topics include nucleic acids and protein biosynthesis, blood chemistry, respiration, acid-base chemistry, metabolism, and nutrition. Four lecture hours per week. Prerequisites: CHEM 754.

CHEM 759 - Special Topics in Molecular Biochemistry (3 Credits)
May be repeated as content varies by title.

CHEM 790 - Introduction to Research (3 Credits)
A laboratory and introduction to modern research techniques. Six hours of laboratory per week and individual consultation with instructor.

CHEM 791 - Introduction to Research (1-3 Credits)
A continuation of CHEM 790. Six hours of laboratory per week and individual consultation with instructor. Prerequisites: CHEM 790.
CHEM 798 - Research in Chemistry I (1-12 Credits)
Directed laboratory research and readings in chemistry.

CHEM 799 - Thesis Preparation (1-12 Credits)

CHEM 898 - Research in Chemistry II (1-12 Credits)
A continuation of CHEM 798 for Ph.D. candidates.

CHEM 899 - Dissertation Preparation (1-12 Credits)

Chinese (CHIN)

CHIN 550 - Advanced Special Topics in Chinese Studies (3 Credits)
Advanced special topics in Chinese studies. May be repeated as content varies by title.

CHIN 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the MA or PhD degree.

Civil Engineering (ECIV)

ECIV 502 - Life Cycle Assessment of Civil and Environmental Engineering Systems (3 Credits)
The steps of conducting and interpreting an environmental life cycle assessment on civil and environmental engineering systems. Fundamentals associated with conducting a life cycle assessment, including goal and scope, inventory analysis, impact assessment, and interpretation.
Prerequisites: D or better in ECIV 350 and D or better in either ECIV 303, ECIV 325, ECIV 327, ECIV 330, ECIV 340 or ECIV 362.

ECIV 503 - Structural Modeling and Experimental Methods (3 Credits)
Introduction of structural modeling; strain gauge instrumentation; force, displacement, acceleration, pressure, temperature measurements; concrete and steel modeling; size effects; analysis of experimental data.
Prerequisites: ECIV 327.

ECIV 520 - Structural Analysis II (3 Credits)
Advanced methods of structural analysis with emphasis on matrix methods. Development of the generalized matrix force and matrix displacement methods of static analysis, with applications to trusses and frames.
Prerequisites: ECIV 320.

ECIV 521 - Numerical Methods in Mechanics (3 Credits)
Prerequisites: D or better in ECIV 201 or ENCP 201.

ECIV 524 - Structural Vibrations (3 Credits)
Response of single- and multiple-degree of freedom structurally dynamic systems to impact, harmonic, wind, and seismic excitations.
Prerequisites: ECIV 320.

ECIV 526 - Timber and Masonry Design (3 Credits)
Basic engineering properties of timber and masonry materials, design methods and philosophies for timber and masonry structures. Particular attention is paid to current codes, specifications and analysis.
Prerequisites: C or better in ECIV 320.

ECIV 530 - Foundation Analysis and Design (3 Credits)
Subsurface investigation procedures. Theoretical and practical aspects of the design of earth retaining structures, spread footings, and pile foundations.
Prerequisites: ECIV 330.

ECIV 531 - Design of Earth Structures (3 Credits)
Geotechnical engineering problems associated with the behavior of earth masses. Soil shear strength, lateral earth pressure, design of retaining structures, slope stability, water flow through soils.
Prerequisites: ECIV 330.

ECIV 533 - Geosynthetics and Geotechnical Design of Landfills (3 Credits)
Principles for the design, construction, and performance of waste containment systems. Characterization of barrier materials; geosynthetics; design of liner and leachate collection systems; stability and deformation analyses of landfills.
Prerequisites: ECIV 330.

ECIV 535 - Geotechnical Engineering in Transportation (3 Credits)
Remote sensing and engineering geology. Field and laboratory testing. Design and maintenance methods for flexible and rigid pavements. Topics in tunnel design and buried conduit.
Prerequisites: ECIV 330.

ECIV 539 - Experimental Methods in Geotechnical Engineering (3 Credits)
Overview of transducers, signal conditioning and data acquisition; test control methods, data analysis and measurement errors; testing systems to measure soil strength, stiffness, and hydraulic conductivity; laboratory projects and examinations.
Prerequisites: ECIV 330, ECIV 330L.

ECIV 540 - Transportation Systems Planning (3 Credits)
Fundamental interactions between supply and demand in transportation systems. Modeling transportation demand and trip-making behavior. Evaluation of alternatives for decision making.
Prerequisites: ECIV 340.

ECIV 541 - Highway Design (3 Credits)
Design of transportation facilities using relevant tools and guidelines with emphasis on physical and operational aspects of arterials, freeways, intersections, and interchanges, including geometry, capacity, control, and safety.
Prerequisites: D or better in ECIV 111 or ENCP 102 and D or better in ECIV 340.

ECIV 542 - Traffic Engineering (3 Credits)
Capacity analysis of freeways and arterials. Traffic flow characteristics and basic relationships among traffic flow parameters. Signalized and unsignalized intersection control and signal timing design.
Prerequisites: ECIV 340.

ECIV 543 - Traffic Safety Analysis (3 Credits)
Research concepts and methodologies to enable students to identify the underlying reasons and factors that contribute to traffic crashes and determine appropriate countermeasures.
Prerequisites: D or better in ECIV 340.
ECIV 551 - Elements of Water and Wastewater Treatment (3 Credits)
Unit operations and processes employed in the physical, chemical, and biological treatment of water and wastewater. Design of water and wastewater treatment systems.
Prerequisites: ECIV 350.

ECIV 555 - Principles of Municipal Solid Waste Engineering (3 Credits)
Fundamentals and engineering principles of solid waste generation, characterization, collection and transport, source reduction and recycling, and physical, chemical, and biological treatment strategies.
Prerequisites: ECIV 350.

ECIV 556 - Air Pollution Control Engineering (3 Credits)
Introduction to the sources of air pollution and the engineering principles used for control and prevention.
Prerequisites: ECIV 350.

ECIV 557 - Sustainable Construction for Engineers (3 Credits)
Instruction to sustainable engineering design alternatives and principles for construction and site development from preconstruction through design and the construction phase.
Prerequisites: ECIV 350 and ECIV 570.

ECIV 558 - Environmental Engineering Process Modeling (3 Credits)
Modeling fate and transport phenomena in environmental processes with applications in engineered unit operators and natural systems.
Prerequisites: ECIV 350 and MATH 242.

ECIV 560 - Open Channel Hydraulics (3 Credits)
Steady and unsteady flows in single or multiple-channel systems.
Prerequisites: ECIV 360.

ECIV 562 - Engineering Hydrology (3 Credits)
Applications of hydrologic techniques to design problems; stormwater simulation models; urban stormwater.
Prerequisites: ECIV 360.

ECIV 563 - Subsurface Hydrology (3 Credits)
Hydrologic cycle, subsurface physical properties, equations of groundwater flow; well flow, well design, groundwater resource development, design of dewatering systems, groundwater contamination.
Prerequisites: ECIV 201, ECIV 360.

ECIV 570 - Land Development for Engineers (3 Credits)
Fundamentals of designing and permitting the conversion of land to new or altered states, including environmental issues, traffic and parking, utility resources, site engineering, ADA, safety, planning, and zoning requirements.
Prerequisites: Three from ECIV 320, ECIV 330, ECIV 340, ECIV 350, and ECIV 362.

ECIV 580 - Railway Engineering I (3 Credits)
Introduction to the analysis and design of the railway infrastructure for freight and passenger systems to include track and track support systems, grade crossings, special trackwork, construction, inspection, assessment and compliance.
Prerequisites: ECIV 303, ECIV 320, ECIV 330, ECIV 340.
Corequisite: ECIV 303.

ECIV 582 - Operation and Logistics of Railway Systems (3 Credits)
Principles of rail operations; Network management; Best practices for train planning, performance management and delivery of service; technical elements of a railway from an operations perspective (train controls, signaling, communications, yards, tractive power etc).
Prerequisites: ECIV 340.

ECIV 588 - Design of Railway Bridges and Structures (3 Credits)
Introduction to railway infrastructure; Structural design considerations and criteria of railway structures; Bridge types and components; Planning and preliminary design of modern railway bridges; Loads and forces; Structural analysis and design of steel railway bridges and components.
Prerequisite or Corequisite: ECIV 330; ECIV 325 or ECIV 327.

ECIV 705 - Deterministic Civil and Environmental Systems Engineering (3 Credits)
Planning, design, and operation of large-scale, integrated civil and environmental engineering systems, with applications of mathematical programming and other search models.
Prerequisites: ECIV 405.

ECIV 706 - Probabilistic Civil and Environmental Systems Engineering (3 Credits)
Civil and environmental systems engineering under uncertainty, including decision rules, decision theory, uncertainty propagation, stochastic programming, and conservative design.
Prerequisites: STAT 509.

ECIV 707 - Management of Engineering Projects (3 Credits)
This course focuses in studying the life-cycle of a project using a systems engineering approach. Industry standards for engineering companies as well as practical considerations are studies through the semester.

ECIV 708 - Engineering Risk and Reliability (3 Credits)
Risk analysis is presented in the context of reliability in design including applications to mechanical and electrical systems with discussion of failure modes and life cycle costs.

ECIV 712 - Boundary Element Methods in Engineering (3 Credits)
Introduction to boundary element methods and their computer implementation. Steady-state and transient solutions of two- and three-dimensional problems of elasticity and potential flow.
Prerequisites: ENCP 260, MATH 242.

ECIV 720 - Advanced Structural Mechanics and Analysis (3 Credits)
Development of concepts and practical applications of the finite element method of structural analysis with emphasis on the displacement method approach. Initial strains, specified displacements, numerical integration, and isoparametric elements are included.
Prerequisites: ECIV 520.

ECIV 722 - Theory and Design of Plates and Shells (3 Credits)
Prerequisites: MATH 242.
ECIV 724 - Dynamics of Structures (3 Credits)
Lumped and continuous multidegree of freedom mechanical systems and structural assemblies. Steady-state, shock, and random excitation. Modal analysis, numerical methods. Introduction to wave propagation, earthquake engineering, and nonlinear vibrations.
Prerequisites: ENCP 260, MATH 242.

ECIV 725 - Advanced Analysis and Design in Structural Metals (3 Credits)
Analysis and behavior of metal structural components under general loading combinations. Buckling phenomena of thin-walled open sections in the elastic and inelastic regions, and correlation with design code criteria. Behavior and design of plate girders.
Prerequisites: ECIV 425.

ECIV 726 - Repair and Retrofit of Structures (3 Credits)
Analysis and modeling existing and repaired structures. Selection, modeling, and design of repair and/or retrofit measures.
Prerequisites: ECIV 520.

ECIV 727 - Advanced Analysis and Design of Reinforced Concrete (3 Credits)
Design of multistory structures, two-way slabs, joints in buildings, pavement design, and miscellaneous topics.
Prerequisites: ECIV 427.

ECIV 728 - Prestressed Concrete Analysis and Design (3 Credits)
Pre-stressing methods and materials; flexural analysis, shear and torsion, design of simple, composite and continuous beams. Deflections, slab design, and study of axially loaded members.
Prerequisites: ECIV 327.

ECIV 730 - Advanced Soil Mechanics (3 Credits)
Course covers the mechanical properties of soil; analysis of the field and laboratory tests to determine soil properties required for foundation analysis and design; consolidation theory; and settlement analysis.
Prerequisites: ECIV 530.

ECIV 731 - Slope Stability, Retaining Systems and Lateral Earth Pressure (3 Credits)
Prerequisites: ECIV 530.

ECIV 732 - Theoretical and Numerical Methods in Geomechanics (3 Credits)
Constitutive models and their numerical implementation. Elastic and plastic approaches to analysis. Finite element applications to geomechanics problems. Layer analysis, arching, and stability case studies.
Prerequisites: ECIV 530.

ECIV 733 - Physico-chemical Properties of Soils (3 Credits)
Prerequisites: ECIV 530.

ECIV 734 - Dynamics of Soils and Foundations (3 Credits)
Prerequisites: ECIV 330.

ECIV 736 - Ground Improvement Techniques (3 Credits)
Application of soil mechanics principles to improving the engineering characteristics of soil and rock. Topics include mechanisms of soil densification, preconsolidation, grouting, ground freezing, reinforced earth, and soil nailing.
Prerequisites: ECIV 530.

ECIV 737 - Advanced Foundation Design (3 Credits)
Prerequisites: ECIV 530.

ECIV 742 - Intermodal Freight Transport (3 Credits)
Marine container terminal design and operations, rail-yard design and operations, cross-dock terminal design and operations, drayage routing and scheduling, and network design. Application of operations research techniques to intermodal transportation.
Prerequisites: D or better in ECIV 705.

ECIV 744 - Discrete Choice Analysis of Travel Demand (3 Credits)
Individual choice theory; binary choice models; unordered multinomial and multi-dimensional choice models; sampling theory and sample design; ordered multinomial models, aggregate prediction with choice models; joint stated preference and revealed preference modeling, and longitudinal choice analysis; review of state-of-the-art and future directions.
Prerequisites: D or better in STAT 509.

ECIV 746 - Flows in Transportation Networks (3 Credits)
Design, operation, and management of traffic flows over complex transportation networks. Covers two major topics: traffic flow modeling and traffic flow operations. Includes deterministic and probabilistic models, elements of queueing theory, and traffic assignment. Concepts and methods are illustrated through various applications and examples.
Prerequisites: D or better in ECIV 706.

ECIV 748 - Traffic Flow Theory (3 Credits)
Prerequisites: ECIV 541, STAT 509.

ECIV 750 - Principles of Environmental Engineering Process (3 Credits)
Basic physical, chemical, and biological processes applied to aqueous systems.
Prerequisites: CHEM 112 and MATH 142.

ECIV 751 - Water and Wastewater Treatment Theory I (3 Credits)
Physical and chemical water and wastewater treatment processes. Topics include mixing, coagulation, sedimentation, filtration, oxidation, absorption, and ion exchange.
Prerequisites: ECIV 750.
ECIV 752 - Water and Wastewater Treatment Theory II (3 Credits)
Biological water and wastewater treatment process. Topics include activated sludge, biofilms, nutrient removal, lagoons, and sludge treatment and disposal.
Prerequisites: ECIV 750.

ECIV 753 - Unit Operations Laboratory for Water and Wastewater Treatment (3 Credits)
Laboratory experiments in selected processes for water and wastewater treatment.
Prerequisites: ECIV 350L.

ECIV 755 - Industrial Wastewater Treatment (3 Credits)
Industrial sources, characteristics, and treatment plant design.
Prerequisites: ECIV 751 or ECIV 752.

ECIV 760 - Computational Hydraulics (3 Credits)
Unsteady flow in open channels and pipes: theory, governing equations, and methods for their solution.
Prerequisites: ECIV 560.

ECIV 761 - Numerical Methods in Subsurface Hydrology (3 Credits)
Formation of groundwater flow and solute transport problems: theory and practice, numerical methods, solution techniques.
Cross-listed course: GEOL 775
ECIV 762 - Advanced Hydrology (3 Credits)
Advanced theories and techniques used in stormwater modeling; kinematic hydrology; soil physics infiltration; deterministic and parametric stormwater models; stochastic methods.
Prerequisites: ECIV 562.

ECIV 763 - Unsaturated Flow Theory (3 Credits)
Moisture content-matric suction relationships, theory of flow in unsaturated soils, governing equations, measurement techniques, computer modeling of flow and transport.
Prerequisites: ECIV 563.

ECIV 764 - Contaminant Transport (3 Credits)
Quantitative study of conservative and non-conservative pollutant transport in groundwater. Special topics include: transport processes, field techniques to determine aquifer transport parameters, and computer modeling of flow and transport.
Prerequisites: ECIV 563.

ECIV 765 - Erosion and Sediment Control (3 Credits)
Erosion, sediment transport, methods for control, pond hydraulics and performance, nonpoint source pollution, stream water quality.
Prerequisites: ECIV 562.

ECIV 766 - Fluid Transients (3 Credits)
Definitions; derivation of governing equations; methods of solution; method of characteristics; transients caused by turbomachinery, and methods for controlling transients.
Prerequisites: ENCP 360.

ECIV 767 - Sediment Transport and River Mechanics (3 Credits)
Sediment properties, review of fluid mechanics of sediment transport as bedload and suspended load, stability analysis of bedforms, alternate bars, growth and migration of meander bends.
Prerequisites: ECIV 560.

ECIV 784 - Dynamic Analysis of Railway Systems (3 Credits)
Dynamic characteristics of railway systems and their components; modeling and simulations of railway systems including trains, track and ballast; Dynamic interaction of components including wheel-rail and train-bridge interaction; Study of environmental vibrations; Advanced topics on infrastructure assessment, infrastructure upgrade and vibration mitigation.
Prerequisites: ECIV 524.
Prerequisite or Corequisite: ECIV 520.

ECIV 789 - Design Project in Railway Engineering (4 Credits)
Application of engineering design principles in railway projects; project management; project scheduling; cost estimation; ethics; environmental and social impact; design drawings; report documents.
Prerequisites: ECIV 580 or ECIV 582.

ECIV 790 - Selected Topics in Civil Engineering (3-9 Credits)
Individual studies and/or investigations of special topics in the field of civil engineering.

ECIV 797 - Research in Civil Engineering (1-12 Credits)
Credits to be designated upon registration.

ECIV 798 - Seminar in Civil and Environmental Engineering (0 Credits)
Seminar on current topics in civil and environmental engineering. Includes oral presentations by students on their research projects. Recommended by the department that all graduate students participate each semester the seminar series is offered.

ECIV 799 - Thesis Preparation in Civil Engineering (1-12 Credits)
To be arranged by candidates for the master's degree with the instructor under whose direction the master's thesis is being written.

ECIV 899 - Dissertation Preparation in Civil Engineering (1-12 Credits)

Classics (CLAS)

CLAS 586 - Classical Mythology (3 Credits)
The major Greek and Roman myths, with emphasis on their meaning, functions, and influence on ancient and later Western culture.

CLAS 598 - Classics of Western Literary Theory (3 Credits)
Problems of literary theory in texts from the ancients to the 17th century, with an emphasis on the classical tradition.
Cross-listed course: CPLT 701, ENGL 733

CLAS 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the MA or PhD degree.

Communication Disorders (COMD)

COMD 500 - Introduction to Speech-Language Pathology and Audiology (3 Credits)
Human communication disorders with an overview of prevention and treatment programs.

COMD 501 - Anatomy and Physiology of Speech and Hearing Mechanisms (3 Credits)
An intensive study of the anatomy and physiology of the speech and hearing mechanisms.
COMD 507 - Language Theory and Phonetics (3 Credits)
Study of language theory and international phonetics alphabet transcription.

COMD 521 - Introduction to Clinical Procedures in Speech Pathology (1 Credit)
Diagnostic and therapeutic programs for the communicatively handicapped will be observed in the public school and various rehabilitative settings. Discussion and study of basic therapeutic theories and procedures utilized in speech therapy. Introduction to phonetics or equivalent or permission of instructor.

COMD 525 - Selected Topics (1-3 Credits)
Presentation of current experimental or innovative programs in diagnosis and treatment of the communicatively impaired. Course is designed to update the practicing clinician in specific areas of expertise. May be repeated for credit. Individual topics to be announced by title. Permission of instructor.

COMD 526 - Disorders of Articulation: Evaluation and Therapy (3 Credits)
The diagnosis and treatment of articulation problems in children and adults, including analysis of current research in testing and therapy for articulation disorders.
Prerequisites: COMD 501 and COMD 507 or equivalents.

COMD 560 - Observation of Speech Language Pathology (1-3 Credits)
Introduction to the clinical process through observation of various diagnostic reports and intervention programs included.

COMD 570 - Introduction to Language Development (3 Credits)
The language acquisition process in normal children, including the development of semantics, morphology, syntax, phonology, and pragmatics; American dialects and bilingualism.
Prerequisites: COMD 501 and COMD 507.

Cross-listed course: LING 570

COMD 700 - Advanced Seminars in Speech Sound Disorders (3 Credits)
Study of advanced alternative procedures for the evaluation and management of individuals with significant phonological disturbances.

COMD 701 - Stuttering: Evaluation and Therapy (1-3 Credits)
An introduction to the problem of stuttering; its possible causes; the management and training of clients.

COMD 702 - Cleft Palate-Craniofacial Disorders: Evaluation and Management (1-3 Credits)

COMD 703 - Genetics of Communication Disorders (1 Credit)
Genetic factors that contribute to disorders of speech, language, and hearing.

COMD 704 - Disorders of Voice: Evaluation and Therapy (1-3 Credits)
The diagnosis and treatment of voice disorders in children and adults. The neurological, physiological, and psychological bases of voice disorders will be considered.

COMD 705 - Adult Speech, Language, and Cognitive Disorders (3 Credits)
Neuropathological bases for language disorders in adults; includes differential diagnosis and remediation techniques.
Prerequisite or Corequisite: COMD 744.
COMD 720 - School-Age Language & Literacy Development and Disorders (3 Credits)
The relationship between oral and written language and factors that impact reading and writing (phonological awareness, phonics, vocabulary). Reading (word-level, comprehension, fluency) and writing (composition, spelling) development, assessment, intervention and issues related to delivery of literacy services in the schools.

COMD 721 - Cognitive Rehabilitation (1-3 Credits)
Traumatic brain injury and implications for speech and language function including diagnostic evaluation and remediation.
Prerequisite or Corequisite: COMD 502 or equivalent course.

COMD 722 - Dysphagia (1-3 Credits)
Normal function and pathologic changes of the swallowing mechanism, including evaluation and therapeutic techniques.

COMD 723 - Language Disorders in Adolescents (1-3 Credits)
Diagnosis and treatment of communication problems in adolescent children, including educational psychosocial sequelae.

COMD 724 - Introduction to Medical Speech-Language Pathology (1 Credit)
Practical application skills for speech-language pathology in the medical setting.

COMD 725 - Pediatric Dysphagia (1-3 Credits)
Anatomical and physiological orientation to oral-pharyngeal swallowing disorders in young children.
Prerequisite or Corequisite: COMD 502, COMD 722, AND COMD 724 or equivalent course.

COMD 726 - Advanced Cognitive Retraining (3 Credits)
Issues in traumatic brain injury and implications for speech and language function.

COMD 727 - Advanced Study of Literacy for Speech-Language Pathologists (2 Credits)
Theories of reading development with regard to their implications for assessment and intervention. Connections between oral and written language skills, including vocabulary as a link between word level and text-level skills. Overall framework for thinking about literacy as a multi-component language skill.

COMD 735 - Counseling in Speech-Language Pathology (2 Credits)
The use of counseling skills by speech-language pathologists regarding the impact of communication disorders on the family system, the importance of interpersonal communication in counseling, and the principles and processes of counseling in facilitating behavior change.

COMD 738 - The Speech Pathologists Role in Working with Children with Autism Spectrum Disorders (2 Credits)
Speech-language pathologists (SLPs) are key team members in the assessment and treatment of individuals with Autism Spectrum Disorders (ASD), with 90% of school-based SLPs serving children with ASD. This course is intended to prepare students for the assessment and interventions targeting language and communication skills for children with ASD.

COMD 744 - Neurocognitive Bases of Language Behavior (3 Credits)
Neurocognitive bases for speech and language in the central nervous system including anatomy and physiology and theoretical constructs of language.
Prerequisites: COMD 501.

COMD 745 - Introduction to Speech Science and Acoustic Measurement (3 Credits)
The physical and related psychological attributes of speech. Use of electronic instruments and laboratory practices in measurement of acoustic variables. Introduction to information theory.
Prerequisites: COMD 501 and COMD 507.

COMD 748 - Speech Pathology Management of Patients with Tracheostomy & Ventilator Dependency (2 Credits)
Communication options and dysphagia management for speech-language pathologists working with tracheostomized patients.
Prerequisites: COMD 722.

COMD 750 - Introduction to Audiology and Aural Habilitation (3 Credits)
Basic anatomy and psycho-physics of hearing, pathologies of hearing loss, introduction to identification procedures including hearing screening and pure-tone audiometry, impact of hearing loss on preschool and school-aged children, and educational, psychological, and medical aspects of auditory habilitation.
Prerequisites: COMD 507 and COMD 504.

COMD 754 - Aural (Re)Habilitation of Children and Adults (3 Credits)
Effects of hearing loss on a child's development and also on adult function and quality of life (linguistic, intellectual, social, and educational). Communication assessment and case management, including parent and patient training, education, and counseling.
Prerequisite or Corequisite: COMD 501, COMD 745, and COMD 750 or their equivalent.

COMD 755 - Aural Rehabilitation of Adults (3 Credits)
Comprehensive rehabilitation of hearing-impaired adults with emphasis upon amplification, auditory training, and speech reading in developing communication skills.

COMD 760 - Cochlear Implants (3 Credits)
Anatomy and physiology of the normal cochlea and the eighth cranial nerve. Evoked otoacoustic emissions as a diagnostic medium. Cochlear pathology with emphasis on candidacy for cochlear implantation.

COMD 761 - Habilitation of Individuals with Cochlear Implants (1-3 Credits)
Clinical techniques for the communication assessment and habilitation of the child post cochlear implantation.

COMD 762 - Aural Habilitation: Manual Communication (1-3 Credits)
Basic sign vocabulary for speech-language pathologists' professional use with hearing-impaired clients. Focus on the nature and components of manual language systems.

COMD 772 - Practicum in Speech Language Pathology and Audiology (1-13 Credits)
Supervised clinical practice in screening, diagnosis, and therapy.

COMD 774 - Internship in Speech Pathology (3-13 Credits)
Supervised internship in diagnosis and treatment of children and adults with communicative disorders in clinical and public school settings in field situations.

COMD 790 - Introduction to Research in Speech Pathology and Audiology (3 Credits)
An introduction to research methods applicable to and utilized in speech pathology and audiology. An analysis of basic and applied research.

COMD 791 - Research Methodology (3 Credits)
Preparation of research designs, procedures of sampling and use of statistical measures.
COMD 799 - Thesis Preparation (1-9 Credits)

COMD 800 - Seminar in Speech Pathology (3 Credits)
An in-depth exploration of problems, theories, and research in a specific area of speech pathology. May be repeated for credit when the topic(s) covered is different. Individual topics to be announced with title.

COMD 801 - Advanced Topics in Speech Pathology (3 Credits)
A series of lectures, presentations, and discussion sessions in a selected area of speech pathology. May be repeated for credit when the topic(s) covered is different. Individual topics to be announced with title.

COMD 802 - Contemporary Issues in Speech Pathology (3 Credits)
Issues of local, state, and national impact related to the prevention or solution of problems in speech pathology.

COMD 803 - Advanced Study of Clinical Phonology (3 Credits)
Introduction to nonlinear phonological theory (e.g., autosegmental, metrical) and its application for assessment and intervention of children with phonological disorders.

COMD 805 - Advanced Study of Language Disorders in Adults (3 Credits)
Theories of language processing, language development, and the effects of neural pathology on the normal language process.

COMD 820 - Advanced Speech Science (3 Credits)
Advanced study of the physical and related psychological attributes of sound and measurement of acoustic variables of sound and speech. Review of current research in speech science.

COMD 821 - Advanced Hearing Science (3 Credits)
The normal auditory system; middle ear and cochlear physiology as determiners of auditory psychophysics.

COMD 822 - Normal Bases of Speech Production (3 Credits)
Processes underlying speech production, including neural control, respiration, phonation, and articulation; theories explaining the processes; measurements of physical properties of speech.

COMD 823 - Normal Bases of Language (3 Credits)
Advanced study of the effects of pathology on the normal language processes. Theories of language processing and development over the life span. Effects of focal and diffuse neutral pathologies on language processes.

COMD 899 - Doctoral Research and Dissertation Preparation (1-12 Credits)

Comp Sci & Comp Engr (CSCE)

CSCE 500 - Computer Programming and Applications (3 Credits)
Concepts and properties of algorithms; programming exercises with emphasis on good programming habits. Credit may not be received for both CSCE 500 and CSCE 145. Open to all majors. May not be used for major credit by computer science and engineering majors.

CSCE 510 - System Programming (3 Credits)
System software such as command language interpreters, client-server applications, debuggers, mail systems, browsers, macroprocessors, and revision control systems; file systems, processes, threads, and interprocess communication.
Prerequisites: CSCE 215, CSCE 240.

CSCE 512 - System Performance Evaluation (3 Credits)
Measuring, modeling, analyzing, and predicting performance of computer systems and networks; bottleneck analysis; Markovian queueing systems and networks; use of operational and probabilistic models.
Prerequisites: CSCE 311, STAT 509 or CSCE 515.

CSCE 513 - Computer Architecture (3 Credits)
Design methodology; processor design; computer arithmetic: algorithms for addition, multiplication, floating point arithmetic; microprogrammed control; memory organization; introduction to parallel architectures.
Prerequisites: CSCE 211, CSCE 212.

CSCE 515 - Computer Network Programming (3 Credits)
Computer networks and communication protocols; socket programming; interprocess communication; development of network software; case studies.
Prerequisites: CSCE 311.

CSCE 516 - Computer Networks (3 Credits)
Structure, design, and analysis of computer networks; ISO/OSI network architecture.
Prerequisites: STAT 509 or CSCE 515.

CSCE 517 - Computer Crime and Forensics (3 Credits)
Structure, design, and analysis of computer networks; ISO/OSI network architecture.
Prerequisites: CSCE 215.

CSCE 518 - Ethical Hacking (3 Credits)
Fundamental principles and techniques of ethical hacking, including penetration testing life cycle, planning and scoping, identifying targets and goals, active and passive reconnaissance, enumeration and scanning, exploitation, post-exploitation, and results reporting.
Prerequisites: CSCE 215 or previous Linux/UNIX experience.

CSCE 520 - Database System Design (3 Credits)
Database management systems; database design and implementation; security, integrity, and privacy.
Prerequisites: CSCE 240 or GEOG 563.

CSCE 522 - Information Security Principles (3 Credits)
Threats to information resources and appropriate countermeasures. Cryptography, identification and authentication, access control models and mechanisms, multilevel database security, steganography, Internet security, and intrusion detection and prevention.
Prerequisites: CSCE 146; MATH 374 or MATH 174.

CSCE 526 - Service Oriented Computing (3 Credits)
Cooperative information systems and service-oriented computing. Techniques for achieving coordinated behavior among a decentralized group of information system components. Distributed databases, multiagent systems, conceptual modeling, Web services, and applications.
Prerequisites: CSCE 311.

CSCE 531 - Compiler Construction (3 Credits)
Techniques for design and implementation of compilers, including lexical analysis, parsing, syntax-directed translation, and symbol table management.
Prerequisites: CSCE 240.
CSCE 546 - Mobile Application Development (3 Credits)
Development of mobile applications, including user interface design for mobile, local and cloud data storage techniques, and application architectures.
Prerequisites: CSCE 240 or previous programming experience with one of the following programming languages (C/C++, Java, Swift, Python, Matlab, Javascript).

CSCE 547 - Windows Programming (3 Credits)
Object-oriented methods and tools for application programming with graphically interactive operating systems.
Prerequisites: CSCE 240.

CSCE 548 - Building Secure Software (3 Credits)
Prerequisites: CSCE 240.

CSCE 551 - Theory of Computation (3 Credits)
Basic theoretical principles of computing as modeled by formal languages and automata; computability and computational complexity
Prerequisites: C or better in CSCE 350 or MATH 300.
Cross-listed course: MATH 562

CSCE 552 - Computer Game Development (3 Credits)
Design and development of computer games, with emphasis on the technologies used. Hands-on development of computer games.
Prerequisites: CSCE 240, CSCE 350.

CSCE 555 - Algorithms in Bioinformatics (3 Credits)
Concepts, algorithms and tools for important problems in Bioinformatics, including nucleotide and amino acid sequence alignment, DNA fragment assembly, phylogenetic reconstruction, and protein structure visualization and assessment.
Prerequisites: CSCE 350.

CSCE 557 - Introduction to Cryptography (3 Credits)
Design of secret codes for secure communication, including encryption and integrity verification: ciphers, cryptographic hashing, and public key cryptosystems such as RSA. Mathematical principles underlying encryption. Code-breaking techniques. Cryptographic protocols.
Prerequisites: C or better in CSCE 145 or MATH 241, and at least one of CSCE 355, MATH 300 or MATH 374.
Cross-listed course: MATH 587

CSCE 561 - Numerical Analysis (3 Credits)
Interpolation and approximation of functions; solution of algebraic equations; numerical differentiation and integration; numerical solutions of ordinary differential equations and boundary value problems; computer implementation of algorithms.
Prerequisites: C or better MATH 520 or in both MATH 242 and MATH 344.
Cross-listed course: MATH 527

CSCE 563 - Systems Simulation (3 Credits)
Computer simulation of real systems; principles of system organization; random number generation; programming exercises in a simulation language.
Prerequisites: CSCE 240, STAT 509 or STAT 515.

CSCE 564 - Computational Science (3 Credits)
Parallel algorithms; scientific visualization; techniques for solving scientific problems.
Prerequisites: MATH 526, CSCE 146 or CSCE 207 or CSCE 500.

CSCE 565 - Introduction to Computer Graphics (3 Credits)
Graphics hardware; graphics primitives; two-dimensional and three-dimensional viewing; basic modeling.
Prerequisites: CSCE 240, MATH 526 or MATH 544.

CSCE 567 - Visualization Tools (3 Credits)
Scientific visualization tools as applied to sampled and generated data; methods for data manipulation and representation; investigation of visualization techniques.
Prerequisites: CSCE 145 or CSCE 206 or CSCE 207.

CSCE 569 - Parallel Computing (3 Credits)
Architecture and interconnection of parallel computers; parallel programming models and applications; issues in high-performance computing; programming of parallel computers.
Prerequisites: knowledge of programming in a high-level language; MATH 526 or MATH 544.

CSCE 571 - Critical Interactives (3 Credits)
Foundational techniques in multidisciplinary software development, specifically of applications designed to present sensitive, sometimes controversial, materials in ways to engender empathic awareness of the interactor.
Cross-listed course: FAMS 581

CSCE 572 - Human-Computer Interaction (3 Credits)
Interdisciplinary approach to interaction design, user-centered design, human abilities, survey development, experimental study methodology, heuristic evaluations, usability testing, universal design, and accessibility.
Prerequisites: Undergraduate or graduate standing in CSE or permission of the instructor.

CSCE 574 - Robotics (3 Credits)
Design and application of robotic systems; emphasis on mobile robots and intelligent machines.
Prerequisites: CSCE 211, CSCE 212, CSCE 240.

CSCE 578 - Text Processing (3 Credits)
Text and natural language processing; formal models and data structures appropriate for text processing; selected topics in computational linguistics, stylistics, and content analysis.
Prerequisites: CSCE 330, CSCE 355.

CSCE 580 - Artificial Intelligence (3 Credits)
Heuristic problem solving, theorem proving, and knowledge representation, including the use of appropriate programming languages and tools.
Prerequisites: CSCE 350.

CSCE 582 - Bayesian Networks and Decision Graphs (3 Credits)
Prerequisites: CSCE 350; STAT 509 or STAT 515.
Cross-listed course: STAT 582
Prerequisites:

**CSCE 585 - Machine Learning Systems (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 587 - Big Data Analytics (3 Credits)**
Fundational techniques and tools required for data science and big data analytics. Concepts, principles, and techniques applicable to any technology and industry for establishing a baseline that can be enhanced by future study.

**Prerequisites:** CSCE 211, or CSCE 313.

**Cross-listed course:** STAT 509, STAT 513, or STAT 515.

**CSCE 590 - Topics in Information Technology (3 Credits)**
Reading and research on selected topics in information technology. Course content varies and will be announced in the schedule of courses by title. May be repeated for credit as topics vary.

**CSCE 594 - Strategic Management of Information Systems (3 Credits)**
Strategic management and use of information systems in organizations.

**Cross-listed course:** MGSC 594

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

**CSCE 617 - Computer System Performance and Reliability Analysis (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** CSCE 211, or CSCE 313.

**Cross-listed course:** STAT 509, STAT 513, or STAT 515.

**CSCE 590 - Topics in Information Technology (3 Credits)**
Reading and research on selected topics in information technology. Course content varies and will be announced in the schedule of courses by title. May be repeated for credit as topics vary.

**CSCE 594 - Strategic Management of Information Systems (3 Credits)**
Strategic management and use of information systems in organizations.

**Cross-listed course:** MGSC 594

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

**CSCE 617 - Computer System Performance and Reliability Analysis (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

**CSCE 617 - Computer System Performance and Reliability Analysis (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

**CSCE 617 - Computer System Performance and Reliability Analysis (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

**CSCE 617 - Computer System Performance and Reliability Analysis (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

**CSCE 617 - Computer System Performance and Reliability Analysis (3 Credits)**
Design and implementation of machine learning systems, Deep learning systems stack, machine learning platforms, scalable and distributed machine learning.

**Prerequisites:** C or better in CSCE 240 or CSCE 206.

**CSCE 597 - Cryptography (3 Credits)**
Cryptographic protocols for secure communication across a network.

**Prerequisites:** STAT 509 or STAT 511.

**CSCE 599 - Computer System Performance and Reliability Analysis (3 Credits)**
Evaluation of computer system performance and reliability using reliability block diagrams, fault trees, reliability graphics, queuing networks, Markov models, and Markov reward models.

**Prerequisites:** CSCE 522.

**CSCE 611 - Advanced Digital Design (3 Credits)**
Design techniques for logic systems; emphasis on higher-level CAD tools such as hardware description languages and functional modeling.

**Prerequisites:** CSCE 211.

**CSCE 612 - VLSI System Design (3 Credits)**
VLSI design process models, introduction to EDA tools, HDL modeling and simulation, logic synthesis and simulation, benchmark design projects.

**Prerequisites:** CSCE 211.

**CSCE 613 - Fundamentals of VLSI Chip Design (3 Credits)**
Design of VLSI circuits, including standard processes, circuit design, layout, and CAD tools. Lecture and guided design projects.

**Prerequisites:** ELEC 371.

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCE 743</td>
<td>Software Requirements (3 Credits)</td>
<td></td>
<td></td>
<td>Elicitation, analysis, and validation of software requirements, specification of software systems including formal specification methods; CASE tools.</td>
</tr>
<tr>
<td>CSCE 744</td>
<td>Object-Oriented Analysis and Design (3 Credits)</td>
<td></td>
<td></td>
<td>Fundamentals of object-oriented technology; object modeling of structure, function, and time-dependent behavior; system analysis and design.</td>
</tr>
<tr>
<td>CSCE 745</td>
<td>Object-Oriented Programming Methods (3 Credits)</td>
<td></td>
<td></td>
<td>Object-oriented programming paradigm, including encapsulation, inheritance, reusable classes, object classification, specialization, and message passing; case studies and applications.</td>
</tr>
<tr>
<td>CSCE 747</td>
<td>Software Testing and Quality Assurance (3 Credits)</td>
<td></td>
<td></td>
<td>Structural and functional techniques for testing software; code inspection, peer review, test verification and validation; statistical testing methods; preventing and detecting errors; testing metrics; test plans; formal methods of testing.</td>
</tr>
<tr>
<td>CSCE 750</td>
<td>Analysis of Algorithms (3 Credits)</td>
<td></td>
<td></td>
<td>Algorithm design techniques; algorithms and data structures for sets and graphs; time and space complexity; sorting and searching; NP-complete problems.</td>
</tr>
<tr>
<td>CSCE 755</td>
<td>Computability, Automata, and Formal Languages (3 Credits)</td>
<td></td>
<td></td>
<td>Formal models of computation, including finite state automata, Turing machines, recursive functions, formal grammars, and abstract complexity theory.</td>
</tr>
<tr>
<td>CSCE 758</td>
<td>Probabilistic System Analysis (3 Credits)</td>
<td></td>
<td></td>
<td>Application of probability theory and stochastic processes to analyze the dynamic behavior of engineering systems.</td>
</tr>
<tr>
<td>CSCE 760</td>
<td>Numerical Analysis I (3 Credits)</td>
<td></td>
<td></td>
<td>Numerical solution of equations and systems of linear equations, polynomial approximation, difference calculus, solution of ordinary and partial differential equations, least squares and sets of orthogonal polynomials, Gaussian quadrature.</td>
</tr>
<tr>
<td>CSCE 761</td>
<td>Numerical Analysis II (3 Credits)</td>
<td></td>
<td></td>
<td>Continuation of CSCE 760.</td>
</tr>
<tr>
<td>CSCE 763</td>
<td>Digital Image Processing (3 Credits)</td>
<td></td>
<td></td>
<td>Concepts and techniques for digital image processing; emphasis on low-level processes that analyze discrete images at the pixel level.</td>
</tr>
<tr>
<td>CSCE 765</td>
<td>Computer Graphics System Design (3 Credits)</td>
<td></td>
<td></td>
<td>Graphics data structures, graphics languages, modeling, raster displays, 3-D shading, hidden surface algorithms.</td>
</tr>
<tr>
<td>CSCE 766</td>
<td>Scientific Visualization (3 Credits)</td>
<td></td>
<td></td>
<td>Visualization techniques for scientific computing; interactive steering of calculations; animation and rendering techniques for multivariate data analysis.</td>
</tr>
<tr>
<td>CSCE 767</td>
<td>Interactive Computer Systems (3 Credits)</td>
<td></td>
<td></td>
<td>Principles for the design of systems supporting effective human-computer interaction; interaction styles; displays and interactive devices; user assistance; system design and evaluation.</td>
</tr>
<tr>
<td>CSCE 768</td>
<td>Pattern Recognition and Classification (3 Credits)</td>
<td></td>
<td></td>
<td>Bayesian classifiers; optimal risk schemes; error rates; numerical methods; implementation; architectures.</td>
</tr>
<tr>
<td>CSCE 769</td>
<td>Computational Structural Biology (3 Credits)</td>
<td></td>
<td></td>
<td>Theoretical concepts and algorithmic tools currently utilized in the field of protein folding such as Xplo-NIH and ROSETTA are presented. Participants are enabled to embark in research of protein folding.</td>
</tr>
<tr>
<td>CSCE 771</td>
<td>Computer Processing of Natural Language (3 Credits)</td>
<td></td>
<td></td>
<td>Computational models for the analysis and synthesis of natural language; representations for syntax and semantics; applications to text-to-speech conversion, speech recognition, and language understanding.</td>
</tr>
<tr>
<td>CSCE 772</td>
<td>Computer Speech Processing (3 Credits)</td>
<td></td>
<td></td>
<td>A/D conversion, digital filters, discrete Fourier transform and FFT, acoustics of speech, and synthesis and recognition of speech.</td>
</tr>
<tr>
<td>CSCE 774</td>
<td>Robotics Systems (3 Credits)</td>
<td></td>
<td></td>
<td>Design and operation of robot systems; dynamics, control, and motion trajectories of manipulators; visual, auditory, and tactile sensing systems; planning and learning.</td>
</tr>
<tr>
<td>CSCE 780</td>
<td>Knowledge Representation (3 Credits)</td>
<td></td>
<td></td>
<td>Representation techniques and languages for symbolic knowledge, including predicate calculus, frame-based systems, and terminological systems; computer reasoning using these systems.</td>
</tr>
<tr>
<td>CSCE 781</td>
<td>Knowledge Systems (3 Credits)</td>
<td></td>
<td></td>
<td>Expert system domains, knowledge representation techniques, inference engines, and knowledge acquisition methods.</td>
</tr>
<tr>
<td>CSCE 782</td>
<td>Multiagent Systems (3 Credits)</td>
<td></td>
<td></td>
<td>Coordinated problem solving by multiple knowledge systems.</td>
</tr>
<tr>
<td>CSCE 784</td>
<td>Neural Information Processing (3 Credits)</td>
<td></td>
<td></td>
<td>Mathematical foundations of biological and artificial neural networks, supervised and unsupervised systems, applications.</td>
</tr>
<tr>
<td>CSCE 787</td>
<td>Introduction to Fuzzy Logic (3 Credits)</td>
<td></td>
<td></td>
<td>Principles of fuzzy set theory, fuzzy relations, and fuzzy logic; fuzzy &quot;if-then&quot; rules.</td>
</tr>
</tbody>
</table>
CSCE 790 - Topics in Information Technology (1-3 Credits)
Reading and research on selected topics in information technology. Course content varies and will be announced in the schedule of courses by title. May be repeated for credit as topics vary.

CSCE 791 - Seminar in Advances in Computing (1 Credit)
Technical writing and presentations in major computing research areas; ethics in research and writing.

CSCE 793 - Internship in Software Engineering (1 Credit)

CSCE 797 - Individual Study and Research (1-12 Credits)
Individual research to be arranged with the instructor.

CSCE 798 - Directed Study and Research (1-12 Credits)
Individual research to be arranged with the instructor.

CSCE 799 - Thesis Preparation (1-12 Credits)

CSCE 813 - Internet Security (3 Credits)
Study security threats and prevention/detection/response techniques on the Internet, including hackers, masqueraders, information spoofing, sniffing, and distribution of damaging software. Security analysis of Web applications.
Prerequisites: CSCE 522 and CSCE 715.

CSCE 814 - Distributed Systems Security (3 Credits)
Security mechanisms of distributed software systems, including cryptographic applications. Secure multiparty computation, group-based cryptography, and security mechanisms for emerging distributed architectures.
Prerequisites: CSCE 522.

CSCE 815 - Computer Communications (3 Credits)
Contemporary computer communication protocols and network architectures.
Prerequisites: CSCE 515 or CSCE 516.

CSCE 818 - Top-Down VLSI Design (3 Credits)
VLSI system design automation, hardware description language-based design, multi-methodology design, and introduction to HDL support tools.
Prerequisites: CSCE 611 or CSCE 612.

CSCE 819 - Custom VLSI Design (3 Credits)
Custom design methodology design rules, stick notation, logic synthesis, and circuit layout; symbolic layout languages; introduction to CAD tools.
Prerequisites: CSCE 611 or CSCE 612.

CSCE 821 - Distributed Database Design (3 Credits)
Architecture, design, and implementation of distributed database management systems; data fragmentation, replication, and allocation; query processing and transaction management; distributed object database management systems.
Prerequisites: CSCE 520.

CSCE 822 - Data Mining and Warehousing (3 Credits)
Information processing techniques and mathematical tools to assemble, access, and analyze data for decision support and knowledge discovery.
Prerequisites: CSCE 520.

CSCE 824 - Secure Database Systems (3 Credits)
Prerequisites: CSCE 522.

CSCE 826 - Cooperative Information Systems (3 Credits)
Strategies for achieving coordinated behavior among a heterogeneous group of information system components; world-wide information networks and applications in health care, logistics, telecommunications, and manufacturing automation.
Prerequisites: CSCE 520, CSCE 580.

CSCE 846 - Software Reliability and Safety (3 Credits)
Reliability and safety of computer-intensive systems; software reliability models and analysis; operational profiles; hazard analysis using fault trees and event trees; formal verification of safety-critical systems.
Prerequisites: STAT 509 or STAT 510 or STAT 511.

CSCE 850 - Advanced Analysis of Algorithms (3 Credits)
Definitions of algorithms and formal models of computation; concepts of space and time; synthesis and analysis of algorithms for sorting, search graphs, set manipulation and pattern matching; NP-complete, and intractable problem.
Prerequisites: CSCE 750.

CSCE 853 - Formal Methods in Computer Security (3 Credits)
Formal techniques applied to computer security, including formal specification language for security properties, security analysis utilities, domain-specific security concerns, and case studies of formally verified secure systems.
Prerequisites: CSCE 522 and CSCE 715.

CSCE 865 - Advanced Computer Graphics (3 Credits)
Input and display devices, data structures, architectures, primitives, and geometrical transformations appropriate to computer graphics, parametric surfaces.
Prerequisites: CSCE 765.

CSCE 867 - Computer Vision (3 Credits)
Scene segmentation using texture, color, motion; representation of 2-D or 3-D structures; knowledge-based vision systems.
Prerequisites: CSCE 763.

CSCE 868 - Advanced Pattern Recognition (3 Credits)
Feature nomination, selection, extraction, and evaluation; deterministic, stochastic, and fuzzy models for classifier design; parameter estimation; error rate estimation; clustering and sequential learning.
Prerequisites: CSCE 768.

CSCE 883 - Machine Learning (3 Credits)
Fundamentals of machine learning including rote learning, learning from examples, learning from observations, and learning by analogy; knowledge acquisition for expert systems.
Prerequisites: CSCE 580.

CSCE 895 - Ph.D. Seminar (1-3 Credits)

CSCE 899 - Dissertation Preparation (1-12 Credits)

Comparative Literature (CPLT)

CPLT 597 - Special Topics in Comparative Studies in Film and Media (3 Credits)
Topics in film and media from an international perspective. National cinematic traditions are compared and contrasted. May be repeated as content varies by title. 03/07/2019.
Graduation with Leadership Distinction: GLD: Global Learning
CPLT 700 - Introduction to Graduate Studies in Languages, Literatures, and Cultures (3 Credits)
An introduction to graduate studies that includes a survey of contemporary literary theory, an overview of the current state of the profession, and instruction in how to carry out research and write at the graduate level.
Cross-listed course: FREN 700, GERM 700, SPAN 700

CPLT 701 - Classics of Western Literary Theory (3 Credits)
Problems of literary theory in texts from the ancients to the 17th century, with an emphasis on the classical tradition.
Cross-listed course: ENGL 733

CPLT 702 - Modern Literary Theory (3 Credits)
Problems of literary theory from the 18th century to the 1960s.
Cross-listed course: ENGL 734

CPLT 703 - Topics in Contemporary Literary Theory (3 Credits)
Present an in-depth study of selected schools or trends in contemporary literary theory.

CPLT 720 - The Periods of Literature (3 Credits)
The study of one cultural period as an international movement. Topics will vary.

CPLT 730 - The Literary Genre (3 Credits)
Study of a genre from its inception to the present and its manifestations in the several literatures. Topics will vary.

CPLT 740 - Themes in Literature (3 Credits)
The study of recurrence and mutation in literary themes. Topics will vary.

CPLT 750 - Cross-Cultural Literary Relations (3 Credits)
Topics will vary and will be announced (e.g., Anglo-French literary relations, 1740-1900; 20th-century German-American literary relations).

CPLT 760 - Literature and Translation: Theory and Practice (3 Credits)
A survey of recent translation theory as it relates to literature, combined with translation analysis and actual translation of literary texts.

CPLT 765 - Advanced Film Study (3 Credits)
Methods of film analysis, resources for research, and the major critical theories.
Cross-listed course: ENGL 765

CPLT 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the MA or PhD degree.

CPLT 799 - Thesis Preparation (1-9 Credits)
Open to Ph.D. candidates who have passed their comprehensive examinations.

CPLT 880 - Seminar in Comparative Literature (3 Credits)

CPLT 881 - Seminar in Comparative Literature (3 Credits)

CPLT 882 - Seminar in Comparative Literature (3 Credits)

CPLT 883 - Seminar in Comparative Literature (3 Credits)

CPLT 895 - Research (3 Credits)

CPLT 896 - Research (3 Credits)

CPLT 899 - Dissertation Preparation (1-12 Credits)

COSM - Prof Master of Sci Prog (COSM)

COSM 701 - Business and Legal Issues for Science Managers (3 Credits)
Survey of skills requisite for careers in domestic or international business: economics, finance, accounting, management, marketing, presentation skills, patent law, regulatory issues, other subjects for managers of science/technology-based businesses.

COSM 702 - Scientific and Technological Problems in Business and Industry (3 Credits)
Seminar course in problem solving, responding to cases with significant technical components, drawn from business/industry. Students analyze cases to propose solutions to problems, integrating the major activities of a technically oriented business.

COSM 790 - Internship in Science and Technology Based Business (3 Credits)
Internship in industry, government agency, or national laboratory. Internship experience culminates in oral and written reports on duties and projects. Internship must include a minimum of 150 hours of experience at the internship site.

Counseling Education (EDCE)

EDCE 502 - Guidance Techniques for Classroom Teachers (3 Credits)

EDCE 503 - Family Counseling (3 Credits)
A comparative study of the major theories in the field of family counseling.

EDCE 507 - Educators in Industry (3 Credits)
The course is designed to provide counselors, teachers, and administrators with increased awareness of a wide variety of work experiences.

EDCE 510 - Introduction to Counseling (3 Credits)
Orientation to the profession of counseling including its historical, social, and cultural foundations. Declaration of the minor in counseling or admission to the Ed.S. in Counselor Education.

EDCE 520 - Wellness and Mental Health (3 Credits)
An overview of the characteristics of optimal holistic wellness and human functioning. Practical application of theoretically and empirically supported wellness models and interventions to enhance social, emotional, mental, physical, and spiritual well-being.

EDCE 555 - Theory and Practice of College Mentoring (3 Credits)
Emphasis on current professional approaches to college mentoring and development of leadership and mentoring skills. Students must participate in Minority Assistance Program. Upper division undergraduate standing or admission to a graduate program and consent of instructors.

EDCE 570 - Seminar in Counseling (3 Credits)
Declaration of the minor in counseling.

EDCE 600 - Communication Skills in Counseling (3 Credits)
Human relations principles applied to the counseling interview.

EDCE 650 - Counseling Student Athletes (3 Credits)
Issues facing student athletes regarding their personal and career development beyond athletics.
Cross-listed course: PEDU 660

EDCE 690 - Independent Study (1-3 Credits)
EDCE 700 - Cross-Cultural Counseling (3 Credits)
Basic concepts and procedures related to cross-cultural counseling; relevant issues which constitute the core of counseling effectively from a cross-cultural perspective; the development of specific learning strategies through which counselor trainees acquire fundamental skills of cross-cultural counseling. This course number and title will be offered with a specific perspective each time, such as blacks, women, ethnic groups, etc.

EDCE 701 - Counseling Parents of Exceptional Children (3 Credits)
Principles and techniques of counseling parents of exceptional children.

EDCE 702 - Counselor as Consultant (3 Credits)
History, theories, and practices of consultation and counseling program coordination.
Prerequisites: EDCE 510.

EDCE 704 - Theory and Procedures of Group Counseling (3 Credits)
A comparative study of major theories of group counseling and related research with emphasis on group interaction within a counseling setting. Laboratory applications expedite understanding of theory and practice.
Prerequisites: EDCE 721, EDCE 722.

EDCE 705 - Educational Measurement (3 Credits)
The history of educational and psychological measurement. Consideration of concepts such as validity and reliability of educational and psychological measures, the rationale of the development and use of instruments for educational purposes.

EDCE 706 - Assessment in Counseling (3 Credits)
Knowledge and application of assessment techniques and instruments utilized in school, career, individual, and family counseling.

EDCE 707 - Career Development (3 Credits)
Career development principles and practices in school and other settings.

EDCE 708 - Critical Issues in School Counseling (3 Credits)
Study of school counseling programs, including school counseling issues; program development, implementation, and evaluation; and current trends.

EDCE 709 - Counseling Through Play (3 Credits)
Interpreting play and using play techniques to facilitate the counseling process.
Prerequisites: EDCE 510, EDCE 600.

EDCE 710 - Professional, Legal and Ethical Issues in Counseling (3 Credits)
Ethical concerns and legal mandates and constraints related to the counseling profession including issues regarding education, supervision, research, and policy development.
Prerequisites: EDCE 510.

EDCE 711 - Advanced Family Counseling (3 Credits)
Advanced study of children within the context of family counseling theories.
Prerequisites: EDCE 503 or equivalent.

EDCE 712 - Comprehensive Developmental School Counseling (3 Credits)
Study of the elements of and practices in a comprehensive developmental school counseling program.
Prerequisites: EDCE 510.

EDCE 714 - Clinical Mental Health Counseling (3 Credits)
Surveying required knowledge and skills for the clinical mental counselor.

EDCE 715 - Sexuality Counseling (3 Credits)
An overview of a family systems approach to understanding and treating clinical issues related to human sexuality.
Prerequisites: EDCE 503, EDPY 705.

EDCE 716 - Leaders in Counselor Education (3 Credits)
Survey and analysis of the works of prominent leaders in counselor education (i.e., behavioral, cognitive, existential approaches). Course content varies and will be announced in the schedule of classes by title.

EDCE 717 - Career Practicum (3 Credits)
A supervised experience in an approved setting that develops and assesses the individual's facilitation skills in career development.
Prerequisites: EDCE 502, EDCE 600, EDCE 700, EDCE 706, and EDCE 707.

EDCE 720 - Theories of Counseling (3 Credits)
An introduction to counseling theories and models.
Prerequisites: EDCE 600.

EDCE 721 - Techniques of Counseling (3 Credits)
Emphasis on development of techniques for assisting clients' personal, social, spiritual, and career development.
Prerequisites: EDCE 510, EDCE 700, EDCE 712, and EDCE 720.

EDCE 722 - Group Procedures in Counseling (3 Credits)
Group process and dynamics applied to counseling in group settings.
Prerequisites: EDCE 510 and EDCE 720.

EDCE 723 - Counseling Supervision Theory (3 Credits)
Comparative study of major approaches to counseling supervision and related research with emphasis on historical foundations of supervision, supervisee characteristics, and application of concepts and techniques to specific practice settings.

EDCE 724 - Techniques of Clinical Mental Health Counseling (3 Credits)
Assisting clients with personal, social, spiritual and career development.
Prerequisites: EDCE 600 and EDCE 720.

EDCE 730 - Counseling and Spirituality (3 Credits)
Current knowledge about counseling and spirituality, including theories of spiritual development, assessment of spirituality, and best practices interventions with children and families.

EDCE 799 - Thesis Preparation (1-9 Credits)

EDCE 800 - Special Topics in Counseling (1-3 Credits)
Advanced study of children within the context of family counseling theories.
Prerequisites: EDCE 503 or equivalent.

EDCE 801 - Advanced Techniques in School Counseling (3 Credits)
This course is designed to help students understand the connection between theory and practice and give them an opportunity to try out this new knowledge. This additional work in both theory and practice will help students to be better prepared for their practicum and internship experiences.
Prerequisites: EDCE 721.

EDCE 802 - Practicum in Human Development and Counseling (3 Credits)
Supervised counseling experience in an approved institution or agency.

EDCE 802E - Elementary School Counseling Practicum (3 Credits)
Supervised counseling experience in an approved elementary school setting. Approved elementary school counseling practicum application.
**EDCE 802F - Marriage, Couples, and Family Counseling Practicum (3-6 Credits)**
Supervised counseling experience in an approved institution or agency. Full admission into a counselor program and program specifics as approved by faculty.

**EDCE 802P - Practicum in Play Therapy (3 Credits)**
Supervised counseling experience in an approved setting focusing on play therapy, counseling through play and expressive arts therapy.
**Prerequisites:** EDCE 709; EDCE 809; EDPY 705; EDCE 810; EDCE 811.

**EDCE 802S - Secondary School Counseling Practicum (3 Credits)**
Supervised counseling experience in an approved secondary school setting. Approved secondary school counseling practicum application.

**EDCE 803 - Practicum in Clinical Mental Health Counseling (3 Credits)**
Supervised counseling experience in an approved mental health agency or practice. Full admission into the counselor education program and program specific courses as approved by program faculty.

**EDCE 804 - Internship in Clinical Mental Health Counseling (3-6 Credits)**
Supervised counseling experience in an approved clinical mental health setting.
**Prerequisites:** EDCE 803.

**EDCE 805 - Counseling Internship (3-6 Credits)**
Counseling experience will be gained in a work setting similar to that in which a counselor will eventually be employed. Internship application must be submitted early in the semester preceding enrollment.
**Prerequisites:** EDCE 802.

**EDCE 805E - Elementary School Counseling Internship (3-6 Credits)**
Counseling experience in an elementary school setting.
**Prerequisites:** EDCE 802S and approved internship application.

**EDCE 805F - Marriage, Couples and Family Counseling Internship (3-6 Credits)**
Counseling experience will be gained in a work setting similar to that in which a counselor will eventually be employed.
**Prerequisites:** EDCE 802F and approved internship application.

**EDCE 805S - Secondary School Counseling Internship (3-6 Credits)**
Supervised counseling experience in an approved secondary school setting.
**Prerequisites:** EDCE 802E.

**EDCE 807 - Advanced Career Development (1-3 Credits)**
Theories of career development and career decision making. Critique of career development programs in institutions and agencies. Students may repeat the course for up to a total of 3 credit hours.
**Prerequisites:** EDCE 707.

**EDCE 809 - Advanced Counseling Through Play (3 Credits)**
Development of advanced theoretical and skill-based competencies in the practices of play therapy.
**Prerequisites:** EDCE 709, EDCE 802.

**EDCE 810 - Theory and Practice of Play Therapy (3 Credits)**
Basic concepts and practices related to the history of play therapy, developmental issues and ethical considerations in working theory to the practices of play therapy.
**Prerequisites:** EDCE 510, EDCE 600.
EDCE 899 - Dissertation Preparation (1-12 Credits)

Criminal Justice (CRJU)

CRJU 510 - Critical Incident Management for Criminal Justice (3 Credits)
Leadership and management strategies for criminal justice agencies during critical incidents and disasters including multi-agency and multi-jurisdictional response.

CRJU 512 - Information-Based Management in Criminal Justice (3 Credits)
The collection and use of information and data-driven analysis in criminal justice organizations.

CRJU 535 - Inmates and Prisons (3 Credits)
Examination of issues affecting prisons and the inmates confined within them. Specific topics of study will include the philosophy and goals of imprisonment, institutional crowding, inmate rights, inmate adaptation, and individual and collective misconduct.

CRJU 554 - Women and Crime (3 Credits)
Impact of gender-based relations on crime and the criminal justice system.

Cross-listed course: WGST 554

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

CRJU 558 - Crime Over the Life Course (3 Credits)
Development of criminal and delinquent behavior over time.

CRJU 563 - Race, Crime, and Criminal Justice (3 Credits)
An historical overview of the intersection between issues of race, crime, and justice. The impact of the criminal justice system on minority groups.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 565 - Organized Crime (3 Credits)
Origins and modern day activity of organized crime in the United States and internationally will be investigated. Attention is given to problems of criminal activity and the present day transnational character of criminal organizations.

CRJU 575 - The Death Penalty (3 Credits)
Overview of the history and evolution of the death penalty. Identification of key legal developments in death penalty jurisprudence.

CRJU 577 - Law and Criminal Justice Policy (3 Credits)
Legal and policy responses to crime and criminal justice issues.
Prerequisites: CRJU 313 or CRJU 314.

CRJU 582 - Computer Applications in Criminal Justice (3 Credits)
Computing, database systems, and software applications in research and professional practice.

CRJU 591 - Selected Topics in Criminal Justice (3 Credits)
A seminar for advanced students. Individual topics to be announced by title. May be repeated once with the consent of the advisor.

CRJU 701 - Survey of Criminal Justice (3 Credits)
Classical and recent literature in criminal justice. Trends and issues that transcend criminal justice.

CRJU 702 - Law and Justice (3 Credits)
Examination of law as an instrument of criminal justice policy, social control, and the protection of civil liberties.

CRJU 703 - Research Methods in Criminal Justice (3 Credits)
Scientific methods in criminal justice research to include methods of design, data collection, and interpretation of research findings.

CRJU 704 - Organization and Management in Criminal Justice (3 Credits)
Management strategies and selected analytic tools for the administration of criminal justice agencies. 03: 07/05/2019.

CRJU 705 - Quantitative Methods in Criminal Justice (3 Credits)
Descriptive and inferential statistics and the use of computers in criminal justice.

CRJU 706 - Advanced Quantitative Analysis for Criminology and Criminal Justice (3 Credits)
A detailed treatment of the general linear model, logistic regression analysis, and statistical models for event count data with applications in criminology and criminal justice. Restricted to criminology and criminal justice majors.

CRJU 711 - Police Practices and Problems (3 Credits)
Historical and contemporary role of the police, societal expectations, resource allocation, police policies, and the effectiveness of various police strategies in controlling crime.

CRJU 712 - Police Administration and Management (3 Credits)
Principles of leadership and management applied to law enforcement.

CRJU 714 - Ethics in Criminal Justice (3 Credits)
Classic and contemporary theories of ethics and their applications to criminal justice decision-making.

Cross-listed course: PHIL 715

CRJU 731 - Corrections (3 Credits)
Historical development of corrections, trends, and changes in the field of corrections and rehabilitation.

CRJU 732 - Correctional Policy (3 Credits)
Policy development, implementation, and evaluation in corrections.

CRJU 741 - Criminology (3 Credits)
The major theories of the etiology of criminal behavior, including biological, environmental, and other causative factors.

CRJU 751 - Juvenile Justice (3 Credits)
Historical evolution of the juvenile justice system. 03: 07/05/2019.

CRJU 752 - Prevention and Treatment of Delinquency (3 Credits)
Theories and methodologies for the organization of delinquency prevention and control programs. Emphasis on the role of the program evaluation.

CRJU 791 - Selected Topics in Criminal Justice (3 Credits)
Seminar for advanced students. Topics of current importance, such as drugs, judicial reform, or crime prevention. May be repeated for credit up to 6 semester hours with consent of advisor.

CRJU 792 - Directed Study in Criminal Justice (3 Credits)
Independent study for advanced students, under faculty supervision. May be repeated for credit up to 6 semester hours.

CRJU 794 - Internship in Criminal Justice (3 Credits)
Placement in a criminal justice agency under faculty supervision.

CRJU 799 - Thesis Research: Thesis Preparation (1-9 Credits)

CRJU 810 - Crime, Law, and Public Policy (3 Credits)
The study of the legal and policy-making processes as they apply to criminology and criminal justice. Examines the interrelationships between law, crime, and public policy and the research methodologies appropriate for the study of crime-related policies.
CRJU 814 - Research Design in Criminology and Criminal Justice (3 Credits)
Intensive coverage of the logic and practice of research design and measurement issues commonly encountered in criminology and criminal justice research. Emphasizes the use of experimental research designs as the preferred methodology for making causal inferences.

CRJU 816 - Applied Quantitative Data Analysis (3 Credits)
Review of applied quantitative methodological literature in criminology and criminal justice. Topics include analysis of data from randomized field experiments, interrupted time-series studies, regression discontinuity studies, instrumental variable estimation, treatment probability matching estimators, statistical power analysis, and study planning.

CRJU 817 - Qualitative Research Methods and Data Analysis (3 Credits)
Examination of the qualitative research paradigm and its contribution to social inquiry, including the collection, organization, and analysis of qualitative date. Collection and analytic strategies involve interviewing, observation, and textual analysis.

CRJU 821 - Advanced Criminological Theory (3 Credits)
Advanced coverage of theoretical and developments and empirical research in criminology, with a focus on definitive statements from important theoretical traditions, empirical tests of criminological theories, and the translation of theory into policy.

CRJU 899 - Dissertation Preparation (1-12 Credits)
Dissertation Preparation.

Curriculum Studies (EDCS)

EDCS 625 - Solving Practical Problems in School Curriculum (3 Credits)
An introduction to current and promising designs and approaches to curriculum development from grades K-12.

EDCS 690 - Independent Study (1-3 Credits)

EDCS 710 - Diversity Training for Staff Development (3 Credits)
Review of the history, concepts, current techniques, skills, and issues in diversity training as it applies to effective staff development.

EDCS 720 - Introduction to Diversity and the Curriculum (3 Credits)
An introduction to the vast array of differences among children, youth, and adults and the impact of these differences on the curriculum, their learning, and their social and emotional development.

EDCS 721 - Social Class Diversity and the Curriculum (3 Credits)
The interplay of social class diversity, curriculum development, and success in formal schooling. Promising programs and practices for educating children of poverty are critically examined.

EDCS 722 - Racial and Ethnic Diversity and the Curriculum (3 Credits)
A critical examination of theories of race and ethnicity and their impact on the curriculum. The dynamics of dominance, issues of social justice, and means of social action are explored.

EDCS 723 - Understanding Sexual Diversity in Schools and Other Social Institutions (3 Credits)
An examination of issues and concepts relating to sexual diversity as it applies to formal and nonformal educational settings with particular emphasis on curriculum, educational policy, and school practice.

EDCS 724 - Gender Diversity in Schools and Communities (3 Credits)
A study of gender, culture, and power; research and theory from educational psychology, sociology, history, and current feminist scholarship.

EDCS 725 - Principles of Curriculum Construction (3 Credits)
Presentation of methods and procedures to design, develop, implement, and evaluate curricula.

EDCS 726 - Curriculum Leadership (3 Credits)
Study of theory, research, and practice of curriculum leadership as a transformative enterprise with particular focus on embracing diversity and fostering social justice in schools and other social institutions.

Prerequisites: EDCS 725.

EDCS 727 - Curriculum Issues in Practice (3 Credits)
Each student identifies and studies a contemporary curriculum issue pertaining to diversity. Under faculty supervision, observations and interviews in schools and/or community agencies will take place throughout the semester.

Prerequisites: EDCS 725 or equivalent.

EDCS 728 - Curriculum in Higher Education (3 Credits)
A survey of the design and development of post-secondary curriculum.

EDCS 729 - Organizational Change in Education (3 Credits)
Investigation of the process of diffusion and adoption of innovations and change in schools and communities, with a particular emphasis on the inclusion of and impact on diverse populations.

EDCS 799 - Thesis Preparation (1-9 Credits)

EDCS 812 - Principles of Action Research (3 Credits)
Introductory analysis, interpretation, and systematic study, using action research methodology, of a significant question or issue related to teaching or administration in K12 schools, higher education, and/or other social institutions.

EDCS 813 - Advanced Principles of Action Research (3 Credits)
Advanced analysis, interpretation, and systematic study, using action research methodology, of a significant question or issue related to teaching, administration in K12 schools, higher education, and/or other social institutions.

EDCS 820 - Advanced Study of Diversity and Curriculum (3 Credits)
The formulation and use of interpretive frameworks to study and understand the relationships among human diversity, school structures, and the curriculum.

EDCS 821 - Curriculum Theory (3 Credits)
An advanced curriculum course designed to allow students to investigate and analyze curriculum studies discourse and its application to issues of diversity.

EDCS 822 - Curriculum Classics: Trends and Issues (3 Credits)
The systematic presentation of classic curriculum works as they relate to current theoretical issues in education.

EDCS 823 - Curriculum Inquiry (3 Credits)
Examination of empirical, critical, and phenomenological methods and issues in conducting curriculum research.

EDCS 824 - Curriculum Seminar (3 Credits)
Intensive study of a designated topic influencing curriculum theory and/or practice.

EDCS 890 - Independent Study (3 Credits)

EDCS 899 - Dissertation Preparation (1-12 Credits)
Dance (DANC)

DANC 500 - Selected Topics in Dance (1 Credit)
A series of courses, each lasting one-third of a semester. Topics and required courses are announced in the class schedule for each semester.

DANC 573 - Dancer's Workshop (1 Credit)
Individual advanced training in movement, improvisation, flexibility, and precision in dance styles including modern and ballet.
Prerequisites: graduate standing or three credits in dance.

DANC 577 - Dance Performance (3 Credits)
Rehearsal, choreographic analysis, and dance performance. All components of dance production—including music, costume, lighting, and scenery—will be considered.
Cross-listed course: PEDU 577

DANC 586 - The Articulate Body (3 Credits)
Theoretical and experimental exploration of the major body systems and development movements to bring more articulation to the body and more awareness and physical ease in performance.
Cross-listed course: THEA 586

DANC 599 - Special Topics in Dance (3 Credits)
Reading and research on selected topics. Course content varies and will be announced in the schedule of classes by title. May be repeated once as topics vary.

DMSB - Darla Moore Sch of Busn (DMSB)

DMSB 700A - Language Training in International Business I (3 Credits)
Language: Arabic. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700C - Language Training in International Business I (3 Credits)
Language: Chinese. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700E - Language Training in International Business I (3 Credits)
Language: English. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700F - Language Training in International Business I (3 Credits)
Language: French. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700G - Language Training in International Business I (3 Credits)
Language: German. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700I - Language Training in International Business I (3 Credits)
Language: Italian. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700J - Language Training in International Business I (3 Credits)
Language: Japanese. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700K - Language Training in International Business I (3 Credits)
Language: Korean. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700P - Language Training in International Business I (3 Credits)
Language: Portuguese. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700R - Language Training in International Business I (3 Credits)
Language: Russian. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 700S - Language Training in International Business I (3 Credits)
Language: Spanish. Language and culture instruction to enable graduates to function in business in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

DMSB 701 - Introduction to the European Union (1 Credit)

DMSB 703A - Language Training in International Business II (3 Credits)
Language: Arabic. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703C - Language Training in International Business II (3 Credits)
Language: Chinese. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703F - Language Training in International Business II (3 Credits)
Language: French. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703G - Language Training in International Business II (3 Credits)
Language: German. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.
DMSB 703I - Language Training in International Business II (3 Credits)
Language: Italian. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703J - Language Training in International Business II (3 Credits)
Language: Japanese. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703K - Language Training in International Business II (3 Credits)
Language: Korean. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703P - Language Training in International Business II (3 Credits)
Language: Portuguese. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703R - Language Training in International Business II (3 Credits)
Language: Russian. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 703S - Language Training in International Business II (3 Credits)
Language: Spanish. A continuation of DMSB 700 for practice in written and oral communication as may be required for students enrolled in the International Master of Business Studies program. Open to M.I.B.S. majors only. Not for major credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705A - Language Training in International Business III (6 Credits)
Language: Arabic. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705C - Language Training in International Business III (6 Credits)
Language: Chinese. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705G - Language Training in International Business III (6 Credits)
Language: German. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705J - Language Training in International Business III (6 Credits)
Language: Japanese. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705K - Language Training in International Business III (6 Credits)
Language: Korean. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705R - Language Training in International Business III (6 Credits)
Language: Russian. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 705S - Language Training in International Business III (6 Credits)
Language: Spanish. Intensive study of the linguistic and cultural aspects of business to prepare the student for an internship. Not for credit in a graduate program in the foreign language department. 03: 07/05/2019.

DMSB 706A - Globalization, Culture and the Business Environment (3 Credits)
Provides a theoretical framework for understanding, and a physical context for, experiencing the historical, sociological, political, economic and cultural aspects of each IMBA residency region and its population within the context of globalization.
Corequisite: DMSB 706B.

DMSB 706B - Internship in International Business (6 Credits)
Completion of internship acquisition, research, and specific related items.
Corequisite: DMSB 706A.

DMSB 707 - Strategy and Policy in the Global Business Enterprise (3 Credits)
Overall strategic management of the globally oriented firm, with strong emphasis on industry analysis and strategy formulation in a global environment.
Prerequisites: DMSB 702.

DMSB 708 - Global Business Issues I (6 Credits)
Issues of doing business in various geographic areas; political, economic, and business factors affecting a region's business climate.

<td></td>
<td>Cross-listed course: IBUS 707</td>
</tr>
</tbody>
</table>
DMSB 750 - Capstone Experience (3 Credits)
Capstone experience course for the IMBA and AMBA programs will develop integration and application of prior functional coursework (e.g., marketing finance operations etc.) to address simulated but realistic strategic business issues. Working within cross functional teams, students will also further refine critical leadership and interpersonal skills.

DMSB 798 - Field Consulting Program (6 Credits)
Management decision making in the corporate environment. Projects assigned on a group basis with emphasis on teamwork, oral and written communication skills in business operations, planning, problem solving, and research.

**Early Childhood Educ (EDEC)**

EDEC 510 - Parent/Family Dynamics in Early Childhood Education (3 Credits)
Principles, practices, and content of family dynamics, including practice/service learning.
**Graduation with Leadership Distinction:** GLD: Community Services

EDEC 540 - The Young Child: Behavior and Development in Early Childhood (3 Credits)
Service-learning and seminar experiences addressing intellectual, physical, social, and emotional development, prenatally through grade three, within an ecological context. Child's critical thinking, creative expression, and diagnosis/assessment emphasized.

EDEC 546 - Education of Young Children: An Ecological Approach (3 Credits)
An ecological study with emphasis on home-school relations, parent involvement, and community resources. Multicultural perspectives and needs of exceptional children addressed.
**Corequisite:** EDEC 469.

EDEC 547 - Field Problems: Teaching Mathematics Using Manipulative Materials, Grades K-3 (3 Credits)
Instructional approaches and materials for teaching elementary school mathematics, grades K-3.

EDEC 570 - Internship in Environments for Teaching and Learning (3 Credits)
Internship for practice in classrooms appropriate to early childhood education related to curriculum design and assessment. Admission to the professional program in early childhood education.
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships

EDEC 591 - Seminar on Teaching in Early Childhood (3 Credits)
Exploration of the principles and theories about teaching and learning as they apply to early childhood education in the context of schools in democratic societies.
**Prerequisites:** admission to internship in early childhood education.
**Corequisite:** EDTE 590A, EDTE 590B, and EDTE 590C.
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships, GLD: Research

EDEC 608 - Parent Involvement in Early Childhood Education (3 Credits)
Analysis of programs and practices for involving parents in early childhood educational settings. Emphasizes objectives, methods, techniques, and materials for program development. Community resources for supporting programs for children in various instructional settings.
**Corequisite:** EDEC 769B, EDEC 769C, and EDEC 770.

EDEC 690 - Independent Study (1-3 Credits)

EDEC 712 - Practicum in Parent Involvement in Early Childhood Education (3 Credits)
School- and home-based experience with parents. Emphasis upon home-school relationships and their effects upon the young child's development and learning. Participation with advisory groups, parent activities in the classroom, home visits, and parent-teacher communication. Weekly seminar sessions.
**Prerequisites:** EDEC 540 and EDEC 608 or EDEC 610.

EDEC 740 - The Young Child: Applying Theory and Research (3 Credits)
Analysis and discussion of theory and research related to the education of young children. Intellectual, social, emotional, and physical development of infants, toddlers, and young children will be examined. Special emphasis on implication for developing.
**Prerequisites:** EDEC 540 and EDPY 705.

EDEC 742 - Advanced Study of Early Childhood Curricula and Program Models (3 Credits)
An analysis of early childhood program models and curricula with theoretical orientation, related research, societal needs, and the student's philosophy of education.
**Prerequisites:** EDEC 540, EDEC 542, EDEC 544.

EDEC 744 - Advanced Study of Language Development and Communication Skills in Early Childhood Education (3 Credits)
Provides classroom teachers with an overview of the development of language and communication skills in children, birth through eight.
**Prerequisites:** EDEC 544 or equivalent.

EDEC 745 - Emergent Literacy (3 Credits)
Theories of emergent literacy and implications for literacy learning and instruction.
**Prerequisites:** EDEC 744.

EDEC 750 - Play Theory and Early Learning (3 Credits)
Theory, research, and practice related to the play of young children in various settings.

EDEC 754 - Studies and Internships I in Teaching Social Studies - Early Childhood (3 Credits)
Planning, designing and implementing a developmentally appropriate socio-cultural curriculum for young children, preschool through grade four.
**Prerequisites:** Admission to the MAT program.

EDEC 755 - Studies and Internship in Teaching Science (3 Credits)
The study and practice of science education for preschool and primary students focusing on appropriate content, goals, and methods.
**Prerequisites:** Admission to the MAT program.

EDEC 769A - Internship II: Early Childhood Curriculum and Assessment (4 Credits)
Internship for practice in prekindergarten through primary grade classrooms related to curriculum design and assessment, leading to initial certification.
**Prerequisites:** Admission to MAT program and successful completion of first semester internship.
**Corequisite:** EDEC 769B, EDEC 769C, and EDEC 770.
EDEC 769B - Internship II: Early Childhood Teaching (4 Credits)
Internship for practice in prekindergarten through primary grade classrooms related to interactive teaching, leading to initial certification. 
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEC 769A, EDEC 769C, and EDEC 770.

EDEC 769C - Internship II: Early Childhood Professional Roles (4 Credits)
Internship for practice in school settings related to professional development, leading to initial certification.
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEC 769A, EDEC 769B, and EDEC 770.

EDEC 770 - Early Childhood Internship Seminar (3 Credits)
Seminar for students seeking initial certification. Consideration of principles and theories of teaching and learning and strategies to translate theory into personal classroom practice.
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEC 769A, EDEC 769B, and EDEC 769C.

EDEC 794 - Leadership, Advocacy and Collaboration in Early Childhood Settings (3 Credits)
An overview of the purposes, organizational structure, sponsorship, funding sources, and advocacy for care and education programs and the characteristics, roles, and responsibilities of leaders in the field.

EDEC 795 - Technology in Early Childhood Education (3 Credits)
Strategies for integrating technology in early childhood education.
Prerequisites: EDTE 631.

EDEC 797 - Seminar in Early Childhood Education (3 Credits)
Synthesis of development, curriculum, cognition, and related issues in early childhood education.
Prerequisites: degree candidacy in early childhood education and 21 graduate hours completed.

EDEC 810 - Special Topics in Early Childhood Education (3 Credits)
Special and specific analyses of crucial issues in the field as they exist and emerge in the future. Provides an opportunity for students to do in-depth study of definitive areas of concern.

EDEC 811 - Current Trends and Issues in Early Childhood Education (3 Credits)
Analysis of innovations in the field within a historical perspective.

EDEC 812 - Advanced Internship in Early Childhood Education (3-6 Credits)
Supervised internship and related seminar participation in an approved setting.
Prerequisites: Admission to doctoral program.

EDEC 813 - Program Development and Implementation in Early Childhood Education (3 Credits)
Analysis of and participation in the development of program content, policy, and advocacy.
Prerequisites: EDEC 740, EDEC 742, EDEC 744, and admission to doctoral candidacy.

EDEC 814 - Analysis of Current Research in Early Childhood Education (3 Credits)
A critical evaluation of reported research in early childhood with special emphasis on recent and ongoing research programs.
Prerequisites: EDEC 740, EDEC 742, EDEC 744, and admission to doctoral candidacy.

EDEC 815 - Advanced Study of Early Childhood Curricula (3 Credits)
An analysis of early childhood curriculum alternatives that focus on theoretical orientation, related research, societal needs, and the student's philosophy of education.
Prerequisites: EDEC 740, EDEC 742, EDEC 744, and admission to doctoral candidacy.

EDEC 890 - Independent Study (3 Credits)

Economics (ECON)

ECON 500 - Urban Economics (3 Credits)
An analysis of economic forces affecting urbanization and the economic processes influencing urban form and structure. Spatial concepts are considered in addition to traditional micro-economic and macro-economic concepts. Topic coverage includes: the economic origin of cities; urban functions and the urban economic base, land-use structure and urban form, and urban efficiency.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 503 - International Trade Economics (3 Credits)
Theory of international specialization, commercial policy, customs unions, and the effects of trade liberalization and protectionism; economic growth and multinational enterprises.
Prerequisites: ECON 321.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 504 - International Monetary Economics (3 Credits)
Exchange rate and balance of payments determination; purchasing-power parity; optimum currency areas, absorption, elasticity, monetary approaches, spot- and forward-exchange markets.
Prerequisites: ECON 322.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 505 - International Development Economics (3 Credits)
Economic theories of growth in developing countries. Use of factor resources; role of social and economic institutions; use of financial trade policies for growth.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 506 - Labor Economics and Labor Markets (3 Credits)
Economics of labor demand, labor supply, wage determination in competitive markets, migration, discrimination, unemployment, and labor unions. Theoretical models and empirical knowledge will be considered.
Prerequisites: ECON 221 and ECON 222, or ECON 224; ECON 321.

ECON 507 - Comparative Economic Systems (3 Credits)
An analysis of the organization and operation of the world's major economic systems.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning
ECON 508 - Law and Economics (3 Credits)
Economic analysis and interpretation of the law. The economic effect of current law and optimal design of law to meet social objectives.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 509 - Economics of Sustainable Development (3 Credits)
Exploration of the basic theory and practice of sustainable economic development. Topics include: environmental legislation, global agreements, sustainable development indicators, and economic strategies and methods to promote environmentally sound development.
Prerequisites: C or better in the following ECON 221 and ECON 222; or ECON 224; MATH 122.

Graduation with Leadership Distinction: GLD: Community Service

ECON 510 - Experimental Economics (3 Credits)
Exploration of the basic theory and techniques of experimental economics. Topics include: basic game theory, experimental design, and elements of behavioral economic thought.
Prerequisites: C or higher in ECON 321.

ECON 511 - Senior Seminar in Economics (3 Credits)
Philosophy and methodology of economics, perspectives on theory and empiricism, economic policy; individualized guided research.
Prerequisites: ECON 321, ECON 322, and ECON 436 with grade of C or higher.

ECON 514 - The Economics of Terrorism (3 Credits)
Focuses on the following aspects of terrorism: (1) its causes/determinants (historical, social, cultural, economic, political, and religious determinants); (2) the organizational and funding structure of terrorist groups; (3) the tactics and weapons of terrorist groups; (4) mobilization and recruitment within terror networks; and (5) counterterrorism methods. Restricted to: Business Majors and Economics Arts and Sciences Majors.
Prerequisites: C or better in ECON 321.

ECON 515 - Industrial Organization (3 Credits)
This course uses the tools of microeconomics and game theory to examine how firms compete and competition’s impact on industry performance. Topics include: price discrimination, product differentiation, and oligopoly behavior.
Prerequisites: ECON 321.

ECON 516 - Political Economy (3 Credits)
This course covers fundamental models of collective decision making, studies their empirical relevance, and considers interactions between the economy and politics.
Prerequisites: C or better in ECON 221 and ECON 222 or C or better in ECON 224.

ECON 523 - Introduction to Mathematical Economics (3 Credits)
Mathematical formulation of economic theories; the use of mathematics in the development and demonstration of economic relationships.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MATH 122, MATH 141, or the equivalent.

ECON 524 - Essentials of Economics (3 Credits)
A course designed to acquaint the student with the principles of operation of the American economic system. A survey course for social studies teachers in secondary schools.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 526 - Managerial Economics (3 Credits)
A study of the application of the economic theory of profits, competition, demand, and costs to analysis of problems arising in the firm and in decision making. Price policies, forecasting, and investment decisions are among the topics considered.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 530 - The Economics of Education (3 Credits)
Investment in human capital; the economic value of schooling; internal efficiency of schools; faculty compensation; equity and efficiency of school finance systems; financing higher education.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 531 - Health Economics (3 Credits)
Applications of economic analysis to health care. Structure and behavior of health-care markets. Description of health care policy issues.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 548 - Environmental Economics (3 Credits)
An analysis of the economic aspects of environmental decay, pollution control, and natural resource use. Analysis of the ability of the market system to allocate resources efficiently when economic activity is accompanied by environmental damage. Discussion of alternative public policy approaches to pollution control and natural resource conservation.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Cross-listed course: ENVR 548

ECON 555 - Game Theory in Economics (3 Credits)
Game theory as used to understand decision making in business, economics, politics and other real-world environments. Topics covered include: basic terminology; strategic; extensive, and combinatorial models; and equilibrium strategy.
Prerequisites: ECON 321 or MATH 141 and STAT 201 or C or higher in STAT 206.

ECON 562 - Public Finance (3 Credits)
Theory and practice of taxation: public revenue, expenditure, and debt.
Prerequisites: C or higher in ECON 321.

ECON 589 - Topics in Economics (1-3 Credits)
Individual topics to be announced with title.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 594 - Introduction to Econometrics (3 Credits)
Statistical and economic tools applied to analysis of business and economic problems with the aid of computers.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 291 or STAT 201, MATH 122 or MATH 141.

ECON 621 - Survey of Contemporary Economic Theory (3 Credits)
Neo-classical value and distribution theory combined with income and employment theory.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 690 - Quantitative Foundations for Business and Economics I (3 Credits)
Calculus and classical optimization methods applied to problems in business and economic analysis; matrices, derivatives, and integrals in the analysis of both univariate and multivariate business and economic models. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.
ECON 691 - Quantitative Foundations for Business and Economics II (3 Credits)
Statistics and probability theory applied to problems of business and economic analysis. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 690 or ECON 690.

ECON 692 - Quantitative Methods I (3 Credits)
Probability and statistics necessary for graduate study in economics and business administration; estimation, hypothesis testing, regression, analysis of variance, and nonparametric methods. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 694 - Quantitative Methods II (3 Credits)
A study of decision models useful in business administration. Topics covered include linear programming, sensitivity analysis and duality, network models, integer programming, determinate and stochastic dynamic programming, inventory, and queues. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; ECON 692, mathematics and computer portion of Fundamental Business Skills or equivalent.

ECON 705 - Economic Growth and Development (3 Credits)
Overall view of problems of economic development, including its history and relationship to the modern world. Brief consideration is given to such noneconomic factors as political, sociological, and cultural environments. Basic theories of growth are presented and critically evaluated.

ECON 711 - Applied Microeconomics (3 Credits)
Theory of demand, production, cost, pricing, distribution, and capital. Particular emphasis on applications of the theory to various problems faced by the firm.
Prerequisites: ECON 621.

ECON 712 - Applied Macroeconomics (3 Credits)
The modern theory of income determination. Inflation, unemployment, and interest rates in an open economy setting. Emphasis on economic policy.
Prerequisites: ECON 621.

ECON 719 - Macroeconomics Analysis and International Economics (3 Credits)
The modern theory of national employment, output, and the price level. Monetary and fiscal policy. International trade, exchange rates, and international capital markets.

ECON 720 - Managerial Economics (3 Credits)
The application of microeconomic concepts to managerial decisions. The concepts include demand, cost, market structure, pricing, profitability, and strategic behavior.

ECON 728 - Applied Microeconomics (3 Credits)
Theory of demand, production, cost, pricing, distribution, and capital. Particular emphasis on applications of the theory to various problems faced by the firm.
Prerequisites: ECON 621

ECON 736 - Applied Econometrics (3 Credits)
The theory and application of linear regression analysis to economic problems. The course will present both finite-sample and asymptotic properties of regression estimators, and address problems that arise in using regression methods with economic data.
Prerequisite or Corequisite: STAT 201; and MATH 122 or MATH 141.

ECON 740 - Applied Economic Forecasting (3 Credits)
Examination of a variety of techniques that are used for forecasting and policy simulation purposes. Development of skills that have applications in business, government, and economic research.
Prerequisites: ECON 692 or equivalent.

ECON 760 - International Trade, Theory and Policy (3 Credits)
Classical and modern models of international trade, evaluation of tariffs and quotas, advantages and disadvantages of international trade agreements.
Prerequisites: ECON 711 or ECON 720, with exceptions made for anyone who has taken an undergraduate Intermediate Microeconomics class ECON 321 at USC in the last five years.

ECON 784 - Health Economics (3 Credits)
A critical introduction to the application of economic analysis to problems in the health care field. Selective surveys of the related scientific literature will be covered.

ECON 788 - Applied Economic Forecasting (3 Credits)
Examination of a variety of techniques that are used for forecasting and policy simulation purposes. Development of skills that have applications in business, government, and economic research.
Prerequisites: ECON 692 or equivalent.

ECON 811 - Microeconomic Theory I (3 Credits)
The modern theory of consumer behavior, production, the firm, and market structure.

ECON 812 - Microeconomic Theory II (3 Credits)
Advanced topics in microeconomics including general equilibrium theory and welfare economics.
Prerequisites: ECON 786.

ECON 814 - Game Theory (3 Credits)
This course teaches the fundamentals of game theory and strategic interaction. Concepts of normal and extensive form games, Nash equilibrium, and subgame perfect equilibrium are defined and used to show how outcomes are achieved between two parties.

ECON 815 - Topics in Microeconomics (3 Credits)
Examination of new theories and applications in microeconomics. Analysis of advances in theory and the application of theory to new new problems of consumer behaviour, industrial organization, and public economics.

ECON 816 - Mathematical Economics (3 Credits)
This course is to acquaint students with the mathematical methods currently being used in micro- and macroeconomic theory. Topics covered are the use in economics of point set topology, nonlinear programming, differential equations, calculus of variations, and control theory.
Prerequisites: ECON 523.

ECON 817 - History of Economic Thought (3 Credits)
An analysis of the development of economic theory with special emphasis on the evolution of alternative methodologies.

ECON 818 - Welfare Economics (3 Credits)
An endeavor to formulate propositions by which alternative economic situations open to society may be ranked on the scale of better or worse.
Prerequisites: ECON 788.
ECON 821 - Macroeconomic Theory I (3 Credits)
The modern theories of income determination, inflation, unemployment, and interest rates. Theories of consumption, investment, government expenditure, and taxation are presented.

ECON 822 - Macroeconomic Theory II (3 Credits)
Recent developments in macro-econometrics, dynamic models, and related topics.
Prerequisites: ECON 785 or the equivalent.

ECON 824 - Monetary Theory (3 Credits)
Monetary theory, monetary policy, and monetary reform. Theory of central banking and monetary equilibrium, and related topics.
Prerequisites: course in money and banking and intermediate economic theory.

ECON 825 - Money and Banking (3 Credits)
An in-depth study of the operation and economic significance of the monetary system (money, commercial banks, and the central bank) and monetary policy. Emphasis is on theory and empirical hypothesis testing as related to above topics.

ECON 831 - Econometrics and Regression I (3 Credits)
A treatment of single equation estimating techniques for the simple linear model, various nonlinear models, and the general linear model. 03: 07/05/2019.
Prerequisites: ECON 792 or equivalent.

ECON 832 - Econometrics and Regression II (3 Credits)
Topics in generalized least squares, autocorrelation, distributed lag models, principal components, identification, and simultaneous estimating techniques. 03: 07/05/2019.
Prerequisites: ECON 831.

ECON 833 - Computational Methods for Economists (3 Credits)
Theory and application of computational methods used to solve and estimate economic models. Solutions to economic models using numerical techniques and high-performance computing. Estimation of empirical models using custom built functions and numerical optimization.

ECON 840 - Economic Growth (3 Credits)
Advanced theory of economic growth. Mathematical models of growth, including the neoclassical model, endogenous growth models, and models of imperfect competition and growth, will be examined. Techniques of dynamic optimization are used to solve models. Empirical methods will be applied to models of economic growth.

ECON 841 - Economic Development (3 Credits)
Application of economic principles to regional analysis and planning. Geographic areas covered range from cities and counties to major regions of the nation. Subject areas include economic measurement, analysis, and development planning.

ECON 843 - Economic History (3 Credits)
Examination and interpretation of the record of events and trends in history using the concepts and tools of economic theory. Analysis of the effect of economic events on the course of world history.

ECON 848 - Environmental Economics (3 Credits)
Fundamentals of environmental and resource economics. Including concepts of pollution, instrument choice, management of renewable and non-renewable resources, and valuation techniques for environmental public goods.

ECON 850 - Health Economics (3 Credits)
A critical introduction to the application of economic analysis to problems in the health care field. Selective surveys of the related scientific literature will be covered. 03: 07/05/2019.

ECON 860 - International Trade Theory (3 Credits)
Theory of international values, comparative advantage, and the gains from trade; theory of commercial policy, tariff structure, and welfare and trade.
Prerequisites: ECON 621.

ECON 862 - International Monetary Economics (3 Credits)
Theories of exchange rate and balance of payments determination (spot and forward exchange markets, interest rate arbitrage, purchasing power parity, and monetary approaches); adjustments under fixed and flexible exchange rates are analyzed.

ECON 865 - Industrial Organization (3 Credits)
Examination of industrial pricing, output, and investment practices in relation to the theory of the firm. Consideration of public aspects of these practices.

ECON 870 - Labor Economics I (3 Credits)
Topics studied include wage theory; the processes of wage determination; the impact of unions and collective bargaining on wage levels, prices, employment, and income distribution; bargaining theory and union-management relations; the union as an economic institution.

ECON 872 - Labor Economics II (3 Credits)
A descriptive and analytic study of manpower as an economic resource in the United States.

ECON 875 - Economics of Education (3 Credits)
A survey of the contribution of economics to educational issues, including the value of educational investments, effect of education on economic growth, input-output analysis, and economics of educational finance.

ECON 880 - Public Finance I (3 Credits)
An analysis of budgets and budget policy; tax incidence and effects; debt and debt management.

ECON 882 - Public Finance II (3 Credits)
A general survey of public finance, including public expenditures; the structure, incidence, and effects of taxes; public goods; and fiscal federalism.

ECON 885 - Urban Economics (3 Credits)
An analysis of economic forces affecting urbanization and the economic processes influencing urban form and structure. Spatial concepts are considered in addition to the traditional microeconomic and macroeconomic concepts.

ECON 886 - Location Theory (3 Credits)
Spatial and economic structures of regions and regional economic development. Topical review of partial and general equilibrium models of land use, regional economic growth; income determination at a regional level (regional accounts and input-output models); regional policy alternatives and their efficiency.

ECON 891 - Sampling Techniques (3 Credits)
Statistical designs and techniques for survey investigations. Mathematical development of sampling systems; sampling units; sample size; estimation; costs; non-sampling problems. Methods of obtaining and reporting information. 03: 07/05/2019.
Prerequisites: ECON 692 or equivalent.
**EDFI 592 - Historical Foundations of American Educational Thought (3 Credits)**
A survey of the history, philosophy, administration, and legal bases of American education.

**EDFI 643 - Southern Educational History (3 Credits)**
Development of educational institutions in Southern society with special attention given to South Carolina.

**EDFI 690 - Independent Study (1-3 Credits)**

**EDFI 722 - Contemporary Education in Europe (3 Credits)**
A comparison of the impact of postwar forces on the educational systems of selected European nations. Analysis of current trends, movements, and problems in all levels of education. Examination of the educational purposes, systems, techniques, and facilities with implications for the future development of industrialized societies.

**EDFI 730 - Qualitative Epistemologies, Paradigms, & Theories (3 Credits)**
Foundations of qualitative research including historical, philosophical, and theoretical perspectives. Examination of different qualitative approaches and associated methodological issues.

**EDFI 731 - Qualitative Inquiry (3 Credits)**
Qualitative research methods including naturalistic inquiry, participant observation, interviewing, focus groups, and document analysis.

**EDFI 740 - Qualitative Inquiry (3 Credits)**
Qualitative research methods including naturalistic inquiry, participant observation, interviewing, focus groups, and document analysis.

**EDFI 741 - International and Comparative Education (3 Credits)**
Introduction to international education and the comparative method in the study of educational systems around the world. Provides students with an overview of comparative and international education theory, practice, and research methodology.

**EDFI 743 - The History of Education in the United States (3 Credits)**
The history of education in the United States from the colonial period through the contemporary moment. Placing the history of education in a larger American economic, social, political, and cultural context, students consider the development, purposes, effects, and evolution of public and private schools in the United States at the elementary, middle and secondary levels during this critical period in United States history and education.

**EDFI 744 - Philosophy and Education (3 Credits)**
The functional considerations governing educational theories and practices.

**EDFI 747 - Critical Race Theory and Education (3 Credits)**
An introduction to tenets and methodology in Critical Race Theory. The study of race and racism as the primary lens of analysis in educational, social, and political issues.

**EDFI 749 - The School in Modern Society (3 Credits)**
Basic concepts of the relation of the school to the social order: an analysis of the essential features of the changing social context within which American educational policy and practice now operate. The educational implications of recent social change in American life and of the emergence of a new world order.

**EDFI 799 - Thesis Preparation (1-9 Credits)**

**ECON 643 - Econometrics and Regression II (3 Credits)**
Topics in generalized least squares, autocorrelation, distributed lag models, principal components, identification, and simultaneous estimating techniques. **Prerequisites:** ECON 795.

**ECON 833 - Narrative Inquiry (3 Credits)**
Exploration of the various forms of narrative inquiry as a distinct genre of qualitative research.

**ECON 834 - Participatory Action Research (3 Credits)**
Theoretical, methodological, and pedagogical orientations to participatory action research.

**ECON 836 - Ethnography and Education (3 Credits)**
Historical, methodological, and theoretical orientations to ethnographic research. **Prerequisites:** EDFI 731 or equivalent.

**ECON 837 - Qualitative Case Study (3 Credits)**
The study and practice of qualitative case study methods. Topics include explanatory, descriptive, and exploratory approaches, single case, multi-case, and multi-site design strategies. **Prerequisites:** EDFI 731.

**ECON 843 - The School and the Social Order: the United States II (3 Credits)**
The impact of education on the social order in the United States continued—1877 to the present. Research assignments will involve analysis and interpretation of primary source materials of 19th- and 20th-century thought and practice in South Carolina. **Prerequisites:** EDFI 743 or equivalent.

**ECON 845 - Seminar of Advanced Students in Foundations of Education (3-9 Credits)**
Individual topics selected by student application and instructor acceptance. May be repeated for up to 9 hours as topics vary.
EDFI 847 - Modern Philosophies of Education (3 Credits)
Critical comparison of present-day schools of thought in the nature, objectives, and functions of American education.
Prerequisites: EDFI 744 or equivalent.

Cross-listed course: PHIL 847

EDFI 857 - Advanced Critical Race Theory and Education (3 Credits)
An advanced study of how Critical Race Theory is applied by researchers to investigate issues of racial justice. The study of race and racism is the primary lens of analysis in understanding disparities in educational, political, social and economic outcomes.
Prerequisites: EDFI 747.

Cross-listed course: EDTE 857

EDFI 868 - History of Student Activism (3 Credits)
An overview of the role of student activists who engaged in deliberate protest to demonstrate their dissatisfaction with the American social order and an examination of the rationale behind facilitating student rebellion and the role of high schools and colleges in facilitating student activism.

EDFI 879 - Equity and Justice Internship (1-3 Credits)
Internship dedicated to equity and justice in educational contexts.
Prerequisites: EDFI 749.

EDFI 890 - Independent Study (3 Credits)

EDFI 899 - Dissertation Preparation (1-12 Credits)

Education (EDUC)

EDUC 610 - Case Study in Classroom Management (3 Credits)
Case study in the clinical application of pedagogy and methods related to classroom management, including relational, procedural and instructional aspects of a classroom management approach.

EDUC 632 - Field Problems in Education I (1-3 Credits)
Selected educational problems will be identified and explored, and probable solutions developed. Emphasis will be on providing practicing school personnel an opportunity to work cooperatively, under supervision, toward solutions to those problems which are of immediate concern to them. Activities will include seminars, review of literature, observations, case studies, materials development, and other applicable approaches. Emphasis will be placed on the development of a comprehensive proposal designed to alleviate or solve the problems identified.

EDUC 633 - Field Problems in Education II (1-3 Credits)
Selected educational problems will be identified and explored, and probable solutions developed. Emphasis will be on providing practicing school personnel an opportunity to work cooperatively, under supervision, toward solutions to those problems which are of immediate concern to them. Activities will include seminars, review of literature, observations, case studies, materials development, and other applicable approaches. Emphasis will be placed on the development of a comprehensive proposal designed to alleviate or solve the problems identified.

EDUC 634 - Field Problems in Education III (1-3 Credits)
Selected educational problems will be identified and explored, and probable solutions developed. Emphasis will be on providing practicing school personnel an opportunity to work cooperatively, under supervision, toward solutions to those problems which are of immediate concern to them. Activities will include seminars, review of literature, observations, case studies, materials development, and other applicable approaches. Emphasis will be placed on the development of a comprehensive proposal designed to alleviate or solve the problems identified.

EDUC 635 - Field Problems in Education IV (1-3 Credits)
Selected educational problems will be identified and explored, and probable solutions developed. Emphasis will be on providing practicing school personnel an opportunity to work cooperatively, under supervision, toward solutions to those problems which are of immediate concern to them. Activities will include seminars, review of literature, observations, case studies, materials development, and other applicable approaches. Emphasis will be placed on the development of a comprehensive proposal designed to alleviate or solve the problems identified.

EDUC 635A - T: Common Core: Math Standards (3 Credits)

EDUC 654 - Assessment of Reading (3 Credits)

EDUC 738 - Supervision of Student Teaching (3 Credits)
The theoretical and functional foundations with which an early childhood, elementary, or secondary school teacher should be familiar when supervising a student teacher in a clinical situation.
Prerequisites: classroom experience.

Educational Admin (EDAD)

EDAD 690 - Independent Study (1-3 Credits)

EDAD 718 - School and Community Relationships (3 Credits)
Development of constructive relationships between schools and the communities they serve. Emphasis on research findings in communication.

EDAD 719 - Interpersonal and Group Relations in Educational Administration (3 Credits)
Emphasis on modern understanding of interpersonal and group relations derived from current research in educational administration.

EDAD 795A - Practicum in School Administration (3 Credits)
An internship in schools at the appropriate level for certification. Will include field experience seminars. Should be taken as last course in degree program.

EDAD 795B - Practicum in School Administration (3 Credits)
An internship in schools at the appropriate level for certification. Will include field experience seminars. Should be taken as last course in degree program.

EDAD 795C - Practicum in School Administration (3 Credits)
An internship in schools at the appropriate level for certification. Will include field experience seminars. Should be taken as last course in degree program.

EDAD 826 - Professional Negotiation in Elementary and Secondary Schools (3 Credits)
An advanced course designed for administrators and prospective administrators. Content for the course ranges from theoretical bases for negotiation through application of specific skills in the negotiating process. Also includes a survey of legislative enactments in various selected states.

EDAD 890 - Independent Study (3 Credits)

EDAD 896 - Practicum in Educational Administration (3 Credits)
Open primarily to students seeking district-level administrative experiences.
**Educational Psychology (EDPY)**

EDPY 644 - Free-Choice Learning and Informal Learning Environments (3 Credits)
Examines free-choice (or informal) learning and the characteristics of settings and activities outside of formal schooling that effectively promote learning and development.

EDPY 690 - Independent Study (3-15 Credits)

EDPY 704 - The Field of Educational Psychology (3 Credits)
Introduction to current issues in educational psychology. Topics include, but are not limited to: learning and teaching, cognition, developmental theories, the brain, information processing, motivation, individual differences, and the social contexts of learning.

EDPY 705 - Human Growth and Development (3 Credits)
Overview of the contributions of the biological and social sciences to an understanding of the mental, emotional, social, and physical development from infancy through adulthood. Study of behavior problems.

EDPY 706 - Growth and Development: Childhood (3 Credits)
Presentation of theories and principles of human development that are particularly relevant to teaching. Application of such theories and principles to learning situations suitable to various age and grade levels.

EDPY 707 - Growth and Development: Middle Childhood and Adolescence (3 Credits)
A review of the literature concerning adolescence; nine years through teens. Emphasis on application to the educational setting.

EDPY 708 - Growth and Development: Adulthood (3 Credits)
Designed to further understanding of the adult and his/her endeavors in the learning process. Emphasis will be on the major contributing factors (physiological, psychological, and sociological) that affect the adult, on the relevant research findings, and on implications for educators.

EDPY 741 - Basic Processes: Cognition (3 Credits)
A study of the cognitive processes involved in complex learning, conceptualization, problem-solving, abstract reasoning, and other aspects of higher intellectual functioning as developed and used in the educational setting.

EDPY 751 - Learning and Instruction (3 Credits)
A systematic survey of major traditional and contemporary learning theories and principles relevant to the design and development of classroom teaching and instruction.

EDPY 752 - Research Methods in Educational Psychology (3 Credits)
Analysis of concepts and methodological approaches to research in the Educational Psychology field. Focus on critical reading and evaluation of published literature across a broad spectrum of areas.

EDPY 785 - Motivation and School Learning (3 Credits)

EDPY 799 - Thesis Preparation (1-9 Credits)

EDPY 805 - Contemporary Research in Human Development and Education (3 Credits)
Issues in research on human development with applications to educational settings.

EDPY 835 - Educational Psychology (3 Credits)
Advanced study of educational psychology with special emphasis on learning.

**Prerequisites:** EDPY 752 and EDRM 711.

EDPY 873 - Advanced Problems in Educational Psychology (3 Credits)
Advanced problems in educational psychology as they apply to the public schools at all levels. Designed to meet the needs of candidates for graduate degrees.

EDPY 890 - Independent Study (3 Credits)

EDPY 899 - Dissertation Preparation (1-12 Credits)

**Educational Technology (EDET)**

EDET 603 - Design and Development Tools I (3 Credits)
Study of multimedia elements (e.g., graphics, animation, audio, and video) including the creation and editing of materials. Instructional applications, copyright issues, and technology limitations will be explored. 03: 07/05/2019.

EDET 650 - Internship in Educational Technology (3 Credits)
Supervised field-based experiences in the design, development, evaluation, and implementation of technology-based instructional and training projects.

**Prerequisites:** EDET 603, EDET 703, and EDET 722.

EDET 652 - Design and Evaluation of Games and Simulations (3 Credits)
Application of instructional design criteria to computer and noncomputer interactions. Analyses include requisite cognitive processes, affective outcomes, and ethical standards. Design and formative testing of interactive exercises.

EDET 703 - Design and Development Tools II (3 Credits)
Critical analysis of research in multimedia programs and implications for instruction. Application of instructional design criteria to develop, author, and evaluate multimedia projects.

**Prerequisites:** EDET 603.

EDET 709 - Applications of Learning Principles (3 Credits)
Behavioral and cognitive learning principles applicable to the design of technology-based instruction and performance training. 03: 07/05/2019.

EDET 722 - Instructional Design and Assessment (3 Credits)
Principles and models of instructional design and the assessment of learning. Applications of the instructional design process and assessment criteria to develop instruction and assessment tools for technology-based environments. 03: 07/05/2019.

EDET 735 - Technological Applications for Diverse Populations (3 Credits)
Application of Universal Design, assistive devices, and other technologies to assure access to information and productivity tools by persons with disabilities, English-language learners, students at risk, and the elderly. 03: 07/05/2019.

EDET 746 - Management of Technology Resources (3 Credits)
The organization and administration of media programs in school buildings and districts, regional and state centers, and colleges and universities. Procedures, problems, and trends for an integrated instructional support system will be emphasized.

EDET 755 - Design and Evaluation of Information Access and Delivery (3 Credits)
Telecommunications tools to support research and instruction across the curriculum. Study of distance education and issues related to instructional delivery, connectivity, and distribution methods. 03: 07/05/2019.
EDET 780 - Research Seminar in Educational Technology (3 Credits)
A study of contemporary trends, problem areas, and issues in educational technology through literature investigations, seminar discussions, and case studies. 03/07/2019.

EDET 793 - Advanced Instructional Design and Development (3 Credits)
Incorporation of instructional design criteria, multimedia development skills, knowledge of instructional methods, learning theory, and evaluation to develop a comprehensive multimedia or Web-based instructional project.
Prerequisites: EDET 650, EDET 703.

EDET 801 - Doctoral Research in Educational Technology (3 Credits)
A comprehensive study of the educational technology field, and an analysis of a significant question or issue related to teaching and administration in K12 schools, higher education, and/or other social institutions through literature investigation.

EDET 810 - Principles of Applied Educational Technology Research (3 Credits)
Introduction to the design of applied educational technology research with theoretical alignment of contemporary paradigms of research, purposes, research questions, ethics, and positionality.

EDET 811 - Advanced Applied Educational Technology Research (3 Credits)
Advanced applied quantitative and qualitative methods for educational technology research using data collection, analysis, interpretation, and systematic study of a significant research problem related to teaching and learning in technology-enhanced learning environments.
Prerequisites: EDET 810.

EDET 825 - Evaluation of Educational Technology Research (3 Credits)
Evaluation and review of relevant research literature in educational technology to synthesize theories, trends, and issues related to the field.
Prerequisites: EDET 811.

EDET 826 - Synthesizing Educational Technology Research (3 Credits)
Emphasis is placed on synthesizing research into an original, coherent and structured review of related literature.
Prerequisites: EDET 825.

EDET 850 - Special Topics in Educational Technology (3 Credits)
Selected topical problems for advanced graduate students interested in technology-enhanced teaching, learning, and performance environments.

EDET 899 - Dissertation Preparation (1-12 Credits)
Special permission of department required.

Electrical Engineering (ELCT)

ELCT 510 - Photovoltaic Materials and Devices (3 Credits)
Fundamentals of photovoltaic solar cell technologies. Design and operation of solar cells, including efficiency analysis and cost benefit. Applications to green and sustainable energy systems.
Prerequisites: C or better in ELCT 361, ELCT 363 or equivalent.

ELCT 521 - Introduction to Microwaves (3 Credits)
Introduction to plane electromagnetic wave propagation, transmission lines, transmission line equations, input impedance, waveguides and cavities, antennas and antenna arrays, microwave modeling.
Prerequisites: ELCT 361 or PHYS 504.

ELCT 530 - Industrial Controls (3 Credits)
The embedded electronics and software used in data acquisition, and process and instrument control in an industrial or manufacturing environment.
Prerequisites: ELCT 331.

ELCT 531 - Digital Control Systems (3 Credits)
Analysis and design of discrete-time control systems, implementation of control systems using digital electronic systems. Applications to electrical systems.
Prerequisites: ELCT 331.

ELCT 533 - System Health Management (3 Credits)
Sensing, data acquisition, and data processing for evaluation of performance and system health. Integration and implementation of health management systems.
Prerequisites: ELCT 321 or equivalent.

ELCT 541 - Sensors for Biomedicine (3 Credits)
Operating principles and design of bioelectric sensors and sensor systems for medical applications.
Prerequisites: C or better in ELCT 361, ELCT 363 and ELCT 371.

ELCT 551 - Power Systems Design and Analysis (3 Credits)
Transmission line design, load flow, and short circuit analysis of power systems.
Prerequisites: ELCT 331.

ELCT 553 - Electromechanical Energy Conversion (3 Credits)
Analysis and design of electromechanical energy conversion systems, including electrical machines and electronic drives.
Prerequisites: ELCT 331, ELCT 361.

ELCT 554 - Integration of Photovoltaics in Modern Power Systems (3 Credits)
Analysis and design of power systems in presence of photovoltaic generation with focus on protection systems, control, power quality.
Prerequisites: ELCT 551.

ELCT 559 - Special Topics in Distributed Energy Resources for Electric Energy Systems (3 Credits)
Special topics in distributed energy resources for modern electrical energy systems. Course content varies and will be announced in the schedule of classes by title. May be repeated as topics vary.
Prerequisite or Corequisite: ELCT 551.

ELCT 562 - Wireless Communications (3 Credits)
Fourier techniques and stochastic processes review, multiple access & cellular techniques, signal space representations for signals and noise, baseband modulations and optimal receivers in additive white Gaussian noise, bandpass and higher-order modulations, mobile & wireless propagation channel characteristics, effects of bandlimiting & distortion mitigation, diversity techniques.
Prerequisites: ELCT 332, ELCT 361.

ELCT 563 - Semiconductor Electronic Devices (3 Credits)
Basic semiconductor material properties. Principles and characteristics of semiconductor p-n junction and Schottky diodes, field-effect transistors (JFETs, MESFETs, and MOSFETs), and bipolar junction transistors.
Prerequisites: ELCT 363 or equivalent.
ELCT 564 - RF Circuit Design for Wireless Communications (3 Credits)
RF design fundamentals, lumped elements, transmission line theory, transmission lines and waveguides, S-parameters, impedance matching, microwave resonators.
Prerequisites: ELCT 361.

ELCT 566 - Semiconductor Optoelectronics (3 Credits)
Basic semiconductor material optical properties. Principles and structures of semiconductor lasers, Light Emitting Diodes, and photodetectors.
Prerequisites: ELCT 363 or equivalent.

ELCT 572 - Power Electronics (3 Credits)
Basic analysis and design of solid-state power electronic devices and circuitry.
Prerequisites: ELCT 371, ELCT 331.

ELCT 574 - Semiconductor Materials and Device Characterization (3 Credits)
Semiconductor material and device characterization; resistivity, carrier and doping density, contact resistance, Schottky barriers, series resistance, defects, trapped charges, and carrier lifetime.
Prerequisites: ELCT 363 or equivalent.

ELCT 582 - Semiconductor Laboratory (3 Credits)
Prerequisite: ELCT 363.

ELCT 732 - Radio Propagation & Wireless Channel Modeling (3 Credits)
Prerequisites: ELCT 562 or successful completion of undergraduate courses in electromagnetics, probability/statistics, and linear system theory.

ELCT 751 - Advanced Power Systems Analysis (3 Credits)
Network analysis methods suitable for computer implementation. System studies, including load-flow analysis, short-circuit analysis, and state estimation.
Prerequisites: ELCT 551.

ELCT 753 - Electrical Drives (3 Credits)
Dynamics of electrical machine and space phasor theory. Analysis and design of control architecture for electrical motors.
Prerequisites: ELCT 553.

ELCT 761 - Fundamental Electromagnetics (3 Credits)
Theorems and principles of EM theory, Maxwell's equations, vector and scalar potentials. Solution to Maxwell's equation in one-, two-, and three-dimensions. Green's functions and theorems with applications to radiation and guided-wave propagation.
Prerequisites: ELCT 361.

ELCT 762 - Signal Integrity for High Speed Circuits (3 Credits)
The concept of signal integrity for high speed circuits, signal parameters, transmission lines, I/O buffer models, clock schemes, serial data, package/die/connector modeling, I/O power delivery, and measurement.
Prerequisites: ELCT 561 or equivalent.

ELCT 763 - Semiconductor Device Modeling and Simulation (3 Credits)
Computer-aided semiconductor device modeling and simulation; Technology Computer-Aided Design (TCAD) tools for modern semiconductor devices.

ELCT 766 - Solid-State Lighting (3 Credits)
Solid-state light sources converting electricity directly into light and their societal impacts. Includes principles, fabrication, and applications of solid-state lamps and lighting systems.
Prerequisites: ELCT 566.

ELCT 771 - Optical Communications: Devices and Systems (3 Credits)
Principles of optical communications, optical signal modulation, optoelectronic devices for optical communications.
Prerequisites: ELCT 361, ELCT 363, and ELCT 581.

ELCT 772 - Advanced Power Electronics (3 Credits)
Advanced topics in power electronics to include rectifiers, inverters, resonant and soft switching converters, power converter system stability issues.
Prerequisites: ELCT 572.

ELCT 774 - Advanced Semiconductor Characterization (3 Credits)
Advanced semiconductor material characterization; Hall effect and mobility measurements, optical characterization, scanning probe microscopy, electron microscopy, X-Ray diffraction techniques; nanoscale characterization techniques.
Prerequisites: ELCT 574.

ELCT 782 - Power Semiconductor Devices (3 Credits)
The function and theory of operation of power semiconductor devices.
Prerequisites: ELCT 363.

ELCT 797 - Research (1-12 Credits)
Individual research to be arranged with the instructor.

ELCT 799 - Thesis Preparation (1-12 Credits)

ELCT 837 - Modern Control Theory (3 Credits)
The analysis and synthesis of linear, nonlinear, and discrete control systems employing the state space approach.
Prerequisites: ELCT 331.

ELCT 838 - Optimal Control and Estimation (3 Credits)
Optimal filtering, prediction, and smoothing in the presence of uncertainty.
Prerequisites: ELCT 331.

ELCT 839 - Robust Adaptive Control (3 Credits)
Theory and rigorous mathematical foundation for synthesis and analysis of robust adaptive controls for systems with uncertain dynamics. Lyapunov stability theory, robust control analysis, methods for model reference adaptive control with emphasis on L1 adaptive control.
Prerequisites: ELCT 331.

ELCT 861 - Advances in Electromagnetics (3 Credits)
Designate as special topics course.

ELCT 862 - Antennas and Radiation (3 Credits)
Prerequisites: ELCT 561.

Prerequisites: ELCT 361.
**Elementary Education (EDEL)**

**EDEL 505P - Inquiry Practicum: The Elementary School (1 Credit)**
Identifying and understanding the various components of the elementary environment through the practice of inquiry through field-based experiences.

Corequisite: EDEL 305.

**EDEL 506 - Integrated Curriculum in Elementary Schools (3 Credits)**
Examining and practicing a variety of approaches that connect the content of different elementary school subjects.
EDEL 701 - Culturally Sustaining Pedagogy for the Elementary Classrooms (3 Credits)
Theoretical and pedagogical approaches to Culturally Sustaining Pedagogy (CSP)—curriculum design tools and instructional strategies that reflect the diversity of students' cultural and linguistic backgrounds in elementary classrooms. Masters of Arts in Teaching for Elementary Education Majors.

EDEL 709 - Curriculum and Instruction Practices Designed to Teach Content & Literacy Across the Curriculum (3 Credits)
An investigation of the beliefs and practices of high quality instructional methods and materials designed to teach elementary readers, writers, mathematicians, scientists and social scientists. Individual content area instruction will be addressed as well as strategies for genuine integration across the curriculum. Special attention will be devoted to teaching diverse populations including English Language Users, in culturally responsive ways.

EDEL 715 - The Elementary School Curriculum (3 Credits)
Critical study of the modern elementary school curriculum.

EDEL 716 - The Elementary School Organization (3 Credits)
A course designed to examine the internal facets of the elementary school, including the library, health, guidance, and other pupil personnel services; curriculum revision; elementary school procedures; and pupil accounting.
Prerequisites: EDEL 715.

EDEL 717 - Curriculum Problems in the Elementary School (3 Credits)
A careful examination of the persistent problems of elementary schools (grouping, promotions, etc.) and the best solutions in terms of research findings and expert opinion.
Prerequisites: EDEL 715.

EDEL 720 - Middle School Organization and Curriculum (3 Credits)
An overview of the development of the middle school, history, purposes, and organization and an in-depth analysis of middle school organization and curriculum. The characteristics of middle school students, methods of evaluating students, and the overall curricular program are also considered.

EDEL 743 - Studies and Internship in Teaching Social Studies- Elementary (3 Credits)
The study and practice of social studies education for elementary students focusing on appropriate content, goals and methods.
Prerequisites: Admission to the MAT program.

EDEL 744 - Studies and Internship in Teaching Science - Elementary (3 Credits)
The study and practice of science education for elementary students focusing on appropriate content, goals and methods.
Prerequisites: Admission to the MAT program.

EDEL 745 - Teaching Elementary Problem Solving, Geometry and Measurement Topics (3 Credits)
Analysis of the school curriculum and instructional methods in the designated areas of mathematics; exploration of appropriate outcomes on instruction.
Prerequisites: MATH 221 or its equivalent.

EDEL 760 - Implementing Social Studies in the Elementary/Middle School (3 Credits)
The selection of teaching procedures and instructional materials used to teach social studies in the elementary/middle school.

EDEL 771 - Teaching Writing in Elementary and Middle School (3 Credits)
Writing instruction in relation to the developmental characteristics of children through preadolescence.

EDEL 780 - Seminar in Elementary Education (3 Credits)
Students will synthesize their graduate studies for a master’s degree in elementary education. 24 semester hours of credit earned as specified on the master’s degree program of study.

EDEL 790 - MAT Internship in Elementary Education (9 Credits)
Internship for practice in elementary classrooms (grades 2-6) related to curriculum design, assessment, interactive teaching, and professional roles. MAT in Elementary Education majors.
Prerequisites: Admission to Internship II in Elementary Education.
Corequisite: EDEL 791.

EDEL 790A - Internship II: Elementary School Instruction (4 Credits)
Internship for practice in classroom settings related to curriculum design and implementation, leading to initial certification.
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEL 790B, EDEL 790C, EDEL 791.

EDEL 790B - Internship II: Elementary School Professional Roles (4 Credits)
Internship for practice in classroom settings related to instruction, leading to initial certification.
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEL 790A, EDEL 790C, EDEL 791.

EDEL 790C - Internship II: Elementary School Professional Roles (4 Credits)
Internship for practice in classroom settings related to professional development, leading to initial certification.
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEL 790A, EDEL 790B, EDEL 791.

EDEL 791 - Elementary Internship Seminar (3 Credits)
Seminar for students seeking initial certification. Consideration of principles and theories of curriculum development and strategies to translate curriculum into personal classroom practice.
Prerequisites: Admission to MAT program and successful completion of first semester internship.
Corequisite: EDEL 790A, EDEL 790B, EDEL 790C.

EDEL 815 - Models of Instruction (3 Credits)
Seminar on the relationship between different models of teaching and the cognitive, affective, social, and psychological outcomes of instruction.
Prerequisites: master's degree in education.

EDEL 840 - Advanced Study of Teaching Elementary School Mathematics (3 Credits)
Identification of instructional methods implied by recent research on mathematics teaching, learning, and curriculum.
Prerequisites: EDEL 645 or EDEL 745.
ENGL 603 - Non-Fiction Prose Workshop (3 Credits)
Instruction in the writing of the nonfiction essay taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.

ENGL 604 - Seminar in Composition for the Visual Media (3 Credits)
Writing for the visual arts, the student will write a treatment (prospectus) and one or more multimedia scripts; or one or more teleplays; or a feature-length screenplay. Limited to 15 students.
Prerequisites: ENGL 101 and ENGL 102 or equivalent; ENGL 565 or equivalent experience in film as determined by the instructor.

ENGL 605 - Seminar in Composition for the Visual Media (3 Credits)
Writing for the visual arts, the student will write a treatment (prospectus) and one or more multimedia scripts; or one or more teleplays; or a feature-length screenplay. Limited to 15 students.
Prerequisites: ENGL 101 and ENGL 102 or equivalent; ENGL 565 or equivalent experience in film as determined by the instructor.

ENGL 606 - Playwriting Workshop (3 Credits)
Instruction in playwriting taught by a contemporary playwright. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.

ENGL 610 - Fiction Workshop: Book-Length Manuscript (3 Credits)
Instruction in the writing of book-length manuscripts taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 611 - Writing the Longer Nonfiction Project (3 Credits)
Instruction in the writing of a book-length nonfiction memoir or literary journalism project taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.

ENGL 612 - Writing Poetry: Traditional and Modern Forms (3 Credits)
The writing of traditional and modern poetic forms. Exercises will give practice in composing metered and free verse. Representative masterpieces of traditional and modern poetry will also be studied.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 613 - Writing the Full-Length Play (3 Credits)
Instruction in the writing of a full-length, two-act play for publication or production. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.

ENGL 615 - Academic and Professional Writing (3 Credits)
A workshop course in the development and revision of writing for academic and professional audiences.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 616 - Writing Children's and Young Adult Literature (3 Credits)
Critical study and practical crafting of literature for children and/or young adults, exploring the demands of these genres both through the reading of representative works and relevant secondary sources and through the writing of creative works. Undergraduate students must receive permission of instructor.
ENGL 620 - Computer Methods for Humanistic Problems (3 Credits)
Introduction to data processing concepts suitable for research interests in non-numerical areas such as the humanities. 03: 07/05/2019.

ENGL 620P - Laboratory for Computer Methods for Humanistic Problems (1 Credit)
Broad but intensive introduction to computer systems and programming for students in the humanities. No mathematical or scientific background is presumed. Laboratory experience with data-processing equipment; introduction to elementary digital computer programming in an appropriate language. 03: 07/05/2019.
Corequisite: ENGL 620.

ENGL 650 - Special Topics in Literature (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated for credit as topics vary.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 660 - Survey of Linguistics (3 Credits)
Survey of core areas of linguistics and extensions to closely related disciplines. Introduction to the linguistic component of human cognition. Formal description and analysis of the general properties of speech and language, the organization of language in the mind/brain, and cross-linguistic typology and universals.
Cross-listed course: ANTH 600, LING 600

ENGL 690 - Special Topics in Composition (3 Credits)
Course content varies and will be announced in the schedule of classes by title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 691 - Teaching of Literature in College (2 Credits)
Introduction to the methods of teaching literature, with emphasis on current pedagogical practice and theory and applications of electronic media. The course meets during the first seven weeks of the term and provides supervision of graduate students teaching English 101.

ENGL 692 - Teaching of Composition in College (1 Credit)
Introduction to the methods of teaching composition, with emphasis on current pedagogical practice and theory and applications of electronic media. The course meets during the first seven weeks of the term and provides supervision of graduate students teaching English 102.

ENGL 700 - Introduction to Graduate Study of English (3 Credits)
Lectures, discussions, and practical assignments in the history, principles, and methods of research into writings in English, taught by various members of the department. Recommended for M.A. and Ph.D. students in the first year of course work.

ENGL 701 - Special Topics in Old English Literature and Culture (3 Credits)
Selected topics in Old English literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 704 - Special Topics in Medieval Literature and Culture (3 Credits)
Selected topics in medieval literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 706 - Special Topics in 16th and 17th Century British Literature and Culture (3 Credits)
Selected topics in 16th and 17th century British literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 707 - Special Topics in 18th Century British Literature and Culture (3 Credits)
Selected topics in 18th century British literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 709 - Special Topics in 19th Century British Literature and Culture (3 Credits)
Selected topics in 19th century British literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 714 - Special Topics in 20th & 21st Century British Literature and Culture (3 Credits)
Selected topics in 20th and 21st century British literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 719 - Special Topics in Colonial American Literature and Culture (3 Credits)
Selected topics in colonial American literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 721 - Special Topics in 19th Century American Literature and Culture (3 Credits)
Selected topics in 19th century American literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 722 - Special Topics in 20th & 21st Century American Literature and Culture (3 Credits)
Selected topics in 20th and 21st century American literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 731 - Special Topics in Children's and Young Adult Literature (3 Credits)
Selected topics in children's and young adult literature. May be repeated up to five times for credit as topics vary.

ENGL 733 - Classics of Western Literary Theory (3 Credits)
Problems of literary theory in texts from the ancients to the 17th century, with an emphasis on the classical tradition.
Cross-listed course: CPLT 701

ENGL 734 - Modern Literary Theory (3 Credits)
Problems of literary theory from the 18th century to the 1960s.
Cross-listed course: CPLT 702

ENGL 736 - Special Topics in Gender and Sexuality Studies (3 Credits)
Selected topics in gender and sexuality studies. May be repeated up to five times for credit as topics vary.

ENGL 739 - Special Topics in Critical Race and Ethnic Studies (3 Credits)
Selected topics in critical race and ethnic studies. May be repeated up to five times for credit as topics vary.

ENGL 740 - Special Topics in Southern Literature and Culture (3 Credits)
Selected topics in literature and culture of the U.S. South. May be repeated up to five times for credit as topics vary.

ENGL 741 - Special Topics in African American Literature and Culture (3 Credits)
Selected topics in African American literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 743 - Special Topics in Women's Literature and Culture (3 Credits)
Selected topics in women's literature and culture. May be repeated up to five times for credit as topics vary.
ENGL 746 - Special Topics in Transatlantic Literature and Culture (3 Credits)
Selected topics in transatlantic literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 747 - Special Topics in Global Anglophone Literature and Culture (3 Credits)
Selected topics in global Anglophone literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 748 - Special Topics in Postcolonial Literature and Culture (3 Credits)
Selected topics in postcolonial literature and culture. May be repeated up to five times for credit as topics vary.

ENGL 749 - Special Topics in Performance Studies (3 Credits)
Selected topics in performance studies. May be repeated up to five times for credit as topics vary.

ENGL 754 - Special Topics in Film and Media Studies (3 Credits)
Selected topics in film and media studies. May be repeated up to five times for credit as topics vary.

ENGL 764 - Special Topics in Theory and Critical Methods (3 Credits)
Selected topics in theory and critical methods. May be repeated up to five times for credit as topics vary.

ENGL 765 - Advanced Film Study (3 Credits)
Methods of film analysis, resources for research, and the major critical theories.
Cross-listed course: CPLT 765

ENGL 766 - Special Topics in Genre, Form, and Aesthetics (3 Credits)
Selected topics in genre, form, and aesthetics. May be repeated up to five times as topics vary.

ENGL 776 - Introduction to Bibliography and Textual Studies (3 Credits)
Introduction to analytical, descriptive, and textual bibliography, and to the principles and practice of editing. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 781 - History of English Language (3 Credits)
The historical background of Modern English with attention to the major linguistic and cultural developments which distinguish English from other related languages. No prior knowledge of Old English or Middle English is required. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.
Cross-listed course: LING 731

ENGL 782 - Varieties of American English (3 Credits)
Social and regional variation in American English since the colonial period. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.
Cross-listed course: LING 745

ENGL 788 - Stylistics (3 Credits)
Linguistic analysis of literary texts. Linguistic definition of style; stylistic choices as the author’s voice. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 789 - Poetics (3 Credits)
The question of meaning in poetry with special attention to linguistic structure as the source of that meaning; also prosody and related formal effects. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 790 - Survey of Composition Studies (3 Credits)
Comprehensive survey of the history and development of composition studies, and of the present state of knowledge about theories, principles, and practices in the field. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 791 - Introduction to Research on Written Composition (3 Credits)
Introduction to the types and methods of research on written composition, both qualitative and quantitative, with intensive analysis of representative exemplars of these types and methods. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 792 - Classical Rhetoric (3 Credits)
Survey of ancient Greek and Roman rhetorical theory. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 793 - Rhetorical Theory and Practice, Medieval to Modern (3 Credits)
Survey of major theories of rhetoric from medieval to modern times. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 794 - Modern Rhetorical Theory (3 Credits)
Survey of 20th-century contributions to rhetorical theory. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 795 - The Teaching of Business and Technical Writing (3 Credits)
A study of theory and practice in business, technical, and scientific writing with emphasis on the pedagogical materials and techniques available to the business and technical writing teacher. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 796 - Special Topics in the Teaching of English (1-3 Credits)
Exploration of issues relevant to the teaching of literature, composition, rhetoric, or speech communication. May be repeated for credit as topics vary.

ENGL 797 - Current Scholarship in Rhetoric and Composition (3 Credits)
Close study of annual issues of recent journals in the field to identify current trends in research and models for scholarly writing.

ENGL 799 - Thesis Preparation (1-9 Credits)
Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 803 - Special Topics: Seminar in Literary and Cultural Studies (3 Credits)
Specialized study in literary and cultural studies. May be repeated up to four times for credit as topics vary.

ENGL 804 - Special Topics: Seminar in Theory and Critical Methods (3 Credits)
Specialized study in theory and critical methods. May be repeated up to four times for credit as topics vary.

ENGL 805 - Special Topics: Seminar in Media Studies (3 Credits)
Specialized study in digital, print, and/or cinematic media. May be repeated up to four times for credit as topics vary.
ENGL 831 - Theory of Prose Fiction (3 Credits)
Various types of prose fiction from folk tales and fables to short stories and novels; including historical changes in fictional forms, the function of technical devices, and modern theories of narrative. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 832 - Theory of Poetry (3 Credits)
A study of various aspects of poetry as an art form, including rhythm, meter, sound, color. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 846 - Studies in Southern Literature (3 Credits)
Topics selected by the instructor for specialized study.

ENGL 850 - Studies in British and American Literature (3 Credits)
Topics selected by the instructor for specialized study. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 862 - Special Topics in Children's and Young Adult Literature (3 Credits)
Special topics selected by instructor for specialized study. May be repeated as content varies by title.

ENGL 870 - Seminar in Bibliography, Textual Criticism, and Editing (3 Credits)
Seminar in analytical and descriptive bibliography. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 871 - Seminar in Bibliography, Textual Criticism, and Editing (3 Credits)
Seminar in textual criticism and editing of specific forms of publication (e.g., manuscripts, plays, poetry, novels). Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 872 - Seminar in Bibliography, Textual Criticism, and Editing (3 Credits)
Seminar in textual criticism and editing of particular periods of English or American literature. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 890 - Studies in Rhetoric and Composition (3 Credits)
Topics selected by the instructor for specialized study. May be repeated as topics vary. Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 895 - Directed Reading and Research (1-3 Credits)
Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 896 - Directed Reading and Research (1-3 Credits)
Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

ENGL 899 - Dissertation Preparation (1-12 Credits)
Non-degree students may not enroll without the consent of the Director of Graduate Studies in English.

Engr and Computing (ENCP)

ENCP 540 - Environmentally Conscious Manufacturing (3 Credits)
Design for the environment; life cycle analysis; environmental economics and global competitiveness; legal and regulatory affairs; and management of technological change. Interdisciplinary collaboration of engineering, science, math, and business majors. Graduate student standing or consent of instructor.

ENCP 602 - Introduction to Engineering Design for Teachers (3 Credits)
An introduction to computer-aided design with solid modeling for pre-service and in-service teachers. Design process, professional communication and collaboration methods, design ethics, and technical documentation. Non-engineering and computing majors only.

ENCP 603 - Gateway to Technology for Teachers (3 Credits)
Addresses the development of knowledge, skills, and understanding of modern technology. For pre-service and in-service teachers. College of Engineering and Computing majors are excluded.

ENCP 605 - Principles of Engineering for Teachers (3 Credits)
Introduces technological processes employed in engineering and engineering technology for K-12 teachers. For pre-service and in-service teachers. College of Engineering and Computing majors are excluded.

ENCP 701 - Introduction to Engineering for Teachers I (3 Credits)
Participants will develop skills and knowledge to teach ENCP 101. For teachers and graduate students in teacher education programs. Restricted to nonengineering majors only.

ENCP 702 - Engineering Graphics with Solid Modeling for Teachers (3 Credits)
An introduction to computer-aided design with solid modeling for K-12 teachers. For teachers and graduate students in teacher education programs.

ENCP 704 - Digital Electronics for Teachers (3 Credits)
An introductory course in digital electronics for K-12 teachers. For teachers and graduate students in teacher education programs. Restricted to nonengineering majors only.

ENCP 707 - Continuum Mechanics (3 Credits)
Development of theory of strain and of stress; constitutive equations; compatibility conditions; equations of motion. An introduction to courses in mechanics of solids and of fluids.

ENCP 710 - Dynamic Analysis (3 Credits)
Analysis of lumped and continuous multidegree of freedom mechanical systems. Transfer function analysis. Response of systems to steady-state, shock, and random excitation. Introduction to non-linear vibrations and wave propagation.

Prerequisites: ENCP 424.
**ENCP 721 - Elasticity (3 Credits)**
Equilibrium, strain-displacement, compatibility, and constitutive equations in terms of complex potential stress functions, applications to plane engineering boundary value problems including beams, disks, thick-walled tubes, and stress concentration problems.
**Prerequisites:** ENCP 707.

**ENCP 730 - Cases in Technology Feasibility Analysis (3 Credits)**
Technology innovation, exploitation of intellectual property, and technology feasibility analysis.

**ENCP 733 - Legal Aspects of Engineering & Innovation (3 Credits)**
Contracts, products liability, intellectual property including patent, trade secrets, copyrights and trademarks, and business torts relating to product design.

**ENCP 734 - Prototype Design & Manufacturing (3 Credits)**
Development processes and organization, product planning, manufacturing principles, and prototyping.

**ENCP 735 - Developing and Launching New Ventures in Science and Technology (3 Credits)**
Processes, strategies and tools to analyze and facilitate the emergence of science and technology oriented ventures.

**ENCP 736 - Innovation and New Venture Analysis (3 Credits)**
Entrepreneurial perspective and planning, market preparation, business model analysis, business planning and fundraising.

**ENCP 737 - Entrepreneurial Laboratory (6 Credits)**
Supervised experience in the field of technology innovation and engineering entrepreneurship.

**ENCP 789 - Advanced Special Topics in Engineering and Computing (0-3 Credits)**
Special topics of an interdisciplinary nature for graduate students of engineering and computing. Course content varies and will be announced in the schedule of classes by title.

**Environment (ENVR)**

**ENVR 500 - Environmental Practicum (3 Credits)**
Multidisciplinary research projects related to University or community environmental problems (e.g., energy, water conservation, solid waste, recycling).

**ENVR 501 - Special Topics in the Environment (3 Credits)**
An in-depth analysis course of a specific interdisciplinary environmental topic. Course content varies and will be announced in the schedule of classes by title.
**Prerequisites:** ENVR 101 or ENVR 201.

**ENVR 531 - Sustainability Management and Leadership Strategies (3-4 Credits)**
Integrated management system principles and advanced leadership strategies to create sustainable development initiatives.

**ENVR 533 - Sustainability Projects Course (3 Credits)**
Research, development and implementation of sustainability projects throughout the campus and community.

**ENVR 538 - Global Food Politics (3 Credits)**
Political, social, and cultural landscapes of food and farming around the world; issues of agricultural production, trade, consumption, and food security.
**Cross-listed course:** GEOG 538

**ENVR 540 - Decolonizing the Environment: Race, Nature, Power (3 Credits)**
Critical examination of the ways ideas about nature and racial difference are conceptually and materially entwined with the production of social and environmental inequalities.

**ENVR 548 - Environmental Economics (3 Credits)**
An analysis of the economics aspects of environmental decay, pollution control, and natural resource use. Analysis of the ability of the market system to allocate resources efficiently when economic activity is accompanied by environmental damage. Discussion of alternative public policy approaches to pollution control and natural resource conservation.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

**Cross-listed course:** ECON 548

**ENVR 571 - Conservation Biology (3 Credits)**
Principles of conservation biology. Importance of biodiversity, causes of decline and extinction, and restoration and conversation policy in terrestrial and aquatic ecosystems. 03: 07/05/2019.
**Prerequisites:** BIOL 301.

**Cross-listed course:** BIOL 571

**ENVR 572 - Freshwater Ecology (3 Credits)**
Quantitative study of the population, community and evolutionary ecology of freshwater habitats (lakes, ponds, rivers, streams, wetlands). Includes mandatory fieldtrips.
**Prerequisites:** BIOL 301.

**Cross-listed course:** BIOL 572

**ENVR 590 - Environmental Issues Seminar (3 Credits)**
Collaborative study of a contemporary environmental issue. Field trips may be required. Restricted to Environmental Science and Environmental Studies majors.
**Prerequisites:** BIOL 301.

**ENVR 700 - Current Topics in Environmental Studies (3 Credits)**
Current issues, policies, and regulations pertaining to environmental studies. Emphasizes integrated multidisciplinary approaches toward identification, evaluation, preservation, mitigation, and/or utilization of environmentally sensitive material and sites.

**ENVR 725 - International Environmental Management Systems (3 Credits)**
International environmental management systems standards will be integrated with business planning to provide students with the best strategies for future growth in today’s environmentally sensitive global economy.

**ENVR 790 - Directed Individual Studies (1-6 Credits)**
Directed research topics to be individually assigned.

**ENVR 795 - Environmental Internship Preparation (1-3 Credits)**
Preparation and presentation of a capstone project plan for conduct of multidisciplinary environmental research addressing public/private/non-profit sector issues through an internship in government agencies, NGOs or private industry.
**Prerequisites:** One semester full-time graduate enrollment or equivalent.
Environmental Hlth Sci (ENHS)

ENHS 515 - Introduction to Public Health and Emergency Preparedness and Response (3 Credits)
Introduction to emergency preparedness and response in relation to environmental and public health. Historical context for the emergence of public health emergency preparedness and demonstration of articulation with community response partner agencies in the post-9/11 era.

ENHS 592 - Advanced Special Topics in Environmental Health (1-3 Credits)
Emerging issues and topics concerning environmental health. May be repeated as content varies by title up to a total of 9 credit hours.

ENHS 625 - Medical Mycology (3 Credits)
Advanced study of infectious diseases caused by fungi. Etiology, symptoms, and treatment of fungi related illnesses.
Cross-listed course: BIOL 625

ENHS 660 - Concepts of Environmental Health Science (3 Credits)
Environmental health sciences presenting the earth as a complex system in which people, plants, animals, and non-living physical-chemical components interact.

ENHS 661 - Parasitology (4 Credits)
Parasites of biological, economic, and public health importance.
Prerequisites: 300 level Biology course or equivalent.
Cross-listed course: BIOL 531, EPID 661

ENHS 662 - Industrial Health Programs (3 Credits)
Analysis, planning, and implementation of programs to protect workers' health in industry; legislative and regulatory background.

ENHS 664 - Environmental Genomics (3 Credits)
"State of the art" molecular techniques that elucidate mechanisms of environmental contaminants in model systems.

ENHS 665 - Biofilms in Environmental Health and Disease (3 Credits)
Effect of bacterial biofilm process on many diverse areas. Recognition, prevention, and control of biofilm-related problems in the environment, health care, industry, and engineering.

ENHS 666 - Metals and Human Health (3 Credits)
Trace metal(loid)s, their fate and transport in the environment and their potential impacts on human health.
Prerequisites: BIOL 101 or BIOL 110; CHEM 101 and CHEM 102, or equivalent.

ENHS 670 - Environmental Pollutants and Human Health (3 Credits)
Overview of environmental pollutants and their impact on human health; case studies of environmental catastrophes; principles of ecotoxicology; air, water, and land pollution associated with neurotoxicity, toxicology, and carcinogenesis.
Prerequisites: BIOL 101 or BIOL 110; CHEM 101 and CHEM 102.

ENHS 671 - From Air to Alveoli: Exposure Science (3 Credits)
A receptor-oriented approach for assessing human exposure to environmental contaminants by inhalation, dermal and ingestion routes. Covers methods for estimating exposures to protect health and well-being, to relate adverse effects to exposures, and to comply with regulations and guidelines.

ENHS 675 - Infectious Disease Ecology (3 Credits)
Ecological theories as the basis for environmental change and the (re)emergence of infectious agents that ultimately impact human and ecosystem health.

ENHS 681 - Occupational Ergonomics I (3 Credits)
Introduction to ergonomics: hazards identification and analysis; solution design and implementation; human musculoskeletal characteristics, injuries; effects of work on performance, safety, and health. Application to manufacturing and office environments.

ENHS 740 - Environmental Nanoscience (3 Credits)
Fundamental principles of environmental nanoscience: unique properties of nanomaterials, syntheses and characterization of nanomaterials, and key processes determining their environmental fate and behavior of nanomaterials.

ENHS 750 - MPH Capstone Course (2 Credits)
Synthesis of foundational and ENHS MPH competencies in preparing a high quality grant proposal to address a public health issue.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, ENHS 660.

ENHS 755 - Marine Conservation and Environmental Health (3 Credits)
Explores the intersection between conservation and environmental health with a particular focus on coastal and marine case studies. 03: 07/05/2019.

ENHS 760 - Fundamentals of Air Pollution (3 Credits)
Chemical and physical aspects of air pollution and their regulatory problems. An examination of air pollution sources; physical and chemical processes affecting pollutants after emission; pollutants and their effects and the ultimate fate of pollutants. Attention is also given to the legal, administrative, and technical aspects of air pollution control.
Prerequisite or Corequisite: ENHS 660.
ENHS 761 - Ecotoxicology of Aquatic Systems (3 Credits)
Lethal and sublethal effects of environmental stressors on organisms living in the water column and in sediments of aquatic systems. Practical techniques of aquatic toxicology, risk assessment and modeling.

ENHS 762 - Fundamentals of Industrial Hygiene (3 Credits)
Industrial hygiene, including health effects, occupational health standards, and the evaluation and control of occupational health hazards.

ENHS 763 - Medical Aspects of Occupational Health (3 Credits)
Emphasizes the medical aspects of exposure to hazardous materials, accidents, and mental and physical stresses on the job. Clinical spectrum of occupational illness with some emphasis on industrial toxicology.

ENHS 764 - Principles, Methods, and Issues in Air Quality (3 Credits)
Fate, transformation, and behavior of pollutants in the atmosphere. Exposure and human health impacts of atmospheric particles.
Prerequisite or Corequisite: ENHS 660.

ENHS 765 - Applied Research in the Environmental Health Sciences (3 Credits)
Current and prospective research associated with the multi-disciplinary areas of environmental health sciences. Critical evaluation of scientific research, and technical writing and oral presentations.

ENHS 766 - Applied Aquatic Sciences (3 Credits)
The quantitative application of principles of basic physical, biological, and geochemical principles in assessing and solving environmental problems in lakes, streams, and wetlands. Emphasis on watershed-water quality interactions, trophic state analyses, wasteload impact prediction, toxic chemical fate and transport, wetland values, and classification.
Prerequisites: ENHS 660, pre-calculus math, general ecology.

ENHS 766L - Applied Aquatic Sciences Laboratory (1 Credit)
Sampling and analysis of the interacting parameters used in assessing water quality and the functioning of aquatic systems.
Corequisite: ENHS 766.

ENHS 767 - Ecological Modeling and Environmental Planning (4 Credits)
Concepts in systems ecology and ecological modeling. Emphasis on the use of models and computer simulations in examining environmental interactions, predicting environmental impact, and facilitating the process of environmental planning. Lab practice in model development and computer simulation analysis.
Prerequisites: MATH 111 or equivalent, ecology, ENHS 660.

Cross-listed course: BIOL 768, MSCI 767

ENHS 768 - Industrial Ventilation and Hazard Control (3 Credits)
Control of chemical and physical hazards in the occupational environment. Course covers principles and design of health protection systems such as ventilation systems, collection mechanisms, control of physical factors (excluding radioactivity).
Prerequisites: college math and ENHS 762 or consent of instructor

ENHS 769 - Exposure and Risk Assessment (3 Credits)
Designing, implementing, and analyzing environmental exposures in the field; error analysis; computation of the value of improved information; hazard identification; dose-response evaluation; and risk characterization.
Prerequisites: MATH 141, CHEM 111 and CHEM 112, and BIOS 700 or STAT 701.

ENHS 770 - Microbial Processes and Pollution (3 Credits)
Microbial processes which alter the fate, bioavailability, and toxicity of environmental pollutants: biotransformations of metals and organic pollutants; resistance mechanisms and roles of microbial biofilms in toxin transfer.

ENHS 771 - Environmental Health Sciences Seminar (1 Credit)
Environmental Health Sciences Seminar is a one credit course that provides the opportunity for graduate students within the department and other related departments/programs to enhance and broaden their knowledge in environmental health by exploring current research and case studies.

ENHS 772 - Human and Ecological Risk Assessment (3 Credits)
Focuses on history, theory, and practice of predicting, managing, and communicating potential human health and environmental risks of hazardous chemicals. Reviews fundamental components and explores uncertainties, probabilistic approaches, and ‘real-world’ challenges of risk analysis.

ENHS 773 - Radiation Health Physics (3 Credits)
Physics of radiation and associated health hazards; hazard evaluation and measurements; radiation content and protection of the individual. Course covers ionizing radiation, ultraviolet, microwave, lasers, R.F. field, and ultra-sound.
Prerequisites: ENHS 660.

ENHS 774 - Risk Assessment and Interactions of Environmental Toxics (3 Credits)
A study of biological interactions and transformation of environmental toxics at the cellular and subcellular levels, and assessment of cellular damage as it relates to health hazards and risks. Topics to include: environmental toxics; exposure measurements; factors affecting interactions and toxicity; metabolism of xenobiotics: types and levels of effects and interactions; and human health risks.
Prerequisites: ENHS 660.

ENHS 775 - Resource Management and Environmental Impact Assessment (3 Credits)
Prerequisites: BIOL 102 and BIOL 570.

ENHS 776 - Environmental Regulation and Planning (3 Credits)
Introduction to environmental planning. Survey of major federal environmental legislation. Review of processes and techniques of environmental planning including zoning, permits, management plans, assessments, and evaluation methods. Case studies of significant environmental projects.

ENHS 777 - Radiation Biology (3 Credits)
Fundamentals on the biological effects of ionizing radiation on living systems, especially man; basic biological mechanisms which bring about somatic and genetic effects.
Prerequisites: ENHS 660, ENHS 773.

ENHS 778 - Air Pollution Monitoring and Modeling (3 Credits)
Sources, sinks, transport, and transformation of air pollutants. Health effects that occur directly or by intermediate transport. Current monitoring methods and modeling techniques for air pollution.
Prerequisites: one year each of general chemistry and physics.
ENHS 779 - Applied Environmental Physiology (4 Credits)
Lecture and laboratory investigations concerning sublethal and lethal physiological responses of aquatic organisms to a variety of environmental pollutants. Stresses the in-depth understanding of the effects of: bacterial and thermal pollution, pesticides/herbicides, industrial chemicals, hazardous materials, and petroleum hydrocarbons on different physiological mechanisms.
Prerequisites: ENHS 660, ENHS 761.

ENHS 780 - Advanced Seminar in Environmental Modeling (1-2 Credits)
A critical review of recent advances and case histories in the formulation and use of ecological/ environmental models. Ecosystems analysis and environmental planning.

ENHS 781 - Occupational Ergonomics II (3 Credits)
Literature reviews and applications in evaluation of hazards and design of ergonomic interventions including human factors in information processing, design of displays and controls, vibration, macroergonomics, fatigue, and shiftwork.
Prerequisites: ENHS 681

ENHS 787 - Analytical Concepts for Environmental Health Sciences (3 Credits)
Physical and chemical principles of environmental qualitative and quantitative analysis with emphasis on atmospheric, aquatic, and terrestrial samples. Includes use and limitations of instrumental techniques, sampling strategies, data management and reduction, and quality assurance programs.

ENHS 788 - Concepts of Hazardous Materials Management I (3 Credits)
Chemical and physical principles of multimedia contaminant transport, environmental effects of hazardous materials, statutes and regulations classification, treatment and disposal of hazardous materials.

ENHS 789 - Concepts of Hazardous Materials Management II (3 Credits)
Chemical and physical properties of hazardous materials; use and storage; disposal options; transportation requirements; site safety considerations; management systems involving hazardous materials.
Prerequisites: ENHS 788

ENHS 790 - Independent Study (1-6 Credits)

ENHS 793 - Special Topics in Environmental Health Sciences (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

ENHS 794 - Introduction to Environmental Science Research (3 Credits)
The course is intended to develop theoretical and practical knowledge in environmental science research. The learning formats will permit focus on areas of interest as a means to develop the research skills for later projects. Guided by focus, students may work in the laboratory, field, and/or use existing data.

ENHS 795 - Issues in Coastal Environmental Health (3 Credits)
Problems associated with coastal population growth and development. Emphasis is on the working group approach to ameliorating impacts on ecosystem and human health. 03: 07/05/2019.

ENHS 796 - Introduction to Nanoanalytics (3 Credits)
Laboratory based course aimed at developing theoretical and practical knowledge in regards to nanoscience in toxicology and in the environment. Students will perform nanoparticle syntheses, characterization, fate and behavior studies or toxicology exposures. Learning formats will permit focus on areas of interest aimed at developing research skills.

ENHS 797 - Global Environmental Health and Food Security (3 Credits)
Global environmental health with a focus on food security in developing nations, including crop responses to warming, soil changes, more variable precipitation inputs and expanding geographical range of pests.

ENHS 798 - Public Health Practice (1-6 Credits)
Performance of a limited work or service project in a public need setting, pursuit of planned learning objectives related to previously identified aspects of the student’s chosen role. Self-monitoring and regular seminars focusing on learning accomplishments.
Prerequisites: 9-10 hours of specified courses including BIOS 700, EPID 700.

ENHS 799 - Thesis Preparation (1-9 Credits)

ENHS 860 - Environmental Radiation Surveillance (4 Credits)
Technical coverage relevant to a practical evaluation of radiation sources and contaminants in the environment.
Prerequisites: ENHS 773.

ENHS 861 - Aerosol Science (3 Credits)
Physical and chemical principles applied to the behavior and properties of particles suspended in air. Course covers motion under applied forces, electrical properties, diffusion, removal from gas, cloud dynamics, and optical properties.

ENHS 862 - Special Research Topics in Environmental Health Sciences (3 Credits)
Discussion and/or laboratory participation involving techniques used in multidisciplinary research areas of environmental health sciences that have not been covered by other courses. May be repeated for credit on different topics.
Prerequisites: BIOS 700, EPID 700, ENHS 660.

ENHS 863 - Advanced Topics in Environmental Planning (3 Credits)
Detailed analyses of techniques, especially computer simulation modeling, used in environmental assessment and planning. Emphasis will be on the prediction of the ecological effects of development projects. Students will collectively construct a simulation model for the purpose of environmental assessment.
Prerequisites: ENHS 767, ENHS 775.

ENHS 864 - Advanced Graduate Seminar (3 Credits)
Seminar presentation and group discussion by students, faculty, and guest speakers on current topics in environmental health sciences. May be repeated for credit.
Prerequisites: Complete at least two semesters in environmental health sciences and courses to include ENHS 660, ENHS 765.

ENHS 880 - Ethics & Research Prep (1 Credit)
Overview of skills and standards, including ethics and research preparation, for Environmental Health Sciences doctoral students.

ENHS 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: one full year (18 hrs) of graduate study beyond the master’s level.
Epidemiology (EPID)

EPID 594 - Special Topics in Epidemiology (1-6 Credits)
This course will introduce epidemiologic concepts and methods using cases studies examining current global health challenges. Students will gain an understanding of the role of epidemiology in understanding the distribution of disease and risk factors, and developing, implementing and evaluating public health interventions globally.

EPID 661 - Parasitology (4 Credits)
Parasites of biological, economic, and public health importance. Three lecture and three laboratory hours per week.
Prerequisites: 300 level Biology course or equivalent.
Cross-listed course: BIOL 531, ENHS 661

EPID 700 - Introduction to Epidemiology (3 Credits)
Principles of epidemiology with examples of selected health problems. Health status of populations and conceptual tools for translating epidemiologic findings into public health action. May not be used as part of a degree program in epidemiology or biostatistics.
Prerequisite or Corequisite: BIOS 701.

EPID 701 - Concepts and Methods of Epidemiology (3 Credits)
Conceptual foundation of epidemiologic research, quantitative methods, and epidemiologic study design. Intended for those who will be involved in epidemiologic research.
Prerequisite or Corequisite: BIOS 701.

EPID 707 - Ethical Issues in Health Care and Research (3 Credits)
The ethical dimensions of decision making in health care delivery, administration and epidemiologic research. Provides ethical foundations for discussion of topics in health-related research and practice.
Cross-listed course: HSPM 707

EPID 711 - Epidemiologic Research Methods (3 Credits)
Theoretical and practical aspects of epidemiologic research methods.
Prerequisites: EPID 700

EPID 720 - Comprehensive Microbiology (6 Credits)
Prerequisites: consent of the instructor.

EPID 721 - Clinical and Population Research Protocol Development and Implementation (2 Credits)
The purpose of this course is to develop applied research skills related to the development of appropriate data collection protocols for a given public health issue and context.

EPID 722 - Scientific Writing and Appraisal of Epidemiologic Studies (2 Credits)
This course will familiarize students with techniques used to critically assess, interpret, evaluate, and synthesize epidemiologic literature. Students will be introduced to research databases, reference management software, reporting guidelines, and methods for systematic reviews. Students will learn how to effectively communicate research finding via manuscript and oral or poster format.
Prerequisites: EPID 700, EPID 701 or PUBH 725.

EPID 725 - Biologic Basis of Public Health (3 Credits)
Survey of the biology of human disease processes at cellular, tissue and body system levels: application of biological principles to contemporary public health problems.

EPID 730 - Public Health Surveillance Systems (3 Credits)
Introduction to the concepts, implementation, and evaluation of surveillance systems to monitor the health of human populations.
Prerequisites: EPID 701, PUBH 725, or equivalent course

EPI 741 - Intermediate Epidemiologic Methods (3 Credits)
Application of epidemiologic methods to current health problems through analysis of secondary data. Strategies for investigating etiologic hypotheses, assessment and control of confounding.
Prerequisites: EPID 701, PUBH 725, or equivalent.

Prerequisite or Corequisite: BIOS 757, BIOS 758 and BIOS 709, BIOS 710.

EPID 742 - Epidemiological Concepts in Selected Disease or Health Conditions (3 Credits)
The study of selected disease or health conditions illustrative of the interaction between host/agent/environment and the factors involved; and the application of epidemiologic methods to the investigation of such events. Two lecture and three laboratory hours per week.
Prerequisites: EPID 701.

EPID 743 - Nosocomial Disease Control (3 Credits)
Specialization in the identification of potential or existing health hazards in institutional settings of the health care system; and includes instruction in the application of scientific knowledge to the daily routines in the implementation of appropriate control behaviors. Two lecture and three laboratory hours per week.
Prerequisites: BIOS 700, EPID 700, EPID 742.

EPID 744 - Cardiovascular Disease Epidemiology (3 Credits)
Epidemiology of selected groups of cardiovascular diseases (CVD) including etiology, pathophysiology, identification and description of events of CVD, and outcomes.
Prerequisites: EPID 701, PUBH 725.

EPID 745 - Seminar in Epidemiology (1-2 Credits)
Analysis of current and prospective issues in epidemiology, including historical foundations. Includes student exploration and critical consideration of current research and unsolved problems in epidemiology.

EPID 746 - Cancer Epidemiology (3 Credits)
Epidemiology of selected cancers in humans, including etiology, pathophysiology, identification and description of events of cancer and outcomes.
Prerequisites: EPID 700.

EPID 747 - Environmental Epidemiology (3 Credits)
Emphasis on the epidemiology of selected environmental factors which may affect human health including the identification of health hazards and methods of investigation. Two lecture and three laboratory hours per week.
Prerequisites: EPID 700, BIOS 700.

EPID 748 - Epidemiologic Evaluation of Preventive and Personal Health Care (3 Credits)
Emphasis is on the use of epidemiologic methods and principles in the selection, design, and implementation of evaluation strategies in preventive and personal health service practice areas. Current models and strategies of evaluation appropriate to public health practice will be analyzed and compared. The student is expected to develop and implement an evaluation design. Two lecture and three laboratory hours per week.
Prerequisites: EPID 700, BIOS 700.
EPID 749 - Infectious Diseases Epidemiology (3 Credits)
Emphasis on epidemiological principles and methods basic to investigation, prevention and control of a variety of bacterial, viral, parasitic, and fungal diseases of public health importance.
Prerequisites: EPID 700 and BIOS 700.

EPID 750 - Methods in Infectious Disease Epidemiology (3 Credits)
Quantitative methods for the study of infectious disease dynamics, including study design and analysis, mathematical modeling, computer simulation, and phylogenetic inference.
Prerequisites: EPID 741 and EPID 749.

EPID 751 - Sexually Transmitted Diseases: Their Epidemiology and Control (3 Credits)
A study of the epidemiology of the various sexually transmitted diseases and their complications, with emphasis on their prevention and control.
Prerequisites: EPID 700 and BIOS 700.

EPID 752 - Epidemiology and Control of Parasitic Diseases of Public Health Importance (3 Credits)
Study of major parasitic diseases of public health importance. Emphasis on epidemiologic principles and patterns of human morbidity and mortality. Analyzes and evaluates various approaches in prevention and control programs.
Prerequisites: EPID 700, BIOS 700, and ENHS 661.

EPID 753 - AIDS: Epidemiology and Control (3 Credits)
A study of the epidemiology of Acquired Immunodeficiency Syndrome (AIDS) and its various implications and issues with emphasis on its prevention and control.

EPID 754 - AIDS Seminar (1 Credit)
Critical analysis of current scientific literature on various aspects and issues on Acquired Immunodeficiency Syndrome (AIDS).

EPID 755 - Emerging Infectious Diseases: Epidemiology and Pathobiology (3 Credits)
Principles and factors in emerging infectious diseases with emphasis on epidemiology, pathobiology, prevention, and control.
Prerequisites: EPID 749.

EPID 757 - Epidemiologic Applications to Occupational Health (3 Credits)
Introduction to clinical and epidemiologic aspects of occupational health and recognition and prevention of occupational diseases and injury. Epidemiologic applications to occupational health are highlighted and stressed, including design and implementation.
Prerequisites: EPID 700 or EPID 701.

EPID 758 - Application of Epidemiology in Public Health (3 Credits)
The course consists of the development of research skills in epidemiology in the context of public health.
Prerequisites: EPID 701, EPID 741.

EPID 760 - Epidemiological Methods in Clinical Trials (3 Credits)
Fundamental and practical issues related to the design, conduct, analysis, and interpretation of results of clinical trials.
Prerequisites: EPID 700, BIOS 700, EPID 741.

EPID 763 - Nutritional Epidemiology (3 Credits)
Covers methodology for investigating nutrition’s role in health, including nutritional assessment and the design and interpretation of research studies. Substantive issues emphasize major public health concerns of the 21st century.
Prerequisites: EPID 701, PUBH 725, or equivalent.

EPID 765 - Reproductive and Perinatal Epidemiology (3 Credits)
Epidemiology of reproductive and perinatal health with emphasis on current research, controversial issues and methodological approaches.
Prerequisites: EPID 701, PUBH 725, or equivalent course, BIOS 701.

EPID 767 - GIS and Public Health Applications (3 Credits)
Principles and application of basic and intermediate-level GIS technologies in public health practice and research.

EPID 768 - Psychiatric Epidemiology (3 Credits)
Methodologic issues in the epidemiologic study of psychiatric disorder, the epidemiology of major psychiatric outcomes, and issues in the study of special populations.
Prerequisites: EPID 701, PUBH 725, or equivalent course.

EPID 770 - Social Epidemiology (3 Credits)
Influence of social factors and the distribution of those factors on patterns of health and disease. Including individual-level examinations of the role of social determinants in producing health, as well as more macro-level examinations of patterns of social disparities in health status.
Prerequisites: EPID 701, PUBH 725, or equivalent course.

EPID 777 - Genetic and Epigenetic Epidemiology (3 Credits)
An introduction to genetic and epigenetic epidemiology and application of epidemiological tools, including statistical analyses, to the study of the genome and the epigenome in human populations.

EPID 785 - Laboratory Practice in Clinical Microbiology (3-6 Credits)
Laboratory practice in the subdisciplines of clinical microbiology. May be repeated for a total of 18 hours.
Prerequisites: EPID 700, EPID 742, BIOS 700, MBIM 720.

EPID 788 - Practical Methods for Secondary Data Analysis (3 Credits)
Introduction to data sources and methods commonly used by epidemiologists and health analysts in state or federal health departments and research settings. Methods include data management and analysis using SAS, data interpretation, survey designs, and innovative record linkages. Instructor reserves the right to waive course requirements.
Prerequisites: BIOS 700 BIOS 701; EPID 700 EPID 701; BIOS 757 BIOS 758, BIOS 754.

Prerequisite or Corequisite: EPID 741 or other equivalent research methods class.

EPID 790 - Independent Study (1-6 Credits)
Directed research on a topic to be developed by M.P.H. or M.S.P.H. student and instructor. May be repeated.

EPID 794 - Selected Topics in Epidemiology (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

EPID 796 - Integrated Learning Experience (1 Credit)
Demonstrate synthesis of MPH foundational and concentration competencies to address a public health issue in the form of a high-quality written product.
EPID 798 - Epidemiology Applied Practicum (2 Credits)
Apply and test public health concepts, theories, and analytical tools learned in the classroom to real-world public health issues outside of the classroom in any one of a variety of settings.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, and PUBH 735.

EPID 799 - Thesis Preparation (1-9 Credits)

EPID 800 - Advanced Methodological Theory in Epidemiology (3 Credits)
Advanced epidemiologic methods in the design of epidemiologic studies, with emphasis on causal inference. Theories and frameworks of causation and interactions between causes and graphical visualization tools.
Prerequisites: EPID 741.

EPID 801 - Advanced Analytic Methods in Epidemiology (3 Credits)
Extension of research design and development issues with focus on grant writing.
Prerequisites: EPID 800.

EPID 802 - Grant Writing for Epidemiologists (3 Credits)
Extension of research design and development issues with focus on writing a major research grant application.
Prerequisites: EPID 741.

EPID 810 - Seminar in the Epidemiology of Trauma (3 Credits)
Seminar presentation and group discussion on the major issues in the study of trauma associated with accidents, injuries, or violence.
Prerequisites: EPID 741, BIOS 759.

EPID 820 - Seminar in the Epidemiology of Health Effects of Physical Activity (3 Credits)
Seminar presentation and group discussion on the major issues in the study of physical activity and exercise and their impact on health.
Prerequisites: EPID 700.

EPID 830 - Seminar in the Epidemiology of Aging (3 Credits)
Exploration in depth of theories, current health problems, research, and methodological issues in the epidemiology of aging.

EPID 844 - Advanced Cardiovascular Disease Epidemiology: Evidence Synthesis and Evaluation (3 Credits)
Epidemiology of cardiovascular disease and its risk factors, with a focus on evidence synthesis through systematic reviews.
Prerequisites: EPID 701.

EPID 845 - Doctoral Seminar (1-3 Credits)
May be repeated for credit.
Prerequisites: complete at least one semester of course work.

EPID 847 - Advanced Environmental Factors and Human Health (3 Credits)
Advanced methods encompassing the investigation of environmental factors and how they affect human health. Emphasis on reading and interpreting the peer reviewed scientific literature and developing a systematic literature review and grant proposal.
Prerequisites: EPID 700 EPID 701 and BIOS 700 BIOS 701.

EPID 855 - Methods in Reproductive & Perinatal Epidemiology (3 Credits)
This course provides an overview of reproductive and perinatal epidemiology and the applications in the field of Maternal and Child Health. It covers the current and emerging topics in this area. Designed for doctoral students with interests in conducting research related to reproductive and perinatal epidemiology.
Prerequisites: EPID 700 EPID 701 and BIOS 700 BIOS 701.

EPID 860 - Geographic Information Systems for Public Health Research (3 Credits)
Principles and application of basic and intermediate-level GIS technologies in public health research. Designed for doctoral students with interest in conducting health-related research using GIS methods.

EPID 865 - Clinical Effectiveness (3 Credits)
Clinical Effectiveness is a broad term that includes clinical trials and intervention study designs. The purpose of this course is to develop skills in the application of epidemiologic methods to clinical effectiveness research, by conceptualizing and designing an intervention study. Students will actively participate in teaching and learning through in-class activities and developing a protocol to test an intervention in a clinical trial design.
Prerequisites: EPID 701, PUBH 725, or equivalent course.

EPID 877 - Advanced Methods and Concepts in Nutrition Research (3 Credits)
Advanced Methods and Concepts in Nutrition Research addresses aspects of nutrition ranging from nutritional biochemistry to dietetics and community nutrition education. It covers disciplinary breadth encompassing the study of effects of dietary exposures on inflammation, epigenetics, immune function, psychological states and traits, physiologic states, and pathophysiologic processes, including carcinogenesis.
Prerequisites: EPID 763.

EPID 890 - Independent Study (1-3 Credits)
Directed research on a topic to be developed by doctoral student and instructor. May be repeated.

EPID 894 - Selected Topics in Epidemiology for Doctoral Students (1-3 Credits)
Variable credit doctoral level epidemiology course (1-3). The specific epidemiologic topic to be taught is determined by the course instructor in consultation with the department.

EPID 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: one full year (18 hrs) of graduate study beyond the master’s level.

Exceptional Children (EDEX)

EDEX 523 - Introduction to Exceptional Children (3 Credits)
Overview of the field of education for exceptional children. Basic course for those entering the field of special education.

EDEX 525 - The Nature of Orthopedic and Special Health Problems (3 Credits)
Symptomatology, behavioral manifestations, and resources for care and treatment of orthopedic conditions and other types of health problems in children and youth.
EDEX 530 - Introduction to Early Childhood Special Education (3 Credits)
An overview of early childhood special education for young children with disabilities and their families.

EDEX 531 - Nature of Students with Specific Learning Disabilities (3 Credits)
Children with average/above average intelligence and specific learning impairments; diagnostic and remedial techniques. (Offered by both the College of Education and the Department of Psychology).
Prerequisites: EDEX 523 or PSYC 528.

Cross-listed course: PSYC 529
EDEX 540 - Nature and Needs of the Gifted and Talented (3 Credits)
Types and characteristics of the gifted and talented.
Prerequisites: EDEX 523 or PSYC 518.

EDEX 580 - Direct Instruction in Reading for At-Risk Learners (3 Credits)
A study of the skills and knowledge required to implement direct instruction procedures when teaching reading, with opportunity for application of skills. Research and theoretical foundations will also be evaluated.
Prerequisites: EDEX 523.

EDEX 581 - Teaching Reading in the Content Area to Adolescents with Reading Disabilities (3 Credits)
Research, theory, and instructional practices related to providing reading instruction in content areas for youth with disabilities, with a focus on developing disciplinary literacy in inclusive settings.

EDEX 582 - Teaching Mathematics to Students at Risk (3 Credits)
Research, theory, and instructional practices related to mathematical readiness and instruction for children and youth at risk for mathematical difficulties.
Prerequisites: EDEX 523 or EDEX 491.

EDEX 610 - Instruction of Students with Severe and Multiple Disabilities (3 Credits)
Data-based instruction for teaching students with significant disabilities: task and developmental analysis, individualizing instruction, and preparing and implementing instructional programs.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 615 - Curriculum and Language Instruction for Students with Severe and Multiple Disabilities (3 Credits)
Design, development, adaptation, and implementation of curriculum, language and communication instruction for students with significant disabilities.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 616 - Instruction of Students with Specific Learning Disabilities (3 Credits)
Theory and application of current evidence-based procedures for teaching children with specific learning disabilities.
Prerequisites: EDEX 523, EDEX 531, or EDEX 632 or equivalent.

EDEX 619 - Nature of Students with Intellectual Disabilities (3 Credits)
Nature and causes of intellectual disabilities, behavior, and potentialities of persons with intellectual disabilities.
Prerequisites: a course in the areas of child psychology or child development.

EDEX 630 - Educational Procedures for Early Childhood Special Education (3 Credits)
An initial course in educational procedures focusing on intervention strategies for serving young children with disabilities in inclusive environments.
Prerequisites: EDEX 530.

EDEX 632 - Nature of Students with Emotional and Behavior Disabilities (3 Credits)
Characteristics, etiology, and major theoretical models for children experiencing emotional and/or behavioral problems in school; special education curriculum, programming alternatives, assessment, and issues concerning this population.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 640 - Managing Problem Behavior in the Classroom (3 Credits)
The development of a workable approach to classroom management through an examination of a research-based synthesis of current knowledge in classroom and behavior management.

EDEX 643 - Social/Emotional Development and Guidance for Young Children with Developmental Delays (3 Credits)
Prerequisites: EDEX 523.

EDEX 646 - Advanced Procedures for Assessment in Early Childhood Special Education (ECSE) (3 Credits)
Advanced assessment methods for serving young children with and without developmental delays and their families.
Prerequisites: EDEX 530.

EDEX 670 - Nature of Students with Multi-categorical Disabilities (3 Credits)
Personal, social, and educational implications of a mild to moderate multi-categorical disability (emotional/behavioral, intellectual, and learning disabilities) throughout the lifespan of an individual.
Prerequisites: C or better in EDEX 523.

EDEX 671 - Instruction of Students with Multi-categorical Disabilities (3 Credits)
Theory and application of current evidence-based procedures for teaching children with mild to moderate multi-categorical disabilities.
Prerequisite or Corequisite: C or better in EDEX 670.

EDEX 682 - Introduction to Braille (3 Credits)
Basic course for mastery of the literary braille code. Transcription of instructional materials in literary braille.

EDEX 685 - Nature of Students with Visual Disabilities (3 Credits)
The psychological, social, and educational implications for persons with visual disabilities; definitions, incidence, characteristics of, and rehabilitative and educational programs for persons with visual disabilities.

EDEX 686 - Introduction to Deafness (3 Credits)
Educational implications of philosophy, theory, and research about deafness.
Prerequisites: EDEX 523 or equivalent.

EDEX 687 - Communication Systems for Students who are Deaf or Hearing Impaired (3 Credits)
Knowledge and basic skills of finger-spelling and sign forms for communication.
EDEX 690 - Independent Study (1-3 Credits)

EDEX 691 - Collaborative Partnerships in PK-12 Special Education (3 Credits)
Communication and collaboration skills and strategies for creating and maintaining effective partnerships with a variety of stakeholders involved in educating students with disabilities in PK-12 settings.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 692 - Partnerships in Early Childhood Special Education (3 Credits)
Strategies for collaborating and communicating with families and other professionals as members of multidisciplinary teams in Early Intervention and Early Childhood Special Education.
Prerequisites: EDEX 523.

EDEX 701 - Nature of Students with Autism (3 Credits)
Definitions, characteristics, and causes of autism; educational models, implications, and programming.
Prerequisites: EDEX 523 or equivalent.

EDEX 710 - Legal Issues in Special Education (3 Credits)
Analysis of legislation, litigation, and administrative rulings related to special education. Emphasis on the development of legally sound policies and procedures to ensure an appropriate education for students with disabilities.

EDEX 712 - Instruction of Students with Intellectual Disabilities (3 Credits)
Methods and materials to teach students with intellectual disabilities.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 713 - Practicum in Instruction of Exceptional Children I (3 Credits)
Experience in the observation of and participation in the education of children with disabilities in settings appropriate to student’s specialization. Includes weekly seminar.
Prerequisites: EDEX 523.

EDEX 714B - Practicum in Instruction of Exceptional Children II: B (Behavioral Disorders) (3 Credits)
Experience in the direct teaching of children with disabilities in settings appropriate to student’s area of specialization. Includes weekly seminar.

EDEX 714C - Practicum in Instruction of Exceptional Children II: C (Multicategorical) (3 Credits)
Experience and seminar in the direct teaching of students with disabilities in settings appropriate to student's area of specialization.

EDEX 714E - Practicum in Instruction of Exceptional Children II: E (Early Childhood Special Education) (3 Credits)
Experience in the direct teaching of children with disabilities in settings appropriate to student’s area of specialization. Includes weekly seminar.

EDEX 714H - Practicum in Instruction of Exceptional Children II: H (Hearing Impairments) (3 Credits)
Experience in the direct teaching of children with disabilities in settings appropriate to student’s area of specialization. Includes weekly seminar.

EDEX 714L - Practicum in Instruction of Exceptional Children II: L (Learning Disabilities) (3 Credits)
Experience in the direct teaching of children with disabilities in settings appropriate to student’s area of specialization. Includes weekly seminar.

EDEX 714M - Practicum in Instruction of Exceptional Children II: ID (Intellectual Disabilities) (3 Credits)
Experience in the direct teaching of children with disabilities in settings appropriate to student’s area of specialization. Includes weekly seminar.

EDEX 714S - Practicum in Instruction of Exceptional Children II: S (Severe/Multiple) (3 Credits)
Experience in the direct teaching of children with disabilities in settings appropriate to student’s area of specialization. Includes weekly seminar.

EDEX 715 - Applied Behavior Analysis in Special Education (3 Credits)
Application of principles of behavior to understanding and changing socially important behavior of students with disabilities.

EDEX 716 - Functional Behavioral Assessment and Behavior Interventions (3 Credits)
Identification and assessment of problem behavior, design and implementation of positive behavior intervention plans.
Prerequisites: EDEX 610 or EDEX 640 or equivalent.

EDEX 717 - Ethics in Behavior Analysis (3 Credits)
Legal, ethical, and professional issues in behavior analysis.
Prerequisites: EDEX 610 or EDEX 715.

EDEX 718 - Intensive Practicum in Applied Behavior Analysis (3-6 Credits)
Principles of applied behavior analysis in the design, delivery, and evaluation of instruction of children and adults in school, home, and community settings. Students pursuing Board Certification in Behavior Analysis.
Prerequisite or Corequisite: EDEX 610, EDEX 715.

EDEX 719 - Advanced Applied Behavior Analysis (3 Credits)
Advanced concepts and principles in applied behavior analysis.
Prerequisites: EDEX 715, EDEX 809.

EDEX 720 - Applied Research Experience in Special Education (1-3 Credits)
Supervised student-led research experience in a school, state agency, department or bureau of the University, or cooperating organization or institution.

EDEX 726 - Seminar in Special Education for Student Teachers (3 Credits)
Synthesis of the knowledge and skills acquired through course work and field experiences during special education teacher preparation.
Corequisite: EDEX 796.

EDEX 740 - Cognitive and Affective Aspects of the Gifted and Talented (3 Credits)
The relationship of cognitive and affective factors to learning in the gifted and talented, including the self-concepts of the learner and the teacher.
Prerequisites: EDEX 523 and EDEX 540.

EDEX 742 - Educational Procedures for the Gifted and Talented (3 Credits)
Emphasis on methodologies and materials involved in the teaching of gifted and talented children and youth.
Prerequisites: EDEX 540.

EDEX 750 - Technology and Exceptional Populations (3 Credits)
The application of microcomputers and other technology in services for special populations. Case management, assessment, and instructional uses of technology are included.
Cross-listed course: RHAB 750
EDEX 760 - Secondary Transition Assessment, Planning, and Program Development (3 Credits)
Foundation for understanding and using assessment information in the transition process for youth with disabilities. Specifically, students will gain knowledge in the multiple domains of transition assessment (e.g., vocational, academic, independent living, self-determination). Students will also develop and determine appropriate transition plans, programs, services, and instruction.
Prerequisites: EDEX 523 or equivalent introductory course in special education.

EDEX 761 - Promoting Student Outcomes Through Collaboration (3 Credits)
Concepts, tools, and strategies essential for effective collaboration within and across systems supporting transition-age youth with disabilities. Best practices on how to partner with agencies, schools, and employers which provide students with support and advocacy as they transition to post-school life.
Prerequisites: EDEX 523 or equivalent introductory course in special education.

EDEX 762 - Career Preparation and Employment for Individuals with Disabilities (3 Credits)
Specific vocational practices and information used to assist persons with disabilities as they begin to make career decisions and transition to the workforce.
Prerequisites: EDEX 523.

EDEX 763 - Integrated Secondary Curriculum, Instructional Strategies, and Transition Programs (3 Credits)
Developing and selecting curricula that meet students’ transition needs and align with state academic standards. Students will evaluate and implement evidence-based practices as well as develop lessons and instructional units that promote the skills necessary for transition to adult life.
Prerequisites: EDEX 523.

EDEX 770 - Methods and Materials for Students with Low Vision (3 Credits)
Current educational methods and materials for students with partial sight including educational needs, assessment of visual functioning, and vision utilization. Educational plannings and instructional strategies will be considered.
Prerequisites: EDEX 685 and EDEX 773.

EDEX 773 - Anatomy, Physiology, and Pathology of the Eye (3 Credits)
Structure, function, and abnormalities of the eye stressing educational implications. Special attention is paid to interpretation of reports from eye specialists, theory and use of low vision aids, and vision screening techniques in schools.
EDEX 774 - Educational Procedures for Students with Visual Disabilities (3 Credits)
Current educational procedures for students who are blind or with partial sight, including programming alternatives, curriculum adaptations and additions, use of specialized equipment, instructional strategies, and educational planning.
Prerequisites: EDEX 682 and EDEX 773.

EDEX 775 - Orientation and Mobility for the Visually Handicapped (3 Credits)
Lectures, discussions, observation, and practice in teaching pre-care skills, orientation and mobility, and activities of daily living to visually handicapped individuals. Presented with reference to the responsibility of the teacher of the visually handicapped.

EDEX 780 - Speech Reading and Auditory Training I (3 Credits)
A study of the use of acoustic amplification and speech reading in developing language skills for deaf and hard-of-hearing children and adults. Theories, methods, and systems of speech reading and use of hearing aids and other amplification equipment are studied and analyzed.

EDEX 781 - Speech Reading and Auditory Training II (3 Credits)
Advanced study in methods of instruction for the hard-of-hearing in the principles and techniques of lip reading and auditory training.
Prerequisites: EDEX 780 or equivalent.

EDEX 784 - Instruction of Students with Emotional and Behavioral Disorders (3 Credits)
Application of current educational procedures for students with emotional and behavioral disorders including alternative administrative arrangements, education strategies, and sources of materials.
Prerequisites: EDEX 632.

EDEX 785 - Language Impairment, Disabilities, and Augmentative Communication (3 Credits)
The study of language disorders in students with disabilities. Focus on defining communicative acts and implementation of alternative and augmentative communication and assistive technology.

EDEX 790 - Introduction to Assessment in Special Education (3 Credits)
Concepts and methods of assessment in special education with emphasis on administering, scoring, and interpreting standardized education tests.

EDEX 791 - Procedures in Special Education Assessment and Intervention I (3 Credits)
Lectures and practicum experiences emphasizing the application of informal educational assessment and intervention planning procedures. Individually supervised case project.
Prerequisites: EDEX 790.

EDEX 792 - Issues in Special Education (3 Credits)
Critical reviews of research related to key issues in special education. A research paper is required.
Prerequisites: EDRM 700, EDEX 790, EDEX 640, 1 methods course.

EDEX 793 - Seminar in Aural Rehabilitation (3 Credits)
Experimental study of various aspects of lip reading and auditory training.

EDEX 794 - Foundations of Secondary Transition Planning and Supports for Individuals with Disabilities (3 Credits)
Orientation to transition planning and vocational training as integrated components of secondary level education curriculum for students with disabilities.

EDEX 795 - Assessment in Early Childhood Special Education (3 Credits)
Assessment instruments, techniques, and procedures for non-discriminatory educational assessment of children with disabilities birth-eight years.
EDEX 796B - Directed Teaching in Special Education (12 Credits)
Application of effective teaching techniques and organization of instructional settings for exceptional learners in selected areas of specialization. B (Behavioral Disorders), L (Learning Disabilities), ID (Intelectual Disabilities), S (Severe/Multiple)
Prerequisites: Admission to the Professional Teacher Certification Program and completion of the special education core
Corequisite: EDEX 726.

EDEX 796C - Directed Teaching in Special Education: C (Multicategorical) (12 Credits)
Application of effective teaching techniques and organization of instructional settings for exceptional learners in selected areas of specialization.
Prerequisites: Admission to the Professional Teacher Certification Program and completion of the special education core
Corequisite: EDEX 726.

EDEX 809 - Single-Case Research Designs in Special Education (3 Credits)
Applications of single-case study designs to the analysis of student behavior in special education, with emphasis on visual display of data and interpretation of research results.
Prerequisites: EDEX 715.

EDEX 810 - Advanced Single-Case Research (3 Credits)
Advanced concepts in single-case research, including the identification of evidence-based practices in special education through systematic reviews and meta-analyses.
Prerequisites: EDEX 809.

EDEX 815 - Coordination of Programs for Exceptional Children (3 Credits)
A study of administrative and supervisory issues in the operation of school programs for exceptional children; alternate instructional models and program organizations, budgeting and funding practices, certification requirements, and other operational factors are emphasized.
Prerequisites: EDEX 523 or equivalent.

EDEX 816 - Special Problems in Education of Students with Emotional and Behavioral Disabilities (3 Credits)
A critical review of research in the identification and education of children and adolescents with emotional and behavioral disabilities. A research project is required.
Prerequisites: PSYC 510 or equivalent and EDRM 700.

EDEX 817 - Advanced Educational Problems in Learning Disabilities (3 Credits)
A study of administrative and supervisory issues in the operation of school programs for exceptional children; alternate instructional models and program organizations, budgeting and funding practices, certification requirements, and other operational factors are emphasized.
Prerequisites: Admission to the Professional Teacher Certification Program and completion of the special education core.

EDEX 818 - Advanced Topics in Exceptional Children (3 Credits)
Supervised field-based experiences related to special education administration, pedagogy, and university teaching.
Prerequisites: EDEX 593 and consent of instructor

EDEX 891 - Advanced Educational Procedures for Exceptional Children (3 Credits)
Supervised field-based experiences related to special education administration, pedagogy, and university teaching.
Prerequisites: EDEX 891.

EDEX 892A - Internship in Exceptional Children: A (Administration) (3-6 Credits)
Supervised field-based experiences related to special education administration, pedagogy, and university teaching.
Prerequisites: EDEX 891 and consent of instructor

EDEX 892B - Internship in Exceptional Children: B (Behavioral Disorders) (3-6 Credits)
Supervised field-based experiences related to special education administration, pedagogy, and university teaching.
Prerequisites: EDEX 891 and consent of instructor

EDEX 892C - Internship in Exceptional Children: C (Multicategorical) (3-6 Credits)
Supervised field-based experiences related to special education administration, pedagogy, and university teaching.
Prerequisites: EDEX 891 and consent of instructor

EDEX 892T - Internship in Exceptional Children: T (Teaching Internship) (3-6 Credits)
Supervised field-based experiences related to special education administration, pedagogy, and university teaching.
Prerequisites: EDEX 891 and consent of instructor

EDEX 893 - Advanced Topics in Exceptional Children (3 Credits)
Selected topics in special education. With consent of advisor, may be repeated for credit as topics change.
Prerequisites: EDEX 891.

EDEX 894 - Research Seminar in Special Education (3 Credits)
Review and analysis of contemporary research topics in special education. May be repeated for up to 12 credit hours as topics vary.

EDEX 899 - Dissertation Preparation (1-12 Credits)
Exercise Science (EXSC)

EXSC 507 - Exercise, Sport, and Nutrition (3 Credits)
The relationship between exercise, sport performance, and nutrient metabolism.
Prerequisites: EXSC 223, EXSC 224, EXSC 330, EXSC 330L.

EXSC 531 - Clinical Exercise Physiology (3 Credits)
Scientific bases of clinical exercise programming. The fitness instructor's role in encouraging changes in exercise behavior.
Prerequisites: EXSC 223, EXSC 224, EXSC 330, EXSC 330L.
Corequisite: EXSC 531L.

EXSC 531L - Clinical Exercise Physiology Lab (0 Credits)
Prerequisite: EXSC 223, EXSC 224, EXSC 330, EXSC 330L.

EXSC 541 - Physiological Basis for Strength and Conditioning (3 Credits)
Investigation on the physiological basis for strength and conditioning. Principles of strength and conditioning through lecture based learning, demonstrations, and through laboratory activities.
Prerequisites: C or better in EXSC 330.

EXSC 555 - Current Topics in Exercise Science (1-3 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

EXSC 562 - Impairments of the Human Motor System (3 Credits)
Role of motor development in the growth and development of individuals exhibiting impaired motor control.
Prerequisites: biology, anatomy, physiology, or the equivalent.

EXSC 563 - Physical Activity and the Physical Dimensions of Aging (3 Credits)
The effects of age and physical activity on physical and motor functions of elderly individuals.
Prerequisites: EXSC 223, EXSC 224, EXSC 351, EXSC 330, EXSC 330L.

EXSC 585 - Women's Health and Physical Activity (3 Credits)
Sex differences in diseases, physiological function of sex hormones, hormonal changes in a woman's life, specific women's health issues, and role of physical activity and exercise in prevention and treatment of conditions and diseases specific to women or related to sex hormones. Restricted to 30 students, Special Permission by Instructor.

EXSC 608 - Apps, Wearables and Technology for Lifestyle Behavior Change and Weight Loss (3 Credits)
The course will increase students' understanding of the theoretical foundations, scientific evidence and practical application of technology-assisted lifestyle interventions, with an emphasis on behavioral weight control for adults.
Prerequisites: C or better in EXSC 410.

EXSC 620 - Nutrition and Immunology (3 Credits)
Examination of the interrelationships that link human nutrition to the immune system in health and disease. Topics will include basic immunology, overview of nutritional sources, deficiencies and excesses, and the impact on public health issues such as exercise, disease and aging.
Prerequisites: EXSC 330.

EXSC 626 - Cardiorespiratory Exercise Physiology (3 Credits)
Examination of the anatomy and function of the cardiovascular and respiratory systems of the exercising human organism, including acute adjustments and chronic adaptations to the systems.
Prerequisites: EXSC 330.

EXSC 666 - Cardiorespiratory Exercise Physiology (3 Credits)
Examination of the anatomy and function of the cardiovascular and respiratory systems of the exercising human organism, including acute adjustments and chronic adaptations to the systems.
Prerequisites: EXSC 330.

EXSC 669 - Skeletal Muscle Physiology: Form and Function (3 Credits)
Skeletal muscle physiology and exercise through select laboratory experiences and discussion of related research literature.
Prerequisites: C or better in both EXSC 330 and EXSC 330L.

EXSC 695 - Writing and Presenting in Research (3 Credits)
The research process in Exercise Science through participation, presentation, and discussion of current research.
Prerequisites: EXSC 224.

EXSC 700 - Physical Activity and Health: Epidemiology, Research and Practice (3 Credits)
An introduction to exercise science with emphasis on the relationships between exercise and health for promotion of physical activity in clinical and public health settings.

EXSC 706 - Assessment of Motor Behavior (3 Credits)
Assessment of infant, child, adolescent, and adult motor behavior.

EXSC 710 - Behavioral Aspects of Physical Activity (3 Credits)
Psychosocial and behavioral factors in physical activity. Topics include mental health effects of exercise, behavior change theories applied to mental health effects of exercise, behavior change theories applied to physical activity, and physical activity determinants and interventions.
Cross-listed course: HPEB 713

EXSC 723 - Genetics in Health Sciences (3 Credits)
The part lecture and part discussion course will explore genetic research in the health sciences, with emphasis on human genetic association studies, clinical utility for personalized medicine, direct-to-consumer genetic testing, and ethical issues. Students will receive hands-on experience searching, interpreting, and summarizing genetic studies on a topic of their choice.

EXSC 727 - Controlled Trials in Exercise Science (3 Credits)
This course covers planning, organizing and implementing randomized controlled trials of physical activity or exercise interventions. It is primarily aimed to meet the needs of graduate students in exercise science and others in related fields.

EXSC 731 - Mechanisms of Motor Skill Performance (3 Credits)
A study of theories and mechanisms involved in human movement. Focus is on analysis of principles and systems of gross motor control and learning.

EXSC 732 - Measurement of Body Composition and Associated Health Behaviors (3 Credits)
Overview of measurement theory and measures to assess body composition and associated health behaviors (i.e., physical activity, sedentary behavior, sleep, diet).
Prerequisites: BIOS 700, BIOS 701, or PUBH 725; for MPH-PAPH students, EXSC 700.
EXSC 742 - Clinical Exercise Testing (1 Credit)
Study of the procedures involved in screening and testing persons with varying levels of functional work capacity.

EXSC 743 - Laboratory Measurements for Exercise Testing (1 Credit)
Biological and physiological assessment of exercise responses and adaptation.
Prerequisites: EXSC 742.

EXSC 744 - Administration of Exercise Programs (1 Credit)
Study of the procedures necessary for proper administration of exercise testing, fitness, and rehabilitation programs.
Prerequisites: EXSC 531.

EXSC 754 - Community-Based Physical Activity Interventions (3 Credits)
Role of the physical activity specialist within the community health department. Development, initiation, and evaluation of campaigns, resources, community capacity building, and coalitions to promote physical activity.
Prerequisites: EXSC 700 or HPEB 700.

EXSC 755 - Special Topics in Exercise Science (3 Credits)
A study of selected issues in exercise science. Content varies by title.

EXSC 771 - Data Acquisition in Exercise Science (3 Credits)
Fundamental concepts of computerized data acquisition in the exercise science laboratory.

EXSC 775 - Neural Basis of Skilled Motor Behavior (3 Credits)
Current and historical perspectives on the neural basis of skilled motor behavior.
Prerequisites: EXSC 731.

EXSC 777 - Endocrinology of Exercise and Health (3 Credits)
The course examines the endocrine system, its interaction with the nervous system, and how they affect human biology before, during, and after exercise. Special attention will be paid to this system's influence on the relationship between physical activity and health.
Prerequisites: At least one undergraduate or graduate course in statistics and molecular or cellular biology.

EXSC 778 - Exercise and Childhood Obesity (3 Credits)

EXSC 779 - Exercise Physiology of Children and Youth (3 Credits)
Principles of exercise physiology applied specifically to children and youth. Particular emphasis on physiological foundations of physical fitness and methods for teaching physical fitness concepts.

EXSC 780 - Physiology of Exercise (3 Credits)
Physiological responses to exercise: skeletal muscle structure and function, cardiorespiratory function, physiological determinants of exercise performance, and training adaptations. Didactic and laboratory included.

EXSC 781 - Physiology, Exercise, and Disease (3 Credits)
The input and response to exercise in diseased populations. Diseases to be examined include cardiovascular disease, age-related diseases, pulmonary, renal, and other conditions.
Prerequisites: EXSC 780.

EXSC 782 - Mechanical Analysis of Motor Skills (4 Credits)
Biomechanical principles underlying motor control and selected techniques used to quantify human movement.

EXSC 783 - Research Seminar in Exercise Physiology (1-3 Credits)
Presentation and discussion of current research topics in exercise physiology.

EXSC 784 - Cardiovascular/Pulmonary Testing and Programming (3 Credits)
Techniques used in exercise testing (including principles of electrocardiology) and in design and delivery of exercise programs for enhancing the health of normal and cardiopulmonary-diseased populations.
Prerequisites: EXSC 781.

EXSC 785 - Advanced Exercise Physiology Laboratory (3 Credits)
Laboratory procedures for measurement of physiological, biochemical, and molecular responses to exercise.
Prerequisites: EXSC 780.

EXSC 786 - Experimental Design for Translational Laboratory Science (3 Credits)
This course establishes the framework for experimental projects in molecular biology and physiology that impact human health: how to set up a molecular system, design experiments within that system, determine and use the correct set of controls, and ultimately how to interpret molecular data in light of human/public health.
Prerequisites: At least one undergraduate or graduate course in statistics and molecular or cellular biology.

EXSC 787 - Research Methods and Design for Exercise Science (3 Credits)
The major goal of this course is to provide an in-depth examination of: research concepts, terminology, experimental, non-experimental, and epidemiological designs, internal and external validity, methods for establishing causality investigating associations, and application of designs to test hypotheses in research of exercise science-related outcomes.

EXSC 790 - Independent Study (1-3 Credits)
Topics to be assigned and approved by advisor, graduate director, and department head.

EXSC 795 - Internship in Exercise Science (3 Credits)
Clinical practice in an applied area of exercise science. Requirements include at least 20 hours fieldwork per week with intensive supervision.

EXSC 796 - MPH Capstone Course (2 Credits)
This course is designed to provide students with a culminating seminar focused on the synthesis of foundational and MPH-PAPH competencies in preparing a high quality grant proposal to address a public health problem.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, B or better in EXSC 700, EXSC 710, EXSC 780.

EXSC 797 - Public Health Practice (1-5 Credits)
The focus of this course is the performance of a limited work or service project in an approved public need setting and the demonstration of at least 5 competencies related to previously identified aspects of the student's chosen role.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, B or better in EXSC 700, EXSC 710, EXSC 780.

EXSC 798 - Project in Exercise Science (3 Credits)
Independently executed project designed to expand the student's knowledge of exercise science.

EXSC 799 - Thesis Preparation (1-9 Credits)
EXSC 580 - Ethical Conduct in Public Health Research (1 Credit)
The course will provide an overview of ethical issues scientists encounter conducting and disseminating public health research. Topics include the history of ethics in public health, working with human participants, conflicts of interests, spin, and creating safe and healthy workplaces.

EXSC 582 - Predoctoral Fellowship Writing Course with Special Emphasis on NIH F31 (1 Credit)
The course is designed to enable predoctoral students to gain grant writing experience, develop into productive, independent research scientists, and to obtain mentored research training while conducting dissertation research.

EXSC 588 - Neuro Repair - Rehabilitation (3 Credits)
Examination of neural repair and rehabilitation from a clinical perspective. 03: 07/05/2019.

EXSC 589 - Physical Activity and the Aging Process (3 Credits)
The course will focus on the aging process and its effects upon the physical activity patterns of the adult. Emphasis is on the mechanisms of aging as they directly influence movement.

EXSC 591 - Data Acquisition in Exercise Science II (3 Credits)
Advanced techniques of interfacing data acquisition equipment to the laboratory computer.

EXSC 592 - Myology and Exercise (3 Credits)
Study of muscle contraction mechanics, energetics, and metabolism and the relationship of these processes to physical training, athletics, and rehabilitation.

EXSC 593 - Advanced Cardiorespiratory Exercise Physiology (3 Credits)
Study of mechanisms for cardiovascular and respiratory responses to acute exercise and adaptations to these systems with chronic physical activity.

EXSC 594 - Physical Activity and Health: Epidemiology and Research Methods (3 Credits)
An examination of physical activity/exercise habit patterns as they relate to health status. Emphasis on the chronic effects of exercise.

EXSC 595 - Chronic Disease Rehabilitation Through Exercise (3 Credits)
The study of the treatment of chronic diseases with special reference to exercise as a mode of therapy.
Prerequisites: EXSC 531 and EXSC 780 or the equivalent.

EXSC 599 - Dissertation Preparation (1-12 Credits)

---

**Film and Media Studies (FAMS)**

FAMS 510 - Topics in Film Media Histories (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

FAMS 511 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: ARTH 551, MART 591

FAMS 566 - Topics in US Film and Media (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title. 03: 07/05/2019.
Prerequisites: FAMS 240.

FAMS 598 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: FORL 598, MART 594

Graduation with Leadership Distinction: GLD: Global Learning

FAMS 710 - Advanced Special Topics in Film and Media (3 Credits)
Advanced study of a specific topic in film and media studies. May be repeated as content varies by title.

**Finance (FINA)**

FINA 666 - Real Estate and Urban Development (3 Credits)
An overview of real estate in both the public and private sectors that serves as the basis for advanced study in the various disciplines of real estate and urban development. No prior knowledge of the field is assumed.

FINA 737 - Derivative Products and Analysis (3 Credits)
Derivative contracts (forwards, futures, swaps, and options), valuation models, and supporting market structures.
Prerequisites: DMSB 715 or FINA 760.

FINA 744 - Risk and Insurance (3 Credits)
A study of non-speculative risk and risk bearing techniques, with emphasis on insurance covering personal, property, and liability risks. Attention is also given to the structure and regulation of the insurance industry, the role of governmental insurance programs, new product developments, and the impact of tort law reform, inflation, and consumerism.

FINA 745 - Management of Employee Benefit Programs (3 Credits)
An analytical study of group life, health, and retirement plans that provide economic security for employees; focuses on design, funding, tax considerations, cost controls, compliance with governmental regulations, the impact of inflation, and new types of benefits.

FINA 746 - Risk Management (3 Credits)
An examination of non-speculative risk, its measurement, and management by organizations. Emphasis is on the formation of top management policy statements on pure risks and their implementation by risk managers. Loss control, insurance, and other risk finance techniques are applied to practical risk management situations.
Prerequisites: FINA 737.
FINA 760 - Financial Policies (3 Credits)
The study of the nature, functions, and operations of financial institutions with particular attention to the banking system. The activities of other lending and savings institutions are studied together with their monetary and fiscal implications. 
**Prerequisites:** FINA 760 or equivalent.

FINA 761 - Advanced Financial Management (3 Credits)
Advanced study of problems involved in the financial management of economic organizations.
**Prerequisites:** FINA 760 or DMSB 715.

FINA 762 - Investment Management (3 Credits)
The use of analytical techniques to evaluate investment opportunities. 
**Prerequisites:** FINA 760.

FINA 763 - Options in Corporate Finance (3 Credits)
Applications of financial options in managing risk.
**Prerequisites:** FINA 737.

FINA 764 - Money and Capital Markets (3 Credits)
Characteristics, structure, and functions of money and capital markets; sources of funds for bond investment, stock financing, mortgage financing, and small business financing. Current problems and procedures in these markets are considered.
**Prerequisites:** FINA 760.

FINA 765 - Management of Financial Institutions (3 Credits)
Nature, functions, and operations of financial institutions with particular attention to the banking system. The activities of other lending and savings institutions are studied together with their monetary and fiscal implications.
**Prerequisites:** DMSB 715 or FINA 670.

FINA 766 - Advanced Real Estate Valuation (3 Credits)
A study of income producing properties including income expense analyses, capitalization processes and discount rates, direct capitalization methodologies, and computerized discounted cash flow valuation models.
**Prerequisites:** FINA 760 or DMSB 715.

FINA 767 - Real Estate Finance (3 Credits)
An analytical study of mortgage markets and the institutions involved. Particular emphasis is placed on specialized institutional practices, innovative financing techniques, and current developments.
**Prerequisites:** FINA 760 or DMSB 715.

FINA 768 - Real Estate Market Analysis (3 Credits)
Market analysis including an overview of market area study and its relationship to the feasibility of a specific project. Topics include theory and methods of market and feasibility analysis. Examples of market and feasibility studies are reviewed and critiqued.
**Prerequisites:** FINA 666.

FINA 769 - Real Estate Decision and Administrative Processes (3 Credits)
An integrative approach emphasizing the special features of real estate decisions; social, legal, economic, political, and environmental problems of the real estate sector within the economy as a whole are studied.
**Prerequisites:** FINA 666.

FINA 770 - Fixed-Income Securities (3 Credits)
Fundamental principles of fixed-income securities and fixed-income valuation models, including valuation of bonds with embedded options.
**Prerequisites:** FINA 737 and FINA 762.

FINA 771 - Financial Services Markets and Institutions (3 Credits)
Analysis of the functions and operations of financial markets and institutions, focusing on insurance markets, investment banking, and market microstructure.
**Prerequisites:** DMSB 715 or FINA 760.

FINA 772 - Student-Managed Investments (3 Credits)
Students will be introduced to a variety of approaches to security analysis and valuation techniques as they manage a real portfolio.
**Prerequisites:** FINA 760 or DMSB 715.

FINA 773 - Project Finance (3 Credits)
Provide an understanding of the following: fundamentals of non-recourse project financing; financial markets for project finance; infrastructure sectors and their business risks; transaction structures and the documentation used to structure individual project financing; political risk; current standards in international organizations relevant to infrastructure investment and finance.
**Prerequisites:** FINA 760 or DMSB 715.

FINA 780 - Entrepreneurial Finance and the Dynamics of Emerging Ventures (3 Credits)
Exploration of the funding and financial management of emerging ventures, including sources and structure of capital, financial levers to drive performance and metrics to monitor performance, and the study of how to impact, capture, quantify, and realize value.
**Cross-listed course:** MGMT 780

FINA 781 - Real Estate Investment Analysis (3 Credits)
Advanced real estate investment analysis emphasizing equity investment positions under alternative ownership forms, syndications and securities registration, real estate productivity evaluation based on cash flow analysis, federal tax policies affecting real estate, and real estate portfolio analysis.
**Prerequisites:** FINA 760.

FINA 970 - Special Topics in Finance (3 Credits)
Analysis of current topics, issues and practices in various areas of finance.

FINA 860 - Principles of Finance (3 Credits)
Fundamental concepts and issues in financial economics, such as risk aversion, portfolio theory, asset pricing models, arbitrage pricing models, corporate investment decisions, capital structure, dividend policy, risk management, and financial institutions.
FINA 865 - Theory of Finance (3 Credits)
Utility models and various alternative models used in asset and security pricing. Emphasis is on seminal research in finance.

FINA 866 - Current Issues in Finance (3 Credits)
Covers current theory of finance and extensions of the theoretical developments examined in FINA 865 Theory of Finance. 
Prerequisites: FINA 865.

FINA 867 - Advanced Topics in Finance (3 Credits)
Special topics in financial markets and institutions, investment and portfolio theory, and/or corporate finance that are not examined in FINA 865 or 866.
Prerequisites: FINA 865.

FINA 868 - Empirical Methods in Financial Research (3 Credits)
Planning and execution of applied research in finance.
Prerequisites: FINA 866, CSCE 206.

FINA 869 - Seminar in Financial Research (3 Credits)
Examination of empirical literature in finance. Development of a research proposal is required.
Prerequisites: FINA 866.

Foreign Languages (FORL)

FORL 501 - Spanish for Medical Personnel (3 Credits)
Basic course in health professions. Functional language and lexicon as well as cultural practices for interaction with Hispanic clients.
Prerequisites: 2 semesters of college-level Spanish or equivalent.

FORL 510 - Teaching Second Languages to Young Children (3 Credits)
To assist prospective teachers of young children in the development of a second language and multicultural learning activities. Practicum sessions are an integral part.
Prerequisites: 210 level of a foreign language or its equivalent.
Cross-listed course: EDEL 510
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

FORL 511 - Teaching Foreign Languages in Secondary Schools (3 Credits)
Current methods, techniques, and materials of instruction appropriate for secondary schools.
Prerequisites: 210 level of a foreign language or its equivalent.
Cross-listed course: EDSE 575

FORL 598 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.
Cross-listed course: FAMS 598, MART 594

FORL 700A - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of Arabic and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700C - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of Chinese and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700E - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of English and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700F - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of French and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700G - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of German and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700H - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of Italian and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700J - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of Japanese and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700K - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of Korean and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 700L - Language Training in International Business I (1-12 Credits)
An introduction to the fundamentals of Portuguese and an intensive study of the culture and specialized language of the business world in which the language is used as may be necessary for I.M.B.A. candidates to function as business specialists in regions other than their native country. Not for graduate credit in a foreign language department. 03: 07/05/2019.

FORL 705I - Lang Trng in Intl Bus III (6 Credits)
Intensive course for students in the I.M.B.A. program, intended to
investigate on an advanced level the linguistic and cultural aspects
of business and to prepare the student for an internship either in the
United States or abroad. Not for major credit in a graduate program in the
foreign language departments. 03: 07/05/2019.

FORL 705J - Lang Trng in Intl Bus III (6 Credits)
Intensive course for students in the I.M.B.A. program, intended to
investigate on an advanced level the linguistic and cultural aspects
of business and to prepare the student for an internship either in the
United States or abroad. Not for major credit in a graduate program in the
foreign language departments. 03: 07/05/2019.

FORL 705K - Lang Trng in Intl Bus III (6 Credits)
Intensive course for students in the I.M.B.A. program, intended to
investigate on an advanced level the linguistic and cultural aspects
of business and to prepare the student for an internship either in the
United States or abroad. Not for major credit in a graduate program in the
foreign language departments. 03: 07/05/2019.

FORL 705P - Lang Trng in Intl Bus III (6 Credits)
Intensive course for students in the I.M.B.A. program, intended to
investigate on an advanced level the linguistic and cultural aspects
of business and to prepare the student for an internship either in the
United States or abroad. Not for major credit in a graduate program in the
foreign language departments. 03: 07/05/2019.

FORL 705R - Lang Trng in Intl Bus III (6 Credits)
Intensive course for students in the I.M.B.A. program, intended to
investigate on an advanced level the linguistic and cultural aspects
of business and to prepare the student for an internship either in the
United States or abroad. Not for major credit in a graduate program in the
foreign language departments. 03: 07/05/2019.

FORL 705S - Lang Trng in Intl Bus III (6 Credits)
Intensive course for students in the I.M.B.A. program, intended to
investigate on an advanced level the linguistic and cultural aspects
of business and to prepare the student for an internship either in the
United States or abroad. Not for major credit in a graduate program in the
foreign language departments. 03: 07/05/2019.

FORL 730 - Principles of Instructed Second Language Acquisition and
Foreign Language Teaching (3 Credits)
An analysis of instructed second language acquisition (SLA). This course
explores the historical development and up-to-date findings in foreign/
second language research and applies that knowledge to classroom
teaching methods. Students will be expected to conduct empirical
investigation.
Prerequisites: FORL 511 or LING 790.

Cross-listed course: LING 792

FORL 772 - Technology in Foreign Language Education (3 Credits)
Introduction to technology in language teaching and the connection
between language acquisition and the implementation of Internet and
multimedia technology.
Cross-listed course: EDTE 772, LING 772

FORL 774A - Teaching Internship (Foreign Languages) (3 Credits)
Application of effective teaching techniques and organization of
instructional settings in foreign languages for K-12.
Prerequisites: acceptance to the professional program in education.

Cross-listed course: EDTE 774A

FORL 774B - Teaching Internship (Foreign Languages) (9 Credits)
Application of effective teaching techniques and organization of
instructional settings in foreign languages for K-12. 03: 07/05/2019.
Prerequisites: FORL 774A.

Corequisite: EDSE 584.

FORL 776 - The Teaching of Foreign Languages in College (3 Credits)
Basic theoretical principles of foreign language teaching in college.
Required of all graduate teaching assistants. Required of all M.A.T.
students. Other students may use as an elective.

FPMD - Family & Preventive Med (FPMD)

FPMD 710 - Topics in Preventive Medicine (2 Credits)
A seminar-format course for physicians and doctoral candidates in health
science disciplines providing clinically oriented discussion of a range of
topical issues in preventive medicine.
Prerequisites: MD or consent of the instructor.

French (FREN)

FREN 501 - Contemporary France (3 Credits)
Readings in and discussion of the culture of contemporary France.
FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents,
or a score of F-7 on the French language placement exam.

FREN 510 - Current Events in the France and the Francophone World (3
Credits)
Development of advanced oral skills in French. Study of linguistic
and cultural aspects of French language media. FREN 311 strongly
recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents,
or a score of F-7 on the French language placement exam.

FREN 511 - Techniques of Literary Analysis (3 Credits)
Texts from standard authors, with emphasis on explication de texte.
Prerequisites: C or better in each of FREN 309, FREN 310, and FREN 311,
or equivalents, or a score of F-7 on the French language placement exam.

FREN 515 - Advanced French Stylistics (3 Credits)
Practice in descriptive and narrative composition with special attention to
contrastive stylistics; thA¨me et version.
Prerequisites: C or better in each of FREN 309, FREN 310, and FREN 311,
or equivalents, or a score of F-7 on the French language placement exam.

FREN 516 - French Phonology (3 Credits)
The sound system and its functioning in the morphological system of
French from the point of view of current phonological theory.
Cross-listed course: LING 512

FREN 517 - French Linguistics (3 Credits)
The structure, morphology, and syntax of modern French.
Cross-listed course: LING 502

FREN 595 - Special Topics in French (3 Credits)
Poetry, prose, theatre, cinema, civilization, language, linguistics. Unique
opportunities will be announced by title. May be repeated. FREN 311
strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents,
or a score of F-7 on the French language placement exam.
FREN 615 - Intensive Readings in French (3 Credits)
Graduate students fulfill their foreign-language reading requirement with successful completion of the course. Undergraduates may take the course as an elective only. Grades S/U for graduates and undergraduates.

FREN 700 - Introduction to Graduate Studies in Languages, Literatures, and Cultures (3 Credits)
An introduction to graduate studies that includes a survey of contemporary literary theory, an overview of the current state of the profession, and instruction in how to carry out research and write at the graduate level.
Cross-listed course: CPLT 700, GERM 700, SPAN 700

FREN 715 - History of the French Language (3 Credits)
Development of the French language from its origins to 1600.
Cross-listed course: LING 732

FREN 720 - La Nouvelle Vague et APRÁ¨s/The New Wave and After (3 Credits)
Modern French films in their cultural context beginning with the cinema of the Tradition of Quality and the Nouvelle Vague of the late 1950s.

FREN 730 - Francophone Literatures (3 Credits)
Literatures in French from Africa and the New World.

FREN 735 - Francophone Literature from Quebec (3 Credits)
Introduction to the literature and culture of French-speaking Canada and specifically of Quebec. A survey of influential works will be discussed in relation to their historical and cultural background.

FREN 740 - Old French Literature (3 Credits)
French literature from 842 to 1500.

FREN 750 - Sixteenth-Century French Literature (3 Credits)
Extensive readings and study in the prose, poetry, and drama of 16th-century literature.

FREN 760 - Seventeenth-Century French Literature (3 Credits)

FREN 770 - Eighteenth-Century French Literature (3 Credits)

FREN 775 - Seminars on Selected Topics in Foreign Language Education (3 Credits)
Topics will be identified by title in the schedule of classes. Each topic may be taken only once.

FREN 776 - The Teaching of Foreign Languages in College (3 Credits)
Basic principles of foreign language teaching in college combined with practical demonstrations. Note: Required of all graduate assistants. This course will not count toward the 30-hour M.A. or M.A.T. degree.

FREN 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the 30-hour M.A. or M.A.T. degree.

FREN 780 - Nineteenth-Century French Literature (3 Credits)

FREN 790 - Twentieth-Century French Literature (3 Credits)

FREN 795 - French Seminar (3 Credits)
May be repeated with approval of advisor.

FREN 796 - Special Projects in French (1-3 Credits)
Directed research and reading in subjects to be individually assigned. Prior written approval of professor required. May be repeated once for credit.

FREN 799 - Thesis Preparation (1-9 Credits)

---

Genetic Counseling (HGEN)

HGEN 700 - Medical Genetics for Health Professionals (3 Credits)
An overview of the role of genetics in health and illness. Focus of study includes strategies for diagnosis, prevention, and treatment of genetic disease and the integration of genetics into clinical practice.

HGEN 701 - Introduction to Genetic Counseling (3 Credits)
An overview of the history and development of genetic counseling. Introduction to the fundamental components of and skills utilized in prenatal, pediatric, and adult genetic counseling.
Prerequisites: admission to program.

HGEN 702 - Psychosocial Aspects of Genetic Counseling (3 Credits)
Exploration of the impact of genetic conditions on the individual and family. Psychosocial skills will be strengthened through reading, role play, discussion, and interactions with affected individuals and families.
Prerequisites: HGEN 701.

HGEN 703 - Approaches to Ethical Challenges in Genetic Counseling (1 Credit)
Seminar in bioethical principles and their application to case management and genetic counseling. Includes lecture, case presentation, and discussion.
Prerequisites: HGEN 701.

HGEN 704 - The Genetic Counseling Process (3 Credits)
Introduction to counseling skills utilized in genetic counseling via reading, discussion, clinical observation, and role play.
Corequisite: HGEN 701.

HGEN 705 - Clinical Skills Seminar (1 Credit)
Intensive skill development focused on practical aspects of patient care for clinical rotation preparation.

HGEN 710 - Genetic Counseling Methods (3 Credits)
An integration of the student's theoretical background and clinical experiences with focus on the development of clinical skills. Format includes case presentation and discussion.
Prerequisites: HGEN 702

HGEN 715 - Contemporary Issues in Genetic Counseling (1 Credit)
Discussion forum targeted at critical evaluation of medical genetics literature and examination of current issues facing the genetic counseling profession. May be repeated for up to 4 credit hours.

HGEN 720 - Medical Genetics (4 Credits)
A study of the clinical aspects of human genetics with focus on single gene, chromosomal, and multifactorial genetic disease; the underlying molecular and biochemical principles; and determination of genetic risk.

HGEN 722 - Human and Medical Genetics (3 Credits)
Principles of genetics as they apply to medicine and basic concepts needed to understand human genetics. Current knowledge and essential areas of research in human and medical genetics.
Prerequisites: BIOL 302 and BIOL 303 or equivalent.

HGEN 725 - Human Developmental Biology I (4 Credits)
The process of normal human development and basic physiological/anatomical processes of organ systems including embryo, craniofacial, nervous, respiratory, musculoskeletal, and the integumentary systems. Clinical significance and etiologies of human malformations.

<tr>
<td>GEOG 510</td>
<td>Special Topics in Geographic Research</td>
<td>3</td>
<td>May be repeated as content varies by title.</td>
</tr>
<tr>
<td>GEOG 512</td>
<td>Migration and Globalization</td>
<td>3</td>
<td>A survey of the political, economic, and social causes and consequences of migration. Topics include migration policy, border control, settlement patterns, transnationalism, multiculturalism, and integration. Selected contemporary and historical cases.</td>
</tr>
<tr>
<td>GEOG 515</td>
<td>Political Geography</td>
<td>3</td>
<td>Concepts of space and power and their relationship to politics, elections, geopolitics, identities, law, economics, populations, and civil society.</td>
</tr>
<tr>
<td>GEOG 516</td>
<td>Coastal Zone Management</td>
<td>3</td>
<td>Analysis of the competing demands for limited resources in the coastal zone with emphasis on the role of management in the resolution of conflicts over resource use.</td>
</tr>
<tr>
<td>GEOG 521</td>
<td>Landscapes of South Carolina</td>
<td>3</td>
<td>An examination of the factors responsible for creating the contemporary South Carolina cultural landscape.</td>
</tr>
<tr>
<td>GEOG 525</td>
<td>Geographical Analysis of Transportation</td>
<td>3</td>
<td>Analysis of transportation systems and the application of geographic tools to transportation planning.</td>
</tr>
<tr>
<td>GEOG 530</td>
<td>Environmental Hazards</td>
<td>3</td>
<td>Human and environmental contributions to the generation and management of hazards originating from extreme natural events to technological failures. Contemporary public policy issues at the national and international level.</td>
</tr>
<tr>
<td>GEOG 531</td>
<td>Quantitative Methods in Geographic Research</td>
<td>3</td>
<td>A survey of basic quantitative approaches for handling and interpreting geographically related data; univariate and bivariate procedures applicable to a variety of problems.</td>
</tr>
<tr>
<td>GEOG 535</td>
<td>Hazards Analysis and Planning</td>
<td>3</td>
<td>Examination of the geo-spatial aspects of hazards analysis and planning with specific reference to disaster preparedness, recovery, mitigation, and resilience.</td>
</tr>
<tr>
<td>GEOG 538</td>
<td>Global Food Politics</td>
<td>3</td>
<td>Political, social, and cultural landscapes of food and farming around the world; issues of agricultural production, trade, consumption, and food security.</td>
</tr>
<tr>
<td>GEOG 541</td>
<td>Advanced Cartography</td>
<td>3</td>
<td>Planning, compiling, constructing, and evaluating thematic maps. Theory and practice in scribing, separation and screening, color proofing, and map reproduction. Discussions of the process of map communication and the ways the cartographer can improve that communication.</td>
</tr>
<tr>
<td>GEOG 542</td>
<td>Dynamic Cartography</td>
<td>3</td>
<td>Theories and principles of interactive and animated cartographic design.</td>
</tr>
<tr>
<td>GEOG 544</td>
<td>Geography of the City</td>
<td>3</td>
<td>The influence of political boundaries, historical forces, settlement patterns, and transportation processes on urban life.</td>
</tr>
<tr>
<td>GEOG 545</td>
<td>Synoptic Meteorology</td>
<td>4</td>
<td>Analysis of synoptic-scale circulation using weather maps, soundings, cross sections, thermodynamic diagrams, numerical models, and imagery.</td>
</tr>
<tr>
<td>GEOG 546</td>
<td>Applied Climatology</td>
<td>4</td>
<td>Analysis of climate applications in natural and human-modified environments. Content may include water resources, solar energy, urban planning, air quality, agriculture, and tourism. Course work includes lab and field experimentation.</td>
</tr>
</tbody>
</table>
GEOG 547 - Fluvial Geomorphology (3 Credits)
Introduction to landforms and processes associated with flowing water at the earth's surface. Hydrology, sedimentology, and theories of channel formation and drainage basin evolution.

GEOG 549 - Water and Watersheds (3 Credits)
Spatial variation of hydrology, water quality, and water-related hazards, including runoff generation, soil erosion, sedimentation, and flood hazards. Emphasizes a watershed perspective using geographic data and methods.
Prerequisites: GEOG 347, GEOL 371, or ECIV 360.

GEOG 551 - Principles of Remote Sensing (3 Credits)
Introduction to remote sensing. A variety of imaging systems including black and white, color, and high altitude color infrared photographs, LANDSAT, thermal infrared, and active microwave. Use of remote sensing for studying the extra-terrestrial environment and earth weather systems.

GEOG 552 - LiDaRgrammetric and Photogrammetric Digital Surface Mapping (3 Credits)
Introduction to fundamental concepts used to map topographic and planimetric Earth surface features using digital LiDAR (LiDaRgrammetric) and digital soft-copy photogrammetry (Photogrammetric).
Prerequisites: GEOG 363 or GEOG 341 or GEOG 345 or GEOG 551 or GEOG 563.

GEOG 554 - Spatial Programming (3 Credits)
Computer programming of spatial problems; spatial statistical analysis, interactive graphics, and computer maps.

GEOG 556 - WebGIS (3 Credits)
Web-based Geographic Information Systems (WebGIS), including concepts and principles of WebGIS, web programming fundamentals, web-based mapping techniques, and developing WebGIS applications.
Prerequisites: GEOG 363.

GEOG 560 - Source Materials for Geographic Instruction (3 Credits)
Introduction to selected materials available for all levels of instruction in geography. Emphasis on the substantive nature of the materials.
Cross-listed course: EDSE 505

GEOG 561 - Contemporary Issues in Geography Education (3 Credits)
Key concepts of geography and current approaches to teaching geography with specific attention to classroom materials, curriculum reform, cross-curricular integration, learning theory, and the use of geospatial/instructional technology.

GEOG 562 - Satellite Mapping and the Global Positioning System (3 Credits)
Technology and use of Global Positioning Systems (GPS). GPS space segment, receiver technologies, range observables, and positioning accuracy. Applications to large/medium scale mapping, remote sensing, and aerial photography.
Prerequisites: GEOG 345 or GEOG 363 or GEOG 551.

GEOG 563 - Advanced Geographic Information Systems (3 Credits)
Theory and application of geographic information systems including discussions of automated input, storage, analysis, integration, and display of spatial data. Use of an operational geographic information system.

GEOG 564 - GIS-Based Modeling (3 Credits)
Geographical information systems for modeling physical/human processes in space and time using raster and vector data. Cartographic modeling concepts, embedded models, and GIS-model coupling.

GEOG 565 - Geographic Information System (GIS) Databases and Their Use (3 Credits)
Representation, construction, maintenance, and analysis of spatial data in a geographic information system (GIS) database.
Prerequisites: GEOG 363 or GEOG 341 or GEOG 551 or GEOG 563.

GEOG 566 - Social Aspects of Environmental Planning and Management (3 Credits)
Geographical approach to environmental problems.
Prerequisites: GEOG 343.

GEOG 567 - Long-Term Environmental Change (3 Credits)
Consequences of increasing anthropogenic changes on environmental systems including the sources of change, regional impacts, and social and policy responses.
Prerequisites: GEOG 343.

GEOG 568 - Human Dimensions of Global Environmental Change (3 Credits)
Intersections of international development and environmental change; study of general theoretical perspectives balanced with case studies from the Global South.
Cross-listed course: ANTH 569
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

GEOG 570 - Geography of Public Land and Water Policy (3 Credits)
Geography of public land, water, and related public trust resources (wildlife, timber, minerals, fuels, recreation, wetlands, coastal zones, wilderness); historical geography of policy; spatial aspects of current research and management.

GEOG 571 - Microclimatology (4 Credits)
Field techniques and processes in the atmospheric boundary layer including radiation, soil heat fluxes, turbulence, momentum, latent and sensible heat fluxes, moisture, and evaporation.
Prerequisites: GEOG 202.

GEOG 573 - Climatic Change and Variability (3 Credits)
Observations and theories of climatic change and variability as they occur at different space and time scales. Projections of future climates. Techniques used in climatic change research and impact analysis.
Prerequisites: GEOG 202 or equivalent.

GEOG 575 - Digital Techniques and Applications in Remote Sensing (3 Credits)
Introduction to digital image processing techniques and applications. Image correction, enhancement, spatial and spectral transformation. Land use/land cover classification, and change detection.
Prerequisites: GEOG 551 or equivalent.
GEOG 581 - Globalization and Cultural Questions (3 Credits)
This course examines cultural understandings of and responses to globalization, examining topics such as its history and theories, migration, economic integration and inequality, identity, social movements, and the environment.

Cross-listed course: ANTH 581

Graduation with Leadership Distinction: GLD: Global Learning

GEOG 590 - Beach-Dune Interactions (3 Credits)
Influence of wind on coastal systems, with emphasis on nearshore currents, sediment transport and bedforms, aeolian transport, and dunes. Minimum Junior standing required.

Cross-listed course: MSCI 590

GEOG 595 - Internship in Geography (1-6 Credits)
Internship in government agencies, private-sector businesses, and non-profit organizations under the joint supervision of sponsor and departmental. A maximum of three credits may be applied to undergraduate Geography major or to Geography master's degree. May be repeated to a maximum of six credits.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

Experiential Learning: Experiential Learning Opportunity

GEOG 701 - History of Geographic Thought (3 Credits)
A survey of the development of geographic philosophy and an analysis of geographic methodology.

GEOG 705 - Directed Individual Studies in Geography (1-3 Credits)
Directed research topics individually assigned and supervised by graduate faculty. May be repeated for credit.

GEOG 706 - Selected Topics in Cartography and Remote Sensing (1-3 Credits)
Special topics are offered in the form of short courses, seminars, and workshops. Students may take these offerings, by permission of the instructor, for variable credit. The course may be taken more than once.

GEOG 709 - Women Explorers and Travelers (3 Credits)
Examines in geographical and historical contexts the activities of various women travelers and explorers.

Cross-listed course: WGST 709

GEOG 710 - Seminar in Geography Education (3 Credits)
Review of recent literature on geography education with an emphasis on the national geography standards, spatial thinking and the use of geospatial technology in pedagogic contexts.

GEOG 711 - Seminar in Regional Geography (3 Credits)
An analysis of the total geographic complex of selected major world regions.

GEOG 712 - Urban Geography (3 Credits)
An investigation into the concepts of the urban field and the urban region.

GEOG 713 - Advanced Economic Geography (3 Credits)
Investigation into the locational aspects and the spatial systems of selected economic activities, from both regional and systematic viewpoints.

GEOG 720 - World Regional Geography for Teachers (3 Credits)
The physical and human geography of major world regions with emphasis on basic principles of regional geography. Cannot be used in M.A., M.S., or Ph.D. programs in geography.

GEOG 721 - Seminar in Systematic Geography (3 Credits)
Studies of the characteristics, processes, and distributions over the world of the different cultural and physical environmental elements, such as economic, political, or social activities, climate and landforms.

GEOG 730 - Seminar in Environmental Geography (3 Credits)
Review of recent geographic literature on nature-society interactions with an emphasis on identifying research themes and methodologies employed by contemporary geographers.

Prerequisites: GEOG 530 or GEOG 568.

GEOG 731 - Seminar in Quantitative Analysis in Geography (3 Credits)
Advanced quantitative approaches for handling and interpreting geographically related data. Multivariate procedures applicable to a variety of problems will be presented. For each topic the students will analyze data relating to their individual interests.

Prerequisites: GEOG 531 or equivalent.

GEOG 734 - Field Seminar in Third World Development Projects (6 Credits)
The student works in a developing country for two to four months on projects designed by instructor and funded by the host country.

GEOG 735 - Seminar in Political Geography (3 Credits)

GEOG 737 - Seminar in Spatial Cognition (3 Credits)
Selected topics in spatial cognition.

GEOG 740 - Research Trends in Geography (1 Credit)
Seminar on research trends and writing research proposals in geography.

GEOG 741 - Seminar in Cartography (3 Credits)
A seminar to familiarize students with current experimental techniques, literature, and research topics in cartography.

GEOG 746 - Seminar in Climatology (3 Credits)
Major theories, measures of climatic change and variability, climate models, statistical analysis, and climate impacts.

GEOG 747 - Seminar in Physical Geography (3 Credits)
Investigation of physical systems and processes at the earth's surface. Topics vary; landforms, hydrology, pedology, biogeography, quaternary science, human impacts on physical systems.

GEOG 751 - Digital Techniques of Remote Sensing (3 Credits)
Introduction to the fundamental principles and methods of digital image processing of remotely sensed data. Algorithms are discussed for preprocessing, enhancement, and classification mapping of digital data for agricultural, urban, geological, and environmental problems.

Prerequisites: GEOG 551 and course in computer programming.

GEOG 755 - Remote Sensing Modeling and Analysis (3 Credits)
Satellite-based information extraction; programming skills for digital image processing; self-developed modeling approaches; quantitative analysis of remote sensing data.

Prerequisites: GEOG 575 or equivalent.

GEOG 763 - Seminar in Geographic Information Systems (3 Credits)
Theory and application of modern automated approaches to handling geographic data. Includes computer oriented procedures for the input, analysis and display of spatial data. Areas covered range from census address matching to statewide natural resource systems.

Prerequisites: GEOG 563.

GEOG 789 - Area Analysis: Europe, the Latin American Republics, Asia, or the United States (3-6 Credits)
To provide the student with a substantial understanding and familiarity with the region of specialization; a multidisciplinary approach with an emphasis on geographic, political, and economic issues most significant for each region. Offered for the International Master of Business Administration program. 03: 07/05/2019.

GEOG 799 - Thesis Preparation (1-9 Credits)
GEOG 801 - Historical and Contemporary Geographic Thought (3 Credits)
A survey of (1) the philosophical and intellectual foundations of Geography as a discipline, and (2) contemporary ideas and debates in major subfields of geographic research.

GEOG 805 - Advanced Directed Individual Studies in Geography (1-3 Credits)
Advanced directed research by a PhD student on geographical topics to be individually supervised by graduate faculty. This course may be taken for 1-3 credit hours of independent study by a student working closely with a faculty member on a specific research project to be defined and agreed upon between the student and a supervising faculty member.

GEOG 810 - Advanced Seminar in Human Geography (3 Credits)
Reading intensive seminar focused on conceptual frontiers and methodological debates in contemporary human geography with a secondary emphasis on intradisciplinary and cross-disciplinary affinities. Prerequisites: any 700-level GEOG seminar course.

GEOG 811 - Advanced Seminar in Regional Geography (3 Credits)
Advanced reading and discussion of the physical, economic, social and/or cultural geography of major selected world regions.

GEOG 830 - Advanced Seminar in Environmental Geography (3 Credits)
A research seminar where students critically evaluate relevant literature, develop a research proposal, and complete a related research project in environmental geography. Prerequisites: GEOG 730.

GEOG 841 - Advanced Seminar in Cartography (3 Credits)
A topic central to cartography will be studied. Students will critically evaluate pertinent literature, develop a research proposal, and complete a related research project.

GEOG 847 - Advanced Seminar in Physical Geography (3 Credits)
Research and discussion on various topics in physical geography. Literature varies with seminar topic but will include prevailing theories, data types, and modeling strategies in climatology, meteorology, hydrology, biogeography, soils, or geomorphology. Prerequisites: GEOG 547 or GEOG 746.

GEOG 851 - Advanced Seminar in Remote Sensing (3 Credits)
Advanced reading and discussion in the following areas - 1) the theoretical bases of remote sensing; 2) remote sensing of biophysical variables such as plant and soil temperatures and moisture content; 3) advanced principles of optical and digital image processing; and 4) economic aspects of remote sensing of the environment.

GEOG 863 - Advanced Seminar in Geographic Information Systems (3 Credits)
A research seminar in which students conduct a detailed analysis of specific aspects of geographical data handling. This will include the design, implementation, and management of an operational geographical information system.

GEOG 899 - Dissertation Preparation (1-12 Credits)

Geology (GEOL)

GEOL 501 - Principles of Geomorphology (3 Credits)
The process of earth denudation with emphasis on chemistry of weathering, stream and erosion hydraulics, quantitative analysis of land form evolution. Prerequisites: GEOL 101 and GEOL 102.

Cross-listed course: MSCI 501

GEOL 502 - Principles of Coastal Geomorphology (4 Credits)
Geological and physical controls on the morphology, development, and stability of coastlines. Analysis of waves and erosional processes, and coastal zone morphodynamics. Several required field trips. Prerequisite or Corequisite: MATH 122 or MATH 141.

Cross-listed course: MSCI 502

GEOL 503 - Regional Stratigraphy and Biostratigraphy of North America (3 Credits)
Sedimentologic, biostratigraphic, and tectonic history of North America, approached from paleogeographic considerations with emphasis on the Atlantic Coastal Plain and Continental Margin. Three hours lecture and three hours recitation per week. Required field trips.

GEOL 508 - Palynology (3 Credits)
Fundamentals of pollen analysis including morphology of modern and fossil forms, use of pollen and spores for correlation, dating, establishing phylogenetic trends, and reconstruction of ancient environments. Two lectures plus one two-hour lab per week.

GEOL 510 - Organic Sedimentation and Coal Genesis (3 Credits)
Theories of origin of coal deposits and coal-forming ingredients. Basic concepts of coal composition and classification. Practical applications of coal petrographic techniques. Two lectures plus one two-hour lab. Two optional field trips.

GEOL 511 - Advanced Paleontology (3 Credits)
Systematic, ecogetic, biogeographic, and evolutionary aspects of paleontology; lectures, practical exercises, field trips. Prerequisites: GEOL 305.

Cross-listed course: MSCI 511

GEOL 515 - Marine Micropaleontology (4 Credits)
Marine microfossils; distribution, ecology, paleoecology, and biostratigraphy; use of microfossils in marine sediments to study oceanographic history. Three lectures and two laboratory hours per week. Cross-listed course: MSCI 515

GEOL 516 - Sedimentology (4 Credits)
Modern concepts of sediment composition, depositional facies, depositional environments, and stratigraphy. Includes laboratory. Prerequisites: GEOL 325.

GEOL 518 - Surface to Subsurface Stratigraphy (3 Credits)
Surface to subsurface stratigraphic interpretation and techniques; litho- and biostratigraphy; geophysical log interpretation and subsurface presentation.

GEOL 520 - Isotope Geology and Geochronology (3 Credits)
Dating techniques for Pleistocene deposits, sediments, archaeological materials, igneous and metamorphic rocks. Cross-listed course: MSCI 521

GEOL 521 - Introduction to Geochemistry (3 Credits)
Investigation of low temperature chemical reactions controlling the geochemistry of the earth's surface. Emphasis on CO2, carbonates, oxidation-reduction, thermodynamics, isotopes, biogeochemistry.

Graduation with Leadership Distinction: GLD: Research
GEOL 524 - Environmental Radioisotope Geochemistry (3 Credits)
Introduction to radioactivity and the use of radionuclides to study environmental processes, including age-dating and biogeochemical cycling in aquatic systems. Two lectures per week.
Prerequisites: CHEM 111, CHEM 112, MATH 141.

GEOL 526 - Igneous Petrology (4 Credits)
Petrology and petrogenesis of igneous rocks; evolution of contrasting petrologic terranes. Three lectures and three laboratory hours per week.
Prerequisites: GEOL 202.

GEOL 527 - Metamorphic Petrology (4 Credits)
Petrography and petrogenesis of metamorphic rocks in orogenic belts. Three lectures and three laboratory hours per week.
Prerequisites: GEOL 202.

GEOL 531 - Plate Tectonics (3 Credits)
Geological and geophysical evidence for plate tectonics, detailed development of the plate tectonics model, and present areas of research, including measurements of plate motion using satellite geodesy.
Prerequisites: Must have passed two GEOL courses numbered 300 or above, or consent of instructor.

GEOL 537 - Field Methods in Geophysics (3 Credits)
Application of two or more geophysical field methods to a current geological problem. Independent study contract required.

GEOL 540 - Earth Science for Teachers I (3 Credits)
Survey of topics related to the origin, internal structure, and internal processes of the earth, including plate tectonics, earthquakes, volcanoes, and mountain building. Required field trips, two lectures, and three lab hours per week. Cannot be used in M.S. or PhD. programs in geology.
Cross-listed course: EDSE 548

GEOL 541 - Earth Science for Teachers II (3 Credits)
Surface processes acting on the earth; introduction to weather and climate, weathering, erosion, and sedimentary processes; landform evolution; ocean currents and tides, near-shore geologic processes. Required field trips, two lecture and three lab hours per week. Cannot be used in MS or PhD programs in geology.
Prerequisites: EDSE 548/GEOL 540.

Cross-listed course: EDSE 549

GEOL 542 - Methods in Geoscience Education Research (3 Credits)
Introduction to methods used in discipline-based education research and their application to research questions in the geosciences.
Prerequisites: C or better in least one course in GEOL, ENVR, MSCI or GEOG.

GEOL 545 - Geological Oceanography (3 Credits)
A comprehensive study of the origin and development of the major structural features of the ocean basins and the continental margins. Discussion of the techniques used in obtaining geologic data and the interpretation of sedimentary processes, volcanism, and the stratigraphy of the ocean basins.
Cross-listed course: MSCI 545

GEOL 546 - Marine Geophysics (3 Credits)
Introduction to the nature and structure of the ocean floor as revealed by geophysical techniques. Two hours lecture and three hours laboratory.

GEOL 548 - Environmental Geophysics (4 Credits)
Practical geophysical techniques for exploring the shallow subsurface. Seismic, resistivity, well log, gravity, magnetic method. Includes lectures and field exercises to collect and analyze data.
Prerequisites: MATH 141 and PHYS 201 or PHYS 211.

GEOL 550 - Sedimentary Simulations and Sequence Stratigraphy (4 Credits)
Problems of sequence stratigraphy resolved with graphic computer simulations. Sedimentary fill of basins by carbonates and/or clastics tracked as a function of rate of sediment accumulation, tectonic behavior, and sea level. Includes laboratory.
Prerequisites: GEOL 325.

Cross-listed course: MSCI 550

GEOL 553 - Marine Sediments (3 Credits)
Marine sedimentary environments; physical/biological factors which control the formation and distribution of modern marine sediments.
Prerequisites: GEOL 516.

Cross-listed course: MSCI 553

GEOL 554 - Applied Seismology (3 Credits)
Theory of seismic wave propagation. Seismic reflection data acquisition, processing, and interpretation.
Prerequisites: MATH 141; PHYS 201 or PHYS 211.

GEOL 555 - Elementary Seismology (3 Credits)
Basic elements of seismology. Mathematical development of seismic wave equations; measurement, description, and interpretation of seismic data.
Prerequisites: MATH 241.

GEOL 556 - Seismic Reflection Interpretation (3 Credits)
The interpretation of geologic structure using seismic sections. Recognition of apparent structure caused by velocity anomalies, multiples, and complex reflector geometry. Application to hydrocarbon exploration.

GEOL 557 - Coastal Processes (3 Credits)
Physical and geological processes controlling the formation and evolution of beach, barrier, and nearshore environments, including discussion of coastal management issues.
Cross-listed course: MSCI 557

GEOL 560 - Earth Resource Management (3 Credits)
An approach to problems of resource management by lecture and seminar using case studies in mineral, energy, hydrogeological, and environmental science.
Graduation with Leadership Distinction: GLD: Research Experiential Learning: Experiential Learning Opportunity

GEOL 561 - Environmental Field Geology (6 Credits)
An introduction to field methods in sedimentology, structural geology, hydrogeology and geophysics with special reference to geological hazards and environmental problems.

GEOL 567 - Long-Term Environmental Change (3 Credits)
Climatic changes of the past and their impact on the physical landscape, with an emphasis on the Quaternary period.
Prerequisites: A 200-level course in physical geography or geology or equivalent.

Cross-listed course: GEOG 567
GEOL 588 - Introduction to Micrometeorology (3 Credits)
Small-scale processes in the atmospheric boundary layers, including energy budget, radiation, soil heat transfer, humidity, viscous flows, turbulence, momentum and heat exchanges, evaporation, and marine atmospheric boundary layer.
Prerequisites: PHYS 201 and MATH 141.
Cross-listed course: MSCI 568

GEOL 570 - Environmental Hydrogeology (3 Credits)
Environmental considerations of the hydrologic cycle, occurrence and movement of ground water, aquifer analysis, and water well emplacement and construction. Water quality, pollution parameters, and the geochemistry of selected natural systems. The effects of environmental problems, waste disposal, and urban development upon the aqueous geochemical regime.
Prerequisites: GEOL 101 and CHEM 111 or their equivalents.

GEOL 571 - Soil Hydrology (4 Credits)
Saturated and unsaturated water flow through soils, pore pressure development, runoff generation, and watershed response to rainfall. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 202 and MATH 142.

GEOL 575 - Numerical Modeling for Earth Science Applications (3 Credits)
Finite difference and finite element methods for solving the diffusion equation and advection-dispersion equation, with applications in hydrogeology, geophysics, geology, and marine science.
Prerequisites: MATH 142; MATH 241 is recommended.

GEOL 579 - Air-Sea Interaction (3 Credits)
The physical mechanism responsible for interaction between the ocean and the atmosphere and the influence of air-sea interaction on atmospheric and oceanic dynamics and thermodynamics on a wide variety of spatial/temporal scales.
Cross-listed course: MSCI 579

GEOL 580 - Satellite Oceanography (3 Credits)
This course provides knowledge of various techniques used in satellite remote sensing of the oceans. Key skills will be developed in satellite data processing, image analysis, and hands-on research.
Cross-listed course: MSCI 580

GEOL 581 - Estuarine Oceanography (3 Credits)
Estuarine kinematics and dynamics; classification of estuaries; estuarine circulation and mixing. Scheduled field trips are required.
Prerequisites: MSCI 314.
Cross-listed course: MSCI 581

GEOL 582 - Marine Hydrodynamics (3 Credits)
Basic principles of fluid statics and dynamics. Conservation of mass, momentum, and energy; viscosity, vorticity, and boundary layers with examples from the marine environment. Applications to and analysis of ocean currents and waves. Scheduled field trips are required.
Prerequisites: differential equations, PHYS 201 or PHYS 211.
Cross-listed course: MSCI 582

GEOL 583 - Geology and Geochemistry of Salt Marshes (3 Credits)
Geological and geochemical processes in salt marshes. Methods of geological research in marshes, including instrumental techniques, sampling design, and data analysis. Two lectures per week plus four weekends of project-oriented fieldwork and/or equivalent lab work. Scheduled field trips are required.
Cross-listed course: MSCI 583

GEOL 584 - Environmental Earth Science for Teachers (3 Credits)
The hydrologic cycle in geologic settings of this region, and the effects of urbanization and industrialization on groundwater, rivers, and coasts. The vulnerability of urban and industrial systems to natural geologic processes. Two lecture and three laboratory hours per week. Not available for graduate credit for students in M.S. or Ph.D. programs in geological sciences.
Prerequisites: introductory course in any of the earth sciences.

GEOL 586 - Field Studies in Pleistocene and Holocene Geology for Teachers (1 Credit)
Two weekend field courses dealing with Pleistocene and Holocene coastal geology, plate tectonics, sea-level change, global circulation patterns, shoreline change since 1850, and nearshore processes.

GEOL 587 - Field Studies for Teachers in Natural and Altered Barrier Island Systems (1 Credit)
Two weekend field courses dealing with barrier island and associated marsh environments, marsh productivity, the dune-beach-bar system, shoreline stabilization, and nearshore processes on natural and armored shorelines.

GEOL 588 - Paleoclimatology (3 Credits)
An overview of Earth's climate history during Cenozoic. Emphasis will be placed on Pleistocene glacial-interglacial climate variability and understanding the proxies used to reconstruct past climate changes.
Cross-listed course: MSCI 711

GEOL 591 - Stable Isotope Geochemistry (3 Credits)
Introduction to the analysis of stable isotopes of hydrogen, oxygen, carbon, nitrogen, and sulfur using mass spectrometry. Emphasis will be on the use of these isotopes in geological problems.
Prerequisites: GEOL 521.
GEOL 716 - Eustasy and Global Variations in Sequence Stratigraphy (3 Credits)
Relationship of sequence stratigraphy to sea level variations, tectonics and sedimentation. Construction and analyses of paleogeographic maps, regional cross-sections, and chronostratigraphic charts.
Cross-listed course: MSCI 716

GEOL 717 - Organic Geochemistry (3 Credits)
Sources, transport, and fate of organic matter in natural environments including soils, riverine, estuarine, coastal and open ocean sediments and waters.
Prerequisites: GEO 521L/MSCI 521.

GEOL 720 - Crystal Chemistry and Mineral Structure (3 Credits)
Principles of atomic structure and chemical variation of minerals.

GEOL 722 - Aqueous Geochemistry (3 Credits)
This course was not found in the supplied content but was listed in the program requirements. If possible, please provide us with the correct information.

GEOL 725 - Solid Earth Processes (3 Credits)
Examination of the structure and dynamics of the Earth's interior combining perspectives from geophysics and geochemistry. Focus on the lithospheric cycle.

GEOL 726 - Igneous Processes and Crustal Genesis (3 Credits)
An investigation of igneous processes and their role in crustal genesis and evolution.

GEOL 731 - Advanced Structural Geology (3 Credits)
A study of the deformation of the earth's crust including mechanics of folding, faulting, jointing, and cleavage formation. Consideration of current theories of orogenesis in relation to geophysical evidence for the structure of the earth's crust, mantle, and core.
Prerequisites: GEOL 331 and GEOL 536.

GEOL 733 - Rock Mechanics (3 Credits)
Behavior of rocks and minerals up to 10kb, 8000°C. Role of internal pore pressure and time. Interplay of theory and empiricism.
Prerequisites: MATH 300.

GEOL 735 - Regional Tectonics (3 Credits)
Integrated analysis (from both model and case history approaches) of the regional structural geology of selected classic areas and analysis of the interaction of tectonic and sedimentary processes in the production of the sedimentary sequences of selected geosynclines and basins. Weekend field trips.

GEOL 743 - Decision Making in Environmental Resource Management (3 Credits)
Environmental project planning and management. Types and magnitudes of environmental problems; environmental pathways; environmental data acquisition and analysis; protection versus restoration; risk assessment; site assessment.
Prerequisites: GEOL 560.

GEOL 744 - Decision Making in Energy Resource Management (3 Credits)
An integrative seminar for science managers. Consideration of the technical, managerial, and financial aspects of decision making in geologic enterprises, with emphasis on hydrocarbon exploration.

GEOL 745 - Petroleum Geology (3 Credits)
An introduction to exploring for oil and natural gas; concentration on specific regions with energy resources.

GEOL 750 - Basin Analysis Seminar (3 Credits)
Development of the stratigraphic systems; detailed analysis of the aims, working methods, and relations between litho-, bio-, and chronostratigraphy. Three lecture hours per week with occasional field trips.

GEOL 751 - Carbonate Petrology (3 Credits)
Detailed analysis of the processes and products of carbonate sedimentation, diagenesis, and lithification, with special emphasis upon the role of organisms in forming carbonate sediments and sedimentary rocks. Three lecture hours per week with occasional field trips.

GEOL 752 - Sandstone Petrology (3 Credits)
Sandstone properties as a response to geologic processes. Relationships between the porous microstructure of sandstones and fluid transport. Automated petrography using image analysis and pattern recognition procedures.

GEOL 754 - Oceanographic Techniques (1 Credit)
Shipboard experience with basic techniques used by geological, physical, chemical, and biological oceanographers.

GEOL 755 - Environmental Measurements and Analysis (3 Credits)
A field and laboratory course designed to acquaint students with basic techniques needed to measure and analyze various biotic and abiotic environmental parameters in estuarine and shallow water habitats. One lecture and six laboratory hours per week. 03: 07/05/2019.

GEOL 758 - Analysis of Geological Data (3 Credits)
Principles used in processing, smoothing, correlating and contouring geological data and simulating geologic processes.

GEOL 764 - Seismic Reflection Interpretation (3 Credits)
The interpretation of regional stratigraphy and structure using seismic sections. Recognition of stratigraphic sequences, sedimentary facies, and extensional and compressional structures. Application to hydrocarbon exploration.

GEOL 765 - Exploration Seismology (3 Credits)
Seismic refraction and reflection methods including sources, instrumentation, data processing, velocity analysis, seismic modeling, and interpretation.
Prerequisites: GEOL 536 or equivalent.

GEOL 766 - Advanced Seismology (3 Credits)
Advanced treatment of elastic wave propagation, ray theory, normal modes, and free oscillations; applications to determine earth structure, modeling of earthquakes.
Prerequisites: GEOL 555 or equivalent.

GEOL 770 - Ground Water Geology (3 Credits)
The evaluation of aquifer characteristics by flow nets, Theis equation and graphic solution technique for water table and artesian conditions. Methodology of pumping tests and data collection. Prediction of aquifer response through time. Analog and computer analysis and interpretation of data.
Prerequisites: GEOL 570 or equivalent.

GEOL 771 - Topics in Hydrogeology (3 Credits)
Selected topics germane to the qualitative and quantitative aspects of the hydrologic cycle.

GEOL 772 - Geologic Theories (3 Credits)
Survey of the origin and development of geologic principles.
GEOL 773 - Water Quality and Pollution (3 Credits)
The nature of water; physical, chemical, and biological quality parameters. Techniques of quantitative analysis, methods of water quality control, and pollution abatement. Hydrogeochemical interactions and effects on water quality and waste disposal.
Prerequisites: GEOL 570 or equivalent.

GEOL 774 - Solute Transport in Geologic Media (3 Credits)
Processes influencing conservative and reactive transport of solutes through porous media. Geochemistry of natural waters; transport processes for geologic and environmental contaminant problems; mathematical equations; numerical methods; field techniques.
Prerequisites: GEOL 570 or ECIV 563.

GEOL 775 - Numerical Methods in Subsurface Hydrology (3 Credits)
Formation of groundwater flow and solute transport problems, theory and practice, numerical methods, solution techniques.
Cross-listed course: ECIV 761

GEOL 781 - Physical Oceanography (3 Credits)
Geographic and hydrodynamic aspects of oceanography, with emphasis on estuaries. Physical properties of sea water and theories and methods involved in ocean currents, air-sea interaction, waves, and tides.
Cross-listed course: MSCI 781

GEOL 782 - Chemical Oceanography (3 Credits)
Chemical characteristics of sea water, distribution of properties, and chemical processes in the oceans, with emphasis on estuaries.
Cross-listed course: MSCI 782

GEOL 783 - Oceanographic Time Series Analysis (3 Credits)
Techniques in the analysis of oceanographic data sequences, including filtering techniques, fast Fourier transforms, and empirical orthogonal functions.
Cross-listed course: MSCI 783

GEOL 784 - Geophysical Fluid Dynamics (3 Credits)
Equations governing the large-scale dynamics of the atmosphere and ocean, rotational influence, shallow water equations, vorticity, quasi-geostrophic dynamics, Rossby waves, energy and enstrophy, and geostrophic turbulence.
Prerequisites: MATH 241 or ENGR 360 or GEOL 582/MSCI 582 or GEOL 781/MSCI 781.

Cross-listed course: MSCI 784

GEOL 785 - Atmospheric Dynamics (3 Credits)
Elementary applications of the basic equations, scale analysis, planetary boundary layer, atmospheric oscillations, synoptic and mesoscale systems, hydrodynamic instability, cyclogenesis, frontogenesis, energy cycle, momentum budget, and tropical motion systems.
Cross-listed course: MSCI 785

GEOL 790 - Directed Individual Studies in Geology (1-6 Credits)
Directed research topics to be individually assigned and supervised by graduate faculty.

GEOL 799 - Thesis Preparation (1-9 Credits)

GEOL 800 - Seminar (General Geology) (0-1 Credits)
Required of all graduate students.

GEOL 801 - Seminar in Paleontology (2 Credits)

GEOL 802 - Seminar in Paleobotany (2 Credits)
Readings and discussions on current topics.

GEOL 803 - Seminar in Stratigraphy (2 Credits)
Critical analysis of recent papers dealing with the reconstruction of marine paleoenvironments based on deep sea sediments. Emphasis will be placed on specific intervals of geologic time. Two discussion hours per week.

GEOL 804 - Seminar in Stratigraphy (2 Credits)

GEOL 805 - Seminar in Earth and Ocean Science Education (1 Credit)
Interactive community outreach and middle school geoscience education for graduate students interested in outreach at the K-12 level. Pass/fail grading.

GEOL 818 - Seminar in Geophysics (2 Credits)
Seminar related to current topics in geophysics.

GEOL 819 - Seminar in Tectonophysics (2 Credits)
Readings and discussion on current tectonophysical problems.

GEOL 821 - Seminar in Mineralogy (2 Credits)

GEOL 824 - Seminar in Geochemistry (2 Credits)

GEOL 831 - Seminar in Structural Geology (2 Credits)

GEOL 832 - Seminar in Structural Geology (2 Credits)

GEOL 833 - Seminar in Structural Geology (2 Credits)

GEOL 834 - Seminar in Structural Geology (2 Credits)

GEOL 841 - Seminars in Petrology (2 Credits)

GEOL 842 - Seminar in Petrology (2 Credits)

GEOL 843 - Seminar in Petrology (2 Credits)

GEOL 844 - Seminar in Sedimentology (2 Credits)

GEOL 851 - Seminar in Sedimentology (2 Credits)

GEOL 854 - Seminar in Geomorphology (2 Credits)

GEOL 861 - Seminar in Hydrogeology (3 Credits)

GEOL 862 - Seminar in Hydrogeology (3 Credits)

GEOL 888 - Data Presentation Workshop (3 Credits)
Preparation and presentation, oral and written, of geological data, discussed via examples from students’ own work and from published material.

GEOL 899 - Dissertation Preparation (1-12 Credits)

German (GERM)

GERM 500 - Survey of German Culture (3 Credits)
Historical survey of the German contribution to the intellectual and cultural life of Europe. Texts and films in German.
Prerequisites: advanced reading ability in German.

GERM 515 - Introduction to German Linguistics (3 Credits)
Structural and descriptive linguistics applied to the German language.
Cross-listed course: LING 503

GERM 516 - History of the German Language (3 Credits)
Development of German in the Germanic, Old High German, Middle High German, and New High German periods. Phonology, morphology, syntax, semantics, and the relationship between dialects and the standard language.
Cross-listed course: LING 733
GERM 517 - Introduction to the Germanic Languages (3 Credits)
Introduction to historical Germanic linguistics including a survey of the Old Germanic languages (Old English, Old Frisian, Old Saxon, Old High German, Old Norse, Gothic); comparative phonology, morphology, and syntax, typology of modern Germanic languages and dialects; and common Germanic in its Indo-European context.
Cross-listed course: LING 533

GERM 518 - German Sociolinguistics (3 Credits)
Introduction to the study of variation in Modern German. Traditional German dialectology and dialect geography, language and society, multilingualism in the German-speaking countries, German in contact with other languages.
Cross-listed course: LING 548

GERM 580 - Topics in German Film (3 Credits)
Examination of recurring themes and issues or of significant periods and influential styles in German film. Course content varies and individual topics will be announced with course title.

GERM 598 - Selected Topics in German (3 Credits)

GERM 615 - Intensive Readings in German (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language requirement with successful completion of the course. Undergraduates may take the course as an elective only by permission of instructor. Grades S/U for graduates and undergraduates.

GERM 700 - Introduction to Graduate Studies in Languages, Literatures, and Cultures (3 Credits)
An introduction to graduate studies that includes a survey of contemporary literary theory, an overview of the current state of the profession, and instruction in how to carry out research and write at the graduate level.
Cross-listed course: CPLT 700, FREN 700, SPAN 700

GERM 710 - Middle High German (3 Credits)
A study of Middle High German language and literature with special emphasis on the lyric and epic poetry of the late 12th and early 13th centuries.

GERM 711H - Old Germanic Languages - Gothic (3 Credits)
Reading and translation of texts in the Old Germanic languages: Old High German 711H, Old Saxon 711S, Old Norse 711N, or Gothic 711G. May be repeated for credit with a different letter suffix from options noted above. Reading knowledge of Moderna German required.

GERM 711H - Old Germanic Languages - Old High German (3 Credits)
Reading and translation of texts in of the Old Germanic languages: Old High German 711H, Old Saxon 711S, Old Norse 711N, or Gothic 711G. May be repeated for credit with a different letter suffix from options noted above. Reading knowledge of Moderna German required.

GERM 711N - Old Germanic Languages - Old Norse (3 Credits)
Reading and translation of texts in of the Old Germanic languages: Old High German 711H, Old Saxon 711S, Old Norse 711N, or Gothic 711G. May be repeated for credit with a different letter suffix from options noted above. Reading knowledge of Moderna German required.

GERM 711S - Old Germanic Languages - Old Saxon (3 Credits)
Reading and translation of texts in of the Old Germanic languages: Old High German 711H, Old Saxon 711S, Old Norse 711N, or Gothic 711G. May be repeated for credit with a different letter suffix from options noted above. Reading knowledge of Moderna German required.

GERM 720 - The German Renaissance and Baroque (3 Credits)
Reading and interpretation of significant literary works of the 16th and 17th centuries.

GERM 730 - The German Enlightenment and its Counter-Currents (3 Credits)
Reading and discussion of key literary and classical works from specific 18th-century movements, including Enlightenment, Storm and Stress, and Weimar Classicism.

GERM 740 - German Romanticism (3 Credits)
The development of German Romanticism, its major literary works and personalities.

GERM 750 - German Realism (3 Credits)
German Realism, its major literary works and background.

GERM 760 - German Literature from 1889 to 1945 (3 Credits)
Currents of German literature since Naturalism, accompanied by critical reading of characteristic works by major writers of the period.

GERM 770 - Recent and Contemporary German Literature (3 Credits)
The development of German literature since World War II, through critical reading and interpretation of major representative works.

GERM 775 - Seminars on Selected Topics in Foreign Language Education (3 Credits)
Topics will be identified by title in the schedule of classes. Each topic may be taken only once.

GERM 776 - The Teaching of Foreign Languages in College (3 Credits)
Basic principles of foreign language teaching in college combined with practical demonstrations. Required of all graduate assistants. This course will not count toward the 30-hour M.A. or M.A.T degree.

GERM 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the M.A. or M.A.T. degree.

GERM 780 - German Seminar (3 Credits)
Content Varies.

GERM 781 - German Seminar (3 Credits)
Content Varies.

GERM 790 - Directed Reading and Research (3 Credits)

GERM 799 - Thesis Preparation (1-9 Credits)

Greek (GREK)

GREK 501 - Herodotus (3 Credits)
Readings from the Histories.

GREK 502 - Thucydides (3 Credits)
Readings from the History of the Peloponnesian War.

GREK 533 - Sophocles (3 Credits)
Selected plays.

GREK 534 - Euripides (3 Credits)
Selected plays.

GREK 543 - Hesiod and the Homeric Hymns (3 Credits)
Readings from the Works and Days, the Theogony, and the Homeric Hymns.

GREK 550 - Greek Seminar (3 Credits)
Authors and topics not covered in other Greek language courses, chosen to meet the needs of individual students. May be repeated with the approval of the department.

GREK 560 - Independent Study (1-3 Credits)
Special projects for independent study and research.
GREK 561 - Independent Study (1-3 Credits)
Special projects for independent study and research.

GREK 614 - Intensive Grammar Review of Ancient Attic Greek (3 Credits)
Intensive review for nonmajors designed to prepare them for GREK 615.

GREK 615 - Intensive Readings in Ancient Attic Greek (3 Credits)
Intensive reading for nonmajors. A review of grammar and syntax with reading of passages from Plato’s Apology. Primarily for graduate students to fulfill the foreign-language reading requirement.

Prerequisites: GREK 614.

Higher Education (EDHE)

EDHE 600 - Special Problems in Higher Education and Student Affairs (1-3 Credits)
The course is designed to provide opportunities for the study of special topics in higher education and student affairs administration.

EDHE 720 - Advanced Study in Adult Education (3 Credits)
Review of the major tenets and theories prominent in the adult learning literature and examination of historical, social, political, economic, and cultural factors influencing contemporary adult learning.

Prerequisites: graduate course in adult learning or development.

EDHE 730 - Evolution of Higher Education in America (3 Credits)
Development of environments, institutions, and individuals relevant to American higher education since the 17th century. Covers foundational history as relevant to contemporary administration, students, faculty, curricula, and policies at institutional, state, and federal levels.

EDHE 731 - Student Affairs in Higher Education (3 Credits)
Objectives and philosophy of student affairs, organizations and administration of student affairs divisions, and current trends and issues.

EDHE 732 - The American College Student (3 Credits)
Study of theories of college student development and learning and application of theories to enhance administrative practices in American higher education. Also examines the impact of the college environment on students.

EDHE 733 - The Ideas of American Higher Education (3 Credits)
Analysis of competing ideas of higher education with the purpose of helping students construct consistent sets of beliefs about values in higher education as a guide to understanding administrative and academic decisions.

Prerequisites: EDHE 730.

EDHE 734 - The Community/Technical College (3 Credits)
Introduction to historical and current events shaping two-year college missions, programs, clienteles, and services. Preparation to assume student services and instructional positions within two-year colleges.

EDHE 735 - Academic Advising in Higher Education (3 Credits)
A comprehensive introduction to the field of academic advising with special emphasis on the topic Appreciative Advising.

EDHE 736 - Financial Aspects of Higher Education (3 Credits)
Survey of principles and practices of financing higher education institutions, including revenue generation and asset allocation. The course reviews methods of budgeting and business processes utilized by colleges and universities.

EDHE 737 - Legal Aspects of Higher Education (3 Credits)
Especially for faculty members and administrators in post-secondary institutions. Emphasis on techniques of legal research, constitutional provisions, statutory laws, court decisions, and regulations as they affect administration of higher education.

EDHE 738 - Principles of College Teaching (3 Credits)
Designed for prospective teachers in institutions of higher education. Considers the practice of teaching from philosophical, empirical, conceptual, and practical vantage points to prepare instructors for a changing and diverse student population.

EDHE 739 - Seminar on Diversity in Higher Education (3 Credits)
Survey of major topics related to social justice, diversity and inclusion in post-secondary institutions.

EDHE 740 - Equity and Access in Higher Education (3 Credits)
The legal, educational and public policy issues that affect access to higher education in America.

EDHE 741 - Seminar on Ethical Issues in Higher Education (3 Credits)
Examination of contemporary ethical issues and problems confronted by higher education administrators.

EDHE 747 - Program Design and Implementation (3 Credits)
An analysis of the theories, processes, and issues underlying the design and implementation of programs for learners in a post-secondary or professional context.

EDHE 748 - Staff Development and Training (3 Credits)
Review of the history, concepts, current techniques, and issues in staff development and training examination and application of skills required by the training practitioner and learning specialist.

EDHE 790 - Independent Study (1-3 Credits)
Independent Study Contract required.

EDHE 799 - Thesis Preparation (1-9 Credits)

EDHE 830 - Organization, Administration, and Governance of Higher Education (3 Credits)
Application of organization and administrative theory to post-secondary institutions of education, with emphasis on policy implementation.

EDHE 831 - Internship in Higher Education and Student Affairs (3-6 Credits)
Internship experience in higher education and student affairs offices. Students are placed in college, university, or agency administration offices under joint supervision of administrative personnel of these offices and faculty members. Prospectus must be submitted at least one month before start of the internship.

EDHE 832 - Special Topics in Higher Education (3 Credits)
Selected topical problems in higher education for advanced graduate students interested in the administration of higher education or college teaching. Possible topics include, evaluation, accountability, management, the learning society, the financial crisis, coordination vs. autonomy. May be used on a program of study up to three times.

EDHE 833 - Contemporary Trends/Issues in Higher Education (3 Credits)
Overview of the major trends and issues confronting American higher education.
EDHE 834 - Internship in College Teaching (3-6 Credits)
Designed to provide opportunity for supervised teaching experience in 2-year and 4-year institutions of higher education. Student will intern as teacher with day-to-day supervision by an experienced instructor. Weekly seminar on campus.
Prerequisites: EDHE 738.

EDHE 835 - Leadership in Higher Education (3 Credits)
Leadership theory and practice as applied to programs, units, and institutions in higher education. Addresses leadership strategies, options, characteristics, traits, and styles.

EDHE 837 - Higher Education and Student Affairs Practicum I (3 Credits)
Supervised experiences in different aspects of higher education and student affairs administration through work in various administrative offices at USC and other colleges.
Prerequisites: EDHE 837.

EDHE 838 - Higher Education and Student Affairs Practicum II (3 Credits)
Additional opportunities for supervised experiences in higher education and student affairs administration.

EDHE 839 - Institutional Assessment in Higher Education (3 Credits)
Concepts, models, and practice of institutional assessment. Student participation in an actual assessment project.

EDHE 851 - Comparative Higher Education (3 Credits)
Introduces students to the study of higher education in other countries, including policy and governance, finance, student life, the professoriate and related issues in comparative perspective. Includes a study abroad component with additional fees.

EDHE 890 - Independent Study (1-3 Credits)
Restricted to doctoral students. Independent Study Contract required.

EDHE 899 - Dissertation Preparation (1-12 Credits)

History (HIST)

HIST 562 - The Middle East and the United States: 1800 to the Present (3 Credits)
Political, cultural, and economic ties which have linked the Middle East to the United States. Middle Eastern views of these relationships and their impact on modern Middle Eastern history.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 599 - Topics in History (3 Credits)
Reading and research on selected historical topics. Course content varies and will be announced in the schedule of classes by title.

HIST 640 - South Carolina History (3 Credits)
South Carolina since colonization.

HIST 641 - The American South Comes of Age (3 Credits)
Changes in the Southern region since 1940.

HIST 692 - Historic Preservation Field Experience--Charleston, S.C. (3 Credits)
On-site introduction to historic preservation including research, interpretation, management, and economics of preservation. Offered only in Charleston during summer term.

HIST 700 - Topics in History (3 Credits)
Reading and research in selected historical subjects.

HIST 701 - Reading Seminar in Colonial American History (3 Credits)
HIST 702 - Reading Seminar in American History, 1789-1876 (3 Credits)
HIST 703 - Reading Seminar in American History since 1876 (3 Credits)
HIST 704 - Reading Seminar in Ancient History (3 Credits)
HIST 705 - Reading Seminar in Medieval History (3 Credits)
HIST 706 - Reading Seminar in Early Modern European History (3 Credits)
HIST 707A - Reading Seminar in Modern European History, 1789-1900 (3 Credits)
Restricted to graduate students in history.
HIST 707B - Reading Seminar in European History, 1900-Present (3 Credits)
Restricted to graduate students in history.

HIST 708 - Reading Seminar in Russian and East European History (3 Credits)

HIST 709 - Reading Seminar in British History, 1500-1815 (3 Credits)

HIST 710 - Reading Seminar in British History since 1815 (3 Credits)

HIST 712 - Reading Seminar in Special Fields (3 Credits)

HIST 713 - The Age of the Antonines (3 Credits)
A consideration of the political, social, economic, and intellectual developments in the Roman world of the second century A.D.

HIST 715 - The Crusades (3 Credits)
Holy war and realpolitik in Mediterranean; East and West relations from the 10th through the 15th centuries.

HIST 716 - Normandy, France, and England, 911-1453 (3 Credits)
The development of the French and English monarchies from the establishment of Normandy to the end of the Hundred Years’ War.

HIST 720 - Introduction to the Study of History (3 Credits)
Introduction to the field for students who intend to become professional historians. Covers debates concerning the writing of history with a focus on recent theoretical and methodological issues. Restricted to M.A. and Ph.D. students in history.

HIST 721 - England Under the Tudors and Stuarts (3 Credits)

HIST 722 - England Under the Tudors and Stuarts (3 Credits)

HIST 725 - Modern British History (3 Credits)
A reading course in the literature of British history since 1815.

HIST 726 - Modern British History (3 Credits)
A reading course in the literature of British history since 1815.

HIST 727 - European Intellectual History, 1815-1900 (3 Credits)
A reading course in art history, literature, and changing social thought in the 19th century.

HIST 728 - European Intellectual History, 1900-1960 (3 Credits)
A reading course in art, architecture, the cinema, literature, and social thought in the 20th century.

HIST 729 - France since 1815 (3 Credits)
Readings in the political, social, economic, and cultural history of modern France.

HIST 730 - Russia from Peter the Great to Nicholas I (3 Credits)
The history of Russia from 1675-1855.
HIST 731 - Russia, 1855-1930 (3 Credits)
A reading course dealing with specific problems of modern Russian history.

HIST 732 - European Diplomatic History, 1870-1914 (3 Credits)

HIST 733 - Contemporary Europe (3 Credits)

HIST 734 - Empire and Nation in Modern Europe (3 Credits)
Comparative study of the concepts and dynamics of empire and nation in 19th- and 20th-century Europe.

HIST 735 - State and Society in Eastern Europe (3 Credits)
Selected topics in the development of the area in the 19th and 20th centuries.

HIST 739 - Readings in Pre-Modern Chinese History (3 Credits)
Selected topics in the history of China from the founding of the Han Dynasty in 202 B.C. to the end of the Ming Dynasty in A.D. 1644.

HIST 740 - China and the West, 1840-1949 (3 Credits)
A reading course on political, intellectual, and social changes in China resulting from the increased contacts with the West.

HIST 741 - Readings in the Social History of Sport (3 Credits)
A reading and discussion of the analytical and critical literature on sport history.
Cross-listed course: PEDU 741

HIST 744 - French Revolution and Napoleonic Era (3 Credits)
Reading course in the historical literature of the revolutionary era, including the 18th-century background.

HIST 745 - Readings in Modern Japanese History (3 Credits)
Topics include the Meiji Restoration, industrialization, nationhood and nationalism, World War II, and postwar changes.

HIST 748 - The Middle East and North Africa, 1798-1962 (3 Credits)
A reading course emphasizing political, intellectual, social, and religious movements in the Ottoman Empire and its successor states. Special attention to the growth of contacts between the Middle East and the West.

HIST 752 - Readings in American Colonial History (3 Credits)

HIST 753 - The Coming of the Civil War, 1815-1860 (3 Credits)
A study of the various factors which produced a breakdown of the democratic process in the United States and produced a domestic war.

HIST 754 - Rise of Industrialism (3 Credits)

HIST 755 - Contemporary United States (3 Credits)

HIST 756 - United States History, 1800-1850 (3 Credits)

HIST 757 - African American Women in Nineteenth and Twentieth Centuries (3 Credits)
This course will acquaint students with some of the secondary literature in African American women's history from the late nineteenth century through the twentieth century. The course examines the impact of race, gender, and class on the lives of black women and explores the historical relationship between African American women, work, family, community, and politics.
Cross-listed course: WGST 757

HIST 758 - Capital City Field School: Theory and Practice of Historic Preservation (3 Credits)
Introduction to theory and practice of historic preservation, taught in Columbia through on-campus classes, off-campus meetings with working professionals, and site visits around the Midlands.

HIST 761 - Southern Intellectual and Cultural History (3 Credits)
A study of the Southern mind together with an investigation of such other aspects of Southern civilization as are clearly related to the mental life of the region.

HIST 762 - The New South (3 Credits)
A survey of the economic, social, and political development of the Southern region since 1876.

HIST 763 - Victorian America (3 Credits)
Readings in the social and political history of the United States in the period from Reconstruction to the First World War.

HIST 764 - History of American Women (3 Credits)
Selected research topics on the cultural, social, economic, and political roles and contributions of American women.
Cross-listed course: WGST 764

HIST 765 - Readings in American Diplomatic History, 1776-1914 (3 Credits)

HIST 766 - Readings in American Diplomatic History, 1914-present (3 Credits)

HIST 770 - Latin American History (3 Credits)
Readings in selected topics in Latin American history.

HIST 772 - Exploring Ethnohistory (3 Credits)
Cross-cultural study of history. Includes theoretical perspectives and cases from the Americas, Europe, Africa, and Asia.
Cross-listed course: ANTH 773

HIST 773 - History of Mexico (3 Credits)
Readings in the political, economic and social history of Mexico.

HIST 774 - Atlantic World History, 15th to 19th Century (3 Credits)
Analysis of the methodological, conceptual, and historiographical debates dealing with the social, political, and cultural process that linked the continents bordering the Atlantic Ocean from the 15th to the 19th century.

HIST 775 - Comparative History of Slavery in the Americas from the 15th to the 19th Century (3 Credits)
Comparative approaches to the methodological, conceptual, and historiographical debates of slavery and the African Diaspora in the Americas, 15th to the 19th century.

HIST 776 - History of Brazil (3 Credits)
Readings in the political, economic and social history of Brazil.

HIST 780 - Readings in Modern Military Thought (3 Credits)
Major military thought from the French Revolution to the present.

HIST 781 - History and Theory of Museums (3 Credits)
Museums as central places for the creation, presentation, and representation of human knowledge and enhancement of civic ritual in modern states. U.S. museums considered in international context.

HIST 782 - Business History (3 Credits)
Readings in the modern history of business in Europe and America.

HIST 783 - History and Theory (3 Credits)
Examination of theory and case studies highlighting current themes in cultural history. Topics may include memory, ethnicity and race, gender and sexuality, popular culture, and truth and objectivity.

HIST 784 - Modern British Material Culture (3 Credits)
Use of material culture by historians of modern Britain including the country house, food and drink, slums and suburbs, the seaside resort, and the public school.
HIST 785 - Comparative History of Time (3 Credits)
Historical study of time-consciousness; how different modes of production have stimulated different forms of time-consciousness in American and other cultures.

HIST 786 - Comparative Applied History, U.S. and U.K. (3 Credits)
Summer field school in the U.K. to provide comparisons with U.S. theory and practice in archives administration, museum management, and historic preservation.

HIST 787 - Material Culture Studies (3 Credits)
Seminar in historical study of material culture; principal disciplinary and theoretical perspectives; emphasis on material culture of North America. Cross-listed course: ANTH 787

HIST 788 - Memory, History, and Space (3 Credits)
A seminar in the historical study of buildings, the built environment, and cultural landscape.

HIST 789 - Historic Site Interpretation (3 Credits)
An examination of the issues and problems in the interpretation of historic house museums and historic sites, with special emphasis on the development of an interpretive exhibit related to state and local history. Field trips.

HIST 790 - Archival Administration and Techniques (3 Credits)
The nature, value, and use of public and private archives; the principles and techniques for preservation, arrangement, description, and reference service for archives, personal papers, and historical manuscripts.

HIST 791 - Historical Editing (3 Credits)
An introduction to and a synopsis of the editorial process, including canons of selection and textual criticism; the editorial commitment; annotation; preparing manuscript for the printer; and the one-person editorial project.

HIST 792 - Historic Preservation (3 Credits)
An examination of the preservation process, including the history of historic preservation, the development of preservation administrative systems, and preservation research methods and strategies. Field trips.

HIST 793 - State and Local History (3 Credits)
An intensive inquiry into the source materials of South Carolina and the unique problems associated with state and local history.

HIST 794 - Research for Teaching (3 Credits)
Course to familiarize M.A.T. students with the basic bibliographic aids and printed sources useful for the preparation of lectures.

HIST 795 - Special Topics: Study Travel in History (1-6 Credits)
Class time will be spent preparing a project that can be completed by faculty-supervised travel in the United States or abroad. Designed to be offered during summer sessions.

HIST 796 - European Historiography (3 Credits)
A course whose purpose is to acquaint students with the development of European historiography, schools of historical thought and interpretation. This course or HIST 797 is required of all history graduate students.

HIST 797 - American Historiography (3 Credits)
A course whose purpose is to acquaint students with the development of American historiography, schools of historical thought and interpretation. This course or HIST 796 is required of all history graduate students.

HIST 798 - Internship in History (3 Credits)
The application of historical skills in a sponsoring historical or public agency.

HIST 799 - Thesis Preparation (1-9 Credits)
For master's candidates.
HPEB 511 - Health Problems in a Changing Society (3 Credits)
Current and emerging health problems in society: causes, effects, and prevention.
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy

HPEB 512 - Southern Discomfort: Public Health in the American South (3 Credits)
Investigation of the unique health and disease profile of the American South, including regional disparities that remain unresolved despite a public health revolution. Topics range from endemic diseases of the antebellum period to the current HIV/AIDS crisis, and ethics of research.

HPEB 513 - Race, Ethnicity, and Health: Examining Health Inequalities (3 Credits)
A comprehensive overview of race/ethnicity and health. Class discussions will focus on comparing health status and health outcomes of different racial/ethnic groups in the U.S. and discussing possible explanations for inequalities from a behavioral science perspective.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HPEB 521 - The Total School Health Program (3 Credits)
A course designed to acquaint the student with the various facets of the modern school health program. Includes school responsibilities for health and safety instruction, school health services, school environmental health problems, school and community relationships, resources for health, and evaluation of programs.

HPEB 540 - Drug Prevention (3 Credits)
Nature of drug actions, motivational factors that influence the use and abuse of drugs, and examination and evaluation of procedures to provide effective drug prevention efforts.

HPEB 542 - Tobacco Prevention and Control in Public Health (3 Credits)
Examines policies and practices for tobacco prevention and control in public health.

HPEB 547 - Consumer Health in Contemporary Society (3 Credits)
An analysis and appraisal of issues related to the production and distribution of products and services as these activities affect consumer health.

HPEB 550 - Behavioral Concepts and Processes for the Health Professional (3 Credits)
The development of interpersonal skills in dealing with health clients in various settings.

HPEB 551 - Medical Anthropology: Field Work (3 Credits)
Application of observation techniques, field notes, informant interviewing, and secondary data analysis to interpreting differential perceptions of health problem solving in the community and clinic.

HPEB 552 - Medical Anthropology (3 Credits)
Socio-cultural factors in health, illness, healing, and in medical systems. Cross-cultural and ethnographic evidence for public health research and program applications.
Cross-listed course: ANTH 552
Graduation with Leadership Distinction: GLD: Research

HPEB 553 - Community Health Problems (3 Credits)
Identification and analysis of major community health problems, their causes, the roles of individuals, community agencies, and government in affecting their solutions. Emphasis upon personal involvement and the responsibility for community health.
Graduation with Leadership Distinction: GLD: Community Service

HPEB 555 - Managing Stress (3 Credits)
Conceptualizing the nature of the stress; psychological, emotional, and spiritual aspects of stress; competency in the active management of stress and mobilizing support.

HPEB 560 - Cooking Up a Storm: Food, Globalization, Localization, and Health in the South (3 Credits)
The role of food in defining our relationships to our family, community, nation, and world. How food underlies much of the political, economic, and social struggles throughout the world.

HPEB 620 - Nutrition Through the Life Cycle (3 Credits)
Examination of nutritional concerns, requirements, and metabolism from pre-conception through the aging process; analysis of cultural, environmental, psychosocial, physical, and economic factors affecting nutritional status through the life cycle; and methods for assuring adequate nutrition through dietary selection, promotion of healthy eating throughout the life cycle and nutritional assessment for each state of the life cycle.

HPEB 621 - Maternal and Child Health (3 Credits)
Public health issues, social and behavioral science, policies, programs, and services related to maternal and child health in the United States and other countries.
Cross-listed course: WGST 621
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

HPEB 627 - Lesbian, Gay, Bisexual and Transgender (LGBT) Health (3 Credits)
Health status and concerns of lesbian, gay, bisexual, and transgender communities. Includes an examination of measurement issues and methodological considerations in research, as well as intervention efforts targeting LGBT populations.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HPEB 631 - Health Promotion for Elementary and Middle School Teachers (3 Credits)
A multimedia course emphasizing health education strategies for major S.C. health problems, risk factors, and concepts of positive health behavior.

HPEB 640 - Behavioral Economics in Public Health (3 Credits)
The ways behavioral economics can help achieve goals in public health and health care. How behavioral insights can be applied to reach promotion aims ranging from achieving weight loss to medication adherence to appointment attendance.

HPEB 653 - Nutrition Assessment and Counseling (3 Credits)
Assessment of nutritional outcomes and work with research participants/patients. Methods for collection of dietary data, anthropometry, and body composition, including the use of new technologies. Nutrition counseling and interviewing techniques useful in gathering nutrition information.

HPEB 654 - Maternal and Child Nutrition (3 Credits)
A survey of current concepts in clinical and public health nutrition which are unique to infants, children, and pregnant and lactating women.

HPEB 674 - Social Networks, Social Capital, and Health (3 Credits)
Examination of health sciences and sociological research on social networks, social capital, and health. Theoretical and methodological foundations for network analysis of social relationships and health, design of public health interventions, and use of online social networks to promote health. Key constructs include social support, social capital, and social diffusion.
HPEB 679 - Addressing Childhood Obesity through Community Approaches (2 Credits)
Approaches for prevention of childhood obesity, using perspectives from public health, social work, exercise science, pharmacy, medicine, and behavioral nutrition. Training to teach diet/physical activity lessons in elementary school settings.

Cross-listed course: SOWK 679

HPEB 680 - Laboratory Techniques in Physiological Measurement (3 Credits)
Practical laboratory skills and theoretical bases of measurements in human physiology, bioelectric potentials, respiratory physiology, energy expenditure, body composition, temperature regulation, and biochemical assays.

HPEB 683 - Contemporary Topics in Sexual Health (3 Credits)
Comprehensive overview of contemporary topics in sexual health.

HPEB 684 - HIV/STI Prevention (3 Credits)
The role of effective behavioral interventions in preventing the spread of the human immunodeficiency virus (HIV) and other sexually transmitted infections (STI) among diverse populations.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Research

HPEB 690 - Independent Study (1-6 Credits)
Topics to be assigned and approved by advisor and department head.

HPEB 700 - Concepts and Methods in Health Promotion (3 Credits)
Fundamental principles and practices of public health promotion including history, ethics, cultural competence, professional responsibilities, overview of theory and models, and selection and implementation of instructional methods.

HPEB 701 - Theoretical Foundations of Health Promotion (3 Credits)
Role of theory in shaping research and practice in health promotion and education; historical and ongoing interaction between health education and the applied social sciences.

HPEB 702 - Planning Health Promotion Programs (3 Credits)
Health promotion planning frameworks; issues in planning, implementing, and evaluating health promotion programs in a variety of settings.

HPEB 703 - Public Health Education Seminar (1-3 Credits)
An examination of controversial and critical issues confronting the health educator, including ethical and professional concerns relating to the practice of health education in a variety of settings.

HPEB 704 - Health Education Research Seminar (1 Credit)
Presentation and discussion of research topics in health education. May be repeated for up to a total of 3 hours.

HPEB 705 - Contemporary Concepts of Health and Health Education (3 Credits)
This course will explore and analyze various concepts of health, disease, and illness as applicable to health education. Consideration will be given to alternative concepts of health and their implications for directions in health education.

HPEB 706 - Consultation in Health Systems (3 Credits)
Consultation for role, program, and organization development in local and state health agencies, and in communities. Advanced practice in consulting roles aimed at system change.

HPEB 707 - Health Promotion Research Methods (3 Credits)
Research methods applicable to the study of individual and group health behavior. Interfaces behavioral theory, research design and methods, and data analysis/interpretation. Introduction to evaluating health promotion research and evaluation.

HPEB 708 - Health Education Methods (3 Credits)
Curricular planning and instructional strategies utilized in public health education settings.

HPEB 709 - Stress and Support Concepts and Management (3 Credits)
Identifies environmental, organizational, interpersonal, and individual patterns of stress with particular reference to health professionals; competency in the active management of stress and mobilizing support in health settings and organizations is evaluated.

HPEB 710 - Evaluation of Health Promotion Programs (3 Credits)
Planning and implementation of health education program evaluations. Emphasis on political, practical, and theoretical aspects of evaluation.

Prerequisites: HPEB 700.

HPEB 711 - Applied Health Communication (3 Credits)
Application of communication, media, and health behavior theory to the development of health communication messages and campaigns.

HPEB 712 - Changing Health Practices (3 Credits)
Students plan and implement a class on changing a health practice such as exercise, diet, or smoking. Lectures and reading assignments on theoretical foundations of how to conduct classes in changing health practices.

HPEB 713 - Behavioral Aspects of Physical Activity (3 Credits)
Psychosocial and behavioral factors in physical activity. Topics include mental health effects of exercise, behavior change theories applied to physical activity, and physical activity determinants and interventions.

Cross-listed course: EXSC 710

HPEB 715 - Qualitative Research Methods in Public Health (3 Credits)
An overview of qualitative data collection and analysis methods commonly used in public health research with an emphasis on practical applications and hands-on experience.

HPEB 720 - Coordinating the School Health Program (3 Credits)
For persons administratively responsible for the school health program and for individuals involved in discharging the various responsibilities. Characteristics of the Health Education Coordinator; areas of responsibility, policies and procedures relative to health education needs; curricular patterns; criteria for an extensive evaluation of selected school health programs.

Prerequisites: HPEB 521.

HPEB 722 - Health Education Curriculum Development (3 Credits)
The basis and nature of the health curriculum, its development, and appraisal of state and national health education curricula.

HPEB 726 - Prevention of Teen Pregnancy (3 Credits)
Design and implementation of community-based educational practices and services to prevent teen pregnancy.

HPEB 730 - Programs for Patient Education (3 Credits)
Knowledge and skills for identifying needs, obtaining support, designing curricula, organizing resources, training personnel, implementing activities, and evaluating patient education programs are presented.

HPEB 731 - Health Promotion for Older Adults (3 Credits)
Research and practice issues in health promotion with older adults, including the impact of ageism, ethnicity, gender, normal aging changes, self-management skills, and social networks on healthy aging.

HPEB 742 - Alcohol, Drugs, and Public Health Policy (3 Credits)
Public health policy issues related to treatment, prevention, research, and education in the field of alcohol and drug abuse.
HPEB 748 - Community Health Development (3 Credits)
Organizational development, policy influence, capacity building, empowerment, community diagnosis and coalition development for enhancing health.

Graduation with Leadership Distinction: GLD: Community Service

HPEB 750 - Health Implications of Stress and Disease (3 Credits)
Caustive agents of chronic disease, with particular emphasis placed on those illnesses which have been termed psychosomatic and related to or caused by stress; physiological response of the individual to contemporary psychological stressors as well as methods of adaptation and prophyaxis.

HPEB 751 - Physical Activity and Health (3 Credits)
An examination of physical activity/exercise habit patterns as they relate to health status. Emphasis on the chronic effects of exercise.

HPEB 752 - Nutrition and Public Health (3 Credits)
A study of the relationships between human nutrition to public health and the potential for risk reduction through health education.

Prerequisites: HPEB 502 or equivalent.

HPEB 753 - Obesity and Eating Disorders (3 Credits)
The public health implications of obesity and eating disorders, considerations of causes, and intervention strategies.

HPEB 754 - EXSC 700 or HPEB 700 or consent of instructor (3 Credits)
Role of the physical activity specialist within the community health department. Development, initiation, and evaluation of campaigns, resources, community capacity building, and coalitions to promote physical activity.
Prerequisites: EXSC 700 or HPEB 700.

HPEB 760 - Health Education in Occupational Worksites (3 Credits)
An overview of health education program models and strategies designed for workers in industry and business.

HPEB 769 - Interdisciplinary Perspectives on Child Abuse and Neglect (3 Credits)
Current knowledge about child abuse and neglect, including typologies, etiology, effects, and current practice interventions.

HPEB 770 - Health Education in Developing Countries (3 Credits)
Development of programs in predominantly rural third world countries. Foreign nationals may substitute this course for HPEB 700.

HPEB 771 - Socio-Cultural Perspectives on Population Health (3 Credits)
Theories, measurement, and empirical evidence related to macro-level factors and health. How socio-cultural and physical environments as well as socially ascribed identities can constrain or promote health.

HPEB 772 - Current Trends in Developing World Health (3 Credits)
Current issues in health of the developing world as represented in literature, policy documents, and program materials. For students having worked either in public health or in the developing world.

HPEB 773 - International Public Health Seminar (1 Credit)
Various lecturers address the state of the art of public health strategies for third world countries aimed at the reduction of death and disease. Repeatable up to a maximum of 3 credit hours.

HPEB 779 - Injury Prevention and Control (3 Credits)
Etiology of injuries and strategies for their prevention are examined within an interdisciplinary framework.

HPEB 782A - Teaching Internship (Health) (3 Credits)
Application of effective teaching techniques and organization of instructional settings in health for K-12.

Prerequisites: acceptance to the Professional Program in Education.

Cross-listed course: EDTE 782A

HPEB 782B - Teaching Internship (Health) (9 Credits)
Application of effective teaching techniques and organization of instructional settings in health for K-12.

Prerequisites: HPEB 782A.

Corequisite: EDSE 584.

HPEB 790 - Independent Study (1-6 Credits)

HPEB 792 - Selected Topics in Health Education (1-6 Credits)
A study of selected issues confronted in health education programs.

HPEB 796 - Health Education Project (1-6 Credits)
Performance of a predetermined work or service project in a health education setting.

HPEB 797 - Applied Practice Experience (5 Credits)
The focus of this course is the synthesis and application of selected program learning objectives in the performance of an applied work or service project in a public need setting.

HPEB 798A - Public Health Practicum Seminar (3 Credits)
Synthesis and application of MPH competencies for professional development, culminating in a practicum fieldwork contract.

Prerequisites: HPEB 700, HPEB 701, HPEB 702, HPEB 707, HPEB 710, HPEB 748.

HPEB 798B - Public Health Practicum Fieldwork (3 Credits)
Performance of a limited work or service project in a public need setting, pursuit of planned, learning objectives related to previously identified aspects of the student's chosen role.

Prerequisites: HPEB 798A.

HPEB 799 - Thesis Preparation (1-9 Credits)

HPEB 802 - Implementing and Monitoring Health Promotion Interventions (3 Credits)
This advanced course will examine the process of implementing and monitoring theory- and evidence-based health promotion interventions with a strong emphasis on research interventions.

HPEB 810 - Applied Measurement in Health Education Research (3 Credits)
This doctoral seminar will examine conceptual and measurement issues regarding psychosocial constructs typically used in health education and health survey research–specifically health beliefs, health attitudes, health behaviors, health status, wellness, and perceptions of health care contexts.

HPEB 811 - Advanced Public Health Communication: Theory and Methods (3 Credits)
Advanced conceptualization, development, and evaluation of communication strategies that aim to promote public health.

Prerequisites: HPEB 711 or equivalent course.
HPEB 815 - Theory-Driven Analysis (3 Credits)
Intermediate-level overview of methods for answering theoretically-informed research questions using quantitative data. Designed for applied researchers who seek a better understanding of statistical methods from describing a population to testing a conceptual model. Practical guidance for organizing, writing about, and presenting results from basic and multivariate statistical analyses.
Prerequisites: BIOS 757 or an equivalent.

HPEB 818 - Advanced Evaluation of Health Promotion Programs (3 Credits)
Evaluation methods including formative, retrospective and monitoring techniques; survey and trend analysis; application of experimental and quasi-experimental designs, triangulation, and cost-accounting.

HPEB 820 - Public Health Advocacy and Policy (3 Credits)
Overview of the key concepts and practices in advocacy efforts to promote the health of human populations through policy, including theories and conceptual frameworks for understanding how social and political change happens. Emphasis on strategies for promoting public health policies, and methods for evaluating advocacy activities and policy impacts.

HPEB 824 - Social and Physical Environment Interventions in Health Promotion (3 Credits)
This advanced course examines issues related to planning, implementing or evaluating health promotion interventions that target change in physical and social including policy environments.

HPEB 898 - Doctor of Public Health Practicum (1-6 Credits)
Applied comprehensive fieldwork experience which facilitates the synthesis of knowledge, skills and application of DrPH core competencies and core content of the discipline. Course may be taken a maximum of 3 times. Enrollment restricted to DrPH students.

HPEB 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: one full year, 18 hrs, of graduate study beyond the master’s level.

Health Services Policy Mgmt (HSPM)

HSPM 500 - Introduction to Health Care Management and Organization (3 Credits)
Provide students with overview of health services management, management techniques and the different roles and functions of the different health care services. Use of field trips and guest speakers from different health care providers.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

HSPM 509 - Fundamentals of Rural Health (3 Credits)
Overview of the delivery and financing of health care in the rural U.S., with emphasis on vulnerable rural populations and access to care.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HSPM 510 - Comparative Health Systems and Health System Efficiency, Effectiveness, Sustainability and Equity (3 Credits)
Comparative health systems of the world including health system organization, management, financing, resource use and health outcomes.

HSPM 513 - Issues in Health Care Information Management (3 Credits)
An introduction to data management in healthcare institutions for undergraduate students and non-HSPM major graduate students. Topics include the nature of medical data, legal protections surrounding such information, and basis strategies for managing information technology resources.
Prerequisites: HSPM 500.

HSPM 514 - Introduction to Health Services Delivery and Policy (3 Credits)
Overview of health services delivery in the United States, including organization and financing of health care, health insurance practices, primary and long-term care among other topics.

HSPM 530 - Finance in Health Administration (3 Credits)
Introduction to health care finance. Course will teach reimbursement structures, regulatory mechanisms, cost control, and related factors unique to healthcare organizations.
Prerequisites: BADM 225.

HSPM 700 - Approaches and Concepts for Health Administration (3 Credits)
An interdisciplinary perspective on the field of health administration. Philosophy concepts, and skills of implementation, management, and evaluation are presented and discussed. Principles in the practice of health administration are applied to identified problems and situations.

HSPM 706 - Health and Economic Development: Interrelationships among health, poverty and economic progress (3 Credits)
Linkages among economic development, poverty, inequality and health. Direct and indirect effects of health in economic development.

HSPM 707 - Ethical Issues in Health Care and Research (3 Credits)
The ethical dimensions of decision-making in health care delivery, administration and epidemiologic research. Provides ethical foundations for discussion of topics in health-related research and practice.
Cross-listed course: EPID 707

HSPM 708 - Methods of Economic Evaluation of Health Projects, Policies and Programs (3 Credits)
Concepts and principles of economic evaluation and applications of evaluation techniques (e.g., cost-effectiveness, cost-utility, cost-benefits, decision modeling) to the real-world issues and problems.

HSPM 709 - Perspectives in Rural Health (3 Credits)
Analysis of issues and demographic, economic, and political forces affecting health care delivery systems in rural America. Examines structure of federal and state public health programs that impact rural health.

HSPM 711 - Health Politics (3 Credits)
Analysis of issues and forces affecting health delivery through the public sector; major models of political decision-making; and current health legislation. 03: 07/05/2019.

HSPM 712 - Health Economics (3 Credits)
A critical introduction to the application of economic analysis to problems in the health care field. Related scientific literature.

HSPM 713 - Information Systems in Health Administration (3 Credits)
Understanding and optimizing the use of health information systems and allied technologies including electronic medical records to improve healthcare organizations’ performance in the areas of care delivery, operations management, quality, safety, and accessibility of healthcare services.
HSPM 714 - Perspectives in Community Health Organizations (3 Credits)
Origins/functions of public health and the U.S. health-care system; special attention to public health perspectives, social/behavioral determinants of health and environmental health issues.

HSPM 715 - Community Assessment and the Delivery of Health Care Services (3 Credits)
An introduction to the concepts of community assessment and managerial epidemiology, and their use in the population-based planning and management of integrated health systems.

HSPM 716 - Quantitative Methods for Health Administration (3 Credits)
An introduction to quantitative methods and analytical techniques with application to health administration. The course includes the use of models and simulation for decision making and control in health administration.
Prerequisites: HSPM 775 or BIOS 700.

HSPM 717 - Health Services Research Methods I (3 Credits)
Evaluation of the efficiency and effectiveness of health programs. Different research designs will be discussed in terms of their relevance to specific evaluation problems.

HSPM 718 - Health Planning (3 Credits)
Strategy and tactics of state, regional, institutional health services planning. Special attention to the role of marketing.
Prerequisites: HSPM 733 or equivalent.

HSPM 719 - Health Services Research Methods II (3 Credits)
The role and methods of sample surveys in health administration; development of survey designs; survey procedures; questionnaire design; interviewing procedures; codebook design; utilization of computer program packages in data analysis.
Prerequisites: BIOS 700.

HSPM 720 - Health Services Research Methods III (3 Credits)
Econometric methods for making proper statistical inferences using estimates for observational data.

HSPM 722 - Sociology of Health for Health Services Managers I (1 Credit)
Sociological approaches to the study of health and the decision to seek health care.

HSPM 723 - Sociology of Health for Health Services Managers II (1 Credit)
Sociological approaches to the study of health care institutions.

HSPM 724 - Health Law (3 Credits)
Legal basis for health care activities; health care provider laws, regulations, antitrust and organizational governance.

HSPM 725 - Human Resources Issues in Health Care Sector (3 Credits)
A study of the current problems, theories, models, and strategies associated with managing human resources in the health care sector.

HSPM 726 - Applied Public Health Law for Administrators (3 Credits)
Course addresses the significant legal and ethical issues in Public Health practice; basis for Public Health actions, authorities and limitations; role of the three branches of government in Public Health protection.

HSPM 727 - Advancing Public Health Policy (3 Credits)
Advancing public health policy through design and implementation of a policy change campaign.
Prerequisites: PUBH 730.

HSPM 730 - Financing of Health Care (3 Credits)
Application of the principles of financial management to the systems involved in the delivery of health care. 03: 07/05/2019.
Prerequisites: BADM 660 or equivalent.

HSPM 731 - Health Care Finance I (3 Credits)
Provides working knowledge of financial management techniques for managers in the health care sector.
Prerequisites: HSPM 733.

HSPM 732 - Health Care Finance II (3 Credits)
Provides knowledge base and decision-making tools for financial management in health care organizations using financial management tools and principles.
Prerequisites: HSPM 731.

HSPM 733 - Health Care Management Accounting (3 Credits)
Financial accounting and internal accounting for management decision-making, including cost determination, cost control, performance evaluation and financial planning.
Prerequisites: Undergraduate course in accounting or competency in accounting through personal study of an undergraduate accounting text.

HSPM 764 - Long-Term Care Administration (3 Credits)
An overview of management and policy concepts and issues pertaining to long-term care facilities and programs.

HSPM 765 - Leadership in Health Care Organizations (1 Credit)
Seminar on theory of and practice of leadership as a manager in the health care industry.

HSPM 766 - Health Services Administration I (3 Credits)
Human Resources Management in health care and allied topics.
Prerequisites: HSPM 769.

HSPM 768 - Health Services Administration II (3 Credits)
Operations management in health care, supply chain management and logistics processes, health services process improvement.
Prerequisites: HSPM 716.

HSPM 769 - Organizational Behavior (3 Credits)
To explore organizational behavior at the micro level (individuals, motivation, leadership, conflict management) and macro level (social systems, inter-organizational relationships, change and innovation, performance and strategy, organizational design), with particular focus on health care environments.

HSPM 770 - Decision Making For Health Care Executives (3 Credits)
Case study format where students identify problems, evaluate alternatives and make decisions using health care leaders in the community to prepare cases. Integration of principles learned in other health care theory and management courses.
Prerequisites: HSPM 732, HSPM 718, and HSPM 769.

HSPM 772 - International Health (3 Credits)
Overview of international health status, demographics; communicable/ noncommunicable diseases; health care needs, financing, and infrastructure delivery; and maternal and child health, family planning, and public health programs.
HSPM 774 - Quality Management in Healthcare (3 Credits)
Systems approach to quality management focusing on Lean and other quality management methods that can be directly applied in a healthcare setting. Group projects in local acute care settings allow students to practice quality management skills.
Prerequisites: HSPM 716, HSPM 731 or equivalent.

HSPM 775 - Managerial Epidemiology and Statistics in Healthcare (3 Credits)
Principles and tools of epidemiology applied to decision-making in a health care environment. Knowledge and skills useful to health services managers related to statistics, population health management and assessment of medical care processes/outcomes are taught.

HSPM 776 - Physician Practice Management (3 Credits)
Builds on prior MHA coursework on health care management to focus on specific knowledge and skills applicable to the management of physician practices.
Prerequisites: HSPM 731 and HSPM 769.

HSPM 777 - Healthcare Policy and Principles of Health Insurance (3 Credits)
Demand, supply, employment-based coverage, government-sponsored programs and managed care.

HSPM 778 - Health Care Marketing (3 Credits)
The principles of marketing applied to the health care setting. 03: 07/05/2019.

HSPM 788 - Public Health Practice Experience (3 Credits)
Applied public health practice experience addressing management or policy need in public health setting.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735 and 6 additional hours HSPM courses.

HSPM 790 - Independent Study (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

HSPM 791 - Selected Topics (1-6 Credits)
Content varies by title. Course may be repeated for a total of 6 credit hours.

HSPM 796 - Health Services Policy and Management MPH Capstone Course (2 Credits)
Synthesis of foundational and HSPM MPH competencies in preparing a high quality grant proposal to address a public health problem.
Prerequisites: PUBH 725, PUBH 726, PUBH 730, PUBH 735, HSPM 712, HSPM 730, HSPM 768.

HSPM 797 - Management Residency (1-3 Credits)
On-site management project in a health care setting.

HSPM 798 - Public Health Residency (3 Credits)
Practicum in approved public health, community health, or health care setting emphasizing evaluation and service delivery planning or a project such as resolution of a management problem or evaluation of a program component.
Prerequisites: EPID 700, BIOS 700 and three additional hours in the major.

HSPM 800 - Doctoral Seminar (1 Credit)
Format for presentation of faculty research, doctoral student dissertation proposals and guest lecturers on timely issues in health care policy and management.

HSPM 818 - Economic Evaluation and Policy Analysis of Health Services (3 Credits)
The course foci is on theories and techniques used in conducting economic evaluations and policy analyses to ascertain the efficacy and effectiveness of public health and health care programs, services, and policies. Enrollment is restricted to DrPH or PhD students.
Prerequisites: HSPM 711, HSPM 712, HSPM 845 and HSPM 846.

HSPM 820 - Public Health Leadership (3 Credits)
The course is designed to give students knowledge and skills necessary to demonstrate leadership in a variety of public health venues. Course content will focus specifically on theories, skills, and techniques used in providing leadership to public health and healthcare programs, services, and policy development, and research. Enrollment Restrictions: Students must be accepted into a PhD, DrPH, or MPH program.

HSPM 845 - Advanced Study in Health Policy Management I (3 Credits)
Readings and discussion of topics relevant to research in health administration/health sciences.

HSPM 846 - Advanced Study in Health Policy Management II (3 Credits)
Readings and discussion of major topics, including institutionally based issues, in research in health administration/health sciences.
Prerequisites: HSPM 845.

HSPM 890 - Independent Study (1-3 Credits)
Directed research on a topic to be developed by doctoral student and instructor. May be repeated for credit.

HSPM 898 - Doctor of Public Health Practicum (6 Credits)
Students are required to conduct applied public health methods and strategies as a part of their practicum experience. Examples of practicum include, but not limited to development, implementation, and evaluation of public health or healthcare services, policies, organizational development, and regulatory activities.

HSPM 899 - Dissertation Preparation (1-12 Credits)
One full year, 18 hrs, of graduate study beyond the master’s level.

Hosp Retail Sport Mgmt (HRSM)

HRSM 700 - Quantitative Methods in HRSM (3 Credits)
This course introduces the basic knowledge of quantitative concepts, principles, and methods necessary for scientific investigation of research problems related to hospitality, retail, and sport management.
Corequisite: HRSM 788.

HRSM 787 - Global Seminar in Hospitality, Retail, Sport & Technology Management (3 Credits)
This is an interdisciplinary learning experience where students apply major specific constructs and current trends in hospitality, retail, sport and technology management in a study abroad context. Students will visit destinations and venues where they will interact with on site management. This course is for HRSM graduate students only and requires permission of the departmental graduate director. This course may be repeated twice for credit.
HRSM 788 - Business Analytics in Hospitality, Retail, and Sport Management (3 Credits)
The course is structured to help students apply concepts of scientific inquiry in practical business problems in the field of hospitality/tourism, retail, and sport management. This course will provide the student with an understanding of the process and the tools to support business problem identification, research design, information/data collection, data analytics, result visualization, and managerial decision-making of business cases.
Prerequisites: STAT 515.

HRSM 795 - Field Project in Hospitality, Retail, and Sport Management (6 Credits)
Work experience and participation in management decision-making in a hospitality/tourism, retail, or sport/entertainment business environment. Positions assigned on an individual basis with emphasis on oral and written communication skills, planning, and problem solving.

HRSM 888 - Research Design in Hospitality, Retail, and Sport Management (3 Credits)
The principles of research design, focusing on the application of these principles as they apply to sport and entertainment, hospitality, and/or tourism management.

Hotel Rest Tourism Mgmt (HRTM)

HRTM 518 - Hospitality Human Capital and Talent Management (3 Credits)
Effective methods for conducting, costing, and evaluating training and development procedures for hospitality supervisors and managers.

HRTM 521 - Revenue Management in the Hospitality Industry (3 Credits)
Examination of revenue management in the hospitality industry with an emphasis on the theory and dynamics of revenue management, the implementation of capacity management, forecasting and discounting.
Prerequisites: HRTM 450.

Corequisite: HTRM 421.

HRTM 537 - Multi-Cultural Dimensions of the Hospitality Industry (3 Credits)
Multicultural, multiracial, and multiethnic factors within the hospitality and tourism industry.
Prerequisites: MGMT 371 or RETL 344.

HRTM 550 - Theme Park and Attractions Management (3 Credits)
This course will give students an overview of the theme park and attractions industry. We will explore each of the areas of this industry including: history, venues, resources, ride operations, merchandising, food service and design.

HRTM 557 - Security Management of Hotels and Restaurants (3 Credits)
Individualized security programs, procedures, legal issues, and review of local, state, and federal laws that apply to the lodging and restaurant industry.
Prerequisites: HRTM 357 or equivalent.

HRTM 560 - Advanced Lodging Management (3 Credits)
Advanced principles of the management of hotels and resorts.
Prerequisites: HRTM 260.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
Experiential Learning: Experiential Learning Opportunity

HRTM 564 - Advanced Meeting Management (3 Credits)
Analysis of current issues and problems in the meetings industry with emphasis on planning, organizing, managing, and enhancing meetings.
Prerequisites: HRTM 364.

HRTM 565 - International Lodging Management (3 Credits)
Analysis of the structure of international lodging companies, challenges of marketing U.S. lodging companies abroad, and cultural differences in international management.
Prerequisites: HRTM 260.

HRTM 567 - Timeshare and Vacation Ownership Management (3 Credits)
Management of the timeshare and vacation ownership industry.

HRTM 570 - Managing Food Service Operations (3 Credits)
An advanced study of the food-service industry and its operations both internally and externally to the physical plant.
Prerequisites: HRTM 270.

HRTM 575 - Advanced Topics in Wine (3 Credits)
A viticultural and enological study of wine and wine regions around the world; from the vineyard to the table including grape varietals, wine regions and wine service. Students must be 21 years old.
Prerequisites: HRTM 475.

HRTM 576 - Franchising within the Hospitality Industry (3 Credits)
This course will focus on the study of multi-unit and franchise operations within the hospitality and tourism industry.
Prerequisites: BADM 371.

HRTM 580 - Adventure Travel Management (3 Credits)
Analysis of the adventure travel industry throughout the world, with emphasis on the management, marketing, and operation of an adventure travel business.

HRTM 584 - Tourism Information Technology Issues (3 Credits)
Information technologies such as e-commerce, e-marketing, and e-research are examined, critiqued, and applied within a tourism context. 03: 07/05/2019.
Prerequisites: ITEC 264 or equivalent.

HRTM 585 - Advanced Club Management (3 Credits)
Advanced topics in hospitality management for the club industry.
Prerequisites: HRTM 285.

HRTM 590 - Special Topics in HRTM (3 Credits)
Advanced concepts, issues, and trends in the hospitality and tourism industry. May be taken twice for degree credit.

HRTM 591 - Golf Tourism (3 Credits)
Effective practices used in the planning, development, and promotion of golf tourism. Experiential learning component for evaluating selected issues, problem solving, and participating in the operational performance of a large golf tournament. Employment with a pre-approved golf tournament or permission of instructor.
HRTM 592 - Golf Tourism Consumer Services (1 Credit)
Examines superior customer service in high-quality business operations for a mega golf-tourism event; includes an experiential learning/fieldwork component.
Prerequisites: HRTM 591.

HRTM 593 - Golf Tourism Supervisory Skills (1 Credit)
Examines basic supervisory skills in high-quality business operations for a mega golf-tourism event; includes an experiential learning/fieldwork component.
Prerequisites: HRTM 591, HRTM 592.

HRTM 594 - Golf Tourism Leadership Skills (1 Credit)
Examines management and leadership skills in high-quality business operations for a mega golf-tourism event; includes an experiential learning/fieldwork component.
Prerequisites: HRTM 591, HRTM 592, HRTM 593.

HRTM 597 - Global Travel and Tourism (3 Credits)
Study of the economic, social, cultural, political, and environmental considerations of international tourism management and development.
Prerequisites: HRTM 280.

HRTM 720 - Hospitality Finance Methods (3 Credits)
The study of financial management related to the hospitality industry.

HRTM 730 - Strategic Leadership in the Hospitality Industry (3 Credits)
Strategic decision-making, planning, and leadership relative to the hospitality industry.

HRTM 740 - Services Management and Customer Experience in the Hospitality Industry (3 Credits)
Analysis, planning, and control of the service function in hospitality organizations with emphasis on management problems.

HRTM 750 - Hospitality Marketing and Social Media (3 Credits)
Strategic marketing process for hospitality organizations.
Prerequisites: MKTG 350.

HRTM 755 - Properties Management (3 Credits)
Feasibility studies, functional planning and design, equipment and utilities management.

HRTM 768 - Contemporary Problems in the Lodging Industry (3 Credits)
Consideration and analysis of relevant contemporary problems and issues presently facing managers in the lodging industry.

HRTM 776 - Current Issues in Foodservice Management (3 Credits)
Critical issues impacting the management of food-service organizations.

HRTM 780 - Seminar in Travel and Tourism (3 Credits)
Issues in travel and tourism.
Prerequisites: HRTM 750.

HRTM 781 - Seminar on the Olympic Games (3 Credits)
Examination of the Olympic Games, a mega sport and tourism event, and its impact on the sport, entertainment, hospitality and tourism sectors.
Cross-listed course: SPTE 781

HRTM 785 - Resort Management (3 Credits)
Management of resort complexes, including master plan development, ecological concerns, and recreational activities development.

HRTM 795 - Tourism and Hospitality Field Project (3 Credits)
Work experience and participation in management decision-making in a hospitality and tourism business environment. Positions assigned on an individual basis with emphasis on oral and written communication skills, planning, and problem solving.

HRTM 798 - Directed Study in HRTM (3 Credits)
Independent study for advanced students under faculty supervision. May be taken twice for degree credit.

HRTM 799 - Thesis Preparation (1-6 Credits)
Thesis preparation in international hospitality and tourism management.
Prerequisites: HRSM 788.

HRTM 850 - Scientific Foundations of Hospitality Management (3 Credits)
Examination of serious inquiry, philosophical foundations and schools of thought, and the contributions from social and behavioral sciences that heavily influence hospitality management.

HRTM 888 - Advanced Research Seminar in Hospitality Management (3 Credits)
Examination of hospitality research issues and research literature, including appropriate methodologies and designs.
Prerequisites: HRSM 788 or equivalent, HRTM 850.

HRTM 890 - Pedagogy in Hospitality and Tourism Management (3 Credits)
An introduction to college level teaching; major components include related theory, current research, instructional design, and the application of effective strategies in the teaching-learning process. Emphasis is also aligned with Preparing Future Faculty (PFF) for instruction and planning for future implementation in HRSM curriculum.

HRTM 895 - Ph.D. Graduate Seminar in Hospitality Management (1 Credit)
Seminar of current topics related to research, teaching and grant writing in hospitality management. As part of the PhD program requirement, the course must be taken twice during the tenure of a student at USC Columbia.
Prerequisites: HRTM 888.

HRTM 899 - Dissertation (1-13 Credits)

Instr and Teacher Educ (EDTE)

EDTE 590A - Internship in Curriculum and Assessment (3 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood or elementary) related to curriculum design and assessment.
Prerequisites: admission to internship II in early childhood or elementary education.
Corequisite: EDTE 590B and EDTE 590C.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
EDTE 590B - Internship in Teaching (3 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood or elementary) related to interactive teaching.
Prerequisites: admission to internship II in early childhood or elementary education.
Corequisite: EDTE 590A and EDTE 590C.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDTE 590C - Internship in Professional Roles (3 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood or elementary) related to professional roles.
Prerequisites: admission to internship II in early childhood or elementary education.
Corequisite: EDTE 590A and EDTE 590B.

EDTE 600 - Systematic Effective Teaching (3 Credits)
Application of research-supported effective teaching techniques to the teaching-learning process, including demonstration lessons, observations, and supervisory conferences.

EDTE 605 - Cooperative/Team Learning in Education (3 Credits)
Instructional approaches, materials, and procedures for utilizing cooperative/team learning in education.

EDTE 610 - Integrated Reading and Writing Instruction (3 Credits)
Theoretical bases and techniques for teaching reading and writing in the elementary school, using multiple subject areas.

EDTE 611 - Whole Language: Concepts and Practices (3 Credits)
development of concepts, materials, and practices to implement a whole language philosophy.

EDTE 620 - Restructuring Schools: Teachers and Classrooms (3 Credits)
Examination of issues related to restructuring schools based on different assumptions about teaching, learning, and assessment.

EDTE 621 - Middle Level School Today (3 Credits)
National trends in the middle level school; emphasis on the relationship of early adolescent developmental characteristics to organization, curriculum, instruction, and teaching.

EDTE 625 - Integrating Character Education into Instructional Programs (3 Credits)
Rationale, processes, and methodologies for integrating character education into school or school district instructional programs.

EDTE 626 - Service Learning for Schools, Community, and Workplace Responsibility (3 Credits)
Assist school personnel in designing academic, personal, civic, and workplace responsibility.

EDTE 631 - Technology to Support Instruction (3 Credits)
Introduction to computers, educational technology, and selected applications for instructional management.

EDTE 671 - Computers in Science Education (3 Credits)
Use of computer technology in teaching and managing science classes and problems in grades K-12.

EDTE 701 - Selected Topics in Teaching Science (3 Credits)
Primarily for elementary, middle, and secondary school teachers. Teachers at other levels may be accepted.

EDTE 710 - Developing as a Professional Educator (3 Credits)
Concepts and strategies to assist teachers in developing as effective and successful educators in PreK through 12 schools.

EDTE 711 - Ideas and Issues in Teaching (3 Credits)
Examination of theoretical and philosophical concepts fundamental to understanding learning and teaching.

EDTE 712 - Action Research in Teaching (3 Credits)
Introduction to action research through the investigation of a significant question or issue related to teaching in PreK through 12 schools.
Prerequisites: EDTE 710, EDTE 711, and EDRM 700 or an approved education research course.

EDTE 713 - Action Research Capstone Seminar (3 Credits)
Culminating experience that includes completion of an action research project and a thorough review of professional growth.
Prerequisites: EDTE 712.

EDTE 731 - Integration of Technology and Instruction (3 Credits)
Survey of the instructional uses of computers and other technologies.

EDTE 733 - Reading and Language Arts in Early Childhood and Elementary Education (6 Credits)
Examination and implementation of the content, goals, and methods of teaching reading and the language arts. Emphasis on the teaching of reading, oral and written expression, and listening. K-6.
Prerequisites: Admission to the MAT program.

EDTE 740 - Introduction to Project-Based Learning (3 Credits)
Introduction to Project-based Learning theory and basics of designing, delivering and assessing it. Designed for classroom teachers who have earned an initial teaching credential or its equivalent and who wish to continue their professional development through graduate education.

EDTE 741 - Applications of Project-Based Learning (3 Credits)
Acquisition of experiences required to plan, create, facilitate, and integrate appropriate instructional methodologies and technology within a Project-based Learning unit of study.
Prerequisites: EDTE 740.

EDTE 742 - Practicum in Project-based Learning (3 Credits)
A field-based practicum designed to provide experience and opportunities to demonstrate knowledge, skills, and dispositions for implementing PBL into a regular classroom setting.
Prerequisites: EDTE 740 and EDTE 741.

EDTE 750 - Evaluating Teacher Effectiveness (3 Credits)
Techniques currently being used to quantitatively analyze the behavior of a teacher and his/her students while in a classroom situation.

EDTE 755 - Teaching Environmental Education (3-6 Credits)
Rationale and strategies for teaching environmental education.

EDTE 759 - Teaching Reasoning and Inquiry Skills (3 Credits)
Definition of and methods for teaching reasoning and inquiry skills in various educational settings. Participants develop a plan of instruction based on a study of model programs.

EDTE 760 - Issues in Writing Instruction K-12 (6 Credits)
Issues in the teaching of writing, with emphasis on classroom applications K-12 and program development.
EDTE 771 - Studies and Internship I in Teaching Math-Early/Elementary Education (3 Credits)
Instructional approaches, materials and methods for primary and elementary classrooms.
Prerequisites: Admission to the MAT program.

EDTE 772 - Technology in Foreign Language Education (3 Credits)
Introduction to technology in language teaching and the connection between language acquisition and the implementation of Internet and multimedia technology.
Cross-listed course: FORL 772, LING 772

EDTE 774A - Teaching Internship (Foreign Languages) (3 Credits)
Application of effective teaching techniques and organization of instructional settings in foreign languages for K-12.
Prerequisites: acceptance to the Professional Program in Education.
Cross-listed course: FORL 774A

EDTE 774B - Teaching Internship (Foreign Languages) (9 Credits)
Application of effective teaching techniques and organization of instructional settings in foreign languages for K-12. 03: 07/05/2019.
Prerequisites: EDTE 774A.

EDTE 776 - Educating African-American Students (3 Credits)
An analysis of historical and contemporary factors that influence the education of African American children in the US. Emphasis on the knowledge, skills and dispositions required for educators and parents to provide an effective equitable education for African American students.

EDTE 777 - Analysis of Effective Instructional Practices (3 Credits)
Analysis of instructional techniques and strategies effective in fostering student achievement at various levels of schooling.
Prerequisites: master's degree and certification.

EDTE 778 - Teacher as Instructional and Professional Leader (3 Credits)
Major roles of the master teacher in instructional improvement and professional development. Emphasis on analysis and integration of instructional change and professional development classroom teaching practices.
Prerequisites: master's degree and certification.

EDTE 779 - Equity Pedagogies in Teacher Education (3 Credits)
effects of cultural diversity on instruction with emphasis on teaching strategies and programs for multicultural student populations.
Prerequisites: EDTE 777, master's degree and certification.

EDTE 779A - Teaching Internship (Theatre) (3 Credits)
Application of effective teaching techniques and organization of instructional settings in theatre for K-12.
Prerequisites: acceptance to the Professional Program in Education.

EDTE 779B - Teaching Internship (Theatre) (9 Credits)
Application of effective teaching techniques and organization of instructional settings in theatre for K-12.
Prerequisites: EDTE 779A.
Corequisite: EDSE 584.

EDTE 780 - Field Study Preparation Seminar (3 Credits)
Instructional planning, including evaluation and dissemination strategies related to improvements and innovations in the classroom. Emphasis is on preparation of written instructional plan for implementation in EDTE 781 Advanced Field Study of Teaching.

EDTE 781 - Advanced Field Study of Teaching (1-6 Credits)
Students will conduct and report results of a field study of a selected instructional innovation as specified by an implementation plan developed in EDTE 780.
Prerequisites: EDTE 780.

EDTE 782A - Teaching Internship (Health) (3 Credits)
Application of effective teaching techniques and organization of instructional settings in health for K-12.
Prerequisites: acceptance to the Professional Program in Education.
Cross-listed course: HPEB 782A

EDTE 782B - Teaching Internship (Health) (9 Credits)
Application of effective teaching techniques and organization of instructional settings in health for K-12. 03: 07/05/2019.
Prerequisites: EDTE 782A.

EDTE 791 - Global Education (3 Credits)
An examination of global issues, including the concepts of interdependence and empowerment, as organizing principles in the design of instruction for internationalizing the curriculum.

EDTE 792 - International Perspectives of Instruction (3 Credits)
A Comparative examination of the educational and instructional processes of select nations in a variety of instructional areas.

EDTE 793 - Development Education (3 Credits)
An examination of the parameters of development education in select areas of the world and its implications for educators and other development workers.

EDTE 799 - Thesis Preparation (1-9 Credits)

EDTE 811 - Developing Integrated Curricula (3 Credits)
Theoretical foundation of an integrated curriculum and implications for current practice.

EDTE 820 - Principles of STEM (Science, Technology, Engineering, and Mathematics) Integration (3 Credits)
Exploration of pedagogical practices and methodological approaches for integrating instruction across STEM disciplines.

EDTE 841 - Genre Study: Academic Writing in Education (3 Credits)
An overview of academic writing in Education as a genre. Emphasis on defining and critiquing the genre, and producing papers, articles, proposals and/or dissertations.
Prerequisites: Admission to a doctoral program in education.

EDTE 850 - Internship in Teaching (1-3 Credits)
Placement in an educational agency, clinical experience, or teacher education setting to gain supervised experience in teacher education. This course is repeatable for up to 9 credit hours. Six (6) hours of required courses in the Ph.D. in Teaching and Learning program and approval of doctoral advisor and field supervisor.
EDTE 851 - Internship in Research in Teaching and Learning (1-3 Credits)
Placement in teaching and/or learning setting to gain supervised research experience. This course is repeatable for up to 9 credit hours. Six (6) hours of required courses in the Ph.D. in Teaching and Learning program and approval of doctoral advisor and field supervisor. Professional division contract approved by instructor, advisor and department chair is required for undergraduate students.

EDTE 857 - Advanced Critical Race Theory and Education (3 Credits)
An advanced study of how Critical Race Theory is applied by researchers to investigate issues of racial justice. The study of race and racism is the primary lens of analysis in understanding disparities in educational, political, social and economic outcomes.
Prerequisites: EDFI 747

Cross-listed course: EDFI 857

EDTE 870 - Seminar in Instruction and Teacher Education (3 Credits)
Major writers, issues, and research related to instruction and teacher education.
Prerequisites: advanced graduate standing.

EDTE 899 - Dissertation Preparation (1-12 Credits)

Integrated Info Tech (ITEC)

ITEC 544 - Training Systems (3 Credits)
Theory, design, and implementation of technology-based training systems, including hardware and software solutions.
Prerequisites: C or better in ITEC 444.

ITEC 545 - Telecommunications (3 Credits)
Telecommunications systems applications and equipment allowing for the global dissemination of information.
Prerequisites: C or better in ITEC 245.

ITEC 552 - Linux Programming and Administration (3 Credits)
Shell scripting and administration in the Linux operating system.
Prerequisites: C or better in CSCE 204, or C or better in CSCE 145.

ITEC 560 - Project Management Methods (3 Credits)
Project management principles and standard practices, including software applications for project management.
Prerequisites: C or better in ITEC 362; and C or better in either ITEC 264 or MGSC 290.

ITEC 562 - Advanced Web Support Systems (3 Credits)
The development of advanced, dynamic, Web-based information systems, including the integration of back-end database-records management systems.
Prerequisites: C or better in ITEC 362.

ITEC 564 - Capstone Project for Information Technology (3 Credits)
Application of project management software, technologies, and practices to the design and implementation of real-world capstone projects.
Prerequisites: C or better in both ITEC 362 and ITEC 560.

ITEC 570 - Database Management and Administration (3 Credits)
Introduction to database administration and implementation using an enterprise-level Relational Database Management System (RDBMS).
Prerequisites: C or better in ITEC 370.

ITEC 590 - Special Topics in Integrated Information Technology (3 Credits)
Advanced concepts, issues, and trends in technology support and training management. Course content varies and will be announced in the schedule of classes by title. May be repeated twice for credit.

ITEC 702 - Technology and Training Applications I (3 Credits)
Computer application skills and concepts used in training support and business education.

ITEC 720 - Technology and Training Applications II (3 Credits)
Spreadsheet and database application skills and concepts used in training support and business education.
Prerequisites: degree candidacy and 15 hours completed or departmental approval

ITEC 742 - Enterprise Network Management (3 Credits)
Management of enterprise networks, including switched Local Area Networks (LANs), Wide Area Networks (WANs), data centers and cloud systems; monitoring and optimization of networks; emerging network technologies.
Prerequisites: C or better in ITEC 749 and ITEC 772.

ITEC 743 - Health Information Privacy and Security (3 Credits)
Healthcare privacy and security threats and solutions. Compliance with patient information privacy and information security regulations.

ITEC 745 - Telecommunications for Health Information Technology (3 Credits)
Overview of telecommunication technologies as they apply to healthcare delivery, healthcare administration, and health information exchange.

ITEC 747 - Management of Health Information Systems (3 Credits)
Overview of health information technology, electronic health records (EHR), and health information exchange (HIE), current practices, trends, and issues in health information systems management, and privacy and security of health information.

ITEC 748 - Internship in Health Information Technology (1-6 Credits)
Professional internship in health information technology. Positions assigned on an individual basis with emphasis on management decision making, oral and written communication skills, planning, and problem solving.

ITEC 749 - Principles of Informatics (3 Credits)
Integration of information technology across the business spectrum. Underlying technological developments and important business drivers of performance. Digital technology's role in relation to three major components of business performance improvement: people, processes and technology.
Prerequisites: C or better in ITEC 447.

ITEC 752 - Systems Analysis & Design for Health Applications (3 Credits)
This course applies the principles of information systems analysis and design to health processes and applications. It looks at the analysis and logical design of business processes and management information systems focusing on the systems development life cycle; and techniques for logical system design.
ITEC 754 - Analysis and Design of Information Systems and Technology (3 Credits)
Application of the principles of information systems analysis and design to organizational processes and applications. Analysis and logical design of business processes and management information systems focusing on the systems development life cycle. Techniques for logical system design.
Prerequisites: B or better in ITEC 447.

ITEC 760 - Cyberinfrastructure and Information Assurance (3 Credits)
Information Technology (IT) elements of the cyberinfrastructure; information assurance and security in the modern cyberinfrastructure; design and secure advanced systems that use, process, transmit, and store of information.
Prerequisites: ITEC 742.

ITEC 761 - Management of Cyberinfrastructure (3 Credits)
Techniques, technologies, and management tools used in modern cyberinfrastructures, including software-defined data centers, next-generation software-defined networking (NG-SDN), and cloud systems.
Prerequisites: ITEC 760.

ITEC 762 - Health Information Technology Usability and Interface Design (3 Credits)
Overview of the analysis, design, and usability of health information systems. Includes consideration of computer interfaces, Web portals, and patient portals.

ITEC 764 - Project Management for Health Information (3 Credits)
Application of project management software, technologies, and practices to the design and implementation of real-world health information technology projects. Integrates IT knowledge and skills learned in earlier graduate courses and challenges graduate students to learn new technologies and to solve real business problems.

ITEC 765 - Human Computer Interaction, Usability and Interface Design (3 Credits)
Overview of the analysis, design, and usability of information systems. Includes consideration of computer interfaces, web portals, and human-computer interaction.
Prerequisites: C or better in ITEC 749 and ITEC 772.

ITEC 766 - IT Project Management (3 Credits)
Application of project management tools to document key components of the implementation of a real-world information technology projects.
Prerequisites: B or better in ITEC 749 and ITEC 772.

ITEC 770 - Health IT Database Systems (3 Credits)
This course is an introduction to design, implementation, and management of database systems that form the foundation for health information systems.

ITEC 772 - Database Systems (3 Credits)
Fundamentals, design, implementation and management of database systems that form the foundation for information systems and data analytics.
Prerequisites: B or better in ITEC 747.

ITEC 775 - Large-Scale Health and Information Systems (3 Credits)
Design, implementation and operation of large-scale information systems for healthcare institutions. Includes EMRs, CPOE, e-prescribing, medication administration, CRM, and supply chain management.

ITEC 776 - Health Information Technology and Clinical Transformation (3 Credits)
Implementation of electronic health records (EHR) and health information exchange with focus on clinical transformation, which is the most difficult and critical component of achieving improved clinical outcomes and efficiencies from EHRs.

ITEC 777B - Tch. Intrm. M/HS-Bus. Educ (9 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students.

ITEC 781 - Artificial Intelligence and Informatics I (3 Credits)
Fundamental concepts in artificial intelligence, including intelligent agents, problem solving by searching, logic-based knowledge representation and inference, planning, and probabilistic reasoning. Basic techniques for building intelligent computer systems and applications to problems.
Prerequisites: B or better in STAT 700, STAT 701, BIOS 700, or BIOS 757; B or better in ITEC 749; B or better in CSCE 145, CSE 204, or ITEC 352.

ITEC 782 - Artificial Intelligence and Informatics II (3 Credits)
Artificial Intelligence concepts including algorithmic decision making. Machine learning techniques such as learning from examples, learning probabilistic models, and reinforcement learning. Applications of AI technologies, e.g. natural language processing, robotics, and perception.
Prerequisites: B or better in ITEC 781.

ITEC 785 - Enterprise Data Analytics (3 Credits)
Mathematical and software tools and quantitative reasoning to the analysis of enterprise data. Fundamental concepts and essential skills in data analytics. Critical and creative thinking about quantitative and qualitative problems involving enterprise data.
Prerequisites: B or better in MATH 174; B or better in STAT 700 or STAT 701; B or better in ITEC 749; C or better in ITEC 264.

ITEC 786 - Advanced Enterprise Data Analytics (3 Credits)
Advanced concepts, issues, and trends in data analytics. Critical thinking and quantitative and qualitative analytical skills essential for Healthcare, Engineering, and Business among many others.
Prerequisites: B or better in ITEC 785.

ITEC 787 - Advanced Data Analytics Tools (3 Credits)
Software tools in data analytics. Advanced analytics techniques. Case studies and problem sets from multiple enterprise domains.
Prerequisites: B or better in MATH 174 and STAT 700; C or better in ITEC 264.

ITEC 790 - Special Topics in Informatics (3 Credits)
Advanced concepts, issues, and trends in information technology. Course content varies and will be announced in the schedule of classes by title. May be repeated twice for credit.

ITEC 791 - Introduction to Management of Information Security (3 Credits)
Overview of information security exploring basic concepts and developing knowledge and skills of protecting valuable information assets and systems.

ITEC 792 - Management of Cyber Operations (3 Credits)
Technical and managerial aspects of IT security operations. Securing the cyberinfrastructure, detecting and mitigating intrusion, monitoring and managing computing systems.
International Business (IBUS)

IBUS 519 - Social Networks and Global Leadership (3 Credits)
A survey of social network theories and evidence that provide theoretical, empirical and practical examples of how different social network configurations achieve different function goals. Concepts are applied to case studies of multinational enterprises to illustrate the network coordination challenges of global business.
Prerequisites: C or better in IBUS 310.

IBUS 541 - Business in Latin America (3 Credits)
Discussion and analysis of business environments and business practices in the countries of Latin America.
Prerequisites: IBUS 310 for Undergraduates.

IBUS 542 - Business in Asia (3 Credits)
Discussion and analysis of business environments and business practices in the countries of Asia.
Prerequisites: IBUS 310 for Undergraduates.

IBUS 543 - Business in Europe (3 Credits)
Discussion and analysis of business environments and business practices in the countries of Europe.
Prerequisites: IBUS 310 for Undergraduates.

IBUS 544 - Business in Africa (3 Credits)
Discussion and analysis of business environments and business practices in the countries of Africa.
Prerequisites: IBUS 310 for Undergraduates.

IBUS 590 - Specialized Study in International Business (0-3 Credits)
Topics in international business. Reading and research on selected topics in the practices in the international business environment.
Prerequisites: C or better in IBUS 310.

IBUS 700 - Survey of International Business (3 Credits)
A survey of the organization and management of international business stressing the effects of international cultural, economic, and legal factors on the management function. Typical factors examined are export and import trade, transnational investment, finance, marketing, production, taxation, and the role of the U.S. national in multinational organizations.
Prerequisites: FINA 760.

IBUS 701 - International Financial Management (3 Credits)
An intensive study of international financial management. Topics include investment analysis, financing decisions, taxation, foreign-exchange risk policies, joint ventures, transfer pricing, financing of trade, and financial control of international operations.
Prerequisites: IBUS 711.

IBUS 702 - International Marketing (3 Credits)
Marketing management of the international operation stressing the viewpoint of the marketing manager who must recognize differences in market arrangements and in legal, cultural, and economic factors in different countries.

IBUS 703 - International Management (3 Credits)
Functionally integrated international strategy design and negotiation with host countries within the worldwide structure of international firms. Emphasis on decision-making in the face of rapidly changing international conditions.
Prerequisites: IBUS 711.

IBUS 704 - Comparative Corporate Governance (3 Credits)
Systematically compare and contrast corporate governance systems across a variety of countries.

IBUS 705 - Global Business Management (3 Credits)
Examines the management of strategic, structural and informal processes within multinational corporations, and how to lead a global workforce.

IBUS 706 - Nations States, Regional Networks and Global Markets (3 Credits)
Introduces conceptual perspectives for understanding dramatic economic events in the global economy; a comparative view of national institution-based systems.

IBUS 707 - Comparative Institutional Systems (3 Credits)
Cross-listed course: DMSB 741

IBUS 708 - International Business Legal Environments (3 Credits)
Practical knowledge and skills to operate effectively and avoid unexpected losses when doing business in international markets under a foreign legal system.

IBUS 709 - International Intellectual Property Management (3 Credits)
Equip managers with the tools to identify intellectual property assets, manage asset development and implementation, and to create intellectual property strategies tailored to business objectives.

IBUS 710 - Global Stakeholder Management (3 Credits)
Survey of the managerial, political, economic, sociological and psychological foundations of global stakeholder management and engagement through extant theory and case study examples of successful and failed stakeholder management strategies in various industries and multiple countries.
IBUS 711 - Global Corporate Valuation (3 Credits)
Application of key corporate valuation models in evaluating different business situations facing multinational corporations.
Prerequisites: DMSB 715 or IBUS 701.

IBUS 712 - Currency Markets, Exchange Risk, and Currency Derivatives (3 Credits)
Structure of the global currency markets, currency derivative products, and the management of exchange risk.
Prerequisites: DMSB 715 or IBUS 701 and FINA 737.

IBUS 713 - Global Financial Markets (3 Credits)
Advanced issues in the structure of global financial markets, including the Eurobond, foreign bond, syndicated credit, Euronote, and swap markets.
Prerequisites: DMSB 715 or IBUS 701.

IBUS 714 - Global Equity Investments (3 Credits)
Theory and quantitative tools useful for asset allocation and security selection with a focus on equity investments, and the process of active tactical asset management in a global setting from the perspective of a global money manager.
Prerequisites: DMSB 715 or IBUS 701.

IBUS 715 - Foreign Market Entry and Growth (3 Credits)
International market selection, foreign market entry, and growth and regional expansion strategies.
Prerequisites: DMSB 716 or IBUS 702.

IBUS 716 - Cross-border Alliances and Joint Ventures (3 Credits)
Strategic management of cooperative strategies (e.g., joint ventures, strategic alliances, cooperative agreements).
Prerequisites: DMSB 711 or IBUS 700.

IBUS 717 - Managing Cross-border Teams (3 Credits)
How the presence of members from multiple national cultures and multiple national locations affect the functioning of teams within the multinational corporation.
Prerequisites: DMSB 714 or IBUS 700 or MGMT 770 or MGMT 799.
Cross-listed course: MGMT 729

IBUS 718 - Consulting and Organizational Development in MNCs (3 Credits)
Restructuring and transformation initiatives within multinational organizations as internal consultants and/or change agents.
Prerequisites: DMSB 711 or IBUS 700 or MGMT 779.
Cross-listed course: MGMT 730

IBUS 719 - Social Networks and Global Leadership (3 Credits)
Survey of social network theories and evidence, such that you are able to better identify, build, and navigate the social settings in which your career unfolds. Concepts are applied to several case studies of multinational enterprises to illustrate the network coordination challenges of global business.

IBUS 720 - International Entrepreneurship (3 Credits)
Develop a business plan for a global startup, integrate international strategy into the business model and financing strategy, analyze the costs of internationalization.

IBUS 721 - Advanced International Marketing (3 Credits)
Analysis of advanced topics and practices in international marketing as viewed from the perspective of a multinational enterprise.
Prerequisites: DMSB 702 or IBUS 702.

IBUS 722 - Export Marketing (3 Credits)
Provides a sound understanding of the role of exporting in the internationalization process and of key features of the environment in which exporters operate. Also covers selected topics of export marketing procedures.
Prerequisites: DMSB 702 or IBUS 702.

IBUS 723 - International Advertising (3 Credits)
International dimensions of advertising and other forms of marketing communication from three perspectives: the seller, society, and advertising agencies and other providers of marketing communication services.

IBUS 726 - The Business Case for Services Offshoring (3 Credits)
How to formulate and present a professional judgment on a corporate initiative (like services offshoring) with a sound business case based on the elements of cost, benefit, risk, and strategic flexibility.

IBUS 727 - Economic Development and Global Strategy (3 Credits)
Theoretical and comparative empirical perspectives on the roles of state and business in economic development; politics of economic reform and the impact of business strategies on development. Cases drawn broadly from emerging markets, advanced economies, and economic history.

IBUS 728 - Risk Management and Security Strategies in International Business (3 Credits)
Analyze how multinational enterprises interact with political, sociocultural and economic environments worldwide with a focus on security threats on multinational companies and overseas investments to include terrorism, mass refugee migrations, and cyber threats; and develop sustainable strategies.

IBUS 729 - Comparative Innovation Systems (3 Credits)
To analyze how innovation is approached by firms in different institutional climates around the world.

IBUS 730 - Global Innovation and Industry Clusters (3 Credits)
Addresses the lessons learned from the combination of factors that led to specific regions of the world successfully developing specialties in certain industry clusters.

IBUS 731 - Global Competitive Analysis (3 Credits)
Provides a conceptual and analytical framework for analyzing industries and competitors, and competitive positioning within a global strategy framework.
Prerequisites: DMSB 702 or IBUS 703.

IBUS 732 - Comparative Management (3 Credits)
Cross-cultural analysis of management theory and practice in select countries and regional markets.

IBUS 733 - East/West Business (3 Credits)
International investment, joint venture, trade and technology transfer relationships between the advanced industrial systems of the U.S., the E.C., and Japan and socialist economies of the former Soviet Union, Eastern Europe, and China.

IBUS 734 - International Business Negotiations (3 Credits)
Examines how decision makers in business and government settings manage the process and outcomes of negotiations. Cross-cultural negotiations in a global business environment.

IBUS 735 - International Mergers and Acquisitions (3 Credits)
Practical skills to effectively transact international mergers and acquisitions. Focus given to essential strategic financial organizational and legal factors.
IBUS 736 - Strategic Management of Global Supply Chains (3 Credits)
Strategic frameworks for designing and managing global supply chains, including management of operational practices form an international perspective.
Prerequisites: DMSB 718 or MGSC 791.

IBUS 737 - International Information Systems (3 Credits)
Analysis of current topics, issues, and practices in international information systems.

IBUS 738 - International Business and Sustainable Development (3 Credits)
An introduction to international environmental and social management issues that affect an organization's sustainable development initiatives.

IBUS 739 - Design Thinking For Global Business (DT4GB) (3 Credits)
The method and practice of bridging an analytical mindset where consistent, replicable outcomes are the gold standard ("reliability") with an intuitive mindset relying on judgment to produce outcomes that meet desirable objectives ("validity").

IBUS 740 - Data Analytics for International Business (3 Credits)
Research issues related to conducting studies in a cross-cultural setting, to develop an awareness of current international research programs.

IBUS 750 - Exploring Global Business (3 Credits)
The course examines in detail the business issues of a specific region as they impact the conduct of global business.
Prerequisites: IBUS 700.

IBUS 780 - International Business Internship (6 Credits)
On-site work experience related to the field of study and/or career interests of the student.

IBUS 790 - Specialized Study in International Business (3 Credits)
Analysis of current topics, issues, and practices in the international business environment not covered in any of the other specialized study courses. Consult instructors for specific coverage.
Prerequisites: DMSB 702 or IBUS 700.

IBUS 801 - Ph.D. Seminar on International Business I (3 Credits)
An intensive study of the evolution of international business thought and the present state of development of international business theory with emphasis on current contributions to international business theory.
Prerequisites: IBUS 711.

IBUS 802 - Ph.D. Seminar in International Business II (3 Credits)
Intensive study of selected current international business topics, research and theories through readings, discussion, and individual research.
Prerequisites: IBUS 700.

IBUS 808 - Current Research in International Business (3 Credits)
Addresses current research issues in international business research.
Prerequisites: DMSB 702 or IBUS 717.

IBUS 811 - Ph.D. Seminar in International Finance I (3 Credits)
Doctoral seminar on theory and empirical research in international finance.

IBUS 812 - Ph.D. Seminar in International Finance II (3 Credits)
Doctoral seminar on theory and empirical research in international investments and implications for the theory of international corporate finance.

IBUS 820 - Ph.D. Seminar in International Marketing (3 Credits)
Examination of current international marketing research, with emphasis on developing a critical understanding of theory, concept development, research design, and research results within the field of international marketing.

IBUS 830 - Ph.D. Seminar in International Management (3 Credits)
Examination of international management research, with emphasis on developing a critical understanding of theory, concept development, research design, and research results within the field of international management.

IBUS 840 - Ph.D. Seminar on MNC Governance (3 Credits)
Examination of theory and research regarding multinational corporation (MNC) governance, and corporate governance and organizational form cross-nationally.

IBUS 850 - Ph.D. Seminar on Cultural Frameworks and Research (3 Credits)
Seminar exploring concepts and research issues relevant to understanding national-based culture.

Italian (ITAL)

ITAL 560 - Independent Studies in Italian Literature (1-3 Credits)
Special topics in Italian literature.

ITAL 561 - Independent Studies in Italian Literature (1-3 Credits)
Special topics in Italian literature.

ITAL 615 - Intensive Readings in Italian (3 Credits)
Graduate students fulfill their foreign language reading requirement with successful completion of the course. Undergraduates may take the course as an elective only.

Japanese (JAPA)

JAPA 500 - Japanese Language in Society (3 Credits)
Japanese language and communication in its sociocultural context; emphasis on comparison with American English. Taught in English.
Cross-listed course: LING 546

JAPA 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the MA or PhD degree.

Journalism (JOUR)

JOUR 501 - Freedom, Responsibility, and Ethics of the Mass Media (3 Credits)
Historical development of freedom, responsibility, and ethics in the mass media, including communication theories, pressures, ownership.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

JOUR 504 - International Mass Communications (3 Credits)
A comparative study of world mass communications media, with particular attention to press systems, the sources and flow of international news, and the problems and implications of world communications.
JOUR 506 - Mass Media Criticism (3 Credits)
Development of critical thinking skills for analyzing mass media.
Prerequisites: JOUR 101.

JOUR 507 - Communicating Science, Health and the Environment (3 Credits)
Explores the role of journalism in shaping perceptions of scientific issues and task. Emphasis on methods of effectively communicating about science, health, and the environment.

JOUR 508 - Faith, Values, and the Mass Media (3 Credits)
Faith and values influence the media. An examination of the influence, why it happens, and of religious diversity and the increased public presence of religions, including Hinduism and Islam.
Prerequisites: JOUR 291 and junior or senior standing or consent of instructor

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

JOUR 515 - Mass Communications Capstone Portfolio (3 Credits)
Development of Mass Communications E-portfolio showcasing and reflecting on coursework and experiential learning, with a focus on leadership, as preparation for matriculation in higher education or careers in mass media.
Prerequisites: C or better in JOUR 501, JOUR 506, or JOUR 542.

JOUR 516 - Advanced Creative (3 Credits)
Development of writing styles for print and broadcast advertising.
Prerequisites: JOUR 416.

JOUR 517 - Integrated Campaigns (3 Credits)
The development of a complete, well coordinated integrated communications plan that incorporates research and analysis techniques, critical thinking, team work, creative and tactical skills.
Prerequisites: JOUR 416 and JOUR 421.

Graduation with Leadership Distinction: GLD: Research

JOUR 518 - Brand Communications Practicum/Competitions (3 Credits)
Application of advertising techniques and skills in preparation of full scale campaign.
Prerequisites: JOUR 332, JOUR 416, JOUR 421.

JOUR 521 - Interactive Communication Strategies (3 Credits)
The development of a complete, well-coordinated integrated communications plan that incorporates research and analysis techniques, critical thinking, team work, creative and tactical skills.
Prerequisites: JOUR 202 or MKTG 350.

JOUR 527 - Advertising Management (3 Credits)
The dynamics of leadership and management in the creative industries.
Prerequisites: JOUR 202.

JOUR 530 - Creative Leadership (3 Credits)
Theories of leadership as applied to creative industries. Students will engage and interact with community-based organizations to assess needs, plan communications strategies, lead student teams in developing those ideas, and present to clients. Junior standing or permission of instructor.

JOUR 531 - Public Relations Campaigns (3 Credits)
Development of public relations campaigns for business and social institutions. Case studies of public relations campaigns and programs.
Prerequisites: JOUR 201, JOUR 332, JOUR 436.

Graduation with Leadership Distinction: GLD: Community Service, GLD: Research

JOUR 533 - Public Relations Management (3 Credits)
Researching, programming, staff, budgeting, and planning public-relations programs by business, government, or consulting firms.
Prerequisites: JOUR 201, JOUR 436.

JOUR 534 - Publication Writing and Design (3 Credits)
Publication writing and design as well as internal or constituent communications, specifically focused on an internal audience. Production of InterCom, the College of Mass Communications and Information Studies' alumni magazine.
Prerequisites: JOUR 291.

JOUR 536 - Crisis Communications (3 Credits)
Introduction to crisis communications and management from a strategic, theory-based approach using research from historical and current case studies.
Prerequisites: C or better in JOUR 436.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

JOUR 537 - The Carolina Agency (3 Credits)
Participation in a functioning communications agency working for actual clients in a student-directed environment. Opportunity to both lead and be a part of a team servicing the communication needs of various clients.
Prerequisites: JOUR 101; JOUR 201; JOUR 203 or JOUR 202; and JOUR 291.

Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

JOUR 538 - The Bateman Team (3 Credits)
Self-directed development and implementation of a public relations campaign as part of a national competition: PRSSA's Bateman Competition.
Prerequisites: JOUR 332 and JOUR 436.

JOUR 539 - Ethics in Public Relations and Public Policy (3 Credits)
Review of the analytical process of resolving complex ethical issues and cases in public relations; study of the philosophical approaches to communication ethics.
Prerequisites: JOUR 101.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

JOUR 542 - Public Opinion and Persuasion (3 Credits)
Theory and practice of persuasive communication and the role of persuasion in shaping public opinion.

JOUR 550 - Advanced Magazine Article Writing (3 Credits)
Writing techniques used in the preparation and marketing of major nonfiction articles for national, regional, and local publications.
Prerequisites: JOUR 566.
JOUR 560 - Capstone Portfolio Development (3 Credits)
Advanced techniques of graphic and multimedia design and their application to problem-solving situations in the mass media. Emphasis on portfolio development.
Prerequisites: JOUR 446, JOUR 447, JOUR 449.

JOUR 563P - Public/Civic Journalism (3 Credits)
To gain an understanding of theory and practice of public/civic journalism, seen by its advocates as socially responsible journalism that attempts to build civic participation and empower communities.
Graduation with Leadership Distinction: GLD: Community Service

JOUR 566 - Magazine Article Writing (3 Credits)
Researching, organizing, writing, and marketing articles for publication in general and specialized publications.
Prerequisites: JOUR 361 or JOUR 436.

JOUR 573 - Editorial and Opinion Writing (3 Credits)
Content and style; writing of editorials, analyses, and commentaries.
Prerequisites: JOUR 291.

JOUR 574 - Data Journalism (3 Credits)
Acquiring, analyzing and presenting data using spreadsheets and other tools to uncover stories and provide depth and context to journalism.
Prerequisites: JOUR 291.

JOUR 575 - Broadcast Journalism Practicum (3 Credits)
Production of public affairs programs.
Prerequisites: JOUR 326, JOUR 333, and JOUR 434.
Corequisite: JOUR 502, JOUR 503, and JOUR 526.

JOUR 576 - Reporting Public Affairs (3 Credits)
Concentrated analyses of reporting in special fields, particularly in the South, including coverage of government, business, labor, the arts and sciences.
Prerequisites: JOUR 361.

JOUR 579 - Broadcast Announcing (3 Credits)
Theory and practice of professional broadcast announcing. Lecture-demonstration-laboratory course in principles underlying professional performance before microphones and cameras and the various broadcast performance functions.
Prerequisites: JOUR 325.

JOUR 580 - Advanced Reporting Topics (3 Credits)
Study and application of highly specialized reporting on topics related to current public discourse. May be repeated as content varies by title.
Corequisite: JOUR 587, JOUR 589, and JOUR 590 or JOUR 586, JOUR 588 and JOUR 590.

JOUR 586 - Capstone I - Advanced Reporting - Broadcast and Online Journalism (3 Credits)
Professional practice in meeting daily newscast deadlines through work on the Carolina News television newscast. Focus on polished reporting, performance and production techniques and demonstration of advanced television reporting skills under deadline pressure.
Prerequisites: JOUR 471.
Corequisite: JOUR 588 and JOUR 590.

JOUR 587 - Capstone I - Advanced Reporting - Multimedia Journalism (3 Credits)
Professional practice in shaping journalistic reporting to the multimedia environment. Application of news gathering, synthesizing and reporting across platforms – print and online, textual and graphic – in timely fashion.
Prerequisites: JOUR 471.
Corequisite: JOUR 589 and JOUR 590.

JOUR 588 - Capstone II - Advanced Broadcast and Online Journalism Production (3 Credits)
Advanced newscast production skills developed in the context of producing daily Carolina News broadcast. Shape and coordinate reporting and production team under deadline pressure in newsroom setting.
Prerequisites: JOUR 471.
Corequisite: JOUR 586 and JOUR 590.

JOUR 589 - Capstone II - Advanced Multimedia Journalism Production (3 Credits)
Editing and design employed to maximize effectiveness in the multimedia environment. Creating accurate and engaging content to reach consumers in varied ways reflecting contemporary consumer use of media.
Prerequisites: JOUR 471.
Corequisite: JOUR 587 and JOUR 590.

JOUR 590 - Capstone III - Digital Journalism (3 Credits)
Exposure to the evolving variety of journalism techniques, software programs and equipment to effectively tell compelling stories and convey information in multiple visual and interactive forms. Emphasis on extending professional skills while reinforcing current best practices.
Prerequisites: JOUR 471.
Corequisite: JOUR 586 and JOUR 588 or both JOUR 587 and JOUR 589.

JOUR 595 - Domestic Study Away in Journalism and Mass Communications (3 Credits)
Domestic study away course will focus on topics in journalism and mass communications and will be taught away from the University of South Carolina Columbia campus. Individual topics will vary by title.
Prerequisites: to be announced in class schedule.

JOUR 596 - Study Abroad in Journalism and Mass Communications (3 Credits)
Study abroad course will focus on topics in journalism and mass communications and will be taught as a study abroad experience. Individual topics will vary by title.
Prerequisites: to be announced in class schedule.

JOUR 597 - Internship in Mass Communications (1-3 Credits)
Supervised professional experience. Maximum of three hours credit. Contract approved by instructor, advisor, and department head is required.
Experiential Learning: Experiential Learning Opportunity

JOUR 598 - Directed Independent Studies (1-6 Credits)
Individual mass media projects. Contract approved by instructor, advisor, and department head is required for undergraduate students.
JOUR 746 - Educational Broadcasting (3 Credits)
History, nature, production-performance, evaluation, and means of improvement of educational/instructional broadcasting.

JOUR 747 - Independent Study in Journalism and Mass Communications (1-3 Credits)
Independent study in an area of journalism and mass communications relevant to the student's professional and/or research goals.

JOUR 749 - Literature of Mass Communication (3 Credits)
Methods for locating, evaluating, and abstracting information from literature relevant to the study of mass communication.

JOUR 750 - Foundations of Multimedia Journalism (3 Credits)
Course is designed to teach the foundations of multimedia journalistic storytelling. It will expose students to core concepts and practices associated with news gathering, news writing and field production.

JOUR 762 - Issues in Mass Communication Management (3 Credits)
Current management-related issues confronting the media, including management of creative people, budgeting, time management on deadline.

JOUR 771 - Media Economics (3 Credits)
Media organizations as economic institutions, including microeconomic analysis, basic trends in revenues and expenditures, evaluation of financial health, and performance in covering business and economics. 

Prerequisites: ECON 224.

JOUR 772 - Seminar in Health, Science, and the Media (3 Credits)
The media representation of issues in science, technology and environment from a social science perspective, with emphasis on consequences in areas such as public opinion, public policy, public understanding attitude formation, persuasion and behavior change.

JOUR 773 - Risk Communication (3 Credits)
The critical examination of classic and contemporary empirical research on risk communication as it pertains to health and environment issues, as well as emerging technologies.

JOUR 774 - Public Relations Theory (3 Credits)
An analysis of the theoretical foundation and issues relevant to the practice of public relations.

JOUR 775 - Strategic Communication for Behavior and Social Change (3 Credits)
Theories of persuasion, principles and best practices of strategic communication, as applied to health and cause communication campaigns. Recognize, and develop effective, persuasive communications for social and health topics.

Prerequisites: JOUR 715.

JOUR 776 - Seminar in Interactive Media and Emerging Communication Technologies (3 Credits)
Seminar that examines the social uses and impacts of interactive / emerging media technologies.

JOUR 777 - Practicum in Mass Communications Management (3 Credits)
Seminar and supervised professional management experience in a media organization.

JOUR 779 - Theories of Global Communication (3 Credits)
Discussion of competing theories that attempt to explain current issues in global communication.

JOUR 789 - Selected Readings and Research (1-3 Credits)
Selected readings course designed to facilitate student's specialized research interest. Permission of instructor required.
JOUR 790 - Topics in Mass Communication (1-6 Credits)
Specialized topics in mass communication, individual topics to be announced by title. May be repeated for credit.

JOUR 797 - Project Preparation (1-3 Credits)
Individualized scholarly activity to develop and execute special projects relevant to the study of mass communication.

JOUR 799 - Thesis Preparation (1-9 Credits)

JOUR 801 - Communication Research Design (3 Credits)
Principles and applications of quantitative and qualitative communication research designs.
Prerequisites: JOUR 701 and statistics competency.

JOUR 802 - Seminar in Ethical Reasoning in Mass Communications (3 Credits)
Ethical reasoning approaches in production and consumption of media messages.

JOUR 803 - Seminar in Mass Communication Theory and Theory Construction (3 Credits)
Meta-theoretical issues relevant to building theory in mass communication, concept explication, and forms of theory.

JOUR 804 - Seminar in Mass Communication Historical Research Methods (3 Credits)
Application of historical research methods to the study of mass communication.

JOUR 805 - Seminar in Teaching Mass Communication (3 Credits)
Teaching and learning methodologies and theories appropriate to mass communication instruction.

JOUR 806 - Seminar in Mass Communication Legal Research Methods (3 Credits)
Application of legal research methods to the study of mass communication.

JOUR 807 - Advanced Communication Research (3 Credits)
Advanced methods and techniques for analyzing empirical data for communication research.

JOUR 808 - Communication Research: Critical, Cultural, and Naturalistic Approaches (3 Credits)
Designing and conducting critical, cultural and naturalistic research.

JOUR 809 - Seminar in Freedom of Speech (3 Credits)
Issues involving the governmental protection and regulation of speech, and how that affects those involved in mass communication.

JOUR 810 - Independent Research Project (3-6 Credits)
Working closely with a faculty member, a student will design, and conduct a research project, with the objective of submitting the final report for publication or for presentation at an academic conference in the discipline. May be repeated for a maximum of 6 credit hours.

JOUR 899 - Dissertation Preparation (1-12 Credits)

Latin (LATN)

LATN 501 - Latin Drama (3 Credits)
Selected plays of Plautus and Terence.

LATN 502 - Cicero (3 Credits)
Readings from a variety of Cicero's works to gain a concept of the man as a humanist.

LATN 504 - Horace (3 Credits)
Readings from the Odes.

LATN 508 - Ovid (3 Credits)
Selected readings from the Metamorphoses.

LATN 513 - Tacitus (3 Credits)
Agricola or selections from the Annales.

LATN 514 - Livy (3 Credits)
Readings from Ab Urbe Condita.

LATN 525 - Roman Satire (3 Credits)
Readings in Horace, Juvenal, and Petronius.

LATN 530 - Latin Erotic Poetry (3 Credits)
Readings from the elegies of Catullus, Tibullus, Propertius, and Ovid.

LATN 537 - Lucretius (3 Credits)
Readings from the De Rerum Natura.

LATN 540 - Renaissance Latin (3 Credits)
An examination of several genres of Latin writing from Europe during the period 1400-1600, emphasizing, but not limited to, Italian writers.

LATN 551 - History of Latin Literature from the Origins to the Golden Age (3 Credits)
Readings from the Twelve Tables to Virgil, supplemented by readings in history and scholarship. Designed to prepare majors and honors students for further study.

LATN 552 - History of Latin Literature in the Silver Age (3 Credits)
Readings from Ovid to Ammianus, supplemented by readings in history and scholarship. Designed to prepare majors and honors students for further study.

LATN 560 - Independent Study (1-3 Credits)
Special projects for independent study and research.

LATN 561 - Independent Study (1-3 Credits)
Special projects for independent study and research.

LATN 580 - Teaching Advanced Latin in Secondary School (3 Credits)
Methods and materials for teaching the Latin Advanced Placement courses in secondary school.

LATN 614 - Intensive Grammar Review in Latin (3 Credits)
Intensive grammar review for non-majors; designed as preparation for LATN 615.

LATN 615 - Intensive Readings in Latin (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language reading requirement with successful completion of the course. Undergraduates may take the course as an elective only.

LATN 703 - Medieval Latin (3 Credits)
Survey of the survival of the classical tradition in the middle ages from the birth of Ammianus Marcellinus to the fall of Constantinople (A.D. 330-1453).

LATN 775 - Seminars on Selected Topics in Foreign Language Education (3 Credits)
Topics will be identified by title in the schedule of classes. Each topic may be taken only once.

LATN 790 - Directed Reading and Research (3 Credits)

Latin American Studies (LASP)

LASP 501 - Contemporary Spanish America (3 Credits)
Analysis and discussion of the 20th-century Spanish American history and the sociocultural forces that have contributed to define this area's national identities. Taught in Spanish.
Cross-listed course: SPAN 501
LAWH 541 - Colonial Spanish-American Literature to Neoclassicism (3 Credits)
Survey or pre-Columbian poetry and of texts dating from the time of Columbus to the end of the Colonial period.
Cross-listed course: SPAN 541

LAWH - Health Law (LAWH)

LAWH 700 - Legal Foundations of the Health Care System I (3 Credits)
Introduction to structure of government, sources of federal, state, and local law, judicial and administrative processes, the role of the lawyer, legal reasoning and analysis, and sources of law that govern and regulate access to U.S. health care system.

LAWH 701 - Legal Foundations of the Health Care System II (2 Credits)
Holistic understanding of the various aspects of the healthcare system related to sources of care, sources of payment, and regulatory and other legal systems that constrain and control the behavior of these sources and how these sources impact each other.
Prerequisites: LAWH 700.

LAWH 702 - Legal Foundations of Health Care System Lab (1 Credit)
Methods used to locate sources of health care regulations that require compliance and to collect required information.
Prerequisites: LAWH 700.
Prerequisite or Corequisite: LAWH 701.

LAWH 710 - Public Health Systems (2 Credits)
Understanding the role and duties of public health officials in the healthcare system, the various public health regimes that require compliance, and the role of public health funding streams in achieving quality compliance for private parties. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 712 - Bioethical Principles (Applied Learning) (2 Credits)
Moral obligations that influence health care professional norms and regulatory structures. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 714 - Health Care Contracting (Applied Learning) (2 Credits)
Health care contracts. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 716 - Medicare Compliance for Medical Facilities (3 Credits)
Medicare reporting and structural requirements for hospitals.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 720 - Health Policy Advocacy (2 Credits)
Communication of health policy concerns to decision makers. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 722 - Risk Management (2 Credits)
Health care professionals' and institutions' limitation and management of risks.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 724 - Certificates of Need (2 Credits)
Navigating the certificate of need process in the health care industry.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 728 - Comparative Studies in International Health Care (2 Credits)
Examining health care systems from a legal and structural perspective in nations outside of the United States. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 730 - Healthcare Structure Planning for Companies & Non-Profits (3 Credits)
Introduction to structure of health care practices and their relationships with others, examining the regulatory compliance requirements necessary to maintain nonprofit taxation status at the state and federal levels. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 732 - Medicare Quality Compliance (3 Credits)
In-depth examination of compliance with various quality initiatives and an understanding of the sources for the regulations and rules.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 734 - Healthcare Fraud & Abuse Compliance (2 Credits)
Examining federal laws and regulations to prohibit healthcare fraud and abuse.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 736 - Third Party Billing Compliance (2 Credits)
Providing an understanding of the requirements for properly billing third-party payers.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 738 - HIPAA and Electronic Medical Records Compliance (3 Credits)
Requirements for organizations that handle protected health information, including information about which entities need to comply with laws protecting such information and to what extent.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 740 - Antitrust Compliance (3 Credits)
Introduction to potential antitrust issues for large scale healthcare organizations, offering a survey of situations that could trigger antitrust investigations and litigation from both state and federal antitrust enforcement agencies.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 750 - Health Systems Legal Externship (2 Credits)
Learning about health systems through working at an approved location to gain first-hand experience in work related to the student's course of study. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

Library & Info Science (SLIS)

SLIS 501 - Teaching and Training in Distributed Environments (3 Credits)
Knowledge and skills for applying complementary technologies for learning in distributed learning environments (Pre-K-lifelong) through lecture, demonstration, and discussion.

SLIS 523 - Materials for Early Childhood (3 Credits)
Media resources and techniques for children from birth to 9 years. Reading interests and developmental needs of young children. Authors, illustrators, indexes, bibliographic tools, evaluation sources, and professional literature. Not open to students enrolled in M.L.I.S. program.
SLIS 525 - Materials for Children (3 Credits)
Media resources for children. Reading interests of children and their curricular and independent needs for information. Authors, illustrators, indexes, bibliographic tools, and sources of evaluation of materials for children. Techniques and literature for read-aloud programs and storytelling. Not open to students enrolled in M.L.I.S. program.

SLIS 527 - Materials for Adolescents (3 Credits)
Media resources for adolescents. Reading interests of adolescents and their curricular and independent information needs. Study of relationships of media to information needs and critical comparison between classic and contemporary materials for adolescents. Indexes, bibliographic tools, and sources of evaluation of materials. Not open to students enrolled in M.L.I.S. program.

SLIS 529 - Special Topics in Library and Information Studies (3 Credits)
Specific topics of current concern to the library, information, and media professions to be identified by title. Not open to students enrolled in M.L.I.S. program.

SLIS 530 - Applications of Information Technology and the Infrastructure (3 Credits)
Introductory knowledge for school library media specialists, teachers, administrators, parents, and other citizens interested in practical applications of information technology to support learning, decision making, and community building.

SLIS 534 - Knowledge Discovery Techniques (3 Credits)
Knowledge discovery techniques and applications.
Prerequisites: SLIS 434 for Undergraduate Students.

SLIS 560 - Information Visualization (3 Credits)
Foster theoretical insights about information visualization. Prepare small and large-scale datasets for visual representations. Project-based and students will map real datasets and understand the methods to interpret the visualizations.

SLIS 600 - Storytelling: Theory, Practice, and Development (3 Credits)
Storytelling methods, techniques, and materials encompassing heritage, art, literature, and programming.

SLIS 701 - Ethics, Values, and Foundational Principles of Library and Information Science Professions (3 Credits)
Introduction to the issues and core values of library and information professions, including equity of access, literacy and learning, information policy, collaboration, service, professional growth and development, and culturally responsive practice.

SLIS 702 - Community Engagement and Service (3 Credits)
Explores the role of library and information organizations in communities, with a focus on building community relationships, engagement, and outreach.

SLIS 703 - Reference and Instruction (3 Credits)
Introduction to the design and delivery of instructional services and assistance on the use of information resources to promote information literacy and informed decision-making.

SLIS 704 - Leadership in Information Organizations (3 Credits)
Introduction to the nature, development, roles, and fundamental issues of leadership in library and information organizations.

SLIS 705 - Research Design and Evaluation (3 Credits)
Introduces the research process as applied to library and information science topics with an emphasis on research methods, critical evaluation, and the practical application of research.

SLIS 706 - Information Organization and Access (3 Credits)
Explores the design, use, and evaluation of information organization and retrieval systems to support digital curation and preservation, metadata generation, and information-seeking.

SLIS 707 - Information Organization and Retrieval (3 Credits)
Issues and techniques of knowledge representation and information organization, information retrieval systems, and users’ information seeking behavior.
Prerequisite or Corequisite: SLIS 701.

SLIS 710 - History of Information Organizations and Technologies (3 Credits)
A survey, from ancient times to the present, of the evolution and social role of information organizations (libraries, archives, information centers, etc.) and technologies (books, journals, computers, etc.). Emphasis on the U.S. in the 19th and 20th centuries.
Prerequisites: SLIS 701.

SLIS 711 - Introduction to Archival & Records Studies (3 Credits)
Nature and use of archives and records; functions of archives and records professionals; and legal, ethical, and political issues in archives and records.

SLIS 715 - Printing (1 Credit)
Introduction to printing with movable type. This course is designed to give students some experience in designing and printing books and broadsides. Examination of paper, typefaces, composition work, and simple bookbinding are included.

SLIS 716 - Introduction to Bibliography and Textual Studies (3 Credits)
Introduction to analytical, descriptive, and textual bibliography, and to the principles and practice of editing. 03: 07/05/2019.

SLIS 717 - Special Collections Librarianship (3 Credits)
Introduction to the missions, professional standards and best practices of special collections librarianships. Topics include access and acquisitions, collection assessment and development, collection management and maintenance, donor relations, public programming and current issues and trends. Restricted to SLIS graduate students.

SLIS 718 - History of Children's and Young Adult Literature (3 Credits)
Historical overview of the literary content, illustration, and social values of children's and young adult literature written in English. Examines the influence of movements such as Romanticism, Rationalism, and postmodernism, as well as changing trends over time.

SLIS 719 - Preservation Planning and Administration (3 Credits)
The planning and administration of preservation programs in libraries, archives, records centers, and manuscript depositories.
Prerequisites: SLIS 701.

SLIS 720 - School Library Media Program Development (3 Credits)
Roles, functions, and organization of school library media programs. Systematic planning and evaluation, leadership, advocacy, and integration of program into the curriculum.

SLIS 721 - Seminar in School Library Programs (3 Credits)
Problems relating to contemporary school media programs will be identified and analyzed by students, drawing from their own experiences, pertinent literature in the field, and field investigations.
Prerequisites: SLIS 701, SLIS 703, SLIS 705, SLIS 707, SLIS 720.
SLIS 724 - Special Libraries (3 Credits)
An overview of industrial, business, governmental, and professional libraries and related information organizations. Study of their organizational characteristics, governance, services, distinctive features. Major part of course is simulation of information management problems in these organizations.

SLIS 725 - Digital Libraries (3 Credits)
History and current state of digital records, including their storage, organization, and preservation in digital libraries. 
Prerequisites: SLIS 701, SLIS 707.

SLIS 726 - Knowledge Management for Library and Information Professionals (3 Credits)
An introduction to the background, principles, practices, and technologies of knowledge management for library and information professionals.

SLIS 727 - Health Sciences Library Services (1 Credit)
A detailed study of traditional and innovative services characteristic of health science libraries. Includes community study design and evaluation of services. For those students committed to careers in health sciences libraries.
Prerequisites: SLIS 726.

SLIS 728 - Public Library Systems (3 Credits)
Course focuses upon three topics: 1) organizational patterns for various library operations, local and regional; 2) the political environment of the public library; and 3) major problems confronting public library systems.
Prerequisites: SLIS 701.

SLIS 729 - Academic Libraries (3 Credits)
An analysis of the historical development and current issues in academic libraries.
Prerequisites: SLIS 704.

SLIS 730 - Cataloging Information Materials (3 Credits)
An in-depth study of AACR2 covering both print and nonprint materials; searching bibliographic materials in a database, editing and updating them; principles of coding, tagging, and entering the results into a database; discussion of administrative problems.
Prerequisites: SLIS 702.
Prerequisite or Corequisite: SLIS 707.

SLIS 731 - Subject Analysis and Classification (3 Credits)
Study of major classification and subject authority systems. Emphasizes the understanding and application of these systems in information agencies.
Prerequisites: SLIS 730.

SLIS 732 - Indexing and Abstracting (3 Credits)
Introduction to principles and practices in abstracting and indexing.
Prerequisite or Corequisite: SLIS 707.

SLIS 733 - Serials (3 Credits)
An introductory study of methods and problems in acquiring, organizing, and retrieving serial publications with an emphasis on the special features of serials. Includes an introduction to computer applications.
Prerequisites: SLIS 702.

SLIS 734 - Government Information Sources (3 Credits)
Creation, acquisition, organization, retrieval, and use of government-produced information. Emphasis is on U.S. government information but includes attention to state, local, and international sources.
Prerequisites: SLIS 703, SLIS 707.

SLIS 735 - Metadata (3 Credits)
Examination of metadata definition, selection and applications; Role of metadata in information discovery, acquaintance with various metadata schemes and standards for libraries, museums, archives and info centers. 
Prerequisites: SLIS 707.

SLIS 738 - Seminar in Technical Services (3 Credits)
Management, personnel, and materials within technical service departments for all types of libraries. Standardization, centralized and cooperative efforts, automation and evaluation as applied to all functions within technical services departments. 
Prerequisites: SLIS 702.

SLIS 740 - Online Information Services (3 Credits)
Direct experience searching online databases and examination of related administrative issues.
Prerequisites: SLIS 707.

SLIS 741 - Educational Services in Library and Information Organizations (3 Credits)
Applications of human learning theory and presentation techniques to information literacy programs and curriculum collaboration for library and information professionals. 
Prerequisites: Completion of 9 semester hours of SLIS graduate-level classes.

SLIS 742 - Curricular Role of the School Librarian (3 Credits)
Role of the school library media specialist in integrating the school library media program into a K-12 standards-based curriculum, including best practices, needs assessment, collaboration, instructional design, and resource provision.
Prerequisites: SLIS 701, SLIS 706, SLIS 703 preferred and required education courses (for initial certification candidates).

SLIS 743 - Health Information Retrieval in Electronic Environments (3 Credits)
Presents a survey of electronic information resources in the health sciences and an introduction to advanced searching techniques and analytical skills to access biomedical literature.

SLIS 744 - Music Libraries and Information Services (3 Credits)
Acquisition of and special cataloging requirements for printed music, recordings, and multimedia; collection management; administration of music libraries; preservation/conservation of special materials.

SLIS 745 - Social Science Information Services (3 Credits)
Considers how literature and information services in the social sciences are organized for the purpose of interpretation and delivery. Students survey the literature of psychology, sociology, political science, and other disciplines in some detail. Practice in question consultation and database searching will be included.
Prerequisites: SLIS 703, SLIS 707.

SLIS 746 - Humanities and Arts Information Services (3 Credits)
A survey and evaluation of the nature, history, and bibliography of the literature of the humanities and arts. Emphasizes the distinctive features of materials, research, communication, and information-seeking patterns.
Prerequisites: SLIS 703.
SLIS 747 - Science and Technology Information Services (3 Credits)
A survey of literature in the basic sciences and applied technical fields. Examines distinctive features of materials, research, and information communication patterns in the various fields. Practice in question consultation and database searching will be included. **Prerequisites:** SLIS 703, SLIS 707.

SLIS 748 - Business Information Sources and Services (3 Credits)
Coverage of the bibliographic and information systems relevant to contemporary managerial information needs, with emphasis on the literature of business and finance, and including statistical materials, literature guides, and investment services. Specialized problems related to the organization and operation of business information systems. Practice in question consultation and database searching will be included. **Prerequisites:** SLIS 740.

SLIS 749 - Health Sciences Information Resources (3 Credits)
Characteristics and use of print and computer-based materials in the health sciences and for general reference librarians.

SLIS 750 - Information and Records Management (3 Credits)
An introduction to the role and functions of the information manager in organizations with emphases on use, retention, and management of information and records. **Prerequisites:** SLIS 701.

SLIS 751 - Libraries, Literacy, and Literature (3 Credits)
Ways in which libraries and librarians become more effective providers and partners in the literacy movement. **Prerequisites:** SLIS 701.

SLIS 752 - Diversity in Libraries (3 Credits)
Nontraditional library users in all types of libraries. Literacy programs, disabled and/or institutionalized persons, older adults, and members of selected ethnic groups.

SLIS 753 - Seminar in Information Services (3 Credits)
Planning and evaluating information services. Emphasis on policy and decision making regarding current issues.

SLIS 754 - Library Programming for Children and Young Adults (3 Credits)
The nature, philosophy, and development of non-curricular programs for children and young adults in the school and public library. Among the types of programs to be discussed are storytelling, film programs, reading programs, programs for parents, and other activities associated with library service to young people. Students will study the principles and problems involved in designing, implementing, and evaluating programs of this nature.

SLIS 755 - Popular Materials and Programming for Adults (3 Credits)
Materials popular with adult readers and programs utilizing those materials. Extensive reading and experience in planning and presenting programs.

SLIS 756 - Children's Materials (3 Credits)
A study of materials intended for children of elementary school age (6-13) with emphasis on the process of evaluating them to meet the educational, cultural, and recreational needs of children.

SLIS 757 - Young Adult Materials (3 Credits)
A study of materials for young adults (13-19) with emphasis on the process of evaluating them to meet the educational, cultural, and recreational needs of young adults.

SLIS 758 - Consumer Health Resources and Information Services (3 Credits)
Concepts and current trends in the creation, implementation, and evaluation of adult consumer health resources and services, including consumer health informatics and e-health.

SLIS 759 - Materials for Early Childhood (3 Credits)
A study of picture books and audiovisual materials intended for the very young child through age 9 with emphasis on the process of evaluating these materials to meet the educational, cultural, and recreational needs of very young children.

SLIS 760 - Materials and Services for Latino Youth (3 Credits)
Introduces a wide range of print and nonprint materials appropriate for Latino youth. Provides resources for librarians and educators serving young Latinos literacy needs.

SLIS 761 - Information Technologies in the School Library Program (3 Credits)
Technology management, use of technology and nonprint resources, and their integration into the K-12 curriculum. **Prerequisites:** SLIS 706.

SLIS 765 - Planning Library Facilities (3 Credits)
An introduction to the process of planning new and renovated spaces and facilities. Content covers roles of participants in planning preparation of building program and examines examples of recent buildings. **Prerequisites:** SLIS 701, SLIS 704.

SLIS 766 - Collection Development and Acquisitions (3 Credits)
An examination of information agencies and their purposes, collections, collection policies, and acquisition procedures. **Prerequisites:** SLIS 701.

SLIS 767 - Management of Public Library Youth Services (3 Credits)
Planning, implementation, and evaluation of public library services for children and young adults. **Prerequisites:** SLIS 701.

SLIS 768 - Problems in Library and Information Agency Administration (3 Credits)
Examines in detail frequently occurring problems that require decision activity by library and information agency managers. May be repeated for credit as topics change. **Prerequisites:** Completion of 9 semester hours of SLIS graduate-level classes.

SLIS 770 - Design and Management of Databases (3 Credits)
Databases used in libraries and other information agencies, including operational and functional design. Extensive hands-on evaluation of selected database software packages. **Prerequisites:** SLIS 701, SLIS 707.

SLIS 772 - Strategic Intelligence for Information Professionals (3 Credits)
Principles and practices of information gathering and analysis of open source information, including competitive intelligence, environmental scanning, and issues management; information evaluation and synthesis; role of strategic intelligence in modern organizations. **Prerequisites:** SLIS 740 or SLIS 748.

SLIS 775 - Practicum in Organizing and Managing Web Resources (3 Credits)
Concepts and practices necessary to organize and manage Web resources in libraries and in other information agencies.
SLIS 776 - Web Technologies for Information Specialists (3 Credits)
Evaluation and programming of Web technologies and related issues in libraries and in other information agencies.
Prerequisites: SLIS 775.

SLIS 777 - Design and Management of Digital Image Collections (3 Credits)
This course presents introductory concepts related to the creation, manipulation, and implementation of visual collections in various online environments. It identifies resources, procedures, and skills needed to successfully design, implement, and manage digital image collections in a collaborative environment.
Prerequisites: SLIS 706, passing of SLIS Technology Test.

SLIS 778 - Seminar in Information Science (3 Credits)
A critical examination of the principles, trends, and issues of modern information systems design and use.
Prerequisite or Corequisite: SLIS 707.

SLIS 780 - Information Networks (3 Credits)
Identification and evaluation of information networks in libraries and other information agencies. The nature of networks, including hardware and software applications.
Prerequisites: SLIS 701, SLIS 707.

SLIS 787 - Seminar in Applied Information Systems for Information Specialists (3 Credits)
Application, management and evaluation of information systems for libraries and other information agencies, including emerging technical, administrative and management issues related to these systems.
Prerequisites: SLIS 701, SLIS 707.

SLIS 791 - Study Abroad: Great Libraries of the World (3 Credits)
Discussion and critical examination of selected topics of current international debate regarding information and related technologies. Specific topics to be identified by title. May be repeated three times for a maximum of 9 hours.

SLIS 794 - Internship in Library and Information Science (3-6 Credits)
Supervised field experience in library, media center, or other information agency relevant to student's professional goals.
Prerequisites: SLIS 701, SLIS 705, SLIS 707.

SLIS 795 - Special Topics in International Information Issues (1-3 Credits)
Discussion and critical examination of selected topics of current international debate regarding information and related technologies. Topics vary by title. May be repeated a maximum of 3 times.

SLIS 796 - Independent Study in Library and Information Science (1-6 Credits)
Independent study in an area of library and information science relevant to the student's professional goals.
Prerequisites: SLIS 701, SLIS 705, SLIS 707.

SLIS 797 - Selected Topics in Librarianship and Information Services (1-3 Credits)
Discussion and investigation of selected topics of current concern to the library and information profession. Specific topics to be identified by title.

SLIS 798 - Specialist Project Preparation (3-6 Credits)
Prerequisite: Specialist degree students only. Approval of the appropriate application for specialist project must be submitted early in the semester preceding enrollment.

SLIS 801 - Research Issues in Library and Information Science (3 Credits)
Seminar examining a range of issues, theories, and research questions that currently shape thinking and discourse in library and information science.

SLIS 802 - Theory and Research Methods in Library and Information Science (3 Credits)
Seminar exploring problems and issues in theory formulation and research methods, including quantitative, qualitative, and multi-method approaches. Not auditable.

SLIS 803 - Information and Society (3 Credits)
Seminar examining the historical and intellectual foundations of library and information science in relation to the nature and current roles of information organization and information transfer in societies. Not auditable.

SLIS 804 - Preparation for Academic Careers in Library and Information Science (3 Credits)
Seminar examining the history, trends, and current status of academic careers in library and information science, emphasizing knowledge and skills needed for successful teaching, scholarship, and service. Not auditable.

SLIS 805 - Information Policy and Ethics (3 Credits)
Seminar in the critical and analytical study of information policy and ethical issues at the individual, institutional, and international levels. Not auditable.

SLIS 806 - Communication Processes and Information-Seeking Behavior (3 Credits)
Seminar examining the characteristics of communication, human information interaction, and information-seeking behavior, with emphasis on social network models, and the relationship between information-seeking behaviors and the design of communication and information systems and services. Not auditable.

SLIS 809 - Planning and Evaluating Colloquia In Library and Information Science (1 Credit)
Involves students in planning, managing, and evaluating colloquia, including recruiting speakers, scheduling venues, attracting audiences, conducting the sessions, and evaluating the results. May be repeated up to three times for credit.

SLIS 810 - Human Information Interactions and Cultural Institutions (3 Credits)
Explores libraries and other cultural institutions as lifelong educational environments where complex human interactions take place. Over the past two years, the promising intersection of cultural organizations has been a topic of strong interest to practitioners and scholars associated with these institutions. This course introduces the interdisciplinary framework, social perspectives, and research methods required to development an understanding of this intersection, the changes that will be required as new technologies alter the way that people engage with these institutions, and the challenges that have begun to emerge as their boundaries become less defined. This type of interdisciplinary framework is needed to address these topics and address both the human information needs that impel cultural institutions and the steps and strategies by which these needs may be recognized and resolved in these information rich environments.
SLIS 811 - Technologies in Cultural Institutions (3 Credits)
This course provides an opportunity for doctoral students to explore the issues associated with the implementation, evaluation and management of various technologies found in cultural institutions. Students will gain practical experience working with different technologies through class demonstrations and will be exposed to different technical environments via class field trips.

SLIS 899 - Dissertation Preparation (1-12 Credits)

Linguistics (LING)

LING 502 - French Linguistics (3 Credits)
The structure, morphology, and syntax of modern French.
Cross-listed course: FREN 517

LING 503 - Introduction to German Linguistics (3 Credits)
Structural and descriptive linguistics applied to the German language.
Cross-listed course: GERM 515

LING 504 - Introduction to Spanish Linguistics (3 Credits)
Phonology, morphology, and syntax of modern Spanish.

LING 505 - Interdisciplinary Topics in Linguistics (3 Credits)
Topics selected by the instructor for specialized study. Course content varies and will be announced in the schedule of classes title. May be repeated with different title.

LING 512 - French Phonology (3 Credits)
The sound system and its functioning in the morphological system of French from the point of view of current phonological theory.
Cross-listed course: FREN 516

LING 514 - Contrastive English-Spanish Phonetics and Phonology (3 Credits)
Introduction to the study of phonetics and phonology and their application to the sounds and sound systems of English and Spanish. Includes transcription practice and discussion of relevance to teaching.
Cross-listed course: SPAN 517

LING 521 - Advanced English Grammar (3 Credits)
Practical survey of the syntactic structures of English; usage, social and regional variation emphasis on data.
Prerequisites: LING 421/ENGL 450 or LING 600/ENGL 680.

LING 527 - Introduction to Mathematical Methods in Linguistics (3 Credits)
Introduction to mathematical mechanisms that play a prominent role in the formalization of syntactic and semantic theories, showing how they are applied to an understanding of the working parts of human language. The topics covered include: set theory, logic, English as a formal language, and languages & grammars.

LING 530 - Language Change (3 Credits)
Major ways in which phonetics, phonology, syntax, morphology, and semantics change through language history; social factors which promote innovation.

LING 533 - Introduction to the Germanic Languages (3 Credits)
Introduction to historical Germanic linguistics including a survey of the Old Germanic languages (Old English, Old Frisian, Old Saxon, Old High German, Old Norse, Gothic); comparative phonology, morphology, and syntax, typology of modern Germanic languages and dialects; and common Germanic in its Indo-European context.
Cross-listed course: GERM 517

LING 540 - Topics in Language and Culture (3 Credits)
Introduction to sociolinguistic issues, focusing on a single language. Course content varies and will be announced by title. May be repeated twice as topics vary.

LING 541 - Language and Gender (3 Credits)
Approaches to gender and language emphasizing the social grounding of both; how language reflects sociocultural values and is a tool for constructing different types of social organization.
Cross-listed course: ANTH 555, WGST 555

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

LING 542 - Research in Language Conflict and Language Rights (3 Credits)
Research into the parameters governing linguistic conflicts and language rights issues, involving a close examination of the nexes of language and individual and ethnic identity, culture, dialects, bilingualism. Examination of regional, national, and international case studies, with particular attention to nationalism, language revitalization, and language planning.
Cross-listed course: POLI 542

LING 543 - Discourse, Gender, and Politics of Emotion (3 Credits)
Anthropological approach to issues of discourse, gender, and emotion. Issues under consideration include the social control, force, and forms of emotional discourse and the relationship between emotion and culture from gender-oriented perspectives.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

LING 545 - Anthropological Approaches to Narrative and Performance (3 Credits)
The ways people from various cultures reflect on, reinforce, and construct their social realities through narrating, which will be considered as both artistic expression and social action.
Cross-listed course: ANTH 553

LING 546 - Japanese Language in Society (3 Credits)
Japanese language and communication in its socio-cultural context; emphasis on comparison with American English. Taught in English.
Cross-listed course: JAPA 500

LING 548 - German Sociolinguistics (3 Credits)
Introduction to the study of variation in Modern German. Traditional German dialectology and dialect geography, language and society, multilingualism in the German-speaking countries, German in contact with other languages.
Cross-listed course: GERM 518

LING 554 - The Structure of Modern Spanish (3 Credits)
Description of the grammatical structures of Modern Spanish. Intensive study of the theory and practice of word formation and sentence structure of Spanish.
Cross-listed course: SPAN 516

LING 556 - Language and Globalization (3 Credits)
Anthropological approach to issues of language and globalization. Linguistic consequences of globalization under consideration include communicative patterns, linguistic change, and language and political economy.
Cross-listed course: ANTH 556

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences
LING 565 - Philosophy of Language (3 Credits)
An examination of concepts and problems such as meaning, reference, analyticity, definition, and the relation between logic and philosophy.
Prerequisites: PHIL 202.
Cross-listed course: PHIL 517

LING 567 - Psychology of Language (3 Credits)
Theories of speech perception, linguistic theories of syntax and semantics, the brain mechanisms underlying language, the development of language in children, and the role of language in thought.
Prerequisites: PSYC 506
Cross-listed course: LING 500

LING 570 - Introduction to Language Development (3 Credits)
The language acquisition process in normal children, including the development of semantics, morphology, syntax, phonology, and pragmatics; American dialects and bilingualism.
Prerequisites: COMD 501 and COMD 502.
Cross-listed course: COMD 570

LING 600 - Survey of Linguistics (3 Credits)
Survey of core areas of linguistics and extensions to closely related disciplines. Introduction to the linguistic component of human cognition. Formal description and analysis of the general properties of speech and language, the organization of language in the mind/brain, and cross-linguistic typology and universals.
Cross-listed course: ANTH 600, ENGL 680

LING 627 - Introduction to Semantics and Pragmatics (3 Credits)
An introduction to the study of linguistic meaning, including the following topics: meaning, reference, and truth; the connections among language, thought, and reality; word meaning and sentence meaning; possible worlds and modality; thematic roles; meaning and context; presupposition and implicature; speech acts; formal semantics; and cognitive semantics.
Prerequisites: LING 300, LING 301, or LING 600.

LING 650 - Introduction to Morphology (3 Credits)
Foundations of generative morphology, focusing on morphological data collection and analysis; the structure of the lexicon; and the interfaces between morphology and phonology, semantics, and syntax.
Prerequisites: LING 300, LING 301, or LING 600.

LING 701 - Quantitative Approaches to Linguistic Analysis (3 Credits)
Description, visualization, and basic statistical analysis of both discrete and continuous linguistic data from various linguistic subfields using R.

LING 710 - Introduction to Phonology (3 Credits)
The phonetic basis of phonology; phonological structure; lexical representation; cross-linguistic survey of major types of phonological processes; emphasis on data analysis.
Prerequisites: LING 600.

LING 711 - Phonological Theory (3 Credits)
Advanced study of theoretical issues in phonology.
Prerequisites: LING 600 and LING 710.

LING 712 - Articulatory and Acoustic Phonetics (3 Credits)
Physical and anatomical mechanisms for producing speech, phonetic representations and models of speech perception and prosody, acoustic characteristics of the speech signal, use of international phonetic alphabet symbols (IPA) to describe speech sounds in the world's languages, training in experimental and field methods in phonetic research.
Prerequisites: LING 600.

LING 720 - Introduction to Syntax (3 Credits)
Foundations of generative grammar, focusing on the syntax of English; universal principles of basic clause structure and derived constructions; emphasis on syntactic argumentation and cross-linguistic generalization.
Prerequisites: LING 600.

LING 721 - Syntactic Theory (3 Credits)
Advanced exploration of a principled model of the syntactic component of universal grammar and the interface between this module and semantic interpretations and lexical information. Competing hypotheses are compared.
Prerequisites: LING 600 and LING 720.

LING 728 - Semantic Theory (3 Credits)
The formal study of linguistic meaning, including the following topics: Fregean truth-conditional semantics; lexical decomposition; predication and modification; lambda abstraction; generalized quantification; intentional and extensional contexts; tense, aspect, and modality; propositional and indexicality.
Prerequisites: LING 600 or LING 627.
Cross-listed course: PHIL 719

LING 729 - Pragmatic Theory (3 Credits)
Study of formal approaches to pragmatic phenomena such as focus, presupposition, and implicature; examination of deictic, contextual and perspectival expressions; survey of pragmatic frameworks such as Relevance Theory and Discourse Representation Theory; study of information structural properties of natural languages, including topic-comment structure, given-new contrasts, definiteness versus indefiniteness.
Prerequisites: LING 600 or LING 627.
Cross-listed course: PHIL 717

LING 730 - Historical Linguistics (3 Credits)
Innovation in phonology, morphology, syntax, and semantics; evidence from texts, social and regional dialects; emphasis on theories of language change.
Prerequisites: LING 600 and LING 610.

LING 731 - History of English Language (3 Credits)
The historical background of Modern English with attention to the major linguistic and cultural developments which distinguish English from other related languages. No prior knowledge of Old English or Middle English is required.
Cross-listed course: ENGL 781

LING 732 - History of the French Language (3 Credits)
Development of the French language from its origins to 1600.
Cross-listed course: FREN 715

LING 733 - History of the German Language (3 Credits)
Development of German in the Germanic, Old High German, Middle High German, and New High German periods. Phonology, morphology, syntax, semantics, and the relationship between dialects and the standard language.
Cross-listed course: GERM 516

LING 734 - History of the Spanish Language (3 Credits)
Development of the language from its origins to the present day.
Cross-listed course: SPAN 715
LING 739 - The Evolution of Linguistic Theory, Practice, and Methods (3 Credits)
Introduces basic resources of discipline and focuses on the development of linguistics in terms of dominant issues and analytical methodology with emphasis on paradigm shifts.
Prerequisites: LING 600, LING 610, LING 620.

LING 740 - Introduction to Sociolinguistics (3 Credits)
An examination of choices speakers in the same community make between styles, dialects, and languages; their association with social group memberships; speakers’ perceptions of interpersonal relationships.
Prerequisite or Corequisite: LING 600.

LING 741 - African American English (3 Credits)
Linguistic approaches to the history, structure, and use of African American English.

LING 742 - Language and Race (3 Credits)
Sociolinguistic examination of the relationship between language and race, including ethnolects, identity construction, linguistic appropriation, linguistic racism, and antiracism in everyday and institutional contexts.

LING 743 - Analysis of Conversation (3 Credits)
Types of interactive organization found within conversation and the methods and procedures used by participants to achieve order.
Cross-listed course: ANTH 756

LING 744 - Language Contact Phenomena (3 Credits)
The structural effects of contact between speakers of more than one language on the language involved. Borrowing, code-switching, convergence, language death, development of pidgins and creoles.
Prerequisites: LING 600.

LING 745 - Varieties of American English (3 Credits)
Social and regional variation in American English since the colonial period.
Cross-listed course: ENGL 782

LING 746 - Sociophonetics (3 Credits)
The intersection between variation in phonetic/phonological form and social factors (such as a speaker’s region, age, group identity, ethnic background, sexual orientation, level of education, etc.), acoustic production of variation, effects of sociophonetic variation on speech perception, on language change, and on language acquisition.

LING 747 - Language as Social Action (3 Credits)
Examines language as a social, cultural, and political matrix. Topics include ideology, gender, race, power, agency, and resistance. Students will apply linguistic theories in their own analyses of everyday speech.
Cross-listed course: ANTH 747

LING 748 - Introduction to Linguistic Anthropology (3 Credits)
A comprehensive introduction to linguistic anthropology, its relationship(s) to sociolinguistics, discourse analysis, and conversation analysis. Contributions made to social theory and theories of language and discourse will be understood.
Prerequisites: LING 600.

Cross-listed course: ANTH 748

LING 765 - Studies in Philosophy of Language (3 Credits)
Examination of concepts such as meaning, reference, analyticity, and translational indeterminacy; evaluation of accounts of speech acts, the semantics of propositional attitudes, and metaphor and other pragmatic phenomena.
Cross-listed course: PHIL 718

LING 772 - Technology in Foreign Language Education (3 Credits)
Introduction to technology in language teaching and the connection between language acquisition and the implementation of Internet and multimedia technology.
Cross-listed course: EDTE 772, FORL 772

LING 780 - Discourse Analysis (3 Credits)
Underlying principles of how phonological, syntactic, and lexical features are organized above the sentence level; alternative choices of these features and how they contribute to the speaker’s/writer’s goals.
Prerequisites: LING 600.

LING 782 - Language Ideology: The Political Economy of Language Beliefs and Practices (3 Credits)
Linguistic anthropological approaches that examine how ideological systems mediate social structures and linguistic/discursive forms and functions. Topics range from language and political economy, identity and identifications, institutions, and nation-building/nationalism.
Cross-listed course: ANTH 782

LING 790 - Second Language Acquisition (3 Credits)
Study of current theory and research in second language acquisition and exploration of relationships between such work and classroom second language learning and teaching. Examination of research techniques used in applied linguistics.
Prerequisite or Corequisite: LING 600.

LING 791 - Theory and Methodology in Second Language Acquisition (3 Credits)
Current issues and research in adult second language acquisition, with special attention to developments in theory and to methodological issues and considerations.
Prerequisites: LING 600, LING 790.

LING 792 - Principles of Instructed Second Language Acquisition and Foreign Language Teaching (3 Credits)
An analysis of instructed second language acquisition (SLA). This course explores the historical development and up-to-date findings in foreign/second language research and applies that knowledge to classroom teaching methods. Students will be expected to conduct empirical investigation.
Prerequisites: FORL 511 or LING 790.

Cross-listed course: FORL 730

LING 795 - Principles and Strategies for Teaching ESOL (3 Credits)
Survey of teaching ESOL, including theoretical principles and practical strategies for approaches, methods, techniques, and materials as they concern elementary, secondary, and postsecondary learners.

LING 796 - Teaching Reading and Writing to ESOL Learners: Theory and Practice (3 Credits)
This course surveys research on the mental processes and linguistic contexts involved in reading and writing in a second language. Pedagogical implications for elementary, secondary, and postsecondary learners are discussed.
Cross-listed course: EDRD 796

LING 798 - Practicum in Teaching ESOL (3 Credits)
Observation and supervised teaching of English to speakers of other languages in an individually designed classroom setting. Course may be taken up to 3 times.
Prerequisites: LING 600, LING 795.

LING 799 - Thesis Preparation (1-9 Credits)
LING 805 - Topics in Linguistics (3 Credits)
Topics selected by the instructor for specialized study. May be repeated as topics vary.

LING 806 - Directed Reading and Research (1-3 Credits)

LING 820 - Seminar in Syntax (3 Credits)
Advanced exploration in syntactic theory, involving either cross-theoretical examination of specific linguistic phenomena or in-depth study of a particular theoretical model.

LING 830 - Seminar in Historical Linguistics (3 Credits)
Special topics in historical and comparative linguistics, such as historical phonology or syntax, Indo-European linguistics, and comparative Germanic or Romance linguistics.

LING 840 - Seminar in Language Variation (3 Credits)
Current theories relevant to specialized consideration of the social functions of linguistic choices at any level of analysis; variation as a reflection of region and social group membership or interpersonal relationships.

LING 890 - Seminar in Language Acquisition (3 Credits)
Special topics in the acquisition of language such as first language acquisition of English or other languages, cross-linguistic effects on acquisition, or issues in acquisition theory.

LING 891 - Seminar in English for Speakers of Other Languages (ESOL) (3 Credits)
Special topics in teaching English to speakers of other languages (ESOL), such as materials design, program design and evaluation, or teaching a particular language skill.

LING 899 - Dissertation Preparation (1-12 Credits)

Management (MGMT)

MGMT 590 - Special Topics in Management (3 Credits)
Current topics, issues and practices in various areas of Management. Course may be repeated up to four (4) times as content varies by title.

MGMT 701 - Human Resources and the Global Firm (3 Credits)
An analysis of human resources practices viewed from a comparative, cross-national perspective and the perspective of a multinational enterprise.

MGMT 718 - Management of Human Resources (3 Credits)
The processes inherent in effective management of the organization's human resources. Topics include: employee selection, training, and development; design of compensation and reward systems; applied motivation models; and current issues in the management of human resources.

MGMT 719 - Management of Compensation (3 Credits)
Examines the techniques, policies, processes, strategies, and practices used by companies, managers, and individuals to effectively and efficiently motivate behavior via rewards.
Prerequisites: MGMT 701.

MGMT 720 - Staffing (3 Credits)
Topics in staffing on a rotating basis among job analysis, recruitment, test validation, selection systems, and other subjects.
Prerequisites: MGMT 701.

MGMT 721 - Employment Relations Law (3 Credits)
The law of employment relations. Policy and practice in areas such as equal employment, wages and hours, employee health and safety, pensions, and labor relations.

MGMT 722 - Labor Relations (3 Credits)
An analysis of some of the major problems faced by managers in their dealings with organizations representing employees. Primary emphasis is on the negotiation of labor agreements and the handling of problems arising under them. The public policy aspect of these problems is also considered.

MGMT 723 - Employee Responsibilities and Rights (3 Credits)
Rights of employees in relation to their employers that arise from individual and collective agreements. Employee discipline and justice. Grievance procedures and their administration, including labor arbitration.

MGMT 724 - American Labor Unions (3 Credits)
The nature, structure, and development of the labor union in the United States. Topics covered include labor history, structure of the labor movement, union governance, the law of unions, and problems of the labor movement.

MGMT 725 - Human Resource Metrics and Research (3 Credits)
Applied data analysis and research methods in human resources. Emphasis on research design, analytic strategies, measurement of human resource variables and outcomes, and presentation of written and oral information.

MGMT 726 - Human Resource and Business Strategy (3 Credits)
Capstone course for master's students in human resources. Integration of course work through analysis of current management issues and the use of case analysis and business simulations.
Prerequisites: MGMT 701.

MGMT 727 - Internship or Practicum in Human Resources (6 Credits)
Field experience in human resources. Includes a report analyzing the experience.

MGMT 728 - Teams and Teamwork Management (3 Credits)
When to use teams; how to design and implement team structures and motivate and lead team members; team decision making, conflict resolution, and other team processes.

MGMT 729 - Managing Cross-border Teams (3 Credits)
How the presence of members from multiple national cultures and multiple national locations affect the functioning of teams within the multinational corporation.
Prerequisites: DMSB 714 or IBUS 700 or MGMT 770 or MGMT 799.

Cross-listed course: IBUS 717

MGMT 730 - Consulting and Organizational Development in MNCs (3 Credits)
Restructuring and transformation initiatives within multinational organizations as internal consultants and/or change agents.
Prerequisites: DMSB 711 or IBUS 700 or MGMT 797 or MGMT 799.

Cross-listed course: IBUS 718

MGMT 731 - Negotiations (3 Credits)
Negotiations analysis, thinking, and communication; alignment between negotiation objectives and strategies; negotiation skills.

MGMT 732 - Learning with Leaders (3 Credits)
Experiential learning with successful business leaders; diagnosis of specific contexts and issues of leadership within these contexts; integration and comparison of leadership across contexts.

MGMT 733 - Strategic Management of Technology and Innovation (3 Credits)
Understanding and managing innovation, both sustaining and disruptive; creating new capabilities in new entrepreneurial firms or large corporations.
MGMT 735 - Mergers and Acquisitions (3 Credits)
Mergers and acquisitions in international and domestic settings: effects of strategic, financial, legal, accounting, and human resource factors.

MGMT 737 - Human Resources Experiential Project (3 Credits)
Provides an applied Human Resources experiential project where students work under close faculty supervision to solve real-world business challenges using applied research and analytical skills.

Prerequisites: MGMT 725.

MGMT 750 - Finance for Human Resource Professionals (3 Credits)
Fundamentals of analysis and decision-making in financial management for human resource professionals.

MGMT 770 - Competing Through People (3 Credits)
Development of an understanding of behavioral concepts necessary for effective production management of organizations. Current literature, case studies, and other simulations to demonstrate applicability of concepts. Concepts studies include perception, motivation, leadership, and intergroup conflict.

MGMT 771 - Organization Theory and Design (3 Credits)
A study of the nature of organizations, their design, their structure, their processes, as well as problems inherent in organizations (e.g., coordination, conflict, communications, power usage, politics).

MGMT 772 - Employee and Leadership Development (3 Credits)
Examination of methods of employee development and leadership development with an emphasis given to program design, management and evaluation.

MGMT 773 - Business Policy (3 Credits)
Policy formulation and decision-making in organizations. The interrelationships of functional areas within the organization, the application of management skills and processes to integrate these areas, and the impact of factors external to the organization are examined with a view toward the attainment of organizational goals.

Prerequisites: MKTG 751, FINA 760, MGMT 770, and MGSC 791.

MGMT 774 - The Firm and Its Environment (3 Credits)
The forces which influence and constrain decision and actions within the individual firm. Consideration of these forces as features of the existing legal, social, and ethical environments. Specific topics include the legal system and public policy, social organization, moral and ethical standards, public opinion, the social responsibility of the firm, and conception within the firm of its role in society, and the interaction of these forces with economic forces.

Prerequisites: ECON 720.

MGMT 775 - Competitive Strategy Analysis (3 Credits)
A study of the techniques used in industry analysis and in the strategic posturing of a firm within its competitive environment.

Prerequisites: MKTG 751 and FINA 760.

MGMT 776 - Strategic Planning (3 Credits)
An evaluation of the conceptual and analytical foundations associated with the management function of planning.

MGMT 777 - Innovation and New Venture Analysis (3 Credits)
Examines the principles, tools, and techniques necessary to conceptualize and initiate a new business entity.

Prerequisites: MKTG 751.

Prerequisite or Corequisite: FINA 760.

MGMT 778 - Small Business Management (3 Credits)
An examination of problems involved in the organization and management of a small business, including an analysis of legal forms, location, product market determination, production, and other operating conditions.

MGMT 779 - Personnel and Employment Relations (3 Credits)
Orientation to the field of personnel and employment relations. Also provides training in communications and computer skills needed in managing human resources.

MGMT 780 - Entrepreneurial Finance and the Dynamics of Emerging Ventures (3 Credits)
Exploration of the funding and financial management of emerging ventures, including sources and structure of capital, financial levers to drive performance and metrics to monitor performance, and the study of how to impact, capture, quantify and realize value.

Cross-listed course: FINA 780

MGMT 782 - Managing Careers in Organizations (3 Credits)
Chronological view of career development issues, from initial vocational and job choice decisions through retirement. Short-run and long-term consequences of individual and organizational career development strategies.

MGMT 790 - Business Research and Reports (3 Credits)
Research tools, techniques, and sources are utilized in the development of both analytical ability and facility in communication.

MGMT 820 - Foundations of Management Theory (3 Credits)
Emphasis on development of understanding the history of management theory and examination of current interpretations of these concepts.

MGMT 821 - Doctoral Seminar in the Behavioral Sciences I (3 Credits)
Study of major theoretical and methodological issues in organizational behavior with emphasis on developing conceptual models and implementing research designs.

MGMT 822 - Doctoral Seminar in the Behavioral Sciences II (3 Credits)
Exploration of current specialized topics in organizational behavior with emphasis on synthesizing research, developing conceptual models, and implementing research designs.

MGMT 823 - Current Topics in the Organization Sciences (3 Credits)
An advanced seminar focusing upon reading, synthesis, and critical evaluation of current research in business and management.

Prerequisites: MGMT 821 or MGMT 822.

MGMT 824 - Doctoral Seminar in Human Resource Management I (3 Credits)
Theories and research in human resource management.

MGMT 825 - Doctoral Seminar in Human Resource Management II (3 Credits)
Advanced theories and research in human resource management.

MGMT 828 - Seminar in Entrepreneurship (3 Credits)
Theories and research in entrepreneurship, emphasizing strategic management framework in integrating diverse treatments of the entrepreneur, new ventures, and corporate innovation.

Prerequisites: MGMT 878.

MGMT 871 - Organization Theory (3 Credits)
An evaluation of theories of organization, with particular emphasis on business applications. Approaches to a conceptual framework include decision theory, sociological and behavioral theories. Various models are evaluated in an attempt to build a framework for analysis of organizations.
MGMT 872 - Seminar in Management Research Methodology (3 Credits)
Research methods and techniques for translation of management theory and practical problems into testable propositions.
Prerequisites: MGSC 882.

MGMT 878 - Seminar in Strategy Formulation (3 Credits)
Investigates the theoretical and empirical evidence regarding strategies aimed at creating and sustaining competitive superiority in business firms and the strategy formation process.

MGMT 879 - Seminar in Strategy Implementation (3 Credits)
Continuation of MGMT 878, with emphasis on strategy implementation.
Prerequisites: MGMT 878.

MGMT 882 - Advanced Statistics for Business I (3 Credits)
The development and application of advanced statistical methods to problems in business. Topics include application of estimation and hypothesis testing in both univariate and multivariate cases.
Cross-listed course: MGSC 882

MGMT 892 - Advanced Statistics for Business II (3 Credits)
The structure and analysis of experimental and research designs with applications to business problems.
Prerequisites: MGMT 882 or equivalent.

Management Science (MGSC)

MGSC 520 - Forecasting and Time Series (3 Credits)
Time series analysis and forecasting using the multiple regression and Box-Jenkins approaches.
Prerequisites: MGSC 292 or STAT 516.

Cross-listed course: STAT 520

MGSC 525 - Statistical Quality Control (3 Credits)
Statistical procedures for process control including CUSUM and Shewhart Control Charts, and lot acceptance sampling.
Prerequisites: MGSC 292 or STAT 509 or STAT 515.

Cross-listed course: STAT 525

MGSC 590 - E-Commerce Concepts and Research Topics (3 Credits)
Social, technological, commercial, marketing, and political implications of current and impending trends in E-Commerce.
Prerequisites: MGSC 390.

MGSC 591 - Simulation of Business Systems (3 Credits)
Theory and design of business simulation experiments, development and use of computer simulation models, and analysis of data generated by computer simulation experiments.
Prerequisites: MGSC 291.

MGSC 592 - Analysis of Decisions Under Uncertainty (3 Credits)
Theory and practice of making decisions in an environment of uncertainty; development of skill in the assessment of preferences and probability distributions.
Prerequisites: MGSC 291.

MGSC 594 - Strategic Management of Information Systems (3 Credits)
Strategic management and use of information systems in organizations.
Cross-listed course: CSCE 594

MGSC 596 - Database Management for Business (3 Credits)
Technology overview and principles of database design for business applications. Enterprise database administration and planning. Design exercises and projects using the latest database management systems software.

MGSC 690 - Quantitative Foundations for Business and Economics I (3 Credits)
Calculus and classical optimization methods applied to problems in business and economic analysis; matrices, derivatives, and integrals in the analysis of both univariate and multivariate business and economic models. 03: 07/05/2019.

MGSC 691 - Quantitative Foundations for Business and Economics II (3 Credits)
Statistics and probability theory applied to problems of business and economic analysis. 03: 07/05/2019.
Prerequisites: MGSC 690 or ECON 690.

MGSC 692 - Quantitative Methods I (3 Credits)
Probability and statistics necessary for graduate study in economics and business administration; estimation, hypothesis testing, regression, analysis of variance, and nonparametric methods. 03: 07/05/2019.

MGSC 694 - Quantitative Methods II (3 Credits)
Decision models useful in business and economics; linear programming, sensitivity analysis and duality, network models, integer programming, dynamic programming, inventory and queuing, and simulation. 03: 07/05/2019.
Prerequisites: MGSC 692 or equivalent.

MGSC 703 - Computers in Business Administration and Economics (1-3 Credits)
Introduction to data processing concepts suitable for research interests in business and economics. Topics include research databases, statistical packages, and communication networks.

MGSC 711 - Quantitative Methods in Business (3 Credits)
Quantitative procedures used to make informed business decisions. The course focuses on the application of descriptive statistics, probability, interval estimates, hypothesis testing, and regression to management problems. Restricted to business students.

MGSC 717 - Global Sourcing: Strategies and Applications (3 Credits)
This course covers skills necessary to pursue sourcing and related careers in manufacturing, services, retailing, and government agencies, including discussion of cutting-edge negotiation and sourcing strategies pursued by exemplar firms.
Prerequisites: DMSB 718 or MGSC 791.

MGSC 772 - Project Management (3 Credits)
Management of projects including justification, planning, scheduling, monitoring, controlling, and auditing. Makes extensive use of project management information systems.

MGSC 776 - Supply Chain Modeling (3 Credits)
Study of the issues, principles, tools and decision processes involved in designing and effectively managing a supply chain. The course entails analyzing and developing models on various topics such as inventory management, transportation, network design and planning, and supply chain coordination.
Prerequisites: DMSB 718 or MGSC 791.
MGSC 777  - Advanced Quantitative Methods in Business (3 Credits)
Practical applications of statistical, optimization, heuristic, simulation, and other quantitative techniques for analyzing problems of contemporary business interest in the areas of manufacturing, services, and supply chain management.
**Prerequisites:** DMSB 718 or MGSC 791.

MGSC 778   - Revenue Management (3 Credits)
Concepts of forecasting demand, segmenting customers and allocating capacity or customizing price offers to distinct customer segments to maximize profits.

MGSC 779  - Innovation and Design (3 Credits)
Creation and launch of viable businesses using innovation tournaments. Development of problem solving and design skills. Application to real innovation and entrepreneurial hurdles.

MGSC 789  - Business Process Analysis, Design, and Implementation (3 Credits)
Study of the concepts, tools and issues associated with analyzing and improving modern business processes including quality management, process control, systems and technologies for process support, and case studies.

MGSC 790  - Data Resource Management (3 Credits)
Overview of data resource management, including database technology and design, information architecture planning, and database administration. A design project is required.

MGSC 791  - Operations Management (3 Credits)
Survey of production or operations functions of organizations. Development of concepts and decision processes relevant to major problem areas. Emphasizes relevance of operations management in both manufacturing and service organizations.
**Prerequisites:** MGSC 694, ACCT 729, and ECON 720.

MGSC 793  - Simulation Methods in Business Systems (3 Credits)
Advanced theory and design of business simulation programs and validation and statistical analysis of model output.
**Prerequisites:** MGSC 692, MGSC 694.

MGSC 794  - Programming Methods (3 Credits)
Mathematical programming techniques which are useful in business and economics. Topics include: solution techniques and applications of linear programming, duality theory, parametric programming, the decomposition problem, integer programming, dynamic programming, Lagrange multipliers, Kuhn-Tucker theory, and an introduction to control theory. 03: 07/05/2019.
**Prerequisites:** MGSC 694.

MGSC 795  - Econometrics and Regression I (3 Credits)
A treatment of single equation estimating techniques for the simple linear model, various nonlinear models, and the general linear model. 03: 07/05/2019.
**Prerequisites:** MGSC 882.

MGSC 796  - Information Systems (3 Credits)
The study of the integration of functional area and company-wide information components considering both internal and external information flows.

MGSC 797  - Sampling Techniques (3 Credits)
Statistical designs and techniques for survey investigations. Mathematical development of sampling systems; sampling units; sample size; estimation; costs; non-sampling problems. Methods of obtaining and reporting information. 03: 07/05/2019.
**Prerequisites:** MGSC 692 or equivalent.

MGSC 798  - Strategic Information Management (3 Credits)
Impacts of information and the information processing industry on the management of organizations; methods for managing information resources in support of competitive strategies.
**Prerequisites:** MGSC 796.

MGSC 799  - Telecommunications (3 Credits)
Technological concepts and techniques applied in video, data, and voice communications. Topics include local area networks, wide area networks, standards, management, and cost issues involved in telecommunications.
**Prerequisites:** MGSC 796.

MGSC 874  - Operations Strategy and Productive Systems Design (3 Credits)
Development and implementation of productive operations strategy and its relation to the overall organizational strategy; particular attention is given to the interface between product and process technology.
**Prerequisites:** MGSC 791.

MGSC 875  - Supply Chain Coordination and Control (3 Credits)
Design and management of systems that coordinate information and material flows within and between firms in a supply chain. Addresses planning basics, system alternatives, and advanced value stream synchronization.
**Prerequisites:** DMSB 718 or MGSC 791.

MGSC 880  - Advanced Statistics for Business I (3 Credits)
The development and application of advanced statistical methods to problems in business and economics. Topics include application of estimation and hypothesis testing in both univariate and multivariate cases.
**Cross-listed course:** MGMT 882

MGSC 883  - Design of Advanced Business Information Structures (3 Credits)
A study of data structures and file management with specific attention to applied business problems. Special emphasis is placed on the structure and management of information for management decision-making systems.
**Prerequisites:** CSCE 205 and CSCE 500.

MGSC 890  - Telecommunications (3 Credits)
Technological concepts and techniques applied in video, data, and voice communications. Topics include local area networks, wide area networks, standards, management, and cost issues involved in telecommunications.
**Prerequisites:** MGSC 796.

MGSC 892  - Advanced Statistics for Business II (3 Credits)
The structure and analysis of experimental and research designs with applications to business and economic problems.
**Prerequisites:** MGSC 882/ MGMT 882 or equivalent.
MGSC 894 - Advanced Topics in Management Science (3 Credits)
Topics will be selected from: nonlinear programming, stochastic programming, integer programming, spectral analysis, decision theory, Markov processes, Box-Jenkins methods, management information systems. 03: 07/05/2019.
Prerequisites: MGSC 694.

MGSC 895 - Econometrics and Regression II (3 Credits)
Topics in generalized least squares, autocorrelation, distributed lag models, principle components, identification, and simultaneous estimating techniques. 03: 07/05/2019.
Prerequisites: MGSC 795.

MGSC 896 - Intelligent Information Systems Design for Business Decision Making (3 Credits)
Selection, design, and application of a wide range of decision support systems and knowledge-based information technologies for supporting effective managerial decision making.

MGSC 897 - Global Supply Chain Operations Management: Graduate Capstone Consulting Project (4 Credits)
This course entails a live project under faculty supervision in which student teams apply GSCOM concepts and techniques to solve practical significant problems and opportunities in real-world service and manufacturing firms.

MGSC 898 - Management of Technology and Innovation (3 Credits)
The role of product and process innovation in competitiveness, intellectual property rights, organizing the technical effort, and techniques to enhance and pace technology development.
Prerequisites: MKTG 751 and MGSC 791.

Marine Science (MSCI)

MSCI 501 - Principles of Geomorphology (3 Credits)
The process of earth denudation with emphasis on chemistry of weathering, stream and erosion hydraulics, quantitative analysis of land form evolution.
Prerequisites: GEOL 101 and GEOL 102.
Cross-listed course: GEOL 501

MSCI 502 - Principles of Coastal Geomorphology (4 Credits)
Geological and physical controls on the morphology, development, and stability of coastlines. Analysis of waves and erosional processes, and coastal zone morphodynamics. Several required field trips.
Prerequisite or Corequisite: MATH 122 or MATH 141.
Cross-listed course: GEOL 502

MSCI 503 - Environmental Microbiology (3 Credits)
An overview of the microbial world including a survey of the distribution, functioning, and diversity of microorganisms in natural systems. Discusses the crucial roles that microorganisms play in ecosystem function, biogeochemical cycles, and environmental quality.
Prerequisites: MSCI 102 or BIOL 102, CHEM 112.
Cross-listed course: BIOL 502

MSCI 505 - Senior Seminar (1 Credit)

MSCI 509 - MATLAB-Based Data Analysis in Ocean Sciences (3 Credits)
MATLAB-based course in processing, analysis, and visualization of large oceanographic data sets. Includes scalar and vector time series measured at fixed locations as well as shipboard surveys of oceanographic characteristics varying both in 3-D and in time. Methods and techniques are relevant to other geoscience disciplines.
Prerequisites: MATH 141.

MSCI 510 - Invertebrate Zoology (4 Credits)
Phylogenetic and comparative aspects of anatomy, physiology, reproduction, and embryology of the invertebrates. Three lecture and one three-hour laboratory period per week.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 510
Graduation with Leadership Distinction: GLD: Research

MSCI 511 - Advanced Paleontology (3 Credits)
Systematic, ecologic, biogeographic, and evolutionary aspects of paleontology. Lectures, practical exercises, occasional field trips.
Prerequisites: GEOL 311.
Cross-listed course: GEOL 511

MSCI 515 - Marine Micropaleontology (4 Credits)
Marine microfossils; distribution, ecology, paleoecology, and biostratigraphy; use of microfossils in marine sediments to study oceanographic history. Three lectures and two laboratory hours per week.
Cross-listed course: GEOL 515

MSCI 521 - Introduction to Geochemistry (3 Credits)
Investigation of low temperature chemical reactions controlling the geochemistry of the earth’s surface. Emphasis on CO2, carbonates, oxidation reduction, thermodynamics, isotopes, biogeochemistry.
Cross-listed course: GEOL 521

MSCI 524 - Environmental Radioisotope Geochemistry (3 Credits)
Introduction to radioactivity and the use of radionuclides to study environmental processes, including age-dating and biogeochemical cycling in aquatic systems. Two lectures per week.
Prerequisites: CHEM 111, CHEM 112, MATH 141.

MSCI 525 - Marine Plants (4 Credits)
Diversity, distribution, physiology, ecology, evolution, and economic importance of marine algal, seagrass, and mangrove communities. Three lecture and three laboratory hours per week. Scheduled field trips are required.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 525

MSCI 535 - Fishery Management (3 Credits)
Management and conservation of aquatic and marine resources, with emphasis on fisheries. Data procurement and analysis; commercial and recreational fisheries; sociological, political, legal, and environmental factors that affect fishery management; and fish biodiversity.
Prerequisites: BIOL 301.
Cross-listed course: BIOL 535
MSCI 536 - Ichthyology (4 Credits)
Phylogeny, morphology, behavior, and ecology of fishes. Three lecture and 3 laboratory hours plus three field trips to be arranged.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 536
Graduation with Leadership Distinction: GLD: Research

MSCI 537 - Aquaculture (3 Credits)
Introduction to the practical and scientific aspects of the commercial culture of freshwater and marine organisms. Three lecture hours per week. One all-day field trip required.
Prerequisites: BIOL 301 or MSCI 311.

MSCI 538 - Behavior of Marine Organisms (4 Credits)
The identification of behavioral adaptations of estuarine and marine organisms: their ecology, physiology, development, and evolutionary history; field observations.
Prerequisites: BIOL 101 and BIOL 102 or MSCI 311.

Cross-listed course: BIOL 538
Graduation with Leadership Distinction: GLD: Research

MSCI 545 - Geological Oceanography (3 Credits)
A comprehensive study of the origin and development of the major structural features of the ocean basins and the continental margins. Discussion of the techniques used in obtaining geologic data and the interpretation of sedimentary processes, vulcanism, and the stratigraphy of the ocean basins.
Cross-listed course: GEOL 545

MSCI 550 - Sedimentary Simulations and Sequence Stratigraphy (4 Credits)
Problems of sequence stratigraphy resolved with graphic computer simulations. Sedimentary fill of basins by carbonates and/or clastics tracked as a function of rate of sediment accumulation, tectonic behavior and sea level. Includes laboratory.
Prerequisites: GEOL 301.

Cross-listed course: GEOL 550

MSCI 552 - Population Genetics (3 Credits)
An introduction to the principles of population genetics, with emphasis on the origin, maintenance, and significance of genetic variation in natural populations.
Prerequisites: BIOL 301, MSCI 311, and BIOL 303.

Cross-listed course: BIOL 552
Graduation with Leadership Distinction: GLD: Research

MSCI 553 - Marine Sediments (3 Credits)
Marine sedimentary environments; physical/biological factors which control the formation and distribution of modern marine sediments.
Prerequisites: GEOL 516.

Cross-listed course: GEOL 553

MSCI 555 - Conservation and Health in Marine Systems (3 Credits)
Introduces the field of conservation and explores the intersection between conservation and environmental health with a particular focus on coastal and marine case studies.
Prerequisites: MSCI 311 or equivalent.

Cross-listed course: GEOL 555

MSCI 557 - Coastal Processes (3 Credits)
Physical and geological processes controlling the formation and evolution of beach, barrier, and nearshore environments, including discussion of coastal management issues.
Cross-listed course: GEOL 557

MSCI 558 - Introduction to Micrometeorology (3 Credits)
Small-scale processes in the atmospheric boundary layers, including energy budget, radiation, soil heat transfer, humidity, viscous flows, turbulence, momentum and heat exchanges, evaporation, and marine atmospheric boundary layer.
Prerequisites: PHYS 201 and MATH 141.

Cross-listed course: GEOL 558

MSCI 564 - Marine Conservation Biology (3 Credits)
Exploration of how human activities affect marine natural populations, species, communities and ecosystems, including threats to biodiversity, approaches to marine conservation; and ecological and evolutionary responses to anthropogenic disturbance.
Prerequisites: BIOL 301.

Cross-listed course: BIOL 564

MSCI 566 - Ecosystem Analysis (3 Credits)
The formulation and simulation of compartment models of marine and terrestrial ecosystems with complex nutrient cycling, food chains, and energy flow. Analog and digital simulation techniques. Ecosystem stability and sensitivity. Organization, structure, and diversity of an ecosystem.

MSCI 568 - Air-Sea Interaction (3 Credits)
The physical mechanism responsible for interaction between the ocean and the atmosphere and the influence of air-sea interaction on atmospheric and oceanic dynamics and thermodynamics on a wide variety of spatial/temporal scales.
Cross-listed course: GEOL 568
MSCI 580 - Satellite Oceanography (3 Credits)
This course provides knowledge of various techniques used in satellite remote sensing of the oceans. Key skills will be developed in satellite data processing, image analysis, and hands-on research.
Cross-listed course: GEOL 580

MSCI 581 - Estuarine Oceanography (3 Credits)
Estuarine kinematics and dynamics; classification of estuaries; estuarine circulation and mixing. Scheduled field trips are required.
Prerequisites: MSCI 314.
Cross-listed course: GEOL 581

MSCI 582 - Marine Hydrodynamics (3 Credits)
Basic principles of fluid statics and dynamics. Conservation of mass, momentum, and energy; viscosity, vorticity, and boundary layers with examples from the marine environment. Applications to and analysis of ocean currents and waves.
Prerequisites: differential equations, PHYS 201 or PHYS 211.
Cross-listed course: GEOL 582

MSCI 583 - Geology and Geochemistry of Salt Marshes (3 Credits)
Geological and geochemical processes in salt marshes. Methods of geological research in marshes including instrumental techniques, sampling design, and data analysis. Two lectures per week plus four weekends of project oriented fieldwork and/or equivalent lab work. Scheduled field trips are required.
Cross-listed course: GEOL 583

MSCI 585 - Coastal Tropical Oceanography (4 Credits)
Descriptive oceanography of mangrove and coral reef coasts with emphasis on physical processes. Taught as an extended field experience with daily lectures and guided research activities.
Prerequisites: MSCI 312.

MSCI 590 - Beach-Dune Interactions (3 Credits)
Influence of wind on coastal systems, with emphasis on nearshore currents, sediment transport and bedforms, aeolian transport, and dunes. Minimum Junior standing required.
Cross-listed course: GEOG 590

MSCI 599 - Topics in Marine Science (1-3 Credits)
Current developments in marine science selected to meet faculty and student interests. Course content varies and will be announced by title in schedule of courses.

MSCI 624 - Aquatic Chemistry (3 Credits)
Study of the chemical reactions and processes affecting the distribution of chemical species in natural systems. Three lecture hours per week.
Prerequisite or Corequisite: CHEM 321, MATH 142.
Cross-listed course: CHEM 624

MSCI 627 - Marine Phytoplankton (3 Credits)
Examines the physiology and ecology of phytoplankton, including environmental controls on community composition, primary productivity, and detection and characterization of water quality (eutrophication) and harmful algal blooms.
Prerequisites: MSCI 102 or MSCI 450 or BIOL 450.
Cross-listed course: BIOL 627

MSCI 711 - Paleoclimatology (3 Credits)
An overview of Earth's climate history during Cenozoic. Emphasis will be placed on Pleistocene glacial-interglacial climate variability and understanding the proxies used to reconstruct past climate changes.
Cross-listed course: GEOL 711

MSCI 716 - Eustasy and Global Variations in Sequence Stratigraphy (3 Credits)
Relationship of sequence stratigraphy to sea level variations, tectonics and sedimentation. Construction and analyses of paleogeographic maps, regional cross-sections, and chronostratigraphic charts.
Cross-listed course: GEOL 716

MSCI 717 - Organic Geochemistry (3 Credits)
Sources, transport, and fate of organic matter in natural environments including soils, riverine, estuarine, coastal and open ocean sediments and waters.
Prerequisites: GEOL 521/MSCI 521.
Cross-listed course: GEOL 717

MSCI 750 - Advanced Biological Oceanography (3 Credits)
Three lecture hours per week.
Prerequisites: BIOL 450/MSCI 450.

MSCI 752 - Marine Biogeochemistry (3 Credits)
Biological, geological, and physical processes that influence the cyling of major bioactive elements (C, O, N, P, S) in marine waters and sediments.
Cross-listed course: BIOL 752

MSCI 754 - Oceanographic Techniques (1 Credit)

MSCI 755 - Marine Conservation and Environmental Health (3 Credits)
Explores the intersection between conservation and environmental health with a particular focus on coastal and marine case studies.

MSCI 758 - Special Topics in Marine Sciences (1-3 Credits)

MSCI 767 - Ecological Modeling and Environmental Planning (4 Credits)
Concepts in systems of models and computer simulations in examining environmental interactions, predicting environmental impact, and facilitating the process of environmental planning. Lab practice in analog and digital simulation and data interpretation.
Prerequisites: MATH 121 or equivalent, ecology, ENHS 660.
Cross-listed course: BIOL 768, ENHS 767

MSCI 769 - Reproductive Ecology (3 Credits)
Theoretical aspects and examples of the variety of reproductive and life history patterns found in animals and plants as adaptations to various environmental constraints. Three lecture hours per week.
Prerequisites: BIOL 570.
Cross-listed course: BIOL 769

MSCI 777 - Current Topics in Marine Ecology for Teachers (3 Credits)

MSCI 778 - Current Topics in Marine Ecology for Teachers (3 Credits)

MSCI 781 - Physical Oceanography (3 Credits)
Geographic and hydrodynamic aspects of oceanography, with emphasis on estuaries. Physical properties of sea water and theories and methods involved in ocean currents, air-sea interaction, waves, and tides.
Cross-listed course: GEOL 781

MSCI 782 - Chemical Oceanography (3 Credits)
Chemical characteristics of sea water, distribution of properties, and chemical processes in the oceans, with emphasis on estuaries.
Cross-listed course: GEOL 782
MSCI 783 - Oceanographic Time Series Analysis (3 Credits)
Techniques in the analysis of oceanographic data sequences, including filtering techniques, fast Fourier transformers, and empirical orthogonal functions.

Cross-listed course: GEOL 783

MSCI 784 - Geophysical Fluid Dynamics (3 Credits)
Equations governing the large-scale dynamics of the atmosphere and ocean, rotational influence, shallow water equations, vorticity, quasigeostrophic dynamics, Rossby waves, energy and enstrophy, and geostrophic turbulence.

Prerequisites: MATH 241 or ECIV 360 or GEOL 582/MSCI 582 or GEOL 781/MSCI 781.

Cross-listed course: GEOL 784

MSCI 785 - Atmospheric Dynamics (3 Credits)
Elementary applications of the basic equations, scale analysis, planetary boundary layer, atmospheric oscillations, synoptic and mesoscale systems, hydrodynamic instability, cyclogenesis, frontogenesis, energy cycle, momentum budget, and tropical motion systems.

Cross-listed course: GEOL 785

MSCI 790 - Directed Individual Studies in Marine Sciences (1-6 Credits)
Directed research topics to be individually assigned and supervised by graduate faculty.

MSCI 795 - Issues in Coastal Environmental Health (3 Credits)
Problems associated with coastal population growth and development. Emphasis is on the working group approach to ameliorating impacts on ecosystem and human health. 03: 07/05/2019.

MSCI 798 - Research in Marine Science (1-9 Credits)
In depth research methods and techniques in preparation of thesis or dissertation.

MSCI 799 - Thesis Preparation (1-9 Credits)

MSCI 800 - Marine Science Seminar (0 Credits)
Advanced topics in Marine Science research presented in Seminar format. Class meets weekly, every semester, during the Marine Science Program seminar.

MSCI 899 - Dissertation Preparation (1-12 Credits)

Marketing (MKTG)

MKTG 701 - Marketing Management (3 Credits)
Marketing function with emphasis on the procedures and techniques for analyzing, planning, and implementing marketing strategies and tactics related to product, pricing, communication, and distribution decisions.

MKTG 702 - Marketing Research (3 Credits)
Research methodology as applied to marketing problems; includes research problem definition, sample design, data collection procedures, valid and reliable measurement, data analysis techniques, and sales forecasting fundamentals.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 703 - Marketing Planning (3 Credits)
Tools and techniques for creating marketing plans.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 704 - Consumer Behavior (3 Credits)
Concepts, theories, and techniques applicable to obtaining a sophisticated understanding of consumer motives, attitudes, decision-making processes, and satisfaction determinants.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 705 - Marketing Communications (3 Credits)
Advertising, sales promotions, marketing-oriented public relations, event and sponsorship marketing, point-of-purchase communications, and other aspects of integrated marketing communications.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 706 - Sales and Sales Management (3 Credits)
The role and activities of sales in marketing, including concepts, practices, and procedures of sales force management.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 707 - Product and Branding Policies (3 Credits)
Product line and portfolio planning, stage-gate approach to new product development, product launch and product life cycle management, and branding strategies and procedures.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 708 - Customer Relationship Management and Data Mining (3 Credits)
Techniques, procedures, and software applications for database marketing, managing customer relations, and mining large databases.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 709 - Internet Marketing (3 Credits)
The Internet as both a marketing channel and communication medium, including E-commerce from a marketing perspective.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 710 - Strategic Marketing (3 Credits)
An integrative treatment of the role of marketing in strategic problem solving.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 712 - Topics in Marketing Thought and Practice (3 Credits)
Readings and research on selected topics in marketing. Course content varies and will be announced in the schedule of classes by title.

Prerequisites: MKTG 701 or DMSB 716.

MKTG 713 - Managing Customer Satisfaction (3 Credits)
This course explores the importance of customer satisfaction in today's marketplace and the challenges of designing and implementing an actual customer satisfaction measurement process.

Prerequisites: MKTG 710 or DMSB 716.

MKTG 715 - Pricing Strategy and Analysis (3 Credits)
Economics and behavioral foundations of pricing strategy formulation and implementation.

Prerequisites: MKTG 701 or DMSB 716 or equivalent.

MKTG 716 - Listening to the Voice of the Market (3 Credits)
Building competencies that help managers acquire knowledge from clients and apply it in ways that enhance openness in building strategic responses.

Prerequisites: DMSB 716 or MKTG 701.

MKTG 717 - Fundamentals of Marketing Analytics (3 Credits)
The critical thinking, statistical tools, and marketing application of business analytics.

Prerequisites: DMSB 716 or MKTG 701 and DMSB 712 or MGSC 711.
MKTG 718 - Social and Digital Media Strategies for Businesses (3 Credits)
Develop a social and digital media plan/solution to present to a client. Business enterprises and even non-business organizations are demanding new marketing hires and their marketing agencies have an acute understanding of how to develop and utilize online and social media as part of their integrated marketing plans. Both business-to-consumer and business-to-business enterprises are migrating to social media as a primary form of communication with customers and partners.
Prerequisites: DMSB 716 and MKTG 701.

MKTG 719 - Business to Business Marketing (3 Credits)
Identifying, developing, communicating and commercializing a value proposition between businesses in the form of a product or service.
Prerequisites: DMSB 716 or MKTG 701.

MKTG 720 - Sales: Process, People and Performance (3 Credits)
Examines and explores the Sales function within the modern organization. In addition to addressing the practical and classic sales issues of alignment, structure, performance and development, the course will also review the technologies and trends that are changing the commercial landscape and causing the fast evolution of the sales function.
Prerequisites: DMSB 716 or MKTG 701.

MKTG 725 - Marketing Consulting Project (3 Credits)
Develop successful marketing strategies using data, research, and analysis to create impactful strategies for real business clients. Businesses and recruiters are increasingly demanding experience handling practical problems faced by a marketing manager from our MBA students. In this elective course, the students get that experience.
Prerequisites: MKTG 701.

MKTG 850 - Research Methods and Philosophies in Marketing (3 Credits)
Doctoral seminar covering research methods and philosophies that underpin knowledge generation in marketing.

MKTG 851 - Concepts and Theories in Consumer Research (3 Credits)
Doctoral seminar exploring concepts, theories, and research methods relevant to understanding consumer behavior.

MKTG 852 - Current Topics in Consumer Research (3 Credits)
Doctoral seminar involving intensive study and criticism of the current consumer research literature.
Prerequisites: MKTG 851.

MKTG 853 - Analytic Techniques for Marketing Decision Making (3 Credits)
Doctoral seminar investigating contemporary analytic techniques for testing marketing theories.

MKTG 854 - Latent Variable Estimation Techniques (3 Credits)
Doctoral seminar examining covariance structure methods for developing measures of unobservable constructs and testing structural models.

MKTG 855 - Conceptualization in Marketing (3 Credits)
A directed project for marketing Ph.D. students requiring literature synthesis of a selected topical area and formulation of original concepts and theoretical propositions.

MKTG 856 - Empirical Testing of Theoretical Propositions in Marketing (3 Credits)
A directed project for marketing Ph.D. students requiring an empirical investigation and testing of theoretical propositions.

MKTG 857 - Marketing Models (3 Credits)
Doctoral seminar covering advances in marketing science models, including brand choice, product development, media choice, and other models.
Prerequisites: MGSC 882.

MKTG 858 - Seminar in Marketing Strategy I (3 Credits)
Doctoral seminar investigating emerging paradigms and theory regarding the role of marketing within the firm and the effects of marketing mix variables on consumer behavior and firm performance.

MKTG 859 - Seminar in Marketing Strategy II (3 Credits)
Theoretical foundations of marketing strategy.

Mathematics (MATH)

MATH 511 - Probability (3 Credits)
Probability and independence; discrete and continuous random variables; joint, marginal, and conditional densities, moment generating functions; laws of large numbers; binomial, Poisson, gamma, univariate, and bivariate normal distributions.
Prerequisites: C or better in MATH 241.
Corequisite: MATH 241.

Cross-listed course: STAT 511

MATH 514 - Financial Mathematics I (3 Credits)
Prerequisites: C or better in MATH 241.

Cross-listed course: STAT 522

MATH 515 - Financial Mathematics II (3 Credits)
Prerequisites: C or better in MATH 514 or STAT 522.

Cross-listed course: STAT 523

MATH 520 - Ordinary Differential Equations (3 Credits)
Differential equations of the first order, linear systems of ordinary differential equations, elementary qualitative properties of nonlinear systems.
Prerequisites: C or better in MATH 344 or MATH 544.

MATH 521 - Boundary Value Problems and Partial Differential Equations (3 Credits)
Laplace transforms, two-point boundary value problems and Green’s functions, boundary value problems in partial differential equations, eigenfunction expansions and separation of variables, transform methods for solving PDE’s, Green’s functions for PDE’s, and the method of characteristics.
Prerequisites: C or better in MATH 520 or in both MATH 241 and MATH 242.
MATH 522 - Wavelets (3 Credits)
Basic principles and methods of Fourier transforms, wavelets, and multiresolution analysis; applications to differential equations, data compression, and signal and image processing; development of numerical algorithms. Computer implementation.
Prerequisites: C or better in MATH 344 or MATH 544.

MATH 523 - Mathematical Modeling of Population Biology (3 Credits)
Applications of differential and difference equations and linear algebra modeling the dynamics of populations, with emphasis on stability and oscillation. Critical analysis of current publications with computer simulation of models.
Prerequisites: C or better in MATH 142, BIOL 301, or MSCI 311 recommended.

MATH 524 - Nonlinear Optimization (3 Credits)
Descent methods, conjugate direction methods, and Quasi-Newton algorithms for unconstrained optimization; globally convergent hybrid algorithm; primal, penalty, and barrier methods for constrained optimization. Computer implementation of algorithms.
Prerequisites: C or better in MATH 241 and one of MATH 344 or MATH 544.

MATH 525 - Mathematical Game Theory (3 Credits)
Two-person zero-sum games, minimax theorem, utility theory, n-person games, market games, stability.
Prerequisites: C or better in MATH 544 or in both MATH 300 and MATH 344.

MATH 526 - Numerical Linear Algebra (4 Credits)
Matrix algebra, Gauss elimination, iterative methods; overdetermined systems and least squares; eigenvalues, eigenvectors; numerical software. Computer implementation. Credit may not be received for both MATH 526 and MATH 544. Three lectures and one laboratory hour per week.
Prerequisites: C or better in MATH 142.

MATH 527 - Numerical Analysis (3 Credits)
Interpolation and approximation of functions; solution of algebraic equations; numerical differentiation and integration; numerical solutions of ordinary differential equations and boundary value problems; computer implementation of algorithms.
Prerequisites: C or better in MATH 520 or in both MATH 242 and MATH 344.

Cross-listed course: CSCE 561

MATH 528 - Mathematical Foundation of Data Science and Machine Learning (3 Credits)
Unconstrained and constrained optimization, gradient descent methods for numerical optimization, supervised and unsupervised learning, various reduced order methods, sampling and inference, Monte Carlo methods, deep neural networks.
Prerequisites: C or better in MATH 344 or MATH 544.

MATH 531 - Foundations of Geometry (3 Credits)
The study of geometry as a logical system based upon postulates and undefined terms. The fundamental concepts and relations of Euclidean geometry developed rigorously on the basis of a set of postulates. Some topics from non-Euclidean geometry.
Prerequisites: C or better in MATH 300.

MATH 532 - Modern Geometry (3 Credits)
Projective geometry, theorem of Desargues, conics, transformation theory, affine geometry, Euclidean geometry, non-Euclidean geometries, and topology.
Prerequisites: C or better in MATH 300.

MATH 533 - Elementary Geometric Topology (3 Credits)
Topology of the line, plane, and space, Jordan curve theorem, Brouwer fixed point theorem, Euler characteristic of polyhedra, orientable and non-orientable surfaces, classification of surfaces, network topology.
Prerequisites: C or better in MATH 241 and MATH 300.

MATH 534 - Elements of General Topology (3 Credits)
Elementary properties of sets, functions, spaces, maps, separation axioms, compactness, completeness, convergence, connectedness, path connectedness, embedding and extension theorems, metric spaces, and compactification.
Prerequisites: C or better in MATH 241 and MATH 300.

MATH 540 - Modern Applied Algebra (3 Credits)
Finite structures useful in applied areas. Binary relations, Boolean algebras, applications to optimization, and realization of finite state machines.
Prerequisites: MATH 300.

MATH 541 - Algebraic Coding Theory (3 Credits)
Error-correcting codes, polynomial rings, cyclic codes, finite fields, BCH codes.
Prerequisites: C or better in MATH 544 or in both MATH 300 and MATH 344.

MATH 544 - Linear Algebra (3 Credits)
Vectors, vector spaces, and subspaces; geometry of finite dimensional Euclidean space; linear transformations; eigenvalues and eigenvectors; diagonalization. Throughout there will be an emphasis on theoretical concepts, logic, and methods. MATH 544L is an optional laboratory course where additional applications will be discussed.
Prerequisites: C or better in MATH 241 and MATH 300.

MATH 544L - Linear Algebra Lab (1 Credit)
Computer-based applications of linear algebra for mathematics students. Topics include numerical analysis of matrices, direct and indirect methods for solving linear systems, and least squares method (regression). Typical applications include theoretical and practical issues related to discrete Markov processes, image compression, and linear programming. Credit not allowed for both MATH 344L and 544L.
Prerequisite or Corequisite: C or better or concurrent enrollment in MATH 544.

MATH 546 - Algebraic Structures I (3 Credits)
Permutation groups; abstract groups; introduction to algebraic structures through study of subgroups, quotient groups, homomorphisms, isomorphisms, direct product; decompositions; introduction to rings and fields.
Prerequisites: C or better in MATH 544.

MATH 547 - Algebraic Structures II (3 Credits)
Rings, ideals, polynomial rings, unique factorization domains; structure of finite groups; topics from: fields, field extensions, Euclidean constructions, modules over principal ideal domains (canonical forms).
Prerequisites: C or better in MATH 546.
MATH 548 - Geometry, Algebra, and Algorithms (3 Credits)
Polynomials and affine space, Grobner bases, elimination theory, varieties, and computer algebra systems.
Prerequisites: C or better in MATH 300 and in one of MATH 344 or MATH 544.

MATH 550 - Vector Analysis (3 Credits)
Vector fields, line and path integrals, orientation and parametrization of lines and surfaces, change of variables and Jacobians, oriented surface integrals, theorems of Green, Gauss, and Stokes; introduction to tensor analysis.
Prerequisites: C or better in MATH 241.

MATH 551 - Introduction to Differential Geometry (3 Credits)
Parametrized curves, regular curves and surfaces, change of parameters, tangent planes, the differential of a map, the Gauss map, first and second fundamental forms, vector fields, geodesics, and the exponential map.
Prerequisites: C or better in MATH 241 and MATH 300.

MATH 552 - Applied Complex Variables (3 Credits)
Complex integration, calculus of residues, conformal mapping, Taylor and Laurent Series expansions, applications.
Prerequisites: C or better in MATH 241.

MATH 554 - Analysis I (3 Credits)
Least upper bound axiom, the real numbers, compactness, sequences, continuity, uniform continuity, differentiation, Riemann integral and fundamental theorem of calculus.
Prerequisites: C or better in MATH 300 and either at least one of MATH 511, MATH 520, MATH 534, MATH 550, or MATH 552.

MATH 555 - Analysis II (3 Credits)
Riemann-Stieltjes integral, infinite series, sequences and series of functions, uniform convergence, Weierstrass approximation theorem, selected topics from Fourier series or Lebesgue integration.
Prerequisites: C or better in MATH 554.

MATH 561 - Introduction to Mathematical Logic (3 Credits)
Syntax and semantics of formal languages; sentential logic, proofs in first order logic; Godel's completeness theorem; compactness theorem and applications; cardinals and ordinals; the Lowenheim-Skolem-Tarski theorem; Beth's definability theorem; effectively computable functions; Godel's incompleteness theorem; undecidable theories.
Prerequisites: C or better in MATH 300.

MATH 562 - Theory of Computation (3 Credits)
Basic theoretical principles of computing as modeled by formal languages and automata; computability and computational complexity.
Prerequisites: C or better in CSCE 350 or MATH 300.

MATH 565 - Modern Algebra for Teachers (3 Credits)
Selected topics from group theory, ring theory, field theory, and linear algebra.
Prerequisites: C or better in MATH 300.

MATH 567 - Discrete Mathematics I (3 Credits)
Mathematical models; mathematical reasoning; enumeration; induction and recursion; tree structures; networks and graphs; analysis of algorithms.
Prerequisites: C or better in MATH 300.

MATH 568 - Discrete Mathematics II (3 Credits)
A continuation of MATH 567. Inversion formulas; Polya counting; combinatorial designs; minimax theorems; probabilistic methods; Ramsey theory; other topics.
Prerequisites: C or better in MATH 567.

MATH 569 - Combinatorial Game Theory (3 Credits)
Winning in certain combinatorial games such as Nim, Hackenbush, and Domineering. Equalities and inequalities among games, Sprague-Grundy theory of impartial games, games which are numbers.
Prerequisites: C or better in MATH 300 or MATH 374.

MATH 570 - Discrete Optimization (3 Credits)
Discrete mathematical models. Applications to such problems as resource allocation and transportation. Topics include linear programming, integer programming, network analysis, and dynamic programming.
Prerequisites: C or better in MATH 300 and in one of MATH 544 or MATH 344.
MATH 700 - Linear Algebra (3 Credits)
Vector spaces, linear transformations, dual spaces, decompositions of spaces, and canonical forms. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 701 - Algebra I (3 Credits)
Algebraic structures, sub-structures, products, homomorphisms, and quotient structures of groups, rings, and modules. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 701I - Foundations of Algebra I (3 Credits)
An introduction to algebraic structures; group theory including subgroups, quotient groups, homomorphisms, isomorphisms, decomposition; introduction to rings and fields. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 241 or equivalent.

MATH 702 - Algebra II (3 Credits)
Fields and field extensions. Galois theory, topics from, transcendental field extensions, algebraically closed fields, finite fields. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 701.

MATH 702I - Foundations of Algebra II (3 Credits)
Theory of rings including ideals, polynomial rings, and unique factorization domains; structure of finite groups; fields; modules. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 701I or equivalent.

MATH 703 - Analysis I (3 Credits)

Prerequisites: MATH 241 or equivalent.

MATH 703I - Foundations of Analysis I (3 Credits)
The real numbers and least upper bound axiom; sequences and limits of sequences; infinite series; continuity; differentiation; the Riemann integral. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 241 or equivalent.

MATH 704 - Analysis II (3 Credits)

MATH 704I - Foundations of Analysis II (3 Credits)
Sequences and series of functions; power series, uniform convergence; interchange of limits; limits and continuity in several variables. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 703I or equivalent.

MATH 705 - Analysis III (3 Credits)
Signed and complex measures, Radon-Nikodym theorem, decomposition theorems. Metric spaces and topology, Baire category, Stone-Weierstrass theorem, Arzela-Ascoli theorem. Introduction to Banach and Hilbert spaces, Riesz representation theorems. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 703, MATH 704.

MATH 708 - Foundations of Computational Mathematics I (3 Credits)
Approximation of functions by algebraic polynomials, splines, and trigonometric polynomials; numerical differentiation; numerical integration; orthogonal polynomials and Gaussian quadrature; numerical solution of nonlinear systems, unconstrained optimization. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 554 or equivalent upper level undergraduate course in Real Analysis.

MATH 709 - Foundations of Computational Mathematics II (3 Credits)
Vectors and matrices; QR factorization; conditioning and stability; solving systems of equations; eigenvalue/eigenvector problems; Krylov subspace iterative methods; singular value decomposition. Includes theoretical development of concepts and practical algorithm implementation. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: MATH 544 or MATH 526, or equivalent upper level undergraduate courses in Linear Algebra.

MATH 710 - Probability Theory I (3 Credits)
Probability spaces, random variables and distributions, expectations, characteristic functions, laws of large numbers, and the central limit theorem. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Prerequisites: STAT 511, STAT 512, or MATH 703.

Cross-listed course: STAT 810

MATH 711 - Probability Theory II (3 Credits)
More about distributions, limit theorems, Poisson approximations, conditioning, martingales, and random walks. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

Cross-listed course: STAT 811

MATH 721 - Probability and Statistics (3 Credits)
This course will include a study of permutations and combinations; probability and its application to statistical inferences; elementary descriptive statistics of a sample of measurements; the binomial, Poisson, and normal distributions; correlation and regression. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
MATH 720 - Applied Mathematics I (3 Credits)
Modeling and solution techniques for differential and integral equations from sciences and engineering, including a study of boundary and initial value problems, integral equations, and eigenvalue problems using transform techniques, Green's functions, and variational principles. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 555 and MATH 520 or equivalent.

MATH 721 - Applied Mathematics II (3 Credits)
Foundations of approximation of functions by Fourier series in Hilbert space; fundamental PDEs in mathematical physics; fundamental equations for continua; integral and differential operators in Hilbert spaces. Basic modeling theory and solution techniques for stochastic differential equations. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 720.

MATH 722 - Numerical Optimization (3 Credits)
Topics in optimization; includes linear programming, integer programming, gradient methods, least squares techniques, and discussion of existing mathematical software. Graduate standing or consent of the department. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 723 - Differential Equations (3 Credits)
Elliptic equations: fundamental solutions, maximum principles, Green's function, energy method and Dirichlet principle; Sobolev spaces: weak derivatives, extension and trace theorems; weak solutions and Fredholm alternative, regularity, eigenvalues and eigenfunctions. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 703/MATH 704.

MATH 724 - Differential Equations II (3 Credits)
Detailed study of the following topics: method of characteristics; Hamilton-Jacobi equations; conservation laws; heat equation; wave equation; linear parabolic equations; linear hyperbolic equations. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 723.

MATH 725 - Approximation Theory (3 Credits)
Approximation of functions; existence, uniqueness and characterization of best approximants; Chebyshev's theorem; Chebyshev polynomials; degree of approximation; Jackson and Bernstein theorems; B-splines; approximation by splines; quasi-interpolants; spline interpolation. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisite or Corequisite: MATH 703.

MATH 726 - Numerical Differential Equations I (3 Credits)
Elliptic equations: fundamental solutions, maximum principles, Green's function, energy method and Dirichlet principle; Sobolev spaces: weak derivatives, extension and trace theorems; weak solutions and Fredholm alternative, regularity, eigenvalues and eigenfunctions. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 708/MATH 709.

MATH 727 - Numerical Differential Equations II (3 Credits)
Ritz and Galerkin weak formulation. Finite element, mixed finite element, collocation methods for elliptic, parabolic, and hyperbolic PDEs, including development, implementation, stability, consistency, convergence analysis, and error estimates.
Prerequisites: MATH 726.

MATH 728 - Selected Topics in Applied Mathematics (3 Credits)
All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 729 - Nonlinear Approximation (3 Credits)
Nonlinear approximation from piecewise polynomial (spline) functions in the univariate and multivariate case, characterization of the approximation spaces via Besov spaces and interpolation, Newman's and Popov's theorems for rational approximation, characterization of the approximation spaces of rational approximation, nonlinear n-term approximation from bases in Hilbert spaces and from unconditional bases in Lp (p>1), greedy algorithms, application of nonlinear approximation to image compression.
Prerequisites: MATH 703.

MATH 730 - General Topology I (3 Credits)
Topological spaces, filters, compact spaces, connected spaces, uniform spaces, complete spaces, topological groups, function spaces. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 731 - General Topology II (3 Credits)
Topological spaces, filters, compact spaces, connected spaces, uniform spaces, complete spaces, topological groups, function spaces. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 732 - Algebraic Topology I (3 Credits)
The fundamental group, homological algebra, simplicial complexes, homology and cohomology groups, cup-product, triangulable spaces. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 733 - Algebraic Topology II (3 Credits)
The fundamental group, homological algebra, simplicial complexes, homology and cohomology groups, cup-product, triangulable spaces. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 734 - Differential Geometry (3 Credits)
Differentiable manifolds; classical theory of surfaces and hypersurfaces in Euclidean space; tensors, forms and integration of forms; connections and covariant differentiation; Riemannian manifolds; geodesics and the exponential map; curvature; Jacobi fields and comparison theorems, generalized Gauss-Bonnet theorem. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
MATH 735 - Lie Groups (3 Credits)
Manifolds; topological groups, coverings and covering groups; Lie groups and their Lie algebras; closed subgroups of Lie groups; automorphism groups and representations; elementary theory of Lie algebras; simply connected Lie groups; semisimple Lie groups and their Lie algebras. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 705 or MATH 730.

MATH 736I - Modern Geometry (3 Credits)
Synthetic and analytic projective geometry, homothetic transformations, Euclidean geometry, non-Euclidean geometries, and topology. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 241 or equivalent.

MATH 737 - Introduction to Complex Geometry (3 Credits)
Algebraic geometry over the complex numbers, using ideas from topology, complex variable theory, and differential geometry.
Prerequisite or Corequisite: MATH 701.

MATH 738 - Selected Topics in Geometry and Topology (3 Credits)
Course content varies and will be announced in the schedule of classes by title. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 739 - Introduction to Complex Geometry II (3 Credits)
Algebraic geometry over the complex numbers, using ideas from topology, complex variable theory, and differential geometry.
Prerequisites: MATH 737.

MATH 740 - Algebra III (3 Credits)
Theory of groups, rings, modules, fields and division rings, bilinear forms, advanced topics in matrix theory, and homological techniques.
Prerequisites: MATH 702.

MATH 741 - Representation Theory (3 Credits)
Representation and character theory of finite groups (especially the symmetric group) and/or the general linear group, Young tableaux, the Littlewood Richardson rule, and Schur functors.
Prerequisites: MATH 702.

MATH 742 - Lattice Theory (3 Credits)
Sublattices, homomorphisms and direct products of lattices; freely generated lattices; modular lattices and projective geometries; the Priestley and Stone dualities for distributive and Boolean lattices; congruence relations on lattices. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 740.

MATH 744 - Matrix Theory (3 Credits)
Extremal properties of positive definite and hermitian matrices, doubly stochastic matrices, totally non-negative matrices, eigenvalue monotonicity, Hadamard-Fisher determinantal inequalities. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 700.

MATH 746 - Commutative Algebra (3 Credits)
Prime spectrum and Zariski topology; finite, integral, and flat extensions; dimension; depth; homological techniques, normal and regular rings. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 701.

MATH 747 - Algebraic Geometry (3 Credits)
Properties of affine and projective varieties defined over algebraically closed fields, rational mappings, birational geometry and divisors especially on curves and surfaces, Bezout's theorem, Riemann-Roch theorem for curves. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 701.

MATH 748 - Selected Topics in Algebra (3 Credits)
Course content varies and will be announced in the schedule of classes by title. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 750 - Fourier Analysis (3 Credits)
The Fourier transform on the circle and line, convergence of Fejer means; Parseval's relation and the square summable theory, convergence and divergence at a point; conjugate Fourier series, the conjugate function and the Hilbert transform, the Hardy-Littlewood maximal operator and Hardy spaces. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 703 and MATH 704.

MATH 751 - The Mathematical Theory of Wavelets (3 Credits)
The L1 and L2 theory of the Fourier transform on the line, bandlimited functions and the Paley-Weiner theorem, Shannon-Whittacker Sampling Theorem, Riesz systems, Mallat-Meyer multiresolution analysis in Lebesgue spaces, scaling functions, wavelet constructions, wavelet representation and unconditional bases, nonlinear approximation, Riesz's factorization lemma, and Daubechies' compactly supported wavelets.
Prerequisites: MATH 703.

MATH 752 - Complex Analysis (3 Credits)
Normal families, meromorphic functions, Weierstrass product theorem, conformal maps and the Riemann mapping theorem, analytic continuation and Riemann surfaces, harmonic and subharmonic functions. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 703, MATH 704.

MATH 752I - Complex Variables (3 Credits)
Properties of analytic functions, complex integration, calculus of residues, Taylor and Laurent series expansions, conformal mappings. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 241 or equivalent.

MATH 754 - Several Complex Variables (3 Credits)
Properties of holomorphic functions of several variables, holomorphic mappings, plurisubharmonic functions, domains of convergence of power series, domains of holomorphy and pseudoconvex domains, harmonic analysis in several variables. All Non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 703 and MATH 704.
MATH 755 - Applied Functional Analysis (3 Credits)
Banach spaces, Hilbert spaces, spectral theory of bounded linear operators, Fredholm alternatives, integral equations, fixed point theorems with applications, least square approximation. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 703.

MATH 756 - Functional Analysis I (3 Credits)
Linear topological spaces; Hahn-Banach theorem; closed graph theorem; uniform boundedness principle; operator theory, spectral theory; topics from linear differential operators or Banach algebras. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 704.

MATH 757 - Functional Analysis II (3 Credits)
Linear topological spaces; Hahn-Banach theorem; closed graph theorem; uniform boundedness principle; operator theory, spectral theory; topics from linear differential operators or Banach algebras. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 704.

MATH 758 - Selected Topics in Analysis (3 Credits)
Course content varies and will be announced in the schedule of classes by title. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 760 - Set Theory (3 Credits)
An axiomatic development of set theory: sets and classes; recursive definitions and inductive proofs; the axiom of choice and its consequences; ordinals; infinite cardinal arithmetic; combinatorial set theory. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 761 - The Theory of Computable Functions (3 Credits)
Models of computation; recursive functions, random access machines, Turing machines, and Markov algorithms; Church's Thesis; universal machines and recursively unsolvable problems; recursively enumerable sets; the recursion theorem; the undecidability of elementary arithmetic. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 762 - Model Theory (3 Credits)
First order predicate calculus; elementary theories; models, satisfaction, and truth; the completeness, compactness, and omitting types theorems; countable models of complete theories; elementary extensions; interpolation and definability; preservation theorems; ultraproducts. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 768 - Selected Topics in Foundations of Mathematics (3 Credits)
Course content varies and will be announced in the schedule of classes by title. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 770 - Discrete Optimization (3 Credits)
The application and analysis of algorithms for linear programming problems, including the simplex algorithm, algorithms and complexity, network flows, and shortest path algorithms. No computer programming experience required. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 774 - Discrete Mathematics I (3 Credits)
An introduction to the theory and applications of discrete mathematics. Topics include enumeration techniques, combinatorial identities, matching theory, basic graph theory, and combinatorial designs. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 775 - Discrete Mathematics II (3 Credits)
A continuation of MATH 774. Additional topics will be selected from: the structure and extremal properties of partially ordered sets, matroids, combinatorial algorithms, matrices of zeros and ones, and coding theory. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 776 - Graph Theory I (3 Credits)
The study of the structure and extremal properties of graphs, including Eulerian and Hamiltonian paths, connectivity, trees, Ramsey theory, graph coloring, and graph algorithms. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 777 - Graph Theory II (3 Credits)
Continuation of MATH 776. Additional topics will be selected from: reconstruction problems, independence, genus, hypergraphs, perfect graphs, interval representations, and graph-theoretical models. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 778 - Selected Topics in Discrete Mathematics (3 Credits)
Course content varies and will be announced in the schedule of classes by title. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 780 - Elementary Number Theory (3 Credits)
Diophantine equations, distribution of primes, factoring algorithms, higher power reciprocity, Schnirelmann density, and sieve methods. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 780I - Theory of Numbers (3 Credits)
Elementary properties of integers, Diophantine equations, prime numbers, arithmetic functions, congruences, and the quadratic reciprocity law. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 782 - Analytic Number Theory I (3 Credits)
The prime number theorem, Dirichlet's theorem, the Riemann zeta function, Dirichlet's L-functions, exponential sums, Dirichlet series, Hardy-Littlewood method partitions, and Waring's problem. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 783 - Analytic Number Theory II (3 Credits)
The prime number theorem, Dirichlet's theorem, the Riemann zeta function, Dirichlet's L-functions, exponential sums, Dirichlet series, Hardy-Littlewood method partitions, and Waring's problem. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
MATH 784 - Algebraic Number Theory (3 Credits)
Algebraic integers, unique factorization of ideals, the ideal class group, Dirichlet's unit theorem, application to Diophantine equations. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 546 and MATH 580.

MATH 785 - Transcendental Number Theory (3 Credits)
Thue-Siegel-Roth theorem, Hilbert's seventh problem, diophantine approximation. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.
Prerequisites: MATH 580.

MATH 788 - Selected Topics in Number Theory (3 Credits)
Course content varies and will be announced in the schedule of classes by title. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 790 - Graduate Seminar (1 Credit)
Although this course is required of all candidates for the master's degree it is not included in the total credit hours in the master's program. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 791 - Mathematics Pedagogy I (0-1 Credits)
First of two required math pedagogy courses for graduate assistants in the department. Pedagogical topics include assessment theory, discourse, theory, lesson planning, and classroom management. Applications assist graduate students with syllabusnessessment creation, teacher questioning, midcourse evaluations, and student learning and engagement. This course will replace the University's requirement for GRAD 701. Restricted to Mathematics graduate students teaching at some capacity.
Prerequisites: Satisfactory grade in MATH 791.

MATH 792 - Mathematics Pedagogy II (0-1 Credits)
Second of two required math pedagogy courses for graduate assistants in the department. Pedagogical topics include student-learning and reflection theories, sociomathematical norms, and constructivism. Applications assist graduates with lesson/revision/reflection, student-centered investigations, curriculum problem solving and metacognition. This course will replace the University's requirement for GRAD 701. Restricted to Mathematics graduate students teaching at some capacity.
Prerequisites: MATH 791.

MATH 797 - Mathematics into Print (3 Credits)
The exposition of advanced mathematics emphasizing the organization of proofs and the formulation of concepts; computer typesetting systems for producing mathematical theses, books, and articles.

MATH 798 - Directed Readings and Research (1-6 Credits)
Full admission to graduate study in mathematics. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 799 - Thesis Preparation (1-9 Credits)
For master's candidates. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 890 - Graduate Seminar (1-3 Credits)
A review of current literature in specified subject areas involving student presentations. Content varies and will be announced in the schedule of classes by title. Minimum of 3 credit hours required of all doctoral students. All non-degree students should request permission to register from the Graduate Director in the Mathematics Department.

MATH 899 - Dissertation Preparation (1-12 Credits)
For doctoral candidates.

MBAD - Master Busn Admin Prog (MBAD)

MBAD 701 - Business Simulation and Case Competition (3 Credits)
Intensive preparation for computer simulation and case competition. Designed to integrate the major functional activities of an organization through case analysis. Teamwork, oral and written communications are emphasized. May be repeated once.

MBAD 702 - Strategic Management (3 Credits)
A course designed to integrate the student's knowledge of accounting, economics, finance, marketing, production, and international environment for the analysis of management problems. Oral and written communications are emphasized using the case method. For final year M.B.A. students.

MBIM - Microblgy & Immunology (MBIM)

MBIM 700 - Topics in Advanced Immunology (2 Credits)
Cutting-edge topics in immunology. Pass-Fail grading.
Prerequisites: cell biology or immunology course.

MBIM 710 - Basic and Clinical Immunobiology (3 Credits)
Imune system components, their functions and interactions. Immune system dysregulation and consequences as related to health and disease. Consideration of current topics of interest in immunology. Four lecture hours per week.
Prerequisites: cell/ molecular biology or 1 semester of Biochemistry.

MBIM 710L - Laboratory in Advanced Immunobiology (2 Credits)
Exercises and experiments on isolation, purification, and characterization of antibodies, lymphocytes, and macrophages and their involvement in immunologic reactions and interactions. Two three-hour laboratories per week.
Prerequisite or Corequisite: MBIM 710.

MBIM 711 - Advances in Biologically-based Complementary and Alternative Medicine (2 Credits)
Introduction of topics and discussion of cutting-edge research in the area of biologically-based Complementary and Alternative Medicine with special emphasis on immunological aspects of treatment and prevention of disease.

MBIM 720 - Comprehensive Microbiology (6 Credits)
Fundamental and clinical principles of microbiology and immunity as they relate to bacteria, viruses, fungi, and parasites. Major areas include immune system (organismic, cellular, and molecular levels), host-parasite interactions and infectious diseases (morphology, biology, and epidemiology). Lectures, conferences, and laboratories. Equivalent to MBIM 650 except there are no labs. Conferences devoted to literature reviews in basic microbiology and immunology.

MBIM 730 - Frontiers in Biomedical Sciences (3 Credits)
Concepts and molecular mechanisms of programmed cell death (PCD) or apoptosis, gene therapy, stem cells, and cell signaling.
Prerequisites: BS or MS degree.
MCBA 739 - Medical Bacteriology (3 Credits)
Description of bacterial structure and metabolism. How infectious agents cause disease, are identified and treated with chemotherapeutic agents. Comparison of diversity of host-pathogen interactions.

MCBA 740 - Virology (3 Credits)
Description of viral structure, chemical composition, and replication; new concepts of the role of viruses in genetics, immunity, and cancer, as well as in acute and chronic infections. Three lecture hours per week.
Prerequisites: minimum of one semester of biochemistry.

MCBA 757 - Special Topics in Microbiology and Immunology (2 Credits)
An intensive consideration of topics of current interest in microbiology and immunology. Course content varies by subject and title, but may not be repeated.

MCBA 780 - Research in Microbiology and Immunology (1-6 Credits)
A non-thesis course to provide training in laboratory techniques in specific areas of microbiology and immunology.

MCBA 790 - Independent Study (1-3 Credits)
Provides graduate students with an opportunity to develop their own course work in conjunction with the instruction. Contract approved by Instructor, Advisor and Department Chair or Graduate Director.

MCBA 801 - Seminar in Microbiology and Immunology (1-2 Credits)

MCBA 899 - Dissertation Preparation (1-12 Credits)

MCBA - Cell Biol & Anatomy (MCBA)

MCBA 700 - Principles of Electron Microscopy (4 Credits)
The overall objectives of this course are to demonstrate to students (1) the use of electron microscopy and related histochemical techniques in studying the disease process at the cellular level and (2) the use of electron microscopy as ancillary instrumentatiion in interdisciplinary medical research. Lectures (two hours per week) would cover current methods of sample preparations and examinations of tissue by transmission electron microscopy, scanning electron microscopy, electron diffraction, and freeze-fracture. Laboratory (6 hours per week) would involve individual sessions with the course director in relation to the individual's specific research problem.

MCBA 701 - Human Embryology and Gross Anatomy (8 Credits)
Gross morphology of the human body; names, relationships, and basic functions of body structures through original cadaver dissection observation supplemented by the use of texts, lectures, clinical correlations, radiographs, and informal discussion in groups.

MCBA 702 - Human Microscopic Anatomy (6 Credits)
Lecture and laboratory devoted to light microscopic and ultrastructural features of human cells, tissues, and organs. The correlations between structure and function are emphasized as well as the intimate relation of microscopic anatomy to biochemistry, physiology, and pathology.

MCBA 710 - Special Topics in Gross Anatomy (3 Credits)
Advanced study of one region of the body with special emphasis on detailed anatomy, normal variation, surgical procedures, original research, embryology, and teaching methods. Content varies by title and may be repeated a maximum of two times.
Prerequisites: ANAT 701.

MCBA 715 - Cardiovascular Embryology (1-3 Credits)
Advanced study of the essential features of human development, clarifying the gross anatomical features and giving emphasis to recent advances in human embryology. The clinical importance of embryology and the etiology of congenital defects are noted.
Prerequisites: ANAT 701.

MCBA 720 - Special Topics in Microscopic Anatomy (1-3 Credits)
Advanced study of selected topics in microscopic anatomy. Content varies by title and may be repeated a maximum of two times.

MCBA 740 - Biological Microscopic Imaging (3 Credits)
Sample preparation and equipment use for electron, light and confocal, and live-cell microscopy. Cell sorting and image analysis will be covered.

MCBA 741 - Molecular Imaging Methods of Biomedical Research (3 Credits)
Imaging technologies used in the analysis of cells, tissues, organs, and animals through a variety of molecular biology techniques.

MCBA 742 - Biological Micro Imaging II (3 Credits)
Advanced scanning and transmission electron microscopy techniques, electron tomography, digital imaging, 2 dimensional and 3 dimensional image analysis, 3 dimensional ultrastructure data set reconstruction. Enrollment restricted to 15 students.

MCBA 743 - Molecular Imaging Methods in Biomedical Research II (3 Credits)
Cell culture techniques, RNA and DNA isolation, PCR reactions, Gene Sequencing, Micro-array Technology. Enrollment restricted to 15 students.

MCBA 750 - Mammalian Reproductive Biology (4 Credits)
Mammalian reproductive systems at organismic, cellular, and molecular levels. Emphases on the structural, functional, and developmental aspects of the hypothalamus, pituitary gland, testis, and ovaries.
Prerequisites: BIOL 717, BMSC 702.

MCBA 761 - Advanced Reproductive Neuroendocrinology (3 Credits)
An intensive consideration of topics of current interest in the neuroendocrine control of reproduction. Student presentation and small group discussion formats.
Prerequisites: MCBA 750.

MCBA 762 - Advanced Male Reproductive Biology (3 Credits)
An intensive consideration of topics of current interest in male reproduction. Student presentation and small group discussion formats.
Prerequisites: MCBA 750.

MCBA 763 - Advanced Female Reproductive Biology (3 Credits)
An intensive consideration of topics of current interest in female reproduction. Student presentation and small group discussion formats.
Prerequisites: MCBA 750.

MCBA 764 - Research in Reproductive Biology (1-12 Credits)
Mentored independent laboratory research.

MCBA 780 - Research in Anatomy (1-10 Credits)

MCBA 899 - Dissertation Preparation (1-12 Credits)
Mechanical Engineering (EMCH)

EMCH 501 - Engineering Analysis I (3 Credits)
Engineering applications of solution techniques for ordinary and partial differential equations, including Sturm-Liouville theory, special functions, transform techniques, and numerical methods.
Prerequisites: MATH 242.

EMCH 502 - Engineering Analysis II (3 Credits)
Engineering applications of optimization methods, calculus of variations including approximate methods, and probability concepts.
Prerequisites: MATH 242.

EMCH 507 - Computer-Aided Design (3 Credits)
Solid modeling using commercial computer-aided design (CAD) applications package to reverse engineer-manufactured parts. Analytical curves and surfaces, transformation matrices, assembly modeling, and computer tools for analyzing parts and mechanisms.
Prerequisites: EMCH 201, EMCH 327.

EMCH 508 - Finite Element Analysis in Mechanical Engineering (3 Credits)
Prerequisites: EMCH 201, EMCH 327.

EMCH 509 - Computer-Aided Manufacturing (3 Credits)
Optimizing computer-controlled machining processes, programmable logic controllers (PLCs), motion control of servomechanisms, CNC machining practices and programming, and robotics.
Prerequisites: D or better in MATH 241.

EMCH 516 - Control Theory in Mechanical Engineering (3 Credits)
An introduction to closed-loop control systems; development of concepts, including transfer function, feedback, frequency response, and system stability by examples taken from mechanical engineering practice; control system design methods.
Prerequisites: MATH 242, EMCH 330.

EMCH 520 - Technology Planning (3 Credits)
Assessment of technological needs in the organization; coupling research and development to production; selection and evaluation of the technical project/program; technical planning, resource allocation, direction, and control; effective use and development of the engineering staff; the process of and barriers to technological change; technology, values, and policy. Senior or graduate standing.

EMCH 521 - Concurrent Engineering (3 Credits)
A systematic approach to the mechanical design of products, requiring the concurrent design of all related processes.
Prerequisites: EMCH 327.

EMCH 522 - Design for Manufacture and Assembly (3 Credits)
Product design principles for early consideration of issues to shorten product development time and to ensure smooth transition to manufacturing, thus accelerating time-to-market.
Prerequisites: EMCH 327 and EMCH 377.

EMCH 527 - Design of Mechanical Systems (3 Credits)
Summary of mechanical design, project management, product liability and the law, intellectual property ethics and professionalism.
Prerequisites: EMCH 327.

EMCH 528 - Product Safety Engineering (3 Credits)
Design considerations and methodologies for products to ensure adequate safeguards for the prevention of accidents, failures, and injuries. Senior standing.

EMCH 529 - Sustainable Design and Development (3 Credits)
System design and development accomplished with consideration of environmental/ecological, economic, and social constraints. Students will be introduced to sustainable design and accomplish a design project. Senior standing.

EMCH 530 - Introduction to Engineering Optimization (3 Credits)
Mathematical formulation of an optimum design problem, introduction to optimum design concepts and multidisciplinary design optimization. Use of mathematical programming methods for unconstrained and constrained minimization for engineering design optimization.
Prerequisites: C or better in MATH 142, Graduate standing.

EMCH 532 - Intermediate Dynamics (3 Credits)
Kinematics and dynamics of particles and rigid bodies using Newtonian mechanics. Work/energy, impulse/momentum, 3-D motion.
Prerequisites: EMCH 332.

EMCH 535 - Robotics in Mechanical Engineering (3 Credits)
Overview of robotics in practice and research: forward and inverse kinematics, statics and dynamics, trajectory generation, control, vision, and motion planning.
Prerequisites: EMCH 332.

EMCH 544 - Compressible Fluid Flow (3 Credits)
Application of the conservation laws of a compressible fluid to isentropic flows, flow with friction, and flows with heating or cooling. Shock and expansion waves. Nozzle and diffuser design.
Prerequisites: EMCH 354.

EMCH 550 - Introduction to Nuclear Safeguards (3 Credits)
International nuclear non-proliferation programs and activities, proliferation risk assessment, and nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues.
Prerequisites: CHEM 112, CHEM 112L, PHYS 212, PHYS 212L, MATH 241, MATH 242.

EMCH 551 - Nuclear Energy in the Hydrogen Economy (3 Credits)
The current role of nuclear energy in the US and global energy mix will be described and the potential for future growth will be surveyed, particularly in the development of the hydrogen economy.
Prerequisites: EMCH 354.

EMCH 552 - Introduction to Nuclear Engineering (3 Credits)
Radioactivity and nuclear reactions; steady state and transient nuclear reactor theory.

EMCH 553 - Nuclear Fuel Cycles (3 Credits)
Processing of nuclear fuel including fabrication, irradiation, and waste disposal or storage. In-core and out-of-core fuel management. Fuel cycle economics.
Prerequisites: EMCH 552.

EMCH 554 - Intermediate Heat Transfer (3 Credits)
Radiant heat exchange, combined modes of heat transfer, computer techniques in heat transfer analysis and design, environmental heat transfer.
Prerequisites: EMCH 354.
EMCH 555 - Instrumentation for Nuclear Engineering (3 Credits)
Basic operational principles of radiation detection and nuclear instrumentation systems. Selection of the proper detector to measure radiation. Statistical analysis of results.
Prerequisite or Corequisite: EMCH 552 or PHYS 511.

EMCH 555L - Nuclear Instrumentation Laboratory (1 Credit)
Use of nuclear radiation detection and instrumentation systems and computers. Data acquisition and analysis.
Corequisite: EMCH 555.

EMCH 556 - Introduction to Risk Analysis and Reactor Safety (3 Credits)
An introduction to probabilistic risk assessment (PRA) methods as applied to nuclear power plants but also examples from the chemical industry, aerospace, transportation, and other sectors. Addresses failure and reliability analysis, fault trees, event trees, reactor safety, regulatory practice.
Prerequisites: STAT 509.

EMCH 557 - Introduction to Radiation Shielding and Sources (3 Credits)
Radiation interactions and transport, design of radiation shields, point kernel, and Monte Carlo methods. Dosimetry, buildup factors, radiation sources, and shield materials.

EMCH 558 - Introduction to Nuclear Reactor Systems (3 Credits)
PWR and BWR reactors, reactor system designs for accident prevention and mitigation, protection systems, containment design, emergency cooling requirements, code of federal regulations, and design criteria.
Corequisite: EMCH 552.

EMCH 560 - Intermediate Fluid Mechanics (3 Credits)
Prerequisites: EMCH 310, EMCH 360.

EMCH 561 - Current Topics in Mechanical Engineering (1-3 Credits)
Special topics related to current issues in mechanical engineering. Course content varies and will be announced in the schedule of classes by title.

EMCH 562 - Micro/nanofluids and Lab-on-a-Chip (3 Credits)
Basic fluid mechanics, capillary, drop and micro/nanoparticle, electrokinetics; Micropump, mixer, preconcentrator, electrophoresis, microactuator and particle manipulator; Sensors for pressure, velocity, concentration, temperature in environmental monitoring/biodefence, clinical diagnostics, drug discovery/delivery. Restricted to: Upper division.
Prerequisites: CHEM 112, CHEM 112L, PHYS 212.

EMCH 567 - Bio Nano/Micro Electro-Mechanical Systems (3 Credits)
Nano/microfabrication for nano/microstructures, photolithography, self-assembly, etching techniques, physical and chemical vapor deposition, surface and bulk micromachining, MEMS integration and packaging; applications in Biomedical Engineering; microactuators, biomicrosensors, and biomedical devices.
Prerequisites: CHEM 112, CHEM 112L, PHYS 212.

EMCH 571 - Mechanical Behavior of Materials (3 Credits)
Micromechanisms of the deformation and fracture of structural materials; brittle versus ductile behavior; fatigue and creep; strengthening mechanisms; mechanical testing techniques; methods in analysis of mechanical failures.
Prerequisites: EMCH 260, EMCH 371.

EMCH 572 - Physical Metallurgy (3 Credits)
Equilibrium and phase relations in metallic systems; kinetics of phase transformations; annealing and precipitation phenomena.
Prerequisites: EMCH 371.

EMCH 573 - Introduction to Nuclear Materials (3 Credits)
Materials for nuclear applications; materials degradation processes occurring in the nuclear reactor environment. Restricted to Engineering Upper Division and Graduate Students.

EMCH 575 - Adaptive Materials and Smart Structures (3 Credits)
A multidisciplinary introductory course addressing the engineering field of adaptive materials and smart structures.
Prerequisites: EMCH 260, EMCH 310.

EMCH 576 - Fundamentals and Applications of Fuel Cells (3 Credits)
Study of fuel cell principles, fuel cell characterization, characteristics of the major types of fuel cells, fuel cell stack and system design, fuel cell applications in portable, transportation, and stationary areas, as well as the current status and future research focus of fuel cells. Restricted to: Upper division.
Prerequisites: EMCH 290 or ECHE 310 or ENCP 290.

EMCH 577 - Aerospace Structures I (3 Credits)
Static analysis of aerospace structural elements such as bars, beams, columns, plates, and shells. Topics include, but not limited to elasticity theory, simple beam theory, boundary value problems, and structural stability. Upper division or graduate status.

EMCH 578 - Introduction to Aerodynamics (3 Credits)
Fundamentals of aerodynamics, elements of compressible flow, thin airfoil theory, finite wing theory, flow through nozzles diffusers and wind tunnels, normal and oblique shock waves, elements of the methods of characteristics of finite difference solutions for compressible flows, aspects of hypersonic flow.

EMCH 580 - Mechanics of Solid Biomaterials (3 Credits)
Prerequisites: MATH 242.

EMCH 584 - Advanced Mechanics of Materials (3 Credits)
Topics in stress analysis, including unsymmetrical bending, three-dimensional stress-strain; torsion; rotational stress; thick-walled pressure vessels; beams on elastic foundations; and stress concentration.
Prerequisites: EMCH 260.

EMCH 585 - Introduction to Composite Materials (3 Credits)
Prerequisites: EMCH 327, EMCH 371, MATH 242.
EMCH 586 - Experimental Stress Analysis (3 Credits)
Stress analysis utilizing experimental techniques including transmission and scattered light photoelastography, strain gauges, and brittle coatings. Introduction to modern concepts of coherent optics in stress analysis with emphasis on engineering applications.
Prerequisites: EMCH 260.

EMCH 592 - Introduction to Combustion (3 Credits)
Chemical thermodynamics, reaction kinetics, and combustion phenomena in energy production. Application to the modeling of coal combustion, incineration, and combustion engines.
Prerequisites: EMCH 354, EMCH 394.

EMCH 594 - Solar Heating (3 Credits)
Solar radiation; review of heat transfer and radiation characteristics of relevant materials; flat plate and focusing collectors; energy storage models for design of solar heating systems; system design by computer simulation; direct conversion by solar cells.
Prerequisites: EMCH 290, EMCH 354, or ECHE 321.

EMCH 597 - Thermal Environmental Engineering (3 Credits)
Prerequisites: EMCH 354, EMCH 394.

EMCH 701 - Methods of Engineering Analysis (3 Credits)
Variational methods of approximation are used with the finite element method to simulate the reliability predictions in design of mechanical systems. The functional relationship between geometry, materials, and physical laws of motion and energy are applied to solid, thermal, and fluid systems.
Prerequisites: EMCH 201.

EMCH 708 - Computer-Aided Product Design and Analysis (3 Credits)
Integration of computer-aided design and computer-aided engineering for shorter design cycles. Application of solid modeling and computer simulation tools to the design process.

EMCH 717 - Advanced Finite Element Methods (3 Credits)
Advanced finite element topics, including dynamic and nonlinear analyses. Computer projects will be assigned.
Prerequisites: EMCH 508.

EMCH 721 - Aeroelasticity (3 Credits)
Study the principles and applications of aircraft aeroelasticity with emphasis on aircraft structural dynamics, vibrations, unsteady aerodynamics, and interaction thereof.

EMCH 722 - Plasticity (3 Credits)
Basic experiments and observations of elastic-plastic material behavior; yield criteria; deformation and flow theories; slip line fields; numerical techniques; and one and two dimensional applications.
Prerequisites: ENCP 707.

EMCH 727 - Advanced Mechanical Design (3 Credits)
Analysis of stresses involved in mechanical loading under various environmental conditions including failure criteria, impact and fatigue loading, residual stress, contact stress, and experimental stress analysis.
Prerequisites: EMCH 260.

EMCH 732 - Advanced Dynamics of Machinery (3 Credits)
Prerequisites: EMCH 532

EMCH 741 - Viscous and Turbulent Flow (3 Credits)

EMCH 742 - Advanced Gas Dynamics (3 Credits)

EMCH 743 - Aircraft and Rocket Propulsion (3 Credits)
Introduction to aircraft and rocket engines with emphasis on the performance and characteristics of various types of propulsion systems, including turbojet, turbofan, turboprop, ramjet, scramjet, and liquid and solid propellant rockets.
Prerequisite or Corequisite: EMCH 544.

EMCH 744 - Aerodynamics & Flight Mechanics (3 Credits)
Aerodynamics of wings and bodies in aircraft and the static and dynamic analysis of airplane flight mechanics. Topics include fundamentals of potential flows, thin airfoil theory, finite wing theory, laminar and turbulent boundary layers, trajectory analysis, and stability and control of an airplane.

EMCH 751 - Advanced Heat Transfer (3 Credits)
Development of the energy equation for convection and some exact solutions. Approximate analysis of the boundary layer by integral methods. Analogy between heat and momentum transfer. Experimental results.

EMCH 752 - Thermal Radiation Heat Transfer (3 Credits)
Radiation heat transfer between surfaces of enclosures; diffuse-gray and nondiffuse-gray surfaces. Radiative properties of real materials; metals, opaque nonmetals, transmitting solids. Gas radiation in enclosures.
Prerequisites: EMCH 751.

EMCH 753 - Chemical Thermodynamic Calculations and Modeling with Applications (3 Credits)
Principles of chemical thermodynamics; reactions, transformations, phase equilibria, and applications to engineering processes.

EMCH 754 - Thermal Hydraulic Design of Nuclear Reactors (3 Credits)
Power plant thermodynamics, reactor heat generation and removal (single-phase as well as two-phase coolant flow and heat transfer), and engineering considerations in reactor design.
Prerequisites: EMCH 552.

EMCH 755 - Advanced Nuclear Engineering (3 Credits)
Reactor physics including heterogeneous effects, multi-group calculations, reactor kinetics, stability and control, fuel depletion, and burnable poisons.
Prerequisites: EMCH 552.

EMCH 756 - Safety Analysis for Energy Systems (3 Credits)
Analysis of the safety of nuclear energy facilities focusing on reliability and probabilistic risk analysis.
Prerequisites: EMCH 552.
EMCH 757 - Radiation Shielding (3 Credits)
Prerequisites: EMCH 552.

EMCH 758 - Nuclear Reactor Systems (3 Credits)
PWR and BWR reactors, reactor system designs for accident prevention and mitigation, protection systems, containment design, emergency cooling requirements, and atmospheric dispersion of radioactive material.
Prerequisites: EMCH 552.

EMCH 759 - Waste Management in the Nuclear Industry (3 Credits)
Management of low- and high-level radioactive, hazardous, and mixed waste; transportation, treatment, storage, and disposal techniques. Political and social issues involved with nuclear waste.
Prerequisites: EMCH 552.

EMCH 764 - Mechanical Engineering Projects (3 Credits)
Guided independent work on current research or design projects, culminating either in a written report or in the construction of a prototype device.

EMCH 767 - Microelectromechanical Systems (MEMS) (3 Credits)
Fundamentals of micromachining and microfabrication technologies, microsystem design, MEMS integration and packaging issues, design and analysis of microsensors and microactuators, microfluidics and bioMEMS, and CAD for MEMS. Design project required.

EMCH 770 - Predictive Modeling: Combining Experiments with Computations (3 Credits)
Experimental and computational uncertainties; combining experiments with computations to obtain "best - estimate" results with reduced uncertainties; predictive modeling.

EMCH 771 - Design Properties of Plastics (3 Credits)
Physical properties of various commercial thermoset and thermoplastic resins. Linear viscoelastic theory and its relationship to measurable mechanical properties of plastics.

EMCH 772 - Nuclear Materials (3 Credits)
This course focuses on behavior and performance of materials in nuclear irradiation fields. Materials used in the core for reactivity control and materials used for structural support will be studied.

EMCH 774 - Radiation Damage (3 Credits)
Structural materials for nuclear application, Radiation interaction with matter; Microstructure evolution under irradiation; Material properties degradation under irradiation.
Prerequisites: EMCH 573.

EMCH 777 - Aerospace Structures II (3 Credits)
Principles and applications of aerospace structures with emphasis on the construction and analysis of thin-wall monocoque and semi-monocoque wings and fuselages.
Prerequisite or Corequisite: EMCH 577.

EMCH 778 - Nanomaterials: Synthesis, Characterization, and Applications (3 Credits)
Advances in nanomaterials; synthesis of nanomaterials; nanoparticles, nanotubes/wires, nanometer thick thin films, nanostructured bulk materials; assembly of nanostructures; biologically inspired structures; structure-property-correlations in nanomaterials and nanostructures; advanced characterization techniques; applications, especially those related to nanotechnology, information technology, MEMS/NEMS, and biotechnology.
Prerequisites: EMCH 371.

EMCH 780 - Energy Storage (3 Credits)
This course is aimed to provide graduate students with a comprehensive introduction to the various energy storage mechanisms and technologies that are currently being utilized. The content of the course includes methods and mechanisms of common energy storage (thermal, mechanical, chemical and electrochemical).

EMCH 785 - Design of Composite Materials for Aerospace Structures (3 Credits)
Property and performance requirements for aerospace structures. Design for stiffness, strength, durability, damage tolerance, and life at the lamina, laminate, and structural level (materials and analysis).

EMCH 787 - Nuclear Reactor Systems (3 Credits)
An advanced treatment of thermodynamics stressing fundamentals. Application of first and second laws; study of properties and criteria for reactive, non-reactive, and coupled systems.
Prerequisites: EMCH 354 and EMCH 394.

EMCH 791 - Selected Topics in Thermal Systems (1-3 Credits)
Special topics related to current research in thermal systems.

EMCH 792 - Selected Topics in Mechanical Systems (1-3 Credits)
Special topics related to current research in mechanical systems.

EMCH 793 - Combustion Processes in Industry (3 Credits)
Development of the physics of turbulent flow, turbulent combustion, atomization, and vaporization of liquid sprays. Design and analysis of industrial combustion processes including incinerators and furnaces.
Prerequisites: EMCH 592.

EMCH 794 - Thermodynamics (3 Credits)
An advanced treatment of thermodynamics stressing fundamentals. Application of first and second laws; study of properties and criteria for reactive, non-reactive, and coupled systems.
Prerequisites: EMCH 592.

EMCH 797 - Research (1-12 Credits)

EMCH 799 - Thesis Preparation (1-12 Credits)

EMCH 847 - Fluid Systems Design (3 Credits)
Prerequisites: EMCH 741.

EMCH 857 - Advanced Heat Transfer II (3 Credits)
Solution of radiation problems through non-absorbing, non-emitting media. Heat exchanger design.

EMCH 881 - Fatigue of Materials (3 Credits)
Fatigue of materials presented from mechanics and microstructural points of view. Stress-life, strain life, and Linear Elastic Fracture Mechanics (LEFM) approaches will be covered.
EMCH 882 - Fracture Mechanics (3 Credits)
Prerequisites: EMCH 584.

EMCH 883 - Wave Propagation in Solids (3 Credits)
Prerequisites: ENCP 707.

EMCH 899 - Dissertation Preparation (1-12 Credits)

MEDI - Medicine Clinical (MEDI)
MEDI 700 - Health Aspects of Aging (3 Credits)

Media Arts (MART)
MART 521A - Media Writing Advanced: Screenwriting (3 Credits)
Advanced study of screenwriting. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 521B - Media Writing Advanced: Feature Film (3 Credits)
Advanced study of feature film writing. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 521C - Media Writing Advanced: Manga and Anime (3 Credits)
Advanced study of Manga and Anime. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 521D - Media Writing Advanced: Television Writing (3 Credits)
Advanced study of television writing. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 571A - Moving Image Advanced: Narrative (3 Credits)
Narrative for motion picture.
Prerequisites: MART 371.

MART 571B - Moving Image Advanced: Documentary (3 Credits)
Documentary production.
Prerequisites: MART 371.

MART 571C - Moving Image Advanced: Animation (3 Credits)
Animation production.
Prerequisites: MART 371.

MART 571D - Moving Image Advanced: Experimental (3 Credits)
Experimental motion picture production.
Prerequisites: MART 371.

MART 571E - Moving Image Advanced: Cinematography (3 Credits)
Motion picture cinematography.
Prerequisites: MART 371.

MART 571F - Moving Image Advanced: Sound for Motion Picture (3 Credits)
Sound production for motion picture.
Prerequisites: MART 371.

MART 581A - New Media Advanced: Site-based and Installation Art (3 Credits)
Art and practice of site-based and installation art. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581B - New Media Advanced: Mobile Platforms (3 Credits)
Art and practice of mobile platforms. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581C - New Media Advanced: Media Performance (3 Credits)
Art and practice of media performance. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581D - New Media Advanced: Video Game Design (3 Credits)
Art and practice of video game design. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581E - New Media Advanced: Sound Art (3 Credits)
Art and practice of sound art. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 590 - Special Topics in Media Arts (3 Credits)
Selected topics in media arts. Course content varies and will be announced in the schedule of classes by title.

MART 591 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: ARTH 551, FAMS 511

MART 592 - Special Topics in Film and Media Histories (3 Credits)
Intensive study of a specific topic in film and media history. May be repeated as content varies by title. 03. 07/05/2019.
Prerequisites: FAMS 300.
MART 593 - Special Topics in U.S. Film and Media (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title. 03: 07/05/2019.
Prerequisites: FAMS 240.

MART 594 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: FAMS 598, FORL 598

MART 598 - Media Management and Distribution (3 Credits)
Research in media management and distribution.
Prerequisites: MART 110 and MART 210.

MART 701 - The Role of Research in Media Arts Practice (3 Credits)
Approaches to research methods as these inform media arts and practice. Emphasis on the development of critical (e.g., theoretical, historical, social, cultural, etc.) engagement.

MART 702 - Principles of Media Arts Practice (3 Credits)
Application of theoretical concepts to media arts practice.
Prerequisites: MART 701.

MART 721A - Research and Practice in Media Writing: Screenwriting (3 Credits)
Advanced study of media storytelling in one or more of the following topics: 721A Screenwriting; 721B Feature Film; 721C Manga and Anime; 721D Television Writing.

MART 721B - Research and Practice in Media Writing: Feature Film (3 Credits)
Advanced study of media storytelling in one or more of the following topics: 721A Screenwriting; 721B Feature Film; 721C Manga and Anime; 721D Television Writing.

MART 721C - Research and Practice in Media Writing: Manga and Anime (3 Credits)
Advanced study of media storytelling in one or more of the following topics: 721A Screenwriting; 721B Feature Film; 721C Manga and Anime; 721D Television Writing.

MART 721D - Research and Practice in Media Writing: Television Writing (3 Credits)
Advanced study of media storytelling in one or more of the following topics: 721A Screenwriting; 721B Feature Film; 721C Manga and Anime; 721D Television Writing.

MART 771A - Research and Practice in Media Arts Production: Narrative (3 Credits)
Advanced study of moving image production in one or more of the following topics: 771A Narrative; 771B Documentary; 771C Animation; 771D Experimental; 771E Cinematography; 771F Sound for Motion Picture. Course may be taken 2 times.

MART 771B - Research and Practice in Media Arts Production: Documentary (3 Credits)
Advanced study of moving image production in one or more of the following topics: 771A Narrative; 771B Documentary; 771C Animation; 771D Experimental; 771E Cinematography; 771F Sound for Motion Picture. Course may be taken 2 times.

MART 771C - Research and Practice in Media Arts Production: Animation (3 Credits)
Advanced study of moving image production in one or more of the following topics: 771A Narrative; 771B Documentary; 771C Animation; 771D Experimental; 771E Cinematography; 771F Sound for Motion Picture. Course may be taken 2 times.

MART 771D - Research and Practice in Media Arts Production: Experimental (3 Credits)
Advanced study of moving image production in one or more of the following topics: 771A Narrative; 771B Documentary; 771C Animation; 771D Experimental; 771E Cinematography; 771F Sound for Motion Picture. Course may be taken 2 times.

MART 771E - Research and Practice in Media Arts Production: Cinematography (3 Credits)
Advanced study of moving image production in one or more of the following topics: 771A Narrative; 771B Documentary; 771C Animation; 771D Experimental; 771E Cinematography; 771F Sound for Motion Picture. Course may be taken 2 times.

MART 771F - Research and Practice in Media Arts Production: Sound for Motion Picture (3 Credits)
Advanced study of moving image production in one or more of the following topics: 771A Narrative; 771B Documentary; 771C Animation; 771D Experimental; 771E Cinematography; 771F Sound for Motion Picture. Course may be taken 2 times.

MART 781A - Research and Practice in New Media Art: Site-based and Installation Art (3 Credits)
Advanced study of new media art in one or more of the following topics: 781A Site-based and Installation Art; 781B Mobile Platforms; 781C Media Performance; 781D Video Game Design; 781E Sound Art. Course may be taken 2 times.

MART 781B - Research and Practice in New Media Art: Mobile Platforms (3 Credits)
Advanced study of new media art in one or more of the following topics: 781A Site-based and Installation Art; 781B Mobile Platforms; 781C Media Performance; 781D Video Game Design; 781E Sound Art. Course may be taken 2 times.

MART 781C - Research and Practice in New Media Art: Media Performance (3 Credits)
Advanced study of new media art in one or more of the following topics: 781A Site-based and Installation Art; 781B Mobile Platforms; 781C Media Performance; 781D Video Game Design; 781E Sound Art. Course may be taken 2 times.

MART 781D - Research and Practice in New Media Art: Video Game Design (3 Credits)
Advanced study of new media art in one or more of the following topics: 781A Site-based and Installation Art; 781B Mobile Platforms; 781C Media Performance; 781D Video Game Design; 781E Sound Art. Course may be taken 2 times.

MART 781E - Research and Practice in New Media Art: Sound Art (3 Credits)
Advanced study of new media art in one or more of the following topics: 781A Site-based and Installation Art; 781B Mobile Platforms; 781C Media Performance; 781D Video Game Design; 781E Sound Art. Course may be taken 2 times.

MART 790 - Independent Study (3 Credits)
Specialized research in media arts theory and/or practice.
MART 795A - Media Arts Research: Media Theory (3 Credits)
Advanced study in one or more of the following topics in the media arts:
795A Media Theory; 795B Media History; 795C Media Aesthetics; 795D Global Media Culture; 795E Media Management and Distribution. Course can be taken 2 times.

MART 795B - Media Arts Research: Media History (3 Credits)
Advanced study in one or more of the following topics in the media arts:
795A Media Theory; 795B Media History; 795C Media Aesthetics; 795D Global Media Culture; 795E Media Management and Distribution. Course can be taken 2 times.

MART 795C - Media Arts Research: Media Aesthetics (3 Credits)
Advanced study in one or more of the following topics in the media arts:
795A Media Theory; 795B Media History; 795C Media Aesthetics; 795D Global Media Culture; 795E Media Management and Distribution. Course can be taken 2 times.

MART 795D - Media Arts Research: Global Media Culture (3 Credits)
Advanced study in one or more of the following topics in the media arts:
795A Media Theory; 795B Media History; 795C Media Aesthetics; 795D Global Media Culture; 795E Media Management and Distribution. Course can be taken 2 times.

MART 795E - Media Arts Research: Media Management and Distribution (3 Credits)
Advanced study in one or more of the following topics in the media arts:
795A Media Theory; 795B Media History; 795C Media Aesthetics; 795D Global Media Culture; 795E Media Management and Distribution. Course can be taken 2 times.

MART 797 - Practicum in Media Arts (3 Credits)
Field experience in the media arts combined with directed research.

MART 798 - Project Research and Preparation (1-6 Credits)
Development and completion of a creative media arts project grounded in theory and research. May be repeated for credit. Not auditable.

MART 799 - Thesis Research and Preparation (1-6 Credits)

Middle Level Education (EDML)

EDML 553 - Methods and Materials for Teaching Science in the Middle Grades (3 Credits)
A study of methods, techniques, and materials of instruction appropriate to science teaching in the middle school.

EDML 563 - Methods and Materials for Teaching Social Studies in the Middle School (3 Credits)
A study of goals, content, methods, and materials of instruction in middle school social studies.

EDML 572 - Middle Level Literacy Assessment (3 Credits)
Introduces literacy assessment for individual and small groups or middle level students.

EDML 573 - Methods and Materials for Teaching English/Language Arts in the Middle Grades (3 Credits)
Introduces goals, content, and methods of teaching language arts at the middle level.

EDML 583 - Methods and Materials for Teaching Mathematics in the Middle Grades (3 Credits)
A study of methods, techniques, and materials of instruction appropriate to mathematics teaching in the middle school.

EDML 584 - Middle School Internship Seminar (3 Credits)
Inquiry into the issues that arise during internship B experiences including classroom management, adolescent development, legal/professional responsibilities, multicultural perspectives, and needs of exceptional children.

Corequisite: EDML 599.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDML 598 - Internship A in the Middle School (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle school students.

Prerequisites: admission to internship in middle level program.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDML 599 - Internship B in the Middle School (12 Credits)
Application of effective teaching techniques and organization of instructional settings for middle school students.

Prerequisites: B or better in EDML 598.

Corequisite: EDSE 584.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

Experiential Learning: Experiential Learning Opportunity

Music (MUSC)

MUSC 500 - Topics in Performance and Literature (1-3 Credits)
Course content varies and will be announced in the schedule of course title.

MUSC 501 - Secondary Applied Music (1-2 Credits)

MUSC 501A - Secondary Applied Music/ Flute/ Piccolo (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501B - Secondary Applied Music/ Oboe/ English Horn (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501C - Secondary Applied Music/ Clarinet (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501D - Secondary Applied Music/ Bassoon (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501E - Secondary Applied Music/ Saxophone (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.
MUSC 501F - Secondary Applied Music/ French Horn (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501G - Secondary Applied Music/ Trumpet (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501H - Secondary Applied Music/ Trombone (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501I - Secondary Applied Music/ Euphonium (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501J - Secondary Applied Music/ Tuba (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501K - Secondary Applied Music/ Percussion (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501L - Secondary Applied Music/ Harpsichord (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501M - Secondary Applied Music/ Classical Guitar (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501N - Secondary Applied Music/ Organ (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501O - Secondary Applied Music/ Piano (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501P - Secondary Applied Music/ Harp (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501Q - Secondary Applied Music/ Violin (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501R - Secondary Applied Music/ Viola (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501S - Secondary Applied Music/ Viola da Gamba (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501T - Secondary Applied Music/ Violoncello (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501U - Secondary Applied Music/ Double Bass (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501V - Secondary Applied Music/ Voice (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501W - Secondary Applied Music/ Service Playing (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501X - Secondary Applied Music/ Conducting (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 501Y - Secondary Applied Music/ Jazz (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 505 - Violin Scales and Technique (2 Credits)
Improving and refining left hand and right hand technique on the violin through the use of scales.

MUSC 511A - Applied Music/ Flute/ Piccolo (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511B - Applied Music/ Oboe/ English Horn (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511C - Applied Music/ Clarinet (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511D - Applied Music/ Bassoon (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511E - Applied Music/ Saxophone (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511F - Applied Music/ French Horn (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511G - Applied Music/ Trumpet (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511H - Applied Music/ Trombone (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511I - Applied Music/ Euphonium (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511J - Applied Music/ Tuba (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511K - Applied Music/ Percussion (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511L - Applied Music/ Harpsichord (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511M - Applied Music/ Classical Guitar (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511N - Applied Music/ Organ (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.
MUSC 511R - Applied Music/ Violin (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511S - Applied Music/ Viola (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511T - Applied Music/ Violoncello (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511U - Applied Music/Double Bass (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511V - Applied Music/ Voice (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511W - Applied Music/ Service Playing (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511Y - Applied Music/ Conducting (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 511Z - Applied Music/ Jazz (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 515 - Orchestration (3 Credits)
Instrumentation and orchestration; possibilities and limitations idiomatic to specific orchestral instruments and ensemble combinations. Not auditable.

MUSC 516 - Composition (3 Credits)
Private study in music composition; may be repeated. Not auditable.
Prerequisites: MUSC 417 or equivalent experience.

MUSC 518 - Form and Analysis (3 Credits)
Examination of fundamental principles of musical forms; analysis of representative tonal works. Not auditable.

MUSC 520 - Studio Arranging and Composition (3 Credits)
Instruction and practice in arranging and composing in various jazz and commercial music styles and genres. May be repeated for credit. Not auditable.

MUSC 523 - Techniques and Materials of Tonal Music (3 Credits)
Study of the techniques and materials of tonal harmony and voice leading with integrated ear-training component. Not auditable.

MUSC 525 - Post-Tonal Music Theory (3 Credits)
Prerequisites: MUSC 216.

MUSC 526 - Analytical Studies (3 Credits)
Analytical techniques applied to music of a particular style, period, or genre. May be repeated for a total of 9 credits. Topic for any semester to be announced by title in the schedule of classes. Not auditable.

MUSC 528 - Seminar in Music Theory (3 Credits)
Advanced studies in music theory. Individual projects. Three meetings per week. Not auditable.

MUSC 529 - Eighteenth-Century Counterpoint (3 Credits)
Analysis and writing in contrapuntal forms with emphasis on the style of Bach. Not auditable.

MUSC 530 - Sixteenth-Century Counterpoint (3 Credits)
Analysis and writing in contrapuntal forms with emphasis on the style of Palestrina. Not auditable.

MUSC 540 - Projects in Computer Music (1-3 Credits)
Directed study in computer-music composition or research. Not auditable.
Prerequisites: MUSC 336.

MUSC 543 - Song Literature (3 Credits)
A study of the development of the solo art song, illustrated by major works of the song writers of all major nationalities. Not auditable.

MUSC 544 - Topics in Music History (3 Credits)
Topic for any semester to be announced by title in the schedule of classes. May be repeated for a total of nine credits. Not auditable.

MUSC 545 - Survey of the Opera (3 Credits)
A survey of the literature of Classic, Romantic, and modern opera, with special attention given to the recognition of the best-known works in each school. Recordings. Open to all students as an elective. Not auditable.

MUSC 548 - Orchestra Literature (3 Credits)

MUSC 549 - Survey of Chamber Music (3 Credits)
The literature for small instrumental ensembles from the Baroque era to the present. The string quartet, divertimento, keyboard-accompanied sonata, etc. Not auditable.

MUSC 555 - World Music (3 Credits)
Rhythms, scales, forms, and instrument types basic to all music. European and American folk song, African and Native American tribal music, Asian music. Not auditable.
Prerequisites: MUSC 110 or equivalent.

Graduation with Leadership Distinction: GLD: Global Learning

MUSC 557 - American Music (3 Credits)
Survey of the music composed in the United States from the colonial period to the present. The influences of European, African, Indian, and South American musical styles. Not auditable.

MUSC 558 - Piano Literature I (3 Credits)
Standard piano literature including major masterpieces from 1700 to 1850. Emphasis on instrumental and stylistic developments, and historical and theoretical background for interpreting the literature of the piano. Not auditable.

MUSC 559 - Piano Literature II (3 Credits)
Standard piano literature including major masterpieces from 1850 to present. Emphasis on instrumental and stylistic developments, and historical and theoretical background for interpreting the literature of the piano. Not auditable.

MUSC 560 - Renaissance Music (3 Credits)
Western music from ca. 1300 to the early Baroque; vocal and instrumental forms, national schools, and performance practices. Not auditable.
Prerequisites: MUSC 353, MUSC 354.

MUSC 561 - Music of the Baroque (3 Credits)
Music from 1600 to 1750, including Monteverdi and Schutz through Handel and Bach. Not auditable.
Prerequisites: MUSC 353, MUSC 354.
MUSC 562 - Music of the Classical Period (3 Credits)
The works of Haydn, Mozart, and Beethoven; the music of their predecessors and contemporaries; the characteristics of the Viennese classical style. Not auditable.
Prerequisites: MUSC 353, MUSC 354.

MUSC 563 - Romantic Music (3 Credits)
The music of the 19th and early 20th centuries; the relationship of music to other arts in works such as Schubert's songs, Wagner's drama, and Berlioz’ program symphony. Not auditable.
Prerequisites: MUSC 353, MUSC 354.

MUSC 564 - Music of the 20th Century (3 Credits)
Music from 1900 to the present; major trends in contemporary music. Not auditable.
Prerequisites: MUSC 353, MUSC 354.

MUSC 565 - Advanced Audio Recording Techniques (3 Credits)
Multi-microphone and ambisonic stereo recording techniques; multi-track recording, signal processing and audio production; digital audio. Studio and field experience. Not auditable.
Prerequisites: MUSC 365.

MUSC 566 - Fundamentals of Sound Use for Media (3 Credits)
Music for use in media; midi applications and synchronization methods using time code; direct-to-hard-disc tapeless audio recording software. Not auditable.
Prerequisites: MUSC 565.

MUSC 567 - Recording Studio Techniques (3 Credits)
Technology and techniques in the recording studio including use of equalizers, limiters, reverberators, compressors, the mixing console, multi-track recording, microphone techniques, and basic acoustics related to the instrumental and vocal recording process. Not auditable.
Prerequisites: MUSC 564, MUSC 565.

MUSC 569 - Intermediate Piano Accompanying (3 Credits)
Approaches to specific problems in vocal and instrumental accompanying; supervised accompanying in class. Advanced work for experienced students. Not auditable.

MUSC 570 - Italian and Latin Diction (2 Credits)
Techniques of pronunciation, phonetics, and international phonetic alphabet as applied to standard vocal repertory, with emphasis on Italian and Latin languages. Not auditable.

MUSC 571 - Digital Audio Technology (3 Credits)
A study of the theory and practice of digital audio technology including analog to digital conversion, digital storage, error correction, transmission, basic digital signal processing, and synchronization.
Prerequisites: MUSC 365.

MUSC 572 - Advanced Audio Topics (3 Credits)
A study of the theory and practice of audio topics such as digital signal processing, psychoacoustics, data compression, sound reinforcement systems, wireless transmission, large scale system integration, and emerging technologies.

MUSC 573 - Performance Pedagogy I (3 Credits)
Basic concepts, techniques and materials for teaching a specific instrument. Not auditable.

MUSC 573L - Pedagogy Laboratory (2 Credits)
Directed teaching in laboratory and private settings. Not auditable.
Corequisite: MUSC 573 or MUSC 574.

Experiential Learning: Experiential Learning Opportunity

MUSC 574 - Performance Pedagogy II (3 Credits)
Basic concepts, techniques and materials for teaching a specific instrument intermediate studies. Not auditable.

MUSC 574L - Pedagogy Laboratory (2 Credits)
Directed teaching in laboratory and private settings. Not auditable.
Corequisite: MUSC 573 or MUSC 574.

MUSC 575 - Directed Teaching in Pedagogy I (3 Credits)
Supervised teaching in a performance area. Not auditable.

MUSC 575L - Pedagogy Laboratory (2 Credits)
Directed teaching in laboratory and private settings. Not auditable.
Corequisite: MUSC 575.

MUSC 576 - Teaching in Pedagogy II (3 Credits)
Supervised teaching in a performance area. Course may be repeated for credit (6 credits total). Not auditable.

MUSC 576L - Pedagogy Laboratory (1 Credit)
Practical experience in preparing lesson plans and teaching theory-performance classes for precollege piano students on electronic and acoustical instruments. May be repeated for credit. Not auditable.

MUSC 577 - Vocal Pedagogy (2 Credits)
Anatomy and function of the singing voice with practical application to teaching. Not auditable.

MUSC 578 - German and English Diction (2 Credits)
Techniques of pronunciation for singing in German and English. Not auditable.
Prerequisites: C or better in MUSC 570.

MUSC 579 - French Diction (2 Credits)
Techniques of pronunciation for singing in French. Not auditable.
Prerequisites: C or better in MUSC 570.

MUSC 580 - Music & Arts Entrepreneurship (3 Credits)
Entrepreneurial skills and context for arts-based careers and business ventures. Students develop arts projects related to their interests. Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

MUSC 581 - The Alexander Technique (2 Credits)
Theoretical/experimental exploration of major body systems and developmental movements to bring more articulation to the body and more awareness and physical ease in performance. For music and education students. Not auditable.

MUSC 582 - Music and Money (3 Credits)
A survey of the for-profit and non-profit music economies and the broader policy that drives these economies. Restricted to Music majors.

MUSC 583 - Music and Worship (3 Credits)
The selection and leadership of music in the church service; music for the rural church; selecting and directing anthems and service music for the nonprofessional church choir; the transition from psalmody to hymnody in the 18th century; the Anglican Chant and the Lutheran Chorale. Not auditable.

MUSC 584 - Workshop in Music (1-3 Credits)
Selected topics in music. May be repeated as topic varies. Not auditable.

</table>
MUSC 711P - Graduate Applied Music/ Piano (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711R - Graduate Applied Music/ Violin (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711S - Graduate Applied Music/ Viola (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711T - Graduate Applied Music/ Violoncello (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711U - Graduate Applied/Double Bass (1-4 Credits)
Note: Courses consist of individual instruction including individualized assignments and regular private instruction and review. A-flute/piccolo; B-oobo/English horn; C-clarinet; D-bassoon; E-saxophone; F-French horn; G-trumpet; H-trombone; I euphonium; J-tuba; K-percussion; L-harpischord; N-classic guitar; O-organ; P-piano; R-violin; S-viola; T-violoncello; U-double bass; V-voice; W-service playing; Y-conducting; Z-jazz. Subdiscipline: Music (Applied Music)

MUSC 711V - Graduate Applied Music/ Voice (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711W - Graduate Applied Music/ Service Playing (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711Y - Graduate Applied Music/ Conducting (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 711Z - Graduate Applied Music/ Jazz (1-4 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not auditable.

MUSC 713 - Advanced Jazz Theory (3 Credits)
Harmonic, melodic, rhythmic, and structural concepts related to advanced jazz improvisation and composition. In-depth analysis of selected improvisations of artists and contemporary jazz styles.

MUSC 714 - Advanced Jazz Arranging (3 Credits)
Advanced orchestration, compositional development, cross-ensemble writing, extended forms, expanded harmonic and rhythmic vocabulary in the various contemporary jazz styles.
Prerequisites: MUSC 520 or equivalent.

MUSC 715 - Analysis and Performance (3 Credits)
Performance and interpretive considerations through the study of music on a technical basis. Observations of unity/variety and tension/repose, the interaction of music's materials, and the sources for growth and shape. Not auditable.

MUSC 716 - Composition (1-3 Credits)
Original composition. May be repeated for credit. Not auditable.

MUSC 717 - Advanced Orchestration (3 Credits)
Advanced orchestral arranging and score study, principles or score identification, and historical survey of orchestration practices and styles.

MUSC 718 - Band Arranging (3 Credits)
Characteristics and use of individual instruments; writing for separate choirs, chamber and solo writing; scoring piano, organ, and orchestra music for band. Not auditable.

MUSC 719 - Choral Arranging (3 Credits)
Practice in arranging and composing in the choral medium with emphasis on choral groups of the junior and senior high schools. Not auditable.

MUSC 720 - Pedagogy of Music Theory (3 Credits)
Concepts, techniques, and materials for teaching music theory. Not auditable.

MUSC 721 - Tonality in the Twentieth Century (3 Credits)
Study of the theoretical and analytical writings of Arnold Schoenberg. Students will be able to describe and compare basic elements of music theory, including foundational principles of harmony and voice leading, in a variety of musical styles.

MUSC 722 - Symphonic Analysis (3 Credits)
Analysis of orchestral music from the 17th to the 20th centuries with respect to form, tonal language, and orchestration. Not auditable.

MUSC 723 - Baroque Styles (3 Credits)
Baroque styles, forms, and performance practices. Not auditable.

MUSC 724 - Contemporary Styles (3 Credits)
A study of the techniques of 20th-century composition through writing in individual styles. The first semester (MUSC 724) is concerned with composers such as Bartok, Stravinsky, and Schoenberg. Not auditable.

MUSC 725 - Contemporary Styles (3 Credits)
MUSC 725 concentrates on more recent music. Not auditable.

MUSC 726 - Topics in Music Theory (3 Credits)
Analytical techniques, advanced orchestration, arranging for the marching band, or other selected topics. May be repeated as topic varies. Not auditable.

MUSC 727 - Schenkerian Analysis (3 Credits)
Study of analytical concepts developed by Heinrich Schenker, and their application to analysis of tonal music.

MUSC 728 - Score Reading (1-3 Credits)
Practice in reducing full scores at the piano. Repeatable for a maximum of nine credit hours. Not auditable.

MUSC 729 - Contrapuntal Techniques (3 Credits)
Contrapuntal procedures from the 16th through the 20th centuries.

MUSC 730 - Polyphonic Music Before 1600 (3 Credits)
Notation and theory of pre-tonal polyphonic music. Not auditable.

MUSC 731 - Contemporary Experimental Music (3 Credits)
Survey of iconoclastic and visionary contemporary composers whose music and ideas fall mostly outside mainstream classical and popular genres.

MUSC 732 - Advanced Conducting (3 Credits)
Study of conducting problems in selected choral or instrumental works. 733A-choral; 733B-instrumental. Not auditable.
Prerequisites: One year of study in conducting.

MUSC 733A - Advanced Conducting/ Choral (3 Credits)
Study of conducting problems in selected choral or instrumental works. Not auditable.
Prerequisites: One year of study in conducting or approval of instructor

MUSC 733B - Advanced Conducting/ Instrumental (3 Credits)
Study of conducting problems in selected choral or instrumental works. Not auditable.
Prerequisites: One year of study in conducting or approval of instructor
MUSC 734 - Ensemble (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not auditable.

MUSC 734A - Ensemble - Symphonic Band (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not auditable.

MUSC 734B - Ensemble - Wind Ensemble (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not auditable.

MUSC 734C - Ensemble - Graduate Vocal (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not auditable.

MUSC 734D - Ensemble - Percussion (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not auditable.

MUSC 734E - Ensemble - Left Bank Jazz (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734F - Ensemble - Guitar (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734G - Ensemble - Opera Chorus (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734H - Ensemble - Symphony Orchestra (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734I - Ensemble - Concert Choir (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734J - Ensemble - Opera Orchestra (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734K - Ensemble - Chamber Orchestra (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734L - Chamber Music - Woodwinds (0-1 Credits)
Experience in a small musical ensemble such as a string quartet or woodwind quintet. Repeatable for credit. Not Auditable.

MUSC 734M - Chamber Music - Brass (0-1 Credits)
Experience in a small musical ensemble such as a string quartet or woodwind quintet. Repeatable for credit. Not Auditable.

MUSC 734N - Chamber Music - Contemporary (0-1 Credits)
Experience in a small musical ensemble such as a string quartet or woodwind quintet. Repeatable for credit. Not Auditable.

MUSC 734O - Chamber Music - Percussion (0-1 Credits)
Experience in a small musical ensemble such as a string quartet or woodwind quintet. Repeatable for credit. Not Auditable.

MUSC 734P - Chamber Music - Saxophone (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Not Auditable.

MUSC 734Q - Chamber Music - Strings (0-1 Credits)
Experience in a small musical ensemble such as a string quartet or woodwind quintet. Repeatable for credit. Not Auditable.
MUSC 740L - Music Literature/ Harpsichord (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740N - Music Literature/ Classical Guitar (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740O - Music Literature/ Organ (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740P - Music Literature/ Piano (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740R - Music Literature/ Violin (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740S - Music Literature/ Viola (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740T - Music Literature/ Violoncello (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740U - Music Literature/ Double Bass (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740V - Music Literature/ Voice (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740W - Music Literature/ Service Playing (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740X - Music Literature/ Conducting (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 740Z - Music Literature/ Jazz (1-3 Credits)
Study of the literature of a specific performance area. Repeatable for credit. Not auditable. Note: 6 hrs max

MUSC 743 - Seminar in Music History (3 Credits)
For graduate students in music and music education. Methods of historical research, and problems of aesthetics and criticism.

MUSC 744 - Topics in Music History (3 Credits)
Selected topics such as French music in the 19th century, Richard Wagner, and mensural notation. May be repeated as the topic varies; 12 hrs max.

MUSC 746 - Choral Literature (3 Credits)
Choral literature from the Renaissance to the present. Study of smaller forms in the context of composers' contributions to the literature.

MUSC 747 - Advanced Music Research (2 Credits)
Development of advanced music research skills. Preparation for writing graduate research projects.
Prerequisites: MUSC 707.

MUSC 748 - Major Choral Works (3 Credits)
A survey of major oratorios, cantatas, and masses.

MUSC 754 - Ancient, Oriental, and Western Medieval Music (3 Credits)
Practices and theories of music in ancient high civilizations. Oriental, Greek, Roman, Jewish, and early Christian music, up to ca. AD 1300.

MUSC 755 - Renaissance Music (3 Credits)
Music from 1400 to 1600, including an introductory study on polyphonic styles of the later Medieval period; evolution of musical styles within the context of Renaissance Western European culture.

MUSC 756 - Music of the Baroque (3 Credits)
Music from 1600 to 1750 including representative composers from Monteverdi's generation through Bach and Handel.

MUSC 757 - Music of the Classical Period (3 Credits)
The works of Gluck, Haydn, Mozart, Beethoven and their contemporaries; formation of the "Viennese" Classical idiom and its most important forms and genres.

MUSC 758 - Romantic Music (3 Credits)
The music of the nineteenth and early twentieth centuries; the relationship of music to other arts; works from Schubert and Rossini to Mahler, Strauss, and Debussy.

MUSC 759 - Music Since 1900 (3 Credits)
Music from the early twentieth century to the present; major trends in contemporary music.

MUSC 764L - Ensemble - Guitar (0-1 Credits)
Experience in a musical ensemble such as orchestra, graduate chorus, or jazz. Repeatable for credit. Suffixes: B-Wind Ensemble, C-Graduate Vocal Ensemble, D-Percussion, E-Left Bank Jazz, L-Guitar, S-Symphony Orchestra, T-Concert Choir, V-Chamber Orchestra. Subdiscipline: Music (Musical Organizations)

MUSC 766 - Topics in Church Music (1-3 Credits)
Selected topics such as hymnology, church-choir literature and techniques, and church-music administration. May be repeated for a maximum of 12 hours as topic varies.

MUSC 767 - Pedagogy of Group Piano (3 Credits)
Methodology and survey of materials for beginning through intermediate piano study in groups.

MUSC 769 - Advanced Piano Accompanying (3 Credits)
Continuation of MUSC 569. Approaches to specific problems in vocal and instrumental accompanying; supervised accompanying in class.

MUSC 770 - Suzuki String Pedagogy I (3 Credits)

MUSC 771 - Suzuki String Pedagogy II (3 Credits)
An examination of the teaching points in Suzuki Violin books 3 and 4, including scales, arpeggios, etudes, and other supplementary material. Congruent with Suzuki Association of the Americas guidelines.

MUSC 773 - Seminar in Performance Pedagogy I (3 Credits)
Problems in piano pedagogy at the advanced level and directed teaching.

MUSC 774 - Seminar in Performance Pedagogy II (3 Credits)
Problems in piano pedagogy at the advanced level and directed teaching. Course may be repeated for a total of 9 credit hours.

MUSC 775 - Topics in Piano Pedagogy and Literature (3 Credits)
For pianists only. Topics such as Mozart sonatas, Beethoven sonatas, piano music of Debussy. May be repeated for credit as topic varies, 12 hrs max.

MUSC 776 - Special Topics in Piano Pedagogy (3 Credits)
Content varies by title. May be repeated as title varies.
MUSC 777 - Advanced Vocal Pedagogy (3 Credits)
Advanced study of the anatomy and function of the singing voice with application to the diagnosis and correction of problems in singing.
Prerequisites: MUSC 577.

MUSC 778 - Advanced Diction (2 Credits)
Practical application of teaching points in Suzuki Violin books 1 and 2. Includes observations of lessons and supervised teaching.

MUSC 780 - Opera Theater (1 Credit)
Study of selected operatic characters from a historical, psychological, and physical perspective.

MUSC 781 - Role Preparation (1 Credit)
Study of operatic role(s), with attention given to rhythmic accuracy, style, language/diction, translations, and interpretation.

MUSC 782 - Opera Production (1 Credit)
Supervised preparation and production of an opera.

MUSC 783 - College Music Teaching (3 Credits)
Trends in higher education, responsibilities of college teachers, strategies for effective teaching, the academic job search, and tenure and promotion processes.

MUSC 784 - Suzuki Practicum I (1 Credit)
Practical application of the teaching points in Suzuki Violin books 1 and 2. Includes observations of lessons and supervised teaching.

MUSC 785 - Suzuki Practicum II (1 Credit)
Practical application of the teaching points in Suzuki Violin books 3 and 4. Includes observations of lessons and supervised teaching.

MUSC 786 - Advanced Jazz Improvisation (3 Credits)
Applications of harmonic, melodic, and rhythmic concepts for the advanced jazz improvisation student. Exploration of different jazz improvisation areas such as "free," avant-garde, polytonal, and serial.

MUSC 787 - Special Topics in Music (1-3 Credits)
Content varies by title. May be repeated for credit as topics vary for a total of 12 credits.

MUSC 790 - Composition Recital (1 Credit)
Presentation of the student composer's work in a suitable professional setting.

MUSC 793 - Opera Role (1 Credit)
Public performance of a major opera role.

MUSC 794 - Concerto Recital (1 Credit)
Public performance of a major concerto with orchestra or appropriate ensemble.

MUSC 795 - Hamber Recital (1 Credit)
Performances of a public recital of chamber music.

MUSC 796 - Solo Recital (1 Credit)
Performance of a public recital in the student's performance area.

MUSC 799 - Thesis Preparation (1-3 Credits)

MUSC 801 - Advanced Performance Pedagogy (2 Credits)
Applied music teaching at the college level. Observation in two or more studios. Teaching experience on an individual basis under the direction of applied faculty members. Repeatable for maximum of four credits.

MUSC 811G - Doctoral Applied Music/Trumpet (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811N - Doctoral Applied Music/Classic Guitar (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811H - Doctoral Applied Music (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811O - Doctoral Applied Music/Organ (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811I - Doctoral Applied Music/Euphonium (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811P - Doctoral Applied Music/Piano (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811J - Doctoral Applied Music/Tuba (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811R - Doctoral Applied Music/Violin (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811K - Doctoral Applied Music/Percussion (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811S - Doctoral Applied Music/Viola (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811L - Doctoral Applied Music/Harpsichord (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.

MUSC 811T - Doctoral Applied Music/Violoncello (1-4 Credits)
Courses consist of individual instruction including individualized
assignments and regular private instruction and review. 811A-flute/
piccolo; 811B-oboe/English horn; 811C-clarinet; 811D-bassoon; 811Esaxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811Ieuphonium; 811J-tuba; 811K-percussion; 811L-harpsichord; 811N-classic
guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello;
811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting;
811Z-jazz. Repeatable for credit.


MUSC 811U - Doctoral Applied Music/Double Bass (1-4 Credits)
Courses consist of individual instruction including individualized assignments and regular private instruction and review. 811A-flute/piccolo; 811B-octave/English horn; 811C-clarinet; 811D-bassoon; 811E-saxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811-euphonium; 811J-tuba; 811K-percussion; 811L-harpischord; 811N-classic guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello; 811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting; 811Z-jazz. Repeatable for credit.

MUSC 811V - Doctoral Applied Music/Voice (1-4 Credits)
Courses consist of individual instruction including individualized assignments and regular private instruction and review. 811A-flute/piccolo; 811B-octave/English horn; 811C-clarinet; 811D-bassoon; 811E-saxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811-euphonium; 811J-tuba; 811K-percussion; 811L-harpischord; 811N-classic guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello; 811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting; 811Z-jazz. Repeatable for credit.

MUSC 811W - Doctoral Applied Music/Service Playing (1-4 Credits)
Courses consist of individual instruction including individualized assignments and regular private instruction and review. 811A-flute/piccolo; 811B-octave/English horn; 811C-clarinet; 811D-bassoon; 811E-saxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811-euphonium; 811J-tuba; 811K-percussion; 811L-harpischord; 811N-classic guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello; 811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting; 811Z-jazz. Repeatable for credit.

MUSC 811Y - Doctoral Applied Music/Conducting (1-4 Credits)
Courses consist of individual instruction including individualized assignments and regular private instruction and review. 811A-flute/piccolo; 811B-octave/English horn; 811C-clarinet; 811D-bassoon; 811E-saxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811-euphonium; 811J-tuba; 811K-percussion; 811L-harpischord; 811N-classic guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello; 811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting; 811Z-jazz. Repeatable for credit.

MUSC 811Z - Doctoral Applied Music/Jazz (1-4 Credits)
Courses consist of individual instruction including individualized assignments and regular private instruction and review. 811A-flute/piccolo; 811B-octave/English horn; 811C-clarinet; 811D-bassoon; 811E-saxophone; 811F-French horn; 811G-trumpet; 811H-trombone; 811-euphonium; 811J-tuba; 811K-percussion; 811L-harpischord; 811N-classic guitar; 811O-organ; 811P-piano; 811R-violin; 811S-viola; 811T-violoncello; 811U-double bass; 811V-voice; 811W-service playing; 811Y-conducting; 811Z-jazz. Repeatable for credit.

MUSC 816 - Composition (1-3 Credits)
Original composition. May be repeated for credit.

MUSC 890 - Composition Recital (1 Credit)
Presentation of predissertation doctoral compositions in a professional setting.

MUSC 891 - Recital Preparation (1-3 Credits)

MUSC 892 - Lecture Recital (1 Credit)
Public presentation of a lecture recital.

MUSC 893 - Opera/Oratorio Role (1 Credit)
Public performance of a major opera or oratorio role.

MUSC 894 - Concerto Recital (1 Credit)
Public performance of a major concerto with orchestra or appropriate ensemble.

MUSC 895 - Chamber Recital (1 Credit)
Performance of a public recital of chamber music.

MUSC 896 - Solo Recital (1 Credit)
Performance of a public recital in the student's primary performance area.

MUSC 897 - Document Preparation (1-2 Credits)

MUSC 898 - Treatise Preparation (1-6 Credits)

MUSC 899 - Dissertation Preparation (1-12 Credits)

Music Education (MUED)

MUED 533 - Methods for String Instruction I (2 Credits)
Fundamentals of teaching orchestral stringed instruments in school string and orchestra classes. Emphasis on sequential instruction, materials, and classroom management.
Prerequisites: C or better in both MUED 104 and MUED 200.
Corequisite: MUED 533P.

MUED 533P - Practicum in Methods of String Instruction I (1 Credit)
Practical application of string methods and materials in public and community school settings. Not auditable.
Corequisite: MUED 533.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

MUED 534 - Methods of String Instruction II (2 Credits)
Continued study of methods, materials, and concepts of teaching orchestral stringed instruments in school string and orchestra classes. Emphasis on rehearsal techniques and curricula.
Prerequisites: MUED 533, MUSC 101.
Corequisite: MUED 534P.

MUED 534P - Practicum in Methods of String Instruction II (1 Credit)
Practical application of string methods and materials in public and community school settings. Not auditable.
Corequisite: MUED 534.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

MUED 551 - The Middle School Band (2 Credits)
Study of teaching materials, methods, literature, and educational practices used in middle school band settings.
Prerequisites: C or better in each of MUED 105, MUED 106, and MUED 200.

MUED 552 - The High School Band (2 Credits)
Study of teaching materials, methods, literature, and educational practices used in high school band settings.
Prerequisites: MUED 551.

MUED 554 - Workshop in Music Education (1-3 Credits)
Selected topics in music education. May be repeated as the topic varies. Credits 1-3 per registration; 12 maximum.
MUED 555 - Integrating Music into the Elementary Classroom (3 Credits)
Develop activities and learning plans that integrate music into language arts, math, science, social studies, ELA, and learning for students with special needs. Apply those lessons in practicums with children.

MUED 557 - Wind Pedagogy II (2 Credits)
Continued study of the issues in playing and teaching wind instruments in a heterogeneous class. Special study of problems unique to each woodwind and brass instrument regarding fingering and intonation.
Prerequisites: MUED 357 or admission to MAT (music) program.

MUED 558 - Arranging for the Marching Band (2 Credits)
Instruction and practice in arranging music for the marching band.

MUED 564 - String Instrument Pedagogy (2 Credits)
Principles and practices in teaching string instruments, including Suzuki and Rolland. Emphasis on teaching in the private studio.

MUED 565 - Specialized Elementary Music Methods (2 Credits)
Advanced study of Orff, Kodaly, Dalcroze, and Gordon music learning theories as applied in elementary schools.
Prerequisites: MUED 465.

MUED 568 - Organization and Administration of Music Programs (2 Credits)
Topics include materials and techniques of class teaching, equipment purchase, budgeting, recruiting, public relations, and the music library.
Prerequisites: C or better in MUED 200.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

MUED 568P - Practicum in Instrumental Music (1 Credit)
Practical application of instrumental methods and techniques in school settings. Not auditable.
Corequisite: MUED 568.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

MUED 700 - Independent Study in Music Education (1-3 Credits)
This course is designed for graduate students who wish to pursue a study of various areas of music education according to their particular needs.

MUED 731 - Teaching Internship in Music (12 Credits)
This course is designed to provide a full semester of field experience in the public school for Master of Arts in Teaching (music) degree participants. Not Auditable.
Prerequisites: Acceptance into Professional Program in Education.

MUED 732 - Music Teaching Internship Seminar (3 Credits)
A series of seminars designed to enhance the student teaching experience. Topics include classroom management, lesson planning, assessment, and curriculum development.
Prerequisites: MUED 731 and Acceptance into Professional Program in Education.

MUED 752 - Psychology of Music (3 Credits)
Study of the physical factors involved with the production and perception of musical sound; the tests for measuring music aptitude and achievement; the psychology of learning applied to music.

MUED 753 - Instrumental Development and Related Materials (3 Credits)
Detailed study and analysis of techniques used for the development of the instrumental program in the public schools; diagnosis of problems relating to strings, woodwinds, brass, and percussion; study and evaluation (including the problems in selection and use) of literature and materials for solos, small ensembles, bands, and orchestras suitable for elementary, junior, and senior high schools.

MUED 754 - Music Administration and Curriculum (3 Credits)
Concepts of and trends and practices in supervision; the place of music in the total program of education; consideration of current types of administrative organizations; study of administrative problems including scheduling and budgeting; consideration of effective music programs in city and county school systems; in-service education and workshop techniques; school and community relationships.

MUED 756 - Choral Development and Related Materials (3 Credits)
Study of choral problems from the classroom point of view; techniques of voice development in classes; emphasis on style, interpretation, rehearsal techniques, rhythm, tone quality, and diction; study and evaluation of choral compositions from Palestrina to the present day available for use in the public schools at all levels of instruction.

MUED 757 - Seminar in Elementary School Music (3 Credits)
A survey and evaluation of music book series for the elementary and middle school; an investigation of contemporary developments in pedagogy and in the application of research findings; and the formulation of a topical bibliography.

MUED 781 - Advanced Brass Pedagogy (3 Credits)
Pedagogical methods and techniques of brass instruction, and a survey of music literature appropriate for intermediate through advanced level.

MUED 782 - Advanced Woodwind Pedagogy (3 Credits)
An investigation of pedagogical methods and techniques of woodwind instruction through performance, and a survey of music literature appropriate for intermediate through advanced levels.

MUED 783 - Advanced Wind Pedagogy (3 Credits)
Pedagogical methods and techniques of wind instruction. Special study of problems unique to each instrument relating to care and repair, embouchure, tone production, articulation, fingering, intonation, and teaching materials.

MUED 784 - Band Literature (3 Credits)
History and literature of the wind band/ensemble.

MUED 785 - Measurement and Evaluation of Music Learning (3 Credits)
Selection and development of appropriate music learning measurement and evaluation techniques.

MUED 790 - Principles of Music Education (3 Credits)
Seminar on selected topics in music education.

MUED 791 - History and Philosophy of Music Education (3 Credits)
History of music education in the United States; comparative music education in foreign countries; philosophies that have influenced music education; and socio-cultural effects of music in the United States

MUED 792 - Music Learning Theory (3 Credits)
Application of learning theory to music.

MUED 793 - Topics in Music Education (1-3 Credits)
May be repeated for up to twelve credits. Topic for any semester to be announced by title in the schedule of classes.

MUED 794 - New Directions in Music Education (3 Credits)
Current trends in music education and an examination of how these issues affect music teaching and learning.
Prerequisites:

- NPSY 758 - Classification and Assessment of Mental Disorders (3 Credits)
  Classification of mental disorders using the DSM-IV, standard reference of the American Psychiatric Association, and the interpretation of formalized evaluations and appraisal techniques in achieving differential diagnoses.
  Prerequisites: NPSY 757.

- NPSY 760 - Addictions Rehabilitation (3 Credits)
  Theory, treatment, and psychological aspects of addictions to alcohol and other drugs.

- NPSY 761 - Dual Diagnosis (3 Credits)
  Current research and models for rehabilitation of individuals with a substance abuse/dependency and other mental illness. Based on analyses of case studies.
  Prerequisites: NPSY 757 and NPSY 760.

- NPSY 763 - LGBT Issues Counseling and Rehabilitation (3 Credits)
  Contemporary issues related to the provision of effective counseling and rehabilitation services with the lesbian, gay, bisexual, transgendered (LGBT) population. The focus will be on attaining a level of applied knowledge and awareness commensurate with master's level professional practice.

**Nursing (NURS)**

- NURS 504 - Emergency Preparedness: Implications for Health Care Professionals (3 Credits)
  Principles of emergency preparedness with implications for health care at the local, regional, national, and global levels.

- NURS 505 - Caring for Limited English Proficient Patients (3 Credits)
  Principles and policies for clinical practice with Limited English Proficient patients.

- NURS 506 - Special Topics in International Nursing (3 Credits)
  Experiential field study to examine international nursing in another country. Course content varies and will be announced in the schedule of courses by title. May be repeated for credit.
  Prerequisites: NURS 312.

- NURS 534 - The Rural Interdisciplinary Practicum (1-6 Credits)
  Students live and practice in a rural, interdisciplinary environment and participate in an organized community-based health care activity. Contract approved by instructor and department chair is required for undergraduate students.
  Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

- NURS 541 - Issues in Women's Health (3 Credits)
  An exploration of women's health and health care concerns from multiple perspectives.
  Cross-listed course: WGST 541
  Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

- NURS 553 - In-Service Education (3 Credits)
  Organizing, developing, implementing, and evaluating the in-service education program.

- NURS 571 - Special Topics (3 Credits)
  Topics vary by title, consent of instructor.

- NURS 700 - Theoretical and Conceptual Foundation for Nursing (3 Credits)
  Concept development, model and theoretical framework interpretation, and theoretical formulations in nursing. Critical analysis of current theories of nursing, related nursing research, and selected theories from natural, behavioral, and applied health sciences.
NURS 702 - Pharmacologic Mgmt in Pediatric, Adult, & Gerontological Patients Across Hlthcare Delivery Continuum (3 Credits)
Pharmacologic management of acute and chronic health problems of pediatric, adult and gerontological patients across the healthcare delivery continuum.
Prerequisites: NURS 707.

NURS 703 - Executive Leadership Development Cockcroft (4 Credits)
Intensive engagement in self-assessment of leadership ability and development of proven successful leadership strategies relevant to practice, academia and policy development in complex interdisciplinary healthcare systems. Restricted to acceptance into the Amy C. Cockcroft Nursing Leadership Development program.

NURS 704 - Advanced Health Assessment and Diagnostic Reasoning (3 Credits)
Advanced theory and practice in critical thinking, physical assessment, diagnostic reasoning for clients across the life span to identify pathologic variations and initiate appropriate interventions. Didactic, lab, and field study.
Prerequisites: NURS 702 and NURS 707.

NURS 705 - Acute Problems of Adults/Gerontology and Women's Health in Primary Care (3 Credits)
Management of primary care to adult and gerontological clients across the delivery continuum who present with lifestyle behaviors, reproductive practices, and acute health problems. Includes didactic and clinical practice. Students who have not had advanced physical assessment within two years prior to taking this course must successfully validate their skills.
Prerequisites: NURS 702 and NURS 704.

NURS 706 - Primary Care Nursing of Children (3 Credits)
Advanced theory of histories, physical examinations, and diagnostic algorithms in primary care of children with health problems and developmental well care and counseling. Didactic and field study.
Prerequisites: NURS 702 and NURS 704.

NURS 707 - Advanced Pathophysiology for Nurses (3 Credits)
Advanced concepts of pathophysiological functioning with application to advanced nursing practice in selected specialty areas.

NURS 708 - Conceptual Basis for Family and Community Health Nursing (3 Credits)
Key concepts, theories, and issues relevant to practice as a specialist in public health/community health nursing.
Prerequisite or Corequisite: NURS 700.

NURS 709 - Pathophysiological Concepts for Nursing Practice (3 Credits)
Pathophysiological processes and application for nursing practice.
Corequisite: NURS 711.

NURS 710 - Role of the Nurse Educator (3 Credits)
Explores the integrated roles of the nurse educator, including teaching, research/scholarship, service and practice.

NURS 711 - Pharmacotherapies for Nursing Practice (3 Credits)
Pharmacotherapies treatments and application for nursing practice.
Corequisite: NURS 709.

NURS 712 - Health Assessment for Nursing Practice (3 Credits)
Health assessment processes and application for nursing practice.
Corequisite: NURS 709, NURS 711, NURS 713.

NURS 713 - Nursing Practice Fundamentals (4 Credits)
Introduction to cognitive, affective, and psychomotor skills and technology needed for nursing interventions.
Corequisite: NURS 709, NURS 711, NURS 712.

NURS 714 - Maternal/Newborn Nursing Practice (4 Credits)
Nursing interventions focusing on health promotion, restoration, and support to childbearing families. Field study required.
Prerequisites: NURS 712, NURS 713.
Corequisite: NURS 723.

NURS 715 - Pediatric Nursing Practice (4 Credits)
Nursing care of families with children, focusing on support for child growth and development, health promotion and health restoration. Field study required.
Prerequisites: NURS 712, NURS 713.
Corequisite: NURS 723.

NURS 717 - Application of Basic Statistics for Nursing Practice & Service Management (3 Credits)
Application of basic statistical principles and procedures to address common nursing practice issues and guide nursing practice and management.

NURS 718 - Diagnostic Interpretation and Therapeutic Modalities (3 Credits)
Analysis of diagnostic and laboratory findings for clinical decision-making in advanced practice nursing. Course incorporates selected medical and nursing diagnostic and therapeutic modalities.
Prerequisites: NURS 702 and NURS 707.

NURS 720 - Clinical Application of Population Analysis (3 Credits)
Application of concepts and principles of epidemiology, genetics/genomics, health informatics, and population health assessment to support clinical decision-making skills within different practice environments and health policy development.
Prerequisites: NURS 717.

NURS 721 - Gerontological Nursing Care (2 Credits)
Nursing care focusing on health promotion, restoration and support of older adults.
Prerequisites: NURS 712, NURS 713.

NURS 722 - Adv Pract Nurs Mgmt of Chronic Diseases in Pediatric, Adult/Gero Patients across the Continuum (3 Credits)
Advanced practice nursing of pediatric, adult and gerontological patients with chronic illnesses and disabilities across the health continuum.
Prerequisites: NURS 704, NURS 707, NURS 702.

NURS 723 - Medical Surgical Nursing Practice I (5 Credits)
Nursing Care of the patient with Chronic Health Problems.
Prerequisites: NURS 709, NURS 711, NURS 712, NURS 713.
Corequisite: NURS 714, NURS 715.

NURS 724 - Education in Nursing (3 Credits)
Introduction to the teaching-learning environment in nursing, including teaching-learning theories, strategies, assessment and facilitation of learner/learning and provides a framework for the nurse educator in the educational environment.
NURS 725 - Education: Curriculum and Evaluation (3 Credits)
The course introduces principles of curriculum development, design, implementation and evaluation. Evaluation measures explore internal and external constituents, including meeting that reflect contemporary health care trends and educational expectations, and prepare graduates to function effectively in the health measurement techniques are examined.

NURS 726 - Medical Surgical Nursing Practice II (5 Credits)
Nursing care of the patient with acute health issues.
Prerequisites: NURS 712, NURS 713, NURS 723.
Corequisite: NURS 745, NURS 729, NURS 730.

NURS 727 - Teaching Practicum in Nursing (3 Credits)
Supervised teaching experiences with nursing students, patients, and staff in selected health care and academic settings.

NURS 729 - Psychiatric Nursing Practice (4 Credits)
Nursing care of clients experiencing psychiatric/mental health problems, with a focus on health promotion, restoration, and support.
Prerequisites: NURS 712, NURS 713, NURS 721, NURS 723.
Corequisite: NURS 726.

NURS 730 - Population Health Nursing (3 Credits)
Trends of the public health workforce capacity and issues impacting the health of individuals and communities.

NURS 731 - Management of Psychiatric Mental Health Problems across the Lifespan (3 Credits)
Management of Psychiatric Mental Health Problems.
Prerequisites: NURS 702, NURS 704, NURS 707, NURS 761; Students who have not completed these requirements will be dropped from 731.

NURS 732 - Management of Complex Mental Health Problems (3 Credits)
Clinical management of complex mental health problems across the lifespan in hospital and community settings. Theory and field study.
Prerequisites: NURS 702, NURS 704, NURS 707, NURS 761, NURS 731; Students who have not completed these requirements will be dropped from 732.

NURS 734 - Conceptual Basis of Health Systems (3 Credits)
Organizational, systems, and complexity theory analysis with an emphasis on nursing leadership roles, strategic planning, systems thinking and conceptualizing organizations as complex adaptive systems.

NURS 736 - Women, Work, and Health: Global Perspectives (3 Credits)
Intersections of women's work and women's health in diverse social, cultural, economic, geographic, and political contexts.

NURS 737 - Foundations for DNP Development (3 Credits)
This course is designed to introduce students to the Doctor of Nursing Practice degree to include the roles of expert clinician, clinical scholar, policy and patient advocate, and leader in health care.

NURS 738 - Financing of Health Care (3 Credits)
Application of the principles of financial management to the systems involved in the delivery of health care. 03: 07/05/2019.

NURS 739 - Online Instruction and Technology in Nursing Education (3 Credits)
Principles of evidenced-base practices for online/distance-based education and technology in nursing education.

NURS 740 - Facilitative Processes in Nursing Administration (3 Credits)
Issues, structures, and processes employed in providing a supportive environment for professional nursing practice. Emphasis on development of professional nursing systems models.

NURS 741 - Coordinating Processes in Nursing Administration (3 Credits)
Methods for supporting nursing systems with resources of health care delivery systems. Focus is on professional and systems relationships.
Prerequisites: NURS 740.

NURS 742 - Integrative Processes in Nursing Administration (3 Credits)
Strategies for maximizing the potential of nursing services within organizations. Methods for meeting the challenges presented by complex changes occurring in the health care system. Practicum.
Prerequisites: NURS 741.

NURS 743 - Advanced Nursing Practicum for the Educator (3 Credits)
Precepted clinical immersion experience in specialty area with emphasis on the role of the masters prepared nursing educator's role.
Prerequisites: B or better in NURS 707, NURS 702, and NURS 704.

NURS 745 - Nursing Ethics, Policy & Advocacy (3 Credits)
Issues and trends in ethics, policy and advocacy for nursing practice.

NURS 746 - Informatics, Technology, and Emerging Issues (3 Credits)
Explores the application of informatics and technology in healthcare and other emerging issues in the field.

NURS 747 - Leadership and Safety for Nursing Practice (3 Credits)
Concepts and principles of leadership roles and the management functions of professional nurses in a contemporary health care environment, interprofessional relationships and quality/safety principles. Students will also utilize evidence-based research to examine clinical questions.
Prerequisites: NURS 726, NURS 729, NURS 745.
Corequisite: NURS 746, NURS 789, NURS 750.

NURS 748 - Care Coordination and Outcomes Management (3 Credits)
Strategies for effective care coordination and effective measurement of patient outcomes related to care transitions.

NURS 750 - Transition to Nursing Practice I (3 Credits)
Focuses on quality/safety in the healthcare setting and includes field study.
Prerequisites: NURS 714, NURS 715, NURS 726, NURS 729.
Corequisite: NURS 746, NURS 747, NURS 789.

NURS 751 - Transition to Nursing Practice II (3 Credits)
Application and synthesizing knowledge and skills learned throughout the nursing program. Students will integrate content from previous courses during class time and clinical experiences.
Prerequisites: NURS 750.
Corequisite: NURS 748, NURS 720, NURS 791.

NURS 756 - Advanced Primary Care of Children for the FNP (2 Credits)
Emphasis on children's growth & development, well care, assessment and management strategies for problems commonly encountered in primary care are introduced.
Prerequisites: NURS 704.
Corequisite: NURS 718, NURS 757.
NURS 757 - Advanced Primary Care of Women for the FNP (2 Credits)
Emphasis on women's health, including well pregnancy, and assessment and management strategies for problems commonly encountered in primary care are introduced.
Prerequisites: NURS 704.
Corequisite: NURS 756.

NURS 758 - Acute Problems in Primary Care for the FNP (6 Credits)
Management of acute health problems in the primary care setting for the FNP. Includes didactic and clinical practicum.
Prerequisites: NURS 756, NURS 757.

NURS 759 - Management of Common Chronic Health Problems for the FNP (6 Credits)
Advanced Practice Nursing of Pediatric, Adult, and Gerontological Patients with chronic illnesses and disabilities across the lifespan for the FNP. Includes didactic and clinical practicum.
Prerequisites: NURS 758.

NURS 760 - Family Nurse Practitioner Legal, Ethical, and Role Transition (2 Credits)
Focuses on the role of the nurse practitioner. Special consideration is given to business, policy, legal, cultural, and ethical issues regarding primary care and FNP practice.
Prerequisites: NURS 759.

NURS 760A - Family Nurse Practitioner Role Practicum (2 Credits)
Supervised field study in advanced practice nursing for primary care patients (pediatric, adult, and gerontological) across the delivery continuum.
Prerequisites: NURS 759.
Corequisite: NURS 760.

NURS 761 - Neuroscientific Basis for Pharmacological & Nonpharmacological Treatments for Psychiatric Conditions (4 Credits)
Links neurology to behavior, psychopathology and psychopharmacology in order to prepare the advanced practice psychiatric nurse to make evidence supported treatment decisions.
Prerequisites: NURS 704.
Corequisite: NURS 718.

NURS 763 - Advanced Psychiatric Nurse Practicum I: Management of Psychiatric/Mental Health Conditions (6 Credits)
Comprehensive biopsychosocial assessment, treatment and management of psychiatric mental health conditions across the lifespan in primary and acute care settings. Didactic and field study.
Prerequisites: NURS 761.

NURS 764 - Advanced Psychiatric Nurse Practicum II: Management of Complex Psychiatric/Mental Health Conditions (6 Credits)
Pharmacological and behavioral management of complex mental health problems across the lifespan in hospital and community settings. Didactic and field study.
Prerequisites: NURS 763.

NURS 768 - Endocrine, Metabolic & Nutrition Nurse Practitioner: Pathophysiology & Clinical Management (2 Credits)
Focuses on the role of the nurse practitioner. Special consideration is given to business, policy, legal, cultural, and ethical issues regarding PMHNLP practice.
Prerequisites: NURS 764.

NURS 768A - Advanced Psychiatric Nurse Practicum III: Role Development (2 Credits)
Supervised field study in advanced practice nursing for the psychiatric mental health nurse practitioner.
Prerequisites: NURS 764.
Corequisite: NURS 768.

NURS 769 - Independent Study in Nursing (1-6 Credits)
Opportunity for self-directed study in a theoretical area related to nursing, in an area of clinical nursing practice, or in an area of functional nursing practice.
Prerequisites: Required consent of major advisor and faculty member supervising the independent study

NURS 770 - Emergent Diagnostics in Nursing (1 Credit)
Overview of emergent diagnostic topics.

NURS 771 - Selected Topics (3 Credits)

NURS 772 - Introduction of Acute Care Adult and Gerontological Health Problems I (3 Credits)
Introduction of selected acutely ill adult and gerontological patients.
Prerequisites: NURS 704.
Corequisite: NURS 718.

NURS 773 - Principles of Acute Care Adult and Gerontological Health Problems I (6 Credits)
Management of selected acutely ill adult and gerontological patients. Didactic and field study.
Prerequisites: NURS 772.

NURS 774 - Principles of Acute Care Adult and Gerontological Complex Health Problems II (6 Credits)
Management of selected acutely ill adult and gerontological patients. Didactic and field study.
Prerequisites: NURS 773.

NURS 775 - Foundations in Nursing Informatics (3 Credits)
Overview of nursing informatics and current trends in health care technology.

NURS 777 - Nursing Informatics Practicum (3 Credits)
Application of nursing informatics competencies to organizational change in health care systems.

NURS 778 - Advanced Practice Role: Adult Gerontology Acute Care NP (AGACNP) (2 Credits)
Focuses on the role of the nurse practitioner. Special consideration is given to business, policy, legal, cultural, and ethical issues regarding the AGACNP.
Corequisite: NURS 778A.

NURS 778A - Practicum of Advanced Practice Role: Adult Gerontology Acute Care NP (AGACNP) (2 Credits)
Supervised field study in advanced practice nursing for acutely ill adult and gerontological patients across the delivery continuum.
Corequisite: NURS 778.
NURS 779 - Health Policy (3 Credits)
Analysis of issues and forces affecting health delivery through the public sector; major models of political decision-making; and current health legislation.

NURS 780 - Organizational Theories and Systems in Healthcare (3 Credits)
Systems theories applied to complex organizations, emphasizing advanced nursing roles in strategic planning and systems thinking within current and anticipated healthcare environments. 
**Prerequisites:** NURS 737, NURS 817.

NURS 781 - Applied Technology in Health Care (3 Credits)
Computer applications and other technological advances in nursing and health care delivery. Nursing administration, patient care management, and research applications. 
**Prerequisites:** NURS 817.

NURS 783 - Clinical Project Immersion & Proposal Development (3 Credits)
Provides students the opportunity to integrate nursing theory, research and advanced nursing practice into a health care clinical project through interactive seminar format. Requires students to create a clinical project that transforms clinical practice for a selected population and incorporates process and outcome evaluations. 
**Prerequisites:** NURS 819 and NURS 781.

NURS 786 - Management of Acute Care Adult and Gerontological Health Problems I (4-6 Credits)
Management of selected acutely ill adult and gerontological patients. Practicum required. 
**Prerequisites:** NURS 704, NURS 707, and NURS 718.

NURS 787 - Management of Acute Adult and Gerontological Health Problems II (5,6 Credits)
Management of acutely ill adult and gerontological patients. Practicum required. 
**Prerequisites:** NURS 786.

NURS 789 - Statistical and Research Methods for Nursing Practice (3 Credits)
Exploration of research methods, including application of basic statistical principles and procedures. Evaluation of published nursing research reports. 
**Prerequisites:** NURS 700.

NURS 790 - Research Methods for Nursing (3 Credits)
Development of nursing research and methodological approaches to the study of nursing problems. 
**Prerequisites:** NURS 700 and approved statistics course.

NURS 791 - Seminar in Clinical Nursing Research (3 Credits)
Survey and critical analysis of current research in clinical nursing and related disciplines. 
**Prerequisites:** NURS 790.

NURS 793 - Advanced Practice Practicum for Emphasis Area: Primary Care (3-4) (3-4 Credits)
Supervised field study in advanced practice nursing for primary care patients (pediatric, adult and gerontological) across the delivery continuum. Seminars on related topics. 
**Prerequisites:** Placement and credit determined with advisement.

NURS 794 - Ethics and the Health Sciences (1-4 Credits)
An introduction to the formal and informal codes of professional conduct of health science disciplines and a discussion of their implications for interprofessional research, clinical practice, and administration. 03: 07/05/2019.

NURS 796 - Advanced Practice Practicum: AGACNP (3-4 Credits)
Supervised field study in advanced practice nursing for acutely ill adult and gerontological patients across the delivery continuum. Seminars on related topics. Any graduate student who is not currently in good academic standing in the College of Nursing is excluded. 
**Prerequisites:** NURS 786, NURS 787.

NURS 798 - Advanced Practice Practicum: PMHNP across the Lifespan (3-4 Credits)
Supervised field study in advanced practice nursing. 
**Prerequisites:** NURS 731, NURS 732, NURS 761.

NURS 799 - Thesis Preparation (1-6 Credits)
May be repeated; only 6 hours may be applied to the degree. 
**Prerequisites:** NURS 790.

NURS 800 - Philosophical and Theoretical Foundations of Nursing Science (3 Credits)
A critical examination of the evolution of approaches to nursing theory and nursing science and the impact on research theory development and clinical practice.

NURS 801 - Theory Analysis and Application for Nursing Science (3 Credits)
Examination and critique of theories from nursing and the physical, biomedical behavioral, and sciences and their application to nursing science. 
**Prerequisites:** NURS 800.

NURS 803 - Scientific Knowledge in Nursing (3 Credits)
In-depth examination of a specific nursing science knowledge domain. 
**Prerequisites:** NURS 801, NURS 804, NURS 810, NURS 811, NURS 813.

NURS 804 - The Role of the Nurse Scientist (3 Credits)
Selected roles and professional responsibilities in diverse settings and preliminary application of basic research skills.

NURS 805 - Advanced Nursing Leadership (3 Credits)
Nursing leadership in complex health care organizations.

NURS 806 - Nurse Executive Leadership I (3 Credits)
This course is the first of two courses focusing on advanced organizational leadership. Students prepare for top-level executive leadership roles within health care systems or health-related business organizations. Field study required. 
**Prerequisites:** NURS 819.

NURS 807 - Nurse Executive Leadership II (3 Credits)
This course is the second of two courses building advanced leadership knowledge and competencies for top-level organizational leadership roles within health care systems or health-related business organizations. The emphasis of this course is leadership for clinical excellence. Field study required. 
**Prerequisites:** NURS 806.

NURS 808 - Advanced Nursing in Population Health (3 Credits)
Application of evidence-based nursing interventions to issues in population health.
NURS 809 - Advanced Healthcare Financing (3 Credits)
Course provides the tools for financial management in the health services industry. Case studies provide insight into complex financial decisions required for healthcare administration, with a focus on financial and business aspects of healthcare administration with implications on patient care quality and outcomes.
Prerequisites: NURS 738 or equivalent graduate level finance class.

NURS 810 - Nursing Research Methods I (3 Credits)
An introduction to methods of inquiry utilized in the biomedical, behavioral, and social sciences and their application for nursing research.
Prerequisites: Completion of a graduate level statistics course (eg - BIOS 700 or equivalent).

NURS 811 - Nursing Research Methods II (3 Credits)
Advanced quantitative methods, designs, and analysis techniques used in the development of nursing science.
Prerequisites: NURS 810 or EDRM 711 and BIOS 757 or equivalent.

NURS 812 - Measurement in Nursing Research (3 Credits)
Design and conduct of a measurement project related to the student's area of research interest.

NURS 813 - Nursing Research Methods III (3 Credits)
Examination and practical application of the diverse qualitative research epistemology, ontologies, methodologies and ethical issues.
Prerequisites: NURS 810.

NURS 814 - Observational Methods (3 Credits)
Quantitative observational research techniques, strategies for developing coding systems, determining reliability and validity, and analyzing data.

NURS 817 - Application of Statistics for Evidence Based Nursing Practice (3 Credits)
Application of intermediate inferential statistical techniques and procedures used to build and translate evidence based nursing practice.
Prerequisites: NURS 717 or equivalent graduate level stats course in the past 5 years.

NURS 819 - Evidence and Nursing Practice (3 Credits)
Analysis and synthesis of evidence needed for formulating recommendations for nursing practice.
Prerequisites: NURS 780.

NURS 840 - Independent Study in Nursing Science (1-6 Credits)
Independent study to meet the needs of individual students. Conferences with professor.

NURS 840A - Independent Study in Nursing Science (1-6 Credits)
Independent Study for doctoral student field study Restricted to: Graduate Nursing majors only - Doctoral level

NURS 850 - Selected Topics in Nursing Science (3 Credits)
Depth analysis of a specific method or content area of nursing research.

NURS 870 - Research Proposal Development (3 Credits)
An introduction to the methodological and practice concepts relevant to nursing research grant proposal development.
Prerequisites: NURS 811, NURS 813.

NURS 897 - DNP Project Preparation and Residency (1-6 Credits)
DNP project consists of two parts; synthesis of the literature related to a practice problem and application of findings in a practice setting.

NURS 898 - Research Internship (1-6 Credits)
Application of the principles and techniques of nursing research and theory through collaboration with a graduate nursing faculty mentor in an ongoing research project.

NURS 899 - Dissertation Preparation (1-12 Credits)
Minimum of 12 hours required for completion of degree.

Nursing (NURS)

OBTY - Obstetrics / Gynecology (OBTY)

OBTY 702 - Genetic Dilemma-Life Cyc (3 Credits)

PATH - Pathology (PATH)

PATH 710 - Neoplasia (3 Credits)
Survey course covering a broad range of topics on cancer, including definition, causes, control of cancer growth, similarities and differences between malignant and normal cells, role of viruses and carcinogens, mechanisms of metastasis, oncogenes, role of nutrition, and principles of treatment.
Prerequisites: BIOL 340 and CHEM 232 or consent of instructor

PATH 711 - Experimental Pathology (3 Credits)
Basic principles of pathologic processes of disease in organs and tissues at the gross and microscopic level. A review of normal anatomy and histology essential to an understanding of processes and organs and tissues that were normal before the disease began.

PATH 741A - Pathology I (4 Credits)
Lecture, laboratory, and discussion of special topics covering basic principles of disease, neoplasia, infectious disease, genetic diseases, diseases of the blood forming organs. One semester. Students will not be allowed to receive credit for both PATH 741A and 741B.

PATH 741B - Pathology I (4 Credits)
Lecture, laboratory, and discussion of special topics covering basic principles of disease, neoplasia, infectious disease, genetic diseases, diseases of the blood forming organs, heart and lung. For students who are planning to take PATH 742, Pathology II. Students will not be allowed to receive credit for both PATH 741A and 741B.

PATH 742 - Pathology II (4 Credits)
Lecture, laboratory, and discussion of special topics covering diseases of the digestive tract, endocrine system, nervous system, and skin and autoimmune diseases.
Prerequisites: PATH 741B

PATH 760 - Topics in Pathobiology (1 Credit)
Tutorial instruction in selected topics dealing with the molecular and cellular basis of disease. These topics may be drawn from the areas of inflammation, neoplasia, circulatory disturbances, medical genetics, infectious diseases, and cell injury and death.
Prerequisites: PATH 741.

PATH 770 - Seminar in Pathology (1 Credit)
Group discussion by students and faculty of current research articles in the area of disease mechanisms. May be taken four times for credit.
Prerequisites: PATH 741.

PATH 780 - Research in Disease Mechanisms (3-12 Credits)
This is a non-thesis course to provide training in specific laboratory techniques in experimental pathology. May be repeated for credit.
PHAR 700 - Principles of Pharmacology, Medicinal Chemistry, and Pharmaceutics (4 Credits)
This four credit hour course instructs students on the important fundamentals that define pharmaceutical sciences. Important concepts of pharmacology, medicinal chemistry and pharmaceutics are taught with the broad goal of understanding pharmaceutical agents at a molecular level. It is the introductory graduate level course for graduate students in the pharmaceutical sciences. It is also intended for graduate students in other related fields of biological, chemical, and biomedical sciences who wish to learn the principles of pharmaceutical sciences.
Prerequisites: PHAR 700.

PHAR 703 - Advanced Medicinal Chemistry I (2 Credits)
The interaction of natural and synthetic drugs with biological systems at the molecular and quasi-molecular level.

PHAR 704 - Advanced Medicinal Chemistry II (1-3 Credits)
An advanced study of natural and synthetic drugs by pharmacological classes, with emphasis on the application of principles covered in PHAR 703.

PHAR 705 - Advanced Medicinal Chemistry III (2-5 Credits)
A continuation of PHAR 704.

PHAR 706 - Advanced Medicinal Analysis (3 Credits)
A study of the medicinal analyses of an advanced nature with special emphasis on instrumental methods of medicinal analysis.

PHAR 707 - Heterocyclic Medicinal Chemistry (3 Credits)
A study of the fundamentals of heterocyclic nomenclature and the chemistry of both the heterocyclic medicinal products and the intermediates for their synthesis.

PHAR 708 - Natural Products Medicinal Chemistry (3 Credits)
The chemistry and biogenesis of alkaloids and antibiotics.

PHAR 709 - Advanced Biochemistry (3-4 Credits)
Lectures, seminars, demonstrations and laboratory work on recent and more technical advances in the field of biochemistry.

PHAR 710 - Advanced Biochemistry (3-4 Credits)
Lectures, seminars, demonstrations and laboratory work on recent and more technical advances in the field of biochemistry.

PHAR 711 - Seminar in Pharmaceutical Sciences (1 Credit)
Discussion and presentation of current topics in pharmacy administration. Required of all master's degree (2 credit hours) and Ph.D. degree (3 credit hours) candidates in the Department of Pharmacy Practice.

PHAR 711A - Seminar in Pharmacy Administration (1 Credit)
Discussion and presentation of current topics in pharmacy administration. Required of all master's degree (2 credit hours) and Ph.D. degree (3 credit hours) candidates in the Department of Pharmacy Practice.

PHAR 711B - Seminar in Pharmacy Administration (1 Credit)
Discussion and presentation of current topics in pharmacy administration. Required of all master's degree (2 credit hours) and Ph.D. degree (3 credit hours) candidates in the Department of Pharmacy Practice.

PHAR 711C - Seminar in Pharmacy Administration (1 Credit)
Discussion and presentation of current topics in pharmacy administration. Required of all master's degree (2 credit hours) and Ph.D. degree (3 credit hours) candidates in the Department of Pharmacy Practice.

PHAR 711D - Seminar in Pharmacy Administration (1 Credit)
Discussion and presentation of current topics in pharmacy administration. Required of all master's degree (2 credit hours) and Ph.D. degree (3 credit hours) candidates in the Department of Pharmacy Practice.

PHAR 712 - Seminar in Pharmaceutical Sciences (1 Credit)
Discussion of current topics in pharmaceutics, medicinal chemistry, and pharmacology. Required of all students. A maximum of 4 credit hours may be earned in PHAR 712 A-D.

PHAR 712A - Seminar in Pharmaceutical Sciences (1 Credit)
Discussion of current topics in pharmaceutics, medicinal chemistry, and pharmacology. Required of all students. A maximum of 4 credit hours may be earned in PHAR 712 A-D.

PHAR 712B - Seminar in Pharmaceutical Sciences (1 Credit)
Discussion of current topics in pharmaceutics, medicinal chemistry, and pharmacology. Required of all students. A maximum of 4 credit hours may be earned in PHAR 712 A-D.

PHAR 712C - Seminar in Pharmaceutical Sciences (1 Credit)
Discussion of current topics in pharmaceutics, medicinal chemistry, and pharmacology. Required of all students. A maximum of 4 credit hours may be earned in PHAR 712 A-D.

PHAR 712D - Seminar in Pharmaceutical Sciences (1 Credit)
Discussion of current topics in pharmaceutics, medicinal chemistry, and pharmacology. Required of all students. A maximum of 4 credit hours may be earned in PHAR 712 A-D.

PHAR 713 - Synthetic Medicinal Chemistry (3 Credits)
Application of synthetic procedures in the preparation of various medicinal and pharmaceutical chemicals and their intermediates.

PHAR 714 - Drug Design by Molecular Modeling and Computational Techniques (3 Credits)
Application of molecular modeling, computer graphics, and other computational techniques to the design of drugs.

PHAR 715 - Pharmacogenomics and Personalized Medicine (3 Credits)
Pharmacogenomics concepts and experimental approaches combined with pharmacotherapy realms.
PHAR 717 - Special Topics in Pharmacy (3 Credits)
Lectures, readings, and discussions on special areas of experimental pharmacy not offered in other courses.

PHAR 718 - Special Topics in Pharmacy (3 Credits)
Lectures, readings, and discussions on special areas of experimental pharmacy not offered in other courses.

PHAR 720 - Pharmacokinetics (3 Credits)
A study of the mathematical models used in research to describe drug changes in body fluids as related to pharmacologic effects. Includes the kinetics of dissolution, absorption, distribution, metabolism, and excretion after a drug reaches the general circulation. Three lecture and three laboratory hours per week.

PHAR 720L - Pharmacokinetics Lab (1 Credit)

PHAR 725 - Advanced Pharmaceutics I (2 Credits)
Physical, chemical, and kinetic concepts which apply to the design and evaluation of pharmaceutical systems.

PHAR 726 - Advanced Pharmaceutics II (3 Credits)
Application of chemical and physical concepts to the design and evaluation of pharmaceutical systems (dosage forms).

PHAR 732 - Radiation Protection (3 Credits)
The biological effects of ionizing radiation and the basic mechanisms which bring about these effects. Monitoring, dosimetry, hazard control, and legal responsibilities concerning ionizing radiation used in medicine.

PHAR 734 - Selected Topics in Neuropharmacology (2 Credits)
Neurochemical analysis of selected central nervous system neurotransmitter topics, including the kinetics of synthesis, storage and release, and the action of selected psychotherapeutic agents on these processes.

PHAR 735 - Cancer: Causes, Treatment, Prevention (2 Credits)
The molecular and biochemical basis of cancer and the therapeutic approaches in the prevention and treatment of cancer.

PHAR 736 - Advanced Pharmacology I (1-4 Credits)
Survey of drugs acting on the autonomic nervous system and the cardiovascular system; advanced topics in these areas and on antibiotics and chemotherapy.

PHAR 737 - Advanced Pharmacology II (1-4 Credits)
Survey of centrally acting drugs, anti-inflammatory and immunomodulating drugs, hormones, and vitamins; advanced topics in these areas and in drug design and drug toxicity/teratogenesis.

PHAR 738 - Basic Pharmacological Principles (2 Credits)
Factors that govern drug response, biochemical and molecular actions of drugs, and adverse effects induced by drugs.

PHAR 740 - Socio-Economics of Pharmacy Practice (3 Credits)

PHAR 741 - Pharmaceutical Outcomes Database Development (3 Credits)
Development and use of pharmaceutical outcomes databases.

PHAR 742 - Research Methods in Pharmaceutical and Health Outcomes Sciences (3 Credits)
The nature of the research process in the administrative and behavioral aspects of pharmacy practice. Emphasis on developing the skills to analyze the total drug use process.

PHAR 744 - Marketing of Drug Products (3 Credits)
The principles of marketing as applied to pharmaceutical products. Topics include various marketing institutions and the integration of these into the drug distribution system, and the duties of the market manager in a pharmaceutical firm.

PHAR 745 - International Pharmaceutical Marketing (3 Credits)
The principles of marketing applied to the international pharmaceutical industry. Emphasis on the marketing environment and institutions of pharmaceutical marketing in global markets.

PHAR 746 - Drug Benefits in Health Care Programs (3 Credits)
Detailed analysis of the third party prescription market including prescribing behavior, drug use, cost containment, legal issues, and quality of care.

PHAR 748 - Principles of Pharmacoeconomics (3 Credits)
Analytical techniques and theoretical principles for evaluating costs and consequences of pharmaceutical agents and services for the health care system and society.

PHAR 799 - Thesis Preparation (1-6 Credits)

PHAR 896 - Doctoral Directed Research (1-6 Credits)
Directed laboratory research and literature assignments supervised by graduate faculty.

PHAR 899 - Dissertation Preparation (1-12 Credits)

Philosophy (PHIL)

PHIL 501 - British Empiricism (3 Credits)
A historical and critical survey of the British philosophers of experience. Principal concentration is on Locke, Berkeley, and Hume.
Prerequisites: C or better in PHIL 304.

PHIL 502 - Continental Rationalism (3 Credits)
A critical and historical study of the 17th-century European philosophers. The works of Descartes, Spinoza, and Leibniz are emphasized.
Prerequisites: C or better in PHIL 304.

PHIL 503 - Analytic Philosophy (3 Credits)
A critical study of recent and contemporary works in philosophical analysis, and an evaluation of the purposes, methods, and results of this movement.
Prerequisites: C or better on 3 hours in philosophy beyond the 100 level.

PHIL 504 - Phenomenology and Existentialism (3 Credits)
A critical study of some fundamental themes in phenomenology and the philosophy of existence. Emphasis is placed on an intensive study of selected works of such writers as Kierkegaard, Jaspers, Husserl, and Heidegger.
Prerequisites: C or better in PHIL 304 or PHIL 305.

PHIL 505 - Plato (3 Credits)
An intensive study of selected Dialogues by Plato.
Prerequisites: C or better in PHIL 301.

PHIL 506 - Aristotle (3 Credits)
An intensive study of some of the more important of Aristotle’s works.
Prerequisites: C or better in PHIL 301.

PHIL 507 - Medieval Philosophy (3 Credits)
A historical and critical study of the works of the leading medieval philosophers.
Prerequisites: C or better in PHIL 303.
PHIL 508 - Hume (3 Credits)
An intensive study of the philosophical writings of Hume, especially A Treatise of Human Nature.
Prerequisites: C or better in PHIL 304.

PHIL 509 - Kant (3 Credits)
An intensive study of the work of Kant, especially the Critique of Pure Reason.
Prerequisites: C or better in PHIL 304.

PHIL 510 - Theory of Knowledge (3 Credits)
An examination of some representative theories of truth, meaning, probability, and perception.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 511 - Symbolic Logic (3 Credits)
A presentation and philosophical examination of the fundamentals of modern symbolic logic.
Prerequisites: C or better in PHIL 115.

PHIL 512 - Philosophy of Science (3 Credits)
A critical examination of methods and concepts of the sciences. Topics include scientific revolutions, the unity of science, experimentation, explanation, and evidence.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 513 - Philosophy of History (3 Credits)
A philosophical examination of historical inquiry. Theories of historical development. The logical problems of historical explanation.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 514 - Ethical Theory (3 Credits)
Survey of recent and historical developments in ethical theory with special emphasis on the meaning of ethical language and the forms of reasoning employed in discussing moral values.
Prerequisites: C or better in PHIL 320.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 515 - Philosophy of Religion (3 Credits)
A critical study of selected problems in the philosophy of religion. Emphasis is placed on problems relating to the existence of God, religious knowledge, and the language of religion.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 516 - Advanced Aesthetics (3 Credits)
Detailed examination of the literature on aesthetics.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 517 - Philosophy of Language (3 Credits)
An examination of concepts and problems such as meaning, reference, analyticity, definition, and the relation between logic and philosophy.
Prerequisites: C or higher in PHIL 114 or PHIL 511.

Cross-listed course: LING 565

PHIL 518 - Philosophy of the Social Sciences (3 Credits)
The goals of inquiry and problems such as objectivity, reduction, value freedom, and ideology.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 519 - Metaphysics (3 Credits)
Major issues in classical and modern metaphysics. Topics include the idea of first philosophy, being, substance, the problem of universals, essentialism, causation, time and space, and metaphysical method.
Prerequisites: C or better in PHIL 350 or PHIL 351 or PHIL 360.

PHIL 520 - Philosophy of Mind (3 Credits)
The concept of mind, the mind-body problem, emotions and cognition, the possibility of artificial minds, theories of embodied cognition.
Prerequisites: C or better in PHIL 350 or PHIL 351 or PHIL 360.

PHIL 521 - Mathematical Logic (3 Credits)
Axiomatic development of logic and the set-theoretic foundations of mathematics.
Prerequisites: C or better in PHIL 511.

PHIL 522 - Introduction to Semantics (3 Credits)
Introduction to the study of linguistic meaning, including the following topics: meaning, reference, and truth; the connections among language, thought, and reality; word meaning and sentence meaning; possible worlds and modality; thematic roles; meaning and context; presupposition and implicature; speech acts; formal semantics; and cognitive semantics.
Prerequisites: C or better in any of LING 300, LING 301, LING 600, PHIL 114, PHIL 511.

PHIL 523 - Advanced Topics in Logic (3 Credits)
Philosophical problems about logic, the development of philosophical logic, and the problems surrounding them.
Prerequisites: C or better in PHIL 511.

PHIL 524 - Philosophy of Biology (3 Credits)
Examination of major conceptual, theoretical, and methodological issues in biological science. Topics include reductionism, units of selection, adaptationism, relations between evolutionary and developmental biology and between biology and society.
Prerequisites: C or better in 3 hours of Philosophy beyond the 100 level.

PHIL 526 - Hellenistic Philosophy (3 Credits)
Survey of the major schools and trends in Hellenistic philosophy: Epicureans, Stoics, Academic Skeptics. Topics include eudaimonism, hedonism, monism, teleology, and the criterion of truth.
Prerequisites: C or better in PHIL 301 or PHIL 302.

PHIL 527 - Virtues, Acts, and Consequences (3 Credits)
Recent contributions to three central strands of ethical theory: virtue theory, deontology, and utilitarianism; historical roots and recent developments.
Prerequisites: C or better in PHIL 320.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 528 - Concepts of Evidence (3 Credits)
Systematic approaches to data analysis—Bayesian, Fisherian and decision theoretic—will be critically appraised. Applications of these theories to some problems of inductive logic: the paradoxes of confirmation, the role of simplicity, and the probability of inductive generalizations.
Prerequisites: C or better in PHIL 350 or PHIL 351 or PHIL 360.
PHIL 732 - Social Justice (3 Credits)
Recent theories of distributive justice and their application to such issues as redistribution of wealth, reverse discrimination, and the conflict between liberty and equality. Authors include Rawls, Nozick, Hayek, and Popper.
Prerequisites: C or better in PHIL 320 or PHIL 321 or PHIL 322 or PHIL 330 or PHIL 331.

Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Global Learning

PHIL 734 - Contemporary European Social Philosophy (3 Credits)
An examination of European social philosophy associated with either the Frankfurt School of Social Research or contemporary French Poststructuralism.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 735 - Ecofeminism (3 Credits)
An exploration of the connections between oppression of women and oppression of nature.
Prerequisites: 3 hours in philosophy beyond the 100 level.

Cross-listed course: WGST 535

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 756 - Language and Interpretation in Contemporary European Philosophy (3 Credits)
Selected contemporary European philosophical movements, their views on language, and their approach to interpretation: hermeneutics, structuralism, poststructuralism.
Prerequisites: C or better in PHIL 114.

PHIL 540 - Renaissance Philosophy (3 Credits)
Humanism (e.g., Petrarca), Platonism (e.g., Pico and Ficino), Aristotelianism (e.g., Pomponazzi), philosophies of nature (e.g., Telesio, Campanella, and Bruno), and Nicholas of Cusa, Erasmus, Montaigne, and Suarez.
Prerequisites: C or better in PHIL 301 or PHIL 302 or PHIL 303.

PHIL 550 - Health Care Ethics (3 Credits)
An exploration of the ethical dimensions of patient care in the clinical setting.
Prerequisites: C or better in PHIL 320 or PHIL 321 or PHIL 322 or PHIL 330 or PHIL 331.

PHIL 598 - Readings in Philosophy (3 Credits)
Prerequisite: 6 hours in philosophy beyond the 100 level.

PHIL 701 - Studies in Ancient Philosophy (3 Credits)

PHIL 705 - Studies in 17th- and 18th-Century Philosophy (3 Credits)

PHIL 706 - Studies in Continental Philosophy (3 Credits)
Study of the works of one or more major contemporary continental philosophers.

PHIL 707 - Studies in 19th-Century Philosophy (3 Credits)

PHIL 709 - Studies in 20th-Century Philosophy (3 Credits)

PHIL 710 - Ethics and the Health Sciences (1-4 Credits)
Students are introduced to formal and informal codes of professional conduct of various health science disciplines and understand the implications of these distinctions for interdisciplinary research, clinical practice, and administration. 03: 07/05/2019.

PHIL 711 - Studies in Ethics (3 Credits)

PHIL 712 - Studies in Theory of Knowledge (3 Credits)

PHIL 714 - Philosophy of Science (3 Credits)

PHIL 715 - Ethics in Criminal Justice (3 Credits)
Classic and contemporary theories of ethics and their applications to criminal justice decision-making.
Cross-listed course: CRJU 714

PHIL 716 - Philosophy of Mind (3 Credits)
Topics and problems arising in the philosophy of mind.

PHIL 717 - Pragmatic Theory (3 Credits)
Study of formal approaches to pragmatic phenomena such as focus, presupposition, and implicature; examination of deictic, contextual and perspectival expressions; survey of pragmatic frameworks such as Relevance Theory and Discourse Representation Theory; study of information structural properties of natural languages, including topic-comment structure, given-new contrasts, definiteness versus indefiniteness.
Prerequisites: LING 600 or LING 627.

Cross-listed course: LING 729

PHIL 718 - Studies in Philosophy of Language (3 Credits)
Examination of concepts such as meaning, reference, analyticity, and translational indeterminacy; evaluation of accounts of speech acts, the semantics of propositional attitudes, metaphor, and other pragmatic phenomena.
Cross-listed course: LING 765

PHIL 719 - Semantic Theory (3 Credits)
The formal study of linguistic meaning, including the following topics: Fregean truth-conditional semantics; lexical decomposition; predication and modification; lambda abstraction; generalized quantification; intentional and extensional contexts; tense, aspect, and modality; propositional attitudes; and indexicality.
Prerequisites: LING 600 or LING 627.

Cross-listed course: LING 728

PHIL 720 - Studies in Philosophy of Religion (3 Credits)

PHIL 721 - Pragmatism (3 Credits)

PHIL 723 - Hegel (3 Credits)

PHIL 724 - Speculative Metaphysics (3 Credits)

PHIL 735 - Contemporary Political Philosophy (3 Credits)
Recent work in philosophy regarding political and social values, principles of justice, political authority, institutions, and related subjects.

PHIL 760 - Special Topics in Philosophy (3 Credits)

PHIL 763 - Epistemology (3 Credits)
Survey of historical and recent trends in epistemology.

PHIL 764 - Metaphysics (3 Credits)
Survey of historical and recent trends in metaphysics.

PHIL 767 - Case Study in the Philosophy of Science (3 Credits)
Introduction to the method of studying historical cases in the philosophy of science. This course revolves around the sustained treatment of one or two such cases.

PHIL 769 - Jurisprudence (2-3 Credits)
An examination of a number of philosophical problems about the law: the nature and function of rules, the difference between legal rules and other rules, the nature of reasoning from legal rules, the concept of a legal system, and the relation of law and morals. 03: 07/05/2019.
PHIL 790 - Teaching Philosophy (3 Credits)
Materials, techniques, and problems of teaching philosophy. Repeatable for credit.

PHIL 797 - Independent Study (3 Credits)
Requires permission of instructor.

PHIL 798 - Research Seminar (1 Credit)
Student and faculty presentations of current research in specified subject areas. Content varies. May be repeated for credit.

PHIL 799 - Thesis Preparation (1-9 Credits)

PHIL 835 - Seminar in Environmental Ethics (3 Credits)
Examination of the intellectual, cultural, and ethical frameworks within which environmental problems arise and are solved.
Cross-listed course: ENVR 835

PHIL 847 - Modern Philosophies of Education (3 Credits)
Critical comparison of present-day schools of thought on the nature, objectives, and functions of American education.
Prerequisites: Education 744 or equivalent.
Cross-listed course: EDFI 847

PHIL 899 - Dissertation Preparation (1-12 Credits)

**PHPH - Physiology & Pharmacology (PHPH)**

PHPH 701 - Physiology for Health Sciences (6 Credits)
Major organ systems with emphasis on basic physiological processes and control systems. Primarily for health sciences graduate students.

PHPH 703 - Human Neuroanatomy (4 Credits)
Lecture, laboratory, and independent study devoted to the structure and function of the human nervous system. Emphasis on those features of the nervous system of contemporary research interest.

PHPH 705 - Biomedical Pharmacology (6 Credits)
Lectures and conference discussions covering principles of drug action; autonomic (adrenergic/cholinergic), cardiovascular, renal, central nervous system, endocrine and antimicrobial pharmacology, cancer chemotherapy, and toxicology.
Prerequisites: PHPH 701 or PHPH 720.

PHPH 720 - Graduate Physiology Lecture and Laboratory (8 Credits)
Lecture, discussions, and laboratory covering: cell, muscle, respiratory, circulatory, gastrointestinal, metabolism, endocrinology, nervous system, and reproduction. Students will conduct physiology experiments to gain knowledge of experimental techniques and data collection.

PHPH 725 - Autonomic Pharmacology (3 Credits)
Functional regulation of biosynthesis, release and reuptake of neurotransmitters as well as the role of transmitters in regulating physiological processes will be presented. Emphasis will be placed on experimental techniques used in this area of pharmacology.
Prerequisites: graduate physiology, pharmacology, and biochemistry.

PHPH 730 - Seminar in Neuroanatomy (1-3 Credits)
Advanced study of selected topics in neuroanatomy.

PHPH 735 - Cardiovascular Pharmacology (3 Credits)
An in-depth examination of the cardiovascular system with an emphasis on hemodynamic principles, cardiac regulation, and the use of drugs in various pathological states of the mammalian heart.

PHPH 739 - Drug Action on Ion Movements (3 Credits)
The actions of several classes of drugs that alter ion movements in excitable tissues will be explored in depth with emphasis on models of drug actions and altered responses in hereditary and disease states.
Prerequisites: PHPH 705.

PHPH 740 - Neuroscience (4 Credits)
Cellular and molecular principles of neurobiology and neuroscience topics from a research-oriented perspective.
Prerequisites: BMSC 754 or CHEM 754.

PHPH 741 - Special Topics in Neuroscience (1-3 Credits)
Tutorial instruction and group discussion of select topics in neuroscience involving neuroendocrinology, neuropharmacology, developmental neurobiology, or neuropsychobiology. Content varies by title and may be repeated up to a maximum of 6 credits total.

PHPH 742 - Neuroscience Seminar (1 Credit)
Presentation and group discussion of research articles in neuroscience. Focus on improvement of critical thinking and scientific writing skills, as well as development of research ideas.

PHPH 745 - Neurophysiology (3 Credits)
Generation and transmission of excitation in the mammalian nervous system. Integrated function of the nervous system with emphasis on interactions of autonomic, neuroendocrine, and behavioral mechanisms contributing to homeostatic regulation.

PHPH 750 - Fundamental Neuroscience I (4 Credits)
Integrated foundation in neuroanatomical and neurophysiological principles from a research-oriented perspective.

PHPH 751 - Fundamental Neuroscience II (4 Credits)
Integrated foundation in neurochemical and neuropharmacological principles from a research-oriented perspective. Includes aspects of molecular neuroscience and systems analyses.

PHPH 752A - Neurobiology Basics Module: Neuroanatomy (2 Credits)
Principles of neuroanatomy necessary for research in neurobiology-related disciplines. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPH 752B - Neurobiology Basics Module: Neurochemistry–Fundamental Concepts (2 Credits)
Principles required for understanding chemical and cellular processes in the nervous system. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPH 752C - Neurobiology Basics Module: Neurochemistry–Advanced Concepts (2 Credits)
In-depth analysis of neurochemical processes, signaling, and pathways in the nervous system. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.
PHPP 752D - Neurobiology Basics Module: Neurophysiology (2 Credits)
Principles required for understanding neurophysiological processes and integrated nervous system functions. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPP 752E - Neurobiology Basics Module: Physiology for Neurobiologists (2 Credits)
Principles of physiological processes and the nervous system control of such processes. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related discipline.

PHPP 752F - Neurobiology Basics Module: Neuropharmacology (2 Credits)
Principles of neuropharmacology and how drugs act on the nervous system. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPP 752G - Neurobiology Basics Module: Molecular Neurobiology (2 Credits)
Principles related to cellular and molecular control of neurobiological processes. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPP 752H - Neurobiology Basics Module: Quantitative Methods in Neurobiology (2 Credits)
Principles for quantifying changes related to neurobiological research. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPP 752I - Neurobiology Basics Seminar (2 Credits)
Novel topics in neurobiology offered as the field progresses. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPP 753A - Neurobiology of Disease Module: Stress, Anxiety Disorders, and the Amygdala (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurobiological basis of anxiety. Research-oriented and literature-based approaches integrate the molecular, cellular, systems, and translational levels of stress, the amygdala, and anxiety disorders. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 752B - Neurobiology of Disease Module: Epilepsy (2 Credits)
Principles of epilepsy and the nervous system control of seizures. Each 5-week module provides fundamentals of particular aspects of neurobiology, including neuroanatomy, neurophysiology, neurochemistry, molecular neurobiology, and neuropharmacology, or skills necessary for research in neurobiology-related disciplines.

PHPP 752C - Neurobiology of Disease Module: Schizophrenia, Prefrontal Cortex, and Executive Function (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurobiological basis of cognition such as schizophrenia. Research-oriented approaches integrate the molecular, cellular, systems, and translational aspects of prefrontal cortex control of executive function and its role in schizophrenia. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 752D - Neurobiology of Disease Module: Neurophysiology (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurobiological basis of depression. Research-oriented approach integrates the molecular, cellular, systems, and translational levels of depression, the hippocampus, and epinephrine. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 753G - Neurobiology of Disease Module: Degenerative Diseases of Old Age (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurodegenerative diseases associated with aging. Research-oriented approaches integrate the molecular, cellular, systems, and translational levels of disorders such as Parkinson's, Alzheimer's, and stroke. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 753H - Neurobiology of Disease Module: Pain and Analgesia (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurobiological basis of pain. Research-oriented and literature-based approaches integrate the molecular, cellular, systems, and translational basis of chronic pain and its treatment. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 753I - Neurobiology of Disease Module: Schizophrenia, Prefrontal Cortex, and Executive Function (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurobiological basis of cognition such as schizophrenia. Research-oriented approaches integrate the molecular, cellular, systems, and translational aspects of prefrontal cortex control of executive function and its role in schizophrenia. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 753J - Neurobiology of Disease Module: Epilepsy (2 Credits)
Team taught modules integrate the clinical, basic, technical, and social issues surrounding the neurobiological basis of epilepsy. Research-oriented and literature-based approaches integrate the molecular, cellular, systems, and translational levels of seizure disorders and their treatment. Team taught, 5-week modules integrate the clinical, basic, technical, and ethical issues surrounding a specific neurobiological disease. Modules focus on research oriented and literature-based approaches to the molecular, cellular, systems, and translation.

PHPP 760 - Clinical Problems in Anesthesia (1-3 Credits)
Tutorial instruction in anesthesia. This course may be repeated up to a maximum of 6 credits total.

PHPP 761 - Principles and Practice of Anesthesia 1 (7 Credits)
Foundational and basic concepts of anesthesia practice integrated into supervised clinical training to reinforce principles of anesthesia care.
PHPH 762 - Principles and Practice of Anesthesia 2 (6 Credits)
Foundational and advanced concepts of anesthesia practice integrated into supervised clinical training to reinforce principles of anesthesia care.
Prerequisites: PHPH 761.

PHPH 765 - Tutorials in Pharmacology and Physiology (1-3 Credits)
Tutorial instruction in pharmacology and physiology. This course may be repeated up to a maximum of 6 credits total.

PHPH 770 - Seminar in Pharmacology and Physiology (1-2 Credits)
Group discussions by students and staff based on literature surveys and current research in pharmacology and physiology.

PHPH 772 - Seminar in Anesthesia (1-2 Credits)
Group discussions by students and staff based on literature surveys and current research in anesthesia.

PHPH 773 - Health Assessment in Anesthesia (1 Credit)
Preoperative assessment, intraoperative management and postoperative management of patients receiving anesthesia. Development of cognitive and psychomotor skills needed to perform an advanced health assessment for patients undergoing anesthesia.

PHPH 775 - Practicum I in Nurse Anesthesia (6 Credits)
Introduction to the cognitive and clinical skills necessary to perform effective anesthesia in a supervised clinical setting.

PHPH 777 - Practicum II in Nurse Anesthesia (6 Credits)
Supervised clinical practicum in nurse anesthesia for students beginning their second year of training.
Prerequisites: PHPH 775.

PHPH 779 - Practicum III in Nurse Anesthesia (6 Credits)
Advanced, supervised clinical practicum in nurse anesthesia for students in their second year of training.
Prerequisites: PHPH 777.

PHPH 780 - Research in Pharmacology and Physiology (1-6 Credits)
Graduate research designed by student in conjunction with research advisory committee.

PHPH 781 - Practicum IV in Nurse Anesthesia (6 Credits)
To instruct nurse anesthesia students entering their third year of training to the advanced cognitive and clinical skills necessary to perform effective anesthesia in a supervised clinical setting.
Prerequisites: PHPH 779.

PHPH 791 - Principles of Anesthesia I (1-5 Credits)
Pre and post-operative evaluation, principles, and techniques of anesthesia, and the use of the anesthesia machine, ventilators, and monitoring equipment used in the administration of anesthesia. Course can be taken up to 5 total credits.

PHPH 792 - Principles of Anesthesia II (1-5 Credits)
Continuation of PCOL 791. Anesthetic techniques for specialty surgery including neurological, cardiovascular-thoracic, pediatric, and obstetrical surgery. May be repeated for a total of up to 5 credits.

PHPH 795 - Physical-Chemical Basis of Anesthetic Action (3 Credits)
Physical and chemical concepts and their relationships to the principles of anesthesia. Includes the behavior of gases and the gas laws, chemical composition of anesthetic agents and drugs.

PHPH 797 - Professional Aspects of Nurse Anesthesia (3 Credits)
An overview of the professional, practical, and educational issues of the practice of nurse anesthesia. Includes the history of anesthesia practice, psychological, and ethical issues, legal aspects of anesthesia practice, and current trends in anesthesia practice.

PHPH 798 - Biomedical Sciences for Nurse Anesthesia (3 Credits)
Human anatomy, biochemistry, and pathological processes necessary for the practice of the health-related professions.

PHPH 899 - Dissertation Preparation (1-12 Credits)

Physical Education (PEDU)

PEDU 510 - Teaching Health Related Physical Fitness (3 Credits)
Knowledge and application of processes and principles of health related physical fitness in physical education and sport settings.
Prerequisites: EXSC 223/EXSC 224 or BIOL 243/Biol 244.

PEDU 515 - Physical Education for Inclusion (3 Credits)
Designing physical education programs for special populations and for students with special needs.
Prerequisites: PEDU 340, PEDU 360.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PEDU 520 - Observational Analysis of Sports Techniques and Tactics (3 Credits)
Qualitative and quantitative techniques to observe, describe, analyze, and evaluate human movement in physical education and sports settings.
Prerequisites: PEDU 190, EXSC 223, EXSC 224 or BIOL 243, BIOL 244; PHYS 101.

PEDU 553 - The Organization and Administration of Physical Education (3 Credits)
Organization of instructional, intramural, interscholastic, and recreational programs, with emphasis on criteria for the evaluation and selection of activities.
Prerequisites: 18 credits in physical education, including six semester hours of professional skill courses.

PEDU 555 - Current Topics in Physical Education (1-3 Credits)

PEDU 570 - Human Child/Adolescent Growth (3 Credits)
Human physical growth and development of children with emphasis on years 4 to 18.
Prerequisites: EXSC 223, EXSC 224, or equivalent.

PEDU 575 - Physical Education for the Classroom Teacher (3 Credits)
Appropriate movement experiences for children. Not available for physical education majors.
Prerequisites: EDTE 201.

PEDU 577 - Dance Performance (3 Credits)
Rehearsal, choreographic analysis, and dance performance. All components of dance production—including music, costume, lighting, and scenery—will be considered.
Cross-listed course: DANC 577

PEDU 635 - South Carolina Physical Education Curriculum (3 Credits)
Development of physical education programs using the South Carolina Physical Education Curriculum Materials.

PEDU 637 - Advanced Theory and Techniques of Coaching Football (3 Credits)
An intensive investigation of current theories of offensive and defensive football. Generalship, strategy, conditioning, staff utilization, film analysis, and practice organization are covered in depth.
Prerequisites: current responsibilities or previous experience in college or high school coaching.
PEDU 638 - Advanced Theory and Techniques of Coaching Basketball (3 Credits)
An intensive investigation of the latest techniques and theories of coaching basketball. Systems of offense and defense, generalship, conditioning, staff utilization, film analysis, and practice organization are covered in depth.
Prerequisites: current responsibilities or previous experience in college or high school coaching.

PEDU 639 - Advanced Theory and Techniques of Coaching Track and Field Events (3 Credits)
A thorough study of the latest techniques of coaching track and field events. Isometric, isotonic, and interval conditioning theories involving the cardiovascular and muscular systems are examined to acquaint the student with varying physiological approaches to conditioning.
Prerequisites: current responsibilities or previous experience in college or high-school coaching.

PEDU 640 - Advanced Theory and Techniques of Teaching and Officiating Girls’ Gymnastics (3 Credits)
A thorough study of the latest techniques of teaching and officiating girls’ gymnastics. Balance beam, vaulting, uneven bars, tumbling, dance skills and routines, and officiating methods.

PEDU 650 - The Art and Science of Coaching (3 Credits)
Coaching principles and application to sport programs across a variety of developmental levels.

PEDU 660 - Counseling Student Athletes (3 Credits)
Issues facing student athletes regarding their personal and career development beyond athletics.
Cross-listed course: EDCE 650

PEDU 702 - Interpretation and Implementation of Physical Education Programs for Children (3 Credits)
An intensive investigation of contemporary physical education programs for children.

PEDU 703 - Conceptual Issues in Teaching Physical Education (3 Credits)
Advanced study of current literature and research in physical education.

PEDU 704 - Readings and Research in Physical Education Teaching and Teacher Education (3 Credits)
Advanced study of seminal literature and research in physical education teaching and teacher education.
Prerequisites: PEDU 703.

PEDU 705 - Applied Theories of Perceptual-Motor Learning in Physical Education (3 Credits)
Analysis of theories and principles of perceptual-motor and motor development of infants and children. Emphasis is placed upon reviewing current research as it applies to the physical education setting.

PEDU 709 - Anthropometric Measures and Their Uses (3 Credits)

PEDU 710 - Measurement and Research in Physical Education (3 Credits)
The treatment of current theory and practice of testing, evaluation, and research in physical education, with emphasis on the methods and tools of research.
Prerequisites: PEDU 545.

PEDU 715 - Introduction to Adapted Physical Education, Activity, and Sport (3 Credits)
Focuses on content knowledge foundational to adapted physical education, activity, and sport programs in self-contained and/or itinerant settings for children with moderate to severe disabilities.

PEDU 716 - Universal Design for Learning in General Physical Education (3 Credits)
Focuses on knowledge and skills to design and implement an effective curriculum design, lesson planning and assessment for inclusive physical education settings.

PEDU 717 - Practicum in Adapted Physical Education (3 Credits)
Focuses on the techniques, methodologies, and philosophies of adapted physical education teachers.

PEDU 720 - Theories and Principles of Motor Learning and Control: Applications for Adapted Physical Education (3 Credits)
Focuses on the knowledge of principles/theories of learning and memory applied to motor skill acquisition with an emphasis on factors influencing and the development of successful instructional and training strategies among individuals with disabilities.

PEDU 722 - Curriculum Development in Physical Education (3 Credits)
Principles of physical education based upon physiology, psychology, and sociology; curriculum-making procedures; plans and regulations for the conduct of the curriculum in physical education; criteria for the evaluation and selection of activities; evaluation, measurement, and grading procedures; and the formulation of a curriculum outline for elementary, junior high, and senior high schools.

PEDU 725 - Supervision in Physical Education (3 Credits)
Theory and practice of supervision of student teaching practica in physical education.
Prerequisites: EDUC 731.

PEDU 729 - Study of the Teaching of Physical Education (3 Credits)
Study of the analysis of teaching applied to the development of effective teaching skills in physical education.

PEDU 730 - Psychosocial Aspects of Athletic Performance and Injury Rehabilitation (3 Credits)
The application of psychological principles from motivation, arousal regulation, individual differences and psychological skills for enhancing athletic performance and injury rehabilitation.

PEDU 731 - Motor Skill Learning (3 Credits)
Study of sensory, motor and physical processes that underlie learning and performance of motor skills commonly performed in physical education, sport and dance.

PEDU 732 - Analysis of Instructional Behavior in Physical Activity Programs (3 Credits)
Research-based study of strategies, delivery systems, and clinical, school, and community-based programs in physical activity.

PEDU 741 - Readings in the Social History of Sport (3 Credits)
Reading and discussion of the critical and analytical literature on sport history.
Cross-listed course: HIST 741
PEDU 750 - Historical and Philosophical Foundations of Physical Education (3 Credits)
A study of the historical and philosophical bases of physical education. Emphasis will be placed on the integration and application of this information to the formulation of a practical philosophy of physical education.

PEDU 751 - Principles of Adapted Sport Coaching (3 Credits)
An overview of teaching and training athletes with different disabilities and challenges. Program management and preparing for coaching and competition.
Prerequisites: PEDU 715.

PEDU 755 - Selected Topics in Physical Education (3 Credits)
A study of selected issues confronted in physical education programs.
Prerequisites: 15 hours in graduate courses in physical education.

PEDU 770 - Research Methods in Physical Education (3 Credits)
A study of applicable methods and tools of research in physical education and motor behavior. Provision for students to engage in original research.

PEDU 771 - Theories and Principles of Growth and Motor Behavior: Applications for Adapted Physical Education (3 Credits)
Focuses on knowledge of growth and motor development principles from theory and research with applications for teaching and coaching individuals with disabilities.

PEDU 778A - Directed Student Teaching in Physical Education I (6 Credits)
Student teaching at the elementary or secondary level combined with planning and initiation of an action research project to demonstrate knowledge, skills, and dispositions related to teaching physical education.
Corequisite: PEDU 778B.

PEDU 778B - Directed Student Teaching in Physical Education II (6 Credits)
Student teaching at the elementary or secondary level combined with completion of an action research project to demonstrate knowledge, skills, and dispositions related to teaching physical education.
Corequisite: PEDU 778A.

PEDU 784 - Theory and Application of Effective Teaching Strategies in Physical Education (3 Credits)
Study of effective teaching in physical education. Acquisition of advanced teaching skills beyond those required for basic certification.

PEDU 788 - Action Research Project in Adapted Physical Education (3 Credits)
Focuses on knowledge and skills to design and implement an action research project designed for self-reflective systematic inquiry and improvement of teaching in inclusive physical education settings.

PEDU 790 - Independent Study (1-3 Credits)
Topics to be assigned and approved by advisor, graduate director, and department head.

PEDU 791 - Practicum in Physical Education (0-3 Credits)
Clinical and/or field experience in a variety of settings related to or dealing with physical activity. The practicum is designed to provide the student with in-depth experiences in a particular aspect of motor skill acquisition.

PEDU 829 - Advanced Topics in Child and Adolescent Growth and Development (3 Credits)
An interdisciplinary study of individual (physical and psychological), environmental and task related variables as they relate to motor skill performance, physical activity participation and athlete development.

PEDU 830 - Development of Skilled Sport Performance (3 Credits)
Development of cognitive and motor processes necessary for skilled performance in sport.
Prerequisites: PEDU 730 and either PSYC 501 or PSYC 712.

PEDU 832 - Research Practicum in Motor Learning/Motor Performance (3 Credits)
Scientific investigation of specific research problems in motor learning/motor performance.

PEDU 833 - Research Practicum in Physical Education (1-6 Credits)
Designing, conducting and interpreting research studies in physical education.

PEDU 840 - Historical and Contemporary Perspectives on the Study of Teaching and Instruction (3 Credits)
A survey and critical analysis of the field of research on teaching and instruction.

PEDU 841 - Seminar in Research on Teaching in Physical Education (3 Credits)
Interpretation and critical analysis of research on selected topics on teaching and instruction in physical education.

PEDU 850 - Research, Theory, and Practice of Teacher Education in Physical Education (3 Credits)
Research, theory, and methods of teacher education in physical education.

PEDU 856 - Advanced Curriculum and Philosophy in Physical Education (3 Credits)
Curriculum theory and design in physical education; implications of major philosophical positions, developmental and learning theory, and culture on the design and implementation of physical education curriculum.
Prerequisites: PEDU 722.

PEDU 870 - Promoting Integrative Youth Physical Development (3 Credits)
Examination of the synergistic nature of various physical, behavioral and psychological factors that promote positive trajectories of health in youth and how they are promoted across childhood and adolescence in physical education.

PEDU 899 - Dissertation Preparation (1-12 Credits)

Physics (PHYS)

PHYS 501 - Quantum Physics I (3 Credits)
A self-contained treatment of quantum theory and its applications, beginning with the Schrodinger equation.
Prerequisites: C or better in PHYS 307 and MATH 242.

PHYS 502 - Quantum Physics II (3 Credits)
Advanced topics in quantum physics, plus topics in special relativity, high-energy physics, and cosmology.
Prerequisites: C or better in PHYS 501.
PHYS 503 - Mechanics (4 Credits)
Classical mechanics of particles, systems, and rigid bodies; discussion and application of Lagrange’s equations, introduction to Hamiltonian formulation of mechanics.
Prerequisites: PHYS 206 or PHYS 211, MATH 242 or MATH 520.

PHYS 504 - Electromagnetic Theory (4 Credits)
Field theory of electric and magnetic phenomena; Maxwell’s equations applied to problems in electromagnetism and radiation.
Prerequisites: C or better in PHYS 503.

PHYS 506 - Thermal Physics and Statistical Mechanics (3 Credits)
Principles of equilibrium thermodynamics, kinetic theory, and introductory statistical mechanics.
Prerequisites: C or better in PHYS 306.

PHYS 509 - Solid State Electronics (4 Credits)
Topics include: basic electrical circuits; electronic processes in solids; operation and application of individual solid state devices and integrated circuits. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 207 or PHYS 212.

PHYS 510 - Digital Electronics (3 Credits)
Basic operation of digital integrated circuits including microprocessors. Laboratory application of microcomputers to physical measurements.
Prerequisites: C or better in PHYS 509.

PHYS 511 - Nuclear Physics (4 Credits)
An elementary treatment of nuclear structure, radioactivity, and nuclear reactions. Three lecture and three laboratory hours per week.
Prerequisites: C or better in PHYS 501.

PHYS 512 - Solid State Physics (4 Credits)
Crystal structure; lattice dynamics; thermal, dielectric, and magnetic properties of solids. Free electron model of metals. Band structure of solids, semi-conductor physics. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 502.

PHYS 514 - Optics, Theory, and Applications (4 Credits)
Geometrical and physical optics; wave nature of light, lenses and optical instruments, gratings, thin films, polarization, coherence, spatial filters, and holography. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 306.

PHYS 515 - Mathematical Physics I (3 Credits)
Analytical function theory including complex analysis, theory of residues, and saddlepoint method; Hilbert space, Fourier series; elements of distribution theory; vector and tensor analysis with tensor notation.
Prerequisites: MATH 242.

PHYS 516 - Mathematical Physics II (3 Credits)
Group theory, linear second-order differential equations and the properties of the transcendental functions; orthogonal expansions; integral equations; Fourier transformations.
Prerequisites: PHYS 515.

PHYS 517 - Computational Physics (3 Credits)
Application of numerical methods to a wide variety of problems in modern physics including classical mechanics and chaos theory. Monte Carlo simulation of random processes, quantum mechanics and electrodynamics.
Prerequisites: C or better in PHYS 212 and MATH 142.

PHYS 521 - Biophysics (4 Credits)
Principles of physics applied to living systems: diffusion, friction, low Reynolds-number world, entropy, free energy, entropic/chemical forces, self-assembly, molecular machines, membranes.
Prerequisites: MATH 142, PHYS 212, CHEM 112, BIOL 102.

PHYS 531 - Advanced Physics Laboratory I (1-3 Credits)
A laboratory program designed to develop a combination of experimental technique and application of the principles acquired in formal course work. A maximum of eight hours per week of laboratory and consultation.

PHYS 532 - Advanced Physics Laboratory II (1-3 Credits)
A continuation of PHYS 531. Up to eight hours per week of laboratory and consultation.

PHYS 541 - Advanced Experimental Physics I (4 Credits)
Continuation of PHYS 541. Optical apparatus (telescope, microscope, interferometer) and advanced project planning including equipment design and budgeting.
Prerequisites: C or better in PHYS 310.

PHYS 542 - Advanced Experimental Physics II (4 Credits)
Continuation of PHYS 541. Study of topics from Advanced Optics, Astronomy, Biophysics, Digital Electronics, Nuclear/Particle Physics, or Solid State Physics, plus conduction of a physics experiment, including a written paper and an oral presentation.
Prerequisites: C or better in PHYS 541.

PHYS 546 - Introduction to Astrophysics (3 Credits)
This is an astrophysics course for physics students. The course will cover the basics of observational techniques, structure and evolution of stars, interstellar medium and star formation, structure and properties of the Milky Way and nearby galaxies, and generation and transfer of radiation in astrophysical environments.
Prerequisites: C+ or better in PHYS 307.

PHYS 599 - Topics in Physics (1-3 Credits)
Readings and research on selected topics in physics. Course content varies and will be announced in the schedule of classes by title.

PHYS 701 - Classical Mechanics (3 Credits)
Generalized coordinates, Lagrangian and Hamiltonian formulations, variational principles, transformation theory, and Hamilton-Jacobi equation.

PHYS 703 - Classical Field Theory I (3 Credits)
Development of classical fields; Maxwell’s equations; boundary value problems; radiation theory.

PHYS 704 - Classical Field Theory II (3 Credits)
A continuation of PHYS 703.

PHYS 706 - Statistical Thermodynamics (3 Credits)
Statistics of Boltzmann, of Fermi and Dirac, and of Bose and Einstein, with applications.

PHYS 708 - General Relativity and Cosmology (3 Credits)
Introduction to the basic concepts of general relativity and a discussion of problems of current interest.
Prerequisite or Corequisite: PHYS 701, PHYS 704.

PHYS 711 - Quantum Mechanics I (3 Credits)
A development of non-relativistic quantum mechanics.

PHYS 712 - Quantum Mechanics II (3 Credits)
A continuation of PHYS 711.
PHYS 713 - Advanced Quantum Theory (3 Credits)
Second Quantization. Relativistic formulations of quantum mechanics.
Prerequisites: PHYS 712.

PHYS 714 - Quantum Field Theory (3 Credits)
Theory of quantized fields. Introduction to renormalization. A continuation of PHYS 713.
Prerequisites: PHYS 713.

PHYS 715 - Many-Body Quantum Theory (3 Credits)
Effective field theory, particle-hole, quasiparticles.
Prerequisite or Corequisite: PHYS 713.

PHYS 721 - Subatomic Physics (3 Credits)
Nuclear physics, mainly from the experimental standpoint.

PHYS 723 - Elementary Particles I (3 Credits)
Prerequisites: PHYS 701, PHYS 703, PHYS 711.
Corequisite: PHYS 712.

PHYS 724 - Elementary Particles II (3 Credits)
Expermentally accessible processes and their description using the framework developed in PHYS 723. Gauge theories and the standard model. Particle experiments for the next decade and their underlying physics descriptions.
Prerequisites: PHYS 723

PHYS 725 - Solid State Physics (3 Credits)
The crystalline state of matter and its main characteristics. Electric and magnetic properties of metals, semiconductors, and insulators.

PHYS 726 - Superconductivity (3 Credits)
Theory and description of conventional and high temperature superconductors and their properties.

PHYS 727 - Magnetic Resonance (3 Credits)

PHYS 728 - Quantum Optics - Understanding Light-Matter Interactions (3 Credits)
Semi-classical and fully quantum-mechanical treatments of interactions between matter and electromagnetic fields on the microscopic level.
Prerequisites: Undergraduate quantum mechanics.

PHYS 729 - Applied Group Theory (3 Credits)

PHYS 730 - Graduate Seminar (1 Credit)
Presentation by the student of a designated topic. May be repeated for credit.

PHYS 731 - Extragalactic Astrophysics (3 Credits)
Extragalactic astrophysics, including nearby and distant galaxies, active galaxies, galaxy clusters, large-scale structure, galaxy formation/evolution, scale structure, galaxy formation/evolution, basics of cosmology, cosmic radiation backgrounds, and observation constraints on cosmological models.
Prerequisites: PHYS 701, PHYS 703, and ASTR 211 or equivalent.

PHYS 740 - Selected Topics in Physics (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title.

PHYS 745 - Topics in Nuclear Physics (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title.

PHYS 746 - Principles of Astrophysics (3 Credits)
This is an astrophysics course for physics graduate students. The course will cover the basics of observational techniques, structure and evolution of stars, interstellar medium and star formation, structure and properties of the Milky Way and nearby galaxies, and generation and transfer of radiation in astrophysical environments.
Prerequisites: C+ or better in PHYS 307, PHYS 503, PHYS 506.

PHYS 750 - Topics in Solid State Physics (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title.

PHYS 751 - The Physics of Radiation Therapy (3 Credits)
Description of ionizing and non-ionizing radiation, interaction of radiation with matter, and radiation detection and dosimetry.

PHYS 752 - Health Physics - Radiation and Nuclear Physics (3 Credits)

PHYS 753 - The Physics of Medical Imaging (3 Credits)
Describing basics of imaging science, x-ray imaging modalities including basic principles, detectors, scattered radiation, planar imaging, CT, fluoroscopic imaging, nuclear medicine imaging, ultrasound and MRI, and computers in imaging.

PHYS 755 - Topics in Theoretical Physics (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title.

PHYS 760 - Research (1-6 Credits)
Introduction to and the application of the methods of research.

PHYS 761 - Research (1-6 Credits)
Introduction to and the application of the methods of research.

PHYS 781 - Astronomy for Teachers (3 Credits)

PHYS 782 - Topics in Contemporary Physical Sciences for Teachers (3-4 Credits)
Discussions designed to provide teachers with simple physical explanations of subjects including: nuclear energy, black holes, quarks, strange particles, perception of color, integrated circuits, computers, TV games, and other topics of current interest. Primarily for M.A.T. and M.Ed. students. Not available for M.S. and Ph.D. credit in physics.

PHYS 783 - Modern Physics for Teachers (3 Credits)

PHYS 784 - Topics in Light and Sound for Teachers (3 Credits)
Topics in modern optics and acoustics are discussed in a framework appropriate for school teachers. Primarily for M.A.T. and M.Ed. students. Not available for M.S. and Ph.D. credit in physics.
PHYS 785 - Electronics for Teachers (3 Credits)
Basic electronics with emphasis on measurement and laboratory procedures. Operation and application of semiconductor devices and integrated circuits. Primarily for M.A.T. and M.Ed. students. Not available for M.S. and Ph.D. credit in physics.

PHYS 786 - Teaching Physics on the Internet (3 Credits)
Web-based resources for assigning and grading individualized homework and tests and for creating instructional units in physics and physical sciences. Not available for M.S./Ph.D. physics majors.

PHYS 787 - Design of Physics Laboratory and Demonstration Experiments for Teachers (3 Credits)
Design and performance of demonstrations and experiments to display physical phenomena to students. Qualitative and quantitative experiments. Primarily for M.A.T. and M.Ed. students. Not available for M.S. and Ph.D. credit in physics.

PHYS 788 - Physics for AP Teachers (3 Credits)

PHYS 789 - Physics for Teachers of Mathematics (3 Credits)
Teacher preparation for creating and solving word problems using conservation laws and symmetries found in physics and physical science and linked to the South Carolina Mathematics Standards. Primarily for M.A.T./I.M.A. and M.Ed. students. Not available for M.S. of Ph.D. credit in physics.

PHYS 799 - Thesis Preparation (1-9 Credits)

PHYS 899 - Dissertation Preparation (1-12 Credits)

PHYT - Physical Therapy (PHYT)

PHYT 701 - Human Musculoskeletal and Gross Anatomy (5 Credits)
Intensive study and analysis of the morphologic, functional and imaging anatomy of the human body. Emphasis on the relationship of form and function as a basis for understanding of human movement.

PHYT 702 - Musculoskeletal and Gross Anatomy Dissection (3 Credits)
In depth, hands on study and analysis of the major gross anatomical structures, their relationships to each other and the clinical importance through cadaveric dissection.

PHYT 720 - Fundamentals of Physical Therapy (4 Credits)
An overview of the profession and basic skills needed by the physical therapist related to patient evaluation and management.

PHYT 721 - Health Promotion & Wellness in Physical Therapy (2 Credits)
Presents the role of the physical therapist in health promotion and wellness for patients/clients and the community.

PHYT 731 - Mechanisms of Motor Skill Performance (3 Credits)
A study of theories and mechanisms involved in human movement. Focus is on analysis of principles and systems of gross motor control and learning.

PHYT 740 - Professional Issues in Physical Therapy (2 Credits)
PHYT 740 is designed to allow you to enhance patient interaction through the development of professional communication skills, to explore professional ethics and the APTA Core Values, and to foster a professional identity.

PHYT 741 - Clinical Documentation in Physical Therapy (1 Credit)
Enhance patient interaction through the development of professional communication skills, to develop appropriate documentation skills, and to foster a professional identity.

PHYT 750 - Orthopedic Physical Therapy I (4 Credits)
Principles of physical therapy evaluation and treatment of people with orthopedic disorders involving the cervical spine and/or upper extremity.

PHYT 751 - Orthopedic Physical Therapy II (3 Credits)
Principles of physical therapy evaluation and treatment of people with orthopedic disorders involving the lumbar spine and/or lower extremity.

PHYT 752 - Orthopedic Integration in Physical Therapy (4 Credits)
An advanced course to enhance physical therapy students’ knowledge of orthopedic examination tests and manual therapy interventions. Emphasis will be placed on diagnostic accuracy of special tests (sensitivity, specificity, likelihood ratios, reliability and validity), interpretation of the results, proper execution, and integration of manual techniques into clinical practice.

PHYT 753 - Research Proposal Development (1 Credit)
Fundamentals of developing a research proposal.

PHYT 754 - Manual Therapy I (3 Credits)
Joint and soft tissue mobilization and manipulation techniques.

PHYT 755 - Manual Therapy II (3 Credits)
Techniques will include spinal mobilization, mobilization with movement, manipulation, muscle energy, taping, soft tissue mobilization and integration of techniques into clinical practice.

PHYT 756 - Integumentary Physical Therapy (2 Credits)
Physical therapy management of patients with integumentary disorders.

PHYT 757 - Pharmacology for the Physical Therapist (2 Credits)
Management of the physical therapy patient on selected medications.

PHYT 758 - Patient Education in Physical Therapy (1 Credit)
Role of the physical therapist in professional and patient education.

PHYT 759 - Therapeutic Exercise (2 Credits)
Therapeutic exercise for the orthopedic patient: selection of techniques, rate of progression and modification.

PHYT 760 - Orthotics and Prosthetics (2 Credits)
Management of patients with amputations, prosthetics, and orthotics.

PHYT 761 - Pain Mechanisms and Treatment (2 Credits)
This course will address the theoretical models for understanding the basis for pain. Pain assessment and physical therapy pain management will be addressed. Emphasis will be placed on the development of clinical decision-making and problem solving.

PHYT 763 - Biophysical Agents in Physical Therapy (1 Credit)
This course studies theoretical and practical applications for safe, effective use of biophysical agents commonly used in physical therapy settings using evidence based practice.

PHYT 764 - Cultural Competence in Health Care (3 Credits)
Cultural competencies necessary for the delivery of health care to patients of diverse ethno-cultural heritages.

PHYT 765 - Geriatric Physical Therapy (2 Credits)
Fundamental principles for assessment, treatment and overall foundations of geriatric physical therapy based upon the best available evidence.

PHYT 766 - Essentials of Cardiopulmonary Physical Therapy (3 Credits)
Physical therapy management of patients/clients with acute and chronic cardiac and/or pulmonary dysfunction.
PHYT 770 - Acute Care Physical Therapy (3 Credits)
Cognitive and motor skills required in the management of the acute care physical therapy patient.

PHYT 777 - Special Topics in Physical Therapy (1-3 Credits)
A study of selected issues in the field of physical therapy. Course content varies by title. May be repeated for credit as topics vary for a maximum of 6 credit hours total.

PHYT 782 - Functional Anatomy (4 Credits)
Biomechanical principles underlying motor control and selected techniques used to quantify human movement.

PHYT 855 - Seminar in Physical Therapy (1 Credit)
Critical review of professional literature pertaining to clinical practice in physical therapy. Repeatable for credit.

PHYT 856 - Research Seminar in Physical Therapy (1 Credit)
Presentation and discussion of current research topics in physical therapy.

PHYT 857 - Seminar and Research in Physical Therapy (1 Credit)
Presentation of physical therapy research, article reviews, and clinical in-services. This course deals with the scientific research process with direct application to the discipline of Physical Therapy.

PHYT 858 - Evidence-Based Practice in Physical Therapy (2 Credits)
Research design and analysis techniques necessary for applying evidence-based practice to the clinical physical therapy setting.

PHYT 859 - Independent Study (1-3 Credits)
Topics to be approved by advisor and graduate director. Pass/fail grading.

PHYT 860 - Differential Diagnosis and Clinical Reasoning for Physical Therapists (2 Credits)
Students will gain knowledge and expertise to competently screen for systemic diseases, interpret clinical findings and differentially diagnose movement related impairments from medical conditions that can mimic symptoms of neuromusculoskeletal problems. Emphasis will be placed on Skills necessary to identify patient/client problems that require referral to another health professional.

PHYT 861 - Neuroplasticity and Genetics in Physical Therapy (1 Credit)
A study of neuroplasticity and genetics in relation to motor rehabilitation. Focus is on the analysis and application of key constructs in the design and implementation of rehabilitation interventions in individuals with neurologic diagnoses.

PHYT 862 - Neuro Repair - Rehabilitation (3 Credits)
Examination of neural repair and rehabilitation from a clinical perspective. 03: 07/05/2019.

PHYT 863 - Neuromuscular Assessment and Treatment I (3 Credits)
Neurological conditions and interventions commonly used in physical therapy practice.

PHYT 864 - Neuromuscular Assessment and Treatment II (4 Credits)
Neurological conditions and interventions commonly used in physical therapy practice.

PHYT 865 - Pediatric Physical Therapy (3 Credits)
Assessment and evaluation of selected pediatric conditions.

PHYT 866 - Management of Physical Therapy Practice (2 Credits)
Theory and application of management supervision and leadership skills necessary for the practice of physical therapy.

PHYT 867 - Clinical Experience in Physical Therapy I (6 Credits)
A 320 hour clinical education experience to develop physical therapy management skills of orthopedic patients.

PHYT 851 - Clinical Experience in Physical Therapy II (4 Credits)
Supervised clinical experience in a physical therapy setting.

PHYT 852 - Clinical Experience in Physical Therapy III (6 Credits)
Supervised clinical experience in a physical therapy setting.

PHYT 853 - Clinical Experience in Physical Therapy IV (6 Credits)
Supervised clinical experience in a physical therapy setting.

PHYT 860 - Clinical Experience in Physical Therapy IVa (1 Credit)
An 80 hour clinical education experience to demonstrate professional behaviors while safely managing a partial caseload.

PHYT 861 - Clinical Experience in Physical Therapy IVb (5 Credits)
A 400 hour clinical education experience to develop physical therapy management skills in a setting preferred by the student.

Prerequisites: PHYT 860.

PHYT 888 - Research Project in Physical Therapy (1-6 Credits)
Clinically based research project in physical therapy.

PHYT 899 - Dissertation Preparation (1-12 Credits)

Political Science (POLI)

POLI 502 - Methods of Political Analysis (3 Credits)
Quantitative techniques in political science; levels of measurement; problems of description, causation, and inference.

POLI 503 - American Political Thought (3 Credits)
Themes and thinkers in American political history.

POLI 504 - Politics and Ethics (3 Credits)
The nature of, and relationship between, politics and ethics.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

POLI 505 - Utopian Political Thought (3 Credits)
A critical examination of utopian and dystopian political ideas.

POLI 542 - Research in Language Conflict and Language Rights (3 Credits)
Research into the parameters governing linguistic conflicts and language rights issues, involving a close examination of the nexuses of language and individual and ethnic identity, culture, dialects, bilingualism. Examination of regional, national, and international case studies, with particular attention to nationalism, language revitalization, and language planning.

Cross-listed course: LING 542

POLI 554 - Law and Society (3 Credits)
The American judicial system, including the decision to resolve disputes by legal means, political influence on the legal system, the social impact of legal rulings, the relationship of the courts to other branches of government, and the applicability of higher law concepts in judicial decision making.

POLI 567 - American Local Government (3 Credits)
An introduction to the institutions, functions, policy-making processes, and politics of American local government.

POLI 569 - State and Local Government (3 Credits)
This course will examine the purpose, structure, and functions of state governments and their local subdivisions. Requires special permission of department. Restricted to social studies teachers.

POLI 570 - South Carolina Government and Politics (3 Credits)
South Carolina state and local government in the context of South Carolina history and U.S. state and local government.
POLI 591 - Special Topics in Political Science (3 Credits)
Intensive study of special topics in Political Science. May be repeated as content varies by title.

POLI 700 - The Political Science Discipline and Profession (3 Credits)
Examines political science as a profession and discipline, reviews teaching techniques and issues, and develops dissertation and original research proposals.

POLI 701 - Theories of Political Inquiry (3 Credits)
A brief overview of the growth of the social sciences and of the history of the American discipline of political science in the 20th century, including an examination of the rise of behaviorism. Study of the principles of neo-positivist political inquiry, including problems of empirical research and research design.

POLI 702 - Institutional and Behavioral Theories of Politics (3 Credits)
Introduction to the institutional and behavioral theories used to explain political phenomena.
Prerequisites: POLI 701.

POLI 703 - Democratic Theory (3 Credits)
Critical study of theories of democracy.

POLI 704 - Political Theory and Feminism (3 Credits)
How contemporary feminist theory has responded to and reformulated traditional theories about the role and nature of women.
Cross-listed course: WGST 704

POLI 705 - Theory of Marxism (3 Credits)
Critical study of the development of Marxist theory.

POLI 706 - Advanced Methods of Political Analysis (3 Credits)
Advanced techniques and approaches to multivariate analysis of empirical data in the context of political problems and events.
Prerequisites: POLI 502 or POLI 515.

POLI 707 - Classics of Political Theory (3 Credits)
Introduction to the nature and tradition of political theory; readings from selected political theorists.

POLI 708 - Women in American Politics (3 Credits)
Impact of gender in American politics; elections, representation, rights, social movements, legal institutions, and public policy. Explores class, race, and sexuality issues within gender.
Cross-listed course: WGST 708

POLI 709 - Qualitative Methods of Political Analysis (3 Credits)
Techniques and approaches to qualitative analysis of political problems and events. Topics include field research, interviewing, case studies, content analysis, archival research, and presentation of data.

POLI 710 - Introduction to International Relations (3 Credits)
An introduction to the field of international relations, including causes of war, world order, international distribution of wealth, durability of state system, and the individual in the world system.

POLI 711 - Directed Research in Political Science (3 Credits)
Political science Ph.D. students will work with a faculty mentor in their primary field to produce an original paper suitable for presentation at a national or regional professional conference.

POLI 715 - International Relations Theory (3 Credits)
Systematic survey, analysis, and comparison of major contemporary theoretical works in international relations.

POLI 717 - Comparative Foreign Policy (3 Credits)
A seminar treating the development, interests, formulation, and conduct of the modern foreign policies of selected states, with special reference to their interactions with other states' policies.

POLI 718 - Revolution and Politics (3 Credits)
An analytical investigation of political violence in the international arena, its sources, internal and external bases, and consequences for political behavior within and among states in the contemporary international system.

POLI 719 - Political and Social Change (3 Credits)
Systematic survey, analysis, and comparison of major contemporary theoretical works on political and social change.

POLI 720 - Political Communication (3 Credits)
The role of communication in creating collective political reality, with particular attention to how governmental, economic, professional, and cultural factors influence media organizations.

POLI 721 - Race and Public Policy (3 Credits)
A survey of the most recent and state-of-the-art scholarship on race and American policy.

POLI 724 - Religion and Politics (3 Credits)
Religion as a factor in the comparative politics and international relations of states and societies.
Cross-listed course: RELG 724

POLI 725 - International Conflict (3 Credits)
Survey, analysis, and comparison of theory and research findings on the nature, conditions, and causes of international conflict and violence.

POLI 726 - Seminar in Judicial Politics (3 Credits)
An introduction to the academic literature on American courts and judicial politics.

POLI 727 - Models for Understanding Political Institutions (3 Credits)
A survey of the literature on empirical and game theory methods.
Prerequisites: POLI 502 and POLI 706.

POLI 728 - Judicial Politics in Europe and the Common Law World (3 Credits)
A comparative study of courts of Europe and the and the common law courts of modern democracies (especially Australia, Canada, India, and the United Kingdom). US state courts will also be examined from a comparative perspective.

POLI 729 - Courts in Developing Countries (3 Credits)
A comparative study of courts, judicial process, and judicial behavior, and the role of courts in politics focusing on the common law and civil law courts of Latin America, Africa, and Asia.

POLI 731 - Government and Politics of Latin America (3 Credits)
This course examines the nature of democracy and democratic transitions, the relationship between economic and political development, and the causes and effects of different economic development strategies in Latin America.

POLI 732 - International Law (3 Credits)
Study of the role of law in international relations, emphasizing both substantive and theoretical problems relating to development of systems of law in such areas as war, protection of human rights, outer space and oceans, and international commerce.

POLI 733 - International Organization (3 Credits)
Examination of theoretical and substantive problems relating to the development and functioning of international intergovernmental and nongovernmental organizations.

POLI 734 - Economics of International Politics (3 Credits)
Study of the international political significance of economic issues relating to monetary reform, trade, aid, and economic development.
POLI 735 - International Cooperation (3 Credits)
Approaches to the study of international cooperation, including international integration, community formation, regime formation, interdependence, international institutionalization, and global governance.

POLI 736 - Public Opinion and Political Attitudes (3 Credits)
Examines the determinants, content, and consequences of citizens’ political beliefs and attitudes with attention to political culture, ideology, issue dynamics, and popular support for democratic principles.

POLI 737 - Nationalism and Politics (3 Credits)
Proseminar on the politics of nationalism from both the political sociology and international relations perspectives.

POLI 740 - Formulation and Conduct of United States Foreign Policy (3 Credits)
Study of the constitutional bases, institutions, instruments, and decision-making processes of U.S. foreign policy.

POLI 741 - Contemporary United States Foreign Policy (3 Credits)
Analysis and interpretation of the substantive problems of contemporary U.S. foreign policy.

POLI 742 - Problems in National Security (3 Credits)
Continuing problems and competing strategies involved in formulating a national security strategy for the U.S. Issues include the defense structure and budget; the National Security Council and the decision-making process; the volunteer Army and the role of the military in society; nuclear weapons and arms control.

POLI 745 - Russian Foreign Policy (3 Credits)
Study of the foreign policy of Russia and the other states of the former Soviet Union, including consideration of historical developments, institutions, capabilities, and strategic objectives.

POLI 746 - Chinese Foreign Policy (3 Credits)
A seminar on the Chinese tradition in foreign policy and the foreign policies of the Republic of China and the People’s Republic of China, emphasizing the impact of domestic Chinese affairs on their foreign relations in the post-World War II period.

POLI 747 - Japanese Foreign Policy (3 Credits)
A seminar on the foreign policy of Japan with emphasis on the post-World War II period and on the analysis of Japanese objectives and capabilities in international relations.

POLI 749 - International Relations of the Middle East (3 Credits)
Foreign policies and international relations of the Middle East, focusing on relations within the region and with the West and Soviet bloc.

POLI 751 - Policy Analysis I (3 Credits)
Introduction to the theory and practice of policy analysis.

POLI 752 - Policy Analysis II: Advanced Policy Analysis (3 Credits)
Overview of methods used to evaluate public policies. Prerequisites: POLI 771 or equivalent.

POLI 753 - Capstone Seminar in Public Administration (3 Credits)
Critical issues in public administration; term project integrating the material from other courses in the analysis of a contemporary problem. Field work and applied project required. Prerequisites: 30 credit hours MPA program.

POLI 754 - Public Accountability and Ethics (3 Credits)
An examination of the legal, political, professional, and organizational accountability demands made on administrators; the interplay of these demands with the needs for ethical decision making and integrity.

POLI 755 - Grants Administration (3 Credits)
Analysis of grant and contract functions in government agencies; proposal writing; legal and fiscal requirements of grants administration. Cross-listed course: EDRM 800

POLI 756 - Introduction to Planning and Politics in the United States (3 Credits)
Overview of contemporary planning in the United States at local, state, and national levels, with emphasis on the politics of planning at the local level of government. Includes theory of planning, history, problems in the planning process, and implementation of planning.

POLI 757 - Health Politics (3 Credits)
Analysis of issues and forces affecting health delivery through the public sector; major models of political decision making; and current health legislation. 03: 07/05/2019. Prerequisites: HSPM 700 and HSPM 782.

POLI 758 - The State and Economic Life (3 Credits)
A study of the relation of government to the economy in the modern world, including theories of the economic functions of the state.

POLI 759 - Information Systems and Public Administration (3 Credits)
The development and uses of information systems in local, state, and federal administrative agencies with emphasis on the management of information systems in the public agency environment; the problems of interagency and intergovernmental relations; the politics of technological innovation; privacy, confidentiality, and security and information policy; and the role of information technology in democratic government.

POLI 760 - American Government and Politics (3 Credits)
Advanced survey of the institutions and processes of the American political system.

POLI 761 - American National Government for Professionals (3 Credits)
Fundamental institutions, processes, values, and policies of the U.S. political system. Designed for master's and non-degree students in education, public administration, and business administration.

POLI 762 - Politics of the Budgetary Process (3 Credits)
Analysis of the political, economic, and social influences on the budgetary process.

POLI 763 - Legislative Process and Behavior (3 Credits)
The structure, organization, powers, functions, and problems of legislative bodies in America; the behavior of members of those bodies, with emphasis on the United States Congress.

POLI 764 - Problems of the Presidency (3 Credits)
A seminar on the problems of the contemporary presidency. Various approaches to the study of the presidency will be used as a means to uncovering and examining some of the major problems connected with the role of the president in the American system of government. Leading exponents of various approaches will be read and discussed.

POLI 765 - Political Parties and Interest Groups (3 Credits)
Intensive examination of contemporary development of political organizations in the United States.

POLI 766 - Electoral Behavior (3 Credits)
Examination of electoral behavior, including historical patterns in electoral history and forces affecting individual voting behavior such as partisan and class loyalties, political socialization, political attitudes, and candidate appeals. The role played by elections in the larger political system.

POLI 767 - State Government (3 Credits)
State government problems and policy issues. Emphasis on the modernization of government institutions and comparative state politics.

</table>
POLI 801 - Selected Thinkers in Political Theory (3 Credits)
Analysis of particular theorist or theorists as chosen by the instructor.
May be repeated as topics vary. Variations will be announced in the schedule of classes by title.

POLI 802 - Seminar in Comparative Administration (3 Credits)

POLI 803 - Research Methods in Political Science (3 Credits)
Consideration of advanced methods in statistics and research design and their application and use in the writing of a major research paper.

POLI 806 - Seminar in Advanced Methods of Political Analysis (3 Credits)
Advanced methodological strategies for empirical analysis. The course will focus primarily on causal models, data theory, dimensional analysis, and scaling techniques.

POLI 815 - Seminar in Advanced International Relations Theory (3 Credits)
A critical examination of contemporary efforts to analyze international relations through the use of empirical methodologies, including: social-psychological studies, simulation, game theory, decision theory, quantitative analyses.

POLI 816 - Seminar in Comparative Study of Foreign Policy (3 Credits)
Research seminar stressing systematic research procedures in the investigation of the determinants of foreign policy, including the employment of empirical data for testing theoretical propositions.

POLI 817 - Seminar in International Organization and Cooperation (3 Credits)
Advanced research seminar in selected topics related to international organization, international law, world order, ethics of international affairs.

POLI 831 - Seminar on Europe (3 Credits)
Advanced study of the European interstate system and Europe's role in world affairs. Emphasis on post-World War II Western and Central Europe, major powers, the European Union, and intra-European relations after the Cold War.

POLI 834 - Seminar on Africa (3 Credits)
Advanced study of the politics and international relations of Africa, regional development, foreign policy patterns, security problems, and questions of governance.

POLI 850 - Seminar in Public Law (3 Credits)

POLI 865 - Seminar in Urban Politics (3 Credits)
Advanced study of the politics and governmental problems of urban areas.

POLI 872 - Public Sector Labor Relations and Collective Bargaining (3 Credits)
Overview of public sector unions, labor-management relations, negotiating strategies, and the unique dynamics of management/employee interactions within public agencies.

POLI 880 - Seminar in Comparative Politics (3 Credits)
Intensive study of selected problems in comparative politics, with emphasis on individual research.

POLI 899A - Dissertation Preparation (1-12 Credits)
For candidates for the Doctor of Philosophy degree in political science.

POLI 899B - Dissertation Preparation (1-12 Credits)
For candidates for the Doctor of Philosophy degree in international studies.

Portuguese (PORT)

PORT 615 - Intensive Readings in Portuguese (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language reading requirements with successful completion of the course. Undergraduates may take the course as an elective only.

Psychology (PSYC)

PSYC 501 - Human Factors Psychology (3 Credits)
Application of research in experimental psychology to ergonomics, the design of human-environment systems, with emphasis on work settings.
Prerequisites: PSYC 101 and 9 hours of upper-level courses all in psychology, business, engineering, or nursing.

PSYC 503 - Psychology of Drug Use and Effects (3 Credits)
Research and theoretical considerations of substance abuse. Pharmacological, sociological, psychological, medical, economic, forensic, and other relevant research and treatment disciplines.
Prerequisites: PSYC 450 or PSYC 455 or PSYC 460.

PSYC 506 - Psychology of Language (3 Credits)
Theories of speech perception, linguistic theories of syntax and semantics, the brain mechanisms underlying language, the development of language in children, and the role of language in thought.
Cross-listed course: LING 567

PSYC 507 - Cognitive Neuroscience (3 Credits)
Research and theories on the role of the brain in facets of cognitive behavior, including attention, short-term and working memory, perception, language, executive function, thinking, and problem solving.
Prerequisites: C or better in PSYC 405, highly recommended PSYC 455 or PSYC 460.

PSYC 510 - Child Behavioral and Mental Disorders (3 Credits)
Theories, description, and assessment of child behavior problems and disorders; methods of intervention.
Prerequisites: PSYC 420 or PSYC 410.

Graduation with Leadership Distinction: GLD: Community Service

PSYC 520 - Psychology of Child Development (3 Credits)
Examination of development from conception through older childhood. Specific cognitive and social processes will be given in-depth study.
Prerequisites: PSYC 420.

PSYC 521 - Psychology of Adolescence (3 Credits)
Theories and research examining social, emotional, and intellectual development in adolescence. Explores influence of family, peer, school, and cultural contexts.
Prerequisites: PSYC 420.

PSYC 522 - Psychology of Early and Middle Adulthood (3 Credits)
Developmental changes in abilities, personality, and behavior which occur between adolescence and old age.
Prerequisites: PSYC 420.

PSYC 523 - Psychology of Aging (3 Credits)
Psychological, social, and biological phenomena associated with maturity and aging.
Prerequisites: PSYC 420.
PSYC 524 - Nature of Students with Mental Retardation (3 Credits)
Nature and causes of mental retardation; behavior and potentialities of persons with mental retardation.
Prerequisites: a course in the areas of child psychology-child development.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PSYC 525 - The Psychology of the Midlife Woman (3 Credits)
Biological, social, and psychological aspects of the midlife woman.
Cross-listed course: WGST 525
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PSYC 526 - Prevention of Psychological Problems in Children and Youth at Risk (3 Credits)
Etiology, prevention of, and intervention in behavioral, social, emotional, educational, and psychological problems in children and youth at risk.
Prerequisites: PSYC 410 or PSYC 420 or equivalent.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PSYC 528 - Psychology of Children with Exceptionalities (3 Credits)
Characteristics, causes, needs, and intervention strategies for children with a broad range of exceptionalities including mental, physical, social/emotional difficulties and atypical gifts and talents.
Prerequisites: PSYC 420 or PSYC 520.

PSYC 529 - Nature of Students with Specific Learning Disabilities (3 Credits)
Children with average/above average intelligence and specific learning impairments; diagnostic and remedial techniques. Offered by both the College of Education and the Department of Psychology.
Prerequisites: EDEX 523 or PSYC 528.

Cross-listed course: EDEX 531

PSYC 530 - Advanced Social Psychology (3 Credits)
Intensive study of topics selected from the field of social psychology.
Prerequisites: PSYC 430.

PSYC 550 - Advanced Sensation and Perception (3 Credits)
Intensive study of topics selected from the field of sensation and perception.
Prerequisites: PSYC 450.

PSYC 560 - Advanced Topics in Neuroscience (3 Credits)
Intensive study of topics selected from the field of neuroscience.
Prerequisites: PSYC 455 or PSYC 460.

PSYC 565 - Psychology of Physical Activity (3 Credits)
Introduction to psychosocial factors in physical activity. Topics include mental health effects of exercise, behavior change theories applied to physical activity, and physical activity determinants and interventions. 03: 07/05/2019.
Prerequisites: PSYC 101, PSYC 228.

PSYC 570 - Neuroscience Laboratory (3 Credits)
Practice in surgical, histological, and behavioral testing methodology. Two lectures and one three-hour laboratory per week.
Prerequisites: PSYC 460.

PSYC 571 - Cognitive Neuroscience Laboratory (3 Credits)
Methods of observation and experimentation in cognitive neuroscience. Two lectures and one three-hour laboratory per week.
Prerequisites: PSYC 227 and C or better in two courses from PSYC 405, PSYC 450, PSYC 455, PSYC 460, or PSYC 507.

Prerequisite or Corequisite: one course from PSYC 400, PSYC 450, PSYC 455, or PSYC 460.

PSYC 572 - Cognitive Psychology Laboratory (3 Credits)
Practice in the experimental techniques used in the study of cognitive psychology. Two lectures and one three-hour laboratory per week.
Prerequisite or Corequisite: PSYC 405.

PSYC 574 - Sensation and Perception Laboratory (3 Credits)
Concepts and principles in the study of sensation and perception in the laboratory. Two lectures and one three-hour laboratory per week.
Prerequisite or Corequisite: PSYC 405.

PSYC 575 - Developmental Psychology Laboratory (3 Credits)
Methods of observation and experimentation on human psychological development. Two lectures and one three-hour laboratory per week.
Prerequisites: PSYC 226 and PSYC 227.

Prerequisite or Corequisite: PSYC 420 or PSYC 520.

PSYC 580 - Intermediate Statistics for Psychologists (3 Credits)
Advanced analysis of the uses and applications of statistics to research in psychology, and interpretation of statistics in the psychological literature.
Prerequisites: B or better in PSYC 227.

PSYC 583 - Psychological Tests and Measurement (3 Credits)
Introduction to the theory and practice of measuring psychological attributes. Emphasis on test construction in a laboratory setting. Hands-on experience in designing, administering, and analyzing psychological tests and measures.
Prerequisites: B or better in PSYC 227 and PSYC 228.

PSYC 584 - History and Systems of Psychology (3 Credits)
Systematic approaches to psychology.
Prerequisites: 9 hours in psychology at 400 level or above.

PSYC 585 - Advanced General Psychology (3 Credits)
Review and integration of general principles of psychology. Primarily for students planning graduate study in psychology.
Prerequisites: 12 hours in psychology courses numbered above 300.

PSYC 589 - Selected Topics in Psychology (3 Credits)
Course content varies and will be announced in the schedule of classes by title.

PSYC 598 - Individual Research (3 Credits)
Planning and execution of supervised research in psychology. Approved contract required.
Prerequisites: 15 hours of psychology.

PSYC 599 - Individual Research (3 Credits)
Planning and execution of supervised research in psychology. Approved contract required.
Prerequisites: 15 hours of psychology.
PSYC 700 - Psychosocial Approaches to Gerontology (3 Credits)
Introduction to gerontology from the fields of demography, psychology, sociology, social welfare, and economics.
Cross-listed course: SOWK 771

PSYC 701 - Behavioral Assessment and Intervention with Children and Youth (3 Credits)
A combination of lecture and practicum experiences emphasizing the application of behavioral assessment and intervention techniques in educational, institutional, and home settings. Students receive individual and group supervision throughout the semester.
Prerequisites: PSYC 711.

PSYC 702A - Basics of Neuroscience (3 Credits)
Functional organization of the nervous system; research and theories of the neurological bases of behavior.

PSYC 702B - Basics of Cognitive Psychology (3 Credits)
Research and theories on attention, memory, language, thinking, and other cognitive processes.

PSYC 702C - Basics of Developmental Psychology (3 Credits)
Research and theories of psychological development across the lifespan.

PSYC 702D - Basics of Learning and Motivation (3 Credits)
Research and theories of instrumental conditioning, classical conditioning, learning, and motivation.

PSYC 702E - Experimental Design (3 Credits)
This course covers basic principles of sound experimental design, including such topics as internal and external validity, subject selection factors, and techniques for reducing sampling error and minimizing bias. In addition, the course will discuss practical limitations to ideal experimental design and have students identify the design conventions specific to their field of study.

PSYC 703A - Integration across Cognitive Psychology and Neuroscience (3 Credits)
Research and theories of cognitive neuroscience.

PSYC 703C - Integration across Developmental and Cognitive Psychology (3 Credits)
Research and theories of cognitive development.

PSYC 703D - Integration across Areas of Psychology (3 Credits)
Presentation of research and theories that cross different areas within psychology.

PSYC 704 - Group Dynamics (3 Credits)
Offered for an interdisciplinary student clientele interested in group processes and structures. Training is provided in observational methods and techniques of group assessment. Laboratory and field study required.

PSYC 705 - Psychological Systems and Theories (3 Credits)
Contemporary trends in systematic approaches and behavior theories.

PSYC 706 - Seminar in Judgment and Decision Making (3 Credits)
Research and theories of processes in judgment, choice, and decision making.

PSYC 709 - Basic Quantitative Methods in the Analysis of Behavioral Data I (3 Credits)
Quantitative methods for graduate students in psychology and other behavioral sciences. Emphasizes logical/intuitive understanding of the basic techniques, focuses heavily on the application of these methods to psychological research. Three lecture/discussion hours and a one-hour scheduled lab per week.
Prerequisites: introductory course in statistics, psychology or mathematics.

PSYC 710 - Basic Quantitative Methods in the Analysis of Behavioral Data II (3 Credits)
A continuation of PSYC 709. Three lecture/discussion hours and a one-hour scheduled lab per week.
Prerequisites: PSYC 709.

PSYC 713 - Survey of Psychoeducational Tests and Assessment (3 Credits)
Consideration of basic issues in evaluation of children, such as reliability, validity, item selection, standardization groups, criterion-referenced vs. norm-based testing, ethics, etc. Includes presentations via various instructional modes of a wide range of psychoeducational assessment procedures with a wide variety of children.

PSYC 714 - Psychoeducational Assessment of Children I (1-3 Credits)
A combination of lectures and practicum concerned with interviewing, behavioral observation and analysis, and cognitive-intellectual assessment. Requires involvement in school psychology training-service centers in the schools.
Prerequisites: acceptance in graduate psychology department program.

PSYC 715 - Psychoeducational Assessment of Children II (1-3 Credits)
A combination of lectures and practicum concerned with assessment of perceptual-motor processes, academic achievement, and personality and interpersonal skills. Requires involvement in school psychology training-service centers in the schools.
Prerequisites: PSYC 714 and acceptance in graduate psychology department program.

PSYC 716 - Assessment of Emotional-Behavioral Functioning (1-3 Credits)
Consideration, via lecture and/or practicum, of special areas of psychoeducational assessment. Topics will include infant assessment, criterion-referenced assessment, and assessment of neurological problems.
Prerequisites: PSYC 714, Acceptance in Department of Psychology graduate program.

PSYC 717 - Survey of Personality Theories (3 Credits)
Issues, theories, and research on personality.
Prerequisites: 18 hours in psychology.

PSYC 720 - Psychological Interventions with Children and Families (3 Credits)
Integration of theory, research, and practice in child clinical and family psychology. Focus on systemic, behavioral, and other orientations in the treatment of children and families.

PSYC 721 - Developmental Psychopathology and Resilience (3 Credits)
Theoretical, empirical, and methodological issues in the development of psychopathology or resilience in children, adolescents, and families. Emphasis on research topics related to nature, course, and etiology.
Prerequisites: acceptance in graduate psychology department or consent of instructor.
PSYC 725 - Systems and Theories of Psychological Intervention (3 Credits)
Seminar emphasizing a critical analysis of psychotherapy systems and theories.

PSYC 726 - Psychological Problems and Resilience (3 Credits)
A survey of clinical disorders, their origins and characteristics. Includes a review of contemporary diagnostic systems, research, and theory.
Prerequisites: PSYC 410.

PSYC 727 - Foundations of Community Psychology (3 Credits)
Survey of theoretical foundations, research and practice in community psychology. Topics include prevention, social systems intervention, community participation, innovation in community service delivery systems, and community change processes.

PSYC 728 - Laboratory in Community Study (1 Credit)
Designated to accompany Psychology 727. Laboratory will target specific problems, resources, or populations and will provide students with elementary exposure to a community system.
Prerequisite or Corequisite: PSYC 727.

PSYC 732 - Clinical Neuropsychology (3 Credits)
Overview of relationships between brain structures and function and the assessment of cognitive and emotional behavior in adults and children.
Prerequisite or Corequisite: PSYC 702A or comparable course in biopsychology.

PSYC 733 - Neuropsychological Syndromes in Childhood (3 Credits)
Applications of neuropsychological theory and research to the study of the learning process, with emphasis upon assessment and intervention with learning disabilities.

PSYC 734 - Neuropsychological Screening and Assessment (3 Credits)
Assessment procedures for screening neuropsychological factors in individuals with neurobehavioral deficits.

PSYC 735 - Survey of Psychopharmacology (3 Credits)
The effect of drugs upon internal psycho-physiological functioning and upon the behavior of human and animal subjects. Particular emphasis will be given to the psychoactive drugs.
Prerequisites: 18 hours in psychology

PSYC 742 - Consultation and Systems Interventions (3 Credits)
Focus on understanding the theoretical bases of consultation and developing the skills necessary for the practice of mental health consultation.

PSYC 743 - Theory and Practice of Mental Health Consultation II (3 Credits)
Continues the practicum begun in Psychology 742 and develops the skills of administrative mental health consultation and evaluation of consultation programs.

PSYC 745 - Organizational Behavior (3 Credits)
Analysis of the organization as a complex interaction system.

PSYC 749 - Principles of Human Diversity (3 Credits)
Fundamental, conceptual and empirical knowledge regarding dimensions of diversity, social inequality and the application of this knowledge to psychological research, teaching and practice. Restricted to psychology students. Non-Psychology students need instructor permission to register.

PSYC 750 - Psychology of Women (3 Credits)
Women's diversity explored through research on personality, stereotypes, status and power, biological aspects, socialization, sexuality, relationships, mothering, work and achievement, violence against women, psychological disorders, and feminist therapies.
Cross-listed course: WGST 750

PSYC 751 - Race, Class, Gender, and Sexuality (3 Credits)
Historical and contemporary dimensions of social inequality centered in race, social class, gender, and sexuality.

PSYC 760 - Issues and Ethics in Clinical-Community Psychology (3 Credits)
The presentation of ethics in research and practice in clinical-community psychology and the discussion of current professional issues. Covering history and systems in psychology and providing in depth training on the ethical conduct of research.

PSYC 761 - Psychological Assessment I (3 Credits)
Develop assessment skills through interviewing, observation, performance testing, and report writing. Experience includes assessment of individuals, couples, and/or families from a variety of perspectives. Didactic/practicum.

PSYC 762 - Psychological Assessment II (4 Credits)
Theory of measurement and the construction of measures specific to clinical and community psychology. Intellectual achievement, objective personality, and projective measures. Didactic/practicum.

PSYC 763 - Clinical Psychology Assessment III (1-4 Credits)
Conceptualization of cases involving psychological measures. Clients include individuals, couples, and families. Didactic/practicum. May be repeated for up to 4 credits.
Prerequisites: PSYC 761.

PSYC 765 - Externship in School Psychology (3 Credits)
A closely supervised 20-hour-per-week externship in the techniques of psychological services in school systems. Staff.

PSYC 770 - Survey of Social Psychology (3 Credits)
Issues, research, and theories in social psychology.
Prerequisites: 18 hours in psychology.

PSYC 772 - Research Approaches to Human Behavior (3 Credits)
Nonquantitative aspects of research methodology and experimental design in laboratory and field settings. A critical investigation of artifacts and ethical issues in behavioral research.
Prerequisites: PSYC 709.

PSYC 773 - Research in Clinical-Community Psychology (1-3 Credits)
Supervised training in the conduct of empirical research in clinical-community psychology. May be repeated once for credit.

PSYC 777 - Environmental Psychology (3 Credits)
The study of human behavior and satisfaction in relation to the natural and person-made environment. Topics include environmental stress, risk, social ecology of families, behavior setting theory, and person-environmental relationships.
Prerequisites: PSYC 727.

PSYC 780 - Behavior Therapy (3 Credits)
A survey of principles, theory, methods, issues, and research in behavior therapy. Behavioral interventions with adults, children and families, organizations, and community settings.
PSYC 781 - Behavior Therapy Practicum: Adults (1-3 Credits)
Intensive practicum experience in the use of behavioral and cognitive-behavioral therapy with adult inpatients (psychiatric, geriatric, alcoholic, imprisoned), outpatients, and marital therapy clients.

Prerequisites: PSYC 720.

PSYC 782 - Child, Adolescent and Family Therapy Practicum (3 Credits)
Individually supervised practicum in therapy with children, adolescents, and families. Includes exposure to multiple approaches including behavioral and family systems modes of intervention.

Prerequisites: PSYC 711 or PSYC 730.

PSYC 783 - Health Psychology/Behavioral Medicine (3 Credits)
Scientific study of the application of psychological principles to prevention of illness, maintenance of health, and the treatment of related medical dysfunctions. Primary emphasis on the use of behavior therapy and behavior modification techniques.

Prerequisites: PSYC 762, PSYC 783.

PSYC 785 - Seminar in Psychotherapy Research (3 Credits)
Psychotherapy research and selected topics in other clinical research, such as alcoholism and hypnosis.

PSYC 790 - College Teaching of Psychology I (1-3 Credits)
Didactic, seminar, and experiential coverage of the teaching of psychology at the college level.

Prerequisites: 18 hours in psychology.

PSYC 791 - College Teaching of Psychology II (1 Credit)
Didactic, seminar, and experiential coverage of the teaching of psychology at the college level.

Prerequisites: 18 hours in psychology or permission of instructor.

PSYC 792A - Responsible Conduct of Research in Psychology and Neuroscience (1 Credit)
Ethical issues and dilemmas in research. Compliance with national standards.

PSYC 792B - Issues and Ethics in Research in Psychology and the Teaching of Psychology II (1 Credit)
Presentation of ethics and issues pertaining to the teaching of psychology and psychological research.

PSYC 799 - Thesis Preparation (1-9 Credits)
To be arranged by candidates for the MA degree with the thesis advisor.

PSYC 801 - Cognitive Neuroscience I (3 Credits)
Techniques and methodologies of cognitive neuroscience, emphasizing classic research and theoretical perspectives as well as cutting-edge findings. Areas of focus include sensation and perception, attention, motor control, short-term/working memory, and reward/decision-making.

Prerequisites: or Corequisite: Completion of 6 credits from PSYC 702A-D.

PSYC 802 - Cognitive Neuroscience II (3 Credits)
Detailed exploration of the techniques and methodologies of cognitive neuroscience and the brain mechanisms sub-serving long-term memory, autobiographical memory, language, emotion, social cognition, and cognitive development.

Prerequisite or Corequisite: PSYC 801.

PSYC 806 - Special Topics in Quantitative Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in quantitative methods and quantitative psychology. May be repeated as content varies by title.

Prerequisite or Corequisite: PSYC 710.

PSYC 816 - Advanced Research in Clinical-Community Psychology (1-3 Credits)
Supervised training in the conduct of empirical research in clinical-community psychology.

PSYC 818 - Research in the Schools (3 Credits)
Supervised psychological research on school-related problems; participation in ongoing program of research. Required of all doctoral candidates in psychology.

PSYC 819 - Seminar in Biological Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in biological psychology. May be repeated with different topics.

Prerequisites: PSYC 730.

PSYC 820 - Seminar in Developmental Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in developmental psychology. May be repeated with different topics.

Prerequisites: PSYC 751.

PSYC 821 - Theory of Psychological Measurement (3 Credits)
A survey of psychological scaling and factor theory, together with special techniques for achieving reliability and validity, including item analysis.

Prerequisites: PSYC 225 or the equivalent.

PSYC 822 - Seminar in Cognitive Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in cognitive psychology. May be repeated with different topics.

Prerequisites: PSYC 712.

PSYC 823 - Multivariate Analysis of Behavioral Data (3 Credits)
Advanced topics in multiple-variable research. Topics include multiple linear regression, polynomial regression, canonical correlation, discriminant function, and the analysis of variance using orthogonal polynomials and multidimensional scaling, both metric and nonmetric approaches.

Prerequisites: PSYC 710.

PSYC 824 - Special Topics in Quantitative Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in quantitative methods and quantitative psychology. May be repeated as content varies by title.

Prerequisite or Corequisite: PSYC 710.

PSYC 825 - Introduction to Statistical Mediation Analysis (3 Credits)
Mediation analysis and statistical methods for assessing mediating variables.

Prerequisites: PSYC 709 and PSYC 710 or STAT 700 and STAT 701.

PSYC 826 - Family Psychotherapy (3 Credits)
Advanced topics in family psychotherapy.

Prerequisites: PSYC 720, acceptance in clinical-community or school psychology graduate program, and consent of instructor.

PSYC 827 - Applied Individual and Couples Psychotherapy (3 Credits)
Individually supervised practice in individual and couples psychotherapy.

Prerequisites: PSYC 725.

PSYC 828 - Applied Group Psychotherapy (1-3 Credits)
Advanced theory and research methods with supervised practice in the modification of personality and behavior through group interaction.

PSYC 829 - Community Psychology Practicum I (1-3 Credits)
Individually supervised field assignments in the community.
PSYC 830 - Advanced Child, Adolescent and Family Therapy Practicum (1-3 Credits)
Individually supervised advanced practicum in child, adolescent and family therapeutic intervention.
Prerequisites: PSYC 782.

PSYC 831 - Practicum in Psychological Assessment (1-3 Credits)
Training for advanced students in testing, assessment, and psychodiagnosics under the supervision of psychology staff.

PSYC 832A - Practicum in School Psychology (3 Credits)
Qualified advanced students will perform psychological evaluations and render other services in a public school setting under the supervision of the school psychology faculty. Cases dealt with include children with general or special learning difficulties.

PSYC 832B - Practicum in School Psychology (1-3 Credits)
Qualified advanced students will perform psychological evaluations and render other services in a public school setting under the supervision of the school psychology faculty. Cases dealt with include children with general or special learning difficulties.

PSYC 833 - Practicum in Mental Retardation (1-3 Credits)
Qualified advanced students will perform psychological evaluations and other clinical services under the supervision of mental retardation faculty in designated settings such as the USC Psychological Service Center, Midlands Training School, and other agencies providing services for persons with mental retardation. The assignment of cases will be based on a previous diagnosis of mental retardation or the probable involvement of mental retardation in client to be studied.
Prerequisites: PSYC 519.

PSYC 834 - Experimental Psychopathology (3 Credits)
A survey of experimental findings on psychological behavior in animals and humans and their theoretical implications. An introduction to applicable research procedures.

PSYC 835 - Advanced Psychotherapy Practicum (1-3 Credits)
Supervised psychotherapy with children, adolescents, or adults, together with additional training in marriage counseling, behavior therapy, and family therapy.
Prerequisites: PSYC 827 or PSYC 830.

PSYC 835A - Advanced Psychotherapy Practicum (1-3 Credits)
Supervised psychotherapy with children, adolescents, or adults, together with additional training in marriage counseling, behavior therapy, and family therapy.
Prerequisites: PSYC 827 or PSYC 830.

PSYC 835B - Advanced Psychotherapy Practicum (1-3 Credits)
Supervised psychotherapy with children, adolescents, or adults, together with additional training in marriage counseling, behavior therapy, and family therapy.
Prerequisites: PSYC 827 or PSYC 830.

PSYC 835C - Advanced Psychotherapy Practicum (1-3 Credits)
Supervised psychotherapy with children, adolescents, or adults, together with additional training in marriage counseling, behavior therapy, and family therapy.
Prerequisites: PSYC 827 or PSYC 830.

PSYC 836 - Seminar in Psychopharmacology (3 Credits)
Theoretical and empirical issues in an area of current interest in psychopharmacology. May be repeated with different topics.
Prerequisites: PSYC 735

PSYC 837 - Autism Theory and Diagnostics (1-3 Credits)
Prerequisites: PSYC 714 and PSYC 716 or equivalent.

PSYC 838 - Seminar in Learning and Conditioning (3 Credits)
Theoretical and empirical issues in an area of current interest in learning and conditioning. May be repeated with different topics.
Prerequisites: PSYC 711.

PSYC 839 - Community Psychology Practicum II (3 Credits)
Supervised practicum experience in community need assessment and the development of grant applications. Placement in state agencies and community programs.
Prerequisites: PSYC 727 and PSYC 829.

PSYC 840 - Seminar in Professional School Psychology (3 Credits)
A survey of the role of the psychologist functioning in a school setting, the associated problems and methods, including relationships with children and parents with teachers, administrators, and other school personnel.

PSYC 841 - Advanced Study in Selected Topics (1-6 Credits)
Special assignments to meet the needs of individual students. Conferences with instructor and staff. May be repeated with different topics.

PSYC 842 - Seminar in Social Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in social psychology. May be repeated with different topics.
Prerequisites: PSYC 770.

PSYC 845 - Topics in Community Psychology (3 Credits)
Theoretical and empirical issues in an area of current interest in community psychology. May be repeated with different topics.
Prerequisites: PSYC 727.

PSYC 850 - Academic Interventions (3 Credits)
Overview of consultation and systems-level interventions in psychological services.

PSYC 856 - Advanced Study of Selected Problems in Clinical Psychology (3 Credits)

PSYC 865 - Internship in School Psychology (1 Credit)
Two semesters required for Ph.D. Student is registered upon recommendation of the student's advisory committee. Will be graded as satisfactory (S) or unsatisfactory (U).

PSYC 888 - Selected Topics in Psychology (1-6 Credits)
Intensive study in an advanced area in psychology. May be repeated for credit.

PSYC 889 - Independent Advanced Research (1-9 Credits)
Doctoral-level research additional to that involved in the doctoral dissertation.

PSYC 899 - Doctoral Research and Dissertation Preparation (1-12 Credits)
Public Health (PUBH)

PUBH 678 - Transforming Health Care for the Future (1 Credit)
Foundation for beginning health professions students to gain an understanding of the complexities of the health care system through experiential activities conducted in interprofessional teams and the importance of interprofessional collaboration in order to improve the system.

Cross-listed course: SOWK 678

PUBH 700 - Perspectives in Public Health (3 Credits)
Seminar-format orientation to history, mission, and core services and disciplines of public health to develop understanding of current public health practice and how many health-related disciplines contribute to achieving public health goals.

PUBH 710 - Ethics and the Health Sciences (1-4 Credits)
Students are introduced to formal and informal codes of professional conduct of various health science disciplines and understand the implications of these distinctions for interdisciplinary research, clinical practice, and administration. 03: 07/05/2019.

PUBH 725 - Quantitative Methods for Public Health Practice (5 Credits)
Introduction to epidemiology and biostatistics and their application to public health issues and practice. Covers basic epidemiologic, biostatistical, and data management techniques used to analyze and interpret data in the field of public health.

PUBH 726 - Qualitative Methods for Public Health Practice (3 Credits)
An introductory course on why, when, and how to apply qualitative data collection and analysis methods to public health activities with a focus on practice-based application. Identifying, working with, and communicating with a range of community stakeholders are also discussed.

PUBH 730 - Public Health Systems, Policy, and Leadership (3 Credits)
A course on public health management and policy process and advocacy to develop effective public health leaders. Included is an emphasis on the relationships between people and their environment and the impact of the environment on human health and well-being.

Prerequisites: PUBH 725 and PUBH 726.

PUBH 735 - Practical Applications of Public Health Planning (4 Credits)
A practical approach to planning public health programs through the application of planning frameworks and the exploration of fundamental issues in planning, implementing and evaluating programs in various settings addressing diverse populations and issues.

Prerequisites: PUBH 725 and PUBH 726.

PUBH 743 - Foundations of Health Disparities (3 Credits)
Evolution of health disparities from historical, public, social, economic, and political perspectives.

PUBH 791 - Special Topics Public Health (1-3 Credits)
The purpose of this course is to provide the student of public health a clear understanding of public health history as a key component of the environment in which the any health professional must function. The course content will begin in prehistory and have a worldwide perspective through the 1700s. It will then shift to the history of the United States. In the historical, social, economic, and political context that the US public health and health care systems evolved are lessons and understandings that are necessary for this generation of health administrators and health policy makers to advance health for all. The first part of the course will examine the impact of disease on world history through the 18th century. The second and third parts of the course will present, from a historical perspective, the evolution of public health and health care delivery in the United States.

PUBH 798 - Public Health Practice (1-6 Credits)
Limited work experience or service project in an approved public health setting.

Prerequisites: BIOS 700 or BIOS 701 and EPID 700 or EPID 701.

PUBH 810 - Ethics in Public Health Research and Practice (1 Credit)
Foundations of public health ethics with application to practice and to responsible conduct of research in public health disciplines. Enrollment restricted to Doctoral students & post-docs, master's students by permission of instructor.

RCON - Rehabilitation Counslng (RCON)

RCON 601 - Helping Relationships: Fundamentals of Counseling Practice (3 Credits)
Development of communication skills necessary to foster and develop effective counseling relationships.

RCON 605 - Culture and Disability (3 Credits)
Concepts and procedures relating to disability and culture, covering relevant issues affecting racially and culturally diverse individuals with disabilities, as well as promoting sensitivity and competence. Includes implications for an array of helping professions.

RCON 700 - Foundations of Clinical Rehabilitation Counseling (3 Credits)
Origin, evolution, and future of the rehabilitation counseling profession. Role and functions, scope of practice, and practice settings of rehabilitation counselors.

RCON 702 - Introduction to Rehabilitation Research and Program Evaluation (3 Credits)
Foundations underlying research and assessment methodologies and their application to counseling. Research design, program evaluation, ethical principles in research, the scholarly research process, and statistical software packages.

RCON 704 - Ethics in Rehabilitation Counseling and Helping Relationships (3 Credits)
Examines contemporary ethical concerns, issues, decision-making models, and best practices in rehabilitation counseling and the helping professions. Knowledge and awareness appropriate for master's-level professionals with a particular focus on working with people with disabilities or disadvantage. Application of knowledge across a range of helping relationships.
RCON 711 - Rehabilitation Counseling Theories and Practice (3 Credits)
Individual counseling theories and techniques applied to a wide range of persons, including persons with a disability (emotional, psychosocial, mental, and physical) and disadvantaged persons.
Prerequisites: RCON 601 or equivalent.

RCON 714 - Rehabilitation Assessment (3 Credits)
Assessment in clinical rehabilitation, including assessment instruments, methods, materials, and interpretation as applied to a variety of rehabilitation clients. Concepts, skill development, and application of clinical rehabilitation assessment.

RCON 720 - Group Counseling in Rehabilitation Settings (3 Credits)
Principles and practice of group counseling techniques applied to a wide range of persons, including persons with a disability (emotional, psychosocial, mental, and physical) or disadvantaged persons.
Prerequisites: RCON 601 and RCON 711 or equivalents.

RCON 725 - Career Counseling Theories and the World of Work (3 Credits)
Career counseling theories, processes, and techniques, with emphasis on persons with disabilities and vocational placement. Identification of values, interests, abilities, and methods for obtaining, organizing, and utilizing career information to enable career success of persons with disabilities and disadvantage.

RCON 733 - Medical and Psychosocial Aspects of Disability (3 Credits)
Medical and psychosocial aspects of chronic illness and disability, including physical, psychological, social, and educational impacts of disability. Functional limitations and impact on employment, family/social life, and daily living. Approaches to treatment, prevention, and an overview of adaptive measures to enhance functioning and overall quality of life.

RCON 734 - Professional Issues in Clinical Rehabilitation Counseling (3 Credits)
Professional issues and functions within the clinical rehabilitation process. Includes a detailed exploration of the case management process, independent provider status, expert witness status, forensic rehabilitation, life care planning, and managed care systems. Addresses emerging professional issues.

RCON 880 - Counseling Practicum in Clinical Rehabilitation (3 Credits)
Supervised counseling experience in an approved institution or agency.
Prerequisites: Official application must be submitted no later than the semester preceding enrollment.
Corequisite: 150 hours of supervised counseling experience in an approved clinical setting.

RCON 883 - Internship in Clinical Rehabilitation Counseling (3,6 Credits)
Supervised counseling experience in a work setting suitable for a clinical rehabilitation counselor.
Prerequisites: RCON 880.

Reading (EDRD)

EDRD 500 - Content Area Literacy PK-12 (3 Credits)
A survey of research and practice which facilitates students’ literacy skills in the content areas. For K-12 content area teachers of art, dance, physical education, foreign language, music and theatre.

EDRD 511 - Teaching Reading to Adults I (3 Credits)
Diagnostic and prescriptive modes of teaching reading to adults, based on the physical, psychological, intellectual, and social characteristics of the adult learner.

EDRD 512 - Teaching Reading to Adults II (3 Credits)
Preparation of materials for teaching basic reading skills to adults and practicum experiences in teaching adults to read.
Prerequisites: EDCO 511 or EDRD 511.

EDRD 514 - Teaching of Reading in the Elementary School (3 Credits)
Study of the various phases of reading in their relation to a modern program of education and the place of reading in the curriculum. Emphasis on modern practices in the classroom teaching of reading.

EDRD 518 - Reading in the Secondary School (3 Credits)
The place of reading instruction in high schools, the programming of special services in reading instruction, methods of teaching basic and developmental reading skills, and case studies of programs. Demonstrations of tests and devices.

EDRD 600 - Foundations of Reading Instruction (3 Credits)
An overview of reading and its curriculum implications: grades K-12 and adults. Emphasis is placed on current trends and issues and related methodologies.

EDRD 650 - Teaching Reading Through A Literature Emphasis (3 Credits)
Integrating appropriate literature into traditional and alternative reading programs. Identifying appropriate literature for classroom use and recreational reading. Use of literature as a means of developing and reinforcing reading skills.

EDRD 651 - Introduction to Teaching Media Literacy (3 Credits)
A survey of analysis of electronic and non-print media themes and messages aimed at youth, with special emphasis on design and implementation of curricula for enhancing children's media literacy.

EDRD 690 - Independent Study (1-3 Credits)

EDRD 700 - Multimodal Multi-genre Writing (3 Credits)
An active and reflective experience of process writing within multiple genres and multimodal literacies with classroom applications.

EDRD 711 - Psychological Foundations of Reading (3 Credits)
Designed to familiarize students with research findings and theories in psychology as they relate specifically to the process of learning to read. Topics will range from perception, learning theory, and personality theory to the implications of cultural differences and language factors as they affect both the child’s learning to read and the teacher’s effective facilitation of this learning.
Prerequisites: EDRD 514, EDRD 716, EDRD 717.

EDRD 714 - Critical Foundations of Literacy (3 Credits)
An overview of major theoretical, conceptual, and historical foundations in literacy and their curricular implications. Emphasis is placed on actively analyzing current trends and related methodologies.

EDRD 715 - Instructional Strategies for Reading (3 Credits)
Demonstration and critical evaluation of teaching strategies and materials in reading.

EDRD 716 - Foundations of Reading Assessment (3 Credits)
Seminar and supervised one-on-one field experience focusing on assessing and meeting the needs of individual children as readers with emphasis on at-risk children.
EDRD 718 - Seminar in Classroom Reading Assessment (3 Credits)
Seminar and supervised field experience focusing on assessing and meeting the needs of small groups of children as readers.
Prerequisites: EDRD 600, EDRD 715, and EDRD 716.

EDRD 719 - Developing and Guiding the Reading Program (3 Credits)
Design, management, and evaluation of reading programs at the classroom, school, or district levels.
Prerequisites: EDRD 600 and EDRD 715.

EDRD 720 - Capstone Seminar in Language and Literacy (3 Credits)
Synthesis, critique, and evaluation of current research and educational practice in language and literacy.
Prerequisites: EDRD 600, EDRD 715, EDRD 716, EDRD 718, and EDRD 719.

EDRD 730 - Teaching Reading and Writing in the Content Areas (3 Credits)
A survey of the strategies and materials which facilitate students' reading and writing skill in the content areas. For P-12 reading education and content area teachers.

EDRD 731 - Assessment and the Foundations of Reading/Writing (3 Credits)
Overview of assessment theory and practice; the reading/writing processes and the curricular implications across content areas.

EDRD 732 - Teaching Reading and Writing in the Content Areas (3 Credits)
Survey of the strategies and materials which facilitate students' reading and writing skill in the content areas.

EDRD 750 - Literacy Curriculum Development (3 Credits)
Classroom, school, and district literacy curriculum will be explored through multicultural and global literature.

EDRD 760 - Literacy Research and Inquiry (3 Credits)
An overview of inquiry-based teaching and learning within literacy instruction. Affiliated field experience will occur with a focus on assessing and meeting the needs of small groups of students.

EDRD 776 - Coaching within Classrooms: Improving Teaching and Literacy Instruction (3 Credits)
Coaching principles and strategies related to improvements and innovations in classrooms and in literacy instruction. Emphasizes working with teachers in classrooms to bring about educational reform and improvements in teaching and literacy instruction.

EDRD 783 - Literacy Leadership and Supervision (3 Credits)
Developing as a literacy leader within school and district contexts through: engagement in effective collaboration; design, management, and evaluation of professional learning; design, management, and evaluation of family and community outreach.

EDRD 794 - Linguistics for Classroom Teachers PreK-12 (3 Credits)
An introduction to the concepts of linguistics specifically for preK-12 educators. Topics include syntax, morphology, semantics, pragmatics, and first and second language acquisition theories.

EDRD 795 - ESOL Principles and Strategies for PreK-12 Classrooms (3 Credits)
A survey course focused on English for Speakers of Other Languages (ESOL), including a focus on different theoretical principles and approaches within various learning context as they concern preK-12 learners.

EDRD 796 - Teaching Reading and Writing to ESOL Learners: Theory and Practice (3 Credits)
This course surveys research on the mental processes and linguistic contexts involved in reading and writing in a second language. Pedagogical implications for elementary, secondary, and postsecondary learners are discussed.
Cross-listed course: LING 796

EDRD 797 - Assessment for English Language Learners (3 Credits)
Seminar and supervised one-on-one field experience focusing on accessing and meeting the needs of English learners including approaches to classroom-based assessments in ESL, bilingual education, and preschool-grade 12 classrooms.

EDRD 798 - Curriculum Design and Materials Development for English Language Learners (3 Credits)
This course will engage students in the examination and creation of research and theory that support curriculum design and materials development for the ESOL classroom.

EDRD 800 - Literacy Education P-12 (3 Credits)
Impact of theories of teaching, learning, and texts on literacy instruction; social, historical, political, and cultural influences on literacy.

EDRD 801 - Critical Perspective on English/Language Arts (3 Credits)
Issues of literacy from a variety of critical stances such as democratic values, gender roles, and multiculturalism.

EDRD 802 - Internship in the Supervision of Reading (3 Credits)
Internship in diagnosis and instruction of disabled, corrective, and developing readers to include supervision of graduate students enrolled in practica in reading, parent training, and program administration. Limited to advanced graduate students. May be repeated one additional time in a different supervisory setting for a maximum of six hours.

EDRD 803 - Pedagogical Applications of Reader Response Theory (3 Credits)
Research and theory, emphasizing the role of the reader's response in the reading process.

EDRD 805 - Teaching and Administering the College Reading Program (3 Credits)
Emphasis on the acquiring of background and skills necessary for instruction in and administration of college-level reading programs located in post-high school institutions (technical schools, two-year colleges, four-year colleges, and universities).
Prerequisites: EDRD 514, EDRD 518.

EDRD 806 - Practicum in Teaching and Administering the College Reading Program (3 Credits)
Refining of counseling, evaluation, research, instructional, and administrative skills needed by college reading personnel. Practical application of the background and skills taught in EDRD 805.
Prerequisites: EDRD 514, EDRD 805.

EDRD 811 - Cultural Perspective on Psychological and Social Foundations of Literacy Learning (3 Credits)
Perspectives from psychology and sociocultural theory as they relate to literacy learning and research in literacy learning.

EDRD 815 - Critique of Qualitative Research in Language and Literacy Education (3 Credits)
A review and critique of qualitative perspectives on language and literacy research.
EDRD 824 - Seminar in Language and Literacy Education (3 Credits)
Intensive study of a designated topic influencing theory and/or practice in language and literacy education.
Prerequisites: Admission to a doctoral program in education or related field.

EDRD 840 - Semiotics, Reading, Literacy and Learning (3 Credits)
Peircean semiotics and the implications of such for language and literacy education.

EDRD 844 - Advanced Study of Language Acquisitions (3 Credits)
Theoretical frameworks and the relationship between current and classic studies in language acquisition.
Prerequisites: EDEC 744.

EDRD 845 - Advanced Study of Emergent Literacy (3 Credits)
Conceptual frameworks, findings, and connections among current and classic studies in emergent literacy; implications for further research.
Prerequisites: EDRD 844.

EDRD 848 - Feminist Investigation in Literacy Education (3 Credits)
Current theories of gender identity in relationship to literacy education.

EDRD 850 - Internship in Language and Literacy Education (3-6 Credits)
Placement in an agency or higher education setting to gain supervised experience in literacy program planning and/or research. May be repeated once for a total of 6 hours.
Prerequisites: 6 hours of required language and literacy courses in the language and literacy PhD program.

EDRD 890 - Independent Study (3 Credits)

Religious Studies (RELG)

RELG 514 - The Quest of the Historical Jesus (3 Credits)
Examination of studies on the historical Jesus from 1778 to the present. Attention given to the relationship between "the Jesus of history" and "the Christ of faith".

RELG 551 - Tradition and Transformations in Islamic Cultures (3 Credits)
Islam as a dynamic cultural tradition: emphasis on the tension between Islamization and the larger Islamic tradition.
Cross-listed course: ANTH 515
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

RELG 552 - Buddhist Studies Seminar (3 Credits)
The examination of a theme or problem central to the study of Buddhism in a seminar emphasizing intensive reading and creative discussion. Course may be repeated since topics change.

RELG 700 - Problems in the Comparative Study of Religion (3 Credits)
Introduction to formative thinkers in the discipline of religious studies, with attention to the methodological problems of comparison.

RELG 701 - Foundational Readings (3 Credits)
Foundational texts appropriate to the student's area of specialization and required for advanced course work and thesis preparation.

RELG 710 - The Christology of the New Testament (3 Credits)
Examination of the four major New Testament titles: Son of Man, Christ, Lord, and Son of God. Attention also given to some lesser-known titles and to Christology in context.

RELG 724 - Religion and Politics (3 Credits)
Religion as a factor in the comparative politics and international relations of states and societies.
Cross-listed course: POLI 724

RELG 740 - Israelite Religion (3 Credits)
Beliefs and practices in ancient Israelite religion, with particular attention to the emergence of monotheism. Comparison with other ancient Near Eastern religions.

RELG 760 - Religion and Literature (3 Credits)
Introduction to historical and contemporary approaches to the cross-disciplinary study of the inter-relations of the religious and the literary imaginations.

RELG 770 - Black Christianity in America (3 Credits)
Elements in the religion of the black slave in early America, the development of black churches and theological movements.

RELG 771 - Black and Liberation Theology (3 Credits)
Tenets, themes, and representative figures in black liberation theology in the United States and in Central and South America.

RELG 772 - Nineteenth-Century American Evangelical Thought (3 Credits)
The diverse heritage of American evangelism, with special emphasis on its socio-political and theological origins in the late 18th and 19th centuries.

RELG 773 - Twentieth-Century Christology (3 Credits)
Various 20th-century christological perspectives, with special emphasis on the person and work of Jesus as bases for addressing life/death and hope/despair issues.

RELG 780 - World Spirituality (3 Credits)
An examination of the perennialist approach to the mystical and contemplative teachings of the major religious traditions.

RELG 789 - Seminar in Philosophical Theology (3 Credits)
Examination of contemporary problems in the philosophical foundations of religion.

RELG 792 - Special Topics in Texts and Traditions (3 Credits)
Topics related to the study of texts in the life of specific religious communities. Course content varies; individual topics will be announced.

RELG 793 - Special Topics in Theology and Religious Thought (3 Credits)
Topics related to the study of religious doctrines, cosmologies, spiritual practices, and ethics. Course content varies; individual topics will be announced.

RELG 794 - Special Topics in Religion and Society (3 Credits)
Topics examining religious institutions, practices, and experiences in relation to other cultural forms. Course content varies; individual topics will be announced.

RELG 797 - Independent Study (3 Credits)

RELG 799 - Thesis Preparation (1-9 Credits)

Research & Measurement (EDRM)

EDRM 520 - Introduction to Testing and Evaluation (3 Credits)
The construction and use of teacher-made tests; descriptive statistics, measurement error, norms, and interpretation of scores; types of standardized instruments for use in elementary and secondary schools.
EDRM 690 - Independent Study (1-3 Credits)

EDRM 700 - Introduction to Research in Education (3 Credits)
Concepts and methods of conducting research in education. Admission to graduate standing.

EDRM 710 - Educational Statistics I (3 Credits)
Introductory course in statistics for graduate students in education and the other social sciences. Central tendency and variability; normal distribution, simple correlation and regression, z and t tests for one and two samples, and the chi-square test. Use of statistical software.

EDRM 711 - Educational Statistics II (3 Credits)
Continuation of Educational Statistics I. Inference for one and two samples, factorial designs, repeated measures designs, and multiple regression. Use of statistical software.
Prerequisites: EDRM 710.

EDRM 712 - Nonparametric Statistics (3 Credits)
Applied nonparametric statistics in education and the social sciences. Distribution-free inference for repeated measures and factorial designs; logistic regression and log-linear analysis. Use of statistical software.
Prerequisites: EDRM 711.

EDRM 715 - Mixed Methods Research (3 Credits)
The study and practice of mixed methods research. The integration of qualitative and quantitative approaches and methods in research practices. Emphasis on educational research and settings with consideration of other social science fields as needed.
Prerequisites: An initial course in or experience with quantitative research (example - EDRM 705 or EDRM 710) and qualitative research (example - EDFI 731).

EDRM 718 - Research and the Statistical Packages (1-3 Credits)
Advanced use of available statistical packages in educational research. Content varies; topics and credit announced in advance. May be repeated for up to six hours of credit. May be repeated for up to 6 hours of credit.
Prerequisites: EDRM 710 and EDRM 711.

EDRM 720 - Educational Measurement (3 Credits)
The history of educational and psychological measurement. Consideration of concepts such as validity and reliability of educational and psychological measures and the rationale of the development and use of instruments for educational purposes.

EDRM 721 - Constructing Cognitive Instruments (3 Credits)
The rationale, construction, use, and appraisal of achievement tests as tools of educational evaluation and research.
Prerequisites: EDRM 710 and EDRM 720 or equivalent.

EDRM 722 - Constructing Non-Cognitive Instruments (3 Credits)
Consideration and the construction of educational and psychological tests and measurement instruments.
Prerequisites: EDRM 721.

EDRM 723 - Classroom Assessment Methods (3 Credits)
Emphasis in the linkages between curriculum, instruction, and assessment, and the development of assessments for learning outcomes. Methods include observations, interviewing, performance assessments, portfolios, and classroom tests.

EDRM 724 - Design and Analysis of Educational Surveys (3 Credits)
Topics in educational surveys: design of questionnaires, sampling, data collection, treatment of non-responses, survey interviewing, randomized response techniques, data tabulation, and graphical presentation. Use of statistical software.

EDRM 728 - Technical Aspects of Tests and Measurements (3 Credits)
Statistical techniques and theoretical concepts involved in educational and psychological measurement. Analysis and interpretation of test data, equating of equivalent forms, latent trait theories and models, multiple matrix sampling, and issues related to criterion-referenced testing.
Prerequisites: EDRM 710 and EDRM 720 or equivalent.

EDRM 736 - Program Evaluation (3 Credits)
Methods of designing and implementing evaluations of social and educational programs.
Prerequisites: EDRM 700 and EDRM 710.

EDRM 737 - Internship in Research (3 Credits)
Supervised research experience in a school, state agency, department or bureau of the University, or cooperating institution.

EDRM 789 - Principles and Applications of Structural Equation Modeling (3 Credits)
Theories and applications of covariance structure modeling, including reliability analysis, confirmatory factor analysis, and path analysis with observed and latent variables.
Prerequisites: EDRM 711 or equivalent and EDRM 721 or equivalent.

EDRM 799 - Thesis Preparation (1-9 Credits)

EDRM 800 - Grants Administration (3 Credits)
Analysis of grant and contract functions in government agencies; proposal writing; legal and fiscal requirements of grants administration.
Cross-listed course: POLI 755

EDRM 801 - Principles and Applications of Educational Research (3 Credits)
Concepts and application of designing research in education.
Prerequisites: EDRM 700 or equivalent.

EDRM 810 - Design and Analysis of Experiments (3 Credits)
Emphasis on the development of an understanding of the role of inferential statistics in educational experimentation, a working knowledge of the common tests in statistical analysis, and the student's ability to design and execute experiments involving application of the statistical tests.
Prerequisites: EDRM 711 or the equivalent.

EDRM 812 - Hierarchical Linear Modeling (3 Credits)
Advanced quantitative methods course in multilevel data analysis. Covers theoretical grounding, applications in the social sciences, and model building.
Prerequisites: EDRM 711.

EDRM 816 - Correlational and Multivariate Methods (3 Credits)
Advanced statistical applications including partial and multiple correlational methods, multiple regression, multivariate analysis of variance, discriminant analysis, and canonical correlation. Use of statistical software.
Prerequisites: EDRM 711.

EDRM 828 - Item Response Theory (3 Credits)
Statistical models for item response theory, Rasch and other models for binary and polytomous data, and applications. Use of statistical software.
Prerequisites: EDRM 711 or PSYC 710 or STAT 701 or STAT 704.
Cross-listed course: STAT 778
EDRM 840 - Advanced Qualitative Inquiry in Education (3 Credits)
Theory, methodology and practice of qualitative research in educational settings. Students will conduct research in applied settings using qualitative data collection methods including observation, interviews, focus groups, and document analysis.
Prerequisites: EDFI 731.

EDRM 842 - Educational Biography (3 Credits)
Examination of biography as a form of educational research and scholarship.

EDRM 878 - Seminar in Research Techniques (1-3 Credits)
Theoretical and empirical issues in qualitative and/or quantitative methods in educational research. Content varies; topics and credit announced in advance. May be repeated for up to 12 hours of credit.

EDRM 889 - Advanced Principles and Application of Latent Variable Modeling (3 Credits)
Study of advanced concepts, principles, techniques, and issues in structural equation modeling (SEM) and the latent variable framework.
Prerequisites: EDRM 789 or similar course.

EDRM 890 - Independent Study (3 Credits)

EDRM 897 - Dissertation Seminar in Education (3 Credits)
Topics involved with major issues in the planning and conducting of significant research in education. Several faculty members participate; a forum is provided in which candidates may present for analysis original research designs primarily related to their dissertations.

EDRM 899 - Dissertation Preparation (1-12 Credits)

Retailing (RETL)

RETL 525 - Legal Aspects of Entrepreneurship and E-Commerce (3 Credits)
Examination of domestic and international laws affecting retail entrepreneurship and online commerce, such as data privacy and breach response, intellectual property protection, sales tax, advertising and unfair trade practices, consumer protection laws, employment laws, and legal obligations involving physical locations.
Prerequisites: SPTE 240 or equivalent.

RETL 530 - Fashion and the Law (3 Credits)
Examination of domestic and international laws which affect the fashion industry, such as intellectual property protection, licensing agreements, operational and marketing issues, and international trade.
Prerequisites: SPTE 240 or equivalent.

RETL 535 - Retail Logistics (3 Credits)
Examination of the flow of retail inventory from initial production to final purchase. Meets the needs of individuals in retail organizations from entry-level sales floor personnel to buyers. Students must be qualified to enroll in a 500 level course at The University of South Carolina.

RETL 551 - Retail and Fashion Business Planning (3 Credits)
Essential skills for building a new or expanding an existing retail or fashion business in both brick-and-mortar and online venues by developing a marketing plan and corresponding e-Commerce website for a business or fashion organization.
Prerequisites: RETL 351.

RETL 562 - Advanced Merchandising Management Strategies (3 Credits)
The analysis of assortment planning and inventory management of apparel products utilizing merchandising principles and industry software.

RETL 569 - Advanced Retail Promotion and Social Media Analytics (3 Credits)
Essential principles and analytical tools used in retail promotion; appraisal of methods and outcomes via field experiences, visuals, and simulations.

RETL 590 - Special Topics in Retail Management (3 Credits)
Course content varies. May be repeated once under a different title.

RETL 592 - Retailing/Fashion Merchandising Field Study (3 Credits)
Study of international/domestic fashion manufacturers, retailers, ancillary businesses, and selected resident buying offices. May be repeated once for credit. Must be in good standing with a 2.0 GPA or better; No pending or past judicial council infractions.

RETL 600 - Fundamentals of Omni-Channel Retailing (3 Credits)
Exploration of the fundamentals of Omni-Channel Retailing.

RETL 640 - Personnel Development & Relations Management (3 Credits)
Advanced examination of human resource management within retail organizations.

RETL 662 - Customer Relationship Management for the Retail Industry (3 Credits)
The analysis of customer relationship management for retailers utilizing merchandising principles and industry software.

RETL 700 - Advanced Omni-Channel Retailing (3 Credits)
Advanced examination of Omni-channel retailing.

RETL 710 - Retailing E-Commerce (3 Credits)
Examination of e-commerce elements and retailer implications.

RETL 725 - Customer Experience Optimization in the Retail Environment (3 Credits)
Study of customers' needs, activities, and trends to aid retail strategy formulation for enhancing customer experiences in retail environments.

RETL 730 - Retail Loss Prevention (3 Credits)
The analysis of current retail loss prevention issues from the perspective of the business and customer. Meets the needs of individuals in retail organizations from entry level sales floor personnel to senior management.

RETL 740 - Omni-Channel Workforce Management (3 Credits)
Advanced examination of workforce management for Omni-channel retailers.

RETL 745 - International Retailing (3 Credits)
Broad overview of retail marketing theories, principles, and methods for international operations focusing on the cultural, economic, and regulatory environments.

RETL 747 - Competitive Strategies in Retailing (3 Credits)
Fundamentals of strategic decision-making and performance measurement within the retail organization.

RETL 748 - Advanced Retail Space Management (3 Credits)
Advanced examination of retail space allocation and management of merchandise via retail analytics and JDA software.

RETL 749 - Advanced Category Management (3 Credits)
Advanced examination of category management strategies.
RET 750 - Advanced Sales Strategies for Retail (3 Credits)
Advanced strategic decision-making theories, principles, and techniques used in different buyer-seller situations by a retail organization.

RET 790 - Special Topics in Marketing Education (3 Credits)
Contemporary topics, trends, and issues in marketing education. Individual topics may be announced by titles.

RET 798 - Directed Study in Retailing (3 Credits)
Independent study for advanced students under faculty supervision.

RET 799 - Thesis Preparation (1-6 Credits)

RHAB - Rehab Counseling (RHAB)

RHAB 540 - Assistive and Adaptive Technology (3 Credits)
The use of Assistive Technology as it relates to employment, education, communication, recreation, and mobility for individuals with disabilities. Explores types of assistive technologies, functional assessments, and resources through hands-on application, lectures, and discussions.

RHAB 702 - Introduction to Rehabilitation Research and Assessment (3 Credits)
Foundations underlying research and assessment methodologies and their application to counseling. Research design, program evaluation, ethical principles in research, the scholarly research process, and statistical software packages.

RHAB 703 - Psychosocial Aspects of Disability (3 Credits)
Theory, research, and practice which contribute to an understanding of disability; attitudes, psychological, and social factors.

RHAB 704 - Ethics in Rehabilitation Counseling (3 Credits)
Examines contemporary ethical concerns and issues in rehabilitation counseling profession. The focus will be on attaining a level of applied ethical knowledge and awareness for master's-level professionals.

RHAB 705 - Culture and Disability (3 Credits)
Concepts and procedures relating to disability and culture, covering relevant issues affecting racially and culturally diverse individuals with disabilities, as well as promoting sensitivity and competence.

RHAB 710 - Medical Aspects of Rehabilitation (3 Credits)
This course is concerned with imparting medical terminology, the muscular, skeletal, and neurological systems, and common diagnostic categories encountered in rehabilitation counseling. Understanding and utilization of symptomology, treatment, and other management aspects of physical medicine are emphasized. The major outcome is directed toward developing the counselor's ability to interpret medical information meaningfully to a plan of action for the client's rehabilitation.

Prerequisites: RHAB 570.

RHAB 711 - Rehabilitation Counseling Practice II (3 Credits)
Individual counseling theory and technique applied to persons with a disability (emotional, psychosocial, mental, and physical) and disadvantaged persons.

Prerequisites: RCON 601.

RHAB 712 - Occupational Analysis and Placement in Rehabilitation (3 Credits)
Sequential set of opportunities to acquire and apply knowledge, skills, and insights pertaining to the employment of persons with disabilities.

Prerequisites: RCON 700, RCON 702.

RHAB 713 - Career Development and Counseling in Rehabilitation (3 Credits)
Career development theories and their relevance to persons with disabilities. Identification of values, interests, abilities, and methods for obtaining, organizing, and utilizing career information to enable career success.

RHAB 714 - Rehabilitation Assessment (3 Credits)
Vocational assessment instruments, methods, materials, and interpretation are applied to a variety of rehabilitation clients. Concepts, skill development, and application of vocational assessment.

Prerequisites: RHAB 702

RHAB 720 - Group Counseling in Rehabilitation Settings (3 Credits)
Principles and practice of group counseling applied to persons with a disability, or disadvantaged persons.

Prerequisites: RCON 601.

RHAB 730 - Case Management and Community Resources in Rehabilitation (3 Credits)
Focuses on factors which facilitate or deter rehabilitation caseload movement. A detailed task analysis of case intake, case study, individualized written rehabilitation program planning, case services, and case closure within agency procedural regulations are emphasized.

RHAB 750 - Technology and Exceptional Populations (3 Credits)
The application of microcomputers and other technology in services for special populations. Case management, assessment, and instructional uses of technology are included.

Cross-listed course: EDEX 750

RHAB 752 - Disability and Sexuality (3 Credits)
Impact of major disabling conditions on sexual functioning; sex education and counseling of disabled persons.

RHAB 753 - Rehabilitation and Severe Disability (3 Credits)
Course examines the specialized knowledge and techniques required to rehabilitate persons with severe physical, mental-emotional, and social disabilities.

Prerequisites: RCON 700.

RHAB 754 - Counseling and Death Education (3 Credits)
Counseling approaches with the terminally ill and surviving family members.

RHAB 880 - Counseling Practicum I (3 Credits)
Supervised counseling experience in an approved institution or agency. Official application must be submitted at least one month before the end of the semester preceding enrollment. Supervised counseling experience in an approved institution or agency. Required 150 hours.

Prerequisites: RHAB 880

RHAB 890 - Independent Study (1-3 Credits)

Russian (RUSS)

RUSS 518 - Medieval Russian Culture (3 Credits)
An introduction to the culture of medieval Russia through its written records, folklore, icons, and ancient religious chant.
RUSS 520 - Russian Modernism: Love, Sex and Politics in Revolutionary Russia (3 Credits)
An exploration of Russian modernist culture, with particular attention to the themes of social and political change. Authors under discussion include Kuzmin, Bely, and Zamyatin.

RUSS 530 - Homer in Russia (3 Credits)
An examination of the influence of Homer's epic poems The Iliad and The Odyssey on Russian culture, as seen in works by Russian writers including Tolstoy, Pasternak, and Brodsky.

RUSS 540 - Writing Russian National Identity (3 Credits)
An examination of Russian writers reflecting on Russian national identity, including Solzhenitsyn, Dostoevsky, and Grossman.

RUSS 598 - Selected Topics in Russian (3 Credits)
Reading and research on selected topics in Russian. Course content varies and will be announced in the schedule of courses by title.

RUSS 615 - Intensive Readings in Russian (3 Credits)
Intensive reading course for non-majors. Primarily for graduate students to fulfill the foreign-language reading requirement. It will not be applied toward the degree language requirements nor will it be accepted as a substitute in the course sequence leading to the various degree requirements.

RUSS 616 - Intensive Readings in Russian (3 Credits)
Intensive reading course for non-majors. Primarily for graduate students to fulfill the foreign-language reading requirement. It will not be applied toward the degree language requirements nor will it be accepted as a substitute in the course sequence leading to the various degree requirements.

Prerequisites: RUSS 615.

RUSS 777 - Supervised Instruction in Teaching Foreign Languages in College (0 Credits)
Supervised direction of foreign language teaching in college. Required of all graduate assistants who are teaching. This course will not count toward the MA or PhD degree.

RUSS 790 - Directed Reading and Research (1-3 Credits)

School Leadership (EDLP)

EDLP 517 - Law and Policy Studies in Education (3 Credits)
Policy issues affecting public and private educational institutions across the PK-20 continuum (pre-school through higher education).

EDLP 520 - The Teacher as Manager (3 Credits)
To help teachers, principals, and other personnel solve school problems by identifying and applying selected management techniques.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
Experiential Learning: Experiential Learning Opportunity

EDLP 525 - Resources for Teaching and Learning (3 Credits)
An introduction to educational technology, its increasing importance in the total school program, and its relationship to learning theories and communication.

EDLP 601 - The Effective Teacher (3 Credits)
Use of theory and research to understand and improve classroom teaching. Emphasis on teacher reflection and decision-making. The administrative role in enhancing effectiveness is highlighted.

EDLP 690 - Independent Study (1-3 Credits)

EDLP 700 - Introduction to Educational Administration (3 Credits)
A survey of basic principles of school administration, the conceptual and structural organization of public education, and the educational governance at the federal, state, and local levels.

EDLP 701 - School Leadership (3 Credits)
A study of interpersonal relations and communication within an educational organization and between the school and the community.

EDLP 702 - School Personnel Administration (3 Credits)
Personnel management in the public schools with attention to such issues as teacher supply, recruitment, selection, staff development, supervision, teacher welfare, legal rights/liabilities of school personnel.

EDLP 703 - Supervision of Instruction (3 Credits)
An introduction to the functioning of an educational supervisor. Emphasis on the improvement of instruction and instructional programs.

EDLP 704 - School Finance and Business Management (3 Credits)
Financial and business management functions of school administration. Local/state/national funding issues, economics and politics of school finance, budget preparation, accounting/auditing/plant operation/maintenance from school level.

Prerequisites: At least two of the following EDLP 700, EDLP 701, EDLP 702, EDLP 703.

EDLP 705 - Legal Basis of Educational Organization and Administration (3 Credits)
Emphasis on techniques of legal research, the legal relationships between the federal and state government as they relate to school district organization and administration, as well as legal case studies in all major areas of administrative concern.

Prerequisites: At least two of the following EDLP 700, EDLP 701, EDLP 702, EDLP 703.

EDLP 706 - The Principalship (3 Credits)
Principles, problems, competencies, and practices involved in the administration of schools.

Prerequisites: Completion 15 hours of EDLP courses prior to enrolling.

Corequisite: one of EDLP 707A, EDLP 707B, EDLP 708A, EDLP 708B, EDLP 709A or EDLP 709B.

EDLP 707A - The Elementary School Principal in Practice I (3 Credits)
One of two courses in a required two-semester internship in the elementary schools.

Corequisite: EDLP 706.

EDLP 707B - The Elementary School Principal in Practice II (3 Credits)
One of two courses in a required two-semester internship in the elementary schools.

Corequisite: EDLP 706.

EDLP 708A - The Middle School Principal in Practice I (3 Credits)
One of two courses in a required two-semester internship in the middle schools.

Corequisite: EDLP 706.

EDLP 708B - The Middle School Principal in Practice II (3 Credits)
One of two courses in a required two-semester internship in the middle schools.

Corequisite: EDLP 706.
EDLP 709A - The High School Principal in Practice I (3 Credits)
One of two courses in a required two-semester internship in the high schools.
Corequisite: EDLP 706.

EDLP 709B - The High School Principal in Practice II (3 Credits)
One of two courses in a required two-semester internship in the high schools.
Corequisite: EDLP 706.

EDLP 734 - Improvement Science and Action Research (3 Credits)
Using action research strategies and an improving science framework for continuous improvement.

EDLP 737 - Anti-racist Leadership (3 Credits)
An introduction to ideas supporting anti-racist educational leadership across the P-20 educational pipeline. Specific topics include contested definitions of racism, policy, praxis, and anti-racist research, scholarship and leadership.

EDLP 751 - Advanced School Law (3 Credits)
A seminar designed to give teachers and school administrators an opportunity to explore key legal issues.
Prerequisites: EDLP 705.

EDLP 752 - Computer Management in Educational Institutions (3 Credits)
Open to advanced graduate students of education. History of the management, movement, and application of techniques and processes for managing the modern educational institution, emphasizing computer technology.

EDLP 753 - Advanced Methods of Instructional Supervision (3 Credits)
An analysis of leadership techniques necessary to produce instructional improvement in educational organizations and of the technical methodology that distinguishes instructional supervision from other positions of school leadership.
Prerequisites: EDLP 703 or equivalent and employment in a position requiring supervisory responsibilities.

EDLP 754 - Educational Finance (3 Credits)
A study of principles of financing public education, analyses of revenue sources from all levels of government, existing plan of financing and possible alternatives for financing schools from district level.
Prerequisites: EDLP 704.

EDLP 755 - Educational Policy Analysis (3 Credits)
An introduction to policy making in education with emphasis on the local and state levels of policy formation.
Prerequisites: EDLP 705.

EDLP 756 - The Superintendency (3 Credits)
A two-semester course on the district superintendency.
Prerequisites: EDLP 706 and admission to EdS or PhD program.
Corequisite: EDLP 757A.

EDLP 757A - The Superintendent in Practice I (3 Credits)
The first of two courses in a required two-semester internship in the district superintendency.
Prerequisite or Corequisite: EDLP 706, EDLP 756, and admission to EdS or PhD program.

EDLP 757B - The Superintendent in Practice II (3 Credits)
The second of two courses in a required two-semester internship in the district superintendency.
Prerequisite or Corequisite: EDLP 757A and admission to the EdS or PhD program.

EDLP 758 - School Building Planning (3 Credits)
Study of the problems involved and the procedures utilized in a comprehensive approach to planning and constructing school plants, the personnel involved and the roles they play, and the problems related to the long-term financing of such facilities.
Prerequisites: Admission to EdS or PhD program.

EDLP 799 - Thesis Preparation (1-9 Credits)

EDLP 803 - Administrative Evaluation and Decision-Making (3 Credits)
A study of the requirements, practices, problems, and opportunities of administrative evaluation of programs and personnel as required by state and federal educational legislation.
Prerequisites: Admission to EdS or PhD program.

EDLP 804 - Advanced Educational Finance (3 Credits)
A study of funding schemes, the economics of financing, and construction and defense of a school district budget. Microcomputers are utilized.
Prerequisites: EDLP 704 and EDLP 754 and PhD candidate.

EDLP 805 - Advanced Educational Policy Analysis (3 Credits)
Advanced study of policy making at the federal level. The class will include a mandatory week-long stay in Washington, D.C.
Prerequisites: EDLP 705 and EDLP 755 and PhD candidate.

EDLP 806 - Theories of Educational Leadership (3 Credits)
Organization, leadership, motivation, and change theories as they apply to educational agencies and institutions.

EDLP 807 - Seminar in Selected Topics in Educational Administration (3 Credits)
Selected topics in educational administration in either finance, administration, supervision, evaluation, policy, and financial planning/management.
Prerequisites: Admission to doctoral program.

EDLP 808 - Field Problems in Educational Administration: The Literature (1-3 Credits)
This course is designed to help students identify a research literature that provides the context for their own dissertation research. Students will conduct a systematic review of this literature in order to refine their questions and methods for their dissertation research, and to build towards their own dissertation proposal and literature review chapter.

EDLP 809 - Field Problems in Educational Administration (1-3 Credits)
Opportunity for in-depth study of selected field problems in educational administration, utilizing research and other techniques.

EDLP 890 - Independent Study (3 Credits)
Independent study form required for authorization.

EDLP 899 - Dissertation Preparation (1-12 Credits)
Science and Math Educ (SMED)

SMED 510 - Life Science for Teachers I (3 Credits)
Topics appropriate for elementary and middle-school curricula; phylogenetic organization of major kingdoms, characteristics of plants and animals, including humans; ecological principles; communities; energy needs, resources, flow and balance; heredity and adaptation.

SMED 586 - Energy, Motion, and Matter (3 Credits)
Integrated study of the earth's atmosphere for pre-service and in-service middle school teachers combining concepts from earth, life, and physical science leading to an understanding of the interaction of all systems.
Prerequisites: introductory-level courses in life, earth, and physical sciences.

SMED 587 - Interdependence of Living Systems (3 Credits)
Integrated study of the biotic and abiotic environments combining life, earth, and physical science concepts to understand relationships in living systems. For pre-service and in-service middle school teachers.
Prerequisites: introductory-level courses in life, earth, and physical sciences.

SMED 588 - Origin and Evolution of Living and Non-Living Systems (3 Credits)
Study of the earth system for pre-service and in-service middle school teachers, with emphasis on the origin, evolution, and interactions of the subsystems of the earth system.
Prerequisites: introductory-level courses in life, earth, and physical sciences.

SMED 591 - Data Analysis for Teachers (3 Credits)
Introduction to statistics for elementary, middle, and high school teachers. The fundamentals of data collection, descriptive statistics, probability, and inference with special focus on methods of teaching statistical reasoning. For M.A.T. (excluding mathematics) / M.Ed. / M.T. and nondegree credit only. For M.A.T. (excluding mathematics) / M.Ed. / M.T. and nondegree credit only.
Cross-listed course: STAT 591

SMED 729 - Special Topics in Science for Teachers (1-3 Credits)
Topics not likely to be incorporated into regular offerings, offered as seminars, workshops, and formal courses. Variable credit, depending on contact hours. May be taken more than once.

SMED 769 - PD: Math for Teachers (1-3 Credits)

Secondary Education (EDSE)

EDSE 500 - Equity and Community Engagement (3 Credits)
Field-based inquiry into theories of critical multicultural education, culturally relevant and equity pedagogies with an emphasis on middle/high school students and engaging parents and the larger school community.

EDSE 502 - Teachers and Teaching (3 Credits)
Teaching as reflective and ethical practice. Professional standards, teacher leadership and school change, and various roles of professional educators.

EDSE 505 - Source Materials for Geographic Instruction (3 Credits)
Introduction to selected materials available for all levels of instruction in geography. Emphasis on the substantive nature of the materials.
Cross-listed course: GEOG 560

EDSE 508 - Teaching Middle and High School (Business Education) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school business education. 03: 07/05/2019.

EDSE 528 - Study of the Teaching of Business Education in the Secondary School (3 Credits)
Teaching techniques and methodology related to the business education curriculum, emerging technology and software. 03: 07/05/2019.

EDSE 547 - Teaching Middle and High School (English) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school English.
Prerequisites: Admission to MAT program for graduate students; EDSE 402 for undergraduate students.

EDSE 548 - Earth Science for Teachers I (3 Credits)
Origin, internal structure and internal processes of the earth, including plate tectonics, earthquakes, volcanoes, and mountain building. Required field trips, two lectures, and three lab hours per week. Cannot be used in MS or PhD programs in geology.
Cross-listed course: GEOL 540

EDSE 549 - Earth Science for Teachers II (3 Credits)
Surface processes acting on the earth; introduction to weather and climate, weathering, erosion, and sedimentary processes; landform evolution; ocean currents and tides, near-shore geologic processes.
Required field trips, two lecture, and three lab hours per week. Cannot be used in MS or PhD programs in geology.
Prerequisites: EDSE 548/GEOL 540.

Cross-listed course: GEOL 541

EDSE 550 - Teaching Middle and High School (Mathematics) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school mathematics.

EDSE 551 - Teaching Middle and High School (Health) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school health.

EDSE 552 - Teaching Middle and High School (Marketing Education) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school marketing education.

EDSE 553 - Teaching Middle and High School (Science) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school science.

EDSE 554 - Teaching Middle and High School (Theatre and Speech) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school theatre and speech.

EDSE 558 - Teaching Middle and High School (History and Social Studies) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school history and social studies.

EDSE 575 - Teaching Foreign Languages in Secondary Schools (3 Credits)
Current methods, techniques, and materials of instruction appropriate for secondary schools.
Cross-listed course: FORL 511
EDSE 580 - Teaching Advanced Latin in Secondary School (3 Credits)
Methods and materials for teaching the Latin Advanced Placement courses in secondary school.
Corequisite: LATN 580.

EDSE 584 - Middle and High School Internship Seminar (3 Credits)
Classroom management, service learning, legal/professional responsibilities, multicultural perspectives and needs of exceptional children.
Corequisite: Internship II.

EDSE 585 - Secondary Internship Seminar I (1 Credit)
Integration of content, pedagogy, and disposition knowledge learned during coursework with Internship I field experiences.
Corequisite: Students must be enrolled in the Internship I field experiences.

EDSE 586 - Secondary Internship Seminar II (2 Credits)
Integration of content, pedagogy, and disposition knowledge learned during coursework with Internship II field experiences.
Corequisite: Students must be enrolled in the Internship II field experiences.

EDSE 660 - Teaching Mathematics with Manipulatives, Grades 7-12 (3 Credits)
Methods and materials for using manipulative devices to teach middle and high school level mathematics.

EDSE 670 - Graphics Calculators in High School Mathematics (3 Credits)
Methods and materials for using graphics calculators to teach algebra, elementary functions, and analytic geometry.

EDSE 690 - Independent Study (1-3 Credits)

EDSE 702 - Teaching Information Management Technology (3 Credits)
Development of curriculum and educational materials for middle and high school information technology courses; selection of equipment; techniques of teaching information management technology; practical experience with software and hardware.

EDSE 703 - Perspectives in Teaching Secretarial Skills (3 Credits)
Strengthening the technical competence of the business teacher. Philosophy and psychology of skill development in secretarial subjects. 03: 07/05/2019.

EDSE 704 - Perspectives in Teaching Bookkeeping/Accounting and Basic Business (3 Credits)
Strengthening the technical competence of business teachers in bookkeeping/accounting and basic business, and improving instruction in these areas. 03: 07/05/2019.

EDSE 727 - Advanced Principles and Practices of Teaching in High School (3 Credits)
Study of the problems involved in all teaching in the secondary school.

EDSE 728 - Advanced Study of the Teaching of English in Secondary Schools (3 Credits)
A study of historical developments and recent innovations in curricula, resources, and techniques in the field of teaching English in secondary schools. Students will be expected to investigate research as it relates to the improvement of instruction.

EDSE 729 - Advanced Study of the Teaching of History and Social Studies in Secondary Schools (3 Credits)
A study of historical developments and recent innovations in curricula, resources, and techniques in the field of teaching history and social studies in secondary schools. Students will be expected to investigate research as it relates to the improvement of instruction.

EDSE 732 - Advanced Study of the Teaching of Science in Secondary Schools (3 Credits)
A study of historical developments and recent innovations in curricula, resources, and techniques in the field of teaching science in secondary schools. Students will be expected to investigate research as it relates to the improvement of instruction.

EDSE 733 - Selected Topics in Social Studies Education (3 Credits)
Topics will be selected from various social studies education fields, including trends, methods, and materials of social studies education. May be repeated; credit up to six hours may be applied toward a degree.
Prerequisites: EDSE 729 or its equivalent.

EDSE 764 - Advanced Study of the Teaching of Mathematics in Secondary Schools (3 Credits)
A study of historical developments and recent innovations in curricula, resources, and techniques in the field of teaching mathematics in secondary schools. Students will be expected to investigate research as it relates to the improvement of instruction.

EDSE 766 - Historical Topics in the Teaching of Mathematics (3 Credits)
Use of the history of mathematics in middle and secondary school teaching.
Prerequisites: EDSE 764.

EDSE 770 - Technology in Mathematics Education (3 Credits)
Topics in the use of electronic technology in the teaching of mathematics at the middle and secondary school levels.

EDSE 773 - Advanced Study of the Teaching of Computer Studies (3 Credits)
Recommendations for materials, content, and methods for teaching computer-related subject matter at the middle and high school level. Experience in writing computer programs for educational purposes in the Logo, BASIC, and Paschal languages will be given.
Prerequisites: EDTE 731.

EDSE 775A - Teaching Internship in Middle or High School (History and Social Studies) (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students.
Prerequisites: acceptance to the Professional Program in Education.
Corequisite: EDSE 558.

EDSE 775B - Teaching Internship in High School History and Social Studies (9 Credits)
Application of effective teaching techniques and organization of instructional settings for high school students.
Prerequisites: EDSE 775A.
Corequisite: EDSE 584 or EDSE 784.
EDSE 776A - Teaching Internship in Middle or High School (English) (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students.
Prerequisites: acceptance to the Professional Program in Education.

EDSE 776B - Teaching Internship in High School English (9 Credits)
Application of effective teaching techniques and organization of instructional settings for high school students.
Prerequisites: EDSE 776A.
Corequisite: EDSE 584 or EDSE 784.

EDSE 777A - Teaching Internship in Middle or High School (Business Education) (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students. 03: 07/05/2019.
Prerequisites: acceptance to the Professional Program in Education.

EDSE 777B - Teaching Internship in Middle or High School (Business Education) (9 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students. 03: 07/05/2019.
Prerequisites: EDSE 777A.
Corequisite: EDSE 784.

EDSE 778A - Teaching Internship in Middle or High School (Mathematics) (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students.
Prerequisites: acceptance to the Professional Program in Education.

EDSE 778B - Teaching Internship in High School Mathematics (9 Credits)
Application of effective teaching techniques and organization of instructional settings for high school students.
Prerequisites: EDSE 778A.
Corequisite: EDSE 584 or EDSE 784.

EDSE 781A - Teaching Internship in Middle or High School (Science) (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle or high school students.
Prerequisites: acceptance to the Professional Program in Education.

EDSE 781B - Teaching Internship in High School Science (9 Credits)
Application of effective teaching techniques and organization of instructional settings for high school students.
Prerequisites: EDSE 781A.
Corequisite: EDSE 584 or EDSE 784.

EDSE 783 - Advanced Study of the Teaching of Mathematics in the Middle or Junior High School (3 Credits)
Historical developments and recent innovations in curricula, resources, and techniques in the teaching of mathematics in the middle or junior high school. Investigative research into the improvement in instruction.

EDSE 785 - Seminars on Selected Topics in Foreign Language Education (3 Credits)
Topics will be identified by title in the schedule of classes. Each topic may be taken only once. 03: 07/05/2019.

EDSE 786 - The Teaching of Literature in the Secondary School (3 Credits)
Subject content of new literature programs; resources and innovative approaches; problems in organizing literature. Emphasis on specific teaching methodology and the development of materials.

EDSE 787 - The Teaching of Composition in the Secondary School (3 Credits)
New curricula in the teaching of oral and written composition; issues and problems in the composition phase of English programs; innovative teaching techniques and methodology. Development of materials appropriate to the teaching of oral and written composition.

EDSE 788 - The Teaching of the English Language in the Secondary School (3 Credits)
Recent innovations in curricula, resources, and teaching techniques for such topics as dialectology, usage, regional varieties of language, lexicography, language history and development, structural grammar, and transformational grammar.

EDSE 789 - The English Teacher and Special Problems in Reading (3 Credits)
Selected problems and solutions in reading at the secondary level. Ways to improve reading skills; research contributions to the improvements of instruction in reading.
Prerequisites: EDRD 514 or EDRD 518.

EDSE 828 - Research in English Education (3 Credits)
Research methodology and design in the field of English education. Interpretation of data and implications for further research. A preliminary dissertation proposal may be developed.

EDSE 851 - Advanced Reading in Mathematics Education (3 Credits)
Analyses of select studies in the pertinent field(s) of specialization in secondary education. Consideration is given to implications for needed research in these fields.

EDSE 890 - Independent Study (3 Credits)

Social Work (SOWK)

SOWK 668 - SpecialTopics in Social Work (1-3 Credits)
Study of special populations, settings, and/or problems encountered by social workers and other human service professionals, and interventions and skills for dealing with them. May be repeated as content varies by title.

SOWK 678 - Transforming Health Care for the Future (1 Credit)
Foundation for beginning health professions students to gain an understanding of the complexities of the health care system through experiential activities conducted in interprofessional teams and the importance of interprofessional collaboration in order to improve the system.
Cross-listed course: PUBH 678
SOWK 679 - Addressing Childhood Obesity through Community Approaches (2 Credits)
Approaches for prevention of childhood obesity, using perspectives from public health, social work, exercise science, pharmacy, medicine, and behavioral nutrition. Training to teach diet/physical activity lessons in elementary school settings. 
Cross-listed course: HPEB 679

SOWK 701 - Professional Development Bridge (3 Credits)
Bridge course designed to prepare newly enrolled Advanced Standing MSW students for their Advanced Practice year of study for the MSW program. Students must hold a BSW from a CSWE- accredited BSW program and be admitted to the University of South Carolina Graduate School and the College of Social Work's Master's Program as an Advanced Standing Student.

SOWK 702 - Writing for Professional Social Work Practice (3 Credits)
Prepare students to write effectively for professional practice in social work.

SOWK 703 - Richland County Sheriff’s Department School Practicum (1 Credit)
This seminar is part of a collaborative school social work/law enforcement practicum immersion study. Permission of the instructor and concurrent enrollment in an instructor-approved field practicum is required.

SOWK 704 - Nonprofit Leadership (3 Credits)
This course provides students with foundational knowledge for leading and managing nonprofit or nongovernmental organizations. The student will learn about governance, human resources, financial management, marketing, and planning and evaluation. In this class, the student will use theory to understand effective organizational practices in a modern era. This course counts as a practice elective.

SOWK 705 - Family Interventions and Family Therapy (3 Credits)
Social work practice with families, parents, and couples, focused on family interventions and family therapy with culturally diverse and vulnerable family populations. This course counts as a practice elective.

SOWK 712 - Human Behavior and the Social Environment I (3 Credits)
Study of institutions, communities, and organizations as social systems relevant to social work practice.

SOWK 714 - Diversity and Social Justice Issues for Social Work Practice (3 Credits)
Diversity, strengths, needs, and responses of oppressed populations from a social justice perspective, with emphasis on experiential learning and implications for social work practice at all system levels.

SOWK 716 - Human Behavior and the Social Environment II (3 Credits)
A systems approach is used to study the family and individual development. Cultural and structural variability are emphasized.

SOWK 718 - Systems Analysis of Social Work Practice (3 Credits)
Integration and application of social work theories, skills, and values in preparation for the transition to professional practice.
Prerequisites: Full-time and Part-time Programs: SOWK 779, SOWK 783, SOWK 792 or SOWK 793; Advanced Standing Program: SOWK 779, SOWK 783, SOWK 792 or SOWK 793.

SOWK 722 - Social Work Practice with Individuals, Families and Small Groups (3 Credits)
Methods of social work intervention with individuals, families and groups within the social environment.

SOWK 724 - Advanced Social Work Practice with Groups (3 Credits)
Advanced study of social work intervention with groups, including treatment, educational, self-help and mutual aid. This course qualifies as a Practice Elective.

SOWK 726 - Supervision and Case Consultation (3 Credits)
An in-depth study of modalities for overseeing the delivery of direct services in social agencies. This course qualifies as a Practice Elective.

SOWK 727 - Social Work in an Educational Setting (3 Credits)
Examination of school social work services from a multi-level, ecological approach including the community, the school, the family, and the students. This course qualifies as a Practice Elective.

SOWK 728 - Social Work Case Management (3 Credits)
Practice of social work case management with a special emphasis on case management for vulnerable populations. This course qualifies as a Practice Elective.

SOWK 729 - Cognitive Behavioral Therapies (3 Credits)
Knowledge and skills for practice with cognitive behavior therapies. This course qualifies as a Practice Elective.

SOWK 730 - Trauma-informed Social Work Practice (3 Credits)
Integration and infusion of meaning of trauma into one's practice so as to recognize its prevalence, realize its impact, and respond sensitively and competently. This course qualifies as a Practice Elective.

SOWK 731 - Motivational Interviewing for Social Work Practice (3 Credits)
Motivational interviewing strategies and advanced practice competencies within a variety of social work practice settings. This course qualifies as a Practice Elective.

SOWK 732 - Social Work Practice with Organizations and Communities (3 Credits)
Social work practice in organizations and communities, especially skills in problem identification and solving.

SOWK 734 - Advanced Social Work Practice with Organizations and Communities: Community Social Work (3 Credits)
Pro-active macro practice methods in several areas, including legislative advocacy and skills in persuasive communication. This course qualifies as a Practice Elective.

SOWK 737 - Overview of Social Work Practice with the Military, Veterans, and their Families (3 Credits)
Foundation knowledge for practice with military and their families including information about military culture, values. An overview of military knowledge and history essential for working with this population, information about problems unique to the military, and the identification of treatment and community resources.

SOWK 738 - Military Mental Health and the Impact of Trauma (3 Credits)
Designed to provide state-of-the-art information about problems and disorders encounter by veterans and military personnel, including information about the signature injuries associated with current and past conflicts, as well as information about problems encountered in family life.

SOWK 739 - Intervention Strategies in Military Behavioral Health (3 Credits)
Military social work focuses on social work practice, policy, and advocacy and includes preventive, treatment, and rehabilitative services to uniformed service members veterans, and their families.
SOWK 740 - International Social Work and Social Justice (3 Credits)
International aspects of social work in the United States and in a global context.

SOWK 742 - Social Welfare Policy Analysis (3 Credits)
Analysis of social welfare policies, including their development, implementation, and evaluation.

SOWK 743 - Immigration Policy (3 Credits)
This course examines immigration policy in the contemporary U.S. context. It explores current policy debates in light of migration research and theory, and aims to address the following questions: Why do people migrate? How do they adapt once they arrive? How does immigration impact receiving societies?

SOWK 744 - Grant Writing (3 Credits)
Planning and program development through grant writing that can be generalized to any setting and relevant to social, community, and economic development as well as other areas of social work practice.

SOWK 745 - Housing and Community Development (3 Credits)
Examination of housing and community development in contemporary society. Major issues and debates in the field are considered and critically examined. This course qualifies as a Practice Elective.

SOWK 746 - Community Mental Health (3 Credits)
Course develops skills for effective social work practice within dynamic and multifaceted mental health settings. Substantive areas include role play, research informed practice and practice informed research, and reflective/reflexive practice. The primary goal is to produce practitioners capable of influencing mental health related practice paradigms, programs, services, interventions, and policies. This course qualifies as a Practice Elective.

SOWK 748 - Crisis Intervention (3 Credits)
This course introduces students to crisis theory and intervention models for response to a variety of individual, family, and community crises. This course focuses on crisis theories, the tasks associated with crisis care, methods of intervention and the responses to specific crises.

SOWK 749 - Evidence Based Parenting Interventions Child & Adolescent Social, Emotional, & Behavioral Challenges (3 Credits)
Examines theories of practice and parenting interventions with strong empirical evidence for supporting positive youth development and preventing or ameliorating child and adolescent social, emotional, and behavioral challenges among diverse youth and parents.

SOWK 751 - Youth and Substance Use (3 Credits)
Students are introduced to the unique dynamics of substance use among adolescent populations. Students gain foundational knowledge about adolescent development, substance use trends and prevalence among adolescent populations. Risk and protective factors are explored that impact adolescent substance use, and systems of care for this unique group.

SOWK 752 - Social Work Intervention in Substance Abuse (3 Credits)
Knowledge and skills for substance abuse treatment for clients from diverse backgrounds with a focus on empirically based methods from a social work practice. This course qualifies as a Practice Elective.

SOWK 756 - Social Work Practice and Developmental Disabilities (3 Credits)
Explores values, addresses psychosocial issues and examines assessment and intervention tools important for practice with persons with disabilities, their families and the community.

SOWK 758 - Family Dynamics and Substance Abuse (3 Credits)
An examination of the family dynamics of drug abuse, including the etiology, assessment approaches, and prevalent treatment methods. Special emphasis on the role of the family as a contributing factor and vehicle for positive change.

SOWK 759 - Psychopathology and Psychodiagnostics for Social Work Practice with Children and Adolescents (3 Credits)
This course introduces students to etiology, assessment, and diagnosis of child and adolescent mental health within the social work person-in-environment framework to understand the critical biopsychosocial influences on incidence and manifestation of the most commonly presented disorders and the differential effect of these factors on diverse and at-risk populations.

SOWK 760 - Psychopathology and Psychodiagnostics for Social Work Practice with Adults and Older Adults (3 Credits)
This course introduces students to etiology, assessment, and diagnosis of adult and older adult mental health within the social work person-in-environment framework to understand the critical biopsychosocial influences on incidence and manifestation of the most commonly presented disorders and the differential effect of these factors on diverse and at-risk populations.

SOWK 762 - Loss, Grief, and Social Work Intervention (3 Credits)
Losses encountered throughout the life cycle, normal and pathological grieving, and intervention techniques.

SOWK 764 - Independent Study (3 Credits)
For advanced graduate students.

SOWK 765 - Sexuality Issues for Social Work Practice (3 Credits)
Sexuality in the context of social functioning and its relationship to problems encountered by social work practitioners. Emphasis on problems of sexual oppression.

SOWK 768 - Special Topics in Social Work (1-3 Credits)
An in-depth study of selected issues, social concerns, and application of behavioral implications for practice. May be repeated as content varies by title.

SOWK 769 - Interdisciplinary Perspectives on Child Abuse and Neglect (3 Credits)
Current knowledge about child abuse and neglect, including typologies, etiology, effects, and current practice interventions. 03: 07/05/2019.

SOWK 771 - Psychosocial Approaches to Gerontology (3 Credits)
Introduction to gerontology from the fields of demography, psychology, sociology, social welfare, and economics.

Cross-listed course: PSYC 700

SOWK 772 - Programs and Services for Older Adults (3 Credits)
Examination of the policy/planning issues relating to older adults, including current trends in services, base for social service development, and evaluation of services for older adults.

SOWK 777 - Advanced Theory for Social Work Practice (3 Credits)
A theoretical background for specialized advanced social work practice incorporating social and behavioral science as a framework for analyzing evidence-based approaches for social work interventions.

Prerequisites: Full-time and Part-time Programs: SOWK 712, SOWK 714, SOWK 716, SOWK 781, SOWK 791; Advanced Standing Program: None.
SOWK 778 - Advanced Analysis of Social Policy, Programs, and Services (3 Credits)
Overview of the structure and functions of programs, policies, and systems in a specialized area of practice, including the history of policy development, the current policy environment, and the role of social workers and the social work profession in shaping and implementing policy in this area.
Prerequisites: Full-time and Part-time Programs: SOWK 777, SOWK 779, SOWK 783; Advanced Standing Program: SOWK 777, SOWK 779, SOWK 783.

SOWK 779 - Advanced Social Work Interventions (3 Credits)
Advanced direct practice in a specialized area with a focus on engagement, assessment, intervention planning and implementation, and practice evaluation for diverse client systems at multiple levels. Instructor permission required for non-MSW program students.
Prerequisites: Full-time and Part-time Programs: SOWK 722, SOWK 732, SOWK 742, SOWK 777, SOWK 782; Advanced Standing Program: SOWK 777.

SOWK 781 - Field Instruction I: Generalist Social Work Practice (3 Credits)
An agency-based study of the community social welfare system and the social agency's place in delivery of services; a beginning involvement in agency practice.

SOWK 782 - Field Instruction II: Generalist Social Work Practice (3 Credits)
An agency-based study of the community social welfare system and the social agency's place in delivery of services; a beginning involvement in agency practice.
Prerequisites: Full-time and Part-time Programs: SOWK 781; Advanced Standing Program: None.

SOWK 783 - Field Instruction III: Advanced Social Work Practice (3 Credits)
Advanced experience in social work practice with individuals, families, and small groups with focus on treatment process and differential use of alternative modalities of intervention.
Prerequisites: Full-time and Part-time Programs: SOWK 722, SOWK 732, SOWK 742, SOWK 777, SOWK 782; Advanced Standing Program: None.

SOWK 784 - Field Instruction IV: Advanced Social Work Practice (3 Credits)
Advanced experience in social work practice with individuals, families, and small groups with focus on treatment process and differential use of alternative modalities of intervention.
Prerequisites: Full-time and Part-time Programs: SOWK 779, SOWK 783, SOWK 792 or SOWK 793; Advanced Standing Program: SOWK 779, SOWK 783, SOWK 792 or SOWK 793.

SOWK 791 - Social Work Research Methodologies (3 Credits)
Examination of social work research contexts, designs, and strategies.

SOWK 792 - Evaluation of Social Work Practice (3 Credits)
Examines a number of single-system designs that can be used to evaluate practice or practice interventions with clients.
Prerequisites: Full-time and Part-time Programs. SOWK 791; Advanced Standing Program: None.

SOWK 793 - Evaluation of Social Work Programs (3 Credits)
Examines methods that can be used to evaluate social work programs, policies, and practice.
Prerequisites: Full-time and Part-time Programs: SOWK 791; Advanced Standing Program: None.

SOWK 800 - Intellectual Foundations of Social Welfare and Social Work I: Historical Roots (3 Credits)
Examines across disciplines the theoretical and empirical foundations for social welfare and social work in historical, economic, social, and political contexts prior to the 20th century.

SOWK 801 - Intellectual Foundations of Social Welfare and Social Work II: Modern Developments (3 Credits)
Examines across disciplines the theoretical and empirical foundations of social welfare and social work in historical, economic, social, and political contexts from the early 20th century to the present.

SOWK 802 - Intellectual Foundations of Social Welfare and Social Work III: Conceptual Model-Building (3 Credits)
Examines the process of developing theory-based welfare and social work scholarship from a variety of research approaches, focusing on conceptual model-building.

SOWK 811 - Qualitative Methods of Inquiry for Social Work Research (3 Credits)
Foundations of qualitative methods in social research with emphasis on intensive interviewing and grounded theory.

SOWK 822 - Measurement and Instrument Design (3 Credits)
Advanced study to evaluate and design measurement and instrumentation in social work research. Restricted to social work doctoral students.
Prerequisites: SOWK 891, SOWK 892.

SOWK 830 - Community - Engaged Research for Social Welfare and Social Change (3 Credits)
Doctoral-level course covering conceptual foundations and key processes and skills of community-engaged research for understanding and promoting social welfare and social change. Emphasis on engagement with community, collaboration, challenges, and ethics. Assignments include practical community-engaged research experience.

SOWK 831 - Leadership for Social Change (3 Credits)
Examines theoretical and practical foundations of providing leadership for social change through organizations, communities, public policies, and social norms.

SOWK 850 - Social Work Doctoral Professional Seminar (1-2 Credits)
Examines issues related to making a successful transition from doctoral student to professional social work scholar. May be repeated for credit.

SOWK 872 - Social Work Education Practicum (0 Credits)
A wide range of supervised classroom, field, and other learning experiences designed to prepare the student for work as a social work educator.
Prerequisites: SOWK 871.

SOWK 889 - Doctoral Social Work Practicum (0 Credits)
Students acquire practical research experience, based on an individualized learning contract, under the supervision of a faculty member.

SOWK 890 - Analysis of Social Work Data (3 Credits)
Approaches to the organization, analysis, interpretation, and utilization of data sets available from social agency records or from existing empirical research.
SOWK 891 - Advanced Analysis of Social Work Data (3 Credits)
Analysis of complex data sets from social services agencies and other research sources. Before enrolling in SOWK 891 (Advanced Analysis of Social Work Data), student must demonstrate proficiency in computer applications for statistical analysis using software designated by the Doctoral Program Committee. Typically this will be accomplished by completing an online tutorial (not for credit). Contact the Doctoral Program Director for instructions about the tutorial or contact coswpd@mailbox.sc.edu.

SOWK 892 - Design and Critical Analysis of Social Work Research (3 Credits)
Advanced study of research methods commonly employed in the development of knowledge for social work practice and education. Critique of published social work research using a standardized critique model.

SOWK 894 - Planning and Design of Dissertation Research (1 Credit)
A seminar designed to provide intensive faculty supervision and peer consultation to the doctoral student in the preparation of the dissertation proposal. Repeatable- 2 credits required for the doctoral program.
Prerequisites: SOWK 890, SOWK 891, SOWK 892, SOWK 811.

SOWK 899 - Dissertation Preparation (1-12 Credits)
Prerequisite: SOWK 894.

Sociology (SOCY)

SOCY 500 - Social Networks (3 Credits)
Analysis of personal, social and organizational networks, their structural patterns, practical consequences, and principles of formation and change.

SOCY 502 - Political Sociology (3 Credits)
Theory and research concerning the interrelationship between the polity and social structures.

SOCY 503 - Family and Social Stratification (3 Credits)
An analysis of the contemporary American family emphasizing social stratification, mobility, occupations, and urbanization.

SOCY 504 - Social Stratification (3 Credits)
Theory and research in social stratification.

SOCY 505 - Social Structures in Communities (3 Credits)
Interrelationships of major social structures within communities.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 506 - Social Organizations (3 Credits)
Selected theoretical orientation, methodological procedures, and illustrative substantive issues pertaining to organizations.

SOCY 507 - Sociology of Social Control (3 Credits)
Theories and issues relating to the definition and response to crime and/or deviance.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 509 - Advanced Social Structures (3 Credits)
The analysis of core methodological and substantive issues in the study of social structures.

SOCY 510 - Life Course Demographics (3 Credits)
People's demographic lives, structural contexts, and social change. Emphasis on the socioeconomic context in which lives unfold.
Prerequisites: SOCY 310.

SOCY 512 - Internal and International Migration (3 Credits)
A survey of methods of analysis and research findings with emphasis on the social and economic concomitants of internal migration. Cultural, economic, and historical aspects of international migration. Effects of governmental policies on immigration and emigration. Examination of selected countries.

SOCY 514 - Urbanization (3 Credits)
Analysis of urbanization using contemporary and historical data from developing societies. The demographic components of metropolitan growth and the changing structure of metropolitan communities.

SOCY 515 - Scientific Methods and Sociological Inquiry (3 Credits)
Introduction to methods used to answer theoretical, empirical, and practical sociological questions, including scientific inquiry and research design.

SOCY 520 - Advanced Social Psychology (3 Credits)
Advanced survey of social psychological perspectives and research on inequality, discrimination, power and status, cooperation and collective action, social norm and morality, networks and relationships.

SOCY 521 - Small Group Analysis (3 Credits)
A behavioral analysis of small groups.

SOCY 522 - Power and Authority Structures in Groups (3 Credits)
An exploration of theoretical perspectives, methodological approaches, and substantive issues in the study of interpersonal power and authority.

SOCY 523 - Social Processes of Deviance Control (3 Credits)
A systematic analysis of the interrelation among the creation, involvement, recognition, and control of deviance.

SOCY 524 - Interpersonal Behavior in Families (3 Credits)
Social psychological perspectives on family behavior.

SOCY 525 - Selves and Social Transaction (3 Credits)
A systematic analysis of interrelationships among social acts, selves, roles, transactions, and language.

SOCY 540 - Sociology of Law (3 Credits)
Review of theoretical and empirical developments in the sociology of law, including classical and modern sociological theories of law and selected sociological themes of law in various social settings.

SOCY 550 - Sociology of Science (3 Credits)
Interrelationships among society, culture, and contemporary science.

SOCY 557 - Sociology of Education and Inequality (3 Credits)
Advanced inquiry into the relationship between education and inequality. Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 560 - Advanced Sociological Theory (3 Credits)
Theoretical perspectives on society and social behavior.

SOCY 561 - Integrative Research Experience (3 Credits)
Design and conduct of original research using sociological research methods to meet Carolina Core Integrative course requirement for the BA and the BS.
Prerequisites: SOCY 101, SOCY 220 and SOCY 300-level or higher course.

Experiential Learning: Experiential Learning Opportunity

SOCY 562 - Advanced Sociological Research Methods (3 Credits)
Advanced survey of methods used in sociological research.

SOCY 598 - Selected Topics (3 Credits)
Readings and research on selected sociological topics. Course and content varies and will be announced in the schedule of classes by title.
Prerequisites: SOCY 101.
SOCY 599 - Advanced Independent Study (3-6 Credits)
Advanced independent study. Contract approved by instructor, advisor, and department chair is required.
Prerequisites: SOCY 101.

SOCY 698 - Special Topics (3 Credits)
Reading and research.
Prerequisites: SOCY 101.

SOCY 710 - Theoretical Foundations of Sociology (3 Credits)
Survey of theoretical and empirical works of sociological scholars.

SOCY 711 - Theory Construction (3 Credits)
Presentation and study of the major theory groups in contemporary sociology, including functionalism, exchange, and consistency theories. Analysis of theoretical perspectives using criteria of logical consistency and adequacy of explanation. Techniques of building formal theory in sociology.

SOCY 719 - Selected Topics in Sociological Theory (3 Credits)
Prerequisite: SOCY 710.

SOCY 720 - Survey of Research Methods (3 Credits)
Survey of data-gathering techniques used in sociology including questionnaires, interviews, surveys, archival searches, experiments, and observational techniques.

SOCY 721 - Selected Sociological Topics in Methodology (3 Credits)
Intensive focus on selected social research methods having applications to the study of sociology.

SOCY 729 - Selected Sociological Topics in Methodology (3 Credits)
Prerequisite: SOCY 701.

SOCY 730 - Statistical Analysis in Sociology (3 Credits)
Introduction to statistical analysis in sociology, including bivariate and multiple regression, correlation and analysis of variance.
Prerequisites: SOCY 700.

SOCY 731 - Topics in the Quantitative Analysis of Sociological Data (3 Credits)
Recursive and non-recursive modeling, multiple regression using longitudinal data, event history analysis.
Prerequisites: SOCY 515.

SOCY 732 - Topics in the Analysis of Social Networks (3 Credits)
Selected topics in the theory, measurement, and analysis of social networks.

SOCY 733 - Topics in Scaling and Measurement Methods (3 Credits)
Selected topics in scaling and measurement of social science data emphasizing exploratory and descriptive techniques such as correspondence analysis, proximity scaling and contingency table representations.

SOCY 734 - Experimental Methods in Sociology (3 Credits)
Purposes, design and implementation of laboratory experiments in sociology.

SOCY 739 - Selected Topics in the Quantitative Analysis of Sociological Data (3 Credits)
Prerequisite: SOCY 700.

SOCY 745 - Social Demography (3 Credits)
Classical and contemporary theories and analytical approaches to demography.

SOCY 746 - Sociology of the Family (3 Credits)
Sociological theories of the family and social change.

SOCY 749 - Selected Topics in Demography (3 Credits)
Introduction to selected research methodologies having applications to the study of demography.
Prerequisites: SOCY 515.

SOCY 755 - Social Structures and Inequality (3 Credits)
Social inequality and stratification studied from a structural perspective, focusing on patterns in institutions that perpetuate inequality.

SOCY 756 - Race, Class, Gender, and Sexuality (3 Credits)
Historical and contemporary dimensions of social inequality centered in race, social class, gender, and sexuality.
Cross-listed course: PSYC 751

SOCY 759 - Selected Sociological Topics in Social Structures (3 Credits)
Prerequisite: SOCY 700.

SOCY 765 - Contemporary Group Processes (3 Credits)
Theories and problems in contemporary groups processes; primary emphasis on theories of status, power, justice, emotion, and legitimacy.

SOCY 769 - Selected Sociological Topics in Social Psychology (3 Credits)
Prerequisite: SOCY 700.

SOCY 775 - Medical Sociology (3 Credits)
Social and cultural meanings, determinants, and experiences of health and illness; organization of health care delivery system; impact of culture, roles, and relationships on patients and providers.

SOCY 779 - Selected Topics in Medical Sociology (3 Credits)
Topics from Medical Sociology theory and research. May be repeated as content varies by title.

SOCY 780 - Sociology Proseminar (1 Credit)
This seminar introduces graduate students in sociology to aspects of the sociological profession that are beyond the confines of sociological theory, methodology, and the discipline's substantive interests.

SOCY 781 - Teaching Sociology (1-3 Credits)
An exploration of college teaching of sociology, including goals, means, and challenges.
Prerequisites: SOCY 515.

SOCY 790 - Special Topics: Reading and Research (3 Credits)

SOCY 791 - Special Topics: Reading and Research (3 Credits)

SOCY 799 - Thesis Research and Preparation (1-9 Credits)

SOCY 890 - Special Topics: Reading and Research (3 Credits)

SOCY 891 - Special Topics: Reading and Research (3 Credits)

SOCY 899 - Dissertation Preparation (1-12 Credits)

Southern Studies (SOST)

SOST 500 - Topics in the American South (3 Credits)
Selected topics related to the study of the American South. Course content varies and will be announced in the schedule of classes by title. May be repeated for credit as topics vary.
Spanish (SPAN)

SPAN 500 - Contemporary Spain (3 Credits)
Analysis and discussion of 20th-century Spanish history and the sociocultural forces that have contributed to define this country's national identity. Taught in Spanish.
Prerequisites: SPAN 303 for Undergraduates, Phase II placement exam above SPAN 303.

Graduation with Leadership Distinction: GLD: Global Learning

SPAN 501 - Contemporary Spanish America (3 Credits)
Analysis and discussion of 20th-century Spanish American history and the sociocultural forces that have contributed to define this area's national identities. Taught in Spanish.
Cross-listed course: LASP 501

SPAN 513 - Introduction to Professional and Technical Translation (3 Credits)
Introduction to translation and practice of skills required for professional and technical Spanish/English translation.
Prerequisites: SPAN 409.

SPAN 515 - Introduction to Spanish Linguistics (3 Credits)
Phonology, morphology, and syntax of modern Spanish.
Prerequisites: SPAN 303, Phase II placement exam above SPAN 303.

SPAN 516 - The Structure of Modern Spanish (3 Credits)
Description of the grammatical structures of Modern Spanish. Intensive study of the theory and practice of word formation and sentence structure of Spanish.
Cross-listed course: LING 554

SPAN 517 - Contrastive English-Spanish Phonetics and Phonology (3 Credits)
Introduction to the study of phonetics and phonology and their application to the sounds and sound systems of English and Spanish. Includes transcription practice and discussion of relevance to teaching.
Cross-listed course: LING 514

SPAN 518 - Introduction to Spanish Medieval Literature (3 Credits)
Survey of Spanish literature from its first manifestations to La Celestina. Introduction; early works; the epic; 13th- through 15th-century prose and verse; Berceo, Alfonso X, Juan Ruíz, Marques de Santillana; others.
Prerequisites: SPAN 312 for undergraduates.

SPAN 524 - Renaissance and Golden Age Literature (3 Credits)
Survey of the works of Garcilaso, the Spanish mystics, Lope, Quevedo, Tirso, Calderón, Gongora and others.
Prerequisites: SPAN 312 for undergraduates.

SPAN 534 - Nineteenth-Century Spanish Literature (3 Credits)
Survey of the works of the major literary figures of the period.
Prerequisites: SPAN 312 for undergraduates.

SPAN 538 - Twentieth-Century Spanish Literature (3 Credits)
Survey of major peninsular writers from the Generation of '98 to the present.
Prerequisites: SPAN 312 for Undergraduates.

SPAN 541 - Colonial Spanish-American Literature to Neoclassicism (3 Credits)
Survey of pre-Columbian poetry and of texts dating from the time of Columbus to the end of the Colonial period.
Cross-listed course: LASP 541

SPAN 543 - Spanish-American Literature from the Independence Through Modernism (3 Credits)
Survey of the most significant works of the Independence through Modernism.
Prerequisites: SPAN 312 for Undergraduates.

SPAN 550 - Advanced Language Study Abroad (3 Credits)
Intensive language practice in native environment with special emphasis on oral skills. Instruction by native speakers; extensive community contact and home stay. Prior placement test required.

SPAN 555 - Spanish-American Literature from Modernism Through 1960 (3 Credits)
Survey of the most significant works of this period.
Prerequisites: SPAN 312 for undergraduates.

SPAN 557 - Contemporary Spanish-Amercian Literature (3 Credits)
Survey of the most significant works from 1960 to the present.
Cross-listed course: LASP 471

SPAN 575 - Special Topics in Spanish (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as content varies by title.
Prerequisites: D or better in SPAN 312 or graduate standing.

SPAN 615 - Intensive Readings in Spanish (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language requirement with successful completion of the course. Undergraduates may take the course as an elective only by permission.

SPAN 700 - Introduction to Graduate Studies in Languages, Literatures, and Cultures (3 Credits)
An introduction to graduate studies that includes a survey of contemporary literary theory, an overview of the current state of the profession, and instruction in how to carry out research and write at the graduate level.
Cross-listed course: CPLT 700, FREN 700, GERM 700

SPAN 711 - Introduction to Literary Theory and Criticism (3 Credits)
Overview of the main theories and methods in analyzing Spanish and Spanish-American literature.

SPAN 715 - History of the Spanish Language (3 Credits)
Development of the language from its origins to the present day.
Cross-listed course: LING 734

SPAN 722 - Cervantes (3 Credits)
Selected topics from among the works of Cervantes, including Don Quixote, the Galatea, the Persiles, the Novelas ejemplares, and his dramatic works.

SPAN 724 - Renaissance and Baroque Poetry and Drama (3 Credits)
In-depth study of the works of Lope de Vega, Quevedo, Gongora, Calderón, and others.

SPAN 730 - Contemporary Spanish Prose Fiction (3 Credits)
Emphasis on the post-Spanish Civil War narrative.

SPAN 732 - Nineteenth-Century Spanish Prose and Poetry (3 Credits)
Intensive reading of major works of Spanish Romanticism and Realism.

SPAN 733 - Trans-Atlantic Perspectives (3 Credits)
An exploration of the inter-connection between Spain and the Americas including issues relating to processes of articulation and assimilation between the Spanish legacy and America's cultures, together with the African dimensions.

</tr>
</tbody>
</table>
SPCH 749 - Performance and Cultural Studies (3 Credits)
Theories and research exploring the mutual contributions of performance and cultural studies. Emphasis on performance as both a subject of critical/cultural inquiry as well as a method of critical/cultural invention.

SPCH 751 - Performance Criticism (3 Credits)
Study of critical performance methods and the conceptual and paradigmatic assumptions that motivate, compose, and justify performance as a critical act, criticism as a performative act, and performance events as critical objects.

SPCH 755 - Theories of Performance, Representation, and Advocacy (3 Credits)
Exploration of performance as a site of and means for representing and creating social change.

SPCH 761 - Ethics & Politics of Rhetoric (3 Credits)
Examination of the ethical and political commitments in the rhetorical tradition. Emphasis on the intersection of rhetorical scholarship with issues in communication ethics and their implications for political rhetoric.

SPCH 762 - Rhetorics of Materiality, Technology, and Science (3 Credits)
Study of the rhetorical analysis of scientific and technological public discourse, implications of public science and technological changes for the theory and practice of rhetoric, and the rhetorical construction of sciences and technologies.

SPCH 764 - Rhetoric, Violence, and the Discourse of Human Rights (3 Credits)
Advanced study of the rhetorical violence that attends the human condition and its attempted redress through discourses of human rights. Special attention devoted to theories of violence and critical interpretation of legal discourse, human rights doctrine, and humanitarian advocacy.

SPCH 790 - Special Topics in Speech Communication, Rhetoric, and Performance (3 Credits)
Selected topics in speech communication, rhetoric, and performance studies. May be repeated as content varies by title.

SPCH 792 - Classical Rhetorical Theory (3 Credits)
Survey of ancient Greek and Roman rhetorical theory.

SPCH 793 - Medieval to Modern Rhetorical Theory (3 Credits)
Survey of important figures, debates, and perspectives in rhetorical theory from the Medieval period to the 19th century.

SPCH 794 - Contemporary Rhetorical Theory (3 Credits)
Survey of major figures, debates, and theories in the field of rhetoric from the 19th century to present.

SPCH 796 - Independent Study in Speech Communication, Rhetoric, and Performance (1-3 Credits)
Individually arranged studies in specialized areas of speech communication, rhetoric, or performance.

SPCH 797 - Special Projects in Speech Communication, Rhetoric, and Performance (1-3 Credits)
Individually research projects focused on a selected area of speech communication, rhetoric, or performance.

SPCH 799 - Thesis Preparation (1-9 Credits)
To be arranged by candidates for the Master of Arts degree with the instructor under whose direction the master's thesis is being written.

Sport & Entertainmnt Mgmt (SPTE)

SPTE 501 - Trends and Issues in Sport and Entertainment Management (3 Credits)
Trends and Issues in Sport and Entertainment Management.

SPTE 545 - Managing Part-Time Employees and Volunteers (3 Credits)
Recruiting, hiring, training, and retaining part-time employees and volunteers in sport and entertainment.

SPTE 550 - The Business of Esports (3 Credits)
This course is designed to provide students with an overview of the business of esports. It will focus on the history of video games from creation to the present and will also cover the various business elements of the modern, competitive esports environment.

SPTE 560 - Performing Arts Management and Leadership (3 Credits)
The study of performing arts management as it relates to nonprofits and organizational structure.
Prerequisites: C or better in SPTE 202 and SPTE 380.

SPTE 565 - Business of Broadway (3 Credits)
The study of the management of Broadway productions from script to play, including the creative process, business ventures, production houses, and investor relations.
Prerequisites: SPTE 202 and SPTE 380; C or higher for SPTE majors.

SPTE 570 - Special Topics in Global Sport (3 Credits)
This course examines a variety of global sport and entertainment management issues. The emphasis will be on an understanding of the concepts related to the sport and entertainment management in an international setting. Content varies by title. May be repeated once.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SPTE 580 - Business Principles in Sport Management (3 Credits)
Business principles in the management of public and private sector sport programs.

SPTE 585 - Sports Economics (3 Credits)
This course focuses on issues relevant to sport, entertainment, and related industries. The goal of the class will be for students to understand both basic and complex concepts within economics in a sport and entertainment context, in order to grasp the importance of economic decision-making.

SPTE 590 - Special Topics in Live Entertainment and Sport (3 Credits)
Investigation of Special topics pertinent to the sport and entertainment management industry. Content varies by title. May be repeated twice.

SPTE 635 - Sport and Entertainment Event Development (3 Credits)
Business concepts needed to develop sport and entertainment special events.

SPTE 640 - Venue Management: Principles and Practices (3 Credits)
Managing public assembly facilities and venues.
Prerequisites: SPTE 203 or equivalent.

SPTE 650 - Integrated Marketing Communication in Sport and Entertainment (3 Credits)
Use of integrated marketing communication concepts, theories, and strategies in sport and entertainment.
Prerequisites: MKTG 350.

SPTE 655 - Social Media in Live Entertainment and Sport (3 Credits)
In-depth investigation of social networks, digital platforms, and online marketing for the live entertainment and sport industries.
SPTE 701 - Management in the Sport and Entertainment Industry (3 Credits)
Management principles in the sport and entertainment industry.

SPTE 720 - Advanced Live Entertainment Management (3 Credits)
The advanced study of underlying themes in entertainment management and its application to music, family shows, and other live entertainment business venues.

SPTE 730 - Advanced Sport and the Law (3 Credits)
Advanced knowledge of the legal issues that frequently arise in the context of sport will be covered. The focus of the course is law as it applies to sport as well as how the law affects participants, spectators, sport organizations, and facility managers, among others.

SPTE 736 - Sport and Entertainment Event Entrepreneurship (3 Credits)
Process of new venture creation with respect to sport and entertainment events.

SPTE 746 - Risk and Security Management in Public Assembly Facilities (3 Credits)
The risks and security issues associated with managing public assembly facilities.

SPTE 750 - Strategic Planning and Policy Development in Sport and Entertainment Management (3 Credits)
Policy development and implementation in the sport and entertainment industry.

SPTE 760 - Principles of Sport and Entertainment Marketing (3 Credits)
This course is designed to provide a foundation in the principles of sport and entertainment marketing.
Prerequisites: Undergraduate marketing class or equivalent.

SPTE 765 - Advances Sales in Sport and Entertainment Management (3 Credits)
Comparative approaches of revenue generation and sales processes/strategies used by sport and entertainment organizations.
Prerequisites: Completion of an introductory marketing course and/or relevant industry marketing experience.

SPTE 770 - Public Assembly Facility Management Programming and Sales (3 Credits)
Concepts, knowledge, and sales skills involved in programming public assembly facilities.

SPTE 775 - Event Programming and Production (3 Credits)
This course will examine the critical functions of booking and scheduling a public assembly facility and the production of events in such a venue.
Prerequisites: SPTE 640.

SPTE 780 - Public Assembly Facility Operations and Procedures (3 Credits)
Concepts, knowledge, and operational procedures associated with managing public assembly facilities.

SPTE 781 - Seminar on the Olympic Games (3 Credits)
Examination of the Olympic Games, a mega sport and tourism event and its impact on the sport, entertainment, hospitality and tourism sectors.
Cross-listed course: HRTM 781

SPTE 790 - Sport and Entertainment Finance (3 Credits)
This course examines financial information necessary to perform the usual duties and responsibilities associated with sport facilities, programs and organizations.

SPTE 798 - Directed Study in Sport and Entertainment Management (3 Credits)
Independent study for advanced students under faculty supervision. May be taken twice for degree credit.

SPTE 799 - Thesis Preparation (1-6 Credits)
Thesis preparation in sport and entertainment management.

SPTE 801 - Seminar in SPTE Management (3 Credits)
Acquaints sport management PhD students with advanced principles and applications of the sport and entertainment management discipline. This course will expose the doctoral student to research examining organization, leadership, and strategic management in the sport and entertainment industry and appropriate sub-industries.

SPTE 810 - Seminar in SPTE Education (3 Credits)
Provides Sport and Entertainment Management graduate students with insights that foster professional growth and development as a college instructor. This course examines the scholarship of teaching SPTE and developing optimal classroom environments and identification and guided reflective analysis of critical issues in SPTE education.

SPTE 830 - Seminar SPTE Law & Risk Management (3 Credits)
Acquaints students with advanced theory and application of law and risk management in sport and entertainment management through the review of scholarship about professional and amateur sport, laws impacting the entertainment industry, and risk management issues within sport and entertainment facilities.

SPTE 860 - Seminar in SPTE Marketing (3 Credits)
Acquaints sport management PhD students with advanced principles and application of the sport and entertainment marketing discipline. The course will take an in-depth look at how amateur/professional sport, and emerging sport business enterprises and trends affect the practice of sport and entertainment marketing. This course is designed for students to study sport and entertainment marketing theories and practical applications and principles by specifically learning about marketing information systems, pricing strategies, media relations, promotional methods and endorsements.

SPTE 880 - Sport and Society (3 Credits)
When sport is discussed, how we talk about them, and the possible viewpoints are all given beforehand by deeply entrenched social institutions. The objective of this course is to identify how these institutions are constructed, and how sport is an activity that embodies social relations.

SPTE 890 - Seminar in SPTE Finance (3 Credits)
This course covers advanced principles and applications of sport and entertainment finance. The course takes an in-depth look at the theory, concepts, and frameworks of sport and entertainment finance research. The focus will be on the optimum financial policies and decisions of nonfinancial firms in the sport and entertainment industry.

SPTE 899 - Dissertation Preparation (1-12 Credits)
Assists students through the proposal and dissertation writing process.

Statistics (STAT)

STAT 506 - Introduction to Experimental Design (3 Credits)
Techniques of experimentation based on statistical principles with application to quality improvement and other fields. Full and fractional factorial designs for factors at two levels; dispersion effects; related topics.
Prerequisites: C or higher in MATH 122 or MATH 141; or both MATH 111 or higher and any statistical class.
STAT 509 - Statistics for Engineers (3 Credits)
Basic probability and statistics with applications and examples in engineering. Elementary probability, random variables and their distribution, random processes, statistical inference, linear regression, correlation and basic design of experiments with application to quality assurance, reliability, and life testing. May not be taken concurrently with or after STAT 513, STAT 515, or STAT 516. Not for C.A.S., M.A.S., or Ph.D credit in Statistics.
Prerequisites: MATH 142 or equivalent.

STAT 511 - Probability (3 Credits)
Probability and independence; discrete and continuous random variables; joint, marginal, and conditional densities; moment generating functions; laws of large numbers; binomial, Poisson, gamma, univariate and bivariate normal distributions.
Prerequisites: C or better in MATH 241.
Corequisite: MATH 241.
Cross-listed course: MATH 511

STAT 512 - Mathematical Statistics (3 Credits)
Functions of random variables, order statistics, sampling distributions, central limit theorem, quality of estimators, interval estimation, sufficient statistics, minimum-variance unbiased estimator, maximum likelihood, large-sample theory, introduction to hypothesis testing.
Prerequisites: C or better in STAT 511 or MATH 511.

STAT 513 - Theory of Statistical Inference (3 Credits)
Hypothesis testing, Neyman-Pearson lemma, likelihood ratio tests, power, the theory of linear models including multiple linear regression and ANOVA, the Chi-square goodness-of-fit test, Chi-square inference for contingency tables, Bayesian inference, and advanced topics including survival analysis (only if time permits).
Prerequisites: C or better in STAT 511 or MATH 511.

STAT 515 - Statistical Methods I (3 Credits)
Applications and principles of elementary probability, essential discrete and continuous probability distributions, sampling distributions, estimation, and hypothesis testing. Inference for means, variances, proportions, one-way ANOVA, simple linear regression, and contingency tables. Statistical packages such as SAS or R. May not be taken concurrently with or after STAT 509, STAT 513, or STAT 516. Not for CAS, MAS, MS, or PhD in Statistics.
Prerequisites: C or better in MATH 122 or MATH 141; or both MATH 111 or higher and any statistics class.

STAT 516 - Statistical Methods II (3 Credits)
Applications and principles of linear models. Simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance. Statistical packages such as SAS. Not for CAS, MAS, MS, or PhD credit in Statistics.
Prerequisites: C or better in STAT 515, STAT 509, STAT 512, or equivalent.

STAT 517 - Advanced Statistical Models (3 Credits)
Theory and applications of advanced statistical models. Includes implementation and assessment of generalized linear, nonlinear and nonparametric regression, mixed effect, repeated measures, multivariate regression, and spatial models.
Prerequisites: STAT 512 or STAT 516 or equivalent.

STAT 518 - Nonparametric Statistical Methods (3 Credits)
Applications and principles of nonparametric statistics. Classical rank-based methods, and selected categorical data analysis and modern nonparametric methods. Statistical packages such as R.

STAT 519 - Sampling (3 Credits)
Techniques of statistical sampling in finite populations with applications in the analysis of sample survey data. Topics include simple random sampling for means and proportions, stratified sampling, cluster sampling, ratio estimates, and two-stage sampling.
Prerequisites: C or higher in STAT 515, STAT 509, STAT 512, or equivalent.

STAT 520 - Forecasting and Time Series (3 Credits)
Time series analysis and forecasting using the multiple regression and Box-Jenkins approaches.
Prerequisites: STAT 516 or MGSC 391.
Cross-listed course: MGSC 520

STAT 521 - Applied Stochastic Processes (3 Credits)
An introduction to stochastic processes, including conditional probability, Markov chains, Poisson processes, and Brownian motion. Incorporates simulation and applications to actuarial science.
Prerequisites: C or higher in STAT 511.

STAT 522 - Financial Mathematics I (3 Credits)
Prerequisites: C or better in MATH 241.
Cross-listed course: MATH 514

STAT 523 - Financial Mathematics II (3 Credits)
Prerequisites: C or better in MATH 514 or STAT 522.
Cross-listed course: MATH 515

STAT 525 - Statistical Quality Control (3 Credits)
Statistical procedures for process control including CUSUM and Shewhart Control Charts, and lot-acceptance sampling.
Prerequisites: STAT 509 or STAT 515 or MGSC 391.
Cross-listed course: MGSC 525

STAT 528 - Environmental Statistics (3 Credits)
Statistical analysis of environmental data. Review of multiple regression and ANOVA, nonlinear regression models and generalized linear models, analyses for temporally and spatially correlated data, and methods of environmental sampling.
Prerequisites: STAT 516.

STAT 530 - Applied Multivariate Statistics and Data Mining (3 Credits)
Introduction to fundamentals of multivariate statistics and data mining. Principal components and factor analysis; multidimensional scaling and cluster analysis; MANOVA and discriminant analysis; decision trees; and support vector machines. Use of appropriate software.
Prerequisites: C or higher in STAT 515, STAT 205, STAT 509, STAT 512, ECON 436, MGSC 391, PSYC 228, or equivalent.
STAT 535 - Introduction to Bayesian Data Analysis (3 Credits)
Principles of Bayesian statistics, including: one- and multi-sample analyses; Bayesian linear models; Monte Carlo approaches; prior elicitation; hypothesis testing and model selection; hierarchical models; selected advanced models; statistical packages such as WinBUGS and R.
Prerequisites: C or higher in STAT 512; or CSCE 582 [=STAT 582]; or both STAT 511 and either STAT 509 or STAT 515; or equivalent.

STAT 540 - Computing in Statistics (3 Credits)
An introduction to statistical packages such as R and SAS with special focus on data management and computing procedures such as Monte Carlo simulation.
Prerequisites: C or higher in STAT 515, STAT 509, STAT 512, or equivalent.

STAT 541 - Advanced SAS Programming (3 Credits)
Advanced programming techniques in SAS, including database management, macro language, and efficient programming practices.
Prerequisites: STAT 540.

STAT 582 - Bayesian Networks and Decision Graphs (3 Credits)
Normative approaches to uncertainty in artificial intelligence. Probabilistic and causal modeling with Bayesian networks and influence diagrams. Applications in decision analysis and support. Algorithms for probability update in graphical models.
Prerequisites: STAT 509, STAT 509, or STAT 515.

Cross-listed course: CSCE 582

STAT 587 - Big Data Analytics (3 Credits)
Foundational techniques and tools required for data science and big data analytics. Concepts, principles, and techniques applicable to any technology or industry for establishing a baseline that can be enhanced by future study.
Prerequisites: STAT 509, STAT 513, or STAT 515.

Cross-listed course: CSCE 587

STAT 588 - Genomic Data Science (3 Credits)
This course focuses on quantitative knowledge for interdisciplinary applications in genetics as well as hands-on experience in analyzing genetic data. In this course, students will have programming exercises in using analysis tools to conduct genome-wide analysis, annotation, and interpretation of genetic data using R/Bioconductor packages.
Prerequisites: C or better in STAT 201 or higher.

Cross-listed course: BIOL 588

STAT 591 - Data Analysis for Teachers (3 Credits)
Introduction to statistics for elementary, middle, and high school teachers. The fundamentals of data collection, descriptive statistics, probability, and inference with special focus on methods of teaching statistical reasoning. For M.A.T. (excluding mathematics) / M.Ed. / M.T. and nondegree credit only.

Cross-listed course: SMED 591

STAT 599 - Topics in Statistics (1-3 Credits)
Course content varies and will be announced in the schedule of courses by title.

STAT 600 - Statistics for Applied Management (3 Credits)
Introduction to data collection, descriptive statistics, and statistical inference with examples from hospitality, retail, sport, and entertainment management. Focus on selecting, implementing, and interpreting the appropriate statistical methods using software such as Excel and SPSS. Not for minor or degree credit in Mathematics or Statistics. Does not prepare students for STAT 516, STAT 518, STAT 519 or STAT 525.

STAT 650 - AP Statistics for Teachers (3 Credits)

STAT 700 - Applied Statistics I (3 Credits)
Introduction to probability and the concepts of estimation and hypothesis testing for use in experimental, social, and professional sciences. One and two-sample analyses, nonparametric tests, contingency tables, sample surveys, simple linear regression, various statistical packages. Not to be used for M.S. or Ph.D. credit in statistics or mathematics. Not to be used for M.S. or Ph.D. credit in statistics or mathematics.

STAT 701 - Applied Statistics II (3 Credits)
Continuation of STAT 700. Simple linear regression, correlation, multiple regression, fixed and random effects analysis of variance, analysis of covariance, experimental designs, some multivariate methods, various statistical packages. Not to be used for M.S. or Ph.D. credit in statistics or mathematics.

Prerequisites: STAT 700 or the equivalent.

STAT 702 - Introduction to Statistical Theory I (3 Credits)
Fundamental theory of statistics and how it applies to industrial problems. Topics include probability, random variables and vectors and their distributions, sampling theory, point and interval estimators, and application to the theory of reliability, regression, process control and quality issues. Not to be used for M.S. or Ph.D. credit in statistics.

Prerequisites: MATH 142.

STAT 703 - Introduction to Statistical Theory II (3 Credits)
Continuation of STAT 702. Topics include discussion of theoretical properties of point estimators and tests of hypotheses, elements of statistical tests, the Neyman-Pearson Lemma, UMP tests, likelihood ratio and other types of tests, and Bayes procedures in the decision process. Not to be used for M.S. or Ph.D. credit in statistics.

Prerequisites: STAT 702.

STAT 704 - Data Analysis I (3 Credits)
Primarily for graduate students in statistics and the mathematical sciences. Probability concepts, inferences for normal parameters, regression, correlation, use of computer statistical packages.

Prerequisite or Corequisite: STAT 712.

STAT 705 - Data Analysis II (3 Credits)
Continuation of STAT 704. Analysis of variance (fixed and random effects), analysis of covariance, experimental design, model building, other applied topics, and use of computer statistical packages.

Prerequisites: STAT 704 and STAT 712.

STAT 706 - Experimental Design (3 Credits)
Specialized experimental design: 2n and 3n factorials; fractional replication; confounding; incomplete block designs, including split-plot, split-block, and Latin square designs; general principles of design.

Prerequisites: STAT 701 or STAT 705.

STAT 708 - Environmetrics (3 Credits)
Statistical methods for environmental and ecological sciences, including nonlinear regression, generalized linear models, spatial analyses/kriging, temporal analyses, meta-analysis, quantitative risk assessment.

Prerequisites: STAT 701 or STAT 708 or BIOS 757.

Cross-listed course: BIOS 808
STAT 709 - Environmetrics II (3 Credits)
Theoretical underpinnings of environmetrics. Spatial statistics, temporal and longitudinal analysis, hierarchical modeling, and Bayesian inferences for environmental data.
Prerequisites: STAT 708 or BIOS 808; STAT 714.

Cross-listed course: BIOS 809

STAT 712 - Mathematical Statistics I (3 Credits)
Sample spaces, probability and conditional probability, independence, random variables, expectation, distribution theory, sampling distributions, laws of large numbers and asymptotic theory, order statistics, and estimation.
Prerequisites: advanced calculus.

STAT 713 - Mathematical Statistics II (3 Credits)
Further development of estimation theory and tests of hypotheses, including an introduction to Bayes estimation, sufficiency, minimum variance principles, uniformly most powerful and likelihood ratio tests, and sequential probability ratio tests.
Prerequisites: STAT 712.

STAT 714 - Linear Statistical Models (3 Credits)
A study of the general linear statistical model and the linear hypothesis. Topics include the multivariate normal distribution, distributions of quadratic forms, and parameter estimation and hypothesis testing for full-rank models, regression models, and less than full-rank models.
Prerequisites: STAT 513 and MATH 544 or STAT 712 or equivalent.

STAT 715 - Nonlinear Statistical Models (3 Credits)
Inference for general nonlinear parametric statistical models for univariate and multivariate response; linear and quadratic estimating equations; models for covariance structure; effects of model misspecification and robustness.
Prerequisites: STAT 713, STAT 714.

STAT 716 - Selected Topics in Probability (1-3 Credits)
Special topics in probability theory and stochastic processes not offered in other courses.

STAT 718 - Selected Topics in Statistics (1-3 Credits)
Special topics in statistics not offered in other courses.

STAT 720 - Time Series Analysis (3 Credits)
Stochastic properties, identification, estimation, and forecasting methods for stationary and nonstationary time series models.
Prerequisites: STAT 704 and STAT 512.

STAT 721 - Stochastic Processes (3 Credits)
Theory of stochastic processes, including branching processes, discrete and continuous time Markov chains, renewal theory, point processes, and Brownian motion.
Prerequisites: STAT 711 or STAT 712.

STAT 730 - Multivariate Analysis (3 Credits)
A survey of the theory and applications of the fundamental techniques for analyzing multivariate data.
Prerequisites: STAT 713.

STAT 740 - Statistical Computing (3 Credits)
A survey of current algorithms and software for solving fundamental problems of statistical computing with emphasis on computer generation of random variates.
Prerequisites: STAT 713 and knowledge of a computer programming language.

STAT 750 - Response Surface Methodology (3 Credits)
Methods for fitting (regression) response surfaces and interpreting them subject to random error. Includes designs and industrial process optimization methods.
Prerequisites: STAT 701 or STAT 705.

STAT 761 - Reliability and Life Testing (3 Credits)
The various statistical and probability models in reliability and life testing and inference procedures for such models, including life distributions, parametric and nonparametric inference methods, hazard and failure rate functions, plotting methods, analysis of mixtures, censoring.
Prerequisites: STAT 703 or STAT 713.

STAT 770 - Categorical Data Analysis (3 Credits)
Prerequisites: STAT 704 or BIOS 759.

Cross-listed course: BIOS 805

STAT 771 - Applied Longitudinal Data Analysis (3 Credits)
Modern methods for the analysis of repeated measures, correlated outcomes, and longitudinal data, including repeated measures ANOVA, generalized linear models, random effects, and generalized estimating equations.
Prerequisites: BIOS 757 or BIOS 758 or STAT 701 or STAT 705.

Cross-listed course: BIOS 770

STAT 772 - Binary Dose Response Theory and Methods (3 Credits)
Threshold, mass action, and target theory; empirical dose response functions; methods in current use among health science researchers. 03: 07/05/2019.
Prerequisites: STAT 512.

STAT 775 - Generalized Linear Models (3 Credits)
Statistical theory and applications extending regression and analysis of variance to non-normal data. Encompasses logistic and other binary regressions, log-linear models, and gamma regression models.
Prerequisites: STAT 713 or STAT 513, and STAT 705 or BIOS 757.

Cross-listed course: BIOS 815

STAT 777 - Statistics Phylogenetics and Molecular Evolution (3 Credits)
Theory and applications of phylogenetics; estimation via Markov models, likelihood, distances and parsimony; hypothesis testing of evolutionary trees and parameters; related topics including molecular divergence time inference.
Prerequisites: B or better in MATH 241 or STAT 510.

STAT 778 - Item Response Theory (3 Credits)
Statistical models for item response theory, Rasch and other models for binary and polytomous data, and applications. Use of statistical software.
Prerequisites: EDRM 711 or PSYC 710 or STAT 701 or STAT 704.

Cross-listed course: EDRM 828

STAT 790 - Seminar in Statistical Consulting (1 Credit)
An exposure to the techniques of statistical consulting through discussion and analysis of actual statistical problems which occur in fields of application.
Prerequisites: STAT 700 or equivalent.
STAT 791 - Practicum in Statistical Consulting (1 Credit)
Experiences in actual statistical consulting settings; participation and critiques.
Prerequisites: STAT 790.

STAT 798 - Independent Study (1-6 Credits)

STAT 799 - Thesis Preparation (1-9 Credits)

STAT 810 - Probability Theory I (3 Credits)
Probability spaces, random variables and distributions, expectations, characteristic functions, laws of large numbers, and the central limit theorem.
Prerequisites: STAT 511, STAT 512, or MATH 703.

Cross-listed course: MATH 710

STAT 811 - Probability Theory II (3 Credits)
More about distributions, limit theorems, Poisson approximations, conditioning, martingales, and random walks.
Cross-listed course: MATH 711

STAT 822 - Advanced Statistical Inference (3 Credits)
The advanced theory of statistical inference, including the general decision problem; Neyman-Pearson theory of testing hypotheses; the monotone likelihood ratio property; unbiasedness, efficiency, and other small sample properties of estimators; asymptotic properties of estimators, especially maximum likelihood estimators; and general sequential procedures.
Prerequisites: STAT 713.

STAT 823 - Large Sample Theory (3 Credits)
Modes of convergence, limit theorems, and the asymptotic properties of estimators and tests.
Prerequisites: STAT 713.

STAT 824 - Nonparametric Inference (3 Credits)
The general theory of nonparametric statistics, including order statistic theory, theory of ranks, U-statistics in nonparametric estimation and testing, linear rank statistics and their application to location and scale problems, goodness-of-fit, and other distribution-free procedures.
Prerequisites: STAT 713.

STAT 890 - Doctoral Seminar (3 Credits)
For doctoral candidates.

STAT 898 - Directed Readings and Research (1-12 Credits)

STAT 899 - Dissertation Preparation (1-12 Credits)
For doctoral candidates.

The Graduate School (GRAD)

GRAD 701 - Graduate Teaching/Instructional Assistant Development (0 Credits)
An introduction to skills and strategies for graduate teaching and instructional assistants at the University of South Carolina.

GRAD 720 - Graduate Civic Scholars Seminar I (0 Credits)
Key principles and approaches to community-engaged research and teaching, and civic scholarship.

GRAD 721 - Graduate Civic Scholars Seminar II (0 Credits)
Advanced principles, concepts, and approaches to community-engaged research and teaching, and civic scholarship. For Graduate students admitted to the Civic Scholars Program.
Prerequisites: GRAD 720.

GRAD 722 - Graduate Civic Scholars Seminar III (0 Credits)
Application of advanced principles and approaches to community-engaged research and civic scholarship. For Graduate students admitted into the Graduate Civic Scholars Program.
Prerequisites: GRAD 721.

GRAD 800 - The Graduate Student as Instructor (0-3 Credits)
Workshop in teaching skills sponsored by The Graduate School to enhance teaching experiences for graduate students who are involved in formal or informal teaching. Not for degree credit. May be repeated for up to 6 credits.

GRAD 801 - Graduate Student as Scholar (0-3 Credits)
Seminar examining scholarly growth and professional productivity. Not for degree credit.

GRAD 802 - The Graduate Student as Leader (0-3 Credits)
Seminar examining topics related to professional development. Not for degree credit.

Theatre (THEA)

THEA 500 - Selected Topics in Theatre (1 Credit)
A series of courses, each lasting one-third of a semester. Topics and Prerequisites: are announced in the class schedule for each semester.

THEA 510 - Rendering Techniques for the Theatre (3 Credits)
Rendering techniques for the communication of concepts and mood in the design process.

THEA 520 - Playwright’s Workshop (3 Credits)
Principles and practice of playwriting. Writing, adapting, and revising plays. May be repeated with consent of department chair.

THEA 522 - Drama in Education (3 Credits)
Comprehensive review of drama strategies, methods and pedagogical practices to be applied to non-drama learning contexts. Practical experience with the necessary skills, philosophies and techniques of drama in education.

THEA 526 - Children’s Theatre (3 Credits)
Special problems in producing plays for child audiences.
Prerequisites: THEA 170 and THEA 253.

THEA 527 - Applied Theatre Arts (3 Credits)
Principles and practices of theatre-making within community contexts to address local issues and to provide aesthetic strategies for creative problem solving through theatre.

THEA 529 - Theatre Management (3 Credits)
Problems involved in organizing, administering, and promoting the non-professional theatre.

THEA 530 - Period Styles for Wig and Hair Design (3 Credits)
Research and execution of period styles for wigs, hair, and facial pieces as related to theatrical and media design.
Prerequisites: THEA 230 and THEA 550.
THEA 531 - Theatre Graphics (3 Credits)
Specialized graphic techniques used in the preparation of a theatrical production. Practice in the execution and interpretation of working drawings, perspective sketches, color renderings, scale models, etc.

THEA 540 - Voice and Movement: Practice and Performance (3 Credits)
A variety of vocal and movement techniques that apply to acting and coaching with special emphasis on the physical and vocal processes in performance.

THEA 547 - Global/Contextual Issues in Theatre Education Practice and Performance (3 Credits)
Survey and analysis of current drama teacher practice across international contexts in relationship to global, social and educational change.

THEA 550 - History of Costume (3 Credits)
A survey of clothing through the ages with emphasis on the dress of the actor in significant periods of theatrical activity. From ancient times to present day.

THEA 552 - Stage Costume Pattern Drafting and Drawing (3 Credits)
The principles of pattern making for costume construction using flat-pattern and draping techniques.

THEA 553 - Advanced Stagecraft (3 Credits)
Advanced principles and practices of stagecraft.
Prerequisites: THEA 253 or equivalent.

THEA 554 - Performing Arts Safety (3 Credits)
Study of health and safety hazards for actors, technicians, and audience members.

THEA 555 - Scene Painting for the Stage (3 Credits)
Techniques of scene painting. Application of principles of painting to the stage.

THEA 556 - Stage Design (3 Credits)
Survey of the history and principles of scene design. Assignments will involve drawings, watercolor sketches, and scale models.

THEA 557 - Advanced Scenic Design (3 Credits)
Advanced procedures and techniques of scenic design.
Prerequisites: THEA 556.

THEA 558 - Draping for the Modern Silhouette (3 Credits)
Apparel design through basic draping techniques on industry standard dress forms. Analysis of fit and design, problem solving and interaction of fabric characteristics with style features.
Prerequisites: B or better in THEA 551.

THEA 559 - Introductory Methods for K-12 Theatre Certification (3 Credits)
Developmental approaches to drama instruction in K-12 classroom settings.

THEA 561 - History of the Theatre I (3 Credits)
A survey of plays, playwrights, actors, production, and the physical development of theatres from the time of the Greeks to 1660; reading of representative plays required.

THEA 562 - History of the Theatre II (3 Credits)
A survey of plays, playwrights, actors, production, and the physical development of theatres from 1660 to the present; reading of representative plays required.

THEA 563 - History of Modern Theatre (3 Credits)
History of Western Theatre since the early 20th century. Students will be introduced to major figures, plays, and movements and explore influences from the broader culture on theatrical expression.

THEA 565 - African American Theatre (3 Credits)
The major movements, figures, plays, and critical strategies that have marked the development of African American theatre in the 19th, 20th, and 21st centuries.

Cross-listed course: AFAM 565, ENGL 565
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

THEA 567 - Dramatic Theory I (3 Credits)
A survey of the major works of dramatic theory and criticism, with emphasis on theories of theatrical performance. From Aristotle through 18th-century neo-classicism.

THEA 568 - Dramatic Theory II (3 Credits)
A survey of the major works of dramatic theory and criticism, with emphasis on theories of theatrical performance from the 18th century to the present.

THEA 569 - Dramaturgy (3 Credits)
A study of dramatic structure as it relates to theatrical production. Emphasis on script reading and analysis. Production and new-works dramaturgy will be covered.

THEA 570 - Advanced Acting I (3 Credits)
Theory and practice in the development of a role and an understanding of the psychology of the audience-actor relationship.
Prerequisites: B or better in THEA 240 and THEA 372 and THEA 370.

THEA 571 - Advanced Acting II (3 Credits)
Technique of performing play scripts with heightened language and styles other than naturalism/realism. Some examples of genres that may be taught are Classical Greek, Elizabethan, absurdist.
Prerequisites: B or better in THEA 240 and THEA 372 and THEA 370.

THEA 572 - Advanced Makeup for Theatre and Film (3 Credits)
Makeup design for specific character types, prosthetics and three-dimensional makeup effects. Special attention to the process of sculpting and modeling for makeup prosthetics.
Prerequisites: THEA 230.

THEA 575 - Rehearsal and Performance (3 Credits)
An intensive laboratory course in theatrical and media performances.

THEA 576 - Rehearsal and Performance (3 Credits)
An intensive laboratory course in repertory theatre.

THEA 577 - Special Topics in Physical Theatre (3 Credits)
Research and performance training in selected topics related to physical theatre. Course content varies and will be announced in the schedule of classes by title. May be repeated as topics vary.

THEA 578 - Play Direction I (3 Credits)
A study of the principles, procedures and practice of stage direction, with the selection, analysis, casting, and rehearsal of a one-act play to be presented in the laboratory theatre.
Prerequisites: THEA 270, THEA 280, and 6 hours from 300 level or above.

THEA 579 - Play Direction II (3 Credits)
A continuation of THEA 578.
Prerequisites: THEA 578.
THEA 581 - Film as Performance (3 Credits)
Study and analysis of film production, performance, and aesthetics.

THEA 582 - Costume Design (3 Credits)
Theory and practice in the design of theatre costumes.

THEA 583 - Advanced Practice in Sound Design (3 Credits)
Advanced study in sound, production and design. Emphasis will be on mounting designs and refining design skills for Theatre, Music, and Media Arts students.

THEA 585 - Design for Communications Media Production (3 Credits)
The study and application of techniques in theatrical stagecraft, design, lighting, costing, and makeup applicable to specialized fields of communication media.
Prerequisites: THEA 253, THEA 351.

THEA 586 - The Articulate Body (3 Credits)
Theoretical and experimental exploration of the major body systems and developmental movements to bring more articulation to the body and more awareness and physical ease in performance.
Cross-listed course: DANC 586

THEA 587 - Film and Television Acting (3 Credits)
Theory and practice of film and television acting.
Prerequisites: THEA 170.

THEA 588 - Stage Light Design I (3 Credits)
The interrelationship of stage lighting and other production elements. Design techniques, equipment, and script analysis. Laboratory work on department productions. Restricted to theatre majors or those having special permission of instructor.

THEA 589 - Adv. Stage Lighting Des. II (3 Credits)
Stage lighting equipment and design techniques. Laboratory work on departmental productions.

THEA 599 - Special Topics in Theatre (3 Credits)
Reading and research on selected topics. Course content varies and will be announced in the schedule of classes by title. May be repeated once as topics vary.

THEA 701 - Research Methodology (1 Credit)
Introduction to research methods, sources, and practices for graduate work in theatre and theatre studies. Concentration on preparing for paper writing and thesis production.

THEA 710 - Graduate Design Studio (3 Credits)
The collaborative process between directors and theatrical designers.

THEA 720 - Dramatic Literature for Youth (3 Credits)
This course is designed to expand pre-service theatre teachers' exposure to the canon of plays written for young audiences and actors. Students will gain insight into issues surrounding creating plays for young audiences.

THEA 721 - M.F.A. Practicum, Technical Direction (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721A - M.F.A. Practicum, Technical Direction (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721B - M.F.A. Practicum, Management (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721C - M.F.A. Practicum, Costuming (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721D - M.F.A. Practicum, Lighting (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721E - M.F.A. Practicum, Acting (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721F - M.F.A. Practicum, Scenery and Properties (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 721G - M.F.A. Practicum, Directing (1-6 Credits)
A studio workshop for advanced study of theatre arts and crafts.
Prerequisites: admission into MFA program.

THEA 730 - Stage Management (3 Credits)
The aim of this course is to train graduate students in the requirements of stage management production meetings, assisting the director, and running the show. Professional, community, and academic theatre will be covered.

THEA 731 - Technical Drawing for the Theatre (3 Credits)
Advanced training in the technique and practice of technical drawing for the theatre.

THEA 741 - Advanced Voice Lab (1-3 Credits)
Advanced training in vocal skills needed by actors. (A) Techniques of Berry and Linklater, (B) Technique of Skinner. May be repeated for a total of 15 hours.

THEA 741A - Advanced Voice Lab (1-3 Credits)
Advanced training in vocal skills needed by actors. Techniques of Berry and Linklater. Note: May be repeated for a total of 15 hours.

THEA 741B - Advanced Voice Lab (1-6 Credits)
Advanced training in vocal skills needed by actors. (A) Techniques of Berry and Linklater, (B) Technique of Skinner. Note: May be repeated for a total of 15 hours.

THEA 752 - Advanced Costume Construction (3 Credits)
Advanced procedures and techniques of drafting, draping, pattern making, and wig making. Fabrics, their selection and modification for stage use.

THEA 754 - Theatrical Rigging and Mechanics (3 Credits)
Traditional and modern techniques for solving problems from actual theatrical productions.
Prerequisites: THEA 553.

THEA 755 - Advanced Scene Painting for the Stage (3 Credits)
Advanced techniques in scene painting. Application of principles of painting to the stage.

THEA 756 - Advanced Costume Design (3 Credits)
Advanced procedures and techniques of costume design: includes color theory, fabric potentiality, theatrical use of line, mass, and color.

THEA 757 - Problems in Theatre Practice I (3 Credits)
Analysis of selected problems in theatrical design, technical execution, or performance techniques. May be repeated once for credit.

THEA 758 - Problems in Theatre Practice II (3 Credits)
Analysis of selected problems in theatrical design, technical execution, or performance techniques. May be repeated once for credit.
THEA 759 - Design Motifs (3 Credits)
Practical and research projects on identification, isolation, and selection of historic motifs for theatrical purposes.

THEA 760 - Graduate Text Analysis (3 Credits)
Analytical skills, a shared vocabulary, and techniques for interpreting the dramatic text for the purposes of staging and performance. For theatrical collaborators.

THEA 761 - Studies in Theatre History (3 Credits)
May be repeated as topics vary for a total of 12 hours.

THEA 765 - Staging in the Non-Traditional Theatre (3 Credits)

THEA 770 - Problems in Acting, Rehearsal, and Performance (3 Credits)

THEA 771 - Problems in Acting, Rehearsal, and Performance (3 Credits)

THEA 773 - Performing in Period Plays I (3 Credits)
A synthesis of literary, critical, historical, and acting problems of selected period pieces with public performance providing the laboratory for testing alternative solutions. Registration by audition only.

THEA 774 - Performing in Period Plays II (3 Credits)
A synthesis of literary, critical, historical, and acting problems of selected period pieces with public performance providing the laboratory for testing alternative solutions. Registration by audition only.

THEA 775 - Advanced Methods in Drama Education (3 Credits)
Focus on dispositions and experiences applicable to developing comprehensive theatre arts programs in K-12 schools.

Prerequisites: THEA 559.

THEA 777 - Advanced Movement and Dance (1-3 Credits)
Advanced training in movement skills needed by actors. May be repeated for a total of 15 hours.

THEA 778 - Directoral Workshop I (3 Credits)
Principles and practice of directing for the stage. The advanced study of the director's role in patterning the auditory stimuli for arena and proscenium theatres.

THEA 779 - Directoral Workshop II (3 Credits)
A continuation of THEA 778.

Prerequisites: THEA 778.

THEA 782 - Professional Costume Design Practices I (3 Credits)
Rendering techniques, script study, color, and textile applications, prepared for presentation.

THEA 783 - Professional Costume Design Practices II (3 Credits)
Complex design projects, advanced rendering techniques, and translation to stage.

THEA 784 - Teaching Internship in Theatre I (3 Credits)
A practical teaching experience in K-12 theatre classrooms consisting of a minimum of seven and a half to ten hours per week.

THEA 785 - Teaching Internship in Theatre B (9 Credits)
Practical experiences in observing, teaching lessons, and applying theory and student-centered approaches in order to implement K-12 theatre classroom strategies.

Prerequisites: THEA 784 and Acceptance to the Professional Program in Education and Internship as MAT Student.

THEA 786 - Professional Scene Design Practices I (3 Credits)
Production-related scene design problems and projects.

Prerequisites: THEA 557.

THEA 787 - Professional Scene Design Practices II (3 Credits)
Responsibilities of the professional scene designer; analysis of problems and preparation of projects.

Prerequisites: THEA 786.

THEA 788 - Professional Stage Lighting Practices I (3 Credits)
Large scale projects, such as musical theatre, ballet and multi-set plays, prepared with appropriate professional techniques for presentation and critique.

Prerequisites: THEA 589 or equivalent.

THEA 789 - Professional Stage Lighting Practices II (3 Credits)
Continuation of THEA 788, to include complex stage lighting problems as well as projects involving related lighting fields.

Prerequisites: THEA 788 or equivalent.

THEA 790 - Professional Theatre Internship (3-9 Credits)

THEA 796 - Special Projects (1-3 Credits)

THEA 797 - Special Projects (1-3 Credits)

THEA 799 - Thesis Preparation (1-9 Credits)

Women & Gender Studies (WGST)

WGST 515 - Race, Gender, and Graphic Novels (3 Credits)
Representations of race and gender in comics with a special emphasis on the experiences of African Americans.

Cross-listed course: AFAM 515

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 525 - The Psychology of the Midlife Woman (3 Credits)
Biological, social, and psychological aspects of the midlife woman.

Cross-listed course: PSYC 525

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 535 - Ecofeminism (3 Credits)
An exploration of the connections between oppression of women and oppression of nature.

Prerequisites: 3 hours in philosophy beyond the 100 level.

Cross-listed course: PHIL 535

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 541 - Issues in Women's Health (3 Credits)
An exploration of women's health and health care concerns from multiple perspectives.

Cross-listed course: NURS 541

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 554 - Women and Crime (3 Credits)
Impact of gender-based relations on crime and the criminal justice system.

Cross-listed course: CRJU 554

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences
WGST 555 - Language and Gender (3 Credits)
Approaches to gender and language emphasizing the social grounding of both; how language reflects sociocultural values and is a tool for constructing different types of social organization.
Cross-listed course: ANTH 555, LING 541
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 598 - Special Topics in Women’s & Gender Studies (3 Credits)
Course content varies and will be announced in the schedule of courses by title. May be repeated as content varies by title.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 621 - Maternal and Child Health (3 Credits)
Public health issues, social and behavioral science, policies, programs, and services related to maternal and child health in the United States and other countries.
Cross-listed course: HPEB 621
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 701 - Feminist Theories and Epistemologies (3 Credits)
Examination of feminist theories and epistemologies from diverse disciplines and intellectual movements, providing an overview of historical developments in feminist discourse. Emphasis on debates surrounding such concepts as gender, identity, difference, power, and embodiment.

WGST 704 - Political Theory and Feminism (3 Credits)
How contemporary feminist theory has responded to and reformed traditional theories about the role and nature of women.
Cross-listed course: POLI 704

WGST 705 - Race, Class, Gender and Sexuality (3 Credits)
Historical and contemporary dimensions of social inequality centered in race, social class, gender, and sexuality.

WGST 706 - Engendering Global Capitalism (3 Credits)
The origins of global capitalism, the nature of money and debt, the roles of gender, race and class in social formations, and the relationship between production and reproduction.
Cross-listed course: ANTH 706

WGST 708 - Women in American Politics (3 Credits)
Impact of gender in American politics; elections, representation, rights, social movements, legal institutions, and public policy. Explores class, race, and sexuality issues within gender.
Cross-listed course: POLI 708

WGST 709 - Women Explorers and Travelers (3 Credits)
Examines in geographical and historical contexts the activities of various women travelers and explorers.
Cross-listed course: GEOG 709

WGST 714 - Nutrition in Women's Health (3 Credits)
An examination of the particular nutritional needs of women through the life cycle with emphasis on disease prevention and how nutrition is related to a woman's health and wellness. 03: 07/05/2019.

WGST 716 - Women's Studies Workshop (1 Credit)
Selected topics in women's studies that are grounded in community concerns with an emphasis on individual action-research. May be repeated for a total of 2 hours credit.

WGST 736 - Women, Work and Health: Global Perspectives (3 Credits)
Intersections of women’s work and women’s health in diverse social, cultural, economic, geographic, and political contexts.

WGST 737 - Topics in British Women Writers (3 Credits)
Selected topics related to works by British women authors from various periods, regions, or genres. May be repeated for credit as topics vary. 03: 07/05/2019.

WGST 738 - Topics in American Women Writers (3 Credits)
Selected topics related to works by American women authors from various periods, regions, or genres. May be repeated for credit as topics vary. 03: 07/05/2019.

WGST 750 - Psychology of Women (3 Credits)
Women's diversity explored through research on personality, stereotypes, status and power, biological aspects, socialization, sexuality, relationships, mothering, work and achievement, violence against women, psychological disorders, and feminist therapies. 03: 07/05/2019.
Cross-listed course: PSYC 750

WGST 757 - African American Women in Nineteenth and Twentieth Centuries (3 Credits)
This course will acquaint students with some of the secondary literature in African American women's history from the late nineteenth century through the twentieth century. The course examines the impact of race, gender, and class on the lives of black women and explores the historical relationship between African American women, work, family, community, and politics.
Cross-listed course: HIST 757

WGST 764 - History of American Women (3 Credits)
Selected research topics on the cultural, social, economic, and political roles and contributions of American women.
Cross-listed course: HIST 764

WGST 767 - Feminist Perspective in Social Work Practice (3 Credits)
Examines the application of feminist theories, concepts, and principles to social work practice. Assesses women's experiences in society and the impact of social, political, and economic structures. Investigates feminist interventions pertaining to individuals, families, organizations, communities, and the larger social environment. 03: 07/05/2019.

WGST 772 - Gender and Culture (3 Credits)
Different cultures' ideas about gender and use of gender to organize social groups in a wide range of societies, including American subcultures.
Cross-listed course: ANTH 772

WGST 790 - Directed Reading and Research (1-3 Credits)
Directed research and reading in subjects to be individually assigned.

WGST 796 - Special Topics in Women’s Studies (3 Credits)
A special topic focusing on an area within women’s studies not usually covered in other graduate courses in women’s studies.

WGST 797 - Seminar in Women’s Studies (3 Credits)
A capstone seminar applying women’s studies theories and methodologies to professional or discipline-based research projects. Prerequisites: WGST 701 and WGST 702.

Policies and Regulations

Here you will find helpful information concerning graduate admissions and academic regulations for the University of South Carolina System.
Graduate Academic Regulations

All graduate students are subject to the academic policies, regulations, and academic standards of both The Graduate School and the department, school and/or college in which enrolled. Graduate programs may have more stringent standards and additional regulations and requirements than that of The Graduate School. Program academic policies, regulations, and standards are available from the graduate director of the program. Contact information for academic programs is available on the website of The Graduate School.

It is the responsibility of all students to be aware of USC academic standards and their own academic record. At the very least, students should check their Record of Academic Work in Self Service Carolina (https://ssb.onecarolina.sc.edu/BANP/twbkbwis.P_GenMenu/?name=homepage) at the conclusion of each semester. The academic record will list any academic or registration issues or probationary status that requires attention by the student.

Graduate students are bound by the academic policies, regulations, standards, and degree requirements found in the Graduate Studies Bulletin (p. 771) in effect at the term of enrollment. With approval of the academic program in which enrolled and the dean of The Graduate School, a student may elect during the course of a program of study to change to standards, regulations, and requirements found in a subsequent Graduate Studies Bulletin. However, the student may not pick and choose from different Bulletins, but must select one Graduate Studies Bulletin during the period of the student's graduate enrollment and conform to all policies, regulations, and degree requirements of the selected Bulletin.

Graduate students in Master's, specialist, and certificate programs have a period of six years, inclusive and continuous, in which to claim the rights of a specific Graduate Studies Bulletin. Doctoral students have a period of 10 years. Any student whose admission lapses for three years loses the right to claim a previous Bulletin and becomes bound to the Bulletin in force when readmitted.

Students are advised that there are no guarantees that a particular course or program of study can be delivered by the University at a time convenient for every student. Unforeseen circumstances may interfere with the scheduling of any given course or degree offering. Students must be prepared for such occurrences even if students experience delays in fulfilling academic goals or require modification of those goals. Academic units and The Graduate School will work closely with students to resolve academic issues.

Note: For detailed information on Degree Requirements (p. 773) see that section of the Graduate Studies Bulletin which is arranged by certificate or specialist degree requirements, Master's degree requirements, and doctoral degree requirements.

Academic Personnel Policies

Graduate Faculty

Faculty members holding the Ph.D. or other terminal degree in a discipline are, upon appointment to a tenure-track position at the University of South Carolina, Columbia campus, eligible to become members of the Graduate Faculty. Specifically, The Faculty Manual (http://www.sc.edu/policies/facman/#current) defines those eligible to be regular members of the graduate faculty on the Columbia campus as the president; provost; dean of The Graduate School; associate deans of The Graduate School; and chairs of academic departments offering degrees conferred by The Graduate School.

Nominations of eligible faculty for such appointments are made by the appropriate academic unit (college, school, or department) to the dean of The Graduate School. Each academic unit must have on file with The Graduate School the process and criteria (http://gradschool.sc.edu/forms/G-TAN.term.appointment.nomination.GS58.pdf) used by the unit to nominate and review faculty for appointment as regular Graduate Faculty. Academic units will notify the dean of The Graduate School when nominations to regular Graduate Faculty status are reviewed and either retained or revoked by the academic unit.

Faculty members and scholars not otherwise eligible for regular membership on the graduate faculty may be appointed to term appointments. Term appointments are appropriate for USC faculty in the School of Law and the School of Medicine, emeriti USC professors, clinical faculty, research professors, faculty members at other institutions (including other campuses of the USC system), and others holding an appropriate terminal degree or other credentials. With the approval of the dean of The Graduate School, persons with term appointments to the graduate faculty may serve on, but may not chair, doctoral committees. Nominations to term appoint as graduate faculty are nominated by the chair and dean of the academic unit to the dean of The Graduate School using the Graduate Faculty Term Appointment Form (G-TAN (http://gradschool.sc.edu/forms/G-TAN.term.appointment.nomination.GS58.pdf)). The Graduate School maintains a database (http://gradschool.sc.edu/facstaff/gfd.asp?page=gf&sub=gfd) of persons with term appointment to graduate faculty status.

Teaching and Committee Personnel

All faculty teaching graduate level course work, courses numbered 500 - 899, must be either a regular member of the Graduate Faculty or must hold a term appointment as graduate faculty. Accreditation standards state that faculty teaching graduate courses have earned the terminal degree in the field. Occasionally, a person having extensive and/or specific career experience may, with written justification from the program, be approved by the dean of The Graduate School to teach graduate courses.

Membership on doctoral committees (see Doctoral Degree Requirements), excluding the outside member, is limited to regular members of the Graduate Faculty and those who hold special term appointments with approval to serve as a regular member of a doctoral committee. Only a regular member of the Graduate Faculty may serve as chair of a doctoral committee. Service as an outside member of a doctoral committee requires only the approval of the dean of The Graduate School, not a term appointment as graduate faculty.

Membership on a thesis committee (see Master's Degree Requirements (p. 781)) is composed of regular graduate faculty of any rank who hold the doctorate or the discipline's terminal degree and tenured faculty at the rank of full professor who do not hold the terminal degree. Research, clinical, and adjunct faculty at any rank who hold the terminal degree may serve on and chair a thesis committee with approval of the program and the dean of The Graduate School. Instructors and lecturers who do not hold the terminal degree may serve as members of thesis committees with justification from the program and approval of the dean of The Graduate School.
Advisor

Every graduate student admitted to a degree program is entitled to an advisor. The academic program graduate director is the default academic advisor for graduate students until another academic advisor is assigned or an advisory committee is formed. Students are urged to consult with an advisor prior to enrollment.

Graduate Assistant

A graduate assistant (GA) is a student enrolled in The Graduate School and a special category part-time employee of the University paid by the University’s Payroll Department. Graduate assistants may serve as teaching assistants (GTA or ITA), research assistants (RA), or perform administrative duties (GA). In addition to receiving a stipend, non-South Carolina residents who are graduate assistants are assessed the in-state rate for tuition purposes. Graduate assistants are expected to devote full-time effort to their studies and assistantship responsibilities and are discouraged from having additional employment on or off campus. For the complete text of USC Policy on Graduate Assistants, see academic policy ACAF 4.00 (http://www.sc.edu/policies/ppm/acaf400.pdf).

To be eligible for employment as a graduate assistant, a graduate student must:

1. be enrolled in a degree program and in good standing; and
2. be registered for at least six graduate credits during a major semester.

Programs are encouraged to provide competitive GA stipends and tuition remission to attract the most highly qualified graduate students. The maximum stipend amount cannot exceed the amount paid to a first-year postdoctoral fellow in the academic unit. The minimum stipend is $1,200 for fall or spring semester for not more than 10 hours per week, and $600 per summer session for not more than 10 hours per week. Appointments for more hours per week should provide proportionately higher stipend.

Graduate assistants may not work more than 20 hours per week. Rare exceptions to the maximum 20 hour per week work limit may be granted by the dean of The Graduate School when justification from the student’s academic program demonstrates the student will derive direct academic benefit from the additional time. Exceptions will not be granted for any reason other than academic benefit.

Graduate Assistants must enroll in 6 to 12 credit hours in the Fall and Spring terms and 1 to 6 hours in the summer terms. Enrollment load exceptions must be approved by The Graduate School.

Accreditation standards require the University to monitor the quality of instruction provided by graduate assistants hired as teaching assistants (ITA or GTA). In order to perform teaching duties, a graduate assistant (GTA) must attend the University-sponsored teaching skills workshop (TA Training) offered by The Graduate School before the start of the Fall term prior to beginning teaching duties. Students need only attend the workshop once and will be placed in the trained ITA database (http://gradschool.sc.edu/TATRAIN/tatrained.asp) when all requirements have been met.

The South Carolina Legislature (http://www.scstatehouse.gov/COde/t59c103.htm) mandates that all instructors at the University have adequate proficiency in English. International graduate students for whom English is not the primary language can be appointed as teaching assistants only if oral proficiency in English has been evaluated as satisfactory by the faculty of the English Programs for Internationals (http://www.epi.sc.edu/) (EPI). Mandatory for all international students appointed as graduate teaching assistants, the evaluation workshop is held prior to the start of each Fall term, three days before the teaching skills workshop (TA Training) offered by The Graduate School that all prospective GTAs and ITAs must complete. Students who demonstrate sufficient English proficiency and complete all other requirements, including the TA Training workshop, will be placed in the GTA/ITA database (http://gradschool.sc.edu/facstaff/trained.asp?page=ta).

Academic Credit and Course Policies

The credit value of each course is usually equal to the number of hours the class meets each week in a major term (fall or spring). Courses are required to have 700 minutes of instructional contact time for each course credit hour.

Courses numbered 700-899 are restricted to graduate students; courses numbered 500-699 are open to upper-level undergraduate and graduate students. Graduate students registered for courses numbered 500-699 must complete graduate level course work and will receive graduate credit. The course syllabus for 500-699 courses must differentiate the workload and rigor of assessment for graduate students and undergraduates.

From time to time graduate students may need to enroll in undergraduate courses. The courses will be posted at the undergraduate level on the USC transcript in the manner that the student registered for the course (credit, audit, pass-fail, etc.) and used in enrollment verification calculations.

Graduate students may not enroll for undergraduate credit in courses numbered 500-699 without the permission of their academic advisor and the dean of The Graduate School.

Distance Education Courses

Many academic programs offer courses and degree programs via distance education using multiple delivery methods, both in synchronous and asynchronous modes. Courses are offered during fall, spring, and summer terms. All courses delivered through distance education are approved by the appropriate academic authority as suitable for distance delivery, are subject to the same academic policies and regulations, and meet the same University standards of rigor, prerequisites, sequence, etc., that are required in residence course work. Students should consult with the individual academic programs for courses and degrees offered via distance education.

Course Syllabus

The course syllabus is a summary for a specific course which includes an outline of the content to be covered, the assignments and how the student’s work will be assessed, and the materials needed for it. Graduate course syllabi are required to contain the title and description of the course, course objectives stated as student learning outcomes,
recommended and/or required texts or readings, the instructional
delivery strategy, the grading scheme to include weights and scale,
course requirements/assignments/exams, a topical outline of content
to be covered, and an attendance policy. It is also recommended that
a disability accommodation statement be included. The instructor is
responsible for ensuring that the course syllabus contains all elements
required by The Graduate School. Students should receive the syllabus
prior to or at the first class session.

Note: For 500-600 level courses adequate differentiation between the
workload and rigor of assessment for graduate and undergraduate
students must be explicitly stated in the syllabus. The instructor
is responsible for ensuring that all graduate students meet the
requirements for graduate credit.

Attendance
Students are expected to complete all assigned work, to attend all class
meetings, and to participate in class. Instructors should notify students,
specifically in the course syllabus, of the attendance policy for the course
by the first day of class. Students with special attendance requests (such
as observation of major religious holidays or participation in University or
professional events) should meet with the instructor early in the term to make
arrangements.

Students who are auditing a graduate course are expected to conform to the
same attendance requirements as students registered for credit, but must attend at least 75 percent of scheduled class meetings to receive audit credit.

A graduate student registered for courses numbered 500-699, or for any undergraduate course for credit, is required to satisfy undergraduate attendance regulations and conform to the "10 percent rule." The Undergraduate Attendance Policy (p. 756) states that absence from more than 10 percent of the scheduled class sessions, whether excused or unexcused, is excessive and the instructor may choose to exact a grade penalty for such absences.

Prerequisites
Course prerequisites are listed to inform students about the academic
background required for satisfactory course completion. The instructor
may approve the enrollment of students who have acquired the
equivalent knowledge or skills through other courses or experiences.
Special permission from the instructor to enroll should be requested prior to registration. Students without the required prerequisites who do not receive prior permission of the instructor to enroll may be dropped from the course and become subject to any applicable financial penalties.

Course Enrollment Load
Special Enrollment (Z-status)
The dean of The Graduate School, under certain circumstances, may
certify that a student’s full-time enrollment is less than the normal
requirement of 9 hours for graduate students or 6 hours for students
serving as graduate assistants. This is known as Z-Status. Students seeking an exception to minimum enrollment requirements (Z-Status) should submit a written request to the dean of The Graduate School with acceptable justification from the student’s academic advisor or the graduate director of the academic program. International students must also submit the approved Exemption from Full-time Enrollment (http://iss.sc.edu/?option=com_docman&task=doc_view&gid=550&Itemid=) form from International Programs for Students.

For a student whose need for under-enrollment results from an internship,
practicum, or field experience required by the graduate program,
a justification indicating the term requested and the nature of the
experience should be submitted in a written memo to the dean of The Graduate School by the student’s academic advisor or the program’s
graduate director.

Students nearing completion of a doctoral or Master’s degree requiring a dissertation or thesis may be granted special enrollment status and certified as half-time or full-time if the student has completed course work required for the degree except thesis (799) or dissertation preparation (899).

Eligibility requires verification of three conditions by the student’s
academic advisor or program graduate director. The memo requesting Z-
status must indicate that:

1. all course work on the program of study has been completed except
   for thesis (799) or dissertation preparation (899);
2. the student is working on the dissertation or thesis full-time, or if applicable, at least half-time; and
3. the student is not employed outside their graduate assistantship or,
   if applicable, employed no more than half-time if not on a graduate assistantship.

A Z-status request for under-enrollment privilege must be term-specific
and is limited to two terms. Z-status for under-enrollment privilege may be extended beyond two terms with the approval of and justification from the academic unit and with the approval of the dean of The Graduate School.

Students who request exemption from full-time enrollment for financial aid purposes must submit the Special Academic Enrollment Release form (F 6.2) from the Office of Financial Aid (http://www.sc.edu/financialaid/).

Family Leave (Z-Status)
A graduate student who is the primary child-care provider is eligible to
take a one major term of family leave from graduate study the major
term during or following the event for the birth of a child or adoption
of a child less than 6 years old. The graduate student taking family
leave will receive a one year extension of all academic responsibilities,
including time to degree, removal of incomplete grades, and course in-
date time. During family leave the graduate student will be on special
enrollment (Z-status) status and must have health coverage. The student
may waive out of University-sponsored health insurance if covered by
other insurance or may elect to continue enrollment in the University-
sponsored student health insurance plan. The student is responsible for
submitting required waivers and/or for contacting the student health
insurance contactor directly to enroll in the health insurance program
and for paying premiums by the deadline. Students should be aware that
a graduate assistantship position or other financial support may not be
available upon return from family leave.

Note: While this policy does not mandate that programs continue
financial support during family leave and/or guarantee student support
or resumption of an assistantship after returning from family leave,
programs are strongly encouraged to do so whenever possible.

Students contemplating family leave must advise their academic
unit of the intention to take family leave and begin the family leave
planning process at least six (6) weeks before the leave start date. Once
planning has been completed at the unit level, a written petition for family
leave with required supporting documentation and signatures must
be submitted as a single packet to the dean of The Graduate School for approval at least three (3) weeks before the start of the leave. The petition must contain evidence of consultation and planning with the student’s academic advisor(s) and a memo of support from the academic unit signed by the program’s graduate director, a leave timeline, and appropriate documentation. Appropriate documentation for a female student for childbirth includes written certification from the student’s health care provider confirming the pregnancy and anticipated due date or the baby’s birth certificate and for a male student either certification confirming the anticipated due date or the baby’s birth certificate. For adoption of a child less than 6 years old, a written certification of adoption from a certifying individual or agency specifying the date of adoption and the age of the child is the appropriate documentation.

This planning process with the academic unit should also be used to determine if any additional length of time beyond the one year extension of academic responsibilities period will be needed for the student opting for family leave to complete degree requirements. While a one year extension of academic responsibilities will be granted to any student on approved family leave, academic units often have specific timelines for exams, fieldwork, course sequences, etc., which may necessitate extension beyond the one year period. Graduate students with such circumstances may petition The Graduate School for extension of leave time. Academic unit requirements or limitations are a valid justification to petition for the extension. Petitions for extension of time beyond the one year family leave should be supported by the student’s academic unit and will be reviewed by The Graduate School on an individual basis.

Note: Medical complications or other extenuating circumstances are not included in this policy. Such situations are more appropriately covered by the University’s current policies regarding course incompletes and withdrawal and/or leave of absence due to extenuating circumstances.

The family leave policy is also intended to allow an international student to be coded as a “special enrollment” student and not affect current visa status. However, immigration regulations might dictate a different definition of enrollment than that defined as “special enrollment” for this policy. The Office of International Student Services is the authority on campus for interpreting current enrollment regulations for international students, so international students contemplating family leave must consult the Office of International Student Services to address proactively any individual or unique visa issues and/or to consider how the latest applicable regulations would affect eligibility for family leave. International students applying for family leave must discuss the intended leave period with the Office of International Student Services at the beginning of the six (6) week planning period and must include a signed memo from the Office of International Student Services detailing immigration status and any consequences of taking family leave in the written petition packet submitted to the student’s program graduate director for signature and to the dean of The Graduate School for approval.

Once the family leave has been approved, a memo will be placed by The Graduate School in the student’s academic file indicating the leave dates and the extension date for academic responsibilities. It is the student’s responsibility to communicate with their academic unit while on leave. It is also the student’s responsibility to work with faculty and program administrators on arrangements for course completion, achievement of degree requirements, and for continuation of research and/or teaching activities before and following the period of the leave.

Enrollment in Courses Outside Major
Students wishing to enroll in courses outside the area to which they have been admitted should do so only with the permission of their academic advisor and should consult the department offering the course regarding eligibility and prerequisites. An individual who has been declined admission or had their admission cancelled to a program may not continue to enroll in or audit courses in that area without special permission of that program even if the student has subsequently been admitted to another program. Programs have the right to limit enrollment in program courses to students in the program and/or to decline admission to program coursework to a student that has registration eligibility through another program. Issues related to course enrollment or registration eligibility may be referred to the dean of The Graduate School.

Enrollment in Courses for Audit
A student must be eligible to register as a graduate student and go through the regular registration process to be eligible to audit a graduate-level course. Some departments do not permit auditing at the graduate level, and if space in the class is limited, degree-seeking students always are given priority over students who are auditing. Students wishing to audit graduate courses are advised to obtain permission from the appropriate department chair or graduate director. No record of audit shall appear on a transcript unless a student attends 75 percent of the classes. A course taken for audit cannot be used on a program of study to satisfy degree requirements unless it has been retaken for credit.

Students who have registered for a course on an audit basis and who wish to change their registration to take the course for credit (or who wish to change from credit to audit) must do so no later than the last day to change course schedule or drop without a grade of W being recorded, as published in the Academic Calendar (http://Registrar.sc.edu/html/calendar/5YrCalendar3.stm).

Note: No credit may be earned for an audited course by examination.

Independent Study
The purpose of an independent study is to allow the student to pursue an area of academic interest not adequately covered by the regular course structure. Therefore, an independent study course cannot be used to fulfill a core requirement.

Prior to enrolling in a graduate independent study course, a student must complete a graduate Independent Study Contract form (G-ISC (http://gradschool.sc.edu/docLibrary/documents/G-ISC.independent.study.contract.GS50.pdf)). The approval of the instructor, advisor, and the graduate director of the program is required. Students send an approved copy of the G-ISC to the Office of the University Registrar before registering for the course.

Note: Not more than 6 hours of independent study may be used on a Master’s program of study and no more than 9 hours of independent study may be used on a doctoral program of study.

Transfer of Course Credit
Course work not part of a completed certificate program or graduate degree from USC or another institution may be transferred for credit toward a Certificate of Graduate Study, a master’s or doctoral degree. Course work transferred from another institution must be relevant to the program and have course content and a level of instruction equivalent to that offered by the University’s own graduate programs. Approval for
acceptance of transfer credit to a student’s program of study must be approved and justified by the student’s academic program and submitted to the dean of the Graduate School for final approval on the Request for Transfer of Academic Credit (G-RTC (http://gradschool.sc.edu/DocLibrary/documents/G-RTC.pdf)) form.

No more than 12 semester hours of graduate credit may be transferred into a master’s program that requires 30-36 hours; no more than 15 semester hours of graduate credit may be transferred into a master’s program that requires 37-45 hours; and no more than 18 semester hours of graduate credit may be transferred into a master’s program that requires 46 or more semester hours. Only credits with grades of B or better (equivalent to a 3.0 on a 4.0 scale) may be transferred from another institution into any graduate degree program. Course work transferred for credit toward a Master’s degree, Graduate Certificate or Specialist Program must be from an accredited institution and must be no more than six years old at the time of graduation and coursework transferred into a doctoral degree program must be no more than ten years old at the time of graduation.

Revalidation of Out-of-Date Courses

Students enrolled in a doctoral program at the University of South Carolina may, with permission of the academic program, request revalidation of USC graduate courses over 10 years old for inclusion on the doctoral program of study. Each academic unit will determine whether a course is appropriate for revalidation. All instructions for revalidation (http://gradschool.sc.edu/forms/pre.pdf) must be followed and the Permit for Revalidation Examination (PRE (http://gradschool.sc.edu/forms/pre.pdf)) form must be completed and submitted to the dean of The Graduate School for approval prior to revalidation. Proof of payment of revalidation fees must be submitted with the Permit for Revalidation Examination form.

Note: Coursework taken at other institutions may not be revalidated.

Correspondence Course Credit

The University neither offers correspondence courses for graduate credit nor accepts correspondence work as applicable toward any graduate degree.

Credit by Examination

No graduate credit is offered by examination only.

Retroactive Graduate Credit

The Graduate School does not retroactively award graduate credit for graduate-level (course number 500 and above) USC courses previously taken for undergraduate, continuing education, or audit credit. The academic policy of The Graduate School also stipulates that no graduate-level USC course taken for undergraduate or continuing education credit or as an audit may be repeated for graduate credit at a later date.

Dropping a Course

A graduate student may drop a course using Self Service Carolina. Beginning with the Fall 2013 term, graduate students will visit Self Service Carolina to drop a course. Courses dropped before the drop/add date found on Academic Calendar (http://registrar.sc.edu/html/calendar/5YrCalendar3.stm) (usually within the first week of class) can be dropped without academic or financial penalty.

Courses dropped during the second through the sixth week of a regular semester (see date on the Academic Calendar) are recorded with an academic nonpenalty grade of W. After the first six weeks of the semester, any courses dropped will appear on the permanent record with a grade of WF. A WF is treated as an F in the evaluation of the student’s eligibility to continue and is computed into the student’s graduate cumulative grade point average. Graduate students who stop attending a class without officially dropping it remain on the final grade roll and must be assigned a grade by the professor of record. A grade of F is appropriate, unless a higher grade has been earned by partial submission of the required course work, and that assigned grade is included in all calculations and totals. In summer sessions and other shortened terms, the period for withdrawal with a grade of W will be 43 percent of the total number of class days (see date on the Academic Calendar (http://registrar.sc.edu/html/calendar/5YrCalendar3.stm)). A course cannot be dropped after the last day of classes specified for the session in which the course is scheduled.

Students are responsible for consulting the academic calendar for each term in which they are enrolled for the applicable dates. Students should also consult their academic advisor and graduate director for advisement before withdrawing from course work.

Dropping a Course for Extenuating Circumstances

A student who wishes to drop a course for medical reasons or other acceptable cause after the session penalty date specified on the Academic Calendar for that term (last day to receive a W), may petition for assignment of W by submitting a Request for Assignment of W for Extenuating Circumstances form (AS-122A) available from the Office of the University Registrar (http://registrar.sc.edu/html/forms/) with the appropriate documentation of circumstances, (e.g., a letter from a physician or health care provider). The petition requires the approval of the student’s graduate director, the instructor of each course, and the dean of The Graduate School. A request for partial reduction (rather than complete) withdrawal for extenuating circumstances must include evidence (i.e., a written statement from a physician, counselor, or other qualified professional; or other documentation of extenuating circumstances) that a reduction in, rather than complete withdrawal from, student course work is appropriate. Students must be aware that liability for repayment of student loans and other financial obligations may apply.

Withdrawal from All Courses

A student who wishes to withdraw from all courses should consult their academic advisor and graduate director for advisement before withdrawing from course work. The date of withdrawal affects the grades assigned (W or WF), as do valid, supported claims of extenuating circumstances (see previous section). If applicable, Form AS-122A available from the Office of the University Registrar (http://registrar.sc.edu/html/forms/) must be approved by the graduate director and a student’s instructors prior to withdrawal. Grades assigned to students who withdraw from all courses are determined in the manner described in the previous section. Students who withdraw should be aware of the ramifications of that action with respect to grades assigned, program status, liability for repayment of student loans, and financial obligations to the University.

Financial Obligations to the University

Any student withdrawing from the University within the scheduled refund period can expect to receive a refund in approximately four to
six weeks. If, at the time of withdrawal, the student has any financial obligations to the University, these amounts will be deducted from any refund due. Refunds for students who received and used financial aid to pay academic fees may be applied toward repayment of financial aid.

Students who have received long-term loans through the University must contact the Student Loan Accounting Office for an exit interview. Failure to participate in this exit interview may result in a hold being placed on transcripts.

Grading Policies

The letter grades A, B, C, D, and F are employed to designate excellent, good, fair, poor, and failing work, respectively. The grades B+, C+, and D+ also may be recorded. Courses graded D+ or lower cannot be applied to graduate degree programs. The letter grades S (satisfactory) and U (unsatisfactory) are assigned only in courses that have been approved for Pass-Fail grading or in a standard graded course where the student, with the approval of the dean of The Graduate School, has elected an individual Pass-Fail Option. Courses completed with an S may be counted in total credits earned. Grades of T (satisfactory progress) or U (unsatisfactory progress) are given for thesis (799) and dissertation (899) preparation. Grades of T in thesis (799) and dissertation (899) preparation are not computed in the cumulative graduate grade point average. Graduate-level courses completed with the grade of U are calculated as an F in the cumulative graduate grade point average. In certain circumstances, grades of I (incomplete) or NR (no record) may be assigned by the instructor.

Note: Retaking a graduate course does not delete the original grade.

The grade of I (incomplete) is assigned at the discretion of the instructor when, in the instructor’s judgment, a student is prevented from completing a portion of the assigned work in a course because of an illness, accident, verified disability, family emergency, or some other unforeseen circumstance. The student should notify the instructor without delay and request an extension of time to complete the course work, but the request for a grade of incomplete must be made to the instructor before the end of the term. The instructor will determine, according to the nature of the circumstance and the uncompleted requirements, how much additional time, up to 12 months, will be allowed for completing the work before a permanent grade is assigned. The justification for the incomplete grade, conditions for make-up, a deadline for completion, and a back-up grade if the course work is not completed by the deadline must be included on the form. Re-enrolling in a course will not make up an incomplete grade. A grade of I is not computed in the calculation of a student’s cumulative grade point average until the make-up grade is posted.

There is no automatic time period for completion of the work for which a grade of incomplete is given. The instructor should give the student a reasonable deadline, up to one year after the scheduled end of the course, to complete the work. After 12 months an I (incomplete) grade that has not been replaced with a letter grade is changed permanently to a grade of F or to the backup grade indicated by the faculty member on the Assignment of Incomplete Grade form. In the rare instance the instructor believes there is justification for an extension beyond the 12 month limit, a request for extension of incomplete time should be submitted to the dean of The Graduate School before the expiration of the 12 month period on the Extension of Incomplete Time Period Authorization (GS-47 (http://gradschool.sc.edu/forms/eia.pdf)) form for approval. The Graduate School does not approve the make-up of I grades in courses which are already out-of-date for use on a student’s program of study or extensions of time without sufficient justification and/or supporting documentation.

Graduate students cannot register for additional coursework if there are 3 or more temporary grades of incomplete (I) that have not yet been replaced with a permanent grade on their academic record. Student enrolled in graduate study may not graduate with a temporary grade of I on their record, even if that course is not listed on the Program of Study.

NR (no record) is a temporary mark on the transcript assigned by the Office of the University Registrar if a grade has not been submitted by the instructor at the proper time or if any grade not approved for a particular course has been submitted. As a temporary mark on the transcript the NR must be replaced by a grade. If the NR is not resolved or replaced by the instructor with a valid end-of-term grade before the end of the major (Fall or Spring) term following the term for which the grade of NR was recorded, a grade of F will be assigned.

Pass-Fail Option

Unless there is an academic program exception explicitly approved by the Graduate Council, a graduate student may elect Pass-Fail grading in a course only if the content is outside the student’s major area of study and is not required on the program of study. This option permits enrichment of the student’s learning experience and a grade of either S (satisfactory) or U (unsatisfactory) will be awarded. Courses completed with a satisfactory grade may be counted toward total credit hours earned. A grade of U received under the individual Pass-Fail Option will be calculated in the cumulative grade point average as a grade of F. Students must have the approval of their academic program advisor and the dean of The Graduate School prior to registration.

Academic Standard for Grade Point Average

The cumulative grade point average (GPA) is defined as the GPA of all graduate credit courses recorded on the official USC transcript. In-date courses are ten or fewer years old for doctoral students and six or less years old for Master’s, specialist, graduate certificate, and nondegree students. Revalidated courses are also included in the cumulative GPA calculation. Grades earned for graduate credits transferred from other colleges or universities are not included in the cumulative GPA.

Academic Standard for Progression

Graduate courses may be passed for degree credit with a grade as low as C, but a degree-seeking student must maintain at least a B (3.00 on a 4.00 scale) cumulative grade point average. Some programs stipulate that no grade below B can be applied to a core course. Programs may cancel a student’s registration privilege if the student fails to make adequate progress toward degree as defined by the program’s academic policies. A student’s registration privileges may also be cancelled for failure to meet academic standards as defined by The Graduate School.

Academic Standard for Graduation

At the time of graduation, the student’s graduate cumulative grade point average (GPA) must be at least 3.00 (B) on a 4.00 scale. Additionally, the student’s average on all grades recorded on the program of study for courses numbered 700 or above must be at least 3.00 and all courses listed on the program of study must be at least 3.00.
Academic Suspension Policy
Graduate degree-seeking students whose cumulative grade point average (GPA) drops below 3.00 (B) will be placed on academic probation by The Graduate School and allowed one calendar year in which to raise the cumulative GPA to at least 3.00. In the case of conversion of grades of incomplete that cause a cumulative GPA to drop below 3.00, a degree-seeking student will be placed on academic probation at the end of the semester in which the grade is posted. Students whose cumulative GPA falls below the required minimum of 3.00 by receiving a grade for a course in which they received a grade of Incomplete will, instead of an one-year probationary period, be granted only one major semester of probation dating from the semester in which the Incomplete conversion grade is received by the registrar in which to raise their cumulative GPA to 3.00 or above. Students who do not reach a cumulative 3.00 grade point average during the probationary period will be suspended from graduate study and will not be permitted to enroll for further graduate course work as a degree or a nondegree student.

Colleges, schools, and/or departments may have a more stringent policy than The Graduate School's academic suspension policy. Students are also responsible for knowing program policies.

Reinstatement After Suspension
The Graduate School's Policy on Academic Probation and Suspension stipulates that when a degree-seeking graduate student's cumulative grade point average (GPA) falls below 3.0 the student is placed on academic probation. The student has one calendar year, or in the case of an Incomplete conversion one major term, from the academic probation term to increase his/her cumulative graduate GPA to at least 3.0. Failing to meet this condition will result in academic suspension from all graduate study at the University of South Carolina.

After suspension, reinstatement to graduate study or nondegree enrollment status cannot be granted for one calendar year following the term of suspension. To appeal for reinstatement the student must submit through the student's academic program a completed petition packet to the dean of The Graduate School following the guidelines below. Appeals may be initiated at any point following suspension, but petition packets must be received by The Graduate School at least 45 days before the start of the term for which the student wishes to be readmitted.

A student must contact the academic program and ask for support for reinstatement to graduate study. The department must recommend reinstatement for an appeal to go forward. Only packets containing all of the required letters, documentation, and recommendations and forwarded to the dean of The Graduate School from the graduate director of the academic program will be considered. Appeal packets must contain all of the following:

1. A letter from the student that explains the factors that resulted in his/her academic suspension.
2. An explicit plan written by the student and endorsed by the graduate director showing how the student will address the extenuating circumstances noted in the student's letter of appeal (e.g., medical treatment, change of major, adjustment of work demands, etc.) and raise his/her GPA. Supporting documentation of extenuating circumstances must be included.
3. A feasible projection of what grades will be required in what courses and which semesters to yield the requisite overall cumulative GPA of 3.0.
4. A letter from the appropriate department chair or graduate director to confirm that all materials for this appeal are in order and that the appeal is supported by faculty of the academic program.

Complete packets may be delivered in person, by U.S. mail, or by campus mail to:

Dean of The Graduate School
The Graduate School
901 Sumter Street
Byrnes Building, Suite 302
Columbia, SC 29208

Note: Students who have not been enrolled for three or more years must reapply to The Graduate School.

Academic Forgiveness Policy
The Academic Forgiveness Policy is intended to assist former University of South Carolina graduate students whose cumulative USC graduate grade point average (GPA) is below 3.00 to reenroll in graduate study without having to overcome the burden of previous unsatisfactory academic performance. Any former USC graduate student who has not been enrolled in graduate study for at least 24 consecutive months is eligible to apply for academic forgiveness. Academic forgiveness sets aside all former grades earned as a USC graduate student so that previous grades will not be calculated into the student's cumulative graduate GPA. Once academic forgiveness is granted courses taken during and prior to the term elected cannot be revalidated or count toward the completion of a graduate degree.

A student who seeks academic forgiveness must submit a written petition for academic forgiveness to the dean of The Graduate School. That petition must include:

1. A letter from the student that explains the factors that resulted in the student's previous academic record.
2. An explicit plan written by the student and endorsed by the graduate director showing how the student will address those factors in future graduate study if academic forgiveness is granted.
3. A letter from the appropriate department chair or graduate director in support of granting academic forgiveness and recommending reinstatement.
4. Notice of the specific term for which courses taken during and prior to that term are to be segmented on the student's academic record as forgiven.

Each appeal for academic forgiveness will be considered on a case-by-case basis. If granted, the registrar's office will upon notification from the dean of The Graduate School segment the student's academic record showing all courses and grades to be included in academic forgiveness and will recalculate the USC graduate cumulative GPA accordingly. The courses and grades will remain a part of the student's academic record. A notation will appear on the transcript indicating the student was approved for academic forgiveness.

Academic Exception Petitions
The academic policies and regulations of The Graduate School and the graduate programs generally serve as purposeful guidelines and standards for graduate students as they pursue graduate degrees. Occasionally, individual students may feel there are grounds to seek
an exception from the uniform application of an academic regulation, requirement, or policy and may file a petition for exception.

The Graduate School accepts petitions for exception to an academic regulation, requirement, or policy only with sufficient justification and/or documentation and only if the exception is endorsed by the student's academic advisor and the program's graduate director. A complete petition including the signature of the graduate director and any necessary supporting documentation is sent by the academic program graduate director to the dean of The Graduate School. Once received a petition is reviewed by the dean, who may act on the request or refer the matter to the Graduate Council for review and recommendation.

**Appeal of Academic Decisions**

Appeals seeking to reverse or modify decisions made at a lower level of authority should be filed according to the established procedures with the student's academic unit. Students should file appeals with the dean of The Graduate School only after the internal processes for appeals and grievances within the academic program, school, and/or college have been exhausted.

The Graduate School will accept appeals on academic matters only. Disagreement with a grade assigned in a course is not a basis for appeal to the Graduate School, but should be directed to the course instructor.

Appeals to the dean of The Graduate School must be submitted in writing and must include the name, student number, the signature of the appellant, and a full description of the circumstances of the appeal. Student appeals for reversal of departmental decisions are only accepted for consideration when questions such as inequitable application of regulations, bias, conflict with regulations, or extenuating circumstances are cited as grounds for appeal.

The dean of The Graduate School will attempt to resolve appeals filed with the Graduate School and will refer unresolved issues to the Graduate Council, whose decision will be the final action taken within The Graduate School. Any further appeal must be directed to the Office of the Provost. Graduate student appeals of disciplinary decisions reached under the Rule of Academic Responsibility procedures of the University must be made to the University Committee on Academic Responsibility.

**Academic Documents and Student Records**

Students are responsible for checking the accuracy of their academic records. Students may check their academic record in Self Service Carolina.

University policy ACAF 3.03 (http://www.sc.edu/gradschool/DocLibrary/documents/gradstudentregistration.pdf) states that The University of South Carolina complies with The Family Educational Rights and Privacy Act (FERPA), which affords students certain rights with respect to their education records.

1. The right to inspect and review their records.
2. The right to request an amendment of records that the student believes are inaccurate or misleading.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent (outlined in the Annual Notification of Student Rights under FERPA.)

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA.

The University of South Carolina has designated the following items as directory information: a student's name, electronic mail address, local and permanent mailing addresses and telephone numbers, semesters of attendance, enrollment status (full- or part-time), date of admission, date of graduation, school, major and minor fields of study, whether or not currently enrolled, classification (freshman, etc.), type of degree being pursued, expected graduation date, degrees, honors, and awards received (including scholarships and fellowships), weight and height of members of athletic teams, and whether the student has participated in officially recognized activities and sports sponsored by the University. The University may disclose any of these items without prior written consent, unless the student has submitted a written request to the Office of the University Registrar (http://registrar.sc.edu/) not to release directory formation pertaining to the student. The student must submit the written request no later than May 31 in order to prevent disclosure in the student directory.

The University of South Carolina reserves the right to refuse to permit a student to inspect the following records:

1. Parents' financial records.
2. Confidential letters of recommendation requested by the student and filed before November 19, 1974, or letters written after that date for which the student has waived access. Students may request the names of those who have submitted confidential recommendations.
3. Documents revealing non-directory information about other students (such as class rolls).

The University of South Carolina may refuse to release transcripts and verification of records for students who have a financial obligation to the University (ACAF 3.09 (http://www.sc.edu/policies/ppm/acaf309.html)). Students should contact the Office of the University Registrar (http://registrar.sc.edu/) for additional information about official records and/or filing appeals for correction of University records.

**Copy of Student Graduate Admission File**

Graduate students who want copies of documents in admission files to which they have not waived access, such as letters of recommendation, should complete the Document Copy Request form (DCR (http://gradschool.sc.edu/DocLibrary/documents/dcr.pdf)) available on The Graduate School’s website. A fee of $10 is charged for researching and copying releasable information from a student’s file.

**Note:** Test scores and transcripts obtained through this process are considered “unofficial” documents.

**Transcripts**

A transcript of a student's record carries the following information: current status; a detailed statement of the scholastic record showing courses taken with semester hours carried, semester hours earned, grades, grade points, grade point average, and system of grading; a permanent record of all failures, Incomplete grades, and penalties (such as suspension or probation); cumulative USC grade totals; and references to other college or universities attended, dates attended, and the total transfer credits accepted by the University of South Carolina. Copies of transcripts are available from the Office of the University Registrar and must be requested in writing by memo or form. Each transcript request must include a written statement of consent to release the transcript, full
name or names used, student number, current mailing address, dates of attendance, location of attendance, and date of birth to assure proper identification of the record requested.

Any student who needs a transcript or a certified copy of the end-of-semester grade report should complete a transcript request (AS-25 (http://registrar.sc.edu/pdf/trf_3.pdf)) form or send a signed and dated letter containing all pertinent identifying information as listed above to the Office of the University Registrar. (http://registrar.sc.edu/) Official transcripts may also be requested online through Self Service Carolina. The nonrefundable transcript processing fee is $12 unless the transcript is for use with a current application to The Graduate School.

With the exception of copies made for internal use, (including the State Department of Education) no copy of a student’s permanent record (transcript) will be released to anyone without the student’s written consent. No transcript will be issued to a student who is indebted to the University. No partial transcript will be issued. Students may print unofficial copies of their academic record for personal use from Self Service Carolina.

**Special Programs**

For information on contract courses and degree programs offered by the University contact the Office of Educational Outreach (OEO (http://www.ed.sc.edu/oeo/)) administered by the College of Education.

**Accelerated Bachelor’s/Graduate Study Plan (G-BGPA)**

Admission to an Accelerated Bachelor’s/Master’s Plan allows the student to apply graduate credits to a baccalaureate program. This form is to be completed by the student in consultation with his/her academic advisor and the Graduate Director of the proposed master’s program.

Students must have completed at least 90 hours of undergraduate coursework and have a minimum GPA of 3.40 overall as well as in their undergraduate major.

Endorsements should be obtained in the order indicated on the form.

A Bachelor’s/Master’s Degree Accelerated Plan Course Work Authorization form (G-BMCA) must be processed for all graduate courses at the time of registration, in order for the Registrar’s Office to properly enroll the student.

Application of graduate credits earned under the Bachelor’s/Master’s Degree Accelerated Plan to the student’s baccalaureate program should be noted by the student’s college dean at the time the student’s record is cleared for award of the baccalaureate.

Admission to a the Bachelor’s/Master’s Degree Accelerated Plan does not require application for nor admission to a master’s program, nor does it guarantee admission to the proposed master’s program.

The student who wishes to be considered for admission to a Master’s program must also submit a completed application (http://www.gradschool.sc.edu/futurestudents/OnlineApplication.html) and any additional credentials (GRE scores, recommendations, etc.) which are required by that Master’s program.

Undergraduate students participating in Senior Privilege or the Accelerated Bachelor’s/Master’s Plan may opt for only one program. If a student has been approved to participate in one of these programs, he or she is prohibited from applying for, or taking courses under, the other.

**Senior Privilege Coursework**

Senior Privilege permits undergraduate seniors in their final semester (who need less than a normal course load to complete their baccalaureate requirements) to earn up to six hours of graduate credit.

Overload enrollment that includes one or more courses under senior privilege is not allowed.

Courses for graduate credit under senior privilege cannot be used toward undergraduate degree requirements.

Undergraduate students must be a senior, have at least a 3.00 overall GPA, and have approval of their undergraduate advisor, the Graduate Director of the relevant program, the dean of The Graduate School, and the instructor for each course to be taken.

Endorsements should be obtained in the order indicated on the form.

Grades earned in senior privilege classes do not affect undergraduate or graduate GPA; the credit is added to the undergraduate record but not the graduate record. A comment is posted to the graduate record.

Undergraduate students participating in Senior Privilege or the Accelerated Bachelor's/Graduate Plan may opt for only one program. If a student has been approved to participate in one of these programs, he or she is prohibited from applying for, or taking courses under, the other.

This form must be processed at the time of registration to permit the Registrar’s Office to properly enroll the student for graduate credit.

This form may not be used retroactively for courses already taken or courses in which the student is currently enrolled. That is, the form must be endorsed and on file before the first day of the relevant semester.

Undergraduate students interested in Senior Privilege enrollment or the Accelerated Bachelor's/Graduate program (http://gradschool.sc.edu/forms/G-BGCA.pdf) should consult their academic advisor.

**Graduate Admissions**

**Admission Standards**

For admission to The Graduate School, a baccalaureate or higher degree from a college or university accredited by a regional accrediting agency is required. Applicants’ academic records should demonstrate adequate
preparation in the field in which graduate work is to be undertaken. Standardized test scores, letters of recommendation, and other materials specified by the individual academic program may also be required. The dean of The Graduate School admits applicants on the recommendation of the department or college concerned after an appraisal of the credentials submitted.

Applicants whose educational preparation is equivalent to that represented by a baccalaureate degree and who have sufficient maturity to undertake advanced study may be admitted after submitting their credentials, including appropriate test scores, for review by the dean of The Graduate School.

Note: Individual programs may have special application requirements in addition to those of The Graduate School. These requirements range from personal interviews to statements of purpose and employment histories to auditions and portfolios. Applicants should consult the appropriate college or department to learn what these requirements are. However, all materials must be submitted directly to The Graduate School to ensure that they are included in the applicant’s file.

Categories of Admission

The Graduate School provides prospective students with two categories of admission: Degree-seeking Admission and Nondegree-Seeking Admission.

For information about these categories of admission, visit the following links:

- Degree-Seeking Admission (https://academicbulletins.sc.edu/graduate/policies-regulations/graduate-admissions/degree-seeking-admissions/) (including transfer admission)
- Nondegree-Seeking Admission (https://academicbulletins.sc.edu/graduate/policies-regulations/graduate-admissions/nondegree-seeking-admissions/)

University Registration Requirements

Immunization Requirements

The University of South Carolina requires all students, regardless of birthdate, to contact the Immunization Office at 803-777-9511. Students born after December 31, 1956 need to be immunized against, or provide proof of immunity to, measles (rubella) and German measles (rubella). Proof of immunity and/or immunization requires documentation of one of the following:

- two measles and one German measles (MR or MMR) shot after 1967 (not before first birthday)
- positive serum titers (blood antibodies) to measles and German measles
- physician-diagnosed measles illness and either shots or positive serum titer for German measles. (A history of German measles illness does not meet requirements.)

Mandatory Health Insurance

Mandatory health insurance is not required of nondegree students unless the student is enrolled in full time credit hours. Nondegree graduate students affected by this mandatory health insurance (http://www.sa.sc.edu/shs/tshc/insurance.shtml/) requirement will be automatically enrolled in the University Plan (with the cost included in students’ bills for tuition and fees) unless documentation of comparable alternative health insurance coverage is on file in the Health Insurance Assistance Office at the Thomson Student Health Center (http://www.sa.sc.edu/shs/tshc/).

Citizenship Verification

USC students must present proof of citizenship or lawful presence in the U.S. before enrolling. This policy has been adopted by the University in order to comply with section 59-101-430 of the South Carolina Code of Laws, as amended, which requires that lawful presence in the United States is verified before enrollment at any public institution of higher education. Verification of immigration status for non-citizens will be conducted by International student officials. For other students, a proof of citizenship verification process has been adopted to deter and prevent false claims of citizenship by unlawful aliens attempting to evade the eligibility requirements of section 59-101-430. Students who are not verified as citizens during the Federal Financial Aid Application (FAFSA) process must present the USC’s Citizenship Status Verification form (http://registrar.sc.edu/pdf/citizenshipverificationform.pdf) and one of the following acceptable documents:

- Copy of the South Carolina driver’s license if the student first became a licensed driver in the state after January 1, 2002;
- A Certified Birth Certificate indicating that you were born in the United States or a territory of the United States;
- Current U.S. Passport or U.S. Passport that has not been expired more than 10 years;
- Certificate of Naturalization — USCIS Form (N-550 or N-570);
- U.S. government issued Consular Report of Birth Abroad;
- Certificate of Citizenship (N-560 or N-561);
- Unexpired U.S. Active Duty/Retiree/Reservist Military ID Card (DOD DD-2)

The University can accept photocopies of birth certificates and other citizenship documents so long as we reserve the right to demand production of the certified original in the event there are any questions about whether the copy is true and accurate, or in the event any of the information on the copy is unreadable.

For more information: http://registrar.sc.edu/html/citizenshipverification.stm

Course Registration

Course Enrollment

Courses numbered 700-899 are restricted to graduate students; courses numbered 500-699 are open to upper-level undergraduate and graduate students. Graduate students registered for courses numbered 500-699 must complete graduate level course work and will receive graduate credit. Graduate students may not enroll for undergraduate credit in courses numbered 500-699 without the permission of their academic advisor and the dean of The Graduate School.

Access to Courses and Prerequisites

Access to graduate courses is always subject to departmental consent. Courses numbered 700-899 are restricted to graduate students; courses numbered 500-699 are open to upper-level undergraduate and graduate students. Graduate students registered for courses numbered 500-699 must complete graduate level course work and will receive graduate credit. Graduate students may not enroll for undergraduate credit in course numbered 500-699 without permission of the dean of The Graduate School.
Course prerequisites are listed to inform students about the academic background required for satisfactory course completion. The instructor may approve the enrollment of students who have acquired the equivalent knowledge or skills through other courses or experiences. Special permission to enroll should be requested from the instructor prior to registration.

**Course Loads**

A graduate student may enroll for a semester load not to exceed 15 graduate hours. Some programs limit students to a 12-hour maximum semester load. A student with a load of 9 or more hours during a fall or spring term is classified as full-time for academic purposes.

Graduate assistants carrying 6 or more hours for graduate credit are classified as full-time students. Graduate assistants are required to carry a minimum of 6 hours of graduate credit during the fall and spring terms and if employed during summer session are required to carry a minimum of 1 credit per session.

A student must be enrolled for at least 1 credit during any semester in which thesis or dissertation progress is made and such University resources as the library, computer facilities, or faculty time are used.

Students requesting an overload exception must submit the required Course Overload Enrollment Authorization (CEO) Form to the dean of The Graduate School for approval prior to the beginning of the term for which the exception is requested. Students seeking enrollment exceptions (Z-status) should contact their academic program for processing.

**Right to an Advisor**

Students permitted to enroll as nondegree students are not entitled to an advisor, but may consult an academic program’s graduate director for information or approvals as needed.

**Transient Nondegree-Seeking Students**

Students enrolled in or admitted to graduate degree programs at other accredited institutions may seek permission to attend The Graduate School of the University of South Carolina as transient students for a limited number of hours. Students wishing to be admitted as transient students must follow the application process and requirements for nondegree-seeking students.
Here you will find helpful information concerning the University of South Carolina System, links to sites addressing fees, financial aid, scholarships and other important resources. Please note that both undergraduate and graduate policies and regulations are found here.

The University
UofSC System Mission Statement
Approved by the Board of Trustees- October 11, 2019

The primary mission of the University of South Carolina System is the education of the state's diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate's, bachelor's, master's, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and conferring over 30% of all bachelor’s and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. As the flagship institution of the university system, the University of South Carolina Columbia leads the way in providing all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, community outreach, and artistic creation.

UofSC Columbia Mission Statement
Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The primary mission of the University of South Carolina Columbia is the education of the state's citizens through teaching, research, creative activity, and community engagement. Among America's oldest and most comprehensive public universities, the University of South Carolina Columbia is the major research institution of the university system and its largest campus. At the heart of its mission lies the university's responsibility to state and society to promote the dissemination of knowledge, cultural enrichment, and an enhanced quality of life.

The University of South Carolina Columbia serves a diverse population of students with widely varying backgrounds, career goals, and levels of aspiration. The university offers over 320 degrees at the bachelor's, master's, doctoral, and professional program levels, affording students the most comprehensive array of educational programs in the state. Opportunities for personal and career development are provided to the citizens of South Carolina through outreach and continuing education activities. The university provides additional opportunities for associate degrees through Fort Jackson and through the oversight of regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work. The depth and breadth of its graduate programs distinguishes the University of South Carolina Columbia from all other institutions of higher learning in South Carolina.

Recognized by the Carnegie Foundation as a top research and community engaged institution, nationally ranked in start-up businesses, and conferring over 30% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. As the flagship institution of the university system, the University of South Carolina Columbia leads the way in providing all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, community outreach, and artistic creation.

History
Chartered in 1801 as South Carolina College, the University of South Carolina was the first state university to be supported continuously by annual state appropriations. In the years before the Civil War, it rapidly achieved a reputation for academic excellence in the classical tradition and was known as one of the best endowed and most distinguished colleges in the United States. Its faculty included Francis Lieber, editor of the Encyclopaedia Americana and author of On Civil Liberty and Self-Government; the nationally known scientists John and Joseph LeConte; and chemist William Ellet, who produced some of the first daguerreotypes in the United States. By the 1830s, distinguished alumni virtually filled the state's General Assembly. James H. Hammond and Wade Hampton were the most prominent of a parade of future governors, senators, judges, and generals who graduated during the antebellum period.

The pre-Civil War campus included Longstreet Theatre and all the buildings in the area known today as the Horseshoe (with the exception of McKissick Museum). When the voluntary enlistment of all students into the Army of the Confederacy forced the college to close in June 1862, the buildings were used by the Confederate government as a hospital. By the time General Sherman's army reached Columbia in February 1865, the hospital housed wounded Union soldiers as well. A fire soon started that destroyed most of the city, but federal troops helped save the campus buildings from the flames.

After reopening in 1865, the institution went through six reorganizations and name changes during the last decades of the 19th century, while legislators, administrators, and faculties reassessed the institution's goals and struggled to define its mission. Finally in 1906, at the beginning of its second century, it was chartered for the third, and last, time as the University of South Carolina, with a graduate school.

In sharp contrast to the South Carolina College's antebellum, elitist philosophy, President William Davis Melton in 1925 expressed a far-reaching principle that had emerged in the first quarter of the century: “Education is not a special privilege to be enjoyed by a special few.” Thus,
in its final reorganization, the University of South Carolina developed this institutional objective: to furnish both liberal and professional education to the people of South Carolina.

Efforts to achieve this objective were almost immediately hampered by the early arrival of the Great Depression in South Carolina. Enrollment declined, some courses were eliminated, and buildings went without repairs. The situation improved greatly in the late 1930s because of grants from federal New Deal agencies. Then America entered World War II, and the campus was virtually transformed into a naval training base, with payments from the Navy helping the school continue to function during the war years.

Fulfillment of the promise of the early years of the 20th century began in earnest in the 1950s. Since then, dynamic academic expansion and the development of a statewide network of campuses have produced highly diverse and innovative education programs. A commitment to graduate education along with involvement in major research programs has attracted an outstanding faculty. A master plan for the campus environment and buildings will preserve the historic campus atmosphere while providing new academic, residence, and campus life facilities.

Today, the University serves the entire state and includes, in addition to the Columbia campus, three four-year campuses (Aiken, Beaufort, and Upstate) and four regional campuses offering primarily two-year programs (Lancaster, Salkehatchie, Sumter, and Union). Enrollment on all campuses totals more than 40,000. Of these, more than 27,000 students are on the Columbia campus, about one-third of whom are enrolled in graduate and professional programs. The University offers more than 350 degree programs, including 11 programs of study for associate degrees, baccalaureate degrees in 140 areas, master’s degrees in 150 areas, doctoral degrees in 66 areas, and professional doctorates in law, medicine, and pharmacy. Many programs are nationally and internationally ranked, from the creative arts, liberal arts, health and physical sciences, to law, business, and engineering. Regional campuses primarily offer associate degrees to students who may earn 60 hours of credit applicable toward a baccalaureate degree program. The four-year campuses, in addition to basic courses, primarily offer programs leading to the baccalaureate degree. Graduate courses are also offered at more than 50 sites throughout the state under the Extended Graduate Campus program administered by the Columbia campus. Other programs are broadcast via closed-circuit television from studio classrooms on the Columbia campus and through the state’s ETV digital satellite network.

Coinciding with this statewide outreach program has been the establishment of the South Carolina Honors College on the Columbia campus. The college is designed to offer academically gifted undergraduates the finest advantages of a small college in the context of a large comprehensive university.

The University’s effort in the international area, particularly important to the state’s development of foreign trade and investment, continues to expand; academic exchange programs and research linkages have been established with European, African, and South American universities, as well as with China and Japan.

In keeping with both its 19th-century and its 20th-century heritage, the University continues to promote academic excellence while responding progressively to its educational responsibilities and the citizens of South Carolina. It has committed itself to earning a place in the Association of American Universities (AAU), which includes 60 of the finest institutions of higher learning in America. Pursuing this goal, the University aspires to build upon its commitment to enhancing not only our students’ knowledge, understanding, and economic viability, but also their sense of character, empathy, and mutual respect. Such ambitions and ideals were cornerstones of the original college and remain fundamental to the University’s purpose in South Carolina and in society.

**Accreditation**

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master’s, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses’ accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

In addition to this comprehensive accreditation, the professional schools on the Columbia campus are individually accredited by their respective associations as follows:

**College of Arts and Sciences**: In the Department of Psychology, the graduate degrees in clinical-community psychology are accredited by the American Psychological Association; graduate degrees in school psychology are accredited by the National Association of State Directors of Teacher Education and Certification, the National Council for Accreditation of Teacher Education, and the National Association of School Psychologists with the doctoral program also being accredited by the American Psychological Association. The Master of Public Administration degree offered by the Department of Political Science is accredited by the National Association of Schools of Public Affairs and Administration. The Department of Theatre and Dance is accredited by the National Association of Schools of Theatre and the University/Resident Theatre Association. The Department of Art is accredited by the National Association of Schools of Art and Design. The Department of Chemistry is accredited by the American Chemical Society.

**Moore School of Business and the School of Accounting**: American Assembly of Collegiate Schools of Business.

**College of Education**: National Council for Accreditation of Teacher Education, Council for the Accreditation of Counseling and Other Related Educational Programs.

**College of Engineering and Computing**: Programs in chemical engineering, civil engineering, computer engineering, electrical engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET. The programs in computer science and computer information systems are accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

**School of Hospitality, Retail, and Sport Management**: Accreditation Commission for Programs in Hospitality Administration.

**School of Law**: American Bar Association, Association of American Law Schools.

**College of Information and Communications**: The School of Journalism and Mass Communications is accredited by the Accrediting Council on Education in Journalism and Mass Communications. The School of Library and Information Science is accredited by the American Library Association.
School of Medicine: Liaison Committee on Medical Education of the American Medical Association—Association of American Medical Colleges.

School of Music: National Association of Schools of Music.

College of Nursing: Commission on Collegiate Nursing Education.

College of Pharmacy: American Council on Pharmaceutical Education.

College of Social Work: Council on Social Work Education.

University Officials

Board of Trustees
Henry McMaster, Governor of South Carolina, Ex Officio Chair
John C. von Lehe, Jr., 9th Judicial Circuit, Chair
Hubert F. Mobley, 6th Judicial Circuit, Vice Chair
C. Dan Adams, Gubernatorial Designee
Chuck Allen, 10th Judicial Circuit
J. Egerton Burroughs, 15th Judicial Circuit
Robert F. Dozier, Jr., ex officio
C. Edward Floyd, 12th Judicial Circuit
Richard A. Jones, Jr., Gubernatorial Appointee
Toney J. Lister, 7th Judicial Circuit
Miles Loadholt, 2nd Judicial Circuit
Leah B. Moody, 16th Judicial Circuit
Rose Buyck Newton, 14th Judicial Circuit
C. Dorn Smith III, 3rd Judicial Circuit
Molly M. Spearman, State Superintendent of Education
Eugene P. Warr, Jr., 4th Judicial Circuit, Chair Emeritus
Thad H. Westbrook, 11th Judicial Circuit
Mack I. Whittle, Jr., 13th Judicial Circuit
Charles H. Williams II, 1st Judicial Circuit
J. Cantey Heath, Jr., Secretary

Board of Trustees Office
Osborne Administrative Building
University of South Carolina
Columbia, SC 29208
Phone: 803-777-3106
Email: trustees@sc.edu
Website: www.trustees.sc.edu (http://www.trustees.sc.edu)

Administrative Officers
Robert L. "Bob" Caslen Jr., President
William F. "Bill" Tate IV, Executive Vice President for Academic Affairs and Provost
Ed Walton, Senior Vice President for Administration
Mark Bieger, Chief of Staff
Caroline Agardy, Vice President for Human Resources
Doug Foster, Vice President for Information Technology and Chief Information Officer
Prakash Nagarkatti, Vice President for Research
Dennis Pruitt, Vice President for Student Affairs and Vice Provost for Academic Support
Larry Thomas, Vice President for Communications

Will Elliott, Interim Chief Development Officer
Ray Tanner, Director of Athletics
Julian R. Williams, Vice President for Diversity, Equity and Inclusion
Bill Kirkland, Executive Director of the Office of Innovation, Partnership, and Economic Engagement
Walter “Terry” Parham, General Counsel and Executive Director of Compliance Programs

Academic and Support Services

Libraries
Detailed instruction concerning the use of library facilities is provided both in English 101 as well as in tours offered by the library’s Reference Department. A library guide, which gives information about library services, is available upon request.

Thomas Cooper Library (Greene Street). This library, which opened in June 1976, contains all of the University library collections in Columbia except those located in the South Caroliniana Library, Coleman Karesh Law Library, Mathematics Library, Music Library, Springs Business Library, and Medical Library. Thomas Cooper Library seats approximately 2,500 readers. Included in the seating are more than 900 private, locked facilities for faculty and graduate students involved in research and 40 study rooms seating up to four persons each. The library has three classrooms for use by librarians and other faculty on a limited basis. Two of the rooms are modern multimedia classrooms funded by the University 101 program and used primarily for the library instruction module of UNIV 101. A more traditional classroom is also available for library-related instruction and individual class sessions as requested.

Special areas in the library include the student Computer Lab, the Government Information Department and the Map Library on Level 5, the Science Library on Level 4, the Educational Films Collection on Level 3, and Rare Books and Special Collections on the Mezzanine Level. Access to the collections is obtained through the library's Online Catalog with terminals located throughout the building.

The library provides multiple research databases that are available via the Web to the University community from both on and off campus. Librarians provide assistance with these resources in person as well as via phone, via e-mail, and online. The Center for Adaptive Technology located in the Computer Lab in the Thomas Cooper Library has four PCs, a Braille embosser, a tactile graphics-capable Braille embosser, screen readers, screen magnifiers, two scanners with OCR translation software, a CCTV, plus other hardware and software for students with disabilities.

Special Collections, Thomas Cooper Library. The department's foundation stone is the collection of the South Carolina College, assembled by the University between 1801 and 1860. The collections have expanded vastly in recent years. Prominent areas of research strength include English and American literature, historical children's literature, the Civil War, and natural history and science, including the John J. Audubon Collection and the Claudia Lea Phelps Camelia Collection.

Gift collections of international repute include:

- G. Ross Roy Collection of Robert Burns, Burnsiana, and Scottish Literature: Dr. G. Ross Roy, Curator
- John Osman Collection of Braun and Hogenberg City Views
- Matthew J. and Arlyn Brucelli Collection of F. Scott Fitzgerald
- C. Warren Irvin Jr. Collection of Charles Darwin and Darwiniana: Dr. C. Warren Irvin Jr., Honorary Curator
• Anthony P. Campanella Collection of Giuseppe Garibaldi: Dr. Anthony P. Campanella, Honorary Curator
• Augusta Baker Collection of African-American Children’s Literature and Folklore
• James Willard Oliver Collection of David Hume
• Joseph Heller Archive
• James Ellroy Archive
• Speiser and Easterling Hallman Foundation Collection of Ernest Hemingway
• Joel Myerson Collection of Nineteenth-Century American Literature: Dr. Joel Myerson, Curator.

Springs Business Library (Close-Hipp Building, 2nd Floor). A circulating collection of business books plus a collection of noncirculating financial, labor, and tax services; corporation annual reports; textbooks; and periodicals. Multiple business indexes are available via the Web, including Business Source Premier, a full-text database that covers most areas of business, including management, economics, finance, accounting, and international business. The reserve reading collection for all courses in business and economics is located in the library. The library is available to all UofSC students.

Coleman Karesh Law Library (Law Center). A noncirculating collection serving the research and study needs of the students and faculty of the School of Law in the field of Anglo-American law.

Mathematics Library (LeConte, 3rd floor). A collection of books and journals in the subject area of pure mathematics serving the research needs of the mathematics department. Available to all UofSC students.

Medical Library (V.A. Campus). A special collection serving the research and study needs of the students and faculty of the medical school. Available to all UofSC students.

Music Library (School of Music Building, 2nd Floor). A collection including more than 90,000 books and scores, 135 periodical subscriptions, more than 60,000 sound recordings in all formats, and more than 300 videos, laser discs, and DVDs. Thirty-two carrels are equipped for remote viewing and listening. The International Index to Music Periodicals, RILM Abstracts of Music Literature, and the New Grove Dictionary of Music and Musicians (2nd edition) are available online via the Web. Available to all UofSC students.

South Caroliniana Library (Horseshoe). Largest collection in the world of South Carolina material. Includes books, pamphlets, newspapers, maps, and manuscripts relating to South Carolina and the South.

Research Bureaus and Institutes
Belle W. Baruch Institute for Marine and Coastal Sciences. The institute is a leader in research of coastal ecosystems, with research ranging from the molecular to the landscape level of organization. Assessing impacts of human activities is an integral part of many of the studies. Using a multidisciplinary approach to investigate the complexity of coastal and marine environments, we bring together researchers in many fields. These include the sciences and disciplines such as geography, economics, environmental health, policy, statistics, and geographic information processing and remote sensing technologies. We provide students with opportunities to pursue their research interests, welcome visiting researchers and classes, and offer educational programs for university and secondary-school faculty and students, state and federal agency personnel, nongovernmental organizations, and the general public. The institute was established in 1969 through the joint efforts of the Belle W. Baruch Foundation and the University of South Carolina. A freestanding entity within the College of Arts and Sciences, the institute has headquarters and laboratory facilities on the University’s main campus in Columbia and a 25,000-square-foot laboratory located on Hobcaw Barony, near Georgetown, S.C.

Center for Disability Resources/UCEDD. The Center for Disability Resources (CDR), a University Center for Excellence in Developmental Disabilities Education, Research, and Service (UCEDD), is an interdisciplinary training program of the Department of Pediatrics. The CDR receives administrative and operational support from the University of South Carolina and a federal grant awarded under P.L. 106-402, Department of Health and Human Services, Administration on Developmental Disabilities. Through interdisciplinary training, exemplary services, technical assistance, and information dissemination activities, the CDR identifies and uses the vast resources within institutions of higher education to improve the quality of life for people with developmental disabilities and their families as well as other citizens of our state.

Center for Electrochemical Engineering. The Center for Electrochemical Engineering (CEE) was created July 1, 1995, within the Department of Chemical Engineering in the College of Engineering and Information Technology at the University of South Carolina. Its mission is to provide a means for students, faculty, and industrial researchers to interact on projects that involve electrochemical science and engineering. The CEE is dedicated to the integrated study of fuel cells, hydrogen storage, batteries, supercapacitors, corrosion and corrosion protection, and electrodeposition of metal alloys and composites. The CEE serves as a focal point for the development (system identification, specific cell design, engineering, testing, and evaluation) of new power source technologies, novel corrosion protection strategies, and environmentally friendly coatings.

Center for Health Promotion and Risk Reduction in Special Populations. The Center for Health Promotion and Risk Reduction in Special Populations is housed in the College of Nursing. The purpose of the center is to provide the infrastructure to develop a critical mass of investigators to study problems related to the center focus, to promote and support interdisciplinary collaboration in research, and to develop and initiate mechanisms to disseminate research findings into the scientific community, clinical practice, and health care policy. The center supports the College of Nursing's long-range goal to conduct interdisciplinary research, which builds knowledge in the science of health promotion and risk reduction in special populations.

Center for Information Technology. The center establishes the University of South Carolina as a leader in the research and development of advanced information systems. Under the broad themes of agent-based software systems and information security, researchers at the center are investigating multiagent systems, information awareness and security, ontological engineering, service-oriented computing, and computational intelligence, with applications to enterprise integration, executive decision support, and agent-based software development. The center is part of an ongoing effort at UofSC to increase information systems security awareness and develop high-quality education and research in this area, with a goal of becoming one of the leading academic institutions in information security education. The center serves as a focal point for the University’s research, public service, and education efforts in these important new areas of technology, providing well-qualified scientists and engineers and an educational and research capability that meets the needs of industry and government.
Center for Mass Communications Research. Located in the School of Journalism and Mass Communications, the Center for Mass Communications Research engages faculty and graduate students in a wide range of studies for individual and organizational clients involving the processes and effects of mass communication, including audience analysis, readership studies, content analysis, advertising and public relations effectiveness research, communication surveys, polls, samples, and other studies involving consumer and organizational behavior. The center also participates in interdisciplinary studies, especially externally funded projects that involve the communication aspects of scientific research. In addition, the center sponsors conferences and symposia of state, regional, and national interest to mass communications industries and scholars. The center works collaboratively with the College of Mass Communications and Information Studies Office of Research.

Center for Mechanics, Materials, and Nondestructive Evaluation. The statewide center serves as a focus for research in solid mechanics, material science, fracture mechanics, nondestructive evaluation, and advanced joining methods. The center is supported by the Southeastern Electron Microscopy Center, which houses SEM, TEM, STEM, and optical microscopy facilities for microstructural evaluation. With the recent addition of the Advanced Materials Institute, which focuses on industrially relevant research in the area of friction stir joining, the center's research projects span a spectrum from basic science to industry applications. Areas of expertise include materials characterization, dynamic and static mechanical testing, structural analysis, state-of-the-art noncontacting strain measurement methods, advanced numerical simulations, and fracture mechanics. Facilities include sophisticated mechanical test capabilities (including high-vacuum environmental chambers and dynamic loading systems), optical strain analysis equipment for field and laboratory use, novel nanoscale measurement capability including AFM- and SEM-based systems, and a unique friction stir welding process for manufacturing joints under controlled conditions.

Center for Nursing Leadership. The Center for Nursing Leadership is an interdisciplinary center housed in the College of Nursing. The purpose of the center is to develop and advance dynamic nurse leaders in practice, education, and service and provide the structure to continually build the leadership capacity of nurses. Program development and evaluation, seminars, workshops, and consultation are provided to enrich the leadership opportunities for nursing faculty, clinical practitioners, nursing students, and other professionals. It also serves as a forum for local, regional, and national nurse leaders, other health care professionals, and public policy leaders to engage in shaping the future of nursing, the delivery of health care, and the design and implementation of health policy.

Center for Outcomes Research and Evaluation (CORE). The primary purpose of the center is to research clinical, economic, and humanistic outcomes related to the utilization of pharmaceutical products and services. The center strives to cultivate an interdisciplinary research environment, which blends expertise and interest from academia, industry, and government. Currently the center is being restructured and is inactive.

Center for Retailing. The University of South Carolina's Department of Retailing has a goal of becoming the outstanding, comprehensive educational center for retailing education in the world. The department seeks innovative, entrepreneurial initiatives that will serve students while simultaneously benefitting the retail community. One of the major opportunities to accomplish these goals while working closely with colleagues is the Center for Retailing. The Center for Retailing has been developed to support the academic programs and faculty through outreach and research while serving as a resource to the retail community. The ultimate goal of the center is to become a clearinghouse for research in the areas of retail technology and international retailing. The center is supported by founding partners, including Wal-Mart, Miller Brewing Company, Fairchild Books, JDA Software, BIG Research, and Retail Forward.

Center for Science Education. The center, administered as part of the College of Arts and Sciences, coordinates content area aspects of pre-service and in-service science and mathematics teacher training. The center coordinates instruction in all sciences and mathematics, ranging from one-hour in-service presentations through formal, graduate-level course offerings, to multiyear program development. The center draws upon the expertise of science and mathematics faculty from the College of Arts and Sciences and science and mathematics education faculty in the College of Education to provide these services. The goal of the center is the improvement of the quality of instruction in the sciences and mathematics from the elementary-school level through the post-secondary-school level, or K16.

Division of Research, Moore School of Business. An integral part of the Moore School of Business, the division publishes analyses of significant business and economic problems in its Business & Economic Review and Economic Indicators series. Through its programs the division facilitates research by students and faculty members and encourages the use of economic data by regional businesses and public groups. The division also conducts special research projects for both private and public organizations and sponsors an annual Economic Outlook Conference that features the latest economic forecast from the division's South Carolina Economic Forecasting Service. All of the division's research (https://sc.edu/study-colleges-schools/moore/research-and-centers/division_of_research/) is available to the public.

Earth Sciences and Resources Institute (ESRI-USC). The institute conducts environmental studies primarily integrating geology, hydrology, and geochemistry with advanced computer applications for subsurface characterization, prediction of groundwater flow and solute transport, and agricultural and nonpoint source studies. Applied research programs focus on both site-specific and regional scale hydrogeologic studies that involve field, laboratory, and modeling activities. A key component of the institute's groundwater research is the use of geophysical techniques to describe the geologic framework of groundwater systems and to determine the extent of groundwater contamination. The institute uses geographic information system (GIS) capabilities for managing large spatially-oriented databases and modeling diverse geographic data.

Funding for the environmental research program comes from both public and private sources. The U.S. Department of Defense, U.S. Department of Energy, Argonne National Laboratory, the U.S. Department of Agriculture, state agencies, and several environmental consulting firms have recently supported environmental earth science research within the institute.

The institute contributes to the academic mission of the University of South Carolina through its contribution to the Master's in Earth and Environmental Resources Management (MEERM) program administered by the School of the Environment. This graduate degree program was initiated in the late 1980s to expand the business- and management-related expertise of technically oriented individuals. The MEERM program offers expanded opportunities to pursue environmental-related course work while maintaining its focus on integrating business and technical decision making. ESRI-USC plays a key role in the MEERM program through teaching, graduate student research opportunities,
and graduate student advisement. ESRI-USC also provides many educational opportunities apart from the MEEREM program through the availability of graduate research assistantships, summer intern programs, and undergraduate hourly employment. The institute is committed to providing high-quality research opportunities in earth and environmental sciences for graduate and undergraduate students at the University of South Carolina.

The environmental research capabilities of the Earth Sciences and Resources Institute are expanding to meet the increasing need for better understanding of subsurface phenomena. In that regard, the institute is providing state-of-the-science solutions to the environmental challenges before us.

Electron Microscopy Center. Administered as a part of the College of Arts and Sciences, the center is open to UofSC faculty members and students for training and research in analytical microscopy imaging and microanalysis of materials.

The center is equipped with three transmission electron microscopes (TEMs), including a high-resolution JEM 2100F TEM; three scanning electron microscopes with X-ray microanalysis systems; a wavelength dispersive electron microscope; a two-photon laser confocal microscope; four ultra microtomes; and other modern equipment necessary for material studies.

Institute for Families in Society (IFS). The Institute for Families in Society seeks to enhance the well-being of families in society through research, education, technical assistance, and consultation at community, state, national, and international levels. The institute's interdisciplinary group of scholars, researchers, and learners believes that this mission can be accomplished best through collaboration with community groups, social institutions, and government.

The institute advances the mission of the University by integrating the talents of various academic units concerned with family issues while creating bridges among public- and private-sector groups concerned with strengthening families. Working with partners outside the University, the institute

• studies the strengths, needs, and functions of families in a changing society;
• focuses on families who face special risks or challenges (e.g., poverty, disparities, disabilities, violence, or chronic mental or physical illness);
• evaluates how interventions affect families and their members throughout the life span;
• informs policy makers and communities about culturally competent effective practices, programs, and policies.

The Richard L. Walker Institute of International and Area Studies in the College of Arts and Sciences serves as an interdisciplinary research and public-service unit of the University.

The Walker Institute was founded in 1961 and is the principal unit in the University for promoting research, scholarship, and public-service programs in international affairs and the comparative cross-cultural study of human societies as well as for encouraging and facilitating related teaching and public-service activities.

The institute works in cooperation with faculty and research units in various colleges and departments of the University to facilitate research on public policy issues. It provides consultative and training services and undertakes special research projects for governmental and nongovernmental organizations, foundations, and public sector agencies.

Incorporated within the institute are the programs in African studies, Asian studies, European studies, Islamic studies, Latin American studies, and Russian studies, as well as the Association for Research on Ethnicity and Nationalism in the Americas (ARENA).

Institute for Public Service and Policy Research. The institute is an interdisciplinary research and public service unit of the University of South Carolina. Its principal purpose is to address current and emerging issues relating to matters of public policy, governance, and leadership through research, educational activities, publications, and direct assistance programs. The goal of the institute is to improve the quality of social, political, environmental, and economic life, with a primary focus on South Carolina. The institute is composed of several programs, including Environmental Research and Service, Survey Research, Governmental Research and Service, the S.C. Semester Program, the Washington Semester Program, and the Center for Bioethics and Medical Humanities.

Institute for Southern Studies. The institute coordinates academic research and public service to further the understanding of South Carolina and the South. Although the institute is administratively located within the College of Arts and Sciences, its interdisciplinary emphasis calls for a working relationship with departments and colleges throughout the University. Funding assistance and research fellowships are often provided to community officials as well as out-of-state and foreign scholars studying the many different aspects of Southern culture. In addition, the institute provides information upon request and works closely with other educational institutions within the state. Public programs, publications, scholarly research, and undergraduate courses of study are sponsored by the institute.

Institute for Tourism Research. The institute is administered as part of the School of Hotel, Restaurant, and Tourism Management with the purpose of developing research, education, and service programs for South Carolina’s largest industry—tourism. Among other endeavors, the institute conducts studies in the following areas: feasibility, needs assessment, market segmentation, position analysis, image and advertising effectiveness, visitor profile analysis, and economic impact. At the state, national, and international levels, the aforementioned research enables the institute to provide information to government, industry, and community leaders through publications, workshops, and consultancy.

The National Resource Center for The First-Year Experience and Students in Transition. The center and the University 101 Program at the University of South Carolina form one functionally integrated academic unit. The center’s mission is to support and advance efforts to improve student learning and transitions into and through higher education. The center achieves this mission by providing opportunities for the exchange of practical and theory-based information and ideas through the convening of conferences, teleconferences, institutes, and workshops; publishing monographs, a peer-reviewed journal, an electronic newsletter, guides, and books; generating and supporting research and scholarship; hosting visiting scholars; and hosting a Web site and electronic listservs. As one academic unit, the center and University 101 report to the Office of the Executive Vice President for Academic Affairs and Provost.

The Riegel and Emory Human Resource Research Center. The Riegel and Emory Human Resource Research Center was founded in January 1982 through the generosity of Riegel Textile Corp. and the family of the late
Mr. German H.H. Emory, former chair of Riegel. The basic objectives of the center are:

- to conduct research in motivation and satisfaction of workers
- to dignify work and the worker
- to emphasize human values in the workplace
- to enhance skills of management
- to encourage higher levels of cooperation in the workplace
- to preserve the values of the free market system.

The center staff and faculty believe that scholarly research is most useful when practitioners, whom the research results might benefit, are involved in formulating the design and carrying out the research. Thus, center staff work closely with an advisory board made up primarily of business executives in determining the problems needing attention and the approaches that offer the most promise. The center also sponsors periodic executive conferences at which faculty and senior human resource practitioners review the center’s research findings and discuss current human resource needs.

South Carolina Institute of Archaeology and Anthropology (SCIAA). The institute is a full-time research facility and state agency within the University with professional and support staff and facilities for field and laboratory research on a year-round schedule. Under the S.C. Code of Laws (60-13-210 and 54-7-610 et seq.), it has a dual responsibility for service research programs for the state and for academic research programs for the University.

SCIAA has some 60 employees (with an additional 10 graduate and undergraduate student employees) in its Columbia, Aiken, and Charleston offices among its research, cultural resource consulting, and administrative divisions; the Office of the State Archaeologist; the Office of the State Underwater Archeologist; and the Savannah River Archaeological Research Program.

The Underwater Archaeology Division administers some 475 hobby licenses yearly and issues salvage licenses for the recovery of cultural resources located beneath the state’s navigable waters. The institute has the Western Hemisphere’s largest water-logged wood conservation tank and is currently treating numerous cannons, ships, canoes, and other artifacts from around the state.

The service programs under the Office of the State Archaeologist deal with environmental impact archaeology and historic preservation within the same theoretical and methodological concepts of scholarly excellence as the academic programs supported by the University and by grants. The research division of the institute is also excavating, with the assistance of the U.S. Department of Defense/USMC, the 1560s and 1570s Spanish colonial capital of Santa Elena and the French Huguenot site of Charlesfort on the U.S. Marine Corps base at Parris Island, S.C.

The institute is responsible for the statewide inventory of 21,500 archaeological sites, for the curation of all state of South Carolina prehistoric and historic archaeological collections (now amounting to 29,000 cubic feet), and for the synthesis of all research data available concerning the prehistoric and historic archaeology and anthropology of the state, both on land and beneath the waters. This pursuit of research leads to an understanding of the 12,000 or more years of cultural development in South Carolina. The institute sponsors conferences, interdisciplinary studies, avocational societies, and visiting scholars; trains students in research; has an extensive publication program; and has an extensive contracts and grants program. The institute, within the University of South Carolina, participates in numerous University activities, scholarly events, and programs and works cooperatively with other universities to further archaeological and anthropological research.

The South Carolina University Center for Excellence in Developmental Disabilities Education, Research, and Service (S.C. UCEDD). The S.C. UCEDD is an interdisciplinary training program of the Department of Pediatrics in the School of Medicine. The S.C. UCEDD receives administrative support from the University of South Carolina and a federal grant awarded under P.L. 106-402, Department of Health and Human Services, Administration on Developmental Disabilities. Through interdisciplinary training, exemplary direct services, exemplary services, and information/dissemination activities, the S.C. UCEDD identifies and utilizes the vast resources within institutions of higher education to improve the quality of life for people with disabilities, their families, and other citizens of our state.

The term "developmental disabilities" includes severe, chronic disabilities due to mental and/or physical impairment that become manifest early in life, result in substantial functional limitation, and require long-term coordinated, specialized services.

University Technology Services

University Technology Services (https://sc.edu/about/offices_and_divisions/division_of_information_technology/) (UTS), under the direction of the Division of Information Technology and the chief information officer, provides centralized and distributed computing and telecommunications for academic, research, and administrative use to support the University’s mission and meet the needs of the faculty, staff, and students at the University of South Carolina. UTS provides computing, telecommunications, networking, data security, video transport, Web services, customer support, desktop and server support, installation and maintenance of technology infrastructure, policies and procedures, software licensing and distribution, planning, partnerships, applications development, and support to operational systems that serve the UofSC community.

For more information, call the University Technology Services Help Desk at 803-777-1800 or go online (https://sc.edu/about/offices_and_divisions/division_of_information_technology/end_user_services/available_technology_resources/service_desk/). UTS offers computer support for the University community.

McKissick Museum

McKissick Museum at the University of South Carolina, accredited by the American Association of Museums, is located at the head of the historic Horseshoe. Remodeled in 1976 to serve as a center for the University’s museums, art gallery, and archives, McKissick was formerly the central library at USC. In order to “tell the story of Southern life, culture, and community,” the museum administers a broad range of activities. Exhibitions and collections include: Southern folk art; works by state and regional artists; artifacts relating to the University’s history, the history of South Carolina, and the material culture of the South; and the Bernard Baruch Silver Collection. The Howard Gemstone Collection, which is part of one of the finest collections of minerals in the Southeast; the extensive Ferillo political campaign memorabilia collection; and the South Carolina Folk Arts Resource Center are also parts of McKissick Museum. Art, history, and science traveling exhibitions are offered as well as exhibitions based on the permanent collections and faculty research interests. Special cultural events and other educational activities are also regularly scheduled. McKissick also administers a graduate-level certificate program in museum management.
University of South Carolina Press

The University of South Carolina Press shares the University’s central missions—to advance knowledge and to enrich the state’s cultural heritage. Established in 1944, it is one of the oldest publishing houses in the South. With more than 1,500 books published, the press is important in enhancing the scholarly reputation and worldwide visibility of the University of South Carolina. The press publishes in a variety of disciplines, including history (African American, American, Civil War, maritime, Southern, and women’s), contemporary literature, regional studies, religious studies, rhetoric, and social work. The press now has more than 600 titles in print and publishes approximately 50 new books annually.

Fellowships and Scholar Programs

The Office of Fellowships and Scholar Programs was established in 1994 to provide innovative education initiatives for academically talented students. Reporting to the Office of the Vice President for Academic Affairs and Provost, the staff of the office facilitates the pursuit of nationally prestigious fellowships by University students and coordinates an enhanced University experience for the Carolina and McNair Scholars. The involvement and leadership of these scholars make them prime candidates for national fellowships and scholarships. In addition to the scholars, other high achieving students are identified, recruited, and advised to compete for such prestigious scholarships as the Rhodes, Truman, Marshall, Rotary, NSF, Fulbright, Mellon, Udall, and Goldwater. Once identified, students are provided support and assistance in every aspect of candidacy, such as selecting appropriate courses, completing applications, writing essays, and interviewing. Although the ultimate goal is for University students to be awarded these competitive and prestigious scholarships, the preparation process for potential scholars is designed to be developmental and thus rewarding in and of itself. This program is available for qualified University students.

The coordination of scholar programs is also assigned to this unit. Scholar programs provide an enhanced University experience for Carolina and McNair Scholarship recipients through programs, communication, and student group advisement. An advisory committee representing a wide range of academic and administrative units on campus assists the operations of the office. The office is located in Room 220 of Legare College on the UofSC Horseshoe.

Division of Student Affairs and Academic Support

The Division of Student Affairs and Academic Support (https://sc.edu/about/offices_and_divisions/student_affairs/) focuses on the promotion of the intellectual, emotional, physical, spiritual, cultural and social development of students and educators, thus preparing them for a life of learning, service, and engagement. The division collaborates with campus and external constituents to provide access, facilitate students’ progress and persistence, and advance learning at the University of South Carolina and in the higher education community.

Students are encouraged to take advantage of myriad opportunities to develop leadership, academic success skills, personal physical and emotional wellness, multicultural perspectives, life goals, and personal and civic responsibility, among many others. Such opportunities reflect the university’s mission and philosophy of multifaceted learning and development that occurs in and beyond the classroom, in the community, and around the globe.

Southern Regional Education Board (SREB) Academic Common Market

The Southern Regional Education Board (SREB) Academic Common Market (ACM) enables students from specific states to pursue eligible out-of-state programs at a reduced tuition rate. Students must apply for ACM in order to receive the ACM tuition reduction for a future term. Once UofSC approval is granted, students must remain in their UofSC ACM approved major, remain fully and continuously enrolled each major term (Fall/Spring), and must maintain good academic standing.

Beginning Fall 2019, new ACM students that wish to declare a dual/double major may only choose majors which are ACM-eligible for their state of residence. ACM students that change their major from their primary UofSC ACM approved major will lose their UofSC ACM tuition reduction. Current students with non ACM-eligible dual/double majors will be grandfathered in under the same major for five (5) years from the first term of enrollment at UofSC. Current students who change their UofSC ACM approved major will lose their UofSC ACM tuition reduction. More information is available on our Maintaining ACM page (https://www.sc.edu/about/offices_and_divisions/provost/planning/academicprograms/acm/maintainingacm.php).

Student Health Center

Student Health Services offers general medical and urgent care; women’s care; lab, radiology and pharmacy services; an allergy, immunization and travel clinic; sports medicine and physical therapy clinics; counseling and psychiatric services; wellness and prevention programs; and sexual assault and violence intervention and prevention services. The student health fee, which is paid through tuition each semester, covers the cost of some but not all services at Student Health Services.

Student Ombudpersons

Undergraduate and Graduate Student Ombudpersons serve as a resource for addressing student problems and concerns.

• Dale Moore, Graduate Student Ombudsman, Byrnes Building, Suite 301
• Lisa Jerald, Undergraduate Student Ombudperson, Osborne Administration Building, Room 110

State-specific student complaint procedures are available on the UofSC State Authorization website.

Distributed Learning

The Office of Distributed Learning (https://sc.edu/about/offices_and_divisions/distributed_learning/) provides support for students pursuing degrees and taking courses using alternative delivery methods. Students can search for online courses and find information about online programs, test proctoring, and other services at: www.sc.edu/onlinecourses/ (http://www.sc.edu/onlinecourses/).

Professional Licensure Information

State boards of professional licensure and certification may limit distributed learning and/or experiential learning activities outside of South Carolina for programs leading to professional licensure (https://sc.edu/about/offices_and_divisions/provost/planning/academicprograms/state-authorization/professional-licensure-info.php). Information for each program leading to professional licensure is found in the Professional Licensure Outcomes statement (https://sc.edu/about/offices_and_divisions/provost/planning/academicprograms/state-authorization/professional-licensure-info.php). Students should
contact the appropriate state licensing board for detailed rules regarding distributed learning (online coursework) or experiential learning in the state prior to enrolling or engaging in online or on-the-ground coursework outside of South Carolina.

Fees and Refunds

Fees

Academic and Other Fees

Complete details about fees, payments, tax credits, loans, late charges, and related information may be found at the bursar's website (http://www.sc.edu/bursar/). A list of estimated expenses for undergraduate students is available online (https://sc.edu/about/offices_and_divisions/undergraduate_admissions/tuition_scholarships/tuition/). Tuition and fees are approved by the Board of Trustees and subject to change at any time.

Information regarding the location and accessibility of Guaranty Bonds for prepaid tuition held by the institution, as required by the State Authorization regulations for residents of some states, is available here (https://academicbulletins.sc.edu/http://www.sc.edu/provost/stateauthorization/).

Non-academic Fees, Charges, and Regulations

For information about non-academic fees, charges, and regulations, visit the websites below.

- University Housing (http://www.housing.sc.edu)
- Carolina Dining Services (http://www.sc.edu/dining/)
- Student Health Services (https://sc.edu/about/offices_and_divisions/student_health_services/)
- Vehicle Management and Parking Services (http://www.sc.edu/vmps/)

Any student who has failed to pay all required registration fees by the payment deadline may be dropped from class rolls. Any student who fails to relieve any other indebtedness to the University or to any of its auxiliary agencies on the date such obligations become due may not be permitted to remain in University residence halls or be issued a transcript, diploma, or degree.

Checks, Money Orders, and Credit Cards

The University assesses a credit-card convenience fee for all students paying fees by credit/debit cards. If you decide to pay with a credit/debit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self Service Carolina (https://sc.edu/about/offices_and_divisions/student_health_services/) (SSC) a convenient way to pay, SSC will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by check or money order through the mail. You may also pay in person with check, cash, or money order. Alternative methods include payment by E-check, UofSC’s preferred method of payment, when using SSC or payment by check or money order through the mail.

Application Fees

Undergraduate

Every new student will normally be charged a nonrefundable application fee of $65; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls. International students pay an enrollment fee of $750.

Graduate

Every new graduate student will be charged a nonrefundable application fee of $50. All applications must be accompanied by the application fee. International students pay an enrollment fee of $750.

Matriculation Fee

A nonrefundable matriculation fee of $80 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students.

Examination Fees

$40 Scholastic Assessment Test. (SAT) May be taken once only.

$25 Challenge Examination. This test is used to establish undergraduate college credit without class attendance or to validate credits from a non-regionally accredited college. Per semester hour.

Graduate Record Examination

1. General Test ($60)
2. Subject Test ($60)

Revalidation examinations intended to revalidate UofSC courses, obsolete under the statute of limitations. Per hour, $25.

Note: Revalidation examinations require permission of the dean of Graduate Studies. The fee must be paid in advance, and is nonrefundable, once the student is presented to the instructor for the examination.

Legal Residency

The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one’s resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

Legal Residency Requirements for Fee and Tuition Purposes

Code of Laws Governing Residence

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions

“Academic Session” is defined as a term or semester of enrollment.

“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent
person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person’s college education. A dependent person’s residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“Full time employment” is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such minor and are no longer under any legal obligation to support or maintain such minor.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents

Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.
The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person's support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver's license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver's license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence

A person's temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person's absence from the State. The burden is on the person to show retention of South Carolina residence during the person's absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver's license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

Effect of Change of Residency

Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.
If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

**Effect of Marriage**

In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

**Exceptions**

Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. “Military Personnel and their Dependents”: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in state tuition and fees.

2. “Faculty and Administrative Employees with Full Time Employment and their Dependents”: Full time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. “Residents with Full Time Employment and their Dependents”
   Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary (p. 1470”).

4. “Retired Persons and their Dependents” Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

**Application for Change of Resident Status**

Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

**Incorrect Classification**

Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

**Inquiries and Appeals**

Inquiries regarding residency requirements and determinations should be directed to the Legal Residency Office, University Of South Carolina, Columbia, SC 29208, 803-777-4060.

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.
Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person's situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

**Free Tuition**

**Undergraduate**

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the code are reproduced below. Please note that these laws include free tuition only. Other academic fees and mandatory fees are still the responsibility of the student.

   a. A child of a wartime veteran, upon application to and approval by the South Carolina Department of Veterans Affairs, may be admitted to any state-supported college, university, or post high school technical education institution free of tuition so long as his work and conduct are satisfactory to the governing body of the institution, if the veteran was a resident of this state at the time of entry into service and during service or has been a resident of this state for at least one year and still resides in this state or, if the veteran is deceased, resided in this state for one year before his death, and provided the veteran served honorably in a branch of the military service of the United States during a war period, as those periods are defined by Section 101 of Title 38 of the United States Code and:
      i. was killed in action
      ii. died from other causes while in the service
      iii. died of disease or disability resulting from service
      iv. was a prisoner of war as defined by Congress or Presidential proclamation during such war period
      v. is permanently and totally disabled, as determined by the Veterans Administration from any cause
      vi. has been awarded the Congressional Medal of Honor
      vii. is missing in action, or
      viii. the applicant is the child of a deceased veteran who qualified under item (4) and (5)
      ix. has been awarded the Purple Heart for wounds received in combat.

   b. The provisions of this section apply to a child of a veteran who meets the residency requirements of Chapter 112 of this title, is 26 years of age or younger, and is pursuing any type of undergraduate degree.

2. **S.C. Code Ann. § 59-111-110 (Law Co-op. 1976)** No tuition may be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of:
   a. firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers, or corrections officers, as defined herein, including reserve and auxiliary units of counties or municipalities who become totally disabled or are killed in the line of duty on or after July 1, 1964;

   b. government employees who become totally disabled or are killed in the line of duty while working on state time on or after July 1, 1996, as a result of a criminal act committed against them which constitutes a felony under the laws of this State.

   The tuition authorized to be paid by this section applies only to undergraduate courses or curriculum and may be paid for a period not exceeding four years, regardless of the number of state-supported colleges, universities, or state-supported vocational or technical schools the child attends.

3. **S.C. Code Ann. § 59-111-10 (Law Co-op. 1976)** Each year the first place winner of the essay contest sponsored by the Governor’s Committee on the Employment of the Physically Handicapped shall receive a four-year scholarship from the State-supported institution of his choice, provided he is otherwise qualified. The scholarship shall be granted by the governing body of the particular institution upon certification by the Governor’s Committee of the first-place winner and that the winner is in financial need. The scholarship shall provide free tuition and fees, and may be cancelled if a recipient does not maintain general scholastic and conduct standards established by the institution.

4. **S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984)** State-supported colleges and universities, and institutions under the jurisdiction of the State Board for Technical and Comprehensive Education, are authorized to permit legal residents of South Carolina who have attained the age of sixty to attend classes for credit or noncredit purposes on a space available basis without the required payment of tuition, if these persons meet admission and other standards deemed appropriate by the college, university, or institution.

   HISTORY: 1962 Code Section 22-82; 1974 (58) 2844; 1978 Act No. 503, Section 1; 1992 Act No. 263, Section 1; 2015 Act No. 50 (S.261), Section 1, eff June 3, 2015.

   Effect of Amendment
   2015 Act No. 50, Section 1, inserted *, and if these persons do not receive compensation as full-time employees”.

**Graduate**

(This includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. **S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984)** State-supported colleges and universities, and institutions under the jurisdiction of the State Board for Technical and Comprehensive Education, are authorized to permit legal residents of South Carolina who have attained the age of sixty to attend classes for credit or noncredit purposes on a space available basis without the required payment of tuition, if these persons meet admission and other standards deemed appropriate by the college, university, or institution.

   HISTORY: 1962 Code Section 22-82; 1974 (58) 2844; 1978 Act No. 503, Section 1; 1992 Act No. 263, Section 1; 2015 Act No. 50 (S.261), Section 1, eff June 3, 2015.

   Effect of Amendment
   2015 Act No. 50, Section 1, inserted *, and if these persons do not receive compensation as full-time employees”.
Refund Policy

I. Policy

The University will refund a part of academic fees in certain cases:

1. Changes in a student’s status, which may require a refund:
   a. Change in a full-time student’s schedule which results in reclassification to part-time.
   b. Change in a part-time student’s schedule which results in fewer credit hours.
2. Situations which may require a refund:
   a. Course or courses dropped.
   b. Drop/Withdrawal from the University.
   c. Cancellation of a class by the University.

II. Procedure

A. Refund Requests

All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

B. Determining the Refundable Portion Procedure

Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus the refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

C. Drop/Withdrawal Refund Policy

Standard refund procedures for dropping/withdrawal from the university:

All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar’s Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund.

1. 100 percent if the student’s official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
2. 70 percent if the student’s official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
3. 50 percent if the student’s official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
4. 20 percent if the student’s official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

D. Refund Schedules

Refund schedules are located under the important deadlines on the Registrar’s website (http://registrar.sc.edu/).

E. Return of Title IV Funds

1. Refunds Policy for Students Who Have Received Title IV Funds And Withdraw From The University:

   Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from school.

2. Title IV Refund Distribution

   a. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the funds that are distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
      • Unsubsidized Federal Stafford
      • Subsidized Federal Stafford
      • Federal Perkins
      • Federal PLUS Loan
      • Federal Pell Grant
      • Federal Supplemental Education Opportunity Grant
      • Federal TEACH Grant
      • Federal Iraq/Afghanistan Service Grant

   b. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

   c. Exit interviews are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Exit interviews can be completed online (http://www.sc.edu/financialaid/loan_counseling/default.html). Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

F. Appeals Process

A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal.
The Withdrawal Refund Appeals Committee for each campus reviews and acts on all appeals. Address appeals to your respective campus:

Withdrawal Refund Appeals Committee (Columbia Campus Only)
Office of the Registrar
University of South Carolina
Columbia, SC 29208
803-777-5555

III. Reason for Revision
Policy revised to reflect change in student system refund processing, align drop and withdrawal schedules, and update summer information for one summer term. Policy designator changed due to reorganization to Administration and Finance.

Housing Fees
1. Students in the following categories are eligible for refunds in accordance with the terms shown in their Residence Hall contract:
   a. newly admitted students who do not attend the University of South Carolina
   b. students who graduate from school at the end of the fall semester
   c. students who are suspended for academic reasons
   d. students who get married.
   Check the contract or call University Housing for deadline dates and other information.
2. Tenants who do not withdraw from the University but desire release from their contracts will be placed on a contract release waiting list with University Housing. Releases will be granted only when all other space is filled and the space can be rented for the balance of the year to another tenant. Students will be notified upon release and appropriate refunds will be made.

Withdrawal Refunds
All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (p. 1470) when they request to drop their last course. Staff members of the Office of the University Registrar are available to assist students in completing the withdrawal process. In addition, staff from the Student Ombudsman Office located in the Osborne Administration building can provide counseling. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should see their college dean.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

University Withdrawal Refund Appeal Procedures
The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University's published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Office of the University Registrar and will be considered only in written form. A standardized appeal form must be submitted.
2. All requests for appeal must be submitted directly by the student through the Office of the University Registrar and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student's family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official's advice, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.
3. The appeal must be initiated during the semester for which the refund is requested.
4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.
5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.
6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses, are excluded from consideration.
7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chair. The student will be informed of the outcome of the appeal by letter from the Office of the Associate Vice President for Student Life and Development.

Welcome to the School of Law Academic Bulletin

The School of Law Academic Bulletin is the official document of record concerning academic programs and regulations.

This bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina. The University reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Academic Bulletin Information

Bulletin Updates and Corrections

Noncurricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the University Registrar (bulletin@sc.edu) on the Columbia Campus. Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletins.

Printing Portions of the Online Bulletins

The academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

Additional Information

Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement.

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost on the Columbia campus.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton St.
Columbia, South Carolina
telephone 803-777-3854

The University

UofSC System Mission Statement

Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The primary mission of the University of South Carolina System is the education of the state's diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate's, bachelor's, master's, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

UofSC Columbia Mission Statement

Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The primary mission of the University of South Carolina Columbia is the education of the state's citizens through teaching, research, creative activity, and community engagement. Among America's oldest and most comprehensive public universities, the University of South Carolina Columbia is the major research institution of the university system and its largest campus. At the heart of its mission lies the University's responsibility to state and society to promote the dissemination of knowledge, cultural enrichment, and an enhanced quality of life.

The University of South Carolina Columbia serves a diverse population of students with widely varying backgrounds, career goals, and levels of aspiration. The university offers over 320 degree programs at the bachelor's, master's, doctoral, and professional program levels, affording students the most comprehensive array of educational programs in the state. Opportunities for personal and career development are provided to the citizens of South Carolina through outreach and continuing education activities. The university provides additional opportunities for associate degrees through Fort Jackson and through the oversight of regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).
Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work. The depth and breadth of its graduate programs distinguishes the University of South Carolina Columbia from all other institutions of higher learning in South Carolina.

Recognized by the Carnegie Foundation as a top research and community engaged institution, nationally ranked in start-up businesses, and conferring over 30% of all bachelor’s and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. As the flagship institution of the university system, the University of South Carolina Columbia leads the way in providing all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, community outreach, and artistic creation.

Accreditation

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master’s, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses’ accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

In addition to this comprehensive accreditation, the professional schools on the Columbia campus are individually accredited by their respective associations as follows:

College of Arts and Sciences: In the Department of Psychology, the graduate degrees in clinical-community psychology are accredited by the American Psychological Association; graduate degrees in school psychology are accredited by the National Association of State Directors of Teacher Education and Certification, the National Council for Accreditation of Teacher Education, and the National Association of School Psychologists with the doctoral program also being accredited by the American Psychological Association. The Master of Public Administration degree offered by the Department of Political Science is accredited by the National Association of Schools of Public Affairs and Administration. The Department of Theatre and Dance is accredited by the National Association of Schools of Theatre and the University/Resident Theatre Association. The Department of Art is accredited by the National Association of Schools of Art and Design. The Department of Chemistry is accredited by the American Chemical Society.

Moore School of Business and the School of Accounting: American Assembly of Collegiate Schools of Business.

College of Education: National Council for Accreditation of Teacher Education, Council for the Accreditation of Counseling and Other Related Educational Programs.

School of Hospitality, Retail, and Sport Management: Accreditation Commission for Programs in Hospitality Administration.

College of Information and Communications: The School of Journalism and Mass Communications is accredited by the Accrediting Council on Education in Journalism and Mass Communications. The School of Library and Information Science is accredited by the American Library Association.

School of Medicine: Liaison Committee on Medical Education of the American Medical Association-Association of American Medical Colleges.

School of Music: National Association of Schools of Music.

College of Nursing: Commission on Collegiate Nursing Education.

College of Pharmacy: American Council on Pharmaceutical Education.

College of Social Work: Council on Social Work Education.

Ed Walton, Senior Vice President for Administration
School of Law

The mission of the University of South Carolina School of Law is to provide students, through an in-depth legal education, with a foundation upon which they can build successful careers in the practice of law and public service; to contribute to the development of the law and legal theory through significant faculty scholarship on issues of state, national and international importance; and to advance the administration of justice through service to the legal profession, the state and the nation.

Degree Programs

The School of Law offers a full-time day Juris Doctor program. To earn the J.D., students must successfully complete 90 hours of course work over six semesters, including at least four semesters of study in residence at the School of Law.

- Juris Doctor (p. 1485)

Dual Degree

The School of Law offers students the opportunity to complete work on a Juris Doctor and a graduate degree in one of the following programs:

- Accountancy / Law, M.A.C.C. / J.D. (p. 1480)
- Criminology and Criminal Justice / Law, M.A. / J.D. (p. 1480)
- Earth and Environmental Resources Management / Law, M.E.E.R.M. / J.D. (p. 1481)
- Environmental Law and Policy / Law, M.E.L.P. / J.D. (Dual Degree Program with the Vermont Law School) (p. 1481)
- Health Services Policy and Management / Law, M.H.A. / J.D. (p. 1483)
- Human Resources / Law M.H.R. / J.D. (p. 1483)
- International Business / Law, I.M.B.A. / J.D. (p. 1483)
- Journalism and Mass Communications / Law, M.M.C. / J.D. (p. 1483)
- Public Administration / Law, M.P.A. / J.D. (p. 1487)
- Social Work / Law, M.S.W. / J.D. (p. 1487)

Admissions

The admissions goal of the School of Law is to enroll qualified students who will make a positive contribution to the school’s educational environment and to South Carolina, the region, and the nation after graduation. In making admissions decisions, the Faculty Committee on Admissions takes a holistic approach and considers myriad factors with emphasis on the cumulative undergraduate GPA and the Law School Admission Test (LSAT). Other factors that may influence the committee’s decision include, but are not limited to, employment experience, military or public service, residency, diversity, course of study, personal statement, and letters of recommendation.

In order to be considered for admission, a candidate must have or expect to have an academic bachelor’s degree from a fully accredited college or university by the date of the anticipated enrollment in the School of Law or must be a participant in the Honors College six-year B.A./B.S.-J.D. degree program. All applicants are required to take the LSAT and to register with the Law School Data Assembly Service.

The decision-making process begins in December of each year with the Faculty Committee on Admission reviewing completed files.

Applications to the School of Law must be received in the Office of Admissions by March 1. To receive priority consideration for merit-based scholarships, an applicant’s completed admissions file (including all supporting material) must be received in the Office of Admissions by February 1. Accepted applicants may request a one-year deferment. Deferment is granted in the discretion of the Office of Admissions.

For further information about the School of Law, interested applicants should contact:

Office of Admissions
USC School of Law
1525 Senate Street
SC 29208

Information about the School of Law may also be obtained by visiting our Web site at https://sc.edu/study/colleges_schools/law/admissions/.

Degree Programs

The School of Law offers a full-time day Juris Doctor program. To earn the J.D., students must successfully complete 90 hours of course work over six semesters, including at least four semesters of study in residence at the School of Law.

- Juris Doctor (p. 1485)

Dual Degree

The School of Law offers students the opportunity to complete work on a Juris Doctor and a graduate degree in one of the following programs:

- Accountancy / Law, M.A.C.C. / J.D. (p. 1480)
- Criminology and Criminal Justice / Law, M.A. / J.D. (p. 1480)
- Earth and Environmental Resources Management / Law, M.E.E.R.M. / J.D. (p. 1481)
- Environmental Law and Policy / Law, M.E.L.P. / J.D. (Dual Degree Program with the Vermont Law School) (p. 1481)
- Health Services Policy and Management / Law, M.H.A. / J.D. (p. 1483)
- Human Resources / Law M.H.R. / J.D. (p. 1483)
- International Business / Law, I.M.B.A. / J.D. (p. 1483)
- Journalism and Mass Communications / Law, M.M.C. / J.D. (p. 1483)
- Public Administration / Law, M.P.A. / J.D. (p. 1487)
- Social Work / Law, M.S.W. / J.D. (p. 1487)

Accountancy / Law, M.A.C.C. / J.D.

The Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and Master of Accountancy (M.A.C.C.) degrees in approximately four years.

Degree Requirements M.A.C.C. (30 Hours) / J.D. (90 Hours)

Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the business administration program. Students in the M.A.C.C. program may use up to 9 hours of law course credit as electives. Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Moore School of Business.

Criminology and Criminal Justice / Law, M.A. / J.D.

Admission

Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Department of Criminology and Criminal Justice. Upon admission to the combined degree program, the student will be assigned courses to be elected in both programs.
Degree Requirements M.A. (30 Hours) / J.D. (90 Hours)
The Department of Criminology and Criminal Justice, in cooperation with the University of South Carolina School of Law, offers a combined degree program which permits a student to obtain both the Juris Doctor and the Master of Arts in Criminal Justice degrees in approximately four years. Through the combined program, the total course load may be reduced by as many as 15 credit hours from that required if the two degrees were earned separately. In such a situation of each student permits. In such event, each case will be judged on its

Earth and Environmental Resources Management / Law, M.E.E.R.M. / J.D.
Admission
The combined J.D./M.E.E.R.M. program requires that students be accepted independently into each of the programs, that the students begin their first year with courses exclusively in the School of Law, and that the remaining years be divided between the two programs. Upon acceptance by both programs, students must complete a dual degree form. Acceptance into one program does not affect the decision of the other school with regards to admission. Upon admission to the dual degree program, the student must select electives from an approved list of courses.

Degree Requirements M.E.E.R.M. (36 Hours) / J.D. (90 Hours)
The Environment and Sustainability Program in cooperation with the USC School of Law and The Graduate School offers a dual degree program. The dual degree program, the Master of Earth and Environmental Resources Management (M.E.E.R.M.) and law degree (J.D.), permits students to complete the joint program in approximately four years. Through the combined program, the total course load may be reduced by as many as 18 credit hours from that required if the two degrees were earned separately, since up to 9 hours of electives toward the M.E.E.R.M. degree may be taken in approved law courses and 9 hours of electives toward the M.A. may be earned in the M.A. program.

Environmental Law and Policy / Law, M.E.L.P. / J.D. (Dual Degree Program with the Vermont Law School)
Accreditation
The University of South Carolina is accredited by the Southern Association of Colleges and Schools’ Commission on Colleges to award Juris Doctor degrees. Because of its geographic location, Vermont Law School is accredited by a different body, and has no relationship with the Commission on Colleges. Both law schools are fully accredited by the American Bar Association. The Southern Association of Colleges and Schools’ Commission on Colleges accreditation of the University of South Carolina does not extend to or include the Vermont Law School or its students. Although the University of South Carolina has faculty-approved regulations and accepts certain course work in transfer toward a credential from Vermont Law School, or collaborates in other ways for generation of course credits or program credentials, other colleges and universities may or may not accept this work in transfer, even if it appears on a transcript from the University of South Carolina. Such a decision would be made by the institution subsequently considering the possibility of accepting such credits.

Admission and Degree Requirements
M.E.L.P. (30) / J.D. (90)
Application deadline is January 21, 2011. Applications will be available Fall 2010.

1. Students who enter the program must:
   b. Be admitted to the University of South Carolina (USC) School of Law.
      (a & b mean that the student must meet all entrance requirements of each school and be accepted as a student therein.)
   c. Be admitted to the Dual Degree Program. Admission to the dual degree program must be made by application to both programs and both programs must approve the student’s admission to the dual degree program.
   d. Each program shall maintain appropriate records on each student in the program.

2. The program is prospective in operation.
   a. Those students already holding a M.E.L.P. degree or a law degree will not be eligible for admission to the program.
   b. Students currently enrolled in either school may enter the program and appropriate credit will be granted by both schools with due care exercised to effect the transition to insure the closest compliance with these regulations as the individual situation of each student permits.

3. Students will often complete the dual degree program in three years (including full-time summer study). Students shall begin the program by completing the first full year in USC’s School of Law. At the end of that year, a student will enroll in 1-credit USC course entitled Introductory Environmental Law and Policy. A student will thereafter enroll in Vermont M.E.L.P. courses via summer school, distance learning, and internships. A minimum of six (6) M.E.L.P. credits through distance learning must be earned during the course of the second and third years of study at USC’s School of Law. The entire program for both degrees must be completed within a period of five academic years unless substantial reasons acceptable to the Joint Committee are given. In such event, each case will be judged on its individual merits and decisions in the case of other students will not serve as precedent.

4. Students must maintain the academic requirements presently in effect or as may be placed in effect to remain in the program.
   a. Failure to maintain the requisite academic standing requirements of either school will preclude the student’s continuation in the program in the semester he or she becomes ineligible.
   b. The student may continue to complete the degree requirements in the school whose academic standing he or she has met.
   c. A student dropped from the program for academic deficiency may not re-enter.
5. a. The University of South Carolina School of Law will grant up to 9 hours credit toward the J.D. degree for work completed on the Vermont Law School campus toward the M.E.L.P. Degree with a minimum grade of C. The student must take the course for a letter grade if the course is offered on this basis. A grade of C or better shall be recorded on the student’s USC transcript as a pass. No degree credit will be granted by the School of Law when the candidate earns a grade of less than C in the Vermont Law School course. Several courses published in the M.E.L.P. Program may be excluded as courses available for credit in the M.E.L.P.-J.D. dual degree program. These courses duplicate courses taught through the University of South Carolina’s School of the Environment. This will be handled on a case-by-case basis as the program progresses.
b. Vermont Law School will grant up to 9 hours of credit toward the M.E.L.P. degree for specified course work completed in the USC School of Law. No credit will be granted when a candidate earns less than a C grade in the School of Law. All Graduate School academic requirements will be applicable to students participating in the Dual Degree Program.

VLS will award credit toward the M.E.L.P. degree for up to nine hours earned in the following School of Law courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS 731</td>
<td>Environmental Law and Policy</td>
<td>3</td>
</tr>
<tr>
<td>LAWS 651</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>LAWS 709</td>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

It may be possible to earn M.E.L.P. credit through other USC School of Law courses, as approved by the Joint Committee on a case-by-case basis.

6. Students enrolled in this program must take the one-credit LAWS 816 Introduction to Environmental Law and Policy, at the end of their first year.

7. Students enrolled in this program must have completed the requirements for both degrees to come within the provisions of paragraph 5.

8. The School of Law will assign a P,F, or W grade as may be appropriate for purposes of determining the Law School G.P.R. with respect to non-Law School courses taken in the M.E.L.P. Program.
   a. The Joint Committee assigned to administer the program will take appropriate action to insure that each school is notified of the grades earned so that the proper entries are made on the student’s record.
   b. The Joint Committee will adopt any forms necessary to carry out the objectives of this program.

9. The Joint Committee shall consist of one or two designees from Vermont Law School appointed by the Director of the Vermont Law School Environmental Law Center, one or two faculty members from the USC Law School appointed by the Dean of the Law School, and the USC Law School Associate Dean for Academics. They shall each endorse all applications to the J.D.-M.E.L.P. program and take all necessary administrative action to insure that the purposes, spirit, and intent of the program are fulfilled.

The student may not take courses for credit under the dual degree program in one program where there is substantial duplication of material with a course which the student has taken in the other program.

a. The Committee shall decide all questions of duplication or preemption of courses the student desires to take. It is understood that each committee member will confer with the member of his or her faculty whose course or seminar the student desires to take for credit in the program where it appears that there is substantial duplication of material or preemption of the course by a similar course in the other program.
b. If the Joint Committee shall be in disagreement with regard to the duplication of material or preemption then each shall confer as follows:
   i. Vermont Law School’s representative(s) of the Joint Committee shall confer with and abide by the decision reached by the Director of the Environmental Law Center.
   ii. The USC School of Law’s representative(s) on the Joint Committee shall confer with and abide by the decision reached by the Curriculum Committee of the School of Law.
   iii. Each member of the Joint Committee shall be permitted to present and discuss the matter on which there is disagreement with the Committee of each program.
   iv. In the event a student is aggrieved by a decision of the Joint Committee denying him or her permission to take a course in either program he or she desires to take under this Dual Degree Program, the student may appeal the decision to the Committee of the school in which he or she seeks to undertake such work.

10. The Joint Committee shall make every effort to accommodate the needs of the student consistent with the aims and objectives of the program. The Committee members shall counsel with the student, recommend alternative courses and otherwise assist him or her in furthering his or her career objectives through the Dual Degree Program.

11. A Program of Study shall be approved by the Joint Committee prior to attending the Summer Session at Vermont Law School. Each student must submit his or her proposed schedule to the Joint Committee in sufficient time prior to registration to permit the Joint Committee to act on it. Therefore, students in the program should confer with the Joint Committee at regular and frequent intervals when schedules become available.

12. The Joint Committee may make other such regulations concerning matters not contained herein which have not bee anticipated and which are in keeping with the objectives of the program and the desires of both faculties, keeping always in mind the wishes of the student and his or her career objectives.

13. Any student withdrawing from one of the programs in the Dual Degree Program will be required to satisfy all of the requirements of the degree program in which he or she retains candidacy.

15. The University of South Carolina is accredited by the Southern Association of Colleges and Schools’ Commission on Colleges to award Juris Doctor degrees. Because of its geographic location, Vermont Law School is accredited by a different body, and has no relationship with the Commission on Colleges. Both law schools are fully accredited by the American Bar Association. The Southern Association of Colleges and Schools’ Commission on Colleges accreditation of the University of South Carolina does not extend to or include the Vermont Law School or its students. Although the University of South Carolina has faculty-approved regulations and accepts certain course work in transfer toward a credential from Vermont Law School, or collaborates in other ways for generation of
course credits or program credentials, other colleges and universities may or may not accept this work in transfer, even if it appears on a transcript from the University of South Carolina. Such a decision would be made by the institution subsequently considering the possibility of accepting such credits.

Health Services Policy and Management / Law, M.H.A. / J.D.

Degree Requirements M.H.A. (58 Hours) / J.D. (90 Hours)
The Department of Health Services Policy and Management and the School of Law offer a coordinated program that leads to a dual degree. Some courses do fulfill requirements for both portions of the dual degree. A dual degree program thus typically requires fewer semester hours in total than if the two programs were taken separately.

Human Resources / Law M.H.R. / J.D.
The Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and Master of Human Resources (M.H.R.) degrees in approximately four years.

Degree Requirements M.H.R. (45 Hours) / J.D. (90 Hours)
Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the business administration program. Students in the M.H.R./J.D. program may use up to 12 hours of employment-related law courses from the law school to fulfill requirements within the M.H.R. program. Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Moore School of Business.

International Business / Law, I.M.B.A. / J.D.
The Moore School of Business in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and International Master of Business Administration (I.M.B.A.) degrees in approximately four years. Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the business administration program.

Students in the I.M.B.A./J.D. program must take 9 credit hours of electives in the Moore School. An additional 12 credit hours in the School of Law will be used to satisfy the 21 elective credit hours required for the I.M.B.A. degree. All of these elective courses must be included in the I.M.B.A. program of study. Upon approval of the graduate director and dean of The Graduate School, business-related law school electives may be substituted for Moore School electives. Such substitution is permissible only if the business-related electives are not counting toward the J.D. degree. Students must supply the I.M.B.A. office with a letter from the law school registrar stating that any substitute business-related law school electives are not also being used to satisfy the J.D. degree.

Prior to obtaining admission to the combined degree program, a student must be admitted to both the School of Law and the Moore School of Business.

Degree Requirements I.M.B.A. (68 Hours) / J.D. (90 Hours)
Students in the I.M.B.A./J.D. program must take 9 credit hours of electives in the Moore School. An additional 12 credit hours in the School of Law will be used to satisfy the 21 elective credit hours required for the I.M.B.A. degree. All of these elective courses must be included in the I.M.B.A. program of study. Upon approval of the graduate director and dean of The Graduate School, business-related law school electives may be substituted for Moore School electives. Such substitution is permissible only if the business-related law school electives are not counting toward the J.D. degree. Students must supply the I.M.B.A. office with a letter from the law school registrar stating that any substitute business-related law school electives are not also being used to satisfy the J.D. degree.

Journalism and Mass Communications / Law, M.M.C. / J.D.
The School of Journalism and Mass Communications in cooperation with the University of South Carolina School of Law offers a combined degree program that permits a student to obtain the J.D. and Master of Mass Communications (M.M.C.) degrees in approximately four years. Through the combined program, the total course load may be reduced from that required if the two degrees were earned separately since 9 hours of electives toward the J.D. may be earned in the Mass Communication program. Students in the M.M.C. program may use up to 9 hours of law course credit as electives. Prior to obtaining permission to the combined program, a student must be admitted to both the School of Law and the School of Journalism and Mass Communication.

Students must complete all courses in the first year curriculum and earn a grade of D or better or pass for Introduction to the Legal Profession (entering Fall 2011). A first year student who receives a grade of F in a first year course receives no credit and is required to repeat the course. The Associate Dean, however, may waive for good cause the requirement that the student retake the course.

### Upper Level Credit Hour Requirements

During the second and third years, students must take no less than twelve (12) and no more than sixteen (16) hours each semester. During summer school students may take no more than six (6) hours. Students who wish to take additional hours must file a petition with the Associate Dean for Academic Affairs (see §VI.H). A form for this petition is available in the Office of the Registrar/Academic Services, room 137.
