UNIVERSITY OF SOUTH CAROLINA BULLETIN

The Academic Bulletins are the official documents of record concerning academic programs and regulations. Each calendar year has a unique bulletin and there are different bulletins based on your particular course of study.
Welcome to the Undergraduate Studies Bulletin

The Undergraduate Studies Bulletin is the official document of record concerning undergraduate academic programs and regulations.

This bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina. The University reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Academic Bulletin Information

Administrative Copies

Printed administrative copies of the academic bulletins through the 2008-2009 academic year are available for reference in Thomas Cooper Library, the School of Medicine Library, Coleman Karesh Law Library, the Office of Undergraduate Admissions, The Graduate School, the Office of the Provost, and each college, school, and department office. Complimentary administrative copies are no longer produced.

Bulletin Updates and Corrections

Non-curricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the University Registrar (bulletin@mailbox.sc.edu). Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletins.

Printing Portions of the Online Bulletins

Except for a limited run of administrative copies up to the 2008-2009 academic year (copies of which are available for reference in the UofSC libraries), the academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

Other Printed Academic Documents

Supplementary materials are available on request as follows: the School of Medicine bulletin may be obtained by writing to the medical school; the School of Law bulletin may be obtained by writing to the School of Law. These offices are at the University of South Carolina, Columbia, SC 29208.

Final authority for all aspects of content rests with the Office of the Provost. All material submitted for publication in the undergraduate bulletin must be cleared through the academic editor, Sandra Kelly, vice provost and dean of undergraduate studies. For the graduate bulletin, clearance must be obtained through Cheryl Addy, vice provost and dean of the Graduate School.

Registration at the University of South Carolina assumes the students' acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement such as Carolina Community: Student Handbook and Policy Guide.

Official policies of the University listed below are published annually in Carolina Community.

1. Student Rights and Freedoms within the Academic Community
2. Code of Student Academic Responsibility and Procedures for Implementation of this Code
3. Grievance Policy and Procedures for Non-Academic Areas
4. University Policy on Use of Alcohol
5. University Policy on Campus Solicitation
6. University Policy on Student Patent and Copyright Matters

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

1600 Hampton St.
Suite 805
Columbia, South Carolina
Telephone: 803-777-3854

Academic Programs

Academic Programs

Undergraduate degree programs on the Columbia campus are offered through the Colleges of Arts and Sciences (p. 22); Hospitality, Retail, and Sport Management (p. 430); Education (p. 340); Engineering and Computing (p. 372); College of Information and Communications (p. 470); Nursing (p. 510); Pharmacy (p. 517); and Social Work (p. 519) and through the School of Music (p. 498), the Arnold School of Public Health (p. 452), and the Darla Moore School of Business (p. 312).

For a list of undergraduate programs offered on the Columbia Campus visit the following link:

• Programs A-Z (p. 20)

Carolina Core Requirements

The Carolina Core curriculum provides the common core of knowledge, skill, and academic experience for all Carolina undergraduates. It has 10 Core components, each with learning outcomes and credit hour requirements. The Core begins with foundational courses early in the undergraduate experience, followed by one or more integrative courses near the end in which selected Core learning outcomes are integrated into the chosen major.

Each of the ten Core components must be met with a Core-approved course. While most Core-approved courses fulfill a single Core component, a few courses, called overlay-eligible courses, have been approved to fulfill two Core components. Every student is
required to complete a minimum of 31 credit hours of Core-approved courses.

Transfer students who enter UofSC Columbia, Lancaster, Salkehatchie, Sumter, or Union are subject to the Carolina Core requirements. Any transfer courses that equate to Carolina Core courses will equate to both content and all outcomes associated with the UofSC Course.

Visit the Carolina Core website for more information.

Study Abroad

Each year hundreds of students participate in study abroad programs in many locations around the world. The Study Abroad Office (http://sc.edu/about/offices_and_divisions/global_carolina/?option=com_content&view=article&id=207&Itemid=1/) is available to guide students through the study abroad process, providing information about study abroad options, scholarship opportunities and diverse academic, cultural, and linguistic experiences available to them. By developing and implementing quality programming, the Study Abroad staff helps prepare students interested in experiencing a culture other than their own prior to departure and facilitate their return to UofSC after their study abroad experience has ended.

In addition, the Study Abroad Office assists faculty in developing short-term international programs, provides support services for exchange students who attend UofSC, and administers exchange programs with international universities. The Study Abroad Office is continually developing new program options for the benefit of interested students.

For more information contact the Study Abroad Office (https://sc.edu/about/offices_and_divisions/study_abroad/) at 803-777-7557.

University 101

University 101 is a 3-credit-hour seminar course provided for and offered to freshmen and to other undergraduate students (i.e., transfer students) in their first semester at UofSC Columbia. This course provides an introduction to the nature and importance of university education and a general orientation to the functions and resources of the University. Many sections are offered for students enrolled in a specific UofSC college or academic major.

The course helps new students adjust to the University, develop a better understanding of the learning process, and acquire essential academic success skills. It also provides students a support group in a critical year by examining problems common to the new-student experience.

Offered in small classes of 19 students, University 101 is taught by faculty members and administrative personnel who have a special interest in working with new students. The course may be taken as part of a student’s regular load or as an overload. Course credit is awarded on a letter-grade basis. Credit is applicable as either elective or required credit toward most baccalaureate degrees offered by the University.

Undergraduate Research

Many students enrich the academic experience through research opportunities in all disciplines. Students work one-on-one with a faculty mentor, receive funding for their projects, and gain professional research experiences. The Office of Undergraduate Research (http://sc.edu/about/offices_and_divisions/undergraduate_research/) assists students in making connections with faculty and facilitating projects.

Discovery Day (https://sc.edu/about/signature_events/discover_usc/) showcases students’ scholarly pursuits in and out of the classroom. Students present their research discoveries through poster discussions, oral presentations, artistic presentations & visual art displays. Some students elect to live together in a unique community on campus. Students will benefit from field trips, the Discover Seminar Series, networking events with faculty and other
researchers, and access to service learning opportunities study abroad programs and internships.

**Service Learning**

Service-learning offers students an opportunity for hand-on involvement with real world concerns as a venue for educational growth. Combining the academic experience with community service provides a context for testing, observing, or trying out discipline-based theories, concepts, or skills. The Service Learning website (https://sc.edu/about/offices_and_divisions/leadership_and_service_center/service_opportunities/service_learning/) offers information on service learning courses available for students.

**Leadership Learning**

Many programs and activities are available at UofSC to develop leadership talent in students across disciplines, across colleges, across campus, and throughout the community. Several well known programs include the annual Student Leadership and Diversity Conference, the Emerging Leaders Program (https://sc.edu/about/offices_and_divisions/leadership_and_service_center/leadership_development/carolinalead/cfelp_peer_leader.php) (ELP), and the leader mentor network. The ELP assists students in learning about basic leadership theory. Students assess and explore their own leadership style and capacities, develop skills relevant to leadership work, and develop a personal development and leadership plan. Emerging Leader Mentors (ELMs) are students who have been at the university for more than 4 semesters who provide mentoring for first year students and transfer students in the Emerging Leaders Program.

**Career and Pre-Professional Counseling**

Students interested in careers requiring postgraduate professional training should plan their undergraduate curricula to meet the entrance requirements of the professional schools involved. Special advisors are available to offer assistance in career and curriculum planning in the following fields of postgraduate specialization:

**Law** (Eileen Korpita, pre-law advisor). Most law schools require for admission a B.S. or B.A. degree and an acceptable score on the Law School Admission Test. A solid liberal arts education is the best academic background for the study of law. Hence, no particular major or specific courses are required for successful performance in law school.

**Medicine, Dentistry, Veterinary Medicine, Optometry, Podiatry** (Eileen Korpita, health careers advisor). Students may obtain general advice concerning health related careers from the health careers advisor in Rooms 127-129, Sumwalt. Medical schools urge undergraduate students to obtain a broad liberal arts education but also require certain specific courses for admission. These include courses in the areas of biology, chemistry, English, mathematics, and physics. A very high scholastic average and a good score on the appropriate national admission examination (MCAT, DAT, etc.) are also essential for admission. Premedical, predental, preveterinary medicine, preoptometry, and prepodiatry students should have their course programs approved by the faculty advisor beginning with their freshman year in order to increase their chance for admission to a professional school.

**Religious Vocations** (Carl D. Evans, advisor). The professional schools of theology and religious education usually require a B.A. degree for admission. In regard to the undergraduate program, a broad liberal arts education with emphasis in religious studies, philosophy, English literature, history, and languages is recommended. Students planning professional religious vocations should work with the advisor in planning their academic program to be sure that they are adequately prepared for graduate professional study.

**Education** (Office of Student Affairs). Students may obtain general advice concerning teacher preparation from the Office of Student Affairs in the College of Education, Room 113, Wardlaw College.

**Programs A-Z**

- Accounting, B.S.B.A. (p. 313)
- Actuarial Mathematics and Statistics Minor (p. 180)
- Advertising and Public Relations Minor (p. 477)

College of Arts and Sciences

Dr. Joel Samuels, Interim Dean
Dr. Claudia Benitez-Nelson, Associate Dean for Instruction, Community
Engagement, and Research
Dr. Cynthia J. Davis, Associate Dean for Arts, Humanities, and Academic
Initiatives
Dr. Christy Friend, Interim Associate Dean for Enrollment Management,
Advising, and Retention
Dr. Todd Shaw, Interim Associate Dean for Diversity, Equity, and Inclusion and
for Social Sciences
Dr. Jeff Twiss, Interim Associate Dean for Research and Graduate Education
Dr. Qiana Whitted, Interim Associate Dean for College Initiatives and
Interdisciplinary Programs

Overview of the College

The College of Arts and Sciences is the oldest, largest and most
academically diverse college at the University of South Carolina. Its
disciplines in the arts, humanities and sciences have formed the
university’s intellectual core since its founding in 1805. By providing most
courses in the Carolina Core, the college provides a foundation for every
University of South Carolina undergraduate student. Today, the college is
also a vibrant community of learning on the forefront of advances in
teaching, learning and research.

The college offers over 40 majors and minors and more than 70 graduate
programs, giving students a broad selection of study areas. Rooted in
the liberal arts tradition, the college provides a broad education that
champions critical thinking, creativity, communication skills, resilience,
teamwork and other skills and attributes that form the foundation of
success in graduates’ lives and careers.

The college enriches student learning through active teaching, academic
advising, career development and learning beyond the classroom.
The Student Excellence Collaborative provides student services and
facilitates advising, study abroad, internships and career development
with staff dedicated to the needs of arts and sciences students. The
Incubator for Teaching Innovation assists faculty with enhancing
classroom learning through a variety of teaching methods.

As the heart of a major research university, the college is a hub of
research excellence and creative activity. Its faculty-led research
programs advance knowledge and produce new work with impact in
literature, medicine, education, climate science, public policy, and more.
Its arts programs also make a cultural contribution to South Carolina and
beyond. These programs provide hands-on, engaged learning for both
undergraduate and graduate students, but they also serve as a catalyst
for positive change in the local community, the state, the nation and
the world. The College of Arts and Sciences transforms the lives of our
students and improves the world they will inhabit by creating and sharing
knowledge at the frontiers of inquiry.

Academic Departments

The College of Arts and Sciences consists of the Departments of
Anthropology; Biological Sciences; Chemistry and Biochemistry;
Criminology and Criminal Justice; English Language and Literature; Geography; History; Languages, Literatures, and Cultures; Mathematics; Philosophy; Physics and Astronomy; Political Science; Psychology; Religious Studies; Sociology; Statistics; and Theatre and Dance, as well as the School of the Earth, Ocean and Environment and the School of Visual Art and Design. Interdisciplinary Programs include African American Studies, Film and Media Studies, Global Studies, Jewish Studies, Linguistics, and Women's and Gender Studies. Through departmental and interdepartmental programs in these areas, the college offers the undergraduate degrees of Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Arts in Interdisciplinary Studies. The college also offers both a Bachelor of Arts and a Bachelor of Science degree program in Economics as well as a Bachelor of Science in Cardiovascular Technology that combines 100 semester hours of academic work with a clinical program at an accredited hospital.

Additional programs that offer undergraduate courses and opportunities include African Studies, Asian Studies, Islamic World Studies, Linguistics, Russian and Eurasian Studies, Southern Studies, and Speech Communication and Rhetoric. Aerospace Studies, Military Science, and Naval Science administer the University's ROTC programs. In addition to serving students majoring in any of the established arts and sciences disciplines, the constituent departments and programs of the College of Arts and Sciences offer courses included in the general degree requirements and elective options for all baccalaureate students at the University. Academic units in the college also participate actively in the South Carolina Honors College.

Centers and Institutes

Centers and institutes within the college include the Belle W. Baruch Institute for Marine and Coastal Sciences, Center for Civil Rights History and Research, Center for Digital Humanities, Center for Geographic Education, Center for Science Education, Electron Microscopy Center, GiSciences Research Laboratory, Hazards and Vulnerability Research Institute, Interdisciplinary Mathematics Institute, Institute for African American Research, Institute for Mind and Brain, Institute for Southern Studies, McCausland Center for Brain Imaging, Parenting and Family Research Center, Psychological Services Center, S.C. Institute of Archaeology and Anthropology, and the Walker Institute of International and Area Studies.

The college also is home to the McKissick Museum, which fosters awareness and appreciation for the history of the university and the community, culture and environment of the American South.

Accreditations

The School of Visual Art and Design is accredited by the National Association of Schools of Art and Design (NASAD.) The Department of Chemistry and Biochemistry has been approved by the American Chemical Society’s (ACS) Committee on Professional Training, and the curriculum for the Bachelor of Science in Chemistry meets ACS requirements. In the Department of Psychology, the graduate degrees in Clinical/Community Psychology are accredited by the American Psychological Association (APA); graduate degrees in School Psychology are accredited by the American Psychological Association (APA) and the National Association of School Psychologists (NASP) through a partnership with the National Council on Accreditation of Teacher Education (NCATE.) The Master of Public Administration degree offered by the Department of Political Science is accredited by the National Association of Schools of Public Affairs and Administration (NASPAAA.) The Department of Theatre and Dance is accredited by the National Association of Schools of Theatre (NAST) and the University/Resident Theatre Association (URTA.) Through selected degree programs, the College of Arts and Sciences participates in the teacher education programs of the University that are accredited by the National Council for Accreditation of Teacher Education.

College Academic Policies

Progression Requirements

To remain in a degree program offered by the College of Arts and Sciences, a student must make satisfactory academic progress toward the degree. Some of our majors have progression requirements that each student must meet to remain in the major. When a student fails to meet these progression requirements, students must choose another major. A student who fails to make satisfactory progress may be placed on academic probation or removed from the college. In addition, all students in the college are subject to the regulations on probation, suspension, and readmission in the section of this bulletin titled “Academic Regulations.”

Additional progression and retention requirements for specific majors are specified in the appropriate section of the bulletin.

The faculty of the College of Arts and Sciences recognizes the importance of clear, precise, and correct writing as part of a liberal education. Therefore, the faculty encourages the assignment of written work and fully supports professors who require written assignments to conform to reasonable standards of organization, development, coherence, and acceptable English usage.

Attendance Requirements

Enrollment in a course obligates the student not only for prompt completion of all work assigned but also for punctual and regular attendance and for participation in whatever class discussion may occur. It is the student’s responsibility to keep informed concerning all assignments made. Absences, whether excused or unexcused, do not absolve the student from this responsibility.

Graduation

In order to be eligible for graduation, students in the College of Arts and Sciences must meet all course requirements for the degree program, have a minimum of 120 applicable credit hours, be in good standing, meet any departmental or program requirements, and have a cumulative GPA of at least 2.00 on all work attempted at the university.

Department and program requirements appear under the appropriate departmental listing.

Advising

Students who wish to pursue a degree program in the College of Arts and Sciences must be admitted to the college and advised within the college. Each of the degree programs of the college has a director of undergraduate studies who supervises the academic advising of the students majoring in that program. Although it is the responsibility of students in the college to ensure that they complete all graduation requirements, the faculty and administration of the college make every effort possible to see that students are provided with accurate and timely academic advising. Students must see their academic advisors at least once each semester for assistance in planning their academic program. No student will be allowed to complete the registration process without an advising form approved by an assigned advisor.

Freshmen planning to major in one of the college's degree programs in the humanities, social sciences, or arts are advised by the college's freshman Dean's advisors. Assignment of students to specific Dean's advisors is handled by the Student Excellence Collaborative (SEC) at Flinn
Hall; upon the completion of the first 30 hours, students transition to the major department or program, where they are assigned a major advisor who is responsible for planning and approving the program of study. Freshmen planning to major in the sciences, mathematics, statistics, or cardiovascular technology are assigned a major advisor within the Department or Program upon entry to the college.

During the next-to-last semester before graduation, students must arrange for their academic advisor to complete a major program card; students must then schedule an appointment for a senior records check in the Student Excellence Collaborative in Flinn Hall. Any deficiencies in general education, major, minor, cognate, or special departmental requirements will be noted. This information should form the basis for the student’s final academic advising.

All advising, senior records checks, graduation, and related processes for students majoring in one of the college's degree programs are supervised by the Student Excellence Collaborative, Flinn Hall.

It is the responsibility of each student to understand and complete all requirements for the degree. Each student should obtain a copy of the Guidelines for Advising from their advisor or from the Student Excellence Collaborative at Flinn Hall.

The student’s major department and major advisor should be consulted for interpreting and applying major, minor, and cognate requirements. The college’s Student Excellence Collaborative at Flinn Hall is the final authority on all degree requirements. Students should consult this office with all concerns on the applicability of curricular requirements.

Students seeking further information should contact the Associate Dean for Enrollment Management, Advising, and Retention, Dr. Loren Knapp, LWKNAPP@mailbox.sc.edu or call 803-777-2993.

Right of Petition
A student may seek relief from academic standards and regulations by appealing to the Scholastic Standards and Petitions Committee of the College of Arts and Sciences. Information on procedures may be obtained from the Offices of Undergraduate Academic Affairs and Advising in Flinn Hall.

Career Development
Career development initiatives in the College of Arts and Sciences aim to complement academic advising by assisting students in clarifying career directions. Students are encouraged to begin the process of career planning as early as possible, normally in the freshman year. Career coaches are available in the Career Center to assist students in gaining an understanding of the student's own interests, values, abilities, and personality; the nature of a liberal education and the related marketable skills; and the numerous career opportunities available for arts and sciences students. The Career Center provides individual career counseling, testing, workshops, networking and job shadowing opportunities, job search seminars, resources for graduate school planning, and an online career learning dashboard. In addition, students are encouraged to complement their academic studies with career-related work experience such as internships, cooperative education, part-time work experience, or volunteer work. The Career Center provides advisors with career resource listings to assist them in referring students to the center.

The Student Excellence Collaborative at Flinn Hall as well as individual departments can assist students with identifying internship experiences appropriate for their academic and career interests.

Beyond the Classroom
The College of Arts and Sciences encourages students to seek learning opportunities beyond the classroom. This may include study abroad, internships, service learning, research, independent study courses and other activities.

The Student Excellence Collaborative facilitates study abroad and internships in the college.

The college endorses the use of departmental independent study courses to further students’ intellectual pursuits in alternative ways. Before students may register for an independent study course, they must present a completed independent study contract that has been approved by the instructor overseeing independent study project, the major advisor, and the Associate Dean for Enrollment Management, Advising, and Retention in the college. No student may apply more than 15 hours of independent study credits toward the degree. Unless approved as a part of the major, minor, or cognate, independent study courses will be graded only on a Pass-Fail basis. A grade point average of 2.50 or greater is required to enroll in independent study courses.

Teacher Preparation Programs
The College of Arts and Sciences participates in teacher preparation programs for undergraduate students who wish to pursue teacher certification. Several options are available within the College of Arts and Sciences and in collaboration with the College of Education.

5-year Bachelor's and Master's Degree Program
The University of South Carolina (Columbia campus)’s innovative, five-year program is closely coupled with a student's undergraduate major. After earning a bachelor’s degree in the appropriate discipline in the College of Arts and Sciences, a student may earn a master’s degree in the College of Education, leading to teacher certification. Students must apply and be admitted to the master’s year of this program, and must complete all prerequisites for the master's degree program as specified by the College of Education.

Students who plan to pursue the Master of Teaching degree may pursue a bachelor's degree in the College of Arts and Sciences in the appropriate discipline.

Teaching Area (Bachelor's Degree)

- English (Bachelor of Arts in English)
- Secondary social studies (BA or BS (as applicable) in history, economics, geography, political science, international studies, psychology, or sociology)
- Secondary science or mathematics (Bachelor of Science in biology, chemistry, physics, or mathematics)

The Master of Arts in Teaching (MAT) degree is also available at the University of South Carolina in selected disciplines, including art, foreign languages and theatre.

Bachelor's Degree Teacher Preparation Options
The College of Arts and Sciences also offers a Bachelor of Fine Arts with a major in art education that prepares students for K-12 certification in art. Students majoring in dance with a concentration in dance education K-12 are prepared for certification in K-12 dance.
Students majoring in Classics, French, German, or Spanish may seek K-12 teacher certification in Latin, French, German, or Spanish through a teacher preparation option at the undergraduate level.

The Center for Science Education assists individual departments in offering content-specific courses in their disciplines designed for in-service and pre-service teachers. For details on available courses, students can contact the Center for Science Education or communicate with their advisors.

College Curricula
Degree requirements vary among the undergraduate degree programs in the College of Arts and Sciences. The curricula established for all baccalaureate degrees awarded by the college include a set of courses that fulfill general education requirements, a set of courses that comprise a departmental major, a set of courses that comprise a cognate or minor, and several hours of free elective courses. A course may be used to fulfill only one requirement. Students who choose to complete one of the college’s degree programs are advised to read carefully the statement of the major department or program and to consult frequently with the major advisor. Students who wish to change a major field of study during the final 30 hours of academic work can only do so after consultation with staff members of the Student Excellence Collaborative at Flinn Hall.

General Education Requirements
Degree candidates in the College of Arts and Sciences must satisfy the general education requirements prescribed for the specific degree program. These requirements are designed to provide students with a broad experience in the liberal arts and sciences and opportunities to develop intellectual skills in analysis, synthesis, and evaluation, as well as competence in written and oral communication. General education is not defined by subject matter alone, but rather by an attitude toward the world that emphasizes intelligent functioning as a human being.

The General Education requirements of the College of Arts and Sciences are derived from the learning outcomes on which the Carolina Core, the University’s general education curriculum for all baccalaureate degrees, is based. The college’s General Education requirements include all requirements in the Carolina Core, also, the college’s requirements include specified or additional requirements that must be met for baccalaureate degrees offered by the college.

Each student must complete the specified number of hours or attain the desired level of achievement in the groups of courses outlined below. Note that the credit hours required in some of these groups vary somewhat between the B.A. and B.S. degrees. In planning the course of study during the first two years, a student should give precedence to courses that satisfy the general education requirements. Students must complete ENGL 101 (https://academicbulletins.sc.edu/search/?P=ENGL%20101) and ENGL 102 (https://academicbulletins.sc.edu/search/?P=ENGL%20102) within the first 60 semester hours of work in order for these courses to be credited toward graduation.

Majors and Degrees
- African American Studies (Bachelor of Arts)
- Anthropology (Bachelor of Arts)
- Art Education (Bachelor of Fine Arts)
- Art History (Bachelor of Arts)
- Art Studio (Bachelor of Arts, Bachelor of Fine Arts)
- Biochemistry and Molecular Biology (Bachelor of Science)
- Biological Sciences (Bachelor of Science)
- Cardiovascular Technology (Bachelor of Science)
- Chemistry (Bachelor of Science, Bachelor of Science in Chemistry)
- Chinese Studies (Bachelor of Arts)
- Classics (Bachelor of Arts)
- Comparative Literature (Bachelor of Arts)
- Criminology and Criminal Justice (Bachelor of Arts)
- Dance (Bachelor of Arts)
- Economics (Bachelor of Arts, Bachelor of Science)
- English (Bachelor of Arts)
- Environmental Science (Bachelor of Science)
- Environmental Studies (Bachelor of Arts)
- Experiential Psychology (Bachelor of Arts, Bachelor of Science)
- Film and Media Studies (Bachelor of Arts)
- French (Bachelor of Arts)
- Geography (Bachelor of Arts, Bachelor of Science)
- Geological Sciences (Bachelor of Science)
- Geophysics (Bachelor of Science)
- German (Bachelor of Arts)
- History (Bachelor of Arts)
- Interdisciplinary Studies (Bachelor of Arts in Interdisciplinary Studies)
- International Studies (Bachelor of Arts)
- Marine Science (Bachelor of Science)
- Mathematics (Bachelor of Science)
- Media Arts (Bachelor of Arts)
- Philosophy (Bachelor of Arts)
- Physics (Bachelor of Science)
- Political Science (Bachelor of Arts)
- Religious Studies (Bachelor of Arts)
- Russian (Bachelor of Arts)
- Sociology (Bachelor of Arts, Bachelor of Science)
- Spanish (Bachelor of Arts)
- Statistics (Bachelor of Science)
- Theatre (Bachelor of Arts)
- Women's and Gender Studies (Bachelor of Arts)

Basic Degree Requirements for Bachelor of Arts Degrees (120 Hours)

Basic Degree Requirements for Bachelor of Science Degrees (120 Hours)

Note: The following Bachelor of Science degrees require 128 hours instead of 120 hours: Biochemistry and Molecular Biology, Environmental Science, Geophysics, and Marine Science.

Arts and Sciences students may choose to earn multiple degrees, including a Bachelor of Science in one major and a Bachelor of Arts in another.

Majors
Every degree candidate in the college must successfully complete a major program of study, approved by a major advisor, that meets the major requirements of the department or program. A general major consists of at least 24 hours of approved advanced study in the student’s field of interest. An intensive major requires 36 to 48 hours of approved advanced study; no special notation will appear on the student’s transcript or diploma. The intensive major is often conceived specifically
as preparation for professional or graduate study. A minimum grade of C is required for any course submitted for fulfillment of general or intensive major requirements. At least half of the major courses must be taken in residence in the College of Arts and Sciences in order to apply to the degree.

Several majors in the College of Arts and Sciences offer a Graduation with Distinction option that does appear on transcripts and diploma if students complete the additional credit hours and other requirements. These majors include:

- Anthropology
- English
- Geography
- Geology
- Geophysics
- History
- International Studies
- Mathematics
- Philosophy
- Political Science
- Religious Studies
- Sociology

For details about the Graduation with Distinction requirements, see the academic bulletin page for each program.

**Interdisciplinary Studies**

The College of Arts and Sciences offers the Bachelor of Arts in Interdisciplinary Studies for students who want a program of interdisciplinary studies without a major in a single department or in a structured interdepartmental degree program. For details see the bulletin for "Interdisciplinary Studies."

**Second Major**

In some degree programs of the College of Arts and Sciences, a student may elect a second major. Normally, second majors are possible only in degree programs with similar general requirements and are thus not available from other schools and colleges. In those cases students may apply for two separate degrees. The second major option is not available in all colleges.

The following specifications for a second major apply:

1. The student must meet admission and progression requirements for the second major.
2. In those cases where second majors in two separate colleges are possible, the student must have received approval from both deans for a second major.
3. All requirements for the second major must be fulfilled.
4. All general education and special departmental requirements normally associated with the second major must be fulfilled.
5. In cases where the first major and the second major lead to different degrees, the student must designate one as the official degree of record.

A second major eliminates the cognate requirement; however, special departmental requirements normally completed as part of the cognate are not waived. Fulfillment of the requirements for a second major are indicated on the student's official transcript upon graduation. The requirements for the second major must be completed prior to graduation in order for the second major to be noted on the transcript.

**Second Baccalaureate Degree**

For information on second degrees, see “Graduation” in the academic regulations chapter of this bulletin.

**Cognates**

The cognate is intended to support the course work in the major or compliment itself. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs in the College of Arts and Sciences that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences.

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

**Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences**

- Accounting (ACCT): all numbered 300 and above
- Aerospace Studies (AERO): all numbered 300 and above
- African American Studies (AFAM): all numbered 300 and above
- Anthropology (ANTH): all numbered 200 and above
- Arabic (ARAB): all numbered 300 and above
- Army/Military Science (ARMY): all numbered 300 and above
- Art Education (ARTE): all numbered 300 and above
- Art History (ARTH): all numbered 300 and above
- Art Studio (ARTS): all numbered 200 and above
- Astronomy (ASTR): all numbered 300 and above

Health Promotion, Education and Behavior (HPEB): all numbered 300 and above except HPEB 335 (https://academicbulletins.sc.edu/search/?P=HPEB%20335)
History (HIST): all numbered 300 and above
Hotel, Restaurant, and Tourism Management (HRTM): all numbered 300 and above
Integrated Information Technology (ITEC): all numbered 300 and above
International Business (IBUS): all numbered 300 and above
Italian (ITAL): all numbered 300 and above
Japanese (JAPA): all numbered 300 and above
Jewish Studies (JSTU): all numbered 300 and above
Journalism (JOUR): all numbered 300 and above
Latin (LATN): all numbered 300 and above
Latin American Studies (LASP): all
Library and Information Science (SLIS): all numbered 300 and above
Linguistics (LING): all numbered 300 and above
Management (MGMT): all numbered 371 and above except MGMT (https://academicbulletins.sc.edu/search/?P=MGMT%20499) 498 and 499
Management Science (MGSC): all numbered 300 and above except MGSC 498 (https://academicbulletins.sc.edu/search/?P=MGSC%20498), MGSC 499
Marine Science (MSCI): all numbered 215 and above
Marketing (MKTG): all numbered 300 and above
Mathematics (MATH): all numbered 241 and above except MATH 401 (https://academicbulletins.sc.edu/search/?P=MATH%20401)
Media Arts (MART): all numbered 200 and above
Music (MUSC): MUSC 115 (https://academicbulletins.sc.edu/search/?P=MUSC%20115), MUSC 116 (https://academicbulletins.sc.edu/search/?P=MUSC%20116), MUSC 145 (https://academicbulletins.sc.edu/search/?P=MUSC%20145) and all numbered 200 and above
Naval Science (NAVY): all numbered 300 and above
Nursing (NURS): all numbered 300 and above
Pharmacy: all numbered 300 and above
Philosophy (PHIL): all numbered 200 and above
Physics (PHYS): all numbered 212 and above
Political Science (POLI): all numbered 300 and above
Portuguese (PORT): all numbered 300 and above
Psychology (PSYC): all numbered 300 and above
Religious Studies (RELG): all numbered 300 and above
Retailing (RELT): all numbered 300 and above
Russian (RUSS): all numbered 300 and above
SC Honors College (SCHC): pending advisor approval
Social Work (SOWK): all numbered 300 and above
Sociology (SOCY): all numbered 300 and above
Southern Studies (SOST): all numbered 300 and above
Spanish (SPAN): all numbered 300 and above
Speech (SPCH): all numbered 200 and above
Sport and Entertainment Management (SPTE): all numbered 300 and above
Statistics (STAT): all numbered 300 and above
Women's and Gender Studies (WGST): all numbered 300 and above

Minors
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major.

Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

Minors are available in participating departments of the College of Arts and Sciences and in other colleges. For descriptions of specific minors, students should see the appropriate sections of the bulletin.

A list of minor programs of study can be found at Programs A-Z (https://academicbulletins.sc.edu/undergraduate/programs-az/)

Electives
Each degree in the College of Arts and Science requires a minimum number of credit hours in academic subjects.

No courses of a physical education (1 credit), first aid, remedial, developmental, skill-acquiring, or vocational nature may be applied as credit toward a degree in the College of Arts and Sciences. To encourage the student to challenge themselves by taking electives that will broaden their educational background, the College of Arts and Sciences permits the use of the Pass-Fail option on true elective courses that are not being used to satisfy major, minor, cognate or core requirements. This option is not available on all courses, so students should check course descriptions and consult with their advisors while choosing electives.

Other Regulations
In addition to the University academic regulations, students pursuing baccalaureate degrees in the College of Arts and Sciences are subject to the following:

1. A student shall not be permitted to enroll for more than 18 credit hours without the approval of the assistant dean of the college.
2. The assistant dean of the college, with the recommendation of the appropriate faculty, may authorize a student to repeat a course.

Aerospace Studies
Department Website (http://artsandsciences.sc.edu/aero/)

Stewart Newton, Chair

The Air Force Reserve Officer Training Corps (AFROTC) Program offered by the Department of Aerospace Studies is conducted pursuant to provisions of the ROTC Vitalization Act of 1964. AFROTC is a leadership program for college students interested in earning a commission and entering the active duty Air Force as an officer, after completing a bachelor’s degree. AFROTC instructs students in military heritage, the development of air and space power, military ethics, drill and ceremonies, communication, human relations, and leadership theory and techniques. Teaching methods include instructor presentations, student discussions and team projects, and hands-on leadership exercises. All books and uniforms associated with AFROTC are provided at no cost to the student. Additionally, students may enroll for academic credit only. The AFROTC program is optimized to cover eight semesters of a typical student career. However, the program can be tailored to accommodate as few as the final
six semesters prior to degree completion. Contact the Department of Aerospace Studies for details.

**General Military Course (GMC)**
Qualified freshman and sophomore students may enroll as Air Force ROTC cadets in the general military course. This program allows students to “try out” Air Force ROTC for up to two years without incurring any obligation unless on an Air Force ROTC scholarship. Students will learn about Air Force history, the historical development of airpower, and basic officer skills. Testing and screening are accomplished during the sophomore year to determine those cadets qualified for enrollment in the professional officer course. Enrollment in AERO 101/AERO 102 or AERO 201/AERO 202, plus the corequisite lab, is required to maintain good standing in the GMC.

**Professional Officer Course (POC)**
Upon successful completion of a four-week field-training course at an Air Force base, qualified cadets may enroll in the professional officer course during their last two years of college. POC courses offered by the Department of Aerospace Studies are designed to prepare selected juniors and seniors for their responsibilities as Air Force officers. A subsistence stipend is paid during the last two years of college to cadets maintaining the minimum grade point average for advancement. Enrollment in AERO 301/AERO 302 and AERO 401/AERO 402, plus the corequisite lab, is required to maintain good standing in the POC. Successful completion of the POC results in receiving a commission as a second lieutenant in the United States Air Force.

**Program Qualification Requirements**
- Be a full-time undergraduate student
- Be a U.S. citizen
- Meet AFROTC height and weight standards
- Have good moral character and no history of illegal drug use or serious civil involvements
- Be medically qualified
- Pass the Air Force Officer Qualifying Test
- Pass an AFROTC Physical Fitness Assessment Test
- Successfully complete field training requirements
- Be in good academic standing
- Be between 17 and 30 years old
- Not be a single parent

**Scholarship Opportunities**
College Students: Air Force ROTC offers two, three, and four-year scholarships to college students in many majors. These scholarships include partial to full tuition and fees, a book allowance, and a monthly nontaxable stipend. Selection is based on student scores on the Air Force Officer Qualifying Test, cumulative grade point average, a physical fitness assessment, SAT (or equivalent) score and a rating from the cadre. To apply for any scholarship, contact the Department of Aerospace Studies.

High-School Seniors and Graduates: There are also scholarships available, on a competitive basis, to high-school seniors or graduates who have not enrolled as full-time college students. For up to four years, these scholarships pay partial to full tuition and fees, a textbook allowance, plus a monthly nontaxable stipend. Students should apply at afrotc.com (http://www.afrotc.com) prior to December 1 of the year preceding the fall term they would enter the University full-time.

**Physical Conditioning**
Mandatory physical conditioning is an integral part of the Department of Aerospace Studies curriculum and is required for all Leadership Lab courses including:

**Courses**

**AERO 101 - The Foundation of the U.S. Air Force I (1 Credit)**
Survey course introducing students to the U.S. Air Force and AFROTC. Topics include mission and organization of the Air Force, officer skills, professionalism, military customs and courtesies, and officer career opportunities.

**AERO 101L - Initial Military Training Cadet Leadership Laboratory I (0 Credits)**
Provides cadets the basic skills/knowledge to be functional members of the cadet corps, and activities to build camaraderie and esprit-de-corps. Includes mandatory physical fitness program.

**AERO 102 - The Foundation of the U.S. Air Force II (1 Credit)**
Continuation of AERO 101. Additional topics include Air Force core values, leadership principles, group leadership dynamics, and an introduction to verbal and written communications skills.

**AERO 102L - Initial Military Training Cadet Leadership Laboratory II (0 Credits)**
Continuation of AERO 101L. Exposure to additional information on an Air Force career. Scenarios and problems teach followership and leadership skills. Includes mandatory physical fitness program.

**AERO 201 - The Evolution of the U.S. Air Force I (1 Credit)**
Examines USAF air and space power from a historical perspective. Covers the earliest aircraft, both World Wars, the Korean and Vietnam conflicts, and air and space employment during the Cold War.

**AERO 201L - Field Training Preparation Cadet Leadership Laboratory I (0 Credits)**
Preparation of students for summer training at an Air Force base; teaching drill and other leadership experiences. Includes mandatory physical fitness program.

**AERO 202 - The Evolution of the U.S. Air Force II (1 Credit)**
Continuation of AERO 201. This course continues to explore Air Force history, beginning with the Vietnam era and culminating with the application of air and space power in recent conflicts.
AERO 202L - Initial Field Training Preparation Cadet Leadership Laboratory II (0 Credits)
Continuation of AERO 201L. Focuses on AFROTC Honor Code, Field Training Manual/procedures, and expeditionary skills required at field training. Includes mandatory physical fitness program.

AERO 301 - Air Force Leadership Studies I (4 Credits)
Study of leadership, management fundamentals, the profession of arms, personnel evaluation systems, ethics, motivation, team building, change management, and communication skills. Analyses of leadership and management case studies.
Corequisite: AERO 301L.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 301L - Intermediate Cadet Leader Leadership Laboratory I (0 Credits)
Provides cadets opportunities to develop leadership and followership skills, as well as sharpen their planning, organization, and communication ability. Includes mandatory physical fitness program.
Corequisite: AERO 301.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 302 - Air Force Leadership Studies II (4 Credits)
Continuation of AERO 301. Topics include developing subordinates, conflict management, counseling, influence, authority and responsibility, accountability, and moral leadership. Includes case studies on effective supervision and accountability.
Prerequisites: AERO 301.
Corequisite: AERO 302L.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 302L - Intermediate Cadet Leader Leadership Laboratory II (0 Credits)
Continuation of AERO 301L. Allows intermediate cadet leaders to further develop leadership and management skills essential in Air Force officers. Includes mandatory physical fitness program.
Prerequisites: AERO 301L.
Corequisite: AERO 302.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 401 - National Security/Leadership Responsibilities/Commissioning Preparation (4 Credits)
Study of U.S. Constitution, the Armed Forces, civilian control of the military, elements of national security, USAF doctrine, Total Force, the Joint environment, terrorism, and regional and cultural studies.
Prerequisites: AERO 302.
Corequisite: AERO 401L.

AERO 401L - Senior Cadet Leader Leadership Laboratory I (0 Credits)
Provides senior cadet leaders opportunities to develop leadership and supervisory skills, and to effectively manage resources toward mission accomplishment. Includes mandatory physical fitness program.
Prerequisites: AERO 302L.
Corequisite: AERO 401.

AERO 402 - Preparation for Active Duty (4 Credits)
Continuation of AERO 401. Topics include additional regional studies, military justice, personnel feedback, evaluation and promotion systems, the military profession, current issues affecting the military, and preparation for active duty.
Prerequisites: AERO 401.
Corequisite: AERO 402L.

AERO 402L - Senior Cadet Leader Leadership Laboratory II (0 Credits)
Continuation of AERO 401L. Allows senior cadet leaders advanced opportunities to hone their leadership in preparation for entering active duty. Includes mandatory physical fitness program.
Prerequisites: AERO 401L.
Corequisite: AERO 402.

AERO 499L - Extended Cadet Leader Leadership Laboratory (0 Credits)
Provides extended cadet leaders opportunities to continue developing leadership, managerial, and communication skills, and to mentor junior cadet corps members. Includes mandatory physical fitness program.
Prerequisites: 402L.

African American Studies

Department Website (http://www.cas.sc.edu/afra/)
Qiana Whitted, Director

The African American Studies Program provides undergraduate majors and minors with the interdisciplinary tools to study the experiences of people of African descent and the resources to evaluate black historical, cultural, social, economic and political developments in South Carolina, the United States, and beyond. With courses organized around the two broad subject areas of “Society and History” and “Arts and Culture,” students will have the opportunity to explore the breadth of the discipline before focusing on an individual plan of study. The program’s principal strengths include black political and social movements, African-American literature, and comparative cultural anthropology.

Courses

AFAM 200 - Freedom Papers: Narratives of Race and Nation (3 Credits)
A study of the United States founding documents that emphasizes how the experiences of African American citizens throughout history and culture shape the country’s values, norms, and ideals.

AFAM 201 - Introduction to African American Studies: Social and Historical Foundations (3 Credits)
Introduction to the key debates, figures, and concepts that are fundamental to the interdisciplinary study of the historical, political, and social development of black life in America.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 202 - Introduction to African-American Studies (3 Credits)
Introduction to the analysis and discussion of creative works and traditions by and about African Americans through folklore, music, art, dance, and literature.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
AFAM 207 - Introduction to African American Religions (3 Credits)
The variety of religious traditions of African Americans, with emphasis on the contexts in which they developed.
Cross-listed course: RELG 207
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 218 - Convergence and Divergence in African American and Jewish Relations: Historical and Contemporary (3 Credits)
An examination of African American and Jewish American inter-ethnic, historical and contemporary connections and disconnections. Implications for educational, social, and social settings are considered.
Cross-listed course: EDTE 218, JSTU 218
Carolina Core: GSS, VSR

AFAM 303 - African-American Cultures (3 Credits)
An examination of African-American cultures in the New World. 03: 07/05/2019.
Cross-listed course: ANTH 231
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 308 - African-American Feminist Theory (3 Credits)
An interdisciplinary survey of the contributions of African-American women to feminist theory.
Cross-listed course: WGST 308
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 330 - Psychology and the African-American Experience (3 Credits)
Psychological theory and research as it applies to African Americans. Explores Africentric and other perspectives and roles of culture, racism, and historical phenomena.
Cross-listed course: PSYC 330
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 331 - Black Experience in the United States to 1865 (3 Credits)
The social, cultural, economic, and political life of black people in the United States to 1865.
Cross-listed course: HIST 211
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 332 - Black Experience in the United States since 1865 (3 Credits)
The social, cultural, economic, and political life of black people in the United States since 1865.
Cross-listed course: HIST 212
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 335 - The American Civil Rights Movement (3 Credits)
Examination of the origins of Jim Crow and the multi-faceted struggle against it, and other forms of racial inequality, in the American South and the rest of the US since the early 20th century.
Cross-listed course: HIST 455
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 343 - Religions of the African Diaspora (3 Credits)
Explore development/theologies of African/African Diaspora religions; examine misunderstandings; arrive at a more sophisticated and nuanced vision of these religions and the people who hold them.
Cross-listed course: RELG 343
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 348 - Environmental Racism and Justice (3 Credits)
History of the environmental justice movement and the unequal distribution of environmental harms on low income, minority, and historically marginalized groups.
Cross-listed course: ENVR 348

AFAM 350 - Antiracist Education (3 Credits)
Basic concepts, issues, and practices of antiracist education. Topics include individual and institutional racism, overt and covert racism, curriculum, textbooks, power relationships, teacher-student relationships, and privacy.
Cross-listed course: EDFI 350
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 353 - Introduction to U.S. Racial and Ethnic Politics (3 Credits)
Survey of theories of the impact of race, ethnicity, and racism on American politics, and analysis of major policies and racial group experience regarding American citizenship.
Cross-listed course: POLI 353
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 355 - Race and Ethnic Relations (3 Credits)
Theoretical and empirical approaches related to race/ethnicity and the current state of race relations in American, with some attention to global issues.
Cross-listed course: SOCY 355
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 364 - African-American Politics (3 Credits)
African-American politics from the colonial period to the present. Emphasis on voting rights and strategies to advance black representation.
Cross-listed course: POLI 364
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
AFAM 365 - Medical Experimentation and the Black Body (3 Credits)
A cross-disciplinary study of how the bodies of Africans and African Americans were used in medical experimentation, starting in the late 18th century and continuing to the present. 03: 07/05/2019.
Cross-listed course: ANTH 263
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 366 - Medicine, Disease, and Slavery (3 Credits)
An interdisciplinary study of the health of enslaved African Americans during the nineteenth century by focusing on the conceptions, experiences, and dynamics of the relationship between slaves, medicine, healing, and their masters in the Antebellum American South.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 380 - Cultural History of Hip Hop Music (3 Credits)
Roots of rap/hip hop music from African bardic tradition to African American vernacular traditions and development as a musical genre; rap's musical and verbal traits and political ideologies; hip hop's influence on mainstream American society and global youth.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 393 - Race and Science Fiction (3 Credits)
Draws on science fiction to understand the contemporary history of American racial and ethnic politics and to speculate about the significance of race in America's political future.
Cross-listed course: POLI 393
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 397 - Special Topics in African-American Society and History (3 Credits)
Reading and research on selected social and historical topics in African American studies. May be repeated as content varies by title.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 398 - Special Topics in African-American Arts and Cultures (3 Credits)
Reading and research on selected arts and cultural topics in African-American studies. May be repeated as content varies by title.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

AFAM 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

AFAM 402 - African American Political Thought (3 Credits)
Survey of many of the major schools of historic and contemporary African American political thought.
Cross-listed course: POLI 402
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 420 - Slavery, Literature & Culture (3 Credits)
Interdisciplinary analysis of how the experiences of enslaved people are represented through fiction, autobiography, film, art, and new media.

AFAM 428A - African-American Literature I: to 1903 (3 Credits)
Representative works of African-American writers to 1903.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270 - ENGL 292.
Cross-listed course: ENGL 428A
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 428B - African-American Literature II: 1903 – Present (3 Credits)
Representative works of African-American writers from 1903 to the present.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270 - ENGL 292.
Cross-listed course: ENGL 428B
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 438B - African Literature (3 Credits)
Authors and literary forms representative of Africa.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270 - ENGL 292.
Cross-listed course: ENGL 438B
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 442 - African-American English (3 Credits)
Linguistic examination of the structure, history, and use of African-American English, as well as literary presentations, language attitudes, and issues relating to education and the acquisition of Standard English.
Cross-listed course: ANTH 442, ENGL 457, LING 442
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 463 - Jim Crow: Histories & Revivals (3 Credits)
This course critically examines the continuities and discontinuities between Jim Crow and our current historical and political moment.
Cross-listed course: HIST 463

AFAM 476 - Black Activism (3 Credits)
Critical review of theories of community organizing, grassroots activism, and social movements, and examination of contemporary forms of black activism.
Cross-listed course: POLI 476
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
AFAM 486 - African-American Rhetoric (3 Credits)
African-American rhetoric as manifested in speeches, essays, and other rhetorical artifacts.
Prerequisites: WGST 111 or WGST 112 or ANTH 102.
Cross-listed course: ENGL 486, SPCH 486
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 487 - Black Women Writers (3 Credits)
An examination of literature by and about black women, including fiction, poetry, drama, and autobiography. This study will focus on issues that emerge from the creative representations of black women and the intersections of race, gender, sexuality, and class that interrogate what is both particular and universal experiences.
Prerequisites: ENGL 101, ENGL 102.
Cross-listed course: ENGL 487, WGST 487
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 498 - Seminar in African-American Studies (3 Credits)
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 499 - Seminar in African-American Studies (3 Credits)
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 515 - Race, Gender, and Graphic Novels (3 Credits)
Representations of race and gender in comics with a special emphasis on the experiences of African Americans.
Cross-listed course: WGST 515
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AFAM 517 - An Anthropological View of Blacks in Film (3 Credits)
Cultural representations, constructions, production, and consumption of African-American identity in the popular culture medium of feature films.
Cross-listed course: ANTH 517
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 565 - African American Theatre (3 Credits)
The major movements, figures, plays, and critical strategies that have marked the development of African American theatre in the 19th, 20th, and 21st centuries.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270 - ENGL 292.
Cross-listed course: ENGL 565, THEA 565
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 580 - Culture and Identity in the African Diaspora (3 Credits)
Students will explore the African Diaspora as a social, cultural, and historical formation with Africa at its center, focusing on US, Latin American, and Caribbean African-descended communities.
Cross-listed course: ANTH 580
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

Anthropology

Department Website (http://www.cas.sc.edu/anth/)

Jennifer Reynolds, Chair

The department offers an undergraduate major in anthropology leading to the Bachelor of Arts degree.

Programs

- Anthropology Minor (p. 38)
- Anthropology, B.A. (p. 39)
- Medical Anthropology Minor (p. 42)

Courses

ANTH 101 - Primates, People, and Prehistory (3 Credits)
An exploration of human origins, human evolution, human prehistory, and cultural existence from its less complex forms to early civilizations. An introduction to the concepts, methods, and data of physical, biological, and archaeological anthropology.
Carolina Core: GSS

ANTH 102 - Understanding Other Cultures (3 Credits)
An exploration and comparison of selected contemporary cultures, including their languages. An introduction to the concepts, methods, and data of socio-cultural anthropology and anthropological linguistics.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 161 - Human Origins: An Introduction to Biological Anthropology (4 Credits)
An introduction to the science of biological anthropology, a sub-field of anthropological that emphasizes a focus on humanity and its origin from a biological perspective, employing laboratory components to complement and reinforce lecture materials.
Carolina Core: SCI

ANTH 201 - Anthropological Inquiry in Undergraduate Research (3 Credits)
Introduces research-based learning in anthropology from a four-field perspective. To encourage self-reflective, professional thinking and provide experience and practice in professional skills and applications in anthropology.
Graduation with Leadership Distinction: GLD: Research

ANTH 203 - Comparing Cultures Through Film (3 Credits)
Human behavior in differing cultural contexts through ethnographic films of social relations in selected societies.

ANTH 204 - Plagues Past and Present (3 Credits)
An overview of how plagues and epidemics have shaped human prehistory and history. How large-scale social transformations have produced forms of human/disease interactions. How infectious disease has been conceptualized at different times and by different cultural groups and treated as a threat to the social order.
Carolina Core: GSS

ANTH 206 - Anthropology of Magic and Religion (3 Credits)
A comparative examination of such topics as ritual, cosmology, revitalization movements, magic, witchcraft, myth, and possession.
Cross-listed course: RELG 260
ANTH 207 - Gender and Culture (3 Credits)
Anthropological study of gender, with emphasis on cross-cultural investigation of the interaction of biological, cultural, and environmental factors including intersections of race, social class, and sexuality as influences gender behavior. 03/07/2019.

Cross-listed course: WGST 207

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 208 - Anthropology of Globalization and Development (3 Credits)
Examine cross-cultural definitions and experiences of globalization and development, through topics including colonial legacies of inequality, migration, land use, economic restructuring, media, consumption, tourism, health, and participatory development.

Graduation with Leadership Distinction: GLD: Global Learning

ANTH 209 - Introduction to Folklore (3 Credits)
Folk expression as shaped by various cultures; fieldwork methodology and anthropological theory.

ANTH 210 - Human Life Cycles in Different Cultures (3 Credits)
Childhood, maturity, old age, and gender socialization within the family.

Cross-listed course: WGST 210

Carolina Core: GSS

Graduation with Leadership Distinction: GLD: Community Service, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 211 - Learning Across Cultures (3 Credits)
Classroom ethnography, bilingualism, cultural minorities, communication across cultural boundaries. Films, videotapes, and fieldwork in classroom settings.

Carolina Core: GSS

Graduation with Leadership Distinction: GLD: Global Learning

ANTH 212 - Food and Culture (3 Credits)
Biological and cultural interactions affecting foodways around the world, and associated ethical issues.

Carolina Core: GSS, VSR

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 213 - Ethnobotany: Plants and Peoples (3 Credits)
Anthropological overview of the interactions between cultures around the world and the plants that affect them, from cultural, biological, archaeological, and linguistic points of view.

Carolina Core: GSS

ANTH 214 - Drinking in Culture: Anthropology of Alcohol (3 Credits)
Cultures of alcohol production and consumption from ancient times to the present, including relationships among social roles of alcohol, technological innovations, agriculture, and economy in an anthropological perspective.

ANTH 216 - Violence and Peace: Anthropological Perspectives (3 Credits)
Violence and peace in current events, cultural practices, historical periods, and everyday experiences. The ethics shaping violence and peace-making strategies. Classroom discussions and lectures analyzing harm and wellbeing. Themes addressing the Values, Ethics, and Social Responsibility (VSR) Carolina Core component, including colonialism, environmental exploitation, bondage, mass extinctions, and racism.

Carolina Core: VSR

ANTH 219 - Great Discoveries in Archaeology (3 Credits)
Survey of key archaeological discoveries from around the world.

ANTH 221 - Forensics of Sherlock Holmes (3 Credits)
Forensic methods of Sherlock Holmes within the context of modern forensic science. Aspects of forensic science including history of the discipline, forensic pathology, entomology, print analyses, crime scene analysis, forensic anthropology, early scientific theory, and anthropological theory of Holmes.

ANTH 222 - Modernity Archaeology and the Recent Past (3 Credits)
Explores the last five centuries of world history, using artifacts and archival sources. Evidence such as probate records, bottles, and geophysical maps are analyzed to discover the age of sites and answers to questions about topics such as colonialism, race, technology, piracy, class, Native Americans, industrialization, slavery, inequality, capitalism, and gender.

ANTH 224 - Indigenous Caribbean Archaeology (3 Credits)
Historical archaeology and ethnography of the Casimiroid, Ortoiroid, Saladoiid, Ostionoid, Taino and Carib indigenous culture of the Caribbean from 4,000 BC to 1524 AD. Emphasis on social complexity, religion, art and political organization to illustrate the diversity and richness of Amerindian Caribbean life until their rapid decline after European contact.

ANTH 225 - Archaeology in Film and Popular Culture (3 Credits)
Archaeological images and ideas in modern popular culture, including film and fiction.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 226 - Biblical Archaeology (3 Credits)
The fundamental elements of human culture as it relates to biblical archaeology. The defining characteristics of different kinds of society through interdependency of language and culture. The affects of modern world interests in defining / redefining this area

Cross-listed course: RELG 208

ANTH 227 - Forbidden Archaeology: Fantasies, Frauds, and Mysteries of the Human Past (3 Credits)
History and basis of several popular “fringe” ideas about the human past that utilize archaeological information: giants, Ice Age civilizations, and pre-Columbian transoceanic contact.

ANTH 229 - Southeastern Archaeology (3 Credits)
Major cultural milestones and lifeways experienced by Indians in the archeological record of the southeastern U.S., including colonization, religion, trade, invention of pottery, and place-making.

ANTH 230 - Diversity in the United States (3 Credits)
Application of techniques and insights of social and cultural anthropology to selected cultural settings in contemporary USA.

ANTH 231 - African-American Cultures (3 Credits)
An examination of African-American cultures in the New World.

Cross-listed course: AFAM 303

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 232 - Contemp Cultures of South Carolina (3 Credits)
Application of the methods & techniques of socio-cultural anthropology to the contemporary cultures of SC. Examination of contrasts such as low country and up country, black and white, and rich and poor as they are manifested in cultural patterns.

ANTH 234 - Caribbean Cultures (3 Credits)
Ethnographic approach to Caribbean cultures and societies. Topics include colonial histories and experience, gender and race relations, beliefs and religious life, verbal arts, literature, and Creole language.
ANTH 236 - Cultures of Africa (3 Credits)
A comparative study of ethnographic data on African cultures with emphasis upon its significance for broader anthropological theory.

ANTH 237 - Cultures of Islam (3 Credits)
Diversity of lifestyles and institutions of Islam from Morocco to Indonesia, with attention to everyday life in small communities.

ANTH 238 - Middle Eastern Cultures (3 Credits)
A consideration of selected problems in the social and cultural life of peoples in the Middle East with emphasis on non-Arab populations.

ANTH 240 - South Asian Cultures (3 Credits)
Society and culture in South Asia; economic and political institutions, kinship, and religion as they pertain to the daily lives of people in the Subcontinent. Emphasis on India. Bangladesh, Nepal, Pakistan, and Sri Lanka also included.

ANTH 241 - Southeast Asian Cultures (3 Credits)
Social and cultural patterns of the region and how they influence current developments, especially Indonesia, Thailand, Vietnam, and the Philippines.

ANTH 242 - Chinese Popular Culture (3 Credits)
An overview of Chinese popular culture with an introduction to broad anthropological frameworks concerning popular culture.

Graduation with Leadership Distinction: GLD: Global Learning

ANTH 243 - Japanese Cultures (3 Credits)
An exploration of Japanese values and the institutions that shape Japanese behavior through analysis of rural and urban community studies and how Japanese people present themselves.

Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Internships

ANTH 244 - American Indian Nations Today: From Hard Times to Hard Rock (3 Credits)
Contemporary Indian Country in anthropological, historical, cultural, economic, and political contexts.

Carolina Core: GSS, VSR

ANTH 260 - Planet of the Apes: Behavior and Biology (3 Credits)
A survey of field and laboratory investigations of the comparative anatomy and behavior of nonhuman primates.

ANTH 261 - Human Variation (3 Credits)
The biocultural processes of human variation.

ANTH 262 - Basic Forensic Anthropology (3 Credits)
Survey of the basic scientific methods and applications of forensic anthropology.

ANTH 263 - Medical Experimentation and the Black Body (3 Credits)
A cross-disciplinary study of how the bodies of Africans and African Americans were used in medical experimentation, starting in the late 18th century and continuing to the present.

Cross-listed course: AFAM 365

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 270 - Anthropology of Nonverbal Communication (3 Credits)
Body language, facial expressions, gestures, use of interpersonal space, and other nonverbal systems of communication and behavior in terms of pertinent theories, research methodology, findings, and cross-cultural implications.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ANTH 271 - Language and Popular Culture (3 Credits)
Linguistic anthropological study of forms of language through the lens of popular culture. Explore the ethnography of communication through play and performance, discursive and semiotic practices, and varieties of language invoked in popular cultural forms that provide resources for cultural reproduction and contestation.

Cross-listed course: LING 241

ANTH 273 - Cross-Cultural Communication (3 Credits)
This course introduces students to the fields of interactional sociolinguistics and linguistic anthropology. Students will learn how they approach the study of cross-cultural and intercultural forms of (mis)communication within the context of globally interconnected people, places, and systems of communication.

Cross-listed course: LING 273

Carolina Core: GSS

ANTH 280 - Humans Going Nuclear: Atomic Bombs, Cold War, and the Fallout (3 Credits)
Ethnographic study of the Cold War, nuclear culture, and its aftermath.

Carolina Core: GSS, VSR

ANTH 291 - Selected Topics in Anthropology (1-3 Credits)
Topics of special interest. May be taken more than once as topics change.

ANTH 292 - Disease, Health, and Social Inequities (3 Credits)
Course focuses on political and economic processes contributing to the unequal access to health and social inequalities.

ANTH 301 - Latin American Cultures (3 Credits)
Comparative study of selected Latin American cultures with emphasis on their significance for a broader anthropological theory.

Cross-listed course: LASP 311

Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 313 - Ethical Dilemmas in Anthropology (1 Credit)
An examination of ethical decision-making encountered in the practice of anthropology.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 318 - Material Culture (3 Credits)
Material aspects of cultures from artifact production in historical societies to contemporary industrial crafts; the cultural context of artifacts; fieldwork; relevant anthropological theories.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 319 - Principles of Archaeology (3 Credits)
Introduction to principles, methods, and theory of archaeology, including prehistoric and historic case studies.

ANTH 320 - Archaeology Theory (3 Credits)
This course charts the history of ideas in archaeology, over the past century, as a means of understanding current directions in archaeological thinking and current applications in archaeological practice.

Prerequisites: ANTH 319.

ANTH 321 - South Carolina Archaeology (3 Credits)
Prehistoric and historic archaeology of South Carolina.

ANTH 322 - Field School in Archaeology (3-6 Credits)
Archaeological field techniques, laboratory analysis and data interpretation.

Prerequisites: ANTH 319.
ANTH 323 - Field School in Ethnography (3-6 Credits)
Designing and carrying out ethnographic research including project design, data collection, analysis and description.

ANTH 324 - Ethnoarchaeology (3 Credits)
Current research on use of modern material culture in archaeological analysis.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 327 - Prehistoric Civilizations of the New World (3 Credits)
Study of Mesoamerican and South American civilizations, particularly the Mayan, Aztec, and Inca states. Processes of state formation as reflected in archaeological data.

Cross-listed course: LASP 325

ANTH 328 - Ancient Civilizations (3 Credits)
Causes for the rise and fall of several civilizations; ideological and ecological factors, unique events, and personalities versus general processes.

ANTH 331 - Mesoamerican Prehistory (3 Credits)
Cultural development and variation in Mesoamerica from the first arrival of man to the arrival of Europeans. Particular attention to cultural continuities from prehistoric times.

Cross-listed course: LASP 322

ANTH 333 - North American Prehistory (3 Credits)
Prehistoric anthropology in North America from the first arrival of man through the beginning of European acculturation.

ANTH 342 - Environmental Anthropology: Cross-cultural Perspectives on Environmental Change (3 Credits)
Cross-cultural perspectives on environmental issues.

Cross-listed course: ENV 342

ANTH 349 - Anthropology of Work (3 Credits)
Techniques, customs, verbal expressions, and expressive styles of workers in a variety of occupational cultures.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 350 - Anthropology & Development (3 Credits)
An examination of political and economic change in contemporary peasant communities.

Graduation with Leadership Distinction: GLD: Global Learning

ANTH 351 - The Family in Cross-Cultural Perspective (3 Credits)
Kinship, systems of descent, marriage, and domestic organization in different cultures. Variations in childrearing practices, gender, and other aspects of social relations in kin groups.

Cross-listed course: WGST 351

Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 353 - Anthropology of Law and Conflict (3 Credits)
Understanding human behavior through the examination of cultural norms, mechanisms of social control, and social conflict.

Graduation with Leadership Distinction: GLD: Global Learning

ANTH 355 - Language, Culture, and Society (3 Credits)
Language in its social setting. The relationship between linguistic categories and culture categories. Language and cognition.

Cross-listed course: LING 340

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 356 - Anthropology of Art (3 Credits)
Sculpture, drama, ceramics, weaving, music, and other arts from tribal societies will be discussed in terms of the religious, social, and aesthetic principles that underlie their production, use, and interpretation.

ANTH 357 - Psychological Anthropology (3 Credits)
Cultural differences and pan-cultural similarities in such psychological features as personality and cognition.

ANTH 359 - Theories of Culture (3 Credits)
Theory and practice of ethnology/sociocultural anthropology, based on a wide range of simple and complex societies.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 360 - Anthropology of Sex (3 Credits)
An overview of human sexuality in different cultures in regions across the globe; an examination of anthropological frameworks for sexuality that draw on historical and modern cultural conceptions.

Graduation with Leadership Distinction: GLD: Global Learning

ANTH 361 - Becoming Human (3 Credits)
The processes of hominoid development with a review of the basic principles of physical and behavioral evolution using the fossil record and the evolving ecological and psychosocial contexts.

ANTH 366 - Medicine, Disease and Slavery (3 Credits)
An interdisciplinary study of the health of enslaved African Americans during the nineteenth century by focusing on the conceptions, experiences, and dynamics of the relationship between slaves, medicine, healing, and their masters in the Antebellum American South.

Carolina Core: GSS

ANTH 371 - Ethnography of Communication (3 Credits)
Ethnographic analysis of communication in human groups and institutions.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 373 - Introduction to Language Sciences (3 Credits)
Introduction to the linguistic component of human cognition. Properties of speech, the organization of language in the mind/brain, cross-linguistic universals, child language acquisition, and aspects of adult language processing.

Cross-listed course: LING 300, PSYC 470

ANTH 374 - Cognitive and Social Aspects of Bilingualism (3 Credits)
Bilingual language development, social and cultural aspects of bilingualism, the bilingual brain, bilingualism throughout the lifespan.

ANTH 381 - Gender and Globalization (3 Credits)
Examines the dialectic between globalization and the social construction of gender. Topics include the global assembly line, transnational markets for domestic labor and sex workers, and global feminist alliances.

Prerequisites: WGST 111 or WGST 112 or ANTH 102.

Cross-listed course: WGST 381

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences
ANTH 388 - Cultures, Pregnancy, and Birth (3 Credits)
Anthropological study of pregnancy and birth with a cross-cultural focus comparing the United States to other nations. Examination of cultural factors such as prenatal care, dietary practices, taboos, birth location, practitioners, and birthing styles.
Cross-listed course: WGST 388
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 391 - Selected Topics in Anthropology (1-3 Credits)
Topics of special interest. May be taken more than once as topics change.

ANTH 392 - Global Women's Health (3 Credits)
This course examines health concerns important to the lives of women around the world through an overview of contemporary issues and challenges in the field of global health, broadly construed.
Cross-listed course: WGST 392
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 399 - Independent Study (3-6 Credits)
Graduation with Leadership Distinction: GLD: Research

ANTH 442 - African-American English (3 Credits)
Linguistic examination of the structure, history, and use of African-American English, as well as literary presentations, language attitudes, and issues relating to education and the acquisition of Standard English.
Cross-listed course: AFAM 442, ENGL 457, LING 442
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 498 - Senior Thesis (3 Credits)
Directed research resulting in a written report. 00.
Prerequisites: GPA of 3.
Graduation with Leadership Distinction: GLD: Research

ANTH 499 - In the Tradition of Anthropology (3 Credits)
A seminar synthesizing the major with an examination of anthropology as a field of inquiry.

ANTH 512 - Gender Issues in China (3 Credits)

ANTH 513 - Anthropological Ethnobotany (3 Credits)
Survey of how each anthropological subfield studies the interrelationships between plants and peoples. Application of methods, including interviewing and data analysis.

ANTH 515 - Tradition and Transformations in Islamic Cultures (3 Credits)
Islam as a dynamic cultural tradition: emphasis on the tension between Islamization and the larger Islamic tradition.
Cross-listed course: RELG 551
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

ANTH 517 - An Anthropological View of Blacks in Film (3 Credits)
Cultural representations, constructions, production, and consumption of African-American identity in the popular culture medium of feature films.
Cross-listed course: AFAM 517
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 518 - Visual Cultures (3 Credits)
Survey of visual anthropology including theoretical frameworks of ways of seeing, ethnographic photography and filmmaking, contemporary technologies, and their effects on culture.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 520 - Field Problems in Ethnology (6 Credits)
A two-semester class and field session. Research design, field methods, interpretation of data, and the development of theory from the data.

ANTH 525 - Ethnoecology (3 Credits)
Seminar exploring human-plant-animal-natural interactions within an anthropological framework.

ANTH 533 - North American Archaeology (3 Credits)
Prehistoric and historic archaeology.

ANTH 534 - Prehistoric Archaeology of South America (3 Credits)
Prehistoric archaeology of the South American continent.
Cross-listed course: LASP 425

ANTH 535 - Conflict Archaeology (3 Credits)
Anthropological and archaeological theories and methods in the study of conflict, war, and warfare. Causes, effects, outcomes of sustained social acts of violence of groups, tribes, states, and nations. Evolutionary, biological, social origins of warfare. History, strategy, and tactics, battlefield archaeology.

ANTH 536 - Public Archaeology (3 Credits)
Philosophy and mechanics of modern archaeological Cultural Resource Management (CRM). CRM legislation, regulation, and process. Contemporary issues and problems in Public Archaeology including Native American reburial negotiations, conflict resolution, ethics, looting, business practices, standards, contexts and protection.

ANTH 541 - Field Problems in Archaeology (3 Credits)
Archaeological field methods and techniques such as excavation, flotation, sampling, surveying, photography, and remote sensing.
Prerequisites: ANTH 320.

ANTH 546 - Forensic Archaeological Recovery (FAR) (3 Credits)

ANTH 550 - Archaeological Laboratory Methods (3 Credits)
Laboratory on basic prehistoric and historic artifact analysis, including analytical methods, laboratory equipment, and data interpretation. May be repeated.
Prerequisites: ANTH 319 or ANTH 322.

ANTH 551 - Medical Anthropology: Fieldwork (3 Credits)
Application of observation techniques, field notes, informant interviewing, and secondary data analysis to interpreting differential perceptions of health problem solving in the community and clinic.

ANTH 552 - Medical Anthropology (3 Credits)
Socio-cultural factors in health, illness, healing, and in medical systems. Cross-cultural and ethnographic evidence for public health research and program applications.
Cross-listed course: HPEB 552
Graduation with Leadership Distinction: GLD: Research
ANTH 553 - Anthropological Approaches to Narrative and Performance (3 Credits)
The ways people from various cultures reflect on, reinforce, and construct their social realities through narrating, which will be considered as both artistic expression and social action.
Cross-listed course: LING 545

ANTH 555 - Language and Gender (3 Credits)
Approaches to gender and language emphasizing the social grounding of both; how language reflects sociocultural values and is a tool for constructing different types of social organization.
Cross-listed course: LING 541, WGST 555
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 556 - Language and Globalization (3 Credits)
Anthropological approach to issues of language and globalization. Linguistic consequences of globalization under consideration include communicative patterns, linguistic change, and language and political economy.
Cross-listed course: LING 556
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 557 - Psychological Anthropology (3 Credits)
Psychological aspects of behavior from a cross-cultural perspective.

ANTH 561 - Human Osteology (4 Credits)
An intensive examination of the human skeleton and techniques for anthropological interpretation.

ANTH 565 - Health and Disease in the Past (3 Credits)
Varieties and effects of disease patterns among past populations illustrating biological, environmental, and cultural interrelationships.

ANTH 567 - Human Identification in Forensic Anthropology (3 Credits)
Theories and methodologies necessary for the identification of human skeletal remains in a forensic setting.

ANTH 568 - Nutritional Anthropology (3 Credits)

ANTH 569 - International Development and the Environment (3 Credits)
Intersections of international development and environmental change; study of general theoretical perspectives balanced with case studies from the Global South.
Cross-listed course: GEOG 569
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

ANTH 570 - Ethnographic Film (3 Credits)
Problems in conveying and interpreting ethnographic information on film or tape. Includes syntax, suitability of subject matter to the medium, irrelevant or distracting information, and observer bias.

ANTH 572 - Temporal Processes in Culture (3 Credits)
Clocks, cycles, and contingencies as they affect human societies now and have done so in the past. Theories and models from biology and the other natural sciences will be used to interpret the history of culture.

ANTH 575 - Economic Anthropology (3 Credits)
A cross-cultural study of the economic behavior of pre-literate and literate societies.

ANTH 576 - Archaeology of the African Diaspora (3 Credits)
Foodways, architecture, crafts, and narrative of African-American cultures.

ANTH 577 - Advanced Topics in the Anthropological Study of Social Organization (3 Credits)
Selected recent theoretical and methodological developments in the study of social organization.

ANTH 579 - Cultural Ecology (3 Credits)
An interdisciplinary approach to prehistoric, historic, and contemporary relationships between the development of socio-cultural configurations and ecosystems.

ANTH 580 - Culture and Identity in the African Diaspora (3 Credits)
Students will explore the African Diaspora as a social, cultural, and historical formation with Africa at its center, focusing on US, Latin American, and Caribbean African-descended communities.
Cross-listed course: AFAM 580
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 581 - Globalization and Cultural Questions (3 Credits)
This course examines cultural understandings of and responses to globalization, examining topics such as its history and theories, migration, economic integration and inequality, identity, social movements, and the environment.
Cross-listed course: GEOG 581
Graduation with Leadership Distinction: GLD: Global Learning

ANTH 586 - Discourse, Gender and Politics of Emotion (3 Credits)
Anthropological approach to issues of discourse, gender and emotion. Issues under consideration include the social control, force, and forms of emotional discourse and the relationship between emotion and culture from gender-oriented perspectives.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 591 - Selected Topics (1-3 Credits)
Topics of special interest. May be taken more than once as topics change.

ANTH 600 - Survey of Linguistics (3 Credits)
Survey of core areas of linguistics and extensions to closely related disciplines. Introduction to the linguistic component of human cognition. Formal description and analysis of the general properties of speech and language, the organization of language in the mind/brain, and cross-linguistic typology and universals.
Cross-listed course: ENGL 680, LING 600

ANTH 699 - Reading and Research (3-6 Credits)

Note: In certain cases ANTH 101/ANTH 161 or ANTH 102 can be exempted by permission of the Undergraduate Director in the Department and replaced with two other anthropology courses.

Anthropology, B.A.

Learning Outcomes

- Students will demonstrate their knowledge of the four sub-fields of anthropology, and central themes in the sub-fields. These themes include: 1) the biological and cultural changes that occurred in human prehistory and history 2) cultural diversity worldwide and throughout time 3) relationships between aspects of human life, such as biology, cultural beliefs, material culture, and language and 4) the dynamics at work in different components of cultural systems (e.g. kinship).
- Students will communicate in written form about anthropological themes and topics in a variety of different and appropriate writing styles including research papers, projects, reaction papers, and essay exams. In their writing, students will analyze human situations from an anthropological perspective, and will recognize and evaluate different theories and methods in anthropology.
- Students will demonstrate general techniques of anthropological research and recognize the importance of the principles of anthropological ethics in conducting research. This research will include basic library and internet research, and in some cases, will include data collection and analysis through “hands on” training.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>

</thead>
<tbody>
<tr>
<td>1. Carolina Core</td>
<td>32-44</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>15-18</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>31-46</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>27</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)
INF – Information Literacy (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

Choose 1 of the following to fulfill a Carolina Core requirement:
- ANTH 101
- ANTH 161

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  OR
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300 or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
- ANTH 102
- Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (9 hours of Fine Arts or Humanities)

3. Program Requirements (31-46 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (13-34 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: 7-28 hours of electives will be needed to reach hours to graduate if completing the B.A. with Distinction.

4. Major Requirements (27 hours)

A minimum grade of C is required in all major courses.

**Total Credit Hours** 12

**Major Electives (15 hours)**

- Select **one** course from the ANTH 500-level
- Select an additional **12 hours** from ANTH 200-level or above

Note: Selection of major courses must include at least one of the following courses: ANTH 261, ANTH 319, ANTH 320, ANTH 355, ANTH 366, ANTH 371, ANTH 381, ANTH 518 or ANTH 581.

**B.A. with Distinction (33 hours)**

Departmental Undergraduate Research Track/Intensive Major is available to students majoring in Anthropology who wish to participate in significant research activities in collaboration with, or under the supervision of, a faculty mentor.
Major Courses (21 hours)
- Select one course from Biological Anthropology (3 hours)
- Select one course from Archaeology (3 hours)
- Select one course from Linguistic Anthropology (3 hours)
- Select one course from Sociocultural Anthropology (3 hours)
- Select one Fieldschool, Laboratory, Practicum, Qualitative Methodology or Quantitative Methodology course (3 hours)
- ANTH 201 OR an additional 500-level course (3 hours)
- ANTH 498 (3 hours)

Major Electives (12 hours)
- Select two courses from the ANTH 500-level (6 hours)
- Select an additional 6 hours from ANTH 200-level or above

Note: Selection of major courses must include at least one of the following courses: ANTH 261, ANTH 319, ANTH 320, ANTH 355, ANTH 366, ANTH 371, ANTH 381, ANTH 518 or ANTH 581.

Additional Requirements
- A minimum major GPA of 3.30.
- A minimum cumulative GPA of 3.30.
- Public presentation of the Senior Thesis in a venue approved by the faculty mentor, such as:
  - Annual meeting of the Southern Anthropological Society (or another annual meeting of the appropriate professional organization)
  - A regular or special session of the Department of Anthropology Colloquium Series
  - USC Discovery Day
  - Submission to a professional journal
- A written sponsorship agreement from the faculty mentor to be placed on file in the Department of Anthropology office.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Anthropology, B.A. (https://sc.edu/about/offices_and_divisions/advising/documents/major_maps/2020-2021/2020_anth_map.pdf)

Medical Anthropology Minor
The Medical Anthropology minor develops students’ understanding of health from the perspective of human cultural and biological diversity, preparing them for careers in global health.

Admission Requirements
- The minor is not open to Anthropology majors
- At least 15 hours used in the minor must be earned at UofSC within the Department of Anthropology

Requirements
The minor in Medical Anthropology consists of 18 credit hours or 6 classes.

Departmental or Honors College special topics courses or field schools related to medical anthropology may fulfill the restricted electives requirement, provided that the course substitutions are pre-approved by the office of the Dean of Undergraduate Student Affairs and Advising in Flinn Hall in consultation with faculty content experts in the Department of Anthropology; bring a syllabus to Flinn Hall for the course you want pre-approved. Appeals to register in pre-approved honors college courses should be directed to the Honors College.

Total Credit Hours 18

1 ANTH 102 may not also fulfill the Carolina Core GSS component

Biological Sciences
Department Website (http://www.biol.sc.edu/)

Jeff Twiss, Interim Chair

The Department of Biological Sciences offers a Bachelor of Science degree with a major in biological sciences.

Programs
- Biological Sciences, B.S. (p. 48)
- Biology Minor (p. 51)
- Neuroscience Minor (p. 51)

Courses
BIOL 101 - Biological Principles I (3 Credits)
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology.
Carolina Core: SCI

BIOL 101A - Biological Principles I (3 Credits)
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology. Three lecture hours per week. Restricted to students who have credit for BIOL 101L but lack the lecture.
Prerequisites: BIOL 101L.
BIOL 101L - Biological Principles I Laboratory (1 Credit)
(Recommended concurrent with BIOL 101). Experimental examination of basic principles of cell biology, genetics and metabolism. Three hours per week.
Carolina Core: SCI
BIOL 102 - Biological Principles II (3 Credits)
Introductory survey of plant and animal development, physiology, ecology, and evolution. Three lecture hours per week.
Prerequisites: C or better in BIOL 101.
Corequisite: BIOL 102L.
Carolina Core: SCI
BIOL 102A - Biological Principles II (3 Credits)
Introductory survey of plant and animal development, physiology, ecology, and evolution. Three lecture hours per week. Restricted to students who have credit for BIOL 102L but lack the lecture.
Prerequisites: BIOL 102L.
BIOL 102L - Biological Principles II Laboratory (1 Credit)
Experimental examination of structure and function of plant and animal systems, biodiversity, ecology. BIOL 101, 102, 101L and 102L must be completed prior to enrolling in 300-level or above Biology courses.
Prerequisites: C or better in BIOL 101 and BIOL 101L; recommended concurrent with BIOL 102.
Carolina Core: SCI
BIOL 110 - General Biology (4 Credits)
Basic biological concepts and issues for non-biology majors. Credit may not be given for both this course and BIOL 120. Three lecture, two laboratory hours per week.
Carolina Core: SCI
BIOL 110A - General Biology (Audio-Tutorial) (1 Credit)
Addendum to BIOL 110.
BIOL 120 - Human Biology (3 Credits)
Fundamental principles of human biology. Credit may not be given for both BIOL 110 and BIOL 120. Three lecture hours per week. Not for major credit.
Carolina Core: SCI
BIOL 120L - Laboratory in Human Biology (1 Credit)
Exercises dealing with basic concepts of human biology. Not for major credit.
Prerequisite or Corequisite: BIOL 120.
Carolina Core: SCI
BIOL 200 - Plant Science (3 Credits)
An introduction to plant science for the non-major. This course does not carry major credit, and is not designed as a Plant development, physiology, genetics, evolution, and ecology will be considered. Three lecture hours per week.
Prerequisites: for other biology courses.
BIOL 200L - Plant Science Laboratory (1 Credit)
Laboratory exercises, demonstrations, and audio-visual supplements to BIOL 200. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 200.
BIOL 206 - Genetics and Society (3 Credits)
(Designed for non-major students.) Genetic principles, emphasizing human heredity. Relevance of recent advances in genetics. Three lecture hours per week.
Carolina Core: SCI
BIOL 208 - Our Hungry World from Malthus to McDonalds (3 Credits)
Scientific and social issues concerning the interrelationship of culture and agricultural biotic diversity and technology, climate change, resources management, food security, and human health.
Carolina Core: SCI, VSR
BIOL 220 - Elementary Life Science (4 Credits)
This course will ensure that elementary education majors will understand the fundamental concepts of Biology. Cannot be used for biology major credit.
BIOL 232 - Anatomy (3 Credits)
BIOL 232L - Anatomy Laboratory (1 Credit)
The principles of anatomy as demonstrated by microscopic studies and animal dissection. Three hours per week.
Corequisite: BIOL 232.
BIOL 240 - Applied Human Physiology (3 Credits)
BIOL 242 - Human Physiology (4 Credits)
Functional biology of organ systems in the maintenance of the whole organism; homeostatic relationships. Not available for biology major credit. Three lecture and three laboratory hours per week.
Prerequisites: BIOL 232.
BIOL 243 - Human Anatomy and Physiology I (3 Credits)
Functional anatomy and physiology of the human body, including the integumentary, skeletal, muscular, and nervous systems. Not available for biology major credit. Three lecture hours per week.
Carolina Core: SCI
BIOL 243L - Human Anatomy and Physiology Laboratory (1 Credit)
The principles of anatomy and physiology as demonstrated by microscopic studies, animal dissection, and physiological experiments. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 243.
Carolina Core: SCI
BIOL 244 - Human Anatomy and Physiology II (3 Credits)
Functional anatomy and physiology of the human body, including the cardiovascular, endocrine, excretory, reproductive, digestive, and respiratory systems. Not available for biology major credit. Three lecture hours per week.
Prerequisites: BIOL 243.
Carolina Core: SCI
BIOL 244L - Human Anatomy and Physiology Laboratory (1 Credit)
A continuation of BIOL 243L. One three-hour laboratory per week.
Corequisite: BIOL 244
Carolina Core: SCI
BIOL 250 - Microbiology (3 Credits)
An introduction to bacteria and viruses, emphasizing structure, metabolism, and pathogenesis. Discussion of infectious diseases, antigen-antibody relationships, and anti-microbial agents in chemotherapy. Not available for biology major credit. Three lecture hours per week.
Prerequisites: College-level Biology and Chemistry.
Corequisite: BIOL 250L.

BIOL 250L - Microbiology Laboratory (1 Credit)
Not available for biology major credit. Three hours per week.
Prerequisite or Corequisite: BIOL 250.

BIOL 260 - Physiology (3 Credits)
Physiology of human systems especially susceptible to disturbance: immunobiology, circulation, excretion, metabolism, endocrinology, and muscle physiology. Not for biology major credit. Intended for pharmacy students.
Prerequisites: BIOL 102.

BIOL 270 - Introduction to Environmental Biology (3 Credits)
Basic ecological principles and the impacts of human population growth and technology. Not for major credit.
Carolina Core: SCI

BIOL 270L - Introduction to Environmental Biology Laboratory (1 Credit)
Demonstrations, data analyses, discussions, and films relating to human ecology, resource use, and environmental impact. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 270.

Carolina Core: SCI

BIOL 301 - Ecology and Evolution (3 Credits)
Concepts of evolution, populations, and population interactions; communities and ecosystems. Three lecture hours per week.
Prerequisites: BIOL 102 or MSCI 311.

Graduation with Leadership Distinction: GLD: Research
BIOL 301L - Ecology and Evolution Laboratory (1 Credit)
Experiments, exercises, and demonstrations. Three hours per week.
Prerequisite or Corequisite: BIOL 301.

BIOL 302 - Cell and Molecular Biology (3 Credits)
Principles of eukaryotic cell structure, molecular organization, and physiology. Genome organization and expression. Cell growth, division, and cell-cell interactions. Three lecture hours per week.
Prerequisites: BIOL 102 or MSCI 311.
Prerequisite or Corequisite: CHEM 333.

Graduation with Leadership Distinction: GLD: Research
BIOL 302L - Cell and Molecular Biology Laboratory (1 Credit)
Experiments, exercises, and demonstrations. Three hours per week.
Prerequisite or Corequisite: BIOL 302.

BIOL 303 - Fundamental Genetics (3 Credits)
Basic principles of transmission and molecular genetics; quantitative inheritance; recombination; biochemical aspects of gene function and regulation; developmental genetics and population genetics. Three lecture hours per week.
Prerequisites: BIOL 102 or MSCI 311.

BIOL 351 - Introduction to Animal Science (3 Credits)
Exploration of current careers in the animal industry including a brief overview of the sciences involved in animal production such as genetics and selection, behavior, physiology, reproduction, and nutrition of cattle (beef and dairy), horses, swine, sheep, poultry, and others.
Prerequisites: C or better in BIOL 102.

BIOL 398 - Laboratory Teaching Experience (1 Credit)
Participation in preparation and teaching of undergraduate biological sciences laboratories.
Experiential Learning: Experiential Learning Opportunity
BIOL 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department head is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research
BIOL 405 - Cellular and Molecular Neurobiology (3 Credits)
Cellular and molecular mechanisms underlying the development and functions of the nervous system, such as nervous system patterning, neuronal differentiation/migration, formation of neuronal projections, development of synapses, apoptosis, refinement of neuronal circuits, and how cells and neurons respond to signals from the environment.
Prerequisites: BIOL 302.

BIOL 415 - Comparative Vertebrate Anatomy (4 Credits)
Phylogenetic and comparative aspects of anatomy, reproduction, and embryology of the vertebrates. Three lecture hours and one three-hour laboratory period per week.
Prerequisites: BIOL 102 or MSCI 311.

BIOL 420 - Survey of the Plant Kingdom (3 Credits)
Phylogenetic survey of the major plant divisions; consideration of the structure and development of flowering plants.
Prerequisites: BIOL 301.

BIOL 420L - Survey of the Plant Kingdom Laboratory (1 Credit)
Three hours per week.
Prerequisite or Corequisite: BIOL 420.

BIOL 423 - Medicinal Botany (3 Credits)
A survey of plants affecting human health and how they are used historically and in modern times, with emphasis on the biologically active constituents.
Prerequisites: C or better in BIOL 301 and BIOL 302.

BIOL 425 - Plant Form and Function (3 Credits)
Basic introduction to plants, including cellular biology, energetics, structure-function relationships, development, nutrition, and diversity.
Prerequisites: BIOL 302.

BIOL 425L - Plant Form and Function Laboratory (1 Credit)
Illustration of principles of introductory botany and plant physiology using experiments, exercises, and demonstrations. Three laboratory hours per week.
Prerequisite or Corequisite: BIOL 425.

BIOL 450 - Principles of Biological Oceanography (3 Credits)
Principles and methods of measuring production in the sea. Emphasis on the ocean's role in the global carbon budget. Three lecture hours per week. Scheduled field trips are required.
Prerequisites: MSCI 311, BIOL 301.

Cross-listed course: MSCI 450
BIOL 460 - Advanced Human Physiology (3 Credits)
Functional physiology of human organ systems.
Prerequisites: BIOL 302 or MSCI 311 with a grade of C or better.

BIOL 460L - Advanced Human Physiology Laboratory (1 Credit)
Experiments on organ system functions using different animal models.
Prerequisites: .
Prerequisite or Corequisite: BIOL 460 (with a grade of D or better if used as a
BIOL 461 - Advanced Human Anatomy (3 Credits)
Structure, function, and development of human anatomy.
Prerequisites: Any two of BIOL 301, BIOL 302, or BIOL 303 with a grade of C or better.

BIOL 461L - Advanced Human Anatomy Laboratory (1 Credit)
Practical exercises in structure, function, and development of anatomy
Prerequisites: .
Prerequisite or Corequisite: BIOL 461 (with a grade of D or better if used as a

BIOL 462 - Advanced Microbiology (3 Credits)
The taxonomy, morphology, metabolism, genetics, and ecology of microorganisms.
Prerequisites: C or better in BIOL 302.

BIOL 462L - Advanced Microbiology Laboratory (1 Credit)
Practical exercises with the taxonomy, morphology, metabolism, genetics, and ecology of microorganisms.
Prerequisite or Corequisite: D or better in BIOL 462.

BIOL 465 - Domestic Animal Nutrition (3 Credits)
Elements of nutrition and animal feeding in veterinary practice. Three
lecture hours per week.
Prerequisites: BIOL 302.

BIOL 497 - Undergraduate Seminar in Biological Sciences (1 Credit)
Student seminars and a survey of research in the fields of Biological Sciences.
Prerequisites: BIOL 301, BIOL 302, and BIOL 303, or Instructor's Permission

BIOL 498 - Biological Research: An Introduction (4 Credits)
Methodologies of biological research with emphasis on hypothesis formation, research design, and data collection, and current issues in biology. Two lecture and six laboratory hours per week.
Prerequisites: one 300-level or higher biological laboratory.
Graduation with Leadership Distinction: GLD: Research

BIOL 502 - Environmental Microbiology (3 Credits)
An overview of the microbial world including a survey of the distribution, functioning, and diversity of microorganisms in natural systems.
Discusses the crucial roles that microorganisms play in ecosystem function, biogeochemical cycles, and environmental quality.
Prerequisites: MSCI 102 or BIOL 102, CHEM 112.

Cross-listed course: MSCI 503

BIOL 505 - Developmental Biology (3 Credits)
An introduction to the descriptive and experimental embryology of animals. Living and preserved specimens will be used to demonstrate the basic processes of embryogenesis. Three lecture hours per week.
Prerequisites: or Corequisite: BIOL 302.

BIOL 505L - Developmental Biology Laboratory I (1 Credit)
Descriptive and experimental exercises related to embryology. One three-hour laboratory per week.
Corequisite: BIOL 505.

BIOL 506 - Developmental Biology II (3 Credits)
Molecular aspects of development from gamete formation through tissue and organ differentiation in plants and animals. Three lecture hours per week.
Prerequisites: BIOL 505.

BIOL 506L - Developmental Biology Laboratory II (1 Credit)
A series of experimentally oriented laboratory exercises will be performed. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 506.

BIOL 510 - Invertebrate Zoology (4 Credits)
Phylogenetic and comparative aspects of anatomy, physiology, reproduction, and embryology of the invertebrates.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: MSCI 510
Graduation with Leadership Distinction: GLD: Research

BIOL 523 - Plant Development (3 Credits)
Descriptive and molecular examination of the processes and mechanisms used by plants in organogenesis, differentiation, and morphogenesis. Three lecture hours per week.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 523L - Plant Developmental Laboratory (1 Credit)
Experiments utilizing a genetic approach to the study of plant development. Three laboratory hours per week.
Corequisite: BIOL 523.

BIOL 524 - Mycology (4 Credits)
Taxonomy and morphology of fungi; cultivation, life histories, and economic importance; all classes and major orders considered. Three lecture hours per week.
Prerequisites: BIOL 301.

BIOL 525 - Marine Plants (4 Credits)
Diversity, distribution, physiology, ecology, evolution, and economic importance of marine algal, seagrass, and mangrove communities. Three lecture and three laboratory hours per week. Scheduled field trips are required.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: MSCI 525

BIOL 526 - The Fall Flora (4 Credits)
Two lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

BIOL 527 - The Spring Flora (4 Credits)
Two lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

</tbody>
</table>
BIOL 558 - Stem Cells and The Physiological Environment (3 Credits)
Discussion of how physiological factors, like nutritional status, influence systemic signals to alter stem cell activity, and the physiological stimuli that impact stem cell activity in a variety of organisms (from worms to humans).
Prerequisites: C of higher in BIOL 302.

BIOL 570 - Principles of Ecology (3 Credits)
Interactions of organisms and the environment; ecosystem structure and functions. Three lecture hours per week.
Prerequisites: BIOL 301 or MSCI 311.

BIOL 570L - Principles of Ecology Laboratory (1 Credit)
Three hours per week.
Prerequisite or Corequisite: BIOL 570.

BIOL 571 - Conservation Biology (3 Credits)
Principles of conservation biology. Importance of biodiversity, causes of decline and extinction, and restoration and conversation policy in terrestrial and aquatic ecosystems. 03: 07/05/2019.
Prerequisites: BIOL 301.

Cross-listed course: ENVR 571

BIOL 572 - Freshwater Ecology (3 Credits)
Quantitative study of the population, community and evolutionary ecology of freshwater habitats (lakes, ponds, rivers, streams, wetlands). Includes mandatory field trips.
Prerequisites: BIOL 301.

Cross-listed course: ENVR 572

BIOL 574 - Marine Conservation Biology (3 Credits)
Exploration of how human activities affect marine natural populations, species, communities and ecosystems, including threats to biodiversity; approaches to marine conservation; and ecological and evolutionary responses to anthropogenic disturbance. 03: 07/05/2019.
Prerequisites: BIOL 301.

Cross-listed course: MSCI 574

BIOL 575 - Marine Ecology (3 Credits)
Structure, dynamics, and interactions between populations and communities in marine ecosystems. Attendance at designated departmental seminars is required. Three lecture hours per week.
Prerequisites: CHEM 111 and BIOL 301 or MSCI 311.

Cross-listed course: MSCI 575

BIOL 575L - Marine Ecology Laboratory (1 Credit)
Laboratory and field exercises in coastal environments.
Prerequisite or Corequisite: BIOL 575.

Cross-listed course: MSCI 575L

BIOL 576 - Marine Fisheries Ecology (3 Credits)
Interdisciplinary examination of the distribution, reproduction, survival, and historical variation of the principal commercial marine fisheries. 03: 07/05/2019.
Prerequisites: BIOL 301.

Cross-listed course: MSCI 576

BIOL 577 - Ecology of Coral Reefs (4 Credits)
Structure, productivity, and biodiversity of coral reefs, emphasizing their sensitivity, stability, and sustainability. Taught as an extended field experience with daily lectures and guided research activities.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: MSCI 577

BIOL 588 - Genomic Data Science (3 Credits)
This course focuses on quantitative knowledge for interdisciplinary applications in genetics as well as hands-on experience in analyzing genetic data. In this course, students will have programming exercises in using analysis tools to conduct genome-wide analysis, annotation, and interpretation of genetic data using R/Bioconductor packages.
Prerequisites: C or better in STAT 201 or higher.

Cross-listed course: STAT 588

BIOL 599 - Topics in Biology (1-3 Credits)
Current developments in biological sciences. Readings and research on selected topics. Course content varies and will be announced in the schedule of classes by title.

BIOL 610 - Hallmarks of Cancer (3 Credits)
Survey of current concepts regarding the molecular and genetic factors that regulate the origin and progression of cancer. Readings based on current primary literature.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 612 - Virology - Classical and Emerging Concepts (3 Credits)
Advanced study of viruses with regard to biochemical, molecular, pathological, epidemiological, and biotechnological aspects. Focus on animal viruses with particular emphasis on human pathogens.
Prerequisites: BIOL 302.

BIOL 614 - Stem Cell Biology (3 Credits)
Focuses on the understanding of how stem cells can be used to make fundamental biological discoveries with a special focus in neuroscience.
Prerequisites: C or better in BIOL 302.

BIOL 620 - Immunobiology (3 Credits)
Basic immunological concepts including antibody structure, function, and genetics; cellular immunology; transplantation; hypersensitivity; autoimmunity; and immunity to infectious diseases.
Prerequisites: BIOL 302.

BIOL 625 - Medical Mycology (3 Credits)
Advanced study of infectious diseases caused by fungi. Etiology, symptoms, and treatment of fungi related illnesses.
Cross-listed course: ENHS 625

BIOL 627 - Marine Phytoplankton (3 Credits)
Examines the physiology and ecology of phytoplankton, including environmental controls on community composition, primary productivity, and detection and characterization of water quality (eutrophication) and harmful algal blooms.
Prerequisites: MSCI 102 or MSCI 450 or BIOL 450.

Cross-listed course: MSCI 627

BIOL 630 - Biology of Birds (3 Credits)
Biology of birds at molecular, organisal, and population levels, emphasizing unique adaptations of the class of Aves.
Prerequisites: BIOL 301, BIOL 302, and BIOL 303.
BIOL 654 - Biology of Neurological Diseases (3 Credits)
Advances in molecular and cellular neurobiology that bring new understanding for human neurological disease.
Prerequisites: BIOL 302 and SCHC 330 or BIOL 405.

BIOL 635 - Neurophysiology (4 Credits)
Descriptive and experimental aspects of the neural basis of behavior, emphasizing cellular and molecular mechanisms. Two lecture and six laboratory hours per week. Three lecture hours per week.
Prerequisites: BIOL 302.

BIOL 640 - Microbial Ecology (3 Credits)
Interactions of microorganisms with each other, with more complex organisms, and with their environments. Three lecture hours per week.
Prerequisites: BIOL 550 and either BIOL 301 or MSCI 311.

BIOL 641 - Biophysical Ecology (3 Credits)
This course examines how the mechanisms by which animals and plants interact with their physical environments influence organismal physiology.
Prerequisites: BIOL 301, MATH 141 or MATH 122.

BIOL 650 - Biochemical Evolution (3 Credits)
Advanced study of related aspects of biological evolution. Rose of life from physical and chemical precursors, biochemical basis of adaptation to ecological pressures, and biochemical aspects of the origins and maintenance of biodiversity.
Prerequisites: BIOL 301, BIOL 302, BIOL 303.

BIOL 651 - Limnology (4 Credits)
A study of the aquatic environment and its biota. Three lecture and four laboratory hours per week.
Prerequisites: BIOL 301.

BIOL 652 - Evolutionary Biology (3 Credits)
An advanced course in evolutionary biology, including natural selection, neutral evolution, molecular evolution population genetics, quantitative genetics, sexual selection, speciation, human evolution, and the evolution of disease.
Prerequisites: BIOL 301 and BIOL 303.

BIOL 653 - Bioinformatics (3 Credits)
Studies of the principles of genetics and molecular biology as applied to adaptive evolution of genes and genomes.
Prerequisites: BIOL 302, BIOL 303.

BIOL 654 - Speciation (3 Credits)
Speciation as the source of biological diversity. Historical and biological viewpoints. Analysis of concepts of species and models of speciation. Two lectures and one recitation per week.
Prerequisites: BIOL 301 or BIOL 652.

BIOL 655 - Biotechnology (3 Credits)
Studies in molecular biology and genetics with emphasis on the use of newly developed techniques in biotechnology. Three lecture hours per week.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 656 - Experimental Biotechnology (4 Credits)
Techniques used in biotechnology will be employed in the context of an experimental project. Twelve laboratory hours per week.
Prerequisites: BIOL 302, BIOL 302L.

BIOL 660 - Biology of Mammals (4 Credits)
Evolution, systematics, genetics, ecology, and adaptation of mammals. Emphasis on native South Carolina species. Two lectures and one two-hour laboratory per week, plus five field trips to be arranged.
Prerequisites: BIOL 301 or MSCI 311.

BIOL 662 - Signal Transduction and Pathogenesis (3 Credits)
Signaling pathways involved in human diseases, such as cancer, AIDS, autoimmune diseases and diabetes, and cellular processes involving apoptosis, cell cycle, cell-cell adhesion, growth factors, hormones, G protein-couples receptors, cytokines and immune response.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 665 - Human Molecular Genetics (3 Credits)
Molecular mechanisms underlying gene action and differentiation in man; the genetic bases for human variability and inborn metabolic errors leading to inherited diseases.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 667 - Molecular and Genetic Mechanisms of Disease Pathogenesis (3 Credits)
An advanced examination of the molecular mechanisms underlying gene action in humans. Current literature illustrating the genotype-phenotype relationship in human disease pathogenesis will be discussed.
Prerequisites: BIOL 302 and BIOL 303.

BIOL 668 - Metabolic Biochemistry of Human Disease (3 Credits)
Core concepts of biochemistry as applied to human health and disease.
Prerequisites: C or higher in CHEM 555/BIOL 545 or CHEM 550/BIOL 541.

Cross-listed course: CHEM 655

BIOL 670 - Plant Ecology (3 Credits)
Structure and dynamics of plant populations and communities, including life histories, adaptations, and plant interactions. Three lecture hours per week.
Prerequisites: BIOL 301.

BIOL 670L - Plant Ecology (1 Credit)
Laboratory and field exercises in plant ecology. Four hours per week.
Prerequisite or Corequisite: BIOL 670.

BIOL 671 - Plant Responses to the Environment (3 Credits)
Physiological, molecular, and genetic examination of induced plant responses to various biotic and abiotic environmental stresses.
Prerequisites: BIOL 302.

BIOL 690 - Ultramicroscopy (3 Credits)
Theoretical and practical aspects of scanning and transmission electron microscopy, digital image acquisition and energy dispersive x-ray spectroscopy. Two lecture and one laboratory hour per week, plus a research project to be arranged.
Prerequisites: BIOL 302 or MSCI 311.

Biological Sciences, B.S.

Learning Outcomes
- Students will demonstrate a solid base of knowledge in Biology.
  Subjects such as cell and molecular biology, genetics, ecology and evolution, plant biology, and physiology are all crucial subject areas that will be mastered.
• Students will analyze qualitative and quantitative data, assess validity of work and identify gaps in knowledge, and evaluate the results of analyses and experiments and decide on next steps.
• Students will identify assumptions, create and evaluate hypotheses, and design relevant experiments.
• Students will be trained to locate sources of information and to evaluate the quality of the information needed to make decisions. Students will be trained to critically read and discuss primary literature and evaluate its validity (on an appropriate level).
• Students will demonstrate the ability to learn independently and then share that knowledge with others as well as to work collaboratively.

Progression Requirement
Biological sciences majors may enroll in a biological sciences major course a maximum of twice to earn the required grade of C or higher. For the purposes of this standard of progression, withdrawal with a W does not constitute enrollment.

Transfer Requirement
Any student applying for transfer to the biological sciences major from other programs within the University, or from other accredited colleges and universities, is required to have a minimum overall grade point average of 2.50 on a 4.00 scale.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
Must be passed with a grade of C or higher.

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (A Minimum of 12 hours)

• MATH 122 or MATH 141
• MATH 142 or MATH 170 or MATH 172

Note: MATH 141 & MATH 142 are recommended. However, successful completion of MATH 122 and MATH 170, or MATH 172 may be substituted.

SCI – Scientific Literacy (8 hours)

• BIOL 101
• BIOL 102

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)
VSR – Values, Ethics, and Social Responsibility (3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)
- STAT 205
- CSCE 102

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- OR
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)
- Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
  - Three hours of Social Science
  - Three hours of Fine Arts or Humanities

3. Program Requirements (30-45 hours)

Supporting Courses (8-16 hours)

CHEM 332L Essentials of Organic Chemistry Laboratory II 1

Total Credit Hours 16

Note: PHYS 201 and PHYS 202 are recommended in addition to the above required courses. CHEM 333, CHEM 331L, CHEM 334, and CHEM 332L may be used to fulfill 8 hours of the cognate. However, additional elective hours may be required to reach minimum hours to graduate.

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

Minors are available in participating departments of the College of Arts and Sciences and in other colleges. For descriptions of specific minors, students should see the appropriate sections of the bulletin.
A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (0-25 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (28 hours)**

*A minimum grade of C is required in all major courses.*

13 hours of biological sciences majors courses 300 or higher

**Total Credit Hours**

1  BIOL 425 and BIOL 549 may only be used for either the Physiology or Plant credit, not both.

Note: At least three courses applied toward the major must have an associated laboratory. No more than three credits of 398/399 may be applied toward the major. Two of 301, 301, or 303 must be completed to advance to 400-600 level courses. **At least two courses must be at the 500-level or above.**

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Total Credit Hours**

**Neuroscience Minor**

The minor is designed for students going into graduate studies in neuroscience, animal behavior, psychology or medicine and for students simply interested in gaining a better understanding of their own interactions with the world. The minor will provide opportunities to develop a strong background of how the nervous system works from the social and behavioral to the cellular and molecular levels. Beyond core requirements, students may focus on topics of specific interest in the
very broad field of neuroscience. Research experience in neuroscience is required.

**Application**

Students must complete an application and qualify for the neuroscience minor. Applications can be submitted any time after their first year of college (30 credit hours must be completed in residency at the University of South Carolina, Columbia Campus). Normally, students will be expected to have at least a 3.00 UofSC system grade point average. Applications will be evaluated by the co-directors of the Neuroscience Minor and they will be judged on overall academic merit. Application forms can be obtained from the Departments of Psychology and Biological Sciences and from the neuroscience minor web page.

**Degree Requirements (18 Hours)**

Eighteen credit hours are required to satisfy the minor. Students must complete the required three credit Introduction to Neuroscience course and 2-3 credit hours of neuroscience research experience under an independent study number. Additional honors courses or other specialized courses in the neurosciences may also satisfy the minor requirements provided the course substitutions are approved by the co-directors of the neuroscience minor. No more than a total of six credits of independent study credits may count towards the minor.

<td>1-3</td>
</tr>
</tbody>
</table>

**Electives**

Select courses from the following list. In addition, one three credit independent study in neuroscience may count in the Elective group. Sometimes Honors courses and special topics courses in neuroscience are offered and these are approved on a semester by semester basis by the co-directors of the neuroscience minor.

Note that many of the courses below have prerequisites and/or co-requisites. Course instructors can always give permission to take the course without the listed prerequisites and/or co-requisites and you should consult with individual instructors if you think that you have an adequate background and would like to take the course.

**Chemistry and Biochemistry**

**Department Website** ([http://www.chem.sc.edu/](http://www.chem.sc.edu/))

Ken Shimizu, Chair

The Department of Chemistry and Biochemistry offers three undergraduate degrees. A general major leads to the Bachelor of Science with a major in chemistry; the intensive major, suggested for those intending to enter the chemical profession, leads to the degree of Bachelor of Science in Chemistry. The department also offers a Bachelor of Science degree with a major in biochemistry and molecular biology. For all majors a minimum grade of C in CHEM 111 and CHEM 112 is required. The Department of Chemistry and Biochemistry has been approved by the American Chemical Society’s (ACS) Committee on Professional Training, and the curriculum for the Bachelor of Science in Chemistry meets ACS requirements.

**Retention, Progression, and Transfer Standards**

1. Chemistry majors may enroll in a chemistry course a maximum of twice to earn the required grade of C or higher. Biochemistry and molecular biology majors may enroll in a biology or chemistry course a maximum of twice to earn the required grade of C or higher.
2. A chemistry major must receive a grade of C or higher in any chemistry course in order for it to be used to satisfy a major requirement. A biochemistry and molecular biology major must receive a grade of C or higher in any chemistry or biology course in order for it to be used to satisfy a major requirement.

3. Any student applying for transfer to the chemistry major from other programs within the University, or from other accredited colleges and universities, is required to have a minimum overall grade point average of 2.50 on a 4.00 scale.

4. To be admitted to the biochemistry and molecular biology major, a student must have earned at least 30 semester hours with a minimum 3.25 grade point average on a 4.00 scale. The 30 semester hours must include CHEM 111, CHEM 112, BIOL 101, BIOL 102, and MATH 141, each passed with a grade of C or higher.

Note: All four standards apply for the Biochemistry and Molecular Biology, B.S. degree. The first three standards apply for the Chemistry, B.S. and the Chemistry, B.S. Chem degrees.

Programs
- Biochemistry and Molecular Biology, B.S. (p. 56)
- Chemistry Minor (p. 58)
- Chemistry, B.S. (p. 58)
- Chemistry, B.S. Chem (p. 61)

Courses

**CHEM 101 - Fundamental Chemistry I (4 Credits)**
A science elective surveying inorganic and solution chemistry. First of a terminal two-semester sequence. Three lecture, one recitation, and two laboratory hours per week.
*Carolina Core: SCI*

**CHEM 102 - Fundamental Chemistry II (4 Credits)**
An introductory survey of organic and biochemistry. Three lecture, one recitation, and two laboratory hours per week.
*Prerequisites: 1 year high-school chemistry, CHEM 101, CHEM 111, or equivalent.
*Carolina Core: SCI*

**CHEM 105 - Chemistry and Modern Society I (4 Credits)**
A conceptual and qualitative approach to chemistry, its evolution, achievements, and goals and its impact on technology, the environment, and modern life and thought. (Specifically designed for non-science majors.) Three lecture and three laboratory hours per week.
*Carolina Core: SCI*

**CHEM 106 - Chemistry and Modern Society II (3 Credits)**
A continuation of Chemistry 105. Three lecture hours per week.
*Prerequisites: C or higher in CHEM 105.

**CHEM 106L - Chemistry and Modern Society II Laboratory (1 Credit)**
Laboratory associated with CHEM 106. Three hours of laboratory per week.
*Prerequisites: CHEM 105.
*Corequisite: CHEM 106.*

**CHEM 107 - Forensic Chemistry (4 Credits)**
Surveys chemical aspects of criminal investigation and adjudication including drug, arson, DNA, paint, and fiber identification. Three lecture and three laboratory hours per week.
*Carolina Core: SCI*

**CHEM 111 - General Chemistry I (3 Credits)**
Survey of the principles that underlie all chemistry with applications illustrating these principles. Three lecture and one recitation hours per week.
*Prerequisites: C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math (or by placement score into MATH 122, MATH 141 or higher math).
*Corequisite: CHEM 111L (unless grade of C or higher in CHEM 111L earned previously).*
*Carolina Core: SCI*

**CHEM 111L - General Chemistry I Lab (1 Credit)**
Introduction to the principles and techniques of experimental chemistry with emphasis on formula investigations, equations, elementary statistics, and chemical reactivity.
*Prerequisites: MATH 111 or MATH 115 or higher.
*Prerequisite or Corequisite: CHEM 111.*

**CHEM 112 - General Chemistry II (3 Credits)**
Continuation of CHEM 111. Special emphasis on chemical equilibrium. Three lecture and one recitation hours per week.
*Prerequisites: C or higher in CHEM 111 and C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math.
*Corequisite: CHEM 112L.*

**CHEM 112L - General Chemistry II Lab (1 Credit)**
Continuation of CHEM 111L with emphasis on solution properties, kinetics, equilibrium, acids and bases, and qualitative analysis.
*Prerequisites: C or higher in CHEM 111 and CHEM 111L or CHEM 141.
*Prerequisite or Corequisite: CHEM 112.*

**CHEM 118 - Computational Chemistry I (1 Credit)**
Introduction to the use of computers in solving chemical problems. One discussion and two laboratory hours per week.
*Corequisite: CHEM 111 and CHEM 111L or CHEM 141 (unless grade of C or higher earned previously).*

**CHEM 141 - Principles of Chemistry I (4 Credits)**
Advanced general chemistry I. Atoms and chemical bonds. Three lecture hours, one recitation hour, and three laboratory hours per week. Credit cannot be received for both CHEM 111 and CHEM 141.
*Prerequisites: high-school chemistry; C or higher in MATH 141 or higher math (or by placement score into MATH 142 or higher math).
*Carolina Core: SCI*

**CHEM 142 - Principles of Chemistry II (4 Credits)**
Advanced general chemistry II. Chemical kinetics, equilibria, and thermodynamics. Three lecture hours, one recitation hour, and three laboratory hours per week. Credit cannot be received for both CHEM 112 and CHEM 142.
*Prerequisites: C or higher in CHEM 141.

**CHEM 318 - Computational Chemistry II (1 Credit)**
A continuation of CHEM 118, with applications to more advanced chemical problems. One discussion and two laboratory hours per week.
*Prerequisites: C or higher in CSCE 145 or CSCE 206 and in CHEM 118.*

---

**CHEM 111 - General Chemistry I (3 Credits)**
Survey of the principles that underlie all chemistry with applications illustrating these principles. Three lecture and one recitation hours per week.
*Prerequisites: C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math (or by placement score into MATH 122, MATH 141 or higher math).
*Corequisite: CHEM 111L (unless grade of C or higher in CHEM 111L earned previously).*
*Carolina Core: SCI*

**CHEM 111L - General Chemistry I Lab (1 Credit)**
Introduction to the principles and techniques of experimental chemistry with emphasis on formula investigations, equations, elementary statistics, and chemical reactivity.
*Prerequisites: MATH 111 or MATH 115 or higher.
*Prerequisite or Corequisite: CHEM 111.*

**CHEM 112 - General Chemistry II (3 Credits)**
Continuation of CHEM 111. Special emphasis on chemical equilibrium. Three lecture and one recitation hours per week.
*Prerequisites: C or higher in CHEM 111 and C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math.
*Corequisite: CHEM 112L.*

**CHEM 112L - General Chemistry II Lab (1 Credit)**
Continuation of CHEM 111L with emphasis on solution properties, kinetics, equilibrium, acids and bases, and qualitative analysis.
*Prerequisites: C or higher in CHEM 111 and CHEM 111L or CHEM 141.
*Prerequisite or Corequisite: CHEM 112.*

**CHEM 118 - Computational Chemistry I (1 Credit)**
Introduction to the use of computers in solving chemical problems. One discussion and two laboratory hours per week.
*Corequisite: CHEM 111 and CHEM 111L or CHEM 141 (unless grade of C or higher earned previously).*

**CHEM 141 - Principles of Chemistry I (4 Credits)**
Advanced general chemistry I. Atoms and chemical bonds. Three lecture hours, one recitation hour, and three laboratory hours per week. Credit cannot be received for both CHEM 111 and CHEM 141.
*Prerequisites: high-school chemistry; C or higher in MATH 141 or higher math (or by placement score into MATH 142 or higher math).
*Carolina Core: SCI*

**CHEM 142 - Principles of Chemistry II (4 Credits)**
Advanced general chemistry II. Chemical kinetics, equilibria, and thermodynamics. Three lecture hours, one recitation hour, and three laboratory hours per week. Credit cannot be received for both CHEM 112 and CHEM 142.
*Prerequisites: C or higher in CHEM 141.

**CHEM 318 - Computational Chemistry II (1 Credit)**
A continuation of CHEM 118, with applications to more advanced chemical problems. One discussion and two laboratory hours per week.
*Prerequisites: C or higher in CSCE 145 or CSCE 206 and in CHEM 118.
CHEM 321 - Quantitative Analysis (3 Credits)
Gravimetric, volumetric, and introductory instrumental analysis. Three lecture and one recitation hours per week.
**Prerequisites:** C or higher in CHEM 112 and CHEM 112L or in CHEM 142.

**Corequisite:** CHEM 321L.

CHEM 321L - Quantitative Analysis Laboratory (1 Credit)
Three laboratory hours per week. Credit cannot be received for both CHEM 321L and CHEM 322L.
**Corequisite:** CHEM 321.

CHEM 322 - Analytical Chemistry (3 Credits)
Qualitative analysis, quantitative analysis, fundamental or method analysis, and molecular characterization.
**Prerequisites:** C or higher in CHEM 112 and CHEM 112L (or in CHEM 142) and in MATH 141 or higher MATH.

**Corequisite:** CHEM 322L.

CHEM 322L - Analytical Chemistry Laboratory (1 Credit)
Laboratory skill building in analytical techniques. Applications of stoichiometry, spectroscopy, phase transfer, electrochemistry and kinetics. Credit cannot be received for both CHEM 321L and CHEM 322L.
**Prerequisites:** C or better in CHEM 112 and CHEM 112L or CHEM 142.

**Corequisite:** CHEM 322.

CHEM 331L - Essentials of Organic Chemistry Laboratory I (1 Credit)
Laboratory safety, syntheses, separation, and purification of carbon compounds. For non-majors.
**Corequisite:** CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 332L - Essentials of Organic Chemistry Laboratory II (1 Credit)
Continuation of CHEM 331L. Spectroscopic identification of carbon compounds. For non-majors. Three lab hours per week.
**Prerequisites:** C or higher in CHEM 331L.

**Corequisite:** CHEM 334 (unless grade of C or higher in CHEM 334 earned previously).

CHEM 333 - Organic Chemistry I (3 Credits)
Contemporary theories, nomenclature, reactions, mechanisms, and syntheses of carbon compounds. Three lecture and one recitation hours per week.
**Prerequisites:** C or higher in CHEM 112 or in CHEM 142.

CHEM 333L - Comprehensive Organic Chemistry Laboratory I (2 Credits)
Laboratory safety, synthesis, separation, and purification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
**Corequisite:** CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 334 - Organic Chemistry II (3 Credits)
Continuation of CHEM 333. Three lecture and one recitation hours per week.
**Prerequisites:** C or higher in CHEM 333.

CHEM 334L - Comprehensive Organic Chemistry Laboratory II (2 Credits)
Continuation of CHEM 333L. Spectroscopic identification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
**Prerequisites:** C or higher in CHEM 333L.

**Corequisite:** CHEM 334 (unless grade of C or higher in CHEM 334 earned previously).

CHEM 340 - Elementary Biophysical Chemistry (3 Credits)
A non-calculus approach to the study of the principles of physical chemistry emphasizing their application to significant biochemical and biological systems. Chemical thermodynamics, kinetics, equilibrium, solution chemistry, the structure of macromolecules, and acid-base properties of biomolecules. Credit for a degree will not be given for both CHEM 340 and CHEM 541.

**Prerequisites:** C or higher in CHEM 112 and CHEM 112L or in CHEM 142.

CHEM 360 - Undergraduate Seminar (1 Credit)
Student seminars and a survey of biochemical and molecular biology research at the University of South Carolina. Required of all biochemistry majors.

CHEM 399 - Independent Study (1-3 Credits)
Contract Required.

**Graduation with Leadership Distinction:** GLD: Research

CHEM 401 - Industrial Chemistry Capstone Experience (3 Credits)
Prepares students for future roles in chemical industry or graduate school and provides career-enhancing interpersonal skills, including team-building, public speaking, resume preparation, and interviewing.

CHEM 496 - Undergraduate Research (3 Credits)
Introduction to the methods of chemical research. A written report on work accomplished is required at the end of each semester. Nine hours of library and laboratory per week. Contract Required.

**Graduation with Leadership Distinction:** GLD: Research

CHEM 497 - Undergraduate Research (3 Credits)
Introduction to the methods of chemical research. A written report on work accomplished is required at the end of each semester. Nine hours of library and laboratory per week. Contract Required.

**Graduation with Leadership Distinction:** GLD: Research

CHEM 498 - Undergraduate Research (3 Credits)
Introduction to the methods of chemical research. A written report on work accomplished is required at the end of each semester. Nine hours of library and laboratory per week. Contract Required.

**Graduation with Leadership Distinction:** GLD: Research

CHEM 499 - Undergraduate Research (3 Credits)
Introduction to the methods of chemical research. A written report on work accomplished is required at the end of each semester. Nine hours of library and laboratory per week. Contract Required.

**Graduation with Leadership Distinction:** GLD: Research

CHEM 511 - Inorganic Chemistry (3 Credits)
Consideration of atomic structure, valence, complex compounds, and systematic study of the periodic table.
**Prerequisites:** C or higher in CHEM 334, PHYS 212, and MATH 241.

CHEM 533 - Comprehensive Organic Chemistry III (3 Credits)
Selected organic reactions from synthetic and mechanistic viewpoints. For Undergraduate Credit Only.
**Prerequisites:** C or higher in CHEM 334.
CHEM 541 - Physical Chemistry (3 Credits)
Chemical thermodynamics and kinetics. For Undergraduate Credit Only. 
**Prerequisites:** C or higher in CHEM 112 (or CHEM 142) and in MATH 241 or higher MATH.

**Corequisite:** PHYS 212; unless a grade of C or higher in PHYS 212 earned previously.

CHEM 541L - Physical Chemistry Laboratory (2 Credits)
Applications of physical chemical techniques. Five laboratory hours and one recitation hour per week.
**Prerequisites:** C or higher in CHEM 321L or in CHEM 322L or in CHEM 142.

**Corequisite:** CHEM 541 (unless grade of C or higher in CHEM 541 earned previously).

CHEM 542 - Physical Chemistry (3 Credits)
Spectroscopy, statistical mechanics, and chemical applications of quantum mechanics.
**Prerequisites:** C or higher in CHEM 112 or in CHEM 142, MATH 241 and PHYS 212.

CHEM 542L - Physical Chemistry Laboratory (2 Credits)
Applications of physical chemical techniques. Five laboratory hours and one recitation hour per week.
**Prerequisites:** C or higher in CHEM 321L or in CHEM 142.

**Corequisite:** CHEM 542 (unless grade of C or higher in CHEM 542 earned previously).

CHEM 545 - Physical Biochemistry (3 Credits)
A survey of physical methods essential for studies of biomacromolecules. Three lecture hours per week.
**Prerequisites:** C or higher in CHEM 541 and in CHEM 550 or CHEM 555.

CHEM 550 - Biochemistry (3 Credits)
Description of biological macromolecules and major metabolic pathways. Three lecture hours per week.
**Prerequisites:** C or higher in CHEM 334.

**Cross-listed course:** BIOL 541

CHEM 550L - Biochemistry Laboratory (1 Credit)
Experiments and demonstrations illustrating the principles of biochemistry. Three laboratory hours per week.
**Prerequisite or Corequisite:** C or higher in CHEM 550 or BIOL 541 or CHEM 555 or BIOL 545.

**Cross-listed course:** BIOL 541L

CHEM 555 - Biochemistry/Molecular Biology I (3 Credits)
Essentials of modern biochemistry. First semester of a two-semester course. Three lecture hours per week.
**Prerequisites:** C or higher in CHEM 334.

**Cross-listed course:** BIOL 545

CHEM 556 - Biochemistry/Molecular Biology II (3 Credits)
Essentials of modern biochemistry and molecular biology. Three lecture hours per week.
**Prerequisites:** C or higher in BIOL 302.

**Cross-listed course:** BIOL 546

CHEM 619 - Special Topics in Inorganic Chemistry (1-3 Credits)
Current developments in inorganic chemistry. Readings and research on selected topics. Course content varies by title and will be announced in the schedule of classes. May be repeated for credit.

CHEM 621 - Instrumental Analysis (3 Credits)
Chemical instrumentation including electronics, signal processing, statistical analysis, molecular/atomic spectroscopy, electrochemical methods, chromatography, and mass spectrometry. Three lecture hours per week.
**Prerequisites:** C or higher in CHEM 321 or CHEM 322.

CHEM 621L - Instrumental Analysis Lab (1 Credit)
Methods, principles and strategies for chemical instrumentation in analysis. Chemical instrumentation laboratory with environmental, forensic, and biotechnology applications. Three laboratory hours per week.
**Corequisite:** CHEM 621.

CHEM 622 - Forensic Analytical Chemistry (3 Credits)
Analytical chemical methods in forensic science, including gathering of evidence, toxicology, drug identification, analysis of trace evidence, arson analysis, and DNA/serology.
**Prerequisites:** C or higher in CHEM 321, CHEM 321L and in CHEM 334, CHEM 332L or CHEM 334L.

CHEM 623 - Introductory Environmental Chemistry (3 Credits)
Study of the chemical reactions and processes that affect the fate and transport of organic chemicals in the environment. Three lecture hours per week.
**Prerequisites:** C or higher in CHEM 321, in CHEM 333, and in MATH 142.

CHEM 624 - Aquatic Chemistry (3 Credits)
Study of the chemical reactions and processes affecting the distribution of chemical species in natural systems. Three lecture hours per week.
**Prerequisite or Corequisite:** CHEM 321, MATH 142.

**Cross-listed course:** MSCI 624

CHEM 629 - Special Topics in Analytical Chemistry (1-3 Credits)
Current developments in inorganic chemistry. Readings and research on selected topics. Course content varies by title and will be announced in the schedule of classes. May be repeated for credit.

CHEM 633 - Introduction to Polymer Synthesis (3 Credits)
Special emphasis on the modern synthesis of polymeric materials. Definitions, characterization, and applications of polymers will be briefly presented.
**Prerequisites:** C or higher in CHEM 334.

CHEM 639 - Special Topics in Organic Chemistry (3 Credits)
Current developments in organic chemistry. Readings and research on selected topics. May be repeated as content varies by title.

CHEM 643 - Computational Chemistry (3 Credits)
This course is designed to familiarize students with theory and use of modern electronic structure codes, as well as to develop critical thinking and problem-solving skills and to improve computer literacy.
**Prerequisites:** C or higher in CHEM 541 or CHEM 542.
CHEM 644 - Materials Chemistry (3 Credits)
Introduction to materials science; structural and electronic description of inorganic-based solids; experimental techniques in materials chemistry; interfacial energetics and optoelectronic processes at metal and semiconductor surfaces.
Corequisite: CHEM 542 (unless a grade of C or higher earned previously).

CHEM 649 - Special Topics in Physical Chemistry (1-3 Credits)
Current developments in physical chemistry. Readings and research on selected topics. Course content varies by title and will be announced in the schedule of classes. May be repeated for credit.

CHEM 655 - Metabolic Biochemistry of Human Disease (3 Credits)
Core concepts of biochemistry as applied to human health and disease.
Prerequisites: C or higher in CHEM 555/BIOL 545 or CHEM 550/BIOL 541.

Cross-listed course: BIOL 668

CHEM 659 - Special Topics in Biochemistry (3 Credits)
Selected topics in the field of biochemistry. May be repeated as content varies by title.
Prerequisites: C or higher in CHEM 555/BIOL 545 or CHEM 550/BIOL 541.

Biochemistry and Molecular Biology, B.S.

Learning Outcomes

• Students will explain basic and advanced concepts in biology, chemistry, and biochemistry and apply them in problem solving.
• Students will apply computer applications and information retrieval skills to experiments and data analysis. These skills are taught in CHEM 541L and CSCE 102.
• Students will communicate effectively orally and in writing about biochemical concepts, problems, and solutions.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another college on the UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (128 hours)

<tr>
<td>3. Program Requirements</td>
<td>3-16</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>63</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 Hours)

must be passed with a grade of C or higher.

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (8 hours)

must be passed with a grade of C or higher

• MATH 141
• MATH 142

SCI – Scientific Literacy (8 hours)

must be passed with a grade of C or higher

• PHYS 211 & PHYS 211L
• PHYS 212 & PHYS 212L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course. It is recommended that students complete the foreign language requirement with French, German, Japanese, Russian, or Spanish.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)
CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)
• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)
• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)
• any overlay or stand-alone CC-VSR course (p. 742)

Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
• only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)
Course Title Credits
CSCE 102 General Applications Programming 3
STAT 201 Elementary Statistics 3
Total Credit Hours 6

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)
• Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science
• Three hours of Fine Arts or Humanities

3. Program Requirements (3-16 hours)
Supporting Courses (3 hours)
must be passed with a grade of C or higher
• MATH 241

Cognate (12 hours) optional
The Biochemistry and Molecular Biology Major does not require a Cognate or a Minor. If either is selected, it must meet the College of Arts and Sciences requirements as listed below.

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

Minor (18 hours) optional
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major.

Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.
Minors are available in participating departments of the College of Arts and Sciences and in other colleges. For descriptions of specific minors, students should see the appropriate sections of the bulletin.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (0-13 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. **Major Requirements (63 hours)**

_a minimum grade of C is required in all major courses_

Note: Students who transfer into the program after completion of CHEM 331L and CHEM 332L may meet the organic chemistry requirements by completing CHEM 334L.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>

<tbody>
<tr>
<td>1. Carolina Core</td>
<td>34-46</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>15-19</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>26-34</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>37-38</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

*must be passed with a grade of C or higher*

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (8 hours)

• MATH 141
• MATH 142

SCI – Scientific Literacy (8 hours)

*must be passed with a grade of C or higher*

• PHYS 211 & PHYS 211L
• PHYS 212 & PHYS 212L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully
completing Phase II of the Proficiency Test or by successfully completing
the 122 course, including the exit exam administered as part of that
course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign
language begin college-level study of that language in their first semester and
continue in that language until their particular foreign language requirement
is completed.

GHS – Global Citizenship and Multicultural
Understanding: Historical Thinking (3 hours)
any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural
Understanding: Social Sciences (3 hours)
any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3
hours)
any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive
Communication: Spoken Component 1 (0-3 hours)
any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3
hours)
any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible
Requirements — Overlay-approved courses offer students the option of
meeting two Carolina Core components in a single course. A
maximum of two overlays is allowed. The total Carolina Core credit
hours must add up to a minimum of 31 hours. Some programs
may have a higher number of minimum Carolina Core hours due to
specified requirements.

2. College Requirements (12-19 hours)

Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

Analytical Reasoning (3-7 hours)

<table>

Total Credit Hours 7

Note: If CHEM 111, CHEM 112, CHEM 322, and CHEM 322L (or CHEM 141,
CHEM 142, CHEM 322 and CHEM 322L) are all completed at USC,
STAT 509 or STAT 515 is not required. Also, if CHEM 621 and CHEM 621L
are completed, STAT 509 or STAT 515 is not required. Students who
exempt STAT 509 or STAT 515 through this process will be required to
take an approved elective to reach minimum hours for graduation.

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-
U.S. History course. Whichever is not fulfilled through the Carolina Core
GHS requirement must be fulfilled through this college requirement.
Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused
  on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-
  approved course determined by the College of Arts and Science to fit
  this geographic category.
  or
- One Carolina Core GHS-approved course primarily focused on non-
  U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106,
  HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved
  course determined by the College of Arts and Sciences to fit this
  geographic category.

Social Science and Fine Arts or Humanities (6 hours)

- Courses Acceptable for Social Science and Fine Arts or Humanities
  Credit in Degree Programs in the College of Arts and Sciences
  (https://academicbulletins.sc.edu/undergraduate/arts-sciences/
courses-acceptable-social-science-fine-arts-humanities/)
  - Three hours of Social Science
  - Three hours of Fine Arts or Humanities

3. Program Requirements (26-37 hours)
Supporting Courses (14 hours)

Total Credit Hours 14

Cognate (12 hours)
The cognate is intended to support the course work in the major. The
cognate must consist of twelve (12) hours of courses at the advanced
level, outside of but related to the major. The cognate may be taken in
one or more departments or programs, depending on the interests of the
student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for
cognate credit are outlined in the section titled Courses Acceptable for
Cognate Credit in Degree Programs in the College of Arts and Sciences
(https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-
acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate
sections of this bulletin. Some major programs have specific cognate
requirements.
It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

**Minor (18 hours) optional**

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major.

Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

Minors are available in participating departments of the College of Arts and Sciences and in other colleges. For descriptions of specific minors, students should see the appropriate sections of the bulletin.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (0-11 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (37-38 hours)**

*a minimum grade of C is required in all major courses*

3 credit of undergraduate research (in an approved area of biochemistry or inorganic chemistry) | 3 |

**Total Credit Hours**

37

If the undergraduate research is not in an approved area of biochemistry or inorganic chemistry, CHEM 550L must be taken.

Note: Students who transfer into the program after completion of CHEM 331L and CHEM 332L, may meet the organic chemistry requirements by completing CHEM 334L.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Cardiovascular Technology, B.S.**

The Bachelor of Science degree with a major in cardiovascular technology is awarded upon the following:

1. satisfactory completion of at least 100 semester hours of academic work, including all courses prescribed in the curriculum below;
2. satisfactory completion of an intensive CVT training program, accredited by the Joint Review Committee on Education in Cardiovascular Technology.

**Admission and Retention Standards for Cardiovascular Technology**

Admission to CVT training programs is very competitive, and only a limited number of candidates can be admitted in each class. For this reason the following retention standards are applied during the academic portion of this program at USC:

- Retention. Progressive GPA standards are enforced for continuation in the program. Upon completion of 30 credit hours a minimum GPA of 2.50 is required; at 60 credit hours a minimum GPA of 2.75 is required. Upon completion of the specified academic requirements, only students who have gained admission into an approved CVT training facility will be retained in the program.
- Transfer students admitted to this degree program must complete the last 30 credit hours of academic work in residence at the
Cardiovascular Technology, B.S.

University of South Carolina prior to entering the intensive CVT training program.

- Students who have already completed a CVT training program or CVT internship will not be eligible for acceptance into this major.

Learning Outcomes

- Student demonstrates oral skills and knowledge by communicating effectively in spoken English.
- Student will be evaluated after completion of the academic portion of the Internship.
- Student will be evaluated monthly during the clinical portion of the internship.
- At the completion of the program of study, the student will be eligible to sit for the national registry exam. From the lecture, laboratory and clinical rotations, the student will demonstrate competency in one of more areas of Cardiovascular Technology.

Admissions

Admission to CVT training programs is very competitive, and only a limited number of candidates can be admitted in each class. For this reason the following retention standards are applied during the academic portion of this program at USC:

- Retention. Progressive GPA standards are enforced for continuation in the program. Upon completion of 30 credit hours a minimum GPA of 2.50 is required; at 60 credit hours a minimum GPA of 2.75 is required. Upon completion of the specified academic requirements, only students who have gained admission into an approved CVT training facility will be retained in the program.
- Transfer students admitted to this degree program must complete the last 30 credit hours of academic work in residence at the University of South Carolina prior to entering the intensive CVT training program.
- Students who have already completed a CVT training program or CVT internship will not be eligible for acceptance into this major.

CHEM 321L Quantitative Analysis Laboratory 1

Total Credit Hours 4

CVT Training (28 hours)

Following the academic portion of the Cardiovascular Technology Program, an 18 months clinical training program in an approved facility will be the final stage of the degree program. Students will be awarded 28 credit hours upon completion of the clinical portion of the training. Students who have already completed a CVT training program or CVT internship will not be eligible for acceptance into this major.

1 In an approved facility

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Cardiovascular Technology, B.S.

Criminology and Criminal Justice

Department Website (http://www.cas.sc.edu/crju/)

Brandon K. Applegate, Chair
Patricia Armstrong, Director of Academic Programs

The Department of Criminology and Criminal Justice offers a program of study leading to a Bachelor of Arts degree. This degree program provides students with a strong foundation in the liberal arts and the social sciences. The department fosters a program of study that has a strong research emphasis and encourages public service. Courses offered through the department focus on problem-solving and critical thinking, which provide students with the skills necessary to understand and interpret the scientific literature, access emerging technologies in the field, and understand emerging issues in criminology and criminal justice. For additional information, visit our website (https://sc.edu/study/colleges_schools/artsandsciences/criminology_and_criminal_justice/index.php/).

Degree Offered

The Department of Criminology and Criminal Justice offers a four-year program of study leading to the Bachelor of Arts degree with a major in criminology and criminal justice. The degree requirements are based upon a strong foundation in the liberal arts and the social sciences. An array of professional criminal justice courses is offered to support the particular interests of various students. Students also are encouraged to participate in community service activities. Pursuant to this, the department provides information on opportunities for volunteer work and involvement in the criminal justice field through internships.

Entrance Requirements

The Department of Criminology and Criminal Justice follows the general admission policies of the University. Should there be more applicants for the degree program than the number of spaces available, admission decisions will be competitive and may take into account the applicant’s grade point average as well as other factors deemed indicative of the student’s potential for success in the program.

Transfer Students

Transfer students from other institutions, other USC campuses, or other degree programs must have a cumulative GPA of 2.25 and a semester GPA of 2.00 in the last semester enrolled. Official transcripts of all academic work must be sent to the admissions office. These transcripts will be evaluated by the Department of Criminology and Criminal Justice for possible transfer credits. Only collegiate courses completed at accredited institutions will be considered, and transfer credit will be approved only where an analysis of the course level and content indicates that the work is appropriate for inclusion in a program of study offered by the department.

Progression Requirements

Admission to the upper division is based upon a minimum 2.00 cumulative UofSC GPA.

Programs

- Criminal Justice Minor (p. 67)
- Criminology and Criminal Justice, B.A. (p. 68)

Courses

CRJU 101 - The American Criminal Justice System (3 Credits)
Survey of crime and societal responses to crime, including law enforcement, courts, corrections, and the juvenile justice system.
Carolina Core: GSS

CRJU 202 - Research Methods in Criminology and Criminal Justice (3 Credits)
Introduction to the practice of social research in criminology and criminal justice settings.
Graduation with Leadership Distinction: GLD: Research

CRJU 203 - Criminal Procedure (3 Credits)
Overview of the constitutional restraints on the investigation, detention, prosecution and adjudication of criminal defendants. Coverage of Supreme Court decisions involving the 4th, 5th, and 6th Amendments to the U.S. Constitution.

CRJU 311 - Policing (3 Credits)
Current and historical perspectives on American policing.

CRJU 312 - Corrections (3 Credits)
Current and historical perspectives on incarceration and its alternatives.

CRJU 313 - Criminal Courts (3 Credits)
Structure and organization of the federal and state criminal court systems and personnel.

CRJU 314 - Criminal Law (3 Credits)
Origin and development of criminal law in America. Basic elements of crimes and defenses.

CRJU 322 - Drugs and Crime (3 Credits)
Overview of criminal justice system responses to illegal substances. Relationship between substance abuse and crime.

CRJU 323 - Violence in America (3 Credits)
Historical overview of violence in American society, including theoretical perspectives on the causes and prevention of violence.

CRJU 341 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.

Cross-listed course: SOCY 353

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 351 - Juvenile Delinquency (3 Credits)
Social factors in the development, identification, and treatment of delinquents.

Prerequisites: CRJU 101 OR SOCY 101.

Cross-listed course: SOCY 350

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and Office of Academic Programs is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

CRJU 420 - Analyzing Homicide (3 Credits)
Relationships between patterns and trends in homicide, and theoretical explanations for why offenders engage in homicide.

CRJU 421 - Victimization (3 Credits)
Causes and consequences of criminal victimization and public policy responses to victimization issues.
CRJU 422 - Alternatives to Incarceration (3 Credits)
Correctional alternatives to imprisonment including probation, parole, and various community correctional programs.

CRJU 423 - Street Gangs: Structure, Activity, and Response (3 Credits)
Course covers the theoretical and empirical work on gangs, gang members, and gang activity along with insight on these issues from a practitioner perspective. It then examines the variety of policy responses from government and community organizations.

CRJU 424 - Criminal Justice Intelligence (3 Credits)
An investigation of the motivations to commit crime. The course presents profiles of the targets of crimes and provides strategic and tactical assessments of police investigations and intelligence.

CRJU 425 - Hate Crimes (3 Credits)
An examination of the causes and responses to hate crimes. The course also provide a foundation for understanding crimes motivated by racial, gender, religious, disability, and sexual orientation biases.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 426 - Criminal Justice and Mental Health (3 Credits)
Interface between the mental health sciences and the criminal justice system.

CRJU 430 - Communities and Crime (3 Credits)
Relationship between criminality and community characteristics, with particular attention to how variation in community structure, organization, and culture impacts crime.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 440 - Homeland Security and Terrorism (3 Credits)
The nature of terrorism; its history; its methodology; and its application to criminological theory.

CRJU 485 - Selected Topics in Criminal Justice Policy (3 Credits)
Public policy responses to crime, its formation, and its impact on society. Individual topics to be announced by title. May be repeated with consent of advisor.

CRJU 491 - Special Topics (3 Credits)
Topics in criminology and criminal justice. Individual topics to be announced by title. May be repeated with consent of advisor.

CRJU 494 - Internship (3 Credits)
A supervised experiential course in a criminal justice agency. Contract approved by instructor, advisor, and Office of Academic Programs is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

CRJU 510 - Critical Incident Management for Criminal Justice (3 Credits)
Leadership and management strategies for criminal justice agencies during critical incidents and disasters including multi-agency and multi-jurisdictional response.

CRJU 512 - Information-Based Management in Criminal Justice (3 Credits)
The collection and use of information and data-driven analysis in criminal justice organizations.

CRJU 535 - Inmates and Prisons (3 Credits)
Examination of issues affecting prisons and the inmates confined within them. Specific topics of study will include the philosophy and goals of imprisonment, institutional crowding, inmate rights, inmate adaptation, and individual and collective misconduct.

CRJU 551 - Adolescent Mentoring (3 Credits)
Application of skills and theories of adolescent mentoring taught in the classroom to a supervised, structured mentoring field experience.
Cross-listed course: WGST 551

CRJU 554 - Women and Crime (3 Credits)
Impact of gender-based relations on crime and the criminal justice system.
Cross-listed course: WGST 554

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

CRJU 558 - Crime Over the Life Course (3 Credits)
Development of criminal and delinquent behavior over time.

CRJU 563 - Race, Crime, and Criminal Justice (3 Credits)
An historical overview of the intersection between issues of race, crime, and justice. The impact of the criminal justice system on minority groups.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 565 - Organized Crime (3 Credits)
Origins and modern day activity of organized crime in the United States and internationally will be investigated. Attention is given to problems of criminal activity and the present day transnational character of criminal organizations.

CRJU 575 - The Death Penalty (3 Credits)
Overview of the history and evolution of the death penalty. Identification of key legal developments in death penalty jurisprudence.

CRJU 577 - Law and Criminal Justice Policy (3 Credits)
Legal and policy responses to crime and criminal justice issues.
Prerequisites: CRJU 313 or CRJU 314.

CRJU 582 - Computer Applications in Criminal Justice (3 Credits)
Computing, database systems, and software applications in research and professional practice.

CRJU 591 - Selected Topics in Criminal Justice (3 Credits)
A seminar for advanced students. Individual topics to be announced by title. May be repeated once with the consent of the advisor.

**Criminal Justice Minor**

**Minor Requirements (18 Hours)**

Criminology and Criminal Justice, B.A.

Learning Outcomes

- Students will be able to identify the core components of the American criminal justice system: police, corrections, and courts.
- Students will demonstrate an understanding of the relationships between the components of the criminal justice system.
- Students will demonstrate an understanding of how criminological theories are developed.
- Students will demonstrate an understanding of how criminological theories are used to explain individual and collective deviant behavior.
- Students will demonstrate an understanding of the scientific method.
- Students will demonstrate an understanding of social research design and measurement.
- Students will demonstrate the ability to effectively communicate ideas and issues involving criminology and criminal justice in writing.
- Students will be able to identify the constitutional provisions that govern the treatment of persons suspected of committing a crime.
- Students will demonstrate an understanding of the limits of governmental authority over the criminally accused.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

<tbody>
<tr>
<td>1. Carolina Core</td>
<td>32-44</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>15-18</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- CRJU 101

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)
Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The
cognate must consist of twelve (12) hours of courses at the advanced
level, outside of but related to the major. The cognate may be taken in
one or more departments or programs, depending on the interests of the
student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for
cognate credit are outlined in the section titled Courses Acceptable for
Cognate Credit in Degree Programs in the College of Arts and Sciences
(https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-
acceptable-social-science-fine-arts-humanities/).

For cognate course offerings in other colleges, consult the appropriate
sections of this bulletin. Some major programs have specific cognate
requirements.

It should be emphasized that the cognate is not a second set of elective
courses to be chosen at random by the student. The cognate must be
approved by the major advisor as being related to the major field of
study. Students are urged to consult their major advisors for specific
requirements in their major.

Courses applied toward general education requirements cannot be
counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a
grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences
may choose a minor consisting of at least 18 credit hours of prescribed
courses. (Some minors in the sciences require a minimum of 16 hours.)
The subject area of the minor may be related to the major. Students
pursuing interdisciplinary minors who wish to use courses in their major
department for minor credit must petition the College Committee on
Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a
second area of study. It differs from the cognate inasmuch as the
courses must be concentrated in one area and must follow a structured
sequence. Interdisciplinary minors can be designed with the approval of
the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be
counted toward the minor. No course may satisfy both major and minor
requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in
residence at the University.

A list of minor programs of study can be found at Programs A-Z
(p. 20).

Electives (7-28 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational
nature may apply as credit toward degrees in the College of Arts and
Sciences. The College of Arts and Sciences allows the use of the Pass-
Fail option on elective courses. Further clarification on inapplicable
courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (33 hours)
A minimum grade of C is required in all major courses.

CRJU 430 Communities and Crime  
CRJU 554 Women and Crime  
CRJU 563 Race, Crime, and Criminal Justice  
CRJU 591 Selected Topics in Criminal Justice

Total Credit Hours 24

1 Courses must be approved by the Department of Criminology and Criminal Justice Office of Academic Programs.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Criminology and Criminal Justice, B.A.

Economics (College of Arts and Sciences)

McKinley Blackburn, Chair

The Department of Economics offers majors in both the College of Arts and Sciences and Sciences (p. 22) and in the Darla Moore School of Business (p. 312).

Economics majors in the College of Arts and Sciences may earn the B.A. or B.S. degree by completing the 24-hour major requirement along with the college core, distribution requirements, and cultural-awareness and writing-emphasis requirements as described in the basic degree requirements in liberal arts.

Business economics majors in the Moore School of Business may opt for a 12-hour major or a 24-hour intensive major as described in the degree requirements for the Bachelor of Science in Business Administration. This major combines course work in economics with the business course work in management science, accounting, management, marketing, and finance, along with a general education core.

Students are encouraged to talk with an advisor in the economics department to gain further information about the differences between the B.A. and B.S. in economics in the College of Arts and Sciences and the business economics major in the Moore School of Business.

Entrance Requirements

Lower division. Freshmen and transfer students must meet all University and college admission requirements. Students transferring from other institutions or from other majors on the Columbia campus must meet all such requirements, have a GPA of 2.50 or better and have completed either MATH 122 or MATH 141 with a C or better. All students enter the lower division when the economics major is declared.

Progression Requirements

Lower division. Students in the lower division may not enroll in ECON 321/ECON 322 or in courses for which these courses are prerequisite.

Upper division. Progression into the upper division requires the completion of ECON 221 and ECON 222 (or ECON 224) and MATH 122 or MATH 141 with a grade of C or better in each of these courses.

Programs

- Economics, B.A. (p. 73)
- Economics, B.S. (p. 75)

Courses

ECON 123 - The American Economy (3 Credits)  
Basic concepts, institutional foundations, structure of the private and public sector, labor markets; major economic problems.

ECON 221 - Principles of Microeconomics (3 Credits)  
The study of supply and demand, pricing and cost concepts, firm and consumer decision-making, market structure, and government policies.

ECON 222 - Principles of Macroeconomics (3 Credits)  
The study of gross domestic product, business cycles, economic growth, inflation, unemployment, and monetary and fiscal policy.

ECON 223 - Introduction to Economics (3 Credits)  
Introduction to economics principles for non-majors. Basics of supply and demand and government and monetary policy are covered in a non-technical manner. Not open to business or economics students. Credit not granted for both ECON 223 and ECON 221 or ECON 222.

ECON 224 - Introduction to Economics (3 Credits)  
The study of supply and demand, markets, household and firm decision-making, gross domestic product, inflation, unemployment, and government policies. Open to all students except business administration and economics majors.

ECON 301 - Money and Banking (3 Credits)  
The role of money in the market economy. Commercial banks, the Federal Reserve System, and monetary policy. Cannot be used to satisfy major requirements. 03: 07/05/2019.

Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 303 - The International Economy (3 Credits)  
Survey of international economic issues and institutions, including trade and protectionism, global and regional trade agreements, trade balances and exchange rates, Japan, NAFTA, and the European Union.

Prerequisites: ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 311 - Issues in Economics (3 Credits)  
The nature and causes of major economic problems facing the nation and its communities, and policy alternatives designed to solve them. The philosophy and methodology of economics in social problem solving.

Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 321 - Intermediate Microeconomic Theory (3 Credits)  
Analysis of the economic behavior of households and firms. Production, consumption, price determination, and the degree of competition in markets.

Prerequisites: ECON 221 and ECON 222, or ECON 224, MATH 122 or MATH 141.
ECON 322 - Intermediate Macroeconomic Theory (3 Credits)
Analysis of the national economy as a whole. Money, output, employment, inflation, and international economic linkages.
Prerequisites: ECON 221 and ECON 222, or ECON 224, MATH 122 or MATH 141.

ECON 329 - American Economic History (3 Credits)
Growth and development of the American economy; applications of economic theory to economic history.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 363 - Business Finance (3 Credits)
The procurement and management of wealth by privately owned profit-seeking enterprises. 03: 07/05/2019.
Prerequisites: ECON 221, ACCT 225, and 3 hours of statistics at the 200-level.

ECON 364 - Financial Institutions (3 Credits)
A study of the functions and operations of financial institutions and their relationships to the commercial banking system and the general economy. Attention is devoted to savings institutions, insurance companies, rural and urban real estate credit, consumer credit, and associated topics. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 379 - Government Policy Toward Business (3 Credits)
An analysis of public policy toward business in the United States. Emphasis is on the desirability of various policies in light of their consequences for the general welfare.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 399 - Independent Study (1-15 Credits)
Contract approved by instructor, advisor, and undergraduate division head is required.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Research

ECON 402 - Money, Income, and Prices (3 Credits)
A study of monetary standards, monetary theory, monetary policy, and the mechanism of international payments. Attention is devoted to questions of monetary problems, employment, and fiscal policy.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 406 - Labor Economics (3 Credits)
A study of labor market institutions, trends in labor market activity, and the effects of government policy on the labor market. (Not open to majors in economics.)
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 408 - History of Economic Thought (3 Credits)
A survey of economics from the ancient philosophers to the present; with emphasis on the mercantilist, physiocratic, classical, Marxist, Austrian, neo-classical, and institutional schools of economics.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 415 - Economics of American Industry (3 Credits)
A study of the structure of selected American industries, of the development and concentration of economic power in the American economy, and of public policy toward industry.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 420 - Business Applications of Economic Forecasting (3 Credits)
Analysis of business cycles and applications of forecasting techniques to project and interpret economic trends.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 421 - Engineering Economics (3 Credits)
Decision making with respect to capital goods, with emphasis on such decision making in governmental activities and public utilities. Intended primarily for engineering students, the course emphasizes the types of investment decisions that engineers are often called upon to make.

ECON 436 - Introductory Econometrics (3 Credits)
The use of statistical techniques to analyze economic relationships. The emphasis is on the application of linear regression to real-world economic data.
Prerequisites: ECON 224, or ECON 221 and ECON 222; MGSC 291 or STAT 201; and MATH 122 or MATH 141.

Carolina Core: ARP

ECON 476 - Foundations of Capitalism (3 Credits)
Examines the foundations of capitalism and why it has prevailed over alternative systems. Topics include the justification of private property, distribution of wealth, profit motive, source of wealth creation, and others.
Prerequisites: ECON 221 and ECON 222.

ECON 499 - Internship in Economics (1-6 Credits)
Supervised work experience of at least nine hours per week, to include one class meeting a month and individual consultation. Contract approval by instructor, advisor, and department chair is required. Cannot be used to satisfy major requirement.
Prerequisites: C or better in both ECON 321 and ECON 322, and cumulative GPA of 2.75.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ECON 500 - Urban Economics (3 Credits)
An analysis of economic forces affecting urbanization and the economic processes influencing urban form and structure. Spatial concepts are considered in addition to traditional micro-economic and macro-economic concepts. Topic coverage includes: the economic origin of cities; urban functions and the urban economic base, land-use structure and urban form, and urban efficiency.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 503 - International Trade Economics (3 Credits)
Theory of international specialization, commercial policy, customs unions, and the effects of trade liberalization and protectionism; economic growth and multinational enterprises.
Prerequisites: ECON 321.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 504 - International Monetary Economics (3 Credits)
Exchange rate and balance of payments determination; purchasing-power parity; optimum currency areas, absorption, elasticity, monetary approaches, spot- and forward-exchange markets.
Prerequisites: ECON 322.
ECON 505 - International Development Economics (3 Credits)
Economic theories of growth in developing countries. Use of factor resources; role of social and economic institutions; use of financial trade policies for growth.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning
ECON 506 - Labor Economics and Labor Markets (3 Credits)
Economics of labor demand, labor supply, wage determination in competitive markets, migration, discrimination, unemployment, and labor unions. Theoretical models and empirical knowledge will be considered.
Prerequisites: ECON 221 and ECON 222, or ECON 224; ECON 321.

ECON 507 - Comparative Economic Systems (3 Credits)
An analysis of the organization and operation of the world's major economic systems.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning
ECON 508 - Law and Economics (3 Credits)
Economic analysis and interpretation of the law. The economic effect of current law and optimal design of law to meet social objectives.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 509 - Economics of Sustainable Development (3 Credits)
Exploration of the basic theory and practice of sustainable economic development. Topics include: environmental legislation, global agreements, sustainable development indicators, and economic strategies and methods to promote environmentally sound development.
Prerequisites: C or better in the following ECON 221 and ECON 222; or ECON 224; MATH 122.

Graduation with Leadership Distinction: GLD: Community Service
ECON 510 - Experimental Economics (3 Credits)
Exploration of the basic theory and techniques of experimental economics. Topics include: basic game theory, experimental design, and elements of behavioral economic thought.
Prerequisites: C or higher in ECON 321.

ECON 511 - Senior Seminar in Economics (3 Credits)
Philosophy and methodology of economics, perspectives on theory and empiricism, economic policy; individualized guided research.
Prerequisites: ECON 321, ECON 322, and ECON 436 with grade of C or higher.

ECON 514 - The Economics of Terrorism (3 Credits)
Focuses on the following aspects of terrorism: (1) its causes/determinants (historical, social, cultural, economic, political, and religious determinants); (2) the organizational and funding structure of terrorist groups; (3) the tactics and weapons of terrorist groups; (4) mobilization and recruitment within terror networks; and (5) counterrorism methods. Restricted to: Business Majors and Economics Arts and Sciences Majors.
Prerequisites: C or better in ECON 321.

ECON 515 - Industrial Organization (3 Credits)
This course uses the tools of microeconomics and game theory to examine how firms compete and competition's impact on industry performance. Topics include: price discrimination, product differentiation, and oligopoly behavior.
Prerequisites: ECON 321.

ECON 516 - Political Economy (3 Credits)
This course covers fundamental models of collective decision making, studies their empirical relevance, and considers interactions between the economy and politics.
Prerequisites: C or better in ECON 221 and ECON 222 or C or better in ECON 224.

ECON 523 - Introduction to Mathematical Economics (3 Credits)
Mathematical formulation of economic theories; the use of mathematics in the development and demonstration of economic relationships.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MATH 122, MATH 141, or the equivalent.

ECON 524 - Essentials of Economics (3 Credits)
A course designed to acquaint the student with the principles of operation of the American economic system. A survey course for social studies teachers in secondary schools.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 526 - Managerial Economics (3 Credits)
A study of the application of the economic theory of profits, competition, demand, and costs to analysis of problems arising in the firm and in decision making. Price policies, forecasting, and investment decisions are among the topics considered.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 530 - The Economics of Education (3 Credits)
Investment in human capital; the economic value of schooling; internal efficiency of schools; faculty compensation; equity and efficiency of school finance systems; financing higher education.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 531 - Health Economics (3 Credits)
Applications of economic analysis to health care. Structure and behavior of health-care markets. Description of health care policy issues.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 548 - Environmental Economics (3 Credits)
An analysis of the economic aspects of environmental decay, pollution control, and natural resource use. Analysis of the ability of the market system to allocate resources efficiently when economic activity is accompanied by environmental damage. Discussion of alternative public policy approaches to pollution control and natural resource conservation.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Cross-listed course: ENVR 548
ECON 555 - Game Theory in Economics (3 Credits)
Game theory as used to understand decision making in business, economics, politics and other real-world environments. Topics covered include: basic terminology; strategic, extensive, and combinatorial models; and equilibrium strategy.
Prerequisites: ECON 321 or MATH 141 and STAT 201 or C or higher in STAT 206.

ECON 562 - Public Finance (3 Credits)
Theory and practice of taxation: public revenue, expenditure, and debt.
Prerequisites: C or higher in ECON 321.

ECON 589 - Topics in Economics (1-3 Credits)
Individual topics to be announced with title.
Prerequisites: ECON 221 and ECON 222, or ECON 224.
ECON 594 - Introduction to Econometrics (3 Credits)
Statistical and economic tools applied to analysis of business and economic problems with the aid of computers.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 291 or STAT 201, MATH 122 or MATH 141.

ECON 621 - Survey of Contemporary Economic Theory (3 Credits)
Neo-classical value and distribution theory combined with income and employment theory.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 690 - Quantitative Foundations for Business and Economics I (3 Credits)
Calculus and classical optimization methods applied to problems in business and economic analysis; matrices, derivatives, and integrals in the analysis of both univariate and multivariate business and economic models. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 691 - Quantitative Foundations for Business and Economics II (3 Credits)
Statistics and probability theory applied to problems of business and economic analysis. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 690 or ECON 690.

ECON 692 - Quantitative Methods I (3 Credits)
Probability and statistics necessary for graduate study in economics and business administration; estimation, hypothesis testing, regression, analysis of variance, and nonparametric methods. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; ECON 692.

ECON 694 - Quantitative Methods II (3 Credits)
A study of decision models useful in business administration. Topics covered include linear programming, sensitivity analysis and duality, network models, integer programming, deterministic and stochastic dynamic programming, inventory, and queues. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 291 or ECON 690.

Our graduates will be able to demonstrate their understanding of economic concepts and quantitative knowledge and use these concepts and knowledge to analyze real-world problems.

Economics, B.A.

Learning Outcomes
- Our graduates will understand core microeconomic theories and concepts.
- Our graduates will understand core macroeconomic theories and concepts.
- Our graduates will be able to solve basic equations to find equilibrium outcomes and use graphs to understand and interpret economic relationships.
- Our graduates will be able to demonstrate their understanding of economic concepts and quantitative knowledge and use these concepts and knowledge to analyze real-world problems.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.50 and completion of MATH 122 or MATH 141 with a C or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.50 and completion of MATH 122 or MATH 141 with a C or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.50 and completion of MATH 122 or MATH 141 with a C or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, cardiovascular technology, biological sciences, chemistry, biochemistry and molecular biology, economics, environmental science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed below in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

1. Carolina Core Requirements (32-44 hours)

CMW - Effective, Engaged, and Persuasive Communication: Written (6 hours)
must be passed with a grade of C or higher
- any CC-CMW courses (p. 742)

ARP - Analytical Reasoning and Problem Solving (6-7 hours)
must be passed with a grade of C or higher
- MATH 122 or MATH 141
- STAT 201

SCI - Scientific Literacy (8 hours)
- two 4-credit hour CC-SCI laboratory science courses (p. 742)

GFL - Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.
- CC-GFL courses (p. 742)
It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component ¹ (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy ¹ (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility ¹ (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

¹ Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

3. Program Requirements (31-49 hours)
Supporting Courses (6 hours)

must be passed with a grade of C or higher

</tbody>
</table>

Total Credit Hours 6

Note: Students who took ECON 224 must take either ECON 221 or ECON 222. A student who earned an A in ECON 224 may be exempted.

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences. (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/)

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.)

The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured
sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (10-31 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24-27 hours)
Must be passed with a grade of C or higher.

Economics majors may enroll in ECON 221, ECON 222, ECON 321, ECON 322 and ECON 436 a maximum of twice to earn the required grade of C or higher. For the purposes of this standard progression, withdrawal with a W does not constitute enrollment. Students who plan to major in economics are advised to consult the director of undergraduate studies with a W does not constitute enrollment. Students who plan to major in economics are advised to consult the director of undergraduate studies in economics during the freshman year.

<td>Introductory Econometrics</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours: 9

Major Electives (15-18 hours)
- Five ECON electives, 400-level or higher, excluding ECON 421, ECON 476, ECON 499 and ECON 524.

Note: If a student earned an A in ECON 224 and is exempted from taking ECON 221 and ECON 222, one additional ECON elective must be taken.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Economics, B.A.

Economics, B.S.

Learning Outcomes
- Our graduates will understand core microeconomic theories and concepts.
- Our graduates will be able to solve basic equations to find equilibrium outcomes and use graphs to understand and interpret economic relationships.
- Our graduates will be able to demonstrate their understanding of economic concepts and quantitative knowledge and use these concepts and knowledge to analyze real-world problems.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.50 and completion of MATH 122 or MATH 141 with a C or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.50 and completion of MATH 122 or MATH 141 with a C or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.50 and completion of MATH 122 or MATH 141 with a C or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, cardiovascular technology, biological sciences, chemistry, biochemistry and molecular biology, economics, environmental science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed below in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

1. Carolina Core Requirements (34-46 hours)
CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
must be passed with a grade of C or higher
- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-7 hours)
must be passed with a grade of C or higher
• MATH 141
• MATH 142

SCI – Scientific Literacy (8 hours)
• two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.
• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
• only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)
must be passed with a grade of C or higher
• STAT 201
• CSCE 102

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
• Three hours of Social Science
• Three hours of Fine Arts or Humanities

3. Program Requirements (29-47 hours)
Supporting Courses (6 hours)

Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.
It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (8-29 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24-27 hours)
Must be passed with a grade of C or higher.

Economics majors may enroll in ECON 221, ECON 222, ECON 321, ECON 322, and ECON 436 a maximum of twice to earn the required grade of C or higher. For the purposes of this standard progression, withdrawal with a W does not constitute enrollment. Students who plan to major in economics are advised to consult the director of undergraduate studies in economics during the freshman year.

Economics, B.S.

English Language and Literature
Department Website (http://www.cas.sc.edu/engl/)

Nina Levine, Chair
The Department of English offers the Bachelor of Arts degree with a major in English. The general major assures a broad knowledge of literature and composition. The intensive major is tailored for those students planning to pursue graduate study in English and/or American literature. The writing concentration is a version of the major placing special emphasis on advanced composition. The department also offers a minor in speech, with courses in public speaking, business and professional communication, speech criticism, performance studies, and small group communication.

Programs
- Creative Writing Minor (p. 85)
- English Minor (p. 86)
- English, B.A. (p. 86)
- Professional Writing and Communication Minor (p. 89)
- Speech Communication Minor (p. 89)

Courses
ENGL 101 - Critical Reading and Composition (3 Credits)
Instruction in strategies for critically reading and analyzing literature and non-literary texts; structured, sustained practice in composing expository and analytical essays.

Carolina Core: CMW

ENGL 102 - Rhetoric and Composition (3 Credits)
Instruction and intensive practice in researching, analyzing, and composing written arguments about academic and public issues.
Prerequisites: C or better in ENGL 101 or equivalent credit.

Carolina Core: CMW, INF

ENGL 200 - Creative Writing, Voice, and Community (3 Credits)
Workshop course on creative writing with a focus on values, ethics, and social responsibility.
Prerequisites: ENGL 101 and ENGL 102.

Carolina Core: AIU, VSR
ENGL 270 - World Literature (3 Credits)
Selected masterpieces of world literature from antiquity to present.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Cross-listed course: CPLT 270
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 280 - Literature and Society (3 Credits)
Fiction, poetry, drama and other cultural texts engaged with questions of values, ethics and social responsibility.
Prerequisites: ENGL 101 and ENGL 102.

Carolina Core: AIU, VSR

ENGL 282 - Special Topics in Fiction (3 Credits)
Special topics in fiction from several countries and historical periods, illustrating the nature of the genre. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ENGL 284 - Drama (3 Credits)
Drama from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ENGL 285 - Special Topics in American Literature (3 Credits)
Special topics in American literature exemplifying persistent themes of American culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 286 - Poetry (3 Credits)
Poetry from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 287 - American Literature (3 Credits)
An introduction to American literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 288 - English Literature (3 Credits)
An introduction to English literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 289 - Teaching Writing in One-to-One Sessions (3 Credits)
The study of theories and pedagogy of individualized writing instruction with intensive writing practice including hands-on one-on-one sessions. Recommended for prospective writing teachers.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 340 - Literature and Law (3 Credits)
Introduction to the interdisciplinary study of literature and law.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 341 - Literature and Medicine (3 Credits)
Introduction to the interdisciplinary study of literature and medicine.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: FAMS 350

ENGL 355 - Introduction to Professional Writing (3 Credits)
Overview of concepts, contexts, and genres used in professional communication. Intensive practice in analyzing, emulating, and creating textual and multimedia documents for a variety of professional, non-academic purposes (including commercial, informative, persuasive, and technical).
Prerequisite or Corequisite: C or higher in both ENGL 101 and ENGL 102.

ENGL 363 - Language in the USA (3 Credits)
Linguistic examination of the structure, history, and use of language varieties in the U.S., with a particular focus on regional and sociocultural variation and relevant sociolinguistic issues.
Prerequisites: ENGL 101; ENGL 102.

Cross-listed course: LING 345
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 380 - Epic to Romance (3 Credits)
Comprehensive exploration of medieval and other pre-Renaissance literature using texts representative of the evolution of dominant literary forms.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: CPLT 380
ENGL 381 - The Renaissance (3 Credits)
Literature of the Renaissance, in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: CPLT 381

ENGL 382 - The Enlightenment (3 Credits)
Literature of the Enlightenment in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: CPLT 382

ENGL 383 - Romanticism (3 Credits)
Literature of Romanticism, in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: CPLT 383

ENGL 384 - Realism (3 Credits)
Literature of Realism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: CPLT 384

ENGL 385 - Modernism (3 Credits)
Literature of Modernism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: CPLT 385

ENGL 386 - Postmodernism (3 Credits)
Literature of Postmodernism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: CPLT 386

ENGL 387 - Introduction to Rhetoric (3 Credits)
Theories of human communication useful for understanding and informing the everyday work of writers. Emphasis on intensive analysis and writing.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: SPCH 387
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 388 - History of Literary Criticism and Theory (3 Credits)
Representative theories of literature from Plato through the 20th century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 389 - The English Language (3 Credits)
Introduction to the field of linguistics with an emphasis on English. Covers the English sound system, word structure, and grammar. Explores history of English, American dialects, social registers, and style.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: LING 301

ENGL 390 - Great Books of the Western World I (3 Credits)
European masterpieces from antiquity to the beginning of the Renaissance.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-292.
Cross-listed course: CPLT 301
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 391 - Great Books of the Western World II (3 Credits)
European masterpieces from the Renaissance to the present.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-292.
Cross-listed course: CPLT 302
Graduation with Leadership Distinction: GLD: Global Learning

ENGL 392 - Great Books of the Eastern World (3 Credits)
Classical and contemporary poetry and prose of the Middle and Far East.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-292.
Cross-listed course: CPLT 303
Graduation with Leadership Distinction: GLD: Global Learning

ENGL 393 - Postcolonialism (3 Credits)
Literature of Postcolonialism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-292.

ENGL 395 - Classical Drama (3 Credits)
Representative plays by Greek and Roman dramatists. 03: 07/05/2019.
Prerequisites: ENGL 101 and ENGL 102.
Graduation with Leadership Distinction: GLD: Research

ENGL 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 400 - Early English Literature (3 Credits)
Major works of Old and Middle English literature (excluding Chaucer).
Prerequisites: ENGL 101 and ENGL 102.

ENGL 401 - Chaucer (3 Credits)
Chaucer’s works, with special attention to The Canterbury Tales.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 402 - Tudor Literature (3 Credits)
English non-dramatic poetry and prose of the 16th century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 403 - The 17th Century (3 Credits)
Poetry and prose of major 17th-century writers (excluding Milton).
Prerequisites: ENGL 101 and ENGL 102.

ENGL 404 - English Drama to 1660 (3 Credits)
Drama in England, from the Middle Ages to the Restoration (excluding Shakespeare).
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-292.
ENGL 405 - Shakespeare's Tragedies (3 Credits)
Prerequisite: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 406 - Shakespeare's Comedies and Histories (3 Credits)
Note: All Literature Courses 300 and above require ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 407 - Milton (3 Credits)
Milton's works, with special attention to Paradise Lost.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 410 - The Restoration and 18th Century (3 Credits)
Poetry and prose from 1660 to the later 18th century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 411 - British Romantic Literature (3 Credits)
Poetry and prose of the English Romantic period.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 412 - Victorian Literature (3 Credits)
Poetry and prose from the 1830s to the end of the century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 413 - Modern English Literature (3 Credits)
Poetry and prose of the 20th century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 414 - English Drama Since 1660 (3 Credits)
Major dramatists from the Restoration to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 415 - The English Novel I (3 Credits)
A study of the novel from the beginnings through Walter Scott.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 416 - The English Novel II (3 Credits)
A study of the novel from Walter Scott into the 20th century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 419 - Topics in English Literature (3 Credits)
Intensive study of selected topics. May be repeated for credit under a different title. Course can be taken 2 times for credit. 6 is the maximum number of credit hours if course can be taken multiple times.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 420 - American Literature to 1830 (3 Credits)
Colonial, Revolutionary, and early Romantic poetry and prose.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 421 - American Literature 1830-1860 (3 Credits)
Poetry and prose of the American Romantic period.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 422 - American Literature 1860-1910 (3 Credits)
Poetry and prose from the Civil War to the early modern era.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 423 - Modern American Literature (3 Credits)
Poetry and prose of the 20th century.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 424 - American Drama (3 Credits)
Representative plays from the 18th century to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 425A - The American Novel to 1914 (3 Credits)
Representative novels from the 18th century to World War I.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 425B - The American Novel Since 1914 (3 Credits)
Representative novels from 1914 to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 426 - American Poetry (3 Credits)
Representative works from the 17th century to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 427 - Southern Literature (3 Credits)
Representative works of Southern writers.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 428A - African-American Literature I: to 1903 (3 Credits)
Representative of African-American writers to 1903.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: AFAM 428A
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 428B - African-American Literature II: 1903 – Present (3 Credits)
Representative works of African-American writers from 1903 to the present.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: AFAM 428B
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 429 - Topics in American Literature (3 Credits)
Intensive study of selected topics. May be repeated for credit under a different title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 430 - Topics in African American Literature (3 Credits)
Intensive study of selected topics. May be repeated for credit under a different title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 431A - Children's Literature (3 Credits)
Literature written for children in a variety of historical periods and geographical regions, illustrating the nature of the genre.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 431B - Picture Books (3 Credits)
Literature written for children and young adults that communicates through interdependent visual and verbal modes.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 432 - Young Adult Literature (3 Credits)
Post-World War II literature in a variety of genres whose primary audience is young adults.
Prerequisites: ENGL 101 and ENGL 102.
ENGL 433 - Special Topics in Children’s and Young Adult Literature (3 Credits)
Intensive study of a genre, historical period, geographical regions, author, or theme in Children's or Young Adult Literature. May be repeated as content varies by title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 434 - Environmental Literature (3 Credits)
Literature of the natural environment and of human interactions with nature, along with critical theories about human/nature interactions.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 435 - The Short Story (3 Credits)
The characteristics of the short story and its historical development in America and Europe.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 436 - Science Fiction Literature (3 Credits)
Representative masterworks of science fiction from the beginnings of the genre to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 437 - Women Writers (3 Credits)
Representative works written by women.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.

ENGL 438A - South Carolina Writers (3 Credits)
Authors and literary forms representative of South Carolina.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 438B - Scottish Literature (3 Credits)
Authors and literary forms representative of Scotland.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 438C - Irish Literature (3 Credits)
Authors and literary forms representative of Ireland.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 438D - African Literature (3 Credits)
Authors and literary forms representative of Africa.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: AFAM 438D

ENGL 438E - Caribbean Literature (3 Credits)
Authors and literary forms representative of the Caribbean.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: AFAM 438E

ENGL 439 - Selected Topics (3 Credits)
Intensive study of selected themes, topics, currents of thought, or interdisciplinary concerns. May be repeated for credit under a different course title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 440 - Principles of Modern Literary Theory (3 Credits)
Major 20th-century approaches to texts, from New Criticism to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 441 - Global Contemporary Literature (3 Credits)
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 445 - LGBTQ+ Literature (3 Credits)
This course will examine LGBTQ+ (lesbian, gay, bisexual, trans, queer, and other nonnormative sexual identities) literatures and cultures.
Prerequisites: C or better in ENGL 101 and ENGL 102.

Cross-listed course: WGST 445

ENGL 449 - Special Topics in Theory (3 Credits)
Approaches to criticism, such as feminism, Marxism, semiology, deconstruction, New Historicism, cultural materialism, and others; or genre, such as narrative, poetry, drama, and others.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 450 - English Grammar (3 Credits)
Major structures of English morphology and syntax; role of language history and social and regional variation in understanding contemporary English.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: LING 421

ENGL 453 - Development of the English Language (3 Credits)
History of English from the earliest Old English texts through Middle English to Contemporary English. No previous knowledge of Old or Middle English is required.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: LING 431

ENGL 455 - Language in Society (3 Credits)
Patterns in language use as a reflection of social group memberships or the negotiation of interpersonal relationships; special attention to social dialects and stylistic differences in American English.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: LING 440

ENGL 457 - African-American English (3 Credits)
Linguistic examination of the structure, history, and use of African-American English, as well as literary presentations, language attitudes, and issues relating to education and the acquisition of Standard English.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENGL 292.

Cross-listed course: AFAM 442, ANTH 442, LING 442

ENGL 460 - Advanced Writing (3 Credits)
Extensive practice in different types of nonfiction writing.
Prerequisites: ENGL 101 and ENGL 102.
ENGL 461 - The Teaching of Writing (3 Credits)
Theory and methods of teaching composition and extensive practice in various kinds of writing. Recommended for prospective writing teachers.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 462 - Technical Writing (3 Credits)
Preparation for and practice in types of writing important to scientists, engineers, and computer scientists, from brief technical letters to formal articles and reports.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 463 - Business Writing (3 Credits)
Extensive practice in different types of business writing, from brief letters to formal articles and reports.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 464 - Poetry Workshop (3 Credits)
Workshop in writing poetry.
Prerequisites: C or better in ENGL 101 and ENGL 102 or equivalent.

ENGL 465 - Fiction Workshop (3 Credits)
Workshop in writing fiction.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.

ENGL 466 - Internship (1-3 Credits)
Supervised professional experience writing in a workplace or community agency, including analysis and production of documents. Internship contract and department permission required. 6 is the maximum number of credit hours if course can be taken multiple times. Internship contract and department permission required.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ENGL 467 - Topics in Rhetoric (3 Credits)
Intensive study of selected topics. May be repeated for credit under a different title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 468 - Digital Writing (3 Credits)
Emphasis on writing in digital environments, exploring critically and creatively what it means to compose in emerging genres and media. Students will create multimedia texts that may include digital video, audio podcasts, social networks, and/or blogs and wikis, among other digital modes of expression.

ENGL 469 - Creative Nonfiction (3 Credits)
Explores the various subgenres and techniques of creative nonfiction, such as collage, memoir and literary journalism by reading polished examples and by responding to writing exercises designed to prompt ideas and hone skills.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.

ENGL 470 - Rhetoric of Science and Technology (3 Credits)
Rhetorical study of science and technology in contemporary culture, emphasizing the ways scientific texts and technologies make their persuasive appeals.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: SPCH 470

ENGL 471 - Rhetoric and the Ancient Roots of Modern Life (3 Credits)
Classical rhetoric and its ongoing influence in the modern world, emphasizing how the study and use of language in ancient Greece and Rome continue to shape modern communication.
Cross-listed course: CLAS 471, SPCH 471

ENGL 472 - Rhetoric and Popular Culture (3 Credits)
Rhetorical study of popular culture, using the methods and theories of cultural analysis to examine how various popular cultural forms work as persuasion.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: SPCH 472

ENGL 473 - Film and Media Theory and Criticism (3 Credits)
Theory and criticism of film and media from the 1910s to the present. Considers a range of critical approaches to analyzing what different forms of audio-visual media do to and for the audiences they address and the worlds they depict. 03: 07/05/2019.
Prerequisites: FAMS 240.

ENGL 474 - History of Cinema I (3 Credits)
Survey of the international cinema from its inception until 1945. 03: 07/05/2019.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270 - ENGL 292.

ENGL 475 - History of Cinema II (3 Credits)
Survey of the international cinema from 1945 to the present.
Prerequisites: ENGL 101 and 102 or equivalent; ARTH 366.

ENGL 476 - Women's Rhetoric (3 Credits)
Study of rhetoric by and about women as manifested in speeches, essays, and other rhetorical artifacts.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: SPCH 485, WGST 485

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 477 - African-American Rhetoric (3 Credits)
African-American rhetoric as manifested in speeches, essays, and other rhetorical artifacts.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENGL 292.

Cross-listed course: AFAM 486, SPCH 486

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
ENGL 487 - Black Women Writers (3 Credits)
An examination of literature by and about black women, including fiction, poetry, drama, and autobiography. This study will focus on issues that emerge from the creative representations of black women and the intersections of race, gender, sexuality, and class that interrogate what is both particular and universal experiences.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: AFAM 487, WGST 487
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
ENGL 490 - Topics in Advanced Study (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as topics vary.
Prerequisites: ENGL 101 and ENGL 102; English major, junior or senior standing, or consent of instructor.
ENGL 491 - Advanced Poetry Workshop (3 Credits)
Students will study poetry writing at an advanced undergraduate level through close readings of professional poetry, composition of original work, and regular practice in the evaluation of peer work.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.
ENGL 492 - Advanced Fiction Workshop (3 Credits)
Students will study the art and craft of writing literary fiction at an advanced level through close readings and the composition of original short stories.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.
ENGL 493 - Advanced Creative Non-Fiction (3 Credits)
The art and craft of writing creative nonfiction at the advanced level.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.
ENGL 494 - Advanced Professional Writing Workshop (3 Credits)
An advanced workshop on the genres, practices, and contexts of professional writing for experienced writers.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.
ENGL 499 - Thesis (3 Credits)
Directed research resulting in a project of substantial length. Upper-level English majors; permission of undergraduate director and supervising faculty member.
ENGL 550 - Language of the Professions (3 Credits)
Practical survey of the syntactic structures of English; usage, social and regional variation emphasis on data.
Prerequisites: ENGL 450, LING 421 or ENGL 680, LING 600.
ENGL 565 - African American Theatre (3 Credits)
The major movements, figures, plays, and critical strategies that have marked the development of African American theatre in the 19th, 20th, and 21st centuries.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270- ENGL 292.
Cross-listed course: AFAM 565, THEA 565
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
ENGL 566 - Special Topics in U.S. Film and Media (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.
Cross-listed course: MART 593
ENGL 600 - Seminar in Verse Composition (3 Credits)
First half of a year-long course in the writing of poetry taught by a contemporary poet. Limited to 15 students.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270- ENGL 292.
ENGL 601 - Seminar in Verse Composition (3 Credits)
Second half of a year-long course in the writing of poetry taught by a contemporary poet. Limited to 15 students.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENGL 292.
ENGL 602 - Fiction Workshop: Short Story (3 Credits)
Instruction in the writing of short fiction taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270-ENG 292.
ENGL 603 - Non-Fiction Prose Workshop (3 Credits)
Instruction in the writing of the nonfiction essay taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.
ENGL 604 - Seminar in Composition for the Visual Media (3 Credits)
Writing for the visual arts, the student will write a treatment (prospectus) and one or more multimedia scripts; or one or more teleplays; or a feature-length screenplay. Limited to 15 students.
Prerequisites: ENGL 101 and ENGL 102 or equivalent; ENGL 565 or equivalent experience in film as determined by the instructor.
ENGL 605 - Seminar in Composition for the Visual Media (3 Credits)
Writing for the visual arts, the student will write a treatment (prospectus) and one or more multimedia scripts; or one or more teleplays; or a feature-length screenplay. Limited to 15 students.
Prerequisites: ENGL 101 and ENGL 102 or equivalent; ENGL 565 or equivalent experience in film as determined by the instructor.
ENGL 606 - Playwriting Workshop (3 Credits)
Instruction in playwriting taught by a contemporary playwright. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.
ENGL 610 - Fiction Workshop: Book-Length Manuscript (3 Credits)
Instruction in the writing of book-length manuscripts taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: ENGL 101 and ENGL 102, and one course between ENGL 270- ENGL 292.
ENGL 611 - Writing the Longer Nonfiction Project (3 Credits)
Instruction in the writing of a book-length nonfiction memoir or literary journalism project taught by a contemporary prose writer. May be repeated once for credit.
Prerequisites: graduate status in the English department, or permission of instructor for undergraduates.
ENGL 612 - Writing Poetry: Traditional and Modern Forms (3 Credits)
The writing of traditional and modern poetic forms. Exercises will give practice in composing metered and free verse. Representative masterpieces of traditional and modern poetry will also be studied. **Prerequisites:** ENGL 101 and ENGL 102, and one course between ENGL 270- ENGL 292.

ENGL 613 - Writing the Full-Length Play (3 Credits)
Instruction in the writing of a full-length, two-act play for publication or production. May be repeated once for credit. **Prerequisites:** graduate status in the English department, or permission of instructor for undergraduates.

ENGL 615 - Academic and Professional Writing (3 Credits)
A workshop course in the development and revision of writing for academic and professional audiences. **Prerequisites:** ENGL 101 and ENGL 102, and one course between ENGL 270- ENGL 292.

ENGL 616 - Writing Children's and Young Adult Literature (3 Credits)
Critical study and practical crafting of literature for children and/or young adults, exploring the demands of these genres both through the reading of representative works and relevant secondary sources and through the writing of creative works. Undergraduate students must receive permission of instructor.

ENGL 620 - Computer Methods for Humanistic Problems (3 Credits)
Introduction to data processing concepts suitable for research interests in non-numerical areas such as the humanities. **Corequisite:** ENGL 620.

ENGL 650 - Special Topics in Literature (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated for credit as topics vary. **Prerequisites:** ENGL 101 and ENGL 102.

ENGL 680 - Survey of Linguistics (3 Credits)
Survey of core areas of linguistics and extensions to closely related disciplines. Introduction to the linguistic component of human cognition. Formal description and analysis of the general properties of speech and language, the organization of language in the mind/brain, and cross-linguistic typology and universals. **Cross-listed course:** ANTH 600, LING 600

ENGL 690 - Special Topics in Composition (3 Credits)
Course content varies and will be announced in the schedule of classes by title. **Prerequisites:** ENGL 101 and ENGL 102.

ENGL 691 - Teaching of Literature in College (2 Credits)
Introduction to the methods of teaching literature, with emphasis on current pedagogical practice and theory and applications of electronic media. The course meets during the first seven weeks of the term and provides supervision of graduate students teaching English 101.

ENGL 692 - Teaching of Composition in College (1 Credit)
Introduction to the methods of teaching composition, with emphasis on current pedagogical practice and theory and applications of electronic media. The course meets during the first seven weeks of the term and provides supervision of graduate students teaching English 102.

SPCH 140 - Public Communication (3 Credits)
Introduction to theory and practice of oral communication in public, social, and institutional contexts. Includes foundational and cumulative training in the invention, performance, and critical analysis of oral communication, with emphasis on argumentation, persuasion, audience analysis, delivery, and ethical forms of engagement. **Carolina Core:** CMS, VSR

SPCH 145 - Online Public Communication (3 Credits)
Introduction to theory and practice of live and recorded online spoken communication in public, social, and institutional contexts. Training in invention, performance, and critical analysis of online spoken communication, including audience analysis, persuasion, delivery, and ethical engagement. Includes significant practice in preparing and presenting live online public communication. **Carolina Core:** CMS, INF

SPCH 150 - Speaking Anxiety Reduction Laboratory (1 Credit)
Exercises, techniques, and demonstrations aimed toward reducing public speaking anxiety. Not for major credit. **Corequisite:** THEA 140 or THEA 230.

SPCH 201 - Popular Communication and Public Culture (3 Credits)
Examination of historical and popular communication conflicts, texts, and events. Offers an introduction to critical concepts and analysis of public speech, rhetoric, and cultural discourse. **Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

SPCH 213 - Communicating Moral Issues (3 Credits)
Moral issues confronting men and women in contemporary society and the challenges of communicating effectively about them. Topics will vary but may include access to health care, euthanasia, abortion, same sex marriage and the moral and environmental consequences of eating animals. **Cross-listed course:** PHIL 213 **Carolina Core:** CMS, VSR

SPCH 230 - Business and Professional Speaking (3 Credits)
Fundamentals of oral communication within business and professional settings. Includes performance. **Carolina Core:** CMS

SPCH 260 - Argumentation and Debate (3 Credits)
Preparing and delivering the debate. Academic debate serves as a model. **Carolina Core:** CMS

SPCH 330 - Small Group Communication (3 Credits)
The development of the skills and methods of effective participation in teams, committees, and other small groups. **Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences
SCH 331 - Organizational Communication (3 Credits)
Examines communication behavior and networks within organizations through the study of major theories of organizational communication, identifies and defines primary concepts, and applies them to organizational scenarios and case studies.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SCH 340 - Literature and Performance (3 Credits)
Introduction to the study of literature through performance; reading, analysis, and performance of prose, poetry, nonfiction, and drama.

Cross-listed course: THEA 340

SCH 380 - Persuasive Communication (3 Credits)
Analysis of the process and functions of persuasive communication.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SCH 387 - Introduction to Rhetoric (3 Credits)
Theories of human communication useful for understanding and informing the everyday work of writers. Emphasis on intensive analysis and writing.

Prerequisites: ENGL 101; ENGL 102.

Cross-listed course: ENGL 387

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SCH 399 - Independent Study and Research (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

SCH 411 - Arguments in Cultural Studies (3 Credits)
The study of texts and discourse from contemporary culture drawing from concepts such as politics, television, music, and other popular culture and entertainment.

SCH 441 - Rhetorical Criticism (3 Credits)
Interpretation and evaluation of communication texts and events such as speeches, media, and social movements. Employs a variety of critical methods and approaches.

SCH 448 - Contemporary Political Rhetoric (3 Credits)
Analysis and evaluation of speeches, political campaigns and controversies over political representation and recognition. Focus on case studies that illustrate the role of speech-making in political campaigns. Offered only in fall semesters in which national elections are held.

SCH 463 - Great Debates (3 Credits)
A study of debates at the Constitutional Convention, Lincoln-Douglas debates (1858), vice presidential and presidential debates, and other national debates.

SCH 464 - Speechwriting (3 Credits)
An exploration of the process of advanced policy advocacy emphasizing speechwriting strategies, issues management, and systematic advocacy campaigns.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SCH 470 - Rhetoric of Science and Technology (3 Credits)
Rhetorical study of science and technology in contemporary culture, emphasizing the ways scientific texts and technologies make their persuasive appeals.

Prerequisites: ENGL 101, ENGL 102.

Cross-listed course: ENGL 470

SCH 471 - Rhetoric and the Ancient Roots of Modern Life (3 Credits)
Classical rhetoric and its ongoing influence in the modern world, emphasizing how the study and use of language in ancient Greece and Rome continue to shape modern communication.

Cross-listed course: CLAS 471, ENGL 471

SCH 472 - Rhetoric and Popular Culture (3 Credits)
Rhetorical study of popular culture, using the methods and theories of cultural analysis to examine how various popular cultural forms work as persuasion.

Prerequisites: ENGL 101; ENGL 102.

Cross-listed course: ENGL 472

SCH 485 - Women's Rhetoric (3 Credits)
Study of rhetoric by and about women as manifested in speeches, essays, and other rhetorical artifacts.

Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 485, WGST 485

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SCH 486 - African-American Rhetoric (3 Credits)
African-American rhetoric as manifested in speeches, essays, and other rhetorical artifacts.

Cross-listed course: AFAM 486, ENGL 486

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SCH 499 - Special Topics in Speech (3 Credits)
Reading and research on selected topics. Course content varies and will be announced in the schedule of classes by title. May be repeated once as topics vary.

Graduation with Leadership Distinction: GLD: Research

SCH 543 - Communication, Law, and Society (3 Credits)
Examines the role of communication in legal and judicial contexts. Focus on case studies that illustrate the theoretical and practical significance of rhetoric in the work of the courts, lawyers, and public advocacy groups.

Required Courses (18 Hours)

• One 200-level ENGL course (3 Hours)
• 300-500 level ENGL courses (15 Hours)

English, B.A.

Learning Outcomes

• Students will demonstrate knowledge of canonical and non-canonical texts, covering a range of periods, using current theoretical and critical approaches to literary and cultural studies.
• Students will demonstrate competence in critical thinking by learning how to acquire and evaluate information in order to form compelling analyses and reach well-justified conclusions.
• Students will demonstrate competence in written expression by learning the principles of grammar and composition and argument.
• Students will demonstrate basic linguistic knowledge (such as knowledge of the nature of human language, dialects, the development of grammar of the English language, and issues involving usage and standard English.)

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.

2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

• Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)
AIU – Aesthetic and Interpretive Understanding (3 hours)
  • any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
  • any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
  • any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
  • any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specific requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
  • only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

  • One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
    or
  • One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105 HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

  • Three hours of Social Science
  • Nine hours of Fine Arts or Humanities

3. Program Requirements (19-43 hours)

Supporting Courses (6 hours)
  must be passed with a grade of C or higher

Course Title Credits
ENGL 287 American Literature 3
ENGL 288 English Literature 3

Total Credit Hours 6

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences. (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/)

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (0-25 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-
Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (30-39 hours)

Students may choose to complete the General Major, the Writing Concentration Major, or an Intensive Major.

A minimum grade of C is required in all major courses.

General Major (30 hours)

B.A. with Distinction (Open to all English Majors)

The Departmental Undergraduate Research Track (B.A. with Distinction) is available to students majoring in English who maintain a minimum GPA of 3.50 in the major and 3.30 overall and who wish to participate in a substantial research or creative project in collaboration with, or under the supervision of, a faculty mentor. Ideally, students who pursue this option would complete their theses by December of their final year of coursework.

Requirements
- Overall GPA of 3.30 or higher and a GPA of at least 3.50 in the major;
- Senior Thesis: General, Writing, and Secondary Education track majors who wish to graduate with distinction must complete a thesis in addition to the courses required for their chosen track within the English major. For Intensive majors, the thesis is part of the required coursework. The thesis may be completed either by enrolling in ENGL 499 or by taking ENGL 490, provided that the latter course includes a thesis requirement;
- Submission of the distinction intent form (available in the undergraduate English office) to the undergraduate English office at the beginning of the semester in which you write your thesis;
- Public presentation of the thesis in an approved venue including:
  - English Department Colloquium Series
  - USC Discovery Day
  - Professional Conference or Journal publication.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Total Credit Hours 18

Speech Communication Minor

The minor in Speech Communication provides students with the skills, knowledge, and experiences vital to being effective producers and consumers of communication in business, organizational, political, and cultural settings. The diversity of courses offered in the program span from training in public speaking, to studies of political arguments and debates, to analysis of how we communicate through our visual representations, behaviors, and cultural practices.
Minor Requirements (18 Hours)

Required Courses
- 18 credit hours in Speech Communication (SPCH). 9 of those 18 credit hours must be in courses numbered 300 or higher.

European Studies

Department Website (http://www.cas.sc.edu/euro/)

Jeff Persels, Director

European Studies is a program within the Richard L. Walker Institute of International and Area Studies offering an undergraduate minor. The minor is designed to provide a foundation for undergraduates in the College of Arts and Sciences who are interested in European history, cultures, geography, politics, and economics. Each student develops a program of study that combines work from two or more academic departments. Academic advisement is done by the program director in consultation with faculty from the participating departments.

Courses

EURO 300 - Introduction to European Studies (3 Credits)
Team-taught interdisciplinary seminars, lectures, and readings with guest lecturers.
Graduation with Leadership Distinction: GLD: Global Learning

EURO 490 - Senior Seminar (3 Credits)
Topics in contemporary European studies. Applicable to EURO major only.
Graduation with Leadership Distinction: GLD: Research

EURO 499 - Senior Thesis (3 Credits)
Approval of topic by EURO advisor(s).
Graduation with Leadership Distinction: GLD: Research

Film and Media Studies

Department Website (http://www.sc.edu/study/colleges_schools/artsandsciences/film_media_studies/)

Lauren Steimer, Director

Film and Media Studies majors study the media—it's many forms, industries, aesthetics, audiences and impacts on global culture. Students gain the knowledge and skills necessary to critically engage with a wide array of media forms and practices as citizens, creators, and scholars. Major and minor programs of study cultivate increasingly important skills for the 21st century: analytic and interpretive skills, knowledge of diverse and global media histories, writing and research, and communication and collaboration. Students apply these skills to investigations of past, present, and future media artworks, industries and audiences. Students who earn a degree in Film and Media Studies enter diverse career paths within the entertainment and media industries, professional fields such as law and education, work for NGO and nonprofit organizations, and more.

Students who might want to major or minor in film and media studies should begin with either FAMS 240 (CC-AIU) or FAMS 300 (CC-GHS). FAMS 110 (CC-AUI) is designed for non-majors who seek a broad introduction to foundational concepts in the analysis and production of media arts.

Programs

- Film and Media Studies Minor (https://academicbulletins.sc.edu/undergraduate/arts-sciences/visual-art-design/film-media-studies-minor/)
- Film and Media Studies, B.A. (https://academicbulletins.sc.edu/undergraduate/arts-sciences/visual-art-design/film-media-studies-ba/)

Courses

FAMS 110 - Media Culture (3 Credits)
Introduction to the critical study of film, video, photography, audio, and new media.
Cross-listed course: MART 110
Carolina Core: AIU

FAMS 180 - Film Culture (3 Credits)
How the film industry developed and the impact the movies have had on global popular culture. Does not count toward the film studies major.
Carolina Core: AIU

FAMS 240 - Film and Media Analysis (3 Credits)
Introduction to the critical study of film and media. Students will closely analyze moving images and develop written arguments about film and media.
Carolina Core: AIU

FAMS 300 - Film and Media History (3 Credits)
Surveys the development of cinema and related media from the 1820s to the present. Attention to the relations among key technological, cultural, and industrial changes, their causes, and consequences.
Carolina Core: GHS

FAMS 301 - Media, Power & Everyday Life (3 Credits)
Foundational approaches to media as a means of defining and distributing social power in everyday life.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 308 - Global Media Industries (3 Credits)
Provides the foundation for the study of globalized film and media industries.
Cross-listed course: GLST 308

FAMS 310 - Special Topics In Popular Media (3 Credits)
Intensive study of a specific topic in popular film and media. May be repeated up to three times for a total of nine credit hours as content varies by title.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 311 - Classical Hollywood Cinema (3 Credits)
Survey of Classical Hollywood Cinema in aesthetic, cultural, political, and economic contexts.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 316 - Music and the Hollywood Film (3 Credits)
Examination of how music guides audience interpretation and shapes Hollywood film style.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 325 - Superheroes across Media (3 Credits)
Examination of the superhero within and across media, industries, and eras addressing topics such as genre, style, seriality, remediation, franchising, and fandom.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 350, or ENGL 350.
FAMS 328 - The Blockbuster (3 Credits)
Examination of the post-1975 blockbuster film phenomenon with an emphasis on marketing, finance, and reception.
Prerequisite or Corequisite: C or better in FAMS 308.

FAMS 330 - Special Topics in Non-Film Media (3 Credits)
Intensive study of a specific topic concerning a medium or mediums other than film. May be repeated up to three times for a total of nine credit hours as content varies by title.
Prerequisites: C or better in FAMS 240 or FAMS 300.

FAMS 332 - American Television (3 Credits)
Examination of American television as an industry, art form, medium of social representation, and set of viewer practices.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 338 - Contemporary British Television Industry (3 Credits)
Examination of industrial structures, network histories, production cultures, and regulation contexts of contemporary British television.
Prerequisite or Corequisite: C or better in FAMS 308.

FAMS 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Cross-listed course: ENGL 350

FAMS 360 - Special Topics in Global Media (3 Credits)
Intensive study of a specific topic in film and media centered outside the U.S. May be repeated up to three times for a total of nine credit hours as content varies by title.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 361 - Middle East on Screen (3 Credits)
Examines representations of the Middle East on screen within multiple media-making traditions and considers their aesthetic, political, and ethical dimensions.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 363 - Hong Kong Action Cinema (3 Credits)
Survey of the transnational history of Hong Kong action cinema and introduction to critical approaches through which it has been studied.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 365 - Screening China (3 Credits)
Survey of Chinese language cinema. Chinese film history and vocabulary with which to discuss film texts. Covers classic leftwing cinema, Hong Kong martial arts films, as well as the Hong Kong, Taiwan, and PRC New Waves. Taught in English. Films subtitled.
Cross-listed course: CHIN 365

FAMS 380 - Special Topics in Alternative Media (3 Credits)
Intensive study of a specific topic concerning film and media forms and/or practices outside the commercial mainstream. May be repeated as many as three times for a total of nine credit hours as content varies by title.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 381 - History of Experimental Film (3 Credits)
Survey of key examples and tendencies in the history of experimental film.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 383 - Documentary Studies (3 Credits)
History, theory, and practices of documentary film and media.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and program director is required. Graduation with Leadership Distinction: GLD: Research

FAMS 470 - Genre Studies Film & Media (3 Credits)
Critical study of a popular genre (e.g., horror, science fiction, melodrama), or set of genres, in film and media. Course content varies and will be announced in the schedule of courses by title. May be repeated as topics vary.

FAMS 499 - Internship in Film and Media Studies (3 Credits)
Internship in Film and Media Studies. (Variable) Supervised professional experience working with media production, distribution, exhibition, archiving, and/or education.
Prerequisite or Corequisite: C or better in FAMS 308.

FAMS 510 - Topics in Film Media Histories (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

FAMS 511 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

FAMS 581 - Critical Interactives (3 Credits)
Foundational techniques in multidisciplinary software development, specifically of applications designed to present sensitive, sometimes controversial, materials in ways to engender empathic awareness of the interactor.
Cross-listed course: CSCE 571

FAMS 598 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Geography

Department Website (http://www.cas.sc.edu/geog/)

Jerry Mitchell, Chair

The Department of Geography offers both the Bachelor of Arts degree and the Bachelor of Science degree, each with a major in geography. The BA degree is in general geography; the BS degree offers concentrations in physical/environmental geography, geographic information sciences, and general geography.

Minors

The Department of Geography offers a flexible general geography minor that requires 18 credit hours in geography courses. Students may not apply more than 3 credit hours from the 100 level and not more than 9 credit hours from the 200 level.
Besides the general geography minor, students may instead choose a specialized minor in the following areas: environmental geography, geographic information science, meteorology and climatology, physical geography, and regional geography. Please see a faculty advisor in the Department of Geography for more details on the requirements for specialized minors.

**Programs**

- Geography Minor (p. 95)
- Geography, B.A. (p. 95)
- Geography, B.S. (p. 98)

**Courses**

GEOG 103 - Introduction to Geography (3 Credits)
Carolina Core: GSS

GEOG 104 - Introduction to Physical Geography (3 Credits)
Basic concepts of landform geography, climatology and meteorology, and biogeography.
Carolina Core: SCI

GEOG 105 - The Digital Earth (3 Credits)
Introduction to geographic data; use of digital maps and aerial/satellite images as means of Earth observation; basics of spatial data analysis; location-based Web APPs; digital map services.
Carolina Core: ARP

GEOG 121 - Globalization and World Regions (3 Credits)
Introduction to political, economic, social, and environmental processes of global integration and regional differentiation.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

GEOG 201 - Landform Geography (4 Credits)
Hydrology, soil science, and interpretation of physical features formed by water, wind, and ice, with emphasis on environmental change. Three hours of lecture and one two-hour laboratory per week.
Carolina Core: SCI

GEOG 202 - Weather and Climate (4 Credits)
Processes that influence weather and climate patterns on the earth. Three lectures and one two-hour laboratory per week.
Carolina Core: SCI

GEOG 210 - Peoples, Places, and Environments (3 Credits)
Basic principles of human geography.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

GEOG 221 - Geography of South Carolina (3 Credits)
An intensive regional analysis of South Carolina. Selected phenomena such as urbanization, industrialization, land use, the physical environment, and their interrelationships.
Carolina Core: GSS

GEOG 224 - Geography of North America (3 Credits)
Physical and human geography of North America with emphasis on the United States.
Carolina Core: GSS

GEOG 225 - Geography of Europe (3 Credits)
Physical and human geography of Europe.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Global Learning

GEOG 226 - Geography of the Middle East (3 Credits)
A regional geographic approach to the environmental, social, economic, and political aspects of the Middle East (Southwest Asia and north Africa) with emphasis on contemporary problems.
Carolina Core: GSS

GEOG 228 - Geography of Sub-Saharan Africa (3 Credits)
A regional approach to the physical, social, economic, and political aspects of Sub-Saharan Africa with emphasis on contemporary problems.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Global Learning

GEOG 285 - Introduction to Drones for Airborne Spatial Data (3 Credits)
This course is an introduction to the use of small unmanned aerial systems (UAS) in collecting/processing imagery for mapping/information analysis. Course content includes UAS characteristics, small camera considerations, project planning and processing, and legal requirements in the United States and selected European countries.

GEOG 310 - Topics in Geography (3 Credits)
Selected topics of special interest in geography. May be repeated as content varies by title.

GEOG 311 - Cultural Geography (3 Credits)
The temporal-spatial relationship between humans and the natural environment with emphasis on the role through time of human activity in changing the face of the earth.

GEOG 312 - Geography and Global Geopolitics (3 Credits)
Geographic perspectives on problems in international relations. Political geographic analysis of contemporary world problems.
Graduation with Leadership Distinction: GLD: Global Learning

GEOG 313 - Economic Geography (3 Credits)
Spatial interrelation and linking of economic activities and how location affects the nature of economic systems.

GEOG 321 - Sustainable Cities (3 Credits)
Overview of the relationships between urbanization and environmental processes and an exploration of pathways to greater sustainability.

GEOG 324 - Landscapes of the United States (3 Credits)
Geographic change through time in the United States, with emphasis on evolution of the American landscape. Physical environment as modified by human intervention over time within a regional framework.

GEOG 330 - The Geography of Disasters (3 Credits)
The study of disasters, their triggering mechanisms (natural, human, technological), their spatial distributions from local to global scales, and associated human responses.

GEOG 341 - Cartography (3 Credits)
Introduction to the theory and principles of map construction including discussions of equipment and materials, lettering and symbolization, scale and generalization, data manipulation and representation. Presentation of geographic information on maps.
GEOG 343 - Environment and Society (3 Credits)
A geographic consideration of the interactions between environment and society. The ways in which social, economic, and cultural processes interact across local to global scales and influence environmental practices, policies, and patterns of change will be emphasized.

GEOG 344 - Geographies of American Cities (3 Credits)
Overview of the development of American cities from industrial period to the present. Special attention given to the political, economic, social processes that shape urban space and urban ways of life.

GEOG 345 - Interpretation of Aerial Photographs (3 Credits)
Theory and use of basic photo interpretation instruments and methods. Practice in acquiring and interpreting data from aerial photography for use in the physical and social sciences.

GEOG 346 - Climate and Society (3 Credits)
Major theories and methodologies for studying the relationship between climate and society.

GEOG 347 - Water as a Resource (3 Credits)
Introduction to spatial and institutional aspects of water availability, demand, and quality. Water storage/conveyance strategies and facilities. Real and perceived flood, drought hazards.

GEOG 348 - Biogeography (3 Credits)
Spatial distributions of plants and animals as they relate to historical biogeographic patterns and human impact on the biosphere.

GEOG 349 - Cartographic Animation (3 Credits)
Introduction to theories and principles of cartographic animation.
Prerequisites: GEOG 341 or GEOG 363.

GEOG 360 - Geography of Wind (3 Credits)
Fundamental principles of wind formation, measurement, and its impacts on the natural and human environment – landscape, human settlement and health, transportation, and energy.

GEOG 363 - Geographic Information Systems (3 Credits)
Introduction to principles and methods of geographic information systems including discussion of computers, spatial data, analysis, and display. Includes discussion of applications and hands-on experience.

GEOG 365 - Hurricanes and Tropical Climatology (3 Credits)

GEOG 370 - America's National Parks (3 Credits)
Resource, managerial, and recreational-use components of the national park system; contemporary issues, problems, and managerial alternatives.

GEOG 371 - Air Pollution Climatology (3 Credits)
Fundamentals, processes, and issues associated with air pollution. Emphasis is on the role of the atmosphere, how air pollution affects surface climate, and how climate and meteorology influence air quality.

GEOG 378 - World Tourism Geography (3 Credits)
Geographic analysis of tourism in America and selected world regions; demand, supply, transportation, and cultural/environmental impact of tourism and travel.

GEOG 380 - Global Geography of Human Rights (3 Credits)
Geopolitical, historical, cultural, and economic geographies of human rights around the world; issues of development, environment, health, inequality, violence.

GEOG 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

GEOG 495 - Seminar in Geography (3 Credits)
Research methods and projects; restricted to students with at least 15 hours of credit in geography. Restricted to students with at least 15 hours of credit in geography.

Graduation with Leadership Distinction: GLD: Research
Experiential Learning: Experiential Learning Opportunity

GEOG 497 - Special Topics: Service Learning in Geography (1 Credit)
Service learning experience in conjunction with designated Geography courses. Direct, hands-on service experience with an agency, voluntary organization, or community-based project. May be repeated, as content varies by title. Students enrolled in designated Geography courses by Instructor permission.
Corequisite: Must be taken simultaneously with designated Geography courses, levels 200 and above.

Experiential Learning: Experiential Learning Opportunity

GEOG 498 - Undergraduate Research (3 Credits)
Research on a significant geography problem in the local environment. Emphasis will be on the development of relatively individualized experiences in scientific investigation.

Graduation with Leadership Distinction: GLD: Research

GEOG 499 - Senior Thesis (3 Credits)
Senior research thesis on a problem of fundamental geographic significance, supervised by faculty member; must include a written final project report.

Graduation with Leadership Distinction: GLD: Research

GEOG 510 - Special Topics in Geographic Research (3 Credits)
Selected topics of special interest in geography. May be repeated as content varies by title.

GEOG 511 - Planning and Locational Analysis (3 Credits)
Scientific approaches to locational problems in urban and regional planning, including regional growth and decline, land use control, public facility location and provision, and locational efficiency.

GEOG 512 - Migration and Globalization (3 Credits)
A survey of the political, economic, and social causes and consequences of migration. Topics include immigration policy, border control, settlement patterns, transnationalism, multiculturalism, and integration. Selected contemporary and historical cases.
Prerequisites: GEOG 210.

GEOG 515 - Political Geography (3 Credits)
Concepts of space and power and their relationship to politics, elections, geopolitics, identities, law, economics, populations, and civil society.

GEOG 516 - Coastal Zone Management (3 Credits)
Analysis of the competing demands for limited resources in the coastal zone with emphasis on the role of management in the resolution of conflicts over resource use.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

GEOG 521 - Landscapes of South Carolina (3 Credits)
An examination of the factors responsible for creating the contemporary South Carolina cultural landscape.
GEOG 525 - Geographical Analysis of Transportation (3 Credits)
Analysis of transportation systems and the application of geographic tools to transportation planning.

GEOG 530 - Environmental Hazards (3 Credits)
Human and environmental contributions to the generation and management of hazards originating from extreme natural events to technological failures. Contemporary public policy issues at the national and international level.

GEOG 531 - Quantitative Methods in Geographic Research (3 Credits)
A survey of basic quantitative approaches for handling and interpreting geographically related data; univariate and bivariate procedures applicable to a variety of problems.

GEOG 535 - Hazards Analysis and Planning (3 Credits)
Examination of the geospatial aspects of hazards analysis and planning with specific reference to disaster preparedness, recovery, mitigation, and resilience.
Prerequisites: GEOG 363 and GEOG 530, or equivalents.

GEOG 538 - Global Food Politics (3 Credits)
Political, social, and cultural landscapes of food and farming around the world; issues of agricultural production, trade, consumption, and food security.

Cross-listed course: ENVR 538

GEOG 541 - Advanced Cartography (3 Credits)
Planning, compiling, constructing, and evaluating thematic maps. Theory and practice in scribining, separation and screening, color proofing, and map reproduction. Discussions of the process of map communication and the ways the cartographer can improve that communication.
Prerequisites: GEOG 341.

GEOG 542 - Dynamic Cartography (3 Credits)
Theories and principles of interactive and animated cartographic design.
Prerequisites: GEOG 341.

GEOG 544 - Geography of the City (3 Credits)
The influence of political boundaries, historical forces, settlement patterns, and transportation processes on urban life.

GEOG 545 - Synoptic Meteorology (4 Credits)
Analysis of synoptic-scale circulation using weather maps, soundings, cross sections, thermodynamic diagrams, numerical models, and imagery.
Prerequisites: GEOG 202 or equivalent.

GEOG 546 - Applied Climatology (4 Credits)
Analysis of climate applications in natural and human-modified environments. Content may include water resources, solar energy, urban planning, air quality, agriculture, and tourism. Course work includes lab and field experimentation.

GEOG 547 - Fluvial Geomorphology (3 Credits)
Introduction to landforms and processes associated with flowing water at the earth's surface. Hydrology, sedimentology, and theories of channel formation and drainage basin evolution.

GEOG 549 - Water and Watersheds (3 Credits)
Spatial variation of hydrology, water quality, and water-related hazards, including runoff generation, soil erosion, sedimentation, and flood hazards. Emphasizes a watershed perspective using geographic data and methods.
Prerequisites: GEOG 347, GEOL 371, or ECIV 360.

GEOG 551 - Principles of Remote Sensing (3 Credits)
Introduction to remote sensing. A variety of imaging systems including black and white, color, and high altitude color infrared photographs, LANDSAT, thermal infrared, and active microwave. Use of remote sensing for studying the extra-terrestrial environment and earth weather systems.

GEOG 552 - LiDARgrammetric and Photogrammetric Digital Surface Mapping (3 Credits)
Introduction to fundamental concepts used to map topographic and planimetric Earth surface features using digital LiDAR (LiDARgrammetric) and digital soft-copy photogrammetry (Photogrammetric).
Prerequisites: GEOG 363 or GEOG 341 or GEOG 345 or GEOG 551 or GEOG 563.

GEOG 554 - Spatial Programming (3 Credits)
Computer programming of spatial problems; spatial statistical analysis, interactive graphics, and computer maps.

GEOG 556 - WebGIS (3 Credits)
Web-based Geographic Information Systems (WebGIS), including concepts and principles of WebGIS, web programming fundamentals, web-based mapping techniques, and developing WebGIS applications.
Prerequisites: GEOG 363.

GEOG 560 - Source Materials for Geographic Instruction (3 Credits)
Introduction to selected materials available for all levels of instruction in geography. Emphasis on the substantive nature of the materials.
Cross-listed course: EDSE 505

GEOG 561 - Contemporary Issues in Geography Education (3 Credits)
Key concepts of geography and current approaches to teaching geography with specific attention to classroom materials, curriculum reform, cross-curricular integration, learning theory, and the use of geospatial/instructional technology.

GEOG 562 - Satellite Mapping and the Global Positioning System (3 Credits)
Technology and use of Global Positioning Systems (GPS). GPS space segment, receiver technologies, range observables, and positioning accuracy. Applications to large/medium scale mapping, remote sensing, and aerial photography.
Prerequisites: GEOG 345 or GEOG 363 or GEOG 551.

GEOG 563 - Advanced Geographic Information Systems (3 Credits)
Theory and application of geographic information systems including discussions of automated input, storage, analysis, integration, and display of spatial data. Use of an operational geographic information system.

GEOG 564 - GIS-Based Modeling (3 Credits)
Geographical information systems for modeling physical/human processes in space and time using raster and vector data. Cartographic modeling concepts, embedded models, and GIS-model coupling.

GEOG 565 - Geographic Information System (GIS) Databases and Their Use (3 Credits)
Representation, construction, maintenance, and analysis of spatial data in a geographic information system (GIS) database.
Prerequisites: GEOG 363 or GEOG 341 or GEOG 551 or GEOG 563.

GEOG 566 - Social Aspects of Environmental Planning and Management (3 Credits)
Geographical approach to environmental problems.
Prerequisites: GEOG 343.
GEOG 567 - Long-Term Environmental Change (3 Credits)
Climatic changes of the past and their impact on the physical landscape, with an emphasis on the Quaternary period.
Prerequisites: A 200-level course in physical geography or geology or equivalent.
Cross-listed course: GEOL 567

GEOG 568 - Human Dimensions of Global Environmental Change (3 Credits)
Consequences of increasing anthropogenic changes on environmental systems including the sources of change, regional impacts, and social and policy responses.
Prerequisites: GEOG 343.

GEOG 569 - International Development and the Environment (3 Credits)
Intersections of international development and environmental change; study of general theoretical perspectives balanced with case studies from the Global South.
Cross-listed course: ANTH 569
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

GEOG 570 - Geography of Public Land and Water Policy (3 Credits)
Geography of public land, water, and related public trust resources (wildlife, timber, minerals, fuels, recreation, wetlands, coastal zones, wilderness); historical geography of policy; spatial aspects of current research and management.

GEOG 571 - Microclimatology (4 Credits)
Field techniques and processes in the atmospheric boundary layer including radiation, soil heat fluxes, turbulence, momentum, latent and sensible heat fluxes, moisture, and evaporation.
Prerequisites: GEOG 202.

GEOG 572 - Climatic Change and Variability (3 Credits)
Observations and theories of climatic change and variability as they occur at different space and time scales. Projections of future climates. Techniques used in climatic change research and impact analysis.
Prerequisites: GEOG 202 or equivalent.

GEOG 575 - Digital Techniques and Applications in Remote Sensing (3 Credits)
Introduction to digital image processing techniques and applications. Image correction, enhancement, spatial and spectral transformation. Land use/land cover classification, and change detection.
Prerequisites: GEOG 551 or equivalent.

GEOG 581 - Globalization and Cultural Questions (3 Credits)
This course examines cultural understandings of and responses to globalization, examining topics such as its history and theories, migration, economic integration and inequality, identity, social movements, and the environment.
Cross-listed course: ANTH 581
Graduation with Leadership Distinction: GLD: Global Learning

GEOG 590 - Beach-Dune Interactions (3 Credits)
Influence of wind on coastal systems, with emphasis on nearshore currents, sediment transport and bedforms, aeolian transport, and dunes. Minimum Junior standing required.
Cross-listed course: MSCI 590

GEOG 595 - Internship in Geography (1-6 Credits)
Internship in government agencies, private-sector businesses, and non-profit organizations under the joint supervision of sponsor and departmental. A maximum of three credits may be applied to undergraduate Geography major or to Geography master’s degree. May be repeated to a maximum of six credits.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

**Geography Minor**

**Minor Requirements (18 Hours)**
The Department of Geography offers a flexible General Geography minor that requires 18 credit hours in geography courses. Students may not apply more than 3 credit hours from the 100-level and not more than 9 credit hours from the 200-level.

**Geography, B.A.**

**Learning Outcomes**
- Students will demonstrate the ability to communicate in written and oral forms. These outcomes are evaluated together because they are connected for our students who often are in careers where their written work is the substance of their oral presentations. We see the linkage of the two to be the most important aspect.
- Students will demonstrate understanding of and the use of one geographical technique such as GIS, remote sensing, cartography, or spatial statistics.
- Students will demonstrate their knowledge of the central themes within the discipline.
- Students will be prepared for careers in the field or for graduate study in geography.

**Admissions**

**Entrance Requirements**
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.
Degree Requirements (120 hours)
Program of Study

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

Choose at least 1 of the following to fulfill a Carolina Core requirement

must be passed with a grade of C or higher

Course | Title | Credits |
--------|-------|---------|
GEOG 103 | Introduction to Geography | 3 |
GEOG 104 | Introduction to Physical Geography | 3 |
GEOG 105 | The Digital Earth | 3 |
GEOG 121 | Globalization and World Regions | 3 |
GEOG 201 | Landform Geography | 4 |
GEOG 202 | Weather and Climate | 4 |
GEOG 210 | Peoples, Places, and Environments | 3 |

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Nine hours of Fine Arts or Humanities
3. Program Requirements (34-49 hours)
Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences. (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/)

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (16-37 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: 4-25 hours of electives will be needed to reach hours to graduate, if completing the B.A. with Distinction.

4. Major Requirements (24 hours)
a minimum grade of C is required in all major courses

Major Courses (6 hours)

Total Credit Hours 6

Major Electives (18 hours)

- Select 5-6 GEOG courses with advisor's approval that are tailored towards a topical, methodological, or geographical focus.

Note: Majors may take up to 9 hours of GEOG courses at the 200-level to fulfill major requirements; 6 hours must be at the 500-level. GEOG 595 can be used to fulfill up to 3 hours of geography elective credit, but not the 500-level requirement. Courses used to fulfill Carolina Core or College Requirements may not be used again to fulfill these requirements.

B.A. with Distinction in Geography (36 hours)
Available to students majoring in Geography who wish to participate in significant research activities in their major field under the supervision of a faculty mentor.

Prerequisite
A minimum GPA of 3.50 in the major, and 3.30 cumulative, is required to apply for a BA with Distinction in Geography.

Requirements
- Students must submit a written application for the BA with Distinction in Geography at least eight months before completion of the degree.
- Written sponsorship agreement from a Geography faculty mentor on file in the department.
- An established thesis committee consisting of a tenure-track faculty member in Geography and at least one other tenure-track or research faculty member at the University of South Carolina.
- A written thesis demonstrating significant original work and approved by the thesis committee.
- A public presentation of the Senior Thesis research.
- Successful fulfillment of all requirements below with a minimum GPA of 3.50 in the major and 3.30 cumulative.
- General major requirements, plus 12 additional credit hours including:
  - A minimum of nine credit hours in GEOG 498, or any GEOG 500-level courses (9 hours)
  - GEOG 499

Note: South Carolina Honors College students satisfying the above requirements will graduate with "Honors from the South Carolina Honors College" and with "Distinction in Geography."
Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Geography, B.A.

Geography, B.S.

Learning Outcomes
- Students will demonstrate the ability to communicate in written and oral forms. These outcomes are evaluated together because they are connected for our students who often are in careers where their written work is the substance of their oral presentations. We see the linkage of the two to be the most important aspect.
- Students will demonstrate understanding of and the use of one geographical technique such as GIS, remote sensing, cartography, or spatial statistics.
- Students will demonstrate their knowledge of the central themes within the discipline.
- Students will be prepared for careers in the field or for graduate study in geography.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

VSR – Values, Ethics, and Social Responsibility (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)
Courses Acceptable for Social Science and Fine Arts or Humanities (6 hours)

Accordingly, please select one of the following:

- GHS requirement must be fulfilled through this college requirement.

History (3 hours)

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Three hours of Fine Arts or Humanities

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

3. Program Requirements (33-49 hours)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/)

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Science degrees, grades of D are acceptable for cognate credit. Courses applied toward general education requirements cannot be counted toward the cognate, except where restricted by the major program.

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (15-37 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.
Note: 4-25 hours of electives will be needed to reach hours to graduate, if completing the B.S. with Distinction.

4. Major Requirements (24-25 hours)

A minimum grade of C is required in all major courses.

Concentrations (24-25 hours)
Students must choose one of the following three concentrations:

General Geography (24 hours)
At least two courses for the major must be from the 500-level. GEOG 595 can be used to fulfill up to 3 hours of geography elective credit, but not the 500-level requirement.

1  GEOG 201 or GEOG 202 may be used if not used to satisfy Carolina Core or College Requirements.

B.S. with Distinction in Geography (36 hours)
Available to students majoring in Geography who wish to participate in significant research activities in their major field under the supervision of a faculty mentor.

Prerequisite
A minimum GPA of 3.50 in the major, and 3.30 cumulative, is required to apply for a BA or BS with Distinction in Geography.

Requirements
• Students must submit a written application for the BS with Distinction in Geography at least eight months before completion of the degree.
• Written sponsorship agreement from a Geography faculty mentor on file in the department.
• An established thesis committee consisting of a tenure-track faculty member in Geography and at least one other tenure-track or research faculty member at the University of South Carolina.
• A written thesis demonstrating significant original work and approved by the thesis committee.
• A public presentation of the Senior Thesis research.
• Successful fulfillment of all requirements below with a minimum GPA of 3.50 in the major and 3.30 cumulative.
• General major requirements, plus 12 additional credit hours including:
  • A minimum of nine credit hours in GEOG 498, or any GEOG 500-level courses (9 hours)
  • GEOG 499

Note: South Carolina Honors College students satisfying the above requirements will graduate with “Honors from the South Carolina Honors College” and with “Distinction in Geography.”

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Geography, B.S. General Geography Concentration
Geography, B.S. Geographic Information Science Concentration
Geography, B.S. Physical/Environmental Geography Concentration

Global Studies
Department Website (https://www.sc.edu/study/colleges_schoo ls/artsandsciences/global_studies/)
The Global Studies Program is housed in the College of Arts and Sciences and features the Bachelor of Arts in Global Studies, established in 2016.
This degree program encourages interdisciplinary study of global issues while promoting cross-cultural perspectives.

Students in the Global Studies Degree program will focus on one of four themes: Global Health, Global Conflict and Security, Global Sustainability and Development, and Global Cultures. These themes are then applied to one of six world regions: Africa, Asia, Europe, Latin America, Middle East and North Africa, and Russia & Eurasia. The major also features a Leadership in the Global Economy concentration.

Courses

GLST 220 - Introduction to Global Studies Through Literature (3 Credits)
Given that literature represents real policies and practices in the contemporary world and our ethical responsibility as global citizens, the course will focus on literature from different periods, nations, and regions across the world in order to better understand the way human experiences and different cultures relate. All literature will be read and taught in English.

GLST 300 - Introduction to International Development (3 Credits)
Critical, historical, and theoretical introduction to modern development practice. Includes extended discussions of contemporary best practices in the field.

GLST 308 - Global Media Industries (3 Credits)
Provides the foundation for the study of globalized film and media industries.
Cross-listed course: FAMS 308

GLST 369 - History of Capitalism 1: Ancient and Medieval World (3 Credits)
History of “capitalist” economic behavior and culture in various premodern societies: the Ancient Middle East, Classical Greece, the Roman Empire, early Islamic society, medieval Christian and Islamic states, the Mongol period and the era of global expansionism; evaluation of competing theories about premodern economic life and the meaning of “capitalism”

GLST 370 - History of Capitalism From the Industrial Revolution to the Global Economy (3 Credits)
A history of capitalism and its evolving definitions in Europe from the Middle Ages to the 20th Century, including its role in agriculture, mechanical industry, international trade, and colonialism and domination.

GLST 391 - Topics in Global Studies (3 Credits)
Selected topics in Global Studies. May be repeated with a change in topic. May be taken three times for credit.

GLST 490 - Global Studies Internship (1-3 Credits)
Academic counterpart to a professional work experience in which global or international affairs play a central role. Provides an introduction to foreign affairs and intercultural interactions in a working environment. Introduction to career possibilities for a student trained in global studies. Global Studies major with 3.0 or better GPA and completion of at least 45 credits.
Prerequisites: Two courses from the following: ANTH 102; GEOG 121; GEOG 210; LING 101; POLI 101; RELG 101.

Programs

- History Minor (p. 109)
- History, B.A. (p. 109)

Courses

HIST 101 - European Civilization from Ancient Times to the Mid-17th Century (3 Credits)
The rise and development of European civilization from its Mediterranean origins through the Renaissance and Reformation.
Carolina Core: GHS

HIST 102 - European Civilization from the Mid-17th Century (3 Credits)
European development and expansion from the mid-17th century to the present.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 103 - Introduction to South Asian History (3 Credits)
Political, cultural, and economic forces that have conditioned the development of institutions and ideas in South Asia.
Carolina Core: GHS

HIST 104 - Introduction to the Civilization of the Islamic Middle East (3 Credits)
An analysis which treats the major cultural elements of traditional Islamic civilization and then concentrates upon the reactions of the Arabs, Turks, and Iranians to the problems of adjusting to the modern world.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

History

Department Website (https://sc.edu/study/colleges_schools/artsandsciences/history/index.php/front-page/)

Jessica Elfenbein, Chair
HIST 105 - Introduction to East Asian Civilization (3 Credits)
The evolution of social, political, and cultural patterns in East Asia, with emphasis on the development of philosophical, religious, and political institutions and their relationship to literary and artistic forms in China and Japan.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 106 - Introduction to African History (3 Credits)
An examination of several traditional sub-Saharan African societies and of their political and economic transformation in the modern, colonial, and post-independence periods.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 107 - Introduction to Ancient Near Eastern Civilization (3 Credits)
The political, social, religious, economic, military, and intellectual development of Ancient Egypt, Mesopotamia, and adjoining areas from the origins of civilization until the seventh century A.D.

HIST 108 - Science and Technology in World History (3 Credits)
The development of science and technology and their roles in world civilizations from antiquity to the present.
Carolina Core: GHS, VSR

HIST 109 - Introduction to Latin American Civilization (3 Credits)
A discussion of the political, cultural, and economic forces which have conditioned the development of institutions and ideas in Spanish and Portuguese America.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 110 - Conquest, Colonization, and Captivity: A Cultural History of the Americas from 1441 to 1888 (3 Credits)
Comparative examination of conquest, colonization, and human captivity in the history, cultural values, and social ethics of European, African, and Indigenous civilizations in the Americas, 1441-1888.
Carolina Core: GHS, VSR

HIST 111 - United States History to 1865 (3 Credits)
A general survey of the United States from the era of discovery to 1865, emphasizing major political, economic, social, and intellectual developments.
Carolina Core: GHS

HIST 112 - United States History since 1865 (3 Credits)
A general survey of the United States from 1865 to the present, emphasizing major political, economic, social, and intellectual developments. Honors sections are available for students in the honors program.
Carolina Core: GHS

HIST 201 - American Founding Documents (3 Credits)
Introduction to Declaration of independence, Constitution, Federalist Papers, Bill of Rights, landmark Supreme Court cases and constitutional amendments; exploration of these texts' historical context and debates about their meaning.

HIST 211 - Black Experience in the United States to 1865 (3 Credits)
The social, cultural, economic, and political life of black people in the United States to 1865.
Cross-listed course: AFAM 331
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

HIST 212 - Black Experience in the United States since 1865 (3 Credits)
The social, cultural, economic, and political life of black people in the United States since 1865.
Cross-listed course: AFAM 332
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

HIST 213 - History of the American West (3 Credits)
The history and development of an American region, "the West," through the narratives of its diverse people and the effects of its complex geography.

HIST 214 - The Practice of Public History (3 Credits)
Introduction to the field of public history. Explores the challenges of portraying history in museums, parks, and other public history venues.
Carolina Core: GHS

HIST 215 - History of the Devil (3 Credits)
A survey of the beliefs and practices associated with the demonic and the Devil from c. 500 B.C.E. to the 20th century.
Cross-listed course: RELG 206

HIST 300 - Introduction to the History Major: The Historian's Craft (3 Credits)
The nature of historical evidence, the formulation of historical questions, the process of historical research, and the construction of historical arguments using primary sources and secondary materials.
Graduation with Leadership Distinction: GLD: Research

HIST 301 - The Ancient Near East to 323 B.C. (3 Credits)
The formation of ancient Near Eastern cultures, the ultimate synthesis of these cultures and the resulting establishment of the Near East as an historical entity.

HIST 302 - Greek History and Civilization to 146 B.C. (3 Credits)
The origins and development of Greek civilization in its political, economic, social, and cultural aspects with special attention being given to the early and late classical periods and the Hellenistic Age.

HIST 303 - Roman Republic and Early Empire (3 Credits)
The origins of Rome and shaping of its republican government, the spread of Roman rule in Italy and across the Mediterranean, the establishment of the principate and formation of one diverse imperial society and culture.

HIST 304 - Late Antiquity: Imperial Rome to Islam (3 Credits)
Political, social and religious transformation of the Mediterranean world, 2nd to the 8th century, including the rise of Christianity, the decline of Roman power, and the rise of Islam.

HIST 305 - Greece and Rome in Film and Popular Culture (3 Credits)
Representations of antiquity in cinema, television, and other contemporary media, with emphasis on Hollywood's reception of Greek and Roman history.
Cross-listed course: CLAS 305

HIST 306 - Medieval Europe, ca. 300-1492 (3 Credits)
Topics include the formation of monarchies, the rise of Christianity, learning and universities, knighthood and social orders, and heresy and crusades.

HIST 307 - Family and Society in Europe, c. 1200-1700 (3 Credits)
Explores the concerns and importance of families in pre-modern Europe. Topics include household furnishings and management, social classes, gender roles, family law, marriages, business, children, feuds, and sexuality.
Graduation with Leadership Distinction: GLD: Global Learning
HIST 308 - Magic and Witchcraft in Europe, c. 1200-1700 (3 Credits)
Practices of, reactions against, and ideas surrounding magic and witchcraft during the late Middle Ages and the time of Europe's "Great Witch Craze".

HIST 309 - Age of Renaissance (3 Credits)
Social, cultural, and artistic movements in Italy and northern Europe from the Black Death (c. 1350) to religious reforms and revolutions (c. 1520).

HIST 310 - Age of the Reformation (3 Credits)
Religious, social, and political reforms from the rise of local religious protests (c. 1450) to the crisis of the 17th century. The rise of Protestantism and reactions in Catholicism.
Graduation with Leadership Distinction: GLD: Research

HIST 311 - The Age of Absolutism, 1648-1789 (3 Credits)
A survey of European political, economic, and intellectual development from the age of Louis XIV to the eve of the French Revolution.

HIST 312 - French Revolution and Napoleon (3 Credits)
The changes in France and Europe during the revolutionary decade, the rise of Napoleon, and the establishment of French hegemony over the Continent.

HIST 313 - The Enlightenment (3 Credits)
Intellectual and cultural history of the Enlightenment with particular attention to its relationship with the colonial world and its challenges to eighteenth-century states. Readings focused on primary sources.

HIST 314 - Video Games and History (3 Credits)
History in video games; comparison of selected games with historical scholarship, to assess the validity of the games' presentations of historical developments and the value of games to the understanding of history.

HIST 316 - Nineteenth-Century Europe (3 Credits)
Political, social, economic, and intellectual developments from 1815-1900, which brought European culture to its zenith and contributed to Europe's global domination.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 317 - Contemporary Europe from World War I to World War II (3 Credits)
The Great War, revolution, and reconstruction; the rise of authoritarian and totalitarian regimes and the coming of World War II.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 318 - Europe from World War II to the Present (3 Credits)
The Second World War and its origins; the Cold War; European recovery; a divided continent and Europe in the Global Era.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 320 - The History of Great Britain (3 Credits)
A survey of the political, social, economic, and cultural development of the British Isles from Anglo-Saxon times to the present. First semester: to the Restoration of 1660; second semester: since 1660.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 321 - The History of Great Britain (3 Credits)
A survey of the political, social, economic, and cultural development of the British Isles from Anglo-Saxon times to the present. First semester: to the Restoration of 1660; second semester: since 1660.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 323 - The British Empire (3 Credits)
Examination of the British Empire, tracing various historical themes as regions of world fell under British control, with particular attention to Ireland, India, and sub-Saharan Africa (especially South Africa) in the 17th Century-20th Century.

HIST 324 - Slavery and Freedom in the Ancient and Medieval World (3 Credits)
Exploration of varied forms of servitude in the ancient and medieval Mediterranean; examination of human bondage in the Hebrew Bible, ancient Greece, Roman society, late antique religious teachings, and medieval Christian and Islamic societies; study of ancient slavery in modern political debates, historians' writings, and television and film.

HIST 325 - Byzantine History: 4th to 11th Centuries (3 Credits)
The political, religious, and military developments within the Eastern Empire including its influence on Western and Slavonic Europe and Islam.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 326 - Byzantine History: 11th to 15th Centuries (3 Credits)
The political and military developments within the Eastern Empire from the invasion of the Seljuk Turks to its final destruction by the Ottoman Turks.

HIST 327 - The Crusades (3 Credits)
Holy war and realpolitik in Mediterranean East-West relations from the 10th through the 15th centuries with emphasis on the role of the crusades in the cultural formation, development, and international relations of East and West.

HIST 328 - Nineteenth-Century Britain (3 Credits)
The political, economic, and social developments in Great Britain and Ireland during the Victorian Age.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 329 - Modern and Contemporary Britain (3 Credits)
The political, economic, and social developments in Great Britain and Ireland during the 20th century.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 333 - France Since 1815 (3 Credits)
A political and social history from the Bourbon Restoration to the present.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 334 - The History of Russia from the Earliest Times to the Mid-19th Century (3 Credits)
The earliest life on the steppe, the Kievan State, the foundations of Moscow, and the Russian empire to the reign of Nicholas I.

HIST 335 - The History of Modern Russia and the Soviet Union (3 Credits)
The decline of Imperial Russia, the Revolution of 1917, Lenin, Stalin, and the Soviet Union since Stalin.

HIST 336 - Russian and Soviet Diplomatic History (3 Credits)
Imperial and Soviet foreign and military policies in the 19th and 20th centuries.

HIST 338 - Modern Germany (3 Credits)
A survey of German history including political, cultural, social, and economic developments from unification in 1871 to the present.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 342 - The Slavs in History (3 Credits)
An introductory survey of the civilization of the Slavic peoples. The historical traditions and culture of the peoples that occupy much of the Eurasian continent.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 343 - The Fall of the Eastern European Empires (3 Credits)
Nineteenth-century eastern European states and peoples; the political and social forces leading to World War I.
Graduation with Leadership Distinction: GLD: Global Learning
HIST 344 - Eastern Europe Since WWI (3 Credits)
Survey of states in East-central and Southeastern Europe. Problems of national identity, modernization, and small state politics. Impact of WWII, the Cold War, the fall of communism, and the return to pluralism.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 347 - The Middle East in Modern Times (3 Credits)
The impact of modern civilization upon the Middle East, including the history of the Arab, Turkish, Iranian, and Israeli segments of the Middle East during the 19th and 20th centuries.
**Graduation with Leadership Distinction:** GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 348 - North Africa from Colonialism to Revolution: 1830-1962 (3 Credits)
A survey of French North Africa (Morocco, Algeria, and Tunisia) and Libya under colonial rule. The creation, development, and triumph of the nationalist movements, with particular attention to Algeria and its revolution.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 349 - The Contemporary Middle East and North Africa (3 Credits)
Political, social, and economic history of the Middle East and North Africa in the years since World War II.
**Graduation with Leadership Distinction:** GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 350 - Saving Africa: Development and Humanitarianism in Historical Perspective (3 Credits)
Exploration of how and why Africa is often represented as helpless, the colonial origins of common patterns of development and humanitarianism, and other possible models for these processes.

HIST 351 - Africa to 1800 (3 Credits)
Social, cultural, economic, and political developments, focusing on internally and externally generated changes.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 352 - Africa since 1800 (3 Credits)
Commercial and religious revolutions of the 19th century, imposition and ending of formal colonial rule, and post-colonial issues.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 353 - Problems in the History of Africa South of the Sahara (3 Credits)
Independent readings and written papers on appropriate topics.

HIST 354 - Modern East Asia (3 Credits)
Surveys modern development of East Asia from 1800 to the present.
**Graduation with Leadership Distinction:** GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 355 - Late Imperial China (3 Credits)
Political, economic, social, and intellectual transformations of late imperial China from the Ming dynasty (1368-1644) through the last empire of China, the Qing dynasty (1644-1911).

HIST 356 - China Since 1949 (3 Credits)
Introduction to the major social, economic, and political changes in China from the Communist Revolution in 1949 to the present.

HIST 357 - Japan to 1800: Aristocrats and Warriors (3 Credits)
The growth of the ancient state and the evolution of the samurai class and its political authority.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 358 - Japan since 1800 (3 Credits)
The development of modern Japan: political evolution, industrial growth, social change, war, defeat, and occupation.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 360 - Into the Wild: Global Conservation since 1800 (3 Credits)
Global and comparative environmental-historical investigation of the ecological, socioeconomic, and cultural significance of wilderness protection, nature conservation, national parks, and nature tourism; field excursions required.

HIST 365 - East Africa and the Indian Ocean World (3 Credits)
East Africans’ contributions to an Indian ocean World that transcends single nation-states (stretching from Mozambique and Somalia to the Middle East, India and China) from the deep past to the present, including sections on “piracy,” Islam, slavery, race, and gender.

HIST 367 - Gandhi and the Nationalist Movement in India (3 Credits)
Development of anticolonial thought and political movements in British India from the early nineteenth century onwards. Focuses on Mohandas K. Gandhi, his critics, and Gandhi’s continuing global legacy.

HIST 369 - History of Capitalism 1: Ancient and Medieval Worlds (3 Credits)
History of “capitalist” economic behavior and culture in various premodern societies: the Ancient Middle East, Classical Greece, the Roman Empire, early Islamic society, medieval Christian and Islamic states, the Mongol period and the era of global expansionism; evaluation of competing theories about premodern economic life and the meaning of "capitalism"

HIST 370 - History of Capitalism 2: From the Industrial Revolution to the Global Economy (3 Credits)
A history of capitalism and its evolving definitions in Europe from the Middle Ages to the 20th Century, including its role in agriculture, mechanical industry, international trade, and colonialism and domination.

HIST 371 - History of Aipower (3 Credits)
The evolution of airpower from the early 20th Century through the early 21st Century. The emphasis is on the development of various theories about the application of aerial force, and how operations in time of war have confirmed or challenged these theories from a multinational perspective.

HIST 372 - History of Modern Sea Power (3 Credits)
The evolution of sea power through the development of steam navies around the globe, 1860 CE - 2020 CE.

HIST 374 - Nationalism: Myth and Reality (3 Credits)
A comparative examination of the origins and development of nationalism and its impact on the modern world.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 375 - Nazis and Fascists in European History, 1919-1945 (3 Credits)
German and Italian political movements; emphasis on the role of leadership, propaganda, and ideology. Fascist movements in France, Rumania, Hungary, and Great Britain.
**Graduation with Leadership Distinction:** GLD: Global Learning

HIST 376 - War and European Society, 1914-1945 (3 Credits)
Thematic examination of the nature and impact of total war on European society; emphasis on socio-economic, cultural, and military aspects.
**Graduation with Leadership Distinction:** GLD: Global Learning
HIST 377 - Business in Historical Perspective (3 Credits)
Capitalism in the Western world; the rise of modern corporate enterprise in Europe and America since 1850.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 378 - Urban Experience in Modern Europe (3 Credits)
Social and cultural impact of urbanization in Europe since 1789 through a comparison of major cities such as London, Paris, Vienna, and Berlin.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 379 - Women in Modern Europe (3 Credits)
Survey of women in European history from the eighteenth to the twenty-first century. Focus on women's citizenship beginning with Enlightenment idea of rights through developments in modern feminism. Cross-listed course: WGST 379
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 380 - History of the Holocaust (3 Credits)
Introduction to Nazi Germany's systematic mass-murder of Europe's Jews and other minorities during World War II. Examination of forces that led to the Holocaust, including scientific racism, Nazi policy implementation, and dynamics of annihilation during war. Cross-listed course: JSTU 492

HIST 381 - The Nobel Peace Prize: Peace, War, and Politics (3 Credits)
Modern history through the lens of the Nobel Peace Prize. Limitations of the Nobel as encouragement to peace. Cross-listed course: JSTU 381, RELG 381

HIST 382 - History of Medicine: Antiquity to the Scientific Revolution (3 Credits)
A survey of the history of premodern medicine. How Western cultures of the past approached health and illness; anatomy; nutrition; sexuality; disease and plague; mental and emotional health; and more. From ancient Greece, through medieval and early modern Islamic, Jewish, and Christian approaches to medicine and the body. Cross-listed course: JSTU 382, RELG 382

HIST 383 - Jewish History I: Late Antiquity to 1500 (3 Credits)
The religious, cultural, social, and political conditions that shaped the Jewish experience in the Near East and Europe from late antiquity to 1500. Cross-listed course: JSTU 381, RELG 381

HIST 384 - Jewish History II: 1500 to the Present (3 Credits)
Case studies of Jewish history in Europe, America, and the land of Israel, 1500 to the present. Cross-listed course: JSTU 382, RELG 382

HIST 385 - The Expansion of Christianity (3 Credits)
Critical epochs in the spread of Christianity. Consideration of the great crises that shaped the structure and form of Christianity during the last 20 centuries: the Hellenistic world; the medieval syntheses; the breakup of Western Christian unity; the transition to worldwide mission activity in the industrial age. Graduation with Leadership Distinction: GLD: Global Learning

HIST 386 - Islamic Institutions and Traditions (3 Credits)
The religious, political, social and economic institutions and intellectual and scholarly traditions developed by Muslim societies throughout Afro-Eurasia from late antiquity to the present. Cross-listed course: RELG 354
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 387 - Messiahs, Mystics and Rebels in the Islamic World (3 Credits)
Representative messianic movements, millenarian visionaries and apocalyptic imaginings in the Islamic world from the 7th century to the present, with attention to related developments in the Jewish and Christian traditions over the last two millennia. Cross-listed course: RELG 368

HIST 388 - Kabbalah: Science, Religion and Nature in Western History (3 Credits)
Historical investigation of kabbalah, a philosophical system and mystical current common to Judaism, Islam and Christianity, from the medieval period to the present; focus on its formative role in early modern Western cosmology and science, and its ecological implications today. Cross-listed course: JSTU 388, RELG 388

HIST 389 - Science, Magic and Religion (3 Credits)
Occultism as a link between science and religion and its central role in Western intellectual and cultural history; the historical development of the science-magic-religion continuum in the Islamo-Christian world from late antiquity to present. Cross-listed course: RELG 362

HIST 390 - Engineering in History (3 Credits)
History of engineering practices, professions, and sciences, as well as development of engineered artifacts from the Middle Ages to the present. Cross-listed course: JSTU 390

HIST 391 - Information Technology: Past and Present (3 Credits)
The history of the computer; how it acquired various forms through the 20th century; how information, as defined by computers, had shaped the world over the past century. Cross-listed course: JSTU 391

HIST 392 - Making Modern Science: The Physical Sciences (3 Credits)
The history of physics, chemistry, geology, and related sciences since the Scientific Revolution. Cross-listed course: JSTU 392

HIST 393 - Making Modern Science: The Life Sciences (3 Credits)
The study of the life from antiquity to the present. Investigates the origins of modern biology and medicine and how life has shaped scientific, political, and economic thought. Cross-listed course: JSTU 393

HIST 394 - History of the Automobile (3 Credits)
Evolution of the automobile from a conceptual idea through the present-day. Emphasis on analysis of the automobile's impact on culture, economics, the environment, politics, science and technology, and society. Cross-listed course: JSTU 394

HIST 395 - Plagues and Societies in World History (3 Credits)
A survey of biopolitical, social, economic, and cultural aspects of epidemic diseases throughout world history. Cross-listed course: JSTU 395

HIST 396 - Evolution of Warfare I (3 Credits)
A history of tactics, strategy, weapons, and logistics from 500 B.C. to A.D. 1400. Cross-listed course: JSTU 396

HIST 397 - Evolution of Warfare II (3 Credits)
A history of tactics, strategy, weapons, and logistics from A.D. 1400 to the present. 03: 07/05/2019. Cross-listed course: JSTU 397

HIST 398 - Sustainability in World History from Early Times to the Anthropocene (3 Credits)
An interdisciplinary examination of sustainability around the world from social, environmental, technological, and economic perspectives from early times to the present. Cross-listed course: JSTU 398

HIST 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students. Graduation with Leadership Distinction: GLD: Research

<tr>
<td>HIST 443</td>
<td>The New South</td>
<td>3</td>
<td>Reconstruction, the Bourbon era, agrarian revolt, industrial revolution, racial problems, and the changes resulting from the impact of two world wars and the New Deal (1865-1946).</td>
</tr>
<tr>
<td>HIST 444</td>
<td>The Civil War in American History</td>
<td>3</td>
<td>The causes, events, and results of the Civil War.</td>
</tr>
<tr>
<td>HIST 445</td>
<td>The Reconstruction of the Nation</td>
<td>3</td>
<td>The events and results of the attempt to reorder the American nation after the Civil War.</td>
</tr>
<tr>
<td>HIST 446</td>
<td>Immigration and Ethnicity in America</td>
<td>3</td>
<td>Issues of immigration, assimilation and nativism in the United States, 1840 to 1930.</td>
</tr>
<tr>
<td>HIST 447</td>
<td>American Empire: Policy, Society, and Culture</td>
<td>3</td>
<td>HIST 447 examines the full sweep of American history through the lens of empire, covering especially the linkages between U.S. foreign policy and American domestic culture.</td>
</tr>
<tr>
<td>HIST 448</td>
<td>American Environmental History</td>
<td>3</td>
<td>Interaction of cultural values, economic interests, public policy, and technology with the physical environment over time.</td>
</tr>
<tr>
<td>HIST 449</td>
<td>American Popular Culture Since 1890</td>
<td>3</td>
<td>A history of the contributions of the popular aspects of American culture and their interactions with American institutions.</td>
</tr>
<tr>
<td>HIST 451</td>
<td>The History of American Medicine</td>
<td>3</td>
<td>The development of the art and science of medicine as practiced in the United States from colonial times to Medicare. Emphasis on the social history of American medicine.</td>
</tr>
<tr>
<td>HIST 452</td>
<td>The History of Science in America</td>
<td>3</td>
<td>The development of science in America from colonial times to the present. Special attention will be given to defining those factors, scientific, economic, and social, which have raised American science to its commanding position in the 20th century.</td>
</tr>
</tbody>
</table>
HIST 453 - Technology and American Society (3 Credits)
The historical development of technologies and technological systems in the American context.

HIST 455 - The American Civil Rights Movement (3 Credits)
Examination of the origins of Jim Crow and the multi-faceted struggle against it, and other forms of racial inequality, in the American South and the rest of the US since the early 20th century.

Cross-listed course: AFAM 335
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

HIST 460 - American Thought to 1865 (3 Credits)
The transfer and adaptation of European ideas to a new environment and the development of new patterns.

HIST 461 - American Thought since 1865 (3 Credits)
The maturation and extension of a national culture.

HIST 462 - Southern Intellectual and Cultural History (3 Credits)
Intellectual and cultural developments characteristic of the Southern region from colonial times to the recent past.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HIST 463 - Jim Crow: Histories & Revivals (3 Credits)
This course critically examines the continuities and discontinuities between Jim Crow and our current historical and political moment.

Cross-listed course: AFAM 463

HIST 464 - History of American Women (3 Credits)
The social, political, and economic roles and changing status of women in America.

Cross-listed course: WGST 464
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

HIST 465 - American Diplomatic History (3 Credits)

HIST 466 - American Diplomatic History (3 Credits)

HIST 468 - American Military Experience (3 Credits)
Transformation of war and of the institutions for waging war from the American Revolution to the present.

Cross-listed course: ARMY 406

HIST 469 - Constitutional History of the United States (3 Credits)
A study of the constitutional development of the United States from the creation of the Articles of Confederation to the Civil War. It deals primarily with problems of governmental organization, judicial interpretation, and sectional politics.

HIST 470 - Constitutional History of the United States (3 Credits)
An analysis of the growth of constitutional power from 1860 to the present, giving special attention to the constitutional problems of the Civil War period, the increasing role of the judiciary in national affairs, and the general extension of constitutional authority in the 20th century.

HIST 471 - American Jewish History (3 Credits)
Examination of experiences of Jews in the United States from Colonial Period to late 20th century, especially Jewish immigration, political behavior, social mobility, religious affiliation, group identity formation, and meaning of Anti-Semitism in American and global contexts.

Cross-listed course: JSTU 471

HIST 475 - Historic Preservation (3 Credits)
Overview of historic preservation as the practice of protecting and conserving places that tell stories about the past.

HIST 476 - Digital History (3 Credits)
Introduction to Digital History that examines ways to engage and adapt the discipline of history to technological trends and explores new approaches and interpretive techniques.

HIST 478 - Material Culture in the Digital Age (3 Credits)
Examination of material culture (objects and artifacts a society produces) as primary sources for historical research, how these sources are transformed when digitized, and the nature of born-digital resources.

HIST 479 - Oral History (3 Credits)
Methodology, application and usage, historic and current literature, identification and examination of available resources.

Graduation with Leadership Distinction: GLD: Research

HIST 480 - Internship in Public History (3 Credits)
Professional practice in museums, archives, preservation organizations, and other agencies involved in historical research, advocacy, and preservation of historical resources and history programming for public audiences.

Experiential Learning: Experiential Learning Opportunity

HIST 492 - Topics in History (3 Credits)
Reading and research on selected historical subjects. Open only to juniors and seniors with permission of the instructor.

Graduation with Leadership Distinction: GLD: Community Service, GLD: Research

HIST 493 - Topics in History (3 Credits)
Reading and research on selected historical subjects. Open only to juniors and seniors with permission of the instructor.

Graduation with Leadership Distinction: GLD: Research

HIST 494 - Topics in History (3 Credits)
Reading and research on selected historical subjects. Open only to juniors and seniors with permission of the instructor.

Graduation with Leadership Distinction: GLD: Research

HIST 497 - Senior Seminar (3 Credits)
Principles of historical research and writing as applied to the seminar topic. Open to history majors or by special permission of instructor.

Prerequisites: HIST 300.

Graduation with Leadership Distinction: GLD: Research

HIST 498 - Senior Seminar (3 Credits)
Principles of historical research and writing as applied to the seminar topic. Open to history majors or by special permission of instructor.

Prerequisites: HIST 300.

Graduation with Leadership Distinction: GLD: Research

HIST 499 - Senior Thesis (3 Credits)
Principles of historical research and writing. A senior year thesis related to one of the advanced courses in the major program.

Prerequisites: HIST 300.

Graduation with Leadership Distinction: GLD: Research

HIST 562 - The Middle East and the United States: 1800 to the Present (3 Credits)
Political, cultural, and economic ties which have linked the Middle East to the United States. Middle Eastern views of these relationships and their impact on modern Middle Eastern history.

Graduation with Leadership Distinction: GLD: Global Learning
Wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.

2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

### Degree Requirements (120 hours)

#### Program of Study

<table>

</tr>
<tr>
<td>3. Program Requirements</td>
<td>28-43</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>27</td>
</tr>
</tbody>
</table>

#### 1. Carolina Core Requirements (32-44 hours)

**CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)**

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

**ARP – Analytical Reasoning and Problem Solving (6-8 hours)**

- any CC-ARP courses (p. 742)

**SCI – Scientific Literacy (8 hours)**

- Two 4-credit hour CC-SCI (p. 742) laboratory science courses

**GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)**

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required for all baccalaureate degrees. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

*It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.*
GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
  • any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
  • any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
  • any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
  • any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
  • any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
  • any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
  • only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
  • One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  • One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

3. Program Requirements (28-43 hours)
Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences. (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/)

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholaristic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (10-31 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.
4. Major Requirements (27 hours)

A minimum grade of C is required in all major courses.

Students may take up to 6 hours of History courses at the 200 level to fulfill major requirements; all the rest of their course hours in History must be taken at the 300 level or higher.

Major Courses (15 hours)

Total Credit Hours 15

1 Students should take HIST 300 as soon as possible after declaring their history major.
2 Overlay: the same courses that fulfill these requirements may also fulfill other major requirements
3 Students may not use the same course to count for both of these chronological categories.
4 Honors Thesis may substitute if this thesis is directed by a member of the history faculty.

Major Electives (12 hours)

Select 4 additional history courses, 200-level or above. The Assistant Chair and Undergraduate Director will determine into which groups specific History courses fall in consultation with the faculty member teaching the class. The Undergraduate Committee of the History Department must approve exceptions to the distribution requirements.

B.A. with Distinction (36 hours)

Students who fulfill the requirements for the general major may earn a B.A. with Distinction upon the completion of the following additional requirements:

- Declare their intention to pursue a degree with distinction before the beginning of their senior year, that is, before they have begun the last 30 units of their undergraduate degree.
- Have a minimum 3.60 GPA in the major and 3.50 overall GPA at the time of declaration of intent and maintain these GPA requirements.
- Complete an additional 9 hours of History courses at the 200-level or higher (only 6 hours of 200-level History courses may count towards the requirements for the major and graduation with distinction).
- Notify the professor of their Senior Seminar or Thesis course in writing by the end of the first week of class that they intend to pursue a degree “with distinction” and complete to the professor’s satisfaction the additional research necessary for work “with distinction.”
- Public presentation of their research at Discovery Day.

Note: Students who want a degree “with distinction” from the History Department and a degree “with honors from the South Carolina Honors College” must complete two separate research projects.

The Warwick Exchange Program

Selected history majors spend the junior year at the University of Warwick, Coventry, England, and maintain normal progress toward graduation.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

History, B.A.

Interdisciplinary Studies (College of Arts and Sciences)

The College of Arts and Sciences offers two interdisciplinary studies degrees, the Bachelor of Arts in Interdisciplinary Studies (BAIS) and the Bachelor of Science in Interdisciplinary Studies (BSIS), for students who want to pursue interdisciplinary studies without a major in a single department or in one of the structured interdepartmental degree programs (African American studies, classics, European studies, film studies, Latin American studies, marine science, and women's studies). The Bachelor of Arts in Interdisciplinary Studies and the Bachelor of Science in Interdisciplinary Studies are not intended to be substitutes for approved major and minor programs. The degree programs are under the general supervision of the college Interdisciplinary Studies Committee, and individual programs are administered by special interdisciplinary program committees.

Bachelor of Arts in Interdisciplinary Studies programs in the College of Arts and Sciences must focus primarily on disciplines in the humanities, social sciences, and fine arts. Bachelor of Science in Interdisciplinary Studies programs in the College of Arts and Sciences must focus primarily on disciplines in the sciences, mathematics, and statistics; they may be particularly useful for students who plan to seek teacher certification in more than one science area.

A student who wishes to undertake a Bachelor of Arts in Interdisciplinary Studies shall apply to the Assistant Dean of the College of Arts and Sciences, Undergraduate Academic Affairs and Advising, Flinn Hall.

A student who wishes to undertake a Bachelor of Science in Interdisciplinary Studies shall apply to the Assistant Dean of the
College of Arts and Sciences, Undergraduate Academic Affairs and Advising, Flinn Hall.

Courses
IDST 390 - Introduction to Interdisciplinary Inquiry (3 Credits)
A study of the history, philosophy, and theory of and modes of inquiry in interdisciplinary studies.

STEM 101 - Concepts and Connections: An Introduction to Science, Technology, Engineering and Mathematics (3 Credits)
This course introduces concepts, connections, and evolving relationships among the sciences engineering and mathematics to strengthen understanding of current ideas and applications of advancing technologies.

African American Studies Minor
A minor in the African American Studies Program strengthens an undergraduate degree in the College of Arts and Sciences by providing students with the interdisciplinary tools and resources to study the experiences of people of African descent and to evaluate black historical, cultural, social, economic and political developments in South Carolina, the South, the United States, and beyond. Our principal specializations include black political and social movements, African-American literature, comparative cultural anthropology, and health disparities. In addition, students will have the opportunity to select related courses in other disciplines (as approved by the program director and faculty advisors) in order to develop a more competitive and focused schedule that will prepare students for advanced graduate or professional study, and careers in education, politics, management, tourism, the arts, and more.

Minor Requirements (18 Hours)

Total Credit Hours 6

Additional Courses (12 Hours)
- 3 hours of an AFAM course or other course pertinent to African American Studies numbered 200 and above as approved by program.
- 9 hours of AFAM courses or other courses pertinent to African American Studies numbered 300 and above as approved by program.

Note: No more than one Independent Study course (3 hours) may be applied to the minor. Independent Study requires the approval of the Director of African American Studies.

African American Studies, B.A.

Learning Outcomes
- Majors will learn the importance of the principal movements, pivotal figures, and conceptual ideas that shape the academic study of African American experiences. Students will acquire the tools for contextualizing the dynamic realities of race in America and for analyzing their social, political, and cultural implications.
- Majors will work across academic disciplines in the humanities and social sciences to synthesize the multiple roots and routes of intellectual inquiry within African American Studies. Students will interpret primary and secondary source material using both individual and collaborative methods of study.
- Students will develop as scholars and researchers in African American Studies through effective oral, written, and aesthetic forms of communication. Assignments will emphasize the tasks of rigorous scholarship, including: critical thinking, creative expression, precise writing, constructive discussions, and standards of professional engagement.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:
1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary...
Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

**Degree Requirements (120 hours)**

**Program of Study**

<td>28-43</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>30</td>
</tr>
</tbody>
</table>

**1. Carolina Core Requirements (32-44 hours)**

**CMW** – Effective, Engaged, and Persuasive Communication: Written (6 hours)  
*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

**ARP** – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

**SCI** – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI (p. 742) laboratory science courses

**GFL** – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

*It is strongly recommended that students continue the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.*

**GHS** – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

**GSS** – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

**AIU** – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

**CMS** – Effective, Engaged, and Persuasive Communication: Spoken Component ¹ (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

**2. College Requirements (15-18 hours)**

**Foreign Language (0-3 hours)**

- only if needed to meet 122-level proficiency

**History (3 hours)**

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

**Social Science and Fine Arts or Humanities (12 hours)**

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

**3. Program Requirements (28-43 hours)**

**Cognate or Minor (12-18 hours)**

**Cognate**

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences. (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/)
**Minor**

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher. No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses may apply toward general education requirements in their major.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (10-31 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (30 hours)**

*A minimum grade of C is required in all major courses*

**Major Courses (9 hours)**

Asian Studies Minor

Minor Requirements (18 Hours)

The minor in Asian Studies requires a minimum of 18 credit hours from the courses listed below or other related courses pre-approved by the director of the program. It must include courses from at least three groups listed below. Of the 18 hours, at least 12 must be 300-level or above. In addition, the student is encouraged to take courses in Chinese or Japanese. One 3-hour 200-level course in Chinese or Japanese can be counted towards the minor.
Global Studies, B.A.

Students at the University of South Carolina are living in an increasingly globalized context in which economic, social, environmental, and cultural transformations in one part of the world can affect all others. The Global Studies major is a flexible, interdisciplinary degree program that familiarizes students with the complex historical and contemporary relationships and processes that link together people and places. By focusing on themes relating to globalization, the major also encourages students to recognize and to appreciate the world’s diversity. To achieve this end, the major requires students to focus on a particular world region and to attain proficiency in a modern foreign language. The overall aim of the program is to foster in students a critical, global outlook that will allow them to engage with pressing global questions and to thrive in an interconnected world.

### Learning Outcomes

- Global Studies majors will employ a variety of disciplinary perspectives to demonstrate a critical understanding of global processes and the theories and concepts used to explain and interpret these processes.
- Global Studies majors will evaluate the interactions between global and local processes by selecting a world region for intensive study.
- Global Studies majors will demonstrate expertise in key global issues through courses in one of four thematic areas: Global Development and Sustainability; Global Health; Global Conflict and Security Studies; and Global Cultural Studies.
- Global Studies majors will demonstrate proficiency in a foreign language, allowing them to study, work, travel, and/or conduct research outside of the United States.
- Students will demonstrate their preparation for appropriate careers or graduate studies.

### Admissions

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on
the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>

<tr>
<td>3. Program Requirements</td>
<td>25-49</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>24-33</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

**CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)**

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

**ARP – Analytical Reasoning and Problem Solving (6-8 hours)**

- any CC-ARP courses (p. 742)

Note: Global Studies students pursuing the Leadership in the Global Economy concentration must select either MATH 122 or MATH 141 as one of their ARP-approved courses. Prerequisites may be applied to degree requirements, where appropriate.

**SCI – Scientific Literacy (8 hours)**

Two 4-credit hour CC-SCI courses (p. 742)

**GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)**

- Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

CC-GFL courses (p. 742)

- It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

Note: Global Studies students must demonstrate proficiency in one modern foreign language, approved by the advisor, at the advanced level by completing 6 hours in language courses numbered 300 and above or the equivalent. Courses in that foreign language at the beginning or intermediate levels (100 or 200-levels), if needed as prerequisites, may be applied to Carolina Core or College requirements, where appropriate.

**GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)**

- any CC-GHS course (p. 742)

**GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)**

Select one from:

- ANTH 102
- GEOG 121
- GEOG 210
- LING 101
- POLI 101
- RELG 101

**AIU – Aesthetic and Interpretive Understanding (3 hours)**

- any CC-AIU course (p. 742)

**CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)**

- any overlay or stand-alone CC-CMS course (p. 742)

**INF – Information Literacy 1 (0-3 hours)**

- any overlay or stand-alone CC-INF course (p. 742)

**VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)**

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

**Foreign Language (0-3 hours)**

- only if needed to meet 122-level proficiency

Note: Global Studies students must demonstrate proficiency in one modern foreign language, approved by the advisor, at the advanced level by completing 6 hours in language courses numbered 300 and above or the equivalent. Courses in that foreign language at the beginning or
intermediate levels (100 or 200-levels), if needed as prerequisites, may be applied to Carolina Core or College requirements, where appropriate.

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (9 hours of Fine Arts or Humanities)

1 Prerequisite: HRTM 280

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).
Electives (7-37 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24-33 hours)
Selection of major courses must include at least one Carolina Core Integrative course: ANTH 355, ANTH 581, ENGL 437, ENGL 455, HRTM 482, LING 440, POLI 315, POLI 370, POLI 374, or a World Region course that is designated as Integrative.

Foreign Language (modern) (6 hours)
Two 300 or above level language courses

Global Theme or Concentration (6-19 hours)
Students must complete one theme or one concentration from the following lists. Special topics courses with appropriate content may be applied to the global theme or concentration requirement with approval of the advisor.

Global Themes (6 hours)

Required Courses
Select one course from four of the following categories: 12-13

Environmental Studies:
ENVR 322 Environmental Ethics
ENVR 531 Sustainability Management and Leadership Strategies
ENVR 548 Environmental Economics

Geography:
GEOG 311 Cultural Geography
GEOG 312 Geography and Global Geopolitics
GEOG 313 Economic Geography
GEOG 569 International Development and the Environment
GEOG 581 Globalization and Cultural Questions

Management:
MGMT 403 Leadership in Organizations

Music:
MUSC 403 Music & Arts Entrepreneurship
MUSC 582 Music and Money

Philosophy:
PHIL 320 Ethics
PHIL 322 Environmental Ethics
PHIL 323 Ethics of Science and Technology
PHIL 324 Business Ethics

Political Science:
POLI 315 International Relations
POLI 330 International Organization
POLI 370 Introduction to Public Administration
POLI 371 Politics of Taxing and Spending
POLI 373 Regulatory Policies
POLI 374 Public Policy
POLI 433 Economic Aspects of International Politics

Library and Information Science:
SLIS 315 Information Policy
SLIS 410 Knowledge Management
SLIS 440 Competitive Intelligence
World Region (9 hours)

Three courses selected from one of the following area studies groups. See entries for minors in these areas in the undergraduate Bulletin for lists of approved courses. Special topics courses with appropriate content may be applied to the world region requirements with approval of the advisor.

- African Studies
- Asian Studies
- European Studies
- Middle East and North Africa (Islamic World Studies)
- Latin American Studies
- Russian and Eurasian Studies

Major Electives (0-3 hours)

One course from any of the approved global theme, global concentration, or world region courses. Students completing a concentration are exempt from this requirement.

Note: Students are strongly encouraged to spend a period of time overseas, preferably in a country where they can develop their language skills. Participating in a study abroad program or an overseas work experience are two ways to gain an international experience. A period of a semester or full year is most beneficial. Approved study abroad courses may apply to some Global Studies major requirements, with permission of the advisor and the College.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Degree Requirements (120 hours)

1. Carolina Core Requirements (32-44 hours)

   CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
   must be passed with a grade of C or higher
   - any CC-CMW courses (http://www.sc.edu/about/offices_/undergraduate/carolina-core-courses/and_divisions/provost/academicpriorities/undergradstudies/carolinacore/courses/foundational-courses.php?search=CMW)

   ARP – Analytical Reasoning and Problem Solving (6-8 hours)
   - any CC-ARP courses (p. 742)

   SCI – Scientific Literacy (8 hours)
   - Two 4-credit hour CC-SCI courses (p. 742)
GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.
• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approvable courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
• only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
• Three hours of Social Science
• Nine hours of Fine Arts or Humanities

3. Program Requirements (22-37 hours)
Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured
The following procedures shall be followed in designing a program of interdisciplinary studies program requirement. A minimum grade of C is required in all major courses.

Each student must complete a program of studies designed by an interdisciplinary program committee appointed by the College Academic Affairs and Advising Office. The program shall include a minimum of 36 semester hours of credit in major eligible courses in two or more fields. No course submitted in fulfillment of the general education requirements may be included in the program requirements. A maximum of 15 semester hours of independent study courses may be applied to the interdisciplinary studies program requirement.

Procedure

The following procedures shall be followed in designing a program of interdisciplinary studies:

- The candidate shall apply to the College Academic Affairs and Advising Office for declaration of an interdisciplinary studies program.
- The candidate must submit to the College Academic Affairs and Advising Office a written statement of goals concerning a potential interdisciplinary studies program.
- The College Academic Affairs and Advising Office will help the candidate formulate an interdisciplinary program committee, which shall consist of faculty members from the student’s areas of interdisciplinary interest. The members of the interdisciplinary program committee shall be appointed by the College Academic Affairs and Advising Office, who will designate one member as chair and as the student’s academic advisor.
- The interdisciplinary program committee shall meet with the student and prepare a program of studies leading to the Bachelor of Arts in Interdisciplinary Studies. This program shall include a written justification for the specific program of studies designed with the student. The program of study must be approved by the committee prior to the completion of 75 hours. The committee and College Academic Affairs and Advising Office must approve any subsequent changes in the student’s program.
- The candidate’s academic advisor shall advise the student each semester and shall sign the necessary registration and other advisor’s forms. Advising shall adhere to the student’s approved program of studies. The academic advisor shall consult with the interdisciplinary program committee for approval should deviation from the original program become necessary or advisable. All changes shall be registered with the College Academic Affairs and Advising Office.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Interdisciplinary Studies, B.A.I.S.

Interdisciplinary Studies, B.S.I.S. (College of Arts and Sciences)

Learning Outcomes

• Students will identify interdisciplinary approaches to scholarship through thematic or problem-focused study. They will demonstrate the ability to use information, concepts, analytical approaches, and methods involved in at least two related fields.

• Students in the BAIS and BSIS programs will synthesize a personalized set of outcomes and independently work towards achieving them.

• Students in the BAIS or BSIS program will be admitted to graduate/professional school or will be hired in entry-level positions in their fields within three (3) years of graduation.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Three hours of Fine Arts or Humanities

3. Program Requirements (20-35 hours)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for
Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

**Minor**
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (2-23 hours)**
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. **Major Requirements (36 hours)**

A minimum grade of C is required in all major courses.

Each student must complete a program of studies designed by an interdisciplinary program committee appointed by the College Academic Affairs and Advising Office. The program shall include a minimum of 36 semester hours of credit in major eligible courses in two or more fields. No course submitted in fulfillment of the general education requirements may be included in the program requirements. A maximum of 15 semester hours of independent study courses may be applied to the interdisciplinary studies program requirement.

**Procedure**
The following procedures shall be followed in designing a program of interdisciplinary studies:

- The candidate shall apply to the College Academic Affairs and Advising Office for declaration of an interdisciplinary studies program.
- The candidate must submit to the College Academic Affairs and Advising Office a written statement of goals concerning a potential interdisciplinary studies program.
- The College Academic Affairs and Advising Office will help the candidate formulate an interdisciplinary program committee, which shall consist of faculty members from the student’s areas of interdisciplinary interest. The members of the interdisciplinary program committee shall be appointed by the College Academic Affairs and Advising Office, who will designate one member as chair and as the student’s academic advisor.
- The interdisciplinary program committee shall meet with the student and prepare a program of studies leading to the Bachelor of Arts in Interdisciplinary Studies. This program shall include a written justification for the specific program of studies designed with the student. The program of study must be approved by the committee prior to the completion of 75 hours. The committee and College Academic Affairs and Advising Office must approve any subsequent changes in the student’s program.
- The candidate's academic advisor shall advise the student each semester and shall sign the necessary registration and other advisor’s forms. Advising shall adhere to the student’s approved program of studies. The academic advisor shall consult with the interdisciplinary program committee for approval should deviation from the original program become necessary or advisable. All changes shall be registered with the College Academic Affairs and Advising Office.

**Bachelor of Science in Interdisciplinary Studies Degree After Completion of One Year of Medical or Dental School**
Upon application to the College Academic Affairs and Advising Office, a student who has completed 90 hours or more of degree-applicable undergraduate work at the University of South Carolina (with the last 30 hours in residence at the University) with a grade point average of 2.00 or higher, will be granted the BSIS degree provided the following:

- The applicant has satisfied all graduation requirements for the BSIS degree in the College of Arts and Sciences, except for the final 30 hours.
- The applicant has not applied these University of South Carolina credits to obtaining a baccalaureate degree from any institution.
- The applicant submits documents from an accredited medical or dental school demonstrating satisfactory completion of the first year of study leading to a post-baccalaureate degree.
- The applicant has the program of study approved by the College Academic Affairs and Advising Office.
- The College Academic Affairs and Advising Office certifies that the requirements prescribed for the degree have been met.

Interested students enrolled at the University should consult the College Academic Affairs and Advising Office for details concerning this option.

- POLI 103
- POLI 449 International Relations of the Middle East
- RELG 250 Introduction to Islam
- RELG 358 The Qur’an and Hadith
- RELG 359 Islamic Theology and Philosophical Thought
- RELG 367 Sufism
- RELG 387 Jews and Muslims

**Total Credit Hours**: 12

1. Course choices must include at least one of the listed courses in Religious Studies unless taken to fulfill other degree requirements.

Note: ARAB 121 and ARAB 122 are recommended as choices for the foreign language requirement. Students may apply credits from special topics courses offered by any Arts and Sciences department toward the Islamic World Studies minor. To count toward the minor, the majority of material covered in a special topics course must relate to Islam, Muslim populations, and/or Islamic World contexts. Approval of special topics courses is at the discretion of the Program Director.

### Jewish Studies Minor

**Minor Requirements**

A total of 18 credit hours in Jewish Studies courses is required in the following categories for a Jewish Studies Minor degree.

<table>

Select five courses selected from the following list of program electives:

- HEBR 121 Elementary Hebrew
- HEBR 122 Basic Proficiency in Hebrew
- HEBR 201 Intermediate Hebrew
- JSTU 230 Introduction to Judaism
- JSTU 301 Hebrew Bible (Old Testament)
- JSTU 373 Literature and Film of the Holocaust
- JSTU 381 Jewish History I: Late Antiquity to 1500
- JSTU 382 Jewish History II: 1500 to the Present
- JSTU 387 Jews and Muslims
- JSTU 475 Visions of Apocalypse
- JSTU 491 Special Topics in Jewish Studies

**Total Credit Hours**: 18
Latin American Studies Minor

Minor Requirements (18 Hours)

The interdisciplinary minor in Latin American Studies requires a minimum of 18 credit hours. Because LASP is an interdisciplinary program, we encourage students to take LASP courses offered in the academic disciplines of history, political science, anthropology, geography, literature and languages, and additional areas as they are offered. Coursework in at least two disciplines is required for the minor. Students pursuing the minor in Latin American Studies are required to select Spanish or Portuguese as their language of study, and they must complete at least one 3-hour course at the 200-level in that language. The 200-level course (or equivalent demonstration of language proficiency) is considered a prerequisite for the minor and will not count as part of the 18 hours. Examples of courses offered regularly that could be taken by students minoring in LASP are listed below. In addition to these, there are often Special Topics courses appearing on the course schedule as sections of LASP 398.

Suggested Courses

Medical Humanities and Culture Minor

Minor Requirements

The minor in Medical Humanities and Culture consists of 18 credit hours or 6 classes.

- **Two-four courses (6-12 credit hours)** must be chosen from offerings in the humanities (Group A); if two humanities courses (6 hours) are chosen, then 12 hours must be chosen from the social sciences, so that the student takes the requisite 18 hours total.
- **Two-four courses (6-12 credit hours)** must be chosen from offerings in the social sciences (Group B); if two social sciences courses (6 hours) are chosen, then four courses (12 hours) must be chosen in the humanities, so that the student takes the requisite 18 hours total.

Total Credit Hours 18

Note: Departmental or Honors College special topics courses related to medicine may satisfy the minor requirements in either the humanities (Group A) or social sciences (Group B), provided that the course substitutions are pre-approved by the office of the Dean of Undergraduate Student Affairs and Advising in Flinn Hall in consultation with faculty content experts; bring a syllabus to Flinn Hall for the course you want pre-approved. Appeals to register in pre-approved honors college courses should be directed to the Honors College.

Medical Humanities Minor

George Khushf, Director

This minor is designed primarily for students intending to go into medicine. It will provide an understanding of the ethical issues as well as a selective examination of sociocultural, legal, economic, and political factors that condition medical knowledge and practice. The minor will also be valuable for students interested in health law or other areas directly related to the health professions.

Application

Students must complete an application, and qualify for the medical humanities minor. Applications can be submitted any time after the freshman year (30 credit hours completed). Normally, students will be expected to have at least a 3.3 grade point ratio. Applications will be evaluated by a Medical Humanities Education Committee, and they will be judged on overall academic merit. Application forms can be obtained from the Department of Philosophy, College of Arts and Sciences (Flinn 101), and the Honors College.

Opportunity to Participate in Honors College Courses

Several courses in the medical humanities minor will be offered as honors courses. Students minoring in medical humanities will be able to take these courses, and they will have priority in registration, even over Honors College students who are not minoring in medical humanities. This will provide students outside of the Honors College with the opportunity to do extensive course work in the Honors College.

**Russian and Eurasian Studies Minor**

**Minor Requirements**

**Prerequisites**

Two years of college-level study (or equivalent level of mastery) of Russian or one of the other languages of the region. The prerequisite may be satisfied by successful completion of RUSS 202 or a placement examination arranged with the RES Director.

**Total Credit Hours** 18

1. Students whose primary focus is a country other than Russian may petition the Director of Russian and Eurasian Studies to substitute a similar survey course on another region for RUSS 280 or the History or Political Science Elective.

2. Students may substitute another course with substantial Russian or Eurasian studies content with the approval of the Director of Russian and Eurasian Studies.

**Southern Studies Minor**

**Minor Requirements (18 Hours)**

The minor requires a minimum of 18 credit hours, including:

**Program Courses**

<table>
<thead>
<tr>

</table>

**Total Credit Hours** 6

**Additional Courses (12 Hours)**

Select twelve hours from the following:

- 3 hours of WGST courses or cross-listed courses numbered 200 and above as approved by the program.
- 9 hours of WGST courses or cross-listed courses numbered 300 and above, or courses relevant to WGST numbered 300 and above, as approved by the program.

**Notes**

Occasionally, special topics courses offered by various academic departments and approved by Women's and Gender Studies may also be applied to the minor.

No more than one Independent Study course (3 hours) may be applied to the minor. Independent Study requires the approval of the Director of Women's and Gender Studies.

**Women's and Gender Studies, B.A.**

**Learning Outcomes**

- Students will demonstrate a basic understanding of feminist concepts and analysis.
- Students will demonstrate understanding of diversity by gender, race, ethnicity, social class, sexuality, and nationality.
- The students will demonstrate civic engagement through their community placements and other curricular activities.

**Admissions**

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee.
that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

<td>34-49</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>24</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW course (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• any CC-ARP course (p. 742)

SCI – Scientific Literacy (8 hours)

two 4-credit hour CC-SCI laboratory science courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• WGST 112 — should be taken in the first 45 hours

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences

https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/

• Three hours of Social Science

• Nine hours of Fine Arts or Humanities

3. Program Requirements (34-49 hours)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.
Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (16-37 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24 hours)
A minimum grade of C is required in all major courses.

Major Courses (15 hours)

- WGST 352 Gender and Politics
- WGST 381 Gender and Globalization
- WGST 555 Language and Gender

Practicum
- WGST 499 Community Service Internship (or a Research Project coordinated by WGST advisor) 3

Total Credit Hours 15

Major Electives (9 hours)
- WGST or approved discipline-based courses (9 hours)

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Women's and Gender Studies, B.A.

Jewish Studies

Department Website (http://artsandsciences.sc.edu/jstp/)

F.K. Schoeman, Director

Judaism has been central to Western culture from antiquity to the present. Its contributions to Western civilization are deeply interwoven into both Jewish and non-Jewish Western cultural history, contributing significantly to art, language, law, literature, medicine, philosophy and political thought. Jewish Studies is thus an important component of the larger liberal arts curriculum. Its focus on important issues of group and national identity, Diaspora, genocide and cultural survival gives Jewish Studies particular relevance not merely to those who seek a richer understanding of the Jewish experience but also to scholars of other dispossessed or minority groups. Fundamentally interdisciplinary in its approach and international in its focus, the University of South Carolina's Jewish Studies Program adds an important dimension to the scholarly work being done in Jewish Studies in South Carolina. The courses and activities of the program are designed to enhance our knowledge of Judaism's role on the world stage and help students and scholars forge connections between Judaism in South Carolina and this larger context.

Courses

JSTU 218 - Convergence and Divergence in African American and Jewish Relations: Historical and Contemporary (3 Credits)
An examination of African American and Jewish American inter-ethnic, historical and contemporary connections and disconnections. Implications for educational, social, and social settings are considered.
Cross-listed course: AFAM 218, EDTE 218
Carolina Core: GSS, VSR
JSTU 230 - Introduction to Judaism (3 Credits)
Overview of Jewish experiences, beliefs, practices from a contextual point of view.
Cross-listed course: RELG 230

JSTU 301 - Hebrew Bible (Old Testament) (3 Credits)
Modern study of the Hebrew Bible from historical, literary, and archeological points of view. Reading and analysis of texts in translation.
Cross-listed course: RELG 301

JSTU 373 - Literature and Film of the Holocaust (3 Credits)
Film, poetry and literature created in response to the Holocaust as the means for a decades long cultural discussion, in European and American societies, of the moral and religious implications of the Holocaust on our self-understandings as religious and moral beings.
Cross-listed course: RELG 373
Graduation with Leadership Distinction: GLD: Global Learning

JSTU 381 - Jewish History I: Late Antiquity to 1500 (3 Credits)
The religious, cultural, social, and political conditions that shaped the Jewish experience in the Near East and Europe from Late Antiquity to 1500.
Cross-listed course: HIST 383, RELG 381

JSTU 382 - Jewish History II: 1500 to the Present (3 Credits)
Case studies of Jewish history in Europe, America, and the land of Israel, 1500 to the present.
Cross-listed course: HIST 384, RELG 382

JSTU 387 - Jews and Muslims (3 Credits)
Jewish-Muslim relations in the Near East and the US; an exploration of Jewish-Muslim encounters, issues of religious law, politics, radical religious ideologies, and their repercussions for today.
Cross-listed course: RELG 387
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

JSTU 388 - Kabbalah: Science, Religion and Nature in Western History (3 Credits)
Historical investigation of kabbalah, a philosophical system and mystical current common to Judaism, Islam, and Christianity, from the medieval period to the present; focus on its formative role in early modern Western cosmology and science, and its ecological implications today.
Cross-listed course: HIST 388, RELG 388

JSTU 471 - American Jewish History (3 Credits)
Examination of experiences of Jews in the United States from Colonial Period to late 20th century, especially Jewish immigration, political behavior, social mobility, religious affiliation, group identity formation, and meaning of Anti-Semitism in American and global contexts.
Cross-listed course: HIST 471

JSTU 475 - Visions of Apocalypse (3 Credits)
Symbolic visions, tours of heaven and hell, cosmic battles, divine judgment, messianic figures, prophecy, or other forms of revelation as found in literature, art, or social movements from diverse geographical and historical locations.
Cross-listed course: RELG 475

JSTU 491 - Special Topics in Jewish Studies (3 Credits)
Intensive study of special topics in Jewish Studies; may emphasize interdisciplinary themes. Maybe be repeated as content varies by title.
Cross-listed course: RELG 491

JSTU 492 - History of the Holocaust (3 Credits)
Introduction to Nazi Germany's systematic mass-murder of Europe's Jews and other minorities during war. Examination of forces that led to the Holocaust, including scientific racism, Nazi policy implementation, and dynamics of annihilation during war.
Cross-listed course: HIST 380

Language, Literatures, and Cultures

Department Website (http://www.cas.sc.edu/dllc/)
Francisco J. Sanchez, Interim Chair

The department offers undergraduate majors in Chinese studies, classics, comparative literature, French, German, Russian, and Spanish, all leading to the bachelor of arts degree. The department offers minors in ancient Greek, Chinese studies, classical studies, comparative literature, French, German, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Minors in foreign languages generally require 18 hours of course work at the 200 level or above.

Advanced Standing
Students who have studied a foreign language during the five years preceding their enrollment at UofSC must take the placement test in that language. A maximum of 7 or 8 semester hours of advanced standing credit for 121-122 courses in one foreign language may be earned on the basis of completion (with a grade of B or better) of the first 200-level or above 3-credit course in that foreign language; 4 hours credit for 121 may be awarded for a grade of B or better in a 122 course. Courses that may not be offered for advanced standing credit are all CLAS courses, FREN 290, FREN 295, FREN 397, FREN 399, GERM 398, and GERM 399, LATN 399, SPAN 350, SPAN 398, and SPAN 399.

Exemptions
Students will not normally be permitted to repeat for credit foreign language units previously earned in high school or college. Freshmen achieving advanced standing at the University may be permitted to validate certain omitted courses, according to current regulations, and should consult the department for further information. Students who have learned English as a foreign language may, with the concurrence of the dean of their college and that of the chair of the department, be exempted from the language requirement without credit. Such students will, at the discretion of the department, be excluded from courses in their native language.

Programs
- Ancient Greek Literature Minor (p. 149)
- Chinese Studies Minor (p. 149)
- Chinese Studies, B.A. (p. 150)
- Classical Studies Minor (p. 152)
- Classics, B.A. (p. 152)
- Comparative Literature Minor (p. 155)
- Comparative Literature, B.A. (p. 156)
- Foreign Language Education Minor (p. 158)
- French Minor (p. 158)
- French, B.A. (p. 158)
- German Minor (p. 161)
- German, B.A. (p. 161)
- Italian Minor (p. 164)
Courses

ARAB 121 - Elementary Arabic (4 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language. Offered only in fall.
Carolina Core: GFL

ARAB 122 - Basic Proficiency in Arabic (4 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills. Admission only by successful completion of ARAB 121. Offered only in spring.
Carolina Core: GFL

ARAB 201 - Intermediate Arabic (3 Credits)
Continuation of reading, writing, and speaking Arabic.
Prerequisites: ARAB 201.

ARAB 202 - Intermediate Arabic (3 Credits)
Increased emphasis on reading and writing skills in Arabic.
Prerequisites: ARAB 202.

ARAB 280 - Introduction to Modern Arab Culture (3 Credits)
Introduction to Arab culture (literature, music, film, and art) from the 19th century to the present.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ARAB 301 - Advanced Arabic Language I (3 Credits)
This course builds on grammar and vocabulary by reading and listening to authentic Arabic materials. By semester's end, the student will be able to write in detail and comprehend and use advanced vocabulary grammar and syntax in all forms of expression.
Prerequisites: Arabic 202 or equivalent.

ARAB 302 - Advanced Arabic Language II (3 Credits)
This course is a continuation of ARAB 301 and builds on grammar and vocabulary by reading and listening to authentic Arabic materials. By semester's end, the student will be able to write in detail and comprehend and use advanced vocabulary grammar and syntax.
Prerequisites: ARAB 301 or equivalent.

ARAB 310 - Conversational Arabic (3 Credits)
Practical drills in aural-oral skills to develop facility in the spoken language.
Prerequisites: ARAB 202.

ARAB 311 - Colloquial Arabic II (3 Credits)
Continued instruction in colloquial (spoken) Arabic with a focus on oral and aural competencies, discussing aspects of the local culture, and working with media produced in the local variety of Arabic. Course may be repeated as the variety of Arabic may change.
Prerequisites: ARAB 310 or equivalent.

ARAB 320 - Introduction to Modern Arab Literature in Translation (3 Credits)
Introduction to dominant trends and genres in nineteenth and twentieth century Arabic literature.

ARAB 398 - Selected Topics (3 Credits)
Selected literary topics of the Arab world. May be repeated for credit under different titles. Taught in English.

ARAB 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

ARAB 401 - Advanced Arabic I (3 Credits)
Acquisition of advanced grammar and vocabulary. Increased focus on reading, writing, and discussion in Modern Standard Arabic.
Prerequisites: C or better in ARAB 302 or equivalent.

ARAB 402 - Advanced Arabic II (3 Credits)
Continued acquisition of advanced grammar and vocabulary. Increased focus on reading, writing, and discussion in Modern Standard Arabic.
Prerequisites: ARAB 401 or equivalent.

ARAB 615 - Intensive Readings in Arabic (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language requirement with successful completion of the course. Undergraduates may take the course as an elective only. Grades S/U for graduates and undergraduates.

ASLG 121 - Elementary American Sign Language (4 Credits)
Introduction to basic vocabulary and common grammar structures of ASL. Focus on communication and familiarization with aspects of deaf culture. This course does not satisfy the foreign language requirements of any college.

ASLG 122 - Basic Proficiency in American Sign Language (4 Credits)
Practice and further development in the language and culture of the American deaf community. This course does not satisfy the foreign language requirement of any college.
Prerequisites: ASLG 121.

CHIN 103 - Introduction to Chinese Calligraphy (2 Credits)
Five hundred of the most commonly used Chinese characters. Emphasis is on the phonetic and significant elements common to large groups of ideograms.

CHIN 121 - Elementary Chinese Mandarin (4 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language.
Carolina Core: GFL

CHIN 122 - Basic Proficiency in Mandarin Chinese (4 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills. Admission only by successful completion of Chinese 121.
Prerequisites: CHIN 121.
Carolina Core: GFL

CHIN 221 - Intermediate Mandarin Chinese (3 Credits)
Continued practice of basic sentence patterns used in modern speech with increased emphasis on reading and acquisition of additional characters.
CHIN 222 - Intermediate Mandarin Chinese II (3 Credits)
Continued practice of basic sentence patterns used in modern speech with increased emphasis on reading and acquisition of additional characters.

CHIN 240 - Chinese Culture, Tradition, and Modern Societies (3 Credits)
Introduction to Chinese culture, heritage, and modern societies. Readings selected from printed and online sources. Taught in English.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

CHIN 311 - Advanced intermediate Mandarin Chinese I (3 Credits)
Provides advanced intermediate training in spoken and written Chinese. By increasing students' vocabulary and knowledge of sentence patterns, the course focuses on speaking and writing in coherent, well-formed paragraphs.
Prerequisites: CHIN 222.

CHIN 321 - Advanced Intermediate Mandarin Chinese II (3 Credits)
Continues advanced intermediate training in spoken and written Chinese. Attention is given to complex grammatical patterns, discourse characteristics, and discussions of cultural topics.
Prerequisites: CHIN 321.

CHIN 322 - Advanced Intermediate Mandarin Chinese II (3 Credits)
Continues advanced intermediate training in spoken and written Chinese. Attention is given to complex grammatical patterns, discourse characteristics, and discussions of cultural topics.
Prerequisites: CHIN 321.

CHIN 325 - Women in China (3 Credits)
Introduces the connection between gender and the Chinese national imagination. Readings include cultural and historical documents that purport to explain the experience of women in China. Readings in English. Taught in English.
Cross-listed course: WGST 335
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

The major Greek and Roman myths, with emphasis on their meaning, functions, and influence on ancient and later Western culture.

CLAS 598 - Classics of Western Literary Theory (3 Credits)
Problems of literary theory in texts from the ancients to the 17th century, with an emphasis on the classical tradition.
Cross-listed course: CPLT 701, ENGL 733

CPLT 150 - Values and Ethics in Literature (3 Credits)
Analysis of major works of world literature focusing on values, ethics, and social responsibility.
Carolina Core: AIU, VSR

CPLT 270 - World Literature (3 Credits)
Selected masterpieces of world literature from antiquity to the present.
Cross-listed course: ENGL 270
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

CPLT 300 - What is Comparative Literature (3 Credits)
Introduction to ways of reading and comparing literatures drawn from diverse languages and cultures.
Prerequisites: any 200-level literature course.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

CPLT 301 - Great Books of the Western World I (3 Credits)
European masterpieces from antiquity to the beginning of the Renaissance.
Cross-listed course: ENGL 390
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

CPLT 302 - Great Books of the Western World II (3 Credits)
European masterpieces from the Renaissance to the present.
Cross-listed course: ENGL 391
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

CPLT 303 - Great Books of the Eastern World (3 Credits)
Classical and contemporary poetry and prose of the Middle and Far East.
Cross-listed course: ENGL 392
Graduation with Leadership Distinction: GLD: Global Learning

CPLT 380 - Epic to Romance (3 Credits)
Comprehensive exploration of medieval and other pre-Renaissance literature using texts representative of the evolution of dominant literary forms.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 380

CPLT 381 - The Renaissance (3 Credits)
Literature of the Renaissance, in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 381

CPLT 382 - The Enlightenment (3 Credits)
Literature of the Enlightenment in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 382

CPLT 383 - Romanticism (3 Credits)
Literature of Romanticism, in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 383

CPLT 384 - Realism (3 Credits)
Literature of Realism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 384

CPLT 385 - Modernism (3 Credits)
Literature of Modernism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 385

CPLT 386 - Postmodernism (3 Credits)
Literature of Postmodernism in its cultural contexts, explored through representative works.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: ENGL 386

CPLT 415 - Topics in Comparative Literary Relations (3 Credits)
Topics involving two or more national literatures. Topics to be announced in master schedule by title.

Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

CPLT 499 - Senior Thesis (3 Credits)
Graduation with Leadership Distinction: GLD: Research
CPLT 597 - Special Topics in Comparative Studies in Film and Media (3 Credits)
Topics in film and media from an international perspective. National cinematic traditions are compared and contrasted. May be repeated as content varies by title. 03: 07/05/2019.
Graduation with Leadership Distinction: GLD: Global Learning

FORL 472 - Introduction to Technology in Language Education (3 Credits)
Acquaints students with principles and practices concerning the use of technology in foreign language teaching. Explores connection between second language acquisition and the implementation of Internet and multimedia technologies.
Cross-listed course: LING 472

FORL 474 - Directed Teaching in Foreign Languages (15 Credits)
Students apply methods of curriculum and assessment, professionalism, effective teaching, and organization of instructional settings during internship in foreign language classroom.
Prerequisites: admission to the professional program in education.
Cross-listed course: EDTE 474
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

FORL 501 - Spanish for Medical Personnel (3 Credits)
Basic course in health professions. Functional language and lexicon as well as cultural practices for interaction with Hispanic clients.
Prerequisites: 2 semesters of college-level Spanish or equivalent.

FORL 510 - Teaching Second Languages to Young Children (3 Credits)
To assist prospective teachers of young children in the development of a second language and multicultural learning activities. Practicum sessions are an integral part.
Prerequisites: 210 level of a foreign language or its equivalent.
Cross-listed course: EDEL 510
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

FORL 511 - Teaching Foreign Languages in Secondary Schools (3 Credits)
Current methods, techniques, and materials of instruction appropriate for secondary schools.
Prerequisites: 210 level of a foreign language or its equivalent.
Cross-listed course: EDSE 575

FORL 598 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.
Cross-listed course: FAMS 598, MART 594

FREN 109 - Beginning French I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Admission to FREN 109 restricted to those who have never studied French, who have not studied French in the previous five years, or who have a score of F-1 on the placement test.
Carolina Core: GFL

FREN 110 - Beginning French II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Admission to 110 restricted to those who have completed FREN 109. Credit may be received only for one of the following: FREN 109/FREN 110 or FREN 121.
Prerequisites: FREN 109.
Carolina Core: GFL

FREN 121 - Elementary French (3 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in French. Admission to FREN 121 restricted to those who have a score of F-2 on the placement test. Credit may be received for only one of the following: FREN 109/FREN 110 or FREN 121.
Carolina Core: GFL

FREN 122 - Basic Proficiency in French (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: FREN 110, FREN 121 or placement score of F-3.
Carolina Core: GFL

FREN 209 - Reading and Written Expression (3 Credits)
Readings in French; grammar, basic writing, and composition.
Prerequisites: FREN 122 or score of F-5 on placement exam.

FREN 210 - Oral Communication (3 Credits)
Practice in conversation involving authentic listening materials; vocabulary building.
Prerequisites: FREN 122 or score of F-5 on placement exam.

FREN 290 - French Literature in Translation (3 Credits)
Readings and discussion in English, with consideration of the cultural context.
Carolina Core: AIU

FREN 295 - Topics in French Culture (3 Credits)
Intensive one-term study of a particular topic identified by title. Taught in English.
Prerequisites: FREN 110, FREN 121, or equivalent.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

FREN 300 - French Phonetics (3 Credits)
Analysis of and practice in pronunciation and listening comprehension.
Prerequisites: C or better in both FREN 209 and FREN 210, or equivalents, or a score of F-6 on the French language placement exam.

Cross-listed course: LING 316
FREN 307 - Advanced Oral Practice (1 Credit)
Development and maintenance of speaking and listening skills at the advanced level. Offered Pass-Fail only. May be repeated.
Prerequisites: C or better in both FREN 209 and FREN 210, or equivalents, or a score of F-6 on the French language placement exam.

FREN 309 - Reading French Texts (3 Credits)
Reading, discussion, and written analysis of French texts, both literary and nonliterary. Not open to students with a score of F-7.
Prerequisites: C or better in both FREN 209 and FREN 210, or equivalents, or a score of F-6 on the French language placement exam.

FREN 310 - Advanced Oral Communication (3 Credits)
Current issues and events presented in French-language media. Discussion and presentations in French provide practice with advanced structures and idiomatic speech. Not open to students with score of F-7.
Prerequisites: C or better in both FREN 209 and FREN 210, or equivalents, or a score of F-6 on the French language placement exam.

FREN 311 - French Composition (3 Credits)
Practice in French composition; intensive review of French grammar. FREN 309 strongly recommended. Not open to students with score of F-7.
Prerequisites: Grades of C or better in both FREN 209 and FREN 210, or equivalents, or a score of F-6 on the French language placement exam.

FREN 316 - Introduction to Business French (3 Credits)
Practical oral and written communication in a commercial context; introduction to business terminology and correspondence.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents.

FREN 330 - The French Theatre Experience (3 Credits)
Project work in the production of plays in French. Includes readings in and public performance of French theatre and related materials.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents.

FREN 350 - French Language Study Abroad (1-6 Credits)
Intensive language practice with special attention to oral skills. Classroom instruction by native speakers.

FREN 351 - Service Learning in the French-Speaking World (3 Credits)
Cultural and linguistic service-learning experience in a French-speaking environment. Course may be repeated once in a different location.
Prerequisites: FREN 209 or 210.

FREN 397 - The French Film Experience (3 Credits)
An introduction to the history of the French film, with special emphasis on the aesthetic appreciation of the films in their artistic and cultural context. Films in French, with English subtitles. Taught in English. To be counted towards FREN major or minor.
Prerequisites: C or better in both FREN 209 and FREN 210, or equivalents, and FREN 309 is strongly recommended.

FREN 398 - Selected Topics in French & Francophone Culture (3 Credits)
Intensive study of selected topics of the French-speaking world. May be repeated for credit under a different title. May not be counted for major or minor credit. Note: Taught in English. To be counted towards FREN major or minor.
Prerequisites: C or better in both FREN 209 and FREN 210 are required, and FREN 309 is strongly recommended.

FREN 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-6 on the French language placement exam.

Graduation with Leadership Distinction: GLD: Research

FREN 400 - French Cultural History (3 Credits)
French history and the arts from early times through the Napoleonic era. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

FREN 416 - Advanced Business French (3 Credits)
Commercial organizations and businesses in France. Practical business correspondence. Terminology and techniques in commercial transactions with the Certificat Pratique of the Paris Chamber of Commerce in view. Taught in French.
Prerequisites: FREN 316.

FREN 450 - Topics in Literature (3 Credits)
May be repeated for credit. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

FREN 451 - French Literature and Culture Before 1800 (3 Credits)
Study and discussion of French works written before 1800 within their cultural and historical contexts. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

FREN 452 - French Literature and Culture After 1800 (3 Credits)
Study and discussion of French works written after 1800 within their cultural and historical contexts. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

FREN 453 - Francophone Literatures and Cultures (3 Credits)
Study and discussion of works from French-speaking societies outside France, with attention to their cultural contexts and historical contexts. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

Graduation with Leadership Distinction: GLD: Global Learning

FREN 499 - Senior Thesis (3 Credits)
Graduation with Leadership Distinction: GLD: Research

FREN 501 - Contemporary France (3 Credits)
Readings in and discussion of the culture of contemporary France. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

FREN 510 - Current Events in the France and the Francophone World (3 Credits)
Development of advanced oral skills in French. Study of linguistic and cultural aspects of French language media. FREN 311 strongly recommended.
Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.
Carolina Core:

GERM 110, GERM 111, or GERM 121.

GERM 122

Carolina Core:

GERM 109, GERM 110, GERM 111, GERM 121.

Prerequisites: C or better in each of GERM 109, GERM 110, and GERM 111, or equivalents, or a score of F-7 on the French language placement exam.

FREN 517 - French Linguistics (3 Credits)
The structure, morphology, and syntax of modern French.

Cross-listed course: LING 502

FREN 595 - Special Topics in French (3 Credits)
Poetry, prose, theatre, cinema, civilization, language, linguistics. Unique opportunities will be announced by title. May be repeated. FREN 311 strongly recommended.

Prerequisites: C or better in both FREN 309 and FREN 310, or equivalents, or a score of F-7 on the French language placement exam.

FREN 615 - Intensive Readings in French (3 Credits)
Graduate students fulfill their foreign-language reading requirement with successful completion of the course. Undergraduates may take the course as an elective only. Grades S/U for graduates and undergraduates.

GERM 109 - Beginning German I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have never studied German or who have placed by examination into GERM 109. Credit may be received only for one of the following GERM 109; GERM110; GERM 111; GERM 121.

Carolina Core: GFL

GERM 110 - Beginning German II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Credit may be received only for one of the following: GERM 109; GERM 110; GERM 111; GERM 121.

Carolina Core: GFL

GERM 111 - Intensive Beginning German (6 Credits)
Intensive introduction to grammar and practical vocabulary necessary for fundamental communication skills. Admission only to highly motivated beginning students who obtain permission of the department. Credit may be received only for one of the following: GERM 109 and GERM 110; GERM 111; GERM 121.

GERM 121 - Elementary German (4 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in German. Admission only by proficiency examination. Credit may be received for only one of the following: GERM 109; GERM 110; GERM 111; GERM 121.

Carolina Core: GFL

GERM 122 - Basic Proficiency in German (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.

Prerequisites: Admission either by placement examination or successful completion of GERM 110, GERM 111, or GERM 121.

Carolina Core: GFL

GERM 210 - Intermediate German (3 Credits)
Further development of listening, reading, speaking, and writing skills; discussion of selected literary texts, and current issues; intensive review of basic grammar structures.

Prerequisites: GERM 122, or satisfactory score on Basic Proficiency Phase II placement test.

GERM 211 - Intermediate German (3 Credits)
Reading strategies, a review, and expansion of grammar structures, supplemented with materials concerning current issues.

Prerequisites: GERM 122, or satisfactory score on Basic Proficiency Phase II placement test.

Prerequisite or Corequisite: GERM 210.

GREK 560 - Independent Study (1-3 Credits)
Special projects for independent study and research.
GREK 561 - Independent Study (1-3 Credits)
Special projects for independent study and research.
GREK 614 - Intensive Grammar Review of Ancient Attic Greek (3 Credits)
Intensive review for nonmajors designed to prepare them for GREK 615.
GREK 615 - Intensive Readings in Ancient Attic Greek (3 Credits)
Intensive reading for nonmajors. A review of grammar and syntax with reading of passages from Plato’s Apology. Primarily for graduate students to fulfill the foreign-language reading requirement.
Prerequisites: GREK 614.
HEBR 121 - Elementary Hebrew (4 Credits)
Grammar and practical vocabulary for fundamental communication skills. Assumes no prior experience in the language. Offered only in fall.
HEBR 122 - Basic Proficiency in Hebrew (4 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills. Offered only in spring.
Prerequisites: HEBR 121.
HEBR 201 - Intermediate Hebrew (3 Credits)
Review of the basic principles of grammar, with emphasis on reading, oral skills, and writing.
HEBR 202 - Intermediate Hebrew (3 Credits)
Review of the basic principles of grammar, with emphasis on reading, oral skills, and writing.
HEBR 310 - Conversation and Composition (3 Credits)
Practical training in the spoken and written language.
Prerequisites: HEBR 202 or equivalent.
HEBR 398 - Selected Topics (3 Credits)
Intensive study in selected and cultural topics related to Judaism. May be repeated for credit under different titles. Taught in English.
HEBR 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research
ITAL 121 - Elementary Italian (4 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills.
Carolina Core: GFL
ITAL 122 - Basic Proficiency in Italian (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: ITAL 121.
Carolina Core: GFL
ITAL 130 - Accelerated Basic Proficiency in Italian (6 Credits)
Accelerated development of essential listening, reading, speaking, and writing skills to obtain the Basic Proficiency Level in Italian. Credit may be received only for one of the following: ITAL 121 and ITAL 122, or ITAL 130.
ITAL 221 - Intermediate Proficiency in Italian I (3 Credits)
Practice and rapid development of accurate skills in speaking, listening, and writing. Features BBC television course.
Prerequisites: ITAL 121.
ITAL 222 - Intermediate Proficiency in Italian II (3 Credits)
Practice and further rapid development of accurate skills in speaking, listening, and writing. Features BBC television course.
Prerequisites: ITAL 221.
ITAL 230 - Accelerated Intermediate Italian (6 Credits)
Accelerated development of intermediate level listening, reading, speaking, and writing skills in Italian. Credit may be received only for one of the following: ITAL 221 and ITAL 222, or ITAL 230.
Prerequisites: ITAL 122 or ITAL 130.
ITAL 310 - Italian Conversation (3 Credits)
Oral practice with advanced protocols of Italian conversation, focusing on perfecting rhythms and tonalities, and on a clear presentation of meaning.
ITAL 311 - Writing in Italian (3 Credits)
Introduction to letter, short essay, and creative writing, and to newspaper reports and selected essays as models of self-expression.
Prerequisites: ITAL 222.
ITAL 350 - Advanced Italian Study Abroad (3-6 Credits)
Intensive language practice, emphasizing oral proficiency skills and advanced conversational protocols. Classroom instruction by native speakers, extensive contact with native environment, field trips. May be repeated for credit by permission.
Prerequisites: ITAL 122.

ITAL 398 - Selected Topics (3 Credits)
Intensive study of selected literary and cinematic topics of the Italian world. May be repeated for credit as topic varies by title. Taught in English.

ITAL 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

ITAL 400 - Contemporary Italian Civilization (3 Credits)
Significant values in the Italian cultural heritage, as presented in native print and visual media.
Prerequisites: ITAL 310 and ITAL 311, or ITAL 350.

Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ITAL 404 - Twentieth Century Italian Literature (3 Credits)
Selected plays, short stories, novels and poems which characterize quality achievements by Italians, and which promote a better understanding of Italian life.
Prerequisites: ITAL 310 and ITAL 311, or ITAL 350.

ITAL 499 - Senior Project (3-6 Credits)
Directed independent research project, with a formal presentation and public discussion.
Graduation with Leadership Distinction: GLD: Research

ITAL 560 - Independent Studies in Italian Literature (1-3 Credits)
Special topics in Italian literature.

ITAL 561 - Independent Studies in Italian Literature (1-3 Credits)
Special topics in Italian literature.
JAPA 340 - Introduction to Japanese Culture and Literature (3 Credits)
Introduction to Japanese literature and its cultural background. Conducted in English, but some background of Japanese is recommended.
**Prerequisites:** JAPA 340.

JAPA 350 - Japanese Culture and Society through Film (3 Credits)
Examination of Japanese culture and contemporary society through selected films. Taught in English.

JAPA 351 - Japanese Culture and Society through Theatre (3 Credits)
Introduction to Japanese traditional theater and its influences on Japanese culture and society. Taught in English.
**Cross-listed course:** THEA 369

JAPA 353 - Japanese Culture and Society through Animation (3 Credits)
Examination of Japanese culture and contemporary society through studying of popular animations. Taught in English.

JAPA 398 - Selected Topics (3 Credits)
Intensive study of selected topics in Japanese literature and culture. May be repeated for credit as topic varies by title. Taught in English.

JAPA 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
**Graduation with Leadership Distinction:** GLD: Research

JAPA 421 - Advanced Japanese III (3 Credits)
Development of proficiency in speaking, reading, and writing through advanced studies of authentic Japanese materials.
**Prerequisites:** JAPA 322, JAPA 323.

JAPA 422 - Advanced Japanese IV (3 Credits)
Strengthening proficiency in writing and reading.
**Prerequisites:** JAPA 421.

JAPA 500 - Japanese Language in Society (3 Credits)
Japanese language and communication in its sociocultural context; emphasis on comparison with American English. Taught in English.
**Cross-listed course:** LING 546

LATN 109 - Beginning Latin I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental reading skills. Admission to 109 restricted to those who have never studied Latin, who have not studied Latin in the previous five years, or who have a score of L-1 on the placement test.
**Carolina Core:** GFL

LATN 110 - Beginning Latin II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental reading skills. Credit may not be received for both LATN 109/LATN 110 and LATN 121.
**Prerequisites:** LATN 109.

LATN 121 - Elementary Latin (4 Credits)
Grammar and vocabulary necessary for fundamental reading skills. Assumes prior experience in Latin. Admission only by proficiency examination. Credit may be received for only one of the following: LATN 109/LATN 110 or LATN 121.
**Carolina Core:** GFL

LATN 111 - Latin Literature (3 Credits)
Reading from the Aeneid.

LATN 122 - Basic Proficiency in Latin (3 Credits)
Practice and further development of essential reading skills.
**Prerequisites:** LATN 110 or LATN 121.

LATN 301 - Advanced Readings in Latin Literature (3 Credits)
Selected readings in prose and poetry of representative authors.

LATN 302 - Latin Literature of the Golden Age (3 Credits)
A study of Latin syntax in order to translate English prose into Latin. Instruction is individualized.

LATN 303 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
**Graduation with Leadership Distinction:** GLD: Research

LATN 305 - Latin Drama (3 Credits)
Selected plays of Plautus and Terence.

LATN 306 - Latin Erotic Poetry (3 Credits)
Readings from the elegies of Catullus, Tibullus, Propertius, and Ovid.

Readings from Ovid to Ammianus, supplemented by readings in history and scholarship. Designed to prepare majors and honors students for further study.

LATN 560 - Independent Study (1-3 Credits)
Special projects for independent study and research.

LATN 561 - Independent Study (1-3 Credits)
Special projects for independent study and research.

LATN 580 - Teaching Advanced Latin in Secondary School (3 Credits)
Methods and materials for teaching the Latin Advanced Placement courses in secondary school.

LATN 614 - Intensive Grammar Review in Latin (3 Credits)
Intensive grammar review for non-majors; designed as preparation for LATN 615.

LATN 615 - Intensive Readings in Latin (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language reading requirement with successful completion of the course. Undergraduates may take the course as an elective only.

PORT 121 - Elementary Portuguese (3 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language.
Carolina Core: GFL

PORT 122 - Basic Proficiency in Portuguese (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: PORT 121.

Carolina Core: GFL

PORT 201 - Intermediate Portuguese I (3 Credits)
Review of the basic principles of grammar with additional emphasis on reading and oral skills.
Prerequisites: PORT 122, PORT 130.

PORT 202 - Intermediate Portuguese II (3 Credits)
Continued review of the basic principles of grammar with additional emphasis on reading, writing, and oral skills.
Prerequisites: PORT 201.

PORT 299 - Accelerated Portuguese for Speakers of Spanish (3 Credits)
Accelerated Portuguese for speakers of Spanish, taught through a communicative approach. Students will develop intermediate-level oral and written communication skills in Portuguese and increase knowledge about multiple aspects of Luso-Brazilian cultures.
Prerequisites: SPAN 302, advanced proficiency or equivalent in Spanish.

PORT 309 - Advanced Conversation and Composition I (3 Credits)
Development of advanced conversational and compositional skills through systematic grammar study and review, reading, oral activities, and film discussion.
Prerequisites: Any 200-level PORT course.

PORT 310 - Advanced Conversation and Composition II (3 Credits)
Development of advanced conversational and compositional skills through systematic grammar study and review, reading, and the analysis of texts through both writing and oral discussion.
Prerequisites: Any 200-level PORT course.

PORT 312 - Introduction to Luso-Brazilian Literature (3 Credits)
Introduction to reading literary texts in Portuguese through carefully selected readings from different genres/periods.
Prerequisites: PORT 309 and PORT 310.

PORT 325 - The Brazilian Modern Short Story (3 Credits)
Examination of Brazilian short fiction and cronicas (literary journalistic pieces).
Prerequisites: PORT 309 and PORT 310.

PORT 375 - Special Topics in Luso-Brazilian Cultural Production (3 Credits)
Intensive study of special topics in Luso-Brazilian cultural production. May be repeated once as content varies by title. Taught in Portuguese.
Prerequisites: PORT 309 and PORT 310.

PORT 398 - Selected Portuguese Topics (1-3 Credits)
Intensive study of selected topics. May be repeated for credit under different title. Taught in English. Individual topics to be announced by title.

PORT 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

PORT 615 - Intensive Readings in Portuguese (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language reading requirements with successful completion of the course. Undergraduates may take the course as an elective only.

RUSS 121 - Elementary Russian (4 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language.
Carolina Core: GFL

RUSS 122 - Basic Proficiency in Russian (4 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: RUSS 121.

Carolina Core: GFL

RUSS 201 - Intermediate Russian I (3 Credits)
Continued exposure to the fundamentals of Russian grammar, along with increased focus on reading and speaking skills.
Prerequisites: RUSS 122 or satisfactory score on language placement test.

RUSS 202 - Intermediate Russian II (3 Credits)
Completion of exposure to the fundamentals of Russian grammar, with emphasis on writing, reading, and conversation.
Prerequisites: RUSS 201 or satisfactory score on language placement test.
RUSS 280 - Introduction to Russian Civilization (3 Credits)
A multimedia introduction to Russian culture from its beginnings to the present. No knowledge of Russian required.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

RUSS 298 - Selected Topics (1-3 Credits)
Introductory-level study of selected topics in Russian culture. Does not apply toward the Russian major. May be repeated for credit under a different title.

RUSS 301 - Russian Conversation and Composition I (3 Credits)
Conversation, reading, composition, comprehensive review of grammar.
Prerequisites: RUSS 202 or satisfactory score on language placement test.

RUSS 302 - Russian Conversation and Composition II (3 Credits)
Emphasis on oral proficiency, using contemporary authentic materials from Russian newspapers, textbooks, and television newscasts.
Prerequisites: RUSS 301 or satisfactory score on language placement test.

RUSS 319 - Nineteenth-Century Russian Literature in Translation (3 Credits)
Masterworks of Russian literature by Tolstoy, Dostoevsky, Turgenev, Pushkin, Chekov, and others.
Graduation with Leadership Distinction: GLD: Global Learning

RUSS 319L - Nineteenth-Century Russian Literature in Russian (1 Credit)

Course content varies and will be announced in the schedule of classes by title. May be repeated as content varies by title.
Prerequisites: D or better in SPAN 312 or by placement.

SPAN 476 - Advanced Special Topics in Hispanic Language and Culture (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as content varies by title. This course will be taught in Spanish.
Prerequisites: D or better in SPAN 303 or by placement.

SPAN 498 - Advanced Special Topics in Hispanic Studies (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as content varies by title. Taught in English.

SPAN 499 - Senior Seminar (3 Credits)
A special seminar devoted to the in-depth study of selected subjects in Hispanic literature, culture, or language. Required for the intensive major in Spanish.
Prerequisites: 3.00 GPA; 18 hours of 300-level Spanish.

Graduation with Leadership Distinction: GLD: Research

SPAN 500 - Contemporary Spain (3 Credits)
Analysis and discussion of 20th-century Spanish history and the sociocultural forces that have contributed to define this country’s national identity. Taught in Spanish.
Prerequisites: SPAN 303 for Undergraduates, Phase II placement exam above SPAN 303.

Graduation with Leadership Distinction: GLD: Global Learning

SPAN 501 - Contemporary Spanish America (3 Credits)
Analysis and discussion of 20th-century Spanish American history and the sociocultural forces that have contributed to define this area’s national identities. Taught in Spanish.
Cross-listed course: LASP 501

SPAN 513 - Introduction to Professional and Technical Translation (3 Credits)
Introduction to translation and practice of skills required for professional and technical Spanish/English translation.
Prerequisites: SPAN 409.

SPAN 515 - Introduction to Spanish Linguistics (3 Credits)
Phonology, morphology, and syntax of modern Spanish.
Prerequisites: SPAN 303, Phase II placement exam above SPAN 303.

SPAN 516 - The Structure of Modern Spanish (3 Credits)
Description of the grammatical structures of Modern Spanish. Intensive study of the theory and practice of word formation and sentence structure of Spanish.
Cross-listed course: LING 554
SPAN 517 - Contrastive English-Spanish Phonetics and Phonology (3 Credits)
Introduction to the study of phonetics and phonology and their application to the sounds and sound systems of English and Spanish. Includes transcription practice and discussion of relevance to teaching.
Cross-listed course: LING 514

SPAN 518 - Introduction to Spanish Medieval Literature (3 Credits)
Survey of Spanish literature from its first manifestations to La Celestina. Introduction; early works; the epic; 13th- through 15th-century prose and verse; Beceo, Alfonso X, Juan Ruiz, Marques de Santillana; others.
Prerequisites: SPAN 312 for undergraduates.

SPAN 524 - Renaissance and Golden Age Literature (3 Credits)
Survey of the works of Garcilaso, the Spanish mystics, Lope, Quevedo, Tirso, Calderon, Gongora and others.
Prerequisites: SPAN 312 for undergraduates.

SPAN 534 - Nineteenth-Century Spanish Literature (3 Credits)
Survey of the works of the major literary figures of the period.
Prerequisites: SPAN 312 for undergraduates.

SPAN 538 - Twentieth-Century Spanish Literature (3 Credits)
Survey of major peninsular writers from the Generation of ‘98 to the present.
Prerequisites: SPAN 312 for Undergraduates.

SPAN 541 - Colonial Spanish-American Literature to Neoclassicism (3 Credits)
Survey of pre-Columbian poetry and of texts dating from the time of Columbus to the end of the Colonial period.
Cross-listed course: LASP 541

SPAN 543 - Spanish-American Literature from the Independence Through Modernism (3 Credits)
Survey of the most significant works of the Independence through Modernism.
Prerequisites: SPAN 312 for Undergraduates.

SPAN 550 - Advanced Language Study Abroad (3 Credits)
Intensive language practice in native environment with special emphasis on oral skills. Instruction by native speakers; extensive community contact and home stay. Prior placement test required.

SPAN 555 - Spanish-American Literature from Modernism Through 1960 (3 Credits)
Survey of the most significant works of this period.
Prerequisites: SPAN 312 for undergraduates.

SPAN 557 - Contemporary Spanish-American Literature (3 Credits)
Survey of the most significant works from 1960 to the present.
Cross-listed course: LASP 471

SPAN 575 - Special Topics in Spanish (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as content varies by title.
Prerequisites: D or better in SPAN 312 or graduate standing.

SPAN 615 - Intensive Readings in Spanish (3 Credits)
Intensive reading for non-majors. Graduate students fulfill their foreign-language requirement with successful completion of the course. Undergraduates may take the course as an elective only by permission.

SPAN 121 - Elementary Swahili (4 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language. Offered only in fall.

SPAN 122 - Basic Proficiency in Swahili (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills. Offered in spring and summer II semesters.
Prerequisites: SWAH 121.

SPAN 201 - Intermediate Swahili (3 Credits)
Development of reading, speaking, listening, and writing skills; introduction of East African culture. SWAH 201 offered in fall, SWAH 202 offered in spring.

SPAN 202 - Intermediate Swahili (3 Credits)
Development of reading, speaking, listening, and writing skills; introduction of East African culture. SWAH 201 offered in fall, SWAH 202 offered in spring.

SPAN 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

Ancient Greek Literature Minor

Chinese Studies, B.A.

Learning Outcomes
- Students will demonstrate a level of comprehension of spoken, standard Mandarin Chinese that will facilitate interactive communication in the language.
- Students will demonstrate advanced proficiency in understanding written Chinese, including familiarity with simplified and traditional character sets and regional variations across the Chinese-speaking world.
- Students will demonstrate the ability to speak Mandarin Chinese at an intermediate to advanced level of proficiency, i.e. to express a wide range of needs, experiences, and ideas in Chinese.
- Students will demonstrate the ability to write in Chinese at an intermediate to advanced level of proficiency, i.e. to express a wide range of needs, experiences, and ideas in Chinese.
- Students will recognize and be able to discuss the significance of primary periods and major writers in Chinese literature, as well as the major historical, cultural, and social trends of Chinese civilization from ancient times to the present day.
- Students will evaluate and discuss knowledgeably cultural texts or linguistic documents, including major texts of Chinese literature, and advance arguments effectively through strong writing and reasoning.
- Students will demonstrate their preparation for appropriate careers or graduate studies.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

<tr>
<td>3. Program Requirements</td>
<td>37-49</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>24</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.
Accordingly, please select one of the following:

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15 hours)

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
- Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (3 hours of Social Science)
  - CHIN 221
  - CHIN 222
  - CHIN 240

Note: If a student places out of CHIN 221 and CHIN 222, a Humanities or Fine Arts course would be required in place of each as part of the College of Arts and Sciences curriculum.

3. Program Requirements (37-49 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 12 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.
A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (19-37 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24 hours)

_a minimum grade of C is required in all major courses_

 Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Note: Other courses, with appropriate content, such as special topics, may be applied with permission of the advisor.

Classics, B.A.

Learning Outcomes

• Students will comprehend and translate into English a wide variety of Latin and Greek texts.
• Students will demonstrate the ability to differentiate between the primary periods and significant writers of Latin and Greek literatures.
• Students will demonstrate the ability to think critically and analyze texts.
• Students will recognize the major historical, cultural, and social trends of Greco-Roman civilization.
Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

<tr>
<td>Major Requirements</td>
<td>24-45</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-8 hours)

Students in the Classics major must demonstrate proficiency in both the Greek and Latin languages equivalent to the minimal passing grade on the exit examination in the 122 course. Latin courses fulfill the CC-GFL requirement for the Latin PK-12 Teacher Certification Concentration, as GREK 121 and GREK 122 are included in the major hours for that concentration. For any of the other concentrations, either Latin or Greek may meet the CC-GFL requirement. Students can demonstrate proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

only if needed to meet 122-level proficiency for Latin

- Students in the Classics major must demonstrate proficiency in both the Greek and Latin languages equivalent to the minimal passing grade on the exit examination in the 122 course. Students who choose Latin to fulfill the CC-GFL requirement and test into LATN 109 will need an additional semester of the language to reach the 122 level.

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
• One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science
• Nine hours of Fine Arts or Humanities

3. Program Requirements (20-49 hours)
Supporting Courses (0-9 hours)

Students in the Classics major must demonstrate proficiency in both the Greek and Latin languages equivalent to the minimal passing grade on the exit examination in the 122 course. Latin courses fulfill the CC-GFL requirement for the Latin PK-12 Teacher Certification Concentration, and GREK 121 and GREK 122 are included in the major hours for that concentration, so no Supporting Courses are needed. For any of the other concentrations, whichever language (Greek or Latin) was not met through the Carolina Core GFL requirement will be met through these Supporting Courses. Students can demonstrate proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

Cognate or Minor (12-20 hours)

Students completing the Latin PK-12 Teacher Certification Concentration must complete a Foreign Language Education Minor (p. 158) (20 hours) and the two (2) required internships.

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (0-37 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24-45 hours)

a minimum grade of C is required in all major courses

Students must choose a concentration from the options below.

Concentrations (24-45 hours)

Classical Studies Concentration (24 hours)

### Application and Admission

Application and admission to the professional program in education/ internship are required for all majors seeking teacher certification. All teacher education candidates must adhere to all education policies and procedures related to clinical experiences and meet University and S.C. Board of Education requirements in order to be recommended for certification. Information is available from academic advisors or the College of Education, Advising and Student Services office, at 803-777-6732.

### Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

### Classics, B.A. Classical Studies Concentration

Comparative Literature, B.A.

Learning Outcomes

• Students will demonstrate skill in and knowledge of a broad range of diverse literary traditions.
• Students will demonstrate skill in at least two literatures, one in a foreign language.
• Students will demonstrate knowledge of the history of literary theory and adequate ability to apply literary theory to literary texts; they will also acquire a good understanding of the history and development of the field of comparative literature.
• Students will demonstrate skill in linguistic competence in a second foreign language.
• Students will demonstrate skills in basic research methods.
• Students will demonstrate skills in written communication.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Carolina Core</td>
<td>32-44</td>
</tr>
<tr>

<td>15-18</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>31-46</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>27</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- CPLT 270

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

- any overlay or stand-alone CC-CMS (p. 742) course

INF – Information Literacy 1 (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency
History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

3. Program Requirements (31-46 hours)
Supporting Courses (3-9 hours)
Students in the Comparative Literature major are required to demonstrate proficiency in a second foreign language. Students must reach proficiency equivalent to the 122 course in the second language, through course credit or the corresponding foreign language placement score. Students who test out of the 122-level of the second foreign language will be required to take a higher-level course in the language for a minimum of 3 credit hours.

Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.)

The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (4-31 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (27 hours)
A minimum grade of C is required in all major courses.

Major Courses (15 hours)

Notes:
- The Minor in Foreign Language Education is available only to students majoring in French, German, Spanish, or Classics.
- Minors in Education or Foreign Language Education do not qualify candidates for a recommendation for teacher certification. See the College of Education Office of Student Affairs (http://www.sc.edu/study/colleges_schools/education/my_coe/) for information on teacher certification programs.

French, B.A.

Learning Outcomes
- Students will demonstrate the ability to understand and interpret French as spoken by a proficient speaker at normal tempo on non-technical general topics.
- Students will demonstrate the ability to speak French in interpersonal interactive and presentational modes.
- Students will comprehend and interpret texts written in French on non-technical topics.
- Students will write French with grammatical accuracy and clarity.
- Students will demonstrate the required knowledge of the geography, history, socio-political structure, and artistic and intellectual contributions of the societies in which French is a native language or official language.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

VSR – Values, Ethics, and Social Responsibility ¹ (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

¹ Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

Note: Students may use FREN 209 and FREN 210, if needed, to fulfill 6 hours of the Humanities or Fine Arts requirement.
3. Program Requirements (20-46 hours)

Cognate or Minor (12-20 hours)

Students completing the French PK-12 Teacher Certification Concentration must complete a Foreign Language Education Minor (p. 158) (20 hours) and the two (2) required internships.

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (0-34 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

</table>

Note: Students must score at least advanced-low on the Oral Proficiency Interview before their student teaching internship.

Application and Admission

Application and admission to the professional program in education/internship are required for all majors seeking teacher certification. All teacher education candidates must adhere to all education policies and procedures related to clinical experiences and meet University and S.C. Board of Education requirements in order to be recommended for certification. Information is available from academic advisors or the College of Education, Advising and Student Services office, at 803-777-6732.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.
German Minor

Minor Requirements

A minor in German requires eighteen hours of course work on the 200-level and above.

Total Credit Hours: 18

Notes

1. All six courses may be taken above the 200-level. Only one German course taught in English (GERM 280, GERM 290, GERM 398, or GERM 580) may count towards the minor.
2. Students majoring in Business are encouraged to enroll in GERM 316 and GERM 416.
3. A maximum of six hours of GERM 333, Summer Study Abroad, may apply to the German minor.
4. Transfer credit from study in the exchange programs with Bamberg and Wittenberg may be included in the German minor.
5. Students who begin their German minor with knowledge of German and who are placed in the 300-level or higher may petition for credit-by-examination (for a maximum of 6 credits). The student who wants to become proficient in communication skills would, most likely, take the GERM 310, GERM 311, GERM 411 sequence.

German, B.A.

Learning Outcomes

- Students will demonstrate a level of comprehension of spoken standard German that will facilitate interactive communication in German.
- Students will demonstrate advanced proficiency in understanding the written word.
- Students will demonstrate intermediate to advanced level of proficiency in writing German, i.e. express a wide range of needs, experiences, and ideas in German.
- Students will demonstrate intermediate to advanced level of proficiency in speaking German, i.e. express a wide range of needs, experiences, and ideas in German.
- Students will demonstrate basic skills as well as cultural competency in analyzing German literary texts from a variety of historical periods and literary genres and communicate their insights, both orally and in writing.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Notes

1. All six courses may be taken above the 200-level. Only one German course taught in English (GERM 280, GERM 290, GERM 398, or GERM 580) may count towards the minor.
2. Students majoring in Business are encouraged to enroll in GERM 316 and GERM 416.
3. A maximum of six hours of GERM 333, Summer Study Abroad, may apply to the German minor.
3. Program Requirements 20-46

4. Major Requirements 27-45

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

any overlay or stand-alone CC-CMS (p. 742) course

INF – Information Literacy 1 (0-3 hours)

any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course primarily focused on U.S. History:
  HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History:
  HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science

• Nine hours of Fine Arts or Humanities

Note: Students may use GERM 210 and GERM 211, if needed, to fulfill 6 hours of the Humanities or Fine Arts requirement.

3. Program Requirements (20-46 hours)

Cognate or Minor (12-20 hours) optional for German PK-12 Teacher Certification Concentration

Students completing the German PK-12 Teacher Certification Concentration must complete a Foreign Language Education Minor (p. 158) (20 hours) and the two (2) required internships.

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).
For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

**Minor**

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. **All minor courses must be passed with a grade of C or higher.** At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (0-34 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (27-45 hours)**

*a minimum grade of C is required in all major courses*

### Major Courses (12 hours)

| FORL 474 | Directed Teaching in Foreign Languages  | 15  |
| **Total Credit Hours** |                                            | **45** |

Note: Only two GERM courses taught in English may apply to the major. German majors taking a course in English must do some of the readings in German. GERM 398 may be repeated with a different suffix as topics vary.

Students must score at least advanced-low on the Oral Proficiency Interview before their student teaching internship.

**Application and Admission**

Application and admission to the professional program in education/internship are required for all majors seeking teacher certification. All teacher education candidates must adhere to all education policies and procedures related to clinical experiences and meet University and S.C. Board of Education requirements in order to be recommended for certification. Information is available from academic advisors or
the College of Education, Advising and Student Services office, at 803-777-6732.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Total Credit Hours 18

---

**Portuguese Minor**

**Minor Requirements (18 Hours)**

Students must successfully complete 18 hours at the 200-level and above in order to earn the Minor in Portuguese. Up to two different Independent Studies (6 credits total) may be used toward the minor. Students may earn up to 6 credits (two courses) on a study abroad program, but these courses must be approved by the Portuguese section coordinator prior to participation in a program abroad.

---

**Russian Minor**

**Minor Requirements (18 Hours)**

Eighteen credit hours above Russian 122 as follows:
Course | Title | Credits
--- | --- | ---
RUSS 201 | Intermediate Russian I | 3
RUSS 202 | Intermediate Russian II | 3
RUSS 301 | Russian Conversation and Composition I | 3
RUSS 302 | Russian Conversation and Composition II | 3

Literature and Culture
Select six hours of RUSS courses at the 200-500 level

Total Credit Hours | 18

1. Topics courses may be repeated for credit under different topics.

Notes: Students who place into an upper-level language class can replace some or all of the 12 language credits with 400-level language classes or with additional RUSS literature or culture courses at the 200 to 500 level.

Russian, B.A.

Learning Outcomes

- Students will demonstrate a level of comprehension of spoken Russian that will facilitate interactive communication in the language.
- Students will demonstrate advanced proficiency in understanding written Russian.
- Students will demonstrate the ability to speak Russian at an intermediate to advanced level of proficiency, i.e. to express a wide range of needs, experiences, and ideas in Russian.
- Students will demonstrate the ability to write in Russian at an intermediate to advanced level of proficiency, i.e. to express a wide range of needs, experiences, and ideas in Russian.
- Students will recognize and be able to discuss the significance of primary periods and major writers in Russian literature, as well as the major historical, cultural, and social trends of Russian civilization from the medieval period to the present day.
- Students will evaluate and discuss knowledgeably cultural texts or linguistic documents, including major texts of Russian literature, and advance arguments effectively through strong writing and reasoning.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

VSR – Values, Ethics, and Social Responsibility ¹ (0-3 hours)
  • any overlay or stand-alone CC-VSR course (p. 742)

¹ Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15 hours)

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

• Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (3 hours of Social Science and 3 hours of Fine Arts or Humanities)
  • RUSS 201
  • RUSS 202

3. Program Requirements (37-49 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (19-37 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-
Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (24 hours)

A minimum grade of C is required in all major courses.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Spanish, B.A.

Learning Outcomes

- Spanish majors will utilize spoken and written Spanish in order to perform the range of activities stated within the curricular parameters of this goal.
- Spanish majors will participate in various types of content-based interactive communication, write papers, present research in class in Spanish (individually and in groups), and recognize and use correctly a wide range of literary vocabulary in Spanish.
- Students will read, comprehend and analyze a wide variety of literary texts written in Spanish.
- Students will read, discuss, present opinions (orally and in writing) and think critically about past and current events of the Hispanic world (Peninsular Spain and Latin America).
- Students will engage in in-depth discussions about some of the major historical, economic, cultural and social issues that exist in the Hispanic world with an emphasis on interpreting the values inherent to these Hispanic cultures as they form a part of the growing Hispanic population of the U.S. and the world at large.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

</table>
1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• any CC-ARP course (p. 742)

SCI – Scientific Literacy (8 hours)

• Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 108, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities
Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science
• Nine hours of Fine Arts or Humanities

Note: Students may use SPAN 209 and SPAN 210, if needed, to fulfill 6 hours of the Humanities or Fine Arts requirement.

3. Program Requirements (20-46 hours)

Cognate or Minor (12-20 hours)

Students completing the Spanish PK-12 Teacher Certification Concentration must complete a Foreign Language Education Minor (p. 158) (20 hours) and the two (2) required internships.

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).
For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

**Minor**
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (0-34 hours)**
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. **Major Requirements (27-45 hours)**  
*A minimum grade of C is required in all major courses.*

All majors sit for the STAMP test during SPAN 312. Students not taking SPAN 312 on campus should contact the Spanish Program Director for instructions about the test.

Note: Students must score at least advanced-low on the Oral Proficiency Interview before their student teaching internship.

**Application and Admission**

Application and admission to the professional program in education/internship are required for all majors seeking teacher certification. All teacher education candidates must adhere to all education policies and procedures related to clinical experiences and meet University and S.C. Board of Education requirements in order to be recommended for certification. Information is available from academic advisors or the College of Education, Advising and Student Services office, at 803-777-6732.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Spanish, B.A. No Concentration**

**Spanish, B.A. PK-12 Teacher Certification**

**Latin American Studies**

Department Website (https://sc.edu/study/colleges_schools/artsandsciences/walker_institute/area_studies/latin_american_studies/)

Matt Childs, Director

Students can select from an array of courses that enable them to explore Latin America from a variety of perspectives while also having the opportunity to focus their studies on a particular field. The minor in Latin American Studies richly complements majors in many other fields, including Anthropology, Business, Geography, Global Studies, Political Science, History, Journalism, and Spanish.

**Courses**

**CHIN 103 - Introduction to Chinese Calligraphy (2 Credits)**
Five hundred of the most commonly used Chinese characters. Emphasis is on the phonetic and significant elements common to large groups of ideograms.

**CHIN 121 - Elementary Chinese Mandarin (4 Credits)**
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language. Carolina Core: GFL

**CHIN 122 - Basic Proficiency in Mandarin Chinese (4 Credits)**
Practice and further development of essential listening, reading, speaking, and writing skills. Admission only by successful completion of Chinese 121.
Prerequisites: CHIN 121.
Carolina Core: GFL

**CHIN 221 - Intermediate Mandarin Chinese (3 Credits)**
Continued practice of basic sentence patterns used in modern speech with increased emphasis on reading and acquisition of additional characters.

**CHIN 222 - Intermediate Mandarin Chinese II (3 Credits)**
Continued practice of basic sentence patterns used in modern speech with increased emphasis on reading and acquisition of additional characters.

**CHIN 240 - Chinese Culture, Tradition, and Modern Societies (3 Credits)**
Introduction to Chinese culture, heritage, and modern societies. Readings selected from printed and online sources. Taught in English.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

**CHIN 321 - Advanced intermediate Mandarin Chinese I (3 Credits)**
Provides advanced intermediate training in spoken and written Chinese. By increasing students’ vocabulary and knowledge of sentence patterns, the course focuses on speaking and writing in coherent, well-formed paragraphs.
Prerequisites: CHIN 222.

**CHIN 322 - Advanced Intermediate Mandarin Chinese II (3 Credits)**
Continues advanced intermediate training in spoken and written Chinese. Attention is given to complex grammatical patterns, discourse characteristics, and discussions of cultural topics.
Prerequisites: CHIN 321.

**CHIN 335 - Women in China (3 Credits)**
Introduces the connection between gender and the Chinese national imagination. Readings include cultural and historical documents that purport to explain the experience of women in China. Readings in English. Taught in English.

Cross-listed course: WGST 335
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

**CHIN 340 - Introduction to Premodern Chinese Literature (3 Credits)**
An introduction to the most important works, authors, genres, and themes of Chinese literature from the first millennium B.C.E. to 1911.

**CHIN 341 - Modern Chinese Literature (3 Credits)**
Readings of canonical texts from modern Chinese literature. A focus is on the role of literature and other cultural documents in the imagination of China as a modern nation. Readings and discussion in English.

**CHIN 365 - Screening China (3 Credits)**
Survey of Chinese language cinema. Chinese film history and vocabulary with which to discuss film texts. Covers classic leftwing cinema, Hong Kong martial arts films, as well as the Hong Kong, Taiwan, and PRC New Waves. Taught in English. Films subtitled.
Cross-listed course: FAMS 365

**CHIN 398 - Selected Topics (3 Credits)**
Intensive study in selected authors or literary movements of China, including cultural aspects. May be repeated for credit under different titles. Taught in English.

**CHIN 399 - Independent Study (3-6 Credits)**
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research
CHIN 421 - Advanced Chinese I (3 Credits)
Acquisition of advanced grammar and vocabulary. Emphasis on building oral proficiency in professional settings.
Prerequisites: CHIN 322.

CHIN 422 - Advanced Chinese II (3 Credits)
Continued acquisition of advanced grammar and vocabulary. Emphasis on expanding communicative abilities in a wider variety of interpersonal situations.
Prerequisites: CHIN 421.

CHIN 550 - Advanced Special Topics in Chinese Studies (3 Credits)
Advanced special topics in Chinese studies. May be repeated as content varies by title.

LASP 201 - Latin American, Caribbean, and Latino/a Cultures through Film (3 Credits)
Interdisciplinary introduction to the diversity of landscapes and political and social issues in Latin America's history. Films, lectures, and readings provide an overall comprehensive perspective. Lectures by faculty in Spanish, Portuguese, anthropology, and history.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

LASP 301 - Interdisciplinary Study of Latin America (3 Credits)
Anthropology, geography, history, politics, language, and culture of Latin America.
Graduation with Leadership Distinction: GLD: Global Learning

LASP 305 - Working with Hispanic Clients (3 Credits)
Crosscultural approaches to interactions with persons of Hispanic origin in a variety of professional settings. Readings, speakers, media. Taught in Spanish. Departmental permission required for transfer students.
Prerequisites: B or better in SPAN 210 or SPAN 211; placement at 300 level on Phase II placement exam.
Cross-listed course: SPAN 305
Graduation with Leadership Distinction: GLD: Community Service, GLD: Global Learning

LASP 311 - Latin American Cultures (3 Credits)
Comparative study of selected Latin American cultures with emphasis on their significance for a broader anthropological theory.
Cross-listed course: ANTH 301
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

LASP 315 - South American Indian Cultures (3 Credits)
An examination of ethnographic data on South American Indians, emphasizing methods used to acquire those data and their applications to theoretical considerations.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

LASP 322 - Mesoamerican Prehistory (3 Credits)
Cultural development and variation in Mesoamerica from the first arrival of man to the arrival of Europeans. Particular attention to cultural continuities from prehistoric times.
Cross-listed course: ANTH 331

LASP 325 - Prehistoric Civilizations of the New World (3 Credits)
Study of Mesoamerican and South American civilizations, particularly the Mayan, Aztec, and Inca states. Processes of state formation as reflected in archaeological data.
Cross-listed course: ANTH 327

LASP 331 - Geography of Latin America (3 Credits)
Physical and human geography of Latin America.
Cross-listed course: GEOG 223
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Global Learning

LASP 341 - Colonial Latin America (3 Credits)
The establishment and consolidation of the Spanish and Portuguese empires in the Western hemisphere; interaction of Indians, Africans, and Iberians, and the formation of social, economic, and political traditions in Latin America; political independence.
Cross-listed course: HIST 421

LASP 342 - Modern Latin America (3 Credits)
Traditional society in the area and problems arising from social, economic, and political changes since independence; comparative studies of national responses to these problems.
Cross-listed course: HIST 420

LASP 343 - Caribbean Studies (3 Credits)
The development, principles, political thought, and politics of the several Latin American states.
Cross-listed course: POLI 488
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

LASP 351 - Politics and Governments of Latin America (3 Credits)
The development, principles, political thought, and politics of the several Latin American states.

LASP 361 - Spanish American Civilization (3 Credits)
Lectures, readings, and visuals on selected topics of Spanish American civilization and its cultural heritage.

LASP 371 - Literary Tendencies and Masterpieces of Spanish America (3 Credits)
A survey of the masterworks and literary tendencies of Spanish America.
Prerequisites: SPAN 312.

Cross-listed course: SPAN 405

LASP 398 - Special Topics in Latin American Studies (3 Credits)
Selected Topics on Latin America. May be repeated for credit as content varies by title.

LASP 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

LASP 425 - Prehistoric Archaeology of South America (3 Credits)
Prehistoric archaeology of the South American continent.
Cross-listed course: ANTH 534

LASP 441 - Social and Economic History of Latin America (3 Credits)
The evolution of social groups and changes in economic patterns in Latin America from pre-Columbian times to the present.
Cross-listed course: HIST 422

LASP 442 - History of Mexico (3 Credits)
Mexico from the pre-conquest period to the present, with an emphasis on modern Mexico.
Cross-listed course: HIST 423

LASP 451 - International Relations of Latin America (3 Credits)
Contemporary international relations among Latin American states, including economic and political security and relations with the United States.
Cross-listed course: POLI 437
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences
Lingustics

Department Website (http://www.cas.sc.edu/ling/)

Mila Tasseva-Kurkatchieva, Director

Linguistics is the scientific study of language. Its various subdisciplines investigate how speech sounds are organized (phonetics and phonology), how words, phrases, and sentences are structured (morphology and syntax), and how meaning is structured and interpreted (semantics and pragmatics). Linguistics also includes the study of how language is learned (language acquisition), how it is represented in the mind (psycholinguistics), how it changes over time (historical linguistics), and how it relates to social and cultural phenomena (sociolinguistics and linguistic anthropology).

At the undergraduate level the program offers the possibility of an undergraduate minor or cognate field in linguistics, and knowledge gained in such a course of study can complement a wide variety of disciplines. Students who would especially benefit from a minor or cognate in linguistics are those majoring in anthropology, computer science, English, French, German, philosophy, psychology, and Spanish. A linguistics minor is also good preparation for a graduate program in speech pathology. A student wishing to have linguistics as a major concentration of study may pursue an emphasis in the field through the Bachelor of Arts in Interdisciplinary Studies (B.A.I.S.) degree program. Further information about the B.A.I.S. program may be obtained from the College of Arts and Sciences.

The recommended first step in learning about linguistics is LING 101 which satisfies a Global Citizenship and Multicultural Understanding: Social Sciences Carolina Core requirement. After the introduction gained in this course, the student is prepared for specialized courses on the 200-500 level. (There are, however, no formal prerequisites for these courses.) Possibilities include courses on the structure of human language, language in society, history of language, acquisition of language, and courses devoted to the description of a particular language: English, French, German, or Spanish.

Majoring in one of the related disciplines and minorling in linguistics can prepare students for a variety of careers, including teaching, translating, foreign service, and social work, or for graduate study in linguistics and any of its related fields. For students who want to pursue linguistics past the undergraduate level, the USC Linguistics Program offers a comprehensive graduate program in linguistics, which leads to the M.A. and Ph.D. degrees or the Graduate Certificate in Teaching English to Speakers of Other Languages.

Courses

LING 101 - Linguistics 1: Introduction to Language (3 Credits)
Introduction to the human capacity for language and to how it is acquired. Investigation of language varieties, dialects, and styles. Examination of the social and geographical factors that contribute to language variation and change.
Carolina Core: GSS

LING 102 - Integrated Linguistic Skills for Non-Native Speakers 1 (3 Credits)
Linguistic skills for low-advanced non-native speakers of English related to writing, grammar, reading, listening and speaking for academic purposes. Students enrolled in the International Accelerator Program.
Corequisite: LING 103.

LING 103 - Integrated Linguistic Skills for Non-Native Speakers 2 (3 Credits)
Linguistic skills for low-advanced non-native speakers of English related to writing, grammar, reading, listening and speaking for academic purposes with a focus on research skills. Students enrolled in the International Accelerator Program.
Corequisite: LING 102.

LING 104 - Integrated Linguistic Skills for Non-Native Speakers 3 (3 Credits)
Linguistic skills for advanced non-native speakers English related to writing, grammar, reading, listening and speaking for academic purposes with a focus on productive skills. Students enrolled in the International Accelerator Program.

LING 105 - Special Topics in Linguistics I (3 Credits)
Topics of a broad nature that require no previous study in linguistics. May be repeated as content varies by title.

LING 140 - Linguistic Diversity Awareness (2 Credits)
A course designed to cultivate awareness of phonological and grammatical differences among dialects of English and ability to switch comfortably between one's dialect and standard usage. Two-hour lecture and laboratory.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy. GLD: Professional and Civic Engagement Leadership Experiences

LING 205 - Special Topics in Linguistics II (3 Credits)
Topics of a more focused nature that require no previous study in linguistics. May be repeated as content varies by title.

LING 240 - Language Conflict and Language Rights (3 Credits)
Examination of linguistic conflict and rights, as well as centrality of language rights to human rights and personal/cultural identity. Basic facts about language related to identity, culture, attitudes, dialects, bilingualism. Case studies (local, national, international) with particular attention to nationalism, language revitalization, language planning.
Cross-listed course: POLI 240
Carolina Core: VSR
LING 241 - Language and Popular Culture (3 Credits)
Linguistic anthropological study of forms of language through the lens of popular culture. Explore the ethnography of communication through play and performance, discursive and semiotic practices, and varieties of language invoked in popular cultural forms that provide resources for cultural reproduction and contestation.
Cross-listed course: ANTH 271

LING 242 - Language and Humor at the Intersections of Religion, Race, Ethnicity, and Gender (3 Credits)
Explores language and humor, looking at (i) the linguistic structure and psychology of humor, (ii) changing societal standards for humor, (iii) racial, ethnic, religious, and gender-based humor, and (iv) socio-political questions surrounding the use of these.

LING 243 - Korean Popular Culture and Language (3 Credits)
Introduction to linguistic and anthropological concepts through the lens of South Korean popular culture.

LING 273 - Cross-Cultural Communication (3 Credits)
This course introduces students to the fields of interactional sociolinguistics and linguistic anthropology. Students will learn how they approach the study of cross-cultural and intercultural forms of (mis)communication within the context of globally interconnected people, places, and systems of communication.
Cross-listed course: ANTH 273
Carolina Core: GSS

LING 300 - Introduction to Language Sciences (3 Credits)
Introduction to the linguistic component of human cognition. Properties of speech, the organization of language in the mind/brain, cross-linguistic universals, child language acquisition, and aspects of adult language processing.
Cross-listed course: ANTH 373, PSYC 470

LING 301 - The English Language (3 Credits)
Introduction to the field of linguistics with an emphasis on English. Covers the English sound system, word structure, and grammar. Explores history of English, American dialects, social registers, and style.
Cross-listed course: ENGL 389

LING 303 - Chinese Language and Society (3 Credits)
A comprehensive and up-to-date survey of Chinese language in a social context, teaching students not only the linguistic structure of modern standard Chinese but also how language and society mutually influence each other in history and today's digital age. Hands-on instruction to carry out linguistic research.
Prerequisites: C or better in CHIN 121.

LING 305 - Special Topics in Linguistics III (3 Credits)
Reading and research on selected topics in linguistics that may require previous study in linguistics or a related field. May be repeated as content varies by title.
Prerequisites: listed for each course offering.

LING 314 - Spanish Phonetics and Pronunciation (3 Credits)
Analysis of and practice in pronunciation, listening comprehension, and dialect recognition based on study of the speech sounds, combinations, patterns, and processes of Spanish phonetics and phonology. Department permission required for transfer students.
Prerequisites: C+ or better in SPAN 302; placement at 300 level of Phase II placement exam.
Cross-listed course: SPAN 317

LING 316 - French Phonetics (3 Credits)
Analysis of and practice in pronunciation and listening comprehension. Prerequisites: C or better in both FREN 209 and FREN 210, or equivalents, or a score of F-6 on the French language placement exam.

Cross-listed course: FREN 300

LING 340 - Language, Culture, and Society (3 Credits)
Language in its social setting. The relationship between linguistic categories and culture categories. Language and cognition.
Cross-listed course: ANTH 355
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

LING 345 - Language in the USA (3 Credits)
Linguistic examination of the structure, history, and use of language varieties in the U.S., with a particular focus on regional and sociocultural variation and relevant sociolinguistic issues.
Cross-listed course: ENGL 370
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

LING 395 - Teaching English Abroad (3 Credits)
An intensive, hands-on introduction to principles and techniques of teaching English language learners, exposing students to norms of the field of Teaching English to Speakers of Other Languages (TESOL), working with non-native English speakers, and discovering TESOL opportunities worldwide.

LING 399 - Independent Study (1-3 Credits)
Contract approved by instructor, advisor, and program director is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

LING 405 - Topics in Linguistics (3 Credits)
Intensive study of selected topics; may emphasize interdisciplinary themes.

LING 421 - English Grammar (3 Credits)
Major structures of English morphology and syntax; role of language history and social and regional variation in understanding contemporary English.
Cross-listed course: ENGL 450

LING 431 - Development of the English Language (3 Credits)
History of English from the earliest Old English texts through Middle English to Contemporary English. No previous knowledge of Old or Middle English is required.
Cross-listed course: ENGL 453

LING 440 - Language in Society (3 Credits)
Patterns in language use as a reflection of social group memberships or the negotiation of interpersonal relationships; special attention to social dialects and stylistic difference in American English.
Cross-listed course: ENGL 455
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
LING 442 - African-American English (3 Credits)
Linguistic examination of the structure, history, and use of African-American English, as well as literary presentations, language attitudes, and issues relating to education and the acquisition of Standard English.
Cross-listed course: AFAM 442, ANTH 442, ENGL 457
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

LING 472 - Introduction to Technology in Language Education (3 Credits)
Acquaints students with principles and practices concerning the use of technology in foreign language teaching. Explores connections between second language acquisition and the implementation of Internet and multimedia technologies.
Prerequisites: FORL 511.
Cross-listed course: FORL 472

LING 474 - Bilingualism (3 Credits)
Bilingual language development, social and cultural aspects of bilingualism, the bilingual brain, bilingualism throughout the lifespan.

LING 502 - French Linguistics (3 Credits)
The structure, morphology, and syntax of modern French.
Cross-listed course: FREN 517

LING 503 - Introduction to German Linguistics (3 Credits)
Structural and descriptive linguistics applied to the German language.
Cross-listed course: GERM 515

LING 504 - Introduction to Spanish Linguistics (3 Credits)
Phonology, morphology, and syntax of modern Spanish.

LING 505 - Interdisciplinary Topics in Linguistics (3 Credits)
Topics selected by the instructor for specialized study. Course content varies and will be announced in the schedule of classes title. May be repeated twice as topics vary.

LING 512 - French Phonology (3 Credits)
The sound system and its functioning in the morphological system of French from the point of view of current phonological theory.
Cross-listed course: FREN 516

LING 514 - Contrastive English-Spanish Phonetics and Phonology (3 Credits)
Introduction to the study of phonetics and phonology and their application to the sounds and sound systems of English and Spanish. Includes transcription practice and discussion of relevance to teaching.
Cross-listed course: SPAN 517

LING 521 - Advanced English Grammar (3 Credits)
Practical survey of the syntactic structures of English; usage, social and regional variation emphasis on data.
Prerequisites: LING 421/ENGL 450 or LING 600/ENGL 680.

LING 527 - Introduction to Mathematical Methods in Linguistics (3 Credits)
Introduction to mathematical mechanisms that play a prominent role in the formalization of syntactic and semantic theories, showing how they are applied to an understanding of the working parts of human language. The topics covered include: set theory, logic, English as a formal language, and languages & grammars.

LING 530 - Language Change (3 Credits)
Major ways in which phonetics, phonology, syntax, morphology, and semantics change through language history; social factors which promote innovation.

LING 533 - Introduction to the Germanic Languages (3 Credits)
Introduction to historical Germanic linguistics including a survey of the Old Germanic languages (Old English, Old Frisian, Old Saxon, Old High German, Old Norse, Gothic); comparative phonology, morphology, and syntax, typology of modern Germanic languages and dialects; and common Germanic in its Indo-European context.
Cross-listed course: GERM 517

LING 540 - Topics in Language and Culture (3 Credits)
Introduction to sociolinguistic issues, focusing on a single language. Course content varies and will be announced by title. May be repeated twice as topics vary.

LING 541 - Language and Gender (3 Credits)
Approaches to gender and language emphasizing the social grounding of both; how language reflects sociocultural values and is a tool for constructing different types of social organization.
Cross-listed course: ANTH 555, WGST 555
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

LING 542 - Research in Language Conflict and Language Rights (3 Credits)
Research into the parameters governing linguistic conflicts and language rights issues, involving a close examination of the nexus of language and: individual and ethnic identity, culture, dialects, bilingualism. Examination of regional, national, and international case studies, with particular attention to nationalism, language revitalization, and language planning.
Cross-listed course: POLI 542

LING 543 - Discourse, Gender, and Politics of Emotion (3 Credits)
Anthropological approach to issues of discourse, gender, and emotion. Issues under consideration include the social control, force, and forms of emotional discourse and the relationship between emotion and culture from gender-oriented perspectives.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

LING 545 - Anthropological Approaches to Narrative and Performance (3 Credits)
The ways people from various cultures reflect on, reinforce, and construct their social realities through narrating, which will be considered as both artistic expression and social action.
Cross-listed course: ANTH 553

LING 546 - Japanese Language in Society (3 Credits)
Japanese language and communication in its socio-cultural context; emphasis on comparison with American English. Taught in English.
Cross-listed course: JAPA 500

LING 548 - German Sociolinguistics (3 Credits)
Introduction to the study of variation in Modern German. Traditional German dialectology and dialect geography, language and society, multilingualism in the German-speaking countries, German in contact with other languages.
Cross-listed course: GERM 518

LING 554 - The Structure of Modern Spanish (3 Credits)
Description of the grammatical structures of Modern Spanish. Intensive study of the theory and practice of word formation and sentence structure of Spanish.
Cross-listed course: SPAN 516
LING 556 - Language and Globalization (3 Credits)
Anthropological approach to issues of language and globalization. Linguistic consequences of globalization under consideration include communicative patterns, linguistic change, and language and political economy.
Cross-listed course: ANTH 556

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

LING 556 - Philosophy of Language (3 Credits)
An examination of concepts and problems such as meaning, reference, analyticity, definition, and the relation between logic and philosophy.
Prerequisites: PHIL 202.

Cross-listed course: PHIL 517

LING 567 - Psychology of Language (3 Credits)
Theories of speech perception, linguistic theories of syntax and semantics, the brain mechanisms underlying language, the development of language in children, and the role of language in thought.
Cross-listed course: PSYC 506

LING 570 - Introduction to Language Development (3 Credits)
The language acquisition process in normal children, including the development of semantics, morphology, syntax, phonology, and pragmatics; American dialects and bilingualism.
Prerequisites: COMD 501 and COMD 507.

Cross-listed course: COMD 570

LING 600 - Survey of Linguistics (3 Credits)
Survey of core areas of linguistics and extensions to closely related disciplines. Introduction to the linguistic component of human cognition. Formal description and analysis of the general properties of speech and language, the organization of language in the mind/brain, and cross-linguistic typology and universals.
Cross-listed course: ANTH 600, ENGL 680

LING 627 - Introduction to Semantics and Pragmatics (3 Credits)
An introduction to the study of linguistic meaning, including the following topics: meaning, reference, and truth; the connections among language, thought, and reality; word meaning and sentence meaning; possible worlds and modality; thematic roles; meaning and context; presupposition and implicature; speech acts; formal semantics; and cognitive semantics.
Prerequisites: LING 300, LING 301, or LING 600.

LING 650 - Introduction to Morphology (3 Credits)
Foundations of generative morphology, focusing on morphological data collection and analysis; the structure of the lexicon; and the interfaces between morphology and phonology, semantics, and syntax.
Prerequisites: LING 300, LING 301, or LING 600.

Mathematics

Department Website (http://www.math.sc.edu/)

Linyuan Lu, Chair

The department offers a program leading to the degree of Bachelor of Science in mathematics and a special five-year program leading to a Bachelor of Science degree and a Master of Science degree in mathematics. In addition, the department serves many of the disciplines within the University through course offerings which provide basic mathematical skills necessary to the pursuit of studies in these disciplines.

General Mathematics Courses

MATH 111 is a course in basic mathematics intended for students who plan to take MATH 122 or MATH 170 and who need more thorough development in algebraic methods.

MATH 111 is an intensive version of MATH 111. This course is intended for students who plan to take MATH 122 or MATH 170 and desire additional support—in the form of smaller classes and more contact hours—to develop the necessary algebraic skills.

MATH 112 is the basic trigonometry course for students who plan to take MATH 141 and have adequate preparation in algebra but need more thorough development in trigonometry. This course may not be used for mathematics credit in the College of Engineering and Computing.

MATH 115 is the basic precalculus course for students who plan to take MATH 141 and need more thorough development in algebra and trigonometry before entering MATH 141. This course may not be used for mathematics credit in the College of Engineering and Computing.

MATH 122 is intended for students in business, the social sciences, pharmacy, and other disciplines which require an introduction to computational mathematics and calculus and is open to all interested students who satisfy the general requirements listed below.

MATH 141, MATH 142, MATH 241 constitute the normal calculus sequence for students in the College of Arts and Sciences and the College of Engineering and Computing. These courses are open to all students who satisfy the general requirements listed below.

MATH 170 is a basic course in finite mathematics. It may be used to satisfy the University's core requirements and is open to all interested students who satisfy the general requirements listed below.

Freshman Placement in Mathematics

MATH 111: Qualification through placement.

MATH 111: Qualification through placement.

MATH 112: Qualification through placement or credit for MATH 111, either by successful completion of the course with a grade of C or better, transfer credit from another university, or successful completion of the test in MATH 111, available from the testing service.

MATH 115: Qualification through placement.

MATH 122: Qualification through placement or credit for MATH 111, either by successful completion of the course with a grade of C or better, transfer credit from another university, or successful completion of the test in MATH 111, available from the testing service.

MATH 141: Qualification through placement or credit for MATH 112 or MATH 115, either by successful completion of the course with a grade of C or better, transfer credit from another university, or successful completion of the test in MATH 115, available from the testing service.

Students who do not qualify for MATH 141 under paragraph 1 are strongly encouraged to try to obtain credit for MATH 115 either by taking
the course or the examination during the summer preceding their first fall semester.

MATH 170: Qualification through placement or credit
for MATH 111 or MATH 115, either by successful completion of the course with a grade of C or better; transfer credit from another university, or successful completion of the test in MATH 111 or MATH 115 which is available from the testing service.

Incoming students who wish to obtain bypass credit for certain mathematics courses may do so as follows:

MATH 111: CLEP Subject Examination titled “College Algebra” available from the testing service.
MATH 112: CLEP Subject Examination titled “Trigonometry” available from the testing service.
MATH 115: CLEP Subject Examination titled “College Algebra-Trigonometry” available from the testing service.
MATH 141: CLEP Subject Examination titled "Calculus with Analytic Geometry" available from the testing service.

Advanced Placement Test in Mathematics: The Advanced Placement Mathematics tests may be used to gain credit and advanced placement in calculus. Information is available from the testing service.

Programs

- Actuarial Mathematics and Statistics Minor (p. 180)
- Mathematical Biology Minor (p. 180)
- Mathematics Minor (p. 181)
- Mathematics, B.S. (p. 181)

Courses

MATH 111 - Basic College Mathematics (3 Credits)
Basic college algebra; linear and quadratic equations, inequalities, functions and graphs of functions, exponential and logarithm functions, systems of equations.
Prerequisites: placement through Algebra version of the Mathematics Placement Test.

MATH 1111 - Intensive Basic College Mathematics (4 Credits)
An intensive treatment of the topics covered in MATH 111.
Prerequisites: placement through Algebra version of the Mathematics Placement Test.

MATH 112 - Trigonometry (2 Credits)
Topics in trigonometry specifically needed for MATH 141, MATH 142, MATH 241. Circular functions, analytic trigonometry, applications of trigonometry. Credit may not be received for both MATH 112 and MATH 115.
Prerequisites: C or better in MATH 111 or MATH 1111, or placement through Algebra version of the Mathematics Placement Test.

MATH 115 - Precalculus Mathematics (4 Credits)
Topics in algebra and trigonometry specifically needed for MATH 141, MATH 142, MATH 241. Subsets of the real line, absolute value; polynomial, rational, inverse, logarithmic, exponential functions; circular functions; analytic trigonometry.
Prerequisites: C or better in MATH 111 or MATH 1111, or placement through Precalculus version of the Mathematics Placement Test.

MATH 116 - Brief Precalculus Mathematics (2 Credits)
Essential algebra and trigonometry topics for Calculus, including working with equations that involve polynomials, rational functions, exponential and logarithmic functions, and trigonometric and inverse trigonometric functions. Intended for students with prior experience in Precalculus, but not ready for MATH 141.
Prerequisites: C or better in MATH 112 or MATH 115, or placement through Precalculus version of the Mathematics Placement Test.

MATH 122 - Calculus for Business Administration and Social Sciences (3 Credits)
Derivatives and integrals of elementary algebraic, exponential, and logarithmic functions. Maxima, minima, rate of change, motion, work, area under a curve, and volume.
Prerequisites: C or better in MATH 111, MATH 111i or MATH 115 or placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 141 - Calculus I (4 Credits)
Functions, limits, derivatives, introduction to integrals, the Fundamental Theorem of Calculus, applications of derivatives and integrals. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in Math 112, MATH 115, or MATH 116, or placement through Precalculus version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 142 - Calculus II (4 Credits)
Methods of integration, sequences and series, approximations. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in MATH 141.

Carolina Core: ARP

MATH 151 - Calculus Workshop I (2 Credits)
Small study group practice in applications of calculus. For elective credit only.
Corequisite: MATH 141.

MATH 152 - Calculus Workshop II (2 Credits)
Small study group practice in applications of calculus. For elective credit only.
Corequisite: MATH 142.

MATH 170 - Finite Mathematics (3 Credits)
Elementary matrix theory; systems of linear equations; permutations and combinations; probability and Markov chains; linear programming and game theory.
Prerequisites: C or better in MATH 111 or MATH 111i or MATH 122, or placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 172 - Mathematical Modeling for the Life Sciences (3 Credits)
Biological modeling with differential and difference equations; techniques of model modifications; analytic, numerical, and graphical solution methods; equilibria, stability, and long-term system behavior; geometric series; vectors, matrices, eigenvalues, and eigenvectors. Applications principally to population dynamics and compartment models.
Prerequisites: C or better in MATH 122 or MATH 141.

Carolina Core: ARP
MATH 174 - Discrete Mathematics for Computer Science (3 Credits)
Logic, number theory, sequences, series, recursion, mathematical induction, set theory, enumeration, functions, relations, graphs and trees. Connections to computers and to programming are emphasized when possible.
Prerequisites: C or better in MATH 115, MATH 116, MATH 122, or MATH 141, or placement through the pre-calculus version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 198 - Introduction to Careers and Research in the Mathematical Sciences (1 Credit)
An overview of different areas of mathematical research and career opportunities for mathematics majors. Pass/fail only.
Prerequisites: C or better in MATH 141.

Graduation with Leadership Distinction: GLD: Research

MATH 221 - Basic Concepts of Elementary Mathematics I (3 Credits)
The meaning of number, fundamental operations of arithmetic, the structure of the real number system and its subsystems, elementary number theory. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 111 or MATH 111I or placement through Algebra version of the Mathematics Placement Test.

MATH 222 - Basic Concepts of Elementary Mathematics II (3 Credits)
Informal geometry and basic concepts of algebra. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 221.

MATH 241 - Vector Calculus (3 Credits)
Vector algebra, geometry of three-dimensional space; lines, planes, and curves in space; polar, cylindrical, and spherical coordinate systems; partial differentiation, max-min theory; multiple and iterated integration, line integrals, and Green's theorem in the plane.
Prerequisites: C or better in MATH 142.

MATH 242 - Elementary Differential Equations (3 Credits)
Ordinary differential equations of first order, higher order linear equations, Laplace transform methods, series methods; numerical solution of differential equations. Applications to physical sciences and engineering.
Prerequisites: C or better in MATH 142.

MATH 300 - Transition to Advanced Mathematics (3 Credits)
Rigor of mathematical thinking and proof writing via logic, sets, and functions. Intended to bridge the gap between lower-level (computational-based) and upper-level (proof-based) mathematics courses.
Prerequisites: C or better in MATH 142.

MATH 344 - Applied Linear Algebra (3 Credits)
General solutions of systems of linear equations, vector spaces and subspaces, linear transformations, determinants, orthogonality, characteristic polynomials, eigenvalues and eigenvectors, singular value decomposition, and generalized inverse. MATH 344L is an optional laboratory course where additional applications will be discussed.
Prerequisites: C or better in MATH 142.

MATH 344L - Applied Linear Algebra Lab (1 Credit)
Computer based applications of linear algebra for science and engineering students. Topics include numerical analysis of matrices, direct and indirect methods for solving linear systems, and least squares method (regression). Typical applications include practical issues related to discrete Markov processes, image compression, and linear programming. Credit not allowed for both MATH 344L and 544L.
Prerequisite or Corequisite: C or better or concurrent enrollment in MATH 344.

MATH 374 - Discrete Structures (3 Credits)
Propositional and predicate logic; proof techniques; recursion and recurrence relations; sets, combinatorics, and probability; functions, relations, and matrices; algebraic structures.
Prerequisites: C or better in both MATH 142 and CSCE 146.

MATH 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

MATH 401 - Conceptual History of Mathematics (3 Credits)
Topics from the history of mathematics emphasizing the 17th century to the present. Various mathematical concepts are discussed and their development traced. For elective or Group II credit only.
Prerequisites: C or better in MATH 122, or MATH 141.

MATH 490 - Mathematics Internship (1-3 Credits)
Academic counterpart to a professional work experience in which mathematics plays a central role. Introduction to the uses of problem formulation and problem solving in a working environment. Introduction to career possibilities for a student trained in mathematics. Restricted to MATH major with 3.0 or better GPA and completion of at least 60 credits.
Prerequisites: C or better in MATH 241, MATH 300 and at least one 500 level MATH course; CSCE 145 or CSCE 206 and one of the following STAT courses STAT 509, STAT 512, STAT 515.

MATH 499 - Undergraduate Research (1-3 Credits)
Research on a specific mathematical subject area. The specific content of the research project must be outlined in a proposal that must be approved by the instructor and the Undergraduate Director. Intended for students pursuing the B.S. in Mathematics with Distinction. Pass-Fail grading only.
Graduation with Leadership Distinction: GLD: Research

MATH 511 - Probability (3 Credits)
Probability and independence; discrete and continuous random variables; joint, marginal, and conditional densities, moment generating functions; laws of large numbers; binomial, Poisson, gamma, univariate, and bivariate normal distributions.
Prerequisites: C or better in MATH 241.

Corequisite: MATH 241.

Cross-listed course: STAT 511

MATH 514 - Financial Mathematics I (3 Credits)
Prerequisites: C or better in MATH 241.

Cross-listed course: STAT 522
MATH 515 - Financial Mathematics II (3 Credits)
Prerequisites: C or better in MATH 514 or STAT 522.

Cross-listed course: STAT 523

MATH 520 - Ordinary Differential Equations (3 Credits)
Differential equations of the first order, linear systems of ordinary differential equations, elementary qualitative properties of nonlinear systems.
Prerequisites: C or better in MATH 344 or MATH 544.

MATH 521 - Boundary Value Problems and Partial Differential Equations (3 Credits)
Laplace transforms, two-point boundary value problems and Green's functions, boundary value problems in partial differential equations, eigenfunction expansions and separation of variables, transform methods for solving PDE's, Green's functions for PDE's, and the method of characteristics.
Prerequisites: C or better in MATH 520 or in both MATH 241 and MATH 242.

MATH 522 - Wavelets (3 Credits)
Basic principles and methods of Fourier transforms, wavelets, and multiresolution analysis; applications to differential equations, data compression, and signal and image processing; development of numerical algorithms. Computer implementation.
Prerequisites: C or better in MATH 344 or MATH 544.

MATH 523 - Mathematical Modeling of Population Biology (3 Credits)
Applications of differential and difference equations and linear algebra modeling the dynamics of populations, with emphasis on stability and oscillation. Critical analysis of current publications with computer simulation of models.
Prerequisites: C or better in MATH 142, BIOL 301, or MSCI 311 recommended.

MATH 524 - Nonlinear Optimization (3 Credits)
Descent methods, conjugate direction methods, and Quasi-Newton algorithms for unconstrained optimization; globally convergent hybrid algorithm; primal, penalty, and barrier methods for constrained optimization. Computer implementation of algorithms.
Prerequisites: C or better in MATH 241 and one of MATH 344 or MATH 544.

MATH 525 - Mathematical Game Theory (3 Credits)
Two-person zero-sum games, minimax theorem, utility theory, n-person games, market games, stability.
Prerequisites: C or better in MATH 544 or in both MATH 300 and MATH 344.

MATH 526 - Numerical Linear Algebra (4 Credits)
Matrix algebra, Gauss elimination, iterative methods; overdetermined systems and least squares; eigenvalues, eigenvectors; numerical software. Computer implementation. Credit may not be received for both MATH 526 and MATH 544. Three lectures and one laboratory hour per week.
Prerequisites: C or better in MATH 142.

MATH 527 - Numerical Analysis (3 Credits)
Interpolation and approximation of functions; solution of algebraic equations; numerical differentiation and integration; numerical solutions of ordinary differential equations and boundary value problems; computer implementation of algorithms.
Prerequisites: C or better in MATH 520 or in both MATH 242 and MATH 344.

Cross-listed course: CSCE 561

MATH 528 - Mathematical Foundation of Data Science and Machine Learning (3 Credits)
Unconstrained and constrained optimization, gradient descent methods for numerical optimization, supervised and unsupervised learning, various reduced order methods, sampling and inference, Monte Carlo methods, deep neural networks.
Prerequisites: C or better in MATH 344 or MATH 544.

MATH 531 - Foundations of Geometry (3 Credits)
The study of geometry as a logical system based upon postulates and undefined terms. The fundamental concepts and relations of Euclidean geometry developed rigorously on the basis of a set of postulates. Some topics from non-Euclidean geometry.
Prerequisites: C or better in MATH 300.

MATH 532 - Modern Geometry (3 Credits)
Projective geometry, theorem of Desargues, conics, transformation theory, affine geometry, Euclidean geometry, non-Euclidean geometries, and topology.
Prerequisites: C or better in MATH 300.

MATH 533 - Elementary Geometric Topology (3 Credits)
Topology of the line, plane, and space, Jordan curve theorem, Brouwer fixed point theorem, Euler characteristic of polyhedra, orientable and non-orientable surfaces, classification of surfaces, network topology.
Prerequisites: C or better in MATH 241 and MATH 300.

MATH 534 - Elements of General Topology (3 Credits)
Elementary properties of sets, functions, spaces, maps, separation axioms, compactness, completeness, convergence, connectedness, path connectedness, embedding and extension theorems, metric spaces, and compactification.
Prerequisites: C or better in MATH 241 and MATH 300.

MATH 540 - Modern Applied Algebra (3 Credits)
Finite structures useful in applied areas. Binary relations, Boolean algebras, applications to optimization, and realization of finite state machines.
Prerequisites: MATH 300.

MATH 541 - Algebraic Coding Theory (3 Credits)
Error-correcting codes, polynomial rings, cyclic codes, finite fields, BCH codes.
Prerequisites: C or better in MATH 544 or in both MATH 300 and MATH 344.

MATH 544 - Linear Algebra (3 Credits)
Vectors, vector spaces, and subspaces; geometry of finite dimensional Euclidean space; linear transformations; eigenvalues and eigenvectors; diagonalization. Throughout there will be an emphasis on theoretical concepts, logic, and methods. MATH 544L is an optional laboratory course where additional applications will be discussed.
Prerequisites: C or better in MATH 241 and MATH 300.
MATH 544L - Linear Algebra Lab (1 Credit)
Computer-based applications of linear algebra for mathematics students. Topics include numerical analysis of matrices, direct and indirect methods for solving linear systems, and least squares method (regression). Typical applications include theoretical and practical issues related to discrete Markov processes, image compression, and linear programming. Credit not allowed for both MATH 344L and 544L. **Prerequisite or Corequisite:** C or better or concurrent enrollment in MATH 544.

MATH 546 - Algebraic Structures I (3 Credits)
Permutation groups; abstract groups; introduction to algebraic structures through study of subgroups, quotient groups, homomorphisms, isomorphisms, direct product; decompositions; introduction to rings and fields. **Prerequisites:** C or better in MATH 544.

MATH 547 - Algebraic Structures II (3 Credits)
Rings, ideals, polynomial rings, unique factorization domains; structure of finite groups; topics from: fields, field extensions, Euclidean constructions, modules over principal ideal domains (canonical forms). **Prerequisites:** C or better in MATH 546.

MATH 548 - Geometry, Algebra, and Algorithms (3 Credits)
Polynomials and affine space, Grobner bases, elimination theory, varieties, and computer algebra systems. **Prerequisites:** C or better in MATH 500 and in one of MATH 344 or MATH 544.

MATH 550 - Vector Analysis (3 Credits)
Vector fields, line and path integrals, orientation and parametrization of lines and surfaces, change of variables and Jacobians, oriented surface integrals, theorems of Green, Gauss, and Stokes; introduction to tensor analysis. **Prerequisites:** C or better in MATH 241.

MATH 551 - Introduction to Differential Geometry (3 Credits)
Parametrized curves, regular curves and surfaces, change of parameters, tangent planes, the differential of a map, the Gauss map, first and second fundamental forms, vector fields, geodesics, and the exponential map. **Prerequisites:** C or better in MATH 241 and MATH 300.

MATH 552 - Applied Complex Variables (3 Credits)
Complex integration, calculus of residues, conformal mapping, Taylor and Laurent Series expansions, applications. **Prerequisites:** C or better in MATH 241.

MATH 554 - Analysis I (3 Credits)
Least upper bound axiom, the real numbers, compactness, sequences, continuity, uniform continuity, differentiation, Riemann integral and fundamental theorem of calculus. **Prerequisites:** C or better in MATH 300 and either at least one of MATH 511, MATH 520, MATH 534, MATH 550, or MATH 552.

MATH 555 - Analysis II (3 Credits)
Riemann-Stieljes integral, infinite series, sequences and series of functions, uniform convergence, Weierstrass approximation theorem, selected topics from Fourier series or Lebesgue integration. **Prerequisites:** C or better in MATH 554.

MATH 556 - Combinatorial Game Theory (3 Credits)
Winning in certain combinatorial games such as Nim, Hackenbush, and Domineering. Equalities and inequalities among games, Sprague-Grundy theory of impartial games, games which are numbers. **Prerequisites:** C or better in MATH 300 or MATH 374.

MATH 557 - Elementary Number Theory (3 Credits)
Divisibility, primes, congruences, quadratic residues, numerical functions. Diophantine equations. **Prerequisites:** C or better in MATH 300.

MATH 558 - Introduction to Cryptography (3 Credits)
Design of secret codes for secure communication, including encryption and integrity verification: ciphers, cryptographic hashing, and public key cryptosystems such as RSA. Mathematical principles underlying encryption. Code-breaking techniques. Cryptographic protocols. **Prerequisites:** C or better in CSCE 145 or MATH 241, and at least one of CSCE 355, MATH 300, or MATH 374. **Cross-listed course:** CSCE 557
Actuarial Mathematics and Statistics Minor

Minor Requirements (18 Hours)

Prerequisites

Course | Title | Credits
---|---|---
MATH 141 | Calculus I | 4
MATH 142 | Calculus II | 4
MATH 241 | Vector Calculus | 3
Total Credit Hours | 11

Core Courses

Course | Title | Credits
---|---|---
MATH 511 | Probability | 3
STAT 512 | Mathematical Statistics | 3
STAT 513 | Theory of Statistical Inference | 3
Select three of the following: | | 9
MATH 344 | Applied Linear Algebra | 3
or MATH 544 Linear Algebra
MATH 514 | Financial Mathematics I | 3
or STAT 522 Financial Mathematics I
MATH 515 | Financial Mathematics II | 3
or STAT 523 Financial Mathematics II
MATH 520 | Ordinary Differential Equations | 3
Total Credit Hours | 18

Mathematical Biology Minor

Minor Requirements (22 Hours)

Prerequisites

Course | Title | Credits
---|---|---
MATH 141 | Calculus I | 4
MATH 142 | Calculus II | 4
MATH 241 | Vector Calculus | 3
Required Math Prerequisites: 1
Total Credit Hours | 22

Required Science Prerequisites: 2

Select two of the following:

Course | Title | Credits
---|---|---
BIOL 101 | Biological Principles I | 4
BIOL 102 | Biological Principles II | 4
MCSI 101 | The Ocean Environment | 3
MCSI 102 | The Living Ocean | 3
Total Credit Hours | 11

Other Requirements:

Select one of the following:

Course | Title | Credits
---|---|---
BIOL 301 | Ecology and Evolution | 3
BIOL 303 | Fundamental Genetics | 3
MCSI 314 | Physical Oceanography | 3
Total Credit Hours | 22

1. Fulfills Carolina Core ARP Requirement
2. Fulfills Carolina Core SCI requirement.

Courses for the Minor (19 Hours)

Minor courses cannot be counted toward student’s major

Linear Algebra (4 Hours)

Course | Title | Credits
---|---|---
MATH 344 | Applied Linear Algebra | 4
or MATH 344L Linear Algebra Lab
MATH 544 | Linear Algebra | 3
or MATH 544L Linear Algebra Lab
Total Credit Hours | 4

Note: Only one of MATH 344/MATH 544 may be counted for the minor.
**Mathematics Minor**

**Minor Requirements**

**Prerequisite Courses (8 Hours)**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

Total Credit Hours: 15

**Total Credit Hours**: 18

---

**Note**

- All courses for a minor must be completed with a C or better.
- At most one of MATH 374 and MATH 574 may be used for minor credit.
- At most one of MATH 344, MATH 526, and MATH 544 may be used for minor credit.
- Most of the math courses at the 500-level have a prerequisite of MATH 300 and/or MATH 344 (or MATH 544, which implicitly assumes completion of 300). Students are therefore strongly urged to include one or both of MATH 300, MATH 344 in their minor program.
- Students with an interest in pure mathematics (algebra, analysis, discrete mathematics, geometry and topology, logic, mathematics education, and number theory) should take MATH 300.
- Students with an interest in applied and computational mathematics (differential equations and modeling, financial mathematics, numerical analysis, optimization) should take MATH 344.
- Prospective minors are urged to consult with an advisor in the Department of Mathematics to plan a coherent program of study.

**Mathematics, B.S.**

Graduates with a B.S. in Mathematics will, if they wish to pursue studies at the graduate level, be prepared with the necessary analytical skills, openness to new ideas, and positive attitudes (patience, persistence, and enthusiasm) for success. Those going on to employment will have the analytical skills that they need, an ability to learn new ones, and habits of mind that are conducive to productive and rewarding work. Graduates will be aware that mathematics is often a collaborative activity, and that careful reading and clear writing are as important as computational skills. They will know that mathematics is continually growing as research answers old questions and brings forth new ones. Finally, they will find joy in learning, doing, and communicating mathematics to others.

**Learning Outcomes**

- Graduates with a B.S. in Mathematics will demonstrate understanding of logic, set theory, functions, and fundamental methods of mathematical proof.
- Graduates with a B.S. in Mathematics will demonstrate mastery of the fundamental theoretical concepts of linear algebra.
- Graduates with a B.S. in Mathematics will be able to solve problems in linear algebra using standard computational algorithms.
- Graduates with a B.S. in Mathematics will demonstrate mastery of the fundamental concepts and methods of proof in abstract algebra.
- Graduates with a B.S. in Mathematics will demonstrate mastery of the fundamental concepts and methods of proof in real analysis.
- Graduates with a B.S. in Mathematics will, if they wish to pursue studies at the graduate level, be prepared with the necessary analytical skills, openness to new ideas, and positive attitudes (patience, persistence, and enthusiasm) for success. Those going on to employment will have the analytical skills that they need, an ability to learn new ones, and habits of mind that are conducive to productive and rewarding work. Graduates will be aware that mathematics is often a collaborative activity, and that careful reading and clear writing are as important as computational skills. They will know that mathematics is continually growing as research answers old questions and brings forth new ones. Finally, they will find joy in learning, doing, and communicating mathematics to others.
Transfer Requirement

In addition to the minimum University and College of Arts and Sciences requirements, a student seeking to transfer to the mathematics major from another program within the University, or from another accredited college or university, is required to have earned a grade of "B" or higher in at least one of the following courses, or their UofSC equivalent:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 141</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 241</td>
<td>Vector Calculus</td>
<td>3</td>
</tr>
<tr>
<td>MATH 300</td>
<td>Transition to Advanced Math</td>
<td>3</td>
</tr>
</tbody>
</table>

Retention and Other Details

- A grade of C or better is required in each MATH course.
- A student may enroll in each MATH course a maximum of two times. (Enrolled in a course is interpreted to mean that a grade, including W or WF, has been recorded.)
- A student may repeat a maximum of three MATH courses. (Receiving a grade of W is not to be considered a repeat.)

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carolina Core</td>
<td>34-46</td>
</tr>
<tr>
<td>College</td>
<td>15-19</td>
</tr>
<tr>
<td>Program</td>
<td>31-47</td>
</tr>
<tr>
<td>Major</td>
<td>24</td>
</tr>
</tbody>
</table>

Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

must be passed with a grade of C or higher

- MATH 141
- MATH 142

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required for all baccalaureate degrees. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)
Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

College Requirements (15-19 hours)

Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

Analytical Reasoning (6-7 hours)
Must be passed with a grade of C or higher

Total Credit Hours 7

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109 GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
- Three hours of Social Science
- Three hours of Fine Arts or Humanities

Program Requirements (31-47 hours)
Supporting Courses (6 hours)
Must be passed with a grade of C or higher.

Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (7-29 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-
Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**Major Requirements (24 hours)**

*A minimum grade of C is required in all major courses.*

### Major Courses (9 hours)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 544</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>

<td></td>
<td><strong>9</strong></td>
</tr>
</tbody>
</table>

### Major Electives (15 hours)

At least one course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 511</td>
<td>Probability</td>
<td>3</td>
</tr>
<tr>
<td>MATH 520</td>
<td>Ordinary Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 534</td>
<td>Elements of General Topology</td>
<td>3</td>
</tr>
<tr>
<td>MATH 550</td>
<td>Vector Analysis</td>
<td>3</td>
</tr>
<tr>
<td>MATH 552</td>
<td>Applied Complex Variables</td>
<td>3</td>
</tr>
</tbody>
</table>

At least 12 hours of MATH electives numbered 500-599. The choice of the four MATH electives should be made to support the student’s educational goals and career objectives. The courses listed below are available for MATH elective credit. (As MATH 544, MATH 546, and MATH 554 are required of all majors, these are not listed.) Undergraduate students interested in taking 700-level MATH courses as elective credit should consult the Graduate Bulletin.

### Guidelines for Selecting 500-level MATH Electives

#### For Students Considering Graduate Studies in Mathematics

Complete at least one of the two-semester sequences in algebra or analysis:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 546</td>
<td>Algebraic Structures I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 547</td>
<td>Algebraic Structures II</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td><strong>6</strong></td>
</tr>
</tbody>
</table>

#### For Students Considering Careers Teaching at the Secondary Level (Grades 9-12)

Complete the following sequence of courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 531</td>
<td>Foundations of Geometry</td>
<td>3</td>
</tr>
<tr>
<td>MATH 532</td>
<td>Modern Geometry</td>
<td>3</td>
</tr>
<tr>
<td>MATH 574</td>
<td>Discrete Mathematics I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 580</td>
<td>Elementary Number Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

#### As a cognate:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDFI 300</td>
<td>Schools in Communities</td>
<td>3</td>
</tr>
<tr>
<td>EDPY 401</td>
<td>Learners and the Diversity of Learning</td>
<td>3</td>
</tr>
<tr>
<td>EDSE 500</td>
<td>Equity and Community Engagement</td>
<td>3</td>
</tr>
<tr>
<td>EDSE 502</td>
<td>Teachers and Teaching</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credit Hours**

21
Note: With two additional Education courses, students complete a minor in Education. This selection of MATH electives and of the education cognate positions students to complete, after completing a B.S. in Mathematics, a one-year graduate Master of Teaching degree from the College of Education and apply for grades 9-12 mathematics licensure in South Carolina.

For Students Considering Careers in Actuarial Science
Declare a Risk Management and Insurance Minor (p. 338) and complete their MATH electives from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 511</td>
<td>Probability</td>
<td>3</td>
</tr>
<tr>
<td>MATH 520</td>
<td>Ordinary Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 574</td>
<td>Discrete Mathematics I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 524</td>
<td>Nonlinear Optimization</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 570</td>
<td>Discrete Optimization</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 12

Note: Risk Management and Insurance Minor (p. 338) is completed by taking ACCT 225, ECON 221 and ECON 222, and FINA 363, FINA 469, FINA 471, and FINA 475.

To develop a strong basis for success in the initial actuarial examinations (Exam P and Exam FM), and to qualify for the Society of Actuaries’ Validation through Educational Experience (VEE) in Applied Statistics, Economics, and Corporate Finance, students should complete the following collection of 30 semester hours in the Department of Statistics and the Darla Moore School of Business. For detailed information about the VEE program, see http://soa.org.

B.S. with Distinction in Mathematics (39 hours)
Prerequisite
A minimum GPA of 3.60 in upper division (500 and above) major courses, and 3.30 cumulative when the student applies to enter the B.S. with Distinction in Mathematics.

Requirements
The student should apply to enter the B.S. with Distinction in Mathematics track and choose the members of the thesis committee as early as possible, but in all cases at least one year before completion of the degree. The committee will consist of a thesis advisor, who must be a tenure-track faculty member in Mathematics, and one or two other tenure-track or research faculty members in Mathematics or any other department, as approved by the Undergraduate Program Committee. The senior thesis consists of either significant original work or a synthesis of known material beyond the scope of ordinary undergraduate coursework. The student may use their senior thesis to simultaneously fulfill other requirements as well (e.g., Magellan Scholarship, Honors College Thesis, etc.), at the discretion of the thesis advisor.

By the end of the semester in which the student is admitted into the B.S. with Distinction in Mathematics track, a brief research plan must be agreed upon by the thesis committee and the student, and filed in the
Department of Mathematics and College of Arts and Sciences. Before submitting and defending the thesis, the student must have completed three credit hours of MATH 499 under the supervision of the thesis advisor, and at least 12 hours of upper-level (500-599) MATH credit approved by the Undergraduate Director beyond the 24 credit hours of 500-level MATH courses required for the B.S. in Mathematics.

By the end of the student’s last semester, the student must present and defend the senior thesis before the thesis committee. The defense must be announced at least one week in advance and be open to the general public. A certificate attesting to a successful defense, signed by the committee, must be placed on file with both the Department of Mathematics and the College of Arts and Sciences. In addition, prior to graduation the student must have either (a) presented the research at a meeting of a professional society, at Discovery Day at USC, or at a comparable venue; or (b) submitted the work for publication in an undergraduate or professional journal.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Mathematics, B.S.**

**Philosophy**

Department Website (http://www.cas.sc.edu/phil/)

Christopher Tollefsen, Chair

The Department of Philosophy offers the Bachelor of Arts degree program with a major in philosophy.

**Programs**

- Philosophy Minor (p. 190)
- Philosophy, B.A. (p. 190)

**Courses**

PHIL 101 - Special Topics in Philosophy (3 Credits)
Topics selected by the instructor for specialized study. Course content varies and will be announced in the schedule of classes by title.

PHIL 102 - Introduction to Philosophy (3 Credits)
An introduction to the main problems of philosophy and its methods of inquiry, analysis, and criticism. Works of important philosophers will be read. Honors section offered.

PHIL 103 - Special Topics in Ethics and Values (3 Credits)
A study of the moral principles of conduct and the basic concepts underlying these principles, such as good, evil, right, wrong, justice, value, duty, and obligation, as they relate to specific issues or areas of life. May be repeated as content varies by title.

Carolina Core: VSR

PHIL 111 - Introduction to Logic II (3 Credits)
Philosophical foundations of inductive inference, including probability, statistics, and decision theory; application of the methods and results of inductive inference to philosophical problems such as the problem of rationality, epistemology, theory confirmation, social and political philosophy.

Prerequisites: At least one of the following: PSYC 227; SOCY 220; STAT 110, STAT 112, STAT 201, STAT 205, or STAT 206; MGSC 291.

Carolina Core: ARP

PHIL 114 - Introduction to Formal Logic I (3 Credits)
Formal logic, including foundational logical concepts, syntax and semantics of first-order logic; derivations; applications.

Carolina Core: ARP

PHIL 115 - Introduction to Formal Logic II (3 Credits)
 Intermediate topics in predicate logic, including second-order predicate logic; meta-theory, including soundness and completeness; introduction to non-classical logic

Prerequisites: C or higher in PHIL 114 or PHIL 110, or a department-approved equivalent.

Carolina Core: ARP

PHIL 210 - Philosophical Themes in Literature (3 Credits)
Selected philosophical problems as they are presented in imaginative and theoretical literature. Works of fiction and philosophical treatments of issues involved in them will be read and discussed.

PHIL 211 - Contemporary Moral Issues (3 Credits)
Moral issues confronting men and women in contemporary society. Topics will vary but may include discussion of problems related to abortion, drugs, euthanasia, war, social engineering, and punishment of criminals.

Carolina Core: VSR

Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 212 - Images of the Human Person (3 Credits)
Images of the human person in contemporary philosophy, literature, psychology, and religion, and an evaluation of these images as norms for human conduct and social policy. Particular attention may be given to images found in specific philosophical traditions, including existentialism, Marxism, behaviorism, and mysticism.

PHIL 213 - Communicating Moral Issues (3 Credits)
Moral issues confronting men and women in contemporary society and the challenges of communicating effectively about them. Topics will vary but may include access to health care, euthanasia, abortion, same sex marriage and the moral and environmental consequences of eating animals.

Cross-listed course: SPCH 213

Carolina Core: CMS, VSR

PHIL 214 - Science and Pseudo-Science (3 Credits)
Attempts to distinguish science from pseudo-science; inquiry into such cases as astrology, psychoanalysis, and parapsychology.

Graduation with Leadership Distinction: GLD: Research

PHIL 301 - Ancient Philosophy (3 Credits)
An introduction to the work of ancient philosophers, with special emphasis on Plato and Aristotle.

Cross-listed course: CLAS 301
PHIL 302 - Greek and Roman Philosophy after Aristotle (3 Credits)
Problems such as hedonism, providence, belief and evidence, and mysticism, as they appear in the writings of Epicureans, Stoics, Sceptics, and Plotinus.
Cross-listed course: CLAS 302

PHIL 303 - History of Medieval Philosophy (3 Credits)
Major philosophical traditions in the Middle Ages.

PHIL 304 - Seventeenth and Eighteenth-Century Philosophy (3 Credits)
An introduction to Continental and British philosophy running roughly from Descartes through Kant.

PHIL 305 - Nineteenth and Twentieth-Century Philosophy (3 Credits)
An introduction to Continental and British philosophy since Kant through study of the works of representative philosophers. Particular emphasis is placed on the development of Idealism, Marxism, Existentialism and Phenomenology, and analytic philosophy.

PHIL 310 - American Philosophy (3 Credits)
The principal movements of philosophical thought from Colonial times to the present, with special emphasis on the 19th and 20th centuries.

PHIL 311 - Existentialism (3 Credits)
An introduction to existentialist themes in contemporary philosophy, literature, psychology, and religion. The writings of existentialists such as Kierkegaard, Nietzsche, Camus, Sartre, Buber, May, and Binswanger will be read and discussed.

PHIL 312 - Classical Origins of Western Medical Ethics (3 Credits)
Examination of ancient Greek and Roman philosophical, medical, and literary works (in English) as sources for the origins of medical ethics. Priority enrollment for Medical Humanities students.
Cross-listed course: CLAS 360

PHIL 313 - Between Magic and Method: Ancient Medicine (3 Credits)
Introduction to ancient medicine: science and art, theory and practice, healing and predicting. Topics include: Medicine before Hippocrates, Hippocratic medicine, holism, naturalism, medicine, religion and magic, medicine and scientific explanation, Hellenistic medicine and methodology, Galenic medicine.
Cross-listed course: CLAS 361

PHIL 315 - Asian Religious Philosophy (3 Credits)
A historical overview and critical introduction to the philosophical practices of Asian religions; an examination of the basic worldviews, thought frameworks, and foundational questions of the main schools of premodern Asian religious philosophy.
Cross-listed course: RELG 334

PHIL 320 - Ethics (3 Credits)
A study of the moral principles of conduct and the basic concepts underlying these principles, such as good, evil, right, wrong, justice, value, duty, and obligation. The ethical works of influential philosophers are analyzed in terms of these concepts.
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 321 - Medical Ethics (3 Credits)
The concepts of Person and Justice as they relate to biomedical sciences and technologies.
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 322 - Environmental Ethics (3 Credits)
Examination of principles and arguments surrounding moral issues involving the environment.
Cross-listed course: ENVR 322
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

PHIL 323 - Ethics of Science and Technology (3 Credits)
Role of ethical judgments in directing or curtailing scientific research; case studies from natural and social sciences.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 324 - Business Ethics (3 Credits)
Ethical problems in business; application to business situations of philosophical theories of individual, corporate, and governmental rights and responsibilities.
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 325 - Engineering Ethics (3 Credits)
An investigation of ethical issues in engineering and engineering-related technology. Topics include whistleblowing, employee/employer relations, environmental issues, issues related to advances in information technology, and privacy.
Carolina Core: CMS, VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 329 - Law and Religion (3 Credits)
An examination and critical assessment of the philosophical concepts, issues, and questions surrounding the relationship of church and state.

PHIL 330 - Social and Political Philosophy (3 Credits)
An overview of major themes in political philosophy such as the nature of politics, obligation, community, representation, freedom, equality, and justice.
Cross-listed course: POLI 300
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 331 - Crime and Justice (3 Credits)
The fundamental concepts of a criminal justice system and their philosophical bases. Rights, privacy, responsibility, and the problem of justification of state control of private behavior through punishment and therapy.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PHIL 332 - Philosophy of Education (3 Credits)
A critical examination of the theories of education of such philosophers as Plato, Rousseau, Dewey, Newman, and Whitehead. Emphasis is on the development of a philosophy of higher education.

PHIL 333 - Contemporary Marxism and Society (3 Credits)
Recent Marxist-inspired critiques of politics, science, technology, art, advertising, and other aspects of cultural life, with comparison both to Marx's philosophical and economic writings and to other types of contemporary criticisms.
PHIL 334 - Feminist Philosophy (3 Credits)
Introduces feminist philosophy and applications to philosophical problems.
Cross-listed course: WGST 334
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 335 - Disobedience, Dissent, and Revolution (3 Credits)
This course explores central philosophical issues related to resisting and opposing claimed state authority. Focus will be on classic and modern texts regarding the intentional, ethically-, or politically-motivated violation of law and on the justification of revolution.
Carolina Core: VSR

PHIL 340 - Philosophy of Art (3 Credits)
Philosophical problems relating to the arts, with emphasis on questions pertaining to aesthetic experience.

PHIL 341 - Philosophy and Film (3 Credits)
Selected philosophical problems as they are presented in feature and documentary films.

PHIL 350 - Knowledge and Reality (3 Credits)
Examination of skeptical attacks, critical defenses, and philosophical theories of what we know and what is to be taken as ultimate reality.

PHIL 351 - Mind and Nature (3 Credits)
Philosophical theories about the nature of consciousness, the problem of qualia, phenomenal concepts, the explanatory gap hypothesis, higher-order consciousness, prospects for naturalistic accounts of consciousness.

PHIL 352 - Freedom and Human Action (3 Credits)
The principal movements of philosophical thought from Colonial times to the present, with special emphasis on the 19th and 20th centuries.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PHIL 360 - History and Philosophy of Science (3 Credits)
Philosophy and history of science and their interaction from ancient Greece to the present. Emphasis on physics, astronomy, and chemistry.

PHIL 362 - Philosophy of Research Design in Science and Medicine (3 Credits)
A philosophical investigation of research methods used in science and medicine from systematic reviewing and randomized controlled trials to theories of sampling and causal inference.

PHIL 365 - Formal Theories of Rationality and Their Philosophical Implications (3 Credits)
Formal theories of rationality in the context of decision-making and games; uses of these formal theories to address traditional philosophical issues such as rationality, knowledge, choice, social welfare, cooperation, and communication.
Prerequisites: C or higher in any course that satisfies the ARP Carolina Core requirement.

PHIL 370 - Special Topics in Philosophy (3 Credits)
Topics selected by the instructor for specialized study. Course content varies and will be announced in the schedule of classes by title.

PHIL 390 - Junior Seminar in Philosophy (3 Credits)
Overview of philosophical theories and debates with attention to skills in discussion and presentation and in preparing and writing a research paper in philosophy. Topics selected by the instructor.
Graduation with Leadership Distinction: GLD: Research

PHIL 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

PHIL 473 - Film Theory (3 Credits)
Theory and criticism of film and media from the 1910s to the present. Considers a range of critical approaches to analyzing what different forms of audio-visual media do to and for the audiences they address and the worlds they depict. 03: 07/05/2019.
Prerequisites: FILM 240.

PHIL 490 - Senior Seminar in Philosophy (3 Credits)
Review of central topics in philosophy serving as a capstone course for senior majors in philosophy.
Graduation with Leadership Distinction: GLD: Research
Experiential Learning: Experiential Learning Opportunity

PHIL 495 - Senior Thesis (3 Credits)
Directed research resulting in a written thesis. Senior philosophy major or double major, GPA of 3.30, permission of faculty member.
Graduation with Leadership Distinction: GLD: Research

PHIL 501 - British Empiricism (3 Credits)
A historical and critical survey of the British philosophers of experience. Principal concentration is on Locke, Berkeley, and Hume.
Prerequisites: C or better in PHIL 304.

PHIL 502 - Continental Rationalism (3 Credits)
A critical and historical study of the 17th-century European philosophers. The works of Descartes, Spinoza, and Leibniz are emphasized.
Prerequisites: C or better in PHIL 304.

PHIL 503 - Analytic Philosophy (3 Credits)
A critical study of recent and contemporary works in philosophical analysis, and an evaluation of the purposes, methods, and results of this movement.
Prerequisites: C or better on 3 hours in philosophy beyond the 100 level.

PHIL 504 - Phenomenology and Existentialism (3 Credits)
A critical study of some fundamental themes in phenomenology and the philosophy of existence. Emphasis is placed on an intensive study of selected works of such writers as Kierkegaard, Jaspers, Husserl, and Heidegger.
Prerequisites: C or better in PHIL 304 or PHIL 305.

PHIL 505 - Plato (3 Credits)
An intensive study of selected Dialogues by Plato.
Prerequisites: C or better in PHIL 301.

PHIL 506 - Aristotle (3 Credits)
An intensive study of some of the more important of Aristotle's works.
Prerequisites: C or better in PHIL 301.

PHIL 507 - Medieval Philosophy (3 Credits)
A historical and critical study of the works of the leading medieval philosophers.
Prerequisites: C or better in PHIL 303.

PHIL 508 - Hume (3 Credits)
An intensive study of the philosophical writings of Hume, especially A Treatise of Human Nature.
Prerequisites: C or better in PHIL 304.
PHIL 509 - Kant (3 Credits)
An intensive study of the work of Kant, especially the Critique of Pure Reason.
Prerequisites: C or better in PHIL 304.

PHIL 510 - Theory of Knowledge (3 Credits)
An examination of some representative theories of truth, meaning, probability, and perception.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 511 - Symbolic Logic (3 Credits)
A presentation and philosophical examination of the fundamentals of modern symbolic logic.
Prerequisites: C or better in PHIL 115.

PHIL 512 - Philosophy of Science (3 Credits)
A critical examination of methods and concepts of the sciences. Topics include scientific revolutions, the unity of science, experimentation, explanation, and evidence.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 513 - Philosophy of History (3 Credits)
A philosophical examination of historical inquiry. Theories of historical development. The logical problems of historical explanation.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 514 - Ethical Theory (3 Credits)
Survey of recent and historical developments in ethical theory with special emphasis on the meaning of ethical language and the forms of reasoning employed in discussing moral values.
Prerequisites: C or better in PHIL 320.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 515 - Philosophy of Religion (3 Credits)
A critical study of selected problems in the philosophy of religion. Emphasis is placed on problems relating to the existence of God, religious knowledge, and the language of religion.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 516 - Advanced Aesthetics (3 Credits)
Detailed examination of the literature on aesthetics.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 517 - Philosophy of Language (3 Credits)
An examination of concepts and problems such as meaning, reference, analyticity, definition, and the relation between logic and philosophy.
Prerequisites: C or higher in PHIL 114 or PHIL 511.

Cross-listed course: LING 565

PHIL 518 - Philosophy of the Social Sciences (3 Credits)
The goals of inquiry and problems such as objectivity, reduction, value freedom, and ideology.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 519 - Metaphysics (3 Credits)
Major issues in classical and modern metaphysics. Topics include the idea of first philosophy, being, substance, the problem of universals, essentialism, causation, time and space, and metaphysical method.
Prerequisites: C or better in PHIL 350 or PHIL 351 or PHIL 360.

PHIL 520 - Philosophy of Mind (3 Credits)
The concept of mind, the mind-body problem, emotions and cognition, the possibility of artificial minds, theories of embodied cognition.
Prerequisites: C or better in PHIL 350 or PHIL 351 or PHIL 360.

PHIL 521 - Mathematical Logic (3 Credits)
Axiomatic development of logic and the set-theoretic foundations of mathematics.
Prerequisites: C or better in PHIL 511.

PHIL 522 - Introduction to Semantics (3 Credits)
Introduction to the study of linguistic meaning, including the following topics: meaning, reference, and truth; the connections among language, thought, and reality; word meaning and sentence meaning; possible worlds and modality; thematic roles; meaning and context; presupposition and implicature; speech acts; formal semantics; and cognitive semantics.
Prerequisites: C or better in any of LING 300, LING 301, LING 600, PHIL 114, PHIL 511.

PHIL 523 - Advanced Topics in Logic (3 Credits)
Philosophical problems about logic, the development of philosophical logics, and the problems surrounding them.
Prerequisites: C or better in PHIL 511.

PHIL 524 - Philosophy of Biology (3 Credits)
Examination of major conceptual, theoretical, and methodological issues in biological science. Topics include reductionism, units of selection, adaptationism, relations between evolutionary and developmental biology and between biology and society.
Prerequisites: C or better in 3 hours of Philosophy beyond the 100 level.

PHIL 526 - Hellenistic Philosophy (3 Credits)
Survey of the major schools and trends in Hellenistic philosophy: Epicureans, Stoics, Academic Skeptics. Topics include eudaimonism, hedonism, monism, teleology, and the criterion of truth.
Prerequisites: C or better in PHIL 301 or PHIL 302.

PHIL 527 - Virtues, Acts, and Consequences (3 Credits)
Recent contributions to three central strands of ethical theory: virtue theory, deontological, and utilitarianism; historical roots and recent developments.
Prerequisites: C or better in PHIL 320.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 528 - Concepts of Evidence (3 Credits)
Systematic approaches to data analysis--Bayesian, Fisherian and decision theoretic--will be critically appraised. Applications of these theories to some problems of inductive logic: the paradoxes of confirmation, the role of simplicity, and the probability of inductive generalizations.
Prerequisites: C or better in PHIL 350 or PHIL 351 or PHIL 360.
PHIL 532 - Social Justice (3 Credits)
Recent theories of distributive justice and their application to such issues as redistribution of wealth, reverse discrimination, and the conflict between liberty and equality. Authors include Rawls, Nozick, Hayek, and Popper.
Prerequisites: C or better in PHIL 320 or PHIL 321 or PHIL 322 or PHIL 330 or PHIL 331.

Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Global Learning

PHIL 534 - Contemporary European Social Philosophy (3 Credits)
An examination of European social philosophy associated with either the Frankfurt School of Social Research or contemporary French Poststructuralism.
Prerequisites: C or better in 3 hours in philosophy beyond the 100 level.

PHIL 535 - Ecofeminism (3 Credits)
An exploration of the connections between oppression of women and oppression of nature.
Prerequisites: 3 hours in philosophy beyond the 100 level.

Cross-listed course: WGST 535

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 536 - Language and Interpretation in Contemporary European Philosophy (3 Credits)
Selected contemporary European philosophical movements, their views on language, and their approach to interpretation: hermeneutics, structuralism, poststructuralism.
Prerequisites: C or better in PHIL 114.

PHIL 540 - Renaissance Philosophy (3 Credits)
Humanism (e.g., Petrarca), Platonism (e.g., Pico and Ficino), Aristotelianism (e.g., Pomponazzi), philosophies of nature (e.g., Telesio, Campanella, and Bruno), and Nicholas of Cusa, Erasmus, Montaigne, and Suarez.
Prerequisites: C or better in PHIL 301 or PHIL 302 or PHIL 303.

PHIL 550 - Health Care Ethics (3 Credits)
An exploration of the ethical dimensions of patient care in the clinical setting.
Prerequisites: C or better in PHIL 320 or PHIL 321 or PHIL 322 or PHIL 330 or PHIL 331.

PHIL 598 - Readings in Philosophy (3 Credits)
Prerequisite: 6 hours in philosophy beyond the 100 level.

Philosophy Minor

Minor Requirements
Prerequisite Course (3 Hours)
- PHIL 114 (May be used to satisfy a portion of the General Education Requirement)

Required Courses (18 Hours)
Eighteen hours of courses at the 200-level or above.

The six courses composing the minor should, to the greatest extent possible, have some common theme. For instance, it is possible for students to choose courses emphasizing the following general areas in philosophy:
- History of Philosophy
- Ethics, Aesthetics and Value Theory (including social and political philosophy)
- Logic, Epistemology, and Metaphysics (including the philosophy of science)

Students in the College of Arts and Sciences, Liberal Arts division should be aware of the fact that they need to take an additional course in philosophy (other than the courses that are being used for the Philosophy minor or PHIL 114 or PHIL 111) to satisfy the Philosophical Reasoning portion of the College's General Education Requirements. PHIL 102 may be used for this purpose. Students who may desire to do graduate work in Philosophy are advised to take more than one course at the 500 level.

Courses must have the approval of the student's advisor and an advisor in the Philosophy Department. The approval of the Philosophy advisor may come at any stage of the program.

Philosophy, B.A.

Learning Outcomes
- Students will demonstrate knowledge of the history and most important disciplines of philosophy.
- Students will read philosophical texts knowledgeably and critically.
- Students will recognize philosophical questions and grasp philosophical arguments.
- Students will engage in philosophical discussion and will be capable of presenting philosophical ideas in class.
- Students will write philosophical papers that require research, interpretation and argument.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-7 hours)

- PHIL 114
- Any CC-ARP course (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course. The foreign languages recommended for students majoring in philosophy are French, German, Greek, and Latin.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1. Carolina Core Stand Alone or Overlay Eligible Requirements

Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement.

Accordingly, please select one of the following:

- One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

3. Program Requirements (34-49 hours)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).
For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (16-37 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: 13-34 hours of electives will be needed to reach hours to graduate and Program Requirements will range from 31-46 hours, if completing the B.A. with Distinction in Philosophy.

4. Major Requirements (24 hours)
A minimum grade of C is required in all major courses.

</tbody>
</table>

Total Credit Hours 15

Major Electives (9 hours)
• Two courses in Philosophy at the 500-level
• One course in Philosophy numbered 201 or above

Notes: Students majoring in philosophy are encouraged to take PHIL 390 during the junior year, or before the final 30 hours of study.

If PHIL 390 is used to satisfy both the Junior Seminar in Philosophy and Field of Philosophy requirements, then the student must take an additional course numbered 201 or above in order to reach the required 24 hours for the major.

B.A. with Distinction (27 hours)
The Departmental Undergraduate Research Track is available to students majoring in philosophy who wish to participate in significant research activities in collaboration with, or under the supervision of, a faculty mentor.

In addition to the General Major Requirements, students must complete the following:
• PHIL 495
• A minimum GPA of 3.50 in the major
• A minimum cumulative GPA of 3.30
Physics and Astronomy

Department Website (http://www.physics.sc.edu/)

Ralf Gothe, Chair

The undergraduate program in physics is designed to provide a fundamental understanding of both experimental and theoretical physics. All of the majors provide a strong basis for graduate study in physics. The applied major is designed for students seeking employment by industrial or governmental laboratories upon completing their B.S. By a suitable choice of electives students will also be prepared for graduate study in the other sciences, mathematics, medicine, or engineering or to enter the University's special teacher education program that leads to a master's degree and teacher certification.

Programs

• Astronomy Minor (p. 196)
• Physics Minor (p. 196)
• Physics, B.S. (p. 196)

Courses

ASTR 101 - Introduction to Astronomy (4 Credits)
An introduction to the solar system and universe accomplished with interactive lectures, demonstrations, and laboratory experience. Designed primarily for the non-science major.
Carolina Core: SCI

ASTR 201 - Introduction to Astronomy II: The Dark Universe (3 Credits)
Astronomical topics including stellar death, black holes, dark matter, dark energy and cosmology. Astronomical techniques and application of the scientific method in astronomy.
Prerequisites: ASTR 101 or SCHC 115.
Carolina Core: SCI

ASTR 202 - Introduction to Radio Astronomy (4 Credits)
Nature of the sun, planets; galactic and extragalactic sources at radio wavelengths; quasars; techniques, detectors, and telescopes.
Prerequisites: ASTR 211, MATH 115 or equivalent, and PHYS 202, PHYS 212.

ASTR 320 - Introduction to Relativistic Astrophysics (3 Credits)
Final states of stellar evolution; white dwarfs, neutron stars, black holes. Cosmology.
Prerequisites: ASTR 211, MATH 115 or equivalent, and PHYS 202, PHYS 212.

Cross-listed course: PHYS 340

ASTR 499 - Undergraduate Research (3 Credits)
Introduction to and application of the methods of research. A written report on work accomplished is required at the end of each semester.
Graduation with Leadership Distinction: GLD: Research

ASTR 533 - Advanced Observational Astronomy (1-3 Credits)
Development of a combination of observational techniques and facility at reduction of data. A maximum of eight hours per week of observation, data reduction, and consultation. Offered each semester by arrangement with the department.

ASTR 534 - Advanced Observational Astronomy (1-3 Credits)
A continuation of ASTR 533. Up to eight hours per week of observation, data reduction, and consultation.

ASTR 599 - Topics in Astronomy (1-3 Credits)
Readings and research on selected topics in astronomy. Course content varies and will be announced in the schedule of classes by title.

PHYS 101 - The Physics of How Things Work I (3 Credits)
A practical introduction to physics and science in everyday life—from concrete examples to basic physical principles.
Carolina Core: SCI

PHYS 101L - The Physics of How Things Work I Lab (1 Credit)
Experiments, exercises, and demonstrations to accompany PHYS 101.
Prerequisite or Corequisite: PHYS 101.

Carolina Core: SCI

PHYS 102 - The Physics of How Things Work II (3 Credits)
A continuation of PHYS 101 with emphasis on electricity, magnetism, optics, and atomic physics.
Prerequisites: PHYS 101.

PHYS 102L - The Physics of How Things Work II Lab (1 Credit)
Experiments, exercises, and demonstrations to accompany PHYS 102.
Prerequisite or Corequisite: PHYS 102.

PHYS 151 - Physics in the Arts (3 Credits)
The physics of sound, color, illumination; musical instruments and photographic processes. Credit may not be received for both PHYS 151 and PHYS 153 or both PHYS 151 and PHYS 155.

PHYS 151L - Physics in the Arts Laboratory (1 Credit)
Laboratory work on wave motion, including acoustic, optical, photographic, and electronic measurements. Credit may not be received for both PHYS 151L and PHYS 153L or both PHYS 151L and PHYS 155L.
Prerequisite or Corequisite: PHYS 151.

PHYS 153 - Physics in the Visual Arts (3 Credits)
Principals of optics: video, and photography, eye and vision, color, polarization, lasers, and holography. Credit may not be received for both PHYS 153 and PHYS 151.
PHYS 153L - Physics in the Visual Arts Laboratory (1 Credit)
Laboratory work in geometrical and wave optics. Credit may not be received for both PHYS 153L and PHYS 151L.
**Prerequisite or Corequisite:** PHYS 153.

PHYS 155 - Musical Acoustics (3 Credits)
The principles of musical and architectural acoustics, waves and vibrations, digital techniques for generating and recording sound, perception and measure of sound (psychoacoustics). Credit may not be received for both PHYS 155 and PHYS 151.

PHYS 155L - Acoustics Laboratory (1 Credit)
Laboratory work in musical and architectural acoustics. Credit may not be received for both PHYS 155L and PHYS 151L.
**Prerequisite or Corequisite:** PHYS 155.

PHYS 180 - Physics Concepts, Calculations, and Context (1 Credit)
Problem solving techniques and mathematical language using key concepts in introductory physics.
**Corequisite:** PHYS 201 or PHYS 202.

PHYS 199 - Measurement and Analysis in Physics (2 Credits)
Measurements in classical and modern physics are performed, and the analyzed results are compared with basic principles. Four hours of mixed lecture and laboratory per week.
**Prerequisites:** C or better in MATH 115 or equivalent or higher.

PHYS 201 - General Physics I (3 Credits)
First part of an introductory course sequence. Topics include mechanics, and selections from wave motion, sound, fluids, and heat. No previous background in physics is assumed.
**Prerequisites:** C or better in MATH 111 or equivalent or higher.

PHYS 201L - General Physics Laboratory I (1 Credit)
**Prerequisite or Corequisite:** PHYS 201.

**Carolina Core:** SCI

PHYS 202 - General Physics II (3 Credits)
Continuation of PHYS 201; includes electromagnetism, relativity, quantum physics, atomic and nuclear physics.
**Prerequisites:** C or better in PHYS 201.

**Carolina Core:** SCI

PHYS 202L - General Physics Laboratory II (1 Credit)
**Prerequisite or Corequisite:** PHYS 202.

**Carolina Core:** SCI

PHYS 211 - Essentials of Physics I (3 Credits)
Classical mechanics and wave motion. Calculus-level course for students of science and engineering.
**Prerequisites:** C or better in MATH 141.
**Corequisite:** PHYS 211L.

**Carolina Core:** SCI

PHYS 211L - Essentials of Physics I Lab (1 Credit)
**Prerequisite or Corequisite:** PHYS 206 or PHYS 211.

**Carolina Core:** SCI

PHYS 212 - Essentials of Physics II (3 Credits)
Classical electromagnetism and optics.
**Prerequisites:** C or better in PHYS 211 and MATH 142.

**Corequisite:** PHYS 212L.

**Carolina Core:** SCI

PHYS 212L - Essentials of Physics II Lab (1 Credit)
**Prerequisite or Corequisite:** PHYS 207 or PHYS 212.

**Carolina Core:** SCI

PHYS 291 - Einstein's Relativity: Understanding by Example (3 Credits)
Special theory of relativity. Algebra-based course for students of all majors.
**Prerequisites:** B or better in MATH 115 or equivalent.

PHYS 306 - Principles of Physics III (3 Credits)
Wave motion, optics, and thermodynamics. Calculus-level treatment; a continuation of PHYS 207 and PHYS 212.
**Prerequisites:** C or better in PHYS 207 or PHYS 212 and MATH 142.

**Corequisite:** MATH 241.

PHYS 307 - Introduction to Modern Physics (3 Credits)
Experimental foundations and general concepts of quantum theory and special relativity; with selected applications from atomic, condensed matter, and nuclear physics.
**Prerequisites:** C or better in PHYS 212 and MATH 241.

PHYS 308 - Classic Experiments in Physics I (2 Credits)
A laboratory course in the performance and analysis of experiments which have contributed to an understanding of basic concepts. One lecture/recitation and one three-hour laboratory period each week.
**Prerequisites:** PHYS 202, PHYS 207, or PHYS 212.

PHYS 309 - Classic Experiments in Physics II (2 Credits)
Further experiments which have contributed to an understanding of basic concepts. One lecture/recitation and one three-hour laboratory period each week.
**Prerequisites:** PHYS 308.

PHYS 310 - Intermediate Experimental Physics (4 Credits)
Descriptive statistics, scientific ethics, and design, construction, and reporting the results of experiments.
**Prerequisites:** C or better in PHYS 212.

PHYS 311 - Introduction to Applied Numerical Methods (3 Credits)
Introduction and application of linear algebra and numerical methods to the solution of physical and engineering problems. Techniques include iterative solution techniques, methods of solving systems of equations, and numerical integration and differentiation.
**Prerequisites:** MATH 141.

**Corequisite:** MATH 142.

**Cross-listed course:** EMCH 201, ENCP 201
PHYS 340 - Introduction to Relativistic Astrophysics (3 Credits)
Final states of stellar evolution; white dwarfs, neutron stars, black holes. Cosmology.
Prerequisites: ASTR 211, MATH 115 or equivalent, and PHYS 202, PHYS 207, or PHYS 212.

PHYS 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

PHYS 498 - Senior Thesis (3 Credits)
An individual investigation in the library or laboratory or both under supervision of the major professor. The preparation of a scientific report is an integral part of the work.
Graduation with Leadership Distinction: GLD: Research

PHYS 499 - Undergraduate Research (3 Credits)
Introduction to and application of the methods of research. A written report on work accomplished is required at the end of each semester.
Prerequisites: PHYS 308 and PHYS 309.

PHYS 501 - Quantum Physics I (3 Credits)
A self-contained treatment of quantum theory and its applications, beginning with the Schrodinger equation.
Prerequisites: C or better in PHYS 307 and MATH 242.

PHYS 502 - Quantum Physics II (3 Credits)
Advanced topics in quantum physics, plus topics in special relativity, high-energy physics, and cosmology.
Prerequisites: C or better in PHYS 501.

PHYS 503 - Mechanics (4 Credits)
Classical mechanics of particles, systems, and rigid bodies; discussion and application of Lagrange's equations, introduction to Hamiltonian formulation of mechanics.
Prerequisites: PHYS 206 or PHYS 211, MATH 242 or MATH 520.

PHYS 504 - Electromagnetic Theory (4 Credits)
Field theory of electric and magnetic phenomena; Maxwell's equations applied to problems in electromagnetism and radiation.
Prerequisites: C or better in PHYS 503.

PHYS 506 - Thermal Physics and Statistical Mechanics (3 Credits)
Principles of equilibrium thermodynamics, kinetic theory, and introductory statistical mechanics.
Prerequisites: C or better in PHYS 306.

PHYS 509 - Solid State Electronics (4 Credits)
Topics include: basic electrical circuits; electronic processes in solids; operation and application of individual solid state devices and integrated circuits. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 207 or PHYS 212.

PHYS 510 - Digital Electronics (3 Credits)
Basic operation of digital integrated circuits including microprocessors. Laboratory application of microcomputers to physical measurements.
Prerequisites: C or better in PHYS 509.

PHYS 511 - Nuclear Physics (4 Credits)
An elementary treatment of nuclear structure, radioactivity, and nuclear reactions. Three lecture and three laboratory hours per week.
Prerequisites: C or better in PHYS 501.

PHYS 512 - Solid State Physics (4 Credits)
Crystal structure; lattice dynamics; thermal, dielectric, and magnetic properties of solids. Free electron model of metals. Band structure of solids, semi-conductor physics. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 502.

PHYS 514 - Optics, Theory, and Applications (4 Credits)
Geometrical and physical optics; wave nature of light, lenses and optical instruments, interferometers, gratings, thin films, polarization, coherence, spatial filters, and holography. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 306.

PHYS 515 - Mathematical Physics I (3 Credits)
Analytical function theory including complex analysis, theory of residues, and saddlepoint method; Hilbert space, Fourier series; elements of distribution theory; vector and tensor analysis with tensor notation.
Prerequisites: MATH 242.

PHYS 516 - Mathematical Physics II (3 Credits)
Group theory, linear second-order differential equations and the properties of the transcendental functions; orthogonal expansions; integral equations; Fourier transformations.
Prerequisites: PHYS 515.

PHYS 517 - Computational Physics (3 Credits)
Application of numerical methods to a wide variety of problems in modern physics including classical mechanics and chaos theory, Monte Carlo simulation of random processes, quantum mechanics and electrodynamics.
Prerequisites: C or better in PHYS 212 and MATH 142.

PHYS 521 - Biophysics (4 Credits)
Principles of physics applied to living systems: diffusion, friction, low Reynolds-number world, entropy, free energy, entropic/chemical forces, self-assembly, molecular machines, membranes.
Prerequisites: MATH 142, PHYS 212, CHEM 112, BIOL 102.

PHYS 531 - Advanced Physics Laboratory I (1-3 Credits)
A laboratory program designed to develop a combination of experimental technique and application of the principles acquired in formal course work. A maximum of eight hours per week of laboratory and consultation.

PHYS 532 - Advanced Physics Laboratory II (1-3 Credits)
A continuation of PHYS 531. Up to eight hours per week of laboratory and consultation.

PHYS 541 - Advanced Experimental Physics I (4 Credits)
Continuation of PHYS 310. Optical apparatus (telescope, microscope, interferometer) and advanced project planning including equipment design and budgeting.
Prerequisites: C or better in PHYS 310.

PHYS 542 - Advanced Experimental Physics II (4 Credits)
Continuation of PHYS 541. Study of topics from Advanced Optics, Astronomy, Biophysics, Digital Electronics, Nuclear/Particle Physics, or Solid State Physics, plus conduction of a physics experiment, including a written paper and an oral presentation.
Prerequisites: C or better in PHYS 541.

Total Credit Hours 14

**Additional Courses**

- Three or more credits in Physics courses numbered 311 or higher.

**Physics, B.S.**

**Learning Outcomes**

- Students will demonstrate an understanding of the physical phenomena and the use of scientific methods and theories.
- Students will demonstrate their ability to communicate effectively through written reports, which exhibit their ability to comprehend, analyze, and interrogate critically.
- Students will demonstrate their ability to communicate effectively through oral presentations, which exhibit their ability to comprehend, analyze, interrogate critically and present their work to others.
- Students will demonstrate effective use of computers and other technology.

**Transfer Requirements**

In addition to the minimum University and College of Arts and Sciences requirements, a student seeking to transfer to the physics major from another program within the University, or from another accredited college or university, is required to have earned a grade of “C” or higher in MATH 141.

Note: An AP or IB exam score that provides credit for MATH 141 also satisfies this requirement.

**Admissions**

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary...
Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

</table>

1. **Carolina Core Requirements (33-45 hours)**

**Effective, Engaged, and Persuasive Communication: Written** — CMW (6 hours)

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

**ARP – Analytical Reasoning and Problem Solving (8 hours)**

*must be passed with a grade of C or higher*

- MATH 141
- MATH 142

**SCI – Scientific Literacy (7 hours)**

*must be passed with a grade of C or higher*

- CHEM 111 & CHEM 111L
- PHYS 211

**GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)**

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

*It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.*

**GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)**

- any CC-GHS course (p. 742)

**GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)**

- any CC-GSS course (p. 742)

**AIU – Aesthetic and Interpretive Understanding (3 hours)**

- any CC-AIU course (p. 742)

**CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)**

- any overlay or stand-alone CC-CMS course (p. 742)

**INF – Information Literacy 1 (0-3 hours)**

- any overlay or stand-alone CC-INF course (p. 742)

**VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)**

- any overlay or stand-alone CC-VSR course (p. 742)

*Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.*

2. **College Requirements (16-19 hours)**

**Foreign Language (0-3 hours)**

- only if needed to meet 122-level proficiency

**Analytical Reasoning (7 hours)**

*must be passed with a grade of C or higher*

7

**History (3 hours)**

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214 or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

*or*

- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

**Social Science and Fine Arts or Humanities (6 hours)**

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
3. Program Requirements (24-39 hours)

Supporting Courses (24 hours)

*Three hours of Social Science*

*Three hours of Fine Arts or Humanities*

### 3. Program Requirements (24-39 hours)

#### Supporting Courses (24 hours)

must be passed with a grade of C or higher

Total Credit Hours 24

### Cognate

The required mathematics courses satisfy the cognate requirement.

#### Electives (0-15 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (32-54 hours)

A minimum grade of C is required in all major courses.

#### Major Courses (32 hours)

Total Credit Hours 32

#### Engineering Physics Concentration (52-54 hours)

optional

In order to select the Engineering Physics Concentration a student must have achieved a minimum overall GPA of 2.5 with at least 15 hours taken at USC-Columbia. In addition, the student must have passed MATH 141 with a grade of "C" or higher. (An AP or IB exam score that provides credit for MATH 141 also satisfies this requirement.)

Select either the Electrical or Mechanical Option.

#### Electrical Option (52-53 hours)

**Political Science**

Department Website (http://www.cas.sc.edu/poli/)

Todd Shaw, Chair

The department offers the Bachelor of Arts degree with majors in political science and international studies. Students can pursue either a general or intensive major in either political science or international studies.

**Programs**

- International Studies Minor (p. 204)
- International Studies, B.A. (p. 204)
- Leadership Studies Minor (p. 207)
- Political Science Minor (p. 209)
- Political Science, B.A. (p. 210)

**Courses**

**POLI 101 - Introduction to Global Politics (3 Credits)**
Introduction to theories about global politics. Issues and controversies central to global politics.

*Carolina Core:* GSS

*Graduation with Leadership Distinction:* GLD: Global Learning

**POLI 103A - Controversies in the Politics of Global Regions: Africa (3 Credits)**
Social, cultural, and historical forces underlying contemporary political controversies in Africa POLI 103A, Asia POLI 103B, Europe POLI 103C, Latin America POLI 103D, and the Middle East POLI 103E; region will be identified by title.

*Graduation with Leadership Distinction:* GLD: Global Learning

**POLI 103B - Controversies in the Politics of Global Regions: Asia (3 Credits)**
Social, cultural, and historical forces underlying contemporary political controversies in Africa POLI 103A, Asia POLI 103B, Europe POLI 103C, Latin America POLI 103D, and the Middle East POLI 103E; region will be identified by title.

*Graduation with Leadership Distinction:* GLD: Global Learning

**POLI 103C - Controversies in the Politics of Global Regions: Europe (3 Credits)**
Social, cultural, and historical forces underlying contemporary political controversies in Africa POLI 103A, Asia POLI 103B, Europe POLI 103C, Latin America POLI 103D, and the Middle East POLI 103E; region will be identified by title.

*Graduation with Leadership Distinction:* GLD: Global Learning

**POLI 103D - Controversies in the Politics of Global Regions: Latin America (3 Credits)**
Social, cultural, and historical forces underlying contemporary political controversies in Africa POLI 103A, Asia POLI 103B, Europe POLI 103C, Latin America POLI 103D, and the Middle East POLI 103E; region will be identified by title.

*Graduation with Leadership Distinction:* GLD: Global Learning

**POLI 103E - Controversies in the Politics of Global Regions: Middle East (3 Credits)**
Social, cultural, and historical forces underlying contemporary political controversies in Africa POLI 103A, Asia POLI 103B, Europe POLI 103C, Latin America POLI 103D, and the Middle East POLI 103E; region will be identified by title.

*Graduation with Leadership Distinction:* GLD: Global Learning

**POLI 105 - Introduction to Politics (3 Credits)**
Concepts and problems involved in human relationship with governments, the nation-state, and political change.

**POLI 107 - Controversies in Political Theory (3 Credits)**
An introduction to the analysis of politics and of political ideas such as freedom, equality, and justice.

**POLI 109 - Controversies in Public Policy (3 Credits)**
An introduction to the analysis of contentious public policy questions in contemporary American society, such as welfare, gun control, health care financing, immigration, affirmative action, and/or abortion.

*Graduation with Leadership Distinction:* GLD: Diversity and Social Advocacy

**POLI 111 - Controversies in American Politics (3 Credits)**
An introduction to the analysis of key issues in contemporary American politics focusing on the arguments, the groups involved, and the political factors that influence the outcome of the debate.

**POLI 121 - Green Explorations (3 Credits)**
Interdisciplinary seminar combining the intellectual exploration of ecological perspectives with the physical exploration of the local environment. First-year students only.

*Cross-listed course:* ENVR 121
POLI 122 - Green Engagements (3 Credits)
Interdisciplinary seminar on designing, researching, and implementing collaborative projects to promote ecological sustainability. First-year students only.
Cross-listed course: ENVR 122
Graduation with Leadership Distinction: GLD: Community Service, GLD: Research

POLI 201 - American National Government (3 Credits)
The formation and development of the national government, its organization and powers. Overlay Course.
Carolina Core: GSS, VSR

POLI 202 - Policies and Functions of American Government (3 Credits)
The policies and functions of the American national government directed to the public issues and problems of contemporary America.
Prerequisites: POLI 201.

POLI 215 - Introduction to Leadership Studies (3 Credits)
Conceptions and models, values and pitfalls, strategies and skills of leadership and of leaders in diverse contexts
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

POLI 240 - Language Conflict and Language Rights (3 Credits)
Examination of linguistic conflict and rights, as well as centrality of language rights to human rights and personal/cultural identity. Basic facts without language related to identity, culture, attitudes, dialects, bilingualism. Case studies (local, national, international) with particular attention to nationalism, language revitalization, language planning.
Cross-listed course: LING 240
Carolina Core: VSR

POLI 300 - Social and Political Philosophy (3 Credits)
An overview of major themes in political philosophy such as the nature of politics, obligation, community, representation, freedom, equality, and justice.
Cross-listed course: PHIL 330
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

POLI 301 - The Political Science Discipline (3 Credits)
The history and development of approaches, methods, and fields of study in political science.
Graduation with Leadership Distinction: GLD: Research

POLI 302 - Classical and Medieval Political Theory (3 Credits)
Political theories from the Greeks to the Renaissance.
Carolina Core: VSR

POLI 303 - Modern Political Theory (3 Credits)
Political theories from the Renaissance to the 19th century.
Carolina Core: VSR

POLI 304 - Contemporary Political Theory (3 Credits)
Nineteenth and 20th century political theories.
Carolina Core: VSR

POLI 305 - Race, Class, Gender, and Sexuality (3 Credits)
Historical and contemporary power relationships in race, social class, gender, and sexual orientation.
Cross-listed course: SOCY 304, WGST 304
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 307 - Feminist Theory (3 Credits)
Historical development of feminist theory and contemporary debates within feminism.
Cross-listed course: WGST 307
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 315 - International Relations (3 Credits)
International political behavior and institutions.
Graduation with Leadership Distinction: GLD: Global Learning

POLI 316 - Comparative Politics (3 Credits)
Comparative approaches to political systems, behavior, and institutions.
Graduation with Leadership Distinction: GLD: Global Learning

POLI 330 - International Organization (3 Credits)
An introduction to the structure and functions of international political and economic organizations. Particular attention to the United Nations and its specialized agencies, and to emerging regional communities.
Graduation with Leadership Distinction: GLD: Global Learning

POLI 340 - The Conduct and Formulation of United States Foreign Policy (3 Credits)
An analysis of how contemporary United States foreign policy is made and conducted.
Graduation with Leadership Distinction: GLD: Global Learning

POLI 341 - Contemporary United States Foreign Policy (3 Credits)
A critical analysis of selected problems of United States foreign policy.
Graduation with Leadership Distinction: GLD: Global Learning

POLI 342 - National Security Policies of the United States (3 Credits)
Formulation and implementation of contemporary United States defense and security policies.
Graduation with Leadership Distinction: GLD: Global Learning

POLI 350 - Public Opinion and Politics (3 Credits)
A broad survey of the role and development of public attitudes toward political problems in a democracy. Emphasis on the origins, manifestations, and consequences of public opinion in American politics.

POLI 352 - Gender and Politics (3 Credits)
Impact of gender on the distribution of power in society; foundations for intersections of gender, race, social class, and sexuality and their economic, social, and political concomitants.
Cross-listed course: WGST 352
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 353 - Introduction to U.S. Racial and Ethnic Politics (3 Credits)
Survey of theories of the impact of race, ethnicity, and racism on American politics, and analysis of major policies and racial group experience regarding American citizenship.
Cross-listed course: AFAM 353
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 357 - Film, Politics, and Social Change (3 Credits)
Critical analysis of film as expression and agent of political cultural, ideology, and change.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy
POLI 360 - American Political Parties (3 Credits)
A broad survey of the role of political parties in the American political system. Following an examination of the historical evolution of party systems in the United States, primary attention is given to three aspects of contemporary political parties: the party as an organization, the party as an electorate, and the party as a governing elite.

POLI 361 - Elections and Voting Behavior (3 Credits)
An analysis of elections and the voting process. Topics include candidate selection, campaigning, and the conduct of elections as well as public opinion, voting behavior, and the role of elections in the democratic political system.

POLI 362 - Politics and the Mass Media (3 Credits)
Survey of the role in American politics of mass communications media, including the press and electronic news reporting; influence of mass media on the conduct of political campaigns, political leadership style, and public opinion.

POLI 363 - Southern Politics (3 Credits)
Selected political patterns and trends within the 11 states of the American South. Historical developments with the central focus on Southern politics since 1950.

POLI 364 - African-American Politics (3 Credits)
African-American politics from the colonial period to the present. Emphasis on voting rights and strategies to advance black representation.

Cross-listed course: AFAM 364
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 365 - State Government (3 Credits)
A study of state-federal relations, relations among states, state constitutions, and the structure and functions of the three branches of government. Emphasis is given to South Carolina.

POLI 366 - Interest Groups and Social Movements (3 Credits)
The mobilization, organization, tactics, and results of group-based politics, including latent interests and the suppression of interests.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 370 - Introduction to Public Administration (3 Credits)
A study of the basic principles and theory of administrative structure, responsibility, and control in relation to policy making in the modern state.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

POLI 371 - Politics of Taxing and Spending (3 Credits)
Principles and practices of financial administration, including organization, budgeting, assessment, treasury management, and debt.

POLI 373 - Regulatory Policies (3 Credits)
Types and limits of powers exercised by regulatory agencies; procedural law and remedies against administrative action.

POLI 374 - Public Policy (3 Credits)
Process of and major approaches to making public policy particularly, in the United States. Case study materials will focus on such major policies as welfare, health care, national security, and resource management.

POLI 379 - Public Affairs Internship (2-6 Credits)
Contract approved by Instructor, Advisor, and Department Chair is required for undergraduates.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

Experiential Learning: Experiential Learning Opportunity

POLI 380 - Comparative Politics of Developing Countries (3 Credits)
A comparative analysis of the political problems confronting new nations, the political consequences of the breakdown of traditional society and the problems of developing new institutional forms and procedures.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 381 - Comparative Politics of Industrialized Countries (3 Credits)
Introduction to the development, structure, and functioning of government and politics in Western Europe, the former Soviet states, and other selected industrialized countries.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 383 - Genocide: A Comparative Perspective (3 Credits)
An analysis of the causes of genocide and the application of those insights to explain how genocide has occurred repeatedly at various times and places across the globe.

POLI 391 - Topics in Political Science (3 Credits)
May be repeated once as topics change.

Graduation with Leadership Distinction: GLD: Community Service

POLI 393 - Race and Science Fiction (3 Credits)
Draws on science fiction to understand the contemporary history of American racial and ethnic politics and to speculate about the significance of race in America's political future.

Cross-listed course: AFAM 393
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 399 - Independent Study/Poli Sci (3 Credits)
Note: Prior approval of an individualized contract by the director of undergraduate studies in political science and the instructor who will supervise the project required.

Graduation with Leadership Distinction: GLD: Research

POLI 399A - Independent Study in Political Science (1-6 Credits)
Prior approval of and individualized contract by the director of undergraduate studies in political science and the instructor who will supervise the project required.

Graduation with Leadership Distinction: GLD: Research

POLI 399B - Independent Study in International Studies (1-6 Credits)
Prior approval of an individualized contract by the director of undergraduate studies in international studies and the instructor who will supervise the project required.

Graduation with Leadership Distinction: GLD: Research

POLI 400 - Selected Topics in Political Theory (3 Credits)
Intensive analysis of a particular topic or topics. To be identified by title each semester.

POLI 401 - Selected Thinkers in Political Theory (3 Credits)
Intensive analysis of particular theorist or theorists. To be identified by title each semester.
POLI 402 - African American Political Thought (3 Credits)
Survey of many of the major schools of historic and contemporary African American political thought.
**Cross-listed course:** AFAM 402
**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 404 - Democratic Theory (3 Credits)
An introduction to contemporary theories and practices with focus on Western, especially American, experience.

POLI 406 - The State of American Politics (3 Credits)
Major factors that affect the state of contemporary American politics, including the Constitution, the Congress, the courts, the presidency, the states, federalism, political parties, special-interest groups, and the electoral process.

POLI 416 - Revolution and Political Violence (3 Credits)
Forms, causes, and consequences of domestic political violence with special attention to revolution.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 417 - Theories of War in International Relations (3 Credits)
The contributions of the social sciences and social theorists to an understanding of the causes of war.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 420 - International Law (3 Credits)
The origin, development, and principles of the international law of peace and the enforcement of these principles, the law of war and pacific settlement of disputes.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 421 - Law and Contemporary International Problems (3 Credits)
The growth of law in several areas of increasing international concern: environmental protection, expropriation, outer space, individual rights and obligations, conservation of resources, state responsibility, and terrorism.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 430 - Ideology and World Politics (3 Credits)
An introduction to the ideological context of world affairs, with attention to traditional democratic, totalitarian, and Third World "developmental ideologies".
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 431 - Science, Technology, and Public Policy (3 Credits)
Interaction between science and politics, the making of the national science and technology policy, and the role of public policy in promoting and managing scientific change.

POLI 432 - Nationalism and Ethnicity in World Politics (3 Credits)
Nationalism and ethnicity as factors in world politics, including the sources, nature, and analysis of conflicts associated with them.
**Graduation with Leadership Distinction:** GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

POLI 433 - Economic Aspects of International Politics (3 Credits)
Economic problems and policies in international politics including theory of comparative advantage; international economic aid, trade and monetary issues; the United States’ role in the international economy; and the functions of international economic institutions.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 437 - International Relations of Latin America (3 Credits)
Contemporary international relations among Latin American states, including economic and political security and relations with the United States.
**Cross-listed course:** LASP 451
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 440 - Russian Foreign Policy (3 Credits)
Analysis of the development of foreign policies in Russia and other states of the former USSR with special attention to relations with Europe and the United States.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 442 - Globalization and Security (3 Credits)
Exploration of the ways in which globalization may impact national and international security.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 443 - International Relations of East Asia and the Pacific (3 Credits)
Political patterns and forces in the Asia/Pacific region in recent times including the process of decolonization, regional conflicts, great power relations, and economic interdependencies.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 444 - International Relations in Japan (3 Credits)
The institutions, actors, and processes of Japan’s contemporary political and economic foreign affairs.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 445 - Political Economy of Africa’s Regions (3 Credits)
The historic and contemporary political and economic processes and structures of one or more regions in Africa, such as North Africa, West Africa, East Africa, Central Africa, or Southern Africa.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 446 - International Relations of Africa (3 Credits)
Contemporary international relations among African nations including decolonization, pan-Africanism, and movements of national liberation; Africa’s role in the United Nations, relations between African states and the former colonial powers, the United States, and communist countries.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 447 - Foreign Policies of Selected Powers (3 Credits)
Foreign policy-making institutions, processes, and policies of selected powers with special attention to the domestic determinants of foreign policy.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 448 - Politics and Government of China (3 Credits)
Political institutions and processes of the People’s Republic of China with secondary emphasis on the government and politics of the Republic of China on Taiwan.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 449 - International Relations of the Middle East (3 Credits)
Examination of super- and great-power policies toward the Middle East; inter-regional relations and Middle East foreign relations.
**Graduation with Leadership Distinction:** GLD: Global Learning

POLI 450 - Constitutional Law (3 Credits)
Nature and functions of the national government and its relations with the states.

POLI 451 - Constitutional Law (3 Credits)
Due process and civil liberties.
POLI 452 - The Judicial Process (3 Credits)
A study of the growth of law, the law-making function of the courts, the structure and organization of federal and state courts, the procedures involved in civil and criminal cases, and the problems and proposals for reform in the administration of justice.

POLI 453 - Moot Court and Legal Research (3 Credits)
Introduction to fundamental legal research techniques and strategies applied to controversial court cases in both oral and written forms.

POLI 454 - Women and the Law (3 Credits)
Constitutional and statutory case law dealing with gender equality issues. Topics include abortion, affirmative action, pornography, sexual harassment, fetal protection policies, employment discrimination, and women in the military.

Cross-listed course: WGST 454
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 461 - Congress and the Presidency (3 Credits)
Analysis of the interaction between the legislative and executive branches within a separation-of-power system.

POLI 462 - The Legislative Process (3 Credits)
A study of the structure, organization, powers, functions, and problems of legislative bodies.

POLI 463 - The American Chief Executive (3 Credits)
Constitutional, statutory and political powers and roles of the American chief executive.

POLI 464 - Roosevelt Institution Seminar (3 Credits)
Analysis and discussion of contemporary public policy problems through exposure to campus experts and intensive writing and peer review.

POLI 465 - Psychology and Politics (3 Credits)
The role of psychology in political attitudes and behavior. Examination of individual psycho-political relationships and aggregate typologies. Particular emphasis on the psychological roots of the need for or the rejection of political authority.

Prerequisites: PSYC 101.

POLI 470 - Federalism and Intergovernmental Relations (3 Credits)
The origins and evolution of the American federal system, focusing on the constitutional, regulatory, and financial entanglements among federal, state and local governments.

POLI 475 - Survey Research (3 Credits)
Principles and practice of survey research/public opinion polling including sampling, questionnaire design, data collection, coding processing and analysis.

Graduation with Leadership Distinction: GLD: Research

POLI 476 - Black Activism (3 Credits)
Critical review of theories of community organizing, grassroots activism, and social movements, and examination of contemporary forms of black activism.

Cross-listed course: AFAM 476
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 477 - Green Politics (3 Credits)
An analysis of green political thought and environmental movements at the local, state, national, and global levels.

Graduation with Leadership Distinction: GLD: Community Service

POLI 478 - Environmental Policy (3 Credits)
Themes in environmental policy in industrialized nations. Analysis of issue framing, the role of the public and private tools, and conflicting perspectives. Incorporates analysis of policy process and public management.

POLI 480 - Politics and Government of Russia (3 Credits)
Political processes and institutions of Russia and other independent states of the former USSR.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 481 - Politics and Governments of Europe (3 Credits)
Political processes and institutions of European nations.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 483 - Middle East Politics (3 Credits)
Focuses on the internal politics of Middle East states; historical and cultural setting of Middle East politics, social institutions, and dynamics of the political process.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 487 - Politics and Governments of Africa (3 Credits)
Political developments, processes, and institutions of the African nations.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 488 - Politics and Governments of Latin America (3 Credits)
The development, principles, political thought, and politics of the several Latin American states.

Cross-listed course: LASP 351
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

POLI 489 - Politics and Government of Japan (3 Credits)
Political institutions and processes of Japan.

Graduation with Leadership Distinction: GLD: Global Learning

POLI 498 - Research Experience (3 Credits)
Working with a faculty mentor, students develop a research project and related search skills.

Prerequisites: minimum GPA of 3.60 in major courses, 3.30 overall.

Graduation with Leadership Distinction: GLD: Research

POLI 499 - Senior Thesis (3 Credits)
For intensive majors. Individual instruction in research techniques and supervised thesis preparation.

Graduation with Leadership Distinction: GLD: Research

POLI 500 - Selected Topics in Civilization and Culture (3 Credits)

POLI 502 - Methods of Political Analysis (3 Credits)
Quantitative techniques in political science; levels of measurement; problems of description, causation, and inference.

POLI 503 - American Political Thought (3 Credits)
Themes and thinkers in American political history.

POLI 504 - Politics and Ethics (3 Credits)
The nature of, and relationship between, politics and ethics.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

POLI 505 - Utopian Political Thought (3 Credits)
A critical examination of utopian and dystopian political ideas.
POLI 542 - Research in Language Conflict and Language Rights (3 Credits)
Research into the parameters governing linguistic conflicts and language rights issues, involving a close examination of the nexes of language and individual and ethnic identity, culture, dialects, bilingualism. Examination of regional, national, and international case studies, with particular attention to nationalism, language revitalization, and language planning. Cross-listed course: LING 542

POLI 552 - Economic Development Policy (3 Credits)
The role government policies have in local and regional differences in economic performance; strategies governments and non-profits use to evaluate economic development policies; topical focus on a range of economic development policies, including land use, infrastructure, workforce development, and education.

POLI 554 - Law and Society (3 Credits)
The American judicial system, including the decision to resolve disputes by legal means, political influence on the legal system, the social impact of legal rulings, the relationship of the courts to other branches of government, and the applicability of higher law concepts in judicial decision making.

POLI 567 - American Local Government (3 Credits)
An introduction to the institutions, functions, policy-making processes, and politics of American local government.

POLI 569 - State and Local Government (3 Credits)
This course will examine the purpose, structure, and functions of state governments and their local subdivisions. Requires special permission of department. Restricted to social studies teachers.

POLI 570 - South Carolina Government and Politics (3 Credits)
South Carolina state and local government in the context of South Carolina history and U.S. state and local government.

POLI 591 - Special Topics in Political Science (3 Credits)
Intensive study of special topics in Political Science. May be repeated as content varies by title.

Note: The content of each minor should reflect the student’s interests and career aspirations. It should be determined through consultations between the student and the student’s academic advisor. A student may earn a maximum of three (3) hours of minor credit for POLI 379 and/or POLI 399 (internship experience and/or independent study content must be internationally-oriented).

International Studies, B.A.

Learning Outcomes

- International Studies majors will demonstrate knowledge of basic facts, themes, theories and concepts central to the study and understanding of international studies.
- International Studies majors will demonstrate critical writing skills and demonstrate proficiency in the analysis of politics and theories of international politics.
- International Studies majors will develop a comprehensive course of study that permits a clear intellectual focus/specialization and prepares them for careers in the field or for graduate work.
- International Studies majors will demonstrate a clear grasp of the core themes and concepts within the major course concentrations/areas of emphasis they have selected.
- International Studies majors will demonstrate skills in critical thinking and evaluating political data in the analysis of international politics.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:
1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

<td>POLI 122</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Total Credit Hours:** 3

### Cognate or Minor (12-18 hours)

#### Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

#### Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

### Electives (10-31 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: 1-22 hours of electives will be needed to reach hours to graduate and Program Requirements will range from 22-37 hours, if completing either the Intensive Major or the B.A. with Distinction in International Studies.

## 4. Major Requirements (27 hours)

A minimum grade of C is required in all major courses.

### Major Courses (6 hours)

<table>

</table>

**Total Credit Hours:** 6

### Major Electives (21 hours)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select 12-15 hours of POLI 300 or above</td>
<td>12-15</td>
<td></td>
</tr>
<tr>
<td>Select 6-9 hours of internationally-oriented non-POLI courses (300-level and above) recommended</td>
<td>6-9</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credit Hours:** 18-24

Note: Major coursework should be distributed between one or two subfields (e.g. global environmental studies, U.S. foreign policy, international organizations, etc.). Course selection must be guided and approved by the student’s advisor, and all coursework must be internationally focused.

### Intensive Major (36 hours)

A minimum grade of B is required in all major courses.

In addition to the requirements for the General Major, Intensive majors must complete the following:

- An additional 6 hours of International Studies-related courses (approved by the major advisor)
- POLI 499
- Demonstrate proficiency in one foreign language through the intermediate level

Note: Foreign language proficiency will be demonstrated by earning a rating of “intermediate high” on the ACTFL/ETS examination or a “1+” rating on the Interagency Roundtable (ILR) examination. In those languages for which such testing is not available within a foreign language department, proficiency will be demonstrated by passing with a C or better a minimum of 15 hours of one foreign language.
B.A. with Distinction (36 hours)
Departmental Undergraduate Research Track available to students majoring in International Studies who wish to participate in significant research activities of the major field in collaboration with, or under the supervision of, a faculty mentor.

In addition to the requirements for the General Major, “B.A. with Distinction” majors must complete the following:

**Prerequisites**
- A minimum GPA of 3.60
- A minimum cumulative GPA of 3.30

**Requirements**
- POLI 301
- POLI 498
- POLI 499
- Public presentation of the Senior Thesis in a venue approved by the faculty mentor, such as:
  - annual meeting of the South Carolina Political Science Association (or any other annual meeting of the appropriate professional organization)
  - a regular (or special) session of the Political Science Research Workshop
  - sessions scheduled for the Political Science Awards Day activities
  - USC Discovery Day
  - submission to a professional journal
- A written sponsorship agreement from the faculty mentor to be placed on file in the department or college office

**Major Map**
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Leadership Studies Minor**
The Minor in Leadership Studies at the University of South Carolina, housed in the Department of Political Science, prepares students for a lifelong process of leadership development and action. Grounded in a rigorous and multidisciplinary course of study, the minor introduces students to a range of perspectives and models of leadership. These diverse approaches are unified by the goal of providing knowledge and skills that can assist students in promoting positive social change. Academic leadership training combined with the practice of leadership through the myriad of opportunities available at the university provides the foundation for successful leadership development.

A minimum of 18 credit hours is required from the following curriculum, which includes an introductory course, a second course (chosen from one of three core areas: public speaking, organizational/group dynamics, or management), an experiential course, and three courses from at least two of the following four categories: ethics, communication, diversity, and advanced leadership training. Coursework in at least two disciplines is required for the minor. Students must complete minor courses with a grade of 'C' or higher. The content of each minor should reflect the student's interests and be developed in consultation with the student's academic advisor. To this end, courses with appropriate content may be substituted with approval from the advisor for the minor. Students may not count a course toward both their Carolina Core requirements and the minor. Students are strongly encouraged to participate in USC Connect and to develop an e-portfolio reflecting their Carolina leadership experience.

**Minor Requirements (18 Hours)**

**Introductory Course**
Select one:
- POLI 215
- PCAM 205

Experiential Coursework (3 Hours)
3 hours from a course approved by the advisor that incorporates study abroad, service-learning (minimum of 8 hours of community service), internship, National Student Exchange, extensive reflection on a leadership experience (e.g., EDLP 520 for U101 peer leaders), or domestic “study away.” For students enrolled in a ROTC program, the required ROTC leadership experience satisfies the experiential coursework requirements.

Additional Courses (9 Hours)
Select three courses from at least 2 of the following 4 groups:

Group 1 - Ethics
Course Title Credits
ANTH 313 Ethical Dilemmas in Anthropology 1
ARMY 301 Advanced Military Decision Making 4

**Total Credit Hours** 18

Note: The content of each minor should reflect the student’s interests and career aspirations. It should be determined through consultations between the student and the student’s academic advisor. A student may earn a maximum of three (3) hours of minor credit for POLI 379 and/or POLI 399.
Political Science, B.A.

Learning Outcomes

• Political Science majors will demonstrate knowledge of basic facts, themes, theories and concepts central to the study and understanding of politics.

• Political Science majors will demonstrate critical writing skills and demonstrate proficiency in the analysis of politics and theories of politics.

• Political Science majors will demonstrate skills in critical thinking and evaluating political data in the analysis of politics.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.

2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

<td>15-18</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>31-46</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>27</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements(32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours) must be passed with a grade of C or higher

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- POLI 201

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

• OR

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science
• Nine hours of Fine Arts or Humanities

3. Program Requirements (31-46 hours)
Supporting Courses (3 hours)

Total Credit Hours 3

Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (10-31 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: 1-22 hours of electives will be needed to reach hours to graduate and Program Requirements will range from 22-37 hours, if completing either the Intensive Major or the B.A. with Distinction in Political Science.

4. Major Requirements (27 hours)

A minimum grade of C is required in all major courses.

Major Courses (9 hours)

Course Title Credits
Select six courses from POLI 300 or above organized around 1-2 areas of interest with advisor approval 18

Total Credit Hours 18

Note: One of the following courses must be taken as part of the major requirements in order to fulfill the Carolina Core Integrative course requirement: POLI 315, POLI 316, POLI 361, POLI 368, POLI 370, POLI 374, POLI 451, POLI 462, or POLI 504.

Intensive Major (36 hours)
A minimum grade of B is required in all major courses.

In addition to the requirements for the General Major, Intensive majors must complete the following:

- An additional six hours of major course work (approved by the major advisor).
- POLI 499
- Demonstrate proficiency in one foreign language through the intermediate level.

B.A. with Distinction (36 hours)
Departmental Undergraduate Research Track available to students majoring in political science who wish to participate in significant research activities of the major field in collaboration with, or under the supervision of, a faculty mentor.

In addition to the requirements for the general major, “B.A. with Distinction” majors must complete the following:

- A minimum major GPA of 3.60
- A cumulative GPA of 3.30
- Required courses:
  - POLI 301
  - POLI 498
  - POLI 499
- Additional Requirements:
  - Public presentation of the Senior Thesis in a venue approved by the faculty mentor, such as:
    - Annual meeting of the South Carolina Political Science Association (or any other annual meeting of the appropriate professional organization);
• A regular (or special) session of the Political Science Research Workshop;
• Sessions scheduled for the Political Science Awards Day activities;
• USC Discovery Day;
• Submission to a professional journal.
• A written sponsorship agreement from the faculty mentor to be placed on file in the department or college office.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Political Science, B.A.

Psychology
Department Website (http://www.psych.sc.edu/)
Jane Roberts, Interim Chair

The Department of Psychology offers two undergraduate degrees. Students may elect a program leading to either the Bachelor of Arts or Bachelor of Science degree in experimental psychology.

Entrance Requirements
Lower Division
In order to be admitted into the Department of Psychology, freshmen and transfer students must meet all University and college admission requirements. Transfer students must meet all such requirements and have a GPA of 2.25 or better. Acceptance into the department with a lower-division classification does not guarantee progression into the upper-division psychology major.

Upper Division
Progression into the upper division is based on the successful completion of all lower-division criteria.

Progression Requirements
Lower Division
All students enter the lower division when the psychology major is declared.

Requirements
1. Complete PSYC 101 and PSYC 226 with a grade of C or better.
2. Attain a 2.25 cumulative GPA.
3. The preceding lower-division requirements must be met by the completion of the first 30 credit hours as a declared psychology major. If at that time the student has not met the requirements, the student must select another major.

Regulations
1. Ineligible to enroll in 500-level and higher courses.
2. May repeat psychology major courses only once to earn the required grade of C or better.

Upper Division
Students enter the upper division in one of two ways:

1. Successfully complete lower-division requirements within the first 30 credit hours as a declared psychology major.
2. May be placed in with a cumulative GPA of 2.25 or higher and have earned grades of C or better in both PSYC 101 and PSYC 226 or equivalents.

Regulations
1. Maintain a cumulative GPA of 2.00 or be subject to academic probation. If a 2.00 cumulative GPA has not been attained by the completion of the probationary term, the student must select another major.
2. May repeat psychology major courses only once to earn the required grade of C or better.
3. Students may attempt PSYC 227 and PSYC 228 two times each. If after the second attempt a student has not earned a grade of C or higher, the student will be removed from the major.
4. May enroll in 500-level and higher courses if the prerequisites have been completed.

Programs
• Psychology Minor (p. 216)
• Experimental Psychology, B.A. (p. 217)
• Experimental Psychology, B.S. (p. 219)

Courses
PSYC 101 - Introduction to Psychology (3 Credits)
An introduction to and survey of the basic concepts and findings within the field of psychology.
Carolina Core: GSS

PSYC 103 - Psychology of Adjustment (3 Credits)
Introduction to theories and processes underlying and facilitating human adjustment in the community, family, and workplace.

PSYC 226 - Research Methods in Psychology (3 Credits)
Basic principles and methodology.
Prerequisites: PSYC 101 or SCHC 130.

Graduation with Leadership Distinction: GLD: Research

PSYC 227 - Psychological Statistics (3 Credits)
Introduction to statistical methods essential for psychological research.
Prerequisites: PSYC 226 and MATH 111 or placement out of MATH 111.

PSYC 228 - Laboratory in Psychology (2 Credits)
Laboratory in psychology in which research methods and statistical methods are integrated. One lecture and one two-hour laboratory per week.
Prerequisites: PSYC 226 and PSYC 227.

PSYC 300 - Human Sexual Behavior (3 Credits)
Psychological, physiological, and sociological factors of human sexual behavior and attitudes.
PSYC 301 - Psychology of Marriage (3 Credits)
The psychological, physiological, and social characteristics of marriage.  
**Cross-listed course:** WGST 301  
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

PSYC 310 - Psychology of Women (3 Credits)
Women's experiences: childhood and adolescence, work, family, cultural images, adjustment, and social change.  
**Cross-listed course:** WGST 310  
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

PSYC 320 - Psychology of Religion (3 Credits)
The development of the religious consciousness and its various expressions, the psychological dynamics of growth and conversion, response to crisis, and the relation of spiritual practice to health and wholeness.  
**Cross-listed course:** RELG 361

PSYC 330 - Psychology and the African-American Experience (3 Credits)
Psychological theory and research as it applies to African Americans. Explores Africentric and other perspectives and roles of culture, racism, and historical phenomena.  
**Cross-listed course:** AFAM 330  
**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PSYC 350 - Industrial Psychology (3 Credits)
Psychological techniques applied to various industrial problem areas, such as management and supervision, morale, efficiency, training, personnel selection and placement, and relations among personnel.

PSYC 360 - Applied Psychology (3 Credits)
Uses of psychological knowledge and techniques in practical contexts; clinical, school, industrial, consumer, and environmental psychology.

PSYC 370 - Psychology of Consciousness (3 Credits)
Theories, controversies, and research findings on the nature of various states of consciousness; topics such as sleep/dreams, hypnosis, drug-induced states, and psychic phenomena.

PSYC 380 - Sport Psychology (3 Credits)
The role of sports in socialization, personality development and competence, including: spectator-performer interactions, motivation, competition effects; and the application of psychological techniques to performance enhancement.

PSYC 399 - Independent Study (1-6 Credits)
Closely supervised project or research experience in psychology. Approved contract required. May be repeated for up to six credits. Not for psychology major credit.  
**Prerequisites:** PSYC 101.  
**Graduation with Leadership Distinction:** GLD: Research

PSYC 400 - Survey of Learning and Memory (3 Credits)
Research and applications concerning the acquisition of new behavior and knowledge, including accounts based on classical and instrumental conditioning and on information-processing models.  
**Prerequisites:** PSYC 101 or SCHC 130.

PSYC 405 - Cognitive Psychology (3 Credits)
Research and theories on sensory memory, attention, short-term and working memory, human learning and forgetting, imagery, long-term memory, speech perception, reading, language, thinking and problem solving, and decision making.

PSYC 410 - Behavioral and Mental Disorders (3 Credits)
Covers the classification, diagnosis, etiological theories, and treatments of the major mental and emotional disorders.  
**Prerequisites:** PSYC 101 or SCHC 130.

PSYC 420 - Survey of Developmental Psychology (3 Credits)
Psychological development from conception to late adulthood. Topics include physical, cognitive, and social processes associated with development at each stage of the life cycle.  
**Prerequisites:** PSYC 101 or EDPY 335 or SCHC 130.

PSYC 430 - Survey of Social Psychology (3 Credits)
Introduction to theory and research in social psychology from a psychological viewpoint. Topics include social perception, social cognition, attitudes, interpersonal relationships, aggression, prosocial behavior, and group processes.  
**Prerequisites:** PSYC 101 or SCHC 130.  
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

PSYC 432 - Men and Masculinity (3 Credits)
This course provides an overview of psychological, social, physical, and emotional issues related to men's lives. Major topics include: gender construction, men and work, men and health, men in relationships, male sexualities, men in families, and masculinities in the media and popular culture.

PSYC 440 - Survey of Personality (3 Credits)
Covers the major theories and research on personality and the dynamics of human motivation.  
**Prerequisites:** PSYC 101 or SCHC 130.  
**Graduation with Leadership Distinction:** GLD: Research

PSYC 450 - Sensation and Perception (3 Credits)
Processing of information from the environment. Physiological, physical, psychological, and contextual determinants of perception.  
**Prerequisites:** PSYC 101 or SCHC 130.

PSYC 455 - Introduction to Neuroscience (3 Credits)
Function of the brain including basic neuroanatomy, neurophysiology and neurochemistry, neural systems, and psychopharmacology as it relates to behavior.

PSYC 460 - Brain and Behavior (3 Credits)
How the brain mediates simple and complex behavior and how we can apply basic research about the brain to real world problems.  
**Prerequisites:** PSYC 101 or SCHC 130.

PSYC 465 - Health Psychology (3 Credits)
Application of psychological theories and assessment and treatment methodologies for health maintenance and the diagnosis and treatment of illness.  
**Prerequisites:** PSYC 101 or SCHC 130.
PSYC 470 - Introduction to Language Sciences (3 Credits)
Introduction to the linguistic component of human cognition. Properties of speech, the organization of language in the mind/brain, cross-linguistic universals, child language acquisition, and aspects of adult language processing.
Prerequisites: PSYC 226 and PSYC 410.

PSYC 474 - Cognitive and Social Aspects of Bilingualism (3 Credits)
Bilingual language development, social and cultural aspects of bilingualism, the bilingual brain, bilingualism throughout the lifespan.
Prerequisites: PSYC 228.

PSYC 475 - Survey of Clinical Psychology (3 Credits)
The scientific basis of clinical psychology. Topics include history, theory, research, ethics, and best practices. For students interested in graduate school in psychology or other mental health professions.
Prerequisites: B or better in PSYC 228 and PSYC 410.

PSYC 480 - Multi-Cultural Psychology (3 Credits)
This course provides an introduction to theories and research in the study of psychosocial issues of racial, ethnic and cultural groups.
Prerequisites: PSYC 101.

PSYC 487 - Community Psychology (3 Credits)
Application of knowledge from other areas of psychology to the study of the role of the individual in the community.
Prerequisites: PSYC 101 or SCHC 130 and at least 3 hours in psychology at 400 level or above.
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Research

PSYC 489 - Community Psychology Practicum (3 Credits)
Supervised, structured field experience in a community agency, applying psychological principles, theory, and research. May be repeated once for credit.
Prerequisites: 15 hours in psychology.
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Internships, GLD: Research

Experiential Learning: Experiential Learning Opportunity

PSYC 495 - Internship in Psychology (1-6 Credits)
A supervised experiential course in psychology. Contract approved by instructor, advisor, and Office of Academic Programs is required for undergraduate students.
Prerequisites: C or better in PSYC 226.

PSYC 498 - Advanced Independent Study (1-6 Credits)
Closely supervised project or research experience in psychology. Approved contract required. May be repeated for up to six credits.
Prerequisites: 9 hours of psychology.
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

PSYC 501 - Human Factors Psychology (3 Credits)
Application of research in experimental psychology to ergonomics, the design of human-environment systems, with emphasis on work settings.
Prerequisites: PSYC 101 and 9 hours of upper-level courses in psychology, business, engineering, or nursing.

PSYC 503 - Psychology of Drug Use and Effects (3 Credits)
Research and theoretical considerations of substance abuse. Pharmacological, sociological, psychological, medical, economic, forensic, and other relevant research and treatment disciplines.
Prerequisites: PSYC 450 or PSYC 455 or PSYC 460.

PSYC 506 - Psychology of Language (3 Credits)
Theories of speech perception, linguistic theories of syntax and semantics, the brain mechanisms underlying language, the development of language in children, and the role of language in thought.
Cross-listed course: LING 567

PSYC 507 - Cognitive Neuroscience (3 Credits)
Research and theories on the role of the brain in facets of cognitive behavior, including attention, short-term and working memory, perception, language, executive function, thinking, and problem solving.
Prerequisites: C or better in PSYC 405, highly recommended PSYC 455 or PSYC 460.

PSYC 510 - Child Behavioral and Mental Disorders (3 Credits)
Theories, description, and assessment of child behavior problems and disorders; methods of intervention.
Prerequisites: PSYC 420 or PSYC 410.

Graduation with Leadership Distinction: GLD: Community Service

PSYC 520 - Psychology of Child Development (3 Credits)
Examination of development from conception through older childhood. Specific cognitive and social processes will be given in-depth study.
Prerequisites: PSYC 420.

PSYC 521 - Psychology of Adolescence (3 Credits)
Theories and research examining social, emotional, and intellectual development in adolescence. Explores influence of family, peer, school, and cultural contexts.
Prerequisites: PSYC 420.

PSYC 522 - Psychology of Early and Middle Adulthood (3 Credits)
Developmental changes in abilities, personality, and behavior which occur between adolescence and old age.
Prerequisites: PSYC 420.

PSYC 523 - Psychology of Aging (3 Credits)
Psychological, social, and biological phenomena associated with maturity and aging.
Prerequisites: PSYC 420.

PSYC 524 - Nature of Students with Mental Retardation (3 Credits)
Nature and causes of mental retardation; behavior and potentialities of persons with mental retardation.
Prerequisites: a course in the areas of child psychology-child development.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PSYC 525 - The Psychology of the Midlife Woman (3 Credits)
Biological, social, and psychological aspects of the midlife woman.
Cross-listed course: WGST 525
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PSYC 526 - Prevention of Psychological Problems in Children and Youth at Risk (3 Credits)
Etiology, prevention of, and intervention in behavioral, social, emotional, educational, and psychological problems in children and youth at risk.
Prerequisites: PSYC 410 or PSYC 420 or equivalent.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy
PSYC 528 - Psychology of Children with Exceptionalities (3 Credits)
Characteristics, causes, needs, and intervention strategies for children with a broad range of exceptionalities including mental, physical, social/ emotional difficulties and atypical gifts and talents.
**Prerequisites:** PSYC 420 or PSYC 520.

PSYC 529 - Nature of Students with Specific Learning Disabilities (3 Credits)
Children with average/above average intelligence and specific learning impairments; diagnostic and remedial techniques. Offered by both the College of Education and the Department of Psychology.
**Prerequisites:** EDEX 523 or PSYC 528.

Cross-listed course: EDEX 531

PSYC 530 - Advanced Social Psychology (3 Credits)
Intensive study of topics selected from the field of social psychology.
**Prerequisites:** PSYC 430.

PSYC 550 - Advanced Sensation and Perception (3 Credits)
Intensive study of topics selected from the field of sensation and perception.
**Prerequisites:** PSYC 450.

PSYC 560 - Advanced Topics in Neuroscience (3 Credits)
Intensive study of topics selected from the field of neuroscience.
**Prerequisites:** PSYC 455 or PSYC 460.

PSYC 565 - Psychology of Physical Activity (3 Credits)
Introduction to psychosocial factors in physical activity. Topics include mental health effects of exercise, behavior change theories applied to physical activity, and physical activity determinants and interventions. 03: 07/05/2019.
**Prerequisites:** PSYC 101, PSYC 228.

PSYC 570 - Neuroscience Laboratory (3 Credits)
Practice in surgical, histological, and behavioral testing methodology. Two lectures and one three-hour laboratory per week.
**Prerequisites:** PSYC 460.

PSYC 571 - Cognitive Neuroscience Laboratory (3 Credits)
Methods of observation and experimentation in cognitive neuroscience. Two lectures and one three-hour laboratory per week.
**Prerequisites:** PSYC 227 and C or better in two courses from PSYC 405, PSYC 450, PSYC 455, PSYC 460, or PSYC 507.

**Prerequisite or Corequisite:** one course from PSYC 400, PSYC 405, PSYC 450, PSYC 455, or PSYC 460.

PSYC 572 - Cognitive Psychology Laboratory (3 Credits)
Practice in the experimental techniques used in the study of cognitive psychology. Two lectures and one three-hour laboratory per week.
**Prerequisite or Corequisite:** PSYC 405.

PSYC 574 - Sensation and Perception Laboratory (3 Credits)
Concepts and principles in the study of sensation and perception in the laboratory. Two lectures and one three-hour laboratory per week.
**Prerequisite or Corequisite:** PSYC 450.

PSYC 575 - Developmental Psychology Laboratory (3 Credits)
Methods of observation and experimentation on human psychological development. Two lectures and one three-hour laboratory per week.
**Prerequisites:** PSYC 226 and PSYC 227.

**Prerequisite or Corequisite:** PSYC 420 or PSYC 520.

PSYC 580 - Intermediate Statistics for Psychologists (3 Credits)
Advanced analysis of the uses and applications of statistics to research in psychology, and interpretation of statistics in the psychological literature.
**Prerequisites:** B or better in PSYC 227.

PSYC 583 - Psychological Tests and Measurement (3 Credits)
Introduction to the theory and practice of measuring psychological attributes. Emphasis on test construction in a laboratory setting. Hands-on experience in designing, administering, and analyzing psychological tests and measures.
**Prerequisites:** B or better in PSYC 227 and PSYC 228.

PSYC 584 - History and Systems of Psychology (3 Credits)
Systematic approaches to psychology.
**Prerequisites:** 9 hours in psychology at 400 level or above.

PSYC 585 - Advanced General Psychology (3 Credits)
Review and integration of general principles of psychology. Primarily for students planning graduate study in psychology.
**Prerequisites:** 12 hours in psychology courses numbered above 300.

PSYC 589 - Selected Topics in Psychology (3 Credits)
Course content varies and will be announced in the schedule of classes by title.

PSYC 598 - Individual Research (3 Credits)
Planning and execution of supervised research in psychology. Approved contract required.
**Prerequisites:** 15 hours of psychology.

PSYC 599 - Individual Research (3 Credits)
Planning and execution of supervised research in psychology. Approved contract required.
**Prerequisites:** 15 hours of psychology.

### Psychology Minor

#### Minor Requirements (18 Hours)

</table>

#### Elective Courses

Select three of the following:

- PSYC 400 Survey of Learning and Memory
- PSYC 405 Cognitive Psychology
- PSYC 410 Behavioral and Mental Disorders
- PSYC 420 Survey of Developmental Psychology
- PSYC 430 Survey of Social Psychology
- PSYC 440 Survey of Personality
- PSYC 450 Sensation and Perception
- PSYC 460 Brain and Behavior

#### Additional Courses

Select an additional two courses from PSYC 200 or above

Total Credit Hours: 18

1 May not be used to fulfill social science requirement and also minor requirement.
Note: Students may not apply more than one course from the following courses toward their minor:

<table>

**Experimental Psychology, B.A.**

**Learning Outcomes**

- Students will describe key concepts principles and overarching themes in psychology
- Students will develop a working knowledge of psychology content domains
- Students will describe applications of psychology
- Students will use scientific reasoning to interpret psychological phenomena
- Students will demonstrate psychology information literacy.
- Students will interpret and conduct basic psychological research.
- Students will demonstrate effective writing for different purposes.
- Students will exhibit effective presentation skills for different purposes.
- Students will develop meaningful professional direction for life after graduation.
- Students will apply ethical standards to evaluate psychological science and practice.
- Students will adopt values that build community at local national and global levels.

**Admissions**

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

**Degree Requirements (120 hours)**

**Program of Study**

<table>

</tr>
<tr>
<td>3. Program Requirements</td>
<td>26-41</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>32</td>
</tr>
</tbody>
</table>

1. **Carolina Core Requirements (32-44 hours)**

**CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)**

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)

**ARP – Analytical Reasoning and Problem Solving (6-8 hours)**

- any CC-ARP courses (p. 742)

**SCI – Scientific Literacy (8 hours)**

- BIOL 110 or 1 Lab Science that studies the animal kingdom
- Any 4-credit hour CC-SCI course

**GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)**

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

*It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.*

**GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)**

- any CC-GHS course (p. 742)

**GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)**

*must be passed with a grade of C or higher*

- PSYC 101

**AIU – Aesthetic and Interpretive Understanding (3 hours)**

- any CC-AIU course (p. 742)
CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

3. Program Requirements (26-41 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (8-29 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (32 hours)

A minimum grade of C is required in all major courses.

Students planning a major in psychology are advised to take basic science credits in biology and chemistry or physics. This is especially important for those contemplating graduate work.

Total Credit Hours: 20

Major Electives (12 hours)

- Select 3 hours from PSYC 300 or above
- Select 6 hours from PSYC 400 or above
- Select 3 hours from PSYC 501 or above

Note: A maximum of 6 hours of independent study (PSYC 498), individual research (PSYC 598, PSYC 599), and/or practicum (PSYC 489) courses may apply as major credit and are recommended during the junior/senior year. Students may not receive major credit for both PSYC 455 and PSYC 460.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Experimental Psychology, B.A.

Experimental Psychology, B.S.

Learning Outcomes

- Students will describe key concepts principles and overarching themes in psychology

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. <td>3. Program Requirements</td>
<td>29-47</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>32</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher
2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
- Only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)
- STAT 201 (or equivalent) or higher
- CSCE 102 (or equivalent) or higher

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

- Three hours of Social Science
- Three hours of Fine Arts or Humanities

3. Program Requirements (29-47 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.
Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (8-29 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (32 hours)

A minimum grade of C is required in all major courses.

Students planning a major in psychology are advised to take basic science credits in biology and chemistry or physics. This is especially important for those contemplating graduate work.

Total Credit Hours 23

Major Electives (9 hours)

- Select 3 hours from PSYC 300 or above
- Select 6 hours from PSYC 400 or above

Note: A maximum of 6 hours of independent study (PSYC 498), individual research (PSYC 598, PSYC 599), and/or practicum (PSYC 489) courses may apply as major credit and are recommended during the junior/senior year. Students may not receive major credit for both PSYC 455 and PSYC 460.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Experimental Psychology, B.S.

Religious Studies

Department Website (http://www.cas.sc.edu/relg/)

Michael Dickson, Interim Chair

The Department of Religious Studies offers a Bachelor of Arts degree with the option for an intensive major, which has potential for a degree “With Distinction in Religious Studies” upon graduation. The department offers both a major and a minor in religious studies for students seeking a broad liberal arts education focused on the study of a range of complex issues. Students engage in a dynamic, multi-disciplinary investigation that involves insights from fields such as anthropology, history, philosophy, sociology, and theology. Most of all, however, the program of study embraces critical and careful thinking, honest analysis, and an openness to learning about new ideas.
Programs

- Religious Studies Minor (p. 225)
- Religious Studies, B.A. (p. 225)

Courses

RELG 101 - Exploring Religion (3 Credits)
Beliefs and practices of the world’s religions and the methods scholars use to study them.
Carolina Core: GSS

RELG 120 - Comparative Religion (3 Credits)
Issues, theories, and debates that shape global religious traditions, cultures, and communities; examination of historical contexts and development, applying social scientific inquiry and methods to analyze relevant current circumstances and concerns.

RELG 201 - Religion and Culture (3 Credits)
Exploration of the dynamic relationships between selected religions and cultures.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

RELG 202 - Introduction to Reason and Faith (3 Credits)
Critical study of the intellectual strands leading to Western disconnections between reason and faith; the search for balance between belief and reason with emphasis on contemporary developments.

RELG 204 - Introduction to Religions in America (3 Credits)
The diversity of religious traditions in America.

RELG 205 - Morality, Ethics, and Religion (3 Credits)
Values and ethics as developed, contested, and transmitted through a variety of religious practices.
Carolina Core: VSR

RELG 206 - History of the Devil (3 Credits)
A survey of the beliefs and practices associated with the demonic and the Devil from c 500 B.C.E. to the 20th century.
Cross-listed course: HIST 215

RELG 207 - Introduction to African American Religions (3 Credits)
The variety of religious traditions of African Americans, with emphasis on the contexts in which they developed.
Cross-listed course: AFAM 207
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

RELG 208 - Biblical Archaeology (3 Credits)
The fundamental elements of human culture as it relates to biblical archaeology. The defining characteristics of different kinds of society through interdependency of language and culture. The affects of modern world interests in defining / redefining this area.
Cross-listed course: ANTH 226

RELG 210 - Introduction to Hinduism (3 Credits)
An interdisciplinary examination of the complexity of the Hindu religious and philosophical traditions covering such topics as deity, self, cosmos, body ritual, karma, and yoga.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

RELG 219 - Ethics and the Good Life in Asian Religions (3 Credits)
Fundamental questions of ethical and moral inquiry in the religious traditions of Asia.

RELG 220 - Introduction to Buddhism (3 Credits)
An introduction to Buddhism from a social historical perspective that examines Buddhist religious goals and practices in the local contexts of India, Sri Lanka, Tibet, China, and Japan.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

RELG 221 - Buddhist Meditation in Theory and Practice (3 Credits)
Buddhist methods of meditation, asceticism, and similar disciplinary practices for personal and social transformation. Examination of classic Buddhist works from diverse cultures with attention to modern American practices.

RELG 230 - Introduction to Judaism (3 Credits)
Overview of Jewish experiences, beliefs, practices from a contextual point of view.
Cross-listed course: JSTU 230

RELG 240 - Introduction to Christianity (3 Credits)
Introduction to the Christian religion, with emphasis on the history of the major traditions and movements that have shaped the multicultural practices and social impact of modern global Christianity.

RELG 250 - Introduction to Islam (3 Credits)
Interpretation of primary materials reflecting many dimensions of the Islamic religious tradition, such as the Qur’an, Hadith, legal, and theological and mystical writings, art, rituals, and contemporary Muslim voices.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

RELG 260 - Anthropology of Magic and Religion (3 Credits)
A comparative examination of such topics as ritual, cosmology, revitalization movements, magic, witchcraft, myth, and possession.
Cross-listed course: ANTH 206

RELG 261 - Global Human Religiosity (3 Credits)
The human experience and expression of what it means to be religious.

RELG 270 - Religion and the Arts (3 Credits)
Literary, visual, and/or performance art associated with religious discourse and practice.
Carolina Core: AIU

RELG 291 - Special Topics in Religious Studies (3 Credits)
Special topics in Religious Studies. May be repeated as content varies by title.

RELG 301 - Hebrew Bible (Old Testament) (3 Credits)
Modern study of the Hebrew Bible from historical, literary, and archeological points of view. Reading and analysis of texts in translation.
Cross-listed course: JSTU 301

RELG 302 - New Testament (3 Credits)
Historical and critical study of the New Testament writings, with emphasis on origins, production, and transmission.

RELG 310 - Paul and the Philosophers (3 Credits)
Paul's teachings and practices, as shown in his letters and how these resemble those of various cultural formations of his time, with emphasis on moral teachings and schools of Hellenistic philosophy.

RELG 311 - Gospel Literature and the Formation of Christianity (3 Credits)
Gospels about Jesus from the 1st and 2nd centuries CE; analysis with attention to canonical texts as well as those not contained in today's major canonical collections; assessment of gospel literature in competing configurations of Christianity during its formative years.
RELG 312 - The Life and Letters of Paul (3 Credits)
A critical study in the life and thought of Paul, his letters to the early
Christian churches, his role in the expansion of the Christian movement,
and his continuing influence today.

RELG 313 - The Writings of John the Apostle (3 Credits)
Writings of the Apostle John in the context of first century Mediterranean
history as well as the changing interpretations over the centuries up to
and including current methodologies of academic study of these ancient
texts.

RELG 314 - Religion and Culture (3 Credits)
The impact of religion on modern Western culture and, in turn, of culture
on religion. Selected topics: Holocaust, Puritanism, fundamentalism,
Islam, Freud, "love" wisdom tradition, "civil religion."

RELG 315 - Early Christianity (3 Credits)
Christianity in the 1st through 5th centuries; its formation as seen
through the literature of early Christians and their detractors.

RELG 316 - Imagining Jesus: Antiquity to Present (3 Credits)
Conceptions and representations of Jesus in antiquity up to the present;
including the gospel traditions as well as literature, art, and film.

RELG 320 - The Greek New Testament (3 Credits)
Readings in the Gospels and Epistles.
Prerequisites: GREK 121 and GREK 122.

Cross-listed course: GREK 305

RELG 321 - Old Testament Prophets (3 Credits)
Old Testament prophets, the nature of their prophetic experience, their
place in the life of ancient Israel, their message, and their continuing
theological significance.

RELG 332 - Christian Theology (3 Credits)
Basic Christian teachings concerning God, creation, sin, the person and
work of Christ, and life after death.

RELG 333 - Sex, Gender, and Religion (3 Credits)
Gender and sexuality in the shaping of social and individual identity in
religious contexts.

Cross-listed course: WGST 333

Graduation with Leadership Distinction: GLD: Diversity and Social
Advocacy, GLD: Professional and Civic Engagement Leadership
Experiences

RELG 334 - Asian Religious Philosophy (3 Credits)
A historical overview and critical introduction to the philosophical
practices of Asian religions; an examination of the basic worldviews,
thought frameworks, and foundational questions of the main schools of
premodern Asian religious philosophy.

Cross-listed course: PHIL 315

RELG 335 - Christian Ethics (3 Credits)
Basic Christian teachings concerning human nature and conduct;
historical foundations and contemporary applications.

RELG 336 - Social Justice & Religion (3 Credits)
Historical, contextual, and developmental aspects of social justice as a
significant function of religion.

RELG 337 - Religion and Politics (3 Credits)
Relationships between religion and the structure, institutions, and
content of a nation's political processes.

RELG 338 - Sociology of Religion (3 Credits)
Sociological perspectives related to selected aspects of religious
behavior. Includes references to non-Western religions.

Cross-listed course: SOCY 307

Carolina Core: GSS

Graduation with Leadership Distinction: GLD: Diversity and Social
Advocacy

RELG 339 - Law and Religious Traditions (3 Credits)
The study of the role of law, legal argumentation, and legal contexts in
one or more religious traditions.

RELG 340 - God and the Gods (3 Credits)
The worship of Yahweh and other deities in ancient Israel with special
attention to the evolution of monotheism.

RELG 343 - Religions of the African Diaspora (3 Credits)
Explore development/theologies of African/African Diaspora religions;
examine misunderstandings; arrive at a more sophisticated and nuanced
vision of these religions and the people who hold them.

Cross-listed course: AFAM 343

Graduation with Leadership Distinction: GLD: Diversity and Social
Advocacy, GLD: Professional and Civic Engagement Leadership
Experiences

RELG 344 - Hindu Devotional Traditions (3 Credits)
One of the main paths to the divine in the Hindu tradition; deep devotion
to a god or goddess, or bhakti, with expressions in art, poetry, mythology,
theology, and ascetic fervor.

Prerequisites: At least one 100- or 200-level Religious Studies course.

RELG 349 - Tantra: Sex, Power, and Bliss in South Asian Religions (3 Credits)
Investigation of the Buddhist and Hindu religious ideas and practices
known as tantra. Topics include tantric views of the human body, freedom,
and consciousness; tantric use of sex, imagination, visualization, and
manipulation of bodily energy; role of tantric traditions in south Asian
religions and cultures.

RELG 350 - Buddhist Stories, Poetry, and Films (3 Credits)
Buddhist stories, poetry, novels, and films from various cultures and times
examined for how they creatively convey their religious ideals. Study of
great works of Buddhist writing, in English translation, analyzing their
techniques and examining how Buddhists use film today for similar aims.

RELG 351 - Yoga: The Art of Spiritual Transformation (3 Credits)
Examination of major South Asian religions—Hinduism, Jainism,
Buddhism, and Islam, emphasizing the historical context for changing
religious ideals, and the confluence of traditions.

Graduation with Leadership Distinction: GLD: Global Learning, GLD:
Professional and Civic Engagement Leadership Experiences

RELG 352 - Religions of East Asia (3 Credits)
Expansion of Buddhism beyond India, development of Confucianism,
Taoism, Shinto, and other national religious expressions in China and
Japan.

Graduation with Leadership Distinction: GLD: Global Learning, GLD:
Professional and Civic Engagement Leadership Experiences

RELG 354 - Islamic Institutions and Traditions (3 Credits)
The religious, political, social and economic institutions and intellectual
and scholarly traditions developed by Muslim societies throughout Afro-
Eurasia from late antiquity to the present.

Cross-listed course: HIST 386

Graduation with Leadership Distinction: GLD: Diversity and Social
Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement
Leadership Experiences
- The Qur'an and Hadith (3 Credits)
  Intensive study of the Qur'an and Hadith: its major themes and literary quality, with attention to a range of classical and contemporary discourses about the Qur'an, both Islamic and Western.
  Graduation with Leadership Distinction: GLD: Global Learning

- Islamic Theology and Philosophical Thought (3 Credits)
  Close reading and discussion of primary texts (the Qur'an, Hadith, creeds, classical theological arguments, and modern writings) on major theological problems such as salvation, God, revelation, and religious pluralism.
  Graduation with Leadership Distinction: GLD: Global Learning

- Psychology of Religion (3 Credits)
  The development of the religious consciousness and its various expressions, the psychological dynamics of growth and conversion, response to crisis, and the relation of spiritual practice to health and wholeness.
  Cross-listed course: PSYC 320

- Science, Magic and Religion (3 Credits)
  Occultism as a link between science and religion and its central role in Western intellectual and cultural history; the historical development of the science-magic-religion continuum in the Islamo-Christian world from late antiquity to present.
  Cross-listed course: HIST 389

- Sufism (3 Credits)
  A survey of Islamic mysticism, its foundation in the Quranic revelation doctrines and practices, subsequent development, significance within Islamic civilization, and role in the contemporary world, both Islamic and non-Islamic.
  Graduation with Leadership Distinction: GLD: Global Learning

- Messiahs, Mystics and Rebels in the Islamic World (3 Credits)
  Representative messianic movements, millenarian visionaries and apocalyptic imaginings in the Islamic world from the 7th century to the present, with attention to related developments in the Jewish and Christian traditions over the last two millennia.
  Cross-listed course: HIST 387

- Islamic Law (3 Credits)
  Close reading and discussion of primary texts (scriptural, classical, and modern) and accounts of court cases, focuses on one aspect of Islamic law such as equity, violence, authority, or gender.
  Graduation with Leadership Distinction: GLD: Global Learning

- Religion and Existentialism (3 Credits)
  Existentialist thought as adapted by theologians to interpret religious experience and the biblical message. The movement from philosophical protest against essentialism into imaginative description of existence revealed under stress.

- Literature and Film of the Holocaust (3 Credits)
  Film, poetry and literature created in response to the Holocaust as the means for a decades long cultural discussion, in European and American societies, of the moral and religious implications of the Holocaust on our self-understandings as religious and moral beings.
  Cross-listed course: JSTU 373
  Graduation with Leadership Distinction: GLD: Global Learning

- Religion in the South (3 Credits)
  Graduation with Leadership Distinction: GLD: Global Learning

- Holy Women (3 Credits)
  Holy women from various periods and religious traditions, and how they demonstrate the different ways communities understand ideas of holiness, from piety, martyrdom, monasticism and mysticism to social action.
  Cross-listed course: WGST 376
  Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

- Religion and Literature (3 Credits)
  Classic literary works from one or more religious traditions which have shaped and/or expressed the core ethos of a religious tradition or of the more general human concern for the religious and spiritual; and/or general literature (fiction, poetry, plays, essays, non-fiction) which incorporates religious or spiritual references, ideas, symbolism, allusions.

- Jewish History I: Late Antiquity to 1500 (3 Credits)
  The religious, cultural, social, and political conditions that shaped the Jewish experience in the Near East and Europe from late antiquity to 1500.
  Cross-listed course: HIST 383, JSTU 381

- Jewish History II: 1500 to the Present (3 Credits)
  Case studies of Jewish history in Europe, America, and the land of Israel, 1500 to the present.
  Cross-listed course: HIST 384, JSTU 382

- Jews and Muslims (3 Credits)
  Jewish-Muslim relations in the Near East and the US; an exploration of Jewish-Muslim encounters, issues of religious law, politics, radical religious ideologies, and their repercussions for today.
  Cross-listed course: JSTU 387
  Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

- Kabbalah: Science, Religion and Nature in Western History (3 Credits)
  Historical investigation of kabbalah, a philosophical system and mystical current common to Judaism, Islam and Christianity, from the medieval period to the present; focus on its formative role in early modern Western cosmology and science, and its ecological implications today.
  Cross-listed course: HIST 388, JSTU 388

- Theories of Religion (3 Credits)
  A historical overview of major theories and approaches in the academic study of religion.

- Independent Study (3-6 Credits)
  Contract approved by instructor, advisor, and department chair is required for undergraduate students.
  Graduation with Leadership Distinction: GLD: Research

- Origins of Western Morality (3 Credits)
  Greek and Roman ethical theory, its adaptation into Judean and Christian traditions and impact on Western models of morality.

- Faith, Doubt, and God (3 Credits)
  Judeo-Christian views of God; modern criticism and contemporary responses.

- Interfaith Dialogues in the 21st Century (3 Credits)
  The variety of contemporary discourse on interfaith issues and views of the diversity and range of religions with particular emphasis on global dynamics of religious dialogues.
  Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

Select four RELG courses from the 300-level; one course at the 400-level may be substituted for one at the 300-level

### Total Credit Hours

18

### Religious Studies, B.A.

#### Learning Outcomes

- Upon completion of the prerequisite and introductory courses, students should be able to distinguish and discuss various religious traditions and structures of beliefs along with sacred texts and practices which frame, elaborate, and preserve those structures, as well as attention to current scholarship. They should be able to address more issues of greater complexity in the study of religion and religions as social and cultural phenomena. Students’ abilities to critically analyze religious traditions and scholarly discourse should be more refined, informed, and detailed on completion of their degree program as an outcome of the prerequisite and introductory courses.

- Students completing the required number of upper level courses should be able to distinguish multiple approaches to the study of religion(s), differentiate the various ways in which religious ideas establish social values and expectations, elaborate a range of foundational cultural and social structures from a variety of different global regions, and skillfully discuss the religious roots from which these have been generated and derived. Students will demonstrate readiness to assimilate and assess divergent, anomalous, and difficult ideas and produce coherent, informed, well-organized and well-reasoned perspectives and propositions.

- Students should demonstrate a level of skill and proficiency in analysis of different theories, content, and historical data with respect to the study of religions.

#### Admissions

##### Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UoFSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

• two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

**It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.**

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• RELG 101 - must be passed with a grade of C or higher or
• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)

**1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.**

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category, or
• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science
• Nine hours of Fine Arts or Humanities

Note: 3 hours of Fine Arts or Humanities must be fulfilled by RELG 120 - with a minimum grade of C - if RELG 101 was not taken to fulfill the Carolina Core-GHS requirement

3. Program Requirements (34-49 hours)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for
Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (16-37 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: 10-31 hours of electives will be needed to reach hours to graduate and Program Requirements will range from 28-43 hours, if completing the Intensive Major or the B.A. with Distinction in Religious Studies.

4. Major Requirements (24 hours)

A minimum grade of C is required in all major courses.

Major Courses (3 hours)

Total Credit Hours 6

Major Electives (18 hours)
- Select 2 introductory 200-level courses
- Select 2 intermediate 300-level courses
- Select 2 advanced 400-level courses; students may substitute 400-level courses for 300-level requirements with advisor approval

Intensive Major (30 hours)
- Complete all requirements for the General Major.
- One additional RELG course a 300-level or above or, with advisor approval, a course that relates directly to the research path selected from anthropology, classics, history, languages, or philosophy.
  - RELG 498

B.A. with Distinction (30 hours)
Students who fulfill the requirements for the Intensive Major and earn a minimum major GPA of 3.75 and a cumulative GPA of 3.50 will be awarded the degree “With Distinction in Religious Studies” upon graduation.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Religious Studies, B.A.

ROTC
Department Website (https://www.sc.edu/study/colleges_schools/artsandsciences/rotc/)

Military Science
Army Reserve Officer Training Corps (ROTC) is a coeducational program dedicated to developing college-educated men and women to serve in challenging positions of leadership, responsibility, and varied managerial positions both as officers in the U.S. Army and civilians in corporate America.

Army ROTC requires from two to four years to complete, depending on student qualifications. This time is normally divided into a two-year, no-obligation basic program, composed of freshman and sophomore students; and a two-year contractual advanced program, for juniors and seniors. Students with prior military service, JROTC, or National Guard/Reserve service may qualify for direct placement in the advanced program. At the beginning of their junior year, students with two years remaining before graduation may also qualify for the advanced program by attending Leadership Training Course (LTC), a four-week course offered during the summer at Fort Knox, Kentucky. All students participate in a regular program of physical fitness and field training.

The Scholarship Program
The Army ROTC Scholarship Program awards four-, three-, and two-year scholarships to eligible students on a competitive basis. The Department of Military Science accepts applications for three-year and two-year ROTC scholarships year-round. Nursing students who have qualified...
for placement in the advanced course may also apply for two-year scholarships. Students do not have to be enrolled in ROTC to apply for three-year and two-year scholarships.

The scholarship amount is applied to the cost of tuition. An additional amount of $900 is awarded for books and supplies. The students also receive a tiered allowance of $300, $350, $450, or $500 per month for up to 10 months of each school year depending on their academic status, i.e., freshman, sophomore, junior, or senior. All students receive $700 while attending the five-week Leadership Development and Assessment Course at Fort Lewis, Washington, after their junior year.

Leadership Training Course (LTC) Two-Year Program
LTC is for students who missed the first and second years of ROTC. LTC is attended during the summer between the sophomore and junior years of college for four weeks at Fort Knox, Ky. The purpose of LTC is to provide instruction in basic leadership and technical skills that will prepare you for your junior and senior years of ROTC. During this camp, you have the opportunity to compete for a two-year scholarship. All travel expenses are paid and you are paid $700 while attending camp. Students attending this camp incur no military obligation.

Cadet Professional Development Training
Selected cadets may attend Air Assault School, Airborne School, Mountain Warfare School, Northern Warfare School, and/or Scuba School. All training is voluntary and conducted at Army posts throughout the United States during either summer or winter recesses.

Cadet Troop Leader Training
Selected cadets are sent to various Army units in the United States and overseas to develop leadership experience prior to the beginning of their senior year. Cadets are paid and receive all privileges and status of Army officers.

Simultaneous Membership Program (SMP)
The Simultaneous Membership Program is a program in which the individual is both a member of the Army National Guard (ARNG) or the U.S. Army Reserve (USAR) and the Army ROTC. Students receive entitlements from both the ARNG or USAR and the ROTC.

This is a required program for cadets who are in the ARNG or USAR and are in the advanced course. When cadets enter the SMP, they become officer trainees in their guard or reserve unit and are paid as sergeants (E-5) while performing duties commensurate with the grade of second lieutenant.

Professional Military Education Program
The Army ROTC Professional Military Education (PME) program exists to enhance the career development and performance of cadets as future Army officers. The PME guidelines for Army ROTC cadets are as follows:

1. All cadets must successfully complete a course in American military history prior to commissioning.
2. All cadets are encouraged to take a course from each of the following areas prior to commissioning: human behavior, math reasoning, management, and national security studies.

Students will meet with the professor of military science/class advisor before selecting these courses.

Naval Science
The Naval Reserve Officers’ Training Corps Program, offered by the Department of Naval Science, prepares selected students for commissioned service in the United States Navy and the United States Marine Corps. The program embodies moral, mental, and physical development and instills in midshipmen the highest ideals of duty, honor, and loyalty in order to commission college graduates as professionally qualified, well-educated officers in the Naval service.

Selection to the program is based on the potential for future development in mind, body, and character so that midshipmen may assume the highest responsibilities of command, citizenship, and government. Naval ROTC graduates are given equal rank, treatment, and opportunity with graduates of the United States Naval Academy.

Students may enter the Naval ROTC Program at any time during their first two years (three years for five-year curricula) of University work. Specific information on an individual basis may be obtained at the Naval ROTC center, located on Pickens St. between Blossom St. and Wheat St., or via phone at 803-777-3451. Any student attending the University may enroll in naval science courses.

Naval ROTC Programs
Navy-Marine Scholarship Program
Naval ROTC scholarship students are selected through national competition and appointed midshipmen, U.S. Naval Reserve, upon enrollment in the University. Upon graduation, Midshipmen are commissioned as ensign, U.S. Navy, or second lieutenant, U.S. Marine Corps, and serve at the pleasure of the president of the United States. Currently, the required minimum active duty service period has been established at four years.

Costs of tuition and fees and a textbook allowance are paid by the government. Uniforms are also provided by the government and students receive subsistence pay for other expenses at the rates of $250, $300, $350, and $400 per month (depending on class) during the academic year and $375 per semester for books.

Scholarship midshipmen must complete summer training periods, lasting approximately four weeks, and are paid during these training periods. The second and third summer training periods consist of at-sea training; the first provides aviation, submarine, surface, and amphibious warfare orientation.

Four-Year College Program
The Naval ROTC College Program is a four-year sequence leading to a commission as ensign, U.S. Navy, or second lieutenant, U.S. Marine Corps. College-program requirements are similar to those of the scholarship program. Applicants are selected by the professor of naval science and must meet certain physical standards. Students may apply for the Naval ROTC College Program at the Naval ROTC administrative office located in the Naval ROTC armory.

College-program midshipmen, if selected for advanced standing, are required to participate in one summer cruise, normally between the junior and senior years, and receive subsistence pay at the rates of $350 and 400 per month during the junior and senior academic years, respectively, and $375 per semester for books.

College-program students are eligible for selection to the Scholarship Program. Most students with a GPA of approximately 3.00 or better
are awarded full Naval ROTC scholarships for the remainder of their undergraduate education.

College-program graduates commissioned in the U.S. Navy or the U.S. Marine Corps are required to serve on active duty for four years.

Two-Year College Program
The Two-Year College Program is essentially the same as the Four-Year College Program. Applicants must be in the first or second year of college, or in the third year of a five-year curriculum. During the summer preceding the final two years of college, successful candidates attend a six-week Naval Science Institute (NSI) in Newport, Rhode Island. While at the NSI, the Naval ROTC candidate is exposed to various fundamentals of naval science and participates in a compressed review of naval science courses normally taken during the freshman and sophomore years. Upon returning to USC, the Naval ROTC students enroll in the naval science curriculum, commencing with upper-level (300) courses. While in attendance at the NSI, each student receives about $550 per month, room and board, and compensation for travel expenses. Initial application should be made at the Naval ROTC office in the ROTC center.

Two-Year Scholarship Program
The Two-Year Scholarship Program is similar to the Two-Year College Program, in that accepted students attend the NSI during the summer preceding their final two years. However, selectees for this program are guaranteed a full scholarship (tuition, fees, books, allowance, and a $300 per month stipend) upon successful completion of the NSI. Initial application should be made at the Naval ROTC office in the Naval ROTC armory.

Marine Corps Option Program
The Marine-option student completes the naval science curriculum for the first year as prescribed for all midshipmen. Specialized Marine Corps naval science courses and summer field training are required during the final three years of Naval ROTC training. Scholarship, college-program benefits, and subsistence pay are the same for Marine and Navy options.

Students desiring a commission in the Marine Corps may elect to enter the Naval ROTC College Program as Marine-option Midshipmen. Upper division Navy-option midshipmen may change to Marine-option midshipmen by submitting a written application to the professor of naval science, preferably during their sophomore year, for designation as a Marine option.

Other Programs
Scholarships are available through the Tweedale Scholarship program for engineering-related majors. Students must have completed at least one but no more than four semesters of college with excellent performance and be capable of completing all other NROTC requirements. Scholarships are also available to nursing students. Requirements vary; contact the ROTC unit for specifics.

General Requirements
In addition to completing the academic requirements for an approved baccalaureate degree, Naval ROTC students must, either as a part of or in addition to their regular curriculum, complete the following:

1. **Navy-Option Scholarship Students.** Two semesters of calculus by the end of the sophomore year and two semesters of calculus-based physics by the end of the junior year. In addition, scholarship students shall complete one semester of Regional Studies/World Culture, one semester of American Military Affairs or National Security Policy, and two semesters of freshman English.

2. **Navy-Option College Program Students.** Two semesters of college-level mathematics and one semester of computer science by the completion of the junior year. In addition, college program students will complete two semesters of physical science and two semesters of freshman English prior to graduation.

All Naval ROTC students are required to participate in weekly professional training laboratories which include physical fitness, swimming, military drill, and class seminar/advisement. The Naval uniform must be worn all day on those days allocated for military drill, generally Thursdays.

Navy-option students must complete 26 semester hours in a standardized naval science curriculum. Marine-option students must complete 15 semester hours of naval science courses plus one elective approved in advance by the professor of naval science.

**Programs**
- Aerospace Studies Minor (p. 231)
- Military Science Minor (p. 232)
- Naval Science Minor (p. 232)

**Courses**

AERO 101 - The Foundation of the U.S. Air Force I (1 Credit)
Survey course introducing students to the U.S. Air Force and AFROTC. Topics include mission and organization of the Air Force, officership, professionalism, military customs and courtesies, and officer career opportunities.

AERO 101L - Initial Military Training Cadet Leadership Laboratory I (0 Credits)
Provides cadets the basic skills/knowledge to be functional members of the cadet corps, and activities to build camaraderie and esprit-de-corps. Includes mandatory physical fitness program.

AERO 102 - The Foundation of the U.S. Air Force II (1 Credit)
Continuation of AERO 101. Additional topics include Air Force core values, leadership principles, group leadership dynamics, and an introduction to verbal and written communications skills.

AERO 102L - Initial Military Training Cadet Leadership Laboratory II (0 Credits)
Continuation of AERO 101L. Exposure to additional information on an Air Force career. Scenarios and problems teach followership and leadership skills. Includes mandatory physical fitness program.

AERO 201 - The Evolution of the U.S. Air Force I (1 Credit)
Examines USAF air and space power from a historical perspective. Covers the earliest aircraft, both World Wars, the Korean and Vietnam conflicts, air and space employment during the Cold War.

AERO 201L - Field Training Preparation Cadet Leadership Laboratory I (0 Credits)
Preparation of students for summer training at an Air Force base; teaching drill and other leadership experiences. Includes mandatory physical fitness program.

AERO 202 - The Evolution of the U.S. Air Force II (1 Credit)
Continuation of AERO 201. This course continues to explore Air Force history, beginning with the Vietnam era and culminating with the application of air and space power in recent conflicts.
AERO 202L - Initial Field Training Preparation Cadet Leadership Laboratory II (0 Credits)
Continuation of AERO 201L. Focuses on AFROTC Honor Code, Field Training Manual/procedures, and expeditionary skills required at field training. Includes mandatory physical fitness program.

AERO 301 - Air Force Leadership Studies I (4 Credits)
Study of leadership, management fundamentals, the profession of arms, personnel evaluation systems, ethics, motivation, team building, change management, and communication skills. Analyses of leadership and management case studies.
Corequisite: AERO 301L.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 301L - Intermediate Cadet Leader Leadership Laboratory I (0 Credits)
Provides cadets opportunities to develop leadership and followership skills, as well as sharpen their planning, organization, and communication ability. Includes mandatory physical fitness program.
Corequisite: AERO 301.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 302 - Air Force Leadership Studies II (4 Credits)
Continuation of AERO 301. Topics include developing subordinates, conflict management, counseling, influence, authority and responsibility, accountability, and moral leadership. Includes case studies on effective supervision and accountability.
Prerequisites: AERO 301.

Corequisite: AERO 302.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 302L - Intermediate Cadet Leader Leadership Laboratory II (0 Credits)
Continuation of AERO 301L. Allows intermediate cadet leaders to further develop leadership and management skills essential in Air Force officers. Includes mandatory physical fitness program.
Prerequisites: AERO 301L.

Corequisite: AERO 302.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

AERO 401 - National Security/Leadership Responsibilities/Commissioning Preparation (4 Credits)
Study of U. S. Constitution, the Armed Forces, civilian control of the military, elements of national security, USAF doctrine, Total Force, the Joint environment, terrorism, and regional and cultural studies.
Prerequisites: AERO 302.

Corequisite: AERO 401L.

AERO 401L - Senior Cadet Leader Leadership Laboratory I (0 Credits)
Provides senior cadet leaders opportunities to develop leadership and supervisory skills, and to effectively manage resources toward mission accomplishment. Includes mandatory physical fitness program.
Prerequisites: AERO 302L.

Corequisite: AERO 401.

AERO 402 - Preparation for Active Duty (4 Credits)
Continuation of AERO 401. Topics include additional regional studies, military justice, personnel feedback, evaluation and promotion systems, the military profession, current issues affecting the military, and preparation for active duty.
Prerequisites: AERO 401.

Corequisite: AERO 402L.

AERO 402L - Senior Cadet Leader Leadership Laboratory II (0 Credits)
Continuation of AERO 401L. Allows senior cadet leaders advanced opportunities to hone their leadership in preparation for entering active duty. Includes mandatory physical fitness program.
Prerequisites: AERO 401L.

Corequisite: AERO 402.

AERO 499L - Extended Cadet Leader Leadership Laboratory (0 Credits)
Provides extended cadet leaders opportunities to continue developing leadership, managerial, and communication skills, and to mentor junior cadet corps members. Includes mandatory physical fitness program.
Prerequisites: 402L.

ARMY 101 - Fundamentals of Military Science (2 Credits)
Development of leadership, management, and communication skills. Map reading, land navigation, and study/time management techniques.

ARMY 102 - Introduction to the Army (2 Credits)
History, organization, mission, and role of United States Army in national defense. Components of total Army structure. Emphasis on group dynamics and communication skills.

ARMY 201 - Fundamentals of Military Leadership (3 Credits)
Oral and written military communications, planning, and organizing techniques. Current military leadership doctrine and application. Combined arms concepts, organizations, and tactics.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ARMY 202 - Fundamentals of Military Decision Making (3 Credits)
Soldier skills, including map reading and land navigation. Introduces Army troop-leading procedures through practical exercises and principles of war using historical events.

ARMY 301 - Advanced Military Decision Making (4 Credits)
Small group leadership through practical applications. Individual leadership skills with emphasis on problem analysis, decision formulation, and steps of decision making.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ARMY 302 - Applied Military Leadership (4 Credits)
Continues development of leadership competencies and confidence. Tactical training exercises to enhance leadership development.
Prerequisites: ARMY 301.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
ARMY 400 - Nurses Summer Training Program Clinical Elective (3 Credits)
A 3-week summer nursing experience conducted at an Army hospital in the United States, Europe, or Asia that orients the cadet nurse to the mission of the U.S. Army Medical Department and its health care delivery system. It provides a minimum of 120 hours of clinical experience to develop nursing, leadership, administrative, and interpersonal skills. **Prerequisites:** completion of the Leadership Development Assessment Course (LDAC), NURS 412 or its equivalent, acceptance into any Army ROTC, and enrolled Army ROTC Nursing Cadets.

ARMY 401 - Leadership and Management Seminar I (4 Credits)
Current Army leadership, tactical, and training doctrine. Military law in context of peacekeeping/enforcement operations. Overview of Army’s role in joint operations. **Prerequisites:** ARMY 301.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

ARMY 402 - Leadership and Management Seminar II (4 Credits)
Application of current Army leadership, tactical, and training doctrine. Evolution of military professionalism; civil-military relations, personal and professional ethics, and military justice system. **Prerequisites:** ARMY 401.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

ARMY 406 - American Military Experience (3 Credits)
Transformation of war and of the institutions for waging war from the American Revolution to the present. **Cross-listed course:** HIST 468

NAVY 101 - Fundamentals of Naval Science (3 Credits)
The Naval Service with emphasis on the mission, organization, regulation, and components of the Navy and Marine Corps.

NAVY 102 - U.S. Military History (3 Credits)
A historical survey on the importance of military doctrine and the many roles of the United States Military covering from the American Revolution to present day. **HIST 468 or ARMY 406 may be taken in lieu of this course to meet the Naval ROTC History requirement.**

NAVY 111 - Naval Military Laboratory (0 Credits)
Military drill, cruise preparation, customs, traditions, and special areas of knowledge required of commissioned officers in the Navy and Marine Corps. Pass/Fail grading.

NAVY 201 - Naval Ships Systems I (3 Credits)

NAVY 202 - Naval Ships Systems II (3 Credits)
Fire control systems, weapons types, capabilities, and limitations. Physical aspects of radar and underwater sound for target acquisition, threat analysis, tracking, weapons selection, delivery, and guidance. Explosives, fusing, and naval ordnance.

NAVY 301 - Navigation/Naval Operations I (4 Credits)
Piloting and celestial navigation theory, principles, and procedures. Tides, current, weather, use of navigational instruments and equipments, and practicum. Laboratory required.

NAVY 301L - Navigation/Naval Operations Lab I (0 Credits)
Laboratory work in piloting and celestial navigation to complement Naval Science 301. One hour per week.

NAVY 302 - Navigation/Naval Operations II (4 Credits)
International and Inland Rules of the Road; relative motion-vector analysis; ship handling, employment, tactics, and afloat communications; and operations analysis. Laboratory required.

NAVY 302L - Navigation/Naval Operations Lab II (0 Credits)
Laboratory work in maneuvering board (vector analysis) and Rules of the Road to complement Naval Science 302. One hour per week.

NAVY 303 - Evolution of the Art of War (3 Credits)
A survey of military history emphasizing principles of warfare, strategy and tactics, and significant military leaders and organizations.

NAVY 401 - Naval Leadership and Management I (3 Credits)
Theory and principles of management, focusing on the officer-manager as an organizational decision maker. Includes interpersonal skills; behavior factors; group dynamics. **Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

NAVY 402 - Naval Leadership and Ethics (3 Credits)
Integration of professional military competencies and qualities of effective leadership with emphasis on moral and ethical responsibilities, accountability, communications, and military law for the junior officer. **Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

NAVY 403 - Fundamentals of Maneuver Warfare (3 Credits)
The history of Maneuver Warfare emphasizing doctrine and techniques while enabling students to become critical thinkers and better prepare them for future service.

**School of the Earth, Ocean and Environment**

Department Website ([https://www.sc.edu/study/colleges_schools/artsandsciences/earth_ocean_and_environment/](https://www.sc.edu/study/colleges_schools/artsandsciences/earth_ocean_and_environment/))

Alicia Wilson, Director
Gwendelyn Geidel, Undergraduate Director
Joseph Quattro, Graduate Director

The School of the Earth, Ocean and Environment (SEOE) is a unit within the College of Arts and Sciences, and encompasses research and education in the geosciences and, marine sciences, and as well as the environment and sustainability. Our focal academic areas span the range from the natural and social sciences to the environmental humanities. Unification of these areas under one umbrella encourages synergistic interactions and collaborations in both research and teaching. The Belle Baruch Institute for Marine and Coastal Sciences is housed within the SEOE, and provides unique facilities and resources on the coast of South Carolina.

---

**Interdepartmental Majors**

Specific programs for students who wish to develop interdepartmental majors will be determined after consultation between the student and faculty representatives of the departments involved. The School of the Earth, Ocean and Environment (SEOE) is a unit within the College of Arts and Sciences, and encompasses research and education in the geosciences and, marine sciences, and as well as the environment and sustainability. Our focal academic areas span the range from the natural and social sciences to the environmental humanities. Unification of these areas under one umbrella encourages synergistic interactions and collaborations in both research and teaching. The Belle Baruch Institute for Marine and Coastal Sciences is housed within the SEOE, and provides unique facilities and resources on the coast of South Carolina.

---

**Programs**

- Environmental Science, B.S. (p. 241)
- Environmental Studies Minor (p. 245)
- Environmental Studies, B.A. (p. 246)
- Geological Sciences Minor (p. 250)
- Geological Sciences, B.S. (p. 250)
- Geophysics Minor (p. 253)
- Geophysics, B.S. (p. 253)
- Marine Science Minor (p. 256)
- Marine Science, B.S. (p. 256)

---

**Courses**

**ENVR 101 - Introduction to the Environment (3 Credits)**

Analysis of environmental issues and the role of science in their identification and resolution.

_Carolina Core: SCI_

**ENVR 101L - Introduction to the Environment Lab (1 Credit)**

Demonstrations, field trips, data analyses, and discussion relating to environmental issues, such as sustainability, resource management, and pollution control.

_Prerequisite or Corequisite: ENVR 101._

_Carolina Core: SCI_

**ENVR 121 - Green Explorations (3 Credits)**

Interdisciplinary seminar combining the intellectual exploration of ecological perspectives with the physical exploration of the local environment. First-year students only.

_Cross-listed course: POLI 121_
ENVR 122 - Green Engagements (3 Credits)
Interdisciplinary seminar on designing, researching, and implementing collaborative projects to promote ecological sustainability. First-year students only.
Cross-listed course: POLI 122
Graduation with Leadership Distinction: GLD: Community Service, GLD: Research

ENVR 200 - Natural History of South Carolina (4 Credits)
General review of plants, animals, and geological features of South Carolina, with an emphasis on connections to the natural world.
Carolina Core: SCI

ENVR 201 - Environmental Science and Policy I (4 Credits)
Introduction to interdisciplinary and multidisciplinary perspectives on environmental issues. Required for majors in the Environment and Sustainability Program. Integrative case studies address ways of understanding nature. Sophomore Standing.

ENVR 202 - Environmental Science and Policy II (4 Credits)
Continuing interdisciplinary and multidisciplinary exploration of relations between environment and society for majors in the Environment and Sustainability Program. Case studies raise issues, challenges, and strategies to achieving sustainability. Sophomore standing.
Prerequisites: ENVR 201.

ENVR 231 - Introduction to Sustainability Management and Leadership (3-4 Credits)
Introduction to development, establishment, and implementation of sustainability management systems and organizational leadership for achieving environmental, social, and economic goals.

ENVR 295 - Green Technology in Germany (3 Credits)
Examination of roots and culture of environmentalism and related technological innovation in Germany. Comparison of green practices around the world to practices within Europe and U.S.
Cross-listed course: GERM 295
Graduation with Leadership Distinction: GLD: Community Service

ENVR 321 - Environmental Pollution and Health (3 Credits)
A survey of pollution (chemical, biological, physical) effects on environmental quality and public health with emphases on how each pollutant class behaves and affects individual and community health over acute to chronic exposure periods.
Cross-listed course: ENHS 321

ENVR 322 - Environmental Ethics (3 Credits)
Examination of principles and arguments surrounding moral issues involving the environment.
Cross-listed course: PHIL 322
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

ENVR 323 - Global Environmental Health (3 Credits)
Concerns in global environmental health, with a focus on toxic pollution and disease burden in developing countries. Investigation of international treaties, corresponding environmental pollution processes, and human health effects.
Cross-listed course: ENHS 323

ENVR 331 - Integrating Sustainability (3 Credits)
Multidisciplinary approach to interrelated environmental, economic and social problems facing humans at local, regional and global scales.

ENVR 342 - Environmental Anthropology: Cross-cultural Perspectives on Environmental Change (3 Credits)
Cross-cultural perspectives on environmental issues.
Cross-listed course: ANTH 342

ENVR 348 - Environmental Racism and Justice (3 Credits)
History of the environmental justice movement and the unequal distribution of environmental harms on low income, minority, and historically marginalized groups.
Cross-listed course: AFAM 348

ENVR 352 - Energy, Society and Sustainability (3 Credits)
The role of energy in shaping society and geographic settings, as well as how energy production and consumption are shaped by the societal values and norms in which it is extracted, produced, and consumed.

ENVR 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and dean of the School of the Environment is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

ENVR 460 - Congaree National Park: Field Investigations in Environmental Science (4 Credits)
Field research practices and analysis techniques in environmental science. Combines inquiry-based field investigations at Congaree National Park and laboratory sample analysis with integration of data and public policy concepts. Daily field trips required.
Prerequisites: ENVR 201 and ENVR 202.

ENVR 490 - Special Topics in Sustainability and the Environment (1-4 Credits)
Current developments in sustainability and global environmental issues selected to meet faculty and student interests. May be repeated as content varies.

ENVR 499 - Research in Environmental Science (1-3 Credits)
Independent student research in collaboration with faculty mentors. Contract approved by instructor, advisor, and department chair is required.
Graduation with Leadership Distinction: GLD: Research

ENVR 500 - Environmental Practicum (3 Credits)
Multidisciplinary research projects related to University or community environmental problems (e.g., energy, water conservation, solid waste, recycling).

ENVR 501 - Special Topics in the Environment (3 Credits)
An in-depth analysis course of a specific interdisciplinary environmental topic. Course content varies and will be announced in the schedule of classes by title.
Prerequisites: ENVR 101 or ENVR 201.

ENVR 531 - Sustainability Management and Leadership Strategies (3-4 Credits)
Integrated management system principles and advanced leadership strategies to create sustainable development initiatives.

ENVR 533 - Sustainability Projects Course (3 Credits)
Research, development and implementation of sustainability projects throughout the campus and community.

ENVR 538 - Global Food Politics (3 Credits)
Political, social, and cultural landscapes of food and farming around the world; issues of agricultural production, trade, consumption, and food security.
Cross-listed course: GEOG 538
ENVR 540 - Decolonizing the Environment: Race, Nature, Power (3 Credits)
Critical examination of the ways ideas about nature and racial difference are conceptually and materially entwined with the production of social and environmental inequalities.

ENVR 548 - Environmental Economics (3 Credits)
An analysis of the economics aspects of environmental decay, pollution control, and natural resource use. Analysis of the ability of the market system to allocate resources efficiently when economic activity is accompanied by environmental damage. Discussion of alternative public policy approaches to pollution control and natural resource conservation.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Cross-listed course: ECON 548

ENVR 571 - Conservation Biology (3 Credits)
Principles of conservation biology. Importance of biodiversity, causes of decline and extinction, and restoration and conversation policy in terrestrial and aquatic ecosystems. 03: 07/05/2019.
Prerequisites: BIOL 301.

Cross-listed course: BIOL 571

ENVR 572 - Freshwater Ecology (3 Credits)
Quantitative study of the population, community and evolutionary ecology of freshwater habitats (lakes, ponds, rivers, streams, wetlands). Includes mandatory fieldtrips.
Prerequisites: BIOL 301.

Cross-listed course: BIOL 572

ENVR 590 - Environmental Issues Seminar (3 Credits)
Collaborative study of a contemporary environmental issue. Field trips may be required. Restricted to Environmental Science and Environmental Studies majors.
Prerequisites: BIOL 301.

GEOL 101 - Introduction to the Earth (4 Credits)
Origin and nature of the earth with emphasis on internal processes and phenomena such as earthquakes, volcanoes, and mountain building; surface processes, including landform evolution. Three lectures and three laboratory hours each week.
Carolina Core: SCI

GEOL 102 - Fossils and the Evolution of Life on Earth (4 Credits)
Basic overview of fossils, including dinosaurs, and their importance for understanding earth history and the evolution of life. Three lectures and three laboratory hours each week.

GEOL 103 - Environment of the Earth (4 Credits)
Analysis of basic energy cycles of the earth. Interaction of human activity with earth processes to affect the environment. Three lectures and three laboratory hours each week. Field trips required.
Carolina Core: SCI

GEOL 104 - Earth Systems through Time (4 Credits)
Survey of earth history, the evolution of continents and oceans, the history of life, and geological dating methods. Includes laboratory and recitation. Required field trips. Taught alternate years.

GEOL 105 - Earth Resources (3 Credits)
Mineral, energy, and water resources with emphasis on geological processes governing their distribution. Intended for non-science majors. Three lecture hours each week with occasional field trips.
Carolina Core: SCI

GEOL 215 - Coastal Environments of the Southeastern U.S. (3 Credits)
Coastal zones of South Carolina and neighboring states, including geologic history, geomorphology, stratigraphy, hydrogeology, shoreline processes, environmental issues, and effects of man. Not available for geology major credit. Three lecture hours each week plus optional field trips.
Carolina Core: SCI

GEOL 215L - Coastal Environments of the Southeastern U.S. (Laboratory) (1 Credit)
Exercises examining coastal ecology, geomorphology, hydrogeology, shoreline processes, environmental issues, and human impact. Two laboratory hours per week. Scheduled field trips required. Not available for marine science major credit.
Cross-listed course: MSCI 215L
Carolina Core: SCI

GEOL 230 - Geology of the National Parks (3 Credits)
Examination of the geologic setting and scientific significance of selected National Parks. Three lecture hours.
Carolina Core: SCI

GEOL 250 - Continental Drift and Ice Ages (3 Credits)
An introduction to geology and geophysics. The structure of the earth, core, mantle, and crust; problems of facies, plate motions, and their probable influence on climate and evolution. Future prospects.

GEOL 302 - Rocks and Minerals (4 Credits)
Chemical and physical processes of mineral formation in earth systems including an overview of igneous, sedimentary, and metamorphic rock-forming processes. Includes laboratory. Field trips required.
Prerequisites: GEOL 101 or GEOL 103 or GEOL 201; CHEM 111 recommended.

GEOL 305 - Earth Systems through Time (4 Credits)
Survey of earth history, the evolution of continents and oceans, the history of life, and geological dating methods. Includes laboratory and recitation. Required field trips. Taught alternate years.

GEOL 315 - Surface and Near Surface Processes (4 Credits)
Overview of groundwater, surface water hydrology, sediment transport, river systems, and coastal processes. Includes laboratory and recitation. Required field trips.
Prerequisites: PHYS 201 or PHYS 211.

Graduation with Leadership Distinction: GLD: Research

GEOL 318 - Field Studies in Geology (1 Credit)
Directed field studies of extraordinary geological locations in North America. Requires a seven- to nine-day field trip during spring break.
Prerequisites: GEOL 101, GEOL 103, or GEOL 201 and consent of instructor.

Graduation with Leadership Distinction: GLD: Research

GEOL 325 - Stratigraphy and Sedimentary Basins (4 Credits)
Overview of sedimentary basins, sediment transport, sedimentation, depositional environments, stratigraphy, seismic stratigraphy, eustacy, and sedimentary petrology. Includes laboratory and recitation. Required field trips.
Prerequisites: GEOL 302.
GEOL 335 - Processes of Global Environmental Change (4 Credits)
The science of global change, its relation to the hydrosphere, atmosphere, lithosphere, and biosphere. Global system science, biogeochemical cycles, paleoclimatology, glaciation, and eustacy.
Cross-listed course: MSCI 335

GEOL 345 - Igneous and Metamorphic Processes (4 Credits)
Prerequisites: GEOL 302; MATH 122 or MATH 141.

GEOL 355 - Structural Geology and Tectonics (4 Credits)
Geologic structures and deformation of Earth materials. Stress and strain, deformation mechanisms, P-T-t paths, geologic maps, and structural regimes in plate tectonics. Includes laboratory and recitation. Required field trips.
Prerequisites: GEOL 302; PHYS 201 or PHYS 211.

GEOL 371 - A View of the River (3 Credits)
Introduction to terrestrial and tidal river morphology and processes, with case studies of South Carolina. Field trips required.
Prerequisites: GEOL 101 or GEOL 103 or GEOL 201.

GEOL 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

GEOL 498 - Undergraduate Research (3 Credits)
Student research on problems of regional and fundamental significance, supervised by a faculty member of the student's choice. Emphasis is on the development of critical thinking and lucid scientific report writing.
Graduation with Leadership Distinction: GLD: Research

GEOL 499 - Undergraduate Research (3 Credits)
Student research on problems of regional and fundamental significance, supervised by a faculty member of the student's choice. Emphasis is on the development of critical thinking and lucid scientific report writing.
Graduation with Leadership Distinction: GLD: Research

GEOL 500 - Field Geology (4-6 Credits)
Geological field techniques including the use of field instruments and the preparation of geologic maps. Written and oral reports required.
Prerequisites: GEOL 325 and GEOL 355.

Graduation with Leadership Distinction: GLD: Research

GEOL 501 - Principles of Geomorphology (3 Credits)
The process of earth denudation with emphasis on chemistry of weathering, stream and erosion hydraulics, quantitative analysis of landform evolution.
Prerequisites: GEOL 101 and GEOL 102.

Cross-listed course: MSCI 501

GEOL 502 - Principles of Coastal Geomorphology (4 Credits)
Geological and physical controls on the morphology, development, and stability of coastlines. Analysis of waves and erosional processes, and coastal zone morphodynamics. Several required field trips.
Prerequisite or Corequisite: MATH 122 or MATH 141.

Cross-listed course: MSCI 502

GEOL 503 - Regional Stratigraphy and Biostratigraphy of North America (3 Credits)
Sedimentologic, biostratigraphic, and tectonic history of North America, approached from paleogeographic considerations with emphasis on the Atlantic Coastal Plain and Continental Margin. Three hours lecture and three hours recitation per week. Required field trips.

GEOL 508 - Palynology (3 Credits)
Fundamentals of pollen analysis including morphology of modern and fossil forms, use of pollen and spores for correlation, dating, establishing phylogenetic trends, and reconstruction of ancient environments. Two lectures plus one two-hour lab per week.

GEOL 510 - Organic Sedimentation and Coal Genesis (3 Credits)
Theories of origin of coal deposits and coal-forming ingredients. Basic concepts of coal composition and classification. Practical applications of coal petrographic techniques. Two lectures plus one two-hour lab. Two optional field trips.

GEOL 511 - Advanced Paleontology (3 Credits)
Systematic, ecologic, biogeographic, and evolutionary aspects of paleontology; lectures, practical exercises, field trips.
Prerequisites: GEOL 305.

Cross-listed course: MSCI 511

GEOL 515 - Marine Micropaleontology (4 Credits)
Marine microfossils; distribution, ecology, paleoecology, and biostratigraphy; use of microfossils in marine sediments to study oceanographic history. Three lectures and two laboratory hours per week.
Cross-listed course: MSCI 515

GEOL 516 - Sedimentology (4 Credits)
Modern concepts of sediment composition, sedimentary facies, depositional environments, and stratigraphy. Includes laboratory.
Prerequisites: GEOL 325.

GEOL 518 - Surface to Subsurface Stratigraphy (3 Credits)
Surface to subsurface stratigraphic interpretation and techniques; litho- and biostratigraphy; geophysical log interpretation and subsurface presentation.

GEOL 520 - Isotope Geology and Geochronology (3 Credits)
Dating techniques for Pleistocene deposits, sediments, archaeological materials, igneous and metamorphic rocks.

GEOL 521 - Introduction to Geochemistry (3 Credits)
Investigation of low temperature chemical reactions controlling the geochemistry of the earth's surface. Emphasis on CO2, carbonates, oxidation-reduction, thermodynamics, isotopes, biogeochemistry.
Cross-listed course: MSCI 521

GEOL 524 - Environmental Radioisotope Geochemistry (3 Credits)
Introduction to radioactivity and the use of radionuclides to study environmental processes, including age-dating and biogeochemical cycling in aquatic systems. Two lectures per week.
Prerequisites: CHEM 111, CHEM 112, MATH 141.

GEOL 526 - Igneous Petrology (4 Credits)
Petrology and petrogenesis of igneous rocks; evolution of contrasting petrotectonic terranes. Three lectures and three laboratory hours per week.
Prerequisites: GEOL 202.
GEOL 527 - Metamorphic Petrology (4 Credits)
Petrography and petrogenesis of metamorphic rocks in orogenic belts. Three lectures and three laboratory hours per week.
Prerequisites: GEOL 202.

GEOL 531 - Plate Tectonics (3 Credits)
Geological and geophysical evidence for plate tectonics, detailed development of the plate tectonics model, and present areas of research, including measurements of plate motion using satellite geodesy.
Prerequisites: Must have passed two GEOL courses numbered 300 or above, or consent of instructor.

GEOL 537 - Field Methods in Geophysics (3 Credits)
Application of two or more geophysical field methods to a current geological problem. Independent study contract required.

GEOL 540 - Earth Science for Teachers I (3 Credits)
Survey of topics related to the origin, internal structure, and internal processes of the earth, including plate tectonics, earthquakes, volcanoes, and mountain building. Required field trips, two lectures, and three lab hours per week. Cannot be used in M.S. or PhD. programs in geology.
Cross-listed course: EDSE 548

GEOL 541 - Earth Science for Teachers II (3 Credits)
Surface processes acting on the earth; introduction to weather and climate, weathering, erosion, and sedimentary processes; landform evolution; ocean currents and tides, near-shore geologic processes. Required field trips, two lecture and three lab hours per week. Cannot be used in MS or PhD programs in geology.
Prerequisites: EDSE 548/GEOL 540.

GEOL 542 - Methods in Geoscience Education Research (3 Credits)
Introduction to methods used in discipline-based education research and their application to research questions in the geosciences.
Prerequisites: C or better in least one course in GEOL, ENV, MSCI or GEOG.

GEOL 545 - Geological Oceanography (3 Credits)
A comprehensive study of the origin and development of the major structural features of the ocean basins and the continental margins. Discussion of the techniques used in obtaining geologic data and the interpretation of sedimentary processes, vulcanism, and the stratigraphy of the ocean basins.
Cross-listed course: MSCI 545

GEOL 546 - Marine Geophysics (3 Credits)
Introduction to the nature and structure of the ocean floor as revealed by geophysical techniques. Two hours lecture and three hours laboratory.

GEOL 548 - Environmental Geophysics (4 Credits)
Practical geophysical techniques for exploring the shallow subsurface. Seismic, resistivity, well log, gravity, magnetic method. Includes lectures and field exercises to collect and analyze data.
Prerequisites: MATH 141 and PHYS 201 or PHYS 211.

GEOL 550 - Sedimentary Simulations and Sequence Stratigraphy (4 Credits)
Problems of sequence stratigraphy resolved with graphic computer simulations. Sedimentary fill of basins by carbonates and/or clastics tracked as a function of rate of sediment accumulation, tectonic behavior, and sea level. Includes laboratory.
Prerequisites: GEOL 325.
Cross-listed course: MSCI 550

GEOL 553 - Marine Sediments (3 Credits)
Marine sedimentary environments; physical/biological factors which control the formation and distribution of modern marine sediments.
Prerequisites: GEOL 516.

GEOL 554 - Applied Seismology (3 Credits)
Theory of seismic wave propagation. Seismic reflection data acquisition, processing, and interpretation.
Prerequisites: MATH 141; PHYS 201 or PHYS 211.

GEOL 555 - Elementary Seismology (3 Credits)
Basic elements of seismology. Mathematical development of seismic wave equations; measurement, description, and interpretation of seismic data.
Prerequisites: MATH 241.

GEOL 556 - Seismic Reflection Interpretation (3 Credits)
The interpretation of geologic structure using seismic sections. Recognition of apparent structure caused by velocity anomalies, multiples, and complex reflector geometry. Application to hydrocarbon exploration.

GEOL 557 - Coastal Processes (3 Credits)
Physical and geological processes controlling the formation and evolution of beach, barrier, and nearshore environments, including discussion of coastal management issues.
Cross-listed course: MSCI 557

GEOL 560 - Earth Resource Management (3 Credits)
An approach to problems of resource management by lecture and seminar using case studies in mineral, energy, hydrogeological, and environmental science.

Graduation with Leadership Distinction: GLD: Research
Experiential Learning: Experiential Learning Opportunity

GEOL 561 - Environmental Field Geology (6 Credits)
An introduction to field methods in sedimentology, structural geology, hydrogeology and geophysics with special reference to geological hazards and environmental problems.

GEOL 567 - Long-Term Environmental Change (3 Credits)
Climatic changes of the past and their impact on the physical landscape, with an emphasis on the Quaternary period.
Prerequisites: A 200-level course in physical geography or geology or equivalent.

Cross-listed course: GEOG 567

GEOL 568 - Introduction to Micrometeorology (3 Credits)
Small-scale processes in the atmospheric boundary layers, including energy budget, radiation, soil heat transfer, humidity, viscous flows, turbulence, momentum and heat exchanges, evaporation, and marine atmospheric boundary layer.
Prerequisites: PHYS 201 and MATH 141.

Cross-listed course: MSCI 568

GEOL 570 - Environmental Hydrogeology (3 Credits)
Environmental considerations of the hydrologic cycle, occurrence and movement of ground water, aquifer analysis, and water well emplacement and construction. Water quality, pollution parameters, and the geochemistry of selected natural systems. The effects of environmental problems, waste disposal, and urban development upon the aqueous geochemical regime.
Prerequisites: GEOL 101 and CHEM 111 or their equivalents.
GEOL 571 - Soil Hydrology (4 Credits)
Saturated and unsaturated water flow through soils, pore pressure development, runoff generation, and watershed response to rainfall. Three lecture and three laboratory hours per week.
Prerequisites: PHYS 202 and MATH 142.

GEOL 575 - Numerical Modeling for Earth Science Applications (3 Credits)
Finite difference and finite element methods for solving the diffusion equation and advection-dispersion equation, with applications in hydrogeology, geophysics, geology, and marine science.
Prerequisites: MATH 142; MATH 241 is recommended.

GEOL 579 - Air-Sea Interaction (3 Credits)
The physical mechanism responsible for interaction between the ocean and the atmosphere and the influence of air-sea interaction on atmospheric and oceanic dynamics and thermodynamics on a wide variety of spatial/temporal scales.
Cross-listed course: MSCI 579

GEOL 580 - Satellite Oceanography (3 Credits)
This course provides knowledge of various techniques used in satellite remote sensing of the ocean. Key skills will be developed in satellite data processing, image analysis, and hands-on research.
Cross-listed course: MSCI 580

GEOL 581 - Estuarine Oceanography (3 Credits)
Estuarine kinematics and dynamics; classification of estuaries; estuarine circulation and mixing. Scheduled field trips are required.
Prerequisites: MSCI 314.

Cross-listed course: MSCI 581

GEOL 582 - Marine Hydrodynamics (3 Credits)
Basic principles of fluid statics and dynamics. Conservation of mass, momentum, and energy; viscosity, vorticity, and boundary layers with examples from the marine environment. Applications to and analysis of ocean currents and waves. Scheduled field trips are required.
Prerequisites: differential equations, PHYS 201 or PHYS 211.

Cross-listed course: MSCI 582

GEOL 583 - Geology and Geochemistry of Salt Marshes (3 Credits)
Geological and geochemical processes in salt marshes. Methods of geological research in marshes, including instrumental techniques, sampling design, and data analysis. Two lectures per week plus four weekends of project-oriented fieldwork and/or equivalent lab work. Scheduled field trips are required.
Cross-listed course: MSCI 583

GEOL 600 - Senior Seminar in Geology and Geophysics (2 Credits)
Advanced research topics in geology and geophysics; critical reading of literature, technical presentations, and written reports. Senior standing.

GEOL 650 - Electron Microscopy and Microanalysis (4 Credits)
SEM, ESEM, TEM, and EMPA, WDS quantitative analysis, EDS semi-quantitative analysis, EBSD, methods of sample preparation, and applications in various disciplines. Two lecture and three laboratory hours per week.
Prerequisites: CHEM 111 or equivalent.

GEOL 699 - Senior Thesis (3-6 Credits)
Senior capstone experience, research on a problem on fundamental significance, supervised by faculty member; must include field study component, written final project report, and oral presentation at departmental seminar.

MSCI 101 - The Ocean Environment (4 Credits)
Origin and evolution of the oceans, plate tectonics, ocean circulation, waves and tides, seawater and sediment composition, and influences on biology. Three lecture and three laboratory hours per week. Scheduled field trips required.
Carolina Core: SCI

MSCI 102 - The Living Ocean (4 Credits)
Origin, evolution, and diversity of marine life, biological production, trophic dynamics, nutrient cycles, marine resources, and environmental concerns. Three lecture and three laboratory hours per week. Scheduled field trips required.
Carolina Core: SCI

MSCI 210 - Oceans and Society (3 Credits)
A nontechnical introduction to human interactions with the marine environment: marine organisms, marine systems, and the physical and chemical characteristics of oceans and estuaries. Not available for marine science major credit.
Carolina Core: SCI

MSCI 210L - Oceans and Society Laboratory (1 Credit)
Experiments and exercises which illustrate how specific components of marine environments are structured, function, and can be measured. Two laboratory hours per week. Not available for marine science major credit. Attendance on designated field trips may be required.
Prerequisite or Corequisite: MSCI 210.
Carolina Core: SCI

MSCI 215 - Coastal Environments of the Southeastern US (3 Credits)
Coastal zones of South Carolina and neighboring states, including geologic history, geomorphology, stratigraphy, hydrogeology, shoreline processes, environmental issues, and effect of man. Three lecture hours each week plus optional field trips. Not available for marine science major credit.
Carolina Core: SCI

MSCI 215L - Coastal Environments of the Southeastern U.S. (Laboratory) (1 Credit)
Exercises examining coastal ecology, geomorphology, hydrogeology, shoreline processes, environmental issues, and human impact. Two laboratory hours per week. Scheduled field trips required. Not available for marine science major credit.
Prerequisite or Corequisite: MSCI 215.
Cross-listed course: GEOL 215L
Carolina Core: SCI

MSCI 305 - Ocean Data Analysis (3 Credits)
Instrumentation, oceanographic time series, spatial and directional data sets, and basic parametric modeling.
Prerequisites: MSCI 101 and MATH 141.

Graduation with Leadership Distinction: GLD: Research

MSCI 311 - Biology of Marine Organisms (4 Credits)
Biological concepts emphasizing adaptation to marine environments. Laboratory experiments emphasize principles and techniques of marine biological study. Three lecture and three laboratory hours per week. Scheduled field trips are required.
Prerequisites: MSCI 102 or BIOL 101.
MSCI 312 - Physical and Chemical Oceanography (4 Credits)
Properties of seawater, mass balances, biogeochemical cycles, circulation, mixing, waves and tides, continental shelf processes, estuarine dynamics. Three lecture and three laboratory hours per week. Scheduled field trips are required.
Prerequisites: MSCI 101, MSCI 102, MATH 142, CHEM 112, PHYS 201 or PHYS 211.

MSCI 313 - The Chemistry of the Sea (4 Credits)
Biogeochemical cycling, carbonate chemistry, climate change, hydrothermal vents, stable isotopes, trace metals, radioactive tracers, mass balance, and properties of sea water. Three lecture and three laboratory hours per week.
Prerequisites: MSCI 101, CHEM 111, MATH 141.

Prerequisite or Corequisite: CHEM 112.

MSCI 314 - Physical Oceanography (4 Credits)
Properties of seawater, mass and momentum balances, circulation, mixing, waves and other processes in the marine environment.
Prerequisites: MSCI 101, MATH 141 and PHYS 201 or PHYS 211.

MSCI 335 - Processes of Global Environmental Change (4 Credits)
The science of global change, its relation to the hydrosphere, atmosphere, lithosphere, and biosphere. Global system science, biogeochemical cycles, paleoclimatology, glaciation, and eustacy.
Cross-listed course: GEOL 335

MSCI 375 - The Deep Sea (3 Credits)
The Deep Sea is an interdisciplinary, scientific survey of the geology, biology, chemistry, and physical setting of the deep-sea (more than 1000 m depth).

MSCI 390 - Policy and Marine Science (3 Credits)
Analysis of past and current issues in global and national marine policy. Relationship between science and policymakers.

MSCI 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

MSCI 450 - Principles of Biological Oceanography (3 Credits)
Principles and methods of measuring production in the sea. Emphasis on the ocean's role in the global carbon budget. Three lecture hours per week. Scheduled field trips are required.
Prerequisites: MSCI 311, BIOL 301.

Cross-listed course: BIOL 450

MSCI 460 - Field and Laboratory Investigations in Marine Science (4 Credits)
Intensive inquiry-based investigations combining oceanographic field sampling with laboratory measurements of collected samples using modern analytical instrumentation, and with analysis and integration of data into a final research report. Course conducted in residence at a marine field site.
Prerequisites: MSCI 311, MSCI 313 and MSCI 314.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships, GLD: Research

MSCI 495 - Internship in Marine Science (0-6 Credits)
Internship experience that offers practical field or laboratory experience in oceanography and/or related marine sciences. Course content varies and will be announced by title in schedule of courses. Usually conducted off campus and student must be able to access internship on their own.
Prerequisites: C or better in MSCI 311, MSCI 313 and MSCI 314.

MSCI 496 - Undergraduate Research (3 Credits)
Student research on problems of fundamental significance in collaboration with faculty mentors. Emphasis on critical thinking, problem solving, proposal development, scientific writing, and professional presentation. Nine hours of laboratory, field, or library work per week.
Graduation with Leadership Distinction: GLD: Research

MSCI 497 - Undergraduate Research (3 Credits)
Student research on problems of fundamental significance in collaboration with faculty mentors. Emphasis on critical thinking, problem solving, proposal development, scientific writing, and professional presentation. Nine hours of laboratory, field, or library work per week.
Graduation with Leadership Distinction: GLD: Research

MSCI 498 - Undergraduate Research (3 Credits)
Student research on problems of fundamental significance in collaboration with faculty mentors. Emphasis on critical thinking, problem solving, proposal development, scientific writing, and professional presentation. Nine hours of laboratory, field, or library work per week.
Graduation with Leadership Distinction: GLD: Research

MSCI 499 - Undergraduate Research (3 Credits)
Student research on problems of fundamental significance in collaboration with faculty mentors. Emphasis on critical thinking, problem solving, proposal development, scientific writing, and professional presentation. Nine hours of laboratory, field, or library work per week.
Graduation with Leadership Distinction: GLD: Research

MSCI 501 - Principles of Geomorphology (3 Credits)
The process of earth denudation with emphasis on chemistry of weathering, stream and erosion hydraulics, quantitative analysis of land form evolution.
Prerequisites: GEOL 101 and GEOL 102.

Cross-listed course: GEOL 501

MSCI 502 - Principles of Coastal Geomorphology (4 Credits)
Geological and physical controls on the morphology, development, and stability of coastlines. Analysis of waves and erosional processes, and coastal zone morphodynamics. Several required field trips.
Prerequisite or Corequisite: MATH 122 or MATH 141.

Cross-listed course: GEOL 502

MSCI 503 - Environmental Microbiology (3 Credits)
An overview of the microbial world including a survey of the distribution, functioning, and diversity of microorganisms in natural systems. Discusses the crucial roles that microorganisms play in ecosystem function, biogeochemical cycles, and environmental quality.
Prerequisites: MSCI 102 or BIOL 102, CHEM 112.

Cross-listed course: BIOL 502

MSCI 505 - Senior Seminar (1 Credit)
MSCI 509 - MATLAB-Based Data Analysis in Ocean Sciences (3 Credits)
MATLAB-based course in processing, analysis, and visualization of large oceanographic data sets. Includes scalar and vector time series measured at fixed locations as well as shipboard surveys of oceanographic characteristics varying both in 3-D and in time. Methods and techniques are relevant to other geoscience disciplines.
Prerequisites: MATH 141.

MSCI 510 - Invertebrate Zoology (4 Credits)
Phylogenetic and comparative aspects of anatomy, physiology, reproduction, and embryology of the invertebrates. Three lecture and one three-hour laboratory period per week.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 510
Graduation with Leadership Distinction: GLD: Research

MSCI 511 - Advanced Paleontology (3 Credits)
Systematic, ecologic, biogeographic, and evolutionary aspects of paleontology. Lectures, practical exercises, occasional field trips.
Prerequisites: GEOL 311.

Cross-listed course: GEOL 511

MSCI 515 - Marine Micropaleontology (4 Credits)
Marine microfossils; distribution, ecology, paleoecology, and biostratigraphy; use of microfossils in marine sediments to study oceanographic history. Three lectures and two laboratory hours per week.
Cross-listed course: GEOL 515

MSCI 521 - Introduction to Geochemistry (3 Credits)
Investigation of low temperature chemical reactions controlling the geochemistry of the earth's surface. Emphasis on CO2, carbonates, oxidation reduction, thermodynamics, isotopes, biogeochemistry.
Cross-listed course: GEOL 521

MSCI 524 - Environmental Radioisotope Geochemistry (3 Credits)
Introduction to radioactivity and the use of radionuclides to study environmental processes, including age-dating and biogeochemical cycling in aquatic systems. Two lectures per week.
Prerequisites: CHEM 111, CHEM 112, MATH 141.

MSCI 525 - Marine Plants (4 Credits)
Diversity, distribution, physiology, ecology, evolution, and economic importance of marine algal, seagrass, and mangrove communities. Three lecture and three laboratory hours per week. Scheduled field trips are required.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 525

MSCI 525 - Fishery Management (3 Credits)
Management and conservation of aquatic and marine resources, with emphasis on fisheries. Data procurement and analysis; commercial and recreational fisheries; sociological, political, legal, and environmental factors that affect fishery management; and fish biodiversity.
Prerequisites: BIOL 301.

Cross-listed course: BIOL 535

MSCI 536 - Ichthyology (4 Credits)
Phylogeny, morphology, behavior, and ecology of fishes. Three lecture and 3 laboratory hours plus three field trips to be arranged.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 536
Graduation with Leadership Distinction: GLD: Research

MSCI 537 - Aquaculture (3 Credits)
Introduction to the practical and scientific aspects of the commercial culture of freshwater and marine organisms. Three lecture hours per week. One all-day field trip required.
Prerequisites: BIOL 301 or MSCI 311.

MSCI 538 - Behavior of Marine Organisms (4 Credits)
The identification of behavioral adaptations of estuarine and marine organisms: their ecology, physiology, development, and evolutionary history; field observations.
Prerequisites: BIOL 101 and BIOL 102 or MSCI 311.

Cross-listed course: BIOL 538
Graduation with Leadership Distinction: GLD: Research

MSCI 545 - Geological Oceanography (3 Credits)
A comprehensive study of the origin and development of the major structural features of the ocean basins and the continental margins. Discussion of the techniques used in obtaining geologic data and the interpretation of sedimentary processes, vulcanism, and the stratigraphy of the ocean basins.
Cross-listed course: GEOL 545

MSCI 550 - Sedimentary Simulations and Sequence Stratigraphy (4 Credits)
Problems of sequence stratigraphy resolved with graphic computer simulations. Sedimentary fill of basins by carbonates and/or clastics tracked as a function of rate of sediment accumulation, tectonic behavior and sea level. Includes laboratory.
Prerequisites: GEOL 301.

Cross-listed course: GEOL 550

MSCI 552 - Population Genetics (3 Credits)
An introduction to the principles of population genetics, with emphasis on the origin, maintenance, and significance of genetic variation in natural populations.
Prerequisites: BIOL 301, MSCI 311, and BIOL 303.

Cross-listed course: BIOL 552
Graduation with Leadership Distinction: GLD: Research

MSCI 553 - Marine Sediments (3 Credits)
Marine sedimentary environments; physical/biological factors which control the formation and distribution of modern marine sediments.
Prerequisites: GEOL 516.

Cross-listed course: GEOL 553

MSCI 555 - Conservation and Health in Marine Systems (3 Credits)
Introduces the field of conservation and explores the intersection between conservation and environmental health with a particular focus on coastal and marine case studies.

MSCI 557 - Coastal Processes (3 Credits)
Physical and geological processes controlling the formation and evolution of beach, barrier, and nearshore environments, including discussion of coastal management issues.
Cross-listed course: GEOL 557
MSCI 566 - Ecosystem Analysis (3 Credits)
The formulation and simulation of compartment models of marine and terrestrial ecosystems with complex nutrient cycling, food chains, and energy flow. Analog and digital simulation techniques. Ecosystem stability and sensitivity. Organization, structure, and diversity of an ecosystem.

MSCI 568 - Introduction to Micrometeorology (3 Credits)
Small-scale processes in the atmospheric boundary layers, including energy budget, radiation, soil heat transfer, humidity, viscous flows, turbulence, momentum and heat exchanges, evaporation, and marine atmospheric boundary layer.
Prerequisites: PHYS 201 and MATH 141.

Cross-listed course: GEOL 568

MSCI 574 - Marine Conservation Biology (3 Credits)
Exploration of how human activities affect marine natural populations, species, communities and ecosystems, including threats to biodiversity; approaches to marine conservation; and ecological and evolutionary responses to anthropogenic disturbance.
Prerequisites: BIOL 301.

Cross-listed course: BIOL 574

MSCI 575 - Marine Ecology (3 Credits)
Structure, dynamics, and interactions between populations and communities in marine ecosystems. Attendance at designated departmental seminars is required. Three lecture hours per week.
Prerequisites: CHEM 111 and BIOL 301 or MSCI 311.

Cross-listed course: BIOL 575

MSCI 575L - Marine Ecology Laboratory (1 Credit)
Laboratory and field exercises in coastal environments. Three hours per week plus field trips.
Prerequisite or Corequisite: MSCI 575.

Cross-listed course: BIOL 575L

MSCI 576 - Marine Fisheries Ecology (3 Credits)
Interdisciplinary examination of the distribution, reproduction, survival, and historical variation of the principal commercial marine fisheries.
Prerequisites: BIOL 301.

Cross-listed course: BIOL 576

MSCI 577 - Ecology of Coral Reefs (4 Credits)
Structure, productivity, and biodiversity of coral reefs, emphasizing their sensitivity, stability, and sustainability. Taught as an extended field experience with daily lectures and guided research activities.
Prerequisites: BIOL 301 or MSCI 311.

Cross-listed course: BIOL 577

MSCI 578 - Physiological and Pollution Ecology of Marine Organisms (3 Credits)
Functional adaptation of marine plants and animals to ecological stresses including pollution. Three lecture hours per week.
Prerequisites: MSCI 311 or equivalent.

Cross-listed course: BIOL 578

MSCI 579 - Air-Sea Interaction (3 Credits)
The physical mechanism responsible for interaction between the ocean and the atmosphere and the influence of air-sea interaction on atmospheric and oceanic dynamics and thermodynamics on a wide variety of spatial/temporal scales.
Cross-listed course: GEOL 579

MSCI 580 - Satellite Oceanography (3 Credits)
This course provides knowledge of various techniques used in satellite remote sensing of the oceans. Key skills will be developed in satellite data processing, image analysis, and hands-on research.
Cross-listed course: GEOL 580

MSCI 581 - Estuarine Oceanography (3 Credits)
Estuarine kinematics and dynamics; classification of estuaries; estuarine circulation and mixing. Scheduled field trips are required.
Prerequisites: MSCI 314.

Cross-listed course: GEOL 581

MSCI 582 - Marine Hydrodynamics (3 Credits)
Basic principles of fluid statics and dynamics. Conservation of mass, momentum, and energy; viscosity, vorticity, and boundary layers with examples from the marine environment. Applications to and analysis of ocean currents and waves.
Prerequisites: differential equations, PHYS 201 or PHYS 211.

Cross-listed course: GEOL 582

MSCI 583 - Geology and Geochemistry of Salt Marshes (3 Credits)
Geological and geochemical processes in salt marshes. Methods of geological research in marshes including instrumental techniques, sampling design, and data analysis. Two lectures per week plus four weekends of project oriented fieldwork and/or equivalent lab work. Scheduled field trips are required.
Cross-listed course: GEOL 583

MSCI 585 - Coastal Tropical Oceanography (4 Credits)
Descriptive oceanography of mangrove and coral reef coasts with emphasis on physical processes. Taught as an extended field experience with daily lectures and guided research activities.
Prerequisites: MSCI 312.

MSCI 590 - Beach-Dune Interactions (3 Credits)
Influence of wind on coastal systems, with emphasis on nearshore currents, sediment transport and bedforms, aeolian transport, and dunes. Minimum Junior standing required.
Cross-listed course: GEOG 590

MSCI 599 - Topics in Marine Science (1-3 Credits)
Current developments in marine science selected to meet faculty and student interests. Course content varies and will be announced by title in schedule of courses.

MSCI 624 - Aquatic Chemistry (3 Credits)
Study of the chemical reactions and processes affecting the distribution of chemical species in natural systems. Three lecture hours per week.
Prerequisite or Corequisite: CHEM 321, MATH 142.

Cross-listed course: CHEM 624

MSCI 627 - Marine Phytoplankton (3 Credits)
Examines the physiology and ecology of phytoplankton, including environmental controls on community composition, primary productivity, and detection and characterization of water quality (eutrophication) and harmful algal blooms.
Prerequisites: MSCI 102 or MSCI 450 or BIOL 450.

Cross-listed course: BIOL 627
Environmental Science, B.S.

Learning Outcomes

• Students will demonstrate their knowledge of fundamental concepts in environmental sciences.
• Students will be able to utilize information from more than one discipline related to environmental science, and be able to synthesize that information to analyze interdisciplinary environmental problems.
• Students will demonstrate strong analytical writing skills.
• Students will demonstrate strong oral communication skills.

Admission, Progression and Transfer Standards

1. Any student applying for transfer to the environmental science major from other programs within the University, or from accredited colleges and universities, is required to have a minimum grade point average of 2.80 on a 4.00 scale.

2. Environmental Science majors may enroll in an environmental science course a maximum of two times to earn the required grade of C or higher. For the purposes of this standard of progression, withdrawal with a W does not constitute enrollment.

Special Opportunities

The major endorses the use of independent study courses to further students’ intellectual pursuits in alternative ways. Before students may register for an independent study course, they must submit a completed independent study contract which has been approved by the major advisor and the Director of Undergraduate Studies. (No student may apply more than 6 hours of independent study credits toward the degree). A grade-point average of 2.5 or greater is required to enroll in independent study courses.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

</tr>
</tbody>
</table>

1. Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• ENGL 101
• ENGL 102

ARP – Analytical Reasoning and Problem Solving (8 hours)

• MATH 141 must be passed with a grade of C or higher
• MATH 142

SCI – Scientific Literacy (8 hours)

• BIOL 101 & BIOL 101L or MSCI 101
• BIOL 102 & BIOL 102L or MSCI 102

Note: Must take either both BIOL or both MSCI.

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• POLI 201

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)
CMS – Effective, Engaged, and Persuasive Communication: Spoken Component¹ (0-3 hours)
  • any overlay or stand-alone CC-CMS (p. 742) course

INF – Information Literacy¹ (0-3 hours)
  • any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility¹ (0-3 hours)
  • fulfilled through POLI 201, an overlay course with GSS, or may be filled by any overlay or stand-alone CC-VSR course

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
  • only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

¹ Pre-major course that must be completed before taking major courses.
² Must be passed with a grade of C or higher.

Minor (18 hours) optional

A student in the Environmental Science major may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.
A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (1-18 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (34-36 hours)
A minimum grade of C is required in all major courses.

Major Courses (17-18 hours)
All majors must complete at least 34-36 hours of approved courses which must include the core requirements of 17-18 hours. Majors must complete 17-18 additional hours in major elective courses to bring them to the required 34-36 hours total. Students are required to develop a program of study in consultation with their advisor. A minimum grade of C is required for all courses used to fulfill major requirements. Any modifications to the program of study must require the approval of the Director of Undergraduate Studies.

Total Credit Hours
17-18

Major Electives (17-18 hours)
Students, in consultation with their assigned advisor, must develop a program of study which either provides a broad set environmental science courses or allows students to focus in a defined area. Given the current course offerings and faculty expertise at the University, if a student wanted to focus their elective course work, possible areas include: Natural Systems, Climate and Weather, Water Resources, Energy, or Humans and the Environment. All Students’ selective courses should include at least 6 hours taken at the 400 level or above. All courses may be selected from ENVR designator classes, but if not ENVR classes, then no more than 3 should be from a single discipline and no more than one Research Methods course.

ENHS 665 Biofilms in Environmental Health and Disease 3
ENHS 670 Environmental Pollutants and Human Health 3

Research Methods Courses
Not required, but if selected, only one of these three may be taken for credit towards the major.
Course  Title  Credits
CSCE 145 Algorithmic Design I 4
ECIV 111 Introduction to Engineering Graphics and Visualization 3
EMCH 111 Introduction to Computer-Aided Design 3

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.
Environmental Science, B.S.

Environmental Studies Minor

The minor in Environmental Studies consists of a minimum of 18 hours. Four courses (12-13 hours) make up the required core. The remaining hours (six) must come from the approved course list. Students wishing to enter the Environmental Studies minor must first complete ENVR 101 and ENVR 101L as a prerequisite. A course in Statistics (STAT 110 or equivalent) is strongly recommended. All prerequisite courses may be used to meet general education requirements, if applicable. Students enrolled in the College of Arts and Sciences and College of Engineering and Computing must choose their remaining hours from the courses listed below specifically for them. Students enrolled in other colleges should choose their remaining hours from the courses listed specifically for them. No courses will be allowed to count for both the minor in Environmental Studies and the student’s major. South Carolina Honors College students are encouraged to pursue this course of study, but Honors Pro-seminars in environmentally related subjects used for credit toward the major must be approved by the Environment and Sustainability Undergraduate Committee.

A student may pursue a minor in Environmental Studies with the academic advisor's approval. The student must declare the selection of the minor in the office of the student's major academic dean.

Environmental Studies, B.A.

Learning Outcomes

- Students will demonstrate their knowledge of fundamental concepts in environmental studies.
- Students will be able to utilize information from more than one discipline related to environmental studies, and be able to synthesize that information to analyze interdisciplinary environmental problems.
- Students will demonstrate effective writing skills.
- Students will demonstrate effective oral communication skills.

Admission, Progression and Transfer Standards

Environmental Studies majors may enroll in a course for major credit a maximum of twice to earn the required grade of C or higher. For the purposes of this standard of progression, withdrawal with a W does not constitute enrollment.

Special Opportunities

The major endorses the use of independent study courses to further students’ intellectual pursuits in alternative ways. Before students may register for an independent study course, they must submit a completed independent study contract which has been approved by their major advisor and the Director of Undergraduate Studies. No student may apply more than 6 hours of independent study credits toward the degree. A grade-point average of 2.50 or greater is required to enroll in independent study courses.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

<tr>
<td>2. College Requirements</td>
<td>15-18</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>21-37</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>36-37</td>
</tr>
</tbody>
</table>

1. Carolina Core (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher and completed in the first 60 hours

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (https://academicbulletins.sc.edu/undergraduate/carolina-core-courses/)

SCI – Scientific Literacy (8 hours)

Select two from the following:

- BIOL 101 & BIOL 101L or MSCI 102
- BIOL 102 & BIOL 102L
- CHEM 111 & CHEM 111L
- GEOL 101
- GEOL 103
- MSCI 101
- MSCI 210
- PHYS 201 & PHYS 201L or PHYS 211 & PHYS 211L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)
AIU – Aesthetic and Interpretive Understanding (3 hours)
  • any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
  • any overlay or stand-alone CC-CMS (p. 742) course

INF – Information Literacy 1 (0-3 hours)
  • any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
  • any overlay or stand-alone CC-VSR course (https://academicbulletins.sc.edu/undergraduate/carolina-core-courses/)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
  • only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

  • One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

  or

  • One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GER M 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

  • Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

  • Select 3 hours of Social Science

  • Select 9 hours of Fine Arts or Humanities

3. Program Requirements (21-37 hours)

Supporting Courses (4 hours)

Select one additional science from the following:

<table>

</tr>
</tbody>
</table>

Total Credit Hours 4

Note: BIOL 301 is required for MSCI 311

Minor (18 hours) Optional

A student in the Environmental Studies major may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (13-30 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (36-37 hours)

A minimum grade of C is required in all major courses
Major Courses (27 hours)

All majors must complete at least 36-37 hours of approved courses, including the core requirements of 27 hours. Majors must complete enough additional hours from the selected courses to bring them to the required 36-37 hours total. Students are required to develop a program of study in consultation with their advisor. A minimum grade of C is required for all courses used to fulfill major requirements.

Please see current University of South Carolina undergraduate course catalog for information about prerequisites required to enroll in many of these courses.

Total Credit Hours 24-25

Major Electives (minimum 12 hours)

Students, in consultation with their advisor, will develop a program of study to meet their educational goals in environmental studies courses.

- Students should select four courses from the list of major courses.
  - At least six hours must be at 400-level or above.
  - At least six hours must have an ENVR designator above ENVR 230.

Geological Sciences, B.S.
The Bachelor of Science degree in Geological Sciences concerns the study of the dynamics and physical history of the Earth, the rocks of which it is composed, and its physical, chemical, and biological changes.

Learning Outcomes

- Students will demonstrate their knowledge of fundamental concepts and laboratory skills in the geosciences by responding to written and laboratory-practical exam questions in at least one of the following courses: GEOL 302, GEOL 305, GEOL 315, GEOL 325, GEOL 335, GEOL 345 and GEOL 355.
- Students will demonstrate knowledge of geological field skills by demonstrating a competency at the proficiency level on a geologic mapping exercise, preferably the Sheep Mountain project, in GEOL 500.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Carolina Core</td>
<td>34-46</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>15-18</td>
</tr>
</tbody>
</table>
1. Carolina Core Requirement (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• MATH 122 or MATH 141
• MATH 170 or MATH 142

SCI – Scientific Literacy (8 hours)

• CHEM 111 & CHEM 111L
• PHYS 201 & PHYS 201L or PHYS 211 & PHYS 211L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)
any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)

• STAT 201 or STAT 509 or STAT 515
• CSCE 102 (or equivalent) or higher

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)

Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)

• Three hours of Social Science
• Three hours of Fine Arts or Humanities

3. Program Requirements (24-46 hours)

Supporting Courses (12 hours)

The minor is intended to develop a coherent basic preparation in a
second area of study. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

Minors are available in participating departments of the College of Arts and Sciences and in other colleges. For descriptions of specific minors, students should see the appropriate sections of the bulletin.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (0-22 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (27-43 hours)**

*a minimum grade of C is required in all major courses*

Degree with Distinction in Geological Sciences
Available to students majoring in Geological Sciences who wish to participate in significant research activities in their major field under the supervision of a faculty mentor. Students who successfully fulfill all of these requirements will be awarded their degree with “Distinction in Geological Sciences” upon graduation. South Carolina Honors College students taking this route would graduate with both Honors in SCHC and “Distinction in Geological Sciences”.

Requirements:
- A minimum GPA of 3.5 in the major and 3.3 institutional.
- A written sponsorship agreement from the faculty mentor on file in the department.
- Public presentation of the Senior Thesis research accompanied by a written document approved by the faculty mentor and a second reader that follows the guidelines of the School of the Earth, Ocean and Environment.
- 3 courses (9 hours) in addition to the general major requirements, including:
  - GEOL 498 or GEOL 499
  - GEOL 699
  - A minimum of one GEOL 500-level course appropriate to the research

Major Map

Geophysics Minor
Designed for students interested in obtaining an in-depth background in the geophysical techniques and how they apply to the study of the Earth. It targets students interested in expanding their quantitative skills to the understanding of the environment, land and ocean resources, natural hazards, and mountain building.

Geophysics, B.S.
The Bachelor of Science degree in Geophysics concentrates on the branch of geology that deals with the physics of the earth, including oceanography, seismology, volcanology, and geomagnetism.

Learning Outcomes
- Students will demonstrate their knowledge of fundamental concepts and laboratory skills in the geosciences by responding to written and laboratory-practical exam questions in at least one of the following GEOL 302, GEOL 325, GEOL 345, GEOL 355, GEOL 531, GEOL 556, GEOL 554, GEOL 555, GEOL 575 and GEOL 582.
- Students will demonstrate knowledge of geological field skills by showing a competency at the proficiency level on a geologic field exercise. In the Geophysics courses GEOL 548 and GEOL 554, the field exercise will include a class field project using seismic data and solving a particular geologic problem, such as fault identifications or the presence of sinkholes. For students enrolling in GEOL 500, the field exercise will be a mapping exercise, the Sheep Mountain project.
- Students will demonstrate their preparation for careers or graduate studies in the geosciences.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (128 hours)

1. Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (8 hours)

must be passed with a grade of C or higher

• MATH 141
• MATH 142

SCI – Scientific Literacy (8 hours)

• PHYS 211 & PHYS 211L
• PHYS 212 & PHYS 212L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.
Social Science and Fine Arts or Humanities (6 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities

Total Credit Hours 13-14

Electives (4-20 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Note: No electives will be needed to reach hours to graduate if completing the Degree with Distinction.

4. Major Requirements (34 hours)
a minimum grade of C is required in all major courses

¹ An approved field course may substitute as the Capstone Experience.

Degree with Distinction in Geophysics
Available to students majoring in Geophysics who wish to participate in significant research activities in their major field under the supervision of a faculty mentor. Students who successfully fulfill all of these requirements will be awarded their degree with “Distinction in Geophysics” upon graduation. South Carolina Honors College students taking this route would graduate with both Honors in SCHC and “Distinction in Geophysics”.

Requirements:
• A minimum GPA of 3.5 in the major and 3.3 overall.
• A written sponsorship agreement from the faculty mentor on file in the department.
• Public presentation of the Senior Thesis research accompanied by a written document approved by the faculty mentor and a second reader that follows the guidelines of the School of the Earth, Ocean and Environment.
• 2 courses (6 hours) in addition to the general major requirements, including:
  • GEOL 498 or GEOL 499
  • GEOL 699

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation. Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Geophysics, B.S.

Additional Courses (6 Hours)

• An additional 6 credit hours of Marine Science Major Courses must also be completed for a total of 18 credit hours numbered 301 and above. Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or better.

Marine Science, B.S.

Learning Outcomes

• Students will demonstrate that they understand the scientific process by testing hypotheses related to Marine Science in an inquiry based, hands on setting.
• Students will demonstrate critical thinking skills using the scientific method.
• Students will demonstrate the ability to conduct independent research.
• Students will demonstrate effective oral communication of Marine Science topics by giving an oral presentation.
• Students will communicate and summarize their research findings effectively in writing (such as on a poster or in an abstract) on Marine Science topics.

Progression Requirement

Marine Science majors may enroll in the following courses a maximum of twice to earn the required grade of C or higher: MATH through MATH 142, CHEM 111, CHEM 111L, CHEM 112, CHEM 112L, PHYS 201/PHYS 201L or PHYS 211/PHYS 211L, PHYS 202/PHYS 202L, or PHYS 212/PHYS 212L. For the purposes of this standard of progression, withdrawal with a W does not constitute enrollment. These courses must be completed before the beginning of the student’s third academic year (fifth major semester) as a marine science major.

Transfer Requirement

Any student applying for transfer to the marine science major from other programs within the University, or from other accredited colleges and universities, is required to have a minimum overall grade point average of 2.50 on a 4.00 scale.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Required Field Experience 1

Total Credit Hours 13

1 All MSCI majors are required to undertake a minimum of three weeks of marine science field effort. Possibilities include MSCI 460, semester or summer internship, REU, semester at sea, or faculty-sponsored field research or cruise. Students who do not select MSCI 460, must submit a petition for an alternative field experience to the Undergraduate Director. If the alternative is approved, the student must submit a report (2-3 page minimum) report at the completion of the experience to the Undergraduate Director for approval. Upon approval, the Undergraduate Director will notify the Dean’s office of the substitution. Students will not normally receive course credit hours for their alternative field experience, but may combine this requirement with independent study credit as appropriate. If no course credit hours are associated with the field experience, the student will be required to undertake a field experience of 20 hours minimum. Some students may complete MSCI 460 in the summer following senior year & graduate in August.

Major Electives (23 hours)

Students, in consultation with a faculty advisor, must select 23 hours of major electives. Preferred courses available for major credit are listed below; however, any course which is eligible for cognate credit in the College of Arts and Sciences can potentially be a major course with consent of faculty advisor. Hours used to fulfill an optional concentration count toward the fulfillment of the 23 hours of major electives, e.g., students selecting Biological Oceanography would fulfill 13 hours of the 23 hours of required major electives.

1 A maximum of 10 hours of independent study, seminar, and undergraduate research courses may count in the 23 hours of major electives required for the Marine Science major.

Note: Credit for a degree will not be given for both CHEM 340 and CHEM 541.

### Concentrations (12-15 hours)

Students may elect to have a Concentration specified directly on their academic transcript upon graduation from the Marine Science Program. In order to earn a Concentration certification, students must take the following courses, with an additional course(s) to be decided upon by the student and his or her Faculty Advisor. These courses may also be included in the 36 major credit hours required for graduation.

#### Biological Oceanography (13 hours minimum)

<table>

</tr>
<tr>
<td>MSCI 582</td>
<td>Marine Hydrodynamics</td>
<td></td>
</tr>
<tr>
<td>MSCI 590</td>
<td>Beach-Dune Interactions</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credit Hours:** 12

1. Courses are taught alternate years. Please check teaching schedule.

2. Students in the Physical Oceanography concentration must take PHYS 211 & PHYS 211L and PHYS 212 & PHYS 212L.

---

### Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.
Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Marine Science, B.S.**
- No Concentration
- Biological Oceanography Concentration
- Chemical Oceanography Concentration
- Coastal Resource Mgmt. & Marine Policy Concentration
- Geological Oceanography Concentration
- Physical Oceanography Concentration

**School of Visual Art and Design**
Website Department (http://www.cas.sc.edu/art/)
Laura Kissel, Director

**Degree Programs**
The Bachelor of Arts degree is available with majors in art history, art studio, and media arts. A Bachelor of Fine Arts degree is offered in art studio and art education. The art education BFA is designed for students who seek certification to teach art in K-12 settings. The Bachelor of Fine Arts in art studio offers concentrations in: ceramics, drawing, graphic design, painting, photography, printmaking, and 3D/sculpture.

The School of Visual Art and Design offers four major areas of study and several degrees in the fields of ART EDUCATION, ART HISTORY, ART STUDIO, and MEDIA ARTS.

Students pursuing a degree in ART EDUCATION receive broad exposure to studio art, art history, education, critical perspectives and aesthetics, and can earn certification to teach art in K-12 schools.

The ART HISTORY program offers courses in art and architecture across cultures and from antiquity to the present. Students develop skills in research, analysis, criticism, and theory.

ART STUDIO encompasses seven areas of studio specialization within the BFA degree: ceramics, drawing, graphic design, painting, photography, printmaking, and 3D/sculpture.

Students pursuing a degree in MEDIA ARTS study media practices and global media cultures in courses where they analyze and produce media such as films, video games, manga, animations, internet art, mobile applications, screenplays, and more.

Interested in film production? (https://sc.edu/study/majors_and_degrees/media_arts.php)

Interested in film studies? (https://sc.edu/study/majors_and_degrees/media_arts.php)

**Honors Sections**
The School of Visual Art and Design participates in the University’s Honors College. Each year, one or more sections of art, media, or art history courses are generally offered for honors students.

**Scholarships**
A limited number of competitive scholarships are available for School of Visual Art and Design majors, including incoming freshmen. Contact the department office or visit the School of Visual Art and Design website for further information.

**Class Attendance**
Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in whatever class discussion may occur. The instructor’s attendance policy should be ascertained by the student at the beginning of the semester. Faculty members should notify classes specifically of the attendance policy which they intend to follow in each class.

**Programs**
- Art Education, B.F.A. (p. 270)
- Art History Minor (p. 273)
- Art History, B.A. (p. 273)
- Art Studio Minor (p. 275)
- Art Studio, B.A. (p. 275)
- Art Studio, B.F.A. (p. 278)
- Media Arts Minor (p. 280)
- Media Arts, B.A. (p. 280)

**Courses**
**ARTE 101 - Introduction to Art (3 Credits)**
Introduction to art appreciation. Elements and principles of the visual arts, with examples from the history of art.
*Carolina Core: AIU*

**ARTE 201 - Special Topics in Art Education (3 Credits)**
Topics selected by the instructor for specialized study. Course content may include a variety of new, contemporary, and emerging art-related issues that are not regularly included in the general art education curriculum. May be repeated.

**ARTE 260 - Interdisciplinary Relationships in the Arts (3 Credits)**
The study of relationships among visual arts, music, theatre, and dance.
*Carolina Core: AIU*

**ARTE 345 - Art Evaluation (3 Credits)**
The language of art is taught through viewing, interpreting, producing, and appreciating art. Historical and contemporary art criticism; methods of teaching art criticism to children and young adults.

**ARTE 399 - Independent Study (3-9 Credits)**
*Graduation with Leadership Distinction: GLD: Research*

**ARTE 520 - Art for Elementary Schools (3 Credits)**
Methods of teaching art to elementary and preschool children. Major emphasis will be given to relevant studio experiences.

**ARTE 525 - Elementary Methods for K-12 Art Certification (3 Credits)**
Curriculum, methods, and materials for teaching art to elementary and preschool children.

**ARTE 525P - Elementary Methods for K-12 Art Certification Practicum (1 Credit)**
Experiential practice and learning in elementary schools.
*Corequisite: ARTE 525.*
ARTE 530 - Art of Children (3 Credits)
A study of prominent theories of the artistic development of children from infancy through adolescence. Students will examine children's art from various age groups and apply theoretical explanations to these observations.

ARTE 540 - The School Art Program (3 Credits)
An introduction to art education as a profession. The history, curricular development, and current issues are examined. Students practice proven teaching techniques.
Prerequisites: ARTE 520.

ARTE 540P - Practicum in Art Education (1 Credit)
A sequence of supervised practicum experiences in middle and secondary school art education settings. Seminars and group discussions.
Corequisite: ARTE 540.

ARTE 550 - Incorporating New Media in Art Education (3 Credits)
Applications new media such as digital photography, sound, and other interactive hypermedia for the art classroom. Emphasis on integrating art production with art history, criticism, and aesthetics.

ARTE 560 - Secondary Methods for K-12 Art Certification (3 Credits)
Curriculum, methods, and materials for teaching art to secondary school students.
Corequisite: ARTE 560P.

ARTE 560P - Secondary Methods for K-12 Art Certification Practicum (1 Credit)
Experiential curriculum, methods, and materials for teaching secondary schoolchildren.
Corequisite: ARTE 560.

ARTE 565 - Field Experience Seminar (3 Credits)
Corequisite: EDSE 471.

ARTE 571 - Directed Teaching in Art (12 Credits)
Students seeking K-12 certification in art participate in directed teaching in elementary and secondary art programs while being supervised by an art education faculty member. Students are evaluated using a state-mandated assessment tool. Completion of course work in art education, admission to professional program, College of Education, and FBI check are required.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ARTE 595 - Art Education Workshop (1-6 Credits)
A workshop especially for teachers and prospective teachers, featuring practical art experiences and projects for elementary and secondary school. Topic varies by title.

ARTH 105 - History of Western Art (3 Credits)
The visual arts from Paleolithic times to the Renaissance.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 106 - History of Western Art (3 Credits)
The visual arts from the Renaissance to the present.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 107 - History of Asian Art (3 Credits)
Art and culture of India, China, and Japan from prehistory to the present.
Carolina Core: GHS

ARTH 313 - History of Roman Art (3 Credits)
An examination of the development of architecture, painting, and sculpture until the end of the Roman Empire.

ARTH 315 - History of Medieval Art (3 Credits)
A survey of architecture, painting, and sculpture in Europe during the Middle Ages.

ARTH 320 - History of Italian Renaissance Art (3 Credits)
The origins and development of Renaissance painting, sculpture, and architecture in Italy during the 15th and 16th centuries.
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 321 - History of Northern Renaissance Art (3 Credits)
The arts of Northern Europe during the 15th and 16th centuries with particular emphasis on the developments in the Low Countries, Germany, and France.
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 325 - History of Southern Baroque Art (3 Credits)
The art and architecture of Italy and Spain in the 17th century.
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 326 - History of Northern Baroque Art (3 Credits)
The art and architecture of Holland, Flanders, France, England, Germany, and Austria in the 17th century.
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 327 - History of 18th-Century European Art (3 Credits)
A survey of eighteenth-century European painting and sculpture, following the lives and works of major artists, changes in style and taste against the backdrop of a broader cultural and historical context.

ARTH 330 - History of 19th-Century European Art (3 Credits)
A survey of nineteenth-century European painting and sculpture, following the lives and works of major artists, changes in style and taste against the backdrop of a broader cultural and historical context.

ARTH 333 - Art, Anatomy, and Medicine, 1700-Present (3 Credits)
Considers anatomical instruction in artistic training; anatomy and ideas of beauty and morality; role of art in dissemination of anatomical/medical information; why artistic representations of medicine and anatomy feature in popular culture; role of art in medical training; how art has imagined anato-medical improbabilities that are now reality.

ARTH 335 - History of 20th Century Art (3 Credits)
A survey of architecture, painting, and sculpture in the 20th century.

ARTH 337 - History of Modern Architecture (3 Credits)
Architecture from the turn of the century until the present.

ARTH 340 - History of American Art I (3 Credits)
A survey of the history of art in America from colonial times to 1860.

ARTH 341 - History of American Art II (3 Credits)
A survey of art in America from 1860 to the present.

ARTH 342 - Contemporary American Art (3 Credits)
Recent trends in painting and sculpture.

ARTH 345 - History of Asian Art (3 Credits)
A survey of the visual arts of India, China, and Japan from prehistory to the present.

ARTH 346 - African Art (3 Credits)
Sculpture, painting, architecture of Sub-Saharan Africa.

ARTH 350 - History and Theory of Art Criticism (3 Credits)
Art criticism from antiquity to the present.
ARTH 365 - History of Cinema I (3 Credits)
Survey of the international cinema from its inception until 1945. 03: 07/05/2019.

ARTH 366 - History of Cinema II (3 Credits)
Survey of the international cinema from 1945 to the present. 03: 07/05/2019.

ARTH 390 - Topics in Art History (3 Credits)
Topic varies by title.

ARTH 399 - Independent Study (3-9 Credits)
Graduation with Leadership Distinction: GLD: Research

ARTH 498 - Independent Study (3 Credits)
Graduation with Leadership Distinction: GLD: Research

ARTH 499 - Independent Study (3 Credits)
Graduation with Leadership Distinction: GLD: Research

ARTH 501 - Methodologies of Art History (3 Credits)
A seminar for art history majors and graduate students in the history and various methodologies of the discipline.

ARTH 503 - Internship in Art History (1-6 Credits)
Supervised experience in the field of art history, including museums, galleries, art dealers and auction houses. Requires a university internship contract and is subject to approval by advisor. May be repeated.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ARTH 511 - Etruscan Art and Archaeology (3 Credits)
Seminar in the art and civilization of the pre-Roman Etruscan peoples of Italy. Slide lectures, discussion sessions, and some examination of archaeological field methods and pottery classification.

ARTH 514 - Topics in Ancient Art (3 Credits)
Topic varies by title.

ARTH 519 - Topics in Medieval Art (3 Credits)
Topic varies by title.

ARTH 520 - History of Renaissance Painting (3 Credits)
An analysis of the paintings and painters of importance during the period of the Renaissance in Europe.

ARTH 521 - History of Renaissance Sculpture (3 Credits)
A survey of the major developments in the art of sculpture associated with the European Renaissance.

ARTH 522 - History of Renaissance Architecture (3 Credits)
European architecture and architectural theory during the 15th and 16th centuries.

ARTH 523 - Florentine Art (3 Credits)
The artistic development of Florence from the age of Giotto to that of Michelangelo as seen in the context of social and cultural developments.

ARTH 524 - Topics in Renaissance Art (3 Credits)
Topic varies by title.

ARTH 525 - History of Baroque Painting (3 Credits)
17th-century European painting.
Prerequisites: ARTH 106 or ARTH 325 or ARTH 326.

ARTH 526 - History of Baroque Sculpture (3 Credits)
17th and 18th-century European sculpture.
Prerequisites: ARTH 106 or ARTH 325 or ARTH 326.

ARTH 527 - History of Baroque Architecture (3 Credits)
The architecture of Europe in the 17th century with special attention to the major architects of Italy, France, Germany, and England. Topics to be included are: the church, the palace, the garden, and city planning.
Prerequisites: ARTH 106 or ARTH 325 or ARTH 326.

ARTH 529 - Topics in 18th-Century Art (3 Credits)
Topic varies by title.
Prerequisites: ARTH 106 or ARTH 327.

ARTH 534 - Topics in 19th-Century Art (3 Credits)
Topic varies by title.
Prerequisites: ARTH 106 or ARTH 330.

ARTH 535 - History of Modern Painting (3 Credits)
A detailed examination of 20th century painting.

ARTH 536 - History of Modern Sculpture (3 Credits)
The development of sculpture in the 19th and 20th centuries with special attention to contemporary tendencies.

ARTH 537 - Topics in Modern Architecture (3 Credits)
Topic varies by title.
Prerequisites: ARTH 106 or ARTH 337.

ARTH 539 - Topics in Modern Art (3 Credits)
Topic varies by title.

ARTH 540 - History of American Painting (3 Credits)
Important aspects of American painting with emphasis on the 19th and 20th centuries.

ARTH 542 - History of American Architecture (3 Credits)
A consideration of the evolution of architecture in America including aspects of town and city planning.

ARTH 543 - The History of American Antiques and Decorative Arts (3 Credits)
A survey of our material culture concentrating upon the evolution of styles.

ARTH 544 - Topics in American Art (3 Credits)
Topic varies by title.

ARTH 545 - Special Topics in Modern Chinese Art (3 Credits)
Topics in modern Chinese art selected for specialized study. May be repeated as content varies by title.

ARTH 546 - Special Topics in Asian Art (3 Credits)
Topics in Asian art selected for specialized study. May be repeated as content varies by title.

ARTH 549 - Topics in Non-Western Art (3 Credits)
Topic varies by title.

ARTH 550 - Trends in Art History (3 Credits)
A critical examination of the development of the discipline of art history and an analysis of its major trends and theoretical positions.

ARTH 551 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: FAMS 511, MART 591

ARTH 557 - History of Printmaking (3 Credits)
Technical, aesthetic, and historical study of the development of printmaking.
ARTH 560 - Museology I (3 Credits)
The history and theory of museums and an introduction to museum practices in the setting of a multi-disciplinary institution. Practical experience provided through the various units of the University Museums.

ARTH 561 - Museology II (3 Credits)
Museum practices emphasizing the conservation, installation, and interpretation of the object in the context of an art museum. Practical experience provided through the Columbia Museum of Art.

ARTH 562 - Art Conservation (3 Credits)
History, theory, practices, ethics, and procedures of modern art conservation. Practical experience provided through the South Carolina Institute of Archaeology and Anthropology.

ARTH 569 - Special Topics in Film and Media Histories (3 Credits)
Intensive study of a specific topic in film and media history. May be repeated as content varies by title.
Prerequisites: FAMS 300.

ARTH 590 - Topics in Art History (3 Credits)
Topic varies by title.
Prerequisites: ARTH 105 or ARTH 106 or any ARTH 300.

ARTH 599 - Independent Study (1-6 Credits)
Independent study for advanced undergraduate majors and graduate students in art history. Approved independent study contract required for enrollment. May be repeated, but no more than 12 credits of Independent Study may be applied to the degree.

ARTS 102 - Introduction to Visual Arts Computing (3 Credits)
A foundations level course in the use of personal computers and discipline-related software as aids in visual design.

ARTS 103 - Fundamentals of Art (3 Credits)
Introduction to visual thinking and principles of two-dimensional design.
Carolina Core: AIU

ARTS 104 - 3-Dimensional Design I (3 Credits)
Introduction to visual thinking and principles of three-dimensional design.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Research

ARTS 107 - Color and Composition (3 Credits)
Color, color theory, and compositional systems.
Prerequisites: ARTS 103.

ARTS 111 - Basic Drawing I (3 Credits)
Introduction to the materials and basic techniques of drawing.
Carolina Core: AIU

ARTS 210 - Introduction to Painting (4 Credits)
An introductory course in the materials and techniques of painting.
Carolina Core: AIU

ARTS 211 - Beginning Painting II (4 Credits)
Exploration of materials and techniques of painting with emphasis on individual creative expression.

ARTS 215 - Introduction to Printmaking (4 Credits)
An introductory course in printmaking with emphasis on monotype, relief, and intaglio processes.

ARTS 220 - Beginning Ceramics (4 Credits)
An introduction to the materials and techniques of ceramics through hand-building and throwing on the wheel.

ARTS 225 - Introduction to Three-Dimensional Studies (4 Credits)
An introductory course in the concepts, materials, and techniques of three-dimensional media.
Prerequisites: C or better in ARTS 104.

ARTS 230 - Introduction to Drawing (4 Credits)
Building on foundational skills acquired in ARTS 111, this course further develops skills in observation, composition, spatial awareness, drawing technique and critical language.
Prerequisites: C or better in ARTS 111.

ARTS 232 - Figure Structure I (4 Credits)
The structural nature of figure, with emphasis on the translation of form in space onto a two-dimensional surface.
Prerequisites: C or better in ARTS 230.

ARTS 233 - Figure Structure II (4 Credits)
Drawing from the human figure.
Prerequisites: C or better in ARTS 230.

ARTS 235 - Introduction to Fiber Arts (4 Credits)
An introductory course in the materials and processes of fiber arts.

ARTS 241 - Color for Design (4 Credits)
Color theory, systems, and applications in visual communications.
Graduation with Leadership Distinction: GLD: Research

ARTS 245 - Graphic Design I (4 Credits)
The basics of visual communication, including formal issues, fundamental communication principles, image development, and relevant digital applications.
Prerequisites: C or better in ARTS 102.

ARTS 246 - Graphic Design II (4 Credits)
Typography, word/image relationships, relevant digital applications.
Prerequisites: C or better in ARTS 102.

ARTS 255 - Introduction to Jewelry Making (4 Credits)
Introduction to concepts and design of jewelry objects in a variety of metals and other materials.

ARTS 260 - Photography for Non-Majors (3 Credits)
Photographic history, theory, and practice with emphasis on developing a personal vision through the use of digital still cameras.

ARTS 261 - Introduction to Photography (4 Credits)
A thorough grounding in 35mm black and white photography using both digital and traditional output, as well as the aesthetics of the photograph as a personal artistic expression.

ARTS 265 - Illustration (4 Credits)
Basic illustration projects emphasizing principles of visual communication, development of resource material, composition and preparation of sketches, comprehensives, and finished illustrations in a variety of media.
Prerequisites: C or better in ARTS 102 and ARTS 111.

ARTS 266 - Illustration II (4 Credits)
Illustration projects emphasizing principles of visual communication, development of resource material, composition and preparation of sketches, comprehensives, and finished illustrations in a variety of media.
Prerequisites: C or better in ARTS 102 and ARTS 111.

ARTS 310 - Intermediate Painting I (4 Credits)
An exploration of painting as a means of multi-sensory expression through visual experience.
ARTS 311 - Intermediate Painting II (4 Credits)
An exploration of the depiction of space and form in painting with a continued emphasis on materials and techniques combined with individual creative expression.

ARTS 315 - Intermediate Printmaking I: Relief (4 Credits)
Linoleum, woodblock printing, and other relief techniques including the execution of original works in these media.

ARTS 316 - Intermediate Printmaking II: Screen (4 Credits)
Screen printing techniques including the execution of original works in these media.

ARTS 320 - Intermediate Ceramics I (4 Credits)
Concentration on development of throwing skills. Experimentation with clay and glaze chemistry.

ARTS 321 - Intermediate Ceramics II (4 Credits)
Concentration on hand-building skills. Glaze experimentation and ceramic materials will be researched.

ARTS 325 - Intermediate Three-Dimensional Studies I (4 Credits)
Contemporary principles in various three-dimensional media.
Prerequisites: C or better in ARTS 225.

ARTS 326 - Intermediate Three-Dimensional Studies II (4 Credits)
Further study of various three-dimensional media.
Prerequisites: C or better in ARTS 225.

ARTS 330 - Intermediate Drawing I (4 Credits)
Enhancing graphic richness in drawings with intellectual and visual perception as content.
Prerequisites: C or better in ARTS 230.

ARTS 331 - Intermediate Drawing II (4 Credits)
Contemporary cultural stimuli as the content for drawing projects. Emphasis on intellectual and emotive approaches.
Prerequisites: C or better in ARTS 230.

ARTS 335 - Intermediate Fiber Arts I (4 Credits)
Exploration of fiber constructions such as weaving, spinning, and feltmaking.
Prerequisites: C or better in ARTS 235.

ARTS 336 - Intermediate Fiber Arts II (4 Credits)
Exploration of fiber surface design techniques such as batik, tie dye, and block printing.
Prerequisites: C or better in ARTS 335.

ARTS 345 - Visual and Verbal Interaction (4 Credits)
Intermediate level exploration of type and image in a variety of visual communication problems employing a variety of media. Graphic design majors only. Portfolio Review Acceptance.
Prerequisites: C or better in ARTS 246, and C or better in ARTS 260 or ARTS 261.

ARTS 346 - Series Development and Practice (4 Credits)
Development of complex visual communication projects that involve problem-seeking and problem-solving and result in works with multiple elements. Discussion of current visual communication issues. Graphic design majors only.
Prerequisites: C or better in ARTS 345.

ARTS 347 - Photographics (4 Credits)
Creative use of contemporary photographic equipment and techniques in solving graphic design problems.
Prerequisites: C or better in ARTS 261.

ARTS 355 - Intermediate Jewelrymaking I (4 Credits)
Jewelry fabrication using the centrifugal casting methods.
Prerequisites: C or better in ARTS 255.

ARTS 356 - Intermediate Jewelrymaking II (4 Credits)
Jewelry fabrication using the electroforming method.
Prerequisites: C or better in ARTS 355.

ARTS 360 - Advanced Black & White Photography (4 Credits)
Continuation of black and white photographic techniques introduced in ARTS 261. Introduction to advanced exposure and film development, exhibition quality printing and presentation, medium and large-format cameras, b&w digital output and darkroom experimentation.
Prerequisites: C or better in ARTS 261.

ARTS 361 - Digital Photography (4 Credits)
Exploration of digital imaging techniques including image adjustment and printing methods with an emphasis on color photography.

ARTS 390 - Special Topics in Art Studio (3 Credits)
Investigation and analysis of various thematic concepts, processes, and techniques in a variety of media. Content varies by course title.

ARTS 399 - Independent Study (3-9 Credits)
Graduation with Leadership Distinction: GLD: Research

ARTS 410 - Advanced Painting I (4 Credits)
Advanced development of individual direction in painting the human figure from a live model. Special emphasis on material selection and formal principles of painting as applied toward individual goals.
Prerequisites: C or better in ARTS 310 or ARTS 311.

ARTS 411 - Advanced Painting II (4-6 Credits)
Advanced development of individual direction in painting and skills in the representation of the human figure working observationally from the live model. Special emphasis on material selection and formal principles of painting as applied toward individual goals.
Prerequisites: C or better in ARTS 310 or ARTS 311.

ARTS 415 - Advanced Printmaking I: Intaglio (4 Credits)
Intaglio techniques, such as drypoint, etching and collagraph, including the execution of original works in these media.

ARTS 416 - Advanced Printmaking II: Lithography (4-6 Credits)
Lithography techniques, including the execution of original works in these media.

ARTS 420 - Advanced Ceramics I (4 Credits)
Further development of throwing and hand-building skills. Introduction to kiln firing and continued glaze and clay experimentation.
Prerequisites: C or better in ARTS 320 or ARTS 321.

ARTS 421 - Advanced Ceramics II (4-6 Credits)
Prerequisites: C or better in ARTS 420.
### ARTS 425 - Advanced Three-Dimensional Studies I (4 Credits)
The development of fabrication skills and creative expression in various three-dimensional media.  
**Prerequisites:** C or better in ARTS 325 or ARTS 326.

### ARTS 426 - Advanced Three-Dimensional Studies II (4-6 Credits)
Further development of fabrication skills and creative expression in various three-dimensional media.  
**Prerequisites:** C or better in ARTS 325 or ARTS 326.

### ARTS 430 - Advanced Drawing I (4 Credits)
Development of a thematic approach to drawing in a series of individual and group generated artworks.  
**Prerequisites:** C or better in ARTS 330 or ARTS 331.

### ARTS 431 - Advanced Drawing II (4-6 Credits)
Development of highly individualized content in a series of drawings.  
**Prerequisites:** C or better in ARTS 430.

### ARTS 435 - Advanced Fiber Arts I (4 Credits)
Advanced study of materials and techniques of fiber arts with emphasis on individual creative expression.  
**Prerequisites:** C or better in ARTS 336.

### ARTS 436 - Advanced Fiber Arts II (4 Credits)
Advanced study of materials and techniques of fiber arts with emphasis on individual creative expression.  
**Prerequisites:** C or better in ARTS 435.

### ARTS 445 - Time and Sequence (4 Credits)
Advanced visual communication projects involving time and sequencing with both visual and verbal elements using a variety of media.  
**Prerequisites:** C or better in ARTS 436.

### ARTS 446 - Structures (4 Credits)
Advanced exploration of visual structures, both 2D and 3D, in visual communication problems.  
**Prerequisites:** C or better in ARTS 445.

### ARTS 447 - Senior Project I (4 Credits)
Individual final project in graphic design.  
**Prerequisites:** C or better in ARTS 445.

**Graduation with Leadership Distinction:** GLD: Research

### ARTS 448 - Senior Graphic Design Portfolio Preparation (4-6 Credits)
Advanced studies in professional presentations of visual communication projects, professional interviews, and graphic design business topics.  
**Prerequisites:** C or better in ARTS 436.

### ARTS 449 - Graphic Design Practicum (4 Credits)
Practical design experience for students through design or publicity problems in non profit organizations.  
**Prerequisites:** C or better in ARTS 345 or ARTS 346.

### ARTS 450 - Intermedia Studio I (4 Credits)
Advanced intermedia; formal and conceptual problems associated with combining multiple forms of imaging processes.

### ARTS 451 - Intermedia Studio II (4 Credits)
Advanced intermedia; creation of portfolio work combining multiple forms of imaging processes.

### ARTS 455 - Advanced Jewelrymaking I (4 Credits)
Advanced problems and individual investigation in jewlerymaking techniques.  
**Prerequisites:** C or better in ARTS 356.

### ARTS 456 - Advanced Jewelrymaking II (4 Credits)
Advanced problems and individual investigation in jewlerymaking techniques.  
**Prerequisites:** C or better in ARTS 455.

### ARTS 460 - Photography Portfolio (4 Credits)
Advanced techniques and career practices in photography. The development of personal vision through the production of a fine arts portfolio. Students may work with any photographic process (digital or analog) towards the completion of a cohesive body of work.  
**Prerequisites:** C or better in ARTS 360 or ARTS 361.

### ARTS 461 - Photography Exhibition (4-6 Credits)
Advanced concepts in photography. The development of personal vision culminating in a collaborative exhibition. Students may work with any photographic process (analog or digital).  
**Prerequisites:** C or better in ARTS 360 or ARTS 361.

### ARTS 465 - Advanced Illustration (4 Credits)
Projects in advertising and editorial illustration. Further development of style, media, and technique.  
**Prerequisites:** C or better in ARTS 265.

### ARTS 466 - Advanced Illustration II (4 Credits)
Projects in commercial illustration. Further development of style, media, and technique with emphasis in development of commercial portfolio.  
**Prerequisites:** C or better in ARTS 265 or ARTS 266.

### ARTS 498 - Independent Study (3-9 Credits)
**Graduation with Leadership Distinction:** GLD: Research

### ARTS 499 - Independent Study (3-9 Credits)
**Graduation with Leadership Distinction:** GLD: Research

### ARTS 500 - Visual Meaning (4 Credits)
The analysis, structuring, and production of individual works of art using traditional and non-traditional approaches.

### ARTS 501 - Art Business (3 Credits)
Business practices for the studio artist. Contracts, portfolio preparation, promotion, alternate professions, museums, galleries, copyright, and shipping will be discussed.

### ARTS 510 - Painting I (6 Credits)
BFA Painting Capstone course stressing focus on further development of individual approaches to painting culminating in a cohesive body of work and a written thesis defense.  
**Prerequisites:** ARTS 210, ARTS 211, ARTS 310, and ARTS 311.

### ARTS 511 - Painting II (6 Credits)
BFA Painting Capstone course focusing on further development of individual approaches to painting culminating in a BFA Senior Thesis Exhibition and defense.  
**Prerequisites:** ARTS 510.

### ARTS 512 - Introduction to Watercolor (3 Credits)
Introduction to traditional and experimental transparent watercolor technique. Encompasses field work at off campus locations.
ARTS 513 - Advanced Watercolor (3 Credits)
Advanced study of watercolor and water-based media with emphasis on individual creative expression. Encompasses field work at off campus locations.

ARTS 514 - Workshop: Painting (4 Credits)
Advanced study in various painting problems, content varies by title.

ARTS 515 - Printmaking I (3 Credits)
Further development of individual approaches to printmaking.
Prerequisites: ARTS 416.

ARTS 516 - Capstone Printmaking I: Professional Practices (3-6 Credits)
Professional development practices including preparing a portfolio and oral presentation of work, researching career options, and preparing applications for exhibition and funding opportunities.
Prerequisites: ARTS 215 and one ARTS 300 - ARTS 400 level print course.

ARTS 517 - Capstone Printmaking II: Exhibition (3-6 Credits)
Preparing for an exhibition.
Prerequisites: ARTS 215 and one ARTS 300 - ARTS 400 level print course.

ARTS 519 - Workshop: Printmaking (3 Credits)
Advanced investigation and analysis of various printmaking techniques. Topic varies by title.

ARTS 520 - Ceramics I (6 Credits)
Further development of a personal approach to the ceramic process, supported by an investigation of ceramic history.
Prerequisites: ARTS 421.

ARTS 521 - Ceramics II (6 Credits)
Further development of a personal approach to the ceramic process, supported by an investigation of ceramic history.
Prerequisites: ARTS 520.

ARTS 524 - Workshop: Ceramics (3 Credits)
Advanced investigation and analysis of problems and methods in ceramics. Topics vary by title.

ARTS 525 - Three-Dimensional Studies I (3-6 Credits)
Personal concepts and expressions in various three-dimensional media.
Prerequisites: C or Better in ARTS 425 or ARTS 426.

ARTS 526 - Three-Dimensional Studies II (3-6 Credits)
Personal concepts and expressions in various three-dimensional media.
Prerequisites: C or better in ARTS 425 or ARTS 426.

ARTS 529 - Workshop: Three-Dimensional Studies (3 Credits)
Investigation and analysis of various three-dimensional concepts, processes, and techniques. Content varies by title.

ARTS 530 - Drawing Capstone I (3-6 Credits)
Further development of individual approaches to drawing with emphasis on intellectual and visual perception as content.
Prerequisites: ARTS 431.

ARTS 531 - Drawing Capstone II (6 Credits)
Further development of individual drawing with emphasis on intellectual and emotive approaches.
Prerequisites: ARTS 530.

ARTS 532 - Advanced Life Drawing (3 Credits)
Human anatomy and instruction in drawing and painting the model from life in a variety of media.
Prerequisites: ARTS 232 or ARTS 233.

ARTS 535 - Fiber Arts I (3 Credits)
Advanced study in the processes and materials of fiber arts.
Prerequisites: ARTS 436.

ARTS 536 - Fiber Arts II (3 Credits)
Advanced study in the processes and materials of fiber arts.
Prerequisites: ARTS 535.

ARTS 537 - Papermaking (3 Credits)
The art and techniques of handmade paper.

ARTS 539 - Workshop: Fiber Arts (3 Credits)
Advanced study in various technical aspects of fiber arts. Topic varies by title.

ARTS 545 - Internship in Graphic Design (4 Credits)
Work experience at a visual communication place of business.
Prerequisites: C or better in ARTS 346.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ARTS 546 - Graphic Design II (3 Credits)
Advanced individual projects in graphic design.
Prerequisites: ARTS 545.

ARTS 555 - Jewelrymaking I (4 Credits)
The development of individual directions in jewelrymaking.
Prerequisites: C or better in ARTS 456.

ARTS 556 - Jewelrymaking II (3 Credits)
The development of individual directions in jewelrymaking.
Prerequisites: ARTS 555.

ARTS 558 - Crafts (3 Credits)
Contemporary applications of traditional craft media, emphasizing the design and conceptual development of works of art.

ARTS 559 - Workshop: Jewelrymaking (3 Credits)
Advanced study in various technical aspects of jewelrymaking. Topic varies by title.

ARTS 560 - Photography Thesis: Portfolio (6 Credits)
Further development of individual approaches to photography.
Prerequisites: ARTS 460.

ARTS 561 - Photography Thesis: Exhibition (6 Credits)
Further development of individual approaches to photography.
Prerequisites: ARTS 461.

ARTS 564 - Workshop: Photography (4 Credits)
Advanced investigation and analysis of problems in photography. Topic varies by title.

ARTS 570 - Visual Arts Computing (3 Credits)
Advanced visual arts computing techniques on using software such as Photoshop, Studio Pro, and Netscape.
Prerequisites: ARTS 102.

ARTS 590 - Video Art: Theory and Practice (3 Credits)
Television as a medium; small format video systems are used in the creation of individual projects.

ARTS 595 - Independent Study (3 Credits)
Independent study for advanced undergraduate majors and graduate students in art studio. Approved independent study contract required for enrollment.
FAMS 110 - Media Culture (3 Credits)
Introduction to the critical study of film, video, photography, audio, and new media.
Cross-listed course: MART 110
Carolina Core: AIU

FAMS 180 - Film Culture (3 Credits)
How the film industry developed and the impact the movies have had on global popular culture. Does not count toward the film studies major.
Carolina Core: AIU

FAMS 240 - Film and Media Analysis (3 Credits)
Introduction to the critical study of film and media. Students will closely analyze moving images and develop written arguments about film and media.
Carolina Core: AIU

FAMS 300 - Film and Media History (3 Credits)
Surveys the development of cinema and related media from the 1820s to the present. Attention to the relations among key technological, cultural, and industrial changes, their causes, and consequences.
Carolina Core: GHS

FAMS 301 - Media, Power & Everyday Life (3 Credits)
Foundational approaches to media as a means of defining and distributing social power in everyday life.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 308 - Global Media Industries (3 Credits)
Provides the foundation for the study of globalized film and media industries.
Cross-listed course: GLST 308

FAMS 310 - Special Topics In Popular Media (3 Credits)
Intensive study of a specific topic in popular film and media. May be repeated up to three times for a total of nine credit hours as content varies by title.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 311 - Classical Hollywood Cinema (3 Credits)
Survey of Classical Hollywood Cinema in aesthetic, cultural, political, and economic contexts.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 316 - Music and the Hollywood Film (3 Credits)
Examination of how music guides audience interpretation and shapes Hollywood film style.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 325 - Superheroes across Media (3 Credits)
Examination of the superhero within and across media, industries, and eras addressing topics such as genre, style, seriality, remediation, franchising, and fandom.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 350, or ENGL 350.

FAMS 328 - The Blockbuster (3 Credits)
Examination of the post-1975 blockbuster film phenomenon with an emphasis on marketing, finance, and reception.
Prerequisite or Corequisite: C or better in FAMS 308.

FAMS 330 - Special Topics in Non-Film Media (3 Credits)
Intensive study of a specific topic concerning a medium or mediums other than film. May be repeated up to three times for a total of nine credit hours as content varies by title.
Prerequisites: C or better in FAMS 240 or FAMS 300.

FAMS 332 - American Television (3 Credits)
Examination of American television as an industry, art form, medium of social representation, and set of viewer practices.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 338 - Contemporary British Television Industry (3 Credits)
Examination of industrial structures, network histories, production cultures, and regulation contexts of contemporary British television.
Prerequisite or Corequisite: C or better in FAMS 308.

FAMS 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Cross-listed course: ENGL 350

FAMS 360 - Special Topics in Global Media (3 Credits)
Intensive study of a specific topic in film and media centered outside the U.S. May be repeated up to three times for a total of nine credit hours as content varies by title.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 361 - Middle East on Screen (3 Credits)
Examines representations of the Middle East on screen within multiple media-making traditions and considers their aesthetic, political, and ethical dimensions.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 363 - Hong Kong Action Cinema (3 Credits)
Survey of the transnational history of Hong Kong action cinema and introduction to critical approaches through which it has been studied.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 365 - Screening China (3 Credits)
Survey of Chinese language cinema. Chinese film history and vocabulary with which to discuss film texts. Covers classic leftwing cinema, Hong Kong martial arts films, as well as the Hong Kong, Taiwan, and PRC New Waves. Taught in English. Films subtitled.
Cross-listed course: CHIN 365

FAMS 380 - Special Topics in Alternative Media (3 Credits)
Intensive study of a specific topic concerning film and media forms and/or practices outside the commercial mainstream. May be repeated as many as three times for a total of nine credit hours as content varies by title.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 381 - History of Experimental Film (3 Credits)
Survey of key examples and tendencies in the history of experimental film.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 383 - Documentary Studies (3 Credits)
History, theory, and practices of documentary film and media.
Prerequisite or Corequisite: C or better in FAMS 240 or FAMS 300.

FAMS 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and program director is required.
Graduation with Leadership Distinction: GLD: Research

FAMS 470 - Genre Studies Film & Media (3 Credits)
Critical study of a popular genre (e.g., horror, science fiction, melodrama), or set of genres, in film and media. Course content varies and will be announced in the schedule of courses by title. May be repeated as topics vary.
FAMS 499 - Internship in Film and Media Studies (3 Credits)
Internship in Film and Media Studies. (Variable) Supervised professional experience working with media production, distribution, exhibition, archiving, and/or education.
Prerequisite or Corequisite: C or better in FAMS 308.

FAMS 510 - Topics in Film Media Histories (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

FAMS 511 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: ARTH 551, MART 591

FAMS 566 - Topics in US Film and Media (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title. 03: 07/05/2019.
Prerequisites: FAMS 240.

FAMS 581 - Critical Interactives (3 Credits)
Foundational techniques in multidisciplinary software development, specifically of applications designed to present sensitive, sometimes controversial, materials in ways to engender empathic awareness of the interactor.
Cross-listed course: CSCE 571

FAMS 598 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: FORL 598, MART 594

Graduation with Leadership Distinction: GLD: Global Learning

MART 101 - Making Media That Matters (3 Credits)
Introductory media arts creation and study for non-majors. Developing an individual aesthetic for the screen and related media by becoming proficient in the conception, creation, and refinement of graphics, audio, and video, while emphasizing the histories and theories that led to and support the current state of the media arts.

MART 110 - Media Culture (3 Credits)
Introduction to the critical study of film, video, photography, audio, and new media.
Cross-listed course: FAMS 110
Carolina Core: AIU

MART 201 - Foundations of Media Arts Production (3 Credits)
Fundamental conceptual and technical aspects of media.
Carolina Core: AIU

MART 210 - Digital Media Arts Fundamentals (3 Credits)
Introduction to theory and practice of origination, sequencing, and processing of screen-based and related media art.
Carolina Core: AIU

MART 262 - Digital Imaging (3 Credits)
Aesthetic and communicative elements of the production of digital images, including capture, processing, and output.

MART 321 - Media Writing (3 Credits)
Storytelling forms and formats for screen-based and related media arts.

MART 341 - Sound Design (3 Credits)
Aesthetic and communicative elements of audio design for screen-based and related media arts.
Prerequisites: MART 210.

MART 371 - The Moving Image (3 Credits)
Introduction to the theory and practice of motion picture production.
Prerequisites: MART 201 and MART 210.

MART 380 - New Media Art (3 Credits)
Introduction to the design and development of new media art, including internet-based art, media performance, installation, and interactivity.
Prerequisites: MART 210 or ARTS 102.

MART 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department head is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

MART 490 - Special Topics in Media Arts (3 Credits)
May be repeated once for credit as topic varies by title.

MART 495 - Research Seminar (3 Credits)
Research in a selected area of media arts.
Prerequisites: junior status

Graduation with Leadership Distinction: GLD: Research

MART 499 - Internship in Media Arts (3-6 Credits)
Supervised experience in media productions and media production facilities. Contract approved by instructor, advisor, and department head is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

MART 521A - Media Writing Advanced: Screenwriting (3 Credits)
Advanced study of screenwriting. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 521B - Media Writing Advanced: Feature Film (3 Credits)
Advanced study of feature film writing. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 521C - Media Writing Advanced: Manga and Anime (3 Credits)
Advanced study of Manga and Anime. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.

MART 521D - Media Writing Advanced: Television Writing (3 Credits)
Advanced study of television writing. Content varies by course title: 521A Screenwriting; 521B Feature Film; 521C Manga and Anime; 521D Television Writing. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 321.
MART 571A - Moving Image Advanced: Narrative (3 Credits)
Narrative for motion picture.
Prerequisites: MART 371.

MART 571B - Moving Image Advanced: Documentary (3 Credits)
Documentary production.
Prerequisites: MART 371.

MART 571C - Moving Image Advanced: Animation (3 Credits)
Animation production.
Prerequisites: MART 371.

MART 571D - Moving Image Advanced: Experimental (3 Credits)
Experimental motion picture production.
Prerequisites: MART 371.

MART 571E - Moving Image Advanced: Cinematography (3 Credits)
Motion picture cinematography.
Prerequisites: MART 371.

MART 571F - Moving Image Advanced: Sound for Motion Picture (3 Credits)
Sound production for motion picture.
Prerequisites: MART 371.

MART 581A - New Media Advanced: Site-based and Installation Art (3 Credits)
Art and practice of site-based and installation art. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581B - New Media Advanced: Mobile Platforms (3 Credits)
Art and practice of mobile platforms. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581C - New Media Advanced: Media Performance (3 Credits)
Art and practice of media performance. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581D - New Media Advanced: Video Game Design (3 Credits)
Art and practice of video game design. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 581E - New Media Advanced: Sound Art (3 Credits)
Art and practice of sound art. Content varies by course title: 581A, Site-based and Installation Art; 581B, Mobile Platforms; 581C, Media Performance; 581D, Video Game Design; 581E, Sound Art. May be repeated as content varies by title up to 3 times.
Prerequisites: MART 380.

MART 590 - Special Topics in Media Arts (3 Credits)
Selected topics in media arts. Course content varies and will be announced in the schedule of classes by title.

MART 591 - Special Topics in Film and Media Studies (3 Credits)
Intensive study of a specific topic in film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

MART 592 - Special Topics in Film and Media Histories (3 Credits)
Intensive study of a specific topic in film and media history. May be repeated as content varies by title.
Prerequisites: FAMS 300.

MART 593 - Special Topics in U.S. Film and Media (3 Credits)
Intensive study of a specific topic in U.S. film and media studies. May be repeated as content varies by title.
Prerequisites: FAMS 240.

MART 594 - Special Topics in Global Film and Media (3 Credits)
Intensive study of a specific topic concerning films produced in a country other than the United States. May be repeated as content varies by title.
Prerequisites: FAMS 240.

Cross-listed course: FAMS 598, FORL 598

MART 598 - Media Management and Distribution (3 Credits)
Research in media management and distribution.
Prerequisites: MART 110 and MART 210.

Art Education, B.F.A.

Learning Outcomes

- Students will demonstrate the ability to make art using two and three-dimensional materials appropriate for use in elementary and early childhood settings.
- Students will demonstrate the ability to make art using two and three-dimensional materials appropriate for use in secondary settings.
- Students will write an arts unit of instruction centered on relevant themes and demonstrates the ability to write learning outcomes that match assessment.
- Students will recall the kinds of assessment used in the elementary and secondary art classroom and demonstrate its use in the arts unit of instruction by creating various assessment tools.
- Students will recall various teaching strategies used for challenging different kinds of learners and integrative learning.
- Students will develop communication skills and motivational strategies for teaching.
- Students will gain expertise in curriculum development and lesson planning.
- Students will successfully develop and teach two demonstration lessons as part of the Young Artists Workshop.
- Students will begin to master successful teaching skills and behaviors and become aware of how such skills and behaviors are measured through the ADEPT assessment instrument, which student teachers and all first year teachers in South Carolina must successfully master.
- Students will gain knowledge of the Collaborative Educational Leader and be able to describe each element of the framework.
- Students will observe or practice teaching in a school setting for at least 3 hours each week for a total of 30 hours.
• Students will record observations of teaching content, interaction patterns, classroom management, use of technology, use of time and space, and knowledge of students.
• Students will write reflective papers and or a case study on a specific issue or situation that they observe between K-12 students and the teacher.
• The student will discuss appropriate dispositions that underlie the knowledge and practice required of candidates: Integrity, Intellectual Spirit, Justice, and Stewardship.
• Students will create digital artworks by utilizing contemporary interactive technologies.
• Students write original scripts for their animation and video films.
• Students will develop curriculum outlines for integrating digital technologies in to the K-12 art curriculum.
• Students will analyze and respond to assigned course readings in writing.
• Students will present assigned course readings to class.
• Students will analyze historical and contemporary approaches to children's artistic development through written responses.
• Student will demonstrate a grasp of course readings via midterm test.
• Students will develop research skills by conducting art projects in an after school setting and documenting observations of children's art making with field notes.
• Students will write a research paper based on their observations of children's art making.
• Students will pass the praxis II exam and qualify for certification in the state of South Carolina.
• Students will develop ways to apply the art curriculum to the public school classroom utilizing interdisciplinary approaches to plan and initiate a K-12 sequential curriculum that incorporates art production, art criticism, aesthetics, art history and art assessment, and conforms to National, State and local Visual and Performing Arts Standards for each grade level or course they teach.
• Students will develop and use effective classroom management strategies.
• Students will write and teach age/appropriate lesson plans for the grade levels assigned.
• Students will successfully complete the requirements of the ADEPT evaluation system for Adept Performance Standards one, two, three and ten.
• Document the student teaching experience through self-evaluation checklists, journal entries, lesson plans, and a visual record of student art making and art making processes (photographs).

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.

2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (123-140 hours)

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>

<tr>
<td>3. Program Requirements</td>
<td>42</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>51</td>
</tr>
</tbody>
</table>

1. Carolina Core (32-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

• Two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)
AIU – Aesthetic and Interpretive Understanding (3 hours)

Students must choose one course from:

- ENGL 270
- ENGL 282
- ENGL 283
- ENGL 284
- ENGL 285
- ENGL 286
- ENGL 287
- ENGL 288

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component \(^1\) (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy \(^1\) (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility \(^1\) (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. At least one of these requirements must be satisfied by a course not applied elsewhere in general education. (3-9 Hours)

2. College Requirements (0-3 hours)

- Foreign language course (0-3 hours) - only if needed to meet 122-level proficiency

3. Program Requirements (42 hours)

Supporting Courses (42 hours)

The following professional courses in education are required for all students preparing to teach art in K-12 settings:

<table>
<thead>
<tr>
<th>Course</th>

ARTH- one course in contemporary Art History
ARTH-Elective
Total Credit Hours 49

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Art History, B.A.

Learning Outcomes

- Upon completion of the B.A. in Art History majors should be able to demonstrate in writing an ability to conduct a visual analysis of a work of art in order to determine meaning.
- Upon completion of the art history program majors should be able to demonstrate the mastery of a basic vocabulary of art terms.
- Upon completion of the Art History B.A. majors should be able to write coherently and persuasively about works of art.
- Upon completion of the Art History B.A. students should demonstrate in writing their ability to conduct basic research on a work of art in terms of resources at both the library and online.
- Upon completion of the Art History B.A. degree students should be able to identify and date the basic periods in the history of art and to distinguish works of art according to the basic period to which they belong.
- Upon completion of the Art History B.A. degree a student will be able to identify, describe, and explain the applications of the basic art history methodologies currently in use in the profession.
- Upon completion of the Art History B.A. degree students should have a working knowledge and appreciation of the creative process in at least one medium.

Admissions

Entrance Requirements
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>

<td>34-49</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>24</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

- any CC-CMW courses (p. 742)
ARP – Analytical Reasoning and Problem Solving (6-8 hours)
- any CC-ARP course (p. 742)

SCI – Scientific Literacy (8 hours)
- two 4-hour CC-SCI course (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL course (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

Choose at least 1 of the following to fulfill a Carolina Core requirement:
Must be passed with a grade of C or higher.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)
- only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (3 hours of Social Science and 9 hours of Fine Arts or Humanities)

If only 1 of the following courses was taken to fulfill a Carolina Core requirement, then a second course below must be taken as a Fine Arts or Humanities: (must be passed with a grade of C or higher)

<table>
<thead>
<tr>
<th>Course</th>

</tr>
<tr>
<td>ARTH 107</td>
<td>History of Asian Art</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 9

3. Program Requirements (34-49 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).
For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

**Minor**

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (16-37 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (24 hours)**

*Must be passed with a grade of C or higher.*

**Major Courses (3 hours)**

<table>

<td>Color and Composition</td>
<td></td>
</tr>
<tr>
<td>ARTS 111</td>
<td>Basic Drawing I</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credit Hours** 6

**Additional Courses (12 Hours)**

Choose three 200+ level 4-credit ARTS courses. It is recommended that students follow the discipline-specific Advisement Tracks when choosing their courses, to focus in Graphic Design, Drawing, Painting, Printmaking, Photography, Ceramics, Sculpture, Jewelrymaking, or Generalist 2D or 3D Studio. These Advisement Tracks are available through the School of Visual Art and Design.

**Art Studio, B.A.**

**Learning Outcomes**

- Students must possess the technical skills, perceptual development, and understanding of principles of visual organization sufficient to achieve basic visual communication and expression in multiple media.
- Demonstrate technical proficiency in each discipline.
- Conceptualize ideas through visual media.
- Articulate the relevance of critical theory and art historical precedents.
- B.A. Studio Art undergraduate students will demonstrate their aesthetic literacy through their 2D and 3D artwork.

**Admissions**

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:
1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

</tr>
<tr>
<td>• 300-level or above ARTH elective1</td>
<td></td>
</tr>
</tbody>
</table>
3. Program Requirements (19-34 hours)

Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (1-22 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (39 hours)

Must be passed with a grade of C or higher.

Foundations Requirements (15 hours)

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Art Studio, B.A.
Art Studio, B.F.A.

Learning Outcomes

• All BFA Studio Art undergraduate students will define and explain development of art, within their own and other cultures, from pre-history to the present.
• All BFA Studio Art undergraduate students will critically analyze aspects of the design and art making process and evaluate theories, philosophies, and research in the practice of the studio arts.
• All BFA Studio Art undergraduate students will, through their artwork, demonstrate their competency of aesthetic literacy.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (8 hours)

• any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

• Two 4-credit hours CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

must be passed with a grade of C or higher

• ARTH 106

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core
GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- or
- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

- Courses Acceptable for Social Science and Fine Arts or Humanities
  Credit in Degree Programs in the College of Arts and Sciences
  (https://academicbulletins.sc.edu/undergraduate/arts-sciences/
courses-acceptable-social-science-fine-arts-humanities/) (3 hours of
  Social Science)
- One course selected from Modern Art History (must be passed with
  a grade of C or higher)
- Two additional courses selected from Art History, including one at the
  500-level selected from Art History (must be passed with a grade of C
  or higher)

3. Program Requirements (0-10 hours)

Cognate or Minor (0 hours)

A cognate or minor is not required for the BFA with a major in Art Studio.

Electives (0-10 hours)

No courses of remedial, developmental, skill-acquiring, or vocational
nature may apply as credit toward degrees in the College of Arts and
Sciences. The College of Arts and Sciences allows the use of the Pass-
Fail option on elective courses. Further clarification on inapplicable
courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (63 hours)

A minimum grade of C is required in all major courses.

Foundations Requirements (15 hours)

Selected Courses (12 Hours)

- Select four additional MART courses from 200 level or above, two of which must be at the 400 level or above. MART 499 and MART 399 may not apply to the minor in Media Arts.

Media Arts, B.A.

Learning Outcomes

- Media Arts students will demonstrate proficiency of technique across a variety of platforms and processes for the creation of media artworks.
- Media Arts students will be able to work individually and in teams to create aesthetically and conceptually sophisticated works of media art.
- Media Arts students will publicly present their work at and beyond the University in screenings, festivals, galleries, conferences, and other forums.
- Media Arts students will be able to identify and analyze the impact of media art as it relates to global media practices and culture.
- Media Arts students will be able to describe and evaluate the relationship between their own artwork and its place in the larger community of artists and practitioners.
Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>

<tr>
<td>4. Major Requirements</td>
<td></td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

- two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.
Social Science and Fine Arts or Humanities (12 hours)

- Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
- Three hours of Social Science
- Nine hours of Fine Arts or Humanities

3. Program Requirements (28-43 hours)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (10-31 hours)

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Media Arts, B.A.

Sociology

Department Website (http://www.cas.sc.edu/socy/)

Brent Simpson, Chair

The department offers two undergraduate majors. Students may elect programs leading to the Bachelor of Arts degree in sociology or to the Bachelor of Science degree in sociology. Students may also attempt to graduate with honors in sociology if they have a 3.50 overall average and a 3.50 in sociology. Under that program students are required to conduct, write, and defend a research project.

Programs

- Sociology Minor (p. 285)
- Sociology, B.A. (p. 285)
- Sociology, B.S. (p. 288)

Courses

SOCY 101 - Introductory Sociology (3 Credits)
An introduction to sociological facts and principles: an analysis of group-making processes and products.
Carolina Core: GSS

SOCY 220 - Elementary Statistics for Sociologists (3 Credits)
An introduction to concepts and application of quantitative methods, including descriptive and inferential statistics. Emphasis on analysis of empirical sociological data.

SOCY 300 - Social Structures (3 Credits)
Selected theoretical orientations, methodological procedures, and illustrative substantive data pertaining to social structures.

SOCY 301 - Sex and Gender (3 Credits)
Offers a sociological lens to develop critical ways of thinking about sex and gender as social processes in everyday lives. This course considers how sex and gender shape and affect the experiences of women, men, girls, boys, and individuals who live in the spaces in-between (those who are intersex or transgender) across a wide range of social institutions (family, work, education, politics, etc.).
Prerequisites: SOCY 101.

Cross-listed course: WGST 300
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 302 - Sociological Theory (3 Credits)
Examination of key ideas from classical, modern, and contemporary sociological theories.

SOCY 303 - Sociological Research Methods (3 Credits)
Qualitative and quantitative methods of sociological research.

SOCY 304 - Race, Class, Gender, and Sexuality (3 Credits)
Historical and contemporary power relationships in race, social class, gender, and sexual orientation.
Prerequisites: SOCY 101.

Cross-listed course: POLI 305, WGST 304
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 305 - Sociology of Families (3 Credits)
Sociological perspectives related to various aspects of family behaviors, roles, and values.
Prerequisites: SOCY 101.

Cross-listed course: WGST 305
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 307 - Sociology of Religion (3 Credits)
Sociological perspectives related to selected aspects of religious behavior. Includes references to non-Western religions.
Cross-listed course: RELG 338
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 308 - Community Organization (3 Credits)
An analysis of formal and informal organization, the interrelationships among public and private agencies, and means through which community action programs are initiated, coordinated, and maintained.
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 309 - An Introduction to Social Inequality (3 Credits)
A sociological analysis of the distribution of wealth and income in selected societies.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 310 - Social Demography (3 Credits)
Introduction to key areas of population studies. Methodological approaches, time trends, regional differences, and contemporary policy issues.
Carolina Core: GSS

SOCY 311 - Ecology of Human Social Systems (3 Credits)
Relationships among and changes in populations, social organization, technology, and the environment.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SOCY 312 - Bureaucracy and Modern Society (3 Credits)
Bureaucracies in the public and private sector, their internal dynamics and relationship to the social environment.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
SOCY 313 - Sociology of Aging (3 Credits)
Analysis of aging as a process of socialization and the status of older people in society, their roles in the community, demographic aspects of aging, and the impact of aging upon social institutions.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 315 - Global Population Issues (3 Credits)
Overview of global population history, theory, statistics, and issues related to recent population trends.
Graduation with Leadership Distinction: GLD: Global Learning

SOCY 320 - Individual and Society (3 Credits)
Selected theoretical orientations, methodological procedures, and illustrative substantive data pertaining to the relations between the individual and society.

SOCY 322 - Sociology of Suicide (3 Credits)
An introductory survey of the social aspects of suicidal behaviors and attitudes.

SOCY 323 - Sociology of Deviant Behavior (3 Credits)
Theories, methodology, and substantive issues in the study of social deviance.

SOCY 325 - Sociology of Childhood (3 Credits)
A consideration of the child in the family group, play group, school group, and community.

SOCY 326 - Sociology of Adolescence (3 Credits)
Sociological perspectives and research findings related to adolescence.

SOCY 330 - Sociology of the Paranormal (3 Credits)
A critical examination of factors that lead to the widespread acceptance of paranormal claims.
Prerequisites: SOCY 101.

SOCY 340 - Introduction to Social Problems (3 Credits)
Contemporary social issues such as poverty, health, the criminal justice system, globalization and the environment, their causes and possible solutions.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy

SOCY 350 - Juvenile Delinquency (3 Credits)
Social factors in the development, identification, and treatment of delinquents.
Prerequisites: SOCY 101.
Cross-listed course: CRJU 351
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 351 - Urban Sociology (3 Credits)
Analysis of urban trends, characteristics, and functions of cities with reference to the social psychological factors in urban living. Attention is directed to the emergence of urbanism in the United States, with particular reference to the Southern region, and to institutions, problems, and city planning.

SOCY 353 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.
Prerequisites: SOCY 101.
Cross-listed course: CRJU 341
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 354 - Collective Behavior (3 Credits)
An analysis of crowds, publics, social movements, and the mass society in terms of their institutional and social psychological consequences.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SOCY 355 - Race and Ethnic Relations (3 Credits)
Theoretical and empirical approaches related to race/ethnicity and the current state of race relations in America, with some attention to global issues.
Cross-listed course: AFAM 355
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 357 - Sociology of Education (3 Credits)
Analysis of educational institutions, organizations, processes, and their effects in contemporary society.
Cross-listed course: EDFI 357
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 360 - Sociology of Medicine and Health (3 Credits)
Health and illness in relation to social institutions. The organization and professionalization of medicine and social barriers to medical care.

SOCY 368 - Society through Visual Media (3 Credits)
Analysis of social phenomena and sociological questions through various forms of media, including films, TV, photography, and other visual media.
Prerequisites: SOCY 101.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 370 - Sociology of Sport (3 Credits)
Theories, methods, and substantive issues in the study of sport in contemporary societies.

SOCY 398 - Topics in Sociology (3 Credits)
Reading and research on selected sociological topics. Course content varies and will be announced in the schedule of classes by title.

SOCY 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

SOCY 460 - Sociology of Mental Health (3 Credits)
Social factors in the development, identification, and treatment of mental illness.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 500 - Social Networks (3 Credits)
Analysis of personal, social and organizational networks, their structural patterns, practical consequences, and principles of formation and change.

SOCY 502 - Political Sociology (3 Credits)
Theory and research concerning the interrelationship between the polity and social structures.

SOCY 503 - Family and Social Stratification (3 Credits)
An analysis of the contemporary American family emphasizing social stratification, mobility, occupations, and urbanization.

SOCY 504 - Social Stratification (3 Credits)
Theory and research in social stratification.
SOCY 505 - Social Structures in Communities (3 Credits)
Interrelationships of major social structures within communities.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 506 - Social Organizations (3 Credits)
Selected theoretical orientation, methodological procedures, and illustrative substantive issues pertaining to organizations.

SOCY 507 - Sociology of Social Control (3 Credits)
Theories and issues relating to the definition of and response to crime and/or deviance.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 509 - Advanced Social Structures (3 Credits)
The analysis of core methodological and substantive issues in the study of social structures.

SOCY 510 - Life Course Demographics (3 Credits)
People's demographic lives, structural contexts, and social change. Emphasis on the socioeconomic context in which lives unfold.
Prerequisites: SOCY 310.

SOCY 512 - Internal and International Migration (3 Credits)
A survey of methods of analysis and research findings with emphasis on the social and economic concomitants of internal migration. Cultural, economic, and historical aspects of international migration. Effects of governmental policies on immigration and emigration. Examination of selected countries.

SOCY 514 - Urbanization (3 Credits)
Analysis of urbanization using contemporary and historical data from developing societies. The demographic components of metropolitan growth and the changing structure of metropolitan communities.

SOCY 515 - Scientific Methods and Sociological Inquiry (3 Credits)
Introduction to methods used to answer theoretical, empirical, and practical sociological questions, including scientific inquiry and research design.

SOCY 520 - Advanced Social Psychology (3 Credits)
Advanced survey of social psychological perspectives and research on inequality, discrimination, power and status, cooperation and collective action, social norm and morality, networks and relationships.

SOCY 521 - Small Group Analysis (3 Credits)
A behavioral analysis of small groups.

SOCY 522 - Power and Authority Structures in Groups (3 Credits)
An exploration of theoretical perspectives, methodological approaches, and substantive issues in the study of interpersonal power and authority.

SOCY 523 - Social Processes of Deviance Control (3 Credits)
A systematic analysis of the interrelation among the creation, involvement, recognition, and control of deviance.

SOCY 524 - Interpersonal Behavior in Families (3 Credits)
Social psychological perspectives on family behavior.

SOCY 525 - Selves and Social Transaction (3 Credits)
A systematic analysis of interrelationships among social acts, selves, roles, transactions, and language.

SOCY 540 - Sociology of Law (3 Credits)
Review of theoretical and empirical developments in the sociology of law, including classical and modern sociological theories of law and selected sociological themes of law in various social settings.

SOCY 550 - Sociology of Science (3 Credits)
Interrelationships among society, culture, and contemporary science.

SOCY 557 - Sociology of Education and Inequality (3 Credits)
Advanced inquiry into the relationship between education and inequality.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 560 - Advanced Sociological Theory (3 Credits)
Theoretical perspectives on society and social behavior.

SOCY 561 - Integrative Research Experience (3 Credits)
Design and conduct of original research using sociological research methods to meet Carolina Core Integrative course requirement for the BA and the BS.
Prerequisites: SOCY 101, SOCY 220 and SOCY 300-level or higher course.

Experiential Learning: Experiential Learning Opportunity

SOCY 562 - Advanced Sociological Research Methods (3 Credits)
Advanced survey of methods used in sociological research.

SOCY 598 - Selected Topics (3 Credits)
Readings and research on selected sociological topics. Course and content varies and will be announced in the schedule of classes by title.
Prerequisites: SOCY 101.

SOCY 599 - Advanced Independent Study (3-6 Credits)
Advanced Independent study. Contract approved by instructor, advisor, and department chair is required.
Prerequisites: SOCY 101.

SOCY 698 - Special Topics (3 Credits)
Reading and research.
Prerequisites: SOCY 101.

Sociology, B.A.

Learning Outcomes

- Sociology majors completing the required SOCY 561 capstone course will demonstrate they understand the general sociological perspective and the uses of sociological theory, can apply critical reasoning skills to evaluating theoretical explanations, and can identify uses and limitations of major sociological research methods in evaluating theories. Majors will evidence the ability to apply these skills to the study of social issues of broad impact and interest beyond the discipline.

- Sociology majors completing advanced substantive courses (500-level) will demonstrate they:
  a. understand the major sociological theories in a specific substantive area of specialization,
  b. can critically evaluate competing theories in the field, and
c. can identify and critique major methodological approaches within the specialty area.
   Examples of substantive areas are Social Inequality, Social Psychology, Sociology of the Family, and Sociology of Medicine and Health.

   • Sociology majors will demonstrate an understanding and ability to use the following statistical tools:
     a. The distinction between descriptive and inferential statistics
     b. Levels of measurement, ratios and rates
     c. Various measures of central tendency and statistical variability used to describe distributions
     d. Hypothesis testing, sampling and inference from sample estimates for a population
     e. Simple bivariate modeling techniques such as correlation and regression.

   • Students should demonstrate that they can apply elementary statistical tools and research methods to the analysis of basic sociological questions.

   • Graduating sociology majors should evidence an integrated preparation for career pursuits and self assess their career preparation as adequate for career plans at the point of graduation.

Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.

2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)  
   must be passed with a grade of C or higher
   • any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)
   • any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)
   • Two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required for all baccalaureate degrees. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.
   • CC-GFL courses (p. 742)

   It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
   • any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
   • SOCY 101 – must be passed with a grade of C or higher
   • any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
   • any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)
   • any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)
   • any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)
   • any overlay or stand-alone CC-VSR course (p. 742)
Carolina Core Stand Alone or Overlay Eligible
Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
• only if needed to meet 122-level proficiency

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
• One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
or
• One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
• Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
  • Three hours of Social Science
  • Nine hours of Fine Arts or Humanities

3. Program Requirements (31-46 hours)
Supporting Courses (3 hours)
must be passed with a grade of C or higher
• SOCY 220

Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (10-31 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (27 hours)
A minimum grade of C is required in all major courses.

B.A. with Distinction in Sociology
The Departmental Undergraduate Research Track (BA with Distinction in Sociology) is available to students majoring in Sociology who maintain a minimum GPA of 3.50 in the major and 3.50 cumulative and who wish to
plan and conduct an individual research project under the supervision of a faculty committee.

A student seeking to graduate with Distinction in Sociology must select a faculty member to chair the committee that guides and evaluates the research project. At least two other faculty members will be appointed by the committee chair to serve as members of the committee. A written sponsorship agreement signed by the committee chair must be filed with the departmental chair. The student must successfully defend a research proposal and final paper to the committee. Ideally, the project should be finished within two semesters.

Research projects must conform to the University’s policy on the treatment of human subjects. Proposals must additionally be subjected to the scrutiny of the Department of Sociology ethics committee.

**Requirements**

- Cumulative GPA of 3.50 or higher and a GPA of 3.50 or higher in the major;
- Successful completion of requirements for the Sociology major;
- Research proposal approved by faculty committee;
- Successful completion of 3-6 hours SOCY 599 including written and oral presentation of research project.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Sociology, B.A.**

**Sociology, B.S.**

**Learning Outcomes**

- Sociology majors completing the required SOCY 561 ([https://academicbulletins.sc.edu/search/?P=SOCY%20561](https://academicbulletins.sc.edu/search/?P=SOCY%20561)) capstone course will demonstrate they understand the general sociological perspective and the uses of sociological theory, can apply critical reasoning skills to evaluating theoretical explanations, and can identify uses and limitations of major sociological research methods in evaluating theories. Majors will evidence the ability to apply these skills to the study of social issues of broad impact and interest beyond the discipline.

- Sociology majors completing advanced substantive courses (500-level) will demonstrate they

  a. understand the major sociological theories in a specific substantive area of specialization,

  b. can critically evaluate competing theories in the field, and

  c. can identify and critique major methodological approaches within the specialty area.

Examples of substantive areas are Social Inequality, Social Psychology, Sociology of the Family, and Sociology of Medicine and Health.

- Sociology majors will demonstrate an understanding and ability to use the following statistical tools:

  a. The distinction between descriptive and inferential statistics

  b. Levels of measurement, ratios and rates

  c. Various measures of central tendency and statistical variability used to describe distributions

  d. Hypothesis testing, sampling and inference from sample estimates for a population

  e. Simple bivariate modeling techniques such as correlation and regression.

- Students should demonstrate that they can apply elementary statistical tools and research methods to the analysis of basic sociological questions.

- Graduating sociology majors should evidence an integrated preparation for career pursuits and self assess their career preparation as adequate for career plans at the point of graduation.

**Admissions**

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.

2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

**Degree Requirements (120 hours)**

**Program of Study**

<table>

1. **Carolina Core Requirements (32-44 hours)**

**CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)**

*must be passed with a grade of C or higher*

- any CC-CMW courses (p. 742)
ARP – Analytical Reasoning and Problem Solving (6-8 hours)
  • MATH 141 or MATH 122
  • MATH 142 or MATH 170 or MATH 172

SCI – Scientific Literacy (8 hours)
  • Two 4-credit hour CC-SCI (p. 742) laboratory science courses

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required for all baccalaureate degrees. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.
  • CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
  • any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
  • SOCY 101 — must be passed with a grade of C or higher

AIU – Aesthetic and Interpretive Understanding (3 hours)
  • any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
  • any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
  • any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
  • any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)
Foreign Language (0-3 hours)
  • only if needed to meet 122-level proficiency

Analytical Reasoning (6 hours)
  • STAT 201 (or equivalent) or higher
  • CSCE 102 (or equivalent) or higher

History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:
  • One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
  • One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)
Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/)
  • Three hours of Social Science
  • Three hours of Fine Arts or Humanities

3. Program Requirements (31-46 hours)
Supporting Courses (3 hours)
  • SOCY 220

Cognate or Minor (12-18 hours)
Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.
For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

**Minor**

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (10-31 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

**4. Major Requirements (27 hours)**

A minimum grade of C is required in all major courses.

**Major Courses (9 hours)**

<table>

- Select 2 additional SOCY courses from the 500-level or above

**B.A. with Distinction in Sociology**

The Departmental Undergraduate Research Track (BS with Distinction in Sociology) is available to students majoring in Sociology who maintain a minimum GPA of 3.50 in the major and 3.50 cumulative and who wish to plan and conduct an individual research project under the supervision of a faculty committee.

A student seeking to graduate with Distinction in Sociology must select a faculty member to chair the committee that guides and evaluates the research project. At least two other faculty members will be appointed by the committee chair to serve as members of the committee. A written sponsorship agreement signed by the committee chair must be filed with the departmental chair. The student must successfully defend a research proposal and final paper to the committee. Ideally, the project should be finished within two semesters.

Research projects must conform to the University’s policy on the treatment of human subjects. Proposals must additionally be subjected to the scrutiny of the Department of Sociology ethics committee.

**Requirements**

- Cumulative GPA of 3.50 or higher and a GPA of 3.50 or higher in the major;
- Successful completion of requirements for the Sociology major;
- Research proposal approved by faculty committee;
- Successful completion of 3-6 hours SOCY 599 including written and oral presentation of research project.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Sociology, B.S.**

**Southern Studies**

Department Website [http://www.cas.sc.edu/iss/](http://www.cas.sc.edu/iss/)

Robert Brinkmeyer, Director

The interdisciplinary minor in Southern Studies offers training in analytic methods and research skills designed to help students excel in their departmental fields of concentration and establish a lasting basis for independent exploration of the South.

**Courses**

**SOST 101 - The Literary South (3 Credits)**

Principles, practices, and contexts of major literary works of the American South.

**Carolina Core: AIU**

**SOST 298 - Topics in the American South (3 Credits)**

Reading and research on selected interdisciplinary topics in Southern Studies. Course content varies and will be announced in the schedule of classes by title. May be repeated for credit under a different title.

**SOST 299 - Topics is South Carolina (3 Credits)**

Reading and research on selected interdisciplinary topics about South Carolina. Course content varies and will be announced in the schedule of classes by title. May be repeated for credit under a different title.

**SOST 301 - Introduction to Southern Studies 1580-1900 (3 Credits)**

Examination of major social and cultural developments of American South from early exploration to 1900.
SOST 302 - Introduction to Southern Studies: The Twentieth Century (3 Credits)
An topical examination of the American South ranging from Reconstruction to the Civil Rights Movement.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Research

SOST 305 - The Contemporary South (3 Credits)
An investigation of Southern regional identity.

SOST 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and program director is required for undergraduates.
Graduation with Leadership Distinction: GLD: Research

SOST 405 - Topics in Southern Studies (3 Credits)
Reading and research on selected topics in Southern studies. Course content varies and will be announced in the schedule of classes by title.
Graduation with Leadership Distinction: GLD: Research

SOST 500 - Topics in the American South (3 Credits)
Selected topics related to the study of the American South. Course content varies and will be announced in the schedule of classes by title. May be repeated for credit as topics vary.

Statistics
Department Website (http://www.stat.sc.edu/)
Joshua Tebbs, Chair

The department offers the Bachelor of Science degree with a major in statistics. The program provides a strong basis in both applied and theoretical statistics and prepares a student for the pursuit of graduate study in statistics or for employment by industry or government. In addition, the department serves many of the disciplines within the University through course offerings which provide basic statistical skills necessary to the pursuit of studies in these disciplines.

Programs
- Statistics Minor (p. 293)
- Statistics, B.S. (p. 293)

Courses

STAT 101 - Elementary Statistics (3 Credits)
Introduction to the fundamentals of modern statistical methods, including descriptive statistics, probability, random sampling, simple linear regression, correlation, tests of hypotheses, and estimation.
Prerequisites: MATH 111 or MATH 115 or STAT 110.
Carolina Core: ARP

STAT 205 - Elementary Statistics for the Biological and Life Sciences (3 Credits)
Introduction to fundamental statistical methods with applications in the biological and life sciences. Includes descriptive statistics; probability; one and two-sample models for population means; contingency tables (including relative risk, odds ratios, case-control studies, and estimation of sensitivity and specificity); linear regression; logistic regression; aspects of survival analysis, and ANOVA.
Prerequisites: MATH 111 or higher.
Carolina Core: ARP

STAT 206 - Elementary Statistics for Business (3 Credits)
Fundamental statistical methods with applications in business. Includes descriptive statistics, graphical methods, probability, distributions, sampling, inference, contingency tables, and linear regression.
Prerequisites: MATH 111 or higher.
Carolina Core: ARP

STAT 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

STAT 506 - Introduction to Experimental Design (3 Credits)
Techniques of experimentation based on statistical principles with application to quality improvement and other fields. Full and fractional factorial designs for factors at two levels; dispersion effects; related topics.
Prerequisites: C or higher in MATH 122 or MATH 141; or both MATH 111 or higher and any statistical class.

STAT 509 - Statistics for Engineers (3 Credits)
Basic probability and statistics with applications and examples in engineering. Elementary probability, random variables and their distribution, random processes, statistical inference, linear regression, correlation and basic design of experiments with application to quality assurance, reliability, and life testing. May not be taken concurrently with or after STAT 513, STAT 515, or STAT 516. Not for C.A.S., M.A.S., or Ph.D credit in Statistics.
Prerequisites: MATH 142 or equivalent.

STAT 511 - Probability (3 Credits)
Probability and independence; discrete and continuous random variables; joint, marginal, and conditional densities; moment generating functions; laws of large numbers; binomial, Poisson, gamma, univariate and bivariate normal distributions.
Prerequisites: C or better in MATH 241.
Corequisite: MATH 241.
Cross-listed course: MATH 511
STAT 512 - Mathematical Statistics (3 Credits)
Functions of random variables, order statistics, sampling distributions, central limit theorem, quality of estimators, interval estimation, sufficient statistics, minimum-variance unbiased estimator, maximum likelihood, large-sample theory, introduction to hypothesis testing.
Prerequisites: C or better in STAT 511 or MATH 511.

STAT 513 - Theory of Statistical Inference (3 Credits)
Hypothesis testing, Neyman-Pearson lemma, likelihood ratio tests, power, the theory of linear models including multiple linear regression and ANOVA, the Chi-square goodness-of-fit test, Chi-square inference for contingency tables, Bayesian inference, and advanced topics including survival analysis (only if time permits).
Prerequisites: C or better in STAT 512.

STAT 515 - Statistical Methods I (3 Credits)
Applications and principles of elementary probability, essential discrete and continuous probability distributions, sampling distributions, estimation, and hypothesis testing. Inference for means, variances, proportions, one-way ANOVA, simple linear regression, and contingency tables. Statistical packages such as SAS or R. May not be taken concurrently with or after STAT 509, STAT 513, or STAT 516. Not for CAS, MAS, MS, or PhD credit in Statistics.
Prerequisites: C or higher in MATH 122 or MATH 141; or both MATH 111 or higher and any statistics class.

STAT 516 - Statistical Methods II (3 Credits)
Applications and principles of linear models. Simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance. Statistical packages such as SAS. Not for CAS, MAS, MS, or PhD credit in Statistics.
Prerequisites: C or higher in STAT 515, STAT 509, STAT 512, or equivalent.

STAT 517 - Advanced Statistical Models (3 Credits)
Theory and applications of advanced statistical models. Includes implementation and assessment of generalized linear, nonlinear and nonparametric regression, mixed effect, repeated measures, multivariate regression, and spatial models.
Prerequisites: STAT 512 or STAT 516 or equivalent.

STAT 518 - Nonparametric Statistical Methods (3 Credits)
Applications and principles of nonparametric statistics. Classical rank-based methods, and selected categorical data analysis and modern nonparametric methods. Statistical packages such as R.

STAT 519 - Sampling (3 Credits)
Techniques of statistical sampling in finite populations with applications in the analysis of sample survey data. Topics include simple random sampling for means and proportions, stratified sampling, cluster sampling, ratio estimates, and two-stage sampling.
Prerequisites: C or higher in STAT 515, STAT 509, STAT 512, or equivalent.

STAT 520 - Forecasting and Time Series (3 Credits)
Time series analysis and forecasting using the multiple regression and Box-Jenkins approaches.
Prerequisites: STAT 516 or MGSC 391.

Cross-listed course: MGSC 520

STAT 521 - Applied Stochastic Processes (3 Credits)
An introduction to stochastic processes, including conditional probability, Markov chains, Poisson processes, and Brownian motion. Incorporates simulation and applications to actuarial science.
Prerequisites: C or higher in STAT 511.

STAT 522 - Financial Mathematics I (3 Credits)
Prerequisites: C or better in MATH 241.

Cross-listed course: MATH 514

STAT 523 - Financial Mathematics II (3 Credits)
Prerequisites: C or better in MATH 514 or STAT 522.

Cross-listed course: MATH 515

STAT 525 - Statistical Quality Control (3 Credits)
Statistical procedures for process control including CUSUM and Shewhart Control Charts, and lot-acceptance sampling.
Prerequisites: STAT 509 or STAT 515 or MGSC 391.

Cross-listed course: MGSC 525

STAT 528 - Environmental Statistics (3 Credits)
Statistical analysis of environmental data. Review of multiple regression and ANOVA, nonlinear regression models and generalized linear models, analyses for temporally and spatially correlated data, and methods of environmental sampling.
Prerequisites: STAT 516.

STAT 530 - Applied Multivariate Statistics and Data Mining (3 Credits)
Introduction to fundamentals of multivariate statistics and data mining. Principal components and factor analysis; multidimensional scaling and cluster analysis; MANOVA and discriminant analysis; decision trees; and support vector machines. Use of appropriate software.
Prerequisites: C or higher in STAT 515, STAT 205, STAT 509, STAT 512, ECON 436, MGSC 391, PSYC 228, or equivalent.

STAT 535 - Introduction to Bayesian Data Analysis (3 Credits)
Principles of Bayesian statistics, including: one- and multi-sample analyses; Bayesian linear models; Monte Carlo approaches; prior elicitation; hypothesis testing and model selection; hierarchical models; selected advanced models; statistical packages such as WinBUGS and R.
Prerequisites: C or higher in STAT 512; or CSCE 582 [=STAT 582]; or both STAT 511 and either STAT 509 or STAT 515; or equivalent.

STAT 540 - Computing in Statistics (3 Credits)
An introduction to statistical packages such as R and SAS with special focus on data management and computing procedures such as Monte Carlo simulation.
Prerequisites: C or higher in STAT 515, STAT 509, STAT 512, or equivalent.

STAT 541 - Advanced SAS Programming (3 Credits)
Advanced programming techniques in SAS, including database management, macro language, and efficient programming practices.
Prerequisites: STAT 540.
STAT 582 - Bayesian Networks and Decision Graphs (3 Credits)  
Normative approaches to uncertainty in artificial intelligence. Probabilistic and causal modeling with Bayesian networks and influence diagrams. Applications in decision analysis and support. Algorithms for probability update in graphical models.  
Prerequisites: CSCE 350, STAT 509, or STAT 515.  
Cross-listed course: CSCE 582

STAT 587 - Big Data Analytics (3 Credits)  
Foundational techniques and tools required for data science and big data analytics. Concepts, principles, and techniques applicable to any technology or industry for establishing a baseline that can be enhanced by future study.  
Prerequisites: STAT 509, STAT 513, or STAT 515.  
Cross-listed course: CSCE 587

STAT 588 - Genomic Data Science (3 Credits)  
This course focuses on quantitative knowledge for interdisciplinary applications in genetics as well as hands-on experience in analyzing genetic data. In this course, students will have programming exercises in using analysis tools to conduct genome-wide analysis, annotation, and interpretation of genetic data using R/Bioconductor packages.  
Prerequisites: C or better in STAT 201 or higher.  
Cross-listed course: BIOL 588

STAT 591 - Data Analysis for Teachers (3 Credits)  
Introduction to statistics for elementary, middle, and high school teachers. The fundamentals of data collection, descriptive statistics, probability, and inference with special focus on methods of teaching statistical reasoning. For M.A.T. (excluding mathematics) / M.Ed. / M.T. and nondegree credit only.  
Cross-listed course: SMED 591

STAT 599 - Topics in Statistics (1-3 Credits)  
Course content varies and will be announced in the schedule of courses by title.

STAT 600 - Statistics for Applied Management (3 Credits)  
Introduction to data collection, descriptive statistics, and statistical inference with examples from hospitality, retail, sport, and entertainment management. Focus on selecting, implementing, and interpreting the appropriate statistical methods using software such as Excel and SPSS. Not for minor or degree credit in Mathematics or Statistics. Does not prepare students for STAT 516, STAT 518, STAT 519 or STAT 525.

STAT 650 - AP Statistics for Teachers (3 Credits)  

Statistics Minor

Minor Requirements (18 Hours)  
• 18 hours of 500 level Statistics courses  

Note: Credit will be given for only one of STAT 509 or STAT 515.

Statistics, B.S.

Learning Outcomes  
• Students will demonstrate the ability to perform fundamental statistical analyses and to prepare informative graphics for public presentation.  
• Students will demonstrate a mastery of probability and mathematical statistics at the mathematical level of calculus and linear algebra.  
• Students will demonstrate the ability to use statistical programming languages.  
• Students will demonstrate competency in technical writing and presentation.

Retention  
To be retained in the program, a student must obtain a grade of C or higher in at most two attempts in all mathematics, computer science, and statistics courses required for graduation.

Transfer Requirement  
Any student applying to transfer to the statistics major from other programs within the University, or from other accredited colleges and universities, is required to have earned a grade of “B” or higher in at least one of the following courses, or their equivalent: USC’s MATH 141, MATH 142, STAT 509, or STAT 515. An AP or IB exam score that provides credit for MATH 142 also satisfies this requirement. STAT 509 and STAT 515 are advanced undergraduate courses. This requirement is in addition to the minimum University and College of Arts and Sciences requirements.

Admissions

Entrance Requirements  
New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.  
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

1. Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

- any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (8 hours)

must be passed with a grade of C or higher

- MATH 141
- MATH 142

SCI – Scientific Literacy (8 hours)

- Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

- CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements

Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-19 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

Analytical Reasoning (6-7 hours)

must be passed with a grade of C or higher

- MATH 344 or MATH 544
- CSCE 145 or CSCE 206

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.

or

- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (6 hours)

- Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (3 hours of Social Science)

- ENGL 462 or ENGL 463 must be passed with a grade of C or higher

3. Program Requirements (28-44 hours)

Supporting Courses (3 hours)

must be passed with a grade of C or higher

- MATH 241
Cognate or Minor (12-18 hours)

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Science degrees, grades of D are acceptable for completion of the cognate requirement, except where restricted by the major program.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (7-29 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (27 hours)

A minimum grade of C is required in all major courses.

Major Courses (18 hours)

¹ A student double majoring in Mathematics and Statistics may use STAT 511 [=MATH 511] to satisfy a major requirement in both programs.

² Major credit will be given for only one of STAT 509 or STAT 515. Neither STAT 509 nor STAT 515 may be taken concurrently with, or after, STAT 513. A student who has started the Statistics major after taking STAT 512 may replace the STAT 509/STAT 515 requirement with an additional 3 hour advanced application course chosen from STAT 500 or above.

Major Electives (9 hours)

- Select three courses from STAT 500¹ or above

² Some minors in the sciences require a minimum of 16 hours.
A student double majoring in Mathematics and Statistics may use STAT 511 (=MATH 511) to satisfy a major requirement in both programs.

Major credit will be given for only one of STAT 509 or STAT 515. Neither STAT 509 nor STAT 515 may be taken concurrently with, or after, STAT 513. A student who has started the Statistics major after taking STAT 512 may replace the STAT 509/STAT 515 requirement with an additional 3 hour advanced application course chosen from STAT 500 or above.

Note: A student double majoring in Economics (in the College of Arts and Sciences) and Statistics may use the combination of both ECON 436 and STAT 506 in place of the combination of both STAT 516 and one of the STAT 500 or above advanced application courses for the Statistics major. In this case ECON 436 may satisfy a major requirement in both programs. ECON 436 and STAT 516 may not both be used to satisfy major requirements in Statistics.

Major Map

A major is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Statistics, B.S. No Concentration

Statistics, B.S. Actuarial Science Concentration

Theatre and Dance

Department Website (http://www.cas.sc.edu/thea/)

Stephanie Milling, Interim Chair

Programs

The Department of Theatre and Dance offers the Bachelor of Arts degree with majors in theatre and dance.

Theatre

The theatre major is especially suitable for persons wishing a strong liberal arts education and/or preparation for careers in theatre, the entertainment industry, communication, education, law, medicine, the ministry, etc.

Dance

The Bachelor of Arts in Dance offers two concentrations: performance and choreography or dance education, and all students actively participate in departmental productions. The program is known for offering rigorous technical training while also providing opportunities for broad-based study in dance and beyond. Experience a world-class repertory, including historical dance works by George Balanchine, Martha Graham, Twyla Tharp, David Parsons, Lila York and Lynne Taylor Corbett, as well as original works by our eminent faculty. You will be exposed to dance techniques that include classical ballet, contemporary dance, jazz, musical theater and world dance. Students focusing in dance education have multiple opportunities to participate in professional learning experiences in a variety of educational and community settings while completing their studies. By extending the classroom into the field, students participate in hands-on learning that prepares them for teaching dance to a variety of populations while earning K-12 certification in dance.

Programs

- Dance Minor (p. 303)
- Dance, B.A. (p. 303)
- Theatre Minor (p. 306)
- Theatre, B.A. (p. 307)

Courses

DANC 101 - Dance Appreciation (3 Credits)
An eclectic survey of various dance forms including primitive, historic, ballet, modern, and Broadway musical.

Carolina Core: AIU

DANC 102A - Ballet Technique I (2 Credits)
A beginning study of ballet with emphasis on alignment, classical historical traditions, and combinations or movement. This course is for dance majors and minors. May be repeated up to six times for credit.

DANC 102B - Ballet Technique I (2 Credits)
A beginning study of ballet with emphasis on alignment, classical historical traditions, and combinations or movement. This course is for non dance majors. May be repeated up to six times for credit.

DANC 103 - The Dancer's Body (3 Credits)
Anatomy and movement analysis for dancers.

DANC 111A - World Dance I (2 Credits)
World Dance is dance experience in diverse world dance forms. This course is for dance majors and minors. May be repeated up to six times for credit.

DANC 111B - World Dance I (2 Credits)
World Dance is dance experience in diverse world dance forms. This course is for non dance majors. May be repeated up to six times for credit.

DANC 112A - Contemporary Dance Technique I (2 Credits)
An introduction to modern dance with the beginning practice of movement technique. This course is for dance majors and minors. May be repeated up to six times for credit.

DANC 112B - Contemporary Dance Technique I (2 Credits)
An introduction to modern dance with the beginning practice of movement technique. This course is for non dance majors. May be repeated up to six times for credit.

DANC 113A - World Dance II (2 Credits)
World Dance is dance experience in diverse world dance forms. This course is for dance majors and minors. May be repeated up to six times for credit.

DANC 113B - World Dance II (2 Credits)
World Dance is dance experience in diverse world dance forms. This course is for non dance majors. May be repeated up to six times for credit.

DANC 150 - Introduction to Dance (3 Credits)
Introduction to dance as art, communication, and cultural expression as it applies to a career in dance. Open to non-majors.

DANC 160A - Dance Improvisation and Composition (3 Credits)
An introductory course on dance composition and the creative process. Exploration and improvisation of different dance forms; specific choreographic tools. This course is for dance majors and minors. May be repeated up to six times for credit.
DANC 160B - Dance Improvisation and Composition (3 Credits)
An introductory course on dance composition and the creative process. Exploration and improvisation of different dance forms; specific choreographic tools. This course is for non dance majors. May be repeated up to six times for credit.

DANC 170 - Ballroom Dance I (2 Credits)
Introduction of six major dances (Foxtrot, Waltz, Tango, Cha Cha, Swing, and Rumba) to students with no dance experience. The emphasis will be on learning dance figures and patterns.

DANC 171 - Ballroom Dance II (2 Credits)
Intermediate steps will include challenging choreography or patterns. The emphasis in technique will be based on developing speed and elegance while dancing complex patterns.
Prerequisites: DANC 170 or equivalent.

DANC 177 - Dance Company I (1 Credit)
This course is designed for rehearsals leading to dance performances; and including student choreography, on stage productions, the dance touring ensemble and components of dance production. Repeat seven times.

DANC 178 - Jazz Dance Technique I (2 Credits)
A beginning level class focusing on coordination, rhythm, alignment, jazz vocabulary, and jazz dance positions. May be repeated up to six times for credit.

DANC 202A - Ballet Technique II (1-2 Credits)
Second level of classical ballet technique facilitating skill in allegro and adagio work. This course is for dance majors and minors. May be repeated up to six times for credit.
Prerequisites: DANC 102A or equivalent.

DANC 202B - Ballet Technique II (1-2 Credits)
Second level of classical ballet technique facilitating skill in allegro and adagio work. This course is for non dance majors. May be repeated up to six times for credit.
Prerequisites: DANC 102B or equivalent.

DANC 204 - Pointe II (1-2 Credits)
Pointe technique and skills on pointe, an extension of ballet technique at the foundational level. May be repeated four times.
Prerequisites: DANC 202 or equivalent.

DANC 212A - Contemporary Dance Technique II (1-2 Credits)
A second level of contemporary technique, with emphasis on skill refinement and aesthetic elements. This course is for dance majors and minors. May be repeated up to six times for credit.
Prerequisites: DANC 112A or equivalent, placement audition or permission of instructor.

DANC 212B - Contemporary Dance Technique II (1-2 Credits)
A second level of contemporary technique, with emphasis on skill refinement and aesthetic elements. This course is for non dance majors. May be repeated up to six times for credit.
Prerequisites: DANC 112B or equivalent, placement audition or permission of instructor.

DANC 260 - Laban Movement Analysis (3 Credits)
An examination of Laban Movement analysis – a language for understanding, observing, describing and notating all forms of movement. Experiential, analytical and performance teaching methods will be used.
Prerequisites: DANC 160.

DANC 270 - Dance Education I: Introduction to Dance Education (2 Credits)
An overview of state and national standards, theoretical and philosophical perspectives that shape current practices for teaching dance in K-12 environments, and arts/dance education advocacy. Not open to freshmen. It is recommended that students have completed at least three semesters of technique.
Prerequisites: DANC 150 and DANC 160A.

DANC 275 - Pilates I (2 Credits)
Innovative system of exercises for the mind and body. Teaching posture, body awareness, and easy graceful movement at a beginner’s level.

DANC 278 - Jazz Dance Technique II (2 Credits)
An intermediate level class focusing on coordination, rhythm, alignment, jazz vocabulary, jazz dance positions, and expanded knowledge of theatrical jazz dance. May be repeated up to six times for credit.
Prerequisites: DANC 178.

DANC 281 - Dance History I (3 Credits)
Overview of the development of dance through the 19th century.

DANC 282 - Dance History II (3 Credits)
Development of dance from the 20th century to the present.
Prerequisites: DANC 281.

Graduation with Leadership Distinction: GLD: Global Learning

DANC 300 - Music for Dancers (3 Credits)
Rhythmic analysis, reading and metric patterns, construction and use of scores from musical theatre to symphonic orchestration with exercises to enhance the knowledge of relationship between dance and music.

DANC 302A - Ballet Technique III (1-2 Credits)
Third level of classical ballet technique. This course is for dance majors and minors. May be repeated up to six times for credit.
Prerequisites: DANC 202A or equivalent.

DANC 302B - Ballet Technique III (1-2 Credits)
Third level of classical ballet technique. This course is for non dance majors. May be repeated up to six times for credit.
Prerequisites: DANC 202B or equivalent.

DANC 303 - Pointe III (1-2 Credits)
Pointe technique and skills on pointe, an extension of ballet technique at the intermediate level. Study and execution of female variations from classical repertory. May be repeated four times.
Prerequisites: DANC 202 or equivalent.

DANC 304 - Intermediate Tap Dance (1 Credit)
Advanced fundamentals of tap dance, including intermediate/advanced rhythmic structure and incorporation of alignment and style.
Prerequisites: permission of instructor.

DANC 307 - West African Dance I (3 Credits)
The history and practice of indigenous West African dance.

DANC 310 - Dance Analysis and Criticism (3 Credits)
Theoretical practices and cultural perspectives of dance making.
Prerequisites: DANC 281 and DANC 282.

DANC 312A - Contemporary Dance Technique III (1-2 Credits)
A third level technique with refinement skills, and complex combinations. This course is for dance majors and minors. May be repeated up to six times for credit.
Prerequisites: DANC 212A or equivalent.
DANC 312B - Contemporary Dance Technique III (1-2 Credits)
A third level technique with refinement skills, and complex combinations. This course is for non dance majors. May be repeated up to six times for credit.
Prerequisites: DANC 212B or equivalent.

DANC 360 - Choreography I (3 Credits)
An intermediate level choreography and composition course designed to create and adapt work in different dance forms in modern, jazz, and ballet.
Prerequisites: DANC 260; recommend students to have completed at least three semesters of technique.

DANC 370 - Dance Education II: Creative Dance (3 Credits)
An introduction to motor development, movement concepts, elements, and skills that contribute to lesson planning, instruction, and assessment of creative dance in K-12 education. It is recommended that students have completed at least three semesters of ballet and contemporary technique and world dance.
Prerequisites: DANC 270 and 360.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

DANC 375 - Pilates II (2 Credits)
Innovative system of exercises for the mind and body. Teaching posture, body awareness, and easy graceful movement at an intermediate level.
Prerequisites: DANC 275 or equivalent.

DANC 377 - Historic Dance (3 Credits)
A course open to all students interested in gaining knowledge of early dances from the 15th Basse, Pavanee and Gaillarde of the Renaissance era to the Baroque dances from the court of Louis XIV.

DANC 378 - Jazz Dance Technique III (1-2 Credits)
Advanced-level jazz dance technique. May be repeated up to six times for credit.

DANC 380 - Movement and Dance for Musical Theatre (3 Credits)
Styles of movement and dance in musical theatre from the '20s, '30s, and '40s to modern contemporary musical theatre. Choreographing for musicals, cultural forms of dance, staging for vocal pieces.

DANC 381 - Dance History (3 Credits)
A survey of dance from ethnic and social to professional dance, from the time of the Greeks through the twentieth century.

DANC 382 - Body Conditioning/Gyrokinetics Method (2 Credits)
Body conditioning technique designed to increase strength, flexibility, and coordination, enhancing the dance students' performance ability and body awareness.

DANC 385 - Men's Ballet (1 Credit)
Study of the art of classical ballet for men with increased emphasis on facilitating skill in allegro and adagio work specific to male technique.
Prerequisites: 4 semesters of ballet or equivalent.

DANC 390 - Dance Studio Operation (3 Credits)
Advanced training methods and techniques in all forms of dance. Emphasis on recent research in dance curriculum and operational technique. For experienced dance teachers.

DANC 399 - Independent Study and Research (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research
DANC 470 - Dance Education III: Dance Pedagogy for Middle and High School (4 Credits)
Intensive study of content and strategies for teaching dance in middle and high school with particular emphasis on curriculum development, instruction, and assessment. Not open to freshmen or sophomores. Minimum of 90 hours in program of study.
Prerequisites: DANC 270, DANC 370, five semesters of ballet, five semesters of modern dance.
Graduation with Leadership Distinction: GLD: Community Service

DANC 471 - Synthesis of Dance Education Constructs (pre-internship seminar) (1 Credit)
Seminar allows students to synthesize content and skills from all previous dance and education coursework in conjunction with their student teaching experience.
Corequisite: DANC 479.

DANC 475 - Inner Mastery Through Movement (3 Credits)
A mind/body integration course designed for performing artists.

DANC 476 - Production Design for Dance (3 Credits)
Technical theatre functions, the structure and purpose of production design, and stage production as it relates to the whole of dance and theatrical performance.

DANC 478 - Integrated Approaches in Dance Education (5 Credits)
Study and application of strategies for teaching diverse learners, implementation of instructional technology in the dance classroom, and dance/arts integration.
Graduation with Leadership Distinction: GLD: Community Service

DANC 479 - Teaching Internship in Dance Education (12 Credits)
Practical demonstration of pedagogical knowledge, skill, and dispositions necessary to effectively teach in K-12 dance education as defined and measured by CAEP and ADEPT standards.
Prerequisites: Must have fulfilled all other program requirements except DANC 471 (and DANC 479), be admitted to the professional program, and approved for student teaching.
Corequisite: DANC 471.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

DANC 482 - Body Conditioning/Gyrokinesis Method II (1 Credit)
Body conditioning technique that simultaneously stretches and strengthens the body at an intermediate level. Gyrokinesis teaches complete freedom of movement through exercises synchronized with corresponding breathing patterns enhancing aerobic and cardiovascular stimulation and promoting neuromuscular awareness. Restricted to dance majors/minors only.
Prerequisites: DANC 382.

DANC 490 - Senior Capstone Dance Project (3 Credits)
Culmination of the performance/choreography dance emphasis. Senior project encompassing a choreographic work or research thesis.
Prerequisites: DANC 160 and DANC 360.
Graduation with Leadership Distinction: GLD: Research

DANC 500 - Selected Topics in Dance (1 Credit)
A series of courses, each lasting one-third of a semester. Topics and required courses are announced in the class schedule for each semester.

DANC 573 - Dancer's Workshop (1 Credit)
Individual advanced training in movement, improvisation, flexibility, and precision in dance styles including modern and ballet.
Prerequisites: graduate standing or three credits in dance.

DANC 577 - Dance Performance (3 Credits)
Rehearsal, choreographic analysis, and dance performance. All components of dance production—including music, costume, lighting, and scenery—will be considered.
Cross-listed course: PEDU 577

DANC 586 - The Articulate Body (3 Credits)
Theoretical and experimental exploration of the major body systems and development movements to bring more articulation to the body and more awareness and physical ease in performance.
Cross-listed course: THEA 586

DANC 599 - Special Topics in Dance (3 Credits)
Reading and research on selected topics. Course content varies and will be announced in the schedule of classes by title. May be repeated once as topics vary.

THEA 120 - Laboratory Theatre Production (1 Credit)
Procedures for implementation of processes involved in the Laboratory Theatre Production Program. Supervised preparation of all performance and production elements involved in the collaborative process of theatre production. Course content varies according to season production program. Permission of Instructor or by audition. May be repeated for credit.

THEA 121 - Theatre Running Crew Laboratory. (1 Credit)
Procedures and processes of running crews for the Mainstage Theatre Production Program. Collaborative teamwork through supervised participation in various theatre production running crews (management, scenic, lighting, sound, costumes and makeup). Course content varies according to season production program. May be repeated for credit.

THEA 122 - Theatre Performance Laboratory (1 Credit)
Preparation and procedures of the rehearsal and performance processes for the Mainstage Theatre Production Program. Collaborative teamwork through supervised participation in an acting company. Course content varies according to season production program. By audition only. May be repeated for credit.
Prerequisites: THEA 120.

THEA 123 - Theatre Production Studio (1 Credit)
Procedures and processes for the Mainstage Theatre Production Program. Collaborative teamwork through supervised participation in various theatre production student crews (scenic, lighting, sound, costume, makeup, and promotions). Course content varies according to season production program.
Prerequisites: THEA 121.

THEA 170 - Fundamentals of Acting (3 Credits)
Introduction to the art and craft of acting. Practical exploration through improvisation and scripted scene work. Includes a brief history of the development of modern acting techniques.
Carolina Core: AIU

THEA 172 - Basic Stage Makeup (1 Credit)
The study and application of the principles of the art of makeup for the theatre.
THEA 181 - Shakespeare in Performance (3 Credits)
Introduction to Shakespeare's works on page, stage, and screen. Emphasis placed on performances of scripts. History of Shakespeare's works/productions, stage/screen technique. Viewings of film adaptations required.
Carolina Core: AIU
THEA 200 - Understanding and Appreciation of Theatre (3 Credits)
An introduction to the understanding and appreciation of theatrical experience. Attendance at theatrical performances required.
Carolina Core: AIU
THEA 201 - Introduction to Theatre Studies (3 Credits)
Introduction to methods of analyzing and interpreting drama, with emphasis on play structure, genre, and style. Designed for the theatre major in preparation for theatre scholarship, performance, production, and design.
Graduation with Leadership Distinction: GLD: Research
THEA 221 - Stage Management Laboratory (2 Credits)
Supervised participation in theatre stage management. May be repeated once for credit.
Prerequisites: THEA 120 and THEA 121.
THEA 225 - Introduction to Stage Management (3 Credits)
An introduction to the roles of the stage manager throughout theatrical productions that include pre-production planning, oversight of the rehearsal process, running technical rehearsals and performances, and completing post-production duties.
THEA 230 - Make-up Design for Theatre and Film (3 Credits)
Theory and practice of make-up design for theatre and film. The application of analytical and research skills in the visual development of the character.
THEA 240 - Beginning Voice and Speech (3 Credits)
Study and practical application of voice and speech fundamentals in performance. Emphasis on speaking with ease, power and clarity to impact an audience.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
THEA 241 - Voice and Speech Studio (1-3 Credits)
Training in vocal skills needed by actors such as dialect, verse speaking and voice for a variety of media. Maybe repeated for credit.
Prerequisites: THEA 240.
THEA 252 - Stage Costume Construction (3 Credits)
An introductory course in the principles and practice of costume construction.
THEA 253 - Stagecraft (3 Credits)
A beginning course in the principles and practice of scenic technology.
THEA 270 - Beginning Acting (3 Credits)
An exploration of the acting process through scene study. Focus will be on developing the actor’s personal technique, emphasizing emotional truthfulness and authenticity.
Prerequisites: THEA 170 or declaration of major.
THEA 280 - Elements of Design for Theatre Production (3 Credits)
Foundational application of design principles and vocabulary as applied to the creative process in production design for theatre. Play analysis, creative and visual thinking, and graphic representation.
THEA 283 - Introduction to Theatre Sound Design (3 Credits)
Introduces the students to the basic principles of sound design and technology. Related topics include physics of sound, use and maintenance of equipment, script analysis, and creative thinking.
THEA 288 - Introduction to Stage Lighting (3 Credits)
Principles and practices of theatrical lighting design. Course not available for major credit.
THEA 340 - Literature and Performance (3 Credits)
Introduction to the study of literature through performance; reading, analysis, and performance of prose, poetry, nonfiction, and drama.
Cross-listed course: SPCH 340
THEA 359 - Theatrical Imagery (3 Credits)
The theory and application of visual imagery in theatrical design; identification and selection of historical motifs.
THEA 369 - Japanese Culture and Society through Theatre (3 Credits)
Introduction to Japanese traditional theatre and its influences on Japanese culture and society. Taught in English.
Cross-listed course: JAPA 351
THEA 370 - Intermediate Acting (3 Credits)
Development of acting skills through study of acting techniques emphasizing emotional truthfulness and authenticity. Application to scene study, monologues and auditions. Intensive script analysis for character development.
Prerequisites: THEA 170 or THEA 270.
THEA 372 - Acting from a Physical Point of View (3 Credits)
Development of physical acting skills related to modern acting techniques emphasizing emotional truthfulness and authenticity. Promoting the experience of full body awareness and expressiveness in character development and storytelling. Includes performative states of relaxation, balance and presence and ensemble work.
THEA 373 - Movement Laboratory (1 Credit)
Training in specific physical skills for actors: stage combat, mime, folk dance, tap dance, etc. May be repeated for credit.
THEA 375 - Inner Mastery Thought Movement (3 Credits)
A mind/body integration course designed for performing artists.
THEA 380 - Production Design for Theatre (3 Credits)
Principles of production design in scenery, costumes, lighting and sound. Play analysis, periods styles, creative and visual thinking and graphic representation.
Prerequisites: THEA 280.
THEA 399 - Independent Study and Research (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research
THEA 425 - Advanced Stage Management (3 Credits)
Delving deeper into the role of the stage manager in theatrical productions that includes problem solving, adapting to challenging situations, and distinguishing the various responsibilities of production assistants, assistant stage managers, and production stage managers and their collaborative contributions.
Prerequisites: C or better in THEA 225.
THEA 440 - Advanced Voice and Speech for the Actor. (3 Credits)
Advanced vocal techniques as applied to performance. Specific skills covered may include vocal flexibility and range, vocal dynamics, dialects, and voice-over technique.
Prerequisites: THEA 240.
THEA 442 - Accents and Dialects for the Actor (3 Credits)
Study and practical application of major accents and dialects used by actors in performance. Emphasis on acquiring the skills necessary for independent learning of an accent or dialect.
Prerequisites: C or better in THEA 240.

THEA 444 - Voice Over and Voice Acting (3 Credits)
Principles and practice of a wide range of voice-over including commercial and narrative styles. Development of character voice as applied to animation, gaming and/or other audio storytelling. Focus is on practical skills necessary for the profession.
Prerequisites: C or better in THEA 240.

THEA 450 - Musical Theatre Workshop (2 Credits)
Intensive musical theatre training in areas of song interpretation, musical theatre, dance, voice and acting.
Cross-listed course: DANC 450, MUSC 450

THEA 452 - Special Topics in Costume Technology (3 Credits)
A specialty skills course for advanced students of theatrical costume design and technology. Topics will include tailoring, fabric modification, needle arts, millinery, etc. Course may be repeated as topics vary.
Prerequisites: THEA 252.

THEA 453 - Computer Aided Drafting for Theatre (3 Credits)
Develop basic and intermediate skills in using computer aided drafting programs for theatrical designs and technical drawings.

THEA 480 - History of Cinema I (3 Credits)
Survey of the international cinema from its inception until 1945. 03: 07/05/2019.

THEA 481 - History of Cinema II (3 Credits)
Survey of the international cinema from 1945 to the present. 03: 07/05/2019.

THEA 489 - Introduction to Costume Design (3 Credits)
Introduction to the basic principles and elements of design as they apply to the costume designer. Script and character analysis, costume rendering, and production unity.
Prerequisites: THEA 280.

THEA 490 - Theatre Capstone Course (3 Credits)
Principles, procedures and practice of the creative and collaborative process. Aspects of the discipline with focus on creative and effective collaboration and communication skills among theatre artists, scholars and technicians. Practical and planning skills for professional success after graduation.
Prerequisites: THEA 270 and THEA 280, and 6 hours from 300 level class or above.

THEA 500 - Selected Topics in Theatre (1 Credit)
A series of courses, each lasting one-third of a semester. Topics and Prerequisites: are announced in the class schedule for each semester.

THEA 510 - Rendering Techniques for the Theatre (3 Credits)
Rendering techniques for the communication of concepts and mood in the design process.

THEA 520 - Playwright's Workshop (3 Credits)
Principles and practice of playwriting. Writing, adapting, and revising plays. May be repeated with consent of department chair.

THEA 522 - Drama in Education (3 Credits)
Comprehensive review of drama strategies, methods and pedagogical practices to be applied to non-drama learning contexts. Practical experience with the necessary skills, philosophies and techniques of drama in education.

THEA 526 - Children's Theatre (3 Credits)
Special problems in producing plays for child audiences.
Prerequisites: THEA 170 and THEA 253.

THEA 527 - Applied Theatre Arts (3 Credits)
Principles and practices of theatre-making within community contexts to address local issues and to provide aesthetic strategies for creative problem solving through theatre.

THEA 529 - Theatre Management (3 Credits)
Problems involved in organizing, administering, and promoting the non-professional theatre.

THEA 530 - Period Styles for Wig and Hair Design (3 Credits)
Research and execution of period styles for wigs, hair, and facial pieces as related to theatrical and media design.
Prerequisites: THEA 230 and THEA 550.

THEA 531 - Theatre Graphics (3 Credits)
Specialized graphic techniques used in the preparation of a theatrical production. Practice in the execution and interpretation of working drawings, perspective sketches, color renderings, scale models, etc.

THEA 540 - Voice and Movement: Practice and Performance (3 Credits)
A variety of vocal and movement techniques that apply to acting and coaching with special emphasis on the physical and vocal processes in performance.

THEA 547 - Global/Contextual Issues in Theatre Education Practice and Performance (3 Credits)
Survey and analysis of current drama teacher practice across international contexts in relationship to global, social and educational change.

THEA 550 - History of Costume (3 Credits)
A survey of clothing through the ages with emphasis on the dress of the actor in significant periods of theatrical activity. From ancient times to present day.

THEA 552 - Stage Costume Pattern Drafting and Drawing (3 Credits)
The principles of pattern making for costume construction using flat-pattern and draping techniques.

THEA 553 - Advanced Stagecraft (3 Credits)
Advanced principles and practices of stagecraft.
Prerequisites: THEA 253 or equivalent.

THEA 554 - Performing Arts Safety (3 Credits)
Study of health and safety hazards for actors, technicians, and audience members.

THEA 555 - Scene Painting for the Stage (3 Credits)
Techniques of scene painting. Application of principles of painting to the stage.

THEA 556 - Stage Design (3 Credits)
Survey of the history and principles of scene design. Assignments will involve drawings, watercolor sketches, and scale models.

THEA 557 - Advanced Scenic Design (3 Credits)
Advanced procedures and techniques of scenic design.
Prerequisites: THEA 556.
THEA 558 - Draping for the Modern Silhouette (3 Credits)
Apparel design through basic draping techniques on industry standard dress forms. Analysis of fit and design, problem solving and interaction of fabric characteristics with style features.
Prerequisites: B or better in THEA 551.

THEA 559 - Introductory Methods for K-12 Theatre Certification (3 Credits)
Developmental approaches to drama instruction in K-12 classroom settings.

THEA 561 - History of the Theatre I (3 Credits)
A survey of plays, playwrights, actors, production, and the physical development of theatres from the time of the Greeks to 1660; reading of representative plays required.

THEA 562 - History of the Theatre II (3 Credits)
A survey of plays, playwrights, actors, production, and the physical development of theatres from 1660 to the present; reading of representative plays required.

THEA 563 - History of Modern Theatre (3 Credits)
History of Western Theatre since the early 20th century. Students will be introduced to major figures, plays, and movements and explore influences from the broader culture on theatrical expression.

THEA 565 - African American Theatre (3 Credits)
The major movements, figures, plays, and critical strategies that have marked the development of African American theatre in the 19th, 20th, and 21st centuries.
Cross-listed course: AFAM 565, ENGL 565
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

THEA 567 - Dramatic Theory I (3 Credits)
A survey of the major works of dramatic theory and criticism, with emphasis on theories of theatrical performance. from Aristotle through 18th-century neo-classicism.

THEA 568 - Dramatic Theory II (3 Credits)
A survey of the major works of dramatic theory and criticism, with emphasis on theories of theatrical performance from the 18th century to the present.

THEA 569 - Dramaturgy (3 Credits)
A study of dramatic structure as it relates to theatrical production. Emphasis on script reading and analysis. Production and new-works dramaturgy will be covered.

THEA 570 - Advanced Acting I (3 Credits)
Theory and practice in the development of a role and an understanding of the psychology of the audience-actor relationship.
Prerequisites: B or better in THEA 240 and THEA 372 and THEA 370.

THEA 571 - Advanced Acting II (3 Credits)
Technique of performing play scripts with heightened language and styles other than naturalism/realism. Some examples of genres that may be taught are Classical Greek, Elizabethan, absurdist.
Prerequisites: B or better in THEA 240 and THEA 372 and THEA 370.

THEA 572 - Advanced Makeup for Theatre and Film (3 Credits)
Makeup design for specific character types, prosthetics and three-dimensional makeup effects. Special attention to the process of sculpting and modeling for makeup prosthetics.
Prerequisites: THEA 230.

THEA 575 - Rehearsal and Performance (3 Credits)
An intensive laboratory course in theatrical and media performances.

THEA 576 - Rehearsal and Performance (3 Credits)
An intensive laboratory course in repertory theatre.

THEA 577 - Special Topics in Physical Theatre (3 Credits)
Research and performance training in selected topics related to physical theatre. Course content varies and will be announced in the schedule of classes by title. May be repeated as topics vary.

THEA 578 - Play Direction I (3 Credits)
A study of the principles, procedures and practice of stage direction, with the selection, analysis, casting, and rehearsal of a one-act play to be presented in the laboratory theatre.
Prerequisites: THEA 270, THEA 280, and 6 hours from 300 level or above.

THEA 579 - Play Direction II (3 Credits)
A continuation of THEA 578.
Prerequisites: THEA 578.

THEA 581 - Film as Performance (3 Credits)
Study and analysis of film production, performance, and aesthetics.

THEA 582 - Costume Design (3 Credits)
Theory and practice in the design of theatre costumes.

THEA 583 - Advanced Practice in Sound Design (3 Credits)
Advanced study in sound, production and design. Emphasis will be on mounting designs and refining design skills for Theatre, Music, and Media Arts students.

THEA 585 - Design for Communications Media Production (3 Credits)
The study and application of techniques in theatrical stagecraft, design, lighting, costuming, and makeup applicable to specialized fields of communication media.
Prerequisites: THEA 253, THEA 351.

THEA 586 - The Articulate Body (3 Credits)
Theoretical and experimental exploration of the major body systems and developmental movements to bring more articulation to the body and more awareness and physical ease in performance.
Cross-listed course: DANC 586

THEA 587 - Film and Television Acting (3 Credits)
Theory and practice of film and television acting.
Prerequisites: THEA 170.

THEA 588 - Stage Light Design I (3 Credits)
The interrelationship of stage lighting and other production elements. Design techniques, equipment, and script analysis. Laboratory work on department productions. Restricted to theatre majors or those having special permission of instructor.

THEA 589 - Adv. Stage Lighting Des. II (3 Credits)
Stage lighting equipment and design techniques. Laboratory work on departmental productions.

THEA 599 - Special Topics in Theatre (3 Credits)
Reading and research on selected topics. Course content varies and will be announced in the schedule of classes by title. May be repeated once as topics vary.
Dance Minor

Minor Requirements (18 Hours)

The dance minor consists of completion of 18 credit hours with courses selected from each section below.

**Total Credit Hours** 12-24

Dance, B.A.

The Bachelor of Arts with a major in Dance offers two concentrations:

1. Performance and Choreography with focuses in ballet or contemporary dance and
2. Dance Education K-12.

The performance and choreography focus in classical ballet requires 8 ballet techniques and 4 contemporary techniques classes. The contemporary dance focus requires 6 contemporary techniques, 4 ballet techniques and 2 techniques of other forms of dance. Academic coursework such as choreography, dance history, and theory courses are also included in the major requirements for a degree in dance. Dance performances include full-length ballet productions, classical repertory and contemporary works.

**Learning Outcomes**

- Dance majors will demonstrate an advanced level of technical proficiency in ballet and or contemporary dance. Dance majors in Performance as well as Dance Education must achieve level three by graduation.
- Students will be able to write about dance in an educated manner and use critical approaches to evaluate dance.
- Students will describe the principles and theories of dance artists, their theories and choreographic strengths and also the material that pertains to history and cultural dance.
- Students will be able to verbally articulate the principles and theories of dance artists and their significance in terms of history and cultural dance.

**Progression Requirements**

1. At the end of each semester, dance majors will be evaluated for proficiency and progression to the next level of dance technique based on rubrics and syllabi. To graduate, students must complete DANC 302 and DANC 312.
2. All dance majors with an emphasis in dance education must fulfill admission requirements for the Professional Education Program and Internship.
3. To remain in the dance major, a student must make satisfactory progress towards a degree. A student who fails to make satisfactory progress may be placed on academic probation or removed from the college.
Admissions

Entrance Requirements

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

Additional Admission Requirements

1. Entering freshmen and transfer students must meet University admissions requirements and academic standards.
2. Initial acceptance into the dance major is dependent upon a qualifying dance audition in ballet and contemporary dance.
3. Dance majors are encouraged to complete all four years at UofSC, Columbia campus, due to the rigorous and ongoing nature of the technical proficiency, as well as company requirements. If a student chooses to transfer into the dance major, additional coursework may be necessary to remedy deficiencies.
4. Students who wish to enter the program from another major on the Columbia campus or from another UofSC campus must be in good standing and have a cumulative GPA of 2.00 or higher.

Degree Requirements (120 hours)

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Carolina Core</td>
<td>32-44</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>15-18</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>0-41</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>32-70</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-8 hours)

• any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

• Two 4-credit hour CC-SCI courses (p. 742)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing the 122 course, including the exit exam administered as part of that course.

• CC-GFL courses (p. 742)

It is strongly recommended that students continuing the study of a foreign language begin college-level study of that language in their first semester and continue in that language until their particular foreign language requirement is completed.

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component¹ (0-3 hours)

• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy¹ (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility¹ (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)

¹ Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

• only if needed to meet 122-level proficiency
History (3 hours)
The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History. HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Science to fit this geographic category.
- One Carolina Core GHS-approved course primarily focused on non-U.S. History. HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)
- Courses Acceptable for Social Science and Fine Arts or Humanities Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (3 hours of Social Science)

The following must be passed with a grade of C or higher (C+ or higher for Dance Education K-12 Certification):
- DANC 150
- DANC 281
- DANC 282

3. Program Requirements (0-41 hours)
Cognate or Minor (12-18 hours) optional for Dance Education K-12 Certification Concentration

Cognate
The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate.

For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor
In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

Electives (0-29 hours)
No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

4. Major Requirements (32-70 hours)
A minimum grade of C is required in all major courses. (C+ or higher for Dance Education K-12 Certification)

Choose one of the following concentrations:

Performance and Choreography (32 hours)

Techniques
Select either Ballet or Contemporary Dance: 15-24

Ballet:
- Eight ballet techniques
- Four contemporary techniques
- Contemporary:
- Six contemporary techniques
- Four ballet techniques
- Two techniques of other forms of dance

Dance Company
- DANC 177 Dance Company I 5

Total Credit Hours 32-41

Note: Students must meet both the number of credits and distribution of technique requirements listed. Some techniques courses are variable credit. To graduate with a major in dance, students must successfully
complete DANC 302A and DANC 312A. Students may take up to 24 hours of techniques courses toward the major.

**Dance Education K-12 Certification (70 hours)**

Dance majors with an emphasis in Dance Education K-12 teacher certification must meet USC and South Carolina Department of Education requirements in order to be recommended for certification (includes passing state-required examinations). An application for certification is required. Contact the College of Education, Office of Student Affairs, 803-777-6732.

**Notes:**

- Students must successfully complete DANC 302A and DANC 312A with a C+ or better.
- Ballet and contemporary technique courses are variable credit.
- Students must meet both the number of credits and distribution of technique requirements listed above.

**Professional Education Program Requirements**

The dance major with an emphasis in dance education supports prospective teachers in developing both in-depth content knowledge and appropriate knowledge, skills, and dispositions of teaching required in today's classrooms.

Extensive clinical experiences in a variety of appropriate K-12 classrooms and schools are a central component of the program.

Application and admission to the Professional Program in Education (typically at 60 credit hours) and admission to Internship are required for all majors seeking teacher certification. All teacher education candidates must adhere to all education policies and procedures related to clinical experiences. Information on education applications, policies, and procedures is available from the College of Education, Advising and Student Services office at 803-777-6732.

Specific requirements in dance education for Admission to Internship II/Student Teaching include the following:

1. Admission to the Professional Program.
2. Maintenance of minimum collegiate summary grade point average as required for admission to the Professional Program.
3. Successful Completion of DANC 270, DANC 370, DANC 470, and DANC 478; all courses within the dance major and all performance practicum requirements.
4. A grade of C+ or better in all dance, dance education and education courses.
5. Successful completion of 100 practicum hours completed during the dance education coursework.
6. Satisfactory performance in the area of teacher education dispositions.
7. SLED clearance through fingerprinting and background check requirements.
8. Successful completion of the application for student teaching.

**Major Map**

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Theatre, B.A.

**Learning Outcomes**

- Students will develop the ability to think critically by producing text analysis of playscripts as well as written critiques of department productions. They will demonstrate skills in preparing text analysis from the various viewpoints of all theatre collaborators.
- Students will demonstrate an understanding of the collaborative process as an important aspect of the artistic process in theatrical performances.
- Students will develop an artistic process by demonstrating the knowledge, vocabulary, and application of training and skills presented in classroom production projects and/or departmental theatre productions.
- Students will demonstrate a general knowledge of significant developments in the history of western theatre and drama through the investigation of plays, playwrights, actors, productions, and the physical development of theatres from the time of the Ancient Greeks to the present.
- Students will develop the ability to think critically by producing text analysis of playscripts as well as written critiques of department productions. They will demonstrate skills in preparing text analysis from the various viewpoints of all theatre collaborators.
- Students will develop an understanding of the collaborative process as an important aspect of the artistic process in theatrical performances.

- Students will demonstrate an understanding of the collaborative process as an important aspect of the artistic process in theatrical performances.
- Students will develop an artistic process by demonstrating the knowledge vocabulary and application of training and skills presented in classroom production projects and/or departmental theatre productions.
- Students will demonstrate a general knowledge of significant developments in the history of western theatre and drama through the investigation of plays, playwrights, actors, productions, and the physical development of theatres from the time of the Ancient Greeks to the present.

**Admissions**

**Entrance Requirements**

New freshmen who meet University admissions standards are eligible for admission to degree programs offered by the college. A student who wishes to enter the College of Arts and Sciences from another college on the Columbia campus must be in good standing and have a cumulative GPA of 2.00 or higher. A student who wishes to enter the College of Arts and Sciences from another UofSC campus must fulfill one of the following requirements:

1. Be in good standing, meet the admission requirements for a baccalaureate degree on the Columbia campus, and have a cumulative GPA of 2.00 or higher.
2. Be in good standing and have completed 30 semester hours with a GPA of 2.00 or higher on a UofSC campus.

Some programs in the College of Arts and Sciences have special admission requirements established by the department or committee that supervises the specific degree program, for example, Cardiovascular Technology, Biological Sciences, Chemistry, Biochemistry and Molecular Biology, Economics, Environmental Science, the Bachelor of Arts in Interdisciplinary Studies, and the Bachelor of Science in Interdisciplinary Studies. These requirements are listed in the sections of this bulletin that describe department and special degree programs.

**Degree Requirements (120 hours)**

**Program of Study**

1. **Carolina Core Requirements (32-44 hours)**

**CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)**

*must be passed with a grade of C or higher*

- any CC-CMW course (p. 742)

2. **ARP – Analytical Reasoning and Problem Solving (6-8 hours)**

- any CC-ARP course (p. 742)

3. **SCI – Scientific Literacy (8 hours)**

- two 4-credit hour CC-SCI laboratory science courses (p. 742)

4. **GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)**

Demonstration of proficiency in one foreign language equivalent to the minimal passing grade on the exit examination in the 122 course is required. Students can demonstrate this proficiency by successfully completing Phase II of the Proficiency Test or by successfully completing...
Accordingly, please select one of the following:

- GHS requirement must be fulfilled through this college requirement.

U.S. History course. Whichever is not fulfilled through the Carolina Core

The College of Arts and Sciences requires one U.S. History and one non-

Foreign Language (0-3 hours)

- INF – Information Literacy (0-3 hours)
  - any overlay or stand-alone CC-INF course (p. 742)

- CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)
  - any overlay or stand-alone CC-CMS course (p. 742)

- VSR – Values, Ethics, and Social Responsibility (0-3 hours)
  - any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (15-18 hours)

Foreign Language (0-3 hours)

- only if needed to meet 122-level proficiency

History (3 hours)

The College of Arts and Sciences requires one U.S. History and one non-U.S. History course. Whichever is not fulfilled through the Carolina Core GHS requirement must be fulfilled through this college requirement. Accordingly, please select one of the following:

- One Carolina Core GHS-approved course (p. 742) primarily focused on U.S. History: HIST 111, HIST 112, HIST 214, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

or

- One Carolina Core GHS-approved course primarily focused on non-U.S. History: HIST 101, HIST 102, HIST 104, HIST 105, HIST 106, HIST 108, HIST 109, GERM 280, FAMS 300, or another GHS-approved course determined by the College of Arts and Sciences to fit this geographic category.

Social Science and Fine Arts or Humanities (12 hours)

- Courses Acceptable for Social Science and Fine Arts Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-social-science-fine-arts-humanities/) (3 hours of Social Science and 6 hours of Fine Arts or Humanities)
  - THEA 201

3. Program Requirements (27-42 hours)

Supporting Courses (6 hours)

- Select 6 hours of dramatic literature from ENGL 300 or above (may apply towards fulfillment of the cognate)

Cognate or Minor (12-18 hours)

Cognate

The cognate is intended to support the course work in the major. The cognate must consist of twelve (12) hours of courses at the advanced level, outside of but related to the major. The cognate may be taken in one or more departments or programs, depending on the interests of the student and the judgment of the advisor.

Courses offered by departments and programs that are acceptable for cognate credit are outlined in the section titled Courses Acceptable for Cognate Credit in Degree Programs in the College of Arts and Sciences (https://academicbulletins.sc.edu/undergraduate/arts-sciences/courses-acceptable-cognate/).

For cognate course offerings in other colleges, consult the appropriate sections of this bulletin. Some major programs have specific cognate requirements.

It should be emphasized that the cognate is not a second set of elective courses to be chosen at random by the student. The cognate must be approved by the major advisor as being related to the major field of study. Students are urged to consult their major advisors for specific requirements in their major.

Courses applied toward general education requirements cannot be counted toward the cognate. For Bachelor of Arts degrees, all cognate courses must be passed with a grade of C or higher.

Minor

In place of the cognate a student in the College of Arts and Sciences may choose a minor consisting of at least 18 credit hours of prescribed courses. (Some minors in the sciences require a minimum of 16 hours.) The subject area of the minor may be related to the major. Students pursuing interdisciplinary minors who wish to use courses in their major department for minor credit must petition the College Committee on Scholastic Standards and Petitions for permission to do so.

The minor is intended to develop a coherent basic preparation in a second area of study. It differs from the cognate inasmuch as the courses must be concentrated in one area and must follow a structured sequence. Interdisciplinary minors can be designed with the approval of the assistant dean for academic affairs and advising.

Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor
requirements. All minor courses must be passed with a grade of C or higher. At least half of the courses in the minor must be completed in residence at the University.

A list of minor programs of study can be found at Programs A-Z (p. 20).

**Electives (3-24 hours)**

No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees in the College of Arts and Sciences. The College of Arts and Sciences allows the use of the Pass-Fail option on elective courses. Further clarification on inapplicable courses can be obtained from the College of Arts and Sciences.

### 4. Major Requirements (31 hours)

*A minimum grade of C is required in all major courses.*

¹ All Theatre lab courses maybe repeated for credit. THEA 120 and THEA 121 are required Laboratory credits. THEA 120 must be completed within the first year of declaring the Theatre major.

#### Major Electives (12 hours)

- Select 6 hours from THEA 200-300 level
- Select 6 hours from THEA 400 level or above

#### Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

---

**Carla A. Pfeffer, Director**

The Women’s and Gender Studies Program at the University of South Carolina promotes an understanding of the experiences of women and other underrepresented groups through a complete program of teaching, research, and service to the University, the local community, the state, the nation and the global community. Through its research mission, the program reconceptualizes knowledge, creates new knowledge, and reinterprets existing knowledge through the lens of gender and the prism of diversity. Its teaching mission is to share this knowledge with students so that they learn to think critically, to communicate effectively, to solve problems, and to interpret human experience. Emerging from an activist tradition, the program serves University, local, state, national and global communities by acting as a resource and guide for issues related to women and gender. Our research, teaching, and service missions interweave as we create, share, and apply the knowledge, skills, and values that promote the full participation of women and other underrepresented groups in society.

There are two introductory courses: WGST 112 and WGST 113. Students in the College of Arts and Sciences and the School of Music may apply WGST 112 for social science general education requirements. WGST 112 may be counted for elective credit in the Moore School of Business, the School of Journalism and Mass Communications, and the College of Nursing.

**Women’s and Gender Studies Minor**

Students may minor in women’s and gender studies by completing 18 hours of specified courses.

**Bachelor of Arts in Women’s and Gender Studies**

A student may also pursue a major in the field through the Bachelor of Arts degree with a major in women's and gender studies.

Further information may be obtained from the College of Arts and Sciences or the Women’s and Gender Studies.

**Courses**

- **WGST 112 - Introduction to Women's and Gender Studies (3 Credits)**
  A social science perspective of women in psychological, sociological, historical, anthropological, economic, and political contexts; the changing roles, images, and institutions.
  **Carolina Core:** GSS, VSR
  **Graduation with Leadership Distinction:** GLD: Community Service, GLD: Diversity and Social Advocacy

- **WGST 113 - Women's Health (3 Credits)**
  Basic functioning of the female body; effects of society on processes of health and disease. Not for natural sciences credit.
  **Carolina Core:** GSS
  **Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

---

**Women’s and Gender Studies**

Department Website (http://artsandsciences.sc.edu/wgst/)
WGST 207 - Gender and Culture (3 Credits)
Anthropological study of gender, with emphasis on cross-cultural investigation of the interaction of biological, cultural, and environmental factors including intersections of race, social class, and sexuality as influences gender behavior. 03: 07/05/2019.
Cross-listed course: ANTH 207
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 210 - Human Life Cycles in Different Cultures (3 Credits)
Childhood, maturity, old age, and gender socialization within the family.
Cross-listed course: ANTH 210
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Community Service, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

WGST 298 - Issues in Women's and Gender Studies (1-3 Credits)
Course content varies and will be announced in the schedule of courses by title. May be repeated as content varies by title.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 299 - Women's and Gender Studies Internship for Non-Majors (3 Credits)
Supervised experience addressing a community organization's needs and allowing the student to explore an aspect of the community related to women's and gender studies issues. Contract approval by advisor required.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 300 - Sex and Gender (3 Credits)
Offers a sociological lens to develop critical ways of thinking about sex and gender as social processes in everyday lives. This course considers how sex and gender shape and affect the experiences of women, men, girls, boys, and individuals who live in the spaces in-between (those who are intersex or transgender) across a wide range of social institutions (family, work, education, politics, etc.).
Prerequisites: SOCY 101.
Cross-listed course: SOCY 301
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 301 - Psychology of Marriage (3 Credits)
The psychological, physiological, and social characteristics of marriage.
Cross-listed course: PSYC 301
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 304 - Race, Class, Gender, and Sexuality (3 Credits)
Historical and contemporary power relationships in race, social class, gender, and sexual orientation.
Cross-listed course: POLI 305, SOCY 304
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 305 - Sociology of Families (3 Credits)
Sociological perspectives related to various aspects of family behaviors, roles, and values.
Cross-listed course: SOCY 305
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 306 - Social Welfare Services for Women and Minorities (3 Credits)
Social welfare services available to women and minorities and the forces that shape these services.
Cross-listed course: SOWK 305
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 307 - Feminist Theory (3 Credits)
Historical development of feminist theory and contemporary debates within feminism.
Cross-listed course: POLI 307
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 308 - African-American Feminist Theory (3 Credits)
An interdisciplinary survey of the contributions of African-American women to feminist theory.
Cross-listed course: AFAM 308
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 309 - Sexual Diversities (3 Credits)
Introduction and overview of theories, history, literature, politics, legal, health and social issues within human sexual diversities, including the intersections of gender, race, and social class.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 310 - Psychology of Women (3 Credits)
Women's experiences: childhood and adolescence, work, family, cultural images, adjustment and social change.
Cross-listed course: PSYC 310
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 311 - Minorities, Women, and the Mass Media (3 Credits)
The study of the relationship among persons of color, women, and the mass media.
Cross-listed course: JOUR 311
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 320 - Sexuality and Gender in Ancient Greece (3 Credits)
Gender roles, standards of sexual behavior, evidence for women's lives, as manifested in ancient Greek literary and archaeological evidence; attitudes toward homosexuality; the modern media's representation of famous Greeks.
Cross-listed course: CLAS 320
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
WGST 321 - Sexuality, Gender, and Power in Ancient Rome (3 Credits)
Sexuality as a social construct exemplified in standards of sexual behavior in ancient Rome and their reinforcement of the ruling ideology; feminine virtue, definitions of manliness, attitudes toward homosexuality.
Cross-listed course: CLAS 321
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 333 - Sex, Gender, and Religion (3 Credits)
Gender and sexuality in the shaping of social and individual identity in religious contexts.
Cross-listed course: RELG 333
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 334 - Feminist Philosophy (3 Credits)
Introduces feminist philosophy and applications to philosophical problems.
Cross-listed course: PHIL 334
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 335 - Women in China (3 Credits)
Introduces the connection between gender and the Chinese national imagination. Readings include cultural and historical documents that purport to explain the experience of women in China. Readings in English. Taught in English.
Cross-listed course: CHIN 335
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

WGST 351 - The Family in Cross-Cultural Perspective (3 Credits)
Kinship, systems of descent, marriage, and domestic organization in different cultures. Variations in childrearing practices, gender, and other aspects of social relations in kin groups. Cross-listed Course: ANTH 351
Cross-listed course: ANTH 351
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

WGST 352 - Gender and Politics (3 Credits)
Impact of gender on the distribution of power in society; foundations for intersections of gender, race, social class, and sexuality and their economic, social, and political concomitants.
Cross-listed course: POLI 352
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 376 - Holy Women (3 Credits)
Holy women from various periods and religious traditions, and how they demonstrate the different ways communities understand ideas of holiness, from piety, martyrdom, monasticism and mysticism to social action.
Cross-listed course: RELG 376
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 379 - Women in Modern Europe (3 Credits)
Survey of women in European history from the eighteenth to the twenty-first century. Focus on women's citizenship beginning with Enlightenment idea of rights through developments in modern feminism.
Cross-listed course: HIST 379
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

WGST 381 - Gender and Globalization (3 Credits)
Examines the dialectic between globalization and the social construction of gender. Topics include the global assembly line, transnational markets for domestic labor and sex workers, and global feminist alliances.
Prerequisites: WGST 111 or WGST 112 or ANTH 102.
Cross-listed course: ANTH 381
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

WGST 388 - Cultures, Pregnancy, and Birth (3 Credits)
Anthropological study of pregnancy and birth with a cross-cultural focus comparing the United States to other nations. Examination of cultural factors such as prenatal care, dietary practices, taboos, birth location, practitioners, and birthing styles.
Cross-listed course: ANTH 388
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 398 - Special Topics in Women's and Gender Studies (1-3 Credits)
Course content varies and will be announced in the schedule of courses by title. May be repeated as content varies by title.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 399 - Independent Study (3 Credits)
Contract approved by instructor, advisor, and director of women's studies required for undergraduate students.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

WGST 430 - Topics in Women's Studies (1-3 Credits)
Course content varies and will be announced in the schedule of courses by title.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 431 - Women's Studies Workshop (1 Credit)
Selected small action-research project on selected issue(s) in women's studies.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

WGST 432 - Men and Masculinities (3 Credits)
Overview of psychological, social, physical, and emotional issues related to men's lives.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 437 - Women Writers (3 Credits)
Representative works written by women.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.
Cross-listed course: ENGL 437
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
WGST 445 - LGBTQ+ Literature (3 Credits)
This course will examine LGBTQ+ (lesbian, gay, bisexual, trans, queer, and other nonnormative sexual identities) literatures and cultures.
Prerequisites: C or better in ENGL 101 and ENGL 102.

Cross-listed course: ENGL 445

WGST 454 - Women and the Law (3 Credits)
 Constitutional and statutory case law dealing with gender equality issues. Topics include abortion, affirmative action, pornography, sexual harassment, fetal protection policies, employment discrimination, and women in the military.
Cross-listed course: POLI 454
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 464 - History of American Women (3 Credits)
The social, political, and economic roles and changing status of women in America.
Cross-listed course: HIST 464
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 485 - Women's Rhetoric (3 Credits)
Study of rhetoric by and about women as manifested in speeches, essays, and other rhetorical artifacts.
Cross-listed course: ENGL 485, SPCH 485
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 487 - Black Women Writers (3 Credits)
An examination of literature by and about black women, including fiction, poetry, drama, and autobiography. This study will focus on issues that emerge from the creative representations of black women and the intersections of race, gender, sexuality, and class that interrogate what is both particular and universal experiences.
Prerequisites: ENGL 101; ENGL 102.

Cross-listed course: AFAM 487, ENGL 487
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 499 - Community Service Internship (3 Credits)
Supervised experience addressing a community organization's needs and allowing the student to explore an aspect of the community related to women's studies issues. Contract approval by advisor required.
Prerequisites: WGST 111, WGST 112 or WGST 113, plus one additional WGST course.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

WGST 515 - Race, Gender, and Graphic Novels (3 Credits)
Representations of race and gender in comics with a special emphasis on the experiences of African Americans.
Cross-listed course: AFAM 515
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 525 - The Psychology of the Midlife Woman (3 Credits)
Biological, social, and psychological aspects of the midlife woman.
Cross-listed course: PSYC 525
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 535 - Ecofeminism (3 Credits)
An exploration of the connections between oppression of women and oppression of nature.
Prerequisites: 3 hours in philosophy beyond the 100 level.

Cross-listed course: PHIL 535
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 541 - Issues in Women's Health (3 Credits)
An exploration of women's health and health care concerns from multiple perspectives.
Cross-listed course: NURS 541
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 551 - Adolescent Mentoring (3 Credits)
Application of skills and theories of adolescent mentoring taught in the classroom to a supervised, structured mentoring field experience.
Cross-listed course: CRJU 551

WGST 554 - Women and Crime (3 Credits)
Impact of gender-based relations on crime and the criminal justice system.
Cross-listed course: CRJU 554
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

WGST 555 - Language and Gender (3 Credits)
Approaches to gender and language emphasizing the social grounding of both; how language reflects sociocultural values and is a tool for constructing different types of social organization.
Cross-listed course: ANTH 555, LING 541
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

WGST 598 - Special Topics in Women's & Gender Studies (3 Credits)
Course content varies and will be announced in the schedule of courses by title. May be repeated as content varies by title.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

WGST 621 - Maternal and Child Health (3 Credits)
Public health issues, social and behavioral science, policies, programs, and services related to maternal and child health in the United States and other countries.
Cross-listed course: HPEB 621
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Robert Lipe, Associate Dean, PMBA
Degree Programs

Progression and Retention Requirements
The requirements stated below are minimum requirements and are subject to change.

First Year Progression
To progress after the first year of admission, a student must have a minimum cumulative Institution GPA of 3.00 on a minimum of 24 hours. The 24 hours must include ENGL 101 and ENGL 102, MATH 122 or MATH 141, MGSC 290, either ECON 221 or ECON 222, STAT 206, and ACCT 225 with a minimum grade of C in each of these courses. Students have fall, spring, and the following summer terms to meet progression requirements. A student not meeting these requirements must transfer out of the Moore School of Business. Students not meeting progression requirements may choose to transfer to another major or will be automatically transferred to Undergraduate Studies under the University Advising Center.

Upperclassmen Retention Requirements
All students are reviewed annually at the end of each summer term for meeting retention requirements. Students must maintain a minimum cumulative Institution GPA of 2.800. Students not meeting this retention requirement must transfer out of the Moore School of Business. Students not meeting upperclass retention requirements may choose to transfer to another major or will be automatically transferred to Undergraduate Studies under the University Advising Center. Students entering their final year and/or are within 30 hours of graduation must have a minimum 2.800 cumulative Institution GPA to graduate. A student will not be permitted to take major courses until first-year progression and 200-level business prerequisite courses have been successfully completed with a minimum grade of C in each course. This coursework includes ENGL 101 and ENGL 102, MATH 122 or MATH 141, STAT 206, ECON 221 and ECON 222, ACCT 225 and ACCT 226, and MGSC 290 and MGSC 291.

All majors in the Moore School of Business must earn a minimum grade of C in all business and economics courses to count toward graduation requirements. Students must petition to take any business or economics class for a third time. Petitioning does not guarantee permission and based on academic record, some students may be required to change majors or transfer out of the business school.

CLEP Subject Examinations
Students who wish to obtain credit for certain business administration courses may do so as follows:

• ACCT 225: CLEP Subject Examination titled “Financial Accounting” with a score of 90% or higher available from the testing service.
• ACCT 324: CLEP Subject Examination titled “Introductory Business Law” with a score of 90% or higher available from the testing service.
• MGMT 371: CLEP Subject Examination titled “Principles of Management” with a score of 90% or higher available from the testing service.
• MKTG 350: CLEP Subject Examination titled “Principles of Marketing” with a score of 90% or higher available from the testing service.

Dual Degrees
Currently enrolled students from other UofSC colleges who expect to obtain a second baccalaureate degree from the Moore School of Business must meet regular admission and progression requirements of the school and formally apply and be accepted by the school prior to obtaining 75 hours.

Classes
Enrollment priority will be given to business majors who are in good academic standing in all business and economics classes.

Suspension
The Moore School of Business adheres to the University's general policy on suspension.

Graduation
All students admitted to the Moore School of Business effective Fall 2016 and thereafter must have a minimum cumulative GPA of 2.80 on all UofSC work attempted in order to obtain a degree from the Moore School of Business.

Attendance Requirements
Students are expected to attend all regular class meetings. Students must conform to University attendance regulations as stated in the section entitled “Academic Regulations.” Where specific faculty policies regarding attendance are more stringent, they will be stated in writing for individual courses.

Accounting, B.S.B.A.
Learning Outcomes
• Our graduates will be able to apply generally accepted financial reporting principles in a broad range of business transactions.
• Our graduates will understand techniques used in determining costs, preparing budgets, and measuring the performance of a business unit.
• Our graduates will understand the regulatory framework that governs financial reporting and auditing in the United States.
• Our graduates will understand the ethical dilemmas faced by accountants and how to respond to such dilemmas based on regulatory guidance.
• Our graduates will understand the accounting issues associated with international business activities.
Our graduates will understand how technology is used in current organizational environments, especially as it concerns business decisions using accounting information systems.

Admissions

Entrance Requirements

In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

Freshmen entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

Students from other UofSC campuses who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

Students enrolled in other colleges on the Columbia campus must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission in the fall term.

Transfer students from other institutions must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

Degree Requirements (125 Hours)

See Darla Moore School of Business (p. 312) for progression requirements and other regulations.

### Program of Study

<table>

<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Carolina Core</td>
<td>31-43</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>40</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>21-30</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>24</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (31-43 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

*must be passed with a grade of C or higher*

- ENGL 101
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (6-7 hours)

*must be passed with a grade of C or higher*

- MATH 122
- Or MATH 141
- STAT 206

SCI – Scientific Literacy (7 hours)

Two approved Carolina Core Scientific Literacy courses (p. 742), including one laboratory course

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Students shall demonstrate in one Foreign Language the ability to comprehend the topic and the main ideas in written and, with the exception of Latin and Ancient Greek, spoken texts on familiar subjects. This ability can be demonstrated by achieving a score of two or better on a USC foreign language test. Those failing to do so must satisfactorily complete equivalent study of foreign language at USC.

- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)

- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)

- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)

- any overlay or stand-alone CC-VSR course (p. 742)
1 Carolina Core Stand Alone or Overlay Eligible
Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (40 hours)

Electives (3-9 hours)
All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempt the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with additional elective credits.

4. Major Requirements (24 hours)
a minimum grade of C is required in all major courses

Major Electives

Business Analytics Concentration (12 hours) optional
This analytics concentration can only be taken in conjunction with the accounting major.
Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Accounting, B.S.B.A. (https://sc.edu/about/offices_and_divisions/advising/documents-major_maps-2020-2021-2020_acct_map.pdf)

**Total Credit Hours:** 18

¹ If ACCT 225 was taken prior to being a business minor, it may be used to satisfy the Accounting requirement.
² If ECON 221 and ECON 222 were taken prior to being a business minor, they may be used to satisfy the Economics requirement.

Notes:

1. When a student’s major requires one of the 300 or 400 level courses included in the Business Administration minor, that course cannot be used to fulfill both the requirements for the major and the requirements for the minor. Where such overlap exists between the requirements of the major and the minor, the student will need to take additional selective coursework to fulfill the 18 hours required by the minor;
2. Prerequisites must be satisfied prior to enrolling in required and selective courses. Consult the Undergraduate Bulletin for list of prerequisites for minors.

Courses

ECON 123 - The American Economy (3 Credits)
Basic concepts, institutional foundations, structure of the private and public sector, labor markets; major economic problems.

ECON 221 - Principles of Microeconomics (3 Credits)
The study of supply and demand, pricing and cost concepts, firm and consumer decision-making, market structure, and government policies.

ECON 222 - Principles of Macroeconomics (3 Credits)
The study of gross domestic product, business cycles, economic growth, inflation, unemployment, and monetary and fiscal policy.

ECON 223 - Introduction to Economics (3 Credits)
Introduction to economics principles for non-majors. Basics of supply and demand and government and monetary policy are covered in a non-technical manner. Not open to business or economics students. Credit not granted for both ECON 223 and ECON 221 or ECON 222.

ECON 224 - Introduction to Economics (3 Credits)
The study of supply and demand, markets, household and firm decision-making, gross domestic product, inflation, unemployment, and government policies. Open to all students except business administration and economics majors.

ECON 301 - Money and Banking (3 Credits)
The role of money in the market economy. Commercial banks, the Federal Reserve System, and monetary policy. Cannot be used to satisfy major requirements. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 303 - The International Economy (3 Credits)
Survey of international economic issues and institutions, including trade and protectionism, global and regional trade agreements, trade balances and exchange rates, Japan, NAFTA, and the European Union.
Prerequisites: ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 311 - Issues in Economics (3 Credits)
The nature and causes of major economic problems facing the nation and its communities, and policy alternatives designed to solve them. The philosophy and methodology of economics in social problem solving.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 321 - Intermediate Microeconomic Theory (3 Credits)
Analysis of the economic behavior of households and firms. Production, consumption, price determination, and the degree of competition in markets.
Prerequisites: ECON 221 and ECON 222, or ECON 224, MATH 122 or MATH 141.

ECON 322 - Intermediate Macroeconomic Theory (3 Credits)
Analysis of the national economy as a whole. Money, output, employment, inflation, and international economic linkages.
Prerequisites: ECON 221 and ECON 222, or ECON 224, MATH 122 or MATH 141.

ECON 329 - American Economic History (3 Credits)
Growth and development of the American economy; applications of economic theory to economic history.
Prerequisites: ECON 221 and ECON 222, or ECON 224.
ECON 363 - Business Finance (3 Credits)
The procurement and management of wealth by privately owned profit-seeking enterprises. 03: 07/05/2019.
Prerequisites: ECON 221, ACCT 225, and 3 hours of statistics at the 200-level.

ECON 364 - Financial Institutions (3 Credits)
A study of the functions and operations of financial institutions and their relationships to the commercial banking system and the general economy. Attention is devoted to savings institutions, insurance companies, rural and urban real estate credit, consumer credit, and associated topics. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 379 - Government Policy Toward Business (3 Credits)
An analysis of public policy toward business in the United States. Emphasis is on the desirability of various policies in light of their consequences for the general welfare.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 399 - Independent Study (1-15 Credits)
Contract approved by instructor, advisor, and undergraduate division head is required.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Research

ECON 402 - Money, Income, and Prices (3 Credits)
A study of monetary standards, monetary theory, monetary policy, and the mechanism of international payments. Attention is devoted to questions of monetary problems, employment, and fiscal policy.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 406 - Labor Economics (3 Credits)
A study of labor market institutions, trends in labor market activity, and the effects of government policy on the labor market. (Not open to majors in economics.)
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 408 - History of Economic Thought (3 Credits)
A survey of economics from the ancient philosophers to the present; with emphasis on the mercantilist, physiocratic, classical, Marxist, Austrian, neo-classical, and institutional schools of economics.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 415 - Economics of American Industry (3 Credits)
A study of the structure of selected American industries, of the development and concentration of economic power in the American economy, and of public policy toward industry.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 420 - Business Applications of Economic Forecasting (3 Credits)
Analysis of business cycles and applications of forecasting techniques to project and interpret economic trends.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 421 - Engineering Economics (3 Credits)
Decision making with respect to capital goods, with emphasis on such decision making in governmental activities and public utilities. Intended primarily for engineering students, the course emphasizes the types of investment decisions that engineers are often called upon to make.

ECON 436 - Introductory Econometrics (3 Credits)
The use of statistical techniques to analyze economic relationships. The emphasis is on the application of linear regression to real-world economic data.
Prerequisites: ECON 224, or ECON 221 and ECON 222; MGSC 291 or STAT 201; and MATH 122 or MATH 141.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ECON 476 - Foundations of Capitalism (3 Credits)
Examines the foundations of capitalism and why it has prevailed over alternative systems. Topics include the justification of private property, distribution of wealth, profit motive, source of wealth creation, and others. 03: 07/05/2019.
Prerequisites: ECON 211 and ECON 222.

ECON 499 - Internship in Economics (1-6 Credits)
Supervised work experience of at least nine hours per week, to include one class meeting a month and individual consultation. Contract approval by instructor, advisor, and department chair is required. Cannot be used to satisfy major requirement.
Prerequisites: C or better in both ECON 321 and ECON 322, and cumulative GPA of 2.75.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 500 - Urban Economics (3 Credits)
An analysis of economic forces affecting urbanization and the economic processes influencing urban form and structure. Spatial concepts are considered in addition to traditional micro-economic and macro-economic concepts. Topic coverage includes: the economic origin of cities; urban functions and the urban economic base, land-use structure and urban form, and urban efficiency.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 503 - International Trade Economics (3 Credits)
Theory of international specialization, commercial policy, customs unions, and the effects of trade liberalization and protectionism; economic growth and multinational enterprises.
Prerequisites: ECON 321.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 504 - International Monetary Economics (3 Credits)
Exchange rate and balance of payments determination; purchasing-power parity; optimum currency areas, absorption, elasticity, monetary approaches, spot- and forward-exchange markets.
Prerequisites: ECON 322.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 505 - International Development Economics (3 Credits)
Economic theories of growth in developing countries. Use of factor resources; role of social and economic institutions; use of financial trade policies for growth.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 506 - Labor Economics and Labor Markets (3 Credits)
Economics of labor demand, labor supply, wage determination in competitive markets, migration, discrimination, unemployment, and labor unions. Theoretical models and empirical knowledge will be considered.
Prerequisites: ECON 221 and ECON 222, or ECON 224; ECON 321.
ECON 507 - Comparative Economic Systems (3 Credits)
An analysis of the organization and operation of the world's major economic systems.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

Graduation with Leadership Distinction: GLD: Global Learning

ECON 508 - Law and Economics (3 Credits)
Economic analysis and interpretation of the law. The economic effect of current law and optimal design of law to meet social objectives.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

ECON 509 - Economics of Sustainable Development (3 Credits)
Exploration of the basic theory and practice of sustainable economic development. Topics include: environmental legislation, global agreements, sustainable development indicators, and economic strategies and methods to promote environmentally sound development.
**Prerequisites:** C or better in the following ECON 221 and ECON 222; or ECON 224; MATH 122.

Graduation with Leadership Distinction: GLD: Community Service

ECON 510 - Experimental Economics (3 Credits)
Exploration of the basic theory and techniques of experimental economics. Topics include: basic game theory, experimental design, and elements of behavioral economic thought.
**Prerequisites:** C or higher in ECON 321.

ECON 511 - Senior Seminar in Economics (3 Credits)
Philosophy and methodology of economics, perspectives on theory and empiricism, economic policy; individualized guided research.
**Prerequisites:** ECON 321, ECON 322, and ECON 436 with grade of C or higher.

ECON 514 - The Economics of Terrorism (3 Credits)
Focuses on the following aspects of terrorism: (1) its causes/determinants (historical, social, cultural, economic, political, and religious determinants); (2) the organizational and funding structure of terrorist groups; (3) the tactics and weapons of terrorist groups; (4) mobilization and recruitment within terror networks; and (5) counterterrorism methods. Restricted to: Business Majors and Economics Arts and Sciences Majors.
**Prerequisites:** C or better in ECON 321.

ECON 515 - Industrial Organization (3 Credits)
This course uses the tools of microeconomics and game theory to examine how firms compete and competition's impact on industry performance. Topics include: price discrimination, product differentiation, and oligopoly behavior.
**Prerequisites:** ECON 321.

ECON 516 - Political Economy (3 Credits)
This course covers fundamental models of collective decision making, studies their empirical relevance, and considers interactions between the economy and politics.
**Prerequisites:** C or better in ECON 221 and ECON 222 or C or better in ECON 224.

ECON 523 - Introduction to Mathematical Economics (3 Credits)
Mathematical formulation of economic theories; the use of mathematics in the development and demonstration of economic relationships.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224; MATH 122, MATH 141, or the equivalent.

ECON 524 - Essentials of Economics (3 Credits)
A course designed to acquaint the student with the principles of operation of the American economic system. A survey course for social studies teachers in secondary schools.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

ECON 526 - Managerial Economics (3 Credits)
A study of the application of the economic theory of profits, competition, demand, and costs to analysis of problems arising in the firm and in decision making. Price policies, forecasting, and investment decisions are among the topics considered.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

ECON 530 - The Economics of Education (3 Credits)
Investment in human capital; the economic value of schooling; internal efficiency of schools; faculty compensation; equity and efficiency of school finance systems; financing higher education.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

ECON 531 - Health Economics (3 Credits)
Applications of economic analysis to health care. Structure and behavior of health-care markets. Description of health care policy issues.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

ECON 548 - Environmental Economics (3 Credits)
An analysis of the economic aspects of environmental decay, pollution control, and natural resource use. Analysis of the ability of the market system to allocate resources efficiently when economic activity is accompanied by environmental damage. Discussion of alternative public policy approaches to pollution control and natural resource conservation.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

Cross-listed course: ENVR 548

ECON 555 - Game Theory in Economics (3 Credits)
Game theory as used to understand decision making in business, economics, politics and other real-world environments. Topics covered include: basic terminology, strategic, extensive, and combinatorial models; and equilibrium strategy.
**Prerequisites:** ECON 321 or MATH 141 and STAT 201 or C or higher in STAT 206.

ECON 556 - Public Finance (3 Credits)
Theory and practice of taxation: public revenue, expenditure, and debt.
**Prerequisites:** C or higher in ECON 321.

ECON 589 - Topics in Economics (1-3 Credits)
Individual topics to be announced with title.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.

ECON 594 - Introduction to Econometrics (3 Credits)
Statistical and economic tools applied to analysis of business and economic problems with the aid of computers.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224; MGSC 291 or STAT 201, MATH 122 or MATH 141.

ECON 621 - Survey of Contemporary Economic Theory (3 Credits)
Neo-classical value and distribution theory combined with income and employment theory.
**Prerequisites:** ECON 221 and ECON 222, or ECON 224.
ECON 690 - Quantitative Foundations for Business and Economics I (3 Credits)
Calculus and classical optimization methods applied to problems in business and economic analysis; matrices, derivatives, and integrals in the analysis of both univariate and multivariate business and economic models. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 691 - Quantitative Foundations for Business and Economics II (3 Credits)
Statistics and probability theory applied to problems of business and economic analysis. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 690 or ECON 690.

ECON 692 - Quantitative Methods I (3 Credits)
Probability and statistics necessary for graduate study in economics and business administration; estimation, hypothesis testing, regression, analysis of variance, and nonparametric methods. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; MGSC 690 or ECON 690.

ECON 694 - Quantitative Methods II (3 Credits)
A study of decision models useful in business administration. Topics covered include linear programming, sensitivity analysis and duality, network models, integer programming, determinate and stochastic dynamic programming, inventory, and queues. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224; ECON 692, mathematics and computer portion of Fundamental Business Skills or equivalent.

Business Economics, B.S.B.A.

Learning Outcomes

- Students will achieve an acceptable pass rate on questions related to the following core microeconomic concepts: (a) Consumer utility maximization (b) Producer profit maximization (c) Equilibrium and welfare analysis under different market structures (d) Importance of externalities
- Students will achieve an acceptable pass rate on questions related to the following core macroeconomic concepts: (a) Determination of full-employment output and growth (b) Money creation and inflation (c) Employment and output fluctuations over the business cycle (d) Fundamentals of macroeconomic policy
- Students will achieve be able to: (a) Solve basic equations to find equilibrium outcomes (b) Use graphs to understand and interpret economic relationships
- Students will be able to successfully prepare a research paper and present the results of their research their peers in a classroom environment.

Internationalization Requirement

The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three hours must be taken from an approved list of courses offered by the Moore School of Business which contain international business or international economics content. The following course options can also be used to satisfy the 3 credit hours of this requirement: approved course work containing international business or international economics content, taken at a semester abroad program; an approved Maymester or summer overseas course containing international business or international economics content; an approved internship course in international business wherein a student would obtain discipline-related work experience in a foreign country; or an approved service-learning component. Students may choose from one of the following options to complete the remaining 6-hour requirement:

- **Language:** Two language courses at the 200 level or above or
- **Electives:** Two approved courses with international content taken either inside or outside the Moore School of Business from a list available in the undergraduate office.

Admissions

Entrance Requirements

In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

Freshmen entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

Students from other UofSC campuses who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

Students enrolled in other colleges on the Columbia campus must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hour,and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission in the fall term.

Transfer students from other institutions must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

Degree Requirements (122 hours)

See Darla Moore School of Business (p. 312) for progression requirements and other regulations.
Program of Study

Requirements | Credit Hours
---|---
1. Carolina Core | 31-43
2. College Requirements | 40
3. Program Requirements | 27-36
4. Major Requirements | 15

1. Carolina Core Requirements (31-43 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
*must be passed with a grade of C or higher*
- ENGL 101
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (6-7 hours)
*must be passed with a grade of C or higher*
- MATH 122 or MATH 141
- STAT 206

SCI – Scientific Literacy (7 hours)
- Two approved Carolina Core Scientific Literacy courses (p. 742), including one laboratory course

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Students shall demonstrate in one Foreign Language the ability to comprehend the topic and the main ideas in written and, with the exception of Latin and Ancient Greek, spoken texts on familiar subjects. This ability can be demonstrated by achieving a score of two or better on a USC foreign language test. Those failing to do so must satisfactorily complete equivalent study of foreign language at USC.
- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (40 hours)
*must be passed with a grade of C or higher*

Total Credit Hours 40

3. Program Requirements (27-36 hours)

Supporting Courses (0-6 hours)
*must be passed with a grade of C or higher*

Upper-Level Business Electives: Students with a single major in Business Economics must complete additional upper level (300-level or above) business/economics course work (in ACCT, ECON, FINA, IBUS, MGMT, MGSC, or MKTG) for a total of 21 hours of Upper-Level Business courses, which include major hours. Students must meet prerequisites to take the business elective of their choosing. Students may choose to double major or pursue a business analytics concentration in place of Upper-Level Business Electives.

Minor or Directed Coursework (minimum of 18 hours)

Minors (non-business) may be selected from a University-wide list of approved minors. The minor is normally a minimum of 18 hours of prescribed courses in one subject area. Students not selecting such a minor may submit an alternative program of study to satisfy the directed coursework requirement. All alternative programs of study are subject to approval by the Undergraduate Program Faculty Committee in coordination with the Undergraduate Division. All minor courses or directed coursework must be passed with a grade of C or better.
**Electives (3-12 hours)**

All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempts the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with additional elective credits.

**4. Major Requirements (15 hours)**

*a minimum grade of C is required in all major courses*

### Major Courses (9 hours)

**Total Credit Hours** 9

### Major Electives (6 hours)

Six hours of ECON courses numbered 400 or above.

Note: ECON 421, ECON 476, ECON 499 and ECON 524 cannot be used to fulfill the 6 hour requirement.

**Business Analytics Concentration (12 hours) optional**

Please consult with your Academic Advisor or department on the courses recommended for individual majors. The analytics concentration must be taken in conjunction with a major. The department may add additional electives to the Business Analytics Concentration, subject to the approval of the Business Analytics Task Force.

**Total Credit Hours** 12

---

**Finance, B.S.B.A.**

**Learning Outcomes**

- Students will understand fundamental financial concepts related to the time value of money and risk-expected return tradeoffs.
- Students will have basic knowledge of the institutional context in which financial decisions and transactions take place.
- Students will be able to conduct a capital budgeting analysis, including calculating expected cash flows, cost of capital, and net present value.
- Students will be able to assess the risk-expected return tradeoffs when constructing a portfolio and apply metrics to assess portfolio performance.
- Students will be able to evaluate a company's prospects and risks.
- Students will be able to infer the impact of business decisions on firm performance.
Internationalization Requirement

The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three hours must be taken from an approved list of courses offered by the Moore School of Business which contain international business or international economics content. The following course options can also be used to satisfy the 3 credit hours of this requirement: approved course work containing international business or international economics content, taken at a semester abroad program; an approved Maymester or summer overseas course containing international business or international economics content; an approved internship course in international business wherein a student would obtain discipline-related work experience in a foreign country; or an approved service-learning component. Students may choose from one of the following options to complete the remaining 6-hour requirement:

- **Language:** Two language courses at the 200 level or above
- **Electives:** Two approved courses with international content taken either inside or outside the Moore School of Business from a list available in the undergraduate office.

Admissions

Entrance Requirements

In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

Freshmen entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

Students from other UofSC campuses who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

Students enrolled in other colleges on the Columbia campus must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission in the fall term.

Transfer students from other institutions must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

Degree Requirements (122 hours)

See Darla Moore School of Business (p. 312) for progression requirements and other regulations.

1. Carolina Core Requirements (31-43 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

- ENGL 101
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (6-7 hours)

- MATH 122 or MATH 141
- STAT 206

SCI – Scientific Literacy (7 hours)

- Two approved Carolina Core Scientific Literacy courses (p. 321), including one laboratory course

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Students shall demonstrate in one Foreign Language the ability to comprehend the topic and the main ideas in written and, with the exception of Latin and Ancient Greek, spoken texts on familiar subjects. This ability can be demonstrated by achieving a score of two or better on a USC foreign language test. Those failing to do so must satisfactorily complete equivalent study of foreign language at USC.

- CC-GFL courses (p. 321)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 321)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 321)

AIU – Aesthetic and Interpretive Understanding (3 hours)

- any CC-AIU course (p. 321)
CMS – Effective, Engaged, and Persuasive
Communication: Spoken Component ¹ (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 321)

INF – Information Literacy ¹ (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 321)

VSR – Values, Ethics, and Social Responsibility ¹ (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 321)

¹ Carolina Core Stand Alone or Overlay Eligible

Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (40 hours)

must be passed with a grade of C or higher

Total Credit Hours 40

3. Program Requirements (27-36 hours)

Supporting Courses (0-6 hours)

must be passed with a grade of C or higher

Upper-Level Business Electives: Students with a single major in Finance must complete additional upper level (300-level or above) business/economics course work (in ACCT, ECON, FINA, IBUS, MGMT, MGSC, or MKTG) for a total of 21 hours of Upper-Level Business courses, which include major hours. Students must meet prerequisites to take the business elective of their choosing. Students may choose to double major or pursue a business analytics concentration in place of Upper-Level Business Electives.

Minor or Directed Coursework (minimum of 18 hours)

Minors (non-business) may be selected from a University-wide list of approved minors. The minor is normally a minimum of 18 hours of prescribed courses in one subject area. Students not selecting such a minor may submit an alternative program of study to satisfy the directed coursework requirement. All alternative programs of study are subject to approval by the Undergraduate Program Faculty Committee in coordination with the Undergraduate Division. All minor courses or directed coursework must be passed with a grade of C or better.

Electives (3-12 hours)

All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempts the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with elective credits to reach minimum degree hours.

¹ International-focused course.
² Depending on the semester or nature of the project, FINA 490 may or may not be applicable to the Finance major. Please consult your advisor to determine if it is applicable in the semester you wish to enroll in the project course.

Note: FINA 333 FINA 367, FINA 369, FINA 442, FINA 443, and FINA 446 do not count towards the major in Finance.

Business Analytics Concentration (12 hours) optional

Please consult with your Academic Advisor or department on the courses recommended for individual majors. The analytics concentration must be taken in conjunction with a major. The department may add additional electives to the Business Analytics Concentration, subject to the approval of the Business Analytics Task Force.
complete the remaining 6-hour requirement:

Students may choose from one of the following options to work experience in a foreign country; or an approved service-learning international business wherein a student would obtain discipline-related international economics content; an approved internship course in or summer overseas course containing international business or international economics content. The following course options can Moore School of Business which contain international business or international economics content that may be used to fulfill other degree requirements. Three

The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three

### Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

### International Business, B.S.B.A.

#### Learning Outcomes

Students will demonstrate...

- In-depth capacity in a functional area of business.
- Strong understanding of the global dimensions of business.
- Excellent communication skills in more than one language.
- Appreciation of the impact of culture on the conduct of business.
- Exposure to living in a second culture.

#### Internationalization Requirement

The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three hours must be taken from an approved list of courses offered by the Moore School of Business which contain international business or international economics content. The following course options can also be used to satisfy the 3 credit hours of this requirement: approved course work containing international business or international economics content, taken at a semester abroad program; an approved Maymester or summer overseas course containing international business or international economics content; an approved internship course in international business wherein a student would obtain discipline-related work experience in a foreign country; or an approved service-learning component. Students may choose from one of the following options to complete the remaining 6-hour requirement:

- **Language:** Two language courses at the 200 level or above
- **Electives:** Two approved courses with international content taken either inside or outside the Moore School of Business from a list available in the undergraduate office.

### Admissions

#### Entrance Requirements

In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

**Freshmen** entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

**Students from other UofSC campusues** who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

**Students enrolled in other colleges on the Columbia campus** must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hour, and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission in the fall term.

**Transfer students from other institutions** must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

#### Additional Admission Information

Admission to the International Business major is highly competitive, and enrollment is limited. Individual limits apply to language selections in the regional concentrations.

#### Degree Requirements (128-131 hours)

See Darla Moore School of Business (p. 312) for progression requirements and other regulations.

MGSC 395 | Operations Management | 3
MKTG 350 | Principles of Marketing | 3

Total Credit Hours 40

3. Program Requirements (21-30 hours)

Minor or Directed Coursework (minimum of 18 hours)
Directed course work may be selected from a University-wide list of approved minors. The minor is normally a minimum of 18 hours of prescribed courses in one subject area. Students not selecting such a minor may submit an alternative program of study to their Moore School academic advisor to satisfy the approved course work requirement. All minor courses or courses approved as alternatives must be passed with a grade of C or better.

Electives (3-12 hours)
All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempts the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with additional elective credits.

4. Major Requirements (27-39 hours)
Students majoring in International Business are required to study outside the United States for a period of one semester, normally the spring semester of the academic year in which IBUS 310 is taken, at an approved institution. Exceptions to this requirement will be
The International Business major requires at least four advanced language courses numbered 300 and above in one foreign language. Students in specific concentrations must meet experiential language program participation requirements that do not equate to specific hours, credits, or course levels. Most students use language courses to fulfill their Minor or Directed Coursework Requirement in the Moore School. 

**Second Major (12-24 hours)**

The International Business major must be taken in combination with a second major in business.

**Regional Cohort Concentrations (15 hours)**

Students in each regional concentration of the International Business major meet the regional course requirements with courses dealing primarily in that region.

**Competitive Admission**

Admission to each concentration of the international business major is highly competitive, and enrollment is limited. Individual limits apply to language selections in the regional concentrations.

**Double Major**

All students selecting international business as a major, regardless of concentration, are required to complete a second major in business.

**Foreign Language**

The International Business major requires at least four advanced language courses numbered 300 and above in one foreign language. Students in specific concentrations must meet experiential language program participation requirements that do not equate to specific hours, credits, or course levels. Most students use language courses to fulfill their Minor or Directed Coursework Requirement in the Moore School.

**Foreign Study**

Students are placed at partner schools through a competitive application process. Students in regional cohort concentrations meet the overseas study requirement at the cohort partner institution and spend a minimum of two semesters abroad depending on cohort concentration. Experiential program requirements are outlined in the Program Expectations for each cohort concentration.

**Conduct**

Regional Cohort Concentrations have specific behavioral requirements. Those requirements are outlined in the Program Expectations for each cohort.

**Chinese Business (15 hours)**

The Chinese Business concentration in the International Business major allows the student to focus on International Business activities with China. Students in this concentration meet the foreign language requirement by selecting Chinese as the language of study. The Chinese language placement test will determine at which level the student will begin. Foreign language courses may be included as part of the required directed coursework. The language requirement for Chinese Business is heavily dependent on incoming language level. If students enroll at USC with C7 on their Chinese placement test, they may not be required to participate in the summer language institutes.

- IBUS 310
- One functional course from the list above (3 hours)
- One thematic course from the list above (3 hours)
- Two regional courses (6 hours)
• IBUS 542
• IBUS 490

1 Because one or more of these courses may not be offered on campus during the two years that a student may be taking major-level courses, these courses are most appropriate for study abroad.

Eurasian Business (15 hours) PENDING

Note: The Eurasian Business Track is awaiting final oversight approval and a completed memorandum of understanding. Accordingly, it is not accepting students at this time.

The Eurasian Business concentration in the International Business major allows the student to focus on International Business activities centered on this region. Students in this concentration meet the foreign language requirement by selecting either Turkish or Russian as the language of study. The language placement test will determine at which level the student will begin. Foreign language courses may be included as part of the required directed coursework.

• IBUS 310
• One functional course from the list above (3 hours)
• One thematic course from the list above (3 hours)
• Two regional courses from the following (6 hours):
  • IBUS 542
  • IBUS 543
  • IBUS 490

1 Because one or more of these courses may not be offered on campus during the two years that a student may be taking major-level courses, these courses are most appropriate for study abroad.

European Business (15 hours)

The European Business concentration in the International Business major allows the student to focus on International Business activities with this region. Students in this concentration meet the foreign language requirement by selecting French, German, or Italian as the language of study. The foreign language placement test will determine at which level the student will begin. Foreign language courses may be included as part of the required directed coursework.

• IBUS 310
• One functional course from the list above (3 hours)
• One thematic course from the list above (3 hours)
• Two regional courses (6 hours)
  • IBUS 543
  • IBUS 490

1 Because one or more of these courses may not be offered on campus during the two years that a student may be taking major-level courses, these courses are most appropriate for study abroad.

Global Business Innovation (15 hours)

The Global Business Innovation Concentration in the International Business major allows the student to focus on International Business activities within a global context. Students in this concentration meet the foreign language requirement by selecting a modern spoken language in the USC language department as the language of study. The foreign language placement test will determine at which level the student will begin. Foreign language courses may be included as part of the required directed coursework.

• IBUS 310
• One functional course from the list above (3 hours)
• One thematic course from the list above (3 hours)
• Two regional courses (6 hours)
  • IBUS 541
  • One from the following:
    • IBUS 542
    • IBUS 543
    • IBUS 544
    • IBUS 490

1 Because one or more of these courses may not be offered on campus during the two years that a student may be taking major-level courses, these courses are most appropriate for study abroad.

Middle East and North Africa (MENA) Business (15 hours)

The Middle East and North Africa (MENA) Business concentration in the International Business major allows the student to focus on International Business activities with this region. Students in this concentration meet the foreign language requirement by selecting Arabic as the language of study. The Arabic language placement test will determine at which level the student will begin. Foreign language courses may be included as part of the required directed coursework. The language requirement for the MENA program is heavily dependent on incoming language level. If students enroll at USC with A4 on their Arabic placement test, they are not required to participate in both summer language institutes. Only one may be required based on evaluation of proficiency.

• IBUS 310
• One functional course from the list above (3 hours)
• One thematic course from the list above (3 hours)
• Two regional courses (6 hours)
  • IBUS 541
  • IBUS 544
  • IBUS 490
South American Business (15 hours)
The South American Business concentration in the International Business major allows the student to focus on International Business activities with this region. Students in this concentration meet the foreign language requirement by selecting Portuguese or Spanish as the language of study. The foreign language placement test will determine at which level the student will begin. Foreign language courses may be included as part of the required directed coursework.

- IBUS 310
- One functional course from the list above (3 hours)
- One thematic course from the list above (3 hours)
- Two regional courses (6 hours)
  - IBUS 541
  - IBUS 490

Because one or more of these courses may not be offered on campus during the two years that a student may be taking major-level courses, these courses are most appropriate for study abroad.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

International Business, B.S.B.A. No Concentration
International Business, B.S.B.A. Chinese Business Concentration
International Business, B.S.B.A. European Business Concentration
International Business, B.S.B.A. Global Business Concentration
International Business, B.S.B.A. Global Business Innovation Concentration
International Business, B.S.B.A. Middle East & North Africa (MENA) Business Concentration
International Business, B.S.B.A. South American Business Concentration

Management, B.S.B.A.
Learning Outcomes
- Students should understand the role of management and managers in building an effective organization.
- Students should understand the role of research in improving managerial practice.
- Students should be able to apply management principles to determine how managers should respond to particular challenges or opportunities confronting an organization.
- Students should be able to effectively communicate management principles or the application of those principles to particular organizational circumstances.

Internationalization Requirement
The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three hours must be taken from an approved list of courses offered by the Moore School of Business which contain international business or international economics content. The following course options can also be used to satisfy the 3 credit hours of this requirement: approved work experience in a foreign country; or an approved service-learning component. Students may choose from one of the following options to complete the remaining 6-hour requirement:

- Language: Two language courses at the 200 level or above
- Electives: Two approved courses with international content taken either inside or outside the Moore School of Business from a list available in the undergraduate office.

Admissions
Entrance Requirements
In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

Freshmen entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

Students from other UofSC campuses who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

Students enrolled in other colleges on the Columbia campus must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hour, and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission in the fall term.
Transfer students from other institutions must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

Degree Requirements (122-128 hours)
See Darla Moore School of Business (p. 312) for progression requirements and other regulations.

1. Carolina Core Requirements (31-43 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
*must be passed with a grade of C or higher*

- ENGL 101
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (6-7 hours)
*must be passed with a grade of C or higher*

- MATH 122 or MATH 141
- STAT 206

SCI – Scientific Literacy (7 hours)

- Two approved Carolina Core Scientific Literacy courses (p. 742), including one laboratory course

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Students shall demonstrate in one Foreign Language the ability to comprehend the topic and the main ideas in written and, with the exception of Latin and Ancient Greek, spoken texts on familiar subjects. This ability can be demonstrated by achieving a score of two or better on a USC foreign language test. Those failing to do so must satisfactorily complete equivalent study of foreign language at USC.

- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)

2. College Requirements (40 hours)

*must be passed with a grade of C or higher*

Total Credit Hours 40

3. Program Requirements (21-36 hours)

Supporting Courses (0-6 hours)

*must be passed with a grade of C or higher*

Upper-Level Business Electives: Students with a single major in Management with a concentration in Human Resources and Organizational Leadership must complete additional upper level (300-level or above) business/economics course work (in ACCT, ECON, FINA, IBUS, MGMT, MGSC, or MKTG) for a total of 21 hours of Upper-Level Business courses, which include major hours. Students must meet prerequisites to take the business elective of their choosing. Students may choose to double major or pursue a business analytics concentration in place of Upper-Level Business Electives.
Minor or Directed Coursework (minimum of 18 hours)

Minors (non-business) may be selected from a University-wide list of approved minors. The minor is normally a minimum of 18 hours of prescribed courses in one subject area. Students not selecting such a minor may submit an alternative program of study to satisfy the directed coursework requirement. All alternative programs of study are subject to approval by the Undergraduate Program Faculty Committee in coordination with the Undergraduate Division. All minor courses or directed coursework must be passed with a grade of C or better.

Electives (3-12 hours)

All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempts the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with additional elective credits.

4. Major Requirements (15-36 hours)

A minimum grade of C is required in all major courses.

Students must choose either the Human Resources and Organizational Leadership Concentration or the Entrepreneurship Concentration.

Concentrations (15-36 hours)

Human Resources and Organizational Leadership (15 hours)

Second Major

Entrepreneurship requires completion of a second, non-Management 15-24 major in business.

Total Credit Hours 27-36

International-focused course.

Business Analytics Concentration (12 hours) optional

Please consult with your Academic Advisor or department on the courses recommended for individual majors. The analytics concentration must be taken in conjunction with a major. The department may add additional electives to the Business Analytics Concentration, subject to the approval of the Business Analytics Task Force.

- MKTG 352 Principles of Marketing Research
- MKTG 447 Pricing Strategy and Analytics

Total Credit Hours 12

Note: a maximum of one course can double count within your major(s).

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Management, B.S.B.A. Human Resources and Organizational Leadership

Management, B.S.B.A. Entrepreneurship
Marketing, B.S.B.A.

Learning Outcomes

- Students will demonstrate knowledge of consumer behavior, and how marketers strive to use an understanding of consumer behavior to promote effective marketing through advertising, product design, or promotions.
- Students will develop an understanding of the internal and external factors that influence consumer choice.
- Students will be able to conduct marketing research, which will include the design and administration of questionnaires, an understanding of sampling techniques, and how to collect, clean, and code data.
- Students will develop the ability to analyze and interpret marketing research results.
- Students will be able to communicate market research results effectively.
- Students will develop an understanding of the strategic marketing management planning process.

Internationalization Requirement

The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three hours must be taken from an approved list of courses offered by the Moore School of Business which contain international business or international economics content. The following course options can also be used to satisfy the 3 credit hours of this requirement: approved course work containing international business or international economics content, taken at a semester abroad program; an approved Maymester or summer overseas course containing international business or international economics content; an approved internship course in international business wherein a student would obtain discipline-related work experience in a foreign country; or an approved service-learning component. Students may choose from one of the following options to complete the remaining 6-hour requirement:

- Language: Two language courses at the 200 level or above
- Electives: Two approved courses with international content taken either inside or outside the Moore School of Business from a list available in the undergraduate office.

Admissions

Entrance Requirements

In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

Freshmen entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

Students from other UofSC campuses who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

Students enrolled in other colleges on the Columbia campus must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hour, and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission in the fall term.

Transfer students from other institutions must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

Degree Requirements (122 hours)

Total Credit Hours 40

3. Program Requirements (27-36 hours)  
*must be passed with a grade of C or higher*

Supporting Courses (0-6 hours)  

Upper-Level Business Electives: Students with a single major in Operations and Supply Chain must complete additional upper level (300-level or above) business/economics course work (in ACCT, ECON, FINA, IBUS, MGMT, MGSC, or MKTG) for a total of 21 hours of Upper-Level Business courses, which include major hours. Students must meet prerequisites to take the business elective of their choosing. Students may choose to double major or pursue a business analytics concentration in place of Upper-Level Business Electives.
Minor or Directed Coursework (minimum of 18 hours)

Minors (non-business) may be selected from a University-wide list of approved minors. The minor is normally a minimum of 18 hours of prescribed courses in one subject area. Students not selecting such a minor may submit an alternative program of study to satisfy the directed coursework requirement. All alternative programs of study are subject to approval by the Undergraduate Program Faculty Committee in coordination with the Undergraduate Division. All minor courses or directed coursework must be passed with a grade of C or better.

Electives (3-12 hours)

All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempts the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with additional elective credits.

4. Major Requirements (16 hours)

a minimum grade of C is required in all major courses

Internationalization Requirement

The program also requires 9 hours of course work with international content that may be used to fulfill other degree requirements. Three hours must be taken from an approved list of courses offered by the Moore School of Business which contain international business or international economics content. The following course options can also be used to satisfy the 3 credit hours of this requirement: approved course work containing international business or international economics content, taken at a semester abroad program; an approved Maymester or summer overseas course containing international business or international economics content; an approved internship course in international business wherein a student would obtain discipline-related work experience in a foreign country; or an approved service-learning component. Students may choose from one of the following options to complete the remaining 6-hour requirement:

- **Language**: Two language courses at the 200 level or above or
- **Electives**: Two approved courses with international content taken either inside or outside the Moore School of Business from a list available in the undergraduate office.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Operations and Supply Chain, B.S.B.A.

Real Estate, B.S.B.A.

Learning Outcomes

- Students will understand the importance and role of real estate in local and national economies.
- Students will be able to identify key driving forces of the real estate market.
- Students will be able to analyze real estate investment cash flows and make real estate investment decisions based on net present value or the internal rate of return.
- Students will understand and be able to analyze mortgage contracts taking the perspective as a borrower, a lender, and an investor.
- Students will be able to understand the basic trade-off in debt versus equity finance in real estate.
- Students will be able to understand the basics of securitization and be able to analyze simple mortgage-backed securitization deals.

Total Credit Hours 12

Note: Students must apply for placement into MGSC 495 and MGSC 497 through a competitive application process.

Electives:

- MGSC 390 Business Information Systems
- MGSC 391 Applied Statistical Modeling
- MGSC 486 Service Operations Management
- MKTG 352 Principles of Marketing Research
- MKTG 447 Pricing Strategy and Analytics
- MKTG 448 Data Science for Business Decision-Making
Admissions
Entrance Requirements
In addition to the academic admission requirements of the Moore School of Business stated below, a limit on admission to the program may be imposed. An enrollment limit would become necessary if enrollment levels exceed school staffing capabilities and resources. The Undergraduate Admissions Committee, in consultation with the dean of the school, shall be responsible for adjusting undergraduate enrollment levels to ensure the quality of the undergraduate program. A student who meets admissions criteria will be favorably considered, but because of space limitations admission cannot be guaranteed. Once minimum criteria are met, all qualified applicants are placed into an admissions group and are ranked by academic credentials. Based on the number of available seats, students are admitted in ranked order until capacity is reached. The Moore School only considers new applicants for Fall Term admission.

Freshmen entering the UofSC Columbia Pre-Business division of the Moore School of Business must meet the campus requirements for admission. Freshmen applicants will only be considered for Fall Term admission.

Students from other UofSC campuses who have no work from colleges outside of UofSC must have a minimum cumulative Institution GPA of 3.25, must have taken at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Additionally, those students who have fewer than 30 semester hours from colleges outside UofSC must also meet Columbia campus freshman admission requirements. Change of campus applicants will only be considered for Fall Term admission.

Students enrolled in other colleges on the Columbia campus must have a minimum cumulative Institution GPA of 3.25, must have at least 15 UofSC credit hours, and have completed calculus with a minimum grade of C. Internal transfers will only be considered for admission.

Transfer students from other institutions must present a minimum cumulative GPA of 3.25 on all college work taken and have completed calculus with a minimum grade of C. Students who have taken fewer than 30 semester hours of college work must also meet Columbia campus freshman admission requirements. External transfers will only be considered for Fall Term admission.

Degree Requirements (122 hours)
See Darla Moore School of Business (p. 312) for progression requirements and other regulations.

1. Carolina Core Requirements (31-43 hours)
CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher
- ENGL 101
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (6-7 hours)

must be passed with a grade of C or higher
- MATH 122 or MATH 141
- STAT 206

SCI – Scientific Literacy (7 hours)
- Two approved Carolina Core Scientific Literacy courses (p. 742), including one laboratory course

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Students shall demonstrate in one Foreign Language the ability to comprehend the topic and the main ideas in written and, with the exception of Latin and Ancient Greek, spoken texts on familiar subjects. This ability can be demonstrated by achieving a score of two or better on a USC foreign language test. Those failing to do so must satisfactorily complete equivalent study of foreign language at USC.
- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component ¹ (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy ¹ (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility ¹ (0-3 hours)
- any overlay or stand-alone CC-VSR course (p. 742)
1 Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a maximum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (40 hours)

must be passed with a grade of C or higher

3. Program Requirements (27-36 hours)

Supporting Courses (0-6 hours)

must be passed with a grade of C or higher

Upper-Level Business Electives: Students with a single major in Real Estate must complete additional upper level (300-level or above) business/economics course work (in ACCT, ECON, FINA, IBUS, MGMT, MGSC, or MKTG) for a total of 21 hours of Upper-Level Business courses, which include major hours. Students must meet prequisites to take the business elective of their choosing. Students may choose to double major or pursue a business analytics concentration in place of Upper-Level Business Electives.

Minor or Directed Coursework (minimum of 18 hours)

Minors (non-business) may be selected from a University-wide list of approved minors. The minor is normally a minimum of 18 hours of prescribed courses in one subject area. Students not selecting such a minor may submit an alternative program of study to satisfy the directed coursework requirement. All alternative programs of study are subject to approval by the Undergraduate Program Faculty Committee in coordination with the Undergraduate Division. All minor courses or directed coursework must be passed with a grade of C or better.

Electives (3-12 hours)

All students must complete 3 hours of electives, not to include coursework in PEDU or MATH/STAT below the Moore School minimum requirements (ex. MATH 111 or STAT 110). Students are strongly encouraged to take a business section of UNIV 101 to fulfill this elective. Additional electives may be needed if a student exempts the foreign language requirement or fulfills Carolina Core requirements with overlay courses. Those credit hours must be replaced with additional elective credits.

Cindy Van Buren, Assistant Dean for Professional Partnerships

Overview
The College of Education is the anchor of the Professional Education Unit (PEU) of the University of South Carolina, which is accredited by the Council for the Accreditation of Educator Preparation (CAEP). In cooperation with the five other colleges/schools of the PEU and our public school partners, the College of Education offers education programs that are designed to develop collaborative educational leaders, including educators’ commitment to integrity, intellectual spirit, justice, and stewardship of schools. All University teacher education programs support prospective teachers in developing both in-depth content knowledge and appropriate knowledge, skills, and dispositions of teaching required in today’s classrooms. Extensive clinical experiences in a variety of appropriate PreK-12 classrooms and schools are a central component of each program.

The College of Education offers undergraduate degrees that lead to certification in early childhood (PreK-grade 3), elementary (grades 2-6), middle level (grades 5-8), and physical education (grades K-12).

Undergraduate teacher preparation programs outside the College of Education include K-12 music education (options in choral or instrumental) in the School of Music; and K-12 programs of art education, dance (concentration in dance education), and foreign language (teacher education options in Classics, French, German, and Spanish) in the College of Arts and Sciences.
Five-year undergraduate/graduate teacher preparation programs are offered in four areas of secondary education: English, mathematics, science, and social studies. Students pursue undergraduate degree programs in the discipline they wish to teach. Students should consult an advisor in the appropriate Arts and Sciences department for program information. Required undergraduate education courses for students pursuing certification in the five-year program include EDFI 300, EDSE 502, EDSE 500, and EDPY 401. Students pursuing English certification must also include EDSE 547 in their undergraduate course work. Students seeking certification also complete a fifth-year Master of Teaching degree. Students must apply for and be admitted to the graduate program. Students are not admitted to the master’s degree program solely by reason of their completion of the undergraduate degree.

Graduate initial teacher certification programs, including the M.A.T. in Special Education and many other areas, are described in the Graduate Studies Bulletin.

Admission to the Professional Program

All University teacher education students must apply and be admitted to Professional Program/Internship at mid-point(s) in their programs prior to final internship (i.e., student teaching). Requirements for admission vary by program, but for undergraduate students include 60 credit hours with a minimum overall GPA of 2.75, successful completion of a state-approved basic skills examination, and courses as specified by program area.

Students should contact their program area or the College of Education Office of Student Affairs for specific requirements and application deadlines.

Certification

To receive a recommendation for initial teacher certification, all University teacher education students must complete appropriate degree(s) and pass assessments required by the South Carolina Board of Education. Inasmuch as degree and certification requirements are linked, if state regulations change, degree requirements are also subject to change.

All students seeking a recommendation for initial teacher certification must:

1. successfully complete the requirements of the degree program;
2. achieve test scores at or above the level established by the state on the program-appropriate exams (Praxis II series) and submit scores to the Office of Student Affairs, College of Education, Wardlaw 113, and to the S.C. Department of Education;
3. submit to an FBI and SLED check for prior felony convictions prior to full-time clinical experience;
4. pay all certification fees as required;
5. successfully complete EEDA and ADEPT requirements with a positive recommendation for certification.

Information

Information regarding all programs in the College of Education and the education requirements for all teacher preparation programs are available online (https://sc.edu/study/colleges_schools/education/) or by contacting the Office of Student Affairs, College of Education, Wardlaw 113, 803-777-6732.

Minors in Education

Students completing degrees outside the College of Education who wish to include an education minor must contact their undergraduate dean’s office for prior approval.

Select two additional courses from the following: 6

Students intending to complete the 5th-year Master of Teaching program for secondary education must complete the following two courses:

- EDSE 500 | Equity and Community Engagement |
- EDSE 502 | Teachers and Teaching |

All other students take the following two courses to complete the minor:

- EDTE 202 | Global Citizenship and Social Responsibility through Education |
Educational Leadership and Policies

Department Website (http://www.ed.sc.edu/EDLP/)

Peter Moyi, Interim Chair

Courses

EDHE 600 - Special Problems in Higher Education and Student Affairs (1-3 Credits)
The course is designed to provide opportunities for the study of special topics in higher education and student affairs administration.

EDLP 517 - Law and Policy Studies in Education (3 Credits)
Policy issues affecting public and private educational institutions across the PK-20 continuum (pre-school through higher education).

EDLP 520 - The Teacher as Manager (3 Credits)
To help teachers, principals, and other personnel solve school problems by identifying and applying selected management techniques.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Experiential Learning: Experiential Learning Opportunity

EDLP 525 - Resources for Teaching and Learning (3 Credits)
An introduction to educational technology, its increasing importance in the total school program, and its relationship to learning theories and communication.

EDLP 601 - The Effective Teacher (3 Credits)
Use of theory and research to understand and improve classroom teaching. Emphasis on teacher reflection and decision-making. The administrative role in enhancing effectiveness is highlighted.

EDLP 690 - Independent Study (1-3 Credits)

Educational Studies

Department Website (http://edst.ed.sc.edu/)

Erik Drasgow, Chair

Courses

EDCE 502 - Guidance Techniques for Classroom Teachers (3 Credits)
A comparative study of the major theories in the field of family counseling.

EDCE 503 - Family Counseling (3 Credits)
The course is designed to provide counselors, teachers, and administrators with increased awareness of a wide variety of work experiences.

EDCE 507 - Educators in Industry (3 Credits)
Orientation to the profession of counseling including its historical, social, and cultural foundations. Declaration of the minor in counseling or admission to the Ed.S. in Counselor Education.

EDCE 510 - Introduction to Counseling (3 Credits)
Orientation to the profession of counseling including its historical, social, and cultural foundations. Declaration of the minor in counseling or admission to the Ed.S. in Counselor Education.

EDCE 520 - Wellness and Mental Health (3 Credits)
An overview of the characteristics of optimal holistic wellness and human functioning. Practical application of theoretically and empirically supported wellness models and interventions to enhance social, emotional, mental, physical, and spiritual well-being.

EDCE 555 - Theory and Practice of College Mentoring (3 Credits)
Emphasis on current professional approaches to college mentoring and development of leadership and mentoring skills. Students must participate in Minority Assistance Program. Upper division undergraduate standing or admission to a graduate program and consent of instructors.

EDCE 570 - Seminar in Counseling (3 Credits)
Declaration of the minor in counseling.

EDCE 600 - Communication Skills in Counseling (3 Credits)
Human relations principles applied to the counseling interview.

EDCE 650 - Counseling Student Athletes (3 Credits)
Issues facing student athletes regarding their personal and career development beyond athletics.

Cross-listed course: PEDU 660

EDCE 690 - Independent Study (1-3 Credits)

EDET 603 - Design and Development Tools I (3 Credits)
Study of multimedia elements (e.g., graphics, animation, audio, and video) including the creation and editing of materials. Instructional applications, copyright issues, and technology limitations will be explored. 03: 07/05/2019.

EDET 650 - Internship in Educational Technology (3 Credits)
Supervised field-based experiences in the design, development, evaluation, and implementation of technology-based instructional and training projects.

Prerequisites: EDET 603, EDET 703, and EDET 722.

EDET 652 - Design and Evaluation of Games and Simulations (3 Credits)
Application of instructional design criteria to computer and noncomputer interactions. Analyses include requisite cognitive processes, affective outcomes, and ethical standards. Design and formative testing of interactive exercises.

EDEX 205 - Understanding the Foundations of Disability (3 Credits)
The role of historical events, politics, media, race, gender, and other issues in shaping how disability is viewed. A critical framework for understanding how disability is viewed in Western culture and the effects of those views on individuals with disabilities.

Carolina Core: GSS

EDEX 399 - Independent Study (3-15 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

EDEX 491 - Introduction to Inclusion of Students with Mild Disabilities (2 Credits)
Inclusion strategies and accommodation planning for students with mild disabilities in general education classrooms.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

EDEX 523 - Introduction to Exceptional Children (3 Credits)
Overview of the field of education for exceptional children. Basic course for those entering the field of special education.

EDEX 525 - The Nature of Orthopedic and Special Health Problems (3 Credits)
Symptomatology, behavioral manifestations, and resources for care and treatment of orthopedic conditions and other types of health problems in children and youth.
EDEX 530 - Introduction to Early Childhood Special Education (3 Credits)
An overview of early childhood special education for young children with disabilities and their families.

EDEX 531 - Nature of Students with Specific Learning Disabilities (3 Credits)
Children with average/above average intelligence and specific learning impairments; diagnostic and remedial techniques. (Offered by both the College of Education and the Department of Psychology).
Prerequisites: EDEX 523 or PSYC 528.

Cross-listed course: PSYC 529

EDEX 540 - Nature and Needs of the Gifted and Talented (3 Credits)
Types and characteristics of the gifted and talented.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 580 - Direct Instruction in Reading for At-Risk Learners (3 Credits)
A study of the skills and knowledge required to implement direct instruction procedures when teaching reading, with opportunity for application of skills. Research and theoretical foundations will also be evaluated.
Prerequisites: EDEX 523.

EDEX 581 - Teaching Reading in the Content Area to Adolescents with Reading Disabilities (3 Credits)
Research, theory, and instructional practices related to providing reading instruction in content areas for youth with disabilities, with a focus on developing disciplinary literacy in inclusive settings.

EDEX 582 - Teaching Mathematics to Students at Risk (3 Credits)
Research, theory, and instructional practices related to mathematical readiness and instruction for children and youth at risk for mathematical difficulties.
Prerequisites: EDEX 523 or EDEX 491.

EDEX 610 - Instruction of Students with Severe and Multiple Disabilities (3 Credits)
Data-based instruction for teaching students with significant disabilities: task and developmental analysis, individualizing instruction, and preparing and implementing instructional programs.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 615 - Curriculum and Language Instruction for Students with Severe and Multiple Disabilities (3 Credits)
Design, development, adaptation, and implementation of curriculum, language and communication instruction for students with significant disabilities.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 616 - Instruction of Students with Specific Learning Disabilities (3 Credits)
Theory and application of current evidence-based procedures for teaching children with specific learning disabilities.
Prerequisites: EDEX 523, EDEX 531, or EDEX 632 or equivalent.

EDEX 619 - Nature of Students with Intellectual Disabilities (3 Credits)
Nature and causes of intellectual disabilities, behavior, and potentialities of persons with intellectual disabilities.
Prerequisites: a course in the areas of child psychology or child development.

EDEX 630 - Educational Procedures for Early Childhood Special Education (3 Credits)
An initial course in educational procedures focusing on intervention strategies for serving young children with disabilities in inclusive environments.
Prerequisites: EDEX 530.

EDEX 632 - Nature of Students with Emotional and Behavior Disabilities (3 Credits)
Characteristics, etiology, and major theoretical models for children experiencing emotional and/or behavioral problems in school; special education curriculum, programming alternatives, assessment, and issues concerning this population.
Prerequisites: EDEX 523 or PSYC 528.

EDEX 640 - Managing Problem Behavior in the Classroom (3 Credits)
The development of a workable approach to classroom management through an examination of a research-based synthesis of current knowledge in classroom and behavior management.

EDEX 643 - Social/Emotional Development and Guidance for Young Children with Developmental Delays (3 Credits)
Prerequisites: EDEX 523.

EDEX 646 - Advanced Procedures for Assessment in Early Childhood Special Education (ECSE) (3 Credits)
Advanced assessment methods for serving young children with and without developmental delays and their families.
Prerequisites: EDEX 530.

EDEX 670 - Nature of Students with Multi-categorical Disabilities (3 Credits)
Personal, social, and educational implications of a mild to moderate multi-categorical disability (emotional/behavioral, intellectual, and learning disabilities) throughout the lifespan of an individual.
Prerequisites: C or better in EDEX 523.

EDEX 671 - Instruction of Students with Multi-categorical Disabilities (3 Credits)
Theory and application of current evidence-based procedures for teaching children with mild to moderate multi-categorical disabilities.
Prerequisite or Corequisite: C or better in EDEX 670.

EDEX 682 - Introduction to Braille (3 Credits)
Basic course for mastery of the literary braille code. Transcription of instructional materials in literary braille.

EDEX 685 - Nature of Students with Visual Disabilities (3 Credits)
The psychological, social, and educational implications for persons with visual disabilities; definitions, incidence, characteristics of, and rehabilitative and educational programs for persons with visual disabilities.

EDEX 686 - Introduction to Deafness (3 Credits)
Educational implications of philosophy, theory, and research about deafness.
Prerequisites: EDEX 523 or equivalent.

EDEX 687 - Communication Systems for Students who are Deaf or Hearing Impaired (3 Credits)
Knowledge and basic skills of finger-spelling and sign forms for communication.
EDFI 690 - Independent Study (1-3 Credits)
EDFI 691 - Collaborative Partnerships in PK-12 Special Education (3 Credits)
Communication and collaboration skills and strategies for creating and maintaining effective partnerships with a variety of stakeholders involved in educating students with disabilities in PK-12 settings.
**Prerequisites:** EDEX 523 or PSYC 528.

EDFI 692 - Partnerships in Early Childhood Special Education (3 Credits)
Strategies for collaborating and communicating with families and other professionals as members of multidisciplinary teams in Early Intervention and Early childhood Special Education.
**Prerequisites:** EDEX 523.

EDFI 300 - Schools in Communities (3 Credits)
Social, political, and historical aspects of diverse educational institutions in American culture with an emphasis on families, schools, and communities. Sophomore standing.
**Graduation with Leadership Distinction:** GLD: Community Service

EDFI 321 - Dynamics of American Public Education (3 Credits)
Extensive treatment of the social, political, economic, and philosophical influences that have shaped public education. Analysis of the financial, organizational, and legal aspects of education. Library assignments provide a working knowledge of professional standard references and journals. Junior or higher standing.

EDFI 350 - Antiracist Education (3 Credits)
Basic concepts, issues, and practices of antiracist education. Topics include individual and institutional racism, overt and covert racism, curriculum, textbooks, power relationships, teacher-student relationships, and privacy.
**Cross-listed course:** AFAM 350
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

EDFI 357 - Sociology of Education (3 Credits)
Analysis of educational institutions, organizations, processes, and their effects in contemporary society.
**Prerequisites:** SOCY 101.
**Cross-listed course:** SOCY 357
**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy

EDFI 361 - Comparative and International Education (3 Credits)
Understanding of schooling in a global society. An introduction to comparative and international education and its major theories practices and research methodologies with an examination of educational issues, levels and system in a variety of cultural contexts and countries.

EDFI 399 - Independent Study (3 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
**Graduation with Leadership Distinction:** GLD: Research

EDFI 592 - Historical Foundations of American Educational Thought (3 Credits)
A survey of the history, philosophy, administration, and legal bases of American education.

EDFI 643 - Southern Educational History (3 Credits)
Development of educational institutions in Southern society with special attention given to South Carolina.

EDFI 690 - Independent Study (1-3 Credits)
EDPY 333 - Introduction to Child Growth and Development (3 Credits)
Basic course designed to familiarize the prospective teacher with the patterns of social, emotional, physical, and intellectual growth of the individual. Development of these growth patterns from the prenatal stage to the onset of adolescence.

EDPY 334 - Introduction to Adolescent Growth and Development (3 Credits)
Basic course designed to familiarize the prospective junior and senior high school teacher with the pattern of social, emotional, physical, and intellectual growth of the individual during his adolescent years. Recommendation of the advisor(s) required.

EDPY 335 - Introduction to Educational Psychology (3 Credits)
Applications of the psychology of learning and development. Special attention to basic statistics and the behavior of the school child.

EDPY 399 - Independent Study (3-15 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
**Graduation with Leadership Distinction:** GLD: Research

EDPY 401 - Learners and the Diversity of Learning (3 Credits)
Overview of psychological theories and research as it applies to education, including theories of learning, child and adolescent development, cognitive processes, classroom practices, individual differences/student diversity, and motivation.
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

EDPY 401P - Practicum: Learners and the Diversity of Learning (1 Credit)
Field experience integrated with course on lifespan development and learning with an emphasis on individual and group diversity.
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships

EDPY 644 - Free-Choice Learning and Informal Learning Environments (3 Credits)
Examines free-choice (or informal) learning and the characteristics of settings and activities outside of formal schooling that effectively promote learning and development.

EDPY 690 - Independent Study (3-15 Credits)
EDUC 110 - USC Teaching Fellows Leadership Seminar (0 Credits)
A resource for members of the Teaching Fellows Program to successfully complete yearly program requirements. Topics include: qualities of an effective teacher, how to give constructive classroom feedback, students' needs decision making, leadership styles, valuing diversity, and factors that influence/contribute to effective teacher leadership. Restricted to students enrolled in the USC Teaching Fellows Program. Instructor permission only.

EDUC 360 - Global and Multicultural Perspectives on Education in International Settings (3 Credits)
Study abroad course in which students apply social science knowledge and analytical methods to understand the ways in which culture, society, politics, and global forces affect education and schooling in diverse international settings. May be repeated as content varies by destination.
**Carolina Core:** GSS
**Graduation with Leadership Distinction:** GLD: Global Learning

EDUC 610 - Case Study in Classroom Management (3 Credits)
Case study in the clinical application of pedagogy and methods related to classroom management, including relational, procedural and instructional aspects of a classroom management approach.
Progression Requirements

To remain in the early childhood, elementary, or middle level degree programs offered by the College of Education, a student must make satisfactory progress toward the degree. A student who fails to make satisfactory progress, as identified in each program area, may be placed on an Action Plan or deemed ineligible to progress in the program in which enrolled. An Action Plan will be written that describes specific goals, actions, and criteria which the student must meet in order to be eligible to progress. Students may repeat one time only, one course offered through a department in the College of Education for which an unsatisfactory grade was earned. Students who earn more than one unsatisfactory grade in an Education course will no longer be eligible to progress in the program.

Any student who fails to meet a progression requirement to continue in an undergraduate program in the College of Education and wishes to transfer to a different major in the Department of Instruction and Teacher Education must petition the new program and be approved for admission by the faculty of the program.

Additionally, all students in the college are subject to the regulations on probation, suspension, and readmission in the section of this bulletin titled "Academic Regulations" under the heading "Academic Standards Policies."

Professional Program

Admission to the professional program in early childhood, elementary, or middle level education is granted by the dean of the College of Education and constitutes the first "midpoint" review in each respective assessment system. Professional program and internship admission requirements can be found in the description of each program area.

Exit Requirements

1. Successfully complete all degree requirements.
2. Complete and submit an application for graduation to the College of Education's Office of Student Affairs early in the last semester of the senior year. Students should consult the official University calendar for the specific date that the application is due.

Early Childhood Education

The Department of Instruction and Teacher Education offers a program leading to a B.A. degree in early childhood education. Students successfully completing all certification requirements are eligible to apply for a professional credential to teach preschool through grade 3.

The Early Childhood Education Professional Program

Upon completion of 60 semester hours of course work, including courses specified by the program area, the candidate may apply for admission to the Professional Program in Early Childhood Education.

For admission to the professional program, the candidate must:

1. meet the state basic skills testing requirement;
2. pass the USC Education and Economic Development Act Assessment;
3. achieve a minimum overall GPA of 2.75
4. achieve a GPA of 3.00 or higher and no grade lower than C on education courses and field experiences;
5. earn a grade of C or better in specific course work as required by the program area.

The Early Childhood Internship Admission Requirements
For admission to the internship semesters, the candidate must:

1. be admitted to the professional program;
2. achieve a minimum overall GPA of 2.75
3. achieve a GPA of 3.00 or higher in all education course work with no grade lower than C;
4. achieve a grade of C or better in specified course work as required by the program area and completed since entry into the professional program;
5. successfully complete criminal background check as required by the S.C. Department of Education by program deadline;
6. earn a grade of B or better in either EDEC 342P or EDEC 443 to meet the dispositions requirement for admission to Internship II. An action plan is required for students who make a grade of C or C+ in either EDEC 342P or EDEC 443;
7. Submit satisfactory work sample as required by the program area.

Elementary Education
The Department of Instruction and Teacher Education offers a program leading to a B.A. degree in elementary education. Students successfully completing all degree and certification requirements are eligible to apply for a professional credential to teach grades 2 through 6.

The Elementary Education Professional Program
Upon completion of 60 hours of course work, including courses specified by the program area, the candidate may apply for admission to the Professional Education Program in Elementary Education. For admission to the professional program the candidate must have:

1. successfully meet the state basic skills testing requirement;
2. pass the USC Education and Economic Development Act Assessment;
3. achieve a minimum overall GPA of 2.75
4. achieve a GPA of 3.00 or higher and no grade lower than C in education courses and field experiences;
5. grade of C or better in specific course work as required by the program area.

The Elementary Education Internship Admission Requirements
For admission to the senior internship semesters, the candidate must:

1. be admitted to the professional program;
2. achieve a minimum overall GPA of 2.75;
3. achieve a GPA of 3.00 or higher in all education course work;
4. achieve a grade of C or better in specific course work as required by the program area;
5. pass criminal background check as required by the S.C. Department of Education by program deadline.

In addition to the above, for admission to EDEL 490 a GPA of 3.00 or higher is required in EDEL 440, EDEL 450, EDEL 460, EDEL 471 and EDRD 431.

Middle Level Education
The Department of Teaching and Instruction offers a program leading to a B.A. or B.S. degree in middle level education. Students successfully completing certification requirements are eligible to apply for a professional credential to teach grades 5 through 8.

Students pursuing a B.A. degree will complete 27 hours in liberal arts and 14 hours in science and mathematics and complete concentrations in English and social studies. Students pursuing a B.S. degree will complete 24 hours in liberal arts and 19 hours in science and mathematics and complete concentrations in science and mathematics. Students completing English/mathematics, English/science, social studies/mathematics, or social studies/science concentrations can choose between pursuing a B.A. or B.S. degree.

The Middle Level Education Professional Program
Upon completion of 60 hours of course work, including the completion of the 9-semester-hour education core (EDTE 201, EDFI 300, and EDPY 401), the candidate may apply for admission to the Professional Education Program in Middle Level Education. For admission to the professional program the candidate must have:

1. successfully meet the state basic skills testing requirement;
2. pass the USC Education and Economic Development Act Assessment;
3. achieve a minimum overall GPA of 2.75
4. achieve a GPA of 3.00 or higher and no grade lower than C in education courses and field experiences;
5. grade of C or better in specific course work as required by the program area.

The Middle Level Internship Admission Requirements
For admission into EDML 598 Internship A in the Middle School, a candidate must:

1. be admitted to the professional program;
2. complete EDML 321;
3. earn a grade of C or better in specific course work as required by the program area;
4. achieve a GPA of 3.00 or higher in all education course work;
5. comply with criminal background check and health screening requirements.

For admission into EDML 599 Internship B in the Middle School, a candidate must:

1. complete EDTE 522;
2. earn a grade of C or better in specific course work as required by the program area;
3. complete four of the six courses in each of the two content areas.

Programs
- Early Childhood Education, B.A. (p. 353)
- Elementary Education, B.A. (p. 355)
- Middle Level Education, B.A. (p. 357)
- Middle Level Education, B.S. (p. 361)
- Secondary Education Mathematics Minor (p. 364)
Courses

EDCS 625 - Solving Practical Problems in School Curriculum (3 Credits)
An introduction to current and promising designs and approaches to curriculum development from grades K-12.

EDCS 690 - Independent Study (1-3 Credits)

EDEC 201 - Inquiry into Early Childhood Education (3 Credits)
Inquiry into the roles, programs, history, and culture trends in early childhood education.

EDEC 250 - Play and Early Learning (3 Credits)
Theory and practice related to children's play and early learning in family, community, and educational settings.

EDEC 336 - Culturally Relevant Pedagogy in Early Childhood Classrooms (3 Credits)
A study of the theoretical and practical foundations of effective teaching in diverse classroom environments. Ethnicity, gender, social class, religion and other issues are considered from multiple perspectives.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy; GLD: Global Learning

EDEC 340 - The Young Child: Development, Care and Education (Birth to 3 years) (3 Credits)
Infants' and toddlers' development and care from an ecological perspective. Assessment of children in various settings is emphasized.
Corequisite: EDEC 340P.

EDEC 340P - The Young Child: Development, Care and Education (Birth to 3 years) Practicum (1 Credit)
Practicum in infants' and toddlers' development and care observed and assessed from an ecological perspective. Includes service learning.
Corequisite: EDEC 340.

EDEC 342 - The Young Child: Development, Care and Education (3-8 years) (3 Credits)
Development of young children and its relationship to appropriate practice and curriculum with an emphasis on mathematics, science, and social studies.
Prerequisites: EDEC 340 and EDEC 340P.
Corequisite: EDEC 342P, EDEC 344, EDEC 347 and EDRD 345.

Graduation with Leadership Distinction: GLD: Research

EDEC 342P - The Young Child: Development, Care and Education (3-8 years) Practicum (3 Credits)
Practicum in development, assessment, and education of young children with an emphasis on mathematics, science, and social studies.
Prerequisites: EDEC 340 and 340P.
Corequisite: EDEC 342, EDEC 344, EDEC 347 and EDRD 345.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDEC 344 - Supporting Linguistic Pluralism Across Content Areas (3 Credits)
Introduction to issues, ideas, practices and policies in support of learning and teaching in multilingual classrooms, pre-K to grade 12 for undergraduate early childhood education majors. Early Childhood Majors Only.
Corequisite: EDEC 342, EDEC 342P, EDEC 347 and EDRD 345.

EDEC 347 - Community of Learners and Classroom Management in Early Childhood (3 Credits)
Methods of building a community of learners including child guidance and group management that foster the development of self-control and learning.
Corequisite: EDEC 342, EDEC 342P, EDEC 344 and EDRD 345.

EDEC 441 - Teaching Mathematics in Early Childhood (3 Credits)
Methods and materials in teaching and assessment in early childhood mathematics (pre-kindergarten-grade 3). Admission to Internship I.
Corequisite: EDEC 443.

EDEC 442 - Teaching Science in Early Childhood Education (3 Credits)
The study and practice of science education for pre-school and primary students focusing on appropriate content, goals and methods. Admission to internship in early childhood education.
Corequisite: EDEC 443.

EDEC 443 - Internship in Integrated Curriculum in Early Childhood Education (4 Credits)
Internship in developmentally and culturally appropriate content and pedagogy in language and literacy, mathematics, science, social studies, and fine arts for young children through grade 3. Admission to internship in early childhood education.
Corequisite: EDEC 441, EDEC 442 and EDRD 445.

EDEC 444 - Teaching Social Studies to Early Childhood Education (3 Credits)
The study and practice of Social Studies education for undergraduate majors in early childhood education. Early Childhood Majors Only.

EDEC 492 - Internship in Curriculum, Assessment, Teaching, and Professional Roles (9 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood) related to professional roles. Admission to the Professional Program in Early Childhood Education.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Experiential Learning: Experiential Learning Opportunity

EDEC 510 - Parent/Family Dynamics in Early Childhood Education (3 Credits)
Principles, practices, and content of family dynamics, including practicum/service learning.
Graduation with Leadership Distinction: GLD: Community Service

EDEC 540 - The Young Child: Behavior and Development in Early Childhood (3 Credits)
Service-learning and seminar experiences addressing intellectual, physical, social, and emotional development, prenatal through grade three, within an ecological context. Child's critical thinking, creative expression, and diagnosis/assessment emphasized.

EDEC 546 - Education of Young Children: An Ecological Approach (3 Credits)
An ecological study with emphasis on home-school relations, parent involvement, and community resources. Multicultural perspectives and needs of exceptional children addressed.
Corequisite: EDEC 469.

EDEC 547 - Field Problems: Teaching Mathematics Using Manipulative Materials, Grades K-3 (3 Credits)
Instructional approaches and materials for teaching elementary school mathematics, grades K-3.
EDEC 570 - Internship in Environments for Teaching and Learning (3 Credits)
Internship for practice in classrooms appropriate to early childhood education related to curriculum design and assessment. Admission to the professional program in early childhood education.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDEC 591 - Seminar on Teaching in Early Childhood (3 Credits)
Exploration of the principles and theories about teaching and learning as they apply to early childhood education in the context of schools in democratic societies.

Prerequisites: admission to internship in early childhood education.

Corequisite: EDTE 590A, EDTE 590B, and EDTE 590C.

Graduation with Leadership Distinction: GLD: Research

EDEC 608 - Parent Involvement in Early Childhood Education (3 Credits)
Analysis of programs and practices for involving parents in early childhood educational settings. Emphasizes objectives, methods, techniques, and materials for program development. Community resources for supporting programs for children in various instructional settings.

EDEC 690 - Independent Study (1-3 Credits)

EDEL 305 - Nature and Management of Elementary Classrooms (3 Credits)
The learning environment to include diversity of students, instructional materials, classroom management, and communication patterns.

Prerequisites: EDPY 401, EDTE 201.

EDEL 306 - Culturally Sustaining Pedagogy for the Elementary Classrooms (3 Credits)
Theoretical and pedagogical approaches to Culturally Sustaining Pedagogy (CSP)—curriculum design tools and instructional strategies that reflect the diversity of students’ cultural backgrounds and languages in elementary classrooms.

EDEL 399 - Independent Study (3-15 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

EDEL 405P - Practicum in Elementary Education (1 Credit)
Sequence of supervised field experiences in an assigned school setting.

Prerequisites: EDEL 301.

EDEL 440 - Elementary Mathematics Instruction (3 Credits)
Approaches, materials, and methods for teaching mathematics in elementary grades. Restricted to students in the BA program in elementary education.

Prerequisites: Admission to the professional program and MATH 221.

EDEL 441 - Introductory Elementary Internship (3 Credits)
Field experience requiring students to gradually assume the responsibilities of teaching in an assigned classroom under the guidance of an experienced teacher.

Corequisite: EEDR 430.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDEL 450 - Elementary Science Instruction (3 Credits)
Instructional approaches and methods for teaching science in elementary grades.

Prerequisites: Admission to the professional program.

EDEL 460 - Elementary Social Studies Instruction (3 Credits)
Instructional approaches, materials, and methods for teaching social studies in elementary grades. Restricted to students in the B.A. program in Elementary Education.

EDEL 470 - Directed Teaching in the Elementary and or Middle Schools (3 Credits)
Teaching and related experiences, including seminars and workshops. Admission to professional teacher certification program and completion of the elementary education core.

Prerequisites: EEDR 420.

EDEL 471 - Internship in Environments, Planning, and Motivation for Teaching and Learning (6 Credits)
Internship for practice in classrooms appropriate to elementary education related to curriculum design and assessment. Field experiences emphasize planning lessons that actively engage students in learning.

Prerequisites: Admission to the internship in elementary education.

EDEL 490 - Internship in Elementary Education (12 Credits)
Internship for practice in elementary classrooms (grades 2-6) related to curriculum design, assessment, interactive teaching, and professional roles.

Prerequisites: Admission to Internship II in Elementary Education.

Corequisite: EDEL 491.

Experiential Learning: Experiential Learning Opportunity

EDEL 490A - Internship in Curriculum and Assessment (4 Credits)
Internship for practice in elementary classrooms (grades 2-6) related to curriculum design and assessment.

Prerequisites: Admission to Internship II in Elementary Education.

Corequisite: EDEL 490B and EDEL 490C.

EDEL 490B - Internship in Teaching (4 Credits)
Internship for practice in elementary classrooms (grades 2-6) related to interactive teaching.

Prerequisites: Admission to Internship II in Elementary Education.

Corequisite: EDEL 490A and EDEL 490C.

EDEL 490C - Internship in Professional Roles (4 Credits)
Internship for practice in elementary classrooms (grade 2-6) related to professional roles.

Prerequisites: Admission to Internship II in Elementary Education.

Corequisite: EDEL 490A and EDEL 490B.

EDEL 491 - Seminar on Teaching (3 Credits)
Exploration of the principles and theories about teaching and learning as they apply to the field of practice in the context of schools in democratic societies.

Prerequisites: Admission to Internship in Elementary Education.

Corequisite: EDEL 490A, EDEL 490B, and EDEL 490C.
EDEL 505P - Inquiry Practicum: The Elementary School (1 Credit)
Identifying and understanding the various components of the elementary environment through the practice of inquiry through field-based experiences.
Corequisite: EDEL 305.

EDEL 506 - Integrated Curriculum in Elementary Schools (3 Credits)
Examining and practicing a variety of approaches that connect the content of different elementary school subjects.

EDEL 506P - Inquiry Practicum: Roles of Elementary Teachers (1 Credit)
Identifying and understanding the roles of elementary teachers through the practice of inquiry through field-based experiences.
Corequisite: EDEL 506.

EDEL 510 - Teaching Second Languages to Young Children (3 Credits)
To assist prospective teachers of young children in the development of a second language and multicultural learning activities. Practicum sessions are an integral part.
Prerequisites: 210 level of a foreign language or its equivalent.
Cross-listed course: FORL 510
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDEL 515 - Science in the Elementary School (3 Credits)
Reinforces the science background of prospective and practicing elementary teachers. Innovations are examined. Emphasis is placed on methods, materials, community resources, and evaluation procedures.

EDEL 544 - Modern Approaches to Mathematics Teaching (3 Credits)
Curriculum and pedagogy for mathematics topics taught in grades 3 through 8.

EDEL 548 - Field Problems: Teaching Mathematics Using Manipulative Materials, Grades 4-6 (3 Credits)
Instructional approaches and materials for teaching elementary school mathematics, grades 4-6. This course cannot be applied to a graduate degree in the elementary education program.

EDEL 560 - Social Studies in the Elementary/Middle School (3 Credits)
Fundamentals of social studies education in the elementary/middle school.

EDEL 570 - Internship in Environments for Teaching and Learning (3 Credits)
Internship for practice in classrooms appropriate to elementary education related to curriculum design and assessment.
Prerequisites: Admission to the internship in elementary education.

EDEL 571 - Internship in Planning and Motivation (3 Credits)
Field experience that emphasizes planning lessons that actively engage students in learning.
Prerequisites: Admission to the internship in elementary education.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDEL 642 - Teaching Mathematics to Young Children (3 Credits)
Analysis of a developmental approach to teaching children under the age of 9.

EDEL 645 - Diagnostic Teaching of Arithmetic (3 Credits)
Analysis of the concepts and skills of arithmetic in the school mathematics curriculum; exploration of diagnostic-prescriptive teaching methods.

EDEL 670 - Language Arts in the Elementary and Middle School (3 Credits)
Examine the content, goals, and methods of teaching language arts in elementary and middle school.

EDEL 690 - Independent Study (1-3 Credits)

EDML 321 - Middle Level Teaching and Management (3 Credits)
Overview of national trends in the middle school with an analysis of the relationship of early adolescent developmental characteristics to organization, curriculum, instruction, and teaching in the middle school level.

EDML 470 - Foundations in Reading (3 Credits)
Reading foundations, curriculum, and assessments for teaching young adolescents across academic disciplines.

EDML 471 - Middle Level Content Area Reading and Writing (3 Credits)
Examination of planning, implementation, and assessment of reading strategy instruction across disciplines and content areas in middle school classrooms. Restricted to: teacher candidates enrolled in the middle level degree program.

EDML 553 - Methods and Materials for Teaching Science in the Middle Grades (3 Credits)
A study of methods, techniques, and materials of instruction appropriate to science teaching in the middle school.

EDML 563 - Methods and Materials for Teaching Social Studies in the Middle School (3 Credits)
A study of goals, content, methods, and materials of instruction in middle school social studies.

EDML 572 - Middle Level Literacy Assessment (3 Credits)
Introduces literacy assessment for individual and small groups or middle level students.

EDML 573 - Methods and Materials for Teaching English/Language Arts in the Middle Grades (3 Credits)
Introduces goals, content, and methods of teaching language arts at the middle level.

EDML 583 - Methods and Materials for Teaching Mathematics in the Middle Grades (3 Credits)
A study of methods, techniques, and materials of instruction appropriate to mathematics teaching in the middle school.

EDML 598 - Internship A in the Middle School (3 Credits)
Application of effective teaching techniques and organization of instructional settings for middle school students.
Prerequisites: admission to internship in middle level program.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
EDML 599 - Internship B in the Middle School (12 Credits)
Application of effective teaching techniques and organization of instructional settings for middle school students.
Prerequisites: B or better in EDML 598.
Corequisite: EDSE 584.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

EDRD 345 - Teaching Reading in Early Childhood Education I (3 Credits)
Theory and practice in the teaching of reading for children from birth through age eight for undergraduate majors in early childhood.
Prerequisites: Admission to the professional program in Early Childhood Education.
Corequisite: EDEC 342, EDEC 342P, EDEC 344 and EDEC 347.

EDRD 399 - Independent Study (3-15 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

EDRD 430 - Elementary Literacy Instruction I (6 Credits)
Examination and implementation of the key concepts, content, goals, and strategies in teaching reading and the language arts in the elementary school. Students will work with elementary children in a school setting to learn literacy concepts and instructional strategies. Admission to the B.A. program in elementary education, children's literature course. Designated for undergraduate students seeking initial certification.

EDRD 431 - Reading Assessment (3 Credits)
Seminar and supervised one-on-one field experience focused on reading assessment of and instruction for individual children and groups of children. Restricted to: Undergraduate students pursuing teacher certification.
Prerequisites: admission to the professional program.

EDRD 445 - Teaching Writing in Early Childhood Education (3 Credits)
Theory and practice in the teaching of writing for children from birth through age eight. For undergraduate majors in early childhood education including literacy practicum. Restricted to: Early Childhood Education Majors.
Prerequisites: EDRD 345.
Corequisite: EDEC 443.

EDRD 500 - Content Area Literacy PK-12 (3 Credits)
A survey of research and practice which facilitates students' literacy skills in the content areas. For K-12 content area teachers of art, dance, physical education, foreign language, music and theatre.

EDRD 511 - Teaching Reading to Adults I (3 Credits)
Diagnostic and prescriptive modes of teaching reading to adults, based on the physical, psychological, intellectual, and social characteristics of the adult learner.

EDRD 512 - Teaching Reading to Adults II (3 Credits)
Preparation of materials for teaching basic reading skills to adults and practicum experiences in teaching adults to read.
Prerequisites: EDCO 511 or EDRD 511.

EDRD 514 - Teaching of Reading in the Elementary School (3 Credits)
Study of the various phases of reading in their relation to a modern program of education and the place of reading in the curriculum. Emphasis on modern practices in the classroom teaching of reading.

EDRD 518 - Reading in the Secondary School (3 Credits)
The place of reading instruction in high schools, the programming of special services in reading instruction, methods of teaching basic and developmental reading skills, and case studies of programs. Demonstrations of tests and devices.

EDRD 600 - Foundations of Reading Instruction (3 Credits)
An overview of reading and its curriculum implications: grades K-12 and adults. Emphasis is placed on current trends and issues and related methodologies.

EDRD 650 - Teaching Reading Through A Literature Emphasis (3 Credits)
Integrating appropriate literature into traditional and alternative reading programs. Identifying appropriate literature for classroom use and recreational reading. Use of literature as a means of developing and reinforcing reading skills.

EDRD 651 - Introduction to Teaching Media Literacy (3 Credits)
A survey of analysis of electronic and non-print media themes and messages aimed at youth, with special emphasis on design and implementation of curricula for enhancing children's media literacy.

EDRD 690 - Independent Study (1-3 Credits)

EDSE 110 - Introduction to Careers in Education (3 Credits)
An individualized survey of careers in education, utilizing practica, seminars, and input from various disciplines to focus on personal and professional development. Pass-fail credit.

EDSE 111 - Practicum in Education (1 Credit)
A sequence of supervised practica in various educational settings. Seminars and group discussions included.

EDSE 210 - Practicum in Education (1 Credit)
A sequence of supervised practica in various educational settings. Seminars and group discussions included.

EDSE 310 - Practicum in Education (1 Credit)
A sequence of supervised practica in various educational settings. Seminars and group discussions included.

EDSE 311 - Practicum in Education (1 Credit)
A sequence of supervised practica in various educational settings. Seminars and group discussions included.

EDSE 312 - Practicum in Education (1 Credit)
A sequence of supervised practica in various educational settings. Seminars and group discussions included.

EDSE 399 - Independent Study (3-15 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

EDSE 410 - Practicum in Education (1 Credit)
A sequence of supervised practica in various educational settings. Seminars and group discussions included.

EDSE 446 - Secondary School Curriculum (3 Credits)
The organization, historical context, foundations for curriculum development, process of curriculum planning, design of the curriculum, and strategy of curriculum change in the secondary school. A laboratory experience in teaching media is included. Open only to juniors and seniors or graduates completing certification requirements.
EDSE 472 - Directed Teaching in High School (Business Education) (12 Credits)
ACAF 2.03: 07/05/2019.

EDSE 473 - Directed Teaching in High School (English) (12 Credits)

EDSE 475 - Directed Teaching in High School (History and Social Studies) (12 Credits)

EDSE 480 - Directed Teaching in High School (Distributive Education) (12 Credits)

EDSE 481 - Directed Teaching in High School (Science) (12 Credits)

EDSE 482 - Directed Teaching in High School (Health) (12 Credits)

EDSE 483 - Directed Teaching in High School (Theatre and Speech) (12 Credits)

EDSE 484 - Secondary Student Teaching Seminar (3 Credits)
Classroom management, discipline, legal responsibilities, multicultural perspectives, and needs of exceptional children.

EDSE 500 - Equity and Community Engagement (3 Credits)
Field-based inquiry into theories of critical multicultural education, culturally relevant and equity pedagogies with an emphasis on middle/high school students and engaging parents and the larger school community.

EDSE 502 - Teachers and Teaching (3 Credits)
Teaching as reflective and ethical practice. Professional standards, teacher leadership and school change, and various roles of professional educators.

EDSE 505 - Source Materials for Geographic Instruction (3 Credits)
Introduction to selected materials available for all levels of instruction in geography. Emphasis on the substantive nature of the materials.
Cross-listed course: GEOG 560

EDSE 508 - Teaching Middle and High School (Business Education) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school business education. 03: 07/05/2019.

EDSE 528 - Study of the Teaching of Business Education in the Secondary School (3 Credits)
Teaching techniques and methodology related to the business education curriculum, emerging technology and software. 03: 07/05/2019.

EDSE 547 - Teaching Middle and High School (English) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school English.
Prerequisites: Admission to MAT program for graduate students; EDSE 402 for undergraduate students.

EDSE 548 - Earth Science for Teachers I (3 Credits)
Origin, internal structure and internal processes of the earth, including plate tectonics, earthquakes, volcanoes, and mountain building. Required field trips, two lectures, and three lab hours per week. Cannot be used in MS or PhD programs in geology.
Cross-listed course: GEOL 540

EDSE 549 - Earth Science for Teachers II (3 Credits)
Surface processes acting on the earth; introduction to weather and climate, weathering, erosion, and sedimentary processes; land form evolution; ocean currents and tides, near-shore geologic processes. Required field trips, two lecture, and three lab hours per week. Cannot be used in MS or PhD programs in geology.
Prerequisites: EDSE 548/GEOL 540.
Cross-listed course: GEOL 541

EDSE 550 - Teaching Middle and High School (Mathematics) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school mathematics.

EDSE 551 - Teaching Middle and High School (Health) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school health.

EDSE 552 - Teaching Middle and High School (Marketing Education) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school marketing education.

EDSE 553 - Teaching Middle and High School (Science) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school science.

EDSE 554 - Teaching Middle and High School (Theatre and Speech) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school theatre and speech.

EDSE 558 - Teaching Middle and High School (History and Social Studies) (3 Credits)
A study of methods, techniques, and materials of instruction in middle and high school history and social studies.

EDSE 575 - Teaching Foreign Languages in Secondary Schools (3 Credits)
Current methods, techniques, and materials of instruction appropriate for secondary schools.
Cross-listed course: FORL 511

EDSE 580 - Teaching Advanced Latin in Secondary School (3 Credits)
Methods and materials for teaching the Latin Advanced Placement courses in secondary school.
Corequisite: LATN 580.

EDSE 584 - Middle and High School Internship Seminar (3 Credits)
Classroom management, service learning, legal/professional responsibilities, multicultural perspectives and needs of exceptional children.
Corequisite: Internship II.

EDSE 585 - Secondary Internship Seminar I (1 Credit)
Integration of content, pedagogy, and disposition knowledge learned during coursework with Internship I field experiences.
Corequisite: Students must be enrolled in the Internship I field experiences.

EDSE 586 - Secondary Internship Seminar II (2 Credits)
Integration of content, pedagogy, and disposition knowledge learned during coursework with Internship II field experiences.
Corequisite: Students must be enrolled in the Internship II field experiences.

EDSE 660 - Teaching Mathematics with Manipulatives, Grades 7-12 (3 Credits)
Methods and materials for using manipulative devices to teach middle and high school level mathematics.

EDSE 670 - Graphics Calculators in High School Mathematics (3 Credits)
Methods and materials for using graphics calculators to teach algebra, elementary functions, and analytic geometry.

EDSE 690 - Independent Study (1-3 Credits)
EDTE 101 - Introduction to Careers in Education (2 Credits)
A survey of professional issues and concerns in education.

EDTE 101P - Practicum in Careers in Education (1 Credit)
Seminars and visits to schools and classrooms.
Prerequisite or Corequisite: EDTE 101.

EDTE 201 - Issues and Trends in Teaching and Learning (3 Credits)
Introduces and examines current issues and trends in teaching and learning.

EDTE 202 - Global Citizenship and Social Responsibility through Education (3 Credits)
Examining the continuing evolution of education and the direct impact on the development of social responsibility, values, and our place as global citizens.
Carolina Core: GSS, VSR

EDTE 218 - Convergence and Divergence in African American and Jewish Relations: Historical and Contemporary (3 Credits)
An examination of African American and Jewish American inter-ethnic, historical and contemporary connections and disconnections. Implications for educational, social, and social settings are considered.
Cross-listed course: AFAM 218, JSTU 218
Carolina Core: GSS, VSR

EDTE 400 - Learning Through Community Service (1 Credit)
Documentation and synthesis of community service activities designed to prepare professional educators.
Corequisite: EDFN 300 and enrollment in an approved community experience.

Graduation with Leadership Distinction: GLD: Community Service

EDTE 448 - Teaching Internship in Foreign Languages (3 Credits)
Application of effective teaching techniques and organization of instructional settings in foreign languages for K-12.
Prerequisite or Corequisite: admission to the professional program of education.
Cross-listed course: FORL 448
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships
Experiential Learning: Experiential Learning Opportunity

EDTE 474 - Directed Teaching in Foreign Languages (15 Credits)
Students apply methods of curriculum and assessment, professionalism, effective teaching, and organization of instructional settings during internship in foreign language classrooms.
Prerequisites: admission to the professional program of education.
Cross-listed course: FORL 474
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
Experiential Learning: Experiential Learning Opportunity

EDTE 522 - Integrated Curriculum at the Middle Level (3 Credits)
Constructing, teaching, and assessing an integrated curriculum for students in middle schools. Upper level undergraduate students exploring middle level education.

EDTE 590A - Internship in Curriculum and Assessment (3 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood or elementary) related to curriculum design and assessment.
Prerequisites: admission to internship II in early childhood or elementary education.
Corequisite: EDTE 590B and EDTE 590C.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDTE 590B - Internship in Teaching (3 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood or elementary) related to interactive teaching.
Prerequisites: admission to internship II in early childhood or elementary education.
Corequisite: EDTE 590A and EDTE 590C.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDTE 590C - Internship in Professional Roles (3 Credits)
Internship for practice in classrooms appropriate to the level of certification sought (early childhood or elementary) related to professional roles.
Prerequisites: admission to internship II in early childhood or elementary education.
Corequisite: EDTE 590A and EDTE 590B.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

EDTE 600 - Systematic Effective Teaching (3 Credits)
Application of research-supported effective teaching techniques to the teaching-learning process, including demonstration lessons, observations, and supervisory conferences.

EDTE 605 - Cooperative/Team Learning in Education (3 Credits)
Instructional approaches, materials, and procedures for utilizing cooperative/team learning in education.

EDTE 610 - Integrated Reading and Writing Instruction (3 Credits)
Theoretical bases and techniques for teaching reading and writing in the elementary school, using multiple subject areas.

EDTE 611 - Whole Language: Concepts and Practices (3 Credits)
Development of concepts, materials, and practices to implement a whole language philosophy.

EDTE 620 - Restructuring Schools: Teachers and Classrooms (3 Credits)
Examination of issues related to restructuring schools based on different assumptions about teaching, learning, and assessment.

EDTE 621 - Middle Level School Today (3 Credits)
National trends in the middle level school; emphasis on the relationship of early adolescent developmental characteristics to organization, curriculum, instruction, and teaching.

EDTE 625 - Integrating Character Education into Instructional Programs (3 Credits)
Rationale, processes, and methodologies for integrating character education into school or school district instructional programs.
EDTE 626 - Service Learning for Schools, Community, and Workplace Responsibility (3 Credits)
Assist school personnel in designing academic, personal, civic, and workplace responsibility.

EDTE 631 - Technology to Support Instruction (3 Credits)
Introduction to computers, educational technology, and selected applications for instructional management.

EDTE 671 - Computers in Science Education (3 Credits)
Use of computer technology in teaching and managing science classes and problems in grades K-12.

**Early Childhood Education, B.A.**

This program is designed for undergraduate students at the University of South Carolina who are interested in a career as an early childhood teacher, serving children birth through age 8. Students who successfully complete the degree and licensure requirements and have a positive recommendation by the faculty will be recommended for teacher certification for prekindergarten through grade 3.

**Learning Outcome**

Students who graduate with a B.A. in Early Childhood Education should be able to ...

- Effectively measure candidate performance and program effectiveness using methods that align with the Specialized Professional Association (SPA) or College of Education standards.

**Admissions**

**Admission to the Professional Program**

All University teacher education students must apply and be admitted to Professional Program/Internship at mid-point(s) in their programs prior to final internship (i.e. student teaching). Requirements for admission vary by program, but for undergraduate students include 60 credit hours with a minimum overall GPA of 2.75, successful completion of a state-approved basic skills examination, and courses as specified by program area.

Students should contact their program area or the College of Education Office of Student Affairs for specific requirements and application deadlines.

**Degree Requirements (122 hours)**

See College of Education (p. 340) for certification requirements and other academic opportunities.

**Program of Study**

**1. Carolina Core Requirements (31-43 hours)**

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
Must be passed with a grade of C or higher.

ARP – Analytical Reasoning and Problem Solving (6-8 hours)
- any CC-ARP courses (p. 742)

SCI – Scientific Literacy (7-8 hours)
- BIOL 110
- BIOL 120 & BIOL 120L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- Choose one of the following:
  - HIST 111
  - HIST 112

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- Choose one of the following:
  - GEOG 121
  - GEOG 210

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)
- any overlay or stand-alone CC-CMS course (p. 742)
INF – Information Literacy 1 (0-3 hours)
  
• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
  
• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible

Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (0 hours)

No college-required courses for this program.

3. Program Requirements (18-21 hours)

Supporting Courses (18 hours)

• A course in culture other than Western European (3 hours)
• The following courses must be passed with a grade of C or higher (15 hours):

Total Credit Hours 15

Minor (0-18 hours) optional

A student may choose to complete a minor consisting of 18 credit hours of prescribed courses. The minor is intended to develop a coherent basic preparation in a second area of study. Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or better.

Electives (0-3 hours)

The number of elective hours required depends upon the number of hours used to fulfill other degree requirements. Minimum degree requirements must equal 122 hours.

4. Major Requirements (70 hours)

A minimum grade of C is required in all major courses.

Education Core (14 hours)

Note: A grade of B or better in either EDEC 342P or EDEC 443 is required to meet the dispositions requirement for admission to Internship II. Students making below a grade of B in both these courses are not eligible to progress. An action plan is required for students who make a grade of C or C+ in either EDEC 342P or EDEC 443.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Early Childhood Education, B.A.

Elementary Education, B.A.

Learning Outcome
Students who graduate with a B.A. in Elementary Education should be able to ...

- Know, understand, and use the major concepts, principles, theories, and research related to development of children and young adolescents to construct learning opportunities that support individual students’ development, acquisition of knowledge, and motivation.
- Demonstrate a high level of competence in use of English language arts and they know, understand, and use concepts from reading, language and child development, to teach reading, writing, speaking, viewing, listening, and thinking skills and to help students successfully apply their developing skills to many different situations, materials, and ideas.
- Know, understand, and use fundamental concepts of physical, life, and earth/space sciences. Candidates can design and implement age-appropriate inquiry lessons to teach science, to build student understanding for personal and social applications, and to convey the nature of science.
- Know, understand, and use the major concepts and procedures that define number and operations, algebra, geometry, measurement, and data analysis and probability. In doing so they consistently engage problem solving, reasoning and proof, communication, connections, and representation.
- Know, understand, and use the major concepts and modes of inquiry from the social studies-the integrated study of history, geography, the social sciences, and other related areas-to promote elementary students’ abilities to make informed decisions as citizens of a culturally diverse democratic society and interdependent world.
- Know, understand, and use as appropriate to their own understanding and skills-the content, functions, and achievements of the performing arts (dance, music, theater) and the visual arts as primary media for communication, inquiry, and engagement among elementary students.

- Know, understand, and use the major concepts in the subject matter of health education to create opportunities for student development and practice of skills that contribute to good health.
- Know, understand, and use as appropriate to their own understanding and skills-human movement and physical activity as central elements to foster active, healthy life styles and enhanced quality of life for elementary students.
- Plan and implement instruction based on knowledge of students, learning theory, connections across the curriculum, curricular goals, and community.
- Understand how elementary students differ in their development and approaches to learning, and create instructional opportunities that are adapted to diverse students.
- Understand and use a variety of teaching strategies that encourage elementary students’ development of critical thinking and problem solving.
- Use their knowledge and understanding of individual and group motivation and behavior among students at the K-6 level to foster active engagement in learning, self motivation, and positive social interaction and to create supportive learning environments.
- Use their knowledge and understanding of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the elementary classroom.
- Know, understand, and use formal and informal assessment strategies to plan, evaluate and strengthen instruction that will promote continuous intellectual, social, emotional, and physical development of each elementary student.
- Be aware of and reflect on their practice in light of research on teaching, professional ethics, and resources available for professional learning; they continually evaluate the effects of their professional decisions and actions on students, families and other professionals in the learning community and actively seek out opportunities to grow professionally.
- Know the importance of establishing and maintaining a positive collaborative relationship with families, school colleagues, and agencies in the larger community to promote the intellectual, social, emotional, physical growth and well-being of children.

Admissions
Admission to the Professional Program
All University teacher education students must apply and be admitted to Professional Program/Internship at mid-point(s) in their programs prior to final internship (i.e. student teaching). Requirements for admission vary by program, but for undergraduate students include 60 credit hours with a minimum overall GPA of 2.75, successful completion of a state-approved basic skills examination, and courses as specified by program area.

Students should contact their program area or the College of Education Office of Student Affairs for specific requirements and application deadlines.

Degree Requirements (120 hours)
See College of Education (p. 340) for certification requirements and other academic opportunities.
### Program of Study

<table>

</tr>
<tr>
<td>3. Program Requirements</td>
<td>24-27</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>62</td>
</tr>
</tbody>
</table>

#### 1. Carolina Core Requirements (31-43 hours)

**CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)**

- must be passed with a grade of C or higher
  - any CC-CMW courses (p. 742)

**ARP – Analytical Reasoning and Problem Solving (6-8 hours)**

- any CC-ARP courses (p. 742)

**SCI – Scientific Literacy (7-8 hours)**

Select from two different categories below.

- **Life Science** from the following (3-4 hours):
  - BIOL 110
  - BIOL 120 & BIOL 120L

- **Physical Science** from the following (3-4 hours):
  - CHEM 105

- **Earth Science** from the following (3-4 hours):
  - ENVR 101 & ENVR 101L
  - ENVR 200
  - GEOL 101
  - GEOL 103
  - MSCI 210 & MSCI 210L
  - MSCI 215 & MSCI 215L

**GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)**

- CC-GFL courses (p. 742)

**GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)**

- Choose one of the following:
  - HIST 111
  - HIST 112

**GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)**

- Choose one of the following:
  - POLI 101
  - POLI 201

**AIU – Aesthetic and Interpretive Understanding (3 hours)**

- any CC-AIU course (p. 742)

**CMS – Effective, Engaged, and Persuasive Communication: Spoken Component (0-3 hours)**

- any overlay or stand-alone CC-CMS course (p. 742)

**INF – Information Literacy (0-3 hours)**

- any overlay or stand-alone CC-INF course (p. 742)

**VSR – Values, Ethics, and Social Responsibility (0-3 hours)**

- any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

#### 2. College Requirements (0 hours)

No college-required courses for this program.

#### 3. Program Requirements (24-27 hours)

**Supporting Courses (24-25 hours)**

Complete 3-4 hours from the category below that was not used to fulfill CC-SCI (for a total of 10 hours in sciences, including the courses chosen to fulfill CC-SCI).

Total Credit Hours 24-25

Minor (0-18 hours) optional

A student may choose to complete a minor consisting of 18 credit hours of prescribed courses. The minor is intended to develop a coherent basic preparation in a second area of study. Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or better.

Electives (0-3 hours)

The number of elective hours required depends upon the number of hours used to fulfill other degree requirements. Minimum degree requirements must equal 120 hours.

4. Major Requirements (62 hours)

Achieve a GPA of 3.00 or higher in all education course work; a minimum grade of C is required in all major courses.

Note: For admission to EDEL 490, a GPA of 3.00 or higher is required in EDEL 440, EDEL 450, EDEL 460, and EDEL 471.

Major Map

A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Middle Level Education, B.A.

Learning Outcomes

Students who graduate with a B.A. in Middle Level Education should be able to...

• understand the major concepts, principles, theories, and research related to young adolescent development, and they provide opportunities that support student development and learning.
• understand the major concepts, principles, theories, and research underlying the philosophical foundations of developmentally responsive middle level programs and schools, and they work successfully within these organizational components.
• understand the major concepts, principles, theories, standards, and research related to middle level curriculum and assessment, and they use this knowledge in their practice.
• understand and use the central concepts, tools of inquiry, standards, and structures of content in their chosen teaching fields, and they create meaningful learning experiences that develop all young adolescents’ competence in subject matter and skills.
• understand and use the major concepts, principles, theories, and research related to effective instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of all young adolescents.
• understand the major concepts, principles, theories, and research related to working collaboratively with family and community members, and they use that knowledge to maximize the learning of all young adolescents.
• understand the complexity of teaching young adolescents, and they engage in practices and behaviors that develop their competence as professionals.

Admissions
Admission to the Professional Program
All University teacher education students must apply and be admitted to Professional Program/Internship at mid-point(s) in their programs prior to final internship (i.e. student teaching). Requirements for admission vary by program, but for undergraduate students include 60 credit hours with a minimum overall GPA of 2.75, successful completion of a state-approved basic skills examination, and courses as specified by program area.

Students should contact their program area or the College of Education Office of Student Affairs for specific requirements and application deadlines.

Degree Requirements (122-124 hours)
See College of Education (p. 340) for certification requirements and other academic opportunities.

Total Credit Hours 49

Concentrations (36-41 hours)

Must be in addition to courses taken to meet Carolina Core requirements.

Specialization is required in two different content areas, chosen from:

- English
- Mathematics
- Science
- Social Studies

Students pursuing a B.A. degree cannot choose the Math/Science combination.

Specialization A (18-23 hours)
To be completed with courses listed below and approved by College of Education advisor in English, mathematics, science, or social studies.

Specialization B (18-23 hours)
To be completed with courses listed below and approved by College of Education advisor in English, mathematics, science, or social studies and different from Specialization A.
### Social Studies Specialization (18 hours)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 101</td>
<td>European Civilization from Ancient Times to the Mid-17th Century</td>

<td>United States History since 1865</td>
<td></td>
</tr>
<tr>
<td>GEOG 561</td>
<td>Contemporary Issues in Geography Education</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

- HIST 409 The History of South Carolina, 1670-1865
- HIST 410 History of South Carolina Since 1865
- HIST 442 The Old South
- SOST 301 Introduction to Southern Studies 1580-1900

Select one of the following:

- Additional 300-level HIST
- ANTH 219 Great Discoveries in Archaeology
- ANTH 327 Prehistoric Civilizations of the New World
- ANTH 331 Mesoamerican Prehistory
- ANTH 328 Ancient Civilizations
- ECON 224 Introduction to Economics

### Mathematics Specialization (18-20 hours)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 603</td>
<td>Inquiry Approach to Algebra</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 142</td>
<td>Calculus II</td>

</tr>
<tr>
<td>STAT 201</td>
<td>Elementary Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 401</td>
<td>Conceptual History of Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 241</td>
<td>Vector Calculus</td>
<td></td>
</tr>
</tbody>
</table>

Select two additional courses from the following OR three courses if

- STAT 201 was used to fulfill the Carolina Core ARP requirement:

  - MATH 141 Calculus I (if not used for Carolina Core requirement)
  - MATH 142 Calculus II (if not used above)
  - MATH 241 Vector Calculus (if not used above)
  - MATH 170 Finite Mathematics
  - or MATH 174 Discrete Mathematics for Computer Science
  - MATH 511 Probability
  - MATH 544 Linear Algebra
  - MATH 546 Algebraic Structures I
  - MATH 574 Discrete Mathematics I
  - MATH 580 Elementary Number Theory
  - STAT 506 Introduction to Experimental Design
  - STAT 515 Statistical Methods I
  - STAT 516 Statistical Methods II

### Science Specialization (18-23 hours)

Select two courses from each of the following sciences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 200</td>
<td>Plant Science</td>

Learning Outcomes
Students who graduate with a B.S. in Middle Level Education should be able to ...

• understand the major concepts, principles, theories, and research related to young adolescent development, and they provide opportunities that support student development and learning.
• understand the major concepts, principles, theories, and research underlying the philosophical foundations of developmentally responsive middle level programs and schools, and they work successfully within these organizational components.
• understand the major concepts, principles, theories, standards, and research related to middle level curriculum and assessment, and they use this knowledge in their practice.
• understand and use the central concepts, tools of inquiry, standards, and structures of content in their chosen teaching fields, and they create meaningful learning experiences that develop all young adolescents’ competence in subject matter and skills.
• understand and use the major concepts, principles, theories, and research related to effective instruction and assessment, and they employ a variety of strategies for a developmentally appropriate climate to meet the varying abilities and learning styles of all young adolescents.
• understand the complexity of teaching young adolescents, and they engage in practices and behaviors that develop their competence as professionals.

Admissions
Admission to the Professional Program
All University teacher education students must apply and be admitted to Professional Program/Internship at mid-point(s) in their programs prior to final internship (i.e. student teaching). Requirements for admission vary by program, but for undergraduate students include 60 credit hours with a minimum overall GPA of 2.75, successful completion of a state-approved basic skills examination, and courses as specified by program area.

Students should contact their program area or the College of Education Office of Student Affairs for specific requirements and application deadlines.

Degree Requirements (122-124 hours)
See College of Education (p. 340) for certification requirements and other academic opportunities.

Program of Study

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Carolina Core</td>
<td>31-44</td>
</tr>
<tr>
<td>2. College Requirements</td>
<td>0</td>
</tr>
<tr>
<td>3. Program Requirements</td>
<td>3-6</td>
</tr>
<tr>
<td>4. Major Requirements</td>
<td>85-90</td>
</tr>
</tbody>
</table>

1. Carolina Core Requirements (31-43 hours)
CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
must be passed with a grade of C or higher

• any CC-CMW course (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-7 hours)

• MATH 122 or MATH 141
• STAT 201

SCI – Scientific Literacy (7 hours)

• any two CC-SCI courses (p. 742) (one must include a lab)

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
To meet the GFL requirement, students in the BS in Middle Level Education complete the Carolina Core approved courses in Foreign Language (GFL) or by achieving a score of 2 or better on a USC foreign language placement test.

• CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component ¹ (0-3 hours)

• any overlay or stand-alone CC-CMS (p. 742) course

INF – Information Literacy ¹ (0-3 hours)

• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility ¹ (0-3 hours)

• any overlay or stand-alone CC-VSR course (p. 742)
Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (0 hours)
No college-required courses for this program.

3. Program Requirements (3-6 hours)
Supporting Courses (3 hours)
- Select an additional Carolina Core-approved SCI course

Minor (18 hours) optional
A student may choose to complete a minor consisting of 18 credit hours of prescribed courses. The minor is intended to develop a coherent basic preparation in a second area of study. Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or better.

Electives (0-3 hours)
The number of elective hours required depends upon the number of hours used to fulfill other degree requirements. Minimum degree requirements must equal 122 hours.

4. Major Requirements (85-90 hours)
A minimum grade of C is required in all major requirements, including all major and concentration courses.

Major Courses (49 hours)
A minimum grade of C is required in all major courses.

Total Credit Hours 49

Concentrations (36-41 hours)
Must be in addition to courses taken to meet Carolina Core requirements.
Specialization is required in two different content areas, chosen from:
- English
- Mathematics
- Science
- Social Studies

Students pursuing a B.S. degree cannot choose the English/Social Studies combination.

Specialization A (18-23 hours)
To be completed with courses listed below and approved by College of Education advisor in English, mathematics, science, or social studies.

Specialization B (18-23 hours)
To be completed with courses listed below and approved by College of Education advisor in English, mathematics, science, or social studies and different from Specialization A.

English Specialization (18 hours)

<td>Continental Drift and Ice Ages</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 18-23

1 Cannot be used if GEOL 103 used to fulfill Carolina Core.

**Major Map**
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

**Middle Level Education, B.S. Mathematics & English Concentration**

**Middle Level Education, B.S. Mathematics & Science Concentration**

**Middle Level Education, B.S. Mathematics & Social Studies Concentration**

**Middle Level Education, B.S. Science & English Concentration**

**Middle Level Education, B.S. Science & Social Studies Concentration**

**Secondary Education Mathematics Minor**
The Secondary Education Mathematics Minor is designed to prepare students in quantitatively oriented majors (outside of Mathematics) for the "fifth-year" Secondary Education Master of Teaching (M.T.) program. Completion of the Minor does not guarantee admission into the M.T. program. Contact the Office of Student Affairs in the College of Education for information on the M.T., its admission requirements, and possible additional course work requirements for some majors.

**Prerequisites Courses**

1 MATH 554 has an additional pre-requisite beyond the required courses for the minor.

**Physical Education**
Department Website (http://www.ed.sc.edu/PHYSED/)

Linda Nigles, Chair

The Department of Physical Education offers a B.S. degree in physical education and a minor in school athletic coaching.

**Admission to Professional Programs**
Students must be formally admitted to the professional programs in teacher certification. Specific requirements are listed below.

**Teacher Certification**
The teacher certification program is an CAEP-approved program that prepares people to teach physical education and coach in public and private schools from grades K to 12. The requirements for acceptance into the professional program in teacher certification include a minimum 2.75 overall GPA, a passing score on the South Carolina required basic skills assessment, a passing score on the Educational and Economic Development Act (EEDA) assessment, a minimum of 60 credit hours, and a C or better in EDFI 300, EDPY 401, PEDU 570, ENGL 101, and ENGL 102.

For a complete listing and description of all program requirements, please refer to the USC Department of Physical Education Student Handbook.

**Transfer admission into degree programs in the Department of Physical Education**

**Physical Education Teacher Certification**
1. Students from regionally accredited colleges and universities must have a minimum overall cumulative GPA of 2.50 (on a 4.00 scale) to enter preprofessional programs in physical education. Note: To be eligible to take upper level Physical Education coursework and for progression into the Professional Program in Education, students must achieve a minimum 2.75 overall GPA.

2. A grade of C or better must be earned on all courses listed for admission to the professional program in physical education.

3. Students may not transfer credit for any course which carries a grade less than C.

**Progression Requirements**
A student in physical education must earn a C or better in all major course work, including major and minor emphases, education courses, required sciences, analytical reasoning option, and ENGL 101 and ENGL 102.
Students may attempt to earn a satisfactory grade in a major course no more than two times. Only if a valid case for taking the course a third time is established will such be allowed. Validity of a case will be determined by departmental review of a formal petition. Completion of remedial course work may be required.

Standards for general eligibility to continue in the University are described in the bulletin. The Department of Physical Education has additional standards.

**Teacher Certification in Physical Education**

1. If the semester, yearly, or cumulative grade point average of a student is below 2.75, the student will receive notification in writing from the department of the GPA jeopardy.
2. If a student has two consecutive semesters of grade point averages below 2.75 and a cumulative grade point average below 2.75, the student will be suspended from academic programs in the Department of Physical Education.
3. To be reinstated the student must achieve an overall grade point average of 2.75 and have the endorsement of the Department of Physical Education.

**Programs**

- Physical Education (Athletic Coaching) Minor (p. 369)
- Physical Education, B.S.P.E. (p. 370)

**Courses**

**PEDU 100 - Contemporary Physical Activity (1 Credit)**
Development of skills in an identified area. Course content will vary and be announced by title. May be repeated as topics vary.

**PEDU 101 - Self-Defense For Women (1 Credit)**
Basic knowledge and understanding of the culture and context in which interpersonal violence occurs, the root causes and patterns of behavior within violent relationships, self defense against forcible attacks, making immediate decisions when confronted with an assault, and the procedures necessary after an assault has occurred.

**PEDU 102 - Contemporary Physical Activity (1-3 Credits)**
Course contact will vary and be announced by title. May be repeated as topics vary.

**PEDU 103 - Jogging (1 Credit)**
Exercise, lectures, and self-evaluation for weight control and fitness improvement.

**PEDU 104 - Personal Fitness and Weight Control (1 Credit)**
Advanced techniques for controlling weight and improving fitness through exercise, lectures, and self-evaluation.

**PEDU 105 - Weight Training (1 Credit)**
Fundamentals of progressive resistance exercise training.

**PEDU 106 - Advanced Weight Training (1 Credit)**
Advanced techniques. **Prerequisites:** PEDU 105.

**PEDU 107 - Group Exercise (1 Credit)**
Cardio-respiratory fitness, flexibility, muscular strength and endurance, and agility through various group exercise formats while utilizing a variety of equipment.

**PEDU 108 - Fitness Swimming (1 Credit)**
Individualized physical conditioning through lap swimming and aquatic calisthenics, games, and activities. **Prerequisites:** PEDU 140.

**PEDU 109 - ROTC Conditioning (1 Credit)**
Exercise testing, technique, and leadership, program design and implementation, nutrition, individual and team competitions, and other forms of training.

**PEDU 110 - Orientation to Physical Education (1 Credit)**
Experiences in a variety of physical-activity areas.

**PEDU 111 - Badminton (1 Credit)**
Basic strokes and introduction to the history, rules, and strategy of the game.

**PEDU 112 - Basketball (1 Credit)**
Fundamental skills of game performance. Strategy, rules, and basic offenses and defenses.

**PEDU 113 - Bowling (1 Credit)**
Fundamental skills and techniques of bowling.

**PEDU 114 - Golf (1 Credit)**
Basic strokes and strategy of golf.

**PEDU 115 - Gymnastics (1 Credit)**
Fundamentals of gymnastics on the trampoline and balance beam; tumbling, parallel bars, rings, and the horse.

**PEDU 116 - Handball (1 Credit)**
Fundamentals, strategy, and rules of handball.

**PEDU 117 - Karate (1 Credit)**
Fundamentals.

**PEDU 118 - Rugby (1 Credit)**
Fundamental skills for game performance.

**PEDU 119 - Soccer (1 Credit)**
Fundamental skills for game performance; history, rules, and game strategy.

**PEDU 120 - Softball (1 Credit)**
Fundamental skills for game performance; history, rules, and game strategy.

**PEDU 121 - Beginning Tennis (1 Credit)**
Basic strokes, history, rules, and strategy of the game.

**PEDU 122 - Volleyball (1 Credit)**
Recreational and competitive volleyball skills.

**PEDU 123 - Pilates (1 Credit)**
Focus is placed on mind-body exercises which help strengthen and condition the muscles. Each exercise will focus on building core strength, lengthening muscles, and improving flexibility. Proper breathing will also be demonstrated for each exercise in order to achieve the maximum benefits.

**PEDU 124 - Fencing (1 Credit)**
Basic foil-fencing techniques, rules, terminology, history, and etiquette.

**PEDU 125 - Intermediate Karate (1 Credit)**
Prerequisite: PEDU 117.

**PEDU 126 - Badminton/Golf (1 Credit)**
Students will learn to perform basic skills as well as to implement game strategies. Major consideration will be given on how to teach each sport.

**PEDU 127 - Field Hockey (1 Credit)**
Fundamental skills, rules, and terminology of field hockey.
PEDU 128 - Football (1 Credit)
Fundamental skills, rules, and terminology.

PEDU 129 - Racquetball (1 Credit)
Fundamental skills, rules, and terminology.

PEDU 130 - Intermediate Golf (1 Credit)
Intermediate strokes and strategies; heavier emphasis on the total golf swing.
Prerequisites: PEDU 114.

PEDU 131 - Basketball/Soccer (1 Credit)
Students will learn to perform basic skills as well as to implement game strategies. Major consideration will be given on how to teach each sport.

PEDU 132 - Intermediate Tennis (1 Credit)
Intermediate skills and strategies.
Prerequisites: PEDU 121.

PEDU 133 - Track and Field (1 Credit)
Fundamental skills, rules, and terminology.

PEDU 134 - Flying Disc Sports (1 Credit)
Fundamentals and strategies of disc golf, ultimate and various physical activities using flying discs in recreational and competitive situations.

PEDU 135 - Tai-Chi-Chuan (1 Credit)
Students will learn to perform basic Tai-Chi-Chuan skills. Major consideration will be given to breathing skills and meditation to relieve stress.

PEDU 136 - Yoga (1 Credit)
Fundamental skills and terminology.

PEDU 137 - Tae Kwon Do (1 Credit)
Fundamental skills of Tae Kwon Do.

PEDU 138 - Softball/Volleyball (1 Credit)
Students will learn to perform basic skills as well as to implement game strategies. Major consideration will be given on how to teach each sport.

PEDU 139 - Tennis/Track (1 Credit)
Students will learn to perform basic skills as well as to implement game strategies. Major consideration will be given on how to teach each sport.

PEDU 140 - Beginning Swimming (1 Credit)
Skills for safety and recreation.

PEDU 141 - Intermediate Swimming (1 Credit)
Prerequisite: PEDU 140.

PEDU 142 - Lifeguard Training (1 Credit)
Skills of lifesaving.
Prerequisites: swim 500 yards, tread water for one minute, and swim 20 feet underwater.

PEDU 143 - Water Safety Instructor Certification (1 Credit)
Skills, methods, and techniques to teach Red Cross Swimming and Life Saving.
Prerequisites: 17 years of age; sound physical condition; possession of the Red Cross Advanced Lifesaving Certificate, a Red Cross Swimmer Certificate, or the ability to perform the Swimmer Course.

PEDU 144 - Beginning Springboard Diving (1 Credit)
Basic dives and aesthetics of springboard diving.
Prerequisites: tread water and swim 20 feet underwater.

PEDU 145 - Skin and Scuba Diving (1 Credit)
Safe and effective use of equipment with emphasis on principles and physical laws of diving.
Prerequisites: ability to swim at the intermediate level.

PEDU 146 - Scuba (Open Water) (1 Credit)
Certification program in open water scuba instruction: safety, emergency procedures, equipment handling, navigation, and air consumption. Includes five open water dives.

PEDU 147 - Beginning Stand-Up Paddleboarding (1 Credit)
History and development of stand-up paddleboarding as a sport, safety protocol, paddleboard construction and design, terminology, fitness attributes and paddling techniques.

PEDU 148 - Team Water Sports (1 Credit)
Fundamental skills, rules, and strategies for participation in team water sports.
Prerequisites: intermediate swimming skills.

PEDU 149 - Survival Swimming (1 Credit)
Skills and techniques for survival under adverse conditions.
Prerequisites: swim 100 yards, tread water for one minute, and swim 20 feet underwater.

PEDU 150 - Basic Keelboat Sailing (1 Credit)
The course is designed to teach students to safely skipper and crew on a 20 to 27 foot sailboat with a tiller and outboard engine on lakes, bays, and sheltered waters in moderate weather conditions. Theory, history, safety, and teamwork will be emphasized.

PEDU 151 - Beginning Skateboarding (1 Credit)
History, rules, etiquette and techniques of skateboarding.

PEDU 152 - Power Yoga (1 Credit)
Vigorous yoga utilizing breath and movement to improve strength and flexibility.

PEDU 153 - Cardiopulmonary Resuscitation (1 Credit)
Knowledge and skills in providing artificial respiration, first aid for foreign body obstruction, one and two rescuer CPR for adults, infants, and children.

PEDU 154 - Advanced Open Water Scuba (1 Credit)
Development skills beyond open water diving: underwater navigation, night diving, and deep diving.
Prerequisites: PEDU 146.

PEDU 155 - Personal Training Preparation (3 Credits)
Safe and effective methods of exercise by the application of theories and principles of exercise science. Discussion of facility organization, legal liability, and injury prevention and treatment within the score of becoming a fitness professional.

PEDU 160 - Intermediate Yoga (1 Credit)
This course is designed to provide the historical and philosophical context of Mindfulness and how it relates to classical yoga of Pantanjali. Students will be guided in deepening their mindfulness meditation practice that includes analysis of the Four Establishments of Mindfulness and will develop an advanced asana sequence as part of their practice.
Prerequisites: PEDU 136.

PEDU 161 - Intermediate Fencing (1 Credit)
Basic footwork and bladework for foil and épée along with more complex skills, concepts, terminology, strategy, and understanding of the rules.
PEDU 168 - Zumba Fitness (1 Credit)
Principles of fitness interval training and resistance training applied to maximize caloric output, fat burning and total body toning with a fusion of Latin and International music-dance themes.

PEDU 169 - Geocaching (1 Credit)
History, rules, terminology, and strategy of geocaching. Strategies for seeking as well as creating geocaches.

PEDU 170 - Beginning Latin Dance (1 Credit)
Introductory course to multiple styles of social Latin dancing including Salsa, Merengue and Bachatta. Designed to develop the skills and techniques necessary for social level Latin dancing. Emphasis will be placed on basic social elements of dance, patterns, music, and leading and following.

PEDU 171 - Swing Dance (1 Credit)
Introduction to swing dances originating from the first half of the 20th century such as the Charleston, East Coast Swing, Lindy Hop, Jitterbug, Jive, and The Big Apple.

PEDU 172 - Rock Climbing and Bouldering (1 Credit)
Safe climbing and bouldering techniques. Movement on rock, rope systems, anchors, rappelling, belaying, risk management, spotting and lead climbing philosophy. Save use of equipment required for sport climbing and bouldering.

PEDU 173 - Folk and Square Dance (1 Credit)
Fundamental skills and terminology.

PEDU 174 - Social Dance (1 Credit)
Fundamental skills and terminology.

PEDU 175 - Intermediate Social Dance (1 Credit)
Development of skills to an intermediate level in six dances: fox trot, waltz, tango, swing, cha cha, rumba.
Prerequisites: PEDU 174.

PEDU 176 - Clogging (1 Credit)
History, folklore, and skills; individual steps and team routines.

PEDU 177 - Beginning Shag (1 Credit)
Techniques and history of the Shag, South Carolina's state dance. Chroniled development, style variations, and cultural contributions are emphasized.

PEDU 178 - Intermediate Shag Dance (1 Credit)
Introduction to more challenging shag moves for couples, based on steps, turns, spins, and passes. Emphasis on good shag form and rhythm, male lead, female follow, and tight couple positions going through step variations. Steps include Sugarfoot, Boogie Walk, Stagger, Walkup and others.
Prerequisites: PEDU 177.

PEDU 179 - Beginning Belly Dance (1 Credit)
Techniques, history, terminology, and dance combinations/choreography associated with Belly Dance at the fundamental level.

PEDU 180 - Archery (1 Credit)
Fundamentals of target and field archery shooting, history, scoring, and rules.

PEDU 181 - Equestrian (1 Credit)
English hunter-style riding for intermediate students.

PEDU 182 - Backpacking (1 Credit)
Living in the out-of-doors; gear selection, map and compass reading, backpacking, hiking, and camping.

PEDU 183 - Canoeing (1 Credit)
Fundamentals of lake, river, and whitewater canoeing.

PEDU 184 - Snow Skiing (1 Credit)
Fundamental skills and techniques.

PEDU 185 - Beginning Kayaking (1 Credit)
Fundamentals of whitewater kayaking including equipment selection and use, safety techniques, strokes, Eskimo roll, river strategies, rescue procedures, and trip planning.

PEDU 186 - Bicycle Touring (1 Credit)
Fundamental skills and techniques.

PEDU 187 - Rock Climbing (1 Credit)
Fundamentals of rock and mountain climbing including gear selection and use, knots and rope management, anchoring systems, belaying, rappelling, climbing techniques, and safety considerations.

PEDU 188 - Triathlon Training (1 Credit)
Intensive conditioning and cross training to achieve a high level cardiovascular fitness. Biking, running, and swimming in preparation for triathlon event.

PEDU 189 - Spinning (1 Credit)
Spinning to obtain physiological and psychological benefits.

PEDU 190 - Introduction to the Description and Analysis of Human Movement (2 Credits)
Analysis and performance of fundamental motor skills.

PEDU 194 - Educational Gymnastics (1 Credit)
Development of knowledge and skill in educational gymnastics. Designed to establish a content base for elementary and middle school physical education programs.

PEDU 195 - Educational Games (1 Credit)
Development of knowledge and skill in game activities appropriate for the elementary and middle school physical education game setting.

PEDU 196 - Educational Dance (1 Credit)
Development of personal skills in the use of movement for expressive purposes. Designed to establish a content base for elementary school physical education programs.

PEDU 197 - Fit Carolina (1 Credit)
Basic concepts associated with physical activity and the opportunities in community environments to engage in health-promoting and wellness activities.

PEDU 226 - Physical Education for Primary Grades (3 Credits)
Selection and development of appropriate content for elementary school physical education experiences.
Prerequisites: PEDU 190.

PEDU 232 - Philosophy and Principles of Physical Education (3 Credits)
Historical background, current problems, and publications.

PEDU 266L - Athletic Training Lab (1 Credit)
Techniques and skills used in the prevention or protection of injury.

PEDU 275 - Functional Musculoskeletal Anatomy (3 Credits)
Knowledge and skill of orthopedic anatomy relative to muscle, ligament, and tendon origin, insertion, innervation, and action.

PEDU 300 - First Aid and CPR (3 Credits)
Knowledge and skills necessary to meet the guidelines for professional certification. Skills include AED, adult, child, and infant CPR, breathing emergencies, and first aid.
PEDU 301 - Practicum in Physical Education Field Experiences (1-3 Credits)
Supervised field experiences for physical educators. Contract approved by instructor, advisor, and department head is required for undergraduate students.

PEDU 302 - Foundations of Coaching (3 Credits)
The philosophical bases, leadership theory, administrative practice, and organizational problems of competitive athletics.

PEDU 303 - Scientific Bases of Coaching I (3 Credits)
Anatomical, kinesiological, and biomechanical principles affecting performance in competitive athletics; use of biomechanical analysis techniques. Primarily for non-physical education majors who wish to coach.

PEDU 304 - Scientific Bases of Coaching II (3 Credits)
Physiological, psychological, ethical, and sport medicine principles affecting performance in competitive athletics; application of scientific principles. Primarily for non-physical education majors who desire to coach.

Prerequisites: PEDU 303.

PEDU 310 - Emergency Medical Responder (3 Credits)
Knowledge and skills necessary to work as an emergency medical responder (EMR) to help sustain life, reduce pain and minimize the consequences of injury or sudden illness until more advanced medical help takes over. Appropriate decision making about the care to provide in a medical emergency; skills an EMR needs to act as a crucial link in the emergency medical services (EMS) system.

PEDU 312 - Coaching Gymnastics, Volleyball, and Softball (3 Credits)
Prerequisite: PEDU 302 and PEDU 303.

PEDU 313 - Coaching Basketball, Track and Field, and Soccer (3 Credits)
Prerequisite: PEDU 302 and PEDU 303.

PEDU 314 - Coaching Football, Baseball, and Wrestling (3 Credits)
Prerequisite: PEDU 302 and PEDU 303.

PEDU 320 - Practicum in Coaching (3 Credits)
Supervised practical experience in interscholastic coaching settings; concurrent seminar.

PEDU 340 - Practicum in the Instructional Aspects of Physical Education (1 Credit)
Application of instructional principles to small peer group settings using open and closed gross motor skills.

Corequisite: PEDU 360.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

PEDU 341 - Practicum in Instruction of Young Learners in Movement Settings (1 Credit)
Application of curriculum and instructional principles to small group instruction with young learners. 75, have met the state basic skills testing requirement for educator preparation program admission.

Prerequisites: PEDU 340 and PEDU 360, cumulative GPA of 2.

Corequisite: PEDU 361.

PEDU 353 - Recreational Sports Programming (3 Credits)
Current program elements and techniques in recreational sports.

PEDU 360 - Instructional Aspects of Physical Education (3 Credits)
Instruction in physical education settings, including environmental arrangements, task presentation, content development, and feedback. 50.

Prerequisites: PEDU 190, cumulative GPA of 2.

Corequisite: PEDU 340.

PEDU 361 - Instruction of Young Learners in Movement Settings (3 Credits)
Development of knowledge and skills to teach physical education to young learners. 75, have met the state basic skills testing requirement for educator preparation program admission.

Prerequisites: PEDU 340 and PEDU 360, cumulative GPA of 2.

Corequisite: PEDU 341.

PEDU 398 - Seminar in Physical Education (1 Credit)
Various topics related to current events in physical education.

PEDU 399 - Independent Study (1-3 Credits)
Open to sophomores and above. Enrollment and topic to be approved in advance by advisor and instructor. Contract approved by advisor, advisor, and department head is required.

Graduation with Leadership Distinction: GLD: Research

PEDU 420 - Motor Learning in Physical Education (3 Credits)
Application of cognitive, sensory, and motor processes related to learning motor skills in physical education and sport settings.

PEDU 440 - Practicum in Secondary School Physical Education (1 Credit)
The application of curriculum and instructional principles to large group instruction in the secondary school.

Prerequisites: PEDU 341.

Corequisite: PEDU 462.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

PEDU 445 - Measurement & Evaluation in Physical Education (3 Credits)
The historic background of measurement in physical education; statistical techniques to be used in scoring and interpreting tests; evaluation of measures now available in the field; and the administration of a testing program. Available for undergraduate credit only.

Prerequisites: 15 credits in professional physical education, including PEDU 232 and 6 semester hours of professional skill courses.

PEDU 446 - Physical Education Curriculum (3 Credits)
The study of K-12 physical education school curriculum theory, issues, and design.

Prerequisites: Cumulative GPA of 2.75, Admission to Directed Teaching Semester.

PEDU 451 - Teaching Physical Education (3 Credits)
Analysis of teaching and learning in physical education.

Prerequisite or Corequisite: PEDU 462, PEDU 440.
PEDU 462 - Instruction in Secondary School Physical Education (3 Credits)
Physical education content and processes for the secondary school. 75, have met the state basic skills testing requirement for educator preparation program admission.
Prerequisites: PEDU 341 and PEDU 361, cumulative GPA of 2.
Corequisite: PEDU 440.

PEDU 479 - Directed Teaching in Physical Education (12 Credits)
Prerequisite: Cumulative GPA of 2.75, Admission to Directed Teaching Semester.

Graduation with Leadership Distinction: EDTE 201.
Experiential Learning: Experiential Learning Opportunity

PEDU 498 - Advanced Seminar in Physical Education (1 Credit)
Advanced learning opportunities in professional physical education. and permission of instructor.
Prerequisites: 90 hrs.

Graduation with Leadership Distinction: GLD: Research

PEDU 510 - Teaching Health Related Physical Fitness (3 Credits)
Knowledge and application of processes and principles of health related physical fitness in physical education and sport settings.
Prerequisites: EXSC 223/EXSC 224 or BIOL 243/BIOL 244.

PEDU 515 - Physical Education for Inclusion (3 Credits)
Designing physical education programs for special populations and for students with special needs.
Prerequisites: PEDU 340, PEDU 360.

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

PEDU 520 - Observational Analysis of Sports Techniques and Tactics (3 Credits)
Qualitative and quantitative techniques to observe, describe, analyze, and evaluate human movement in physical education and sports settings.
Prerequisites: PEDU 190, EXSC 223, EXSC 224 or BIOL 243/BIOL 244, PHYS 101.

PEDU 530 - The Organization and Administration of Physical Education (3 Credits)
Organization of instructional, intramural, interscholastic, and recreational programs, with emphasis on criteria for the evaluation and selection of activities.
Prerequisites: 18 credits in physical education, including six semester hours of professional skill courses.

PEDU 555 - Current Topics in Physical Education (1-3 Credits)

PEDU 570 - Human Child/Adolescent Growth (3 Credits)
Human physical growth and development of children with emphasis on years 4 to 18.
Prerequisites: EXSC 223, EXSC 224, or equivalent.

PEDU 575 - Physical Education for the Classroom Teacher (3 Credits)
Appropriate movement experiences for children. Not available for physical education majors.
Prerequisites: EDTE 201.

PEDU 577 - Dance Performance (3 Credits)
Rehearsal, choreographic analysis, and dance performance. All components of dance production—including music, costume, lighting, and scenery—will be considered.
Cross-listed course: DANC 577

PEDU 635 - South Carolina Physical Education Curriculum (3 Credits)
Development of physical education programs using the South Carolina Physical Education Curriculum Materials.

PEDU 637 - Advanced Theory and Techniques of Coaching Football (3 Credits)
An intensive investigation of current theories of offensive and defensive football. Generalship, strategy, conditioning, staff utilization, film analysis, and practice organization are covered in depth.
Prerequisites: current responsibilities or previous experience in college or high school coaching.

PEDU 638 - Advanced Theory and Techniques of Coaching Basketball (3 Credits)
An intensive investigation of the latest techniques and theories of coaching basketball. Systems of offense and defense, generalship, conditioning, staff utilization, film analysis, and practice organization are covered in depth.
Prerequisites: current responsibilities or previous experience in college or high school coaching.

PEDU 639 - Advanced Theory and Techniques of Coaching Track and Field Events (3 Credits)
A thorough study of the latest techniques of coaching track and field events. Isometric, isotonic, and interval conditioning theories involving the cardiovascular and muscular systems are examined to acquaint the student with varying physiological approaches to conditioning.
Prerequisites: current responsibilities or previous experience in college or high school coaching.

PEDU 640 - Advanced Theory and Techniques of Coaching and Officiating Girls' Gymnastics (3 Credits)
A thorough study of the latest techniques of teaching and officiating girls' gymnastics. Balance beam, vaulting, uneven bars, tumbling, dance skills and routines, and officiating methods.

PEDU 650 - The Art and Science of Coaching (3 Credits)
Coaching principles and application to sport programs across a variety of developmental levels.

PEDU 660 - Counseling Student Athletes (3 Credits)
Issues facing student athletes regarding their personal and career development beyond athletics.
Cross-listed course: EDCE 650

Physical Education, B.S.P.E.

Learning Outcomes

• Students who graduate with a B.S.P.E. in Physical Education should be able to ...
• understand physical education content and disciplinary concepts related to the development of a physically educated person.
• understand how individuals learn and develop and can provide opportunities that support their physical, cognitive, social, and emotional development.
• understand how individuals differ in their approaches to learning, and create appropriate instruction adapted to these differences.
• use an understanding of individual and group motivation and behavior to create a safe learning environment that encourages positive social interaction, active engagement in learning, and self motivation.
• use knowledge of effective verbal, nonverbal, and media communication techniques to enhance learning and engagement in physical activity settings.
• plan and implement a variety of developmentally appropriate instructional strategies to develop physically educated individuals, based on state and national (NASPE K-12) standards.
• understand and use assessment to foster physical, cognitive, social, and emotional development of students in physical activity.
• evaluate the effects of their actions on others (e.g., students, parents/guardians, fellow professionals), and seek opportunities to grow professionally.
• use information technology to enhance learning and to enhance personal and professional productivity.
• foster relationships with colleagues, parents/guardians, and community agencies to support students’ growth and well being.

Admissions

Admission to the Professional Program

All University teacher education students must apply and be admitted to Professional Program/Internship at mid-point(s) in their programs prior to final internship (i.e. student teaching). Requirements for admission vary by program, but for undergraduate students include 60 credit hours with a minimum overall GPA of 2.75, successful completion of a state-approved basic skills examination, and courses as specified by program area.

Students should contact their program area or the College of Education Office of Student Affairs for specific requirements and application deadlines.

Degree Requirements (124 hours)

See College of Education (p. 340) for certification requirements and other academic opportunities.

1. Carolina Core Requirements (32-44 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

must be passed with a grade of C or higher

• any CC-CMW courses (p. 742)

ARP – Analytical Reasoning and Problem Solving (6-7 hours)

must be passed with a grade of C or higher

• any CC-ARP courses (p. 742)

SCI – Scientific Literacy (8 hours)

must be passed with a grade of C or higher

• Select one of the following options (4 hours):
  • BIOL 101 & BIOL 101L
  • BIOL 110
  • BIOL 120 & BIOL 120L

• Select one of the following options (4 hours):
  • PHYS 101 & PHYS 101L (not CC-SCI-approved)
  • PHYS 201 & PHYS 201L
  • CHEM 102
  • CHEM 111 & CHEM 111L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

The Carolina Core requires either two approved courses in one foreign language or a score of two or higher on the foreign language placement test.

• CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

• any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

• PSYC 101

AIU – Aesthetic and Interpretive Understanding (3 hours)

• any CC-AIU course (p. 742)
CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
• any overlay or stand-alone CC-CMS course (p. 742)

INF – Information Literacy 1 (0-3 hours)
• any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
• any overlay or stand-alone CC-VSR course (p. 742)

1 Carolina Core Stand Alone or Overlay Eligible
Requirements – Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours must add up to a minimum of 31 hours. Some programs may have a higher number of minimum Carolina Core hours due to specified requirements.

2. College Requirements (0 hours)
No college-required courses for this program.

3. Program Requirements (11 hours)
Supporting Courses (11 hours)

Total Credit Hours 11

1 Must be passed with a grade of C or higher.
2 Required if PHYS 101 and PHYS 101L were taken to fulfill CC-SCI requirement.

Minor (0-18 hours) optional
A student may choose to complete a minor consisting of 18 credit hours of prescribed courses. The minor is intended to develop a coherent basic preparation in a second area of study. Courses applied toward general education requirements cannot be counted toward the minor. No course may satisfy both major and minor requirements. All minor courses must be passed with a grade of C or better.

4. Major Requirements (81 hours)
A minimum grade of C is required in all major courses.

Major Courses (33 hours)

The College of Engineering and Computing offers the following minors for accredited by the Computing Accreditation Commission of ABET. For Information Systems and Integrated Information Technology are Commission of ABET. The programs in Computer Science, Computer Mechanical Engineering are accredited by the Engineering Accreditation Civil Engineering, Computer Engineering, Electrical Engineering, and Biomedical Engineering, Chemical Engineering, opportunity to pursue specializations within these basic programs. courses that fulfill the general education requirements of the University and a set of courses that are specific to the major. Students have the opportunity to pursue specializations within these basic programs.

The curricula for all baccalaureate degree programs include a set of courses that are specific to the major. Students have the opportunity to pursue specializations within these basic programs. The programs in Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET. The programs in Computer Science, Computer Information Systems and Integrated Information Technology are accredited by the Computing Accreditation Commission of ABET. For additional information, visit http://www.abet.org.

Minors
The College of Engineering and Computing offers the following minors for qualified students:

- Aerospace Engineering Minor (p. 425)
- Applied Computing Minor (p. 399)
- Computer Science Minor (p. 406)
- Data Science Minor (p. 410)
- Electrical Engineering Minor (p. 412)
- Integrated Information Technology Minor (p. 417)
- Nuclear Engineering Minor (p. 430)

A student in the College of Engineering and Computing may add to his or her program of study any minor listed in the Academic Programs A-Z (p. 20) section of this bulletin, provided the minor field of study is distinctly different from the major. Students completing the Computer Information Systems bachelor’s degree program automatically earn a minor in Business Information Systems. In most other cases, additional coursework is required to add a minor to a program of study.

Second Baccalaureate Degree
In accordance with the university’s Second Baccalaureate Degree policy, students may apply for two undergraduate degrees from the College of Engineering and Computing. In addition, the College of Engineering and Computing cooperates with other colleges in the awarding of two degrees. Often, coursework beyond the policy-specified minimum semester hour difference is required to complete the second degree.

Second Major
In accordance with the university’s Second Major policy, qualified students may apply for graduation with double majors in Computer Science and in Mathematics.

Accelerated Graduate Degrees

Accelerated Engineering and Computing Programs
Certain majors within the College of Engineering and Computing offer accelerated bachelors/graduate degree programs in accordance with the procedures given under the “Academic Regulations” section of this bulletin. In such programs, undergraduate students may take course work for graduate credit. The graduate credits may be applied to the student’s baccalaureate program. The number of such credits that may be applied towards an undergraduate degree and a graduate degree are determined by the associated degree programs.

Eligible undergraduate students must have completed at least 90 hours of undergraduate course work, must have both a cumulative and major GPA of 3.4 or better, and have the approval of their undergraduate advisor, the Graduate Director of the relevant graduate program, the Dean of Graduate Studies, and the instructor for each course to be taken. The credits must be earned during the student’s senior year. Interested students should complete the Application for Admission to an Accelerated Bachelor’s/Graduate Study Plan (http://gradschool.sc.edu/forms/G-BGCA.pdf), available from The Graduate School.

Accelerated International Masters in Business Administration
The College of Engineering and Computing and the Moore School of Business support the BS/IMBA program for undergraduate students in the College of Engineering and Computing. Under this program, undergraduate students with appropriate co-op or work experience and a GPA of 3.40, both overall and in their major...
field of study, may first submit an Application for Admission to an Accelerated Bachelor's/Graduate Study Plan to the Graduate School for acceptance to the accelerated program during the semester in which they will have 90 undergraduate credit hours.

Students must also apply to the Moore School of Business for acceptance to the IMBA program. Satisfactory scores on the GMAT are required. Generally, the equivalent of at least one year of full-time professional experience is required for acceptance to the accelerated BS/IMBA program. Students will generally officially start taking IMBA core courses during the summer after they are within 30 hours of completing the undergraduate degree. The following year will be spent taking elective courses in the IMBA program. The first year of the IMBA program is tightly structured and provides little flexibility in scheduling, including the required internship. Courses remaining to complete the requirements for both programs will be taken during the second year of the IMBA program. Up to 9 hours of graduate courses may be used for dual credit in both programs. The specific courses must be approved by both programs for dual credit.

Cooperative Education

The Cooperative Education Program is an optional program designed to provide career-related work experiences, which can either alternate, or run concurrently with academic semesters. The purpose of the co-op experience is to give direction and enrichment to the student's education, to help the student in career decision making, to improve after-graduation job prospects, and to enable students to pay for a significant portion of their college expenses.

To qualify for the co-op program, students must have completed 30 semester hours and have at least a 2.50 grade point average. The program requires that students participate in at least two work experiences, each equal to one academic semester, and maintain at least a 2.50 grade point average. Students are encouraged to enroll with the Engineering and Computing Career Services Office during their freshman year. More information is available from the Career Center's co-op website (http://sc.edu/about/offices_and_divisions/career_center/).

General Education Requirements

A student must satisfy all Carolina Core (p. 742) requirements to receive a baccalaureate degree from the College of Engineering and Computing. Specific courses and guidelines to satisfy these requirements are determined by each degree program in the College. Individual degree programs may also have additional requirements that could be considered as contributing to general education.

Progression Requirements

Any program-specific progression requirement policies are described in that program's section of this bulletin. Students who are within 30 hours of completing all degree requirements should request a senior check from the Student Services Office.

Program GPA Requirement

The College or Engineering and Computing requires that students have a Program GPA of 2.00 or better. A listing of courses included in the Program GPA for each degree program is maintained in the respective academic program section of this bulletin. The Program GPA computation will include all repeated grades, with the exception of those for which the university approved grade forgiveness has been applied. A student not meeting these requirements must change major or transfer out of the College of Engineering and Computing. Click the program link below for specific Program GPA information.

- Aerospace Engineering, B.S.E. (p. 425)
- Biomedical Engineering, B.S. (p. 376)
- Chemical Engineering, B.S.E. (p. 382)
- Civil Engineering, B.S.E. (p. 392)
- Computer Engineering, B.S.E. (p. 401)
- Computer Information Systems, B.S. (p. 403)
- Computer Science, B.S.C.S. (p. 407)
- Electrical Engineering, B.S.E. (p. 413)
- Integrated Information Technology, B.S. (p. 417)
- Mechanical Engineering, B.S.E. (p. 427)

Repetition of Coursework

A student cannot repeat courses from the College of Engineering and Computing in which they earned a grade of C or better. In addition, a student cannot repeat any course from the College a second time. For this purpose, withdrawal from a course with a grade of W is not regarded as enrollment in that course. A student that does not satisfactorily complete a degree-required College course within two attempts must change major or transfer out of the College of Engineering and Computing.

A student can repeat no more than four courses from the College of Engineering and Computing in order to satisfy the requirements for any degree from the College, regardless of satisfactory work. For this purpose, withdrawal from a course with a grade of W is not regarded as enrollment in that course. A student not meeting these requirements must change major or transfer out of the College of Engineering and Computing.

Departments

- Biomedical Engineering (p. 373)
- Chemical Engineering (p. 380)
- Civil and Environmental Engineering (p. 389)
- Computer Science and Engineering (p. 395)
- Electrical Engineering (p. 410)
- Integrated Information Technology (p. 415)
- Mechanical Engineering (p. 419)

Biomedical Engineering

Department Website (https://sc.edu/study/colleges_schools/engineering_and_computing/study/biomedical_engineering/)

Melissa Moss, Director

Biomedical engineers are involved in the design and improvement of products and procedures that promote improved health. Contributions of biomedical engineers range from the design of artificial organs to the discovery of new therapeutic pharmaceuticals to the development of surgical procedures and associated instrumentation. The Departments of Chemical Engineering and Mechanical Engineering collaborate to offer the Bachelor of Science in Biomedical Engineering. The curriculum provides a strong foundation in the basic and applied sciences, as well as in the liberal arts, to provide students with a well-balanced education. Increasing emphasis is placed upon the application of engineering...
principles to biological systems in the junior and senior years. The curriculum provides the opportunity to engage in technical electives, laboratory course components, and a capstone design experience. Additional elective components and the design experience can be tailored to the specific interests of the student.

**Bachelor’s/Master’s Degrees Accelerated Program**

The Bachelor’s/Master’s Degrees Accelerated Program in Biomedical Engineering allows undergraduate students to complete both the B.S. degree and M.S. degree in as few as five years. The use of dual credit-courses that can be used toward both degrees enables acceleration of the program, reducing the total enrollment of the student by one semester.

Biomedical Engineering undergraduate students may apply for approval of an accelerated education plan in the semester in which they will complete 90 hours of undergraduate course work. In addition, students must have a sufficient foundation in biomedical engineering course work to enable them to take graduate-level courses. University and program regulations stipulate that applicants must have a minimum GPA of 3.40, both overall and in biomedical engineering courses. Students in the accelerated program must maintain a GPA of 3.40 while pursuing the B.S. degree.

Students applying to this program must submit to The Graduate School a completed “Application for Admission to a Combined Bachelor's/Master's Education Plan” (G-BMPA) with endorsements of the undergraduate advisor, research advisor and the program graduate director. The dean of The Graduate School has final authority for approving accelerated education plans. A “Bachelor’s/Master’s Degree Accelerated Plan Course Work Authorization” form must be submitted for each semester in which one or more of these courses are taken.

Participation in the accelerated program does not require or insure acceptance into The Graduate School. Students wishing to continue towards a master's degree in biomedical engineering at USC must apply formally to the Graduate School by submitting the appropriate application and all required supporting documents. Students in the accelerated program will be eligible for graduate assistantships upon admission to The Graduate School.

Only graduate-level courses (numbered 500 and above, including up to 3 credit hours of project/research work) satisfying both B.S. and Master's degree requirements may be used for dual credit. BMEN core graduate courses (excluding 1-hour seminar courses and thesis preparation, BMEN 799) or courses from list of the approved BMEN graduate electives (refer to the graduate student handbook) may be used for graduate-level coursework. No more than twelve credit hours may be used as dual credit. The graduate courses used for dual credit must be taken during the student’s final undergraduate year.

**Courses**

**BMEN 101 - Introduction to Biomedical Engineering (2 Credits)**

Introduction to topics comprising the field of Biomedical Engineering, including their ethical impacts. Familiarization with resources and basic skills necessary to succeed in this major and field.

**Prerequisite or Corequisite:** MATH 141.

**BMEN 202 - Professional Development and Ethics in Biomedical Engineering II (1 Credit)**

Communication in the field of biomedical engineering, including technical writing and oral presentations with emphasis on professional development, articulation of a critical position, and productive intellectual exchange. Careers in the field of biomedical engineering. Planning and managing group projects. Ethical issues associated with biomedical engineering.

**Prerequisites:** BMEN 101.

**BMEN 211 - Computational Tools for Modeling Biomedical Systems (3 Credits)**

Introduction to modern computational modeling tools used in biomedical engineering. Analysis and visualization using engineering software as applied to problems of interest in biomedical engineering. Material balance modeling of biomedical systems.

**Prerequisites:** C or better in MATH 141.

**Prerequisite or Corequisite:** CHEM 111 or CHEM 141.

**BMEN 212 - Fundamentals of Biomedical Systems (3 Credits)**

Fundamentals of static equilibrium, free body diagrams, force and momentum balances; viscoelastic mechanical behavior and models of viscoelasticity; introduction to linear circuit analysis, filters, and amplifiers.

**Prerequisites:** C or better in both CHEM 111 or CHEM 141, and MATH 141.

**BMEN 240 - Cellular and Molecular Biology with Engineering Applications (4 Credits)**

Introduction to molecular, cellular, and physical biology principles and concepts and application of engineering principles to further the understanding of biological systems. Protein and nucleic acid structure and function; DNA replication, mutations, and repair; transcription, translation, and post-translational processing; cellular organization; molecular transport and trafficking; and cellular models.

**Prerequisites:** C or better in BIOL 101, C or better in CHEM 112 or CHEM 142, and C or better in MATH 142.

**BMEN 260 - Introduction to Biomechanics (3 Credits)**

**Prerequisites:** C or better in BMEN 211, C or better in MATH 241, C or better in PHYS 211.

**Programs**

- Biomedical Engineering, B.S. (p. 376)
BMEN 263 - Introduction to Biomechanics (3 Credits)
Mathematical and theoretical analysis of the mechanical properties and functions of materials, including those of biological origin and clinical relevance. Stress, strain, mechanical properties of materials, axial loading, torsion, bending, and stress/strain transformations. Application of the categories and methodology of solid mechanics to study biological tissues and events.
Prerequisites: C or better in BMEN 212, C or better in MATH 241, C or better in PHYS 211.

BMEN 271 - Introduction to Biomaterials (3 Credits)
Properties of metals, ceramics, polymers, natural materials and composites; methods to modify surface and bulk properties of biomaterials; mechanisms of degradation in physiological environments; cell- and tissue-biomaterial interactions; host response to implanted biomaterials; blood-biomaterial interactions; rational design of biomaterials for specific biomedical applications.
Prerequisites: CHEM 333, C or better in BMEN 240 or BIOL 302, C or better in BMEN 260 or BMEN 263, C or better in BMEN 290.

BMEN 290 - Thermodynamics of Biomolecular Systems (3 Credits)
First, second, and third law of thermodynamics; free energy and chemical equilibrium in biological processes; phase equilibrium for biomedical systems; energy and metabolism; membrane potentials and depolarization.
Prerequisites: C or better in BMEN 240 or BMEN 211, C or better in MATH 241, C or better in PHYS 211.

BMEN 302 - Professional Development and Ethics in Biomedical Engineering (2 Credits)
Analysis and discussion of biomedical industries, standards, regulations, products, and patents. Ethical issues associated with research, introduction of new products, animal subjects, and human subjects.
Prerequisites: BMEN 101.

BMEN 303 - Professional Development and Ethics in Biomedical Engineering (1 Credit)
Analysis and discussion of industries, products, patents, industrial inventiveness, and biomedical research. Ethical issues associated with research, introduction of new products, animal subjects, and human subjects.
Prerequisites: BMEN 101.

BMEN 321 - Biomonitoring and Electrophysiology (3 Credits)
Basic electric circuits and equivalent cell model circuits used in biomonitoring and electrophysiology. Ohm's and Kirchoff's Laws. Applications of electrical components, such as operations amplifiers, filter, and Wheatstone bridge, in biomonitoring and electrophysiology. Origins of bioelectricity. Biopotential and electrochemistry including Nernst and Goldman-Hugdkin-Katz equations for describing membrane potential of nerve and muscle cells. Ion transport involved in maintaining cell pH, action potential, muscle contraction, sensory perception.
Prerequisites: PHYS 212, C or better in BMEN 211 or BMEN 221, C or better in BMEN 240 or BIOL 302, C or better in MATH 242.

BMEN 342 - Infectious Disease & Immunology for Biomedical Engineers (3 Credits)
Qualitative and quantitative aspects of infectious diseases; principles of diagnosis and control. Elements of human immunological response and immune disorders; influence on biomedical engineering of explants and implants.
Prerequisites: BIOL 101.

BMEN 345 - Human Anatomy and Physiology for Biomedical Engineers (4 Credits)
Foundations for biomedical engineering with a focus on human anatomy and physiology. Introduction to the inter-relationships between tissue/organ structure and function; demonstration of how an engineering approach can promote understanding of these relationships. Recent biomedical engineering advances and their relations to underlying anatomy and physiology.
Prerequisites: BMEN 271, C or better in BIOL 302 or BMEN 240.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships, GLD: Research

BMEN 346 - Medical Microbiology for Biomedical Engineers (3 Credits)
Qualitative and quantitative aspects of human system based medical microbiology; principles of diagnosis and control of representative human diseases. Elements of human immunological response and immune disorders.
Prerequisites: BMEN 240 or BIOL 302.

BMEN 354 - Biotransport (3 Credits)
Basics of convective and diffusive transport applied to biological and biomedical systems. The effect of fluid flow and mass transport upon biochemical interactions. Scaling and design of biotransport systems.
Prerequisites: ECHE 320 or EMCH 360 or ENCP 360, C or better in MATH 242.

BMEN 361 - Biomedical Instrumentation (4 Credits)
Principles of and experimental measurements using bioinstrumentation. Data acquisition, processing, and statistical analysis. Lab and electrical safety. Analytical methods including hematology, human fluids analysis, biosensors, chromatographic techniques, electrophoresis, dialysis, spectrophotometry, fluorometry, and microscopy. Applications of bioinstrumentation in disease diagnosis.
Prerequisites: BMEN 321, STAT 509.

BMEN 363 - Biomedical Instrumentation (3 Credits)
Sensing and measurement of biophysical and biochemical properties and signals in the human body for quantitative molecular, cell, and tissue analysis. Overview on the theory, design and application of common biomedical instrumentation used for diagnosis, treatment, and scientific study of physiological parameters in clinical medicine and biomedical research.
Prerequisites: BMEN 321.

BMEN 381 - Biomedical Engineering Laboratory I (2 Credits)
Introduction to laboratory techniques and tools used for physiological measurements in biomedical engineering, with focus on biological, physical, and biomaterial methods. Data processing and analysis, as well as effective communication of results in written and oral form.
Prerequisites: BMEN 260 or BMEN 263, STAT 509.
Prerequisite or Corequisite: BMEN 271.

BMEN 382 - Biomedical Engineering Laboratory II (2 Credits)
Introduction to laboratory techniques and tools used for physiological measurements in biomedical engineering, with focus on measurement of biosignals and common analytical methods employed in biomedical research and clinical settings. Data processing and analysis, as well as effective communication of results in written and oral form.
Prerequisites: BMEN 321, BMEN 381.
Prerequisite or Corequisite: BMEN 363.
BMEN 389 - Special Topics in Biomedical Engineering for Undergraduates (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as topic varies.

BMEN 391 - Kinetics in Biomolecular Systems (3 Credits)
Kinetic theory applied to biomedical systems, including enzymatic reactions, cell growth, and kinetic models of biological systems. 
**Prerequisites:** CHEM 333 or CHEM 550 or BIOL 541; C or better in BMEN 290; C or better in MATH 242.

BMEN 392 - Fundamentals of Biochemical Engineering (3 Credits)
Biological systems are used in chemical industries for a wide variety of applications, including the formation of important products (e.g., pharmaceuticals), sensor technology, degradation, and waste water treatment. This class will provide an overview of materials needed to investigate and model biosystems. 
**Prerequisites:** CHEM 333.

BMEN 411 - Modeling and Simulation of Biomedical Systems (3 Credits)
Introduction to modern computational modeling tools used in biomedical engineering. Analysis, visualization and image processing using engineering software as applied to problems of interest in biomedical engineering. 
**Prerequisites:** BMEN 263, BMEN 271, and BMEN 354 with a minimum grade of D.

BMEN 427 - Senior Biomedical Engineering Design I (3 Credits)
Integrated team work/project management, “voice of the patient,” design specifications, design functions, design concepts, economic factors, concept selection and product architecture. The initial feasibility study, selection of the final design approach, and preliminary specifications are required by the end of the semester. 
**Prerequisites:** BMEN 271, BMEN 345, BMEN 354, BMEN 361 or BMEN 363.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships, GLD: Research

BMEN 428 - Senior Biomedical Engineering Design II (3 Credits)
Design for manufacturability, ergonomic and aesthetic considerations, prototype construction and testing, fabrication and biological testing of tissue engineered constructs, statistical methods/design of experiments, ethics/product liability and social/environmental impact. The final engineering design (specifications, drawings, bill of materials, including assessment of economics) will be completed by the end of the semester. Both written and oral reports are to be provided. 
**Prerequisites:** BMEN 427.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships, GLD: Research

BMEN 499 - Independent Research (1-3 Credits)
Summer internship, REU, or co-op experience in biomedical engineering. Students enroll in this course following their research experience and prepare a summary paper and research seminar on their technical accomplishments. A maximum of 3 credits may be applied toward the degree. 
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships, GLD: Research

BMEN 532 - Micro/nanofluidics and Lab-on-a-Chip (3 Credits)
Basic fluid mechanics, capillary, drop and micro/nanoparticle, electrokinetics; micropump, mixer, preconcentrator, electrophoresis, microactuator and particle manipulator; sensors for pressure, velocity, concentration, temperature in environmental monitoring/biodefence, clinical diagnostics, drug discovery/delivery. 
**Prerequisites:** D or better in CHEM 112 and CHEM112L or CHEM 142; D or better in PHYS 212.

BMEN 537 - Bio Nano/Micro Electro-Mechanical Systems (3 Credits)
Fundamentals of nano- and microfabrication, metrology and their applications in biomedical engineering and science. The fabrication covers photolithography, nano/microfabrication for nano/ microstructures, etching and additive techniques, MEMS integration and packaging, etc. Metrology focuses on characterization of nanostructures with imaging technologies. 
**Prerequisites:** D or better in CHEM 112 and CHEM 112L or CHEM 142; D or better in PHYS 212.

BMEN 546 - Delivery of Bioactive Agents (3 Credits)
Routes of administration; mechanisms of drug absorption and biological barriers; pharmacokinetic modeling of drug distribution; drug excretion and biotransformation; design and evaluation of controlled release systems, targeted release systems, and responsive release systems. 
**Prerequisites:** BIOL 302, CHEM 333, MATH 142.

BMEN 547 - Immunoengineering (3 Credits)
Engineering approaches to study and control immune reactions and their applications in therapy and diagnostics for infectious disease, cancer, allergy, autoimmunity, and transplantation. 
**Prerequisites:** C or better in BMEN 240 or BIOL 302.

BMEN 548 - Cardiovascular System: From Development to Disease (3 Credits)
Survey of cardiovascular development, anatomy, physiology and pathology. Recent advances in our understanding of the basic mechanisms of congenital cardiovascular defects and cardiovascular disease. Engineering principles, detection and treatment of cardiovascular defects. 
**Prerequisites:** BMEN 240 or BIOL 302.

BMEN 556 - Advanced Biomechanics (3 Credits)
Mathematical and theoretical analysis of the mechanical properties and functions of soft biological tissues to include arterial vessels. 
**Prerequisites:** BMEN 260 or BMEN 263.

BMEN 572 - Tissue Engineering (3 Credits)
Molecular basis of bioregenerative engineering; biomaterial design; biocompatibility assessment; cell isolation and characterization; rapid prototyping, scaffold fabrication, and biofabrication; protein and gene delivery; bioreactor design; transport in biological tissues; applications of tissue engineering in regenerative medicine.

BMEN 589 - Special Topics in Biomedical Engineering (1-3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as topic varies.

**Biomedical Engineering, B.S. Program Educational Objectives**

Graduates of the Biomedical Engineering Program will:

1. Practice in a professional career or pursue an advanced or professional degree in which they are contributing to scientific,
professional, and/or local communities through the improvement of human health.

2. Advance their careers by engaging in teamwork, effective communication, and continued learning to expand their professional development and technical understanding.

Learning Outcomes

- Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions.
- Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
- Ability to communicate effectively with a range of audiences.
- Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Academic Standards

Program GPA

Program GPA requirement policies are described in the College of Engineering and Computing section of this bulletin. For the purpose of these policies, the following courses are used to determine the Program GPA for the Biomedical Engineering B.S. program: all Biomedical Engineering Major courses, all courses used to satisfy a Biomedical Engineering Elective, all courses used to satisfy an Engineering Elective, and ECHE 320 or equivalent.

Admissions

Entrance Requirements

Admission requirements and processes for freshman, transfer students, and former students seeking readmission are managed by the Office of Undergraduate Admissions (http://sc.edu/about/offices_and_divisions/undergraduate_admissions/). Transfer applicants from regionally accredited colleges and universities must have a cumulative 2.75 GPA on a 4.00 scale to enter the College of Engineering and Computing. In addition, transfer applicants for the Aerospace Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, or Mechanical Engineering majors must also have completed a four semester-hour calculus course equivalent to MATH 141 with a grade of "C" or better.

The last 25% of a student’s degree must be completed in residence at the University, and at least half of the hours in the student’s major courses and in the student’s minor courses (if applicable) must be taken at the University.

Degree Requirements (130-142 hours)

See College of Engineering and Computing (p. 372) for progression requirements and special academic opportunities.

1. Carolina Core Requirements (34-46 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)

- ENGL 101 must be passed with a grade of C or higher
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (8 hours)

must be passed with a grade of C or higher

- MATH 141
- MATH 142

SCI – Scientific Literacy (8 hours)

must be passed with a grade of C or higher

- BIOL 101
- BIOL 101L
- CHEM 111
- CHEM 111L

GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)

Score two or better on foreign language placement test; or complete the 109 and 110 courses in FREN, GERM, LATN or SPAN; or complete the 121 course in another foreign language.

- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)

- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)

- any CC-GSS course (p. 742)
Complete all of the following:

1. Foundational Courses (33 hours)
   - any CC-AIU course (p. 742)

2. Supporting Courses (48 hours)
   - any overlay or stand-alone CC-CMS course (p. 742)
   - any overlay or stand-alone CC-INF course (p. 742)

3. Program Requirements (48 hours)

   No college-required courses for this program.

2. College Requirements (0 hours)

3. Program Requirements (48 hours)

   Supporting Courses (48 hours)

   Foundational Courses (33 hours)

Chemical Engineering

Department Website (https://www.sc.edu/study/colleges_schools/engineering_and_computing/departments/chemical_engineering/)

John W. Weidner, Chair

Chemical engineers are involved in the design of materials and devices and in the design and operation of plants which manufacture a wide variety of chemicals, including plastics, textile fibers, fuels, and pharmaceuticals. The work of the chemical engineer can be highly diverse, ranging from research on pollution prevention to the marketing of new chemical products.

The department offers the Bachelor of Science in Engineering with a major in chemical engineering. The department, jointly with the Department of Mechanical Engineering, offers a major in biomedical engineering.

Accelerated B.S.E./M.E. Education Plan

The Accelerated B.S.E./M.E. Plan in Chemical Engineering allows students to complete both the B.S.E. degree and a Master of Engineering degree in chemical engineering in as few as five years. The use of dual credit-courses that can be used toward both degrees enables acceleration of the program, reducing the total enrollment of the student by one semester.

Chemical engineering students may apply for approval of an accelerated education plan in the semester in which they will complete 90 hours of undergraduate course work. In addition, students must have a sufficient foundation in chemical engineering course work to enable them to take graduate-level courses. University and department regulations stipulate that applicants must have a minimum GPA of 3.40, both overall and in chemical engineering courses. Students may apply by submitting an accelerated education plan, an application for senior privilege, and a copy of a Graduate School application to the graduate director in chemical engineering. The dean of The Graduate School has final authority for approving accelerated education plans.

Only graduate-level courses (numbered 500 and above) may be used for dual credit. No more than nine credit hours may be used as dual credit. The graduate courses used for dual credit must be taken during the student’s final undergraduate year. The student graduates with the B.S.E. degree after completing the B.S.E. degree requirements. At that time, the student is admitted to the graduate program with up to nine hours of graduate credit.

Programs

• Chemical Engineering, Minor (p. 382)
• Chemical Engineering, B.S.E. (p. 382)

Courses

ECHE 101 - Introduction to Chemical Engineering (2 Credits)
Introduction to engineering, with emphasis on chemical engineering. Problem-solving techniques, including the use of computer tools. Basic engineering design methods.
ECHE 202 - Exploring the Chemical Engineering Workplace (1 Credit)
Identification of career interests and active exploration of careers in chemical engineering.
Prerequisite or Corequisite: ECHE 300.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

ECHE 203 - Research in Chemical Engineering (1 Credit)
Introduction to research in Chemical Engineering, effective literature search, communication of results, lab safety, and research ethics.
Graduation with Leadership Distinction: GLD: Research

ECHE 300 - Chemical Process Principles (3 Credits)
Material and energy balances in the chemical process industry. Properties of gases, liquids, and solids. Two one-hour lectures and one three-hour laboratory period devoted to problem solving.
Prerequisites: MATH 141.
Prerequisite or Corequisite: CHEM 112 or CHEM 142.

ECHE 310 - Introductory Chemical Engineering Thermodynamics (3 Credits)
First law and second law of thermodynamics. Thermodynamic properties of single component systems. Analysis of power and refrigeration cycles.
Prerequisites: C or better in ECHE 300.
Prerequisite or Corequisite: MATH 241.

ECHE 311 - Chemical Engineering Thermodynamics (3 Credits)
Mass, energy, and entropy balance analysis of chemical engineering systems; evaluation of thermodynamic property changes of pure materials; solution thermodynamics of single-phase multicomponent systems; phase and chemical reaction equilibrium.
Prerequisites: C or better in ECHE 310 or ENCP 290.

ECHE 320 - Chemical Engineering Fluid Mechanics (3 Credits)
Fluid statics and dynamics with emphasis on chemical engineering applications.
Prerequisites: PHYS 211.
Prerequisite or Corequisite: MATH 241.

ECHE 321 - Heat-Flow Analysis (3 Credits)
Theory of heat transmission; mechanism, generation, distribution, and measurement; use of theory in practical equipment design.
Prerequisites: C or better in ECHE 320 or ENCP 360; C or better in MATH 242.
Prerequisite or Corequisite: D or better in ECHE 456.

ECHE 322 - Mass Transfer (3 Credits)
Molecular diffusion in fluids; diffusion in laminar and turbulent flow; momentum, transport analogies; interfacial mass transfer; design applications including humidification and absorption.
Prerequisites: D or better in ECHE 321.

ECHE 372 - Introduction to Materials (3 Credits)
Overview of the fundamental chemical aspects of materials; role of materials in applications in modern society by case studies of advances in new materials and processes.
Prerequisites: CHEM 112.

ECHE 389 - Special Topics in Chemical Engineering (3 Credits)
Course content varies and will be announced in the schedule of classes by title. May be repeated as topic varies.

ECHE 430 - Chemical Engineering Kinetics (3 Credits)
Concepts of chemical kinetics, batch and flow reactors, catalysts and reactor design.
Prerequisites: C or better in ECHE 311.
Prerequisite or Corequisite: D or better in ECHE 321.

ECHE 440 - Separation Process Design (3 Credits)
Design of stagewise chemical separation cascades; analysis of binary and ternary systems; multicomponent separations, plate and column specification procedures; distillation, crystallization, extraction, and leaching.
Prerequisites: C or better in ECHE 300.
Prerequisite or Corequisite: ECHE 311.

ECHE 442 - Adsorption Fundamentals and Processes (3 Credits)
Basic principles of adsorption and adsorption processes including adsorbents, thermodynamics, kinetics, fixed bed adsorption and cyclic adsorption processes.

ECHE 456 - Computational Methods for Engineering Applications (3 Credits)
Introduction to advanced computational tools for the analysis of chemical engineering systems. Initial and boundary value problems related to heat and mass transfer, reaction engineering, and parameter estimation.
Prerequisite or Corequisite: D or better in MATH 242.

ECHE 460 - Chemical Engineering Laboratory I (3 Credits)
Review of technical-report writing and presentation techniques; topics in heat transfer, fluid mechanics, and thermodynamics; verification of theoretical results and determination of design parameters. One lecture and six laboratory hours.
Prerequisite or Corequisite: ECHE 311, ECHE 321.

ECHE 461 - Chemical Engineering Laboratory II (3 Credits)
Continuation of ECHE 460; topics in mass transfer, kinetics, and process control.
Prerequisites: ECHE 460.
Prerequisite or Corequisite: ECHE 430, ECHE 440.

ECHE 465 - Chemical-Process Analysis and Design I (3 Credits)
Economics of chemical engineering projects related to typical corporate goals and objectives; process-flowsheet development techniques; review of shortcut design techniques; selection of profitability criteria.
Prerequisite or Corequisite: ECHE 430, ECHE 440.

ECHE 466 - Chemical-Process Analysis and Design II (3 Credits)
Continuation of ECHE 465; computer-aided design of chemical processes; written and oral presentation of a comprehensive design project.
Prerequisites: ECHE 430, ECHE 440, ECHE 465.
Prerequisite or Corequisite: ECHE 322, ECHE 550, ECHE 567.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships, GLD: Research

ECHE 497 - Thesis Preparation (1-3 Credits)
Completion of the thesis requirements for the departmental undergraduate research track. A maximum of three credits may be applied toward a degree.
Prerequisites: Three credit hours of ECHE 499, acceptance into the departmental undergraduate research track, and consent of instructor.
**ECHE 498 - Topics in Chemical Engineering (1-3 Credits)**
Reading and research on selected topics in chemical engineering. Course content varies and will be announced in the schedule of classes by title. May be repeated two times as topics vary. Pass-Fail grading.

**Prerequisites:** upper division standing.

**Graduation with Leadership Distinction:** GLD: Research

**ECHE 499 - Special Problems (1-3 Credits)**
Individual investigation or studies of special topics. A maximum of six credits may be applied toward a degree. Advance approval of project proposal by advisor and instructor.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships, GLD: Research

**ECHE 520 - Chemical Engineering Fluid Mechanics (3 Credits)**
Multi-phase pressure drop, phase contacting, flow through porous media, fluidization, mixing, and turbulence.

**Prerequisites:** ECHE 320 or ENCP 360.

**ECHE 521 - Computational Fluid Dynamics for Engineering Applications (3 Credits)**
Introduction to the use of computational fluid dynamics codes to analyze flow, heat, and mass transfer problems of practical engineering applications.

**Prerequisites:** ECHE 320 or EMCH 360 or ECIV 360 or ENCP 360 or AESP 265.

**ECHE 530 - Intermediate Chemical Engineering Kinetics (3 Credits)**
Intermediate concepts of chemical kinetics, batch and flow reactors, catalysts and reactor design, including non-ideal systems.

**Prerequisites:** C or better in ECHE 311.

**Prerequisite or Corequisite:** D or better in ECHE 321.

**ECHE 540 - Intermediate Separation Process Design (3 Credits)**
Intermediate level design of stagewise chemical separation cascades; analysis of binary and ternary systems; multicomponent separations, plate and column specification procedures; distillation, crystallization, extraction, and leaching.

**Prerequisites:** C or better in ECHE 300.

**Prerequisite or Corequisite:** D or better in ECHE 311.

**ECHE 550 - Chemical Process Dynamics and Control (3 Credits)**
Fundamental physical and chemical principles in mathematically modeling the dynamic response of chemical processes; feedforward and feedback control systems; design of control schemes for selected chemical processes.

**Prerequisites:** C or better in ECHE 300 and MATH 242; D or better in ECHE 456.

**ECHE 567 - Process Safety, Health and Loss Prevention (3 Credits)**
Reliability, availability, and fault-tree analyses, risk indices, hazard evaluation, vapor cloud modeling, toxicology, material safety classification and regulations, individual/corporate ethical responsibilities.

**Prerequisite or Corequisite:** ECHE 466.

**ECHE 571 - Corrosion Engineering (3 Credits)**
Basic principles of corrosion engineering developed from a chemical engineering approach to thermodynamics, kinetics, mass transfer, and potential theory.

**Prerequisites:** ECHE 311.

**ECHE 572 - Polymer Processing (3 Credits)**
Industrial polymers with emphasis on their characterization and on the modeling of the major polymer fabrication processes.

**ECHE 573 - Next Energy (3 Credits)**
An examination of energy technologies that will enable society to move from an economy based on fossil fuels to one based on sustainable energy.

**ECHE 574 - Combustion (3 Credits)**
Fundamental process and applications related to the broad field of combustion and energy generation including emissions control technologies.

**Prerequisites:** ECHE 430.

**ECHE 579 - Special Advanced Topics in Chemical Engineering (3 Credits)**
Course content varies and will be announced in the schedule of classes by title. May be repeated as topic varies.

## Chemical Engineering, Minor

## Chemical Engineering, B.S.E.

### Program Educational Objectives

Within six years of graduation, our graduates are expected to achieve one or more of the following milestones:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Learning Outcomes

- Students will apply knowledge of mathematics and chemistry to typical problems encountered in chemical engineering practice.
- Students will apply knowledge of engineering to typical problems encountered in chemical engineering practice.
- Students will demonstrate the use of chemical engineering science fundamentals in developing solutions of problems typical of those encountered in chemical engineering practice.
- Students will be able to design and conduct laboratory experiments, as well as to analyze and interpret data using factorial design methods.
- Students will be able to use chemical process simulators and other techniques, skills, and modern engineering tools necessary for chemical engineering practice.
- Students will be able to design a chemical engineering system, unit, or chemical process to meet desired needs.
- Students will be able to present technical material through oral presentations with visual aids.
- Students will be able to present technical material including analysis and conclusions through technical reports.
- Students will be able to work in multi-functional teams.
- Students will be able to find information and to learn independently.
- Students will demonstrate knowledge of and adherence to professional and ethical responsibility.
- Students will be able to describe how economic, political, and social issues affect and are affected by the chemical engineering profession.
- Students will comprehend the topics and ideas of familiar subjects in a foreign language.

Academic Standards

Program GPA

Program GPA requirement policies are described in the College of Engineering and Computing section of this bulletin. For the purpose of these policies, the following courses are used to determine the Program GPA for the Chemical Engineering B.S.E. program: all Lower Division Engineering courses, all Chemical Engineering Major courses, and all Engineering Electives.

Admissions

Entrance Requirements

Admission requirements and processes for freshman, transfer students, and former students seeking readmission are managed by the Office of Undergraduate Admissions (http://sc.edu/about/offices_and_divisions/undergraduate_admissions/).

Transfer applicants from regionally accredited colleges and universities must have a cumulative 2.75 GPA on a 4.00 scale to enter the College of Engineering and Computing. In addition, transfer applicants for the Aerospace Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, or Mechanical Engineering majors must also have completed a four semester-hour calculus course equivalent to MATH 141 with a grade of “C” or better.

Current University of South Carolina students who wish to enter the College of Engineering and Computing, and former students seeking readmission, must have an institutional GPA of 2.50 or better on at least 15 hours earned at UofSC. In addition, such applicants for the Aerospace Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, or Mechanical Engineering majors must also have completed a four semester-hour calculus course equivalent to MATH 141 with a grade of “C” or better.

The last 25% of a student’s degree must be completed in residence at the University, and at least half of the hours in the student’s major courses and in the student’s minor courses (if applicable) must be taken at the University.

Degree Requirements (131-138 hours)

See College of Engineering and Computing (p. 372) for progression requirements and special academic opportunities.

1. Carolina Core Requirements (34-43 hours)

CMW – Effective, Engaged, and Persuasive Communication: Written (6 hours)
- ENGL 101 - must be passed with a grade of C or higher
- ENGL 102

ARP – Analytical Reasoning and Problem Solving (8 hours)

must be passed with a grade of C or higher
- MATH 141
- MATH 142

SCI – Scientific Literacy (8 hours)

must be passed with a grade of C or higher
- CHEM 111 & CHEM 111L
- PHYS 211 & PHYS 211L
GFL – Global Citizenship and Multicultural Understanding: Foreign Language (0-6 hours)
Score two or better on foreign language placement test; or complete the 109 and 110 courses in FREN, GERM, LATN or SPAN; or complete the 121 course in another foreign language.
- CC-GFL courses (p. 742)

GHS – Global Citizenship and Multicultural Understanding: Historical Thinking (3 hours)
- any CC-GHS course (p. 742)

GSS – Global Citizenship and Multicultural Understanding: Social Sciences (3 hours)
- any CC-GSS course (p. 742)

AIU – Aesthetic and Interpretive Understanding (3 hours)
- any CC-AIU course (p. 742)

CMS – Effective, Engaged, and Persuasive Communication: Spoken Component 1 (0-3 hours)
- PHIL 325 (CMS/VSR overlay)

INF – Information Literacy 1 (0-3 hours)
- any overlay or stand-alone CC-INF course (p. 742)

VSR – Values, Ethics, and Social Responsibility 1 (0-3 hours)
- PHIL 325 (CMS/VSR overlay)

1 Carolina Core Stand Alone or Overlay Eligible Requirements — Overlay-approved courses offer students the option of meeting two Carolina Core components in a single course. A maximum of two overlays is allowed. The total Carolina Core credit hours for this program must add up to a minimum of 34 hours.

2. College Requirements (0 hours)
No college-required courses for this program.

3. Program Requirements (64-65 hours)
Supporting Courses (64-65 hours)
Foundational Courses (20 hours)
Complete all of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Total Credit Hours 33

Concentrations (15 hours) optional

Students may pursue any of the following concentrations by choosing specified engineering, technical, and chemistry elective courses to fulfill degree requirements:

- Concentration in Biomolecular Engineering
- Concentration in Energy
- Concentration in Interdisciplinary Engineering
- Concentration in Materials
- Concentration in Environmental Engineering
- Concentration in Numerical Methods and Computing

To fulfill the requirements for any concentration, a student must complete five courses (15 credit hours) in one area. Consult the department website or advising handbook for the most up to date list of approved concentration courses. Also note that the lists may not include all of the prerequisites for some of the listed courses.

Concentration in Biomolecular Engineering (15 hours)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 302</td>
<td>Cell and Molecular Biology ¹</td>
<td>3</td>
</tr>
<tr>
<td>or BMEN 240</td>
<td>Cellular and Molecular Biology with Engineering Applications</td>
<td></td>
</tr>
<tr>
<td>CHEM 550</td>
<td>Biochemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BMEN 271</td>
<td>Introduction to Biomaterials</td>
</tr>
<tr>
<td>BMEN 391</td>
<td>Kinetics in Biomolecular Systems</td>
</tr>
</tbody>
</table>

Select two of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 101</td>
<td>and BIOL 102 are prerequisites for BIOL 302. Multiple distinct 389/589 courses may be counted.</td>
</tr>
</tbody>
</table>

Concentration in Energy (15 hours)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Total Credit Hours 15

### B.S.E. with Distinction

The B.S.E. with Distinction is available to students majoring in chemical engineering who wish to participate in significant research and/or design activities in chemical engineering with a faculty mentor.

A minimum GPA of 3.50 in major courses, 3.50 in all engineering courses, and 3.50 overall is required at the time the student applies to enter the departmental undergraduate research track.

The student should apply to enter the departmental undergraduate research track and choose the members of the thesis committee as early as possible but in all cases at least one year before submitting and defending the thesis. The thesis committee will consist of a thesis advisor, who must be a tenure-track faculty member in chemical engineering, and two other tenure-track or research faculty members in chemical engineering or in any other department.

By the end of the semester in which the student is admitted into the research track, a short description of the research must be agreed upon by the thesis committee and the student, and filed in the college office. Projects involving research and/or design are acceptable. The design projects or research projects for ECHE 465, ECHE 466, ECHE 567, or other courses are not acceptable as the thesis. The student must also choose three credit hours of engineering or technical elective courses related to the thesis topic. The course(s) must be approved by the thesis committee.
and completed by the student at least one semester before the thesis is submitted and defended. Before submitting and defending the thesis, the student must have completed three credit hours of ECHE 499 under the thesis advisor, preferably one credit hour per semester. During the semester in which the thesis is submitted and defended the student must also complete three credit hours of ECHE 497, one credit hour under each of the three members of the thesis committee. At least two months before submitting and defending the thesis, the student must present a progress report to the thesis committee orally and in writing.

By the end of his/her last semester, the student must have presented the research at a national meeting of a professional society (such as AIChE, ACS, ECS, etc.), at Discovery Day at USC, or at a comparable venue. The student must also submit a written thesis describing the research and defend it orally before the thesis committee. The defense must be announced at least one week in advance and be open to the general public.

Students who successfully fulfill all of these requirements with a GPA of at least 3.50 in the three hours of ECHE 497, 3.50 in all major courses, 3.50 in all engineering courses, and 3.50 overall, will be awarded their degree with “Distinction in Chemical Engineering” upon graduation.

Major Map
A major map is a layout of required courses in a given program of study, including critical courses and suggested course sequences to ensure a clear path to graduation.

Major maps are only a suggested or recommended sequence of courses required in a program of study. Please contact your academic advisor for assistance in the application of specific coursework to a program of study and course selection and planning for upcoming semesters.

Chemical Engineering, B.S.E.

Civil and Environmental Engineering

Department Website (https://sc.edu/study/colleges_schools/engineering_and_computing/study/civil_and_environmental_engineering/)

Juan M. Caicedo, Chair

The Department of Civil and Environmental Engineering offers a Bachelor of Science in Engineering degree with a major in civil engineering. Civil engineering is the planning, design, and construction of projects that define a civilization. Civil engineers have built landmarks that now stand as tributes to the profession’s creative spirit and ingenuity. Civil engineering is everywhere: the buildings in which we live and work, the roads on which we travel, the water we drink, the bridges we cross. Civil engineers design industrial and commercial buildings, bridges, towers, dams, tunnels, and mass transportation facilities. They manage urban planning and public works projects, perform air quality monitoring, and plan and design waste collection and handling systems.

Program Educational Objectives

1. Graduates of the Civil engineering program should demonstrate their continuing successful practice as civil engineers and/or their pursuit of post baccalaureate education and/or their engagement in other professional careers that involve the application of engineering concepts.

2. Graduates of the civil engineering program should demonstrate a commitment for continuing professional development and life-long learning.

3. Graduates of the civil engineering program should demonstrate the ability to advance within their profession to positions of greater responsibility and leadership.

The first two years of the undergraduate curriculum form the necessary foundation in mathematics, computer programming, the physical sciences, and basic engineering sciences, together with courses in the liberal arts, to provide the student with a well-balanced educational experience. The upper-division civil engineering program includes the study of construction materials, structural analysis and design, soil behavior, systems analysis, water supply, and pollution control. The department offers elective courses in such areas of engineering as environmental, geotechnical, structural, transportation, and water resources.

The civil engineering graduate is prepared to enter the job market with federal, state, and municipal agencies and with private consulting firms involved with aspects of planning, design, construction, or environmental control. Students may, following graduate study, also pursue careers in teaching and in research and development.

The Civil and Environmental Engineering Department at the University of South Carolina uses the term “program educational objective” to describe the expected accomplishments of our students in a few years (three to five years) following graduation. The term “student learning outcome” is used to describe the knowledge and skills at the time of graduation.

Bachelor’s/Master’s Accelerated Program

A combined B.S.E./M.S. or M.E. degree program is available to undergraduate civil and environmental engineering students with GPAs of 3.50 or above and 90 or more hours earned toward their baccalaureate degrees. Up to 6 credit hours of 500-level or above courses may be applied toward both the B.S.E. and M.S. or M.E. in Civil Engineering degree requirements. The approval of the student’s advisor and the Department of Civil and Environmental Engineering graduate director are required. Questions about this program may be directed to the civil and environmental engineering graduate director.

Programs

- Civil Engineering, B.S.E. (p. 392)

Courses

ECIV 101 - Introduction to Civil Engineering (3 Credits)
Fundamental concepts in each of the disciplines of civil engineering are discussed. Critical thinking skills are formally fostered by hands-on experiences and group discussions.

ECIV 111 - Introduction to Engineering Graphics and Visualization (3 Credits)
Principles and practice of visualization and graphical representation using modern computer-aided design tools.

ECIV 200 - Statics (3 Credits)

Prerequisites: C or better in MATH 141.
ECIV 201 - Computational Methods for Civil Engineering (3 Credits)
The use of computational tools and techniques for solving civil and environmental engineering problems. Overview of numerical methods including roots of equations, systems of linear equations, interpolation, and integration. Use of spreadsheets to analyze civil and environmental systems.
Prerequisites: C or better in MATH 142 and ECIV 200.

ECIV 210 - Dynamics (3 Credits)
Kinematics of particles and rigid bodies. Vector representation of force and motion. Free-body diagrams, application of energy and momentum methods to solve problems. Rigid body and central force motion.
Prerequisites: C or better in ECIV 200 and in MATH 142.

ECIV 220 - Mechanics of Solids (3 Credits)
Prerequisites: C or better in ECIV 200 or ENCP 200 and in MATH 142.

ECIV 300 - Civil Engineering Measurements (3 Credits)
Theory and application of plane surveying and mapping techniques. Lecture plus laboratory.
Prerequisites: MATH 241.

ECIV 303 - Civil Engineering Materials (3 Credits)
Mechanical and thermal properties of mineral aggregates, cements, concrete, timber, asphalt, metals, and plastics.
Prerequisites: C or better in ECIV 220 or ENCP 260.

ECIV 303L - Civil Engineering Materials Laboratory (1 Credit)
Experiments, exercises, and demonstrations to accompany ECIV 303. Three hours per week. 2015.
Prerequisites: ECIV 201 or ENCP 201.

Corequisite: ECIV 303.

ECIV 307 - Professional Development for Civil Engineers (3 Credits)
Prerequisite or Corequisite: D or better in ECIV 320, ECIV 330, ECIV 340, ECIV 350, or ECIV 362.

ECIV 320 - Structural Analysis I (3 Credits)
Prerequisites: ECIV 201; MATH 242; C or better in ECIV 220.

ECIV 325 - Structural Steel Design (3 Credits)
Behavior and design of steel beams, columns, and tension members; strength and stability; design of connections using welded, bolted and riveted construction.
Prerequisites: C or better in ECIV 320.

ECIV 327 - Reinforced Concrete Design (3 Credits)
Behavior and design of reinforced concrete beams, columns, continuous beams and one way slabs, and footings.
Prerequisites: C or better in ECIV 320.

ECIV 330 - Introduction to Geotechnical Engineering (3 Credits)
Engineering properties of soil and rock; hydraulic conductivity, flow nets, drainage design; consolidation theory, shearing strength of soil.
Prerequisites: C or better in either ECIV 220 or ENCP 260.

ECIV 330L - Geotechnical Laboratory (1 Credit)
Laboratory associated with ECIV 330. Soil mechanics experiments, exercises, and demonstrations. Three hours per week. 2015.
Prerequisites: ECIV 201 or ENCP 201.

Corequisite: ECIV 330.

ECIV 340 - Introduction to Transportation Engineering (3 Credits)
Transportation design, planning, and operational analysis, including roadway, airway, and railway systems; transportation elements, including traveled way, vehicle, control, terminals, and advanced technology; traffic data collection, interpretation, and analysis.
Prerequisites: D or better in ECIV 201 or D or better in ENCP 201 and D or better in STAT 509 or D or better in STAT 511.

ECIV 340L - Transportation Engineering Laboratory (1 Credit)
This course covers the principles of distances, elevations and angles that pertain to roadways, basic theories in engineering measurements and surveying calculations, and an introduction to mapping, for transportation engineering applications.
Prerequisite or Corequisite: ECIV 340.

ECIV 350 - Introduction to Environmental Engineering (3 Credits)
Concepts of environmental engineering, including air and water pollution, solid and hazardous waste disposal, and noise pollution. Qualitative and quantitative development of engineering techniques for pollution control.
Prerequisites: D or better in CHEM 111 or CHEM 141; C or better in Math 142.

ECIV 350L - Introduction to Environmental Engineering Laboratory (1 Credit)
Physical, chemical, and biological analysis of water and wastewater. Three laboratory hours per week.
Prerequisites: ECIV 201.

Corequisite: ECIV 350.

ECIV 360 - Fluid Mechanics (3 Credits)
Principles of fluid statics and dynamics. Conservation of mass, momentum, and energy. Similitude and dimensional analysis, open channel flow, lift and drag forces, and introduction to turbulent flow.
Prerequisite or Corequisite: ECIV 210 and MATH 241.

ECIV 362 - Introduction to Water Resources Engineering (3 Credits)
Application of fluid mechanic principles to water resources engineering problems; pipe systems, pumps, open channel flow, peak runoff, seepage, hydraulic structures.
Prerequisites: C or better in either ECIV 360 or ENCP 360.

ECIV 362L - Introduction to Water Resources Engineering Laboratory (1 Credit)
Experiments, exercises, and demonstrations on flow in pipes and open channels, pumps, flow measurement, seepage, and infiltration.
Prerequisites: ECIV 201.

Corequisite: ECIV 362.
ECIV 405 - System Applications in Civil Engineering (3 Credits)
Systems approach to analysis and design; application of engineering economic principles to the evaluation of design alternatives; deterministic modeling and optimization emphasizing civil engineering applications.
Prerequisites: D or better in ECIV 201 or ENCP 201.

ECIV 426 - Structural Design (3 Credits)
Design of steel structures including elastic and plastic design concepts. Design of concrete structures including continuous members and long columns.
Prerequisites: ECIV 325 or ECIV 327.

ECIV 470 - Civil Engineering Design (4 Credits)
Application of hydraulic, geotechnical, and structural principles in design; project scheduling; cost estimation; ethics; environmental and social impact; design drawings; report documents.
Prerequisites: D or better in ECIV 307
Prerequisite or Corequisite: D or Better in ECIV 111 or ENCP 102; D or better in two ECIV Distribution.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships, GLD: Research

ECIV 490 - Special Topics (0-3 Credits)
Course content varies and will be announced in the schedule of classes by course title. May be repeated as topic varies. A maximum of twelve credits may be applied towards a degree.
Graduation with Leadership Distinction: GLD: Research

ECIV 497 - Fundamentals of Engineering Preparation (1 Credit)

ECIV 499 - Independent Study in Civil and Environmental Engineering (1-3 Credits)
Individual investigation or studies of special topics. A maximum of three credits may be applied toward a degree.
Prerequisites: approval of project proposal by instructor; USC/GPA 2.8.
Graduation with Leadership Distinction: GLD: Research

ECIV 502 - Life Cycle Assessment of Civil and Environmental Engineering Systems (3 Credits)
The steps of conducting and interpreting an environmental life cycle assessment on civil and environmental engineering systems. Fundamentals associated with conducting a life cycle assessment, including goal and scope, inventory analysis, impact assessment, and interpretation.
Prerequisites: D or better in ECIV 350 and D or better in either ECIV 303, ECIV 325, ECIV 327, ECIV 330, ECIV 340 or ECIV 362.

ECIV 503 - Structural Modeling and Experimental Methods (3 Credits)
Introduction of structural modeling; strain gauge instrumentation; force, displacement, acceleration, pressure, temperature measurements; concrete and steel modeling; size effects; analysis of experimental data.
Prerequisites: ECIV 327.

ECIV 520 - Structural Analysis II (3 Credits)
Advanced methods of structural analysis with emphasis on matrix methods. Development of the generalized matrix force and matrix displacement methods of static analysis, with applications to trusses and frames.
Prerequisites: ECIV 320.

ECIV 521 - Numerical Methods in Mechanics (3 Credits)
Prerequisites: D or better in ECIV 201 or ENCP 201.

ECIV 524 - Structural Vibrations (3 Credits)
Response of single- and multiple-degree of freedom structurally dynamic systems to impact, harmonic, wind, and seismic excitations.
Prerequisites: ECIV 320.

ECIV 526 - Timber and Masonry Design (3 Credits)
Basic engineering properties of timber and masonry materials, design methods and philosophies for timber and masonry structures. Particular attention is paid to current codes, specifications and analysis.
Prerequisites: C or better in ECIV 320.

ECIV 530 - Foundation Analysis and Design (3 Credits)
Subsurface investigation procedures. Theoretical and practical aspects of the design of earth retaining structures, spread footings, and pile foundations.
Prerequisites: ECIV 330.

ECIV 531 - Design of Earth Structures (3 Credits)
Geotechnical engineering problems associated with the behavior of earth masses. Soil shear strength, lateral earth pressure, design of retaining structures, slope stability, water flow through soils.
Prerequisites: ECIV 330.

ECIV 533 - Geosynthetics and Geotechnical Design of Landfills (3 Credits)
Principles for the design, construction, and performance of waste containment systems. Characterization of barrier materials; geosynthetics; design of liner and leachate collection systems; stability and deformation analyses of landfills.
Prerequisites: ECIV 330.

ECIV 535 - Geotechnical Engineering in Transportation (3 Credits)
Remote sensing and engineering geology. Field and laboratory testing. Design and maintenance methods for flexible and rigid pavements. Topics in tunnel design and buried conduit.
Prerequisites: ECIV 330.

ECIV 539 - Experimental Methods in Geotechnical Engineering (3 Credits)
Overview of transducers, signal conditioning and data acquisition; test control methods, data analysis and measurement errors; testing systems to measure soil strength, stiffness, and hydraulic conductivity; laboratory projects and examinations.
Prerequisites: ECIV 330, ECIV 330L.

ECIV 540 - Transportation Systems Planning (3 Credits)
Fundamental interactions between supply and demand in transportation systems. Modeling transportation demand and trip-making behavior. Evaluation of alternatives for decision making.
Prerequisites: ECIV 340.
ECIV 541 - Highway Design (3 Credits)
Design of transportation facilities using relevant tools and guidelines with emphasis on physical and operational aspects of arterials, freeways, intersections, and interchanges, including geometry, capacity, control, and safety.
Prerequisites: D or better in ECIV 111 or ENCP 102 and D or better in ECIV 340.

ECIV 542 - Traffic Engineering (3 Credits)
Capacity analysis of freeways and arterials. Traffic flow characteristics and basic relationships among traffic flow parameters. Signalized and unsignaled intersection control and signal timing design.
Prerequisites: ECIV 340.

ECIV 543 - Traffic Safety Analysis (3 Credits)
Research concepts and methodologies to enable students to identify the underlying reasons and factors that contribute to traffic crashes and determine appropriate countermeasures.
Prerequisites: D or better in ECIV 340.

ECIV 551 - Elements of Water and Wastewater Treatment (3 Credits)
Unit operations and processes employed in the physical, chemical, and biological treatment of water and wastewater. Design of water and wastewater treatment systems.
Prerequisites: ECIV 350.

ECIV 555 - Principles of Municipal Solid Waste Engineering (3 Credits)
Fundamentals and engineering principles of solid waste generation, characterization, collection and transport, source reduction and recycling, and physical, chemical, and biological treatment strategies.
Prerequisites: ECIV 350.

ECIV 556 - Air Pollution Control Engineering (3 Credits)
Introduction to the sources of air pollution and the engineering principles used for control and prevention.
Prerequisites: ECIV 350.

ECIV 557 - Sustainable Construction for Engineers (3 Credits)
Instruction to sustainable engineering design alternatives and principles for construction and site development from preconstruction through design and the construction phase.
Prerequisites: ECIV 350 and ECIV 570.

ECIV 558 - Environmental Engineering Process Modeling (3 Credits)
Modeling fate and transport phenomena in environmental processes with applications in engineered unit operators and natural systems.
Prerequisites: ECIV 350 and MATH 242.

ECIV 560 - Open Channel Hydraulics (3 Credits)
Steady and unsteady flows in single or multiple-channel systems.
Prerequisites: ECIV 360.

ECIV 562 - Engineering Hydrology (3 Credits)
Applications of hydrologic techniques to design problems; stormwater simulation models; urban stormwater.
Prerequisites: ECIV 360.

ECIV 563 - Subsurface Hydrology (3 Credits)
Hydrologic cycle, subsurface physical properties, equations of groundwater flow, well flow, well design, groundwater resource development, design of dewatering systems, groundwater contamination.
Prerequisites: ECIV 201, ECIV 360.

ECIV 570 - Land Development for Engineers (3 Credits)
Fundamentals of designing and permitting the conversion of land to new or altered states, including environmental issues, traffic and parking, utility resources, site engineering, ADA, safety, planning, and zoning requirements.
Prerequisites: Three from ECIV 320, ECIV 330, ECIV 340, ECIV 350, and ECIV 362.

ECIV 580 - Railway Engineering I (3 Credits)
Introduction to the analysis and design of the railway infrastructure for freight and passenger systems to include track and track support systems, grade crossings, special trackwork, construction, inspection, assessment and compliance.
Prerequisites: ECIV 303, ECIV 320, ECIV 330, ECIV 340.
Corequisite: ECIV 303.

ECIV 582 - Operation and Logistics of Railway Systems (3 Credits)
Principles of rail operations; Network management; Best practices for train planning, performance management and delivery of service; technical elements of a railway from an operations perspective (train controls, signaling, communications, yards, tractive power etc).
Prerequisites: ECIV 340.

ECIV 588 - Design of Railway Bridges and Structures (3 Credits)
Introduction to railway infrastructure; Structural design considerations and criteria of railway structures; Bridge types and components; Planning and preliminary design of modern railway bridges; Loads and forces; Structural analysis and design of steel railway bridges and components.
Prerequisite or Corequisite: ECIV 330; ECIV 325 or ECIV 327.

Civil Engineering, B.S.E.

Learning Outcomes

- Graduates of the program will have an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Graduates of the program will have an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Graduates of the program will have an ability to communicate effectively with a range of audiences
- Graduates of the program will have an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- Graduates of the program will have an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- Graduates of the program will have an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Graduates of the program will have an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
Academic Standards

Entrance Requirements
