### Upper Level Course Requirements

The goals for the second and third year curriculum, as defined by the Curriculum Committee, are as follows:

- to expand the student's substantive knowledge of basic subject matters;
- to expand the student's range of legal skills, to expand the student's perspective on law and the legal process;
- to permit the intensive pursuit of specialized subjects by the student;
- to permit faculty to teach courses related to areas of individual research, interest, and expertise; and
- to allow for experimentation in subject matter and pedagogical methods.

Note: The Associate Dean for Academic Affairs will hold a meeting for students during the spring of each year, prior to registration for the following year, to guide students in selecting courses and to answer any questions they may have. Students are warned, however, that they have the responsibility of complying with all requirements for their degrees. The Office of the Registrar/Academic Services does not maintain a “running audit” of student’s progress through Law School. The Registrar/ Director of Academic Services will catch deficiencies only when checking the records of would-be graduating 3Ls.

While most upper level courses are elective, the following courses are required for graduation.

1. **Professional Responsibility.** Students must earn a grade of C or better in Professional Responsibility (2 credit hours) or Problems in Professional Responsibility (3 credit hours).

2. **A Professional Skills Course (not required for first year students entering in Fall 2017).** Students must earn a grade of Satisfactory, if the course is graded on a pass/fail basis, or a grade of C or better, if the course is graded on a letter basis, in at least one course that is designated as a professional skills course. A course taken to fulfill the professional skills requirement cannot fulfill the graduation writing requirement. Students must obtain the prior written approval of the Associate Dean for Academic Affairs in order to satisfy the professional skills course requirement by taking a course outside the Law School.

Experiential Courses (starting with students entering the first year Fall 2016 and thereafter) must earn a grade of Satisfactory, if the course is graded on a pass/fail basis, or a grade of C or better, if the course is graded on a letter basis, in at least six credit hours of courses designated as experiential courses. Courses taken to fulfill
the experiential requirement cannot fulfill the graduation writing requirement.

Students must obtain the prior written approval of the Associate Dean for Academic Affairs in order to satisfy the experiential course requirement by taking courses outside the Law School.

3. A Perspective Course. The faculty believes that graduates of the School of Law should understand the law in its broader social context, have some sense of its history, and appreciate the philosophical underpinnings of its operation.

Perspective Course Requirement
The perspective course requirement may be satisfied during either the second or third year.

Courses taken outside the Law School may not be used to satisfy the Law School perspective course requirement except where:

1. there is good cause for not taking a perspective course at the Law School; and
2. the course involved is the equivalent in educational value to a perspective course offered in the Law School.

Students must obtain the prior written approval of the Associate Dean for Academic Affairs in order to satisfy the perspective course requirement by taking a course outside the Law School. A perspective course taken by a student prior to enrollment in the Juris Doctor program will not satisfy the perspective course requirement.

Writing Requirement
To satisfy the writing requirement, a student must complete a substantial legal research project that meets the criteria in subparagraph “a” or satisfies the requirements of a proposal approved by the Curriculum Committee under subparagraph “b”.

1. To satisfy the writing requirement a paper must:
   a. Be in the form of a law review article, brief, or memorandum of Law
   b. Be prepared under the supervision of a member of the faculty. The supervision requirement may be satisfied by:
      i. taking a course with not more than 20 students in which all students are required to write a paper complying with the writing requirement (identified in the registration materials as a “writing seminar”); or
      ii. through independent research supervised by a faculty member. No faculty member shall supervise more than five such papers in any given semester.
   c. Be submitted in final written form of approximately 30 to 50 pages in length, after the submission of an outline and draft that have been critiqued by the professor.
   d. When graded, receive a grade of at least a C. If written under a pass/fail election, receive a grade of S. Note that under a pass/fail election a grade of C or higher is recorded as an S, and a grade of lower than a C is recorded as an F

A brief submitted in a moot court competition can satisfy the writing requirement if:
   i. an outline and a draft of the brief has been critiqued and approved by a supervising faculty member; and
   ii. the student contributes at least 30 pages to the brief. If the rules of the competition in which the brief was submitted preclude faculty involvement, the student must revise the brief to the satisfaction of the supervising faculty member after it has been submitted in the competition. This revision can include an outline and preliminary draft. If a student’s contribution to the brief is less than 30 pages, the student may satisfy the page requirement by submitting a supplemental memorandum.

A note submitted to a law journal by a member of that journal can satisfy the writing requirement if it meets the requirements above and the student does not receive degree credit for the note under credit for serving on the editorial board.

Deadline for completion of the writing requirement. Unless the paper is written in a course that a student takes in his/her final semester, May graduates must submit their papers in final form by January 15, and December graduates must submit their papers in final form by September 1.

Passing Grade in 90 Semester Hours of Course Work; Effect of F
Students must successfully complete at least 90 semester hours of course credit. In addition to earning 90 credit hours students must complete Professional Responsibility or Problems in Professional Responsibility and the writing requirement with a grade of “C” or better.

Note: Civil Procedure II, Constitutional Law II and Criminal Procedure are not required for students entering in the Fall 2011 and later. If a student has been required to take these courses they must earn a grade of “D” or better.

Students failing to meet these requirements are required to repeat the courses, but the initial grade will remain on the student’s record. Law school courses taken by a student prior to enrollment in the Juris Doctor program will not be included in determining whether a student has met the 90 credit hour requirement. For good cause, the Associate Dean for Academic Affairs may waive the requirement to retake a required upper level course.

Cumulative Grade Point Average of Not Less than 2.00
Students must have a cumulative grade point average of 2.00 or better for all work taken for Law School credit.

Satisfaction of the Residency Requirement
Students must complete the equivalent of six (6) full semesters of law school residency, four (4) of which must have been completed while matriculating as a student at the University of South Carolina School of Law. A student obtains residency credit for a semester if the following requirements are met:
1. The student maintains registration for a minimum of twelve (12) law hours; and
2. The student receives a grade of Satisfactory or a letter grade of D or better in at least ten (10) credit-hours of course work.

If the student does not comply with either of these requirements, residency credit will not be granted for the semester in which the noncompliance occurs.

Merely complying with the minimum residency requirement of 12 credit-hours per semester for each semester in the second and third years will not enable a student to meet the 90 credit-hour requirement for graduation.

By attending summer school students may reduce their course loads during either the fall or spring semesters, but are still subject to the 12 law hours per semester rule.

In order to accelerate graduation by one semester (December graduation), a student must matriculate in two summer sessions and satisfactorily complete not less than 12 hours in the two sessions, with a minimum of 6 hours being required in each summer session. To satisfy this requirement, students taking Maymester courses must also take at least one course each summer that meets during the regular seven-week summer session.

Completion of Course Study for Degree Requirement

Students must complete all degree requirements no later than 84 months (7 years) after first beginning as a law school student either at the University of South Carolina School or at a law school from which transfer credits has been accepted.

Public Administration / Law, M.P.A. / J.D.

Degree Requirements M.P.A. (39 Hours) / J.D. (90 Hours)

This degree program is offered in cooperation with the School of Law. It allows M.P.A. and J.D. students to receive “dual credit” for 21 semester hours of course work and acquire both a J.D. and a M.P.A. degree with fewer total credit hours than it would take to receive each degree independently. To be eligible, students must apply to, and be accepted by, both programs.

Social Work / Law, M.S.W. / J.D.

Degree Requirements M.S.W (60 Hours) / J.D. (90 Hours)

The joint M.S.W./J.D. degree program provides students an opportunity to complete these complementary professional programs in 135 semester hours of course work. Normally the two degrees, if taken separately, would require a minimum of 150 semester hours of study. The School of Law accepts up to 9 hours of social work courses as electives in its program, and the College of Social Work accepts up to 6 hours of law courses towards the M.S.W. degree. Formal admission to both programs under the standards established by each is required. The first year of law studies must be completed at one time. For details, please refer to the law school bulletin.

Learning Outcomes

Goal 1

Graduates should be able to apply well-developed analytical skills to resolve legal problems with at least a fundamental knowledge across a broad range of substantive doctrines.

Curriculum

In their first-year, law students receive instruction in 9 substantive courses, in addition to Legal Writing and Legal Research. The study of appellate cases and classroom discussion are designed to build analytical skills, while also providing doctrinal coverage in the fields studied. In their second and third years, students are required to take courses in Civil Procedure II, Criminal Procedure, Professional Responsibility, and Constitutional Law and are strongly encouraged to take a second semester of Income Taxation, Wills and Trusts, Corporations, and Evidence. These ensure that all students are exposed to a range of core legal concepts.

- Learning Outcome 1
  At the end of their first year, students will be able develop and apply a reasoned analytical framework for identifying and resolving problems presented to them.
- Learning Outcome 2
  By the end of their first year, students will be able to explain and apply basic civil litigation procedural rules.
- Learning Outcome 3
  At the end of their first year, students will recognize the need for and will have develop the ability to engage in life-long, independent learning, including the performance of independent legal research.
- Learning Outcome 4
  At the end of their second year, students will be able to relate concepts learned in different courses and apply well-developed critical thinking skills.
- Learning Outcome 5
  By the end of their third year, students will be able to analyze and solve complex real world legal problems.
- Learning Outcome 6
  By the end of their third year, students will be able to demonstrate a more advanced understanding of the fundamental concepts and policies underlying at least one area of law

Goal 2

Graduates should be able to effectively use basic practice, research, and communication skills.

Curriculum

First-year students develop their professional writing and research skills by taking legal writing and legal research. Each graduate is required to successfully complete at least one course designated by the faculty as a practice skills course, which includes substantial instruction in practice skills and individual feedback on student skills performance. In AY 2010-11, the law school will offer 29 sections of courses designated as professional skills courses. Other courses will have substantial practical drafting components. Skills taught in these courses include legal writing, advocacy, and drafting, as well as interviewing, counseling, negotiation, and methods of alternative dispute resolution. During Maymester and
At the end of their third-year, students will be able, in an appropriate situation, to consider an issue using the principles of another discipline, in addition to traditional legal analysis.

**Academic Regulations**

**Honor Code and Disciplinary Procedures**

**Definitions**

1. Academic Program
   “Academic Program” means any graduate or undergraduate course, independent study or research for academic credit, internship, externship, clinical program, practicum, field placement, or other form of study or work offered in furtherance of the academic mission of the School of Law. Academic work includes any work performed or assigned to be performed in connection with any Academic Program. Academic Program includes Extracurricular Activities.

2. Advisor
   “Advisor” means any person chosen by the Student to represent the Student and to present arguments and evidence on the Student’s behalf to a Hearing Panel.

3. Chair of Hearing Panel
   “Chair of the Hearing Panel” means a faculty member nominated by the Dean to serve the role of carrying out the duties specified in Section 3 of these Procedures.

4. Code
   “Code” means the University of South Carolina School of Law Honor Code.

5. Day
   “Day” means the period of time as computed under Rule 6(a) of the South Carolina Rules of Civil Procedure.

6. Dean
   “Dean” means the Dean of the School of Law or a designee of the Dean.

7. Extracurricular Activity
   “Extracurricular Activity” means an activity performed by a Student associated with the School of Law or the University of South Carolina that falls outside the realm of normal school curriculum. Extracurricular Activity includes, but is not limited to, participation on Moot Court and Mock Trial teams, law journals, and other student organizations.

8. Hearing Panel
   “Hearing Panel” means a 5 member panel designated to determine whether a Student has violated the Code and, if so, to determine what sanction that Student should receive. The Hearing Panel is comprised of 3 full-time faculty members, appointed by the Dean, and 2 Honor Council members, selected by the Chair of the Honor Council.

9. Investigator
   “Investigator” means a person appointed by the Dean for purposes of carrying out the duties of Sections 4.2 and 4.3. The Investigator may not be the Presenting Party.

10. Instructor
“Instructor” means any person designated by the School of Law to teach or otherwise counsel students in an Academic Program.

11. Presenting Party
   “Presenting Party” means a person appointed by the Dean whose purpose is to present the case against the Student on behalf of the School of Law. The Presenting Party may not be the Dean or the Investigator.

12. School of Law
   “School of Law” means the University of South Carolina School of Law.

13. Statement of Allegations
   “Statement of Allegations” means a document prepared by the Presenting Party for the purposes of notifying the Student of the facts alleged to constitute a violation of the Code and informing the Hearing Panel of the matter before them.

14. Student
   “Student” means any person who has accepted admission to the School of Law and has neither graduated, transferred to another institution or field of study, withdrawn, nor been expelled.

15. University Committee
   “University Committee” means the University Academic Responsibility Committee. This committee consists of five faculty members, two undergraduate students, and two graduate students.

Honor Code
Preamble
The preparation of Students for service in the legal profession requires not only academic rigor, but also adherence to the high standards of personal character and integrity expected of attorneys. As with the standards of the legal profession, the foundation of this Code is self-regulation. Whenever a Student is uncertain as to whether conduct would violate this Code, it is the Student’s responsibility to seek clarification from the Instructor in the affected Academic Program prior to engaging in such conduct.

Section 1. General Applicability.

The following rules govern the conduct of all Students at the School of Law. Former Students of the School of Law remain subject to this Code for violations committed while a Student. An applicant who later becomes a Student at the School of Law is subject to this Code with respect to any statements or representations made in connection with the application process.

Section 2. Prohibitions.

1. A Student shall not lie.
   A lie includes any form of dishonesty or misrepresentation, including the making of a statement known to be false or the willful omission of a material fact necessary to avoid a misrepresentation of the truth. A Student’s knowledge of a statement’s falsity may be inferred from the circumstances. This rule applies only to statements or omissions made in connection with an Academic Program at the School of Law. Examples include, but are not limited to, a Student’s communications with faculty, staff, or other Students of the University relating to academic issues; communications made in connection with the Student’s use of University facilities or services; and communications made while enrolled at the School of Law with third persons, such as a prospective employer, regarding the activities or record of the Student.

2. A Student shall not cheat or plagiarize.

For purposes of this rule, cheating is construed broadly to include using unauthorized materials, disregarding a professor’s rule of anonymity, giving or receiving any unauthorized assistance in the completion of any academic course work, paper, examination, or in connection with a Student’s participation in any Extracurricular Activity. Plagiarism is the use or close imitation of the language and thoughts of another author and the representation of them as one’s own work. Plagiarism includes quoting, paraphrasing, or otherwise using another’s words or ideas as one’s own without crediting the source in a way that clearly indicates the nature and extent of the source’s contribution to the Student’s work. An act of cheating or plagiarism in which the Student does not actually obtain a benefit from the conduct is an offense under this section. An act of cheating or plagiarism without specific intent is an offense under this section.

3. A Student shall not commit any criminal act.
   For purposes of this rule, a criminal act is one that reflects adversely on a Student’s honesty, trustworthiness, or fitness for admission to the practice of law. This rule will be interpreted in accordance with the Model Rules of Professional Conduct § 8.4 (2008). Any criminal act that reflects adversely on the Student’s honesty, trustworthiness, or fitness for admission to the practice of law and which occurs during the time that a Student is subject to this Code is a violation of this rule, regardless of where the conduct occurs. A conviction or plea of guilty in a criminal matter is conclusive proof that the Student committed the act that is the subject of that conviction or plea. The absence of a criminal conviction does not preclude a finding that a criminal act occurred for purposes of this rule.

Section 3. Duties.

1. A Student shall report those who they believe have violated this Code. A Student who has information sufficient to create a reasonable belief that another Student has violated this Code shall promptly report that information to the Instructor in the affected Academic Program or to the Dean.

2. A Student shall testify fully and truthfully in regard to a Code violation when called to do so.

Disciplinary Procedures
Section 1. General Applicability.

The following procedures govern enforcement of the Code at the School of Law. A revision of the Code or these Procedures may be adopted upon approval by a majority of both the faculty and the Honor Council, and only after the proposed revisions have been posted for Student comment either in the School of Law building or on an internet vehicle for a minimum of 12 Days.

Section 2. Report of an Alleged Violation.

1. Reports by Instructor. Any Instructor in an Academic Program who reasonably believes that a Student may have violated the Code shall report in writing the facts giving rise to that belief to the Dean.

2. Report by Persons Other than Instructor. Any person, other than the Instructor, who believes that a Student may have violated the Code shall report in writing the facts giving rise to that belief to either the Instructor of the Academic Program in which the violation allegedly occurred and to the Dean. In the event that a Student reports an alleged violation only to the Instructor, the Instructor shall inform the Dean in writing the facts alleged. A report must include the identity of the reporting person.
Section 3. Disposition of Admitted Violation.

1. Admission of Violation. An accused Student may, at any time, admit a violation of the Code by providing to the Dean a written statement admitting the allegation. If an Investigator has not been appointed pursuant to Section 4.1 prior to the admission of a violation under this Section, the Dean shall promptly appoint an Investigator to conduct a sufficient investigation to determine any additional facts relevant to the admission. If a Presenting Party has not been appointed pursuant to Section 4.5 prior to the admission of a violation under this Section, the Dean shall promptly appoint a Presenting Party to carry out the responsibilities set forth in Sections 3.2 and 4.9. The matter shall thereafter be handled as provided in Section 3.2.

2. Sanctions Hearing.
   a. If the accused Student admits, pursuant to Section 3.1, that a violation has occurred, the Dean shall convene a Hearing Panel to hear the matter for the sole purpose of determining the appropriate sanction, as set forth in Subsection 4.9(b). This hearing must occur at the later of either the Investigator's completion of the investigation or not less than 5 Days, nor more than 21 Days, after the date on which the Dean has received the written statement of admission from the Student.
   b. At the conclusion of any matter in which a violation has been admitted, the Dean shall notify the School of Law Registrar, the University Office of Student Development, and any other appropriate University offices of the offense and the sanction imposed.

Section 4. Disposition of Contested Allegations.

1. Appointment of Investigator and Notice to Accused. Upon receiving a written report of an alleged violation of the Code, the Dean shall gather relevant information regarding the allegations. The Dean may consult with the Chair of the Honor Council regarding whether to initiate a formal investigation. If the Dean decides that the matter warrants a formal investigation, the Dean shall appoint one or more Investigators. Upon appointment of the Investigator, the Dean shall promptly notify the accused Student of the allegations by letter, addressed to the Student, delivered personally or by first-class mail, to the accused Student’s permanent address on record at the School of Law. The notice must inform the Student of the following:
   a. An investigation is being conducted into a possible Code violation,
   b. The general nature of the alleged violation,
   c. The name of the Investigator,
   d. At the conclusion of that investigation, the matter, and any other matters discovered during the course of the investigation, will either be closed or prosecuted in accordance with these Procedures;
   e. If the Student either does not respond or is found to have committed the offense described, the Student may receive one or more of the sanctions described in Section 5.1.

2. Conduct of Investigation. The Investigator may interview witnesses, including the accused Student, and review any documents or other information that may assist in determining facts relevant to the alleged violation. An accused Student who refuses to answer inquiries regarding the matter shall not be subject to additional discipline for doing so. Finders of fact may, however, draw appropriate inferences from the accused Student’s refusal to answer questions.

3. Submission of Investigation Report. The Investigator shall submit a written report to the Dean within 14 Days after appointment, unless the Dean has granted a reasonable extension of time. The investigation report must summarize the factual findings of the investigation. It must also contain a recommendation regarding potential actions under Section 4.4.

4. Action by Dean Upon Receipt of Investigation Report. Upon submission of the written investigation report, the Dean shall, within a reasonable period of time (generally not more than one week) take one of the following actions. In making the decision about the appropriate course of action, the Dean shall consult confidentially with the Chair of the Honor Council.
   a. If the Dean determines that the allegations in the investigation report, even if proven to be true, would not constitute a Code violation, the Dean may close the matter. The Dean shall, either personally or in writing, promptly notify the accused Student, the person who initially reported the allegation, and the Instructor in the affected Academic Program that the matter has been closed with a finding that no violation of the Code occurred.
   b. If the Dean determines that the allegations in the investigation report, if proven to be true, would constitute a Code violation, the Dean shall refer the allegation to the Hearing Panel for hearing and disposition as provided in Section 4.5.
   c. If the Dean determines that additional investigation of the original allegations or of additional allegations is needed, the Dean may request further investigation of the matter prior to disposition under either paragraph (a) or (b) above.

5. Referral of Allegations to the Hearing Panel.
   a. Upon a decision by the Dean to refer a matter for hearing, the Dean shall appoint a Presenting Party. The Presenting Party shall prepare a Statement of Allegations. No more than 14 days after being nominated by the Dean, the Presenting Party shall provide the Statement of Allegations to the Chair of the Hearing Panel (Chair), along with a list of witnesses likely to be called to testify at the hearing, including the Investigator, and copies of any documents likely to be produced at the hearing.
   b. The Presenting Party shall request information regarding any prior violation by the accused Student of the Code or any history of academic discipline for dishonesty as disclosed on the accused Student’s application for admission to the School of Law. The Presenting Party shall not reveal such information to the Hearing Panel until the sanction phase of the hearing according to Subsection 4.9(b).
   c. Not less than 3 Days prior to the hearing date as set in Section 4.6, the accused Student and the Presenting Party shall provide the Chair and the opposing party, either personally or by first-class mail, a list of witnesses likely to be called to testify at the hearing and copies of any additional documents likely to be produced.
   d. Not less than 3 Days prior to the hearing date as set in Section 4.6, the accused Student shall provide notice to the Chair and the Presenting Party, either personally or by first-class mail, if the Student intends to have an Advisor present at the hearing.
   e. The Chair may delay the hearing or exclude from the hearing any witnesses or documents not identified prior to the hearing, as required by Subsection 4.5(c), if the lack of prior notice would unfairly prejudice either party. The Chair, at its discretion, may delay the hearing or refuse to allow the person selected by the Student as an Advisor to participate actively in the hearing, if the
required notice of that person's intended presence is not provided as required in Subsection 4.5(d).

f. No Hearing Panel member shall consider a matter in which that person is unable to serve with impartiality. If an accused Student believes that a member of the Hearing Panel should be recused for partiality, the accused Student shall notify the Dean in writing not less than 96 hours prior to the scheduled hearing, showing cause why a member should be removed from consideration of the matter. If a member is removed or unable to serve, a substitute shall be appointed as set forth in the Hearing Panel definition.

6. Hearing Date. Upon receiving the Statement of Allegations, the Chair shall set a date for a hearing, to be held not less than 14 Days nor more than 21 Days after notice to the accused Student of the hearing is mailed or personally delivered to the accused Student, as provided under Section 4.7. Notice of the hearing date also shall be sent to the Instructor in the affected Academic Program. The time provisions of this section may be waived by the Chair, with the consent of both the accused Student and the Presenting Party.

7. Notice to Accused Student. Upon setting the Hearing Date, the Chair shall deliver to the accused Student, either personally or by first-class mail to the Student's permanent address on record with the School of Law, the following information:
   a. A copy of the Statement of Allegations;
   b. A copy of these Procedures and of the Code;
   c. The Presenting Party's list of possible witnesses and copies of any documents likely to be presented at the hearing;
   d. A list of the names of the members of the Hearing Panel and notice of the Student's right to request recusal of one or more panel members;
   e. Notice of the time and place of the hearing;
   f. Notice of the right to be accompanied by an Advisor at the hearing and the duty to notify the Chair, no less than 3 Days before the hearing is scheduled, of the Student's intention to have an Advisor present at the hearing;
   g. Notice of the right to an open hearing and the duty to exercise this right by notifying the Chair no less than 3 Days before the hearing is scheduled.
   h. Notice that the Student must provide a list of witnesses and documents to the Chair and the Presenting Party no less than 3 Days before the scheduled date of the hearing;
   i. Specific notice that the hearing is the Student's opportunity to defend against the allegations brought and that one or more sanctions specified in Section 5 may result from a finding that any violation occurred.

8. Attendance at Hearing. All hearings must remain confidential and closed to persons other than the Hearing Panel, the Presenting Party, the Instructor in the affected Academic Program, the witnesses during the time of their testimony, the accused Student, and the Advisor unless an open hearing is requested in writing by the accused Student not less than 3 Days prior to the hearing. Nothing in this Section shall be construed to diminish the Chair's authority to take any necessary measures to maintain order and decorum during a hearing, including the removal of any persons acting in a disruptive manner. In the event that the accused Student does not appear at the appointed time and place for the hearing, and the absence is without excuse, the Hearing Panel may elect to hear the matter in absentia. The Instructor in the affected Academic Program may attend the hearing in its entirety, but may not participate in the hearing unless called by either side as a witness or otherwise questioned by the Hearing Panel.

9. Conduct of the Hearing. The hearing shall be conducted in two parts, set forth in paragraphs (a) and (b) of this Section. Hearing Panel members must be physically present for the hearing.
   a. Violation Hearing. At the outset of the violation hearing, the Chair shall provide each member of the Hearing Panel with a copy of the Statement of Allegations or shall read aloud the Statement of Allegations in its entirety. The Presenting Party appointed pursuant to Section 4.5 shall proceed by presenting evidence supporting the allegations set forth in the Statement of Allegations. The Presenting Party may present and question witnesses and offer other relevant evidence in support of the allegations. The accused Student or the Advisor shall have the right to question the witnesses. At the conclusion of the Presenting Party's case, the accused Student or the Advisor may present and question witnesses and offer any other relevant evidence for the purpose of defending against or mitigating the allegations set forth in the Statement of Allegations. The Presenting Party may question witnesses offered by the accused Student. Formal rules of evidence do not apply and any relevant evidence is admissible, including hearsay, unless excluded by the Chair for good cause. Members of the Hearing Panel also may question any witness presented by the Presenting Party or the accused Student. After all evidence has been presented, the Presenting Party may make a closing statement to the Hearing Panel followed by a closing statement by the accused Student or the Advisor. The Presenting Party may then offer a rebuttal statement. The Hearing Panel will then deliberate in private until a decision is reached on each allegation. In order to find a violation, the Hearing Panel must determine by a majority vote that facts sufficient to constitute a violation have been proven by clear and convincing evidence. If the Hearing Panel determines that a violation has not been adequately proven, the Hearing Panel shall prepare written findings of fact and conclusions dismissing the allegation. The Chair shall send a copy of the findings and conclusions to the accused Student and to the Presenting Party. Written notice of the findings and conclusions shall also be sent to the Dean and the Instructor in the affected Academic Program.
   b. Sanction Hearing. If the Hearing Panel determines that a violation has been adequately proven, the Hearing Panel shall then reconvene to consider evidence in aggravation or mitigation of the offense for the purpose of determining a sanction. The Presenting Party shall at this time provide the Hearing Panel with information regarding the Student's history of academic dishonesty as provided for in Subsection 4.5(b). The Presenting Party may also call witnesses or present other relevant evidence in mitigation or in aggravation of the offense. The Student or the Advisor has the right to question the Presenting Party's witnesses. The Student may then call witnesses or present relevant evidence in mitigation of the offense. The Presenting Party may question the Student's witnesses. The Student may make a personal statement to the Hearing Panel. The Hearing Panel shall then deliberate in private and agree upon an appropriate sanction, as set forth in Section 5, by majority vote. The Hearing Panel shall, within 5 Days, deliver personally or send by first class mail to the permanent address of the Student on record with the School of Law, written findings of fact and conclusions, along with notice of sanctions imposed, to the Student, the Dean, the Presenting Party, the Instructor in the
Section 5. Sanction.

1. Sanction Options. The following sanctions may be imposed upon a Student found to have violated the Code:
   a. Permanent expulsion from the School of Law;
   b. Definite suspension from the School of Law for a period of not less than one semester;
   c. Reprimand to be administered orally by the Chair to the Student, with a record of the reprimand to be maintained in the Office of Student Development and the School of Law Registrar’s Office (first offense only);
   d. A Letter of Warning from the Chair to be recorded in the Office of Student Development and the School of Law Registrar’s Office (first offense only);
   e. Revocation of admission to the School of Law or revocation of degree;
   f. Any combination of the above sanctions.

2. Aggravating Factors. A history of discipline for academic dishonesty will be treated as a significant aggravating factor in determining the appropriate sanction for a subsequent offense. The sanctions provided for in this Section are intended to be disciplinary.

3. Independent Academic Discipline. Nothing in these procedures, including the imposition of any sanction, shall be interpreted to limit the academic authority of an Instructor to determine an appropriate grade for a Student. If an Instructor determines that, because of academic dishonesty, a Student’s performance in an Academic Program merits a grade reduction or a failing grade, the Instructor’s authority to award such an appropriate grade is not limited by the imposition of any sanction under this Section.

4. Execution of Sanction. The Dean shall notify proper University offices of the sanction imposed on the Student.

Section 6. Appeals.

1. Grounds for Appeal of Dismissal. Upon a dismissal of an allegation by the Hearing Panel, the Presenting Party may appeal the decision to the University Committee of Academic Responsibility (“University Committee”) only on the ground that the Hearing Panel erred in its conclusion that the facts as set forth by the Hearing Panel in its written findings did not constitute a violation of the Code.

2. Grounds for Appeal of Finding of Violation. Upon the finding of a violation by the Hearing Panel, the accused Student may appeal the decision to the University Committee on any or all of the following grounds:
   a. that specific procedural rules were not followed, resulting in prejudice to the accused Student;
   b. that the facts as set forth by the Hearing Panel in its written findings of fact do not establish a violation of the Code;
   c. that there is no evidence in the record to support a finding of fact by the Hearing Panel;
   d. that there is specific evidence of improper bias on the part of any member of the Hearing Panel;
   e. that there is specific new evidence, which could not reasonably have been discovered prior to the hearing and which likely would have changed the outcome of the hearing.

3. Appeal of Sanction. Either the Presenting Party or the accused Student or both may appeal the sanction imposed by the Hearing Panel on the ground that the sanction is unjust or inappropriate.

4. Notice of Appeal. A party appealing the decision rendered or sanction imposed by the Hearing Panel must notify the Chair of the University Committee in writing not later than ten (10) business days after the written findings of fact and conclusions are sent to the party appealing. The Notice of Appeal should set forth the specific ground or grounds of the appeal. Copies of any Notice of Appeal shall be sent to the Presenting Party or the accused Student (whichever did not file the notice of appeal), the Dean, the University Office of Student Development, the School of Law Registrar’s Office, and the Instructor in the affected Academic Program.

5. Access to Record. Upon receiving a Notice of Appeal, the Chair of the University Committee promptly shall request from the Chair of the Hearing Panel a copy of the record of hearing, as prepared pursuant to Section 4.11. Upon receiving the record, the Chair of the University Committee shall notify the Presenting Party and the accused Student of its availability. Both parties shall have ten (10) business days after notice of the record’s availability is sent in which to submit to the Chair of the University Committee any further written argument or information from the record to substantiate or refute the appeal.

6. Consideration of Appeal. After receiving the Record of Hearing and any written materials provided under Section 6.5, the University Committee shall meet to consider the matter. The University Committee may decide the matter on the written record or may allow the accused Student and the Presenting Party to appear before the University Committee upon reasonable notice. The University Committee promptly shall issue a written opinion either:
   a. affirming the decision of the Hearing Panel;
   b. remanding the matter to the Hearing Panel with a clear statement of specific reasons for requiring further consideration of the merits, the sanction, or both;
   c. reversing or modifying the decision of the Hearing Panel as to the merits, the sanction, or both. (The University Committee also may, for example, affirm a matter in part, such as by affirming a finding of a violation, and remand in part, such as for reconsideration of sanction.)

The Chair of the University Committee shall send copies of the written opinion to the Instructor of the affected Academic Program, the Dean, and the University Office of Student Development. The Dean shall notify the Chair of the Hearing Panel and, if the matter is remanded, shall instruct the Chair to reconvene the Hearing Panel for any further proceedings that may be required.

Section 7. Public Notification of Disposition.

The Dean shall compile the Hearing Panel reports, as required by Section 4.11, not less than annually. The Chair of the Honor Council shall publish these reports to Students and faculty within the School of Law by public posting, distribution, or other appropriate means. The report shall not contain any information that would identify the parties or witnesses to the proceedings.

Section 8. Effective Date.
These Procedures as amended on May 4, 2010, take effect on August 19, 2010, and apply to all matters reported on or after August 19, 2010. The amended procedures also apply to any matters pending on that date unless, in the opinion of the Dean, the former procedures should apply in a particular case in the interest of fairness or because it would not be feasible to apply the amended procedures to the matter already pending.

Provisions on Arrest Reporting

With the adoption of the School of Law Honor Code in August 2010 and the South Carolina Supreme Court's new requirement that the School of Law certify a graduate's fitness for admission to practice, a law student who is arrested for, charged with, or convicted of (including entry of a plea other than not guilty) any offense other than a minor traffic violation for which a fine of $100 or less was imposed must report that information to the School of Law. This process replaces the prior obligation to report an arrest to the University's Office of Student Judicial Programs, although the School of Law will notify OSJP when a law student is arrested, as required by University policy.

Relevant provisions from the Honor Code are as follows:

Preamble

The preparation of Students for service in the legal profession requires not only academic rigor, but also adherence to the high standards of personal character and integrity expected of attorneys.

Section 1. General Applicability

The following rules govern the conduct of all Students at the School of Law. Former Students of the School of Law remain subject to this Code for violations committed while a Student.

Section 2. Prohibitions

2.3 A Student shall not commit any criminal act.

For purposes of this rule, a criminal act is one that reflects adversely on a Student's honesty, trustworthiness, or fitness for admission to the practice of law. This rule will be interpreted in accordance with the Model Rules of Professional Conduct § 8.4 (2008).

Any criminal act that reflects adversely on the Student's honesty, trustworthiness, or fitness for admission to the practice of law and which occurs during the time that a Student is subject to this Code is a violation of this rule, regardless of where the conduct occurs. A conviction or plea of guilty in a criminal matter is conclusive proof that the Student committed the act that is the subject of that conviction or plea. The absence of a criminal conviction does not preclude a finding that a criminal act occurred for purposes of this rule.

In addition, as of August 2010, the Office of Bar Admissions of the Supreme Court of South Carolina adopted a requirement, already existing in many other jurisdictions, that applicants for admission to the Bar must obtain a character and fitness certificate from their law school. Questions relating to discipline include the following:

From the records in your office, including the applicant's law school application, and from your personal knowledge, [indicate if the applicant has ever been]:

- accused of a violation of the honor code or student conduct code, placed on academic or disciplinary probation, suspended, expelled, requested to withdraw, or otherwise subjected to discipline

for academic or personal conduct reasons by any educational institution?

- a party to legal or administrative proceedings?

- charged with, arrested for, or convicted of any traffic or criminal offense?

- accused of a violation of trust?

If you are arrested for, charged with, or convicted of an offense other than a minor traffic violation, you must report that fact to Associate Dean for Student Affairs, within 72 hours of the event. You may notify the Associate Dean for Student Affairs in person, by e-mail, or by phone. If the Associate Dean for Student Affairs is not available, you may see the Associate Dean for Academic Affairs. You will be asked to complete a short form giving relevant information including the date, location, nature of the charge, jurisdiction, a summary of the circumstances leading to the event reported, and the anticipated timetable for disposition, if known. If the matter has not been finally resolved at the time of your initial report, you will also have a continuing obligation to notify the Law School when the matter is resolved.

Class Attendance

Students are expected to prepare all assigned work and attend all classes. A professor may reduce materially a student's grade in a course because of absences. A student who is absent from a class for more than ten percent (10%) of the recitation periods may not take the examination or obtain a grade other than F unless the attendance requirement is waived by the Associate Dean for Academic Affairs. A violation of the Attendance Policy means you must petition for an attendance waiver.

- A student violates the Attendance Policy by missing 6 classes in a 4 credit hour course that meets four times a week
- A student violates the Attendance Policy by missing 5 classes in a 3 credit hour course that meets four times a week
- A student violates the Attendance Policy by missing 4 classes in a 3 credit hour course that meets three times a week
- A student violates the Attendance Policy by missing 4 classes in a 5 credit hour course that meets twice a week
- A student violates the Attendance Policy by missing 4 classes in a 2 credit hour course that meets twice a week
- A student violates the Attendance Policy by missing 2 classes in a 2 credit hour course that meets once a week
- A student violates the Attendance Policy by missing 1 class in a 2 credit hour course that meets once every other week

Students are responsible for keeping track of their own attendance. No absences from class are "excusable" for purposes of determining whether a student has violated the Attendance Rule. The Associate Dean for Academic Affairs, however, can waive the Attendance Rule if a student has not missed more than thirty percent (30%) of the classes in a course. In exercising this discretion to waive the rule, the Associate Dean will consider the total number of absences and whether a substantial majority of these absences are for reasons set forth in §VI.G.2

Note: Students' class schedules must enable them to attend all regularly scheduled classes in all of their courses. Therefore, students may not register for courses that have any overlapping classes.
Waiver of the 10% Attendance Requirement

A student who has missed more than 10% but not more than 30% of the classes in a course, may petition the Associate Dean for Academic Affairs for a waiver of the attendance requirement. The petition shall contain a complete explanation of the reasons for all of the student's absences from class and shall be submitted prior to the examination or due date of a final paper. The form for the petition may be found on the Law Registrar's webpage.

In ruling on such petitions the Associate Dean for Academic Affairs shall balance the necessity of maintaining high academic standards and fairness to the student. The Associate Dean may consider the total number of absences, whether a substantial majority of the absences were the result of illness, personal or family problems, out-of-town job interviews, or out-of-town law school related activities, such as moot court, and whether the student has otherwise made a good faith effort to minimize the total number of absences.

If the Associate Dean for Academic Affairs denies a petition for waiver of the attendance requirement, or if the number of absences exceeds 30%, a student may petition the Academic Responsibility Committee. The Committee's decision is non-reviewable.

Outside Employment While Enrolled as a “Full Time Student”

Because of the rigorous nature of the Law School curriculum and the requirements of law school accrediting agencies, law students are required to be “full time” students. Students should not be employed during the first year of law school. Excessive employment during the second and third year is inadvisable; if undertaken employment should not exceed fifteen hours per week and must not exceed twenty hours per week during the second and third years of law school. The fact of employment will not be considered a mitigating factor in the event of academic difficulties.

Add/Drop/Withdrawal Date

Courses may be added or dropped without penalty up to the end of the drop/add period designated in the Law School calendar. Following this date, students may withdraw from a course without penalty up to the end of the withdrawal period designated in the USC Master Schedule of Classes. A grade of "W" will be recorded on a student's transcript, but the grade will not affect a student's grade point average. Students withdrawing after the "withdraw without penalty" date will receive a grade of "WF". A "WF" is treated as an "F" in computing a student's grade point average. Note: No student will be permitted to drop or withdraw from courses that would result in the student taking less than 12 hours without written approval of the Associate Dean for Academic Affairs.

Grading

1. Anonymous Examination Grading Policy
   a. Anonymous Examination Grading System (AEGS). The Law School provides an anonymous examination grading system. Under the AEGS students identify their examinations by placing only their AEGS number on their examinations. This system provides a mechanism for faculty members to grade examinations anonymously. Each semester the Office of the Law Registrar/Academic Services gives each student a new AEGS number, this includes the summer session. Use of the system is optional with the faculty. Faculty members who subscribe to the anonymous examination grading system may obtain the names of students only after they have turned in grades on the examination. They may then submit grades for the course that reflect class participation or other academic factors.
   b. Student Responsibility: Students have the responsibility to ask their instructors for information about the basis of grading in the course, use of materials on the examination, and use of the AEGS in the course.

2. Grade Distribution Policy
   a. The Law School's grade normalization policy for upper level courses is that the mean average grade in classes of more than 25 students should fall within .25 points of the class's mean average incoming GPA.
   b. The Law School's grade normalization policy for first-year courses other than Legal Research and Legal Writing I and II is that the mean average grade in all classes shall fall within the range 2.7-3.0.
   i. Legal Writing I & II. While seeking to maintain consistency between sections and overall compliance with the general grade normalization range for first year courses, the Director of Legal Writing may authorize deviations from the normal range in sections of Legal Writing on a section by section basis.
   ii. Legal Research. Legal Research will be graded on a Pass/Fail basis. Earned credit does not affect the allotment of six pass/fail hours.
   iii. The Dean shall enforce the grade normalization policy as the Dean deems appropriate.
   c. The purpose of the grade distribution policy is to maintain relative parity in grading among the faculty, particularly among first year sections. Various systems of grade distribution or “curves” are used by a number of law schools.

The Faculty reserves the right to modify the Grade Distribution Policy and apply the modified Policy to students then enrolled in the Law School.

3. Submission and Posting of Grades
   It is the policy of the faculty of the University of South Carolina Law School that all grades are due in the Office of the Registrar/Academic Services as follows:
   • Fall Grades: The first day of class after January 15.
   • Spring Grades: Thirty (30) days after the last regularly scheduled examination. Provided, however, the Dean has discretion to set a date for submission of grade information to determine the status of graduating seniors.
   • Summer Grades: For each summer school course grades must be reported thirty (30) days after either the regularly scheduled examination date for the course or the last day of class if there is no examination in the course.

Grades for each course will normally be available on the University Computer system (VIP) the day after they are received in the Office of the Registrar/Academic Services.

4. Grade Changes
   A grade in a course may be changed only on approval of the instructor teaching the course and the faculty of the Law School for computational error or other good cause. The refusal of the instructor to change a grade is not review-able except on petition to the faculty
under the faculty bylaws. Special make-up work, extra work, or examination to change a grade already recorded is not permitted.

5. **Class Ranks**
   Class ranks are computed twice yearly, and available for distribution on March 1 and August 1. Class ranks are calculated based on grades submitted when semester grades are due. Class ranks are not calculated after summer grades have been submitted. Summer grades are included when calculating Fall semester class ranks. Students can obtain their individual class ranks by making a written request to the Office of the Registrar/Academic Services on a form provided by that office.

6. **Criteria for Academic Honors**
   - **Dean's Medallion.** This engraved medallion is presented each May to the graduate with the highest cumulative GPA.
   - **President's List.** A student who earns a GPA of 4.000, having completed at least 12 graded law hours, will be named to the President's List.
   - **Dean's List.** A student who earns a GPA of 3.500, having completed at least 12 graded law hours, will be named to the Dean's List.
   - **Graduation Honors.** Graduation honors are based upon a student's final GPA after all grades have been submitted. Summa Cum Laude (3.950-4.000); Magna Cum Laude (3.750-3.949); Cum Laude (3.500-3.749).

7. **Standards for Computing Grade Averages**
   Individual semester grade averages and cumulative overall grade averages, as used in these, shall be computed on the following basis:
   a. for each course, multiply the numerical value of the grade received by the credit hours of that course;
   b. total these figures (semestery and cumulatively);
   c. divide this figure by the total number of credit hours taken (semestery and cumulatively).

   The numerical value of grades is as follows:
   - A = 4.0 = Highest Honors
   - B+ = 3.5 = Honors
   - B = 3.0 = Superior
   - C+ = 2.5 = Good
   - C = 2.0 = Competent
   - D+ = 1.5 = Marginal
   - D = 1.0 = Poor
   - F = 0.0 = Failure
   - WF = 0.0 = Withdraw with Failure

   Courses in which the recorded grade is a No Report (NR), Withdrawal (W), or Pass (S) shall not be included in the computation of grade averages. WF is assigned for students withdrawing from a course after the penalty deadline prescribed in the USC Master Schedule of Classes. The grade of WF is treated as an F in the grade point average computation.

   Except with respect to transfer students, only the grades received in courses taken at the University of South Carolina School of Law shall be included in the computation of grade averages for the purpose of these rules. Courses taken for Law School credit in other departments or schools of the University of South Carolina shall be recorded on a pass/fail basis by the Law School, with a grade of below C being recorded as a Failure. See also pass/fail rules on courses taken at other Law Schools.

   Except as provided under the Academic Forgiveness Program, when a course is repeated both grades shall be included in the computation of the cumulative overall grade average, and each grade shall be included in the appropriate semester grade average.

### Pass/Fail Grading

1. **Maximum Number of Credit Hours.**
   A student may receive a maximum of six (6) hours of credit on a pass/fail basis for course or non-course work in the Law School. Students may receive a pass/fail credit for approved course work done outside the Law School at either other ABA accredited law schools or departments at USC other than the Law School. If a student receives pass/fail credit for courses taken outside the Law School, the number of Law School credits that may be taken pass/fail is reduced, but a student shall be allowed to take at least four (4) hours of Law School work on a pass/fail basis. Additional hours taken pass/fail will not count toward meeting graduation requirements unless the student obtains written approval from the Associate Dean for Academic Affairs.

2. **Standard for Earning an S in a Course Taken on a Pass/Fail Basis**
   For all course work taken on a pass/fail basis, whether in the Law School or outside the Law School, a student must do C quality work to earn an S. A grade below C is recorded as an F.

3. **Law School Courses in Which Law Students May Earn Pass/Fail Credit**
   The only Law School courses in which candidates for the Juris Doctor degree may earn pass/fail credits are those courses offered exclusively on a pass/fail basis, such as Criminal Trial Practice, Intensive Trial Advocacy and Trial Advocacy and with the professor’s permission, Supervised Legal Research I and/or II.

   A student who wants to take Supervised Legal Research on a pass/fail basis must obtain the written approval of the instructor prior to the end of the drop/add period. Note that the professor may refuse to allow a student to take Supervised Legal Research on a pass/fail basis. A form for such approval is available in the Office of the Registrar/Academic Services.

4. **Other Law School Credit Awarded on a Pass/Fail Basis**
   Credit for serving on the editorial board of the Journal of Law and Education; the South Carolina Law Review, the Real Property Probate and Trust Journal, the Southeastern Environmental Law Journal and the South Carolina International Law and Business Journal is awarded on a pass/fail basis. In addition, credit for supervised extracurricular competition, such as moot court, is awarded on a pass/fail basis.

5. **Non-Law School Courses**
   Credits earned by J.D. candidates for course work done in other departments of the University of South Carolina or at other ABA approved law schools are recorded on a pass/fail basis.

### Auditing

Law Students may audit courses subject to enrollment limitations and professor’s approval. Students who wish to audit a course are given lowest priority in enrollment. Law students may audit non-law courses provided that University audit procedures are satisfied. If a course is audited, it may not be subsequently taken for credit.
Transfer Students

Transfer students will receive a letter of acceptance from the Office of Admissions. After receiving the acceptance letter, students are required to meet with the Registrar/Director of Academic Services to review transfer of hours, grade point average, graduation requirements and registration. The grades earned at the student’s former school in courses accepted for transfer credit will be included in computing the transfer student’s cumulative grade point average. Although graded hours may exceed 30 hours, no more than 30 earned hours will be accepted toward the 90 hours required for graduation. During the first year a transfer student is enrolled at the Law School the student will not be awarded a class rank. Upon the completion of two full semesters at the Law School a transfer student will be awarded a class rank computed on the basis of all law school grades earned at both the Law School and the student’s former school.

Completion of Course Work at Another ABA/AALS Approved Law School

With approval of the Associate Dean for Academic Affairs, students may complete course work at another ABA/AALS approved law school (for example, by attending such school for the student’s sixth semester) and transferring the credit for such work towards the granting of a J.D. degree from the USC School of Law. Petitions for such credit are granted only where:

1. there is good cause;
2. the proposed course work is substantially equivalent to course work at this Law School; and
3. the student will satisfy requirements concerning the minimum number of hours in residence needed for the J.D. degree by successfully completing at least 60 credit hours in law courses at the University of South Carolina School of Law. The 60 required hours shall not include course work in independent research and co-curricular activities such as law review, journals, moot court, mock trials or any other trial competitions.

Students must take courses at another law school on a graded basis if the course is offered on that basis. Grades in these courses will be recorded on a student’s USC transcript on a Pass/Fail basis. Only grades of C or better will be recorded as a Pass. Grades of C or better will be recorded on the student’s transcript as a S and any grade below a C will be recorded as an F. “Incomplete” (or its equivalent) will be recorded as an F if the work is not completed within three months of the end of classes for the session involved. Courses taken at another law school affect the number of credit hours a student may earn on a Pass/Fail basis at the Law School.

The law school shall not grant a student more than four (4) credit hours of distance education courses in any term, nor more than a total of 12 credit hours, toward the Juris Doctor degree for courses qualifying as distance education.

Students are required to complete the request to visit forms available in the Office of the Registrar/Academic Services and have the Associate Dean for Academic Affairs sign the forms. Students are also required to have an official transcript sent from the visiting school to the Office of the Registrar/Academic Services by the required date that students must discuss and confirm with the Registrar/Director of Academic Services.

Dual Degree Programs

The Law School offers the following dual degree programs:

- International Master of Business Administration
- Master of Accountancy
- Master of Arts in Criminology and Criminal Justice
- Master of Earth and Environment Resources Management
- Master of Arts in Economics
- Master of Health Administration
- Master of Human Resources
- Master of Public Administration
- Master of Social Work
- Master of Environmental Law and Policy (with the Vermont Law School)
- Master of Mass Communications

1. Dual Degrees with other Departments at USC

Students admitted to a dual degree program must complete the law school’s dual degree application available in the Office of the Registrar/Academic Services, room 137. Once officially recognized as dual degree, students may apply 9 graduate credit hours from the other program towards the student’s J.D. degree. Similarly, students may apply 6 to 12 hours (depending upon the program) of Law School credit toward the other graduate degree. The hours transfer as pass/fail credits. Even if admitted to more than one dual degree program, a student may not apply more than a total of 9 graduate credit hours toward the J.D. degree. The courses which are transferred into Law School must have been begun subsequent to being admitted to Law School. In other words, courses completed prior to being admitted to Law School will not count toward a dual degree. Unless a waiver is obtained, all course work for the non-law program must be completed simultaneously with, or prior to, Law School graduation. If a course is offered both in Law School and in the graduate program, e.g., Administrative Law, the graduate school version may not be transferred in for Law School credit. In other words, these courses must be taken in the Law School. Students should obtain permission from the Associate Dean before taking the same titled course in both the Law School and Graduate school. Other than mentioned above, any graduate level course in the combined program may be transferred for the 9 Law School credit hours. Dual degree students must also comply with the 12 hour residency requirement when applying the 9 hours of graduate work. Students in the dual degree program will generally pay Law School fees, with exception of the Moore School of Business. Students enrolled in Law School and the Moore School of Business will pay law tuition and business school program fees. It is required that students enrolling in a dual degree program meet with the Registrar/Director of Academic Services to obtain additional information on graduation requirements and tuition/fee payment. For more specific information please contact the Law Registrar/Director of Academic Services.

2. Dual Degree in Studies in Environmental Law with the Vermont Law School

Students at the University of South Carolina School of Law can take advantage of the nation’s largest environmental law curriculum through a Dual Degree program with Vermont Law School. The University of South Carolina School of Law’s excellent in-house educational opportunities in the field of environmental law are expanded through the Vermont Law School’s Master of Studies in Environmental Law (M.S.E.L.) degree program.
Together, the University of South Carolina and Vermont Law School offer a dual degree program that enables qualified University of South Carolina law students to earn two degrees in three or three and a half years: a J.D. from the University of South Carolina, and an M.S.E.L. from Vermont Law School. In addition to courses at the University of South Carolina, dual degree candidates take courses taught in Vermont’s Summer Session and courses offered by distance learning during the regular academic year, or a combination of summer session and distance learning courses and approved internships.

a. Earning the MELP and JD Degree
University of South Carolina School of Law first-year students initially seek approval to participate in the MELP/JD dual degree program from the Office of the Associate Dean for Academic Affairs, who grants approval pursuant to regulations and in consultation with the Dual Degree Committee. Approved students then apply to Vermont Law School for the M.E.L.P. Degree early in the spring semester of their first year of law school. If accepted, dual degree students register for Summer Session courses later in the semester. Dual Degree students must enroll in Introduction to Environmental Law at the Law School during the Maymester following their first year. Dual degree students also typically attend a ten-week Summer Session at Vermont Law School during the summer between their first and second years of law school. In the second and third years of law school, dual degree students complete additional environmental law courses via distance learning from Vermont Law School. Students may also combine distance learning courses with an approved internship at an organization involved with environmental work. Dual degree students share the remaining credits required for their J.D. degree with the M.E.L.P. degree, thus reducing the overall M.E.L.P. requirements.

b. The Dual Degree Progression
- 11 credits — M.E.L.P. courses (including Ecology) taken at Vermont Law School’s Summer Session.
- 10 credits — M.E.L.P. courses taken via distance learning at the University of South Carolina during the second and third years of law school, or a combination of such courses and a limited number of credit hours for an approved internship.
- 9 credits — Environmental law courses taken at the University of South Carolina for J.D. credit shared with M.E.L.P. requirements. These courses typically include Administrative Law, Federal Environmental Law, and Land Use Planning. Even if admitted to more than one dual degree program (such as MEERM), a student may not apply more than a total of 9 graduate credit hours toward the J.D. degree.

c. Financial Arrangements
Dual degree students pay tuition for their J.D. degree to the University of South Carolina, which includes the nine credits shared with the M.E.L.P. degree. Dual degree students pay Vermont Law School for M.E.L.P. credits on a per-credit basis at the prevailing tuition rate.

d. Note that students in the Juris Doctor — Master of Environmental Law and Policy dual degree program can also pursue the Juris Doctor — Master of Earth and Environmental Resource Management with the School of the Environment at USC. A student can earn all three degrees in four years.

University Courses Outside the Law School
First year students are not permitted to take courses outside the School of Law under any circumstances.

With prior permission of the Associate Dean for Academic Affairs, second and third year students may take for Law School credit, up to two (2) courses or six (6) hours of credit in another department of the University. Only graduate (500 level and up) courses are acceptable. Grades in all such courses shall be recorded on a Pass/Fail basis, with a grade of below C being recorded as a Failure. Note further that such courses count toward the J.D. Students must also satisfy requirements concerning the minimum number of hours in residence needed for the J.D. degree by successfully completing at least 60 credit hours in law courses at the University of South Carolina School of Law. The 60 required hours shall not include course work in independent research and co-curricular activities such as law review, journals, moot court, mock trials or any other trial competitions.

Second and third year students may also enroll in courses in other departments of the University that are not taken for Law School credit without restrictions on the type of course. Note that the sixteen (16) hours maximum rule still applies.

A form for taking courses outside the Law School is available in the Office of the Law Registrar/Academic Services. This form must be filled out and submitted to the Associate Dean for Academic Affairs for approval.

Approval of Course Credit

1. Petitions for approval of hours overload and approval of credit for courses taken at other law schools or in other departments of the University shall contain a complete description of the student’s plans and the relief sought.

2. Petitions for approval of course credit may be granted by the Associate Dean for Academic Affairs if the Dean finds that approval is consistent with the letter and spirit of academic policies established by the Faculty.

3. Appeals from decisions of the Associate Dean for Academic Affairs dealing with course credit may be taken to the Curriculum Committee. The standard of review is whether the decision of the Associate Dean was clearly erroneous.

Summer School

1. Eligibility; Graduation during the summer
The Law School offers a Maymester and one session each summer. No student may enroll for summer school who is not eligible to return in the following fall semester. The Law School does not contemplate that students will normally complete their legal education at the end of a summer session. Therefore, any student intending to complete the requirements for graduation by attending summer school should contact the Office of the Registrar/Academic Services prior to registering for summer school.

2. Accelerated Graduation by Attending Two Summer Sessions
Normally, students will obtain residence credit for the fall and spring semesters of each of their three years of law school and graduate in May of their third year. Students may elect, however, to accelerate their graduation by one semester (graduating in December of their third year rather than May) by attending two summer sessions. These
two summer sessions taken together will qualify for one (1) semester of residency if the following requirements are met:

The student must matriculate in two summer sessions and satisfactorily complete not less than twelve (12) hours in the two sessions, with a minimum of six (6) hours being required in each summer session.

Although credit hours earned during Maymester can be included in determining the minimum 6 credit hours per summer session requirement, to receive residency credit a student must complete at least one course during both regular 7-week summer sessions.

Co-curricular Activities
No credit is allowed for any co-curricular activity except as follows:

1. Editorial Board
   Journal of Law and Education; South Carolina Law Review; Real Property, Probate and Trust Journal; Southeastern Environmental Law Journal; South Carolina Journal of International Law and Business. Students may obtain two (2) hours credit on a pass/fail basis for serving in a position on the Editorial Board of the Journal of Law and Education; the South Carolina Law Review; the Real Property, Probate and Trust Journal; the Southeastern Environmental Law Journal; or the South Carolina Journal of International Law and Business. No credit may be given without the approval of a faculty advisor or the Associate Dean for Academic Affairs. In awarding credit the faculty advisor or the Associate Dean may rely on a certification from the Editor in Chief that a Board member has substantially fulfilled the duties of his/her position.

2. Supervised Extracurricular Competition.
   Students participating in extracurricular competitions (for example, moot court, trial competition, client counseling competition, negotiation competition, etc.) may receive degree credit only once for participating in an extracurricular competition:
   a. The program must be supervised or advised by a faculty member and approved for credit by the curriculum committee or the Associate Dean for Academic Affairs.
   b. The student must make a substantial intellectual contribution to the activity. Alternates may receive credit if they make substantially the same contribution to the team as that made by the primary members of the team. Administrators or “managers” of the programs who do not participate in the intellectual exercises required by the program are not eligible for credit. However, an administrator or manager can receive credit if he/she qualifies for credit under paragraph (c) below.
   c. The student must complete a written exercise in connection with the activity, which will be evaluated by the faculty supervisor or advisor. In many cases this will be a requirement of the competition. When there is no such requirement, students may receive credit if they reduce their learning to a written form which is evaluated by the faculty supervisor or adviser. This may take the form of a brief, trial memorandum, file memorandum, or other document relating to what they learned in the preparation for the competition. If the rules of the competition limit the involvement of faculty supervisors or advisers, evaluation and criticism of the written product may be postponed until the competition is complete.
   d. To obtain credit for supervised extracurricular competition, a student must complete a form available in the Office of the Registrar/Academic Services.

Credit Hour Policy
1. The Law School faculty, upon the recommendation of the Curriculum Committee, establishes the number of credit hours for each course. All course proposals beginning academic year 2016-17, must include a justification for the number of credit hours to be awarded (including out-of-course work).

2. In accordance with ABA Standard 310 (b), a “credit hour” is an amount of work that reasonably approximates:
   a. not less than one hour of classroom or direct faculty instruction and two hours of out-of-class student work per week for fifteen weeks, or the equivalent amount of work over a different amount of time; or
   b. at least an equivalent amount of work as required in number (1) of this definition for other academic activities as established by the institution, including clinical, simulation, field placement, co-curricular, and other academic work leading to the award of credit hours.

3. For each course, the course faculty member must determine that adequate work has been assigned such that a student would be expected to spend a minimum of 30 hours a semester per credit hour outside of the classroom in preparation for the course. The hours include time spent preparing for and taking exams.

4. To document the basis for this determination, the faculty member must include in the course syllabus an adequate description of the work to be assigned.

5. Students enrolled in clinics or externships must submit written documentation for time spent on course-related work to their supervising faculty member at regular intervals, to be determined by their supervising faculty member. Faculty will determine the number of hours required for each unit of credit; at a minimum, students must complete 42.5 hours for 1 credit; 85 hours for 2 credits, and 127.5 hours for 3 credits.

6. Students enrolled in directed research and other non-regularly scheduled classes must complete a minimum of 42.5 hours for 1 credit; 85 hours for 2 credits, and 127.5 hours for 3 credits.

7. For Law Journals and Co-Curricular activities, such as moot trial and moot court, the Editor in Chief or similar position, is responsible for verifying to the faculty advisor that each student to be awarded 2 credits has completed 85 hours of work, which may include written materials, preparation time and performance in competitions.

8. The Associate Dean for Academic Affairs is responsible for interpreting this Policy to ensure consistency and compliance with ABA Accreditation standards and conducting a review of course syllabi every 3 years to ensure compliance with this credit hour policy. At the Associate Dean’s request, the Curriculum Committee will further review a number of course syllabi to ensure compliance.

Hardship Admission to Courses
1. Hardship petitions shall be filed with the Registrar/Director of Academic Services. The petition shall contain a complete statement of why the student is seeking hardship admission to the course. Except in extremely unusual circumstances, hardship petitions will not be granted to allow a second year student to change sections of a second year preference course subject to block pre-registration. Moreover, a petition will normally be denied if the student has an opportunity to take the course in a subsequent semester or if the student did not avail himself or herself of a second year preference. Desire for a particular professor or time does not constitute hardship.
Students seeking hardship admission to second year preference courses during their third year shall explain why they did not take the course during the second year.

2. There is no appeal from the denial of a hardship petition by the Associate Dean for Academic Affairs.

Postponement of Examinations and Papers

1. Petitions for postponement of examinations shall contain the following:
   a. A list of the examinations that the student wishes to have postponed;
   b. The reasons why the student is seeking postponement. If the postponement is sought because of medical reasons, the student should be prepared to present documentation of the medical problem on request.
   c. The period of time for which the student is seeking postponement.

2. The Associate Dean for Academic Affairs may grant examination postponements for good cause, such as some physical or emotional problem that has made preparation for or taking of the examination extremely difficult. The fact that a student has several examinations in sequence does not justify examination postponement. No examination postponement will be granted for a student who has already missed an examination unless the student can demonstrate that it was physically impossible for the student to seek advance approval of an examination postponement.

3. Makeup examinations shall be scheduled on the day designated as a make-up day on the examination schedule or on another day by mutual agreement of the professor, the Associate Dean for Academic Affairs, and the student.

4. There is no appeal from a decision denying postponement of examinations.

Note on Postponement of Papers. Postponement of the due dates of papers may be made by individual professors without the approval of the Associate Dean for Academic Affairs. Provided, however, the due date for any paper submitted to satisfy the Writing Requirement may not be postponed beyond the date for completion of the Writing Requirement without the approval of the Associate Dean and the professor to whom the paper will be submitted. For May graduates the paper must be submitted in final form to the faculty member by January 15. For December graduates, the paper must be submitted by September 1.

Probation and Dismissal for Failure to Meet Academic Requirements

Preamble

The faculty of the University of South Carolina School of Law believes that the rigorous maintenance of high academic standards is of utmost importance. The grade average requirements students must satisfy in order to remain in school represent the bare minimum of what can properly be demanded of one who expects to enter the practice of law. Clearly, the broader aim of the institution is to promote in all its graduates a higher level of competence. There is, thus, ample justification for dismissing any student who cannot meet even these minimal requirements, however narrow the margin of failure may happen to be in any given case.

Students will be held absolutely accountable for their performance at the Law School. It is thus incumbent upon all students to arrange their study habits and personal affairs in such a way as to maximize academic performance. When it appears that this performance will be adversely affected by extraordinary personal circumstances beyond the student’s control, it is the responsibility of the student to determine this and to take such steps as are necessary to obviate the difficulty before it results in academic failure.

Rule 1: Standards for Automatic Dismissal for Failure to Meet Academic Requirements.

Except for graduating seniors in their final semester (see RULE 5), any of the following will result in automatic dismissal for failure to meet minimal academic requirements.

1. A grade average for any individual semester after the first semester of the first year below 1.5.
2. A cumulative overall grade average at any time after the first semester of the first year of less than 2.0.
3. Failure to meet the requirements for being removed from academic probation as specified in RULE 3.
4. Obtaining a grade of F in more than two courses.

Rule 2: Standards for Placing Students on Academic Probation for Failure to Meet Academic Requirements.

Any student whose grade average for an individual semester falls below two point zero (2.0) but who is not otherwise subject to dismissal under RULE 1 shall be placed on academic probation for failure to meet academic requirements.

Rule 3: Standards for Removing Students from Probation.

Any student whose aggregate grade average for the probationary semester and the preceding semester is two point zero (2.0) or better, who satisfies such other requirements as may be imposed, and who is not otherwise subject to dismissal under RULE 1, shall be removed from probation at the end of the probationary semester.

Rule 4: Standards for Conditional Readmission of Probationers Until Grades are Reported.

Any student placed on probation under the provisions of RULE 2 shall be allowed to register and attend classes during the semester or summer school term following the probationary semester until such time as the student’s grades for the probationary semester have been so reported. The student shall be allowed to continue enrollment as a student in good standing only if the requirements of the probation are met. If the requirements of the probation are not met, the student shall be required to withdraw from enrollment in the Law School and shall be dismissed under the provisions of RULE 1. A student who is required to withdraw under the provisions of this Rule shall be entitled to the return of such portion of the student’s tuition as may be permitted by the regulations of the University of South Carolina.

Rule 5: Standards Governing Students Who Fail to Meet Academic Requirements in the Semester They are Scheduled to Graduate.

Violation of the provisions of RULE 1 in the semester a student is scheduled to graduate shall result in automatic dismissal except when the only subparagraph violated is Rule 1(a) (student’s grade average for the semester is below 1.5) in which case the student shall not be
Readmission after Academic Dismissal

1. A readmission petition shall include the following:
   a. An explanation of the reasons for the student's lack of success in law school;
   b. What the student plans to do to remedy these problems; and
   c. If the student is seeking a waiver of the waiting period (§3 below), an explanation of the hardship that would occur if the student were required to comply with the waiting period.

2. In passing on petitions for readmission, the Associate Dean for Academic Affairs shall consider the student's aptitude for the practice of law as reflected in the student's entire record. The Associate Dean shall not grant a petition for readmission unless the Dean finds that there is a high probability that the student will succeed on readmission.

3. Unless waived by the Associate Dean for Academic Affairs because of financial or personal hardship, petitions for readmission will not be granted until the student has complied with the following waiting periods: In the case of students dismissed at the end of the first year, the waiting period is two semesters. For other students, the waiting period is one semester.

4. A student who discontinues his/her legal education without approval of a petition for withdrawal shall be treated as being dismissed because of failure to meet academic requirements. Failure to seek permission for withdrawal shall be a negative factor in any petition for readmission.

5. Readmission shall be on such terms and conditions as may be set by the Associate Dean for Academic Affairs. Provided, however, that if a student is dismissed at the end of the first year and the student's grade point average is less than 1.80 (or the student has 50% or more exam performances less than C), the student may not be readmitted to the second year class but must instead repeat the first year. For students whose grade point average is between 1.80 and 1.99, the Associate Dean has discretion to readmit the student to the second year or require the student to repeat the first year. Students who are readmitted shall be on academic probation until the end of the second semester following readmission. Any readmitted student who does not comply with the requirements of §V, Rule 1, at the end of the probationary period shall be dismissed from School.

6. Neither the Associate Dean for Academic Affairs nor the Admissions Committee will entertain a petition for readmission from any student who has been readmitted after an academic dismissal and then dismissed for a second time. For purposes of this rule dismissal or suspension as a result of a violation of the Rule of Academic Responsibility shall be considered to be for failure to meet academic requirements. A student twice dismissed for fault to meet academic requirements may petition the faculty for readmission. The faculty will consider the petition only if two thirds of the faculty members voting vote to hear the petition. If the faculty hears the petition, the student will be readmitted only if two thirds of the faculty members voting vote to grant the petition.

7. Appeals from decisions of the Associate Dean for Academic Affairs on readmission petitions may be taken to the Academic Responsibility Committee. The standard of review is whether the decision of the Associate Dean is clearly erroneous. The Committee's decision is non-reviewable.

Academic Forgiveness

A student readmitted as a first year student may petition the Associate Dean for Academic Affairs for academic forgiveness. Once academic forgiveness has been granted, the following apply to the student's academic record:

1. All curriculum requirements will be in accordance with those in force at the time of or subsequent to the student's readmission.
2. The student's grade point average is recalculated beginning with the semester in which the student was readmitted to the University.
3. Courses in which the student received a passing grade prior to readmission and the granting of academic forgiveness may, at the discretion of the Associate Dean for Academic Affairs, be used for academic credit, and in recalcultating GPA.
4. The following statement shall appear on the official academic record of any student granted academic forgiveness: "This student was granted academic forgiveness under the University of South Carolina School of Law Academic Forgiveness Program. No courses taken at the Law School prior to (date of readmission) are used to meet degree requirements or in the calculation of the GPA. Introduction to the Legal Profession may be used to meet degree requirements if successfully completed."
5. The following statement shall appear on any unofficial academic record such as a grade sheet of any student granted academic forgiveness: "I was granted academic forgiveness under the University of South Carolina School of Law Academic Forgiveness Program. No courses taken at the Law School prior to (date of readmission) are used to meet degree requirements or in the calculation of the GPA. Introduction to the Legal Profession may be used to meet degree requirements if successfully completed."

Withdrawal from Law School

1. A petition for withdrawal shall contain the following:
   a. The reasons why the student wishes to withdraw. If the withdrawal is sought because of medical reasons, the student should be prepared to present documentation of the medical problem on request of the Associate Dean for Academic Affairs.
   b. A statement of when the student would like to return to law school, if the student intends to do so.
2. Petitions for withdrawal shall be granted by the Associate Dean for Academic Affairs if the Dean finds that bona fide medical or personal circumstances have developed which make continuation of the student's education at this time difficult.
3. A student who discontinues his/her legal education without approval of a petition for withdrawal shall be treated as being dismissed because of failure to meet academic requirements. Failure to seek permission for withdrawal shall be a negative factor in any petition for readmission.
4. Appeals from decisions of the Associate Dean for Academic Affairs dealing with petitions for withdrawal may be taken to the Admissions
Committee. The standard of review is whether the decision of the Associate Dean was clearly erroneous.

Note on One Semester Leave of Absence. After the completion of the first year of Law School, any student in good academic standing may elect to take a leave of absence for no longer than one semester, provided that the Associate Dean for Academic Affairs is notified of this in writing. Such a student shall be automatically entitled to register for the semester immediately following the leave of absence. The election to take a semester’s leave must be exercised and the Associate Dean notified prior to the day that is designated, for that semester, the official “last day to drop without penalty.” Any student who registers and then withdraws to the day that is designated, for that semester, the official “last day to drop without penalty.” Any student who registers and then withdraws pursuant to this rule shall be entitled to the return portion of tuition as may be permitted by the regulations of the University of South Carolina.

Readmission After Withdrawal

1. A petition for readmission after withdrawal shall contain an explanation by the student of how the circumstances that lead to the student’s withdrawal have changed.
2. Petitions for readmission after withdrawal shall be granted if the Associate Dean for Academic Affairs finds that the circumstances leading to withdrawal have been alleviated so that the student’s education can continue.
3. Appeals from decisions of the Associate Dean for Academic Affairs dealing with petitions for readmission after withdrawal may be taken to the Admissions Committee. The standard of review is whether the decision of the Associate Dean was clearly erroneous.

Waiver of Graduation Requirements

1. Petitions for waiver of graduation requirements shall state:
   a. The requirement for which waiver is sought.
   b. The reasons why the student failed to comply with the requirement.
   c. Why failure to grant the waiver would work a hardship on the student.
2. The Associate Dean for Academic Affairs may grant a waiver of a graduation requirement if the Associate Dean finds that there is good cause for the waiver, that compliance with the requirement would work a hardship on the student, and that granting the waiver would not seriously undermine any academic policies of the Law School.
3. Appeals from decisions of the Associate Dean for Academic Affairs dealing with petitions for waiver of graduation requirements may be taken to the Curriculum Committee. The standard of review is whether the decision of the Associate Dean was clearly erroneous.

Notification of Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.
   A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.
   A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.
   If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to provide written consent before the University discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent. The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.
   • The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, service provider or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.
   • A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.
   • To officials of other institutions in which the student seeks or intends to enroll provided that the student had previously requested a release of his/her record;
   • To authorized representatives of the U.S. Department of Education, U.S. Department of Defense (Solomon Amendment), U.S. Attorney General, the Comptroller General of the United States, state education authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations; to the Department of Homeland Security (DHS) and its Immigration and Customs
Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.

- In connection with a student's application for, and receipt of, financial aid;
- To comply with a judicial order or lawfully issued subpoena;
- To parents of dependent students as defined by the Internal Revenue Code, Section 152;
- To appropriate parties in a health or safety emergency; or
- To the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.

The University may disclose the result of a disciplinary proceeding to a parent or guardian so long as the student is under the age of 21 at the time of the incident and the proceeding has resulted in a violation of University drug or alcohol policies, or any federal, state, or local law.

- To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.

Release of Directory Information

In accordance with section 99.7 of the Family Educational Rights and Privacy Act (FERPA), the University of South Carolina provides students annual notification of their FERPA rights. The University of South Carolina has designated certain items as Directory Information. At the University of South Carolina, these items are as follows:

- Name
- Dates of Attendance
- Campus
- College or School
- Classification
- Primary Program of Study
- Full-time or Part-time Status
- Degree(s) Awarded Including Dates
- Honors and Award Including Dean's and President's List
- University Email Address
- City, State, and Zip Code Associated with a Student's Permanent Address

The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a "Confidentiality Indicator" on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be elective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be elective with regard to specific individuals or organizations.

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA.

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5501

Questions concerning this law and the University's procedures concerning the release of academic information may be directed to the Office of the Registrar at 777-5555.

Tuition and Fees

Tuition and fees for the 2018-2019 academic year for the School of Law can be found at the following site: https://sc.edu/study/colleges_schools/law/admissions/financial_aid/tuition_and_fees/index.php.

Refund Policy

1. Policy

The University will refund a part of academic fees in certain cases:

a. Changes in a student's status, which may require a refund.
   i. Change in a full-time student's schedule, which results in reclassification to part-time status
   ii. Change in a part-time student's schedule, which results in fewer credit hours.

b. Situations, which may require a refund.
   i. Course or courses dropped
   ii. Withdrawal from the University
   iii. Cancellation of a class by the University

2. Refund Requests

All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the last summer session (Summer II). Refunds may be requested at any time during the academic year in which the applicable term occurs.

3. Determining the Refundable Portion Procedure

The refund is for the portion of the tuition, fees, room, board, and other charges assessed the student under the control of the University equal to the portion of the period of enrollment for which the student has been charged that remains on the withdrawal date, less any unpaid amount of a schedule cash payment for the period of enrollment for which the student has been charged.

4. Withdrawal Refund Policies

Standard Refund Policy For Withdrawal From The University

a. 100% refund of the charges if the student's official withdrawal calculation is by the first week of classes of a sixteen-week session
b. 90% refund of the charges if the student's official withdrawal calculation is between the period specified in (A) and on or before the end of the 10% period of enrollment for which the student was charged
c. 70% refund of the charges if the student's official withdrawal calculation is between the period specified in (B) and on or before the end of the 16% period of enrollment for which the student was charged
d. 50% refund of the charges if the student's official withdrawal calculation is between the period specified in (C) and on or before the end of the 25% period of enrollment for which the student was charged
e. 25% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (D) and on or before the end of the 50% period of enrollment for which the student was charged

**Title IV Funds**

Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University

Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60% of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from school.

**Title IV Refund Distribution**

For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, refunds will be returned in the order prescribed by federal regulations. The institution must return the refund to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Refunds are to be distributed to the financial aid programs in the following order:

- Unsubsidized Federal Stafford
- Subsidized Federal Stafford
- Federal Perkins
- Federal PLUS Loan
- Federal Grants
- Pharmacy, Nursing & Health Professions Loans
- State funds
- Private or institutional scholarship(s) and loan(s)

Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

Exit interviews are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins, or Federal Nursing Loans. Exit interviews can be completed on the Internet at [http://www.sc.edu/financialaid/](http://www.sc.edu/financialaid/). Click on “Loan Counseling on the Web” and follow the instructions. Or, you may contact the Office of Student Financial Aid and Scholarships at (803)-777-8134 or the Loan Collection Department of the Bursar’s Office at (803)-777-3559 for the Columbia Campus. Telephone numbers and referenced offices are different for each campus.

5. Summer Sessions and Other Shortened Sessions Refund Procedure for Withdrawal

Adjusted refund schedules are printed in the master schedule of classes and are available in the Office of Financial Services.

a. 100% refund of the charges if the student’s **official withdrawal calculation** is by the end of late registration period

b. 90% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (A) and on or before the end of the 10% period of enrollment for which the student was charged

c. 50% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (B) and on or before the end of the 25% period of enrollment for which the student was charged

d. 40% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (C) and on or before the end of the 36% period of enrollment for which the student was charged

e. 25% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (D) and on or before the end of the 50% period of enrollment for which the student was charge.

6. Refund Schedules

Refund schedules are printed in the Schedule of Classes.

7. Dropped Courses - Refund Procedure

A percentage of fees will be refunded for course(s) dropped within two weeks (fall, spring and summer) after the first official day of classes or within an equivalent period for other sessions. No refunds will be made thereafter.

a. Drops - Fall And Spring Courses
   i. 100% refund for courses dropped before the end of the late registration period
   ii. 70% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (A) and on or before the end of the 16% period of enrollment for which the student was charged

b. Drops - Summer Terms
   i. 100% refund for courses dropped before the end of the late registration period
   ii. 40% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (A) and on or before the end of the 36% period of enrollment for which the student was charged
   iii. 25% refund of the charges if the student’s **official withdrawal calculation** is between the period specified in (B) and on or before the end of the 50% period of enrollment for which the student was charged

c. Other Shortened Sessions
   Adjusted refund schedules are printed in the Schedule of Classes

D. Correspondence Course Fees

Circumstance:

i. 100% if application is not accepted

ii. 75% if withdrawal is within one month and/or before an assignment has been submitted for grading and correction

iii. No refund for withdrawal after one month, or after an assignment has been submitted for grading and correction
8. Appeals Process
   A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy.
   A Withdrawal Appeals Committee reviews and acts on all appeals.
   All requests for refunds must be received in writing before the end of the first month of enrollment.

Fees and Refunds

Graduate Fee Schedule

Complete details about fees, payments, tax credits, loans, late changes, and related information may be found at the bursar's Web site, www.sc.edu/bursar (http://www.sc.edu/bursar/). For the complete graduate fee schedule, visit www.sc.edu/bursar/studentfees.html (http://www.sc.edu/bursar/studentfees.html). Tuition and fees are approved by the Board of Trustees and subject to change at any time.

For information about non-academic fees, charges, and regulations, visit the Web sites below.

- University Housing: www.housing.sc.edu (http://www.housing.sc.edu)
- Carolina Dining Services: www.sc.edu/dining (http://www.sc.edu/dining/)
- Thomson Student Health Center: www.sa.sc.edu/shs/tshc/ (http://www.sa.sc.edu/shs/tshc/)
- Vehicle Management and Parking Services: www.sc.edu/vmps (http://www.sc.edu/vmps/)

Checks, Money Orders, and Credit Cards

The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina (https://my.sc.edu/) a convenient way to pay, Self-Service Carolina will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by E-check, USC's preferred method of payment, when using Self-Service Carolina or payment by check or money order through the mail.

Legal Residency

The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one's resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

Legal Residency Requirements for Fee and Tuition Purposes

Code of Laws Governing Residence

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions

- “Academic Session” is defined as a term or semester of enrollment.
- “Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.
- “Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person's college education. A dependent person's residency is based upon the residency of the person upon whom they are dependent.
- “Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.
- “Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.
- “Full time employment” is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.
- “Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.
- “Immediately Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.
- “Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial
loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

**Citizens and Permanent Residents**

Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person’s support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

**Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents**

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

**Establishing the Requisite Intent to Become a South Carolina Domiciliary**

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.
If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

**Maintaining Residence**

A person's temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver’s license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

**Effect of Change of Residency**

Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

**Effect of Marriage**

In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

**Exceptions**

Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. **“Military Personnel and their Dependents”**: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish
South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in-state tuition and fees.

2. “Faculty and Administrative Employees with Full Time Employment and their Dependents”: Full-time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in-state tuition and fees.

3. “Residents with Full Time Employment and their Dependents”: Persons who reside, are domiciled, and are full-time employed in the State and who continue to work full-time until they meet the twelve month requirement and their dependents are eligible to pay in-state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary”).

4. “Retired Persons and their Dependents”: Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in-state rates if they maintain resident and domicile in the state. Persons on terminal leave who have established residency in South Carolina may be eligible for in-state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

Application for Change of Resident Status

Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

Incorrect Classification

Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

Inquiries and Appeals

Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina

Columbia, SC 29208
803-777-4060

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision made by the residency official. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person’s situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

Academic Fees

Application Fees

Every new graduate student will be charged a nonrefundable application fee of $50. All applications must be accompanied by the application fee. International students pay an enrollment fee of $500.

Matriculation Fee

A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students.

Free Tuition

(These includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. S.C. Code Ann. § 59-111-110 (Law Co-op. 1976) No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, as defined herein, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty (on or after July 1, 1964).

2. S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984) Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or non-credit purposes on a space available basis; provided, however, that neither such persons nor their spouses receive compensation as full-time employees.

Examination Fees

Graduate Record Examination

• General Test ($60)
• Subject Test ($60)
Revalidation examinations intended to revalidate USC courses, obsolete under the statute of limitations. Per hour, $25.

Note: Revalidation examinations require permission of the dean of The Graduate School. The fee must be paid in advance, and is nonrefundable, once the student is presented to the instructor for the examination.

Refund Policy

1. Policy
The University will refund a part of academic fees in certain cases:
   a. Changes in a student's status, which may require a refund.
      i. Change in a full-time student's schedule, which results in reclassification to part-time status
      ii. Change in a part-time student's schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Drop/Withdrawal from the University
      iii. Cancellation of a class by the University

2. Procedure
   a. Refund Requests
      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

   b. Determining the Refundable Portion Procedure
      Student refunds for tuition are calculated based on the student's liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

   c. Drop/Withdrawal Refund Policies

      Standard Refund Policy For Dropping/Withdrawal From The University:

      All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar's Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
      i. 100 percent if the student's official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.

   iii. 50 percent if the student's official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.

   iv. 20 percent if the student's official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

   d. Refund Schedules
      Refund schedules are relocated under the important deadlines on the Registrar's website (http://registrar.sc.edu/)

   e. Return of Title IV Funds

      Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University:

      i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from school.

      ii. Title IV Refund Distribution

      1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
         • Unsubsidized Federal Stafford
         • Subsidized Federal Stafford
         • Federal Perkins
         • Federal PLUS Loan
         • Federal Pell Grant
         • Federal Supplemental Education Opportunity Grant
         • Federal TEACH Grant
         • Federal Iraq/Afghanistan Service Grant

   1. 70 percent if the student's official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.

   3. 50 percent if the student's official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.

   4. 20 percent if the student's official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.
2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

3. Exit interviews are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Exit interviews can be completed at http://www.sc.edu/financialaid/loan_counseling/default.html. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

f. Appeals Process
   A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal.

   The Withdrawal Refund Appeals Committee reviews and act on all appeals. Address appeals to:

   Withdrawal Refund Appeals Committee
   (Columbia Campus Only)
   Office of the Registrar
   University of South Carolina
   Columbia, SC 29208
   803-777-5555

Housing Fees
1. Students in the following categories are eligible for refunds in accordance with the terms shown in their Residence Hall contract:
   a. newly admitted students who do not attend the University of South Carolina
   b. students who graduate from school at the end of the fall semester
   c. students who are suspended for academic reasons
   d. students who get married.

   Check the contract or call University Housing for deadline dates and other information.

2. Tenants who do not withdraw from the University but desire release from their contracts will be placed on a contract release waiting list with University Housing. Releases will be granted only when all other space is filled and the space can be rented for the balance of the year to another tenant. Students will be notified upon release and appropriate refunds will be made.

Withdrawal Refunds
All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members of the Office of the University Registrar are available to assist students in completing the withdrawal process. In addition, staff from the Student Ombudsman Office located in the Osborne Administration building can provide counseling. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should see their college dean.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

University Withdrawal Refund Appeal Procedures
The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University's published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Office of the University Registrar and will be considered only in written form. A standardized appeal form must be submitted.

2. All requests for appeal must be submitted directly by the student through the Office of the University Registrar and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student's family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official's advice, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.

3. The appeal must be initiated during the semester for which the refund is requested.

4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.

5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.

6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses, are excluded from consideration.

7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chair. The student will be informed of the outcome of the appeal by letter from the Office of the Associate Vice President for Student Life and Development.
Course Descriptions

• Health Law (LAWH) (p. 1510)
• Law School (LAWS) (p. 1510)

Health Law (LAWH)

LAWH 700 - Legal Foundations of the Health Care System I (3 Credits)
Introduction to structure of government, sources of federal, state, and
local law, judicial and administrative processes, the role of the lawyer,
legal reasoning and analysis, and sources of law that govern and regulate
access to U.S. health care system.

LAWH 701 - Legal Foundations of the Health Care System II (2 Credits)
Holistic understanding of the various aspects of the healthcare system
related to sources of care, sources of payment, and regulatory and other
legal systems that constrain and control the behavior of these sources
and how these sources impact each other.
Prerequisites: LAWH 700.

LAWH 702 - Legal Foundations of Health Care System Lab (1 Credit)
Methods used to locate sources of health care regulations that require
compliance and to collect required information.
Prerequisite or Corequisite: LAWH 701.

LAWH 710 - Public Health Systems (2 Credits)
Understanding the role and duties of public health officials in the
healthcare system, the various public health regimes that require
compliance, and the role of public health funding streams in achieving
quality compliance for private parties. Health Care Compliance Certificate
Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 712 - Bioethical Principles (Applied Learning) (2 Credits)
Moral obligations that influence health care professional norms and
regulatory structures. Health Care Compliance Certificate Students are
excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 714 - Health Care Contracting (Applied Learning) (2 Credits)
Health care contracts. Health Care Compliance Certificate Students are
excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 716 - Medicare Compliance for Medical Facilities (3 Credits)
Medicare reporting and structural requirements for hospitals.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 720 - Health Policy Advocacy (2 Credits)
Communication of health policy concerns to decision makers. Health
Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 722 - Risk Management (2 Credits)
Health care professionals’ and institutions’ limitation and management of
risks.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 724 - Certificates of Need (2 Credits)
Navigating the certificate of need process in the health care industry.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 728 - Comparative Studies in International Health Care (2 Credits)
Examining health care systems from a legal and structural perspective in
nations outside of the United States. Health Care Compliance Certificate
Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 730 - Healthcare Structure Planning for Companies & Non-
Profits (3 Credits)
Introduction to structure of health care practices and their relationships
with others, examining the regulatory compliance requirements
necessary to maintain nonprofit taxation status at the state and federal
levels. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 732 - Medicare Quality Compliance (3 Credits)
In-depth examination of compliance with various quality initiatives and an
understanding of the sources for the regulations and rules.
Prerequisites: LAWH 700, LAWH 701, LAWH 702, and LAWH 716.

LAWH 734 - Healthcare Fraud & Abuse Compliance (2 Credits)
Examining federal laws and regulations to prohibit healthcare fraud and
abuse.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 736 - Third Party Billing Compliance (2 Credits)
Providing an understanding of the requirements for properly billing third-
party payers.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 738 - HIPAA and Electronic Medical Records Compliance (3 Credits)
Requirements for organizations that handle protected health information,
including information about which entities need to comply with laws
protecting such information and to what extent.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 740 - Antitrust Compliance (3 Credits)
Introduction to potential antitrust issues for large scale healthcare
organizations, offering a survey of situations that could trigger antitrust
investigations and litigation from both state and federal antitrust
enforcement agencies.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

LAWH 750 - Health Systems Legal Externship (2 Credits)
Learning about health systems through working at an approved location
to gain first-hand experience in work related to the student’s course of
study. Health Care Compliance Certificate Students are excluded.
Prerequisites: LAWH 700, LAWH 701, and LAWH 702.

Law School (LAWS)

LAWS 500 - Introduction to the Legal Profession (1 Credit)
This course provides an overview of the different roles in which lawyers
serve and the different work environments in which lawyers are
employed. Students will meet members of the legal profession, hear
about the daily work of lawyers in different settings, receive information
about handling the responsibilities of law practice, learn about the range
of lawyers’ duties and to whom those duties are owed, and be introduced
to the basic principles of professionalism. Graduation Requirement:
Course required for graduation. Basis of Grade: Class attendance and
participation; project report. Form of Grade: Pass/Fail.
Prerequisites: None.
LAWS 504 - Contract Law (4 Credits)
An introduction to the law governing contracts, both common law and the Uniform Commercial Code. Topics covered include the agreement process, requirements for enforceability, interpretation and meaning, defenses, and remedies. Graduation Requirement: Course required for graduation. Basis of Grade: Examination. Form of Grade: Letter.
Prerequisites: None.

LAWS 505 - Contracts I (3 Credits)
An introduction to the common law and Uniform Commercial Code relating to the agreement process, including the requirements of offer, acceptance, and consideration for the formation of contractual relationship. Problems on the interpretation of the contract, negotiation, drafting, and legal planning are analyzed and discussed. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 506 - Contracts II (3 Credits)
Continuation of Contracts I. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 509 - Property (4 Credits)
In this course, students are introduced to major concepts of property law, including the historical development of private property rights. The course will focus primarily upon the acquisition, characteristics, and transferability of property interests, as well as the relationship between privately held property interests in land and government regulation of that land for public purposes. Topics covered in the course will typically include adverse possession, estates, future interests, landlord tenant, easements, covenants, purchase & sale, deeds, and financing. Graduation Requirement: Course required for graduation. Basis of Grade: Examination Form of Grade: Letter.

Prerequisites: LAWS 504.

LAWS 510 - Property I (3 Credits)
In this course, students are introduced to major concepts of personal and real property law, including the historical development of private property rights. The course will focus primarily upon the acquisition, characteristics, and transferability of property interests, as well as the relationship between privately held property interests in land and government regulation of that land for public purposes. Topics covered in the course will typically include personal property (gifts, bailments, lost & found), adverse possession, estates, future interests, landlord tenant, easements, covenants, purchase & sale, deeds, financing, and zoning. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 511 - Property II (3 Credits)
Continuation of Property I. Basis of Grade: Final examination. Form of Grade: Letter Grade.

Prerequisites: LAWS 510.

LAWS 523 - Constitutional Law (4 Credits)
A study of the structure of the Federal Government, the function of the Supreme Court in constitutional government, and the provisions of the United States Constitution that guarantee and protect individual rights against governmental encroachment. Topics include judicial review, sources and limits of congressional power, presidential power, equal protection, substantive due process and identification of unenumerated fundamental rights, freedom of speech, and the religion clauses. Graduation Requirement: Course required for graduation. Basis of Grade: Examination. Form of Grade: Letter.

Prerequisites: None.

LAWS 524 - Criminal Law (3 Credits)
This course provides an introduction to the substantive law of crimes. The primary emphasis is on those rules, principles, and doctrines applicable to most or many crimes. These doctrines include actus reus (What is a criminal act?), mens rea (What states of mind are criminal?), and the defenses of insanity, intoxication, impossibility, mistake, duress, necessity, and self-defense. Some attention is also given to several specific crimes and to theories of punishment. The primary materials are selected appellate court opinions and the Model Penal Code. Graduation Requirement: Course required for graduation. Basis of Grade: Final examination. Form of Grade: Letter Grade.

Prerequisites: None.

LAWS 525 - Constitutional Law I (3 Credits)
A study of the Structure of the Federal Government and the function of the Supreme Court in constitutional government. Topics include principles of justiciability and standing; the development of federal power through the commerce clause and limits on state power flowing from the commerce and contract clauses; executive powers and the practice of separation of powers. The course will also generally consider the effect of the Fourteenth Amendment upon federalism, and conclude with the concept of state action as a limitation on the reach of the Amendment's guarantees. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 526 - Constitutional Law II (3 Credits)
The second-half of the required year-long Constitutional Law sequence. This class focuses on provisions of the United States Constitution that guarantee and protect individual rights against government encroachment. Among the topics covered are: equal protection, due process, freedom of speech, and freedom of religion. Registration: Rising 2Ls have registration priority. Subject to block registration, required for graduation. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 527 - Products Liability Problem Research Seminar I (1,2 Credits)

LAWS 528 - Products Liability Research Problems Seminar II (1,2 Credits)

LAWS 529 - Torts (4 Credits)
The legal protection afforded in civil proceedings against interference by others with the security of one's person, property, or intangible interests; the analysis of intentional interference, negligence, and strict liability in the context of recognized categories of tort liability. Graduation Requirement: Course required for graduation. Basis of Grade: Examination. Form of Grade: Letter.

Prerequisites: None.

LAWS 530 - Torts I (3 Credits)
The legal protection afforded in civil proceedings against interference by others with the security of one's person, property, or intangible interests; the analysis of intentional interference, negligence, and strict liability in the context of recognized categories of tort liability. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 531 - Torts II (3 Credits)
Continuation of Torts I. Basis of Grade: Final examination. Form of Grade: Letter Grade.

Prerequisites: LAWS 530.
LAWS 533 - Legal Research, Analysis and Writing I (3 Credits)
This course integrates instruction in fundamental legal research, analysis, and writing. Students learn the basic methods of researching state statutes and case law. Students learn how to analyze cases and statutes, how to identify and understand legal rules derived from these authorities, and how to apply those rules to make informed predictions about legal issues. Students also learn how to convey legal analysis clearly and concisely, and how to draft a legal prediction in the form of a memorandum of law. Students prepare two full memoranda of law and independently conduct the research necessary to complete one of them. Graduation Requirement: Course required for graduation. Basis of Grade: Written Assignments. Form of Grade: Letter.
Prerequisites: None.

LAWS 534 - Legal Research, Analysis and Writing II (3 Credits)
This course builds on the research, writing, and analytical skills introduced in Legal Research, Analysis, and Writing I. Students learn how to research federal statutes and case law, regulations, and secondary sources. Students also learn the skills of persuasive writing and argumentation through the preparation of an appellate brief and oral argument. Students independently conduct the research necessary to complete the appellate brief. Graduation Requirement: Course required for graduation. Basis of Grade: Written Assignments and Exam. Form of Grade: Letter.
Prerequisites: LAWS 533.

LAWS 535 - Legal Writing I (2 Credits)
Students will learn how to read cases and statutes effectively, how to understand legal rules from these authorities, and how to apply those rules to new factual situations to make informed predictions about legal issues. Students will also be taught how to convey legal analysis in clear, concise prose and how to draft a legal prediction in the form of a memorandum of law. The course will also cover information regarding the court system, the litigation process, and the professional obligations of lawyers. Basis of Grade: Written assignments. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 536 - Legal Writing II (1 Credit)
In this course, students build on the analytical and editing skills introduced in Legal Writing I. Students also learn the skills of persuasive writing and argumentation through the preparation of an appellate brief and an oral argument. Basis of Grade: Written assignments and oral argument. Form of Grade: Letter Grade.
Prerequisites: LAWS 535.

LAWS 537 - Legal Research (1 Credit)
During the introductory course in Legal Research, students receive instruction in the basic sources and research techniques of American law. Emphasis will be placed upon the development of an effective and efficient research strategy for locating and updating state and federal cases, statutes, regulatory materials, and major forms of secondary legal resources. Students will examine and use resources in both print and online formats. While some attention will be paid, of necessity, to the details of each source, the course will focus upon the use of these sources within the context of efficient and cost-effective legal research. Basis of Grade: Final examination. Form of Grade: Pass/Fail.
Prerequisites: None.

LAWS 538 - Legal Drafting (3 Credits)
Students will learn the basic techniques of legal drafting - researching the document, finding the appropriate legal concepts to express the client's wishes, organizing the document, then actually writing the document. Students will then use these techniques to draft a variety of types of documents - including private law documents (contracts, releases, etc.), and public law documents (statutes and regulations), and a few pleading documents. The primary focus will be on form and style rather than on the substantive content of the documents. Graduation Requirement: This course satisfies the skills course graduation requirement. Basis of Grade: Drafting assignment. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 540 - Advanced Legal Writing (3 Credits)
This course will focus on format, analysis, and organization with respect to a variety of legal documents, which may include objective memoranda, trial-level briefs, correspondence, discovery requests and responses, and jury instructions. Students will also receive instruction and tailored comments regarding writing style. Graduation Requirement: This course satisfies the writing requirement, or the experiential requirement, but not both; must earn a grade of C or better to satisfy either requirement. Basis of Grade: Written assignments. Form of Grade: Letter Grade.

LAWS 542 - Advanced Legal Analysis (2 Credits)
This course takes an explicit, problem-based approach to legal analysis in order to deepen students' ability to synthesize legal authorities and to formulate and critique legal arguments. Topics covered will include theories of legislative and regulatory interpretation, sources of "public policy" arguments, and an exploration of stare decisis and the weight of published, unpublished, and “depublished” judicial opinions. Throughout the semester, students will work through numerous exercises that require the analysis, synthesis, and application of legal authorities. Some exercises will require students to perform their own legal research; others will be based on the “File” and “Library” format of the NCBE MultiState Performance Test; and still others will ask students to critique the analysis in existing memoranda and briefs. All exercises will require intensive, focused, repeated reading of statutes, regulations, cases, or some combination thereof. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Short written exercises throughout the semester, take-home exam. Form of Grade: Letter.
Prerequisites: None.

LAWS 544 - Legal Research, Analysis and Writing II (3 Credits)
This course integrates instruction in fundamental legal research, analysis, and writing. Students learn the basic methods of researching state statutes and case law. Students learn how to analyze cases and statutes, how to identify and understand legal rules derived from these authorities, and how to apply those rules to make informed predictions about legal issues. Students also learn how to convey legal analysis clearly and concisely, and how to draft a legal prediction in the form of a memorandum of law. Students prepare two full memoranda of law and independently conduct the research necessary to complete one of them. Graduation Requirement: Course required for graduation. Basis of Grade: Written Assignments. Form of Grade: Letter.
Prerequisites: None.
LAWS 543 - Advanced Legal Writing: Online Civil Litigation Drafting (3 Credits)
This course is designed as an online course offering that combines components of two upper-level drafting courses currently offered: Advanced Legal Writing and Writing in Law Practice. The goal of the course is to expose students to the drafting skills private practice lawyers need to handle a case in the course of civil litigation. This class will not deal with trial skills; rather, this course will focus on pretrial and pretrial drafting skills and will simulate a realistic litigation experience in a law firm setting. The course will encourage students to build on the legal writing and research skills they learned in the first year and expose them to documents they will need to produce in practice that are not a part of the first year legal writing experience. Students will learn how to (1) draft common litigation documents; (2) produce clear and concise writing; (3) effectively analyze legal issues; (4) express legal analysis clearly in written and oral communications; (5) conduct legal research in context; (6) critically examine information in its original form and discern information relevant to the litigation; (7) make strategic decisions about litigation based on the client's expressed goals, the facts of the case, and the law; (8) draft a persuasive argument in the pretrial context; and (9) produce documents necessary to resolve the pending litigation. Graduation Requirement: This course satisfies the experiential course requirement, must earn a grade of C or better. Basis of Grade: Written assignments. Form of Grade: Letter.

LAWS 544 - Civil Procedure (4 Credits)
This course will provide an introduction and overview of the procedural steps in the prosecution and defense of civil cases in federal court. The course will focus on pleadings, joinder, discovery, summary judgment, trial and post-trial motions, preclusion doctrines, personal jurisdiction, subject matter jurisdiction, removal, supplemental jurisdiction, venue, and Erie doctrine. If time permits, opportunity to be heard, class actions, case management, appellate review, and alternative dispute resolution may also be addressed. The order of, and time allocated to, each topic will vary from instructor to instructor. Graduation Requirement: Course required for graduation. Basis of Grade: Examination. Form of Grade: Letter.
Prerequisites: None.

LAWS 545 - Civil Procedure I (3 Credits)
An introduction to the Rules of Civil Procedure governing the civil litigation process, including rules regarding pleadings, discovery, joinder of parties, summary judgment, default, post-trial motions, and claim and issue preclusion. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 546 - Civil Procedure II (3 Credits)
An analysis of the procedural steps in the prosecution and defense of a civil case with emphasis on the Federal Rules of Civil Procedure, including pleading, motions directed to pleadings, amendment, joinder, complex joinder devices, obtaining information from other parties through discovery, trial and post-trial motions, and standards for appeal. Special issues in federal procedure including subject matter jurisdiction, removal, jurisdictional limitations on procedural devices, transfer between federal courts, class actions and multi-district litigation and appellate issues and the relationship of the federal and state courts may also be explored. At the discretion of the professor some individual drafting problems may be assigned. Registration: Second year block course; 2L priority registration. Graduation Requirement: Required for graduation (students entering Fall 2009). Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: LAWS 545.

LAWS 547 - Criminal Procedure (3 Credits)
The criminal process with emphasis on constitutional issues relating to arrest, search and seizure, and interrogation. Some consideration of issues relating to identification procedures, jeopardy, pre-trial procedure, and guilty pleas. Registration: 2L priority registration. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 548 - Discovery Drafting (3 Credits)
This course is a practice-oriented introduction to the discovery phase of litigation. The course will simulate a product liability case in which enrolled students will represent either the plaintiff or the defendant. Students will handle the case from the beginning of discovery until the case is ready for settlement or trial, focusing on drafting the discovery documents necessary to advance the case. This course will expose students to the specific skills needed for engaging in litigation discovery. Graduation Requirement: The course satisfies the experiential course requirement, must earn a grade of C or better. Basis of Grade: Each written assignment and course activity will be assigned a point value that will contribute to an overall point total for the entire course. A student's letter grade will be determined by the percentage of points the student earns throughout the course. Form of Grade: Letter.
Prerequisites: None.

LAWS 549 - South Carolina Criminal Law and Procedure (3 Credits)
This course examines the substantive criminal laws of South Carolina with an emphasis on the rules, principles, and procedures applicable to magistrate and General Sessions courts of South Carolina relating to arrest, bonds, pre-trial procedures, guilty pleas, and trials. To prepare students for practicing criminal law as prosecutors or defense attorneys in South Carolina, this course will focus on the criminal process in South Carolina for both the prosecution and defense from the decision to charge through the trial of a case. Graduation Requirement: Course satisfies the experiential graduation requirement. Must earn a grade of "C" or better. Basis of Grade: Written Assignments and Simulations. Form of Grade: Letter Grade.
Prerequisites: Evidence.

LAWS 554 - Problems in Professional Responsibility (3 Credits)
A course that focuses on lawyers' ethical obligations in various areas of practice: criminal defense and prosecution, civil litigation, office practice, counseling, transactions work, corporate and organizational counsel, government, and the judiciary. The course also examines significant issues facing the profession, including limitations on advertising and solicitation, restrictions on the adversary model, and the national and global nature of the legal profession. Registration: 2L priority registration. Second year block course. Graduation Requirement: Satisfies Professional Responsibility requirement for graduation. Must earn a grade of C or better to satisfy the graduation requirement. Students who have taken Professional Responsibility may not enroll. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 555 - Professional Responsibility (2 Credits)
Examination of the lawyer's obligations to clients, other lawyers, and courts, and also to society and themselves, with focus on the Rules of Professional Conduct. Graduation Requirement: This course or Problems in Professional Responsibility is required for graduation. Must earn a "C" or better to meet graduation requirement. Form of Grade: Letter Grade.
Prerequisites: None.
LAWS 556 - Advanced Legal Profession (2 Credits)
An in-depth study of selected problems in ethics and professionalism confronting lawyers in the practice of law. Topics will include legal malpractice, the disciplinary system, ethical issues facing lawyers in particular fields, ethics and professionalism in litigation, office practice, and other issues of current interest. Instruction in the course will be by faculty members, practicing lawyers and judges. Basis of Grade: Written responses to problems; memos and drafting exercises. An assignment on substantive topic discussed in the course. Grade will be based on top 5 scores received on assignments. Form of Grade: Letter.

LAWS 557 - Law Practice Workshop (2 Credits)
The course provides a synthesis of the substantive knowledge and the practical skills and experience essential to a successful practice and the competent representation of clients in numerous areas of the law. The course will emphasize the analysis of client problems and the processes involved in effecting solutions. Practice areas covered from time to time during the semester may include, inter alia, bankruptcy, criminal defense litigation, criminal prosecution, civil defense litigation, plaintiff's litigation, construction law, elder law, fiduciary representation, estate planning, family court litigation, alternative dispute resolution, real estate transactions, workers' compensation, international law, health law, intellectual property, media law, poverty law, education law, commercial law, banking law, employment law, consumer law, business entities and agency law, appellate practice, tax practice, environmental law, regulatory practice, and administrative law. This course is not intended as a substitute for a more in-depth study of doctrinal law and procedure in these various areas but instead will serve as a transitional stage from the knowledge and skills obtained in other courses to the practice of law in those areas. Various presentations will be made by leading experts in their fields. Forms and other practice materials will be provided. Registration: This course is limited to students in their final semester of law school. Basis of Grade: Examinations and/or projects, attendance. Form of Grade: Pass/Fail.

LAWS 558 - Advanced Civil Procedure (3 Credits)
This course is designed to cover topics not covered in depth in the first-year Civil Procedure course and may include complex joinder rules, interpleader, discovery issues related to expert witnesses, offers of settlement, and appeals. It will emphasize federal procedure but note some ways in which South Carolina procedure differs. The course is also designed to enhance skills acquired in the first year including the ability to research, read, and understand procedural rules, statutes, and cases, and the ability to synthesize those sources. Students will spend some time practicing essay and multiple-choice questions of the type they may encounter on a bar exam, in addition to performing more practice-related exercises; the course may thus review, as necessary, some topics encountered in the first-year course. Basis of Grade: Exercises, Quizzes and Open-Book Final Exam. Form of Grade: Letter.
Prerequisites: LAWS 544.

LAWS 559 - Advanced Topics in Criminal Law (2 Credits)
This course is an advanced course in criminal law. Students will explore three different areas: First, they will take an in-depth look at topics that play an important role in criminal practice, but which typically go unmentioned or are only briefly discussed in first-year Criminal Law. Such topics include, for example, possession crimes and conspiratorial relationships. Second, students will survey high-profile criminal law topics that have attracted popular attention, such as cyber-crime, anti-terrorism enforcement, and forensic investigation. Third, students will finish the class by studying sentencing law and policy. The purpose of the course is both to provide students with a broad understanding of criminal law and to prepare them for a career by exposing them to legal doctrines that play a common role in criminal practice. Basis of Grade: 85% final exam, 10% other assignments, 5% participation. Form of Grade: Letter grade.
Prerequisites: LAWS 524.

LAWS 560 - Foundations of Law Practice and Professionalism (2 Credits)
This course has two objectives: first, to introduce students to fundamentals essential to successful private practice, whether solo or small or large firm, and second: to explore professionalism in the legal profession and its relationship to successful practice. Topics covered may include the economics of law practice, trust accounts and record keeping, common mistakes to avoid, interpersonal skills and leadership principles necessary in managing a practice, managing client relationships, marketing and professionalism. Basis of Grade: Final examination and group projects. Form of Grade: Letter Grade.
Prerequisites: LAWS 554 or LAWS 555.

LAWS 561 - Capstone Course: Small Business Organization (5 Credits)
This course will provide students with practical and substantive knowledge and experience in transactional law using a small business nonprofit or small business for-profit organization model. It will be multidisciplinary and provide students a broad theoretical and practical experience with measurable outcomes and skills, including problem solving, project management, leadership, and teamwork. Students will act as counsel for a group interested in forming either a nonprofit 501(c)(3) organization or a for-profit entity that will own and operate a business. As counsel for the organization, students' responsibilities will include interviewing a client; reviewing a Retainer Agreement; preparing Articles of Incorporation; preparing Bylaws; preparing IRC Form 1023 (Application for Exemption) or LLC or other business documents; providing Board of Director education and advice at simulated board meetings; and preparing Contracts, Lease Agreements, and/or Sponsorship Agreements. Students may also advise the client and draft documents related to copyright issues, potential mergers, and partnership agreements. Registration: Limited to 3Ls only. LAWS 717, LAWS 637, and LAWS 771 are highly recommended, but are not Prerequisite: LAWS 554 or LAWS 555 and LAWS 609.
Prerequisites: Students limited to enrolling into one Capstone course. Students cannot enroll in an externship or clinic course in the same semester as a capstone course. Graduation Requirement: This course satisfies the experiential course requirement, must earn a grade of C or better. Basis of Grade: Written and oral assignments. Form of Grade: Letter. LAWS 554 or LAWS 555 and LAWS 609.
LAWS 562 - Advanced Legal Research (2 Credits)
This course builds on the basic research skills gained in the first-year LRAW program. This course provides research experience through classroom instruction and mock legal research assignments that simulate tasks performed in a law firm setting. Upon completion of this course, students should be able to evaluate research options and demonstrate advanced research methods typical of attorneys in practice. Graduation Requirement: This course satisfies the experiential course requirement, must earn a grade of C or better. Basis of Grade: Written assignments and project. Form of Grade: Letter grade.
Prerequisites: LAWS 533, LAWS 534.

LAWS 562A - Advanced Legal Research (3 Credits)
This course is offered for 3 credit hours only during the summer session. This course builds on the basic research skills gained in the first-year LRAW program. The course offers students the opportunity to develop an in-depth working knowledge of legal research methods through experience using and comparing a broad range of legal research tools. Upon completion of this course, students should be able to evaluate research options and demonstrate advanced research methods typical of attorneys in practice. Graduation Requirement: This course will satisfy the skills requirement. Basis of Grade: Written assignments and project. Form of Grade: Letter Grade.
Prerequisites: LAWS 533 and LAWS 534.

LAWS 563 - International Foreign Legal Research (2 Credits)
LAWS 564 - Free Speech and Democracy (3 Credits)
This course will study the constitutional rights of freedom of expression guaranteed by the First Amendment. The course will consider constitutional questions related to regulation of offensive speech, defamation, pornography, symbolic speech, commercial speech, Internet and broadcast regulation, regulation of the public forum, and freedom of association. The course will emphasize the relations between free speech and democratic processes through consideration of campaign finance and election regulations. Registration: The optional paper DOES NOT satisfy the graduation writing requirement. Basis of Grade: Final examination or optional research paper with permission of the instructor. Form of Grade: Letter.
Prerequisites: LAWS 523.

LAWS 565 - Beach Law Seminar (2,3 Credits)
This seminar-style course will allow students the opportunity to discuss and to conduct research on current, specific beach law conflicts. Examples of the kinds of issues that could be the basis for research include sea-level-rise impacts on beaches, public access disputes during the COVID-19 era, recent public access litigation, the history of beach privatization, and differences in public beach rights across jurisdictions. Registration: Students can satisfy the writing requirement in the three-credit option by writing an outline, a first draft, and a 30-page paper, and receiving a grade of "C" or better in the course. Basis of Grade: Students who opt for the two credits will research and write a 20-page paper. Students who opt for the three credits will research and write a 30-page paper. In addition to submitting a final paper, all students will be required to turn in a detailed outline/bibliography; make an in-class presentation; and turn in a complete first draft. Form of Grade: Letter.
Prerequisites: LAWS 568.

LAWS 568 - Coastal Law (3 Credits)
This course explores legal approaches to avoiding and resolving conflicts between human use of coastal areas and the ecological integrity of coastal systems. We will cover relevant South Carolina and Federal law, looking at issues both above and below the tide line. Course readings represent a variety of disciplines, including law, economics, and the natural sciences. Students must participate actively in discussions, present their research proposals, and submit three writing projects. Graduation Requirement: This course satisfies the perspective course requirement. Basis of Grade: Final examination, written assignments and class participation. Form of Grade: Letter.

LAWS 569 - Coastal Law Field Lab (6 Credits)
Classes will have three modules. For the first two weeks students will study coastal land use and environmental issues. The second module, Climate Change and the Coast, will cover domestic and international climate change law, disaster law, and coastal development. The final module, Coastal Energy Law, will cover the fundamentals of energy law, offshore oil and gas law, and coastal impacts of on-shore energy. This is not your typical class because by the end of the course students will have spent eight out of the 20 class days in the field. Students will receive one grade for the three courses which will combine their individual grades from Coastal Law (3 credits), Climate Change and the Coast (1.5 credits), and Coastal Energy Law (1.5 credits). Basis of Grade: Exam. Form of Grade: Letter.

LAWS 569A - Coastal Law Field Lab (2 Credits)
This is a two-credit course taught at Belle Baruch Institute for Marine and Coastal Sciences near Georgetown, South Carolina over a seven-day period during the law school's spring break. The course is built around five half-day field trips to properties along the “north coast” of South Carolina (Charleston to Myrtle Beach) that have either been at the heart of important litigation or high-profile coastal law issues. Prior to each site visit, students will read the relevant case or issue briefing, then meet with the instructor for discussion. During the site visits, the class will meet with attorneys, parties, or government officials who have been involved in the matter for question and answer sessions. Basis of Grade: Writing Assignments. Form of Grade: Letter.
Prerequisites: LAWS 731 or LAWS 709 or LAWS 568.

LAWS 570 - Supervised Legal Research I (1-4 Credits)
Students must register for a minimum of two credit hours to fulfill the graduation writing requirement. Basis of Grade: Research paper 30-50 pages in length. Form of Grade: Letter or Pass/Fail.

LAWS 571 - Supervised Legal Research II (1-4 Credits)
LAWS 572 - Supervised Legal Research III (2 Credits)
LAWS 578 - Supervised Extracurricular Competition (2 Credits)

LAWS 581 - Corporations (3 Credits)
A study of the formation, structure, and characteristics of enterprises organized to do business in the corporate form. Areas discussed include shareholder and promoter liability, division of enterprise ownership, owners and control, duties of management, and securities regulation. Registration: Students who have taken LAWS 600 may not register for this course. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 585 - Journal of Law and Education (2 Credits)
LAWS 586 - Real Property, Trust & Estate Law Journal (2 Credits)
LAWS 587 - South Carolina Journal of International Law & Business (2 Credits)
**LAWS 588 - South Carolina Law Review (2 Credits)**

This course will cover the history, jurisdiction, practice elements, specific procedure and evidence rules, customs, access, and protocols of every tribunal within the South Carolina judicial system. A primary focus will be the differences among the courts’ practice, procedure and evidence rules, and structure. A significant portion of the course will include a comparative aspect with other state courts and with federal courts. Students will visit tribunals and attend classroom presentations from practitioners and judicial officers from every level of court in South Carolina. The course will include lectures, practical experiences, observations, and student participation in exercises illustrating the differences in the jurisdiction and practices of the various courts and administrative law venues. Upon completion of the course, the student will understand the operations and history of all South Carolina state courts -- probate, summary, general jurisdiction (civil and criminal), family, administrative, workers’ compensation, and appellate. Basis of Grade: Examination and student participation in practical exercises. Form of Grade: Letter.

Prerequisites: LAWS 533 and LAWS 534.

**LAWS 596 - Going to Court in South Carolina (3 Credits)**

This course will cover the history, jurisdiction, practice elements, specific procedure and evidence rules, customs, access, and protocols of every tribunal within the South Carolina judicial system. A primary focus will be the differences among the courts’ practice, procedure and evidence rules, and structure. A significant portion of the course will include a comparative aspect with other state courts and with federal courts. Students will visit tribunals and attend classroom presentations from practitioners and judicial officers from every level of court in South Carolina. The course will include lectures, practical experiences, observations, and student participation in exercises illustrating the differences in the jurisdiction and practices of the various courts and administrative law venues. Upon completion of the course, the student will understand the operations and history of all South Carolina state courts -- probate, summary, general jurisdiction (civil and criminal), family, administrative, workers’ compensation, and appellate. Basis of Grade: Examination and student participation in practical exercises. Form of Grade: Letter.

Prerequisites: LAWS 533 and LAWS 534.

**LAWS 599 - The Lean Law Firm Lab (2 Credits)**

This class will introduce students to advanced concepts in law firm management, including lean systems thinking, process design, visual information management, standardization and automation. Students will also be taught how to set goals and measure key performance indicators. Teaching will be accomplished, in part, by placing the students into a mock virtual law firm (or firms depending on enrollment) and requiring hands-on use of case management software and other automation. The goal of the class is to produce students with practical skills ready for the legal workforce (even if that student is considering solo practice). Basis of Grade: Class participation and team project. Form of Grade: Letter.

Prerequisites: None.

**LAWS 600 - Business Corporations (4 Credits)**

A study of the formation, structure, and characteristics of enterprises organized to do business in the corporate form. Areas discussed include shareholder and promoter liability, division of enterprise ownership, powers and control, duties of management, and securities regulation. The course will also briefly examine some basic agency, partnership, and LLC topics. Registration: Second year progression-entry course; 2L priority registration. Students who have taken the three credit hour LAWS 581 in summer school may not register for this course. Basis of Grade: Final examination and class participation. Form of Grade: Letter.

Prerequisites: None.

**LAWS 601 - The Constitution and National Security (2 Credits)**

This seminar will examine the constitutional and statutory law that governs U.S. national security policy and practice. The course will examine the Constitution’s allocation of national security authority, the foreign relations powers, and war powers among the three branches of the federal government. The course will focus on specific issues arising from past and ongoing counterterrorism activities including detention, surveillance, interrogation, and targeted killing. In addition, the course will examine how constitutional and statutory authority relates to the role of international law in U.S. courts and the role of courts more generally in establishing boundaries for national security policy. The course will examine court cases, executive memos, and legislative materials.

Graduation Requirement: This course satisfies the perspectives course requirement for graduation. Basis of Grade: Final examination or optional research paper with permission of instructor. Form of Grade: Letter.

Prerequisites: LAWS 523.

**LAWS 602 - Project Finance (3 Credits)**

This course concentrates on project finance as a vehicle to explore general problems of domestic and international corporate finance in the context of a specific infrastructure finance strategy. Project finance refers to the financing of long-term infrastructure, industrial projects and public services based upon a non-recourse or limited recourse financial structure where project debt and equity used to finance the project are paid back from the cash-flow generated by the project (for example, borrowing to finance construction of an electricity generating plant and then repaying said loan from the proceeds of the sale of electricity generated by the facility). The goal is to give you some insight into how transactional lawyers deal with complex contracting and concepts in a sophisticated business practice. Each week there will be a 2 hour theoretical class shared with overseas students via videoconferencing, and a 1 hour local documentation and drafting class. Registration: Course will include video-conferenced guest speakers. An overnight out-of-town field trip may be required. Graduation Requirement: This course satisfies the experiential course graduation requirement. Form of Grade: Letter.

Prerequisites: None.

**LAWS 603 - Family Business Law (2 Credits)**

This course examines the distinctive characteristics of family businesses, with a particular focus on their governance needs. To be effective, a legal advisor must appreciate the overlap of family law and business law principles, and we will explore important areas of intersection, including (1) how business succession relates to estate planning, and (2) the potentially adverse business implications of marital divorce. We will also discuss ethical issues involving multiple representation that often arise in the context of family businesses. Finally, the course will take up conceptual and normative questions regarding the definition of family business and the extent to which family values influence business priorities. Basis of Grade: Grades will be based on class participation and a final project, which students will work on in small teams. Form of Grade: Letter.

Prerequisites: LAWS 609.
LAWS 605 - Corporate Finance (3 Credits)
This is a course in financial economics as applied to legal problems. Topics will likely include economics of valuation (including consideration of risk and return and the capital asset pricing model), the efficient market hypothesis and the accuracy of stock prices more generally (theories, evidence, and limits), the mechanics and economics of the stock market through which firms raise equity capital, the role of stock prices in capital allocation and corporate governance, event studies, option theory, dividends and share repurchases, debt and leverage, and the theory of the firm. Overall, the course can be seen as a financial-economics-based survey of some of the more prominent advanced-level topics in corporate and securities law. Basis of Grade - Exam performance, with slight adjustments based on in-class participation and performance. Class may involve both a midterm and a final exam. Form of Grade - Letter Grade.
Prerequisites: LAWS 581 or LAWS 600 or LAWS 609.

LAWS 606 - Securities Regulation (3 Credits)
Prerequisites: LAWS 609.

LAWS 607 - Business Crime (2 Credits)
The class will examine substantive federal criminal law, especially "white collar" crimes in the corporate context. Topics covered include mens rea (what state of mind is required for criminal liability?), entity liability (who is the proper criminal defendant?), the attorney's role in conducting corporate internal investigations (who is the client?), the attorney-client privilege and work product protection, and ethical issues involved in joint representations. Substantive crimes addressed will likely include mail and wire fraud, insider trading, securities fraud, conspiracy, and obstruction of justice. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: LAWS 581 or LAWS 600 or LAWS 609.

LAWS 608 - Law and Economics (2 Credits)
This course will provide an introduction to the positive economic analysis of legal problems. Students will be invited to use fundamental principles of economic science to explain legal doctrines. The inquiry, therefore, will not focus on normative aspects of economic analysis, on whether the law ought to promote efficiency. After a brief survey of macroeconomics, the course will address primarily the major common law areas of property, contracts, torts, and criminal law. In general, the course will attempt to demonstrate how fundamental economic concepts, such as transactions costs, externalities, and risk allocation, can help explain the logic of these large bodies of law, difference among them, and long standing principles within each. Depending on the availability of time and the students' prior exposure to economic analysis in these subjects, the course may cover topics in corporation law and the common law process. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Final exam. Form of Grade: Letter.
Prerequisites: None.

LAWS 609 - Business Associations (3 Credits)
This course focuses on the structure and characteristics of enterprises organized to do business in the partnership, LLC, and corporate form. Areas addressed will include the formation, ownership, operation, governance, and dissolution of the business entity. Substantial emphasis will be placed on the corporate form of business, but comparisons to the partnership and LLC forms will be included. The course will also examine fundamental agency principles important to all business organizations. This course is the foundation course for, and Business Associations is not a prerequisite for Agency, Partnerships, & LLCs. Registration: Second year progression course. 2L students have registration priority. Basis of Grade: Exam. Form of Grade: Letter.
Prerequisites: for all upper-level business-law courses, whether focusing on publicly traded entities or businesses owned by only a few persons. for Agency, Partnerships, LLCs.

LAWS 611 - Agency Partnership and Limited Liability Companies (3 Credits)
The principle focus of the course, however, will be on LLCs, and the issues relevant to starting, operating, and ending LLCs. Since LLC operations are based in large part on partnership principles, we will review some of these and see how they are incorporated into the operation of LLCs. We will consider the duties that LLC members owe to each other and the business. We will worry about when an LLC member may be personally liable for obligations of the entity. The financial operations of the business, and the financial rights of the members are important. In regard to Agency, we will review some of the basic principles you studied in Business Associations and may expand on these, including possible examination of issues involving "Undisclosed Principals," "Subagents," "Ratification," and "Notice." In regard to all these topics, we will pay particular attention to South Carolina law. Please note that you will be responsible for four projects done during the semester. These will all be graded. There will also be a brief final exam. 1. Project #1. In a group, your group will be responsible for working some basic "accounting" problems and explaining your results to the class. You will be required to "do math"! You will prepare these accounting problems outside of class. 2. Project #2. Your group will present to both the class and to an actual client, an explanation of some of the risks the client will be faced in forming an LLC. You will be required to prepare and present during class a memo to the client explaining risks they may be subject to. We will probably only have the class complete three projects, but you will be required to do four projects. 3. Project #3. An existing business is considering converting into an LLC. The new LLC will include investors who are interested, along with the business founders, of expanding and modifying the business. Your group will present both to the class and to the founders, a written memo listing key points (with explanations) the founders should consider in adopting this LLC. Another group will present to the class and to the investor group, a similar written memo listing key points (with explanations) the investors should consider in adopting this LLC. We will likely select some of the risks the client will be faced in forming an LLC. You will be required to prepare and present during class a memo to the client explaining the risks that they may be subject to. We will probably only have the class complete three projects, but you will be required to do four projects. 4. Project #4. Essential to the Final Exam. You will individually draft certain specified provisions for the LLC that the folks identified in Project #3 intend to adopt. You will draft two separate sections for each required provision - one favoring the founder group, and one favoring the investor group. This Project # 4 will count the most points for the course. This will likely be assigned the last week of the course and due during the first week of finals. 5. "Brief" Final Exam. The exam will cover topics that are separate from the planning and drafting of the LLC. Form of Grade: Letter Grade.
LAWS 612 - Accounting for Attorneys (3 Credits)
This course introduces students to the principles of accounting, including the theory and function of the financial statements and sources of authoritative accounting principles. The course studies the areas of accounting that commonly arise in day-to-day legal practice, including: law firm accounting, escrow accounting, internal controls, auditing, materiality, and financial ratio analysis. Other topics may also include partnership accounting, governmental/non-profit fund accounting, inventory accounting, and/or business decision-making topics. Registration: Students with six or more credits in Accounting need special permission from the Instructor to enroll in the course. Basis of Grade: Final Exam. Form of Grade: Letter Grade.

LAWS 613 - Criminal Adjudication (3 Credits)
This course examines the major procedural stages of a criminal prosecution from both a theoretical and practical perspective. At any given stage students should pay particular attention to the respective roles, objectives, and strategies of the judge, prosecutor, and defense counsel, and to the sometimes competing legitimate interests of law enforcement and criminal defendants. Principal topics to be covered include: the decision to charge and the issuance of complaints; initial appearance; bail and pretrial release and detention; the probable cause hearing; grand jury, indictment, and information; joinder; criminal discovery; guilty pleas and plea bargaining; speedy trial rights and provisions; jurisdiction and venue; civil forfeiture; double jeopardy; criminal trials and pretrial motions; sentencing, the death penalty, appeal, and post-conviction remedies (particularly habeas corpus). (Sentencing is also studied in greater depth in Sentencing and Correctional Law, to be given in spring 2012.) This course is taught primarily from a nationwide perspective, but as time allows, we may also make reference to practice under the South Carolina law where this state's procedure varies significantly from other jurisdictions. For students who are contemplating either prosecuting or defending criminal cases in their future careers, this course, in combination with courses in Criminal Procedure under the 4th, 5th, and 6th Amendments (sometimes mistakenly called "Constitutional Criminal Procedure," because a solid understanding of constitutional requirements is equally vital to both courses) and Sentencing and Correctional Law, provides a comprehensive nine-credit upper level study of criminal practice. However none of these courses is a Basis of Grade: Final exam. Form of Grade: Letter.
Prerequisites: for the others, and any of these courses may be taken by any student regardless of future career interests.

LAWS 614 - International Business Transactions (3 Credits)
A consideration of some of the problems under international, foreign, and domestic law that American business may encounter in doing business abroad, in selling products for export, and in competing in the U.S. with imported goods. Particular emphasis is given to the transactions and mechanics of international trade and finance, the international settings, including both GATT and bilateral agreements, and national regulation of import and export trade and foreign investment. Basis of Grade: Exam. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 615 - Secured Transactions (3 Credits)
An analysis of secured transactions under Article 9 of the Uniform Commercial Code. Topics to be considered include creation, perfection and priority of security interests; the impact of bankruptcy on secured transactions; and default foreclosure. Basis of Grade: Group problems and exercises; Final exam. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 615A - Secured Transactions Online (3 Credits)
This course examines the rules governing transactions in which personal property and fixtures are used as collateral to secure an obligation. The primary source of authority is Article 9 of the Uniform Commercial Code, but students will also be introduced to other applicable laws, including primarily the U.S. Bankruptcy Code. This body of law addresses not only the rights of the debtor and creditor inter se but also the rights of third parties with an interest in the collateral. Registration: Students in enrolled in this course cannot take LAWS 615, Secured Transactions. Basis of Grade: Final Exam. Form of Grade: Letter.

LAWS 616 - Capital Markets Regulation (2 Credits)
This course concerns the regulation of capital markets: the New York Stock Exchange, NASDAQ, and the wide variety of other institutions devoted to the trading of securities. Capital markets perform important social functions: providing liquidity for investors and incorporating information into prices, which in turn serve as vital guides to real economic activity. The effectiveness with which capital markets perform these functions and their costs of operation are determined in significant part by the rules governing the persons who operate, and trade in, these markets. The course will begin with a consideration of major domestic and transnational capital market institutions. It will then address the economic theory that explains how capital markets operate (market-microstructure economics) and the incentives that motivate their various players. These beginning segments lay the groundwork for a more informed discussion of the substantive law that governs capital markets. Specific regulatory areas to be considered include the rules relating to (1) transparency: who knows (and when) the prices at which securities are being offered and sold (the "ask quotes") and the prices at which actual trades occurred, (2) a broker's execution of a customer's orders, (3) dealers transacting directly with retail customers, (4) market making more generally, (5) trading system alternatives to the NYSE and NASDAQ, (6) trader behavior including manipulation, short selling and insider trading. The course, with its focus on persons who operate or trade in capital markets, should be distinguished from Securities Regulation, which is devoted primarily to the regulation of the behavior of the firms that issuer securities and their agents in connection with the primary offering and secondary trading of their securities. Basis of Grade: Exam performance, with slight adjustments based on in-class participation and performance. Class may involve both a midterm and a final exam. Form of Grade: Letter.
Prerequisites: LAWS 581 or LAWS 600 or LAWS 609 or LAWS 606.

LAWS 617 - Commerical Law Seminar (2 Credits)
The Seminar will cover the following commercial law topics: (1) the enforcement of money judgments; (2) letter of credit transactions; (3) financing secured by security interests in intellectual property; and (4) the past, present, and future of asset securitization. Registration: Course does not satisfy the graduation writing requirement. Basis of Grade: Written responses to problems and drafting exercises. Form of Grade: Letter Grade.
Prerequisite or Corequisite: LAWS 615.

LAWS 618 - Consumer Law (3 Credits)
A survey of federal and South Carolina consumer protection statutes, common law remedies, and enforcement in unfair and deceptive advertising and other sales practices, credit reporting and other disclosures, subprime consumer lending, mortgage lending and servicing, debt collection, landlord-tenant law, telephone privacy law, and arbitration. Basis of Grade: Class participation; writing assignment; class presentation. Form of Grade: Letter Grade.
Prerequisites: None.
LAWS 621 - Social Impact of Business Activity (2,3 Credits)
This course will explore the ways in which laws and regulations surrounding business activity impact the social contributions of businesses. The course will cover theoretical perspectives on the social role of businesses, comparative approaches to improving the social impact of businesses both in the US and abroad, and case studies of business’ positive and negative social contributions. Readings will come from a variety of sources, including chapters from books, journal articles, case studies, and news articles. Class meetings will center on discussion by all members of the class of the week’s readings. The semester will end with presentations of students’ written work. Graduation Requirement: Course satisfies the perspective graduation requirement. Course can also satisfy the graduation writing requirement if taken for three credit hours. Must earn a grade of "C" or better if completing for the writing requirement. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.

Prerequisites: None.

LAWS 623 - Comparative Employment Discrimination Seminar (2,3 Credits)
This course is a seminar focusing on a comparison of employment discrimination laws in the United States and abroad. Students examine timely issues under the American legal system and compare the American approach to these issues with that of foreign-based systems. Through this comparative approach, students will examine critically the American system of employment law primarily as it exists under Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, and Title I of the Americans with Disabilities Act. Graduation Requirement: This course satisfies the perspective course requirement. It satisfies the graduation writing requirement if taken for 3 credit hours. Basis of Grade: Paper, oral presentation, and class participation. Form of Grade: Letter.

Prerequisites: None.

LAWS 624 - Employment Discrimination (3 Credits)
This course is designed to provide a broad overview of the federal legislation which prohibits employment discrimination on the basis of race, color, religion, sex, national origin, age, and disability. The course also examines the prohibitions against retaliation in the workplace. The course explores the basic frameworks for how claims of intentional and unintentional discrimination are analyzed. The course also examines how employment discrimination statutes are enforced, and the remedies available in these types of cases. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.

Prerequisites: None.

LAWS 626 - Principles of Labor Law (2 Credits)
This course will address the basic principles and labor protections found in the National Labor Relations Act (NLRA). The NLRA – and the foundations of labor law generally - address various aspects of collective activity, including the right to organize and join labor organizations, and the regulation of strikes, boycotts and picketing. Additionally, this course will examine the timely issues of labor law, and explore the direction that this field is heading. Basis of Grade: Final examination, class presentation and class participation. Form of Grade: Letter Grade.

Prerequisites: None.

LAWS 627 - Immigration Law (2 Credits)
This course will examine the legal framework and criteria that govern who can legally enter, reside, and become a citizen in the polity of the United States, a country that has attracted large numbers of immigrants throughout its history and continues to do so today. Drawing on the Immigration and Nationality Act, attention will be paid to judicial, legislative, and regulatory construction of those provisions of immigration law relevant to defining who is allowed into the United States and in what category, who may be removed, and the more recent focus on security/terrorism concerns and immigration as a political issue. Basis of Grade: Final examination. Form of Grade: Letter Grade.

Prerequisites: None.

LAWS 628 - Immigration and Family Law Skills Workshop (3 Credits)
In this class, students will follow a simulated immigration case from beginning to end. The class will examine the common issues that undocumented immigrants face during deportation proceedings and learn the skills and defenses immigration attorneys use to represent undocumented immigrants seeking to challenge their removal. In addition, the class will also address how other legal issues pertaining to areas such as family law or criminal are complicated by a client’s immigration status. Students in the class will be expected to draft various immigration documents and will be graded on these assignments. Lastly, throughout the semester, immigration law practitioners will be invited to share their expertise and experience with the class. Graduation Requirement: Satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Written exercises. Form of Grade: Letter Grade.

LAWS 629 - Alternative Dispute Resolution (3 Credits)
Over 95% of all legal disputes are resolved outside of the courts. This course will explore how most of those disputes are resolved. It will provide an overview of the main Alternative Dispute Resolution (ADR) processes: negotiation, mediation and arbitration. Each of these processes will be critically examined, through a combination of assigned readings, interactive role-play exercises, and possibly guest presentations. The primary goal of the course is to expose students to the theoretical and practical fundamentals of ADR, including when and how to effectively use these processes in a professional setting. The second goal is to impart an understanding of the ethical and legal implications of ADR processes. Students will leave this course with a basic competency in some key lawyering skills, including communication, negotiation and representing parties in various ADR fora. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Students will be graded on contributions to general class discussions; performance in a negotiation simulation; performance in a mediation simulation. Note that attendance and class participation will be significant parts of the assessment. Form of Grade: Letter Grade.

LAWS 630 - Individual Employment Law (3 Credits)
Legislatures and courts have steadily increased regulation of employment relationships in recent decades. The new regulations consist of a mixture of contract, tort, criminal, and administrative law. This course explores those developments, and we will study many of the statutory and common law rules governing the establishment and termination of the employment relationship and regulating the conditions of employment. Given the breadth of the subject matter, Individual Employment Law will be useful for students considering general practice or corporate law as well as those planning to practice labor and employment law. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.

Prerequisites: None.
LAWS 631 - Parents, Children and the State (3 Credits)
This course addresses issues related to the legal status of childhood and the parent-child relationship, including: the foundations of parental authority over children, the foundations of the state’s parens patriae authority to intervene in family life, the allocation of authority to make decisions concerning children, child abuse and neglect, the child protection legal system, and family courts and executive branch agencies which administer relevant areas of law. Basis of Grade: The grade will be based on the student’s attendance, class participation, and performance on one or more examinations or other written assignments. Form of Grade: Letter.
Prerequisites: None.

LAWS 633 - Income Taxation (3 Credits)
Basic concepts of income taxation of individuals; gross income, adjusted gross income, applicable deductions, credits, gains and losses and nonrecognition transactions. Examination of concepts of capital gains and losses, including questions of basis, nonrecognition in certain exchanges and carry-over of losses. Registration: Second year progression-entry course; 2L priority registration Basis of Grade: Final examination, problems as announced in class and class participation. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 634 - Elder Law (3 Credits)
This course will include a survey of the substantive topics about which a lawyer should have at least a basic understanding when representing an older client, a client with special needs, or a family member of an elder or a person with disabilities who is in need of protection. Some of the subjects included will be long term care planning; basic estate planning; advance directives; powers of attorney; Medicaid, Medicare and other government benefits; guardianship and conservatorship. The course will also address the many ethical issues which the attorney must resolve in the process of representation. Practical guidance, using both hypothetical and real life examples and sample forms, will be provided. Basis of Grade: Quizzes, writing assignments, class participation and attendance. Final exam. Form of Grade: Letter Grade.

LAWS 636 - Corporate Tax (3 Credits)
Federal income taxation of corporations and shareholders. The course will deal with the organization of a corporation; its' original capital structure; dividends and other non-liquidating distributions; and liquidations. Special emphasis is placed on the problems of the close corporation. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 633.

LAWS 637 - Partnership and LLC Taxation (3 Credits)
An examination of the classifications, organization, operation, and dissolution of partnerships for federal income tax purposes; basis of partnership interests; determination of partnership income; sales of partnership interests; death and retirement of a partner. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: LAWS 633.

LAWS 638 - Tax Policy Seminar (2,3 Credits)
This seminar examines the legal, political, sociocultural, and economic considerations involved in the formulation and implementation of tax policy. Early weeks of the course will explore foundational concepts that provide the metrics by which we evaluate tax policy: simplicity, efficiency and equity. The course is inherently interdisciplinary. Students will engage with philosophy by tackling concepts such as redistributive theory that support or challenge progressive taxation and economic theory on what makes “good” tax policy. After building a foundation with which to evaluate tax law and policy, the course will explore different topics in tax policy, including, but not limited to: the taxable unit, wealth inequality and income redistribution, tax expenditures or subsidies, tax and environmental policy, critical tax theory, and double taxation of corporations. Graduation Requirement: Satisfies perspective course graduation requirement. This course will satisfy the graduation writing requirement if taken for three (3) credit hours and must earn a grade of C or better. Basis of grade: Class participation and multiple five page persuasive essays based on materials covered in class. Each writing assignment will require the student to argue for or against a given issue, proposed or current provision. Form of Grade: Letter.
Prerequisite or Corequisite: LAWS 633.

LAWS 640 - State and Local Tax (2,3 Credits)
A study of the tax systems of state and local governments. We will consider federal Constitutional and statutory restrictions on the ability of state and local governments to enact taxes, state restrictions on the ability of local governments to enact taxes, state income taxes, sales and use taxes, and property taxes. Special attention will be paid to policy; comparing and contrasting South Carolina law to laws of other states and federal income taxes; and comparing the Unites States’ treatment of international transactions to the states’ treatment of multi-state and international transactions. Registration: A student who registers for 2 hours may elect to write a paper or complete a take-home exam; the course will satisfy the graduation writing requirement if taken for 3 credit hours, must earn a grade of C or better. Basis of Grades: paper or take-home exam for 2 credits, and class participation. Form of Grade: Letter grade
Prerequisite or Corequisite: LAWS 633.

LAWS 641 - Wills, Trusts, and Estates (3 Credits)
Disposition of property upon death by intestacy, by will and by will substitute, including consideration of the related problems of limitations upon the testamentary power and contests of testamentary disposition; interviews disposition of property by gift and trust; brief survey of administration and probate. Registration: Second year progression-entry course; 2L priority registration. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 641A - Wills, Trusts, and Estates Online (3 Credits)
This course addresses how property passes when a person dies intestate or with a will. In addition, the creation, administration, and enforcement of trusts will be discussed. Registration: Students enrolled in this course cannot take LAWS 641, Wills, Trusts, and Estates. Basis of Grade: Mid-term Exam; Final Exam; Discussions and Assignments (Class Participation). Form of Grade: Letter.
LAWS 643 - Income Taxation of Trusts and Estates (2 Credits)
Income taxation of trusts, estates, and gifts including the tax treatment of the decedent's final return, grantor trusts, income in respect of a decedent, interviews, testamentary, and charitable trusts, fiduciary accounting, accumulation trusts under the throw-back rules. Basis of Grade: Final exam and class participation. Form of Grade: Letter.
Prerequisites: LAWS 633, LAWS 641, LAWS 649.

LAWS 644 - Bankruptcy (3 Credits)
This course will cover the fundamental concepts and terminology of federal bankruptcy law. The course will provide the background necessary for students interested in specializing in bankruptcy and those with other practice interests who wish to become more marketable in a competitive job market. Students will learn to recognize common insolvency issues and to develop strategies for resolving such issues in both consumer and commercial bankruptcy cases. Some class time will be reserved for visits from legal professionals in the community, who will share their experiences in legal practice, including the field of bankruptcy law and other specialties, and offer advice to students about practicing law during this time of recession. Class time will also be reserved for students to attend court hearings during the semester which will require meeting outside of the regularly scheduled time. Registration: LAWS 615 recommended. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 647 - Fiduciary Administration (2 Credits)
Survey of the probate of wills, the appointment of Personal Representatives of decedents’ estates, the administration of decedents’ estates (duties and powers of Personal Representatives), and the administration of trusts generally (duties and powers of Trustees). South Carolina emphasis. Basis of Grade: Final examination, attendance and class participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 641.

LAWS 649 - Estate and Gift Tax (2 Credits)
Analysis of principles and application of federal estate and gift tax law, regulations and rules effecting (1) various methods for interviews and testamentary transfers including consideration of typical estate planning devises such as gifts, wills, trusts. Insurance, and other death benefits, (2) post-mortem planning, and (3) drafting techniques. Basis of Grade: Exam. Form of Grade: Letter.
Prerequisites: LAWS 641.
Corequisite: LAWS 641 with permission of instructor.

LAWS 650 - Estate Planning (2 Credits)
Commercial (practice) software will be used to prepare estate planning documents. The drafting assignments will include simple wills, wills for couples with minor children, wills and trusts that include provisions for the estate marital deduction and GST taxes, health and financial powers of attorney, as well as drafting for the South Carolina elective share. Other issues covered will include consideration of client competence, preparing for will contests, and ethical issues for estate planners. If time permits, the class will draft irrevocable life insurance trusts. Students will work on projects in teams of 2-3. Registration: LAWS 633 is recommended. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Exam, drafting projects, class participation and attendance. Form of Grade: Letter.
Prerequisites: LAWS 641.

LAWS 651 - Land Use Planning (3 Credits)
A study of regulation of land use. Topics include zoning, subdivision regulation, and takings. One emphasis of course is on practice in the area. To accomplish this goal, class methodology will include use of problems, based on South Carolina law and on the City of Columbia Code, that will be worked on in teams. In addition, students will be required to attend a total of four meetings of councils/commissions during the semester. Registration: Attending the Four Councils/Commissions meetings may require missing a class/classes in other courses. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 652 - Real Estate Transactions I (3 Credits)
This is a course on the substantive law of real estate transactions. The course will cover a broad range of topics and issues related to real estate transactions, both residential and commercial, focusing on provisions typically found in real estate contracts and how those contract provisions manifest themselves in actual transactions. The course will also include a focus on various topics designed to provide a working knowledge of concepts and issues often encountered in a real estate practice. Basis of Grade: Final Examination (Primarily), Class Projects, and Class Participation. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 653 - Real Estate Transactions II (2 Credits)
An in-depth analysis of advanced level real estate planning and transactional matters with an emphasis on problems, techniques, and solutions. Course coverage may include residential closings (including condominium and planned unit developments), commercial closings, and commercial leases. Course material will also include examination of consumers’ rights in real estate matters, of financing problems and techniques, and of problems and techniques of dealing with default by various parties to the transaction. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Projects and class participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 652.

LAWS 654 - Commercial Law (3 Credits)
This course is an introduction to the laws that govern the sale of goods and the means by which parties satisfy obligations by payment. The course primarily examines rules and principles codified in Articles 2, 3, and 4 of the Uniform Commercial Code regarding goods transactions, the use of checks and other negotiable instruments as a payment system, the collection process, and the process for allocating losses. Through statutory and case analysis and problem solving, students will develop skills in planning for and resolving disputes involving these issues, as well as the critical skills necessary to evaluate the goals and implications of these laws. Registration: This course is recommended for 2Ls. Basis of Grade: Final examination. Form of Grade: Letter.
Prerequisites: None.
LAWS 655 - Food and Drug Law (3 Credits)
Regulating products that account for approximately 25 cents of every consumer dollar expended in the United States annually, the Food and Drug Administration (FDA) is central to protecting and advancing the public health. FDA regulates food, drugs, biologics, medical devices, cosmetics, and tobacco products. This course will examine the federal regulation of products subject to FDA’s jurisdiction, focusing on the regulation of human food, human drugs (prescription and OTC), biologics, and medical devices. It will examine the substantive law as well as FDA’s enforcement power, practice, and procedure. This course will explore the historical development of food and drug law as well as contemporary issues, and examine the public policy considerations which have shaped the law. Basis of Grade: Examination and Class Participation. Form of Grade: Letter.
Prerequisites: None.

LAWS 656 - Federal Litigation Clinic (4 Credits)
Students will represent clients in cases presenting problems in civil Federal litigation. The casework will focus on problems of pleading, discovery and motion practice in the Federal Courts. Caseload will be limited and students will work on cases under the supervision of clinical faculty; all aspects of client representation will be closely supervised. A one hour per week classroom component will address specific procedural and substantive problems in the context of individual student cases. Group discussion and decision-making will be employed to expose all students to the problems presented by the various cases. Registration: Subject to Client Contact Clinic Lottery. This course satisfies the skills course graduation requirement. Basis of Grade: Performance on casework, class attendance, preparation and participation. Form of Grade: Letter Grade. 
Prerequisites: LAWS 671.
Prerequisite or Corequisite: LAWS 555 or LAWS 554.

LAWS 657 - Payment Systems (3 Credits)
This course is an introduction to the laws that govern the means by which parties satisfy obligations by payment. The course considers the legal and economic implications of the use of checks and other negotiable instruments as a payment system, including the collection process and loss allocation principles under Articles 3 and 4 of the Uniform Commercial Code. The course also covers federal regulation of funds availability, credit cards, electronic funds transfers and wholesale wire transfers. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 658 - How Governing Institutions Fail (and Succeed) (2 Credits)
This seminar prepares students for the work of designing, building, and working within complex institutions. Drawing on ideas from political science, law, history, economics (especially the economics of public choice), and social welfare, the seminar will focus on the often paradoxical and surprising reasons why institutions become co-opted, inefficient, unrepresentative, or otherwise fail to achieve their goals (and ways to avoid or prevent such failures). The course will examine institutions including legislatures, multi-member courts like the Supreme Court, corporate boards, and administrative agencies. In considering case studies of possible institutional failure, the course will also examine how to design institutions to succeed. Students will read and discuss both theoretical texts and primary documents, including legislation and judicial opinions. Registration: This course satisfies the perspective course graduation requirement. Basis of Grade: Class participation and response papers. Form of Grade: Letter.
Prerequisites: None.

LAWS 659 - Federal Courts (3 Credits)
A study of the role of the federal courts in the operation of the federal system. The course is designed to cover the constitutional and statutory role of federal courts, including their relationship to other branches of the federal government, the interplay of federal and state law, and the distribution of judicial power between federal and state courts. Specific topics to be covered include, Congressional Power to control Federal Jurisdictional, supplemental and Removal Jurisdiction, Jurisdictional Amount, State Sovereign Immunity, Absention, the Anti-Injunction Act and current Concepts of Federalism. If time permits, the course will also cover Habeas Corpus and Civil Rights Removal. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 662 - Islamic Law (2 Credits)
Though often maligned and misunderstood, Islamic law is one of the longest enduring and most widely subscribed systems of law in the world. This course will give students a firm grounding in the sources, principles, concepts, and terminology of Islamic law as well as an in-depth review as to its history and role in the contemporary era. Students will gain practical insights into the sources and constructs of this religious-based legal system, including the substantive difference between Islamic Shari’ah and Islamic jurisprudence, as well as an in-depth analysis of the Qur’an, the Tradition of the Prophet Muhammad, as well as the various rational constructions devised by jurists and eminent legal scholars, the Islamic schools of law, differences between Shi’i and Sunni Islamic law, the historical demise and the modern resurgence of Islamic law, and Islamism as well as examination in the context Islamic fundamentalism, the law of war and modernism. Finally, students will gain an in-depth understanding of selected aspects of Islamic constitutionalism, Islamic criminal law, and how classical and contemporary Islamic law comports with international human rights law as well other contemporary issues. Basis for grade: 85% final exam, 15% participation. Form of grade: Letter.
Prerequisites: None.
LAW 663 - Legal and Equitable Remedies (2 Credits)
An introduction to litigation theory and strategy through analysis of the various kinds of relief that may be obtained in the courts. Readings and problems will be used to analyze the difference among the various remedies, the theories upon which they are based, and their appropriateness in protecting specific legal interests. Problems of choice among remedies will be emphasized as a key factor in practical litigation strategy. Basis of Grade: Final examination. Form of Grade: Letter.
Prerequisites: None.

LAW 664 - Forest and Natural Resource Law (3 Credits)
This course explores the law and policy governing use and conservation of natural resources, such as forests, minerals, water, and wildlife. Natural resources laws and policies must balance conservation, environmental objectives, economic development, recreational use, and other priorities among various groups of users and between current and future generations. In doing so, they incorporate insights from science, economics, politics, and ethics. While legal regimes differ greatly, similar issues arise on both public and private lands. In studying this body of law, the course will focus on a single ecosystem - forests, particularly privately-owned forests in the Southeast US. This focus allows the wide variety of relevant legal tools to be explored in a consistent context, and avoids substantial overlap with courses covering specific areas of natural resources law (such as Water Law and Energy Law). The theories and doctrines studied will, however, have applications beyond forests and beyond the Southeast. In particular, we will study the National Forest Management Act, Endangered Species Act, and common law doctrines such as trespass, nuisance, and easements (including conservation easements). As part of our study, we will also examine theories of natural resources problems, including the tragedy of the commons, and solutions, including regulation and privatization. The course is relevant and useful for students interested in environmental law as well as private real estate practice - the course will consider the implications of natural resources law for both long-term environmental goals and individual land transactions and management practices. Registration: Students who have taken LAWS 684 may not enroll in this course. Basis of Grade: Class participation, short writing assignments, and final exam. Form of Grade: Letter.

LAW 665 - International Trade Law (2,3 Credits)
This course focuses on the law of international trade, sometimes also called international economic law, which is a specialized area of public international law of growing importance because of economic groupings like NAFTA (representing a regional free trade area approach) and the WTO (representing the worldwide multilateral free trade approach) as well as foreign direct investment law. The world is in the early stage of another multilateral trade liberalization round (aka the Doha Round), and beyond existing law we shall look at how things are shaping up. This course will be taught using website materials (no book). This will be a shared video conference course taught together with foreign universities to make you work through trade law problems together with foreign students. Graduation Requirement: This course satisfies the perspective course requirement. It may be taken for 3 credit hours and satisfaction of the graduation writing requirement with the prior permission of the instructor, must earn a grade of C or better Basis of Grade: Paper. Form of Grade: Letter.
Prerequisites: None.

LAW 666 - International Environmental Law (2,3 Credits)
Environmental concerns transcend national borders, but present distinctly different issues to differing groups of countries in an area where soft law predominates. This course looks at the nature of the international law process in the area (with its limited number of treaty and substantive law principles), economic perspectives on natural resource usage, state sovereignty and abiding tensions between industrialized and developing countries concerning pollution problems (beyond prohibitions, to technology transfer and the who pays question). Since established law is minimal, this course examines the public international law framework for international environmental law de lege ferenda. Registration: An overnight out-of-town field trip may be required. Graduation Requirement: Satisfies the Perspective Course requirement. Students may elect to satisfy the writing requirement, if taken for 3 credit hours with instructor’s permission. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Final examination and tutorials or paper. Form of Grade: Letter.
Prerequisites: None.

LAW 667 - Designing Access to Justice Technology Externship (2 Credits)
For students interested in consumer law, elder law, or landlord-tenant law: learn how to make the law more accessible and useful for ordinary people. Students will work 8-10 hours per week as part of a technology initiatives project to develop scripts for guided interviews, training videos, and other online resources for self-represented litigants and pro bono lawyers. Software skills not required. The work will consist of substantive legal research; the observation of related proceedings in Magistrate or Probate Court; the translation of legal requirements and concepts into plain language; and the design and testing of online resources for lawyers and self-represented litigants. Students will work with the lead lawyer on the project, as well as the IT specialist and web content manager at South Carolina Legal Services. Students will also meet periodically with a faculty member to reflect upon their experience and learn about new developments in substantive legal technology. Registration: Students must submit a contemporaneously maintained daily journal of their experience, along with a description and example of the resources developed during the externship. The fieldwork supervisor will also complete an evaluation of the student’s performance. Basis of Grade: The final grade will be determined by the professor, based upon evaluation submitted by the fieldwork supervisor and a determination by the faculty member that all other requirements of the externship have been satisfactorily completed. Form of Grade: Letter.
Prerequisite or Corequisite: LAWS 554.
LAWS 668 - Liberty Seminar (2 Credits)
This seminar examines a difficulty at the heart of the Constitution’s commitment to liberty: how can we reconcile majority rule with individual rights? That is to say, how can we curtail our ability to govern ourselves as part of a community or our right to be free of interference in how we choose to live our own lives without sacrificing an important part of our freedom? To see whether there is any principled basis for limiting either collective judgment or individual liberty, students will review some of the more prominent arguments of political philosophy, paying particularly close attention to the writings of two great champions of liberty, John Stuart Mill and Isaiah Berlin. They will then examine competing conceptions of liberty as they relate to a number of specific legal topics, which may include the following: whether a patient has a right to assisted suicide, the ability of the majority to regulate or forbid certain sexual practices; the arguments for and against campaign finance reform; and the role of the business corporation in a free society. Graduation Requirement: This course satisfies the perspective course requirement, but does not satisfy the graduation writing requirement. Basis of Grade: Response papers, class participation, and final paper. Prerequisites: None.

LAWS 669 - The Constitution (3 Credits)
A study of the structure and theory of the U.S. Constitution as described in the organic laws and founding documents without the judicial exegesis. Specifically, we will examine the Colonial Charters; The Declaration of Independence (1776); The Articles of Confederation (1777); the Treaty of Paris (1783); The Northwest Ordinance (1787); Madison’s Notes on the Philadelphia Convention (1789); the Proposal of the 11th Amendment by the Third Congress (1794); and the Virginia and Kentucky Resolutions (1798). The founders’ ideas of self-rule, federalism, separation of powers, and man’s relation to society will be traced back to Enlightenment writers such as Hume and Montesquieu and developed through the writings of Thomas Jefferson, James Madison and John Adams. Registration: Students who have enrolled in LAWS 835 may not also enroll in this course. Graduation Requirement: Satisfies perspective course graduation requirement. Basis of Grade: Paper. Form of Grade: Letter Grade. Prerequisites: None.

LAWS 670 - Judges and the Rule of Law (3 Credits)
This seminar will compare the nature and role of judges throughout the world in supporting and protecting the Rule of Law, focusing on judicial ethics and independence and investigating the influence of various methods of selecting judges and holding them accountable. It will cover the American Bar Association Model Code of Judicial Conduct, judicial disciplinary procedures, various methods used throughout the United States to select judges and to review judicial performance, as well as constitutional and policy issues arising from the tension between judicial independence and the roles of the executive and legislative branches of government and the electorate in the process of selecting judges and in extending their tenure. Additional insights will be sought from the way these issues are dealt with in other countries, correlating those insights with the Rule of Law Index. Registration: Students who have taken Comparative Seminar on Judges may not also take this course. Note: This course satisfies the perspective course requirement and the graduation writing requirement, must earn a grade of C or better. Basis of Grade: Class participation and a seminar paper. Form of Grade: Letter. Prerequisites: LAWS 554 or LAWS 555.

LAWS 671 - Evidence (3 Credits)
Preparation and presentation of various kinds of evidence, including: proof of writings; qualifications and examination of witnesses; privilege; opinion testimony; demonstrative, experimental, scientific evidence; determination of relevancy; and application of the hearsay rule. Registration: Second year progression course; 2Ls have priority registration. Basis of Grade: Final Exam. Form of Grade: Letter Grade. Prerequisites: None.

LAWS 672 - Public Health Law (2,3 Credits)
This is a survey course on public health law, including constitutional law, administrative law, torts, taxation, public health ethics, and other related areas. Students will also write at least two substantive papers on topics of their choosing in the area of public health law. Graduation Requirement: This class satisfies the requirement for a perspectives class and, if the student takes it for 3 credits, satisfies the graduation writing requirement, must earn a grade of C or better if taken for the writing requirement. Basis of Grade: This is a paper class. For 2 credits, students must write at least 2 separate papers of at least 7-8 pages in length for a total of 15 pages. For 3 credits, students must write at least 2 papers of at least 15-17 pages in length for a total of 30 pages. Form of Grade: letter.

LAWS 673 - Health Law: Finance and Organization (2,3 Credits)
This course focuses on the business of health care and the laws that impact health care business enterprises, including the tax laws governing tax-exempt organizations, the antitrust laws, and the fraud and abuse laws. The course will also examine how health care is funded and regulated through both private and public insurance, including Medicare and Medicaid. The class will do problems for each reading assignment, some in groups and some individually Graduation Requirement: Students who elect to take this course for three (3) credits will write a paper that meets the writing requirement and must earn a grade of C or better. Basis of Grade: In addition to problems, this is a paper course and students will be expected to draft an in-depth memorandum analyzing an issue related to one of these areas of the law. The specific topic will be up to the student. Form of Grade: Letter. Prerequisite or Corequisite: LAWS 676.

LAWS 674 - Health Law: Finance and Organization (2,3 Credits)
This course focuses on the business of health care and the laws that impact health care business enterprises, including the tax laws governing tax-exempt organizations, the antitrust laws, and the fraud and abuse laws. The course will also examine how health care is funded and regulated through both private and public insurance, including Medicare and Medicaid. The class will do problems for each reading assignment, some in groups and some individually Graduation Requirement: Students who elect to take this course for three (3) credits will write a paper that meets the writing requirement and must earn a grade of C or better. Basis of Grade: In addition to problems, this is a paper course and students will be expected to draft an in-depth memorandum analyzing an issue related to one of these areas of the law. The specific topic will be up to the student. Form of Grade: Letter. Prerequisite or Corequisite: LAWS 676.

LAWS 675 - Advanced Evidence: Law and Strategy (2 Credits)
All great trial lawyers enjoy a mastery of the law of evidence, both its academic theory and its practical strategy. This course puts students on the path to that mastery by teaching the advanced academic theories of evidence, and by instilling the habits and principles of sound strategic thinking about real evidence problems. Students will learn to analyze complex evidentiary issues correctly, using the conceptual structure of the law of evidence. Graduates of this class will be able to recognize and solve evidence problems with the highest level of structured academic analysis, complemented by an instinctive knack for practical courtroom strategy. Basis of Grade: Examination. Form of Grade: Letter. Prerequisites: LAWS 671.
LAWS 676 - Health Law and Policy (3 Credits)
This introductory health law and policy course surveys current regulatory schemes governing the provision of healthcare. The class focuses on major themes such as quality of care, access to care, cost containment and the role of the public health. The goal of this course is to familiarize students with the laws and recurrent policy concerns that arise in health law by analyzing a broad spectrum of health law areas. Areas studied include malpractice, the provider-patient relationship, informed consent, the regulation of healthcare facilities, the regulation of health insurers and managed care providers, Medicare/Medicaid, and the power of the state during a health emergency. Basis of Grade: TBA. Form of Grade: Letter.
Prerequisites: None.

LAWS 677 - Intensive Trial Advocacy (2 Credits)
The subject matter covered in this intensive course will include direct, cross and redirect examination; impeachment; opening statements and closing arguments; evidentiary foundations; and expert witnesses. Students will be immersed in the actual performance of all phases of the trial. Participants will learn under the guidance of experienced trial lawyers and judges in a simulated courtroom environment. For ten days, students will devote full time to this course developing their skills in actual trial work. In the last phase of the course, students will be assigned to two person teams and conduct a full scale trial. Note: This course satisfies the skills course graduation requirement. It also offers an excellent opportunity for trial skills preparation for students participating in the Mock Trial program, but all students who have satisfied the Students may not take this course and Trial Advocacy. Basis of Grade: Class exercises Form of Grade: Pass/Fail
Prerequisites: may enroll.

LAWS 679 - Trial Advocacy (2 Credits)
An in-depth consideration of the skills of the trial lawyer ranging from trial preparation to litigation strategy. Students are trained in direct examination, cross examination and other litigation oriented skills. Graduation Requirement: This course satisfies the experiential course graduation requirement. Basis of Grade: Class exercises. Form of Grade: Pass/Fail.
Prerequisite or Corequisite: LAWS 671.

LAWS 680 - Technology Law: Law of the Newly Possible (2,3 Credits)
This course examines how law responds to, incorporates, and affects the development of new technologies. The seminar addresses questions of risk and regulation from both public and private perspectives. It considers a range of currently emerging technologies as well as historic innovations that offer insights into anticipating and resolving key legal and policy tensions. Readings will be excerpted from source documents, academic and technical literature, and current drafts of bills and standards. All students will be expected to actively contribute during class and to critically reflect through regular response papers. Graduation Requirement: Satisfies the perspective course graduation requirement. If taken for three credits (which entails an assignment beyond the regular response papers), it also satisfies the writing requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Response Papers and class participation. Form of Grade: Letter.

LAWS 681 - Criminal Trial Practice (2 Credits)
Understanding of the practical problems that arise in criminal cases; criminal investigation, pleadings and motions practice, criminal evidence, preliminary hearings, appeals, jury selection, discovery, trial practice, and other related issues. Graduation Requirement: This course satisfies the experiential course graduation requirement. Basis of Grade: Class performance in trial situations. Form of Grade: Pass/Fail.
Prerequisites: LAWS 547 and LAWS 671.

LAWS 682 - Legal Writing for the Courts (3 Credits)
This course will concentrate on format, organization, analysis and written expression of thought in a variety of documents which the students will prepare in the context of writing for a hypothetical appellate judge and court. The documents will include materials to support an application for a judicial clerkship, a bench brief, a pre-conference memorandum, an opinion for the court, a dissenting opinion, and editing exercises. The instructor will provide advice and individual comments tailored to each student’s writing style. Graduation Requirement: Students may elect to satisfy the experiential graduation requirement, or writing graduation requirement, but not both. Must earn a grade of C or better. Basis of Grade: A series of writing assignments. Form of Grade: Letter.

LAWS 683 - Appellate Advocacy (3 Credits)
An intensive study of appellate litigation with a view to developing appellate practice skills, including formulation of strategies on appeal, use of the appellate record, brief writing, and oral advocacy. The course will focus on South Carolina appellate practice although federal practice will be included. Emphasis will be placed on individual learning and development. Registration: In the spring semester 2L members of the moot court board will be given priority. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Written and oral assignments, class discussion and individual critique. Form of Grade: Letter Grade.

LAWS 684 - Environmental Law of Natural Resources (3 Credits)
Natural resources laws are meant to ensure, among other things, that wildlife and fisheries are managed sustainably; that fresh water is conserved and allocated fairly; that endangered species are recovered to healthy populations; and that public and private lands provide a wide range of goods and services. Meeting these important objectives means resolving conflicts among various user groups and between current and future generations of users. There are a number of reasons why resolving these conflicts is both challenging and politically charged. Incomplete science often prevents government agencies from accurately assessing the current status of natural resources and predicting how potential future actions will affect them. Psychological traits such as optimism and loss aversion often prevent resource users from even acknowledging that there is a problem in the first place. New laws must often overcome long-standing cultural beliefs and traditions that evolved in the context of fewer resource demands. Finally, natural resource issues are characterized by the inherent political economy problems that arise when difficult-to-represent interests like the environment and future generations are involved. In this course we will study the ways that federal laws, including the Magnuson-Stevens Fishery Conservation and Management Act, the Marine Mammal Protection Act, the Endangered Species Act, and the National Forest Management Act, attempt to conserve and allocate natural resources. As part of our study, we will also examine theories of natural resources problems, including the tragedy of the commons, and solutions, including regulation and privatization. Note: Students who have taken LAWS 664 may not enroll in this course. Basis of Grade: Final examination, short writing assignments and class participation. Form of Grade: Letter Grade.
Prerequisites: None.
LAWS 685 - Serving the Court: Judicial Clerkships (2 Credits)
This class will focus on the role, duties, and conduct of law clerks. You will learn how clerks should conduct themselves; maintain an appropriate relationship with the judge and other participants in the legal system and the type of work clerks perform. The class will offer instruction on how to understand and deal with the court docket of cases and motions, how to properly analyze cases (through case study with intensive analysis and extensive class discussion), how to write succinct and useful bench memos, and how to organize and draft opinions/orders for a court. The course will include speakers to include: judges (both federal and state), clerks, and others who will broaden your perspective and offer you advice if you decide to pursue a clerkship. The class will involve a very high level of classroom participation and out of class work. Registration: Students may not enroll for LAWS 682 and this course. Basis of Grade: Class participation, writing assignments. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 686 - The Future of the Legal Profession (3 Credits)
This course examines new models for the delivery of legal services and the professional and regulatory challenges and opportunities such models create. It begins by analyzing U.S. lawyers' monopoly over the "practice of law" and comparing the U.S. regulatory framework to regulatory frameworks in other countries. It then surveys innovations in legal information technology and the expanding role of non-lawyer providers in both high-tech and low-tech settings, with each class built around case studies of specific companies, products, and providers. Each student will write a case study within the first six weeks of the course, plus a final analytical paper that builds on the case study. Readings and comments for the final sessions will be organized around student topics. Graduation Requirement: This course satisfies the graduation writing requirement. Must earn a grade of C or better. Basis of Grade: Weekly comments, case study, and final paper. Form of Grade: Letter grade.
Prerequisites: LAWS 554 or LAWS 555.

LAWS 687 - Fourth Circuit Practice (2 Credits)
This course will concentrate on appellate practice before the United States Court of Appeals for the Fourth Circuit. It will focus on the proper way to prepare, present, and argue cases before that Court. Some time will be spent on rules and procedures for the Fourth Circuit, but the main emphasis will be effective advocacy before a federal appeals court. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Written and oral assignments, class discussions and individual critique. Form of Grade: Letter.

LAWS 688 - Topics in Insurance Law (2 Credits)
This course is designed to focus upon routine areas of insurance practice and timely statutory and common law updates. Although national standards are surveyed, the course work will focus upon State of South Carolina insurance rules, procedures, and issues. The course is not designed to provide a comprehensive study of all possible areas of insurance law or all possible insurance issues addressed upon the South Carolina Bar examination. Basis of Grade: Final Examination. Form of Grade: Letter.
Prerequisites: None.

LAWS 689 - Construction Law and Litigation (2 Credits)
This course covers the substantive issues that arise in litigation concerning major public and private construction projects. The course addresses the rights and liabilities of owners, lenders, prime contractors, subcontractors, suppliers, sureties, insurers, and design professionals arising under contracts, statutes, professional liability and certain business related torts such as misrepresentation. The course also address the use of litigation, arbitration, and mediation to resolve construction disputes. Registration: This course will be of interest to students interested in a career in state or federal government, construction contracting and litigation, or business litigation. Students with background in engineering, architecture, or construction management are encouraged to enroll. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 690 - Products Liability (3 Credits)
Prerequisites: None.

LAWS 690A - Products Liability (2 Credits)
A study of the law governing legal responsibility for losses caused by defective products. Basis of Grade: Exam. Class participation may be considered. Form of Grade: Letter.
Prerequisites: None.

LAWS 691 - Russian Law and the Legal System (3 Credits)
This course addresses the emergence of post-soviet law in Russia. The course covers the evolution of Russian law through the present stressing the current Civil and Criminal Codes, Civil and Criminal Procedure, and Constitutional Law. Graduation Requirement: Course satisfies graduation writing requirement and graduation perspective course requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Paper. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 692 - Free Speech and Democratic Theory Seminar (2,3 Credits)
This seminar will examine First Amendment free speech doctrines and practices in relation to democratic theories. Because protecting the ability for citizens to engage in democratic self-government is an important value protected by the First Amendment, it is important to understand how democracy works in relation to speech. This course will focus each week on case studies that will include campaign finance, regulation of the public sphere, the role of dissent, campus speech, speech at school, and related issues. The readings will include both cases and secondary literature regarding democratic theory. The course will cover a substantial amount of free speech doctrine, but the goal is to examine how speech works in relation to institutional design and democratic practice in greater depth. Graduation: Course will satisfy the perspective graduation requirement when taken for two credit hours. Course will satisfy the graduation writing requirement when taken for three credit hours. Must earn a grade of "C" or better to satisfy the graduation writing requirement. Basis of Grade: Class participation, written assignments in the form of memos and response papers, and if taken for 3-credits, a 30-page paper. Form of Grade: Letter.
Prerequisites: LAWS 523.
LAWS 693 - Technology and the Practice of Law (3 Credits)
This skills workshop will study the technologies used in practicing law, analyzing the ethical and other legal issues created by their use. Students will learn about current and future technologies and best practices in using them. Much of the learning will be hands-on in the computer lab. A number of practicing lawyers and technology experts will share their knowledge and experience. The American Bar Association has adopted the proposal of its 20/20 Commission on Ethics that the Model Rules of Professional Conduct be amended to specifically require lawyers to be technologically proficient. "Maintaining Competence. To maintain the requisite knowledge and skill, a lawyer should keep abreast of changes in the law and its practice, including the benefits and risks associated with relevant technology." Cloud computing, internet hacking and government snooping, email, networked computers, flash drives, electronic signatures, smart phones, tablet computing, and ubiquitous public wi-fi networks all create legal and ethical challenges for lawyers. Study materials will include cases, ethics opinions, statutes, and regulations. Class meetings will include lectures, demonstrations, hands-on experience, case studies, projects, discussion, and tech expert presentations. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Class participation and projects. Form of Grade: Letter grade. Prerequisites: LAWS 554 or LAWS 555.

LAWS 694 - Tax Practicum (3 Credits)
This seminar is an advanced course in tax law and policy. The purpose of the course is to simulate the real world of tax practice and tax policymaking, helping students to understand how tax rules are made, interpreted, and applied by tax practitioners. Readings will include cases involving taxpayer challenges to tax rules and government challenges to taxpayer positions, and examples of “opinion letters” evaluating the U.S. federal income tax treatment of discrete transactions, examples of comment letters submitted to Treasury, and tax regulations with Treasury-produced explanatory preambles. During the semester, students will work collaboratively to produce the sort of written product that they might be tasked with in tax practice, for example, an opinion letter describing and assessing the tax treatment of a certain transaction; an appeal of an IRS proposed adjustment to a tax position; a petition to Tax Court to challenge a deficiency found by the IRS; or a comment letter in response to a proposed regulation. It is anticipated that the implementation of the Tax Cuts and Jobs Act (i.e. the tax bill enacted at the end of 2017) will result in substantial uncertainty and back and forth between taxpayers (and their representatives) and the government, so the precise nature of the writing assignments and the substantive issues students address will vary semester to semester based on current challenges the tax practitioner community confronts and students' particular interests. When possible, the curriculum will include guest visits from tax practitioners and/or IRS or Treasury personnel. Each student will individually produce an outline of the writing project as well as a first draft of 12-15 pages, which may require a statement of facts, legal analysis, policy arguments and data. Students will conduct an oral and visual presentation on their draft paper, and will be expected to review and critique each other's drafts and presentations. Students will then collaborate in small groups (3-4 students per group) to draft a final product that is 30-35 pages long and that integrates the individual work into a cohesive whole. Graduation Requirement: Effective Spring 2020 - This course can satisfy the graduation writing requirement, or experiential requirement, but not both. Must earn a grade of C or better in the course to satisfy either requirement. Basis of Grade: outline (10%), individual draft and in-class presentation (20%), foal group paper (40%), participation (30%). Form of Grade: Letter grade. Prerequisites or Corequisite: LAWS 633. or LAWS 636 or LAWS 637.

LAWS 695 - Insurance (2 Credits)
The purpose of this course is to impart to the student an understanding of basic insurance law, policy analysis, and the practical problems faced by the insurance industry, courts, attorneys and insurance regulators. Basis of Grade: Final examination. Form of Grade: Letter Grade. Prerequisites: None.

LAWS 697 - South Carolina Worker's Compensation (2 Credits)
Historical background of Worker's Compensation Legislation; Rights of workers and dependents; injuries within worker's compensation law; employers and employees covered under the South Carolina Act; disability benefits; death or dependency benefits; common law actions; miscellaneous provisions of the South Carolina procedure, practice and appeals in compensation cases. Basis of Grade: Final examination. Form of Grade: Letter Grade. Prerequisites: None.
LAWS 698 - Food Law and Policy (2 Credits)
This seminar will offer students an opportunity to study contemporary topics and issues in food law and policy. Students will critically examine the laws and policies that structure and shape the production, processing, transport, and consumption of food in the United States. They will also examine the consequences of these laws and policies for our food system. Topics covered may include genetically modified foods, meat and poultry, the U.S. Department of Agriculture’s child nutrition programs, food allergens, cottage food, craft beer, food trucks, and farmers markets. Through the selected topics students may examine public health, food safety, nutrition, obesity, food scarcity, and First Amendment issues. Basis of grade: A series of short papers, an in-class presentation, and class participation. Form of Grade: Letter.
Prerequisites: None.

LAWS 701 - Advanced Family Law (2,3 Credits)
This course takes students beyond the issues covered in the basic Family Law course and offers an opportunity for in-depth study of contemporary issues in Family Law. The class will explore the legal, ethical, social, and psychological aspects of the family. Topics covered may include parental rights and responsibilities in reproductive technology cases, medical decision-making, adoption, termination of parental rights, gender and sexuality, and special laws unique to Native Americans. Registration: Students who elect the 2 credit-hour option must either take the final examination or complete a paper of not less than 20 pages in length, which will not fulfill the graduation writing requirement. Graduation Requirement: A limited number of students may elect to fulfill the graduation writing requirement with the professor’s prior permission by taking the course for 3 credit-hours and completing a paper of not less than 30 pages in length. Must earn a grade of C or better. Basis of Grade: Final examination or research paper. Form of Grade: Letter Grade.
Prerequisite or Corequisite: LAWS 759.

LAWS 702 - Legal Aspects of Engineering (3 Credits)
This course is designed for students who are enrolled in the graduate program for a Master of Science with a Major in Engineering Management. The course will introduce students to various areas of law and legal principles that may impact their ability to be effective managers. The lectures in the course will focus on a variety of topics, including: labor and employment law, business corporations, agency and partnership, contracts, intellectual property, administrative law, and environmental law. The goal of this class is to give the student a greater understanding of the law and help the student become more aware of legal issues that may affect them or their company in their future. In addition, another benefit of this class is exposing the student to higher level legal, political, and governmental issues and case studies that will be involved in shaping the future of the student’s career, their company, and their industry. Form of Grade: Letter.
Prerequisites: None.

LAWS 703 - Electronic Discovery (2 Credits)
This course is a practical introduction to electronic discovery in civil litigation as governed by the Federal Rules of Civil Procedure. Students will be introduced to how computer files in litigation compare and contrast to traditional paper discovery. They will examine each stage of the discovery process, from identifying sources of potential electronic evidence to instituting a litigation hold, collecting, processing, reviewing, and producing electronic data. Emerging case law and trends for unsettled issues such as E-discovery ethics, privilege (nonwaiver/claw back agreements, not “readily accessible” data), and cost-shifting will also be addressed. Participants will be introduced to the electronic courtroom, from E-filing of documents in federal court to using trial presentation software to make the case to the jury and judge. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Final exam. Form of Grade: Letter.
Prerequisites: None.

LAWS 705 - Child Protection Advocacy Clinic (6 Credits)
In this clinic the students will receive instruction in all aspects of advocacy for abused and neglected children. Students will be responsible for preparing, filing and trying termination of parental rights cases on behalf of the S.C. Department of Social Services. All work will be under the supervision of an experienced clinical faculty member and attorney. Instruction will be through casework, classroom instruction, readings and case rounds. Enrollment is limited to ten students.
Registration: Subject to Client Contact Clinic Lottery. Graduation Requirement: This course satisfies the professional skills graduation requirement. For first year students entering in fall 2016, this course satisfies the experiential course graduation requirement. Must earn a grade of C or better. For first year students entering Fall 2016, this course satisfies the experiential course graduation requirement. Basis of Grade: Case work, class participation and other related work Form of Grade: Letter. Prerequisites: LAWS 671 and LAWS 555 or 554.
Prerequisite or Corequisite: LAWS 679.

LAWS 706 - Administrative Law Externship (4 Credits)
Students will spend a significant amount of time (30 hours per week for 8 weeks during the summer) with either a state or federal agency. They will be exposed to the field of Administrative law by working with federal or state agencies. Typically, the student will work in a general counsel’s office or an office with substantially similar duties and will assist the attorneys in research and drafting documents such as research memoranda and briefs. The student will also have the opportunity to observe court proceedings as well as depositions and interviewing witnesses. In addition to their work at the agency, students will meet periodically with a faculty member to reflect upon their fieldwork experiences. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better Basis of Grade: Journal; Example of written product or a short reflective paper on professional experience; and a brief presentation to the class. The fieldwork supervisor will complete an evaluation of the student’s performance. The final grade will be determined by the instructor, based upon the evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the instructor that all requirements of the externship have been satisfactorily completed. Form of Grade: Letter.
Prerequisite or Corequisite: LAWS 554 or LAWS 555.
LAWS 706A - Administrative Law Externship (2 Credits)
Students will work approximately 8-15 hours per week with either a state or federal agency. They will be exposed to the field of Administrative law by working with federal or state agencies. Typically, the student will work in a general counsel's office or an office with substantially similar duties and will assist the attorneys in research and drafting documents such as research memoranda and briefs. The student will also have the opportunity to observe court proceedings as well as depositions and interviewing witnesses. In addition to their work at the agency, students will meet periodically with a faculty member to reflect upon their fieldwork experiences. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: The final grade will be determined by the professor, based upon evaluation submitted by the fieldwork supervisor and upon a determination by the faculty member that all other requirements of the externship have been satisfactorily completed. Students must submit a contemporaneously maintained daily journal of their experience, along with either an example of a written product prepared during the externship or a short paper reflecting on a professional aspect of the experience. The fieldwork supervisor will also complete an evaluation of the student’s performance. Form of Grade: Letter.

Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 707 - Children's Law Externship (2 Credits)
This course places the student with a lawyer employed by a child-serving agency; an agency involved with child law issues where a child may be charged with a crime or is a victim of a crime; or with a lawyer in private practice that represents children. The student works approximately 8-15 hours per week with the lawyer. This work includes hands-on experience with the supervising lawyer to engage in the representation or advocacy process for those children based upon the legal setting chosen for the individual extern. The extern will observe the lawyer as the lawyer represents clients and also attend meetings, hearings, trials and other legal proceedings in order to experience the legal process firsthand. The student will provide assistance to the assigned lawyer by drafting memorandums, legal motions, proposed orders and providing legal research relevant to each case. The student will be immersed in each system as it relates to the assigned agency’s duties and responsibilities to improve outcomes for children in the legal system. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: The grade shall be based on the student’s attendance and class participation in the bi-weekly class, the evaluation of the student by the externship site supervisor/lawyer, and the journal submitted by the student. Each student will be expected to work 8-15 hours each week of the semester at the approved extern site and to attend a one and a half hour class every other week. Each student will be expected to maintain and submit both at midterm and at the end of the semester a journal of the student’s activities at the extern site. This journal must state the dates and times of the student’s experience and provide a summary of that event as it relates to the listed course objectives above. The student must also submit a weekly timesheet documenting the days and hours worked by the student and have it signed by the assigned supervising lawyer at the extern site. Form of Grade: letter.

Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 708 - Securities Litigation (3 Credits)
This course aims to supplement Securities Regulation. Specifically, it seeks to introduce students to the litigation devices that help ensure more robust securities disclosure. (Securities-disclosure law forms the heart of the Securities Regulation class.) The class will focus on public and private litigation under Section 10(b) of the Securities Exchange Act. It will also likely touch on other important provisions under which much securities litigation proceeds today (namely, sections 11, 12, and 17 of the Securities Act of 1933). Lastly, the class will explore insider-trading prosecutions under the federal securities laws. Importantly, all three of these areas of securities litigation (those relating to Section 10(b), the ‘33 Act provisions, and insider-trading law) are not currently covered in the Securities Regulation class. Basis of grade: Final exam with both issue-spotting and multiple-choice questions. Class participation will also factor into grades on the margin. Form of grade: Letter.

LAWS 709 - Administrative Law (3 Credits)
Government agencies regulate almost every area of our lives. Many lawyers work for government agencies and many other lawyers work for people whose lives are affected by these agencies. Virtually every lawyer needs to know how government agencies operate. That is the subject of this course. The course is recommended for students interested in substantive areas in which agencies play an important role, such as environmental law, health-care law, and securities law (to name a few). Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.

LAWS 710 - Complex Civil Litigation (3 Credits)
This course will study legal doctrine and current “best practices” relating to complex litigation. The focus is on multi-party, multi-jurisdictional disputes and on the increasingly administrative role courts play in these actions. Much of the attention will be devoted to class actions (mainly federal with some discussion of South Carolina class actions), including class certification, extraterritoriality, and interlocutory appeals. We will spend considerable time on complex joinder, aggregated claims, MDL practice, and the impact of CAFA. Some time will be devoted to the recent “Federal Courts Jurisdiction and Venue Clarification Act of 2011.” Registration: It is strongly recommended that students also take LAWS 659, but it is not a requirement.

Prerequisites: . Basis of Grade: In class final examination, plus class participation. Form of Grade: Letter.

LAWS 711A - Antitrust Law and Trade Regulation (2 Credits)
The course will focus on Sections 1 and 2 of the Sherman Antitrust Act, as well as selected other federal trade regulation statutes, including the Clayton Act (as amended by the Robinson-Patman Act). Topics typically covered may include monopolization and attempted monopolization, conspiracies in restraint of trade, e.g., price-fixing and bid-rigging, tying arrangements, the essential facilities doctrine, price discrimination, and merger review. The course will also cover how a heightened pleading standard has changed the civil antitrust litigation landscape. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 713 - Trademark Law (2 Credits)
A survey of federal and state trademark and unfair competition law with an emphasis on the nature, scope and enforcement of trademark rights. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.

Prerequisites: None.
LAWS 716 - Nonprofit Organizations Clinic (6 Credits)
This Clinic provides legal assistance to nonprofit organizations of all types addressing the various needs of the community. Because many of these organizations lack the financial resources to retain private legal counsel, students provide legal assistance in transactional matters that include incorporation, preparation of by-laws, preparation and filing of 501(c)(3) applications, contract review and negotiation, real estate, intellectual property and land use issues. Students may attend board meetings, provide legal assistance to start up organizations or organizations that are merging, converting or spinning off new ventures. The nature of the clinic allows for experience touching many different legal disciplines and helps provide for the stabilization of these organizations so that they can better serve the community. Registration: Subject to Client Contact Clinic Lottery. Effective as of Fall 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Performance on casework, class exercises and participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 554 or LAWS 555.

LAWS 717 - Nonprofit Organizations (3 Credits)
This course will provide an overview of the nonprofit tax exempt sector. It will include the study of the formation, structure, and characteristics of nonprofit organizations and the major categories of federal tax exemption with an emphasis on charitable organizations such as religious organizations, churches, educational organizations, healthcare organizations and arts organizations. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 609.

LAWS 719 - Discovery Practice (3 Credits)
This course will explore problems encountered in the conduct of discovery, primarily through the student’s preparation and argument of discovery motions. Graduation Requirement: This course satisfies the skills course graduation requirement. Basis of Grade: Written and oral assignments and class participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 671.

LAWS 720 - Criminal Law Externship (4 Credits)
Students will spend a significant amount of time (30 hours per week for 8 weeks during the summer) at their placement. Placements will include: the Solicitors Office of various counties, the Public Defenders office, the Attorney General’s office, and federal criminal agencies. Students will assist in the preparation of materials for court and can observe office attorneys in trial. A specific attorney in each office will be responsible for overseeing student experience in the office. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Journal; Example written product or a short reflective paper on professional aspect of experience; and a brief presentation to class. The fieldwork supervisor will complete an evaluation of the student’s performance. The final grade will be determined by the instructor, based upon the evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the instructor that all requirements of the externship have been satisfactorily completed. Form of Grade: Letter.
Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 720A - Criminal Law Externship (2 Credits)
Students will spend a significant amount of time, 8-15 hours per week, at their placement. Placements will include: the Solicitors Office of various counties, the Public Defenders office, the Attorney General’s office, and federal criminal agencies. Students will assist in the preparation of materials for court and can observe office attorneys in trial. A specific attorney in each office will be responsible for overseeing student experience in the office. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Journal; Example written product or a short reflective paper on professional aspect of experience; and a brief presentation to class. The fieldwork supervisor will complete an evaluation of the student’s performance. The final grade will be determined by the instructor, based upon the evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the instructor that all requirements of the externship have been satisfactorily completed. Form of Grade: letter.
Prerequisites: LAWS 554 or LAWS 555.

LAWS 721 - Bioethics Seminar (2,3 Credits)
This course explores the intersection of law and ethics in the field of medicine. The course will cover in-depth, at least three of the following issues: abortion and other issues of reproductive decision making, the right to die, allocation of health care resources, global HIV/AIDS, universal healthcare, organ transplantation and organ procurement, the identity and role of the patient, the research subject and the consumer of health care technology, rationing of healthcare and similar issues. Students may choose to write one paper of not less than 30 pages to satisfy the paper requirement or may write three smaller papers during the course of the semester. There will be no exam. Graduation Requirement: Course qualifies as a writing seminar for the graduation writing requirement if taken for 3 credit hours and the student chooses to write the 30 page paper with the permission of the instructor. Must earn a grade of C or better if taken for the writing requirement. Course satisfies the graduation perspective course requirement. Basis of Grade: Paper of not less than thirty (30) pages or three shorter papers. Form of Grade: Letter Grade.

LAWS 722 - Patent Law (2 Credits)
Consideration of the theoretical underpinnings of the United States patent system, the definition of patentable subject matter, the requirements governing novelty, utility and nonobviousness, the granting and enforcement of patents, the relationship of patents to other methods of protecting intellectual property, and the special role in patent law of the United States Court of Appeals for the Federal Circuit. Students need not have an engineering or science background. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 723 - Copyright Law (3 Credits)
This course will provide an in depth analysis of copyright law. Students will study case law and statutory authority pertaining to copyright protection of literary, musical, dramatic, choreographic, pictorial, graphic, sculptural, audiovisual, and architectural work, as well as computer software. In addition, the class will consider public policy issues raised by recent amendments to the Copyright Act of 1976. Basis of Grade: Final examination and problems. Form of Grade: Letter Grade.
LAWS 724 - Intellectual Property (3 Credits)
This survey course will provide a basic grounding in the law of Copyrights, Patents, and Trademarks. Subject covered will include the acquisition, maintenance and duration of intellectual property protections; the right and obligations of intellectual property owners; and causes of action and remedies for infringing activities. Registration: Students who have taken Patent Law and Copyright Law may register for Intellectual Property. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 726 - Constitutional Issues in Public Education Law (3 Credits)
Survey of historical and contemporary civil liberties issues arising in the operation of the American public school system. Topics addressed will include religious activities in schools, the regulation of student and teacher speech, student privacy, school safety and student discipline. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Portfolio of advice memoranda plus class participation. Form of Grade: Letter.

LAWS 727 - Special Education Law (3 Credits)
This course will introduce students to federal laws and regulations concerning the provision of educational services to disabled students. We will cover the history and development of special education and civil rights for students with disabilities as well as the fundamental principles of the Individual with Disabilities in Education Act (IDEA), Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA). The course will focus on the rights of students and their parents as well as the responsibilities of educators when addressing special education needs. Basis of Grade: Class participation, small group projects and final exam. Form of Grade: Letter.
Prerequisites: None.

LAWS 728 - Constitutional Issues in Property Law (2-3 Credits)
This seminar will examine the intersection of property law and the Constitution, particularly the First, Fourth, and Fifth Amendments. Topics will include eminent domain, regulatory takings, religious land use, and architecture as speech. Basis of Grade: Final examination. Form of Grade: Letter.
Prerequisites: None.

LAWS 729A - Legislation (3 Credits)
This course will examine legislative law and the legislative process. Among the issues addressed will be the legislative power, legislative structure and procedures, interpretation and drafting of statutory law, election laws, legislative advocacy, and regulation of lobbyists. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Final examination and performance in a maximum of two written or oral class exercises. Form of Grade: Letter.

LAWS 730 - Legislative Externship (2 Credits)
Students will work under the supervision of a lawyer-legislator for 8-15 hours per week to evaluate whether proposed legislation might violate constitutional requirements or create unintended ambiguities or conflicts in the law. Students will be assigned actual bills to evaluate, will research any potential legal issues raised by the legislation, and prepare a written report on each bill assigned, setting forth the results of the research. Work will be assigned on a bi-partisan basis, and students will be asked, in appropriate circumstances, to draft alternative language that would eliminate an identified problem, while still achieving the purpose of the proposed legislation. The student's work-product will be submitted to the supervising lawyer-legislator. In addition to work supervised by a lawyer-legislator at the State House, students will meet as a class regularly through the semester with their professor for directed reflection upon their field experiences. Graduation Requirement: This course satisfies the experiential course graduation requirement. Basis of Grade: Written assignments and evaluation by fieldwork supervisor. Form of Grade: Pass/Fail.
Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 731 - Environmental Law & Policy (3 Credits)
This is an introductory course in environmental law. The purpose is to give interested students a background in a number of federal environmental statutes, including NEPA (National Environmental Policy Act) CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) ESA (Endangered Species Act) and CWA (Clean Water Act). Basis of Grade: Exam. Form of Grade: Letter.

LAWS 732 - Sales (3 Credits)
This course examines Uniform Commercial Code Article 2 governing sales of goods and Article 2A governing leases of goods. Through statutory and case analysis and problem solving, students will develop skill in planning for and resolving disputes involving transactions in goods, as well as the critical skill necessary to evaluate goals of the law of sales and leases of goods. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 733 - International Human Rights Skills (3 Credits)
In this course, students will act as human rights attorneys advocating for governmental remedies for human rights violations. Students will: research international, regional, and other countries’ laws; analyze a human rights issue in another country; conduct mock interviews; strategize as to what judicial and non-judicial avenues are best pursued to achieve the desired result; draft sections of a policy and legislative advocacy report; and participate in a simulated hearing before a panel of policy-makers. Through this course, students will: gain a better understanding of the international human rights system and the methods used by the human rights movement; improve their written and oral advocacy skills; gain or improve upon their interviewing and fact-finding skills; and gain an understanding of how to perform international and comparative law research and analysis. Note: Course satisfies the perspective and experiential course graduation requirements. Must earn a grade of C or better. Basis of Grade: Class attendance and participation; written and oral assignments. Form of Grade: Letter.
LAWS 734 - Climate Change Seminar (2,3 Credits)
This seminar will explore legal and regulatory options for addressing global climate change. We will begin with materials examining the scientific evidence and projections of climate change, then move on to attempts at international legal and quasi-legal mechanisms, including the United Nations Framework Convention on Climate Change, the Kyoto Protocol, and the Copenhagen Accord. We will also cover U.S. domestic climate policy options, including regulation under the Clean Air Act and at state level, and contrast these policies with those in place in other developed economies. Throughout, we will discuss the uniquely difficult challenges climate change creates for institutions, society, and the legal system. Registration: LAWS 731, LAWS 666, or LAWS 826 recommended. Graduation Requirement: This course qualifies as a perspective course. If taken for three credits, it satisfies the graduation writing requirement and you must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Class Participation, Class Presentation, and Paper (2 credits: series of response papers; 3 credits: research paper, 30-page minimum). Form of Grade: Letter Grade.

LAWS 735 - Advanced Environmental Law Seminar (2,3 Credits)
This seminar addresses topics in environmental law that go beyond those covered in first- and second-level courses in the environmental law curriculum (Environmental Law, Administrative Law, Water Law, Coastal Law, Natural Resources Law, Energy Law, etc.). The specific topics covered will vary from year to year, but may include recent or ongoing environmental litigation, new or proposed legislation, and/or issues of current public debate. Students will read and discuss secondary and original documents related to the issues discussed, including judicial opinions, appellate briefs, and Federal Register notices of rulemaking. Graduation Requirement: This course satisfies the perspective course graduation requirement. If taken for three credits, it also satisfies the graduation writing requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Class participation and response papers; if the class is taken for three credits, an original paper sufficient to meet the writing requirement. Form of Grade: Letter. g. LAWS 684, 747, 826, 828, etc.), or permission of the professor.
Prerequisites: At least one other course related to LAWS 684 (e.

LAWS 736 - Legislative Drafting Practice and Policy (4 Credits)
This course will explore the process of drafting legal codes in a real-world setting. Specifically, the course will give students the opportunity to participate in the creation of a legal code for the Catawba Nation. Students will be introduced to the relevant areas of Federal Indian law, the history, culture and legal conceptions of the Catawba Nation, and principles of drafting laws. Topics may shift from year to year. Students will use information collected during the course to draft laws to be submitted to the leadership of the Catawba Nation for adoption. Students will acquire the skills they need to draft a section of the Catawba legal code (in the first year this course will focus on domestic violence) for the Catawba Nation. In order to produce this code, students will examine numerous state and tribal statutes. They will discuss the relevant strengths and weaknesses of these laws with the goal of drafting a set of laws particularly suited to the history, culture and legal needs of the Catawba Nation. During the course, they will meet with leadership of the Catawba Nation and with lawyers, government officials and judges from other recognized Indian nations. Students will receive a letter grade at the end of each semester. Registration: LAWS 759 is recommended. Graduation Requirement: This course satisfies the graduation perspective course requirement. This course also satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: The grade will be based on the student’s attendance and class participation as well as the quality of the research and drafting assignments produced through the semester.
Prerequisites: None.

LAWS 737 - Civil Rights Seminar (2,3 Credits)
This course focuses on federal civil rights relating to employment, education, housing, voting, and affirmative action. The course will survey the major issues and legal protections in each of these substantive areas, which includes laws relating to discrimination based on race, gender, disability, language status, and familial status. Students will examine the constitutional and statutory frameworks for addressing these issues, as well scholarly theories by which to critique them. Graduation Requirement: This course satisfies the perspectives course requirement. Students who elect to take this course for three (3) credits will write a paper that meets the graduation writing requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Final Paper. Students electing 2 credits will write a paper that meets the graduation writing requirement. Students electing 2 credits will write a shorter paper. Form of Grade: Letter.

LAWS 740 - Voting Rights & Representation Seminar (2 Credits)
A survey of the protections afforded the right to vote by the U.S. Constitution and the Voting Rights Act. The course includes examination of the major Supreme Court cases involving access to the ballot and malapportionment. Primary emphasis will be on racial discrimination in voting under the 14th and 15th Amendments and Sections 2 and 5 of the Voting Rights Act. Basis of Grade: Paper plus credit for strong class participation. Form of Grade: Letter.
LAWS 741 - Carolina Health Advocacy Medicolegal Partnership Clinic (6 Credits)
The CHAMPS Clinic is a collaboration of the School of Law, the USC School of Medicine, Palmetto Health, Palmetto Health-USC Medical Group, and South Carolina Legal Services. It will provide students with the opportunity to engage in interdisciplinary learning and community engagement in the context of live-client legal cases. More specifically, students will take legal cases on behalf of low income families referred from Palmetto Health and Palmetto Health-USC Medical Group. These cases will address the social-determinants of clients’ health. The law students will work collaboratively on these legal cases with doctors, social workers and other health professionals. In addition to case work, the course will have a seminar component during which students will learn the doctrine, theory, lawyering skills, and policy relevant to their case work. The seminar will also provide the students opportunities to lead discussions about case-related issues and solicit feedback from colleagues on those issues. Registration: Subject to Client Contact Clinic Lottery. Effective as of FALL 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Form of Grade: letter. Basis of Grade: Students will be graded on case work, including professional habits and the development of lawyering skills and identity; reflection essays; interdisciplinary collaboration. Prerequisite or Corequisite: LAWS 671.

LAWS 742 - Sustainable Development Clinic (6 Credits)
Through this clinic, students will provide transactional and advisory legal services to entities whose activities focus on sustainable development, and who would not otherwise be able to hire counsel. These entities (potentially to include non-profit organizations, local governments, public agencies, and others) may work on ecological conservation, agriculture and food access, land use resilience, or other areas. Students will interview clients, conduct needed legal research and writing, advise clients, and provide services in a variety of legal subject areas, likely to include administrative law, environmental law, property law, land use law, and non-profit organizations law. Students may draft and review legal instruments such as conservation easements, examine property title issues, review and advise on organizational documents, and research and advise on legal tools available for resilience initiatives. Through a seminar component and case rounds in addition to hands-on work, students will gain a more sophisticated understanding of the concepts of sustainability and resilience, attorney ethics and professional rules of practice, and other issues faced by land use lawyers, including interdisciplinary matters and policy questions. Registration: Recommended Courses are LAWS 731, LAWS 709, and LAWS 651. Graduation Requirement: For students entering in fall 2016, this course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Professionalism and adherence to clinic procedure/professional practice rules (20%); ability to work with teammates and supervisors (20%); quality of work products and other assistance to clients (20%); responsiveness to feedback (20%); and participation in seminar and case rounds, including completion of any assignments (20%). Prerequisites: LAWS 554 or 555.

LAWS 743 - Introduction to Drafting Business Agreements (2 Credits)
This course will introduce students to the skill of translating a business deal into contract concepts, including representations, warranties, covenants, rights, and conditions. Assignments will familiarize students with the building blocks of a contract, including recitals; definitions; action and payment provisions; license grants and other substantive provisions; termination and breach provisions; and general provisions, such as assignment and delegation, severability, and governing law. Students will practice techniques for effectively drafting, reviewing, and commenting on contracts. Basis of Grade: Series of Drafting Assignments. Form of Grade: Letter. Prerequisites: LAWS 743 taken during the same Maymester session.

LAWS 744 - Drafting Business Agreements Workshop (1 Credit)
Students will work in teams to negotiate and draft a business agreement based on a term sheet and other materials that define the parties’ objectives. The proposed agreement, readings, and lectures will build on topics covered in Introduction to Drafting Business Agreements. Graduation Requirement: Satisfactory completion of this course and its Basis of Grade: Negotiation and Drafting of a Business Agreement. Form of Grade: Letter. Prerequisite: LAWS 743 taken during the same Maymester session. Prerequisites: satisfies the professional skills requirement. LAWS 743 taken during the same Maymester session.

LAWS 745 - Drafting Business Agreements (3 Credits)
This course will introduce students to the skill of translating a business deal into contract concepts including representations, warranties, covenants, rights, and conditions. Additionally, the course will familiarize students with the fundamental building blocks of a contract. Those building blocks include recitals; definitions; action and payment provisions; license grants and other substantive provisions; termination and breach provisions; and general provisions, such as assignment and delegation, severability, and governing law. Students will learn and practice techniques for effectively drafting, reviewing, and commenting on contracts in light of the parties’ objectives and a client’s attitude towards risk. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Series of Drafting Assignments. Form of Grade: Letter.

LAWS 747 - Water Law (3 Credits)
This course will study how society allocates and protects its most crucial natural resource – water. The emphasis will be on current legal and policy debates, although we will also examine the history of water development and politics in the United States. Among the many issues that we will consider are: alternative means of responding to the growing worldwide demand for water; the appropriate role for the market and private companies in meeting society’s water needs; protection of threatened groundwater resources; environmental limits on water development; wetlands law; and interstate water disputes. Basis of Grade: Mid-term and final exam. Form of Grade: Letter.
**LAWS 748 - In-House Counsel Externship (4 Credits)**

During the Externship, students will spend a significant amount of time (10 hours per week during fall or spring and 30 hours per week for 8 weeks during the summer) at their placement. Placements would typically include general counsel offices in universities, hospitals, public utilities, and private corporations. Students will have the opportunity to strengthen their legal writing, research and analytical skills by assisting in various projects like the preparation of materials such as employee handbooks, memoranda of understanding, and compliance documents. The students may also have the opportunity to observe contract negotiations, interviews with employees and possibly discussions with outside counsel. An attorney in each office will be responsible for overseeing student experience in the office. The In-House Counsel Externship will expose students to how those offices function and what impacts in-house counsel to decide whether to manage certain issues or seek outside counsel. Further, students will have the opportunity to observe the attorneys role on the organization and the relationship between the attorney and “client.” Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Journal; Example of written product or a short reflective paper on professional experience; and a brief presentation to the class. The fieldwork supervisor will complete an evaluation of the student’s performance. The final grade will be determined by the instructor, based upon the evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the instructor that all requirements of the externship have been satisfactorily completed. Form of Grade: Letter.

**Prerequisite or Corequisite:** LAWS 554 or LAWS 555.

**LAWS 748A - In-House Counsel Externship (2 Credits)**

Students will spend a significant amount of time (10 hours per week during fall or spring) at their placement. Placements would typically include general counsel offices in universities, hospitals, public utilities, and private corporations. Students will have the opportunity to strengthen their legal writing, research and analytical skills by assisting in various projects like the preparation of materials such as employee handbooks, memoranda of understanding, and compliance documents. The students may also have the opportunity to observe contract negotiations, interviews with employees and possibly discussions with outside counsel. An attorney in each office will be responsible for overseeing student experience in the office. The In-House Counsel Externship will expose students to how those offices function and what impacts in-house counsel to decide whether to manage certain issues or seek outside counsel. Further, students will have the opportunity to observe the attorneys role on the organization and the relationship between the attorney and “client.” Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Journal; Example of written product or a short reflective paper on professional experience; and a brief presentation to the class. The fieldwork supervisor will complete an evaluation of the student’s performance. The final grade will be determined by the instructor, based upon the evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the instructor that all requirements of the externship have been satisfactorily completed. Form of Grade: Letter.

**Prerequisite or Corequisite:** LAWS 554.

**LAWS 749 - Consumer Bankruptcy Clinic (4 Credits)**

This course will provide both a substantive and clinical approach to consumer bankruptcy law and practice. Students will be placed with experienced consumer bankruptcy lawyers who will be handling pro bono cases. Substantively the course will cover discharge, asset retention, secured and unsecured credit, as well as the mechanics of filing and litigating consumer bankruptcy cases. Special emphasis will be placed on interviewing, fact investigation and counseling. In addition to their work on the pro bono cases the students will be required to do a simulated initial client interview and write an opinion letter to the client in the simulation. Registration: LAWS 771 and 644 are helpful, but not required. Graduation Requirement: This course satisfies the course graduation requirement. Basis of Grade: Performance on casework and simulations and class participation Form of Grade: Letter Grade.

**Prerequisites:** or Corequisite: LAWS 555 or 554.

**LAWS 750 - Clinics II (1-4 Credits)**

**LAWS 751 - Education Rights Clinic (6 Credits)**

The Special Education Clinic helps special-needs children and their families get access to equal educational opportunity. The clinic handles legal issues ranging from disability eligibility and entitlement to services, to developing adequate Individualized Education Programs and discipline matters. Law students will begin to develop a variety of legal skills including: interviewing clients, fact investigation, legal research and analysis, case strategy, negotiations, as well as participate in mediation and possibly litigation proceedings. Registration: Subject to Client Contact Clinic Lottery. This course satisfies the Children’s Law Concentration requirement. Effective as of FALL 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Performance on casework, class exercises and participation. Form of Grade: Letter.

**Prerequisites:** LAWS 671.

**Prerequisite or Corequisite:** LAWS 554.
LAWS 752 - Domestic Violence Clinic (6 Credits)
This course will train students to assume the role of lawyer and introduce them to domestic violence law and practice. Through classroom discussion, simulations, assigned readings, client representation, and community-based projects, the course will cover central concepts of laws governing civil injunctive remedies for intimate partner abuse, including orders of protection, restraining orders, and permanent protection orders, as well as related relief, such as custody and visitation, child support, and crime victims' compensation. Students will apply their substantive knowledge by representing clients seeking these forms of relief. Through client representation, students will have an opportunity to develop legal skills including: interviewing, counseling, fact investigation, legal research, writing, and analysis, case strategy, negotiation, and courtroom advocacy, as well as professional and life skills relating to legal practice. The course also will give students an opportunity to consider the broader context of their individual cases through class discussion and community-based projects, which may include know-your-rights presentations, limited advice and assistance clinics, and policy research. In some semesters, students may have the additional opportunity to represent clients in administrative matters related to their experience of domestic violence, such as in applying for affirmative immigration remedies or parole. All student work on cases and community based projects will be completed under the supervision of a clinical professor.
Registration: Subject to Client Contact Clinic Lottery. Effective as of Fall 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Performance on casework and community based projects, as well as their participation in class discussions and exercises. Form of Grade: Letter Grade.
Prerequisites: LAWS 671 and LAWS 554.

LAWS 754 - Advanced Trial Advocacy (2 Credits)
This course will build on the skills learned in basic trial advocacy courses. Focus will be on more complex advocacy problems. Areas covered will include direct and cross examination, qualifying and examining expert witnesses, problems in jury selection, trial motions, offers of proof, and other means of preventing or preserving trial error. Other topics will include use of demonstrative evidence, including foundations for sophisticated exhibits, and the taking and use of depositions and other discovery at trial. Graduation Requirement: Course satisfies the professional skills course graduation requirement. For first year students entering Fall 2016, this course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Performance on simulations and class participation. Form of Grade: Letter Grade.
Prerequisites: LAWS 679 or 677 and LAWS 671.

LAWS 756 - Regulation of Vice (2,3 Credits)
This seminar is an advanced course in criminal law that takes an in-depth look at the legal regulation, particularly the criminalization, of vice. The purpose of the course is to provide students with an understanding of and the ability to apply criminal law theory through a survey of six categories of vice: gambling, alcohol, illicit drugs (both marijuana and other drugs), nontraditional sex, prostitution, and pornography. For each category of behavior, students will review historical regulation, discuss contemporary legal regimes, and consider the justifications for continued criminalization and the expected benefits and costs of alternative methods of regulation. Through readings, guest speakers, and moderated in-class discussions, students will engage with both descriptive and normative questions about the regulation of vice. The course will meet once per week for two hours. Students may choose to take the course for 2 or 3 credit hours. Students who enroll in the 2 credit hour course are responsible for an in-class presentation and three one-page response papers during the semester and a ten-page research paper at the end of the semester. Students who enroll in the 3 credit hour course are responsible for an in-class presentation and three one-page response papers during the semester and a thirty-page research paper at the end of the semester. The three credit hour version of the course will satisfy the upper level writing assignment. Graduation Requirement: This course satisfies the perspective graduation requirement. If taken for 3 credit hours, this course satisfies the graduation writing requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: 70% written work, 15% in-class presentation, 15% participation. Form of Grade: Letter grade.

LAWS 757 - Criminal Practice Clinic (6 Credits)
The clinic will afford participating students an opportunity to gain first-hand, closely supervised training and experience in the representation of real clients and the practice of the arts/skills of litigation planning, client counseling, fact development, negotiation and courtroom advocacy. The vehicle for such training and experience is the planning, preparation and presentation of the legal defense in actual cases involving allegations of criminal conduct. All casework will be done under the supervision of a clinical professor. In addition to the cases there will be assigned readings, lectures, discussions, and demonstrations. Criminal Practice Clinic places emphasis on jury trial practice before the Municipal Court for the City of Columbia. Registration: Subject to Client Contact Clinic Lottery. Effective Fall 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Performance on casework and participation in class discussions and exercises. Form of Grade: Letter Grade.
Prerequisites: LAWS 541, LAWS 671, and LAWS 554 or LAWS 555.
LAWS 758 - Sentencing and Correction Law (3 Credits)
This course will examine what happens to a criminal defendant after adjudication of guilt. Areas of inquiry will include the law, theory, and practice of sentencing; habeas corpus and other post-conviction remedies (not including direct appeals); and the institutions of the adult criminal justice system (corrections, probation, parole, executive clemency). To the extent time permits, we may also examine the role and rights of victims of crime in the criminal justice system. The course will focus particularly on the constitutional rights which do or do not attach at various points in the correctional process, as well as both the scope and the limitations of judicial review available to prisoners and others within the criminal justice system. The course will also include, if possible, a guest presentation by a judge and/or practitioner, and also a class visit to a state or county correctional facility. Basis of Grade: Examination. Form of Grade: Letter.

LAWS 759 - Family Law (3 Credits)
Analysis of legal requirements and limitations on creation, maintenance and dissolution of family relationships. Basis of Grade: Final examination; the instructor may adjust grades 1/2 letter to reflect class participation. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 760 - Transportation Law (2 Credits)
Transportation plays a huge role in life and in law. This course generally focuses on a single case study to holistically analyze specific mobility-related legal issues; past topics have included sudden unintended acceleration in motor vehicles, unmanned aerial vehicles, and Robert Moses. In addition to this principal case study, each student typically selects, researches, and ultimately teaches a separate transportation law topic. Through these two parts, students engage with a range of legal and technical source materials to understand how lawyers (as well as legislators, regulators, executives, journalists, advocates, and engineers) confront interdisciplinary issues that affect human lives, challenge technical confidence, and implicate institutional credibility. The course materials introduce students to transportation law, and the broader lessons that emerge from the classroom discussions are intended to serve any attorney who must navigate complexity and confusion. Graduation Requirement: This course satisfies the perspective graduation course requirement. Basis of Grade: Final exam, class participation, class preparation. Form of Grade: Letter grade.

LAWS 761 - Health Care Finance (3 Credits)
Health care spending accounts for a significant portion of our economy -- nearly 20 percent of the nation's GDP -- and that spending is shaped by a unique web of laws and regulations. This class will examine those laws and regulations, studying the legal regimes that govern health care financing in the United States. Particular emphasis will be placed upon Federal statutes that shape and regulate health insurance, including a study of Medicare (in both its "traditional" form and its more recent variations), Medicaid, CHIP, the Affordable Care Act, any pending or new legislation to supplement or supplant the Affordable Care Act, and additional statutes that govern areas such as employer-based insurance and emergency care. The goals of the class will be to: (1) understand how statutory text and other legal rules rely upon (and attempt to enact) different models of health care financing; (2) understand the theories behind these different financing models; and (3) learn about the legal, economic, and policy-oriented debates that surround these models. Time permitting, additional topics may include fraud and abuse laws, antitrust, laws governing tax-exempt organizations, and medical practice relationships. Basis of Grade: Class participation, final exam. As part of the class participation grade, students will be expected to provide a brief introduction to one class's readings about the debates in health care financing, and to initiate class discussion on that topic. Form of Grade: Letter.

LAWS 762 - Police Law and Policy (3 Credits)
This course explores the roles that police play in our society, the ways in which police agencies and officers are regulated, and how those regulations translate into police policy and officer behavior. While the Fourth, Fifth, and Sixth Amendment govern police investigations-searches, seizures, arrests, and interrogations—of what the police do not implicate constitutional concerns. Instead, those actions—including the selection and training of new officers, the management of a police agency, the administrative investigation of misconduct, the imposition of disciplinary measures, and many others—are regulated by a complicated skein of doctrines, statutes, and administrative policies. And those regulations, along with public expectations and perceptions, can meaningfully affect officer behavior, changing the way that a police agency relates to the public and the way that individual officers interact with civilians. This course will examine the historic and contemporary intersection of regulation and behavior, investigating how laws, administrative directives, and other factors can both contribute to and resolve problematic aspects of policing. Registration: LAWS 547 is recommended. Basis of Grade: Written assignment, observation exercise(s), and participation. Form of Grade: Letter.

LAWS 763 - Conflict of Laws (3 Credits)
The law relating to transactions or relationships with elements in more than one state: judicial and legislative jurisdiction; federal law and state law; choice of law; recognition and enforcement of foreign judgments; interstate divorce, support, and custody. A review of selected aspects of civil procedure, torts, contracts, property, and family law. Basis of Grade: Final examination; class participation will also be considered. Form of Grade: Letter Grade.
LAWS 763A - Conflict of Laws Online (3 Credits)
This course will examine the legal problems that arise when litigation involves people and events that span multiple state or national boundaries, with a focus on the challenge of determining the applicable law. The focus is on US court approaches that are applied in interstate and international cases, constitutional limitations on those approaches, and party efforts to contract for their own resolution to questions of jurisdiction and choice of law. Registration: Students enrolled in this course cannot enroll in LAWS 763. Basis of Grade: Assignments; Discussions; Final Exam. Form of Grade: Letter.

LAWS 765 - International Litigation (3 Credits)
This course combines substantive instruction with a significant skills component in the form of drafting and oral advocacy. It will focus on litigation in US courts involving international parties. Topics include Jurisdiction, Choice of Forum, Choice of Law, and International Judicial Assistance (including the Recognition and Enforcement of Foreign Judgments). Registration: LAWS 784, LAWS 763, and LAWS 659 are recommended. Graduation Requirement: Satisfies Perspective Course requirement and skills course graduation requirement. Basis of Grade: Projects and written and oral skills exercises. Form of Grade: Letter Grade.

LAWS 766 - Education Law and Policy (3 Credits)
This course will consider constitutional, statutory, and policy issues affecting public education at the elementary and secondary levels. Topics include: the history of public schools, public school governance, public school finance and “adequacy” litigation, equal educational opportunity, school disciplinary issues, First Amendment concerns, Due Process concerns, special education, and school choice. Basis of Grade: Final examination and/or a series of writing assignments; class participation. Form of Grade: Letter Grade.

LAWS 767 - Media Law (3 Credits)
The course will focus on freedom and control of mass media in the context of the constitution, statutes, regulations and common law. The goal of the course will be to develop an analytical framework to assist in the resolution of conflicts arising from news gathering and publication in traditional and emerging media. Specific areas of discussion will include prior restraint, access to public records and places, defamation, invasion of privacy, copyright and privileges against compelled testimony and production from reporters. Basis of Grade: Final examination and class participation. Form of Grade: Letter Grade.

LAWS 768B - Law, Society and Justice (2 Credits)
Course will use a series of problems in the fictional state of Petigu to provide a concrete context for considering the nature and purpose of: law, legal systems, and the state in a modern pluralistic society. Topics will range from “simple” neighborhood disputes to broader issues like distributive justice, affirmative action, capital punishment, and liberty. Registration: Students who took Jurisprudence with Professor Hubbard may not enroll in this course. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Take-home exam and class participation. Form of Grade: Letter.

LAWS 769 - Legislative Process (2 Credits)
This course will examine the law making process at the state and federal levels from the source of an idea for a legislative proposal through its ultimate publication as a statute. Among the issues addressed will be constitutional parameters limiting legislative power, legislative structure and procedures, legislative advocacy, and regulation of lobbyists. Practical exposure to the legislative process will be gained through guest lecturers. Basis of Grade: Final examination and weekly quizzes. Form of Grade: Letter Grade.

LAWS 770 - Poverty Law and Policy (2 Credits)
The course will examine how law has defined poverty and will assess the adequacy of that definition when measured against the experience of low income people. Throughout the course, we will pay special attention to how living in poverty affects children's well-being and development and how those effects should be redressed. In addition to considering the treatment of poverty as a constitutional category, we will survey the legal landscape of specific policy sectors: income support, housing, health care, education, and criminal justice. We will also scrutinize governmental and business practices that victimize and exploit low income people and investigate how such practices can be subjected to legal challenge and legislative or regulatory correction. The course will interrogate how political and ideological forces have shaped the law's understanding of poverty and will conclude by exploring anti-poverty activism, particularly the efforts of the poor themselves, and the law reform initiatives associated with such campaigns. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Portfolio of response papers. Form of Grade: Letter.

LAWS 771 - Interviewing, Counseling and Negotiation (3 Credits)
This course provides an introduction to interviewing, negotiation, and counseling in a variety of legal contexts. Emphasis is placed on helping students improve those skills which are essential to accomplish these tasks competently, particularly problem-solving skills. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Simulations; out of class assignments; final examination Form of Grade: Letter Grade.

LAWS 777 - Legal Ethics (2 Credits)
Students enrolled in this course must have completed at least one more advanced course in the law school. Graduation Requirement: This course satisfies the experiential course graduation requirement. Basis of Grade: Final examination and weekly quizzes. Form of Grade: Letter.

LAWS 778 - Clinic (3 Credits)
This course is an introduction to working in legal clinics and practice settings and provides a basis for the student to select a particular subject area for the completion of the Clinical Experience Requirement. Grade: Satisfactory/Unsatisfactory.

LAWS 780 - Internship (3 Credits)
This course is designed to provide an opportunity for a student to participate in legal work in a non-profit organization. Grade: Satisfactory/Unsatisfactory.

LAWS 784 - Bolten Internship Program (3 Credits)
This course provides practical exposure to the legislative process. Practical exposure to the legislative process will be gained through guest lecturers. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Final examination and weekly quizzes. Form of Grade: Letter.

LAWS 785 - Clinic (3 Credits)
This course is an introduction to working in legal clinics and practice settings and provides a basis for the student to select a particular subject area for the completion of the Clinical Experience Requirement. Grade: Satisfactory/Unsatisfactory.

LAWS 786 - Clinic (3 Credits)
This course is an introduction to working in legal clinics and practice settings and provides a basis for the student to select a particular subject area for the completion of the Clinical Experience Requirement. Grade: Satisfactory/Unsatisfactory.

LAWS 787 - Clinic (3 Credits)
This course is an introduction to working in legal clinics and practice settings and provides a basis for the student to select a particular subject area for the completion of the Clinical Experience Requirement. Grade: Satisfactory/Unsatisfactory.

LAWS 788 - Clinic (3 Credits)
This course is an introduction to working in legal clinics and practice settings and provides a basis for the student to select a particular subject area for the completion of the Clinical Experience Requirement. Grade: Satisfactory/Unsatisfactory.

LAWS 789 - Clinic (3 Credits)
This course is an introduction to working in legal clinics and practice settings and provides a basis for the student to select a particular subject area for the completion of the Clinical Experience Requirement. Grade: Satisfactory/Unsatisfactory.
LAWS 772 - Juvenile Justice Clinic (6 Credits)
The clinic will afford participating students an opportunity to gain first-hand, closely supervised training and experience in the representation of real clients and the practice of the arts/skills of litigation planning, client counseling, fact development, negotiating, and courtroom advocacy. The vehicle for such training and experience is the planning, preparation and presentation of the legal defense of juveniles in cases involving allegations of delinquent (i.e. criminal) conduct, including pre-trial issues, guilt or innocence, and disposition (i.e. sentencing) advocacy. All casework will be done under the supervision of a clinical professor. Registration: Subject to Client Contact Clinic Lottery. This course satisfies the Children’s Law Concentration requirement. Students must be available to meet with clients Monday through Friday. Court hearings are most likely scheduled for Tuesdays and Wednesdays. Effective as of Fall 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Performance on casework and participation in class discussions. Form of Grade: Letter
Prerequisites: LAWS 671 and LAWS 554 or LAWS 555.

LAWS 774 - Mergers and Acquisitions (3 Credits)
This is an advanced course intended for students with a particular interest in business law on the national level. It will address applicable federal and state law (principally that of Delaware) relating to business combinations, both friendly and contested. Included will be coverage of asset acquisitions, mergers, leveraged buyouts, takeover defenses, directors’ duties, and tax and accounting rules peculiar to merger and acquisition activity, among other matters. Basis of Grade: Final examination. Form of Grade: Letter Grade. Basis of Grade: Performance on casework and participation in class discussions. Form of Grade: Letter
Prerequisites: LAWS 609.

LAWS 775 - Law and Literature (2 Credits)
This course explores the intersection of law and literature, with particular emphasis on the conceptual and cultural transmission of moral and legal concepts through literary and legal texts. Exploring works of moral and political theory, literary works, and legal cases, this course will examine themes such as the rule of law, justice, obedience, authority, power, duty, guilt, punishment and redemption. Readings will include works by Arendt, Kafka, Kleist, Melville, Camus, Plato, Faulkner, and others. It does not satisfy the graduation writing requirement. Basis of Grade: Final examination or paper. Form of Grade: Letter Grade. Prerequisite: None.
Prerequisites: None Note: This course qualifies as a perspective course. None.

LAWS 776 - International Business Structures (2 Credits)
A consideration of legal structures used by US businesses to undertake business outside the US and by foreign entities doing business in the US. The course uses case studies to examine tax and other legal reasons for choosing particular corporate and other business structures. Students will consider the strengths and weaknesses of various structures that are used in international business activities involving the trade of goods, technology and services (both outbound from the US and inbound to the US). Basis of Grade: Participation, Papers. Form of Grade: Letter.
Prerequisites: LAWS 633, 609.

LAWS 777 - Sports Law (2 Credits)
Through the use of problems, the Sports Law examines the issues of amateur and professional sports. Particular attention will be given to negotiation and arbitration as they relate to contract formation and as to dispute settlement techniques. Basis of Grade: Exam. Form of Grade: Letter.

LAWS 778 - Entertainment Law (2 Credits)
The course will examine the business and legal principles among several entertainment areas including music, film, television, and literary publishing. Although fundamental copyright issues will be touched on, the course will emphasize the practical aspects of legal representation of individuals, entities, and ideas in the entertainment business. Basis of Grade: Final examination. Form of Grade: Letter Grade.

LAWS 780 - Comparative Law (3 Credits)
This course is an introduction to comparative legal study, and will cover the common law and civil law traditions, as well as Islamic law, Asian legal traditions, informal law, and mixed legal systems. The course also covers various methodological and theoretical approaches to comparative law, and the history and culture influencing the evolution of various legal systems. The course will go into some detail on the procedural and substantive aspects of different areas of law in various legal traditions, including constitutional law, criminal law, contract law, and family law. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Final exam or paper. Form of Grade: Letter.

LAWS 781 - Gender-Based Violence Seminar (2,3 Credits)
This course will explore U.S. and international legal responses to gender-based violence. Through classroom discussion, assigned readings and multi-media materials, and in-depth exploration of student-selected paper topics, the course will examine social constructions of gender and their relationship to violence, as well as the historical and contemporary treatment of multiple forms of gender-based violence under the law, such as trafficking, forced marriage, intimate partner violence, rape, sexual harassment, sexual violence within armed conflict, and ritualized practices. Graduation Requirement: This course satisfies the perspective course graduation requirement, and it satisfies the writing course graduation requirement, if taken for 3 credit hours, must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Students will write one 15-20 page paper if they enroll for 2 credits or 30-50 page paper if they enroll for 3 credits. All students will submit one substantial draft and give a brief presentation of the paper during in-class workshops. Students will be graded on their first drafts, workshop preparation and performance, final papers, participation in class discussions and workshops, and completion of written responses to discussion questions. Form of Grade: Letter.

LAWS 782 - Race and the Law (2,3 Credits)
This course offers an overview of how race has been treated in American law, emphasizing both a historical perspective and current legal issues. This course examines the historical treatment of African-Americans, Native Americans, Asian Americans, and Hispanics. The historical discussion includes an examination of slavery and the post-Civil War amendments. The course surveys many current legal issues impacted by race, including the desegregation of schools, affirmative action, racial justice in criminal law, voting rights, and employment discrimination. Graduation Requirement: This course satisfies the perspective course graduation requirement. It may be taken for 3 credit hours to satisfy the graduation writing requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Student’s choice of research paper or series of reading response papers, and class participation. Form of Grade: Letter.

Prerequisites: None.
LAWS 783 - Law and Urban/Rural Divide (2 Credits)
This seminar takes an in-depth look at the segment of the country known as "Rural America" through a law and policy lens. The purpose of the course is to provide students with an understanding of how law, policy, and place interact both in a theoretical sense and in ways that affect legal practitioners. Students will critically analyze the differences between "urban" and "rural" places, with a focus on local government, criminal, and land use law, access to justice, and socioeconomic issues such as class, race, and livelihoods. Students will also develop a deeper understanding of the historical laws and policies that shaped modern rural America, as well as current rural policy challenges, such as the opioid crisis. The last segment of the course will involve examination of case studies that illustrate the issues covered in the course, potentially to include disputes between ranchers and federal agencies in the West and the criminal trials of members of the Bundy family. Graduation Requirement: This course satisfies the perspective course graduation requirement. Form of Grade: Letter. Basis of Grade: Final examination. Form of Grade: Letter. Basis of Grade: Class Participation, Paper(s).
Prerequisites: None.

LAWS 784 - Transnational Law (3 Credits)
A survey course focusing on the actors, sources, and principles of international or transnational law. The transnational law course introduces students to the basic contours of public international law, private international law, domestic (U.S.) law on international issues, supranational law, and comparative law, with a particular focus on the former three categories. The course will provide foundations for further in-depth study in any of these areas and will also provide ample background in these concepts for students who may only take one international law course during their law school careers. Graduation Requirement: The course satisfies the perspective course graduation requirement. Basis of Grade: Final examination. Form of Grade: Letter. Grade. 
Prerequisites: None.

LAWS 786 - Seminar on Restorative and Transformative Justice (3 Credits)
In this course, students will learn about the concepts of restorative justice and transformative justice, how they developed from various systems of justice around the world, how they have been implemented in the United States, and how and when restorative justice can become transformative justice. Students will be expected to think critically about what existing state-centered justice systems achieve (versus what they purport to achieve), how restorative and transformative justice compare with such systems, and to what extent any of these systems further justice. Particular attention will be paid to various forms of implementation, and students will be asked to consider how and when restorative justice should be implemented. At the end of the course, students will have an understanding about what the terms restorative justice and transformative justice mean, why such forms of justice are being promoted as an alternative to the existing criminal justice system, and how to develop restorative and transformative justice processes. Graduation Requirement: Course satisfies the perspective course graduation requirement. Basis of Grade: In-class participation and assignments, final project. Form of Grade: Letter.

LAWS 790 - English Legal History (2 Credits)
The history of the development of English legal institutions, such as the courts and the jury system, and the evolution of the common law, up to the time of the American Revolution. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Exam. Form of Grade: Letter.

LAWS 791 - Judicial Externship (4 Credits)
Students will work approximately 210-245 hours (30-35 hours per week) with either a state or federal judge. They will be exposed to the work of the federal or state judiciary by working with the judge and the law clerk. Typically, the student will have the opportunity to observe court proceedings and conferences in chambers with the guidance of the supervising judge. The student may also assist the judge and the law clerk in research and drafting documents such as bench memoranda, jury instructions, and opinions. In addition to their work at the court, students will meet periodically with a faculty member to reflect upon their fieldwork experiences. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Students must submit a contemporaneously maintained daily journal of their experience, along with either an example of a written product prepared during the externship or a short paper reflecting on a professional aspect of the experience. The fieldwork supervisor will also complete an evaluation of the student’s performance. Evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the faculty member that all requirements of the externship have been satisfactorily completed. Form of Grade: - Letter. 
Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 791A - Judicial Externship (2 Credits)
Students will work approximately 8-15 hours per week with either a state or federal judge. They will be exposed to the work of the federal or state judiciary by working with the judge and the law clerk. Typically, the student will have the opportunity to observe court proceedings and conferences in chambers with the guidance of the supervising judge. The student may also assist the judge and the law clerk in research and drafting documents such as bench memoranda, jury instructions, and opinions. In addition to their work at the court, students will meet periodically with a faculty member to reflect upon their fieldwork experiences. Graduation Requirement: This course satisfies experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Students must submit a contemporaneously maintained daily journal of their experience, along with either an example of a written product prepared during the externship or a short paper reflecting on a professional aspect of the experience. The fieldwork supervisor will also complete an evaluation of the student’s performance. Evaluation submitted by the fieldwork supervisor, the quality of the student’s written submissions, participation in the class sessions, and a determination by the faculty member that all requirements of the externship have been satisfactorily completed. Form of Grade: - Letter. 
Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 792 - American Legal History (3 Credits)
This course is a survey of American law, tracing the developments between the colonial period and the present day. The thematic element is that of change – asking how societal changes have affected the law, and, conversely, how the law has changed society. The discussions will also consider the times when the law did not play role in substantial change. As with any survey course, the course proceeds rapidly, allowing coverage of roughly four centuries in a single semester. There will, however, be stopping points, especially when the relationship between law and society seems especially contentious. The course will include both public and private law, offering multiple opportunities for inquiry about change. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Final examination, plus contributions to class discussion. Form of Grade: Letter.

LAWS 793 - Public Ethics Law (2 Credits)
LAWS 794 - Intersection of Health Law and Technology (2 Credits)
Innovations in technology are continually reshaping the field of medicine - and the law, in turn, plays a significant role in shaping and enabling those innovations. Sometimes the role of the law is to fund or otherwise incentivize these technologies; other times, it is to regulate or even prohibit them. In each instance, the law plays an important role in shaping the future of medicine. This course will examine the many ways that the law intervenes in the development and implementation of medical technologies, with a particular focus on federal law. It will include an examination of how federal law regulates and interacts with medical technologies such as: health information technology, telemedicine, and the development of new drugs. Looking at these and other issues, we will examine the conflicting social goals and values that often emerge when a new medical technology becomes possible - and we will examine the ways, both successful and unsuccessful, that the law has attempted to manage these tensions. Basis of Grade: Class participation, final paper. As part of the class participation grade, students will be expected to briefly introduce and initiate class discussion on one topic during the semester. Form of Grade: Letter.

LAWS 795 - Election Law (2 Credits)
This course provides a broad introduction to the substantive law governing campaigns and elections. It focuses specifically on the election process beginning with the nomination of candidates, the campaign for office, voting, and election protests and challenges. The course will also highlight legal issues in redistricting after a census. The course also covers the intersection of election law with campaign regulations. Students will gain practical insights into the handling of disputes arising out of the election process. Basis of Grade: Final Exam and Class Participation Form of Grade: Letter

LAWS 796 - Statutory Interpretation (1 Credit)
This course will examine the theories and techniques by which courts determine the meaning and application of statutes. Techniques explored will include the "plain meaning rule", textual and other indicators of legislative intent, the significance of legislative history, the canons of statutory construction, and deference to administrative interpretation. Basis of Grade: Final examination. Form of Grade: Letter. Prerequisites: None.

LAWS 797 - Juvenile Justice (2,3 Credits)
The course will examine a range of juvenile justice policy issues. Topics will include: quality of and access to counsel for youth in delinquency cases, systemic racial and ethnic disparities, overincarceration of youth, the role of schools as feeders to the juvenile justice system, and transfer of youth to the adult criminal justice system. The course will also examine social science related to adolescent development. Graduation Requirement: This course satisfies the perspective course graduation requirement. This course also will satisfy the writing course graduation requirement, if taken for 3 credit hours, must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Paper. Form of Grade: Letter.

LAWS 798 - Death Penalty Seminar (3 Credits)
A survey of the history, law, and policy underlying the capital punishment system in the US. Topics will include the eligibility of offenders and offenses for the possibility of death, procedural issues in death sentencing, and methods of execution. Graduation Requirement: This course satisfies the graduation writing requirement. Must earn a grade of C or better. Basis of Grade: Paper. Form of Grade: Letter. Prerequisites: None.

LAWS 799A - Tort Theory Seminar (2 Credits)
The seminar addresses the relationship between tort theory and doctrine. Though one focus of the seminar is on the role in tort law doctrine of control of people or property, students will be given latitude in selecting a paper topic in terms of tort law doctrine to be addressed and theoretical framework to be used. Students may focus on the South Carolina law on the chosen topic or address the "national" law on the topic. Where appropriate, proposals for changing doctrines should be included. Registration: Class will not meet regularly during the middle of the semester while students are writing their papers. During the final part of the semester, students will present their papers to the class. Graduation Requirement: Satisfies the perspective course graduation requirement. Basis of Grade: Paper, presentation, and class participation. Form of Grade: Letter.

LAWS 800 - Comparative Legal Institutions (1.5 Credits)
This course is designed to demonstrate to our students the origins of our own justice system and the manner in which the English tri-partite governmental polity, which so strongly resembles our own, is significantly different in professional training, law formation, and the interaction among the executive, legislative, and judicial sectors. Registration: Students are also required to enroll in the other London program course. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Participation and exam. Form of Grade: Letter grade.

LAWS 801 - Comparative Environmental Law (2.5 Credits)
This course will examine European environmental law, comparing and contrasting the character and development of legal and policy responses to the problems created by industrial society in Europe with those created to address similar problems in the US. Specific topics may include regulation of greenhouse gas emissions, oil and gas extraction, and production and disposal of toxic materials. The course will also examine the influence of structural features of European law, such as the precautionary principle and multi-layer federalism. Registration: Students must also enroll in the other London program course. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Participation and exam. Form of Grade: Letter.

LAWS 802 - Taxation of Property Transactions (3 Credits)
Taxation of Property Transactions is the second step in a course progression from Income Tax to upper level tax courses such as Corporate Tax and Partnership Tax. The course will build upon the foundation established in Income Tax, delving into more complex tax provisions and concepts that govern a wide variety of property transactions, including topics such as: treatment of capital assets, anti-abuse doctrines, installment sale rules, like-kind exchanges, deferred payment sales, cost recovery mechanisms, loss limitations, and sale/lease back arrangements. The course will appeal to students interested in real estate practice, as well as those interested in continuing tax studies. In addition to broadening students' knowledge of tax law doctrine, the course will also enable them to continue to develop their statutory interpretation and advocacy skills. Basis of grade: Class participation (10%), a midterm question (10%), and a final exam (80%). Form of grade: Letter grade Prerequisites: LAWS 633.
LAWS 803 - Women and the Law (3 Credits)
This course will address how the legal system has constructed and applied notions of gender and gender equality. It will introduce students to significant contemporary legal scholarship on the status of women in modern America, and will explore how gender affects legal relationships including some consideration of employment. The materials will include sexual harassment, domestic violence, and domestic relations disputes. Graduation Requirement: This course satisfies perspective course graduation requirement. Students who have taken LAWS 624 may register for this course. Basis of Grade: Written exercises. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 804 - Environmental Advocacy Seminar (3 Credits)
This course explores and develops practical advocacy skills in the area of environmental representation. Topics include: case planning; administrative, legislative, and litigation practice; policy development; settlement/negotiation; remedies; ethical considerations and effective communication between lawyers and environmental scientists, engineers, and other professionals. In order to facilitate meaningful learning regarding all aspects of advocacy, the course relies heavily on simulations, guest lecturers from lawyers and non-lawyers, and collaborative work. This course is required for students participating in the Environmental Law Clinic, but is open to non-clinical law students as well as graduate students from other schools in the university-wide School of the Environment. Registration: LAWS 731 is recommended. Graduation Requirement: This course satisfies the perspective course graduation requirement and the writing course graduation requirement. This course satisfies the skills course graduation requirement. Basis of Grade: Paper, performance on simulations and class participation Form of Grade: Letter Grade.

LAWS 805 - Environmental Law Clinic (6 Credits)
The Environmental Law Clinic is one of two transactional clinical offerings at the School of Law. Students in this clinic will learn transferable legal skills advising organizational entities on complex environmental and land use matters. Students will interview and counsel their clients, take a leadership role to strategize on addressing client needs, conduct factual investigations and legal research, and draft legal documents. Substantive matters in the past have involved green space, forest, and agricultural conservation, regional water planning, carbon cap-and-trade programs, local government law, and federal environmental law. Matters have also involved contract-drafting, ordinance review, and other forms of legal analysis. Clients are either non-profit organizations or public entities working on environmental matters in the public interest. Registration: LAWS 731 and LAWS 709 recommended. Subject to Client Contact Clinic Lottery. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Student grades will be based upon quality of interactions with and services provided to clients, including communication, interviews, work products, counseling, and other tasks (60%); case participation, including active and prepared contributions to seminar and case rounds and the timely completion of assignments (20%); and professionalism and adherence to clinic procedures/professional practice rules, including the ability to work with teammates and supervisors, as well as responsiveness to feedback (20%). Form of Grade: Letter Grade.
Prerequisite or Corequisite: LAWS 554 or LAWS 555.

LAWS 806 - Cyberlaw (2,3 Credits)
This course explores the governance of activity in cyberspace. The course is designed to foster critical thinking in evaluating whether established norms in the physical world should govern virtual activity in the cyber world. Subjects of study include spatial property rights on websites, legal actions in virtual worlds, cybersquatting on domain names, constitutional rights in cyber-speech, copyright enforcement of file-sharing, and virtual contract formation. Graduation Requirement: Students who elect to take this course for three (3) credits will write a paper that meets the writing requirement. Basis of Grade: Students who elect the 3 credit option will write a paper that fulfills graduation requirements. Students that elect 2 credits will have other written assignments. Form of Grade: Letter.

LAWS 807 - Business Torts (2 Credits)
A review of various business torts with an emphasis on liability arising from the theft of prosecution and defense of business torts, and will involve a number of practical case studies which will require students to determine how to counsel clients, advocate positions, develop policies and procedures and refine litigation strategies. Basis of Grade: Final Exam. Form of Grade: Letter.

LAWS 808 - Writing in Law Practice (3 Credits)
This course will simulate a law firm setting in which enrolled students will work as junior associates in the law firm representing the plaintiff or the law firm representing the defendant. Students will handle a case from the time the client seeks legal advice from the firm until the case is ready for trial. This course will expose students to the drafting skills private practice lawyers need to handle a case in the course of civil litigation. Specifically, students will (1) build on writing and research skills learned in the first year; (2) express legal analysis clearly in both written and oral communications; (3) critically examine information in its original form and discern information relevant to the litigation; (4) make strategic decisions about litigation based on the client's expressed goals, the facts of the case, and the law; (5) cooperate with other small group members to produce a final, written document and to orally advise the supervising attorney on the status of the pending litigation; and (6) practice the interpersonal skills needed to work cooperatively and collegially with attorney colleagues, opposing counsel, and support staff. Graduation Requirement: Students taking this course may elect to satisfy either the graduation writing requirement or the skills course graduation requirement, but not both. Basis of Grade: Written assignments. Form of Grade: Letter.

LAWS 809 - CAPSTONE COURSE: Civil Litigation (5 Credits)
Students will be divided into two “law firms” and serve as “associates” in the law firms. The assignments will focus on the pretrial aspect of a civil litigation. Students will have an initial client meeting, write a research memo to the client, draft pleadings, draft and argue motions, prepare discovery requests and answers, take depositions, and hire and prepare witnesses for a deposition. In the course of these exercises students will confront problems dealing with choosing the proper parties, identifying the proper jurisdiction for the litigation, settling discovery disputes, and calculating damages. Registration: Limited to 3Ls. Students are limited to enrolling into one Capstone course. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Written and oral assignments. Form of Grade: Letter.
Prerequisites: LAWS 554 or LAWS 555, LAWS 671.

LAWS 810 - Comparative UK/US Negligence Law (2 Credits)
TBD
LAWS 815 - Rule of Law Seminar (3 Credits)
This course will review key components of rule of law programs undertaken by the United States and the international community in post-conflict, transitional, and developing states. The course will consider the theories, goals, and effectiveness of rule of law programming. Class discussion will involve critical analysis of the strategies and methodologies relating to some of the key components of rule of law programming, such as: constitutional development, judicial reform, accountability for atrocities, alleviation of corruption, use of local customary law, and resolution of land and property disputes. Readings will include scholarly analyses and case studies of rule of law programs in various countries. Graduation Requirement: This course satisfies the perspective course graduation requirement and the writing course graduation requirement. Must earn a grade of C or better. Basis of Grade: Class participation and student’s choice of research paper or series of response papers. Form of Grade: Letter.

LAWS 816 - Introduction to Environmental Law and Policy (1 Credit)
Intensive one-credit course on certain basics of environmental law and policy. The course will cover: relevant history of environmental law and policy; fundamental statutory, regulatory and case law as well as other authorities in the environmental field; an overview of the relevant federal agencies; and a case study. We will use a combination of interrelated classroom work, discussion, presentations, video and web access, reading, and a simulation to explore environmental law and policy. This course is neither a substitute nor a prerequisite for the more in-depth Federal Environmental Law course. Registration: Required for students in the JD/MELP program. Basis of Grade: Final examination. Form of Grade: Letter. Prerequisite: None.

LAWS 817 - International Criminal Law (3 Credits)
This course focuses on individual criminal responsibility for aggression (crimes against peace), offenses against the law of war (humanitarian law), and grave human rights abuses (genocide and crimes against humanity) in the modern era. The course will explore the development of extra-territorial and international jurisdiction over criminal suspects of non-consenting states in the post World War II era. We will examine the work of the Nuremberg Tribunal and the International Military Tribunal for the Far East, ad hoc United Nations tribunals including the International Criminal Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda, the International Criminal Court, and prosecutions in the national systems of various states including the U.S. We will pay close attention to enforcement of the United Nations Charter and the Geneva Conventions. The course will also explore cutting edge contemporary issues such as resistance to I.C.C. authority, the legality of forceful humanitarian intervention absent Security Council authorization, detention and interrogation of combatants, and (time permitting) problems associated with new methods of warfare, including the use of unmanned drones and suicide bombers. The course is designed to help students develop a sophisticated appreciation of criminal theory and the structure of criminal law. Registration: LAWS 784 is helpful, but is not required, and students without a prior background in LAWS 666 have frequently earned top grades in this course. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Examination. Form of Grade: Letter. Prerequisites: LAWS 524.
LAWS 819 - Regulation of the Financial Sector and Money (3 Credits)
The American financial system is among the most sophisticated in the 
world, but has been undergoing rapid change since the early 1980s. The 
course has four goals and is targeted primarily at students interested 
in the Charlotte practice or JD/MBA students (Charlotte now being 
the second largest banking center in the United States). The first is to 
introduce you to the regulatory structure(s) that in 
many ways reflect compromises cobbled together following different 
financial sector crises since the early 1980s, and are still subject to lively 
debate. The second goal is to introduce you to the current regulatory structure(s) that in 
many ways reflect compromises cobbled together following different 
financial sector crises since the early 1980s, and are still subject to lively 
debate. The third goal is to introduce you to the on-going changes in 
financial sector and the more likely prospective regulatory responses, 
because it seems highly likely that change shall continue. The hidden 
fourth aspect is that much of financial sector regulation is undertaken by 
independent regulatory agencies (such as the Federal Reserve, FDIC 
or SEC), rather than directly under statute, so that the changes for the 
past 25+ years typically are either foreshadowed or reflected more in 
regulation and administrative actions, rather than in legislation. So you 
have to understand how the regulatory agencies work because they 
create and apply most of the applicable law in the form of regulation. 
Basis of Grade: Drafting legal and regulatory documents for use in the 
regulation process, in teams. Form of Grade: Letter Grade. Corequisite: 
LAWS 609. 
Prerequisites: None.

LAWS 820 - Religious Legal Systems: Jewish Law (2 Credits)
The course presents the basic features of the Jewish legal system and 
a number of points of comparison to American law. The first half of the 
course will provide an historical and literary conspectus to Jewish Law by 
examining the eternal question of the appropriate remedies for personal 
injuries. Specific topics covered include: the Biblical Law of Injury; 
Biblical Methods of Resolving Disputes (including references to the New 
Testament); and the Rabbinic Law of Injuries. This will be followed by 
several class hours devoted to the laws of marriage. The remaining class 
sessions will examine the process used to reach religious legal decisions 
from three modern perspectives, including decisions concerning Sex 
and Family Life. These discussions should help you see how the Jewish 
legal tradition is being applied in modern times by different groups within 
the Jewish community. The comparative study of another legal system 
can be an important part of learning about one’s own system. A religious 
legal system is especially useful for comparative purposes. Its religious 
roots feed a set of assumptions about the nature of humanity and of 
the law considerably different from those of a self-consciously secular 
system like American law. All class materials are in English and it is 
assumed that students have no special background or familiarity with 
the materials. Students of all religious, racial, or ethnic backgrounds 
are encouraged to enroll in this course. The comparative focus of this 
course puts all students on a level plane at the beginning, with perhaps 
a minor advantage for those who have studied some philosophy in 
their undergraduate training. Graduation Requirement: This course 
satisfies perspective course graduation requirement. Basis of Grade: 
Final examination and class participation. Form of Grade: Letter Grade. 
Prerequisites: None.

LAWS 823 - Religion and the Constitution (2 Credits)
This course will: (1) review seminal Supreme Court precedents 
addressing the free exercise of religion and the Establishment Clause; 
(2) introduce students to influential scholarship addressing the Religion 
Clauses; and (3) analyze important contemporary controversies involving 
both the interpretation of the Religion Clauses and the challenge of 
integrating other constitutional guarantees with the protection of 
religious liberty and freedom of conscience. The course will also have a 
comparative component in which American constitutional approaches to 
questions such as the manifestation of religious identity, the role of 
religion in civic ceremonies, and the relationship between government 
and religious institutions as well as the relationship between civil and 
religious law will be juxtaposed with the legal experience of other nations. 
Basis of Grade: Either a final examination or three writing assignments, at 
the discretion of the professor. Form of Grade: Letter. 
Prerequisites: None.

LAWS 825 - Medical Legal Partnership Clinic (6 Credits)
LAWS 826 - Energy Law (3 Credits)
This course provides an introduction to the law and regulation of energy 
resources, primarily in the United States, focused on three core areas 
within the field. The first part of the course will cover extraction of 
energy resources, primarily coal, oil, and natural gas. The second part 
will cover regulation of the electricity generation and distribution system, 
including public utility and rate regulation, transmission, and relevant 
environmental regulations. The final part of the course will address legal 
and regulatory issues specific to nuclear and renewable energy, with a 
particular focus on the Southeast. Throughout, the course will focus 
on the ability (or inability) of legal and regulatory regimes to keep pace 
with rapid change in the energy sector. Registration: LAWS 731 and 709 
are recommended. Basis of Grade: In-class exam. Form of Grade: Letter 
Grade. 

LAWS 828 - SC Administrative Law (2 Credits)
This course provides an overview of practice and procedure before 
administrative agencies in South Carolina. It will introduce administrative 
law concepts such as notice and due process, rulemaking, the South 
Carolina Administrative Procedure Act, and associated case law, 
as well as provide a survey of state agencies, their jurisdiction, and 
specific agency statutes such as the Revenue Procedures Act. Practical 
information on practice and procedure before adjudicative administrative 
and regulatory bodies such as the Administrative Law Court will be an integral part of the 
course. Registration: Students may take both this course and LAWS 709. 
This course does not satisfy the LAWS 709 requirement of Vermont Law 
School for students in the dual-degree program. Basis of Grade: Final 
examination. Form of Grade: Letter Grade. 
Prerequisites: None.

LAWS 829 - Veterans' Rights Advocacy Seminar (2 Credits)
This seminar teaches practical advocacy necessary to represent the 
interests of military veterans in administrative, legislative, litigation and 
other matters. Students learn advocacy skills through interaction with 
simulated clients and decision makers. This course is a Enrollment in 
this course does not ensure later enrollment in the Veterans' Rights 
Clinic. Registration: This course does not satisfy the graduation writing 
requirement. Basis of Grade: Simulations, papers and class participation. 
Form of Grade: Letter Grade. Prerequisite: None. 
Prerequisites: for participating in the Veterans' Rights Clinic, but is not 
limited to those students. None.
LAWS 830 - Veterans Legal Clinic (6 Credits)
The Clinic will provide direct legal services to veterans with legal issues that are most likely to affect their ability to obtain or retain employment and contribute to homelessness among this population. The Clinic will help to resolve housing, debt and domestic issues that affect the client and others in the home, thereby stabilizing communities with low-income veteran populations. Students will have an opportunity to develop legal skills, including: interviewing and counseling clients, fact investigation, legal research, writing, and analysis, case strategy, negotiations, and courtroom advocacy. The course also will give students an opportunity to consider the broader context of their individual cases through class discussion and community-based projects, which may include know-your-rights presentations, limited advice and assistance clinics, and policy research. Registration: Subject to Client Contact Clinic Lottery. Effective as of FALL 2020, a student who is enrolled in or has been enrolled in a clinical course may not enroll in LAWS 771. Graduation Requirement: This course satisfies the experiential course graduation requirement, must earn a grade of C or better. Basis of Grade: Students will be graded on their performance on casework and participation in class discussions and exercises. Form of Grade: Letter Grade.**Prerequisites:** LAWS 671 and LAWS 555 OR LAWS 554.

LAWS 831 - Children and the Courts (2 Credits)
This course will address issues related to children in the courts, with particular attention to children who are in criminal or family court as witnesses (including as victims of abuse and neglect) and to children who are in family court as delinquents. Specific issues covered will include an overview of legal systems, the role of counsel in representing children, evidentiary rules, and systemic issues involving children and the courts. Graduation Requirement: This course satisfies the perspective course graduation requirement. It does not satisfy the graduation writing requirement. Basis of Grade: Final examination or paper and class participation. Form of Grade: Letter Grade.

LAWS 832 - Current Topics in Professional Responsibility Seminar (2,3 Credits)
This is a seminar focusing on current topics relating to lawyer ethics and the legal profession. It is intended for students who desire an intensive study of legal ethics. Students will be expected to take an active role in class discussions and will have input in the selection of topics for discussion. With the guidance of the professor, each student will be responsible for organizing and preparing one or more of the classes. Students will prepare short weekly papers on issues raised in class, as well as one longer paper. All papers will be posted on the class Internet discussion board. Graduation Requirement: Students who select the three-credit hour option may satisfy the graduation writing requirement. Must earn a grade of C or better. Basis of Grade: Paper. Form of Grade: Letter Grade.**Prerequisites:** LAWS 554 or 555.

LAWS 833 - The Warren Court (3 Credits)
This seminar will study the interrelated changes in law and in society, focusing on the decisions of the United States Supreme Court during Earl Warren's term as Chief Justice. The course will consider how the "Warren Court" changed constitutional law, and in turn, changed American society. Graduation Requirement: This course satisfies the perspective course graduation requirement. It does not satisfy the graduation writing requirement. Basis of Grade: Paper. Form of Grade: Letter Grade.**Prerequisites:** None.

LAWS 834 - Caretaking, the Family and the Law (2,3 Credits)
In this seminar, which will satisfy the perspective course requirement and the graduation writing requirement, students will explore how law, policy, and cultural norms shape conceptions of family and caretaking of those who cannot fully care for themselves and, conversely, how shifting cultural notions of family and caretaking affect law and policy. Throughout the course, students will also specifically consider how cultural and legal notions of privacy and gender affect the law and policy of family and caretaking. Students will analyze these ideas in a variety of legal contexts including how they impact the law of child welfare, public benefits and poverty law, public education, work, and disability. It is anticipated that the first half of the course will be spent on readings and class discussions analyzing these concepts. During this time student will also begin developing paper topics in close consultation with the professor. In the second half of the course, class time will be spent on presentations of student papers. Students will be required to read each others’ papers and will prepare questions and critiques for the presenters. Following their paper presentations, students will have the opportunity to revise their papers and submit a final draft for grading at the end of the semester. Graduation Requirement: This course satisfies the graduation perspective course requirement. This course will satisfy the graduation writing requirement if taken for three credit hours. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Students will be graded on a draft and final paper, class participation, a class presentation, and a critique of a colleague's paper and presentation. Form of Grade: Letter.

LAWS 835 - Federal Constitutional Convention (3 Credits)
This seminar will focus on the debates at the Federal Constitutional Convention of 1787, concentrating on the delegates to the Convention, their arguments during the Convention, and the compromises thought necessary to secure the Constitution's approval. Graduation Requirement: This course satisfies the perspective and writing course graduation requirements. A student taking this course may not also take LAWS 669. Basis of Grade: Paper. Form of Grade: Letter.

LAWS 836 - Consumer Bankruptcy Drafting Workshop (3 Credits)
This course provides an introduction to consumer bankruptcy law with an emphasis on drafting exercises related to practice in the subject area. Students learn basic consumer law issues, with a brief overview of relevant Bankruptcy Code sections and procedural rules. The writing component introduces students to motion practice through simulated cases. Each student must draft one client opinion letter, one demand letter, two common motions, two complaints, a supporting memorandum of law, and at least one type of discovery request. Students receive instruction in Bankruptcy research and will be expected to perform research necessary to complete the writing assignments. Previous study in bankruptcy law is not required. Students may take both this course and Bankruptcy Law. Graduation Requirement; Students taking this course may elect to satisfy either the graduation writing requirement or the skills course graduation requirement, but not both. Basis of Grade: Drafting assignments. Form of Grade: Letter Grade.**Prerequisites:** None.
LAWS 837 - Commericial Speech Seminar (3 Credits)
In Valentine v. Chrestensen, 316 U.S. 52 (1942), the United States Supreme Court said, "We are...clear that the Constitution imposes no restraint on government as respects purely commercial advertising." Since 1942, however, speech that is "commercial" has been afforded greater constitutional protection against government regulation. This seminar will explore whether commercial speech is different from other speech and whether the identity of the speaker matters in determining the extent to which commercial speech may be regulated. The course will trace the development of the "commercial speech doctrine" and seek to provoke inquiry into the consequences of providing full First Amendment protection for commercial speech. Graduation Requirement: This course satisfies the graduation writing requirement. Must earn a grade of C or better. Basis of Grade: Paper. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 838 - Federal Indian Law (2,3 Credits)
This seminar explores the basic legal principles that govern the relationship between American Indian tribes, the federal government, and the state governments. Topics covered will include jurisdictional issues arising between those governments, the source and scope of Indian sovereignty, and the recognition and enforcement of Indian land and treaty rights. Graduation Requirement: This course satisfies the perspective course graduation requirement and the writing course graduation requirement if taken for three credit hours. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Research Paper (three credit hours) or exam/paper (determined by professor) (two credit hours) Form of Grade: Letter.
Prerequisites: None.

LAWS 839 - Transnational Disputes Resolution (4 Credits)
This course is offered at Gray’s Inn in London, England. The course consists of five components: (1) Introduction and U.S. - U.K. Comparative approach (2) International Litigation, (3) International Arbitration; (4) Discovery and Investigations; and (5) Private Dispute Resolution through International Organizations. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Final examination. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 840 - Law and Social Justice Seminar (2,3 Credits)
This course explores whether and to what extent our legal system, including its law schools, perpetuates or counteracts social injustice. Many of the readings derive from modern critical legal theory, particularly critical race theory and radical feminism, and from liberal and non-liberal responses thereto. These readings primarily address the subordination of particular groups in our society and ways in which taken-for-granted legal categories -- such as objective/subjective, public/private, and negative rights/positive rights -- serve to entrench hierarchies of power and wealth. Other readings include foundational political theories and classic texts on topics such as civil disobedience and justified revolution. Graduation Requirement: This course satisfies the perspective course requirement. It may be taken for 3 credit hours and satisfaction of the graduation writing requirement with the prior permission of the instructor. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Paper. Form of Grade: Letter Grade.
Prerequisites: None.

LAWS 841 - First Amendment (2 Credits)

LAWS 845 - Race and Class in American Public Education Seminar (2,3 Credits)
Education plays a crucial role in sustaining a democratic society. As such, it is critical that we understand and are able to critique the legal and public policy choices that shape our education system. This course will explore issues of equity, access, and reform in American public education, particularly as it pertains to race and class. It will examine the right to equal educational opportunity and will consider the various state and federal legal efforts to improve K-12 education and to increase accessibility to institutions of higher education. Topics that will be discussed include, among other things, school desegregation, school finance litigation, school choice, and affirmative action. We will scrutinize a variety of reform efforts, which may include the federal government’s expanding role in education, single-sex education, magnet programs, and charter schools. We will also examine higher education admissions policies such as racial preferences, percentage plans, and reliance on standardized test scores. In addition to examining legal authority and the work of legal scholars, we will examine the writings of historians, social scientists, and education policy experts. Graduation Requirement: This course satisfies the perspectives course requirement. Students who elect to take this course for three (3) credits will write a paper that meets the writing requirement. Must earn a grade of C or better if taken for the writing requirement. Basis of Grade: Paper(s). Form of Grade: Letter.

LAWS 847 - Ethical Issues in Criminal Practice (2 Credits)
This workshop will study the ethical issues faced by prosecutors and defense counsel in criminal practice. Although many of the same Rules of Professional Conduct that govern civil litigation also apply to criminal cases, constitutional rights and duties often require that they be applied differently than in civil cases. In addition, there are particular provisions in the Rules of Professional Conduct that only apply in criminal cases, including the rules governing prosecutors. Our understanding of the special role of the prosecutor and the prosecutor’s duty to seek justice may create prosecutorial duties, as do constitutional rights of persons accused of crime and constitutional duties of, and restraints upon, the government. The workshop will meet once a week for two hours. Students will read assigned laws, rules, cases, and analytical materials and will discuss those readings in class. In addition, the class will study cases that illustrate the problems — and often the injustice — that may flow from violations of the applicable Rules of Professional Conduct and constitutional mandates. Experienced prosecutors, defense attorneys, and judges will share their experiences and insights with the class. Written assignments will be based on the kinds of issues lawyers face in criminal practice and the types of work product lawyers have to create in dealing with those issues in their practice. Basis of Grade: Class participation and written projects. Form of Grade: Letter.
Prerequisites: LAWS 554 or 555.
LAWS 849 - The Great Recession of 2008: Statutory Background and Legislative Response (3 Credits)

Like many people who rely on a 401K plan for retirement, I have taken a personal interest in the "Great Recession of 2008." The students at the law school lived through the Great Recession and are currently facing a diminished job market as a result of its effects. Some economists project that the careers of those now entering the workforce will be permanently impacted by the near-collapse of the banking system in October of 2008. I have read a number of books on the causes of the Great Recession, most by economists or financial journalists. All of the books refer to the statutory background as a cause of the credit collapse, but none of them ever quote or analyze the statutory material at length. None are really satisfactory from the lawyer's point of view. Lawyers should read the statutes before drawing conclusions about the causes of the Great Recession. This seminar would require all the students to read Charles Gasparino, The Sellout: How Wall Street Greed and Government Mismanagement Destroyed America's Global Financial System (2009). Other reading assignments would be made from the attached Bibliography. The out-of-class readings would be supplemented by an in-class review of the statutory basis of the banking and home mortgage industries, including the major U.S. Banking laws, the enabling statutes of the Federal Reserve, the FDIC, Glass-Steagall Act of 1933, Gramm-Leach Billey Act of 1999 (which repealed Glass-Steagall), the Community Reinvestment Act of 1977, and the authorizing acts for the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Federal National Mortgage Association (Fanny Mae), and regulation of the bond, futures, derivative, and Credit Default Swap markets. In-class presentations would also cover the economic events that pre-cipitated the statutory schemes in place as of 2008, e.g., the Panic of 1907, the Great Depression, the Savings and Loan crises of the 1980's, the dot.com bubble, and the collapse of Long Term Capital Management. The class would also look at the key features of the Dodd-Frank Act to see whether those changes really addressed the Recession's underlying causes. Basis of Grade: 30 page paper and class presentations. Form of Grade: Letter.

Prerequisites: LAWS 652.

LAWS 850 - Government Regulation of Businesses (3 Credits)

This course surveys the legal, economic and policy framework that governs American business. In doing so, it examines the core principles that guide our economy and, against the backdrop of the proposition that non-regulated markets are generally preferred, introduces a number or areas of regulation, including antitrust, securities, environmental, patents, health-care, advertising/information and consumer protection. We will critically examine economic rationales, legal ground rules and regulatory models. One objective will be to gain a good understanding of how government intervention has actually played out in selected markets and why. We will also examine markets that, though once regulated, have since been deregulated. Basis of Grade: Final exam and class participation. Form of Grade: Letter.

LAWS 853 - Real Estate Transactions Capstone (5 Credits)

This course is designed to be a Capstone course for third year (3L) students interested in an in-depth, practical and advanced course in real estate law and real estate finance. Students will be participate in simulated experiences throughout the semester, and will end the semester negotiating a real estate development deal. The course will explore land development, real estate finance, foreclosures and receiverships and the development of real estate projects such as condominium, office and retail facilities. The focus will be on real estate commercial transactions in South Carolina, but will have general applicability to real estate transactions in other jurisdictions, as well as general application to residential real estate transactions. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: Assigned exercises and class participation. Form of Grade: Letter.

Prerequisites: None.

LAWS 856 - Public Law and Leadership (2 Credits)

The goal of the Public Law & Leadership Course is to give students a hands-on opportunity to develop skills and exercise leadership in the public arena through service to actual clients. Working in teams, students will tackle public law and policy problems posed by nonprofit organizations. In this structured interaction with “real-life” clients, students will have an opportunity to experience the interconnection between leadership and lawyering skills. Basis of Grade: Class participation, assignments and team client memorandum and presentation. Form of Grade: Letter.

LAWS 857 - The American War on Terror: The U.S., Counter-Terrorism and International Law (2 Credits)

The focus of this course will be on the United States policies and practices in response to the events that occurred on its territory on September 11, 2001. The course will be unique in that it will examine the approaches of both the Bush and Obama Administrations, as foretold through the principles of international law: to this end, we shall consider the legal arguments put forward by both of these governments for the recourse to force (jus ad bellum) and for the conduct of hostilities (jus in bello), and of the changing significance of the “war on terror” in the rhetoric from September 11, 2001, until the present day. Not only shall we explore the legal questions surrounding the military engagements of the United States in Afghanistan (2001) and Iraq (2003), but, also, with respect to its presences in Yemen, Somalia and Pakistan. Candidates shall be encouraged to adopt a critical understanding of the rules of warfare as applied to evolving forms of combat (e.g. drone activity, suicide bombings, targeted killings) as well as explore the traditional modes of regulating prisoners-of-war and the protection of civilians both in the United States and beyond. Firm emphasis shall be placed on historical examples for class exercises, but candidates will also be called upon to question the relevance of these analogies as well as test other possibilities for how best the prosecution of the “war on terror” can occur today and in the future. Registration: LAWS 784 is recommended. Graduation Requirement: This course satisfies the perspective course graduation requirement. Basis of Grade: Examination. Form of Grade: Letter.

Prerequisites: None.
LAWS 859 - Federal Criminal Practice Capstone (4 Credits)
This simulation course is for third year (3L) students interested in the practice of criminal law. During the semester, students will apply the knowledge and skills learned in prior law school courses by simulating the litigation of a federal criminal case beginning with the investigative and grand jury phases; through charging, pre-trial, and plea proceedings; and ending with sentencing and appeal. Students will: (1) prepare prosecution memoranda and indictments; (2) conduct mock grand jury sessions; (3) prepare or respond to motions to suppress evidence; (4) argue suppression motions; (5) conduct sentencing guideline calculations and prepare sentencing memorandum; and (6) file a notice of appeal. Students will also have an opportunity to observe actual federal court criminal proceedings; and gain practical insight from prosecutors, law enforcement officials, members of the criminal defense bar, and judges, who will serve as guest speakers. Although the course will highlight the role of the federal prosecutor, students will serve as both prosecutors and defense counsel during practical exercises. They will also hear the perspective of criminal defense practitioners through guest lecturers, legal articles and treatises. Thus, the skills developed during this course will easily translate to a state, tribal, or military criminal practice as a prosecutor or defense counsel. Graduation Requirement: This course satisfies the experiential course requirement for graduation. Must earn a grade of C or better, Basis of Grade: Class and outside court event participation and attendance, demonstrated research, writing, and oral advocacy skills. Form of Grade: Letter.

Prerequisites: LAWS 547, LAWS 671, and LAWS 555 or LAWS 554.

LAWS 860 - Special Topics in Legislative Drafting I (2 Credits)
This course will explore the process of drafting legal codes in a real world setting. Specifically, the course will give students the opportunity to participate in the creation of a legal code for the Catawba nation. Students will be introduced to the relevant areas of federal Indian law, the history, culture and legal conceptions of the Catawba Nation, and principles of drafting laws. Topics may shift from year to year. Students will use information collected during the course to draft laws to be submitted to the leadership of the Catawba Nation for adoption. In the first year of the course, students will focus on drafting a family law code. They will be introduced to crucial family law concepts relevant to the law-making process. Specifically, students will examine numerous state and tribal family law codes. They will discuss the relevant strengths and weakness of these laws with the goal of drafting a family law code particularly suited to the history, culture and legal needs of the Catawba Nation. During the course, they will meet with leadership of the Catawba Nation and with lawyers, government officials and judges from other recognized Indian nations. Students will receive a letter grade at the end of each semester. Registration: Instructor will select students for this course. Interested students shall submit (1) statement of interest of no more than 500 words; and (2) updated CV. LAWS 759 or LAWS 838 is encouraged, but not required. Students are expected to take both Special Topics in Legislative Drafting I and II. Basis of Grade: The grade will be based on the student’s attendance and class participation as well as the quality of the research and drafting assignments produced through the semester. Form of Grade: Letter.

LAWS 861 - Special Topics in Legislative Drafting II (3 Credits)
This course will explore the process of drafting legal codes in a real world setting. Specifically, the course will give students the opportunity to participate in the creation of a legal code for the Catawba nation. Students will be introduced to the relevant areas of federal Indian law, the history, culture and legal conceptions of the Catawba Nation, and principles of drafting laws. Topics may shift from year to year. Students will use information collected during the course to draft laws to be submitted to the leadership of the Catawba Nation for adoption. Using the skills learned in Legislative Drafting I, students will draft family code for the Catawba Nation. In order to produce these code, students will examine numerous state and tribal family law codes. They will discuss the relevant strengths and weakness of these laws with the goal of drafting a set of laws particularly suited to the history, culture and legal needs of the Catawba Nation. During the course, they will meet with leadership of the Catawba Nation and with lawyers, government officials and judges from other recognized Indian nations. Students will receive a letter grade at the end of each semester. Graduation Requirement: This course satisfies the experiential course graduation requirement. Must earn a grade of C or better. Basis of Grade: The grade will be based on the student's attendance and class participation as well as the quality of the research and drafting assignments produced through the semester. Form of Grade: Letter.

Prerequisites: LAWS 860.
LAWS 899 - Reading Group (1 Credit)
The class will meet for at least 13 hours over the course of one academic year. Students will be assigned a series of books or similarly-substantial materials and required to produce a minimum of five pages of writing as described below, requiring at least 2 hours of out-of-class work for each hour that reading groups meet. Reading Groups are intended to facilitate an intellectually rich academic experience through informal, in-depth discussions between faculty and students. Each Reading Group will be convened to explore a legal topic or theme through the study of appropriate readings, films, and other materials. Reading groups are intended to foster deeper conversations about legal issues than traditional classes permit, especially including conversations regarding sensitive or controversial legal issues between diverse groups of students. Basis of Grade: Attendance, participation, and written work that totals a minimum of five (5) pages. Written work could include reflections on different materials, discussion guides created by students for particular readings, comparisons between different materials, or other assignments required by the faculty member. Form of Grade: Pass/Fail.

LAWS 999 - Law General Course (1 Credit)
SCHOOLS OF MEDICINE

Welcome to the Schools of Medicine Academic Bulletin

In the past three decades, the University of South Carolina’s School of Medicine located in Columbia (USCSOM-Columbia) has emerged as a national leader in primary care medical education, pioneering research, and providing humanistic patient care. Founded in 1975, the USCSOM-Columbia campus is situated on a beautiful 100-acre suburban campus, just four miles from the main campus of the University of South Carolina. The School of Medicine’s 20 year affiliation with the Greenville Health System, South Carolina’s largest public hospital, was enhanced in 2011 with the formulation of a second four-year University of South Carolina School of Medicine, USCSOM-Greenville, located on the Greenville Memorial Hospital Campus. USCSOM-Greenville is separately accredited by the Liaison Committee on Medical Education of the Association of American Medical Colleges, making the University of South Carolina one of only seven universities in the United States with two or more four-year campuses for medical education.

Mission: To improve the health of the people and diverse communities of South Carolina and beyond through innovative medical education and research, and compassionate, exceptional patient care.

The School of Medicine reserves the right to make changes in curricula, degree requirements, course offerings, and all School of Medicine academic regulations at any time when, in the judgment of the faculty, the dean, the president, or the Board of Trustees, such changes are in the best interest of the student, the University, or the School of Medicine.

Registration at the University of South Carolina assumes the student’s acceptance of all published regulations, including both those which appear in this School of Medicine Bulletin and all others found in any official announcement such as Carolina Community. When two or more regulations contained in University publications appear to be inconsistent, the regulations appearing in this bulletin shall control. When two or more School of Medicine regulations appear to be inconsistent, the regulations in force at the time the student entered the School of Medicine shall control.

Bulletin Updates and Corrections

Noncurricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the University Registrar (bulletin@sc.edu) on the Columbia Campus. Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletins.

Printing Portions of the Online Bulletins

The academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

Additional Information

Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement.

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost on the Columbia campus.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton St.
Columbia, South Carolina
telephone 803-777-3854

The University

UofSC System Mission Statement

Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The primary mission of the University of South Carolina System is the education of the state’s diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate’s, bachelor’s, master’s, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor’s and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

UofSC Columbia Mission Statement

Approved by the Board of Trustees- October 11, 2019
The primary mission of the University of South Carolina Columbia is the education of the state's citizens through teaching, research, creative activity, and community engagement. Among America's oldest and most comprehensive public universities, the University of South Carolina Columbia is the major research institution of the university system and its largest campus. At the heart of its mission lies the university's responsibility to state and society to promote the dissemination of knowledge, cultural enrichment, and an enhanced quality of life.

The University of South Carolina Columbia serves a diverse population of students with widely varying backgrounds, career goals, and levels of aspiration. The university offers over 320 degrees at the bachelor's, master's, doctoral, and professional program levels, affording students the most comprehensive array of educational programs in the state. Opportunities for personal and career development are provided to the citizens of South Carolina through outreach and continuing education activities. The university provides additional opportunities for associate degrees through Fort Jackson and through the oversight of regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work. The depth and breadth of its graduate programs distinguishes the University of South Carolina Columbia from all other institutions of higher learning in South Carolina.

Recognized by the Carnegie Foundation as a top research and community engaged institution, nationally ranked in start-up businesses, and conferring over 30% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. As the flagship institution of the university system, the University of South Carolina Columbia leads the way in providing all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, community outreach, and artistic creation.

**Accreditation**

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master's, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses' accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

In addition to this comprehensive accreditation, the professional schools on the Columbia campus are individually accredited by their respective associations as follows:

**College of Arts and Sciences**

In the Department of Psychology, the graduate degrees in clinical-community psychology are accredited by the American Psychological Association; graduate degrees in school psychology are accredited by the National Association of State Directors of Teacher Education and Certification, the National Council for Accreditation of Teacher Education, and the National Association of School Psychologists with the doctoral program also being accredited by the American Psychological Association. The Master of Public Administration degree offered by the Department of Political Science is accredited by the National Association of Schools of Public Affairs and Administration. The Department of Theatre and Dance is accredited by the National Association of Schools of Theatre and the University/Resident Theatre Association. The Department of Art is accredited by the National Association of Schools of Art and Design. The Department of Chemistry is accredited by the American Chemical Society.

**Moore School of Business and the School of Accounting**

American Assembly of Collegiate Schools of Business.

**College of Education**

National Council for Accreditation of Teacher Education, Council for the Accreditation of Counseling and Other Related Educational Programs.

**College of Engineering and Computing**

Programs in chemical engineering, civil engineering, computer engineering, electrical engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The programs in computer science and computer information systems are accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

**School of Hospitality, Retail, and Sport Management**

Accreditation Commission for Programs in Hospitality Administration.

**School of Law**

American Bar Association, Association of American Law Schools.

**College of Information and Communications**

The School of Journalism and Mass Communications is accredited by the Accrediting Council on Education in Journalism and Mass Communications. The School of Library and Information Science is accredited by the American Library Association.

**School of Medicine**

Liaison Committee on Medical Education of the American Medical Association-Association of American Medical Colleges.

**School of Music**

National Association of Schools of Music.

**College of Nursing**

Commission on Collegiate Nursing Education.

**College of Pharmacy**

American Council on Pharmaceutical Education.

**Arnold School of Public Health**

College of Social Work
Council on Social Work Education.

The School of Medicine - Columbia

Vision, Mission, Values

Vision
To be part of a vibrant academic health center that provides access to the best evidence-based medical care and biomedical education, supported by research and cutting edge technologies.

Mission
We serve the people of South Carolina and beyond through exemplary medical and health education, transformative research, and compassionate patient care.

Values

Excellence
We are committed to achieving the highest levels of personal and professional performance in all our endeavors.

Professionalism
We adhere to the highest standards of behavior guided by the values and practices of our professions.

Collaboration
We partner with individuals, teams, institutions and communities to enhance the value of our efforts.

Diversity and Inclusion
We create and sustain an inclusive and diverse environment, demonstrating in word and deed our commitment to valuing and supporting each other and those whom we serve.

Compassion
We are resolute in our efforts to relieve suffering and promote fairness.

History
In 1973, after considerable prior public discussion and planning, the South Carolina Commission on Higher Education and the State Legislature authorized the University of South Carolina to apply for a grant from the Veterans Administration to assist in the development of the medical school; the grant (funded through the Teague-Cranston Act) was approved in 1974. Faculty recruitment and curriculum planning began in 1975 and in 1976 the School of Medicine received provisional accreditation from the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges. In February 1977, the school was granted approval for the admission of the first class of 24 medical students in the fall of 1977. The Charter Class graduated in May 1981, at which time the School of Medicine was fully accredited by the Liaison Committee on Medical Education. Medical student class size has more than tripled since the entrance of the first class.

The School of Medicine's educational programs were further augmented by the establishment of the Ph.D. Program in Biomedical Science in 1981, the M.S. Program in Genetic Counseling in 1985, the M.S Program in Nurse Anesthesia 1993, and the M.S Program in Biomedical Science in 1998. The University’s M.S. Program in Rehabilitation Counseling program was transferred to the School of Medicine in 1994. A M.S. Program in Physician Assistant Studies is scheduled to open in 2017. Residency programs in emergency medicine, family medicine, internal medicine, obstetrics and gynecology, ophthalmology, orthopaedic surgery, pediatrics, preventive medicine, psychiatry, and surgery are cosponsored with Palmetto Health and the Dorn Veterans Administration Medical Center. Fellowships in surgical, medical, and psychiatric specialties are offered by individual School of Medicine departments in conjunction with Palmetto Health.

The School of Medicine's basic science campus, consisting of fully renovated historic buildings, is located four miles from the Columbia campus of the University of South Carolina. The complex provides excellent teaching and research facilities. Most clinical departments are located on the campus at Palmetto Health-Richland in central Columbia.

Affiliated hospitals in Columbia include the WJB Dorn Veterans Administration Medical Center, the Palmetto Health Alliance including Palmetto Health Richland Hospital and Palmetto Baptist Medical Center.
In 2014, the School of Medicine’s affiliation with the Greenville Hospital System (GHS) ended. That affiliation had provided School of Medicine students the opportunity for completion of core third- and fourth-year clerkships and rotations at the GHS facility. The last students from the School of Medicine trained at GHS graduated in 2015.

The School of Medicine started a regional branch campus in 2014 that allows third- and fourth-year students to take core clerkships in Florence, SC. Faculty have been credentialed in all clerkships in addition to elective areas. A regional assistant dean, student services director, and site assistant clerkship directors have been hired. Initial feedback has been good with students reporting hands-on opportunities in procedures, close apprentice-like teaching relationships with faculty and family medicine residents, and great support from the community and institutions. The students at Florence are also enrolled in a longitudinal professional leadership seminar. This partnership is in collaboration with Carolina's Medical Center, McLeod Health System, and Francis Marion University.

To aid expanding activities among the various sites and institutions, the School of Medicine has established an extensive high-definition video conferencing system at all three Columbia campuses, assisted GHS-UMC in developing a comparable video conferencing capability in Greenville, and installed and maintains video conference units at all three Rural Primary Care Education Centers. The School of Medicine has developed a reputation for its primary care medical education and for the excellent quality of students graduating from the medical school. The medical school collaborates closely with state agencies involved in health service delivery, sponsors research focused primarily on South Carolina healthcare needs, and provides a wide range of clinical care services to South Carolinians.

To further enhance the educational opportunities for our students, the School of Medicine also signed affiliation agreements with Grand Strand Regional Medical Center in Myrtle Beach, SC to allow third- and fourth-year student electives, and with Providence Hospital in Columbia for part of the surgery clerkship.

Additionally, the School of Medicine has begun integration with its major partner’s practices, Palmetto Health. This integration will add additional training sites and faculty for education, provide ability for the health care system to provide population health services, and to better serve our patients and learners due to an improved financial environment.

In 2006, the School of Medicine began an integrated ultrasound curriculum for medical students, the first in the nation. Since that time, the School of Medicine has hosted the First and Second World Congress on Ultrasound in Medical Education, and started the first Primary Care Ultrasound Fellowship in 2011 among many other accomplishments and initiatives in ultrasound for students.

The School of Medicine

The School of Medicine Campus

The Offices of Admissions and Enrollment Services, Student and Career Services, Curricular Affairs and Media Resources, and Minority Affairs, as well as basic science departmental offices and laboratories and the Medical Library are located on the School of Medicine campus adjacent to the Dorn Veterans Affairs Medical Center. The Office of the Dean and clinical department offices are located primarily on the Richland Medical Park campus.

Library Facilities

The School of Medicine Library serves as the School of Medicine's information gateway to over 10,000 biomedical electronic journals, over 1,300 electronic textbooks (Access Medicine, Clinical Key), over 80 biomedical databases (MEDLINE, Cochrane Library, Essential Evidence Plus, Micromedex,Web of Science), a diagnostic decision support system (DxPLAIN), consumer health information, an online catalog, and PASCAL, South Carolina's state-wide academic electronic library. The Library's print collection consists of more than 68,000 volumes. The Library provides information resources to meet the needs of the School's faculty, staff, and students and the larger USC community, area health care professionals, and consumers. In its role as a resource library in the National Network of Libraries of Medicine Southeastern/Atlantic Region, the Library also provides information services to all health care professionals in South Carolina. Professional librarians offer reference services, customized literature searches, and a series of on-demand classes for faculty and students on Photoshop, Current Awareness Tools, PubMed, Ovid, and evidence-based medicine resources. Librarians also offer course-integrated instruction to meet the specific needs of students and optimize their research and information literacy skills. Numerous online tutorials are available to provide an overview of an e-resource and can help users improve their searching skills. The Library Liaison Service actively supports the faculty and staff of the School of Medicine, and fosters communication between the Library and School of Medicine departments. Liaison Librarians offer instruction on the use of various library resources and advise on library services and policies. A Computer Classroom with ten workstations and an instructor's workstation is available for instructional purposes. School of Medicine students and faculty also have access to all of the print and electronic resources available from the Thomas Cooper Library of the University of South Carolina. Located on the University's main campus, the Thomas Cooper Library provides access to over 28,000 electronic journals and has a collection of nearly 3 million bound volumes. To further explore the School of Medicine Library's resources, consult the Library's web site at http://uscmed.SC.edu/.

Affiliated Hospitals

Palmetto Health Richland

Palmetto Health Richland is one of the largest acute-care facilities in South Carolina and a community teaching hospital that serves patients from every corner of the state. Boasting the region’s only Level I emergency/trauma center, the Richland campus also includes the state's only freestanding heart hospital, the first children's hospital in South Carolina, and the region's only primary stroke center. Palmetto Health Richland is the Midlands' hub of surgical excellence, offering robotic surgery and incision-free gamma knife radiosurgery in addition to hosting operating rooms for neurosurgery, heart surgery, and orthopaedic, laparoscopic and ear/nose/throat procedures. Among the hospital's other world-class facilities and specialty services are a simulation center, breast center, cancer centers, women's services, a mental/behavioral health services network, and an acclaimed research division that sponsors and conducts innumerable clinical trials. Through its affiliation with the University of South Carolina School of Medicine, Palmetto Health Richland hosts 22 residency and fellowship programs in a wide range of specialties and subspecialties. The hospital is the clinical home to residencies in dentistry, emergency medicine, family medicine, internal medicine, neurology, obstetrics/gynecology, ophthalmology, orthopaedic surgery, pediatrics, preventive medicine, psychiatry and surgery. Fellowship programs include EMS and simulation, emergency medicine ultrasound, sports medicine, cardiology, endocrinology,
geriatrics, infectious disease, pulmonary, child and adolescent psychiatry, forensic psychiatry, geriatric psychiatry, and critical care.

**Dorn Veterans Affairs Medical Center**
The WJB Dorn Veterans Administration Medical Center is one of the most active VA Medical Centers in the South Carolina-Georgia region which includes Primary Care, Specialty Care, Mental Health, Acute, Medical, Surgical, Psychiatric, Physical Medicine and Rehabilitation, Neurology, Oncology, Dentistry, Geriatrics and Extended Care. Community-Based Outpatient Clinics are located in Anderson, Greenville, Florence, Orangeburg, Spartanburg, Sumter and Rock Hill, SC. VA Administrative support is provided for the Florence National Cemetery in Florence, SC and Fort Jackson National Cemetery in Columbia, SC; the Vet Centers located in Greenville, SC and Columbia, SC; and the VA Regional Office, which is located on the west side of the Dorn VAMC campus.

**South Carolina Department of Mental Health**
Various clinical facilities of the South Carolina Department of Mental Health provide diverse clinical experiences for medical students: G. Werber Bryan Psychiatric Hospital provides inpatient psychiatric and forensic treatment and evaluation services to adults; Patrick B. Harris Psychiatric Hospital, provides inpatient psychiatric treatment to adults; Morris Village, provides inpatient treatment for adults with alcoholism and drug abuse or addiction and addiction accompanied by psychiatric illness; C. M. Tucker Nursing Care Center, comprised of two licensed nursing homes (Roddery, a general nursing home; Stone, a veterans nursing home) providing intermediate and skilled long-term care.

**Carolinias Hospital System**
Carolinias Hospital System is located in Florence, SC. Home to the area's first accredited Chest Pain Center, the hospital provides comprehensive acute care, cancer care, cardiac care, emergency/trauma services, maternity care, and an array of specialized rehabilitation programs.

**McLeod Regional Medical Center**
McLeod Regional Medical Center is located in Florence and serves the Pee Dee region of South Carolina. A Level II trauma center and one of four designated perinatal centers in the region; the facility includes a heart and vascular center and one of the nation's largest hospital-based health and fitness centers.

**Rural Primary Health Care Centers**
The John A. Martin Primary Health Care Center, located adjacent to the Fairfield Memorial Hospital in Winnsboro, South Carolina, 35 miles from Columbia, provides medical care to residents of primarily rural Fairfield County and serves as teaching facilities for medical students during the third-year family medicine clerkship.

**Graduate Programs**
The School of Medicine offers the Doctor of Philosophy and Master's of Biomedical Science degrees in biomedical science, the Master of Science degree in Physician Assistant Studies, the Master of Science degree in genetic counseling, the Master of Rehabilitation Counseling degree, the Psychiatric Rehabilitation Certificate, the Master’s of Nurse Anesthesia degree, and the Post-Baccalaureate Certificate in Biomedical Sciences.

**Combined M.D./Ph.D. and M.D./M.P.H. Degrees**
A combined M.D./Ph.D. plan is available to students interested in careers in academic medicine or medical research. The plan permits students to receive both the M.D. degree and the Ph.D. degree in biomedical science in approximately seven years. An M.D./M.P.H. dual degree plan is available to students in conjunction with the School of Public Health. The plan permits students to receive both the M.D. degree and the M.P.H. degree in five years.

Applicants interested in the combined M.D./Ph.D. and M.D./M.P.H. plans must be admitted separately to each degree program. For additional information about the combined M.D./Ph.D. plan, contact:

**Office of Graduate Studies**
School of Medicine
University of South Carolina
Columbia, SC 29208
803-216-3321

For additional information about the M.D./M.P.H. dual degree plan, contact:

**Office of Admissions and Enrollment Services**
School of Medicine
University of South Carolina
Columbia, SC 29208

**Academic Regulations**

**Honor Code**
All students enrolled in the School of Medicine are members of the student body of the University of South Carolina and are, therefore, subject to the regulations found in the Carolina Community, a publication of the University's Division of Student Affairs and Department of Academic Support. The Carolina Community contains a description of the procedures for administration of the Honor Code and other University policies. Questions regarding these policies may be directed to personnel in the School of Medicine Office of Student and Career Services.

Students enrolled in the School of Medicine adhere to the University Honor Code, as follows: It is the responsibility of every student at the University of South Carolina to adhere steadfastly to truthfulness and to avoid dishonesty, fraud, or deceit of any type in connection with any academic program. Any student who violates this Honor Code or who knowingly assists another to violate this Honor Code shall be subject to discipline. A violation of the Honor Code may result in suspension or dismissal from the School of Medicine.

**Student Conduct and Behavior**

Students enrolled in the School of Medicine should conduct themselves in an appropriately professional manner as defined by the School of Medicine Policy on Evaluation of Personal and Professional Conduct. Conduct should be in conformity with the high moral and ethical standards of the profession as well as within the legal constraints of any law-abiding community.

**Policy on Evaluation of Personal and Professional Conduct**
Medical students have the responsibility to maintain the highest levels of personal and professional integrity and to show compassion and respect for themselves, colleagues, faculty, staff, and, most important, the patients who participate in their education.
Evaluation of the personal and professional conduct of medical students will include the following general and specific considerations:

1. The student will show concern for the welfare of patients. He or she will:
   a. display a professional attitude in obtaining medical histories and physical examinations;
   b. act appropriately and respectfully in all verbal and nonverbal interactions with patients;
   c. treat patients with respect and dignity, both in the presence of patients and in discussions with professional colleagues; and
   d. show evidence of the ability to be perceptive, introspective, and insightful in professional relationships.

2. The student will show concern for the rights of others. He or she will:
   a. demonstrate a considerate manner and cooperative spirit in dealing with professional staff, colleagues, and members of the health-care team;
   b. treat all persons encountered in a professional capacity with equality regardless of race, religion, sex, handicap, sexual orientation, or socioeconomic status; and
   c. assume an appropriate and equitable share of duties among peers and colleagues.

3. The student will show evidence of responsibility to duty. He or she will:
   a. effectively and promptly undertake duties, follow through until their completion, and notify appropriate persons in authority of problems;
   b. be punctual and present at rounds, conferences, and all academic and clinical obligations;
   c. notify course and clinical clerkship directors (or other appropriate persons) of absence or inability to attend to duties;
   d. see assigned patients regularly and, with appropriate supervision, assume responsibility for their care; and
   e. ensure that he or she can be promptly located at all times when on duty.

4. The student will be trustworthy. He or she will:
   a. be truthful and intellectually honest in all communications;
   b. accept responsibility and establish priorities for meeting multiple professional demands and for completing work necessary for the optimal care of patients;
   c. accurately discern when supervision or advice is needed before acting; and
   d. maintain confidentiality of all patient information.

5. The student will maintain a professional demeanor. He or she will:
   a. maintain appropriate standards of personal appearance, attire, and hygiene for the patient population served;
   b. maintain emotional stability and equilibrium under the pressures of emergencies, fatigue, professional stress, or personal problems; and
   c. be responsible in the use of alcohol and prescription drugs and avoid their effects while on duty.

6. The student will possess those individual characteristics required for the practice of medicine. He or she will:
   a. be capable of making logical diagnostic and therapeutic judgments;
   b. communicate effectively with patients, supervisors, and peers;
   c. establish appropriate professional relationships with faculty, colleagues, and patients; and

Notification of Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.

A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the University discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

- The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, service provider or collection agent); a
person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

- A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.
- To officials of other institutions in which the student seeks or intends to enroll provided that the student had previously requested a release of his/her record;
- To authorized representatives of the U.S. Department of Education, U.S. Department of Defense (Solomon Amendment), U.S. Attorney General, the Comptroller General of the United States, state education authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations; to the Department of Homeland Security (DHS) and its Immigration and Customs Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.
- In connection with a student’s application for, and receipt of, financial aid;
- To comply with a judicial order or lawfully issued subpoena;
- To parents of dependent students as defined by the Internal Revenue Code, Section 152;
- To appropriate parties in a health or safety emergency; or
- To the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.
- The University may disclose the result of a disciplinary proceeding to a parent or guardian so long as the student is under the age of 21 at the time of the incident and the proceeding has resulted in a violation of University drug or alcohol policies, or any federal, state, or local law.
- To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.

Release of Directory Information

In accordance with section 99.7 of the Family Educational Rights and Privacy Act (FERPA), the University of South Carolina provides students annual notification of their FERPA rights. The University of South Carolina has designated certain items as Directory Information. At the University of South Carolina, these items are as follows:

- Name
- Dates of Attendance
- Campus
- College or School
- Classification
- Primary Program of Study
- Full-time or Part-time Status
- Degree(s) Awarded Including Dates
- Honors and Award Including Dean’s and President’s List
- University Email Address
- City, State, and Zip Code Associated with a Student’s Permanent Address

The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA.

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

Transcripts and Other Documents

All transcripts must be requested in writing from the Office of the University Registrar. A fee of $8 is charged for each transcript copy requested, unless the transcript is for use with a current application to The Graduate School. http://registrar.sc.edu/html/transcripts/default.stm.

No transcript will be issued to/for a student who is indebted to the University.

With the exception of copies made for internal University use, no copy of a student’s record will be released to anyone (including the State Department of Education) without the student’s written consent.

Medical Licensure

Each state has its own licensing board with its own medical licensure requirements. Consequently, although the Doctor of Medicine program at the University of South Carolina School of Medicine is fully accredited by the Liaison Committee on Medical Education (LCME), thereby making its graduates eligible for professional licensure in the state of South Carolina, students must complete the process and requirements for professional licensure in the state of their residency. For students who are not living and completing residency in South Carolina, the following link provides information regarding medical licensure specific to individual states throughout the U.S.

https://www.fsmb.org/contact-a-state-medical-board (https://www.fsmb.org/contact-a-state-medical-board/)

If a current student is considering relocating to another state after being admitted into the Doctor of Medicine program, the student must contact the Director of Enrollment Services to discuss how the move may impact their ability to participate in academic courses and clinical rotations in a different state.

Medical Student Performance Evaluation

The Medical Student Performance Evaluation (MSPE) is a comprehensive assessment of a student’s performance in achieving the educational objectives of the University of South Carolina School of Medicine-Columbia’s medical school curriculum. It is neither a letter of recommendation nor the school’s prediction of the student’s future
performance in a residency program. The MSPE is prepared by faculty and staff in the Office of Medical Education and Academic Affairs and transmitted to post-graduate programs to which the student is applying.

The MSPE, as an institutional assessment, is considered a component of the student’s academic record, and thus students at the University of South Carolina School of Medicine-Columbia have the option to review the MSPE in its entirety prior to its transmission. The student is permitted to correct factual errors in the MSPE but not to revise any evaluative statements. The student may, however, appeal to the Associate Dean for Medical Education and Academic Affairs for changes to evaluative statements. The Associate Dean has the final authority as to the content of the MSPE.

The MSPE is required for fellowship applications and for re-applicants going back through the Match, and it will be resubmitted in its entirety for graduates who request/require its resubmission. Once submitted to residency programs, the MSPE becomes a permanent part of the medical student record and will not be updated or changed to reflect activities or accomplishments during residency.

Appeals Regarding University Records
To ensure that records are not inaccurate or misleading, an appropriate hearing board provides students the opportunity to challenge the content of University records, and a procedure for requesting correction or deletion of any inaccurate, misleading, or otherwise inappropriate data contained therein. Such requests should be made through the petition committees of the individual campuses.

Policy on Registration/Records/Diploma Holds
Registration Hold
Every student is expected to discharge all obligations to the University as promptly as possible. Students who fail to meet their obligations to the University will not be permitted to register for classes.

Transcript and Diploma Holds
No student or individual duly authorized by the student shall be issued a copy of the student’s transcript or receive verification, oral or written, of information contained therein, or be issued a diploma if the student is indebted to the University, the School of Medicine or any affiliated training institutions or agencies and/or if a student is in arrears or default on student loans, and/or if a student fails to participate in required assessment activities. However, requests for verification of enrollment will be fulfilled in circumstances required for student loans as required for use of Title V funds.

Evaluating the Curriculum
A realistic medical curriculum must be flexible, capable of withstanding continuous monitoring, and capable of adjustment to accommodate current changes in medical education brought about by changes in the needs of society. The Curriculum Committee, therefore, with the assistance of special subcommittees and with faculty and student input, continually monitors the curriculum in order to ensure that the goals and objectives of the curriculum and the School of Medicine are achieved.

Academic Workload Policy for Students in the Preclinical Curriculum
The University of South Carolina School of Medicine-Columbia recognizes that the time spent in acquiring knowledge is critical to achieving a solid and sound medical education. However, in order to ensure that the learning objectives and intended learning outcomes are not complicated by scheduled contact hours in the preclinical educational experience, this policy places limitations on the weekly academic workload.

Educational engagement hours (i.e., didactic and self-directed learning) for medical students in the preclinical curriculum are not to exceed an average of 20 hours of required educational activity per week when averaged over the total semester’s weekly class schedule. An additional 10 hours of scheduled group activity (e.g. laboratories, small group case-based sessions, problem-based learning) is allowed per week.

The academic workload expectations for each course (i.e. the assigned period of contact hours allotted to a course each week) will correspond to the number of assigned credit hours. Each self-directed learning hour is given the same weight as a didactic hour when calculating a course’s contact hours.

The monitoring of all scheduled educational activities, and thus the student academic workload, resides with the Curriculum Committee with input from respective subcommittees and assistance from the Office of Curricular Affairs. - Approved 12-10-2015

Class Attendance
Absences
Enrollment in the School of Medicine obligates students to complete all assigned course work promptly and to attend classes on a punctual and regular basis. Absences, whether excused or unexcused, do not absolve the student of these responsibilities.

Grade Penalties for Excessive Absences
Students are expected to attend all regular class sessions. The course or clerkship director has the prerogative to exact a grade penalty for excessive absences. Unsatisfactory class attendance may be considered adequate reason for the instructor to refer to the Student Promotions Committee for consideration in the promotion process.

Notification of the Office of Student and Career Services
Any student who finds it necessary to be absent from a quiz, examination, or other required academic experience due to an emergency situation, illness, or hospitalization, is required to notify the Office of Student and Career Services and the affected course/clerkship director(s) of the reason for the absence prior to the absence or as soon as possible thereafter. Notification should be in the form of a phone call, voice message, or email to both the Office of Student and Career Services and the course/clerkship director(s). When requested, the student will provide written verification of the reason for the absence from the treating physician or other professional to the assistant dean for student affairs. Within the guidelines of University of South Carolina policy, the course/clerkship director will determine whether or not an absence from class shall be excused. Under these guidelines, absences from examinations, structured laboratory assignments, or other academic requirements may be made up at the discretion of the course or clerkship director.

Lack of Notification
Any student who does not provide appropriate notification to the Office of Student and Career Services and/or who does not provide written
verification of the reason for the absence when requested to do so may forfeit the opportunity to make up missed examinations and/or other academic experiences.

**Inclement Weather Policies for M-I and M-II Students**

School of Medicine M-I and M-II classes are canceled when University of South Carolina classes are canceled in times of inclement weather. School of Medicine M-I and M-II classes begin on a delayed schedule when University of South Carolina classes begin on a delayed schedule in times of inclement weather.

**Inclement Weather and Holiday Policies for M-III and M-IV Students**

The inclement weather and holiday policies that have been developed and approved for M-III and M-IV students are discussed in the Student Handbook to Clinical Rotations and in the Clerkship Director Handbook, both of which may be accessed through the Office of Curricular Affairs Webpage.

**Grading System**

**Credit Grades**

The grade point average (GPA) is calculated by dividing the total grade points earned by the hours attempted for credit.

| Description   | Letter Grade | GPA | Numerical Grade
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Superior</td>
<td>A</td>
<td>4.0</td>
<td>90-100</td>
</tr>
<tr>
<td>Above Average</td>
<td>B+</td>
<td>3.5</td>
<td>85-89</td>
</tr>
<tr>
<td>Average</td>
<td>B</td>
<td>3.0</td>
<td>80-84</td>
</tr>
<tr>
<td>Satisfactory</td>
<td>C+</td>
<td>2.5</td>
<td>75-79</td>
</tr>
<tr>
<td>Marginal</td>
<td>C</td>
<td>2.0</td>
<td>70-74</td>
</tr>
<tr>
<td>Poor</td>
<td>D</td>
<td>1.0</td>
<td>65-69</td>
</tr>
<tr>
<td>Failure</td>
<td>F</td>
<td>0.0</td>
<td>below 65</td>
</tr>
</tbody>
</table>

Course grades of D or lower cannot be accepted for degree requirements.

1 Any final numeric grade in a course or clerkship whose first decimal place is calculated to be .5 to .9 shall be rounded to the next whole number, while grades whose first decimal place is calculated to be .0 to .4 should be rounded down to the lower number.

**Other Symbols**

Other symbols used in the grading system are defined below. These grades do not carry grade points.

- **S** - Satisfactory or passing to be used in evaluating work done on a Pass-Fail basis
- **U** - Unsatisfactory or failure to be used in evaluating work done on a Pass-Fail basis
- **W** - Withdrawal passing, or without penalty, from a course or clerkship
- **WF** - Withdrawal failing, or with penalty, from a course or clerkship
- **AUD** - Course or clerkship was carried on an audit basis
- **I** - Incomplete failure to complete some portion of the assigned work in a completed course or clerkship
- **NR** - No report to be used in the absence of any of the above grades; a temporary mark, to be replaced subsequently by a regular grade, which can be used only when no grade has been assigned

The faculty of the School of Medicine is committed to the philosophy that satisfactory performance is expected of all students. No single course or clerkship or area of study is deemed to be more important than any other. The required courses and clerkships of the curriculum are all essential for the practice of medicine, regardless of the student's future specialty choice.

**GPA/Honors/Class Rank**

At the conclusion of each academic semester and academic year, the class rank for each student is calculated on the basis of cumulative GPA. The GPA for a student who has repeated a semester/year includes all hours attempted and grades earned. For purposes of promotion only under the minimum 2.000 GPA rule, hours and grades earned during the original year are not considered in GPA calculation.

Graduation honors are based on the cumulative GPA at the end of the fourth year. Honors are noted on the student's diploma and transcript as follows: cum laude 3.500 - 3.749; magna cum laude 3.750 - 3.999; summa cum laude 4.000. Transfer students from schools which assign grades on a pass/fail basis or which do not award grade points are not eligible for graduation honors. To be eligible for honors, transfer students must earn the qualifying grade point average for all work completed at the University of South Carolina, as well as for the transfer work.

**Student Appeal of Grades**

The procedures herein shall not extend to matters of grading student work where the substance of a complaint is simply the student's disagreement with the grade or evaluation of his/her work. Such matters shall be discussed by a student and his/her instructor; final authority shall remain with the instructor. Students have the right to be graded in an equitable manner, free from arbitrary bias or capriciousness on the part of faculty members. The basis of a student grievance shall be a violation of Teaching Responsibility policies contained in the Faculty Manual (http://www.sc.edu/policies/facman/Faculty_Manual_Columbia.pdf); or a violation of the policies on Protection of Freedom of Expression or Protection against Improper Disclosure, as stated in the Carolina Community.

Students who believe they have the right to grieve under this policy should, within 30 calendar days of receiving a grade, contact the Associate Dean for Medical Education and Academic Affairs to review the appeals process.

1. **Appeal of a Course Grade and/or Written Evaluation**
   a. Initiating an Appeal
      i. Students must submit all appeals in writing to the course/clerkship director.
      ii. Students must send copies of the appeal to the Associate Dean for Medical Education and Academic Affairs.
      iii. The written appeal must clearly state the grievance.
      iv. Students must initiate an appeal within 30 calendar days of notification of the grade or evaluation.
   b. Appeal to the Course or Clerkship Director Level One
      i. The first level of appeal of a course grade and/or written evaluation is to the course or clerkship director.
      ii. Should the course or clerkship director determine that there is a reason to change the course grade or evaluation in the
student’s favor, the director will send a request for revision to School of Medicine Registrar, who will in turn take the request to the Grade Change Subcommittee. If no reason for change is found, the course or clerkship director will inform the student that the grade or evaluation stands. In either event, the student must receive written notification of the course or clerkship director’s decision within ten working days of the student’s appeal.

c. Appeal to the Department Chair Level Two
i. If the course or clerkship director’s decision is not favorable to the student, the student’s clerkship director’s decision.
   1. For departmentally based courses, the student may appeal the course or clerkship director’s decision to the department chair.
   2. For team-taught courses, the student may appeal the course or clerkship director’s decision to the department chair responsible for management of the course.
   3. The appeal must be made within 10 days of receiving the decision from the course or clerkship director.

ii. After consultation with the course or clerkship director, the department chair may uphold the director’s decision or support the student appeal. Should the department chair determine that there is a reason to change the course grade or evaluation in the student’s favor, the department chair will send a request for revision to the School of Medicine Registrar, who will in turn take the request to the Grade Change Subcommittee. If no reason for change is found, the chair will inform the student that the grade or evaluation stands. In either event, the student must receive written notification of the department chair’s decision within ten working days of the student’s appeal.

d. Appeal to the Grade Change Committee Level Three
i. If the student is dissatisfied with the decision of the department chair, the student may submit a written appeal to the Grade Change Subcommittee via the School of Medicine Registrar with a copy of the appeal to the Associate Dean for Medical Education and Academic Affairs.

ii. The written appeal must state grounds for the grievance.
iii. The appeal must be made within 10 days of receiving the decision from the department chair.
iv. The Grade Change Subcommittee will then either:
   1. Rule that the appeal lacks the merit to warrant a hearing and will uphold the decision of the department chair.
   2. Rule that the appeal has the necessary merit for a hearing and will schedule a hearing on the appeal.
   v. The Grade Change Subcommittee decision is the final decision for Course grade or Written Evaluation appeals.

2. Faculty Grievance Procedure
   a. A faculty member who feels that he/she has been aggrieved as a result of a student appeal proceeding has the right to appear before the Faculty Grievance Committee and present his/her case of the committee.

**Curriculum Accommodations**

The School of Medicine will provide reasonable accommodations for students with documented disabilities. Students wishing to request accommodations should make application to the University’s Office of Student Disability Services. Once accommodations are approved, the School of Medicine will be notified. The application must be made in a timely manner prior to any coursework for which accommodation is requested. The assistant dean for preclinical curriculum, when indicated, will advise course directors and other pertinent faculty as to the nature and extent of the accommodations to be provided. The School of Medicine, through the subcommittee of the Curriculum Committee, appointed by the chair, retains the right to request additional information, including test results and diagnostic information from a qualified professional, concerning accommodations that extend beyond the following: extended time for written exams, a separate room for exams, and a note taker. Students receiving accommodations will be held to the same technical standards for graduation as other students.

The assistant dean for preclinical curriculum will also assist students in applying to the National Board of Medical Examiners for permission to take the United States Medical Licensing Examination (USMLE) under nonstandard conditions.

**Leave of Absence, Administrative Leave, and Withdrawal**

I. Leave of Absence

1. Request for a Leave of Absence. For a variety of reasons, it may become temporarily impossible for a student to continue a medical education. It is appropriate under such circumstances that the student present all available information and details of the situation through the assistant dean for student affairs to the Leave of Absence Committee.

2. Leave of Absence Committee. The Leave of Absence Committee is composed of School of Medicine faculty members (or their faculty designees) and the assistant dean for student affairs who serves, without vote, as secretary to the committee. The committee makes recommendations to the dean regarding the granting of a leave of absence to any student who requests a leave, informs the dean regarding the academic standing of the student at the time of the student’s request for a leave, and makes recommendations to the dean regarding a student’s return from a leave of absence to full-time student status. According to School of Medicine regulations, a student will be considered as being in good academic standing if he or she had an overall 2.000 grade point average at the conclusion of the prior semester and had passing grades in all courses in the current semester at the time of the request for a leave of absence. A student who leaves the school in good academic standing and returns will not be considered as repeating the semester or year. A student who leaves the school not in good academic standing and returns will be considered as repeating the semester or year. Any student granted a leave of absence is assigned a grade of W in all courses or clerkships in which he or she was enrolled. In that a leave of absence relieves the student of usual academic responsibilities in the School of Medicine, the Leave of Absence Committee reserves the right to recommend to the dean that a leave of absence be granted with stated conditions, stipulations, and/or contingencies that, in the opinion of the committee, are in the best interest of the student, will serve to document the student’s ability to return to full-time student status at the conclusion of the leave of absence, and/or will preserve the integrity of the School of Medicine curriculum.

3. Procedure. Each student who requests a leave of absence will be invited to meet with the Leave of Absence Committee and to present relevant materials for the committee’s review, including such statements and professional opinions that the student believes will support a request for a leave of absence. The Leave of Absence
Committee will review the statements and professional opinions presented by the student in making its recommendations to the dean about a leave of absence, but such statements or opinions presented by the student are not binding on the Leave of Absence Committee. The student may be accompanied to the committee meeting by one or two advisors of personal choice. The committee meeting is an informal, nonadversarial proceeding. The student may consult with the chosen advisor(s) at any time during the meeting, but the advisor(s) will not be permitted to speak on the student's behalf or to ask questions of committee members. The committee will inform the dean and the student, in writing, of its recommendation.

4. Decision of the dean. After receiving the recommendation of the Leave of Absence Committee, the dean or his/her designee will invite each student for whom the committee has recommended that a leave of absence not be granted to meet. At this informal and nonadversarial meeting, the student may discuss his or her individual situation and present relevant materials (including a personal statement of a maximum of 10 pages, double-spaced) for the dean's review. The student can be accompanied to this meeting by one or two advisors of personal choice and can consult with the advisor(s), but the advisor(s) will not be permitted to speak on the student's behalf or to ask questions of the dean. The dean will inform each student in writing within 10 working days of this meeting of the decision regarding a leave of absence and of the process of review in the dean's decision.

5. Length of a Leave of Absence. No leave of absence will be granted for a period of time exceeding 12 consecutive months. Any student taking a leave of absence for more than 16 weeks during the third year or fourth year of the medical curriculum will be required to complete the entire third year or fourth year in sequence upon a return to full-time student status.

6. Number of Leaves of Absence. Except under extraordinary circumstances, the School of Medicine will grant only one leave of absence to any student during his or her medical education.

7. Return from Leave of Absence. The Leave of Absence Committee reserves the right to require a meeting with a student prior to his or her return from a leave of absence in order to document the ability to resume full-time student status in the School of Medicine. At this meeting, the student may submit to the Leave of Absence Committee such statements and/or professional opinions that the student believes will support the contention that he or she is prepared to resume full-time student status. The Leave of Absence Committee will review the statements and professional opinions presented by the student in making its recommendations to the dean about the student's return from a leave of absence, but such statements or opinions presented by the student are not binding on the Leave of Absence Committee.

8. Independent Evaluation. The School of Medicine reserves the right to require a student to undergo an independent evaluation, at the School of Medicine's expense, by a physician mutually agreeable to the student and the School of Medicine prior to the student's return from a leave of absence to full-time student status.

9. Review Process. The review process for any decision made by the dean of the School of Medicine can be found in Section V of the “Student Promotions Committee” section.

II. Administrative Leave

During the course of a student’s medical education it may become necessary for the student to be placed on administrative leave. A student may be placed on administrative leave due to academic, personal, and/or professional reasons. The associate dean for medical education and academic affairs, in consultation with the chair of the Leave of Absence Committee and the dean, may place a student on administrative leave.

All policies and procedures related to a leave of absence (Section I. A.-I.) will be in effect for any administrative leave.

Any student who is unsuccessful on a first or second attempt at Step 1 of the United States Medical Licensing Examination (USMLE) will be placed on administrative leave according to the policies and procedures for promotion and graduation.

III. Withdrawal

Occasionally a student may decide to withdraw from the School of Medicine without an approved leave of absence. All withdrawals will be made in accordance with University of South Carolina policies if the student is to receive a tuition refund and have the proper grades recorded on the transcript. The School of Medicine uses the University schedule for refunds for any student who is dismissed or who withdraws.

A student who withdraws from the School of Medicine and who subsequently wishes to return to school must make application through the Admissions Committee as a new applicant.

Promotion and Graduation

I. United States Medical Licensing Examination

1. Requirements. Students in the School of Medicine are required to pass the United States Medical Licensing Examination (USMLE) Steps 1 and 2 prior to graduation. Students are required to pass Step 1 in order to be promoted to the third year and to progress to third-year clerkships. Students are permitted a maximum of three attempts at Step 1 and at Step 2. Failure on the third attempt at Step 1 or Step 2 will render students subject to dismissal from the School of Medicine. Students must be enrolled in the School of Medicine in order to take Step 1 or 2.

2. Timelines. Students must adhere to certain timelines and follow established application procedures in order to allow sufficient time for score reporting prior to various promotion deadlines.

   a. Step 1. Second-year students are required to complete applications for Step 1 during the second year in sufficient time to ensure a test date by the end of June and the beginning of third-year clinical clerkships. Students must take Step 1 prior to beginning any third-year clinical clerkships or electives. Second-year students must receive an equivalent passing score on the NBME Comprehensive Basic Science Examination (CBSE) before sitting for the first attempt at Step 1. Any student not receiving an equivalent passing score on the CBSE by the start of the next academic year will sit out of the first clerkship in order to retake the CBSE and then attempt Step 1. Any student not passing the CBSE by the end of the first eight weeks of the academic year will remain out of the fall academic semester, during which time the student will be expected to continue to prepare for and successfully retake the CBSE, and then sit for Step 1 in time to receive a passing score before the start of the next academic semester.

   Any second-year student who is unsuccessful on a first attempt at Step 1 and has started a clerkship will immediately be pulled from the clerkship and placed on administrative leave. The student will not earn academic credit for the clerkship and a grade of W will be received. The second attempt shall be scheduled within eight weeks of the beginning of the third year.
II. Requirements for Promotion

1. Academic Progress. In order to be promoted to the next academic year or to be permitted to continue to the next academic semester, a student must be recommended for promotion or continuation to the dean by the Student Promotions Committee. A student should maintain at least a 2.000 grade point average in order to be promoted to the next academic year or permitted to continue to the next academic semester. A student receiving less than a 2.000 grade point average in an academic semester or academic year or less than a 2.000 cumulative grade point average is subject to dismissal.

   a. Unacceptable Progress. A student who receives a D in a course or clerkship while maintaining a 2.000 grade point average will be considered as making unacceptable progress and will be required to meet with the Academic Review Subcommittee and to repeat the course or clerkship. A student permitted to repeat a clinical clerkship must repeat the clerkship at the University of South Carolina School of Medicine; a student permitted to repeat a preclinical course may repeat the course at another medical school approved by the course director and the assistant dean for preclinical curriculum. If the student fails to achieve a C or better grade in the repeated course or clerkship, the student will be subject to dismissal from the School of Medicine or will be required to repeat the academic year, at the discretion of the dean in consultation with the Student Promotions Committee.

   b. Step 2. Fourth-year students are expected to complete applications for Step 2 Clinical Knowledge (CK) and Clinical Skills (CS) in sufficient time to ensure test dates by the end of the fall academic semester (which falls on the last day of the sixth MIV rotation block). Any student who has not completed either portion of the Step 2 examination by this deadline will be pulled from rotation(s) until such time as the examination is taken.

   Any student not passing either portion of the Step 2 examination will not receive credit for the USMLE Step 2 Preparation Block (DMED D647), which in turn necessitates the student adding another elective to their fourth-year schedule.

   Any fourth-year student who is unsuccessful on a first or second attempt at Step 2 CK and/or CS is expected to complete an application in sufficient time to ensure a test date and score reporting by the beginning of the first third-year clerkship period of the next academic year. In the interim, the student will not be permitted to progress further in the third year of medical education. The student will not earn academic credit for the first clinical clerkship; a grade of W will replace the Incomplete grade.

   Any student who is successful on a third attempt at Step 1 will begin third-year clerkships in the first clerkship period of the subsequent academic year and is required to complete the entire third year in sequence.

   c. Repeated Semester/Year. A student will not usually be permitted to repeat more than one academic semester or academic year. A student who is repeating the semester or year must receive a grade of C or better in repeated courses or clerkships in order to be promoted to the next academic year or permitted to continue to the next academic semester. A student who fails to receive a grade of C or better in repeated courses or clerkships is subject to dismissal.

   If a student is required to repeat an academic semester or academic year, grade points and credit hours from the original semester or year will not be calculated into the cumulative grade point average for the purpose of promotions decisions. For all other purposes, grade points and credit hours from the original
academic semester or academic year will be calculated into the cumulative grade point average.

d. Unsatisfactory Evaluation in Personal and Professional Conduct. A student who receives an Unsatisfactory evaluation in the personal and professional conduct portion of a third- or fourth-year clerkship evaluation will receive an Incomplete grade in that clerkship. The student may or may not be permitted to continue in other clerkships. Remediation may be determined by either the clerkship director or by the Student Conduct Subcommittee, if the clerkship director chooses to refer the issue to this committee. Remediation may include repeating the clerkship or, alternately, repeating the component(s) of the clerkship identified as necessary by the clerkship director; or by completing other requirements as outlined by either the clerkship director or the Student Conduct Subcommittee. If referral is made to the Student Conduct Subcommittee, the committee's recommendations will be referred by the associate dean for medical education and academic affairs to the Student Promotions Committee for review. The Student Promotions Committee will make recommendations to the dean regarding academic alternatives for a student who has received (an) Unsatisfactory evaluation(s) in personal and professional conduct in a third- or fourth-year clerkship. If a second Unsatisfactory assessment is received in the personal and professional conduct portion of the professional evaluation in a repeated clerkship, then the student will be subject to dismissal. If the student receives Exemplary or Effective grades in personal and professional conduct and a C or higher letter grade in the repeat clerkship, the student will be permitted to continue in the third or fourth year. Any additional Unsatisfactory grades in personal and professional conduct during the third year or during the fourth year will render the student subject to dismissal.

2. Personal and Professional Conduct. Student progress is based upon professional performance which includes both cognitive mastery of the basic and clinical sciences and personal and professional conduct that reflects the high standards of moral and ethical behavior and judgment necessary for professional practice as a physician. Factors which could result in a student's suspension or academic progress in the School of Medicine. Remediation may be determined by either the clerkship director or by the Student Conduct Subcommittee, if the clerkship director chooses to refer the issue to this committee. Remediation may include repeating the clerkship or, alternately, repeating the component(s) of the clerkship identified as necessary by the clerkship director; or by completing other requirements as outlined by either the clerkship director or the Student Conduct Subcommittee. If referral is made to the Student Conduct Subcommittee, the committee's recommendations will be referred by the associate dean for medical education and academic affairs to the Student Promotions Committee for review. The Student Promotions Committee will make recommendations to the dean regarding academic alternatives for a student who has received (an) Unsatisfactory evaluation(s) in personal and professional conduct in a third- or fourth-year clerkship.

III. Requirements for Graduation

Upon recommendation by the School of Medicine faculty, the University of South Carolina will confer the degree of Doctor of Medicine upon candidates who have:

1. attained the School's educational objectives as evidenced by satisfactory completion of prescribed basic science courses and clinical clerkships and electives and acquisition of all required clinical skills;
2. passed Steps 1 and 2 of the USMLE;
3. completed the clinical skills attainment document;
4. complete requirements for Institute for Healthcare Improvement (IHI) Open School Certification;
5. attended the University of South Carolina School of Medicine on a full-time basis for a minimum of two years; and
6. discharged all financial obligations to the School of Medicine and to the University.

Students enrolled in the School of Medicine will have six (6) years from the date of matriculation to complete their degree for Doctor of Medicine not including any additional time needed to complete a dual degree. If a student fails to complete his or her degree within the specified time, he or she will be recommended for dismissal by the Student Promotions Committee.

In order to graduate in the May commencement ceremony, fourth-year students must complete successfully all academic requirements by May 31.

Student Promotions Committee

I. Academic Review Subcommittee

The Academic Review Subcommittee, composed of the chair of the Student Promotions Committee and faculty members who are not department chairs, meets at the end of each semester and at other times, as necessary, with each student who is subject to dismissal based upon School of Medicine academic regulations. The committee develops recommendations for consideration by the Student Promotions Committee regarding the student's continued enrollment and/or academic progress in the School of Medicine.

Each student who is subject to dismissal will be invited to meet with committee members in order to discuss his or her individual situation. The student may be accompanied to the committee meeting by one advisor of personal choice. The committee meeting is an informal, nonadversarial proceeding. The student may consult with the advisor at any time during the meeting, but the advisor will
proceeding. The student may consult with the advisor at any time during the meeting, but the advisor will not be permitted to speak on the student's behalf or to ask questions of committee members. Given the confidential nature of this committee, the committee meeting and its deliberations are closed to nonmembers. Only the student appearing before the committee and his/her advisor will be allowed to attend. They will be excused during the deliberation of the committee.

Each student who is subject to dismissal has the right to submit, prior to the committee meeting, relevant materials, including copies of a personal statement (maximum 10 pages, double-spaced), for review by the Academic Review Subcommittee and the Student Promotions Committee. Recommendations from the Academic Review Subcommittee will be referred by the associate dean for medical education and academic affairs to the Student Promotions Committee.

II. Student Promotions Committee
The Student Promotions Committee, acting for the faculty, makes recommendations to the dean regarding each student's continued enrollment and/or academic/professional progress in the School of Medicine, including continuation to the next academic semester, promotion to the next academic year, suspension, dismissal, or any variation thereof that in the opinion of the committee is appropriate. Voting members of the committee include those faculty members who are the chairs of School of Medicine departments (or their designees) and two faculty members elected by the Faculty Representation Committee. Voting committee members will elect the chair of the Student Promotions Committee at the first meeting of each academic year. The associate dean for medical education and academic affairs will serve, without vote, as executive secretary to the committee.

The Student Promotions Committee will receive information of various types, including, but not limited to, grades, evaluations, narrative comments from course and clerkship directors, and recommendations from members of the Academic Review Subcommittee, the Student Conduct Subcommittee, and/or from personnel in the Office of Medical Education and Academic Affairs, and, where indicated, opinions from other sources, including, but not limited to, faculty members, personnel at School of Medicine-affiliated hospitals, consultants, and representatives of relevant professional organizations.

The Student Promotions Committee reserves the right, in its deliberations about recommendations to the dean, to consider all relevant information that bears on a student's fitness to become a physician. All recommendations are made by the Student Promotions Committee to the dean, who will have the final decision within the School of Medicine.

The Student Promotions Committee will meet at the conclusion of each semester and, as necessary, at other times during the year. Criteria for continued enrollment and academic progress will be reviewed regularly. The committee will inform the dean and the student, in writing, of its recommendations. Given the confidential nature of this committee, the committee meeting and its deliberations are closed to nonmembers of the committee.

III. Academic/Professional Alternatives
The Student Promotions Committee may recommend to the dean any of the following academic alternatives:

1. permitting the student to continue to the next academic semester;
2. promoting the student to the next academic year;
3. promoting the student to the next academic year, contingent upon satisfactory completion of all academic deficiencies and contingent upon re-review by the committee;
4. requiring the student to repeat successfully a course, a clerkship, an elective, the academic semester, or the academic year;
5. suspending the student from the School of Medicine for a specified period of time, up to a maximum of one calendar year;
6. dismissing the student from the School of Medicine; or
7. a combination of any of the above-mentioned academic alternatives.
8. other sanctions/remediations deemed educationally and/or professionally beneficial to the student.

IV. Decision of the Dean
After receiving the recommendations of the Student Promotions Committee, the dean will invite each student for whom the Student Promotions Committee has recommended any academic alternative other than A or B (above) to meet. At this informal and nonadversarial meeting, the student may discuss his or her individual situation and present relevant materials (including a personal statement of a maximum of 10 pages, double-spaced) for the dean's review. The student may be accompanied to this meeting by one advisor of personal choice and may consult with the advisor, but the advisor will not be permitted to speak on the student's behalf or to ask questions of the dean. The dean will inform each student, in writing, within 10 working days of this meeting of the dean's decision and of the process of review of the dean's decision.

In the case of the dismissal of a first- or second-year student, a first- or second-year student will be permitted to remain enrolled in first- and second-year courses during the review process, but, if the review process has not been completed by the commencement of the third year, a second-year student will not be permitted to begin the third year until the outcome of the review process has been determined.

In the case of the dismissal of a third- or fourth-year student, notwithstanding the student's right to a review of the dean's decision, the decision of the dean is effective with the date of the dean's letter informing the student of dismissal. A third- or fourth-year student who has been dismissed from the School of Medicine will not be permitted to continue to engage in patient care activities, will not be permitted to remain enrolled in clinical clerkships or electives, and will not be considered to be enrolled in the School of Medicine.

A student will not receive grades in any courses completed during the period of the review process and will receive any refund of tuition and fee payments according to the schedules published by the University of South Carolina.

V. Review Process
A final request for review may be made to the provost of the University of South Carolina of any decision made by the dean of the School of Medicine. This request for review must be made, in writing, within 10 working days of the student's receipt of the dean's decision.

During the review process, the student will be invited to submit to the provost a personal statement (maximum 10 pages, double-spaced) in which the grounds for the request for review are explained. There will be four possible grounds for a request for review:

1. that the decision of the dean is not supported by substantial evidence;
2. that a procedural violation has occurred that has prejudiced the dean's deliberations;
3. that, when the record is reviewed as a whole, the decision of the dean is punitive rather than academically appropriate; and/or
4. that the dean's decision is an arbitrary and capricious one.

The provost can reverse, affirm, or modify the dean's decision. Any modification of the dean's decision by the provost cannot require greater remedial effort on the part of the student than that required by the dean's original decision regarding an academic alternative.

Ideally, the outcome of the provost's review will be communicated to the student, in writing, within 30 days of the date of receipt of the request for a review. The provost's review will consist of an assessment of the student's existing record in the School of Medicine, with no new information being provided by the student or by the School of Medicine.

At the end of the period of suspension, the student will submit to the Student Promotions Committee such statements and/or professional opinions believed to support the contention that the reasons for suspension have been resolved and that he or she is capable of returning to full-time student status. The Student Promotions Committee will review the statements and professional opinions presented in making its recommendations to the dean about the return of the student to full-time student status, but such statements or opinions presented are not binding on the Student Promotions Committee.

The School of Medicine reserves the right to require a student seeking to return to full-time student status from a period of suspension to undergo an independent evaluation, at the School of Medicine's expense, by a physician mutually agreeable to the student and to the School of Medicine. The report from this independent evaluation will be submitted to the Student Promotions Committee for its review prior to its making its recommendation to the dean about a student's return to full-time status, but the statements or opinions presented in this report are not binding on the committee. Following receipt of a recommendation from the Student Promotions Committee that a student not be permitted to return to full-time status after a period of suspension, the dean will invite the student to meet. At this informal and nonadversarial meeting, the student may discuss his or her individual situation and present relevant materials, including a personal statement (maximum 10 pages, double spaced) for the dean's review. The student may be accompanied to this meeting by one advisor of personal choice and may consult with the advisor, but the advisor will not be permitted to speak on the student's behalf or to ask questions of the dean. The dean will inform each student, in writing, within 10 working days of this meeting of the decision and of the process of review.

Administration

Dean: Leslie W. Hall, M.D.
Senior Associate Dean of Strategic Academic Affairs: R. Caughman Taylor, M.D.
Associate Dean for Diversity and Inclusion: Carol L. McMahon, M.D.
Associate Dean for Graduate Medical Education: Charles J. Carter, M.D.
Associate Dean for Medical Education and Academic Affairs: Joshua T. Thornhill IV, M.D.
Associate Dean for Research and Graduate Education, Francis G. Spinale, M.D., Ph.D.
Assistant Dean for Continuous Professional Development and Strategic Affairs: J. Matthew Orr, Ph.D.

Assistant Dean for Administration and Finance: Derek B. Payne, M.B.A.
Assistant Dean for Clinical Curriculum and Assessment: Brian D. Keisler, M.D.
Assistant Dean for Clinical Learning: James W. Cook, M.D.
Assistant Dean for Diversity and Inclusion: Robert M. Rhinehart, Ph.D.
Assistant Dean for Executive Affairs and Director of Library Services: Ruth A. Riley, M.S.
Assistant Dean for Information Technology and Chief Information Officer: D. Lindsie Cone, M.D.
Assistant Dean for Medical Student Education-Florence: Alan G. Schectin, M.D.
Assistant Dean for Preclinical Curriculum: Falicia H. Harvey, Ph.D.
Assistant Dean for Student Affairs: Eric R. Williams, M.D.
Director of Admissions and Enrollment Services/Registrar: Robert M. Rhinehart, Ph.D.
Director of Medical Student Recruitment: James R. Stallworth, M.D.

Department Chairs

Chair, Department of Cell Biology and Anatomy: Wayne E. Carver, Ph.D.
Chair (Interim), Department of Family and Preventive Medicine: Jamee H. Steen, M.D.
Chair (Interim), Department of Internal Medicine: Sharon B. Weissman, M.D.
Chair, Department of Neurology: Souvik Sen, M.D.
Chair, Department of Neuropsychiatry and Behavioral Science: Meera Narasimhan, M.D.
Chair, Department of Obstetrics and Gynecology: Berry A. Campbell, M.D.
Chair, Department of Orthopaedic Surgery: Christopher G. Mazoué, M.D.
Chair, Department of Pathology, Microbiology and Immunology: Mitzi Nagarkatti, Ph.D.
Chair, Department of Pediatrics: R. Caughman Taylor, M.D.
Chair, Department of Pharmacology, Physiology and Neuroscience: Marlene A. Wilson, Ph.D.
Chair, Department of Radiology: Floyd E. Bell III, M.D.
Chair, Department of Surgery: Daniel G. Clair, M.D.

Admissions

Applicants admitted to the University of South Carolina School of Medicine are selected by an admissions committee composed of members of the basic science and clinical science faculties of the School of Medicine, University faculty, medical students, and area clinicians. In making selections from each year's group of applicants, members of the Admissions Committee recognize that they are selecting future physicians. The admissions procedure is therefore an effort to select applicants who possess the individual characteristics required for both the study and practice of medicine.

The Admissions Committee considers all aspects of an applicant's application in the decision-making process. We use a holistic process to review each application, taking into account an applicant's unique academic and professional background. As a South Carolina based school, we prioritize applicants who have a significant connection to South Carolina.

Technical Standards

The School of Medicine has adopted the following technical standards:

Technical Standards for Admission, Retention and Graduation. The curriculum of the University of South Carolina School of Medicine has been designed to provide a general professional education leading to the medical doctor (M.D.) degree and to prepare undifferentiated
students to enter graduate medical training in a wide variety of medical specialties and sub-specialties. All candidates for admission to, and all current students at the School of Medicine - herein after designated as candidates for the M.D. degree should possess sufficient intellectual capacity, physical ability, emotional and psychological stability, interpersonal sensitivity, and communication skills to acquire the scientific knowledge, interpersonal and technical competencies, professional attitudes, and clinical abilities required to pursue any pathway of graduate medical education and to enter the independent practice of medicine. All candidates should be aware that the academic and clinical responsibilities of medical students may, at times, require their presence during day and evening hours, seven days per week. Candidates should be able to tolerate physically taxing workloads and to function effectively under stress.

While the School of Medicine fully endorses the spirit and intent of Section 504 of the Rehabilitation Act of 1973 and of the Americans with Disabilities Act of 1992, it also acknowledges that certain minimum technical standards must be present in candidates for admission, retention and graduation. Those individuals who would constitute a direct threat to the health or safety of themselves, patients, or others are not considered suitable candidates for admission or retention in medical school. Therefore, the School of Medicine has established the following technical standards for admission to, retention in, and graduation from, the M.D. program:

1. All candidates for admission must fulfill the minimum requirements for admission and all candidates for the M.D. degree must complete all required courses and clerkships as indicated in the School of Medicine Bulletin.

2. All candidates for admission and all candidates for the M.D. degree should possess sufficient physical, intellectual, interpersonal, social, emotional, psychological, and communication abilities to:
   a. establish appropriate relationships with a wide range of faculty members, professional colleagues, and patients. Candidates should possess the personal qualities of integrity, empathy, concern for the welfare of others, interest, and motivation. They should possess the emotional and psychological health required for the full use of their intellectual abilities; the exercise of good judgment; the prompt completion of all responsibilities associated with the diagnosis and care of patients; and the development of mature, sensitive, and effective relationships with patients, patients’ families, and professional colleagues. They must be able to adapt to changing environments, to be flexible, and to function in the face of ambiguities inherent in the clinical situation. Candidates should be able to speak, to hear, to read, to write, and to observe patients in order to elicit information, to describe changes in mood, activity, posture, and behavior, and to perceive nonverbal communications. Candidates should be able to communicate effectively and efficiently in the English language in oral and written form with all members of the health care team. Candidates must be mobile and able to function independently within the clinical environment.
   b. obtain a medical history and perform physical and mental examinations with a wide variety of patients. Candidates must be able to observe patients accurately both close at hand and at a distance. Observation requires the functional use of the sense of vision and other sensory modalities and is enhanced by the functional use of the sense of smell. Candidates should have sufficient exteroceptive sense (touch, pain, and temperature), proprioceptive sense (position, pressure, movement, stereognosis, and vibratory), and motor function to carry out the requirements of the physical examination. Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic operations. They should be able to use effectively and in a coordinated manner those standard instruments necessary for a physical examination (e.g., stethoscope, otoscope, sphygmomanometer, ophthalmoscope, and reflex hammer). Candidates should be able to execute motor movements required to provide general and emergency treatment to patients, including cardiopulmonary resuscitation, the administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, the suturing of simple wounds, and the performance of simple obstetrical maneuvers; such actions require coordination of both fine and gross muscular movements, equilibrium, and functional use of the senses of touch and vision.

   c. conduct tests and perform laboratory work. Candidates must be able to observe demonstrations, collect data, and participate in experiments and dissections in the basic sciences, including, but not limited to, demonstrations in animals, microbiologic cultures, and microscopic studies of microorganisms and tissues in normal and pathologic states. They should be able to understand basic laboratory studies and interpret their results, draw arterial and venous blood, and carry out diagnostic procedures (e.g., proctoscopy, and paracentesis).

   d. ultimately make logical diagnostic and therapeutic judgments. Candidates should be able to make measurements, calculate, and reason; to analyze, integrate, and synthesize data; and to problem-solve. Candidates should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. Candidates should be able to integrate rapidly, consistently, and accurately all data received by whatever sense(s) employed.

In evaluating candidates for admission and candidates for the M.D. degree, it is essential that the integrity of the curriculum be maintained, that those elements deemed necessary for the education of a physician be preserved, and that the health and safety of patients be maintained. While compensation, modification, and accommodation can be made for some disabilities on the part of candidates, candidates must be able to perform the duties of a student and of a physician in a reasonably independent manner. The use of a trained intermediary would result in mediation of a candidate’s judgment by another person’s powers of selection and observation. Therefore, the use of trained intermediaries to assist students in meeting the technical standards for admission, retention, or graduation is not permitted.

The School of Medicine will consider for admission any candidate who has the ability to perform or to learn to perform the skills and abilities specified in these technical standards. Candidates for the M.D. degree will be assessed at regular intervals not only on the basis of their academic abilities, but also on the basis of their non-academic (physical, interpersonal, communication, psychological, and emotional) abilities to meet the requirements of the curriculum and to graduate as skilled and effective medical practitioners.

Candidates who have a disability and use accommodations should begin discussions with the University Office of Disability Services as soon as the offer of admission is received and accepted. The candidate with the disability bears the responsibility of providing that office with
current information documenting the general nature of the disability and proposed accommodations.

Preparation

While the School of Medicine does not have any prerequisite requirements, for most applicants a strong preparation in the natural sciences is highly recommended including general biology, general chemistry, organic chemistry, and biochemistry. Further advanced studies in the biological, physical and/or chemical sciences is encouraged.

Preference is given to applicants who will, upon enrollment, hold a bachelor’s degree. Applicants occasionally are admitted on the basis of 90 semester hours of outstanding undergraduate achievement.

As a matter of policy, the School of Medicine can accept applications only from those individuals who are currently citizens of the United States or who are permitted by the Immigration and Naturalization Service to reside permanently in the United States.

The School of Medicine can accept applications only from those individuals who have completed their undergraduate premedical educations at a college or university in the United States or Canada.

The Medical College Admissions Test (MCAT)

All applicants to the School of Medicine are required to take the Medical College Admissions Test (MCAT). The MCAT should be taken no more than four years prior to the time of application and no later than the fall by the end of September of the year of application. The MCAT is offered several times each year and is administered in colleges and universities throughout the country. It is recommended that applicants consider taking the MCAT at least two times. Registration materials can be accessed at http://www.aamc.org/students/mcat/registration.htm

Application Procedures

Inquiries concerning admission should be addressed to:

admissions@uscmed.sc.edu

Office of Admissions and Enrollment Services
School of Medicine
University of South Carolina
School of Medicine VA Campus Bldg. 3
Columbia, SC 29208
803-216-3625

The School of Medicine participates in the American Medical College Application Service (AMCAS). Applications are submitted electronically and can be accessed at www.aamc.org (http://www.aamc.org).

Applications are available on-line after May 1 and may be submitted after June 1. The deadline for submission of applications to AMCAS is November 1.

Following receipt and individual screening of the initial AMCAS application in the School of Medicine Office of Admissions and Enrollment Services, secondary application materials (including evaluations and a nonrefundable $95 processing fee) will be requested from all qualified applicants selected to receive further consideration.

Interview Day

Applicants will be invited for interviews based on guidelines established by the Admissions Committee and are a required part of the admissions process for all applicants. For the 2021 cycle, all interviews will be virtual.

The deadline date of November 1 refers only to the date by which the basic application materials must be received at the AMCAS office; December 15 is the deadline date for receipt of all secondary application materials in the Office of Admissions and Enrollment Services. It is in the best interest of the applicant to submit the completed application as early in the application/admissions process as possible. It is the responsibility of the applicant to ensure that all application materials are received in the Office of Admissions and Enrollment Services by the deadline date. No application will be considered until all application materials have been received.

Admission Procedures

Offers of admission are made on a rolling basis after October 15 and throughout the year. An applicant who is offered a position in the next entering class will be required to accept or decline the offer within a two-week period. A $250 non-refundable seat fee will be due with the Commit to Enroll selection beginning May 1.

An offer of admission is contingent upon the satisfactory completion of all requirements and conditions of admission.

Admitted applicants will be required to submit official transcripts from every college and university attended to the School of Medicine director of enrollment services/registrar prior to matriculation. These transcripts will be included in their School of Medicine academic records.

Assignment of Students for Third and Fourth Year Clinical Rotations

This policy will outline the procedures and guidelines for the assignment of students to either the Columbia campus or the Florence Regional campus for their third and fourth year clinical rotations. In assigning students to a clinical campus, the primary goal is to ensure adequate educational resources for every student to meet the educational objectives of the curriculum. While student preference will be considered in the assignment process, there is no guarantee that a student will be assigned to their preferred campus.

Application

Applicants, at the time of application, will be notified both on the School of Medicine’s Website and through published material that two clinical campuses are available for assignment during the third and fourth year of medical school. On their secondary application, applicants will be asked if they are applying to be considered for the Columbia campus, Florence Regional campus, or both campuses.

Offer Letter

When applicants are made an offer of acceptance into the class, they will be informed that assignment to a clinical campus will occur early in their first year. By accepting the offer the applicant will acknowledge that while they will be able to state a preference, there is no guarantee that they will be assigned to their preferred campus.
**Matriculation**

At the time of the applicant's matriculation into the School of Medicine in early-August, they will be scheduled for mandatory tours of the facilities and meetings with selected faculty from both clinical campuses. After the completion of the tours, students will be required to submit their preference for their clinical campus assignment.

**Assignment**

When possible, student preference will be used in the assignment of the clinical campus which will occur in Fall of the M-I year. If student preferences are not sufficient or exceed the educational resources of either campus, a lottery will be held to assign students and meet the educational resources of both campuses. Students will then be informed by the end of the semester of their assigned campus.

**Switching Campuses**

Students, who mutually agree, will be allowed to switch campuses after jointly making that request prior to January 1 of their M-II year. No switches will be allowed for the six months prior to the beginning of the M-III year.

**Appeal**

Students may, due to extenuating circumstances, appeal their assignment to a clinical campus up to January 1 of their M-II year. This appeal should be presented in writing to the Assistant Dean for Student Affairs and will be considered by the Student Services Committee, who will make a recommendation to the Associate Dean for Medical Education and Academic Affairs. In general, extenuating circumstances should be considered to be out of the student's control and/or the current assignment would cause undue hardship on the student and not simply that the student's preference for their clinical campus was not met. Consideration of the appeal will also need to take into account the availability of educational resources at the other clinical campus.

**Transfer**

Once the clinical assignment is made and the student has begun their M-III year, they are expected to complete all required clerkships and clinical rotations (except for electives) on their assigned clinical campus. Should a student wish to transfer campuses, they would need to follow the same procedure for the appeal of their clinical assignment. Transfers would only be granted under extenuating circumstances and if sufficient educational resources are available at the other clinical campus.

**Early Decision Plan**

Through AMCAS, the School of Medicine participates in the Early Decision Plan (EDP). EDP applicants must be highly qualified and apply only to the University of South Carolina School of Medicine by August 1. All secondary application materials must be received in the Office of Admissions and Enrollment Services by August 15; the Admissions Committee will provide responses to EDP applicants by October 1. EDP applicants must take the MCAT no later than mid-July of the year of application. Successful EDP applicants will be constrained from applying to any other medical school and will have a place reserved for them in the entering class. EDP applicants not admitted under the Early Decision Plan will be reconsidered as regular candidates and will be able to initiate applications to other schools in time to be considered by them.

**Delayed Matriculation**

Applicants accepted to the School of Medicine may request a one-year delay of matriculation for reasons of personal and professional development or significant extenuating circumstances. Application for delayed matriculation must be made, in writing, to the Office of Admissions and Enrollment Services by April 15. The application must contain a description of the specific reasons for the request. The Admissions Committee will make decisions on an individual basis by May 15. The School of Medicine reserves the right to limit the number of applicants granted delays of matriculation in each entering class. For additional information, contact the Office of Admissions and Enrollment Services.

If the request for delayed matriculation is granted, other requirements are as follows:

1. The delay of matriculation will be for a maximum of one year.
2. By May 1 of the year of delayed matriculation, the applicant must provide a written report containing documentation of completion of the purposes for the delay of matriculation for review and evaluation by the Admissions Committee. Delayed matriculation will be contingent upon review, evaluation, and acceptance by the Admissions Committee of the written report.
3. The applicant will agree not to apply to any other medical schools in the interim.
4. The applicant will submit a new AMCAS application for the following year’s entering class.
5. The applicant's nonrefundable seat fee deposit will be retained by the School of Medicine for the following year's entering class.
6. The applicant will provide official transcripts of all additional academic work completed or in progress.
7. The applicant must agree, in writing, to accept the offer of delayed matriculation and all associated conditions.

**Combined M.D./Ph.D. and M.D./M.P.H. Degrees**

A combined M.D./Ph.D. plan is available to students interested in careers in academic medicine or medical research. The plan permits students to receive both the M.D. degree and the Ph.D. degree in biomedical science.
in approximately six years. An M.D./M.P.H. dual degree plan is available to students in conjunction with the School of Public Health. The plan permits students to receive both the M.D. degree and the M.P.H. degree in five years.

Applicants interested in the combined M.D./Ph.D. and M.D./M.P.H. plans must be admitted separately to each degree program. For additional information about the combined M.D./Ph.D. plan, contact:

Office of Graduate Studies  
School of Medicine  
University of South Carolina  
Columbia, SC 29208  
803-216-3321

For additional information about the M.D./M.P.H. dual degree plan, contact:

Office of Admissions and Enrollment Services  
School of Medicine  
University of South Carolina  
Columbia, SC 29208  
803-216-3625

Course Exemptions

All applicants accepted to the School of Medicine are expected to enroll and complete successfully all required courses. Occasionally an applicant with specialized training will enter the School of Medicine and apply to exempt specific required courses. With the concurrence of the assistant dean for preclinical curriculum and the appropriate department chair, the applicant may be given an examination to measure the applicant's degree of proficiency in the appropriate area. Any exemption should be granted before matriculation in the course and must be granted no later than one academic week after matriculation.

Transfer and Advanced Standing

The Admissions Committee will consider applications for transfer into the second-year and third-year medical school classes contingent upon the availability of positions. All applicants for transfer must be currently enrolled and in good standing in a medical school accredited by the Liaison Committee on Medical Education and meet the prerequisite requirements in order to receive consideration. All acceptances into the third year are conditional on verification by the National Board of Medical Examiners of an overall, average passing score on Step 1 of the United States Medical Licensing Examination taken by June 30 following completion of the second year.

Applications for transfer are available after January 1. All application materials (including supplemental information and a nonrefundable $95 processing fee) must be received in the Office of Admissions and Enrollment Services by April 1. Supplemental information includes an essay on the reasons for transfer, letters of evaluation from the dean and two faculty members of the medical school in which the applicant for transfer is currently enrolled, and verification of MCAT scores. Requests for MCAT score verification should be addressed to:

Section for the MCAT  
Association of American Medical Colleges  
2450 N Street, NW  
Washington, DC 20037-1126

If you need more information, call 202-828-0600.

For further information concerning application for transfer, contact:

Office of Admissions and Enrollment Services  
School of Medicine  
University of South Carolina  
Columbia, SC 29208  
803-216-3625

Residency in South Carolina

As a state-supported institution, the School of Medicine has a primary responsibility to train future physicians for the state of South Carolina. Preference for admission to the School of Medicine is therefore given to state residents. Determination of residency as defined by the University of South Carolina for the purpose of tuition and fees is the responsibility of the University Residency Office (http://www.sc.edu/bursar/residency.shtml). For information concerning residency questions, contact:

Legal Residency Office  
1244 Blossom Street  
Suite 106  
University of South Carolina  
Columbia, SC 29208  
803-777-5555

Course Descriptions

• Biomedical Science (BMSC) (p. 1568)  
• Cell Biol & Anatomy (MCBA) (p. 1568)  
• Chemistry (CHEM) (p. 1568)  
• Family & Preventive Med (FPMD) (p. 1568)  
• Medical Topics (DMED) (p. 1570)  
• Medicine Clinical (MEDI) (p. 1572)  
• Neurology (NEUR) (p. 1577)  
• Neuropsychiatry (NPSY) (p. 1578)  
• Obstetrics / Gynecology (OBGY) (p. 1578)  
• Ophthalmology (OPTH) (p. 1580)  
• Orthopaedic Surgery (ORSU) (p. 1580)  
• Pathology & Microbiology (PAMB) (p. 1581)  
• Pathology (PATH) (p. 1582)  
• Pediatrics (PEDI) (p. 1582)  
• Physlgy & Pharmacology (PHPH) (p. 1585)  
• Radiology (RADI) (p. 1585)  
• Surgery (SURG) (p. 1586)
Biomedical Science (BMSC)

**BMSC D604 - Molecular Foundations of Medicine (8 Credits)**
An eight-hour, spring semester course designed for first-year medical students incorporating biochemistry, molecular biology and genetics. With a focus on connecting fundamental biological processes to human pathologies, the course explores properties and functions of nucleic acids, mechanisms of inheritance, structure and function of proteins and enzymes, and cellular metabolism and bioenergetics. Examples of pathological changes at the molecular level will be used to illustrate how normal processes can be altered to induce a disease state. While the primary mode of instruction is lecture-based, incorporation of clinical correlation presentations and pathology perspectives will solidify the connections between basic processes and human diseases. Student mastery of course content will be assessed using department developed multiple choice exams and the National Board of Medical Examiners (NBME) biochemistry exam.

Cell Biol & Anatomy (MCBA)

**MCBA D603 - Foundational Medical Anatomy (12 Credits)**
A twelve-hour, fall semester, first-year medical course involving the combined comprehensive study of human gross anatomy, neuroanatomy, microscopic anatomy, and developmental anatomy. The macro and micro structure of cells, tissues, organs, and systems are studied through an integrated and regional approach, and the functional significance of their morphological features are presented. The course is presented and taught in a collaborative, learning atmosphere by which students learn the names, relationships, and basic functions of body structures. The course relies significantly on a commitment to rigorous independent study. Primary methods of instruction include: lecture; case-based discussion/presentation; ultrasonography; cadaveric laboratory dissections; microscopic laboratory experiences through slides, digitized images, and electron micrographs; and independent learning experiences. Students integrate basic concepts and principles of structures as they pertain to clinical medicine. Web-based instructional methods and videodisc databases are used to present human anatomy and other supporting information relating to overall course content, primarily during laboratory sessions. The goal of laboratory sessions is to facilitate critical thinking skills and correlation of basic science information with clinical problems. Modes of assessment include departmental written multiple choice/essay examination, laboratory practical examination, oral assessment/presentation, and objective structured clinical examination (OSCE).

**MCBA D622 - Clinical Anatomy (1-12 Credits)**
This elective is designed to meet the specific needs or interests of individual students. A program is proposed by the student for faculty approval which normally includes the completion of a number of cadaver dissections. Normal gross anatomy is presented and integrated with relevant clinical material during oral presentations. Clinical faculty are involved whenever possible.

**MCBA D671 - Clinical Anatomy (1-12 Credits)**

Chemistry (CHEM)

**CHEM D650 - Medical Biochemistry (4 Credits)**

**CHEM D651 - Biochemistry II (4 Credits)**

Family & Preventive Med (FPMD)

**FPMD D605 - Family Medicine Clerkship (6 Credits)**
A six-week, six-credit-hour required clerkship in the third year. Students care for ambulatory patients under the supervision of faculty members and residents for two weeks in the Family Medicine Center at Palmetto Health Richland or the Center for Family Medicine at Greenville Memorial Hospital. Ultrasound technology is available at both campuses and is utilized during this part of the clerkship. Students participate for two weeks as integral members of a team that provides care to hospitalized patients on the family medicine inpatient service. In this setting, students perform initial work-ups on new patients and care for patients with acute and chronic problems; they also have the opportunity for collaboration with nurses, nurse practitioners, and other health professionals. In addition, all students spend two weeks in the office of a practicing physician where they experience health care delivery as it is provided in a community family practice. A variety of settings is utilized from rural sites to suburban and urban sites. Primary methods of instruction include lecture, case-based discussion/presentation, computer-assisted instruction, clinical preceptorship, problem-solving exercises, conferences, standardized/simulated patients, small-group discussion, and teaching rounds. Modes of assessment include the Family Medicine NBME subject examination, clinical evaluations, and an Objective Structured Clinical Examination (OSCE). Demonstration of mastery of a prescribed set of clinical skills, included on the Clinical Skills Attainment Document, is required for successful completion of this clerkship. Demonstration of mastery of the following clinical skills is strongly recommended during this clerkship: participation in the nutritional assessment of a patient; observation and performance of outpatient dermatologic procedures; observation of a colposcopy and endometrial biopsy; observation of exercise stress testing; observation of a nasopharyngoscopy; and observation of an individual or family psychotherapy session.

**FPMD D615 - Family Medicine Acting Internship (AI) (4 Credits)**
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward team, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSC AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.

**FPMD D622 - Short-term Psyc Prim Care (1-12 Credits)**
FPMD D623 - Family Medicine Preceptorship (M-IV) (1-12 Credits)
This course offers a brief, intensive exposure to a typical family practice, both for students considering a career in this area and those who are entering other specialties but who want to learn more about the role of the family physician in health care delivery. Students may be placed in rural, suburban or urban practices in various locations in the state, according to their preference. The practice exposure shall include ambulatory care of patients of all ages, including pediatrics, and inpatient hospital experience. It is important that arrangements be made for selecting the practice site as early as possible, and in no case with less than 6 weeks lead time. Preceptors shall be selected carefully and screened according to criteria formulated by the faculty of the Department of Family and Preventive Medicine.

FPMD D624 - Primary Care Sports Medicine (M-IV elective) (1-12 Credits)
This course is designed to give the fourth year medical students exposure to the different aspects of primary care sports medicine. Clinical venues include the Sports Medicine Center, Family Medicine Center, student health center, community settings and USC athletic training room. During the rotation, students will also gain exposure to physical therapy, casting/splinting and exercise physiology. Course Objectives: Improve musculoskeletal medicine knowledge base including anatomy, biomechanics, pathophysiology of common injuries, and prevention techniques. Improve musculoskeletal examination skills. Understand appropriate referral indications. Understand appropriate diagnostic tests, what and when to order, as well as how to read the studies. Understand treatment options for common musculoskeletal injuries. Improve treatment skills including common physical therapy protocols and therapeutic modalities. Exposure to common musculoskeletal procedures including bracing and casting techniques, fracture and dislocation reductions, joint injections and aspirations. Didactic sessions occur weekly. Opportunities for additional didactics may occur throughout the rotation. Sporting event coverage takes place through the University of South Carolina as well as several local high schools. The rotation takes place in the setting of a Primary Care Sports Medicine Fellowship at a major NCAA Division I university. Students are offered the opportunity to work with both faculty members as well as sports medicine fellows. Requirements for the rotation include coverage of at least 2 sporting events with either Family Medicine residents, Sports Medicine Fellows or faculty members. In addition, students will be expected to give a 10-15 minute presentation on a sports medicine topic of interest during one of the weekly didactic sessions.

FPMD D625 - Family Medicine Rural Medicine Elective (1-12 Credits)
This elective is designed to offer the student an intensive rural family medicine experience. The student will have a “hands on” experience working with patients in the office of a small town family physician. During this time, the student will be precepted by the community physician and learn first hand of the unique problems these physicians face in the delivery of health care in a rural setting. The student will have the opportunity to learn the benefits of a team approach to health care through interaction with nurse practitioners and other health care professionals. The student will also acquire first-hand information about the lifestyle of primary care physicians in the rural setting and the impact they have on their patients and their community. Finally, the student will be introduced to practice management issues pertaining to private practice in a rural setting. The elective offers rotations in several small communities within reasonable driving distances from Columbia. Other sites are available which will allow the student to stay in the community to better experience the lifestyle of a small town physician. It is important that arrangements be made for selecting the practice site as early as possible, preferably with at least 6 weeks lead time.

FPMD D626 - Office-Based Counseling Skills in Primary Care (1-12 Credits)
The course is designed to provide introduction to and enhancement of office-based counseling skills in primary care. It will also address basic theory and skill development in the treatment of emotional disorders within the structure of a primary care practice. Emphasis is placed upon brief, direct, and supportive techniques and strategies intended to augment clinicians’ abilities to effectively treat some of the most common psychosocial issues encountered in primary care clinics. Programmed videotapes will be presented and evaluated. Videotaped encounters of the student with Family Medicine patients will be monitored and individually supervised. Videotaping will address interview skills, relationship enhancement issues, transference and countertransference phenomena, nonverbal communication and patient psychodiagnostics. Students will be precepted within and and outside the Family Medicine Center by a variety of interdisciplinary clinicians. Students may sit in on individual and family psychotherapy sessions with the preceptors and discuss patient dynamics. Psychiatric topics of interest to the student will also be prepared and discussed.

FPMD D632 - Global Health and Primary Care (1-12 Credits)
This course offers a brief, intensive exposure to Global health. It is intended for students considering a career working in this area, as well as for those who plan to spend the majority of their career in the United States but want to learn more about providing clinical care in developing nations. The first two weeks of the elective will be spent in the United States with significant didactic requirements, including readings, small group discussions, and required presentations. The latter two weeks will involve a project with the organization Shoulder to Shoulder. From their materials: “The Honduras field experience is set in rural Santa Lucia, Intibucá, at the Shoulder to Shoulder clinic. The clinic provides 24 hour service to the residents in the area including dental services, x-ray and lab services, maternity services and inpatient care. The clinic is an eight hour bus ride from the airport, and three hours over dirt roads from the closest hospital. Every brigade member will have a variety of experiences, including outpatient clinic work, overnight call in the clinic, public health projects, and home visits. Students and residents are supervised by faculty with experience in global health. Nightly conferences are held to discuss the events of the day, interesting cases and presentations by residents, students and faculty.”

FPMD D634 - Community Disease Control (1-12 Credits)
FPMD D636 - Family Medicine Geriatrics (1-12 Credits)
FPMD D645 - Fam Med Outpatient Proc (1-12 Credits)
FPMD D649 - Ultrasound in Primary Care - Point of Care Ultrasound (1-12 Credits)
The senior medical student will spend 40 hours per week for approximately 4 weeks. This elective will focus primarily on teaching the student various point-of-care ultrasound examinations and applications in both inpatient and outpatient settings. This includes but is not limited to: point-of-care echocardiography, evaluation of the IVC, aorta, and lung exams. Furthermore, the course will include MSK applications and ultrasound guided procedures. The student will perform a number of required examinations, attend family medicine ultrasound procedure clinic, and accompany family medicine resident physicians on the hospital wards for educational scanning. At the end of the rotation the student should be able to successfully complete each of the previously mentioned examinations and should be familiar with common primary care applications of point-of-care ultrasound.

FPMD D650 - Family Prac Comm Hospitl (1-12 Credits)
FPMD D651 - Comm Fam Prac Preptrsp (1-12 Credits)
FPMD D652 - Rural Family Practice (1-12 Credits)
FPMD D655 - Rural Family Medicine (1-12 Credits)
FPMD D660 - Clin Externship Fam Med (1-12 Credits)
FPMD D666 - Clinical Family Medicine (1-12 Credits)
FPMD D667 - Fam Med Inpatient Extrnshp (1-12 Credits)
FPMD D670 - Sen Exper in Fam Med (1-12 Credits)
FPMD D675 - Family Medicine Rural Elective (1-12 Credits)
FPMD D677 - Family Medicine (1-12 Credits)
FPMD D679 - Religion and Medicine (1-12 Credits)
FPMD D690 - Clinical Family Medicine (1-12 Credits)
FPMD D691 - Clinical Family Medicine (1-12 Credits)
FPMD D695 - Family Med AI Extramural (4 Credits)
FPMD D710 - Topics/Preventive Med (2 Credits)
FPMD D714 - Nutrition&Womens Health (3 Credits)
FPMD D790 - Independent Study (1-3 Credits)

Medical Topics (DMED)

DMED D600 - Independent Study (1-12 Credits)

DMED D601 - Introduction to Clinical Medicine I (1-12 Credits)
A two-semester, two-credit-hour (DMED 601 - fall) and five-credit-hour (DMED 602 - spring), first-year course consisting of an introduction to the medical profession and to doctor-patient and doctor-community relationships, community and preventive medicine concepts, information about the components of health care delivery systems, and basic philosophical principles underlying bioethical decision-making. The stages of normal growth and development are also discussed to ensure that students acquire a basis for exploring the life history of the patient with an awareness of issues relevant to different age periods. Information about gender and sexuality is presented, followed by a discussion of sexual disorders and dysfunctions. Students are introduced to the basic skills of medical interviewing and the mental status examination through the use of standardized patients and through participating both semesters in a clinical preceptorship. In addition, beginning in the spring semester, each student will be assigned a senior mentor with whom they will practice the medical interviewing skills as well as discuss normal aging. Primary methods of instruction include lecture, problem-based learning, standardized/simulated patients, and small-group discussion. Modes of assessment include multiple choice examinations, senior mentor and clinical preceptorship reflection papers, assessment of performance in the medical interview and the mental status examination and by participation in small-group discussion and problem-based learning.
DMED D603 - Introduction to Clinical Medicine II (6 Credits)
A two-semester, eight-credit-hour (DMED 603 - fall) and eight-credit-hour (DMED 604 - spring), second-year course consisting of an introduction to the fundamentals of physical examination and physical diagnosis and the use of various models to assist in the conceptualization of psychopathological behavior, with an emphasis on the relationship of emotional factors to physical illness. Developmental problems of children, adolescents and adults, addictive problems, sleep disorders, and organic mental disorders are discussed. The course emphasizes the use of population-based data in making sound judgments regarding the clinical care of individual patients and interventions at the community level. Bioethical issues in the care of patients and techniques of prevention are presented and discussed, as are the most frequently encountered primary care clinical problems. The course includes information about frequently used radiologic and clinical laboratory studies and their value and limitations in the context of the pathophysiology of various disease states. The course utilizes an organ system approach and integrates physical diagnosis, ultrasound, and radiology with the medical pathology course. A portion of the spring semester is devoted to a series of problem-based learning exercises designed to integrate information from the Introduction to Clinical Medicine course continuum with knowledge gained from first and second-year basic science courses and to prepare students for the transition to the clinical environment in the third and fourth years. Primary methods of instruction include lecture, problem-based learning, self-instruction modules, standardized/simulated patients, and small-group discussion. Modes of assessment include written multiple choice/essay examination, assessment of participation in small-group discussion and problem-based learning, Objective Structured Clinical Examinations, and the Introduction to Clinical Diagnosis NBME subject examination. Demonstration of mastery of the following minimum clinical skills is required for successful completion of this course: performance of a clinical breast examination; demonstration of basic cardiac life support (BCLS) skills and provision of documentation of same; completion of Columbia Free Medical Clinic experience; completion of complete history and physical examination; and performance of computer literature search and completion of assignments related to the care and assessment of community-dwelling elders.

DMED D604 - Introduction to Clinical Medicine II (7 Credits)
A two-semester, eight-credit-hour (fall) and eight-credit-hour (spring), second-year course consisting of an introduction to the fundamentals of physical examination and physical diagnosis and the use of various models to assist in the conceptualization of psychopathological behavior, with an emphasis on the relationship of emotional factors to physical illness. Developmental problems of children, adolescents and adults, addictive problems, sleep disorders, and organic mental disorders are discussed. The course emphasizes the use of population-based data in making sound judgments regarding the clinical care of individual patients and interventions at the community level. Bioethical issues in the care of patients and techniques of prevention are presented and discussed, as are the most frequently encountered primary care clinical problems. The course includes information about frequently used radiologic and clinical laboratory studies and their value and limitations in the context of the pathophysiology of various disease states. The course utilizes an organ system approach and integrates physical diagnosis, ultrasound, and radiology with the medical pathology course. A portion of the spring semester is devoted to a series of problem-based learning exercises designed to integrate information from the Introduction to Clinical Medicine course continuum with knowledge gained from first and second-year basic science courses and to prepare students for the transition to the clinical environment in the third and fourth years. Primary methods of instruction include lecture, problem-based learning, self-instruction modules, standardized/simulated patients, and small-group discussion. Modes of assessment include written multiple choice/essay examination, assessment of participation in small-group discussion and problem-based learning, Objective Structured Clinical Examinations, and the Introduction to Clinical Diagnosis NBME subject examination. Demonstration of mastery of the following minimum clinical skills is required for successful completion of this course: performance of a clinical breast examination; demonstration of basic cardiac life support (BCLS) skills and provision of documentation of same; completion of Columbia Free Medical Clinic experience; demonstration of complete history and physical examination; and performance of computer literature search and completion of assignments related to the care and assessment of community-dwelling elders.

DMED D607 - Capstone (1 Credit)

DMED D609 - Independent Study/ Board Rev (4 Credits)

DMED D612 - Ind Study/ Medical Span (1-12 Credits)

DMED D614 - Creative Writing (1-12 Credits)

DMED D625 - Prob Based Lm Miv Electv (1-12 Credits)

DMED D636 - Womens Health Selective (4 Credits)

DMED D643 - Intersession Week (1 Credit)

DMED D645 - Gate Exam (0 Credits)
DMED D646 - QUEST: Quality Improvement Education and Systems Training (1-12 Credits)

QUEST is experiential education in quality improvement, a chance to apply principles learned in the classroom in real life with existing healthcare teams. The program is sponsored by the University of South Carolina School of Medicine in partnership with faculty mentors with Prisma Health and McLeod Health. Prior to starting QUEST, students are required to complete the basic certificate in quality and patient safety from the Institute for Healthcare Improvement Open School, a series of thirteen online modules. QUEST begins in the fall with a series of workshops led by system leaders and QI experts. The workshops include interactive sessions to deepen fundamentals of QI and explore applications in our local learning environment. Following the workshops, pairs of students are connected to mentors and QI teams in part based on their areas of interest. Students are generally paired with a learner from a different health profession.

DMED D647 - USMLE Step 2 Preparation (4 Credits)

This course has been specially designed to allow students protected time for USMLE Step 2 (Clinical Knowledge and Clinical Skills) preparation. Students are expected to devise and implement their own study plans. It is strongly recommended that students take the exam components either by the end of the block or early in the following block. Passing scores on the first attempts for both components of Step 2 are required in order to receive credit for the course. If a passing score is not achieved on the first attempt at either component, no credit will be given for the block.

DMED D648 - Ind Study Ultrasound (1-12 Credits)

DMED D649 - Medical Education: Learning From Teaching (1-12 Credits)

This course has been specially designed for students who have met the criteria and have the desire to tutor, mentor and teach. The tutors will meet with the tutees a minimum of 2 to 3 hours per week on an independent schedule. Grading: P/F

DMED D652 - Medical Legal Partnership Elective (1-12 Credits)

The medical legal partnership elective involves students working with second and third year law students and graduate students in social work on cases referred to the Law School’s Medical Legal Partnership Clinic from the Children’s Hospital Outpatient and Special Care Centers. The students will work with the law and social work students to identify the social determinants of health, particularly the legal issues affecting health, and will advocate for changes.

DMED D654 - Culinary Medicine (1-12 Credits)

Each 3 hour session is designed to teach fourth year medical students how to prepare nutritious and affordable meals and to effectively prescribe healthier foods and lifestyles to their patients. Students will spend 30 minutes role playing and discussing patient scenarios that are connected to diet-related diseases. The next 90 minutes will be spent in teams preparing various recipes and 60 minutes reviewing nutritional content of recipes as well as sharing the meal. The curriculum is based on the Mediterranean diet and was designed by Tulane Medical University to be affordable in order to reach lower-income populations which have been particularly susceptible to diet-related chronic disease.

DMED D663 - Neuroscience (1-12 Credits)

DMED D682 - International and Underserved Elective (2-12 Credits)

---

Medicine Clinical (MEDI)

MEDI D605 - Internal Medicine Clerkship (8 Credits)

An eight-week, eight-credit-hour required clerkship in the third year consisting of a eight weeks of inpatient medicine, including a four-day Medical Intensive Care Unit experience. During the inpatient block, students perform as active members of the student/housestaff/attending physician team. Students are assigned patients, obtain medical histories, perform physical examinations, evaluate laboratory data, and analyze the information in order to define patients' problems. Performance is reviewed both during specific preceptor-student contacts and during student presentations on actual ward rounds with the team. There is an ambulatory experience during which students have the opportunity to rotate through the resident clinic one afternoon per week. During this ambulatory experience, students work closely with preceptors, discussing each patient encounter in depth and participating in didactic sessions. Students become familiar with concepts of time management and performance of focused patient assessments. Throughout this clerkship, emphasis is placed on the interpretation of clinical findings in terms of the pathophysiologic mechanisms of disease and the subsequent translation of this information into rational decisions about management. The clerkship provides students, through their active participation, with opportunities to observe the diagnostic process as it unfolds and to develop competence in evaluating broad clinical problems. Primary methods of instruction include lecture, case-based discussion/presentation, clinical preceptorship, conferences, standardized/simulated patients, small-group discussion, and teaching rounds. Modes of assessment include the Internal Medicine NBME subject examination, clinical evaluations, and an Objective Structured Clinical Examination (OSCE). Demonstration of mastery of a prescribed set of clinical skills, included on the Clinical Skills Attainment Document, is required for successful completion of this clerkship.

MEDI D607 - Senior Internal Medicine Clerkship (4 Credits)

A four-week, four-credit-hour required clerkship in the fourth year consisting of a predominantly outpatient experience. Students may choose to rotate within a variety of sub-specialty sites and focus upon common medical problems encountered in the ambulatory setting. The goal of the rotation is to enhance the student's ability to diagnose and manage a wide range of illnesses affecting adults, while acquiring those skills necessary to function in the outpatient arena. Primary methods of instruction include small group case based discussions, clinical preceptorship, bedside teaching and grand rounds. Modes of assessment include clinical evaluations and conference attendance and participation.
MEDI D611 - Medicine/Neurology Clerkship (12 Credits)
A twelve-week, twelve-credit-hour required clerkship in the third year consisting of 2 weeks of Neurology inpatient consults and ambulatory clinics, 4 weeks of inpatient general medicine, 4 weeks of subspecialty elective, and 2 weeks of ambulatory general or subspecialty medicine. During the inpatient portions of the rotation, students perform as active members of the student/resident/fellow/attending physician team. In some cases, the team is a consultative service (subspecialty electives and Neurology) and in other cases, the team is the primary patient care service (general medicine wards and the intensive care unit). Students are assigned patients, obtain medical histories, perform physical examinations, evaluate laboratory data, and analyze the information in order to define patients’ problems and formulate a diagnostic and therapeutic care plan. Performance is reviewed both during specific preceptor-student contacts and during student presentations on rounds with the team. During the ambulatory portion of the rotation, students work closely with resident, fellow and attending preceptors, discussing each patient encounter in depth and participating in didactic sessions. Students become familiar with concepts of time management and performance of focused patient assessments. Throughout this clerkship, emphasis is placed on the interpretation of clinical findings in terms of the pathophysiologic mechanisms of disease and the subsequent translation of this information into rational decisions about management. The clerkship provides students, through their active participation, with opportunities to observe the diagnostic process as it unfolds and to develop competence in evaluating broad clinical problems. For Neurology in particular, the focus will be to broaden students’ basic neuroscience knowledge and learn to apply this knowledge clinically. Students will also develop skills in taking a focused neurological history and conducting a thorough neurological examination. Primary methods of instruction include lecture, case-based self-study and discussion, clinical preceptorship, educational conferences, standardized/simulated patients, small-group discussion, and teaching rounds. Modes of assessment include the Internal Medicine NBME subject examination, Neurology departmental exam, case presentations, clinical evaluations, and an Objective Structured Clinical Examination (OSCE). Demonstration of mastery of a prescribed set of clinical skills, including on the Clinical Skills Attainment Document, is required for successful completion of this clerkship.

MEDI D615 - Medicine Inpatient Acting Internship (AI) - Columbia (4 Credits)
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward teams, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSM AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.

MEDI D616 - MICU-CCU Acting Internship (AI) - Columbia (4 Credits)
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward teams, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSM AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.
MEDI D621 - Clinical Pulmonary Diseases (1-12 Credits)
This elective will provide clinical experience in the diagnosis and management of acute and chronic problems related to the respiratory system, including but not limited to disease processes such as pneumonia, COPD, interstitial lung disease, pulmonary hypertension, lung cancer, and sleep related breathing disorders. The student will learn the interpretation of arterial blood gases, pulmonary function studies and radiographic studies. The student will perform inpatient and outpatient consultative services under the supervision of the pulmonary attending. The student will participate in procedures such as thoracentesis, fiberoptic bronchoscopy and transthoracic needle biopsies. Attendance at other internal medicine conferences, ICU rounds and Wednesday pulmonary conference is encouraged.

MEDI D622 - Dermatology (1-12 Credits)
MEDI D623 - Clinical Endocrinology (1-12 Credits)
Medical students participate in the evaluation and management of patients with metabolic, endocrine, and hormonal problems under the supervision of faculty members. History-taking and physical examination skills are emphasized, along with interpretation of laboratory data and radiologic and imaging studies. Students care for both ambulatory and hospitalized patients at Palmetto Health Richland and Dorn Veterans Affairs Medical Center, and attend the daily teaching rounds, weekly clinical case conferences, journal club, and didactic lectures. They encounter a wide variety of endocrine and metabolic disorders such as diabetes, obesity, metabolic syndrome, endocrine hypertension, dyslipidemia, thyroid disease, calcium problems, osteoporosis, pituitary gland abnormalities, adrenal disease, hypogonadism, erectile dysfunction, and menopausal, reproductive and infertility issues. Formulation of differential diagnoses, a critical thinking approach, and use of the relevant medical literature is encouraged.

MEDI D624 - Digestive Disease and Nutrition (1-12 Credits)
The goal of this rotation is to enhance the student's ability to recognize, evaluate, and treat patients with digestive diseases, diseases of the hepatobiliary system, and disorders of nutrition. To accomplish this goal, the student will perform the initial evaluation on consults submitted to the gastroenterology (GI) service. Consults will be presented and the pertinent radiographic and histologic data reviewed on daily attending rounds. Experience with outpatient care of patients with digestive disease will be gained during a weekly outpatient clinic. The student will also care for a limited number (1-2) of patients with gastrointestinal disease on the inpatient service. Observation of procedures performed on the student's consults is encouraged. Increased knowledge of digestive diseases will be gained through in-depth reading in pertinent textbooks and the current medical literature as well as interaction with staff personnel. The student is required to attend all conferences, i.e., GI radiology, GI pathology, Endoscopy Conference, topic review, and journal review. If the student is interested in research, he/she will have the opportunity to observe the performance of various clinical research studies. This elective will include 2 weeks at PHR and 2 weeks at the DVAMC. Each student is expected to call the course director's office one week prior to starting the elective for assignment either to PHR or DVAMC.

MEDI D625 - Clinical Hematology/Oncology (1-12 Credits)
This elective will involve activities in clinical medicine on the Hematology/Oncology service and will include supervised patient care experiences with in-patients and out-patients, as well as teaching rounds, conferences, Tumor Board meetings and ancillary teaching sessions involving drug pharmacology.

MEDI D626 - Cardiographics (1-12 Credits)
This elective will provide in depth experience in interpretation of electrocardiograms and some experience with exercise electrocardiography.

MEDI D627 - Infectious Diseases: Clinical and Basic Correlation (1-12 Credits)
This course will provide the student with clinical experience in infectious diseases. The student will see patients on the infectious diseases consultation service and in outpatient settings (including the Ryan White HIV clinic 2 mornings a week) under the supervision of the infectious disease attending physician. Emphasis will be on the correlation of basic microbiologic principles with clinical expressions of diseases. The combined clinical and didactic experience should enable the student to: (1) use antimicrobial drugs rationally, (2) diagnose and treat patients with HIV/AIDS, and (3) acquire an approach to the diagnosis and treatment of varied infections.

MEDI D628 - Clinical Cardiology (1-12 Credits)
This elective will provide clinical experience in the diagnosis and management of acute and chronic cardiac problems, including but not limited to disease processes such as hypertensive urgency, heart failure, arrhythmias, syncope, chest pain, and myocardial infarction. The student will learn interpretation of electrocardiograms, echocardiography, and chest x-ray. The student will perform inpatient consultative services, including management of critical cardiac patients, will round with the CCU team each morning, and participate in the management of floor cardiac patients under the supervision of the cardiology attending. The student will participate in procedures such as tranesophageal echocardiography, cardiac catheterization, pacemaker placement, and arteriovenous accesses placement, and arterial line placement. The student will be in attendance at all cardiology conferences, as well as other internal medicine conferences such as grand rounds. The student will also have the opportunity to participate in various outpatient cardiology clinics, including heart failure, pacemaker, and chest pain clinics if desired.

MEDI D629 - Clinical Dermatology (1-12 Credits)
MEDI D630 - MICU-CCU (1-12 Credits)
MEDI D631 - Clinical Genetics (1-12 Credits)
MEDI D635 - Clinical Nephrology (1-12 Credits)
This course will provide clinical experience in the care of patients with acute and chronic renal failure, nephrotic syndrome, various fluid and electrolyte disorders and refractory hypertension. Hemodialysis and peritoneal dialysis will be discussed and utilized. The students will follow selected patients and will round daily with the attending faculty.

MEDI D636 - Allergy, Asthma, and Clinical Immunology (1-12 Credits)
This is a clinical rotation about common, chronic diseases affecting both children and adults. This elective will be beneficial for medical students who are in the third or fourth year of their training.
MEDI D637 - Renal Disease, Electrolyte Disorders and Hypertension (3-12 Credits)
The goal of this rotation is to enhance the student’s ability to recognize, evaluate and treat patients with renal diseases, electrolyte disorders and hypertension. To accomplish this goal, the student will have an active role in the evaluation of consultations presented to the Renal Service. Consults will be presented, and the pertinent laboratory and radiographic data will be reviewed on daily attending rounds. Routine patient management of patients with hypertension, electrolyte disorders and renal disease will be discussed using a problem solving approach on daily rounds. Difficult or interesting cases will be reviewed on weekly Renal Grand Rounds. The student will also participate in the outpatient care of patients with renal disease in the weekly clinic. Also, in order to acquaint the student to problems in care of patients with chronic renal failure such as electrolyte imbalance, hypertension, nutrition, etc., he or she will be encouraged to attend weekly rounds on patients in the chronic hemodialysis program. Fluid electrolyte, acid-base problems will be assigned and reviewed twice weekly with the renal attendings. If the student is interested in clinical research, he/she will have the opportunity to observe the performance and participate in various clinical research studies.

MEDI D638 - Allergy and Asthma (1-12 Credits)

MEDI D639 - Geriatrics (1-12 Credits)
The purpose of this rotation is to provide additional training in geriatric medicine. Students will receive individual supervision as they assess geriatric patients in various settings. Patients may be encountered in the office, nursing home, home and hospital settings. All rotations will involve a structured reading program designed to provide the student with a broad range of knowledge of the subjects more common in the Geriatric population. Students also take both a pre and post test on this rotation. Students interested in taking this rotation who have questions should contact Maureen Dever-Bumba at (803) 434-1244 or deverbumba@gw.mp.sc.edu to ensure that they select the site which best meets their needs.

MEDI D640 - Rheumatology (1-12 Credits)
This elective will provide the student with experience in evaluating and managing patients with rheumatic diseases. Outpatient clinics as well as inpatient consults will allow the student to experience a broad spectrum of rheumatic diseases. Daily teaching sessions will be devoted to covering major clinical topics in rheumatology. The student will also gain experience in reading x-rays and performing joint aspirations.

MEDI D643 - Palliative Medicine (1-12 Credits)
The student will function as a member of a multidisciplinary team providing palliative medicine consultations to patients throughout the hospital and in our outpatient clinic. Students will learn advanced communication skills such as breaking bad news, conducting family meetings, and discussing prognosis. Students will interact with intensive care teams, social workers, chaplains, nurse practitioners, and physicians. Students will receive a didactic series on the fundamentals of palliative medicine including communication skills, pain control, symptom management, and spiritual assessment. Students will be asked to write a brief reflection on their experience on the rotation. This could include a reflection on a patient encounter or how they plan to use skills learned during this rotation to their training moving forward. Students will also be expected to prepare a 5-10 minute presentation on a palliative care topic to present the palliative care group on the last day of their rotation.

MEDI D651 - Internal Medicine (1-12 Credits)

MEDI D653 - Infectious Diseases (1-12 Credits)

MEDI D660 - Cardiology Elective (1-12 Credits)

MEDI D661 - Allergy-Immunology Clarks (1-12 Credits)

MEDI D662 - Endocrinology (1-12 Credits)

MEDI D667 - Radiation Oncology (1-12 Credits)
The goal of this elective is to provide an overview and broad spectrum of radiation oncology in regards to appropriate workup, staging, and prognosis of the various cancers, in addition to obtaining a pertinent oncologic history and physical examination of the cancer patient.

MEDI D671 - Cardiology (1-12 Credits)
Students are assigned to work with a specific group of cardiologists with duties very similar to those of the first year Internal Medicine resident and Family Practice resident assigned to the group. Students will be assigned specific patients to examine and follow throughout the patient’s hospital course. It shall be the student’s responsibility to record a history and physical examination on each assigned patient. History and physical findings will be presented to the attendings on rounds. Students write orders, which are countersigned by a resident or attending. Students will participate in rounds each day. There is an opportunity to observe procedures done on patients in the unit which include pacemaker insertion, cardioversion, hemodynamic monitoring, coronary angiography, and stress testing. The 20 bed Coronary Care Unit and 34 bed post-CCU offer excellent updated physical facilities for this experience. The Cardiac Clinic meets once each week and provides an opportunity to review the history and physical findings on a variety of cardiovascular problems. Considerable emphasis is placed on instruction and interpretation of electrocardiograms. The student is responsible for interpreting an average of 10 records a day. There will be a review session each day with one attending to review all interpretations of EKGs. At these sessions, both residents and students receive ongoing instruction in electrocardiography, as well as reading assignments. Other graphics, including M Mode echocardiography, 2-D echocardiography, and phonoechocardiography, color doppler and angiograms are also included to a lesser degree.
MEDI D672 - Pulmonary Medicine / Respiratory Critical Care (1-12 Credits)
This four-week acting internship provides students with additional experience in the concepts and diagnostic procedures used in pulmonary and critical care medicine. Students are assigned to a pulmonary medicine inpatient team, where they provide primary management and consultative care for patients with pulmonary problems. Students also care for ambulatory patients in the Pulmonary Diagnostic Clinic. Students care for patients as their primary caregivers, under the direct supervision of upper level residents or faculty. Together with their teams, students take in-house overnight call every fourth night, usually admitting 2 to 3 new patients each call night, with a maximum census of 6 to 8 patients for ongoing care. Patient load may be adjusted as needed based on student comfort and patient complexity. Students evaluate all assigned patients, completing and recording the medical interview, physical examination, diagnostic assessment, and management plan. Students reevaluate their patients daily, reassessing their diagnoses and therapeutic plans. Students present their patients and discuss their impressions on daily rounds and in teaching conferences with the Pulmonary/Critical Care faculty. Students learn to interpret sputum samples, chest x-rays, arterial blood gases, and tests of ventilation and gas exchange. Students learn to perform diagnostic and therapeutic procedures, which include thoracentesis and pleural biopsy. Students will assist in exercise testing procedures in the pulmonary laboratory. Through the use of a teaching attachment or video camera, students will be able to observe during fiberoptic bronchoscopies. Clinical learning is supplemented by self-directed reading and required conferences. Slide and tape presentations covering respiratory physiology are available for student use. Conferences include Internal Medicine lectures, Pulmonary Care conferences, Pulmonary/Thoracic Surgery X-Ray conferences, and Medicine Grand Rounds. Students take in-house overnight call every fourth night and receive one day free of patient care duties per week.

MEDI D677 - Infectious Disease (1-12 Credits)
This course is offered as a consultative rotation in clinical Infectious Disease. Students are assigned to work with the attendings and usually one PGYII or III Internal Medicine resident. The student will be responsible for first patient contact with patients referred to the Infectious Disease consult service. These patients will then be presented to the resident and the faculty. The student will be responsible for recording the history, physical and orders with countersignature by the resident and faculty. The average number of consults seen is one and a half per day. There is a biweekly Infectious Disease clinic which the student will also be expected to attend. Outpatients in the office of Drs. Kelly, Schrank, Potts and Weems are also available for teaching depending upon the consultation workload. At the end of this rotation the student should be able to discuss and understand the appropriate use of antibiotic therapy. They should be able to understand the common entities in Infectious Disease such as FUO, hepatitis, STD, septicemia, osteomyelitis, endocarditis, AIDS, postoperative wound infections, etc.

MEDI D678 - Clinical Hematology/Oncology (1-12 Credits)
A preceptorial orientation is utilized with a busy consultative hematology practice dealing with diagnosis and treatment in-hospital and in the office. Patients with hematological neoplasms, immunohematological problems including blood banking problems, clotting difficulties, various cytoes and cytopenias, and patients undergoing plasmapheresis for a variety of disorders are evaluated and discussed. The student can expect to attend daily Internal Medicine conferences and experience one-on-one patient-oriented instructions with Drs. Smith and Thompson. At the conclusion of the rotation, the student should be able to reasonably approach a patient with various cytopenias, clotting disorders, and hematological neoplasms.

MEDI D679 - Nephrology (1-12 Credits)
The medical student will round daily with the attending physician; all aspects of nephrology and hypertension will be discussed. Acid base electrolytes, water metabolism and other subjects of interest will be discussed daily by the attending. These would take the format of discussion on a one-to-one basis with preassigned topics. The student will be at the office where, under supervision, he/she will be able to examine urinary sediments. The bimonthly outpatient nephrology clinic averages six patients. Reprints on topics discussed will be distributed; adequate time will be provided for the student to prepare the topic. Attendance at daily Internal Medicine conferences is expected.

MEDI D681 - Dermatology (1-12 Credits)
Students will rotate with a board-certified dermatologist in their private office. They will read on diseases seen during that time. They will also see patients and learn to do an evaluation and assessment of the patient’s problem and present to the attending. This will primarily occur in dermatology clinic and in patient consultations at Greenville Hospital System. There is a core curriculum they will study. At the end of the rotation they should be able to demonstrate competence in history, physicals, knowledge of common skin disorders, basic dermatologic procedures and general basic therapies in dermatology.

MEDI D676 - Int Med Rural Clrkshp (4 Credits)
MEDI D682 - International and Underserved Health Elective (4 Credits)
This is a 4-week elective rotation designed to give MIV students an educational experience in International and Underserved Health Care. One to two weeks of the rotation will be spent in preparing for the on-site experience and two to three weeks will be spent on-site under the supervision of an experienced clinician. The preparatory component will include study and research of the culture, history and language of the clinical site as well as review of a series of readings related to global and underserved health such as sanitation, nutrition, immunizations and infectious diseases. On-site, students will actively participate in providing health care to the area residents as well as be involved in health education in the community. A daily journal will be kept and a minimum two-page report of the experience will be due at the end of the rotation. In addition, the student’s supervising physician will be required to complete a brief evaluation form and return that to Dr Hall. All potential sites must be pre-approved by Dr Hall and the name of the on-site physician supervisor must be determined in advance. Any underserved area of the world or within the United States will be considered for this elective. Each student will be expected to perform a minimum of 25 hours of medical care and/or health education per week on-site. Dr. Jeff Hall must be notified of your interest in a particular site at least three (3) months in advance of the rotation.

MEDI D683 - Rheumatology Elective (1-12 Credits)
MEDI D684 - Pulmonary Teaching Service (1-12 Credits)
MEDI D687 - Respiratory Critical Care (1-12 Credits)
MEDI D688 - Hospitalist Medicine (1-12 Credits)
The Hospital Medicine elective at Lexington Medical Center is a four week, unopposed, experience that provides comprehensive exposure to complex medical patients with acute and chronic medical illness. The primary objective is to provide the medical student with a focused introduction to the growing specialty of Hospital Medicine. Coupled with didactic reading assignments and case presentations, the student will have the opportunity to initiate the admission process in the Emergency Department, establish continuity of care and patient rapport, and develop a plan for inpatient medical management and discharge disposition. The breadth of exposure will focus on adherence to the most current standard of care, supported by evidence-based medicine. Most commonly encountered acute medical illnesses include, but are not limited to, acute respiratory failure due to COPD and pneumonia, hypertensive urgency and emergency, multi-systemic sepsis, acute stroke, acute renal failure, hepatic failure, acute pancreatitis, diabetic ketoacidosis, cellulitis, acute heart failure, and acute delirium.

MEDI D690 - Clinical Internal Med (1-12 Credits)
MEDI D691 - Clinical Internal Med Ex (1-12 Credits)
MEDI D692 - Clinic Int Med Extmshp (1-12 Credits)
MEDI D695 - Intrml Med/Al Extramural (4 Credits)
MEDI D700 - Health Aspects of Aging (3 Credits)
MEDI D701 - Nutrition and the Elderly (3 Credits)

Neurology (NEUR)

NEUR D607 - Neurology Clerkship (2 Credits)
A two-week, two-credit-hour required clerkship in the third year during which students are assigned to various clinical sites and rotate with one of the neurologists on the clinical faculty in both inpatient and outpatient setting. The overall goal of the clerkship is to teach the principles and skills underlying the recognition and management of the neurologic diseases a general medical practitioner is most likely to encounter in practice. History and physical examination skills, as well as the use and interpretation of common tests used in diagnosing neurologic disease are emphasized. The student is expected to develop the abilities to formulate a differential diagnosis for patients with neurologic problems, to approach the management of common neurologic diseases in systematic fashion, and to recognize situations in which it is appropriate to request neurologic consultation. Primary methods of instruction include lecture, clinical preceptorship, conferences, small-group discussion, and teaching rounds. Modes of assessment include a departmental written examination and clinical evaluations. Demonstration of mastery of a prescribed set of clinical skills, included on the Clinical Skills Attainment Document, is required for successful completion of this clerkship. A limited number of students may elect to study subspecialty areas of neurology or to participate in clinical research in neurology.

NEUR D615 - Gen Neurology Wards Actng Int (4 Credits)
NEUR D639 - Neurology Selective (1-12 Credits)
Up to 10% of patients seen by family practitioners present with neurological symptoms and pose neurological questions to their physicians. Only 16% of the 45 million Americans who visit a physician for a chief complaint referable to the nervous system are ever evaluated by neurologists. In studies of hospitalized patients, the proportion admitted for a neurology diagnosis ranges from 5 to 19%, and the proportion with secondary neurological diagnosis is much higher. Clearly, primary care physicians are routinely called upon to evaluate and manage patients with neurological disease. Practicing physicians require a firm understanding of the general principles of clinical neurology. For those students who are interested in primary care, neurology or related fields; this four-week neurology elective in the fourth year is the suitable setting to lay the foundation for a better understanding of clinical neurology, to introduce neurology sub-specialties, or to offer student introductory exposure to neurology research. In the Columbia campus, the selective neurology students are assigned to the University Specialty Clinic – Palmetto Richland Memorial Hospital, Dorn VA Hospital, or Bryan Psychiatry Hospital. The MIV selective neurology in Greenville campus is conducted by Dr. John R. Absher. At the Columbia campus, we will accept the M-IV students on even numbered rotation blocks, limiting to 6 students each time, as neurology clerks. The M-IV selective neurology clerkship is conducted by Dr. John Absher who will accept one or two MIV students in each rotation period.
Telepsychiatry/telemental health elective offers medical students an opportunity to gain clinical exposure to video-conferencing technology as a means of health care delivery. Students will work with attending physicians who perform telepsychiatry evaluations spanning adolescent, adult, and geriatric age ranges. Students will become familiar with telepsychiatry consultation and mental healthcare delivery to clinical settings including primary care (ICARED), forensics/Department of Juvenile Justice (DJJ), state mental health center and geriatric PACE (Program for All Inclusive Care of the Elderly) sites. This elective will include assigned readings on the scope and effectiveness of telepsychiatry applications from the extant literature.

Obstetrics / Gynecology (OBGY)

A six-week, six-credit-hour required clerkship in the third year that introduces students to the basic fundamental principles of obstetrics and gynecology through a variety of inpatient and outpatient experiences. The rotation is divided into a three week obstetric block, and a three week gynecology block. During the obstetrics portion of the rotation, students spend one week on the labor and delivery floor during the day and one week on the labor and delivery unit at night. During these two weeks, students are exposed to normal labor and delivery patients, high risk antepartum patients, and postpartum patients. The third week of the obstetrics block is dedication to gaining exposure to obstetric ultrasound and genetics, as well as spending some more time on the labor and delivery unit. Students are also exposed to maternal fetal medicine as well during these three weeks. During the gynecology block, the students spend equal time in the operating room and the outpatient clinic. The bulk of time in the operating room is spent observing benign surgical cases with a limited amount of time dedicated to the observation of gynecologic oncology and urogynecology surgical cases. While the students are in the out-patient clinic, they are exposed to both obstetric and gynecologic patients, and are involved in the colposcopy, endocrine, high risk pregnancy, and teen gynecology specialty clinics. Additionally, students receive exposure to gynecologic ultrasound by spending time in the ultrasound unit. Primary modes of instruction include teaching rounds, lectures, and conferences. Modes of assessment include the Obstetrics and Gynecology NBME subject examinations and an Objective Structured Clinical Evaluation (OSCE). Demonstration of mastery of a prescribed set of clinical skills, included on the Clinical Skills Attainment Document, is required for successful completion of this clerkship.
OBGY D615 - Obstetrics and Gynecology Acting Internship (AI) (4 Credits)
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward teams, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSM AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.

OBGY D619 - Gynecologic Oncology (2-12 Credits)

OBGY D621 - Maternal/Fetal Medicine (1-12 Credits)
This course is an introduction to the evaluation and management of those patients whose pregnancies are complicated by conditions that compromise the health of the mother and/or the fetus. Maternal fetal physiology and pathophysiology will be emphasized. An emphasis will be placed on careful history taking (including history of the family for genetic predispositions). Learning experiences will include attendance at the antepartum rounds, prenatal diagnosis clinic, and in the MFM private clinic and conferences on a weekly basis, daily attendance of high risk inpatients and experiences in biophysical antenatal evaluation, including obstetrical sonography and fetal monitoring. Skill sets advanced include drawing pedigrees, ultrasound, and orchestrating a logical approach to complex pregnancies.

OBGY D624 - Rural Obstetrics and Gynecology (1-12 Credits)
Students will independently evaluate patients in the office under the supervision of the faculty member and will be expected to obtain the appropriate history and physical findings. They will be expected to generate an assessment and a plan prior to presentation of the patient to the physicians. Students will not be performing complete physicals on all patients but will be encouraged to “sit in” on several to help develop their own approach for comprehensive health care. Students will be provided with a hands-on experience with regards to office procedures. The didactic and managerial approach to running an office will be experienced as well. Taking night call will be encouraged (frequency will be at the discretion of the student); this will certainly provide the opportunity for more deliveries and more hospital experience. Teaching will be basically case oriented. Students will need to provide their own transportation. For the Manning rotation, housing arrangements will need to be made prior to arrival, and the office will gladly assist in this. Housing is available for the Bennettsville rotation.

OBGY D627 - Repro Endocrinology & Fertility (1-12 Credits)

OBGY D629 - Urogynecology (1-12 Credits)

OBGY D632 - Gynecology Surgery Elective (1-12 Credits)

OBGY D635 - Centering Pregnancy Group Prenatal Care (1-12 Credits)
This longitudinal elective is offered to students who have satisfactorily completed their third year core clinical rotations. The elective has a unique longitudinal design that allows students to follow patients throughout the duration of their pregnancy, and ideally manage the labor and perform the delivery. The student will participate in the Centering Pregnancy group prenatal care model. He or she will help facilitate a group of 9-12 low-risk gravidas. The student will participate in a total of ten 2-hour group prenatal sessions. The visits begin at 14-16 weeks, and then occur at 20, 24, 28, 30, 32, 34, 36, 38, and 40 weeks. Prior to participation in the group care model, the student will audit a training session in “Centering” model of pregnancy care. Along with the preceptor, the student will perform clinical assessments and provide patient education during each 2 hour group visit. Students will also have the opportunity to be “on-call” for each patient’s delivery. The student will manage the patient’s labor, conduct the delivery and provide postpartum care and counseling. Due to the longitudinal nature of this elective, the student must commit to making him or herself available for the fixed schedule of prenatal visits. Students do not have to commit to be available for the delivery, but it is strongly encouraged, if possible.

OBGY D643 - Women’s Health and Diagnostic Center (1-12 Credits)
To gain clinical experience in the diagnosis and management of obstetric and gynecologic problems in a community hospital setting. Rotation would involve seeing patients in an office environment (history, physical exam, office based procedures such as pap smears, pre-op work-ups/orders) and the hospital environment (direct assistance to surgeon in the operating environment, rounding on hospitalized patients to include entering clinical notes into the Electronic Medical Record (Epic), and triaging unstable OB/GYN patients in the Emergency Department). Students would also get the opportunity to work in a rural health environment (Swansea).

OBGY D649 - Orthopedic Surgery – Lexington Medical (1-12 Credits)
To gain clinical experience in the diagnosis and management of orthopedic problems in a community hospital setting. Rotation would involve seeing patients in an office environment (history, physical exam, office based procedures such as injections, etc, pre-op work-ups/orders) and the hospital environment (direct assistance to surgeon in the operating environment, rounding on hospitalized patients to include entering clinical notes into the Electronic Medical Record (Epic), and triaging unstable orthopedic patients in the Emergency Department).

OBGY D650 - Obstetrics & Gynecology (1-12 Credits)

OBGY D651 - Research Method and Study Design (1-12 Credits)
Whether primarily conducting research or performing patient care, an evidence-based approach to medicine requires the ability to understand and critically evaluate scientific literature. This skill is emphasized in the scholarly activity required by all ACGME accredited residencies. This course is designed to prepare the fourth year medical student for the scholarly activity he or she will encounter in residency and to provide the student with the skills required to engage in lifelong practice-based learning and improvement. In addition, at the end of this course, the successful student will have a well-designed research protocol that he or she can use as a residency research project if so desired. This course is offered to students based on academic merit. Interested students should contact the program coordinator to request an application.

OBGY D672 - Gyn/Onc (1-12 Credits)

OBGY D673 - Repro/Endocrin (GHS) (1-12 Credits)
OBGY D674 - High-Risk Obstetrics Elective (1-12 Credits)
This elective is offered to students who have satisfactorily completed their third year clinical rotations. The purpose of this course is to provide the learner with an intensive exposure to high-risk obstetrical care in an inpatient setting. Students will be exposed to a breadth of medical and obstetrical complications and fetal conditions. Clinical experiences will occur in the Antepartum Ward and Labor and Delivery. The student will become acquainted with the research activities in orthopaedics. Four weeks of didactic instruction per week are required. The student will work closely with the resident staff under direct supervision of resident and attending physicians. The student will be actively engaged in intraoperative and perioperative care of patients undergoing gynecologic oncology surgical procedures. This course is offered to students based on academic merit.

OBGY D675 - Elective in Gynecologic Oncology (1-12 Credits)
This two-week elective in Gynecologic Oncology is offered to students having satisfactorily completed their third year clinical rotations. Experience will be offered in an inpatient hospital based setting under the direct supervision of resident and attending physicians. The student will be actively engaged in intraoperative and perioperative care of patients undergoing gynecologic oncology surgical procedures. This course is offered to students based on academic merit.

OBGY D676 - Elective in Peripartum Obstetrics (1-12 Credits)
This elective is offered to students who have satisfactorily completed their third year clinical rotation in Obstetrics & Gynecology. Students will participate in the intrapartum and postpartum care of patients. The primary focus will be refining skills in labor management, interpretation of fetal heart rate tracing, and vaginal and cesarean delivery.

OBGY D677 - Ambulatory Gynecology (1-12 Credits)
OBGY D678 - Ambulatory Obstetrics (2-12 Credits)
OBGY D679 - Longitudinal Obstetrical Antenatal Care Elective (2-12 Credits)
This longitudinal elective is offered to students who have satisfactorily completed their third year core clinical rotations. This elective offers the learner with an intensive exposure to high-risk obstetrical care in an inpatient setting. Students will be exposed to a breadth of medical and obstetrical complications and fetal conditions. Clinical experiences will occur in the Antepartum Ward and Labor and Delivery. The student will become acquainted with the research activities in orthopaedics. Four weeks of didactic instruction per week are required. The student will work closely with the resident staff under direct supervision of resident and attending physicians. The student will be actively engaged in intraoperative and perioperative care of patients undergoing gynecologic oncology surgical procedures. This course is offered to students based on academic merit.

OBGY D680 - Clinical Genetics (2-12 Credits)
OBGY D684 - Intensive OBGYN Prep Res (1-12 Credits)
OBGY D687 - Community OBGYN Elective (1-12 Credits)
OBGY D690 - Clinical Obstet/Gynecol (4-12 Credits)
OBGY D691 - Clin Obgy Externship (1-12 Credits)
OBGY D692 - Extramural Ob/Gyn (1-12 Credits)
OBGY D695 - Ob/Gyn AI Extramural (4 Credits)

Ophthalmology (OPTH)

OPTH D620 - Ophthalmology (1-12 Credits)
This 4-week elective complements the ophthalmology program (Physical Diagnosis in the M-II year). The course is designed to present in depth various topics in basic ophthalmic subjects as well as common ocular diseases (cataract, glaucoma, diabetic retinopathy, etc.). Emphasis is placed on detailed instruction on the essentials of the eye exam as well as ongoing research projects in which the student wishes to participate under faculty guidance. The student is introduced to sophisticated examining equipment - slit lamp biomicroscope, retinoscope, tonometer, ultrasound, etc., used in the eye clinic and is expected to learn to use them. There is ample opportunity to see a large number of patients with a variety of ocular pathologies and to observe ophthalmic microsurgery. The student will be expected to attend the weekly clinical grand rounds and didactic lectures while on the rotation. The course is sufficiently in depth to enable a student to further consider ophthalmology as a career choice. It is also invaluable to any student who plans to train in any of the primary care specialties or in another discipline (neurology, neurosurgery) where additional ophthalmology knowledge is essential. Each student will be assigned to a faculty member and will work with all the residents, but may be assigned to one or more residents.

OPTH D672 - Ophthalmology (1-12 Credits)
In conjunction with the GHS University Medical Center, Southern Eye Associates provides a four week rotation for medical students who wish to become familiar with ophthalmology as a medical and surgical specialty. During the four week rotation, students will have the opportunity to learn the principles of the ophthalmic examination including the use specialized ophthalmic instruments as well as the opportunity to observe surgery. Students will become familiar with outpatient eye care, surgical care of eye patients, diagnostic and therapeutic applications of lasers, fluorescein angiography, ophthalmic emergencies, pediatric care, cataract surgery, and glaucoma. This rotation will also be available to USCSOM third year students for two weeks and will be an abbreviated version.

OPTH D690 - Clinical Ophthalmology (1-12 Credits)
OPTH D691 - Clinical Ophthalmology (1-12 Credits)

Orthopaedic Surgery (ORSU)

ORSU D620 - Introduction to Clinical Orthopaedic Surgery (1-12 Credits)
Designed for the prospective orthopaedic resident and for the student not planning orthopaedic specialization but desiring an extensive exposure to all phases of orthopaedic care, this elective covers preventative aspects, preoperative evaluation, surgery, and postoperative care and rehabilitation of a wide gamut of orthopaedic conditions. Pediatric, adult and geriatric patients with congenital, traumatic and degenerative problems are regularly encountered, and some neoplasms and infections are confronted. The student will work closely with the resident staff under the supervision of the faculty. The student will spend a great deal of time in the emergency and operating rooms and on the orthopaedic wards and will become acquainted with the research activities in orthopaedics. Four to six hours of didactic instruction per week are required. The student will be involved in case presentations and discussion.

ORSU D622 - Ortho Aspects/Sports Med (1-12 Credits)
required to give a case report at the direction of the attending. 

residents and faculty members. Completion of medical history and 

involve seeing patients in an office environment (history, physical 

ors planning an Orthopaedic specialty but looking 

to enhance their exposure to Sports Medicine are welcome to apply. This 
election is intended to expose students to acute, chronic and overuse 

sports injuries, both in-season and off-season, and to the necessity for 

communication with allied personnel, i.e. athletic trainers, therapists, 

etc. On occasion, students will be expected to accompany faculty to 

after-hours clinics, practice and/or games for area high school, collegiate 

and professional teams. At least one scholarly effort will be required 

during the month-long rotation, i.e. conference presentation, case report. 

Students will also be expected to attend approximately four hours weekly 

didactic teaching. 

ORSU D645 - Physical Medicine & Rehab (1-12 Credits) 
ORSU D648 - Intro to Musculosklt Med (1-12 Credits) 
ORSU D649 - Orthopedic Surgery (1-12 Credits) 
To gain clinical experience in the diagnosis and management of 

orthopedic problems in a community hospital setting. Rotation would 

involve seeing patients in an office environment (history, physical 

eam, office based procedures such as injections, etc, pre-op work-ups/

orders) and the hospital environment (direct assistance to surgeon in 

the operating environment, rounding on hospitalized patients to include 

entering clinical notes into the Electronic Medical Record (Epic), and 

triaging unstable orthopedic patients in the Emergency Department). 

ORSU D651 - Orthopaedic Surgery (1-12 Credits) 
ORSU D670 - General Orthopaedic Surgery (1-12 Credits) 
This course is designed to provide the student with a broad exposure to 

orthopaedic surgery. Facilities utilized during the course will include the 

main campus of Greenville Memorial Hospital and the Shriners Hospital 

for Children, Greenville Hospital. Attention will be given to basic adult 

and pediatric orthopaedic pathology, including general affections of the 

musculoskeletal system, arthritis, deformity management, trauma, sports 

medicine, neoplasms, general spine problems, infection, and metabolic 

disease. The student will be assigned to a team consisting of orthopaedic 

residents and faculty members. Completion of medical history and 

physician examination on assigned patients as well as formulation of a 

treatment plan will be the responsibility of the student. Participation in 

the preoperative evaluation, surgical treatment, and postoperative 

management will be expected. In addition to daily rounds, the student will 

participate in regularly scheduled orthopaedic conferences and clinics. 

ORSU D671 - Traumatic Orthopaedics (1-12 Credits) 
ORSU D672 - Pediatric Orthopedics (1-12 Credits) 
The student will have the opportunity to participate in various outpatient 

clinics including limb deficiency, cerebral palsy, clubfoot, general pediatric 

orthopaedics, scoliosis, upper extremity, spina bifida, rheumatology, 

sports medicine and genetics. The student will also be able to observe 

surgeries and attend the motion analysis laboratory. The student will 

be expected to attend surgical case conferences, patient care rounds, 

resident education lectures, and journal clubs. The student may also be 

required to give a case report at the direction of the attending. 

ORSU D673 - Sports Medicine (1-12 Credits) 
This course is designed to give medical students exposure to full 

complement of Sports Medicine Care. You will spend time with Certified 

Athletic Trainers in/at their High School Training Room/Events, Physical 

Therapist treating acute and overuse athletic injuries, Physicians and 

Surgeons practicing Sports Medicine. 

ORSU D690 - Clinical Orthopaedics (1-12 Credits) 
ORSU D691 - Adult Orthopaedics (1-12 Credits) 
ORSU D672 - Pediatric Orthopedics (1-12 Credits) 
The student will have the opportunity to participate in various outpatient 

clinics including limb deficiency, cerebral palsy, clubfoot, general pediatric 

orthopaedics, scoliosis, upper extremity, spina bifida, rheumatology, 

sports medicine and genetics. The student will also be able to observe 

surgeries and attend the motion analysis laboratory. The student will 

be expected to attend surgical case conferences, patient care rounds, 

resident education lectures, and journal clubs. The student may also be 

required to give a case report at the direction of the attending. 

ORSU D673 - Sports Medicine (1-12 Credits) 
This course is designed to give medical students exposure to full 

complement of Sports Medicine Care. You will spend time with Certified 

Athletic Trainers in/at their High School Training Room/Events, Physical 

Therapist treating acute and overuse athletic injuries, Physicians and 

Surgeons practicing Sports Medicine. 

Pathology & Microbiology (PAMB) 
PAMB D620 - M-IV Pathology (1-12 Credits) 
This rotation will consist of an introduction to and some experience in 

Anatomic Pathology and Clinical Pathology. The student may participate 
in the performance of autopsies and examination of surgical material and 
cytologic material and have some exposure to forensic pathology and 
forensic medicine. Also there may be some experience and insight into 

basic areas of Clinical Pathology, including Hematology, Microbiology, 

Clinical Chemistry, Immunopathology, Urinalysis and Blood Banking. 

Certain areas may receive more attention or concentration than others 
depending on the interest or background of the individual student. During 
this rotation, the student will gain a better understanding of the scope 
and limitations of the hospital laboratory and pathology services and will 
better understand the role of the hospital pathologists and the laboratory 
in the overall care of patients and function of the institution. 

PAMB D621 - M - IV Pathology - Dorn Veterans Affairs Medical 
Center (1-12 Credits) 
This rotation will consist of an introduction to and some experience in 

all phases of Anatomic and Clinical Pathology. The student will participate 
in the performance of autopsies and examination of surgical material and 
cytologic material as well as participate in evaluation of abnormal 
laboratory tests and the clinical correlation of those tests. Also, 
there will be some experience and insight into basic areas of Clinical 
Pathology, including Hematology, Microbiology, Clinical Chemistry, 
Immunopathology, Urinalysis and Blood Banking. Certain areas may 
receive more attention or concentration than others depending on the 
interest or background of the individual student. During this rotation, 
the student will gain a better understanding of the scope and role of 
pathology services and will better understand the role of the pathologists 
and the laboratory in the overall care of patients and function of the 
hospital. 

PAMB D622 - Special Topics in Immunology (1-12 Credits) 
The student will work with on T and B lymphocytes, monocytes, 
macrophages, dendritic cells, natural killer cells and their precursors 

from peripheral blood, cord blood, lymphoid and other tissues obtained 

from patients or experimental hosts. Considerable attention will be 
given to cell phenotyping, apoptosis induction, cytokine production, 
proliferation, cytotoxicity and other functional characteristics as well as 
cell-cell interactions. Some of the faculty research focus areas include: 

cancer immunology and immunotherapy particularly using interleukins 

and pharmacologically-activated dendritic cells; complementary and 

alternative medicine; immunotoxicology; biological and chemical defense 

research and infectious disease. The student will have opportunities to 

utilize state-of-the-art technology such as transgenics and knockouts, 

flow cytometry and sorting, confocal and electron microscopy, cytotoxicity 

and proliferation assays, apoptosis and cytokine detection, genomics, 

proteomics and metabolomics technology, histopathology and 
immunohistochchemistry. The studies are aimed at developing 

translational and clinical research.
An eight-week, eight-credit-hour required clerkship in the third year designed to provide a broad overview of general pediatrics. The clerkship consists of four weeks on a general pediatrics ward, including pediatric intensive care unit, and hematology/oncology service; two weeks in the outpatient pediatrics clinic; one week in the newborn nursery and developmental pediatrics; and one week in subspecialty and community pediatrics. In the outpatient setting, students gain experience in the evaluation of patients with common pediatric disorders (e.g., pneumonia, behavioral problems, and gastroenteritis) and in the ambulatory management of complex pediatric disorders, as well as exposure to patients in the child abuse clinic. The inpatient setting provides experience in the full range of pediatric problems from routine pneumonia, croup, and dehydration to the rare and complex entities of congenital disorders and inborn errors of metabolism. In the newborn nursery, students develop skills in the basic newborn examination. During the developmental pediatrics rotation, students make home visits to families of children with special needs. Primary methods of instruction include lecture, problem-based learning, case-based discussion/presentation, clinical preceptorship, problem-solving exercises, home visit, independent learning experiences, conferences, small-group discussion, and teaching rounds. Modes of assessment include the Pediatrics NBME subject examination, a departmental written multiple choice/essay examination, clinical evaluations, an oral examination/presentation, and an Objective Structured Clinical Examination (OSCE). Demonstration of mastery of a prescribed set of clinical skills, included on the Clinical Skills Attainment Document, is required for successful completion of this clerkship.

**PEDI D615 - Pediatric Inpatient/General Ward Acting Internship (AI) (4 Credits)**
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward teams, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSM AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.

**PEDI D616 - Pediatric Critical Care Acting Internship (AI) (4 Credits)**
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward teams, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSM AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.
The student will serve time in the general Pediatrics clinic, which serves as a medical home for wellcare, acute and chronic pediatric medical issues. They may also rotate through various pediatric sub-specialty clinics. The student will be responsible for obtaining history and physical exams and participating in the health care of the patients seen in clinic. Clinic hours are 8:00 a.m. - 5:00 p.m., Monday-Friday. Attendance at the conferences which are required for Pediatric residents will also be required of the student participating in this elective. Evaluations will be based on subjective faculty critiques.

The student will participate in outpatient care of patients with hematologic/oncologic problems. The primary goal for the student is to develop a fundamental understanding of a broad base of common hematologic/oncologic disorders which can be expected to be encountered across the spectrum of medical specialties. Responsibilities will include initial history and physical examination of patients assigned, development of a treatment plan, and utilization of a multidisciplinary patient management approach when appropriate. Students will have the opportunity to participate in outpatient management in the various clinics including Sickle Cell, Hemophilia (pediatrics and adult), and Neuro-oncology and Late Effects/Long Term Follow-Up. The student will be expected to be an active participant in all appropriate conferences.

The student in this elective will function as a member of the medical staff providing care to infants in the Newborn Intensive Care Unit. The student will work under the supervision of the pediatric resident and neonatal faculty of the NICU. The student will be responsible for initial evaluation of babies admitted, including elicitation of history, performance of the physical exam and gestational age assessment, and writing of initial orders. Medical management including gaining experience in technical procedures will be part of the learning experiences. The student will work with the respiratory and nursing staffs to gain insights into these important areas of neonatal intensive care.

The student will function as a member of an interdisciplinary team evaluating children and working with the parents of children having varied developmental problems. This rotation will provide the student with an opportunity to observe and interact with other professionals (psychologists, social workers, special educators, speech language pathologists, physical and occupational therapists, etc.), as they evaluate and plan treatment for children with a wide array of special needs. Some time will also be spent visiting and learning about community resources available to children with special problems.

The student will help evaluate children with endocrine disorders and diabetes. The student will participate in patient care (private office, outreach clinics, inpatient consultation), possible Journal Club, along with basic science and/or clinical project discussion. Grade evaluation will be based on satisfactory clinical performance.

Student will observe and participate in day-to-day routine of a working pediatric practice. Activities will include hospital rounds (primarily at Lexington Medical Center), episodic and well care visits to a pediatrician's office and an introduction to the non-medical aspects of office management. One weekend morning and no night call.

The cardiology elective consists of several distinct areas of service; general inpatient, PICU, NICU, newborn nursery services, and outpatient clinics, particularly the CRS Clinic and private patients seen in the Pediatric Cardiologist Office. The student will spend time in these areas with daily rounds on all of the hospitalized patients. The EKG's, echocardiograms, chest x-rays, and other procedures on each patient will be reviewed. The student will be expected to interpret the EKG's and echocardiograms along with the pediatric cardiologist. The student will attend the CRS Pediatric Cardiology clinics and selected outreach clinics. The student will also attend the private clinics in the Pediatric Cardiology Department. In this setting, the history/physical examination and the diagnosis of congenital heart disease will be emphasized. At the end of the elective, the student will have a good working basic knowledge of pediatric cardiology.

The objectives of this course are to introduce the student to the principles of emergency medicine as applied to infants and children. Clinical emphasis will be placed on treating: acute febrile illnesses, respiratory distress, wound management, orthopaedics, toxicology, critical care, and pre-hospital care. Administrative principles of emergency medicine will also be taught, such as use of consultants, COBRA/EMTALA, and multiple patient management. Five hours of lectures are presented weekly to reinforce important concepts. Other educational opportunities include online lectures, simulation labs, and toxicology workshops.

The student will function as a member of a multidisciplinary team evaluating children suspected of having been physically or sexually abused or neglected. This rotation will provide the student the opportunity to observe and interact with other professionals (psychologists, forensic interviewers, therapists, law enforcement investigators, social workers, attorneys) as they work together to determine the truth about what has happened to a child, and to formulate plans for treatment of the child and the family.

PEDI D672 - Neonatal Intensive Care (1-12 Credits)
The content of this course is designed to present to the student the essential aspects of premature and sick newborn care. Students will get the opportunity to attend high risk deliveries. He/She will be assigned several new patients in the NICU and will be responsible for completing a history, physical, and maturity assessment on each. He/She will observe and participate in special treatment procedures performed on his/her patients, e.g., intravenous and intra-arterial catheter insertions, nasal continuous positive airway pressure, mechanical ventilation procedures, endotracheal intubations and resuscitation. In addition, the student may attend a weekly follow-up clinic for those infants discharged from the NICU. He/She will be responsible for talking with the infant’s parents with guidance from the attending. He/She will make work rounds with the house staff and teaching rounds with the attending physician daily and will participate in all regularly scheduled neonatal and perinatal conferences.

PEDI D673 - Adolescent Elective (1-12 Credits)
M-IV Students will have the opportunity to work at the Student Health Center at Furman University evaluating patients with a variety of acute physical complaints as well as chronic medical and/or emotional conditions. Students can expect to encounter patients with acute infectious disease, sexually transmitted diseases, orthopedic injuries, anxiety disorders, learning disorders, depression and eating disorders. Students will also be expected to complete assigned readings and a series of questions testing their knowledge of common problems encountered in the adolescent population.

PEDI D674 - Ambulatory Pediatrics (1-12 Credits)
This elective is designed for the student who desires exposure to the ambulatory aspects of pediatric practice. Experience will be gained in well child care, behavioral pediatrics, and acute illnesses. The student will participate in daily morning rounds and teaching conferences. Emphases will be placed on interview techniques, parenting concepts, principles of preventive health care, and the diagnosis, differential diagnosis, treatment principles and follow-up care of common acute pediatric illnesses.

PEDI D675 - Pediatric Hematology/Oncology (1-12 Credits)
This rotation will introduce the student to clinical pediatric hematology/oncology. About half the course will consist of learning about hospitalized patients and the other half learning about outpatient pediatric hematology/oncology, especially consultative work. The student can expect to learn about the comprehensive care of children with chronic hematology or oncology diseases, including the psychosocial aspects of their diseases. The student will work primarily with clinical pediatric hematologist/oncologists, but also with other members of the medical team including clinical nurse specialists, social workers, child life specialists, etc., in developing knowledge about the management of these complex problems. The student will attend any conferences or lectures given by the pediatric hematology/oncology staff during this one month period and will have opportunity to use the microscope as much as desired. There will also be opportunity to study a particular patient or topic in-depth if desired by the student.

PEDI D676 - Pediatric Cardiology (1-12 Credits)

PEDI D677 - Pediatric Gastroenterology/Nutrition (1-12 Credits)
Student will attend the outpatient pediatric gastroenterology visits scheduled in the Center for Digestive Health at Patwood Campus of GHS. Typically, patients are seen from 8 am to 4 pm M-TH. Student will also be invited to attend outpatient GI procedures on any of the three procedure days, performed in the Outpatient GI Lab at the Patwood campus. At their discretion, the student will have the option to spend some of the rotation doing inpatient consultation afternoons with the on-call gastroenterologist. The rotation will be primarily an observed experience, where the student will observe outpatient visits. Time can be arranged to attend outpatient visits with the pediatric dietitian as well. In addition, the student will be asked to prepare a topic review (or an equivalent academic pursuit) on an appropriate pediatric gastroenterology topic of their choosing to enhance the learning experience.

PEDI D678 - Pediatric Infectious Disease (1-12 Credits)
Students will participate in care of children with a wide range of infectious disease processes in both inpatient and outpatient setting. Students will participate in direct patient care and one-on-one instruction. Exposure to the clinical microbiology lab and library research techniques will also be a component of this elective.

PEDI D680 - Pediatric Pulmonology (1-12 Credits)
The student will work with the pediatric pulmonologist assessing patients with acute and chronic medical conditions, including but not limited to asthma, recurrent upper and lower respiratory disease, cystic fibrosis and bronchopulmonary dysplasia. The elective will allow the student to independently evaluate a patient before reviewing the patient with the supervising physician. During this elective the student will become more aware of the spectrum of medical conditions treated by a pediatric pulmonologist and may also have the opportunity to observe patients undergoing bronchoscopy.

PEDI D681 - Pediatric Medicine (1-12 Credits)
The Greenville Hospital System Office of Student Services is pleased to offer elective opportunities for senior medical students interested in Med-Peds. Electives are available for students in the inpatient or outpatient setting in the following areas: General medical and pediatric wards, adult and pediatric intensive care, and subspecialty electives in medical or pediatric settings. We do require that students have completed core clerkships in both internal medicine and pediatrics. Electives can be taken as month long blocks of adult or pediatric medicine, or students may arrange for a combined 4 week rotation with 2 weeks of adult and 2 weeks of pediatric experience. Month long rotations with our Med-Peds hospitalist group in Greer are possible when one of our Med-Peds residents is there on rotation. If our residents are not rotating at Greer Memorial during the time you would like to visit, we can make arrangements for you to visit the hospital for a day and meet the Med-Peds faculty there. Students are also encouraged to attend all of our Med-Peds specific activities such as Med-Peds noon conference, combined case conference or evening journal club. During your rotation, you are also encouraged to meet with Dr. Kolarik, our program director and Kelli DaSilva, program coordinator (864) 455-7844, to ensure that your time with us is as productive, informative and enjoyable as possible.
PEDI D682 - Pediatric Newborn Nursery (1-12 Credits)
This rotation provides your best opportunity to learn about comprehensive care of the newborn. Our average daily census on the Pediatric Teaching Service is 23 babies, and we accept newborns at or above 35 weeks' completed gestational age. Each month, common diagnoses in our newborn population typically include heart murmurs, drug exposure, ABO incompatibility, jaundice, minor birth defects, tachyphnea, and high-risk social situations. Every couple of months we also see clavicle fractures, Erb's palsy, Down syndrome, developmental hip dysplasia, cleft palate, hypospadias, and other less common newborn physical findings. Students may additionally learn circumcision skills on this rotation if they so choose; pediatricians perform all circumcisions at our institution.

PEDI D683 - Pediatric Hematology/Oncology (1-12 Credits)
This rotation will allow 3rd year medical students to participate in the care of hematology and oncology patients in the hospital and clinic settings. Under the guidance of an attending hematologist/oncologist, the medical student will shadow and observe direct clinical care of pediatric hematology/oncology patients. By rotation end, they will perform history and physical exams; interpret basic laboratory tests; review peripheral blood and bone marrow aspirate smear; and participate in the planning of comprehensive whole-family care that is the hallmark of the pediatric hematology/oncology team, which consists of physicians, nurse practitioners, nurses, child life, chaplains, social workers and psychologists. Furthermore, the student will be expected to give a brief review of relevant hematology/oncology topics on a weekly basis. Also, bedside teaching occurs during rounds and during clinic visits, so that the student's exposure to most of the common disorders in hematology/oncology will be complete.

PEDI D684 - Pediatric Critical Care (1-12 Credits)
The student is required to have completed the pediatric clerkship prior to taking this elective. The student will function as a member of the pediatric resident team in the pediatric intensive care unit. The purpose of the rotation is to provide students with an introduction to the evaluation and care of critically ill children. Educational material is presented via bedside didactic rounds and guided reading of the PICU notebook, a compilation of relevant critical care articles, etc. No night call is required. The Pass/Fail evaluation is based on subjective faculty critique.

PEDI D685 - Pediatric Lactation Elective (1-12 Credits)
Working in the Newborn Nursery provides your best opportunity to learn about the mechanics of breastfeeding. We currently have a team of lactation consultants who round on breastfeeding mothers daily. You should utilize them as a resource and resist the temptation to give feeding advice to breastfeeding mothers until you feel confident that it is appropriate and consistent with what they recommend.

PEDI D686 - Pediatric Neurology (1-12 Credits)
The student will be exposed to outpatient pediatric neurology, including patients with epilepsy, headache, developmental delays, and other neurologic disorders. They will review neuroanatomy, neuropharmacology, and the neurologic exam in children. They will accompany the neurologist and will be allowed to initially evaluate the patient (for M4’s). They will be exposed to commonly used neurologic diagnostic tests, eg. EEG, MRI, NCV.

PEDI D688 - Community Hospital Inpatient and Urgent Care Pediatrics (1 Credit)
PEDI D689 - Developmental-Behavioral Pediatrics (1-12 Credits)
This 4-week medical student rotation in Developmental-Behavioral Pediatrics will provide an introduction to this subspecialty that focuses on the development of young children and the biological and environmental factors that can influence behavior and development. The student will observe the evaluation and management of children with developmental and behavioral concerns in an outpatient clinical setting and will have the opportunity to interact with members of the multidisciplinary team that includes physicians, psychologists, nurse practitioners, social workers and nurses. There will also be opportunity to learn about the outreach efforts and collaborative projects with community agencies that are focused on promoting healthy child development.

PEDI D690 - Clinical Pediatrics (4-12 Credits)
PEDI D691 - Clinical Pediatrics Ex (1-12 Credits)
PEDI D692 - Clinical Pediatrics Ex II (1-12 Credits)
PEDI D693 - Clinic Pediatrics Ex III (1-12 Credits)
PEDI D694 - Med-Peds Acting Internship (2-12 Credits)
PEDI D695 - Pediatric AI Extramural (4 Credits)
PEDI D697 - Pediatric Urology (1-12 Credits)

Physlg & Pharmacology (PHPH)
PHPH D603 - Medical Neuroscience (4 Credits)
PHPH D621 - Medical Physiology (7 Credits)
PHPH D631 - Pharmacology (7 Credits)

Radiology (RADI)
RADI D620 - Radiology (1-12 Credits)
This course will provide instruction and the opportunity for the student to participate in routine diagnostic imaging procedures. The course will include instruction in the principles of image production and quality control. Instruction will also be given in basic radiation safety. At the completion of the course, the student will have participated in the operation of a diagnostic radiology department. The student will have been made aware of the usefulness and limitations of routinely used procedures in diagnostic radiology.

RADI D621 - Radiation Oncology (1-12 Credits)
The student will participate in the physical diagnosis, treatment planning and treatment delivery of patients receiving therapeutic doses of radiation. The student will attend regularly scheduled rounds to discuss patients currently under treatment and will be encouraged to participate in the group discussion. Students will also attend any regularly scheduled Oncology conferences. Reading assignments will be given.

RADI D622 - Clinical Nuclear Medicine (1-12 Credits)
The course will give the student instruction and experience in the clinical use and performance of nuclear medicine procedures. At the completion of the course, the student will have participated in the performance of all routine nuclear medicine procedures and will have gained some understanding of their clinical usefulness. The chemical and physiologic principles of the various procedures will have been presented and the students’ knowledge of radiation detection and the safe handling of radioactive materials will have been extended.

RADI D660 - Radiological Science (1-12 Credits)
RADI D670 - Introduction to Radiology (1-12 Credits)
During your four week rotation, you will have an introduction to radiology that will take you from the basics of x-rays to the uses of advanced imaging modalities. You will gain an understanding of what a radiologist does and you will have the opportunity to observe a variety of radiological procedures. At the completion of the course, you will have a better understanding of diagnostic and therapeutic options available in radiology.

RADI D690 - Clinical Radiology (4-12 Credits)
RADI D691 - Clinical Radiology II (1-12 Credits)

Surgery (SURG)

SURG D605 - Surgery Clerkship (8 Credits)
An eight-week, eight-credit-hour required clerkship in the third year consisting of primarily inpatient and outpatient experiences with opportunities for outpatient experiences as well. Under the supervision of attending staff physicians and residents, students spend variable amounts of time on general surgery, vascular surgery, trauma, and critical care. Students continue to develop skills in medical history-taking, physical examination, and the use of laboratory data in an organized fashion to understand surgical diseases. During this clerkship, students should develop an understanding of the metabolic and physiologic effects of injury and trauma; correlate disordered physiology with the surgical pathologic process; recognize surgical illness and the place of operative intervention in treatment of diseases; understand the impact of surgery on the patient and family, including the psychological and socioeconomic changes that result from an operation; and acquire surgical techniques and skills basic to all physicians, including wound care, suture technique, and the ability to assist in the operating room. Primary methods of instruction include lecture, case-based discussion/presentation, suture laboratory, conferences, small-group discussion, and teaching rounds. Modes of assessment include the Surgery NBME subject examination, clinical evaluations, and an Objective Structured Clinical Examination (OSCE). Demonstration of mastery of a prescribed set of clinical skills, included on the Clinical Skills Attainment Document, is required for successful completion of this clerkship.

SURG D607 - Senior Surgery Clerkship (4 Credits)
A four-week, four-credit hour required clerkship in the fourth year. Students are offered a choice of two two-week-long rotations in the surgical specialties and academic and clinical experiences in anesthesia, cardiothoracic surgery, neurosurgery, ophthalmology, orthopaedic surgery, otolaryngology, pediatric surgery, plastic surgery, and urology. Both office and hospital-based experiences permit the study of disease processes unique to each of the special areas of surgery, the techniques of diagnosis, the understanding of pathophysiology, and therapy. Management of ambulatory patients is emphasized. During this clerkship, students diagnose diseases particular to the selected surgical specialty and develop the techniques utilized for diagnosis. In addition, students learn to understand the pathophysiology and management of these disease processes, recognize indicated surgical therapy and expected results from the surgical procedures for these diseases, understand and decide when the patient should be evaluated by a surgical specialty related to the disease process, and understand the impact of surgical care on the patient and the family. Students complete a critical analysis for each rotation on a topic of interest. Primary methods of instruction include clinical preceptorship, clinical correlations, and teaching rounds. Modes of assessment include an internal final examination, clinical evaluations, and a review of the quality of the written paper by the course director.

SURG D615 - Surgery Acting Internship (AI) (4 Credits)
A four-week, four-credit hour required clerkship in the fourth year. Students are required to complete the Acting Internship (AI) in one of the following: Family Medicine, Internal Medicine, Pediatrics, Psychiatry, Obstetrics and Gynecology, or Surgery. The AI emphasizes basic generalist competencies, is predominantly an inpatient experience, and includes night call. Acting interns are essential members of the ward teams, although students’ patient loads can be adjusted according to their aptitude. Some of the selectives also provide a minor amount of ambulatory clinical learning. The student has primary and direct responsibility for the continuing care of patients in the community or in one of the University of South Carolina School of Medicine programs at Palmetto Health Richland, the Dorn Veterans Affairs Medical Center, or the Greenville Hospital System University Medical Center. Alternatively, a student may elect to complete the AI as an extramural rotation but must have prior approval for this rotation from the USCSM AI director. The primary mode of instruction is clinical preceptorship. Other educational material may be presented via attending rounds, didactic lectures, subspecialty lectures, weekly grand rounds, resident case presentations, rounds with residents, clinical pathologic conferences, etc., and is dependent upon the specific rotation. Assessment will focus on core clinical skills, including, but not limited to, history and physical examinations, clinical decision making, case presentation, communication with patients, test selection and interpretation, and therapeutic decision making.

SURG D621 - Trauma/Critical Care (1-12 Credits)
SURG D623 - Vascular Surgery (1-12 Credits)
Introduce the student to the pre-operative and post-operative care of the vascular surgery patient as well as expose the student to a wide variety of open surgical and endovascular procedures. Demonstrate the essential skills in the pre-operative evaluation of the vascular surgery patient, including a good vascular history and physical, function efficiently as a first assistant in surgery, understand the basic principles of wound healing and learn more about endovascular catheters and the indications for choosing open versus endovascular intervention, be exposed to a broad scope of vascular surgery including peripheral arterial disease stenting, open and endovascular AAA repair, thrombectomy, AV-fistula creation and revision, amputations and other less common procedures.

SURG D624 - General Surgery (1-12 Credits)
To gain clinical experience with admission, evaluation, diagnosis and consultation, pre-, intra-and postoperative care for patients of all ages to correct or treat various conditions, diseases, disorders, and injuries.

SURG D625 - Pediatric Surgery (1-12 Credits)
The student on this elective will rotate with the doctors in their pediatric surgical practice. The student will work in both private offices and in the hospital setting. Learning experiences will include evaluation of pediatric surgical patients from neonate through adolescence; participation in pediatric surgical conferences and in clinical material; diagnosis and treatment of congenital abnormalities; evaluation and management of pediatric trauma including burn patients; experience in the management and monitoring mechanisms of preoperative and postoperative acutely ill pediatric patients; and exposure to the specialized techniques necessary for management of neonatal patients.
SURG D626 - Anesthesia (1-12 Credits)
Optimal patient care in the perioperative period requires that all physicians become familiar with preoperative evaluation, options for intraoperative management, and principles of postoperative care. Students will be expected to participate in the care of surgical patients with emphasis on intraoperative management, and will gain expertise in techniques of airway management, endotracheal intubation, and vascular access. Exposure to regional anesthetic techniques, obstetric anesthesia, pediatric anesthesia, and cardiac anesthesia is expected. Topics in pharmacology, physiology and critical care will be addressed. The Department will provide a handout of required reading covering basic anesthesia related topics. Evaluations will reflect the student’s daily participation in departmental activities, and a quiz at the end of the rotation will give the student objective feedback on his/her assimilation of important topics. Students also will be expected to take call 2 or 3 times during the month. This can be set up at the student's convenience.

SURG D627 - Emergency Medicine (1-12 Credits)
This course is designed to teach the student the basic components of Emergency Medicine through primary responsibility for patient evaluation and treatment. Opportunities are available for the student to evaluate patients as the first physician contact to develop differential diagnoses and formulate treatment plans. All patients will be presented and discussed with a senior emergency medicine resident or attending and determination of appropriate treatment made. Clinical experiences will encompass the full gamut of illness and injuries presenting to a busy urban Emergency Department. The student will gain experiences in the fundamentals of diagnosis, stabilization, and management of emergency conditions. Five hours of lectures are presented weekly to reinforce important concepts. Other educational opportunities include online lectures, simulation labs, and toxicology workshops.

SURG D630 - General Surgery Precept (1-12 Credits)

SURG D631 - Surgical Oncology (1-12 Credits)

SURG D632 - Office Urology (1-12 Credits)

SURG D634 - Surgical Research (1-12 Credits)

SURG D635 - Clinical Otolaryngology, Head and Neck Surgery (1-12 Credits)
The purpose of this course is to provide the student with an introduction to clinical otolaryngology, head and neck surgery. Anatomy, physiology, and the pathogenesis of disease will be emphasized. The student will become familiar with the use of the otoscope, laryngeal mirrors and the head mirror or head light used for indirect laryngoscopy. He/She will observe and assist with surgical procedures. The student will have the opportunity to see otolaryngologists working in their private practice settings.

SURG D636 - Neurosurgery (1-12 Credits)

SURG D639 - Plastic and Reconstructive Surgery Externship (1-12 Credits)
The elective is designed to integrate the student in the practice of an academic surgeon, provide one-on-one interaction between the student and faculty mentor, involve the student in the pre-operative and post-operative care of the plastic surgery patient, involve the student in a wide variety of plastic and reconstructive surgery procedures, and introduce the student to the plastic surgery literature and help the student to develop a critical analysis of recent publications. Following the rotation, the student will demonstrate the essential skills in the pre-operative evaluation of the plastic surgery patient, function efficiently as a first assistant in surgery, understand the basic principles of wound healing, be able to select appropriate suture material and method of closure for surgical incisions and traumatic wounds, be exposed to the entire scope of plastic and reconstructive surgery including treatment of burns, skin cancers, facial trauma, congenital deformities, breast surgery, microsurgery, and aesthetic surgery, and assist in the design of additional educational objectives of particular interest to the student. The student will work closely with the faculty mentor, functioning as an acting intern in the clinical setting. Additional objectives will be developed with each student based on their special interest or future career orientation. Students will participate in a self-evaluation process of their performance. Evaluation will be based on progress accomplished and completion of the objectives. Cognitive performance, surgical skills and professional behavior will be assessed.

SURG D640 - Honors General Surgery (1-12 Credits)

SURG D643 - Emergency Medicine (LMC) (1-12 Credits)

SURG D644 - Hyperbaric Medicine (4-12 Credits)

SURG D645 - Simulation Medicine (1-12 Credits)

SURG D646 - Wilderness & Environmental Medicine (4-12 Credits)

SURG D647 - Clinical Anesthesia - VA (1-12 Credits)

SURG D649 - Emergency Medicine Ultrasound (1-12 Credits)
The student will be required to complete twenty 8 hour shifts in the ED and perform a minimum of 100 bedside ultrasounds on ED patients. Instruction and supervision will be provided by faculty noted above. Indications for ED ultrasound, the limitations of ultrasound, knobology, and image acquisition will be emphasized. The student will focus on, but is not limited to, imaging of the following: gallbladder and biliary tract, kidneys, heart, aorta, and pelvic organs. In addition, ultrasound will be used during guided procedures, examining for intra-abdominal fluid in traumas, and for foreign body imaging. The student will be required to keep a log of ultrasounds performed with follow up on confirmatory studies obtained. Twenty ultrasounds performed will be digital video and reviewed with the instructor who is present on shift. The student is to be present and participate at ED ultrasound video review sessions and lectures. One online case will be produced during the rotation, with the aide of the course director, to be distributed to the EM residents, fellows, and faculty. Suggested archived video will be reviewed by the student.

SURG D651 - Emergency Med/ Sparbg (1-12 Credits)

SURG D661 - Emergency Care (2-12 Credits)
SURT D662 - Emergency Medicine - Assessment and Observation Unit (1-12 Credits)
The student will get a deep appreciation of emergency medicine that leads to clinical observation, like chest pain and syncpe/TIA amongst other diagnosis, as well as the continuum of psych patients from their initial presentation through their observation to either psych in-patient care or out-patient care. In the rapid assessment we will see plenty of patients and learn the differential to not anchor bias. We will attend to lacerations and abscesses, read on average 8 ECGs as we are responsible for physician in triage ECG patient care.

SURT D670 - General Surgery (1-12 Credits)

SURT D673 - Pediatric Neurosurgery (1-12 Credits)

SURT D674 - Emergency Medicine (1-12 Credits)
This elective is designed to teach the basics of Emergency Medicine through patient evaluation and treatment. Opportunities are available for the student to evaluate patients as the first physician contact to develop differential diagnoses and formulate treatment plans. All patients will be presented and discussed with an emergency attending. Students will work in the adult areas of the Emergency Department. Patients of all types may be seen - pulmonary, cardiac, and trauma. The student will gain experiences in the fundamentals of diagnosis, stabilization, and management of emergency conditions. Time in the simulator center doing airways, wound care and procedures is included.

SURT D675 - Surgical Pediatrics Preceptorship (1-12 Credits)
This elective offers the student an opportunity to work closely with pediatric surgeons in the office and hospital practice using the preceptor method to provide an exemplary approach to the management of problems in surgical pediatrics. The main emphasis of the course is to provide a basis for the comprehensive care of children requiring surgical intervention. The student will be exposed to the basic surgical techniques and be given the opportunity to participate during certain procedures. Patients presenting with complaints ranging from management of para-surgical congenital anomalies will be seen in this setting. The student will work as part of a team of the pediatric surgery service, participating in preoperative, intraoperative, and postoperative care. The patient population will consist of age groups from the premature newborn to the young adolescent. Exposure to a broad spectrum of cases needing surgical intervention, and/or management, will be provided. Hospital rounds, lectures, and conferences will be scheduled for the student to parallel the surgeon.

SURT D676 - Anesthesia (1-12 Credits)
Optimal patient care in the perioperative period requires that all physicians become familiar with preoperative evaluation, options for intraoperative management, and principles of postoperative care. Students will be expected to participate in the care of surgical patients with emphasis on intraoperative management, and will gain expertise in techniques of airway management, endotracheal intubation, and vascular access. Exposure to regional anesthetic techniques, pediatric anesthesia, and cardiac anesthesia is expected. Topics in pharmacology, physiology and critical care will be addressed. Evaluations will reflect the student's daily participation in departmental activities.

SURT D677 - Surgical Critical Care Rotation (1-12 Credits)
This four-week acting internship provides students with additional experience in the concepts and diagnostic procedures used in surgical critical care. Students are assigned to the surgical critical care service at Greenville Memorial hospital, where they provide consultative care for trauma, vascular, neurosurgical, and general surgery patients admitted to the Intensive Care Unit. Students also participate in trauma resuscitations in the Emergency Room and the initial workup of trauma patients. Students care for patients as their primary caregiver under the supervision of the team's residents and faculty. Students take call every four night participating in the care of the patients in the Intensive Care Unit and trauma resuscitations. Students evaluate all assigned patients completing consultation reports including physical diagnosis, diagnostic assessment and plan of care. Students round on their assigned patients daily, presenting their patients and therapeutic plan to the team on morning rounds. Students will also attend Green Surgery (Trauma) morning report each morning to coordinate care with the trauma team on assigned trauma patients. Clinical learning is supplemented with The Society of Critical Care Medicine's Intensive Care course slides available for the students to review online. The student will participate in surgical morning conferences as assigned.

SURT D678 - ENT Head and Neck Surgery (1-12 Credits)
During a rotation with the otolaryngology – head and neck service, students will have the opportunity to experience clinical and surgical patient care. The course content may be adapted to facilitate more time in the clinic if desired, particularly important for those going into primary care fields who will need to be adept at a good head and neck exam. All students will be expected to participate in some operative exposure as well. Students may expect to see a variety of cases including: pediatric ENT, nasal and sinus, head and neck tumors, facial trauma and reconstruction, and otology. They will have the opportunity to learn about basic audiology and allergy as well. Daily participation is expected unless other arrangements are made with the course director.

SURT D679 - Minimal Access Surgery Elective (1-12 Credits)
Minimal access, laparoscopic, or minimally invasive surgical procedures are rapidly gaining in popularity. This subspecialty of general surgery implements a different approach to common surgical maladies. During this rotation the student will be an active participant of the minimal access team and will be exposed to complex foregut (including bariatric), biliary, solid organ, and hernia surgeries. The student will be responsible for rounding and following patients on the inpatient service, and participating as an assistant during surgery.

SURT D680 - Vasclr Intrvntn Rad Elective (4 Credits)
SURT D684 - Surgery Research (1-12 Credits)
SURT D686 - Colon and Rectal Surgery (1-12 Credits)
SURT D689 - Pediatric Surgery (1-12 Credits)
SURT D690 - Clinical Surgery (4-12 Credits)
SURT D691 - Clinical Surgery Externship (1-12 Credits)
SURT D692 - Clinical Surgery Externship II (1-12 Credits)
SURT D695 - Surgery AI Extramural (4 Credits)

Curriculum

Registration for courses offered in the School of Medicine is limited to medical and graduate students enrolled in School of Medicine programs or visiting students from other LCME accredited medical schools who
Program Objectives
A set of coherent and comprehensive objectives has been established for the medical education program in the School of Medicine. The educational program in the School of Medicine shall:

1. ensure the horizontal and vertical integration of basic and clinical sciences;
2. promote students’ mastery of both scientific and clinical knowledge;
3. provide an understanding of the biopsychosocial model of health care;
4. ensure the modeling of cost-effective, evidence-based medicine to students;
5. encourage students’ personal and professional development;
6. foster team-building through student self and peer evaluation;
7. foster students’ acquisition of necessary clinical, communication, and problem-solving skills;
8. utilize a variety of learning formats;
9. provide a variety of clinical settings with diverse patient populations;
10. nurture students’ collaboration with other health care team members;
11. set appropriate and realistic performance standards for students;
12. utilize both formative and summative evaluation methods for students;
13. increase the use of competency-based student assessments;
14. promote students’ interest in scientific exploration;
15. provide a range of elective opportunities for students;
16. educate generalist physicians who are potentially eligible for practice in South Carolina;
17. prepare altruistic, knowledgeable, skillful, and dutiful physicians;
18. graduate physicians who attend equally well to all aspects of health care.

Physician Competencies
1. Patient Care: ability to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health;
2. Medical Knowledge: demonstrate knowledge of established and evolving biomedical, clinical, epidemiological, and social-behavioral sciences, as well as the application of this knowledge to the patient;
3. Practice Based Learning and Improvement: investigate and evaluate the care of patients, appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self evaluation and life-long learning;
4. Systems Based Practice: demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optional health care;
5. Professionalism: demonstrate a commitment to carry out professional responsibilities and an adherence to ethical principles;
6. Interpersonal Skills and Communication: possess skills that are effective in the exchange of information and collaboration with patients, their families, and health professionals.

Educational Objectives and Competencies for Graduates
A set of educational objectives has been established for students of the School of Medicine. After completion of the four-year medical education program in the School of Medicine, a graduate shall have demonstrated to the satisfaction of the faculty the following knowledge, skills, and attitudes and behaviors.

1. Knowledge:
   a. knowledge of the normal structure and function of the body and its major organ systems; Medical Knowledge, Patient Care
   b. knowledge of the molecular, biochemical, and cellular mechanisms that are important in maintaining the body’s homeostasis; Medical Knowledge, Patient Care
   c. knowledge of the various causes (genetic, developmental, metabolic, toxic, microbiologic, autoimmune, neoplastic, degenerative, psychosocial, and traumatic) of maladies and of the pathogenesis of maladies; Medical Knowledge, Patient Care
   d. knowledge of the altered structure and function (pathology and pathophysiology) of the body and its major organ systems seen in various diseases and conditions; Medical Knowledge, Patient Care
   e. knowledge of the frequent clinical, laboratory, roentgenologic, and pathologic manifestations of common maladies; Medical Knowledge, Patient Care
   f. knowledge of the important non-biological determinants of health and of the economic, psychological, social, and cultural factors that contribute to the development and/or continuation of maladies; Medical Knowledge, Patient Care, Systems Based Practice
   g. knowledge of the epidemiology of common maladies within a defined population and systematic approaches to reduce the incidence and prevalence of those maladies; Medical Knowledge, Patient Care, Systems Based Practice
   h. knowledge of various approaches to, and implications of, the organization, financing, and delivery of health care; Patient Care, Systems Based Practice
i. knowledge of the theories and principles that govern ethical decision-making and of the major ethical dilemmas encountered in medical practice, particularly at the beginning and end of life and resulting from the rapid expansion of knowledge in genetics; Medical Knowledge, Patient Care, Professionalism

j. knowledge about relieving pain and ameliorating the suffering of patients; Medical Knowledge, Patient Care

k. knowledge of the threats to medical professionalism posed by the conflicts of interest inherent in various financial and organizational arrangements for medical practice. Patient Care, Professionalism

l. knowledge of the quality improvement methods and the factors associated with increased patient safety; Patient Care, Practice Based Learning and Improvement

2. Skills:

a. the ability to obtain an accurate and complete medical history, with special attention to issues related to age, gender, sexual orientation, and socio-economic status and fully document that information as part of a medical record; Medical Knowledge, Patient Care, Interpersonal Skills and Communication

b. the ability to perform both a complete and organ-specific examination, including a mental status examination and fully document that information as part of a medical record; Medical Knowledge, Patient Care, Interpersonal Skills and Communication

c. the ability to perform routine technical procedures; Medical Knowledge, Patient Care

d. the ability to interpret the results of commonly used diagnostic procedures; Medical Knowledge, Patient Care

e. the ability to communicate effectively, orally and in writing, with patients and their families, colleagues, and others with whom physicians must exchange information in carrying out their responsibilities; Patient Care, Interpersonal Skills and Communication

f. the ability to retrieve, manage, and utilize information for solving problems and making decisions relevant to the care of individuals and populations; Medical Knowledge, Patient Care, Practice Based Learning and Improvement

g. the ability to identify factors placing individuals at risk for disease or injury, select appropriate tests for detecting patients at risk for specific diseases or in the early stage of diseases, and determine appropriate response strategies; Medical Knowledge, Patient Care

h. the ability to construct appropriate management strategies, both diagnostic and therapeutic, for patients with common acute and chronic medical and psychiatric conditions, surgical conditions, and conditions requiring short- and long-term rehabilitation therapy; Medical Knowledge, Patient Care

i. the ability to recognize and institute appropriate initial therapy for patients with immediately life-threatening cardiac, pulmonary, or neurological conditions, regardless of causation; Medical Knowledge, Patient Care

j. the ability to recognize and outline an initial course of management for patients with serious conditions requiring critical care; Medical Knowledge, Patient Care

k. the ability to reason deductively in solving clinical problems; Medical Knowledge, Practice Based Learning and Improvement

l. the ability to access and evaluate critically medical literature; Medical Knowledge, Practice Based Learning and Improvement

m. the ability to understand the power of the scientific method in establishing the causation of disease and efficacy of traditional and non-traditional therapies. Practice Based Learning and Improvement

n. the ability to function as part of an interprofessional health care team and/or serve in a leadership role; Patient Care, Systems Based Practice, Interpersonal Skills and Communication

3. Attitudes and Behaviors:

a. compassionate treatment of patients and respect for their privacy and dignity; Professionalism, Interpersonal Skills and Communication

b. honesty and integrity in all interactions with patients and their families, colleagues, and others with whom physicians must interact in their professional lives; Professionalism

c. commitment to advocate at all times for the interests of patients over personal interests; Systems Based Practice, Professionalism

d. commitment to provide care to patients unable to pay for medical services and to advocate for access to health care for members of traditionally underserved populations; Systems Based Practice, Professionalism

e. commitment to engage in life-long learning in order to stay abreast of relevant scientific advances; Practice Based Learning and Improvement, Professionalism

f. the capacity to recognize and accept limitations in one's knowledge and clinical skills and a commitment to improve that knowledge and ability through self-assessment; Medical Knowledge, Practice Based Learning and Improvement, Professionalism

g. understanding of, and respect for, the roles of other health care professionals and of the need for collaboration with them in caring for patients and promoting the health of defined populations; Systems Based Practice, Interpersonal Skills and Communication

Curriculum (160 Credit Hours)

The School of Medicine is dedicated to the goals of preparing students in the art and science of medicine and providing students with a background for further postgraduate training in a variety of fields of medicine. The curriculum is designed to promote professional growth and a compassionate response to patients' needs, to assist students in understanding the complexity of patient care, and to provide students with a perspective on the role of medicine in society.

The four-year curriculum consists of basic science courses and clerkships in applied clinical medicine. All students are required to complete a specific set of courses during the four years, except as noted under “Course Exemptions.” Elective opportunities are presented throughout the curriculum to assist students in pursuing their individual interests and career goals.

Basic Sciences (Years 1 and 2)

During the first two years of medical school, students study a core curriculum of those basic sciences and clinical disciplines necessary for an understanding of the structure and function of human systems. During the first year, students gain a basic understanding of normal structure and function. During the second year, emphasis is placed on microbiology, pathology, and general therapeutic principles. Throughout the first two years, clinical correlations to basic science material are integral components of the curriculum, as is the four-semester Introduction to Clinical Medicine course continuum. Interdisciplinary material on such subjects as nutrition, substance abuse, ethics and professionalism, ultrasonography, patient safety and quality, and
Electives

Elective opportunities for third and fourth-year students are listed by department in the OASIS scheduling system. Electives are available at the discretion of the department chair. National and international elective programs are also available and encouraged. For more information on third and fourth-year electives, contact the School of Medicine director of enrollment services/registrar.

**Clinical Skills Attainment Document**

Medical students must demonstrate mastery of all required clinical skills enumerated in the Clinical Skills Attainment Document (CSAD) prior to graduation from the School of Medicine. Demonstration of mastery of some of these clinical skills is required for a passing grade in the second-year Introduction to Clinical Medicine course (see “Interdisciplinary Courses” section), while demonstration of mastery of other clerkship-specific clinical skills is required for successful completion of each third-year clinical clerkship (see “Clinical Sciences” section). In addition, students must demonstrate mastery of required non-departmental clinical skills during the third and fourth years of medical education.

**Guidelines for Conduct in Teacher/Learner Relationships**

1. **Statement of Philosophy**
   The University of South Carolina School of Medicine is committed to fostering an environment that promotes academic and professional success in learners and teachers at all levels. The achievement of such success is dependent on an environment free of behaviors which can undermine the important mission of our institution. An atmosphere of mutual respect, collegiality, fairness, and trust is essential. Although both teachers and learners bear significant responsibility in creating and maintaining this atmosphere, teachers also bear particular responsibility with respect to their evaluative roles relative to student work and with respect to modeling appropriate professional behaviors. Teachers must be ever mindful of this responsibility in their interactions with their colleagues, their patients, and those whose education has been entrusted to them.

2. **Responsibilities in the Teacher/Learner Relationship**
   a. Responsibilities of Teachers
      i. Treat all learners with respect and fairness;
      ii. Treat all learners equally regardless of age, gender, race, ethnicity, national origin, religion, disability, or sexual orientation;
      iii. Provide current material in an effective format for learning;
      iv. Be on time for didactic, investigational, and clinical encounters;
v. Provide timely feedback with constructive suggestions and opportunities for improvement/remediation when needed.

b. Responsibilities for learners

i. Treat all fellow learners and teachers with respect and fairness;

ii. Treat all fellow learners and teachers equally regardless of age, gender, race, ethnicity, national origin, religion, disability, or sexual orientation;

iii. Commit the time and energy to your studies necessary to achieve the goals and objectives of each course;

iv. Be on time for didactic, investigational, and clinical encounters;

v. Communicate concerns/suggestions about the curriculum, didactic methods, teachers, or the learning environment in a respectful, professional manner.

3. Behaviors Inappropriate to the Teacher-Learner Relationship

These behaviors are those which demonstrate disrespect for others or lack of professionalism in interpersonal conduct. Although there is inevitably a subjective element in the witnessing or experiencing of such behaviors, certain actions are clearly inappropriate and will not be tolerated by the institution. These include, but are not limited to, the following:

- Unwanted physical contact (e.g. hitting, slapping, kicking, pushing) or the threat of the same;
- Sexual harassment (including romantic relationships between teachers and learners in which the teacher has authority over the learner’s academic progress) or harassment based on age, gender, race, ethnicity, national origin, religion, disability, or sexual orientation;
- Loss of personal civility including shouting, personal attacks or insults, displays of temper (such as throwing objects), use of culturally insensitive language;
- Discrimination of any form including in teaching and assessment based upon age, gender, race, ethnicity, national origin, religion, disability, or sexual orientation;
- Requests for another to perform inappropriate personal errands unrelated to the didactic, investigational, or clinical situation at hand;
- Grading/evaluation on factors unrelated to performance, effort, or level of achievement.

4. Avenues for Addressing Inappropriate Behavior in the Teacher/Learner Context

a. Learners’ Concerns

Learners may address situations in which they feel that they have been the object of inappropriate behavior at various levels. At the most basic level, the most effective way to handle a situation may be to address it immediately and non-confrontationally. Oftentimes, a person is simply unaware that his/her behavior has offended someone, or even if aware, will correct the behavior appropriately if given the opportunity to do so in a way that is not threatening. The way to raise such an issue is to describe the behavior factually (“When you said...”), describe how the behavior made you feel (“I felt...”), and state that the behavior needs to stop or not be repeated (“Please, don’t do that again.”).

Sometimes, such a request is not successful, or the person repeats the behavior, or the learner does not feel comfortable speaking directly to the teach about his/her behavior. In those cases, it may be helpful to discuss the behavior with course/clerkship directors, laboratory mentors, program directors, or department chairs. Students may also elect to speak to any one of the assistant deans or the assistant dean for minority affairs, the director of student services, or one of the School of Medicine’s three ombudspersons for informal advice and counsel about these issues. These individuals may offer additional suggestions for resolving the matter informally, such as, for example, speaking to the individual on the learner’s behalf or on behalf of an entire class, raising the general issue in a faculty meeting, assisting the learner with writing to the individual teacher or even direct intervention to get the behavior to stop.

If no satisfactory resolution is reached after these discussions or the learner does not feel comfortable speaking to these individuals, he/she may bring the matter formally to the attention of the School of Medicine administration. The avenues for this more formal reporting vary depending upon the status of the reporting individual. In either case the learner always has the option of submitting a formal complaint to the University’s Student Grievance Committee through the procedure outlined in the Carolina Community.

i. If the person reporting the behavior is a medical student:

   The student should speak with the director of student services, the associate dean for medical education and academic affairs, or one of the school’s ombudspersons.

ii. If the person reporting the behavior is a graduate student or MD/PhD student pursuing their graduate studies:

   The student should speak with the director of student services or the director of graduate studies program.

b. Teachers’ Concerns

If a teacher feels that a learner has engaged in inappropriate behavior, it is likewise most effective to address the situation immediately and non-confrontationally. If the matter is not resolved satisfactorily, the teacher should contact the course/clerkship director, program director, or laboratory mentor to discuss the matter. If the teacher wishes to make a formal allegation of misconduct, they should contact the following members of the administration:

i. If the matter involves a medical student, contact one of the assistant or associate deans in the Office of Medical Education and Academic Affairs.

ii. If the matter involves a graduate student, contact the director of the graduate studies program.

These allegations will be handled on an individual basis by the appropriate School of Medicine official in consultation with the dean and where applicable according to established School of Medicine and University policies.

5. Procedures for Handling Allegations of Inappropriate Behavior in the Teacher/Learner Context

a. Upon being notified of alleged inappropriate behavior, the associate assistant dean or program director will notify the dean and other appropriate senior administration officials in a written report within five business days of the allegation.

If the complaint is lodged against a faculty member, other than those matters referred to the Office of Equal Opportunity Programs, the matter will be handled by the dean in consultation with the appropriate associate dean and department chair and, where established, the appropriate School of Medicine and University policies. The dean may also choose to appoint an ad hoc committee to investigate the complaint.
Academic Fees 2020-2021

For a schedule of University refund allowances, contact the School of Medicine director of enrollment services/registrar. All required books and equipment are available in the University of South Carolina Bookstore. Students are given a list of acceptable models for clinical equipment and are required to purchase such items as stethoscopes and sphygmomanometers, according to individual preference.

### Financial Information/Aid

#### Financial Information

**Fees and Expenses**

All students are required to register and pay tuition and fees each semester. Any financial aid a student might be awarded is disbursed at the time of registration for the fall and spring semesters.

Fees and charges imposed by the University are subject to change by the Board of Trustees without notice.

No degree will be conferred upon any candidate prior to the payment of all tuition, fees, and indebtedness to the University.

A full-time student who withdraws within a specified period of time may be eligible for a prorated refund in accordance with University policy. For a schedule of University refund allowances, contact the School of Medicine director of enrollment services/registrar.

### Books and Equipment

All required books and equipment are available in the University of South Carolina Bookstore. Students are given a list of acceptable models for clinical equipment and are required to purchase such items as stethoscopes and sphygmomanometers, according to individual preference.

### Computers

A laptop computer with designated software is required as part of the technology enhanced curriculum in the School of Medicine. Specifications are available on the School of Medicine web site and are updated as necessary.

### Refund Policy

1. **Policy**

   The University will refund a part of academic fees in certain cases:
   a. Changes in a student’s status, which may require a refund.
      i. Change in a full-time student’s schedule, which results in reclassification to part-time status
      ii. Change in a part-time student’s schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Withdrawal from the University
      iii. Cancellation of a class by the University

2. **Refund Requests**

   All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the last summer session (Summer II). Refunds may be requested at any time during the academic year in which the applicable term occurs.

3. **Determining the Refundable Portion Procedure**

   The refund is for the portion of the tuition, fees, room, board, and other charges assessed the student under the control of the University equal to the portion of the period of enrollment for which the student has been charged that remains on the withdrawal date, less any unpaid amount of a schedule cash payment for the period of enrollment for which the student has been charged.

4. **Withdrawal Refund Policies**

   Standard Refund Policy For Withdrawal From The University
   100% refund of the charges if the student’s **Official Withdrawal Calculation** is by the first week of classes of a sixteen-week session TITLE IV Funds
   Refunds Policy For Students Who Have Received TITLE IV Funds And Withdraw From The University
Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60% of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from school.

**TITLE IV Refund Distribution**
For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, refunds will be returned in the order prescribed by federal regulations. The institution must return the refund to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Refunds are to be distributed to the financial aid programs in the following order:
- Unsubsidized Federal Stafford
- Federal PLUS Loan
- State funds
- Private or institutional scholarship(s) and loan(s)

Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

Exit interviews are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins, or Federal Nursing Loans. Exit interviews can be completed on the Internet at http://www.sc.edu/financialaid/. Click on "Loan Counseling on the Web" and follow the instructions. Or, you may contact the Office of Student Financial Aid and Scholarships at (803)-216-3629 or the Loan Collection Department of the Bursar’s Office at (803)-777-3559 for the Columbia Campus. Telephone numbers and referenced offices are different for each campus.

**5. Summer Sessions and Other Shortened Sessions Refund Procedure for Withdrawal**
Adjusted refund schedules are printed in the Master Schedule of Classes and are available in the Office of Financial Services.

<table>
<thead>

</table>

**8. Appeals Process**
A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. A Withdrawal Appeals Committee reviews and act on all appeals.

**Financial Aid**
Students in the School of Medicine are individually responsible for tuition, fees, and living expenses. It is imperative that all students anticipating the need for financial assistance at any time during their medical educations undertake early long-term planning. Limited aid specifically oriented for medical students is available from the School of Medicine. However, financial aid programs of the University of South Carolina make it possible for many students to attend the University who could not do so if they were entirely dependent on their own resources. Eligibility for all aid, except for some academic scholarships, depends on applicants’ financial circumstances. Students must file a Free Application for Federal Student Aid (FAFSA) or Renewal FAFSA annually to determine the amount of assistance they are eligible to receive. Information and
application forms for the various financial aid programs may be obtained from the School of Medicine Office of Student and Career Services. www.sc.edu/financialaid (http://www.sc.edu/financialaid/)

**Policy for Satisfactory Academic Progress for Financial Aid Eligibility**

Medical students follow the graduate satisfactory academic progress policy set by the Office of Student Financial Aid and Scholarships.

Listed below are some of the financial aid programs available to students. For complete information, contact the School of Medicine Office of Student and Career Services.

**Loans**

**Federal Loan Programs**

Information about federal programs is subject to change based upon changes in federal legislation.

The Federal Direct Unsubsidized Loan Program provides long-term, low interest loans to undergraduate, graduate, and professional students. In August of 2013, Congress passed and the President signed, the Bipartisan Student Loan Certainty Act of 2013. The Act ties federal student loan interest rates to the financial markets. Under the Act, interest rates are determined each spring for new loans being made for the upcoming award year, which runs from July 1 to the following June 30. Each loan has a fixed interest rate of the life of the loan. The interest rate for the 2019-2020 academic year for the unsubsidized Federal Stafford Loans is 6.08%. These rates are subject to change by law.

Medical students have $40,500 per year in unsubsidized eligibility, and a career maximum total of $224,000 including any amounts borrowed as an undergraduate. Interest begins to accrue at the time the lender makes the loan and is not automatically deferred. A student may choose to pay the interest or request that it be deferred. This results in the deferred interest being capitalized and creating a greater expense during repayment.

Medical students are now eligible to borrow under the Federal Direct PLUS Loan Program up to their cost of attendance minus other estimated financial assistance. The terms and conditions applicable to the Parent PLUS loans also apply to Grad PLUS. These requirements include a determination that a student does not have an adverse credit history. Repayment begins on the date of the last disbursement of the loan. The interest rate for Grad PLUS is 7.08% for the 2019-2020 academic year. To apply for this loan students are required to complete the Free Application for Federal Student Aid (FAFSA) and must also have applied for a Federal Direct Subsidized and Unsubsidized Loan.

**Federal Programs with a Service Commitment**

Information about federal programs is subject to change based upon changes in federal legislation.

**National Health Service Corps Scholarships**

Medical students pursue primary care and serve in health professional shortage areas in the United States. Scholarships are paid by their particular branch. In addition, a monthly stipend is paid directly to the student. Recipients are required to serve 45 days of training duty each year. Repayment is on a year-for-year basis. A deferment for postgraduate education is given only if a student is not chosen for a military residency program.

**Other Programs with a Service Commitment**

**The John T. Stevens Foundation Grant**

This grant is for up to four years of medical education expenses and is awarded to worthy medical students enrolled in the School of Medicine who reside in Lancaster or Kershaw county. The grant requires the scholar to practice in Lancaster or Kershaw county for a defined period of time upon completion of training. Call the USC School of Medicine at 803-216-3629 for more information.

**Scholarships**

**Private Sources**

Columbia Medical Society Auxiliary Scholarship. Established by members of the Columbia Medical Society and Auxiliary, several scholarships are awarded annually to deserving medical students.

Fullerton Medical Scholarship. The School of Medicine nominates one candidate from each entering class for consideration for the Fullerton Medical Scholarship. The scholarship nominee is guaranteed a minimum of $1,000 for one year and competes for a four-year, $80,000 Fullerton Medical Scholarship with medical students from other medical schools in North and South Carolina. Must interview by January 16 for consideration for Fall matriculation.

South Carolina Medical Association Foundation in alliance with the South Carolina Medical Association Alliance. These scholarships are awarded annually to several academically worthy students in need of financial assistance.

**Alumni Scholarship**

This scholarship is awarded annually (or as funds are available) to one or more students who demonstrate a strong academic record, excellent professional skills, and a commitment to serving patients’ needs.

American Medical Association Foundation Scholars Award. This scholarship is awarded to a medical student based on financial need and/or academic excellence.

**Anneniversary Scholarship**

Income from this fund is used to award scholarships to students selected by the School of Medicine Scholarship and Loan Committee.

Tom L. Austin Student Scholarship. Income from this endowed fund, established by the Department of Neonatology at Palmetto Health Richland in honor of Dr. Tom L. Austin, is used to award scholarships to students selected by the School of Medicine Scholarship and Loan Committee.

Bruner-Waddell Scholarship in Medicine. This endowed scholarship was established by the Bruner and Waddell families in memory of Robert Rayson Bruner Jr. and Henry Grady Waddell, M.D. It is awarded annually to a medical student who is a resident of South Carolina.

Laura R. and William M. Corbett Trust Scholarship. This funding started as a loan program before the School of Medicine Columbia was founded and is now a scholarship program for new and continuing medical students based on academic merit.

Lilla Bush McNulty and William McNulty Medical Student Scholarship. This scholarship is awarded by the School of Medicine Columbia and is based on financial need. The criteria may be revised to include other
stipulations such as clinical areas of interest, academic merit, geographic and/or other requirements/preferences.

The William Childs Cantey Sr., M.D., Medical Scholarship. Funds generated by the endowment for this scholarship, which honors Dr. Cantey, are allocated toward tuition for its recipient, who must be a resident of South Carolina. The scholarship is renewable each year for four years and the recipient is designated as a Cantey Scholar.

Thomas C. Chow, M.D., D.P.H. and Rosemary Y. Chow, M.D., D.P.H. Scholarship. This endowed scholarship, which honors the parents of Jim C. Chow, M.D., a 1985 School of Medicine graduate, is awarded to a fourth-year medical student who has demonstrated an interest in a career in family or preventive medicine.

The William Q. and Marguerite D. Claytor Medical Scholarship. This endowed scholarship was established by Dr. Hubert Claytor in memory of his parents.

Dr. and Mrs. George W. Dick Scholarship in Medicine. The income from a fund provided by Mrs. Caroline McKissick Dial, in memory of her father and mother, provides an annual scholarship to a medical student based on scholastic achievement and financial need.

William B. Douglas Scholarship. The interest from this permanent endowment is awarded to medical students in good academic standing and with financial need. Preference is given to South Carolina residents, especially those from the Florence area.

Dr. Lawrence H. Erdman Scholarship. This endowed scholarship, in memory of Dr. Erdman, is awarded to an outstanding student selected by the School of Medicine Scholarship and Loan Committee. Consideration is given to student with financial need and scholastic ability.

Louise Mickle Harvey Medical Student Scholarship. This endowed four-year scholarship is awarded to a student from Camden, S.C. (or the nearest geographic area within South Carolina), who has demonstrated financial need, a record of academic achievement, and the potential for becoming a personable and compassionate physician.

Ellington Cody Hawes, M.D., Medical Scholarship. This is a merit-based scholarship for a resident of Georgia, preferably from the central Savannah River area. This scholarship covers up to $30,000 of the student’s educational expenses per year; it may be renewed for up to four years contingent upon the recipient’s maintaining satisfactory progress as determined by the School of Medicine Student Promotions Committee.

Arthur L. Humphries Scholarship. This is an endowed scholarship in memory of the father of J. O’Neal Humphries, M.D., Dean of the School of Medicine, 1983-1994. The recipient may receive the scholarship for up to four years, provided that stated criteria are met.

The Jowers Scholarship Fund. The income from this fund, provided by Dr. Lawrence V. Jowers in memory of his friends, provides an annual award to a student who has earned the highest achievement in the first or second year of medical school.

James Stanley Liverman, M.D., Scholarship. This is an endowed fund in memory of Dr. Liverman, who devoted his professional life to improving the health of the people of South Carolina.

Lillian Ashe Scholarship. The income from a fund provided by Lillian Ashe provides scholarships to medical students based on scholastic achievement and financial need.

A. Hines McWaters Scholarship. This is an endowed scholarship awarded annually to an academically sound and financially needy medical student.

Dr. Frank Capers Owens Scholarship. This endowed scholarship, in memory of Dr. Owens, is awarded annually to a qualified third-year or fourth-year student planning a career in family practice.

School of Medicine Faculty and Staff Scholarship. This scholarship, established by the faculty and staff of the School of Medicine, is awarded annually to a medical student who has achieved academic excellence, provided service to the School of Medicine and the University, and exhibited a professional demeanor.

James R. Stallworth Student Scholarship. This scholarship is awarded to a medical student who has an outstanding academic record and who shows evidence of good clinical acumen, devotion to patient care, and potential for future leadership.

The Todd Medical Foundation Scholarship. The interest from this permanent endowment is awarded to second-, third-, and fourth-year medical students in good academic standing and with financial need.

John A. Warren Scholarship. This endowed scholarship, established in honor of John A. Warren, the former chairman and chief executive officer of the SCANA Corporation, is given to the rising fourth-year student who has expressed and demonstrated an interest in pursuing a medical career in family practice, pediatrics, and/or oncology. The recipient is selected by the School of Medicine Scholarship and Loan Committee.

George Walker Waring Memorial Scholarship. The income from this fund, established by the Waring family to honor the memory of their father and grandfather, provides a scholarship for medical students who have completed the first two years at the School of Medicine.

Dr. Hudnall Gentry Weaver Scholarship. This endowed scholarship was established by the family of Robert S. Paschal Jr. in memory of Dr. Weaver, a former Macon, Ga., surgeon. Dr. Weaver was the father of Mrs. Paschal and the grandfather of Dr. Hudnall Weaver Paschal, a 1985 School of Medicine graduate.

Dr. Hugh H. Wells Scholarship. The interest from this endowed scholarship in memory of Dr. Wells is awarded annually to a medical student from South Carolina who has a demonstrated financial need.

Veterans Benefits
Veterans and children of deceased or disabled veterans who meet regular admission requirements may be eligible to receive educational assistance benefits through the Department of Veterans Affairs. Application for benefits may be made through the campus University Office of Veterans Affairs. Students are urged to apply for benefits at least 45 days prior to the beginning of the semester.

All veterans and other eligible persons are responsible for informing the University veterans records clerk of any change in enrollment status or withdrawal from the University.

Other Sources of Financial Aid
The School of Medicine Office of Student and Career Services has current information on various financial aid opportunities. Additionally, the School of Medicine Library has national directories listing sources of loans, fellowships, and scholarships. A number of city and county medical societies offer loans or scholarships for residents of their localities, as do churches, businesses, fraternities, and sororities.
Policy on Management of Financial Resources from External Entities

It is the policy and practice of the University of South Carolina School of Medicine to assist enrolled students in the identification of financial resources from external entities to aid them in the financial support of their educations. External entities providing such financial resources can be individuals, employers, professional organizations, hospitals, communities, foundations, and others. The School of Medicine is also required to follow federal and state laws and regulations and University of South Carolina policies, procedures, and guidelines in the processes associated with nominating students for, the awarding of, and the handling of financial resources from external entities for which enrolled students qualify.

For these reasons, and because:

1. the School of Medicine usually does not have specific information about the external entities providing financial resources to students;
2. the School of Medicine usually has not been involved in the prior contractual arrangements associated with students' receipt of financial resources from external entities;
3. the School of Medicine cannot provide legal advice about tax consequences, either for the external entity or for the student, of the award of financial resources to students by those external entities; and
4. all final decisions about the nomination of eligible medical students for awarding of financial resources from external entities are made by the School of Medicine Scholarship and Loan Committee, a faculty committee, it is therefore the policy of the School of Medicine:
   a. to refer external entities wishing to provide financial resources to enrolled students to the School of Medicine director of development for information about the creation of accounts in the University of South Carolina Educational Foundation from which scholarship monies can be awarded to students;
   b. to refer external entities to the University of South Carolina Office of Student Financial Aid and Scholarships when those entities wish to underwrite any portion of a student's tuition and/or fees at the School of Medicine;
   c. to refer students to their legal and financial advisors when questions arise about the tax consequences of financial resources provided to them in support of their educations by external entities; and
   d. to refer all requests for nominations of eligible enrolled students for awards of financial resources from external entities to the School of Medicine Scholarship and Loan Committee for final decisions about those nominations.

Employment

Employment must be discussed with the assistant dean for student affairs. When employment appears to interfere with the student's academic and professional development, the assistant dean for student affairs may refer the matter to the Student Promotions Committee for consideration. The academic responsibilities of the first year of medical school preclude outside employment. The Office of Student and Career Services attempts to identify clinical clerkship employment opportunities for rising second-year students for the summer between the first and second years of medical education.

Student and Career Services

Student Services

Office of the Ombudsperson

The educational program in the School of Medicine has been developed to support and encourage the collegiality and professionalism essential to an effective learning environment. Students who believe that they have been punitively assessed or mistreated because of religion, race, ethnicity, gender, sexual orientation, age or other factors have access to the School of Medicine ombudspersons.

The ombudspersons are empowered to receive and investigate reports of mistreatment in a completely confidential manner, to mediate between the parties involved, and, in the event mediation is not successful, to make recommendations directly to the dean of the School of Medicine regarding appropriate resolution of any complaints.

The use of the ombudspersons' services to resolve a complaint represents a form of alternate dispute resolution. For this reason, the services of the ombudspersons will no longer be available to a student once that student engages an attorney to initiate legal action against the School of Medicine, the University of South Carolina, or the employees of those institutions.

Advisors

Faculty members from all School of Medicine departments volunteer to serve as advisors to medical students. Advisors counsel students regarding academics or other areas pertinent to students' satisfactory progress in the medical curriculum. They also assist students with such aspects of their clinical years as fourth-year electives, specialty selection, and residency application.

Faculty advisors and medical students are encouraged to meet at least once per semester. Advisors assist personnel in the School of Medicine Office of Student and Career Services in following the academic progress of their advisees.

Student-student advisory systems are at the discretion of the respective classes of the School of Medicine. Incoming first-year students are assigned student mentors in the summer so that they may meet preceding matriculation.

Student Housing

The majority of students elect to rent/purchase housing in the area adjacent to the School of Medicine campus. Information is posted on the bulletin board in the student mailroom in building 3. Additional information about off-campus housing can be obtained from:

Office of Off-Campus Housing Service
Russell House University Union
University of South Carolina
Columbia, SC 29208

The University provides a limited number of housing units for married couples. They are assigned on the basis of date of application receipt. For information, contact:

University Housing
University of South Carolina
Attn: Family Housing
1215 Blossom Street
Columbia, SC 29208

Student Bookstores
Located on the first floor of Basic Science Building 1 on the School of Medicine campus, the University of South Carolina Health Science Store offers medical textbooks, reference books, instruments, office supplies, laboratory coats, and microscope rentals. The University Bookstore, located in the Russell House University Union on the University campus, stocks textbooks, supplies, general interest books, popular and classical recordings, and a wide range of gift items.

Student Lounge/Canteen
A large well-furnished student lounge and adjoining small kitchen area are located on the first floor of the Basic Science Annex on the School of Medicine campus. The lounge, containing a television, computers, and a telephone, is available to students 24 hours a day.

Arthur L. Humphries Physical Fitness Center
The Arthur L. Humphries Physical Fitness Center is located on the ground floor of the Dorn V.A. Medical Center Auditorium. Equipped with a variety of exercise machines and mats, the center is open to School of Medicine students, faculty, and staff and Dorn V.A. Medical Center physicians, staff, and patients (under medical supervision).

Services for Students with Disabilities
The University of South Carolina does everything reasonably possible in an attempt to accommodate students with disabilities in the attainment of their academic objectives. Its Office of Disability Services is available to help disabled students with any problems in their campus life experience and to facilitate any adjustments that might be required. Medical students are invited to contact:

Office of Disability Services
University of South Carolina
LeConte College
Room 106
Columbia, SC 29208
803-777-6742
(TDD 803-777-6744)
http://www.sa.sc.edu/sds

University Programs
As students of the University of South Carolina, medical students are entitled to use all facilities and programs available to University students. A partial listing follows.

Russell House University Union
Located at the center of the campus, this facility contains numerous meeting rooms, a ballroom, television and conversational lounges, music listening rooms, a browsing lounge, a theater, and office space for student organizations, including the Student Government, campus newspaper, and radio station.

A variety of services is provided throughout the building. Personnel assist students in locating services. University Dining Services operates food service facilities in the Russell House University Union.

Carolina Productions arranges educational, recreational, and social activities for and with the entire University community. For information, contact the Carolina Productions in the Russell House.

Athletics
The University sponsors extensive programs in nine men's and 11 women's intercollegiate sports. Its athletic teams, the Gamecocks and the Lady Gamecocks, compete as members of the Southeastern Conference of NCAA Division 1A.

Among the facilities for athletics at the University are Williams-Brice Stadium, Colonial Center, an all-weather track, a baseball stadium, and tennis courts. The Blatt Physical Education Center and the Strom Thurmond Wellness and Fitness Center provide extensive indoor space for student sports, including Olympic-sized swimming pools.

Intramural Recreational Athletic and Club Sports
The Division of Student and Alumni Services of the University conducts an extensive intramural athletic and recreational sports program for all students, with competition in many areas. Students may participate as individuals and teams in more than 25 intramural sports and in club sports.

Student Health
The School of Medicine is committed to providing all students with appropriate health care and personal counseling in a compassionate, confidential, and professional manner. Student confidentiality is a priority. No physician treating a student will be involved in the education, evaluation or advancement process for the School of Medicine, with the exception of emergency services, wherein USCSOM Columbia faculty and residents may be the clinical staff responsible for the facility to which the student presents, and it is in the best interest of the student to receive immediate care. The student will be transferred to the care of non-faculty physicians as soon as medically appropriate.

Student Health Policies
Contagious Infections and/or Diseases
The School of Medicine has adopted the following policy regarding applicants and students with contagious infections and/or diseases:

The University of South Carolina School of Medicine supports fully the spirit and intent of Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1992 in fulfilling its role of providing a medical education to qualified candidates with contagious infections and/or diseases who do not constitute a direct threat to the health and safety of other individuals and who are otherwise able to fulfill the requirements incident to attending medical school.

In fulfilling its obligation to educate future physicians, the School of Medicine is charged with maintaining the integrity of the curriculum; preserving, as part of the curriculum, those elements deemed necessary to the education of physicians; and adhering to procedures consonant with those established with the Centers for Disease Control, among others, to maintain the health and safety of patients.

It is, therefore, the policy of the School of Medicine to fulfill the above-stated obligation, and to provide expert and safe patient care; protect the personal rights of students with contagious infections and/or diseases, including the right to be free from disparate treatment and improper management of confidential information; provide information, education, and support services that promote the professional and personal well-being of students; provide a safe working environment for all students; and provide for the implementation of laws and regulations pertaining to public health and welfare.
Therefore, pursuant to the above-stated policy, in appropriate cases, after obtaining the advice and consultation of the appropriate clinical clerkship director, the School of Medicine will monitor and modify the clinical activities of infected students who pose unwarranted risks to patients. The decision to modify the clinical activities shall be based upon an objective evaluation of the individual student’s experience, technical expertise, functional disabilities, and the extent to which the contagious infection and/or disease can be readily transmitted. The infected student shall be afforded full participation in clinical activities that do not pose unwarranted risks to patients, as determined by the appropriate clinical clerkship director. In all instances where the educational activities of a student are modified, steps shall be taken to ensure that his/her educational experience is equivalent to that of his/her uninfected peers. In such cases, maintaining the integrity of the educational experience afforded such a student shall be of paramount importance.

**Chemical Dependency**

The School of Medicine has adopted the following policy regarding chemical dependency in medical students:

The University of South Carolina School of Medicine recognizes that chemical dependency represents a problem of national proportions and that medical students may be at increased risk.

The School of Medicine is therefore committed to providing an integrated substance abuse curriculum to medical students as a component of their medical education, to promoting student wellness by identifying and assisting students who may be chemically dependent, and to providing access for medical students to confidential chemical dependency treatment programs that will not jeopardize their professional career goals.

**Definitions**

Substance abuse is characterized as insidious, progressive, chronic, malignant, primary, family-centered, and treatable. The medical consequences resulting from impairment from substance abuse range from a mild hangover to death due to bleeding, infection, or trauma. For medical students, impairment is defined as recurring trouble associated with alcohol or drug abuse; the trouble may occur in any of several domains, including interpersonal (family or other relationships), educational, legal, financial, or medical. Examples include the range of behaviors from absences from class, clinical clerkships, and electives; repeated lateness in the initiation or completion of assigned responsibilities; binge drinking to violence while under the influence of chemicals; traffic accidents and arrests for driving under the influence; attempts to reduce chemical use; receipt of criticism about alcohol and/or drug use from fellow students, faculty members, medical residents, and other clinical supervisors; and, most especially, the student’s continued drinking and/or drug use in spite of adverse consequences.

**Sources of Assistance**

Confidential assistance for medical students with suspected chemical dependency impairment may be obtained from any of the following sources:

- Community resources: The South Carolina Medical Association Physicians’ Assistance and Advocacy Committee has formally agreed to provide compassionate assistance to medical students and medical residents with chemical dependency problems. Confidential assistance with assessment, intervention, or treatment questions can be obtained by contacting the Physicians’ Assistance and Advocacy Committee chair at 803-798-6207 or 800-327-1021. South Carolina Medical Association offices are located at:

  - 3210 Fernandina Road
  - Columbia, SC 29211

- University of South Carolina/School of Medicine resources: One component of the School of Medicine Department of Neuropsychiatry and Behavioral Science focuses on education, clinical research, and clinical assessment in the area of alcohol and other substance abuse. Medical students concerned about their use/abuse of chemical substances and/or that of their peers may obtain confidential assistance by contacting the USC Counseling and Human Development Center (803-777-5223). In addition, the Peer Advocacy Committee of the Medical Student Association has confidential advisement from a physician faculty member in the Department of Neuropsychiatry and Behavioral Science. Confidential assistance with intervention and referral may be obtained by contacting the Peer Advocacy Committee through the Medical Student Association. The Psychological Services Center (803-777-4864), and the Thomson Student Health Center (803-777-3957), all on the Columbia campus of the University of South Carolina, and the School of Medicine Department of Neuropsychiatry and Behavioral Science (803-434-4300) provide confidential assessment, referral, and treatment. Assistance is also available from the associate dean for medical education and academic affairs (803-216-3600), the assistant dean for student affairs (803-216-3630), and the GHSUMC assistant dean for medical education (864-455-5494).

- Other resources: A comprehensive listing of statewide educational, counseling, and referral resources for problems related to chemical dependency is available from the Department of Neuropsychiatry and Behavioral Science; see above. An additional list of resources is published annually by the University of South Carolina in the Carolina Community: Student Handbook and Policy Guide provided to each medical student at the beginning of the fall semester. The Carolina Community also contains those University policies and procedures relating to the use of alcohol and other drugs to which all enrolled University students are subject as members of the University community.

**Student Health Services**

Student Health Services provides accessible, convenient, high quality, low cost health care. The health services team is sincerely interested in your health and wants to be your partner in wellness.

Student Health Services provides on-campus medical, mental health, ancillary, and health and wellness services for students. Services include:

1. ambulatory primary care at clinics and ancillary services located at the nationally accredited Thomson Student Health Center;
2. a comprehensive array of counseling, testing, and psychological and psychiatric services available at the nationally accredited Counseling and Human Development Center; and
3. a wide variety of wellness-oriented programs and educational services offered by the Office for Campus Wellness and the Office for Sexual Health and Violence Prevention.

Students are encouraged to visit the various Student Health Services Web sites for additional information on clinics, services, and programs. Links to these sites can be found at www.sa.sc.edu/shs/tshc (http://www.sa.sc.edu/shs/tshc/) and www.sa.sc.edu/shs (http://www.sa.sc.edu/shs/).

**Counseling/Consultation Services**

Students in the School of Medicine have available to them various counseling, consultation, and psychotherapeutic resources. These may
be sought from the Office and Career Services, faculty and
student advisors, and psychologists and psychiatrists with appointments
in the School of Medicine, as well as from the various services and
counseling centers on the University campus. Emergency psychiatric
services and confidential assessment, referral, and treatment services
are available on a 24-hour-a-day basis from the School of Medicine
Department of Neuropsychiatry and Behavioral Science (803-434-4300).

Students enrolled in the School of Medicine program at the Greenville
Hospital System University Medical Center have access to equivalent
counseling and medical services; information about these services is
provided to students at the time of third-year orientation.

Medical Insurance
Students enrolled in the School of Medicine are required to have a current
medical insurance policy in effect at the time of fall registration and
throughout the academic year and to provide the School of Medicine with
verification/proof of insurance or sign a formal declaration waiver form.

A comprehensive health insurance policy is made available by Pearce
& Pearce, Inc. through the University of South Carolina for students and
their spouses and/or children. Brochures and registration materials are
available to all students. The policy is in effect from August 1st to July
31st, with fee payment due at the time of fall and spring registrations.

Immunizations
Students are also required to provide, prior to matriculation, a current
medical history, the results of a physical examination, and immunization
data on forms provided by the School of Medicine. In order to ensure the
health and safety of students and patients in both the classroom and
clinical settings, students must provide documentation of immunizations:
two dates/doses of MMR or immune state (titers) for rubeola, rubella,
mumps, varicella (either a titer or documentation of two doses of
varicella vaccine, history of chickenpox is no longer accepted); polio at
the time of initial matriculation (refusal form available); and evidence of a
tetanus booster. A TB test is required within six months of matriculation.
If the results of TB testing are positive or if the student is known to have
tested positive previously, the student must provide proof of positive
PPD and negative chest x-ray within the last three years. Continuing
students will receive TB testing each year as arranged by the medical
school. Evidence of a hepatitis-B vaccine is required with a blood titer
prior to matriculation, or to be completed by the end of the first semester
(refusal form available). Students accepted in transfer must also provide
documentation of hepatitis B immunization and evidence of immune
status by blood titer by the end of the first year of transfer (refusal form
available). A hepatitis B immunization program is available, at cost,
through the School of Medicine during the first year of medical education.

Drug Screenings
Drug screening may be required by certain clinical facilities in which
School of Medicine students rotate. In cases as such, students must
successfully satisfy the testing requirement of the facility.

Workers Compensation Insurance
All medical students are covered by Workers Compensation insurance
through the State Accident Fund for any injuries sustained by students
during the course of those clinical activities that are part of their
medical educations. The premium for this insurance is paid by the School
of Medicine. Information about Workers Compensation insurance policies
and procedures and the reporting requirements for injuries sustained by

students during their medical educations is provided to students annually
and available in the Office of Student Services.

Disability Insurance
A disability insurance policy is available and required for all medical
students. Annual premium payment is due at the time of fall registration.

Student Organizations
Students enrolled in the School of Medicine may participate in a wide
variety of University organizations, including those of specific interest to
medical students.

Alpha Omega Alpha (AOA)
ADA is the national honor society for medical students. Election to
AOA membership is based upon academic achievement, integrity,
leadership ability, and service to the School of Medicine. Eligibility for
AOA membership is limited to third- and fourth-year medical students.

Medical Student Association (MSA)
The goal of the MSA is to foster the exchange of ideas among health
science students. Toward this end, periodic seminars are held at which
research and health-related topics of both a general and specific nature
are discussed. The MSA also sponsors social, athletic, and community
service activities for students and faculty members.

American Medical Student Association (AMSA)
AMSA is a national student organization that offers supplementary
educational programs, including sections in specialized fields and
summer preceptorships. Membership dues are a one-time fee that
includes organizational membership, publications, an opportunity to
purchase life insurance, and other services. Members are also eligible to
attend the annual national convention.

American Medical Women’s Association (AMWA)
AMWA is a national organization representing women medical students
and physicians. Its goal is to enhance the education and training of
members and to educate them and the public on health issues of women.

Medical Student Section of the American Medical
Association (AMA-MSS)
The AMA-MSS enables students to be represented in the activities of
organized medicine within the state and nation.

Student National Medical Association (SNMA)
The School of Medicine SNMA chapter encourages minority students to
consider careers in the health professions and promotes mutual support
and communication among minority medical students.

Journal Club
The Journal Club keeps students informed on new research and
procedures in medical science; gives students the opportunity to read
and present research to their peers in a comfortable setting (as good
practice for future presentations as upperclassmen or residents); and,
gives students the opportunity to access the appropriate faculty while
preparing their presentations.

Dermatology Interest Group
The Dermatology Interest Group is for medical students who have an
interest in pursuing a career in dermatology. The group participates
in several projects, including the National Melanoma Awareness
with first-year students presenting the anatomy, second-year students discussing surgical cases are moderated by faculty members, and students in all four years present cases. At these meetings, open to students in all four years, case presentations are made by students in psychiatry and behavioral science. Four to six dinner meetings are held throughout the academic year, with presentations by faculty members, practicing family physicians, and family practice residents. In addition, an annual dinner meeting is held at which a prominent family physician is featured as guest speaker.

**Emergency Medicine Interest Group**
The Emergency Medicine Interest Group provides opportunities for students to learn about the specialty of emergency medicine. At quarterly meetings and seminars, students meet emergency medicine physicians, participate in practical, hands-on workshops, and discuss topics of relevance to emergency medicine.

**Family Medicine Interest Group**
The Department of Family and Preventive Medicine and the South Carolina chapter of the American Academy of Family Physicians sponsor a Family Practice Club for students who have an interest in careers in this field. At meetings held throughout the academic year at student-determined intervals, students meet family and preventive medicine faculty members, practicing family physicians, and family practice residents. In addition, an annual dinner meeting is held at which a prominent family physician is featured as guest speaker.

**Internal Medicine Interest Group**
The Internal Medicine Interest Group holds informational and social meetings during the academic year for students interested in general internal medicine and in the various specialties and subspecialties of internal medicine. These meetings include presentations by faculty members in the Department of Medicine, community physicians, and internal medicine residents.

**Obstetrics and Gynecology Interest Group**
The OB/GYN Interest Group provides programs for students interested in OB/GYN and other women's health issues. Meetings include presentations by faculty in the Department of OB/GYN, community physicians and OB/GYN residents. Students are also involved in the Teen Clinic at 1801 Sunset Blvd.

**Oncology Interest Group**

**Ophthalmology Interest Group**

**Pediatric Interest Group**
The Pediatric Interest Group was initiated by the Department of Pediatrics to assist students potentially interested in pediatrics to pursue their interests by means of regular contact with departmental faculty members and residents and with regional and national experts in the field. Meetings and social events are held regularly throughout the academic year.

**Psychiatry Interest Group**
The Psychiatry Interest Group was created to foster students interested in psychiatry and behavioral science. Four to six dinner meetings are held throughout the academic year, with presentations by faculty members involved in behavioral science/psychiatry research.

**Radiology Interest Group**

**Surgery Interest Group**
For students with an interest in surgery, the Surgical Interest Group is a student-administered organization that meets monthly throughout the academic year. At these meetings, open to students in all four years, case discussions about surgical cases are moderated by faculty members, with first-year students presenting the anatomy, second-year students presenting the pathophysiology, and third- and fourth-year students presenting the work-up and diagnosis of the case.

**Wilderness Medicine Interest Group**
The Wilderness Medicine Interest Group provides programs for students with an interest in aspects of wilderness medicine, including emergency response and preventive care.

**Military Medicine Interest Group**
The purpose of the Military Medicine Interest Group is to establish fellowship among future military physicians. The group also works to establish continuity of information between classes in order to ease the transition into military duties and military residencies.

**American Geriatrics Society (AGS)**
The purpose of the student chapter network of AGS is to interest physicians-in-training in the field of geriatrics, to enhance the visibility of geriatric medicine at the medical school level, and to provide educational programs on geriatric medicine. AGS holds events in which speakers in the field of geriatrics educate students on relevant issues in the areas of research as well as standard practices.

**Religious Activities**
Medical students are invited to participate in a wide range of student religious activities on the University campus. There is a University chaplain available for counseling. Several denominations provide religious centers with full-time chaplains offering services to the University community. Columbia churches and denominations also serve University students.

**Christian Medical Association (CMA)**
Medical students may participate in monthly CMA activities on the School of Medicine campus.

**IHI Open School**
The Institute for Healthcare Improvement (IHI), an international organization focused on improving healthcare quality and patient safety around the globe, has established the IHI Open School for health professions. The University chapter connects students from all of the University’s health professions schools, including medicine, nursing, pharmacy, physical therapy, social work, healthcare administration, and others. Open School works to establish an interprofessional educational community that gives students the skills to become change agents in healthcare. The chapter has a primary focus in the areas of patient safety, quality improvement, teamwork and communication, and leadership.

**The School of Medicine - Greenville Administration**
Marjorie Jenkins, MD, Dean
Angela Sharkey, MD, Senior Associate Dean for Academic Affairs
April Buchanan, MD, Associate Dean for Curriculum
Paul Catalana, MD, Associate Dean for Student Affairs and Admissions
Julie Linton, MD, Assistant Dean for Admissions
Brenda Thames, EdD, Associate Dean for Culture and Inclusion
Desmond Kelly, MD, Associate Dean for Research
David Cull, MD, Associate Dean for Graduate Medical Education
The School of Medicine Greenville offers the Doctor of Medicine degree (MD) and is accredited by the Liaison Committee on Medical Education (https://lcme.org/) (LCME).

Doctor of Medicine (MD) Overview

The University of South Carolina School of Medicine Greenville offers a hands-on, real-world experience that isn’t a mere promise for the future, but a way of life. The UofSC School of Medicine Greenville is a place where students learn using the latest clinical, information and simulation technology and where they develop the leadership, clinical and interpersonal skills essential to delivering the next generation of patient-focused health care with confidence and compassion.

Learning Outcomes

PATIENT CARE: Provide patient-centered care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health

- PC 1: Demonstrate the ability to perform routine technical procedures.
- PC 2: Gather essential and accurate information about patients and their condition through history-taking, physical examination, and the use of laboratory data, imaging, and other tests
- PC 3: Organize and prioritize responsibilities to provide care that is safe, effective and efficient.
- PC 4: Interpret laboratory data, imaging studies, and other tests required for the area of practice
- PC 5: Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence, and clinical judgment
- PC 6: Develop and carry out patient management plans
- PC 7: Counsel and educate patients and their families to empower them to participate in their care and enable shared decision making
- PC 8: Provide appropriate referral of patients including ensuring continuity of care throughout transitions between providers or settings and following up on patient progress and outcomes
- PC 9: Provide health care services to patients, families, and communities aimed at preventing health problems or maintaining health

KNOWLEDGE FOR PRACTICE: Demonstrate knowledge of established and evolving biomedical, clinical, epidemiological, and social-behavioral sciences, as well as the application of this knowledge to patient care

- KP1: Demonstrate knowledge of the normal structure and function of the body and of each of its major organ systems across the life span.
- KP2: Demonstrate knowledge of the molecular, biochemical, and cellular mechanisms that are important in maintaining the body’s homeostasis.
- KP3: Demonstrate knowledge of the various causes (genetic, developmental, metabolic, toxic, microbiological, autoimmune, neoplastic, degenerative, and traumatic) of maladies and the ways in which they affect the body (pathogenesis).
- KP4: Demonstrate knowledge of the altered structure and function (pathology and pathophysiology) of the body and its major organ systems that are seen in various diseases and conditions.
- KP5: Demonstrate an investigatory and analytic approach to clinical situations
- KP6: Apply established and emerging biophysical scientific principles fundamental to health care for patients and populations
- KP7: Apply established and emerging principles of clinical sciences to diagnostic and therapeutic decision making, clinical problem solving, and other aspects of evidence-based health care
- KP8: Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations
- KP9: Apply principles of social-behavioral sciences to provision of patient care, including assessment of the impact of psychosocial-cultural influences on health, disease, care-seeking, care-compliance, and barriers to and attitudes toward care

PRACTICE-BASED LEARNING AND IMPROVEMENT: Demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning

- PBLI 1: Identify strengths, deficiencies, and limits in one’s knowledge and expertise
- PBLI 2: Set learning and improvement goals
- PBLI 3: Identify and perform learning activities that address one’s gaps in knowledge, skills, or attitudes
- PBLI 4: Incorporate feedback into daily practice
- PBLI 5: Locate, appraise, and assimilate evidence from scientific studies related to patients’ health problems
- PBLI 6: Use information technology to optimize learning
- PBLI 7: Participate in the education of patients, families, students, trainees, peers, and other health professionals
- PBLI 8: Obtain and utilize information about individual patients, populations of patients, or communities from which patients are drawn to improve care
- PBLI 9: Continually identify, analyze, and implement new knowledge, guidelines, standards, technologies, products, or services that have been demonstrated to improve outcomes

INTERPERSONAL AND COMMUNICATION SKILLS: Demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals

- ICS 1: Communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds
- ICS 2: Communicate effectively with colleagues within one’s profession or specialty, other health professionals, and health-related agencies
- ICS 3: Work effectively with others as a member or leader of a health care team or other professional group
- ICS 4: Maintain comprehensive, timely, and legible medical documentation
- ICS 5: Demonstrate sensitivity, honesty, and compassion in difficult conversations (e.g. about issues such as death, end-of-life issues, adverse events, bad news, disclosure of errors, and other sensitive topics)
- ICS 6: Demonstrate insight and understanding about emotions and human responses to emotions that allow one to develop and manage interpersonal interactions
**PROFESSIONALISM:** Demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles

- **P 1:** Demonstrate honesty, integrity, compassion and respect in all interactions with others
- **P 2:** Demonstrate responsiveness to patient needs that supersedes self-interest
- **P 3:** Demonstrate respect for patient privacy and autonomy
- **P 4:** Demonstrate accountability to patients, society, and the profession
- **P 5:** Demonstrate sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation
- **P 6:** Demonstrate a commitment to ethical principles pertaining to provision or withholding of care, confidentiality, informed consent, and business practices, including compliance with relevant laws, policies, and regulations

**SYSTEMS-BASED PRACTICE:** Demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care

- **SBP 1:** Coordinate patient care within the health care system
- **SBP 2:** Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care
- **SBP 3:** Advocate for quality patient care and optimal patient care systems for all patients
- **SBP 4:** Participate in identifying system errors and implementing potential solutions to promote patient safety and quality outcomes

**INTERPROFESSIONAL COLLABORATION:** Demonstrate the ability to engage in an interprofessional team in a manner that optimizes safe, effective patient and population-centered care

- **IPC 1:** Work with other health professionals to establish and maintain a climate of mutual respect, dignity, diversity, ethical integrity and trust
- **IPC 2:** Use the knowledge of one’s own role and those of other professions to appropriately assess and address the health care needs of the patients and populations served
- **IPC 3:** Communicate with other health professionals in a responsive and responsible manner that supports the maintenance of health and the treatment of disease in individual patients and populations
- **IPC 4:** Participate in different team roles to establish, develop, and continuously enhance interprofessional teams to provide patient- and population-centered care that is safe, timely, efficient, effective, and equitable

**PERSONAL AND PROFESSIONAL DEVELOPMENT:** Demonstrate the qualities required to sustain lifelong personal and professional growth

- **PPD 1:** Develop the ability to use self-awareness of knowledge, skills, and emotional limitations to engage in appropriate help-seeking behaviors
- **PPD 2:** Demonstrate healthy coping mechanisms to respond to stress
- **PPD 3:** Manage conflict between personal and professional responsibilities
- **PPD 4:** Practice flexibility and maturity in adjusting to change with the capacity to alter behavior
- **PPD 5:** Demonstrate trustworthiness that makes colleagues feel secure when one is responsible for the care of patients
- **PPD 6:** Provide leadership skills that enhance team functioning, the learning environment, and/or the health care delivery system
- **PPD 7:** Demonstrate self-confidence that puts patients, families, and members of the health care team at ease
- **PPD 8:** Recognize that ambiguity is part of clinical health care and respond by using appropriate resources in dealing with uncertainty

---

**Doctor of Medicine (MD)**

**Requirements**

Applicants admitted to the UofSC School of Medicine Greenville are selected by an admissions committee composed of members of the biomedical science and clinical science faculties of the medical school and the offices of diversity, academic services and research at Prisma Health—Upstate.

In making selections from each year's group of applicants, members of the admissions committee recognize that they are selecting future physicians. The admissions procedure is therefore an effort to select applicants who possess the individual characteristics required for both the study and practice of medicine.

Prior to extending an offer to interview, the admissions committee will evaluate previous academic performance to include undergraduate GPA and MCAT scores, letters of recommendation, clinical and research experience, work and volunteer experience, leadership roles, unique accomplishments, ability to overcome adversity, long-term goals and extracurricular activities.

Following an initial review of the AMCAS application, a supplemental application (and a $95.00 processing fee) will be requested from selected applicants. The supplemental application is due in December each year. Students granted an AMCAS fee waiver are granted a waiver for the $95.00 processing fee.

At least three, and no more than five, individual letters of recommendation or a pre-medical committee evaluation packet are required. For 2020-2021 application cycle and during our evaluation of applicants, we will remain cognizant of the fact that clinical and observation experiences may be more difficult to obtain during this application cycle.

The school interviews those applicants judged to be highly qualified who exemplify our high standards. The committee determines competitiveness for admission based on aptitude and suitability for a career in medicine. In its effort to include diversity among its students, the UofSC School of Medicine Greenville is committed to selecting applicants with distinctive personal attributes and lived experiences who bring added value to an inclusive learning community.

The applicant's credentials are considered from the perspective of the UofSC School of Medicine Greenville's guiding principles. The medical school strives for a student class that exhibits diversity commensurate with the population it serves. It seeks to enroll students with diverse backgrounds who have achieved academic excellence and who exhibit exceptional interpersonal and communication skills, integrity, honesty, empathy, a propensity for team work, maturity, emotional stability,
leadership, a strong work ethic, self-direction and passion for becoming a doctor.

The Medical College Admissions Test (MCAT)

All applicants to the UofSC School of Medicine Greenville are required to take the Medical College Admissions Test (MCAT). For any given year, the MCAT must be taken during or no more than two years prior to the year of application. We will accept MCAT scores from 2018, 2019, and 2020. For the 2020-2021 admissions cycle, those who wish to retake the MCAT after an initial score, we will accept MCAT scores through February 2021 (the MCAT must be taken by January 2021) if additional MCAT dates are not offered after September 2020. We suggest reviewing MCAT materials.

Prerequisite courses for Admission

Required courses:

- Two semesters of biology with lab If using AP or IB credit, an additional semester in advanced biology such as cell biology, genetics, physiology, or molecular biology is required
- Two semesters of general inorganic chemistry with lab
- One semester of organic chemistry with lab (a second semester of organic chemistry with lab is only required if a prerequisite for biochemistry)
- One semester of biochemistry, lab is not required
- One semester of physics with lab
- Three semesters of humanities, social and behavioral sciences (including at least one semester of English composition/literature) AP or IB credit acceptable to the applicant's undergraduate college is allowed for a maximum of two semesters

Recommended courses:

- Cell biology
- Genetics

Technical Standards for Admission, Retention and Graduation

The UofSC School of Medicine Greenville has adopted the following technical standards: Technical Standards for Admission, Retention and Graduation. The curriculum of the UofSC School of Medicine Greenville is designed to provide a general professional education leading to the Doctor of Medicine (M.D.) degree and to prepare students to enter graduate medical training in a wide variety of medical specialties and sub-specialties. All candidates for admission to, and all current students at the School of Medicine Greenville (herein after designated as candidates for the M.D. degree) should possess sufficient intellectual capacity, physical ability, emotional and psychological stability, interpersonal sensitivity, and communication skills to acquire the scientific knowledge, interpersonal and technical competencies, professional attitudes, and clinical abilities required to pursue any pathway of graduate medical education and to enter the independent practice of medicine.

All candidates should be aware that the academic and clinical responsibilities of medical students will, at times, require their presence during day, evening and overnight hours, seven days per week. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress. Although these standards outline the necessary physical and mental abilities of all candidates, they are not intended to deter any candidate for whom reasonable accommodation will allow the fulfillment of all curricular requirements. A "qualified person with a disability" is an individual with a disability who meets the academic and technical standards requisite to admission to, retention in and graduation from the educational program at UofSC School of Medicine Greenville, with or without accommodations.

While the UofSC School of Medicine Greenville fully endorses the spirit and intent of Section 504 of the Rehabilitation Act of 1973 and of the Americans with Disabilities Act of 1990, it also acknowledges that certain minimum technical standards must be present in candidates for admission, retention and graduation. Patient safety and well-being play a major role in establishing requirements involving the physical, cognitive, and emotional abilities of candidates for admission, promotion, and graduation. Those individuals who would constitute a direct threat to the health or safety of themselves or others are not considered suitable candidates for admission or retention in medical school. Therefore, the UofSC School of Medicine Greenville has established the following technical standards for admission to, retention in, and graduation from, the M.D. program.

Technical Standards

1. All candidates for admission must fulfill the minimum academic requirements for admission to the UofSC School of Medicine Greenville.
2. All candidates for the M.D. degree must complete all required courses, clerkships, and rotations at UofSC School of Medicine Greenville.
3. All candidates for admission and all candidates for the M.D. degree must possess sufficient physical, intellectual, interpersonal, social, emotional, psychological, and communication abilities to:
   - establish appropriate relationships with a wide range of faculty members, professional colleagues, and patients. Candidates should possess the personal qualities of integrity, empathy, concern for the welfare of others, commitment to life-long learning, and motivation. They must possess the emotional and psychological health required for the full use of their intellectual abilities; the exercise of good judgment; the prompt completion of all responsibilities associated with the diagnosis and care of patients; and the development of mature, sensitive, and effective relationships with patients, patients’ families, and professional colleagues. They must be able to adapt to changing environments, to be flexible, and to function in the face of ambiguities inherent in any clinical situation. Candidates must be able to speak, to hear, to read, to write, and to observe patients in order to elicit information, to describe changes in mood, activity, posture, and behavior, and to perceive nonverbal communications. Candidates must be able to communicate effectively and efficiently in the English language in oral and written form with all members of the health care team. Candidates must be mobile and able to function independently within the clinical environment.
   - obtain a medical history and perform physical and mental examinations with a wide variety of patients. Candidates must be able to observe patients accurately both close at hand and at a distance. Observation requires the functional use of the sense of vision and other sensory modalities and is enhanced by the functional use of the sense of smell. Candidates must have sufficient
exeroceptive sense (touch, pain, and temperature), proprioceptive sense (position, pressure, movement, stereognosis, and vibratory), and motor function to carry out the requirements of the physical examination. Candidates must have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic operations. They must be able to use effectively and in a coordinated manner those standard instruments necessary for a physical examination (e.g., stethoscope, otoscope, sphygmomanometer, opthalmoscope, and reflex hammer). Candidates must be able to execute motor movements required to provide general and emergency treatment to patients, including cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, intubation, suturing of simple wounds, and performance of obstetrical maneuvers; all such actions require coordination of both fine and gross muscular movements, equilibrium, and functional use of the senses of touch and vision.

- conduct tests and perform laboratory work. Candidates must be able to observe demonstrations, collect data, and participate in dissection of cadavers; examination of specimens in anatomy, pathology and neuroanatomy laboratories; and microscopic study of microorganisms and tissues in normal and pathologic states. They must be able to understand and interpret basic laboratory studies, draw arterial and venous blood, and carry out diagnostic procedures (e.g., NG tube placement; lumbar puncture; thoracentesis paracentesis).

- ultimately make logical diagnostic and therapeutic judgments. Candidates must be able to make measurements, calculate, and reason; to analyze, integrate, and synthesize data; and to problem-solve. Candidates must be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. Candidates must be able to integrate rapidly, consistently, and accurately all data received by whatever sense(s) employed.

In evaluating candidates for admission and candidates for the M.D. degree, it is essential that the integrity of the curriculum be maintained, that those elements deemed necessary for the education of a physician be preserved, and that the health and safety of patients be maintained. While compensation, modification, and accommodation can be made for some disabilities on the part of candidates, candidates must be able to perform the duties of a student and of a physician in a reasonably independent manner. The use of a trained intermediary would compromise a candidate’s judgment by another person’s powers of selection and observation. Therefore, the use of trained intermediaries to assist students in meeting the technical standards for admission, retention, or graduation is not permitted.

**Accommodations Process**

The UofSC School of Medicine Greenville will consider for admission any candidate who has the ability to perform or to learn to perform the skills and abilities specified in these technical standards. Candidates for the M.D. degree will be assessed at regular intervals not only on the basis of their academic abilities, but also on the basis of their non-academic (physical, interpersonal, communication, psychological, and emotional) abilities to meet the requirements of the curriculum and to graduate as skilled and effective medical practitioners.

Admission and promotion at UofSC School of Medicine Greenville is conditional on the candidate’s willingness and ability to satisfy the technical standards, with or without reasonable accommodation.

Admitted candidates who have a disability and require accommodations should contact the Manager of Student Affairs and the Associate Dean for Student Affairs and Admissions as soon as the offer of admission is accepted. Evaluating and facilitating accommodation requests is a collaborative effort between the candidate, UofSC School of Medicine Greenville, and the UofSC Student Disability Resource Center.

It is the responsibility of a candidate with a disability to provide sufficiently current information documenting the nature and extent of his/her disability, any previous accommodation(s) received, and the functional limitations proposed to be accommodated. UofSC School of Medicine Greenville reserves the right to request new or additional information.

Should an accepted candidate or student develop a condition that would place him/her, patients or others at risk or that may require a need for accommodation, an evaluation with UofSC School of Medicine Greenville and the UofSC Student Disability Resource Center may be necessary. As in initial assessments, a complete and careful reconsideration of all the skills, attitudes, and attributes of each accepted candidate or student will be performed. This includes an assessment of his/her willingness, desire and ability to complete the medical curriculum, and will be informed by the fact that students with varied types of disabilities have the ability to become successful medical professionals.

**Background Check**

A background check will be performed for each applicant upon acceptance to the UofSC School of Medicine Greenville. The background check is performed by an external vendor and is completed automatically when an Acceptance Action is entered into the application system, AMCAS. The background check is reviewed by the Manager of Admissions and Registration. If satisfactory, the background check will be saved to the applicant’s electronic file. If the applicant does not pass one or more components of the background check, the Associate Dean for Student Affairs and Admissions may meet with the applicant to discuss the results. Upon further evaluation of the background check results, the Associate Dean for Student Affairs and Admissions has the authority to rescind the acceptance.

**Academic Requirements for the MD Degree**

Upon recommendation by the UofSC School of Medicine Greenville faculty, the UofSC will confer the degree of Doctor of Medicine upon candidates who have completed the graduation requirements as described in the Graduation Requirements policy.

- attained the School’s educational objectives as evidenced by satisfactory completion of prescribed basic science modules and clinical clerkships and electives and acquisition of all required clinical skills.
- passed Steps 1 and 2-CK (Clinical Knowledge) of the USMLE.
- discharged all financial obligations to the UofSC School of Medicine Greenville and to the University of South Carolina.
Promotion Policy
A medical school ensures that the medical education program has a single set of core standards for the advancement and graduation of all medical students. A medical school ensures that there is a fair and formal process for taking any action that may affect the status of a medical student, including timely notice of the impending action, disclosure of the evidence on which the action would be based, an opportunity for the medical student to respond, and an opportunity to appeal any adverse decision related to advancement, graduation, or dismissal.

This Student Evaluation, Remediation, Requirements for Promotion, and Appeal policy outlines and ensures that there is a fair and formal process for taking any action that may affect the status of a medical student, including timely notice of the impending action, disclosure of the evidence on which the action would be based, an opportunity for the medical student to respond, and an opportunity to appeal any adverse decision related to advancement, graduation, or dismissal.

Honor and Professionalism Policy
The purpose of the Honor and Professionalism System of UofSC School of Medicine Greenville is to promote and maintain the basic ethical and professional principles paramount to the success of a student preparing for the profession of Medicine. The Honor and Professionalism System obligates medical students, as future physicians and representatives of the UofSC School of Medicine Greenville, to conduct themselves with honor and integrity in all aspects of their lives. There are three aspects of the Honor and Professionalism System:

- UofSC Policy STAF 6.26: Student Code of Conduct
- UofSC School of Medicine Greenville STAF 5.01 Expectation of Personal and Professional Conduct, which includes the UofSC School of Medicine Greenville Statement of Professionalism

The Honor and Professionalism System is introduced to new medical classes each year at M1 Orientation, and each student is asked to sign a statement acknowledging that they have been informed of the Policies and Procedures of the Honor and Professionalism System. The acceptance of the Honor Code assures that the integrity of students is unquestioned and accepted by all in the academic, clinical and research communities. The Honor and Professionalism Council (HPC) is a committee of medical students elected from the second, third, and fourth year classes with endorsement by the Dean. It functions to ensure the upholding of the Honor and Professionalism System for all actions that directly bear upon students and their relationships with their colleagues, faculty, patients, the institution and the community. Every student enrolled at UofSC School of Medicine Greenville is expected to abide by the Honor and Professionalism System at all times while on the campuses of UofSC School of Medicine Greenville, partner health system campus, as well as off campus and in the community. The UofSC Policy STAF 6.26: Student Code of Conduct extends to incidents off campus which may adversely affect the UofSC School of Medicine Greenville community or which may affect the school’s pursuit of its mission. Any conduct within the UofSC School of Medicine Greenville community that undermines the spirit of the Honor and Professionalism System is a violation. Specific incidents will be considered with regard to the context in which they occur, the alleged infraction, and the magnitude of the alleged offense. Violations of the Honor Code, Professionalism or Student Code of Conduct standards include, but are not limited to:

- Lying - including any form of dishonesty or misrepresentation, omission, fabrication or falsification of documents or clinical reports
- Cheating - using or attempting to use any unauthorized materials, devices or study aids in or prior to an examination, OSCE or any other academic work. Giving or receiving any unauthorized assistance in the completion of any examination, OSCE or other academic work as well as preventing or attempting to prevent others from using authorized materials
- Plagiarism or copyright violation
- Stealing
- Violations of the Chemical Dependency policy
- Unprofessional behavior, including but not limited to, any breach of patient confidentiality
- Inappropriate conduct on campus, in the community or via social media (includes following UofSC School of Medicine Greenville policy related to COVID-19 related physical distancing and face covering requirements)
- Repeated lack of accountability

The Honor and Professionalism System policy (https://www.sc.edu/uscsmong_staf503.pdf) further describes the reporting process, investigation, and appeal process.

Other Requirements for the MD Degree
Immunizations
The UofSC School of Medicine Greenville requires that all students, upon matriculation and annually thereafter, have certain immunizations as recommended by the Centers for Disease Control and Prevention (CDC), the Association of American Medical Colleges (AAMC) and our partner health system.

Incoming Students
As part of the onboarding process and prior to matriculation, students will be required to upload (to myClinicalExchange) immunization records that have been verified by a licensed health provider. In order to ensure the health and safety of students and patients in both the classroom and clinical settings, students must provide the following immunization records or laboratory serology titers:

- Measles (Rubeola), Mumps, Rubella (MMR): Two doses of MMR vaccine or positive serology documenting immunity to each.
- Polio: Positive titer or at least three doses of IPV and/or OPV.
- Tetanus, Diphtheria, Pertussis (Tdap): One dose of adult Tdap vaccine; if last Tdap is more than 10 years old, date of last Td and Tdap must be provided. •
- Tuberculosis (TB): Students must provide documentation for one of the following:
  - Two-Step PPD test completed within 90 days of start of M1 Orientation OR
  - Interferon Gamma Release Assay (IGRA) test drawn within 90 days of start of M1 Orientation.
- Chest X-ray: Only required when a student has a history of a positive PPD or IGRA. Chest xray must be performed within 90 days prior to orientation. A TB Screening Form must also be completed.
- Note: A student with a history of BCG vaccination must still provide evidence of TB screening.
• Varicella: Two doses of Varicella vaccine or positive serology.
• Hepatitis-B: One of the following:
  • 3-series vaccine and a Quantitative Hep B Surface Antibody (titer) documenting immunity
  • 2-series vaccine (documentation must include the brand of the vaccine – Heplisav) and a Quantitative Hep B Surface Antibody (titer) documenting immunity
• Vaccine non-responder: Evaluation by Health System Partner
• Meningococcal: Students are strongly encouraged to obtain the conjugated meningococcal vaccine (MCV4) prior to matriculation.
• Hepatitis A: Students are strongly encouraged to obtain two doses of Hepatitis A vaccine prior to matriculation.

Continuing Students
• Influenza: Annually, students are required to obtain an influenza vaccination.

The Employee Health & Wellness department at the Health System Partner provides vaccination clinics for all campus employees and medical students. Students may obtain their vaccination from Employee Health & Wellness or another provider and submit documentation to the Office for Student Affairs and Admissions. Information on allergies or other contraindications to any of the above immunizations is available from Employee Health & Wellness department at the Health System Partner. More details are available regarding the Required Immunization policy here (https://www.sc.edu/study/colleges_schools/medicine_greenville/internal/_policydocuments/uscsomg_staf702.pdf).

Required Health and Disability Insurance
All UofSC School of Medicine Greenville students are required to have health insurance and disability throughout the duration of their education. Student health insurance is automatically added to each semester’s tuition bill. Students who have an equivalent/alternate health insurance plan may waive the university student insurance and its associated fee by submitting a fee waiver request and documenting proof of adequate medical insurance. Students must opt out of the student insurance each semester or it will be automatically billed to their tuition. At matriculation, students are automatically enrolled in a third-party disability insurance plan; annual premiums are added as a fee to the fall semester tuition bill. The disability plan pays a monthly benefit if a student becomes disabled due to a qualifying event and includes a provision to pay off the student’s loans (maximum of $200K). More information about the benefits and cost of the health and disability insurance plans, including information about requesting a waiver to the University-sponsored health insurance plan is available on the UofSC Student Health Services website and the Required Health and Disability Insurance policy here.

HIPAA Training
Mandatory HIPAA training is required during medical school orientation and annually thereafter. Compliance with the training schedule is tracked by the Office for Student Affairs and Admissions.

Doctor of Medicine Academic Calendar
The educational program at the University of South Carolina (UofSC) School of Medicine Greenville was built around core clinical competencies needed by health care professionals to transform healthcare and impact the wellness of communities. The UofSC School of Medicine Greenville curriculum emphasizes graduated increase in clinical skills and responsibilities across the four years of the curriculum. The curriculum weaves biomedical sciences, behavioral, social and population health, lifestyle medicine and clinical skills throughout all four years, creating a foundation that prepares students to continue the path of lifelong learning and practice as integral members of the healthcare delivery team. Thus, the educational program at the UofSC School of Medicine Greenville lays the foundation for advancement across the continuum from undergraduate medical education to graduate residency training. For details, refer to the School of Medicine Greenville website.

The University of South Carolina (UofSC) School of Medicine Greenville has pre-clerkship, clerkship, and post-clerkship phases. The pre-clerkship phase encompasses the M1 and M2 years. The M1 year is 40 weeks of instruction; the M2 year is 33 weeks of instruction plus three (3) days of orientation to prep for the M3 year. The clerkship phase encompasses the M3 year which is 50 weeks in duration with a two-week break during late December/early January. The post-clerkship phase is the M4 year which is 28 weeks of required rotations and four (4) weeks after the Match for residency preparation. The Integrated Practice of Medicine (IPM) module is a longitudinal module embedded within all four years of the curriculum.

• Radiology (RADI) (p. 1636)
• Surgery (SURG) (p. 1636)

Anesthesiology (ANES)

ANES G710 - Anesthesiology Elective (2 Credits)
The anesthesia clinical rotation will provide the medical students with hands on experiences at airway management including bag/mask ventilation, laryngoscopy, and intubation. The student will learn basic principles of anesthetic management and the indications for different general and regional anesthetic techniques. He/she will also experience a practical review and refinement of pharmacology and physiology in the clinical setting. Students will also receive an overview of acute and chronic pain management.

ANES G810 - Anesthesiology (2-4 Credits)
The anesthesia clinical rotation will provide the medical students with hands on experiences at airway management including bag/mask ventilation, laryngoscopy, and intubation. The student will learn basic principles of anesthetic management and the indications for different general and regional anesthetic techniques. He/she will also experience a practical review and refinement of pharmacology and physiology in the clinical setting. Students will also receive an overview of acute and chronic pain management.

ANES G899 - Anesthesiology Away Rotation (4 Credits)
The student will complete an intensive study of Anesthesiology at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Emergency Medicine (EMED)

EMED G700 - Emergency Medicine Clerkship (2 Credits)
The Emergency Medicine Clerkship introduces students to the principles of acute care medicine while providing in-depth exposure to the specialty of Emergency Medicine. Students will encounter a wide range of patients, presenting complaints, and levels of acuity. Students will have the opportunity to evaluate patients as well as formulate effective testing and treatment strategies. Active participation in patient care and procedural skills are emphasized in a strictly supervised setting. During the course, students will complete daytime, nighttime, and weekend shifts as they rotate through a variety of emergency clinical settings, including the level one trauma center and tertiary care facility of Greenville Memorial Hospital (adult areas and Peds ED), and the outlying community emergency departments of Hillcrest in Simpsonville, Greer Memorial in Greer, North Greenville in Traveler's Rest, and Baptist-Easley Hospital in Easley. Students will also have an eight-hour teaching shift with an EM resident.

EMED G715 - Emergency Medicine Pediatric Focus (2 Credits)
This two week elective is designed for third year medical students who are interested in gaining in depth exposure to Emergency Medicine, with an emphasis on Pediatric Emergency Medicine. Students will work primarily in the Pediatric Emergency Department at Greenville Memorial Hospital. This department is located in a tertiary care facility, and students will have the opportunity to evaluate a variety of common (and very uncommon) complaints. They will also work approximately 2 shifts in a community emergency department in Traveler's Rest, where they will gain better understanding of community pediatric emergency medicine and gain some exposure to common adult emergencies as well. The Emergency Medicine – Pediatric Focus rotation will introduce students to the principles of acute care medicine. Students will have the opportunity to evaluate patients and develop understanding of common and life-threatening illness across a wide range of ages, as well as formulate effective testing and treatment strategies. Active participation in patient care and procedural skills are emphasized in a strictly supervised setting.
EMED G720 - Procedural and Advanced Emergency Medicine (2 Credits)
This is a two-week Emergency Medicine elective designed for students who are interested in learning more about Emergency Medicine and procedures in Emergency Medicine. During this course, students will have the opportunity to practice a variety of advanced emergent procedures, such as airway management and central venous access, in a simulated environment. Students will also be introduced to basic concepts of medical and trauma resuscitation through didactic learning and hands-on practice in the simulation center. In addition, students will work four, eight-hour shifts in the Emergency Department, where they will be immersed in the specialty of Emergency Medicine and the principles of acute care medicine. Students will encounter a wide range of patients, presenting complaints, and levels of acuity. Active management and ownership of patients is emphasized in a strictly supervised setting. These shifts will include one shift in the critical care area at Greenville Memorial Hospital and three additional shifts that may take place at Greenville Memorial and the community hospitals of Greer, Hillcrest, Baptist Easley, Oconee, and Laurens. In general, these shifts will include a weekend shift and one overnight shift. Students will also complete one teaching shift guided by a dedicated senior resident at Greenville Memorial. During this shift, they will receive dedicated teaching in a small group on topics such as procedural skills, resuscitation, documentation, or other topics inspired by patients seen in the Emergency Department. At the conclusion of the rotation, students will complete a final assessment in the simulation center, where they will demonstrate patient management and procedural skills developed on the rotation.

EMED G760 - Emergency Medicine as Microcosm (2 Credits)
As social, economic, and racial disparities continue to grow in our country, the Emergency Department provides one of the last refuges available to all, without any barrier to entry. By critically evaluating the patients, staff, and care provided in the Emergency Department, students will gain insight into the current state of our society and identify areas for positive engagement. The intersection of public health and the individual needs of each patient who presents to the Emergency Department will also be explored. Topics will include social determinants of health, narrative medicine, the impact of health (and non-health) policy, and the role of implicit bias.

EMED G800 - Emergency Medicine Acting Internship (4 Credits)
This is a four week Acting Internship designed for fourth year medical students, especially those who may be interested in pursuing a career in Emergency Medicine. It rotates students through a variety of emergency clinical settings, including the level one trauma center and tertiary care facility of Greenville Memorial Hospital (with shifts in Critical Care, Intermediate Care, and our Children’s Emergency Center), and the outlying community emergency departments of Hillcrest in Simpsonville, Greer Memorial in Greer, and North Greenville in Traveler’s Rest. Shifts will vary from 8 to 12 hours in length and incorporate some weekends, evenings, and nights in an equitable fashion. The A-I in Emergency Medicine will immerse students in the specialty of Emergency Medicine and the principles of acute care medicine. Students will encounter a wide range of patients, presenting complaints, and levels of acuity. Active management and ownership of patients is emphasized in a strictly supervised setting. There will also be an end of rotation final exam and brief patient presentation.

EMED G810 - Emergency Medicine (2 Credits)
This is a two week rotation designed for fourth year medical students who are interested in gaining in depth exposure to the specialty of Emergency Medicine. Students will rotate through a variety of emergency clinical settings, including the level one trauma center and tertiary care facility of Greenville Memorial Hospital (with shifts in Critical Care, Intermediate Care, and our Children’s Emergency Center), and the outlying community emergency departments of Hillcrest in Simpsonville, Greer Memorial in Greer, and North Greenville in Traveler’s Rest. Shifts will vary from 8 to 12 hours in length and incorporate some weekends, evenings, and nights in an equitable fashion. The Emergency Medicine rotation will introduce students to the principles of acute care medicine. Students will encounter a wide range of patients, presenting complaints, and levels of acuity. Students will have the opportunity to evaluate patients as well as formulate effective testing and treatment strategies. Active participation in patient care and procedural skills are emphasized in a strictly supervised setting.

EMED G815 - Pediatric Emergency Medicine (2 Credits)
This is a two week rotation designed for fourth year medical students who are interested in gaining in-depth exposure to the specialty of Pediatric Emergency Medicine. Students will be taught at the tertiary care facility of Greenville Memorial Hospital Children’s Emergency Center. Student shifts will vary from 8 to 12 hours in length, some of which will include weekends, evenings, and nights. The Pediatric Emergency Medicine rotation will introduce students to the principles of acute care Pediatric Emergency Medicine. Students will encounter a wide range of pediatric aged patients, chief complaints, and levels of acuity. Students will have the opportunity to evaluate patients as well as formulate effective testing and treatment strategies. Active participation in patient care and procedures are emphasized in a strictly supervised setting.

EMED G820 - Wilderness Medicine (2 Credits)
This course will serve as an introduction to wilderness medicine for the graduating medical student, utilizing wilderness scenarios and illnesses to review and expand their current medical knowledge. Traditional, simulation-based and outdoor experiential learning will be utilized to engage the learner and optimize retention.

EMED G825 - Prehospital Medicine (4 Credits)
Students will receive didactic lectures that describe EMS systems with regards to design, operations, communications, predictive deployment, fleet, finances, and human resources. Each student will participate in a variety of experiential activities that incorporate all forms of EMS delivery including rotations in the following areas: a. 9-1-1 communications center b. First responders c. EMS ambulance crews d. Interfacility transport services The student will actively participate in any quality improvement activity assigned by faculty and collaborate with EMS administrators and providers as needed to complete tasks. Teaching in any ongoing prehospital education course will be expected. Students will also participate in and discuss strategies involved with any preparedness planning activities and will participate in drills as applicable.
EMED G830 - Emergency Medicine Ultrasound (4 Credits)
The rotation will be comprised of the following components: 1. Self-directed learning (GHS EM Ultrasound Curriculum link under Didactics) 2. Hands-on scanning shifts in the emergency department (with US faculty and EM residents) with completion of QA sheets for scans performed 3. Participation in US educational sessions for EM residents 4. GHS US Division Conferences Each student's schedule will vary slightly month to month based upon US faculty availability for scan shifts in the ED. Didactics During the rotation students are expected to complete the GHS EM US Curriculum. This Curriculum is designed to provide a backbone of foundational knowledge that students will build upon while scanning. The curated resources are available free online or through the GHS Health Sciences Library. Hands-On Scanning Hands-on scanning will take place in the ED. The "GHS Ultrasound QA Sheet" will be used to maintain a record of the scans performed during the ultrasound rotation. Some shifts will be scanning with US faculty where students are in the ED scanning with an US faculty member (who is not working clinically). Other shifts will be assigned with US faculty members while they are working clinically to see the use of US in patient flow. Students will complete at least six 3-hour scanning shifts per week in addition to participating in educational activities as scheduled. Student schedule will mirror the EM resident schedule on US, which varies from week to week.

EMED G835 - Urgent Care (2 Credits)
This two week elective offers an opportunity for each student to evaluate and formulate a plan for treatment of patients in the Urgent Care setting with direct supervision by an attending physician throughout the entirety of each shift. Shifts will range from 8-12 hours and occur approximately 7-9 times throughout the rotation. Students will learn to evaluate patients in a timely but thorough manner. This includes learning to identify patients who may need transfer to a higher level of care, and learning what may be done to stabilize the patient prior to transfer, in addition to treating lower acuity patients. Students will learn basic procedural skills during this rotation and will be expected to attend one Emergency Medicine resident didactic session (generally falling on a Tuesday morning).

EMED G840 - Rural Emergency Medicine (2 Credits)
This is a two week rotation designed for fourth year medical students who are interested in gaining additional exposure to the specialty of Emergency Medicine specifically in rural, community based locations. Students will rotate through two rural community Emergency Departments, North Greenville in Traveler’s Rest and Oconee Memorial Hospital in Seneca, with a roughly equitable split between the two locations. There will be 8 shifts, 8 hours in duration, which will incorporate days, evenings, and one weekend (either a Saturday or Sunday), but no overnights. Students will also be expected to attend Emergency Medicine resident didactics on both Tuesdays. This Rural Emergency Medicine rotation will immerse students in the principles of acute care medicine with an emphasis on the challenges of practicing Emergency Medicine in a rural community setting. Students will have the opportunity to evaluate patients as well as formulate effective testing and treatment strategies. Active participation in patient care and procedural skills are emphasized in a strictly supervised setting.

EMED G845 - Emergency Medicine Interdisciplinary (2 Credits)
This two-week elective is designed for fourth year medical students who are interested in gaining a unique perspective into the Emergency Department (ED). From an all encompassing view, the M4 students will have an opportunity to work with the interdisciplinary staff that serves the ED patient. The schedule is arranged to have students work intimately with members of the ED faculty, Advance Practice Providers, House Resident Staff, Respiratory Care team, Nursing staff, Social Worker team, and ED technicians. It is through this bird’s eye view that the student will learn to work with the care team to achieve appropriate patient care.

EMED G850 - Free Medical Clinic (2 Credits)
This is a longitudinal elective designed for fourth year medical students interested in gaining experience in working with a free medical clinic. Students will work closely with the Greenville Free Medical Clinic and with resident and faculty physician volunteers at the clinic. Students will see adult patients presenting for a medical visit. They will have the opportunity to evaluate patients and develop treatment plans, with a particular focus on resources available, under the supervision of USC-SOMG faculty. Students interested in the course will be required to submit a 1-2 paragraph statement discussing their prior experience with free clinics and why they would like to participate in.

EMED G855 - Medical Toxicology Longitudinal Elective (4 Credits)
This is a longitudinal elective for fourth year medical students interested in learning more about the practice of medical toxicology and the care of the acutely poisoned patient. Students will work closely with Medical Toxicology faculty to evaluate and treat patients across the lifespan presenting to Greenville Memorial Hospital with overdoses, toxic exposures, withdrawal syndromes, and envenomations. There will also be didactic components covering important core topics in Medical Toxicology. The didactic component will also include field trips to the Greenville Zoo to study venomous snakes, the Clemson Botanical Gardens to study toxic plants, and the Palmetto Poison Center in Columbia, SC to participate in poison center calls. Students will be expected to complete at least 15 patient consultations under the supervision of the faculty and residents. Students will also be expected to attend all field trips and participate in 8 human exposure calls during their time at the Palmetto Poison Center. Students will also be expected to cover all 15 core topics on the list below. The options for reviewing core topics will include patient encounters (preferred), field trips, chapter readings followed by in-person discussions with the course director, or simulation followed by debriefing. Finally, students will complete two short (5-10 minute) presentations on a topic of interest to them. Grading is pass/fail. Core topics: 1. Toxicology history, physical exam, and labs 2. Stabilization and decontamination of toxicology patients 3. Toxicidromes 4. Acetaminophen 5. Aspirin 6. Carbon monoxide 7. Cardiac medications (beta-blockers, calcium-channel blockers, and digoxin) 8. Envenomation (snakes, spiders, scorpions, and hymenoptera) 9. Ethanol withdrawal 10. Household chemicals (caustics, hydrocarbons, cleaning products) 11. Opioids 12. Toxic alcohols (methanol, ethylene glycol, and isopropanol) 13. Toxic plants/mushrooms 14. Tricyclic antidepressants 15. Weapons of mass destruction (nerve agents, dirty bombs)
EMED G680 - Emergency Medicine as Microcosm (2 Credits)
As social, economic, and racial disparities continue to grow in our country, the Emergency Department provides one of the last refuges available to all, without any barrier to entry. By critically evaluating the patients, staff, and care provided in the Emergency Department, students will gain insight into the current state of our society and identify areas for positive engagement. The intersection of public health and the individual needs of each patient who presents to the Emergency Department will also be explored. Topics will include social determinants of health, narrative medicine, the impact of health (and non-health) policy, and the role of implicit bias.

EMED G899 - Emergency Medicine Away Rotation (4 Credits)
The student will complete an intensive study of Emergency Medicine at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Family & Preventive Med (FPMD)

FPMD G700 - Family Medicine Clerkship (6 Credits)
The Family Medicine Clerkship allows students to gain exposure to the core components of the broad field of Family Medicine. Students will work in a combination of outpatient clinics including both community and academic settings. While working in these settings, students will be expected to expand their medical knowledge in topics of acute and chronic disease management, as well as preventive and wellness care. Students will develop an understanding of the critical role that family medicine serves as an essential component of the primary care delivery infrastructure in the United States healthcare system. Core themes of the practice of family medicine that will be emphasized throughout the rotation include: the importance of continuity of care, lifestyle and preventive medicine, understanding how psychosocial factors affect care delivery, identifying and addressing healthcare disparities, and care of patients within the greater context of their community and the population as a whole. While working with assigned faculty and/or residents, students will have the opportunity to complete initial evaluations on new patients in addition to caring for those with established problems. Students will also have the opportunity to receive guidance in improving interviewing skills as they participate in patient care. The conclusion of the clerkship will include assessments via the Family Medicine NBME subject examination and an Objective Structured Clinical Evaluation (OSCE).

FPMD G701 - Clerkship Completion (0 Credits)
This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

FPMD G710 - Primary Care Sports Medicine Elective (2 Credits)
This course is designed to give medical students exposure to full complement of Sports Medicine Care. You will spend time with certified athletic trainers in/at their high school training room/events, physical therapists treating acute and overuse athletic injuries, and physicians and surgeons practicing Sports Medicine.

FPMD G715 - Rural Family Medicine Elective (2 Credits)
This elective is designed to offer the student an intensive rural family/suburban medicine experience. The student will have a "hands on" experience working with patients in the office of a small town family physician. During this time, the student will be precepted by the community physician and learn first-hand of the unique issues these physicians face in the delivery of health care in a rural setting. The student will have the opportunity to learn the benefits of a team approach to health care through interaction with nurse practitioners and other health care professionals. The student will also acquire first-hand information about the lifestyle of primary care physicians in the rural/suburban setting and the impact they have on their patients and their community. Finally, the student will be introduced to practice management issues pertaining to private practice in a rural/suburban setting. The elective offers rotations in several small communities within reasonable driving distances from Greenville. Other sites are available which will allow the student to stay in the community to better experience the lifestyle of a small town physician. It is important that arrangements be made for selecting the practice site as early as possible, preferably with at least 6 weeks lead time.

FPMD G720 - Lifestyle Medicine (2 Credits)
This course is designed to give medical students exposure to Lifestyle Medicine, a hallmark of the USC-Greenville School of Medicine. This is an emerging field of medicine that uses lifestyle interventions in the prevention, treatment and management of chronic disease. The student will learn from different resources within the Greenville community and understand how an interdisciplinary team (e.g. family physician, primary care sports medicine physician, nutritionist, exercise specialist, physical therapist, etc.) can affect healthy changes in patients through physical activity prescriptions, healthy eating, motivational interviewing, and stress reduction. The student will apply these principles to patient care at the Center for Family Medicine.

FPMD G725 - Post-Acute Care Elective (2 Credits)
The effective transfer of a hospitalized patient to the outpatient, rehabilitation or community environment requires effective communication and an understanding of impactful means of meeting patient needs in the outpatient or home care environment. This elective is designed to provide students with an opportunity to interface with the interprofessional team who will facilitate the patient and their family successful navigation of this process with the goal of reducing the chance of the patient being readmitted, ensuring a safe transition of care, and a positive patient experience.

FPMD G730 - General Family Medicine Elective (2 Credits)
This course offers a brief and intensive experience in family medicine, both for students considering a career in Primary Care and those who are entering other specialties but who wish to learn more about the role of the Family Physician. Students will have the opportunity to pick from three separate Family Medicine Teaching clinics. The clinic exposure includes the care of patients of all ages in a variety of clinical settings and can be tailored to the learners needs. CFM- Oconee- A rural based Family Medicine teaching clinic located on the campus of Prisma Health- Upstate’s Oconee Memorial Hospital in Seneca. CFM- Greer- A community based Family Medicine teaching clinic located on the campus of Prisma Health- Upstate’s Greer Memorial Hospital in Greer. CFM- Greenville- An academic/tertiary care Family Medicine teaching clinic located across the street from Prisma Health- Upstate’s Greenville Memorial Hospital.
FPMD G800 - Family Medicine Acting Internship (4 Credits)
This course offers a brief, intensive exposure to a typical family practice, both for students considering a career in this area and those who are entering other specialties but who want to learn more about the role of the family physician. Students will be placed in an inpatient setting for two weeks and an outpatient setting for two weeks. The practice exposure shall include the care of patients of all ages including pediatrics and inpatient hospital experience.

FPMD G810 - Lifestyle Medicine (4 Credits)
This course is designed to give medical students exposure to Lifestyle Medicine, a hallmark of the USC-Greenville School of Medicine. This is an emerging field of medicine that uses lifestyle interventions in the prevention, treatment and management of disease. The student will learn from different resources within the Greenville community and understand how an interdisciplinary team (e.g. family physician, primary care sports medicine physician, nutritionist, exercise physiologist, physical therapist, etc.) can affect healthy changes in patients through physical activity prescriptions, healthy eating, motivational interviewing, and stress reduction. The student will apply these principles to patient care at the Center for Family Medicine. The majority of the clerkship will take place during the rotation block. However, there will be a longitudinal component of a small patient panel, lifestyle medicine project, and community outreach.

FPMD G815 - Rural Family Medicine Elective (2-4 Credits)
This elective is designed to offer the student an intensive rural family/suburban medicine experience. The student will have a "hands on" experience working with patients in the office of a small town family physician. During this time, the student will be precepted by the community physician and learn first-hand of the unique problems these physicians face in the delivery of health care in a rural setting. The student will have the opportunity to learn the benefits of a team approach to health care through interaction with nurse practitioners and other health care professionals. The student will also acquire first-hand information about the lifestyle of primary care physicians in the rural/suburban setting and the impact they have on their patients and their community. Finally, the student will be introduced to practice management issues pertaining to private practice in a rural/suburban setting. The elective offers rotations in several small communities within reasonable driving distances from Greenville. Other sites are available, which will allow the student to stay in the community to better experience the lifestyle of a small town physician. It is important that arrangements be made for selecting the practice site as early as possible, preferably with at least 6 weeks lead time.

FPMD G820 - Primary Care Sports Medicine Elective (2-4 Credits)
This course is designed to give medical students exposure to full complement of Primary Care Sports Medicine Care, which include musculoskeletal injuries, as well as medical problems such as concussion management and the prevention of sudden cardiac death in young athletes. You will spend time with Certified Athletic Trainers in/ at their High School Training Room/Events, Physical Therapist treating acute and overuse athletic injuries, Physicians and Surgeons practicing Sports Medicine.

FPMD G825 - General Family Medicine Elective (2-4 Credits)
This course offers a brief, intensive exposure to a typical family practice, both for students considering a career in this area and those who are entering other specialties but who want to learn more about the role of the family physician. Students may be placed in an inpatient setting, community setting, or CFM outpatient setting. The practice exposure shall include the care of patients of all ages including pediatrics and inpatient hospital experience.

FPMD G830 - Post-Acute Care Elective (2 Credits)
The effective transfer of a hospitalized patient to the outpatient, rehabilitation or community environment requires effective communication and an understanding of impactful means of meeting patient needs in the outpatient or home care environment. This elective is designed to provide students with an opportunity to interface with the interprofessional team who will facilitate the patient and their family successful navigation of this process with the goal of reducing the chance of the patient being readmitted, ensuring a safe transition of care, and a positive patient experience.

FPMD G899 - Family Medicine Away Rotation (4 Credits)
The student will complete an intensive study of Family Practice at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Genetics (GENE)

GENE G710 - Clinical Genetics (2 Credits)
This medical student rotation in Clinical Genetics is largely observational and will provide an introduction to this specialty that focuses on the genetic disorders that impact the physical, emotional, and/or developmental well-being of infants, children, adolescents, and adults. The student will observe and participate in the evaluation and management of individuals with known or suspected genetic disorders. The student will have the opportunity to interact with members of the multidisciplinary team that includes physicians, genetic counselors, genetic service coordinators, and genetic clinic coordinators. There will also be an opportunity to learn about the outreach efforts and collaborative projects with community and state agencies that are focused on promoting healthy child development and supporting families with children who have special needs.

GENE G810 - Clinical Genetics (2-4 Credits)
The purpose of this course is to provide the learner with an exposure to the clinical, professional, and lifestyle aspects of Genetics. Students will be exposed to a breadth of medical conditions. Clinical experiences will occur at a GHS Hospital or affiliate under the direct supervision of attending and resident (if applicable) physicians. This medical student rotation in Clinical Genetics is largely observational and will provide an introduction to this specialty that focuses on the genetic disorders that impact the physical, emotional, and/or developmental well-being of infants, children, adolescents, and adults. The student will observe and participate in the evaluation and management of individuals with known or suspected genetic disorders. The student will have the opportunity to interact with members of the multidisciplinary team that includes physicians, genetic counselors, genetic service coordinators, and genetic clinic coordinators. There will also be an opportunity to learn about the outreach efforts and collaborative projects with community and state agencies that are focused on promoting healthy child development and supporting families with children who have special needs.

GENE G899 - Genetics Away Rotation (4 Credits)
The student will complete an intensive study of Genetics at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.
Greenville Medicine (GMED)

GMED G601 - Integrated Practice of Medicine Ia (6 Credits)
The first half of the M1 IPM Course (IPM-1a): The Integrated Practice of Medicine modules are part of a longitudinal multi-year curriculum that prepares students for the multi-faceted aspects of clinical medicine including application of basic science knowledge, clinical proficiency in physical diagnosis, diagnostic testing and fundamental therapeutic procedures, patient interactions, population health, effective communication skills, behavioral and social considerations, team-based health care delivery, ethical issues, professionalism, life-long learning, research and evidence-based practice. In the IPM-1a module, weekly clinical material is presented in a “Case of the Week” format, and provides an introduction to history taking, physical examination skills, clinical reasoning, and patient-centered care. The structure of this module focuses on a team-based approach to clinical problem-solving that includes the application of basic science knowledge and social science concepts to patient care. Weekly, student teams will focus on a clinical case and identify the problem, formulate hypotheses, and develop a comprehensive approach to the case. Students will examine the role of psychological, social, behavioral, economic, and environmental factors in the health of individuals and populations. Through this process, IPM-1a will promote an understanding of patients in their varying contexts: as individuals, in a societal context, within the healthcare delivery system, and as members of a larger population. The premise of the material is that an understanding of the multifactorial aspects of health and the need to understand patients as individuals is necessary for the provision of high quality, patient-centered care. Students will learn to recognize opportunities for personal growth as well as self-identify signs of stress and identify skills of managing stress. Throughout the year, students will learn effective history taking communication skills and to perform physician examinations. Students will begin to develop strategies to formulate differential diagnoses and explain the underlying basic science principles that lead to their hypotheses. Students will begin to develop the foundation for clinical research literacy and practice evidence-based strategies to support their differential diagnoses for each case.

GMED G602 - Integrated Practice of Medicine Ib (6 Credits)
The second half of the M1 IPM Course (IPM-1b): The Integrated Practice of Medicine modules are part of a longitudinal multi-year curriculum that prepares students for the multi-faceted aspects of clinical medicine including application of basic science knowledge, clinical proficiency in physical diagnosis, diagnostic testing and fundamental therapeutic procedures, patient interactions, population health, effective communication skills, behavioral and social considerations, team-based health care delivery, ethical issues, professionalism, life-long learning, research and evidence-based practice. In the IPM-1b module, weekly clinical material is presented in a “Case of the Week” format, and provides an introduction to history taking, physical examination skills, clinical reasoning, and patient-centered care. The structure of this module focuses on a team-based approach to clinical problem-solving that includes the application of basic science knowledge and social science concepts to patient care. Weekly, student teams will focus on a clinical case and identify the problem, formulate hypotheses, and develop a comprehensive approach to the case. Students will examine the role of psychological, social, behavioral, economic, and environmental factors in the health of individuals and populations. Through this process, IPM-1b will promote an understanding of patients in their varying contexts: as individuals, in a societal context, within the healthcare delivery system, and as members of a larger population. The premise of the material is that an understanding of the multifactorial aspects of health and the need to understand patients as individuals is necessary for the provision of high quality, patient-centered care. Students will learn to recognize opportunities for personal growth as well as self-identify signs of stress and identify skills of managing stress. Throughout the year, students will learn effective history taking communication skills and to perform physician examinations. Students will begin to develop strategies to formulate differential diagnoses and explain the underlying basic science principles that lead to their hypotheses. Students will begin to develop the foundation for clinical research literacy and practice evidence-based strategies to support their differential diagnoses for each case.

GMED G605 - Emergency Medical Technician (5 Credits)
The Emergency Medical Technician (EMT) course is a minimum State-required 200-hour program that teaches the practice of emergency healthcare delivery to patients who become unexpectedly ill or injured. The course focuses on examining the role and competencies of the prehospital care provider and exposes the student to the many psychological, social, behavioral, economic, and environmental factors in the health of individuals and populations. The course culminates in a field exercise that serves as a capstone for the didactic and experiential skills learned. Following successful course completion, students will take a National Registry psychomotor skill and written examination and become certified as a South Carolina EMT. This course will be organized according to the following sections: 1) Introduction and Preparation, 2) Patient Assessment, 3) Airway Management, 4) Medical Emergencies, 5) Traumatic Emergencies, 6) EMS Operations. Additionally, principle concepts relevant to non-clinical aspects of medicine including ethics, communication, and professionalism will be integrated into material across content area domains. The premise of the material is that an understanding of the multifactorial aspects of health and the need to understand patients as individuals is necessary for the provision of high quality, patient-centered care.
GMED G610 - Integrated Practice of Medicine Ila (7 Credits)
The first half of the M2 IPM course (IPM-2a): The Integrated Practice of Medicine modules are part of a longitudinal multi-year curriculum that prepares students for the multi-faceted aspects of clinical medicine including application of basic science knowledge, clinical proficiency in physical diagnosis, diagnostic testing and fundamental therapeutic procedures, patient interactions, population health, effective communication skills, behavioral and social considerations, team-based health care delivery, ethical issues, professionalism, life-long learning, research and evidence-based practice. In the IPM-2a module weekly clinical material is presented in a “Case of the Week” format, and provides an introduction to history taking, physical examination skills, clinical reasoning, and patient-centered care including cost effective knowledge of appropriate diagnostic studies and fundamental therapeutic procedures. The structure of this module focuses on a team-based approach to clinical problem-solving that includes the application of basic science knowledge and social science concepts to patient care. Weekly, student teams will focus on a clinical case and identify the problem, formulate hypotheses, and develop a comprehensive approach to the case. Students will examine the role of psychological, social, behavioral, economic, and environmental factors in the health of individuals and populations. Through this process, IPM-2a will promote an understanding of patients in their varying contexts: as individuals, in a societal context, within the healthcare delivery system, and as members of a larger population. The premise of the material is that an understanding of the multifactorial aspects of health and the need to understand patients as individuals is necessary for the provision of high quality, patient-centered care. Students will learn to recognize opportunities for personal growth as well as self-identify signs of stress and identify skills of managing stress. Students will learn the role other professionals play in coordinated patient care. Throughout the year, students will learn to perform physician examinations understand the role of appropriate diagnostic studies and procedures including fundamental therapeutic procedures. Students will begin to develop strategies to formulate differential diagnoses and explain the underlying basic science principles that lead to their hypotheses. Students will build on their foundation for clinical research literacy and practice evidence-based strategies to support their differential diagnoses for each case.

GMED G611 - Integrated Practice of Medicine Ilb (4 Credits)
The second half of the M2 IPM course (IPM-2b): The Integrated Practice of Medicine modules are part of a longitudinal multi-year curriculum that prepares students for the multi-faceted aspects of clinical medicine including application of basic science knowledge, clinical proficiency in physical diagnosis, diagnostic testing and fundamental therapeutic procedures, patient interactions, population health, effective communication skills, behavioral and social considerations, team-based health care delivery, ethical issues, professionalism, life-long learning, research and evidence-based practice. In the IPM-2b module weekly clinical material is presented in a “Case of the Week” format, and provides an introduction to history taking, physical examination skills, clinical reasoning, and patient-centered care including cost effective knowledge of appropriate diagnostic studies and fundamental therapeutic procedures. The structure of this module focuses on a team-based approach to clinical problem-solving that includes the application of basic science knowledge and social science concepts to patient care. Weekly, student teams will focus on a clinical case and identify the problem, formulate hypotheses, and develop a comprehensive approach to the case. Students will examine the role of psychological, social, behavioral, economic, and environmental factors in the health of individuals and populations. Through this process, IPM-2b will promote an understanding of patients in their varying contexts: as individuals, in a societal context, within the healthcare delivery system, and as members of a larger population. The premise of the material is that an understanding of the multifactorial aspects of health and the need to understand patients as individuals is necessary for the provision of high quality, patient-centered care. Students will learn to recognize opportunities for personal growth as well as self-identify signs of stress and identify skills of managing stress. Students will learn the role other professionals play in coordinated patient care. Throughout the year, students will learn to perform physician examinations understand the role of appropriate diagnostic studies and procedures including fundamental therapeutic procedures. Students will begin to develop strategies to formulate differential diagnoses and explain the underlying basic science principles that lead to their hypotheses. Students will build on their foundation for clinical research literacy and practice evidence-based strategies to support their differential diagnoses for each case.

GMED G620 - Molecular and Cellular Foundations of Medicine (3 Credits)
This instructional module integrates the disciplines of molecular biology, genetics, cell biology, and biochemistry as the foundations of understanding the human body at the molecular and cellular level. Students will be introduced to cellular structure and its influence on cellular communication, organization and integration of cellular functions, utilization of biomolecules in metabolic pathways, and processes of cell division and transmission of genetic information. The goal of this module is to gain an understanding of the biology and biological processes of the human body from the molecular to cellular scale, processes and patterns of inheritance, and the role of the human genome and epigenome in medicine.
The Structure & Function module fully integrates the basic disciplines of Biochemistry, Histology, Embryology, Gross Anatomy and Physiology of the human body. Building upon information from the Molecular and Cellular Foundations module, this unit focuses on understanding the interaction and communication of cells to form tissues, the embryological development and differentiation of tissues into organ systems, the anatomical organization and function of tissues and organ systems, and the dynamic relationship between structure and function, from the cellular level to the whole body. Imaging techniques including x-ray, ultrasound, computerized tomography and magnetic resonance will be applied and compared with respect to information they provide in the clinical analysis of structure/function relationships and the consequences of abnormalities in health and disease.

The Structure and Function II module is a continuation of the previous Structure and Function I module. The module continues to integrate gross anatomy, histology, embryology, radiology, physiology, and lifestyle medicine. The purpose of the Structure and Function II module is to provide an integrated and clinically relevant basis of knowledge for understanding the interaction and communication of molecules and cells to form tissues, the differentiation of tissues into organ systems, and the dynamic relationship between physiological functions and structures. This will be accomplished through a student-centered and technology-enhanced instructional approach to achieve the overall module objectives.

The neuroscience module integrates the development, anatomy, biochemistry and physiology of the central and peripheral nervous system with clinical correlates. The principles that underlie the anatomical structures of each system are correlated with their physiology and relevant clinical applications. Students will learn to integrate the normal molecular, cellular, physiological, and anatomical aspects of the nervous system in order to understand the basis of disorders commonly encountered in clinical practice. The Neuroscience module emphasizes integration in four different areas: • Anatomical and functional organization of the nervous system • Morphological and functional correlates of neuronal activity • Vascular supply of the nervous system and its clinical correlates • Integration of motor and sensory systems and their clinical correlates.

The Defenses and Responses module is focused on understanding the immune system and mechanisms by which the body defends against pathological and pathophysiological influences, including infectious organisms and malignant transformations. This module also addresses how abnormalities in the immune system contribute to disease manifestations during infection and autoimmune disorders. Integrated within this module is the basic introduction to pathology, understanding pathogenesis, and the study of the body's response to disruptions including those induced by trauma, infection, genetic mutation and drugs.

The Biomedical Principles of Infectious Diseases and Therapy module will present core concepts underlying causative microbial pathogens of infectious diseases, disease vectors, modes of transmission, mechanisms of pathogenesis and pharmacologic principles of treatment and prevention. This module will lay the foundation for understanding the infectious diseases of the different organ systems and provide a basic epidemiologic approach to prevention and treatment strategies. Clinical evaluation, diagnostic testing and laboratory results used for the identification and classification of microorganisms will also be examined. In addition, students will investigate the characteristics of ill patients and pathogenic organisms that influence therapeutic protocols as well as analyze strategies for the management of antimicrobial resistance and infection control.

The Mind, Brain, and Behavior module is an integrated multidisciplinary overview of the major psychiatric disorders and diseases of the nervous system, including mood and psychotic disorders, visual/auditory disorders, cerebrovascular disease, brain tumors, neurodegenerative disorders, seizure disorders, and brain trauma. This module builds upon knowledge learned in the Structure/Function, Foundations and Neuroscience modules. Gross and histologic images will be reviewed and correlated with clinical findings. Disease etiology, clinical presentation, and evidence-based clinical management will be emphasized. Imaging techniques will be applied and compared with respect to the information they provide in the clinical analysis and treatment of these diseases. This module emphasizes the ongoing development of clinical reasoning skills, an understanding of the clinical-pathologic correlations of the diseases, and skills of critical judgment based on evidence.

The Cardiovascular, Pulmonary and Renal module is an integrated multidisciplinary overview of major diseases of the heart, vasculature, lungs, kidney and lower urinary tract. This module builds upon knowledge learned in Year 1. Descriptions of the pathophysiological and histological processes associated with common cardiovascular, pulmonary and renal disease will be given through active lecture and case studies. Examples of other systems (e.g. endocrine) generating cardiopulmonary and renal disorders will be included. Disease etiology, clinical presentation, and evidence-based clinical management will be emphasized. Diagnostic techniques will be evaluated and compared with respect to the information they provide in the clinical analysis and treatment of these diseases.

The Hematology/Oncology Systems module is an integrated multidisciplinary overview of major diseases and abnormalities of red and white blood cells, lymph nodes, spleen and thymus, bleeding and clotting disorders, and therapeutic agents for neoplastic processes as a whole. This module reviews basic principles and characteristics of neoplasia and builds upon knowledge learned during Year 1. Disease etiology, clinical presentation, and evidence-based clinical management will be emphasized. Gross and microscopic images will be reviewed and correlated with clinical findings. Laboratory studies pertinent to diagnosis, prognosis, and therapy selection will be discussed. Imaging techniques will be applied, as applicable, and compared with respect to the information they provide in the clinical analysis and treatment of these diseases and abnormalities. The educational format will include active lectures, slide review sessions, case-based discussions, laboratory results review sessions, question/quiz-based sessions, and a final review session.
GMED G680 - Musculoskeletal/Dermatology/Rheumatology Systems (2 Credits)
Focuses on the pathology, pathophysiology, signs and symptoms, diagnostic methods, and drugs used for the treatment of disorders related to these organ systems. This module emphasizes the ongoing development of clinical reasoning skills, an understanding of the clinical-pathologic correlations of the diseases, and skills of critical judgment based on evidence. Diagnostic methods and procedures, their indications, contraindications, and complications will be discussed. An understanding of ethical, psychosocial, and cultural factors that affect patient behavior and influence treatment plans will be integrated into the topics presented in this module.

GMED G685 - Gastrointestinal/Hepatic Systems (3 Credits)
The GI and Hepatic Systems Module focuses on the pathology, pathophysiology, signs and symptoms, diagnostic methods, and drugs used for the treatment of disorders related to these systems. This module emphasizes the ongoing development of clinical reasoning skills, an understanding of the clinical-pathologic correlations of the diseases, and skills of critical judgment based on evidence. Diagnostic methods and procedures, their indications, contraindications, and complications will be discussed. An understanding of ethical, psychosocial, and cultural factors that affect patient behavior and influence treatment plans will be integrated into the topics presented in this module.

GMED G695 - Endocrine/Reproductive Systems (3 Credits)
The Endocrine and Reproductive Systems Module presents core concepts underlying the pathology, pathophysiology, signs and symptoms and pharmaceutical principles of treatment related to the endocrine and reproductive systems. This module emphasizes the ongoing development of clinical reasoning skills, an understanding of the clinical-pathologic correlations of diseases and skills of critical judgment based on scientific evidence. Diagnostic methods and procedures, their indications, contraindications, and complications are discussed. Additionally, an understanding of ethical, psychosocial, and cultural factors that impact patient behavior and influence treatment plans are integrated into the module topics.

GMED G697 - Culinary Medicine: Disease Prevention and Treatment (0 Credits)
The Culinary Medicine Elective prepares future physicians to become frontline advocates for healthy lifestyle behaviors in their patients and communities through the effective application of Lifestyle Medicine principles. Students will learn how to effectively use evidence-based Lifestyle Medicine to prevent and treat chronic diseases that include obesity, type 2 diabetes, hypertension, cardiovascular disease, and some forms of cancer. This will be a voluntary, not-for-credit elective which meets 1-2 times per module in M2 year.

GMED G698 - Culinary Medicine: Foundations of Patient Care (0 Credits)
The Culinary Medicine Elective prepares future physicians to become frontline advocates for healthy lifestyle behaviors in their patients and communities through the effective application of Lifestyle Medicine principles. Students will learn how to effectively use evidence-based Lifestyle Medicine to prevent and treat chronic diseases that include obesity, type 2 diabetes, hypertension, cardiovascular disease, and some forms of cancer.

GMED G699 - Research Elective (0 Credits)
The Summer Research Elective provides an opportunity for rising M2 students to engage in clinically relevant research throughout the Health Sciences Center at Prisma Health. Enrollment and subsequent completion of this zero credit course will be recorded on the Fall Semester transcript of the M2 academic year. Enrollment in the Summer Research Elective requires completion of the "Summer Research Elective Approval Form" and subsequent approval by the course director. The form will require student to have identified a research mentor within the Health Sciences Center at Prisma Health, agreed upon a research project and developed a timeline and goals for the project (*if the research mentor is not a member of the Dept. of Biomedical Sciences, the student must identify a secondary advisor within the Dept. of Biomedical Sciences). Students will be required to write a short research proposal outlining their plan and expectations of their summer research experience at the start of the summer. The Summer Research Elective will be offered to rising M2 students between the end of their M1 year and beginning of their M2 year. The time commitment will be a minimum of 120 hours to be completed in approximately 8 weeks over the summer. These hours must be documented and can include time spent completing research efforts (i.e. lab bench, data analysis, chart review, etc.). Students will be divided into 5 groups and assigned an HSC Librarian to meet with at least once during the summer. The student will be expected to present their research findings as an oral/poster presentation at the Annual BMS Summer Research Symposium or approved venue if there is an unavoidable conflict. The student will also be required to complete a research abstract of their efforts upon completion of the elective.

GMED G703 - Integrated Practice of Medicine III (1 Credit)
The Integrated Practice of Medicine modules are part of a longitudinal multi-year curriculum that prepares students for the multi-faceted aspects of clinical medicine including application of basic science knowledge, clinical proficiency in physical diagnosis, diagnostic testing and fundamental therapeutic procedures, patient interactions, population health, effective communication skills, behavioral and social considerations, team-based health care delivery, ethical issues, professionalism, lifelong learning, research and evidence-based practice. In the IPM-3 module, the curriculum is designed to facilitate the students’ transition into the real world of health care delivery as practicing professionals. Building on clinical experiences via third-year clerkships, students discuss the importance and application of topics such as quality and risk management, partnering with other professionals for better patient care such as medical-legal partnerships, advanced diagnostics, lifestyle medicine, and medical practice in the context of societal challenges. Students will further their understanding of identifying and managing stress, work life balance between professional and personal obligations. Students will engage in discussions with patient panels representing underserved and vulnerable populations, learn how to minimize medical errors through effective communication tools and identify opportunities for health care system professional leadership. Students will participate in discussion surrounding current health care policy issues and national health crisis content such as substance use issues. Students will demonstrate proficiency in maintenance of competency in basic and advanced procedural skills and promote professional growth through refining their curriculum vitae preparation for residency applications.
**GMED G705 - Recovery Coaching for Addiction (2 Credits)**
The elective will provide an opportunity for medical students to learn more about addiction and recovery and to apply the principles of motivation interviewing to all patients who are in need of behavior change to improve health. Students will be required to 1) Complete a 40 hours training by the Jones Solution Academy in order to become a Recovery Coach. Students are STRONGLY encouraged to volunteer as a Recovery Coach for FAVOR Greenville upon completion of the elective. 2) Attend meetings at Alcoholics Anonymous, Narcotics Anonymous and Al-Anon and write a reflection on one. 3) Attend group activities at FAVOR Greenville. 4) Observe GHS acupuncturist. 5) Attend sessions at The Pavilion. 6) Take all surveys that are part of the Elective course.

**GMED G740 - Gender and Sexuality in Clinical Settings (2 Credits)**
This elective is designed to provide fourth-year students with the opportunity to develop greater breadth and depth of knowledge to allow them to better address gender and sexuality issues with their patients. Students will receive instruction on the concepts, theories, and psychosocial aspects of gender identity, sexual attraction, sexual functioning, and treatment of sexual dysfunction. Students will examine their own beliefs and assumptions that affect their reactions to gender-identity and sexuality-related issues in patients, and will be guided as to how to take a sexual history and offer psychosocial intervention for patients’ sexuality-related concerns. The course has reading requirements and other assigned work, as well as mandatory class meeting times. Students are expected to be self-motivated and committed to self-examination in their approach to this course.

**GMED G755 - Leadership in Medicine (2 Credits)**
This elective is designed to provide students with the opportunity to develop greater breadth and depth of knowledge in the principles of leadership. Students will receive instruction on the concepts, theories, and applications of leadership in medicine. Students will examine their own strengths and weaknesses, personality styles, and values as each pertains to their effectiveness as leaders. The course has reading requirements and other assigned work, including a project, as well as a small set of mandatory class meeting times. Students are expected to be self-motivated and committed to self-examination in their approach to this course.

**GMED G770 - Novel Coronavirus Elective (2 Credits)**
All students will be required to complete the COVID-19 training modules developed by the American College of Physicians and the World Health Organization. Students will also have articles assigned each week as mandatory reading during the two week rotation. These articles will be discussed between faculty moderators and students in a weekly journal club discussion, conducted as a web conference or a conference call with IPM and BMS faculty.

**GMED G780 - Health Psychology (2 Credits)**
This 2-week course will focus on the psychological and physiological aspects of health, including the systems involved in chronic and acute stress responses and how they relate to chronic illness, different body systems (neurological, reproductive, cardiac, gastrointestinal, immunological), pain, memory, sleep, nutrition, and addictive behaviors, with an emphasis on prevention and methods of changing related behaviors. This course will offer opportunities for students to develop novel ways to integrate theory and research on stress and illness with advances in the science of health and wellness, with the purpose of translating current research to future applications in a clinical environment. In addition, medical student stress, including transitioning from medical school to residency, and the strategies/coping skills that can be used to ease that transition, will be discussed. Students will apply their knowledge through online synchronous and asynchronous discussions, journal article review, development of a public service announcement geared toward the community, and a final project/presentation which applies health psychology concepts to the area of their choice. Active self-assessment of health will be a learning tool for this course, and application of health psychology concepts to development of resiliency and prevention of burnout in physicians will be a focus.

**GMED G801 - Integrated Practice of Medicine IV (4 Credits)**
The Integrated Practice of Medicine modules are part of a longitudinal multi-year curriculum that prepares students for the multi-faceted aspects of clinical medicine including application of basic science knowledge, clinical proficiency in physical diagnosis, diagnostic testing and fundamental therapeutic procedures, patient interactions, population health, effective communication skills, behavioral and social considerations, team-based health care delivery, ethical issues, professionalism, life-long learning, research and evidence-based practice. In the IPM-4 module, the curriculum is designed to facilitate the students’ transition into the first year of residency and the real world of health care delivery. In the second half of the fourth year, students experience a required Intensification Month split into two separate phases: 1) a two week “Core” required by all students; and 2) a two week “Specialty” specific phase which places students into tracts based on their stated clinical specialty. Within these four weeks, students receive applied information that will directly influence their residency experience, including residency specific topics, health care delivery systems and administrative topics. Students will apply skills to function as an effective patient care partner with peers and other professionals, refine clinical skills in interpreting advanced images, studies and challenging communications surrounding patient death. Students will further their foundational skills in identifying and coping with stress, behavior changes, and effectively managing personal and professional expectations.

**GMED G805 - Survey of Culinary Medicine (4 Credits)**
The M4 Culinary Medicine Elective prepares future physicians to effectively work with patients and communities through enhanced Culinary Medicine knowledge and counseling skills, along with cooking techniques, to prevent and treat chronic diseases that include obesity, type 2 diabetes, hypertension, cardiovascular disease, and some forms of cancer. This will be a 4-week, 4 credit hour elective which will meet at least twice per week in person (i.e. classroom and kitchen) and twice per week virtually.
GMED G810 - Academic Medicine - Research (longitudinal) (4 Credits)
A description of project, detailing your study and what you wish to accomplish during this elective must be submitted to the Course Director. This proposal should include background information, a research question, the methods that will be employed, and the expected outcomes and analytic methods that will be used. Specific details of the student role in the proposed project should be outlined. Approved projects will be assigned a faculty mentor.

GMED G815 - Academic Medicine - Teaching (longitudinal) (4 Credits)
This elective is designed to provide fourth-year students with the opportunity to cultivate their teaching skills in order to better prepare them for residency. Students will meet with various faculty during the rotation to receive information on how to refine their teaching skills, with topics such as curriculum development, how to prepare a lecture, bedside teaching, how to give and receive feedback, and how to teach a difficult topic. Students will also develop learning sessions using various teaching methods for junior medical students under the guidance of a faculty mentor. Students may elect to work with biomedical science or clinical faculty. The course has reading requirements. Students are expected to be self-motivated and committed in their approach to this course.

GMED G820 - Global Health (4 Credits)
Student may select from AAMC Global Health Learning Opportunities offering or submit their own proposed experience which would need approval by the Course Director (Dr. Jeremy Byrd) and approval from the University of South Carolina Study Abroad Office.

GMED G825 - Health Policy and Advocacy (longitudinal) (4 Credits)
The purpose of this course is to provide learners with an exposure to the macro level health policy framework, tensions, and influences and to provide students with opportunities to work in the community and to develop and implement advocacy skills. Learners will engage in observational experiences in community health advocacy settings. Based on interests, students can be tracked into pediatric, adult, or combined focus community settings. Students are introduced to the principles of health policy and community advocacy through a series of readings, reflections, selected required conferences and web-based learning. In addition, students participate in service-based learning opportunities with community partners in the Greenville area. Each student must complete a community mapping or other approved advocacy project. Additionally, as part of the elective requirement, students will meet with individual physicians in selected GHS clinical departments to ascertain prevailing policy questions and advocacy interests. Findings from physician feedback will be incorporated into a final project and will inform relevant health policy and advocacy topics for future learners. The goal of this elective is to equip students with the skills to be effective and engaged leaders in community advocacy and influencers in health policy. The majority of the coursework should be done during the assigned block.

GMED G830 - Medical Spanish (longitudinal) (4 Credits)
This is a 4 week elective that can be blocked into a 4 week segment or completed longitudinally. Students will have complete an online Medical Spanish proficiency course. Student will learn how to communicate in Spanish regarding a number of systems: cardiovascular, pulmonary, gastrointestinal, obstetrics and gynecology, psychiatry, musculoskeletal, neurology, prevention, immunizations, and screenings. In addition, students will learn how to take a history, perform physical examinations, ask review of systems, and inform patients of the necessary diagnostic evaluations. Students are required to complete an online medical Spanish course, attend lectures or online learning sessions, participate in formative weekly interviews, submit weekly history and physical examination write-ups, and observe interpreters in various settings. Students will work with a faculty mentor and/or interpreter to develop an OSCE station on a common diagnosis at the conclusion of their rotation. The majority of the coursework should be done during the assigned block.

GMED G835 - Advanced Studies in Clinical Anatomy (4 Credits)
The Advanced Studies in Clinical Anatomy elective is designed to allow 4th year medical students the opportunity to revisit a region of anatomy that will be relevant to their future career plans while expanding their teaching knowledge and skills via participation in the module ‘Structure and Function of the Human Body’. Teaching experience includes delivery of briefing sessions, production of multimedia presentations, interactive small group supervision during laboratory and in-class sessions, preparation and review of prosections, and organization of informal practical and course examination sessions.

GMED G840 - Gender and Sexuality in Clinical Settings (2 Credits)
This elective is designed to provide fourth-year students with the opportunity to develop greater breadth and depth of knowledge to allow them to better address gender and sexuality issues with their patients. Students will receive instruction on the concepts, theories and psychosocial aspects of gender identity, sexual attraction, sexual functioning and treatment of sexual dysfunction. Students will examine their own beliefs and assumptions that affect reactions to gender-identify and sexuality-related issues in patients, and will be guided as to how to take a sexual history and offer psychosocial intervention for patients' sexuality-related concerns. The course has reading requirements and other assigned work, as well as mandatory class meeting times. Students are expected to be self-motivated and committed to self-examination in their approach to this course.
GMED G845 - High Value, Cost Conscious Healthcare and Quality Improvement (4 Credits)
The elective is to provide an opportunity to 4th year medical students to participate in high value healthcare system improvements in order to prepare them to be an effective participant and leader in healthcare transformation as a resident and practicing physician. The elective is structured around the following experiences and activities: 1) Seminars: learning and discussion regarding high value healthcare including healthcare waste, quality, cost, and patient experience. Faculty both within the Greenville Health System and the community will participate. 2) Observational participation in various Greenville Health system initiatives which are dedicated to quality and value improvement (these would include committee meetings). 3) Longitudinal mentorship: The course director will facilitate student discussion regarding observations of healthcare waste or value improvement that occurs during M3 and M4 rotations and during exposure to seminars and quality and value initiatives. 4) Project development: Based on these discussions, each student will identify an improvement opportunity based on their experiences during their clerkships. They will then work with their mentor to develop a novel intervention to improve care and/or reduce costs. It is anticipated that these ideas will form the foundation for QI projects.

GMED G850 - Substance Use Disorder and Recovery (2 Credits)
The elective will provide an opportunity for medical students to learn more about substance use disorder (SUD) and recovery and apply the principles of motivational interviewing to all patients who are in need of behavior change to improve health. Students will complete Recovery Coach Training with FAVOR Greenville. Additional educational components include educational modules delivered by national experts, a book discussion around care redesign for SUD and Recovery and selected educational modules at the course directors discretion.

GMED G855 - Leadership in Medicine (2 Credits)
This elective is designed to provide fourth-year students with the opportunity to develop greater breadth and depth of knowledge in the principles of leadership. Students will receive instruction on the concepts, theories, and applications of leadership in medicine. Students will examine their own strengths and weaknesses, personality styles, and values as each pertains to their effectiveness as leaders. The course has reading requirements and other assigned work, including a project, as well as a small set of mandatory class meeting times. Students are expected to be self-motivated and committed to self-examination in their approach to this course.

GMED G860 - Innovation Translation (4 Credits)
Provide students with exposure to a real world working environment within the designated “innovation engine” of a large healthcare delivery system. Student will enhance critical thinking skills by participating in the evaluation, due diligence, and vetting of new intellectual property and industry engagement opportunities. Student may be exposed to a wide spectrum of executive-level professionals directly tied to new and existing innovation opportunities from new clinical opportunities to economic development projects.

GMED G865 - Medical Legal Partnership (2 Credits)
This 2-week elective is designed for fourth year medical students to give an insight to the medical legal partnership associated with Prisma Health. Students will have the opportunity to be involved with both pediatric and geriatric patients that are involved with the medical legal partnership. Students will learn how legal issues impact a patient’s overall health and how the MP can help patients. Students can learn how to navigate the MLP as future physicians. Student will have the opportunity to go to court and work alongside both doctors and attorneys involved with the MLP. Students will learn how community health can impact the individual patient and learn how to deliver quality care. At the end of the two weeks student will present on a topic/patient.

GMED G870 - Novel Coronavirus Elective (2 Credits)
All students will be required to complete the COVID-19 training modules developed by the American College of Physicians and the World Health Organization. Students will also have articles assigned each week as mandatory reading during the two week rotation. These articles will be discussed between faculty moderators and students in a weekly journal club discussion, conducted as a web conference or a conference call with IPM and BMS faculty.

GMED G875 - Biological Rhythms (2 Credits)
This 2-week module will explore biological rhythms and their influence on human health and disease. An overview of biological rhythms, including the cellular, molecular, and systems basis of cognitive, behavioral, psychological and physiological rhythms will be explored. Emphasis will be placed on the application of knowledge, gained through readings from current literature, journal article reviews, discussion boards, a concept integration assignment, and a final application project to apply biological rhythms research to the area of the student’s choice. Human circadian systems and the influence of our brain’s biological clock on health, mental health, and disease will be considered in depth, with a focus on chronotherapeutics and sleep medicine. Active self-assessment of biological rhythms will be a learning tool for this course, and application of biological rhythm concepts to future patients and the clinical environment will be explored.

GMED G880 - Health Psychology (2 Credits)
This 2-week course will focus on the psychological and physiological aspects of health, including the systems involved in chronic and acute stress responses and how they relate to chronic illness, different body systems (neurological, reproductive, cardiac, gastrointestinal, immunological), pain, memory, sleep, nutrition, and addictive behaviors, with an emphasis on prevention and methods of changing related behaviors. This course will offer opportunities for students to develop novel ways to integrate theory and research on stress and illness with advances in the science of health and wellness, with the purpose of translating current research to future applications in a clinical environment. In addition, medical student stress, including transitioning from medical school to residency, and the strategies/coping skills that can be used to ease that transition, will be discussed. Students will apply their knowledge through online synchronous and asynchronous discussions, journal article review, development of a public service announcement geared toward the community, and a final project/presentation which applies health psychology concepts to the area of their choice. Active self-assessment of health will be a learning tool for this course, and application of health psychology concepts to development of resiliency and prevention of burnout in physicians will be a focus.

GMED G899 - Away Rotation in Research (2-4 Credits)
Research elective at another institution.
**Medicine Clinical (MEDI)**

**MEDI G700 - Internal Medicine Clerkship (8 Credits)**
During the Internal Medicine Clerkship, students will gain exposure to both the inpatient and outpatient practice of Internal Medicine. The rotation is designed to help develop the student's clinical skills and to direct his or her approach to patient care towards a problem-oriented frame. Also, through active participation, the student should observe the diagnostic process as it unfolds and develop his/her own method of evaluating clinical problems. During the inpatient portion of the clerkship, patients admitted to the hospital are assigned to the students for history taking and physical examination. Students then participate in diagnostic and therapeutic decisions concerning their patients and follow them throughout their hospital stay. Students are responsible for daily notes and orders under the supervision of the residents and the attending physician on the service. Students on the Internal Medicine Clerkship will also participate in one week of outpatient/ambulatory care at regional Internal Medicine practices. Formal didactic sessions are offered frequently throughout the IM Clerkship, which include formal lectures and case studies specifically for third-year medical students as well as the Department of Medicine's noon-time conferences and grand rounds presentations. During their time with the inpatient wards team, students will also actively participate in daily morning rounds. Weekend work hours are included during the inpatient portion of the clerkship; other weeks are typically confined to weekdays. The conclusion of the clerkship will include assessments via the Internal Medicine NBME subject examination and an Objective Structured Clinical Evaluation (OSCE).

**MEDI G701 - Clerkship Completion (0 Credits)**
This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

**MEDI G710 - Outpatient Cardiology (2 Credits)**
Students are assigned to work one on one with a cardiologist in a private office setting. Depending on comfort level of students and supervising attending cardiologist, the student may be expected to independently perform history and physical exam and then present the patient to the attending cardiologist. Other patients will be observed with the attending cardiologist present. There will be review sessions with an attending to review all interpretations of EKGs. At these sessions, students receive ongoing instruction in electrocardiography, as well as reading assignments. Other graphics, included M Mode echocardiography, 2-D echocardiography, and phonoechocardiography, color Doppler and angiograms are also included to a lesser degree.

**MEDI G715 - Pulmonology Teaching Service Elective (2 Credits)**
This elective is designed to give students exposure to the evaluation and management of patients with pulmonary disease. Emphasis is placed on differential diagnosis of various clinical and radiologic problems in pulmonary disease. The use and interpretation of pulmonary function tests as well as the role of bronchoscopic and other diagnostic procedures will be reviewed. Students will have the opportunity to observe bronchoscopy.

**MEDI G720 - Internal Medicine Critical Care Elective (2 Credits)**
This elective presents students the opportunity to manage critically ill patients in the Intensive Care Unit. Together with their teams, students take in-house overnight call every fifth night, usually admitting 2-3 new patients each call night with maximum census of 6-8 patients for ongoing care. Patient load may be adjusted as needed based on student comfort and patient complexity. Students evaluate all assigned patients, completing and recording the medical interview, physical examination, diagnostic assessment, and management plan. Students reevaluate their impressions on daily rounds and in teaching conferences with the Pulmonary/Critical Care faculty. Students will also have the opportunity to observe bronchoscopy.

**MEDI G725 - Infectious Disease Elective (2 Credits)**
This course is offered as a consultative rotation in clinical Infectious Disease. Students are assigned to work with the attendings and usually one PGYII or III Internal Medicine resident as related to hospitalized and ambulatory patients. The student will be responsible for first patient contact with patients referred to the Infectious Disease consult service. These patients will then be presented to the resident and the faculty. The student will be responsible for recording the history, physical and orders with countersignature by the resident and faculty. There is a biweekly Infectious Disease clinic which the student will also be expected to attend.

**MEDI G730 - Hematology/Oncology Elective (2 Credits)**
Student will be paired with preceptors in a busy consultative hematology/oncology practice involving inpatient and outpatient diagnosis and treatment. Patients with hematological neoplasms, immunohematological problems including blood banking problems, clotting difficulties, various cytoposes and cytopenias, and patients undergoing plasmapheresis for a variety of disorders are evaluated and discussed. The student will also be exposed to and be involved in various aspects related to all stages in the diagnoses and management of malignant disorders. The student can expect to attend daily Internal Medicine conferences. At the conclusion of the rotation, the student should be able to reasonably approach a patient with various cytoposes, clotting disorders and hematological neoplasms as well as solid tumors.

**MEDI G735 - Nephrology Elective (2 Credits)**
The medical student will round daily with the attending physician; all aspects of nephrology and hypertension will be discussed. Acid base electrolytes, water metabolism and other subjects of interest will be discussed daily by the attending. The format of these discussions will be on a one-to-one basis with preassigned topics. The student will be in inpatient and outpatient settings, where under supervision, they will be able to examine urinary sediments. The student will evaluate both inpatients on various specialty services and outpatients on the Nephrology Consultation Service. The student will present and discuss these patients with staff attending nephrologists and be guided to the appropriate reading on topics related to these patients.

**MEDI G740 - Gastroenterology and Hepatology Elective (2 Credits)**
The Gastroenterology and Hepatology medical student elective will involve the student seeing general GI and liver patients in an outpatient setting and also watching endoscopic procedures (EGD colonoscopy, etc) performed by a gastroenterologist. The student may have additional involvement in inpatient consults.
MEDI G745 - Geriatrics Elective (2 Credits)
The Geriatrics and Palliative Medicine elective is designed to help the student expand on prior experiences to advance knowledge of common Geriatrics Syndromes and improve skills in Geriatric patient assessment. The student will have the opportunity to engage in patient care in a variety of settings including acute care, outpatient care and long term care facilities with a focus on frail elderly patients. By the end of the rotation, the student will be required to demonstrate skills in functional, cognitive and social assessment. We encourage opportunities for student research and participation in program development.

MEDI G750 - Rheumatology Elective (2 Credits)
This elective rotation is designed to provide students with an overview into rheumatic diseases such as various arthritides and connective tissue disorders. Diseases include, but are not limited to, rheumatoid arthritis, psoriatic arthritis, gout, osteoarthritis, lupus, scleroderma, vasculitis, inflammatory myositis. The student will observe, in an outpatient clinic setting, the stepwise approach into diagnosis and treatment of rheumatic disease. Emphasis will be placed on learning the basics of a musculoskeletal history and pertinent physical examination findings.

MEDI G755 - Dermatology Elective (2 Credits)
Second year medical students may choose to spend two weeks in a private dermatology office. The student will be assigned to follow a specific dermatologist in the group which may change on various weekdays, but the rotation consists of full days, Monday through Friday. When there is a GHS Dermatology Clinic, the student should be in attendance at that clinic rather than in the private office. Each student will follow their assigned dermatologist as he/she sees patients throughout the day. They will be expected to read about various dermatologic conditions observed during these times. Dermatology text books, journals and other reference materials will be made available. Students may be allowed to assist with minor surgeries and procedures. In addition to following the dermatologist, a core curriculum will be provided to familiarize the students with basic dermatologic terms and common dermatoses.

MEDI G760 - Community Private Practice Elective (2 Credits)
Introduction to community based primary care Internal Medicine including preventative medicine, chronic disease management and acute urgent care in an ambulatory setting.

MEDI G775 - Radiation Oncology Elective (2 Credits)
This elective is designed to acquaint the student with the practice of radiotherapy and fundamental basic science concepts that guide radiation oncologists in their clinical practice of medicine. An emphasis will be placed on clinical examination, review of radiology images and a general understanding of cancer particularly the indications and delivery of radiation therapy. The primary emphasis of the rotation will focus on issues that will be useful to any physician who may provide care for patients with a cancer diagnosis or patients with a personal history of cancer. While students may decide to pursue further training in this specialty after taking this elective, any student who already plans to pursue residency training in Radiation Oncology should contact the course director or another faculty member as early as possible in their medical education to express and further explore their interest given the highly competitive nature of matching in a radiation oncology residency program. Track 1: University-based Elective: This track is only offered in Greenville and is appropriate for all medical students especially for those students who expect to practice medicine in a university based system or intend to train in an oncologic sub-specialty of internal medicine, pediatrics, gynecology or surgery. Students performing this track can expect to attend a larger variety of multi-disciplinary conferences (e.g., Breast Cancer MDC Conference, Thoracic Oncology MDC, GI-Oncology and Melanoma MDC, Neuro-Oncology MDC, etc.) in addition to the weekly Cancer Conference/Tumor Board at GMH. Students in this track will work with a variety of staff physicians during their rotation. Track 2: Community-based Elective: The track is designed for students who wish to experience a broad overview of clinical radiation oncology practiced in the community setting. Elective sites for this track include either the GHS Cancer Institute’s Spartanburg or Seneca office locations depending on the student’s preference. The student will spend the elective working in radiation oncology seeing patients, performing simulation and treatment planning, and attending multidisciplinary conferences and tumor boards. Exposure to patients with many different types of cancer routinely treated in a community setting will be common during this elective. Students who select this track at the Spartanburg office would work primarily with Dr. Howes while those students who perform this rotation in Seneca would expect to work primarily with Dr. O’Connell.

MEDI G780 - Team-Based Primary Care Health (2 Credits)
This course provides opportunities to develop knowledge and skills in the comprehensive care of patients and their families who have traditionally had gaps in medical care and as an introduction to team based primary care. Students will identify challenges in care for adult patients who are in the uninsured, underinsured or Medicare/Medicaid population. Communication skills, shared decision-making, care coordination, family support interventions and management of acute and chronic medical conditions will be emphasized. The course will include time with members of the interdisciplinary team (pharmacy techs, dieticians, behavioral health providers, social workers, diabetic educators, financial counselor/Medicaid worker, as well as primary and subspecialty physicians and nurses). Students will engage in assessment, management recommendations for, and follow-up of patients, as well as a range of activities examining the clinical, ethical and research aspects of comprehensive care with efforts to overcome identified challenges. Requirements: Grand Rounds each Friday morning, and Case Management Component. For Case. Students will be required to pick one patient within the first 3 days of the elective to follow for a chronic illness. Required interaction will include a follow-up visit either in-person or by telephone at some point throughout the 2-week elective. A written summary of the case should be submitted to the Course Director by the last Friday of the Elective outlining how objectives of the course were met. (see canvas for further instructions).
MEDI G785 - Adult Palliative Care Elective (2 Credits)
This course provides opportunities to develop knowledge and skills in the comprehensive care of patients and their families during various stages of life-limiting illness. Students will be partnered with the palliative care team in the inpatient setting. Students will identify periods of transition in illness, as well as appropriate interventions. Communication skills, decision-making, care coordination, family support interventions and management of symptoms will be emphasized. The course will include didactic and clinical time with members of the interdisciplinary team (nursing, social work, chaplaincy, therapies). Students will engage in assessment, management recommendations for, and follow-up of patients, as well as a range of activities examining the clinical, ethical and research aspects of comprehensive palliative and end-of-life care.

MEDI G790 - Inpatient Cardiology Elective (2 Credits)
Students are assigned to work on the inpatient Cardiology Teaching Service at GMH. The Cardiology Teaching Service consists of medical students (M3 and/or M4), IM residents and an attending cardiologist. The student will be expected to complete history and physicals for new consultations and follow-up visits for existing patients. The student will be expected to follow 1-2 patients at the beginning of the elective and up to 5 patients by the end of the elective. They will be presenting patients during teaching rounds to the attending cardiologist. Common conditions that may be presented include, but are not limited to: NSTEMI, STEMI, CHF, arrhythmias (including AF, atrial flutter, VT/VF).

MEDI G800 - Medicine Inpatient (MTS) Acting Internship (4 Credits)
Students are assigned to work on an inpatient general medicine team, composed of one attending physician, one PGY-2 or PGY-3 resident, one to two PGY-1 residents, and at times third-year medical student(s). Acting interns care for patients as their primary caregivers, under the direct supervision of the upper level resident. Together with their teams, acting interns take in-house call every sixth night, admitting patients with all types of medical illnesses. Acting interns usually admit 2 to 3 new patients each night, with a maximum census of 6 to 8 patients for ongoing care. Patient load may be adjusted as needed based on student comfort and patient complexity. Acting interns evaluate all assigned patients, completing and recording the medical interview, physical examination, diagnostic assessment, and management plan. Acting interns re-evaluate their patients daily, reassessing their diagnoses and therapeutic plans. Acting interns present their patients and discuss their impressions on daily rounds with their attending. Acting interns learn to interpret laboratory data, chest x-rays, and electrocardiograms and to perform procedures such as central line placement, lumbar puncture, paracentesis, stress testing, and thoracentesis based on patient need and attending comfort. Clinical learning is supplemented by self-directed reading and required conferences. Acting interns will follow the schedule of their assigned attending Monday – Friday from 7am – 7pm and will be free of patient care duties Saturday and Sunday. This elective is intended to be 2 weeks, combined with the 2 week critical care elective; however, it can also be scheduled as a 4 week elective.

MEDI G801 - Hospitalist Acting Internship (2-4 Credits)
This elective provides an opportunity for fourth year medical students to work in close relationship with a currently practicing internal medicine hospitalist. The students will have the opportunity to care for ICU and floor patients while following the schedule of a hospitalist, and subsequently gain insight on the typical work life for internal medicine hospitalists. Students are assigned to a hospitalist each week. Acting interns care for patients as their primary caregivers, under the direct supervision of the attending. The acting intern will take in-house call and respond to rapid responses and codes per the attending’s schedule; they will admit patients with varying medical illnesses. Acting interns should admit 2-3 new patients per call day/night, with a maximum census of 6-8 patients for ongoing care. This patient load may be adjusted based on student comfort and patient complexity. Acting interns evaluate all assigned patients, completing and documenting the medical interview, physical exam, diagnostic assessment, and management plan. Acting interns re-evaluate their patients daily, reassessing their diagnoses and therapeutic plans. They will present their patients and discuss their impressions on daily rounds with their attending. Acting interns learn to interpret laboratory data, chest x-rays, and electrocardiograms and to perform procedures such as central line placement, lumbar puncture, paracentesis, stress testing, and thoracentesis based on patient need and attending comfort. Clinical learning is supplemented by self-directed reading and required conferences. Acting interns will follow the schedule of their assigned attending Monday – Friday from 7am – 7pm and will be free of patient care duties Saturday and Sunday. This elective is intended to be 2 weeks, combined with the 2 week critical care elective; however, it can also be scheduled as a 4 week elective.

MEDI G810 - Community Private Practice Elective (2-4 Credits)
Students are assigned to a general medicine office, where they act as primary caregivers for their patients under the direct supervision of a faculty physician. Students provide comprehensive care for patients in all stages of illness, including initial diagnosis of disease, chronic management of established medical problems, acute management of decompensated chronic disease, and followup after hospitalization. Students evaluate 8-10 patients everyday, completing and recording the medical interview, physical examination, diagnostic assessment, and management plan. Students present their patients and discuss their impressions in teaching conferences with the attending physician. Conferences include informal discussions, lectures, and grand rounds.
MEDI G815 - Cardiology Elective (2 Credits)
Students are assigned to work with a specific group of cardiologists. Students will be assigned specific patients to examine and follow hospitalized and ambulatory patients. It shall be the student's responsibility to record a history and physical examination on each assigned patient. History and physical findings will be presented to the attendings on rounds. Students will participate in rounds each day. There is an opportunity to observe procedures done on patients in the unit which include pacemaker insertion, cardioversion, hemodynamic monitoring, coronary angiography, and stress testing. The 20 bed Coronary Care Unit and 34 bed post-CCU offer excellent updated physical facilities for this experience. The Cardiac Clinic meets once each week and provides an opportunity to review the history and physical findings on a variety of cardiovascular problems. Considerable emphasis is placed on instruction and interpretation of electrocardiograms. The student is responsible for interpreting an average of 10 records a day. There will be a review session each day with one attending to review all interpretations of EKGs. At these sessions, students receive ongoing instruction in electrocardiography, as well as reading assignments. Other graphics, included M Mode echocardiography, 2-D echocardiography, and phonoechoangiography, color Doppler and angiograms are also included to a lesser degree.

MEDI G820 - Hematology/Oncology Elective (2 Credits)
Student will be paired with preceptors in a busy consultative hematology/oncology practice involving inpatient and outpatient diagnosis and treatment. Patients with hematological neoplasms, immunohematological problems including blood banking problems, clotting difficulties, various cytoses and cytopenias, and patients undergoing plasmapheresis for a variety of disorders are evaluated and discussed. The student will also be exposed to and be involved in various aspects related to all stages in the diagnoses and management of malignant disorders. The student can expect to attend daily Internal Medicine conferences. At the conclusion of the rotation, the student should be able to reasonably approach a patient with various cytopenias, clotting disorders and hematological neoplasms as well as solid tumors.

MEDI G825 - Infectious Disease Elective (2 Credits)
This course is offered as a consultative rotation in clinical Infectious Disease. Students are assigned to work with the attendings and usually one PGYII or III Internal Medicine resident as related to hospitalized and ambulatory patients. The student will be responsible for first patient contact with patients referred to the Infectious Disease consult service. These patients will then be presented to the resident and the faculty. The student will be responsible for recording the history, physical and orders with countersignature by the resident and faculty. There is a biweekly Infectious Disease clinic which the student will also be expected to attend. At the end of this rotation the student should be able to discuss and understand the appropriate use of antibiotic therapy. They should be able to understand the common entities in Infectious Disease such as FUO, hepatitis, STD, septicemia, osteomyelitis, endocarditis, AIDS, postoperative wound infections, etc.

MEDI G830 - Medicine Critical Care (2 Credits)
Manage critically ill patients in the Intensive Care Unit. Together with their teams, students take in-house overnight call every fifth night, usually admitting 2-3 new patients each call night with maximum census of 6-8 patients for ongoing care. Patient load may be adjusted as needed based on student comfort and patient complexity. Students evaluate all assigned patients, completing and recording the medical interview, physical examination, diagnostic assessment, and management plan. Students reevaluate their impressions on daily rounds and in teaching conferences with the Pulmonary/Critical Care faculty. Students learn to interpret sputum samples, chest x-rays, arterial blood gases, and tests of ventilation and gas exchanges. Students learn to perform diagnostic and therapeutic procedures, which include thoracentesis, central line placement, arterial line placement, intubation, ventilator management. Students will also have the opportunity to observe bronchoscopy.

MEDI G835 - Nephrology Elective (2 Credits)
The medical student will round daily with the attending physician; all aspects of nephrology and hypertension will be discussed. Acid base electrolytes, water metabolism and other subjects of interest will be discussed daily by the attending. These would take the format of discussion on a one-to-one basis with preassigned topics. The student will be in inpatient and outpatient settings, where under supervision, they will be able to examine urinary sediments. Reprints on topics discussed will be distributed; adequate time will be provided for the student to prepare the topic.

MEDI G840 - Rheumatology Elective (2 Credits)
This elective rotation is designed to provide students with an overview into rheumatic diseases such as various arthritis and connective tissue disorders. Diseases include, but are not limited to, rheumatoid arthritis, psoriatic arthritis, gout, osteoarthritis, lupus, scleroderma, vasculitis, inflammatory myositis. The student will observe, in an outpatient clinic setting, the stepwise approach into diagnosis and treatment of rheumatic disease. Emphasis will be placed on learning the basics of a musculoskeletal history and pertinent physical examination findings.

MEDI G845 - Pulmonary Teaching Service Elective (2 Credits)
Prescribe respiratory therapy for hospitalized and ambulatory patients; interpret tests of ventilation and gas exchange; examine and interpret stained sputum for bacteriology; examine and interpret unstained sputum for nonmalignant cytology; perform diagnostic procedures including thoracentesis and pleural biopsy; students will also have the opportunity to observe bronchoscopy.

MEDI G850 - Dermatology Elective (2 Credits)
Fourth year medical student may choose to spend two weeks in a private dermatology office. The student will be assigned to follow a specific dermatologist in the group which may change on various week days, but the rotation consists of full days, Monday through Friday. When there is a GHS Dermatology Clinic, the student may attend at that clinic rather than in the private office. Each student will follow their assigned dermatologist as he/she sees patients throughout the day. They will be expected to read about various dermatologic conditions observed during these times. Dermatology text books, journals and other reference materials will be made available. Students may be allowed to assist with minor surgeries and procedures. In addition to following the dermatologist, a core curriculum will be provided to familiarize the students with basic dermatologic terms and common dermatoses.
MEDI G855 - Gastroenterology and Hepatology Elective (2 Credits)
The Gastroenterology and Hepatology medical student elective will involve the student seeing general GI and liver patients in an outpatient setting and also watching endoscopic procedures (EGD, colonoscopy, etc) performed by a gastroenterologist. The student may have additional involvement in inpatient consultations.

MEDI G865 - Endocrinology Elective (2 Credits)
The endocrine elective will expose the student to a comprehensive spectrum of endocrine conditions, including type 1 and type 2 diabetes and their complications, thyroid disorders, conditions affecting both male and female reproduction, obesity, adrenal and pituitary gland disease, neuroendocrine tumors and their associated syndromes, and conditions involving bone and calcium metabolism. The elective will be primarily outpatient with some inpatient consultations.

MEDI G870 - Medicine-Pediatrics Community Practice (2 Credits)
The focus of this elective is for the medical student to gain exposure to the practice of Internal Medicine and Pediatrics in a community setting. Students will perform well child and adolescent care and well as adult preventative medicine. Students participate in initial diagnosis of disease, chronic management of established medical problems, acute management of decompensated chronic disease, and followup after hospitalization. Students evaluate patients every day, completing and recording the medical interview, physical examination, diagnostic assessment, and management plan. Students present their patients and discuss their impressions with the attending physician. The goal of this elective is for the medical student to have not only an overview of combined Internal Medicine and Pediatrics practice but also to have an understanding of the challenges and rewards that come with providing comprehensive medical care for patients.

MEDI G875 - Radiation Oncology Elective (2-4 Credits)

MEDI G885 - Geriatrics Elective (2 Credits)
The Geriatrics elective is designed to help the student expand on prior experiences to advance knowledge of common Geriatrics Syndromes and improve skills in Geriatric patient assessment. The student will have the opportunity to engage in patient care in variety of settings including acute care, outpatient care and long term care facilities with a focus on frail elderly patients. By the end of the rotation, the student will be required to demonstrate skills in functional, cognitive and social assessment.

MEDI G890 - Advanced Physical Exam Series (2 Credits)
The Advanced Physical Exam Skills course is a 2-4 week workshop offered to fourth-year medical students who are interested in developing a deeper understanding of how to use the physical exam to influence medical decision making. The course combines interactive lectures, physical exam rounds, materials for personal study, and a final assessment. The lectures focus on learning the pathophysiology, diagnostic characteristics, and clinical significance of different exam maneuvers. The physical exam rounds allow for immediate skills practice. Special lectures focus on diagnostic error and how to analyze literature about diagnostics. Articles pertinent to the topics are distributed prior to lectures. A pre-and-post assessment will be given to measure improvement in knowledge and mastery of concepts.

MEDI G895 - Adult Palliative Care Elective (2 Credits)
This course provides opportunities to develop knowledge and skills in the comprehensive care of patients and their families during various stages of life-limiting illness. Students will identify periods of transition in illness, as well as appropriate interventions. Communication skills, decision-making, care coordination, family support interventions and management of symptoms will be emphasized. The course will include didactic and clinical time with members of the interdisciplinary team (nursing, social work, chaplaincy, therapies). Students will engage in assessment, management recommendations for, and follow-up of patients, as well as a range of activities examining the clinical, ethical and research aspects of comprehensive palliative and end-of-life care.

MEDI G899 - Internal Medicine Away Rotation (4 Credits)
The student will complete an intensive study of Internal Medicine at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Neurology (NEUR)

NEUR G710 - Focus in Neurology Elective (2 Credits)
The M3 2 week elective for neurology is designed to allow students to deepen their exposure to neurology in a specific area of their interest. The elective is appropriate for students who are either considering pursuing neurology as a career or for students who would like to strengthen their skills in the field. The elective will be individualized to the specific needs and interest of the student. Opportunities for the elective include inpatient and outpatient exposures or focused experiences in a specific subspecialty such as stroke etc.

NEUR G810 - Advanced Focus in Neurology (2-4 Credits)
The M4 2 week elective for neurology is designed to allow students to deepen their exposure to neurology in a specific area of their interest. The elective is appropriate for students who are either considering pursuing neurology as a career or for students who would like to strengthen their skills in the field. The elective will be individualized to the specific needs and interest of the student. Opportunities for the elective include inpatient and outpatient exposures or focused experiences in a specific subspecialty such as stroke etc. Upon completion of the elective, students will be expected to perform at the level of a first year neurology resident.

NEUR G815 - Neurological Critical Care (2,4 Credits)
This is a 2 or 4-week course on the Neurocritical Care service. Students will work alongside a Neuro ICU attending, Neuro ICU Advanced Practice providers and other residents on the service. Students will train in the evaluation of patients with acute brain injury and the concepts of managing critically ill patients with neurological disease. Students are evaluated on the 6 core competencies: Patient care, medical knowledge, Interpersonal & Communication skills, Practice—based learning and Improvement, Professionalism and Systems-Based Practice. Students will attend the scheduled weekly vascular neurology conferences, didactic ICU presentations and will have assigned reading, over the course of this rotation. Students should be expected to work one Saturday day shift during the rotation.

NEUR G899 - Neurology Away Rotation (4 Credits)
The student will complete an intensive study of Neurology at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.
Neuropsychiatry (NPSY)

NPSY G700 - Neurology and Psychiatry Clerkship (8 Credits)
The Neurology & Psychiatry Clerkship is designed to teach students the skills that are required for any competent physician regardless of specialty. Half of the clerkship will be within Psychiatry and the other half within Neurology, as described below. Throughout the entire clerkship, the formal didactic curriculum will build from the M1 and M2 knowledge of neurosciences and will include case-based clinical education. At the conclusion of the clerkship, students will be expected to demonstrate ability in conducting an appropriate evaluation/examination, obtaining a history, and developing referral and treatment plans of patients at the level expected of a general medical practitioner, as well as demonstrate ability to localize the lesion and develop a differential diagnosis. The conclusion of the clerkship will include assessments via the Psychiatry and Neurology NBME subject examinations and a combined Objective Structured Clinical Evaluation (OSCE). The Psychiatry portion of the clerkship will incorporate both inpatient and outpatient experiences including exposure to areas integral to the optimal management of psychiatric diseases, both in the inpatient and outpatient settings. In addition to rotational exposure, students will have required experiences at an AA meeting and in electroconvulsive therapy. None of the required Clinical Psychiatry portion of the clerkship will fall on a weekend. The Neurology portion of the clerkship will incorporate both inpatient and outpatient experiences including exposure to areas integral to the optimal management of neurological disease such as rehabilitation, palliative care, and neurosurgery. Students will work with inpatient neurology, including time with both the Neuro ICU and the inpatient consult service, as well as outpatient neurology. Students should note that the inpatient neurology component will conclude with Saturday and Sunday work hours. During the Neurology portion of the clerkship, students will also work one day on either neuro-rehab, neuro pain-management, or neurosurgery.

NPSY G701 - Clerkship Completion (0 Credits)
This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

NPSY G710 - Focus in Psychiatry Elective (2 Credits)
Inpatient and outpatient opportunities exist for electives in Psychiatry and subspecialties in child/adolescent and geropsychiatry. The content of this course is designed to provide the student a broader experience in comprehensive psychiatric patient evaluation and treatment. He/she will be assigned to a practicing psychiatrist within a variety of inpatient, outpatient, emergency and consultative fields. The presenting problems of patients include personality disorders, acute psychotic disorders, mood disorders, anxiety disorders, schizophrenia, psychosomatic illness, organic brain syndrome and substance abuse disorders. The student will be responsible for intake assessments, to include a mental status examination. He/she will also participate in the decision-making processes and in continuity of care. Additional assignments will be made to specialized treatment programs including individual and family psychotherapy. The student may see outpatients being treated at the Brownell Center collocated with Marshall I. Pickens Hospital. Additionally, rotations may occur at the Piedmont Mental Health Center located in Simpsonville, near Hillcrest Hospital. Additional inpatient rotations may be at Marshall I. Pickens Hospital or Harris Psychiatric Hospital in Anderson. Consultation and emergency services are located at Greenville Memorial Medical Center. The course is designed to provide the student with maximum patient contact. Reviews of interviewing techniques and the principles of general psychiatry with the introduction of individual and family psychotherapy techniques will complement the student's clinical contact with patients. The student will be evaluated by both his/her preceptors and the Clerkship Director for Psychiatry or his designee. Input will be obtained from the other health professionals with whom the student has worked. Additionally, successful completion of the stated objectives will be required to pass this course.

NPSY G810 - Advanced Focus in Psychiatry (2-4 Credits)
After consultation with the Clerkship Director, the student will be assigned to the area of practice to which he/she needs the most exposure before entering a residency program. Options include inpatient, outpatient, emergency, substance abuse, and consultative fields. The presenting problems of patients may include personality disorders, acute psychotic disorders, mood disorders, anxiety disorders, schizophrenia, psychosomatic illness, organic brain syndrome and substance abuse disorders. The student will be responsible for intake assessments, including a mental status examination. He/she will also participate in the decision-making processes and in continuity of care. Additional assignments will be made to specialized treatment programs including individual psychotherapy.

NPSY G815 - Academic Psychiatry (2 Credits)
Students will review a variety of virtual material that has been made available by the course director to develop teachable resources for the department of psychiatry. Additional material, such as various articles for review and additional online learning modules may also be included for review. Upon the completion of their review, students will submit to the course director a detailed presentation as to how these resources would supplement the NPSY clerkship or the current psychiatry electives and how they might best be used to aid in students’ knowledge and competency in the field of psychiatry. The student would then develop the resource into a delivery module such as an SLM. The majority of the course requirements (modules and readings) will be completed online and can be completed asynchronously. Students will be expected to complete all modules and assignments by the posted deadlines. Each week, discussions will be held via phone or in person. Students must complete all reading prior to these discussions.
OBGY G700 - Obstetrics and Gynecology Clerkship (6 Credits)
The Obstetrics & Gynecology Clerkship is designed to be a comprehensive educational experience that fulfills the learning objectives recommended by the Association of Professors of Gynecology and Obstetrics. The goal of the clerkship is to introduce medical students to the unique aspects of the medical care of women. In the process they are exposed to the specific type of practice encompassing OB/GYN. The curriculum draws upon three sources of learning: Direct Patient Care, Structured Didactics, and Self-Directed Study. Learning obtained through direct patient care is divided into the following clinical venues: Community-based preceptors, Inpatient obstetrics, Gynecologic surgery, and Ambulatory OB/GYN. All clinical experiences involve participation in direct patient care under the supervision of resident staff and faculty. Primary modes of instruction include teaching rounds, lectures, and conferences. The conclusion of the clerkship will include assessments via the Obstetrics and Gynecology NBME subject examination, an Objective Structured Clinical Evaluation (OSCE), an Objective Structured Assessment of Technical Skills (OSAT), and Oral Examination.

OBGY G701 - Clerkship Completion (0 Credits)
This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

OBGY G710 - Urogynecology Elective (2 Credits)
Experience will be offered in both an ambulatory office-based setting an inpatient hospital-based setting under the direct supervision of resident and attending physicians. The student will be actively engaged in the evaluation and management of urogynecologic conditions and the intraoperative and perioperative care of patients undergoing urogynecologic surgical procedures.

OBGY G715 - High Risk Obstetrics Elective (2 Credits)
Students will be exposed to a breadth of medical and obstetrical complications and fetal conditions. The student will participate in clinical experiences in the Antepartum Ward and Labor and Delivery. Students might also be assigned to the outpatient OB clinic under the direct supervision of resident and attending MFM physicians for a small minority of their rotation time.

OBGY G720 - Gynecologic Oncology Elective (2 Credits)
This four week elective in Gynecologic Oncology is offered to students who have satisfactorily completed their third year clinical rotations. Experience will be offered in an inpatient hospital-based setting under the direct supervision of resident and attending physicians. The student will be actively engaged in intraoperative and perioperative care of patients undergoing gynecologic oncology surgical procedures.

OBGY G725 - Inpatient Obstetrics (2 Credits)
This course is for students considering/planning to go into Obstetrics and Gynecology. It is reserved for students who have already completed their core clerkship. They will have a focused two week time frame on the inpatient obstetrics units. This will give opportunity to reinforce knowledge gained in the prior clerkship, as well as gain additional medical knowledge and technical skill specific to the care of the obstetric patient. All clinical activities for the Inpatient Obstetrics Teaching Service (OBTS) block are conducted in Greenville Memorial Hospital. The three main venues for clinical activities are: Labor and Delivery Obstetrical Triage Mother-Baby Inpatient Ward Patient Care Responsibilities (Labor & Delivery): Each morning or evening, students will be assigned one or more patients. Students should contribute to the care of their assigned patients by performing intrapartum assessments, writing progress notes in the medical record, writing orders, and participating in the delivery under the direct supervision of residents and faculty. Once an assigned patient has delivered, the student should continue following this patient through the duration of her postpartum course. Patient Care Responsibilities (Obstetrical Triage): Each morning, students may be assigned the responsibility of evaluating patients. Students should contribute to the care of these patients by performing assessments and formulating care plans under the direct supervision of residents and faculty. When possible, once an assigned patient is admitted for intrapartum management, the student should continue following this patient through the duration of her intrapartum and postpartum course. Patient Care Responsibilities (Mother & Baby Inpatient Ward): Students who are assigned to the OBTS day team should attend daily work rounds on postpartum patients with the resident team. The resident will assign patients to each student to follow. Students should contribute to the care of their assigned patients by performing daily rounds, writing progress notes in the medical record, writing orders, and interpreting laboratory and imaging studies as directed by the supervising residents and faculty.

OBGY G730 - Inpatient Obstetrics Interprofessional Elective (2 Credits)
The medical student who is considering or planning to pursue a career in OB/Gyn will participate within each aspect of the obstetric team. This will include aspects that are essential for excellence in patient care as well as patient satisfaction. Specific examples include: Signout/handoffs Discharge planning Team rounds/care plans Skill sets specific to each area (scrubbing, maintenance of sterility, foley insertion, blood draw) Interprofessional communication Midwifery care The student will be exposed to the roles and responsibilities of each respective area. This will lead to an improved awareness and appreciation for each member of the healthcare team. This also includes specific differences and appropriate roles, for example midwifery versus obstetrician differences, and the benefits of each. They will enhance their understanding and improve their practice of medicine by focusing on communication, knowledge, skills, and attitudes within the team. Additionally, they will review literature regarding important aspects of interprofessional education and team based learning. They will provide examples of issues that could be improved to provide better team based, patient centered care. Additionally, they will provide a potential plan to address these issues that they identify.
OBGY G735 - Inpatient Obstetrics Night Float (2 Credits)
This course is for students considering/planning to go into Obstetrics and Gynecology. It is reserved for students who have already completed their core clerkship. They will have a focused two week time frame on the inpatient obstetrics units. This will give opportunity to reinforce knowledge gained in the prior clerkship, as well as gain additional medical knowledge and technical skill specific to the care of the obstetric patient. All clinical activities for the Inpatient Obstetrics Teaching Service (OBTS) block are conducted in Greenville Memorial Hospital. The three main venues for clinical activities are: Labor and Delivery Obstetrical Triage Mother-Baby Inpatient Ward Patient Care Responsibilities (Labor & Delivery). Each evening, students will be assigned one or more patients. Students should contribute to the care of their assigned patients by performing intrapartum assessments, writing progress notes in the medical record, writing orders, and participating in the delivery under the direct supervision of residents and faculty. Once an assigned patient has delivered, the student should continue following this patient through the duration of her postpartum course.

OBGY G740 - Reproductive Endocrinology and Infertility Elective (2 Credits)
This is an outpatient rotation focused on exposing students to disorders of reproductive endocrinology and infertility. There will be opportunities to participate in new patient evaluations (frequent diagnoses include infertility, PCOS, fibroids, endometriosis, and amenorrhea), clinical procedures, and outpatient surgeries. Students will work primarily one-on-one with faculty, though there will be a resident on service at all times. Attendance at and participation in departmental and division conferences is expected. Grading will be on a pass/fail basis.

OBGY G800 - High Risk Obstetrics Acting Internship (4 Credits)
This Acting Internship is offered to students who have satisfactorily completed their third year clinical rotations. The purpose of this course is to provide the learner with an intensive exposure to high-risk obstetrical care in an inpatient setting. Students will be exposed to a breadth of medical and obstetrical complications and fetal conditions. The student will be expected to function at the level of a PGY-1 resident, participating in clinical experiences in the Antepartum Ward and Labor and Delivery, as well as in the outpatient OB clinic under the direct supervision of resident and attending MFM physicians.

OBGY G801 - Gynecologic Oncology Acting Internship (4 Credits)
This four week Acting Internship in Gynecologic Oncology is offered to students who have satisfactorily completed their third year clinical rotations. Experience will be offered in an inpatient hospital-based setting under the direct supervision of resident and attending physicians. The student will perform the preoperative evaluation, attend surgery, and follow the patient postoperatively. Management will be discussed with the faculty at daily beside teaching rounds. The students will present their patients and be expected to provide a discussion of management options. At the end of the four weeks, the student will be expected to present a peer-reviewed publication in journal club format to the department of Obstetrics and Gynecology. The publication is to be chosen in conjunction with the course director.

OBGY G810 - Longitudinal Obstetrical Antenatal Care Elective (4 Credits)
This longitudinal elective is offered to students who have satisfactorily completed their third year core clinical rotations. The elective has a unique longitudinal design that allows students to follow patients throughout the duration of their pregnancy, and ideally manage the labor and perform the delivery. The student will participate in the Centering Pregnancy group prenatal care model. He or she will help facilitate a group of 9-12 low-risk gravidas. The student will participate in a total of ten 2-hour group prenatal sessions. The visits begin at 14-16 weeks, and then occur at 20, 24, 28, 30, 32, 34, 36, 38, and 40 weeks. Along with the preceptor, the student will perform clinical assessments and provide patient education during each 2 hour group visit. Students will also have the opportunity to be “first-call” for each patient’s delivery. The student will manage the patient’s labor, conduct the delivery and provide postpartum care and counseling. Due to the longitudinal nature of this elective, the student must commit to making him or herself available for the fixed schedule of prenatal visits. Students do not have to commit to be available for the delivery, but it is strongly encouraged.

OBGY G815 - Gynecologic Oncology (4 Credits)
This four week elective in Gynecologic Oncology is offered to students who have satisfactorily completed their third year clinical rotations. Experience will be offered in an inpatient hospital-based setting under the direct supervision of resident and attending physicians. The student will be actively engaged in intraoperative and perioperative care of patients undergoing gynecologic oncology surgical procedures.

OBGY G820 - Reproductive Endocrinology and Infertility (4 Credits)
This elective is offered to students who have satisfactorily completed their third year clinical rotations. This elective provides a mentored, in-depth clinical experience in the evaluation and management of hormone related disorders at all stages of life. The rotation is conducted in the Division of Reproductive Endocrinology and Infertility (REI) under the direct supervision of attending physicians. Students will participate in clinical evaluations and procedures in the ambulatory setting. Assist in surgical procedures, observe assisted reproductive technologies, and attend didactic teaching sessions.

OBGY G825 - Urogynecology (4 Credits)
This rotation is primarily an outpatient experience with some exposure to the operating room and postoperative care. The bulk of the student’s time will be spent in clinic seeing patients alongside the Urogyn faculty and residents. Students will see a wide variety of patients with complex pelvic floor disorders. The majority of patients will have prolapse and/or urinary incontinence. On average, students will be in the operating room 1-2 days per week assisting with surgical repairs. Students will follow patients postoperatively until discharge. The student will also participate in the weekly OB/GYN didactic sessions on Wednesday and (occasionally) Friday mornings.
**Orthopaedic Surgery (ORSU)**

**ORSU G710 - Adult and Geriatric General Orthopedics (2 Credits)**
This course is designed to give a broad experience regarding adult and geriatric musculoskeletal problems of upper and lower extremities. The student's education includes multiple aspects of patient care: initial diagnosis in the E.D. or clinic; development and execution of treatment plans; ongoing assessment of treatment and follow-up care. The student will work with the team of orthopedic attending physicians and resident physicians. All student activities will be supervised and appropriately directed.

**ORSU G715 - Orthopedic Surgery Sports Medicine (2 Credits)**
This course is designed to give a focused experience in the fields of orthopedic sports medicine and trauma. Attention will be given to adult and pediatric pathology within these subspecialties of orthopedic care. This includes acute and chronic athletic injuries, fractures, post-fracture deformity and dysfunction. The student's education includes all aspects of patient care: initial diagnosis in the E.D. or clinic; development and execution of treatment plans; ongoing assessment of treatment and follow-up care. The student will work with the team of orthopedic attendings and resident physicians. There are daily rounds and didactic education. All student activities will be supervised and appropriately directed.

**ORSU G720 - Pediatric Orthopedics (2 Credits)**
This course is an outstanding introduction to caring for musculoskeletal pathology in children. It will encompass congenital, acquired, and traumatic conditions. The student will work in conjunction with Pediatric orthopedic specialists and orthopedic resident physicians. All student activities will be supervised and appropriately directed. Daily activities will include didactic sessions, outpatient care, inpatient care, and surgical procedures.

**ORSU G725 - Orthopedic Surgery - Trauma (2 Credits)**
This course is designed to give a focused experience in the fields of orthopedic sports medicine and trauma. Attention will be given to adult and pediatric pathology within these subspecialties of orthopedic care. This includes acute and chronic athletic injuries, fractures, post-fracture deformity and dysfunction. The student's education includes all aspects of patient care: initial diagnosis in the E.D. or clinic; development and execution of treatment plans; ongoing assessment of treatment and follow-up care. The student will work with the team of orthopedic attending and resident physicians. There are daily rounds and didactic education. All student activities will be supervised and appropriately directed.

**ORSU G810 - General Orthopedic Surgery (4 Credits)**
This course is designed to provide the student with a broad exposure to orthopedic surgery. Facilities utilized during the course include the main campus of Greenville Memorial Hospital and the Shriners Hospital for Children, Greenville Hospital. Attention will be given to basic adult and pediatric orthopedic pathology, including general affections of the musculoskeletal system, arthritis, deformity management, trauma, sports medicine, neoplasms, general spine problems, infection, and metabolic disease. The student will be assigned to a team consisting of orthopedic residents and faculty members. Completion of medical history and physician examination on assigned patients as well as formulation of a treatment plan will be the responsibility of the student. Participation in the preoperative evaluation, surgical treatment, and postoperative management will be expected. In addition to daily rounds, the student will participate in regularly scheduled orthopedic conferences and clinics. At the conclusion of the course, the student will prepare a 10-20 minute presentation relating to a specific orthopaedic condition or process. This will be presented at a regularly scheduled morning conference. Evaluation will be performed at the end of the rotation by the attending faculty. Call schedules will be arranged so that the student will be on in-house call approximately every fourth night and one weekend during the month of the rotation.

**ORSU G815 - Night Float Orthopedic Trauma and Acute Care (2 Credits)**
The student will be assigned to a team consisting of orthopaedic residents and faculty members. Completion of medical history and physician examination on assigned patients as well as assisting in the formulation of a treatment plan will be among the responsibilities of the student. Participation in the preoperative evaluation, surgical treatment, and postoperative management will be expected. The two week rotation will be organized to ensure access to a focused experience in orthopedic trauma and the acute care of orthopedic patients that present to the Emergency Department and Trauma Bay. Therefore, the spectrum of pathology will include a broad spectrum of injuries, infections, and lacerations. Students can expect extensive experience in hands on techniques of laceration repair, application of casts and splints, and interpretation of radiographs. The student will be working in the 710-bed Greenville Memorial Hospital, an acute care hospital, and serves as the major tertiary referral center for the Upstate of South Carolina as well as Western North Carolina and Northeastern Georgia. The hospital also serves as the major Level I Trauma Center for this region. The course director will perform the student's evaluation at the end of the rotation. The rotation will be organized as a night shift, working closely with the orthopedic resident In the Emergency Department. All Accreditation Commission Graduate Medical Education (ACGME), duty hour requirements will be adhered to for the students on the rotation just as they are for the residents.
ORSU G820 - Advanced Orthopedic Surgery (4 Credits)
After their introductory, initial course ORSU-G810, the M4 student will transition to this advanced course in the orthopedic fields of trauma, tumor, sports, and arthroplasty. This second rotation will offer them the training ground to really accelerate and enhance their knowledge and skill across the specialty of orthopedic surgery.

ORSU G899 - Orthopedic Surgery Away Rotation (2-4 Credits)
The student will complete an intensive study of Orthopedic Surgery at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Pathology (PATH)

PATH G710 - Pathology Elective (2 Credits)
The student will be exposed to anatomic pathology, which can include surgical pathology, autopsy pathology/medical examiner, hematopathology, cytology, and dermatopathology. The student should gain a general understanding of the process involved in arriving at pathologic diagnoses as well as how the general pathology laboratory functions. The student will have opportunities for one-on-one interaction with the pathology staff. The staff is board certified in anatomic and clinical pathology with certification in numerous sub-specialties. The course is flexible and can often be tailored to meet the specific needs or interests of the student.

PATH G810 - Clinical Pathology (2 Credits)
The student will be exposed to anatomic pathology, which can include surgical pathology, autopsy pathology/medical examiner, hematopathology, cytology, and dermatopathology. The student should gain a general understanding of the process involved in arriving at pathologic diagnoses as well as how the general pathology laboratory functions. The student will have opportunities for one-on-one interaction with the pathology staff. The staff is board certified in anatomic and clinical pathology with certification in numerous sub-specialties. The course is flexible and can often be tailored to meet the specific needs or interests of the student.

PATH G899 - Pathology Away Rotation (4 Credits)
The student will complete an intensive study of Pathology at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Pediatrics (PEDI)

PEDI G700 - Pediatrics Clerkship (6 Credits)
The Pediatrics Clerkship has been developed to serve as an introduction to general pediatrics. In addition to gaining specific knowledge of common and classic pediatric pathologies, the student will refine skills in obtaining an accurate history from the patient and family, performing a physical exam on pediatric patients, and developing appropriate diagnosis and management plans. Students will have exposure to multiple pediatric conditions, both acute and chronic, newborn care, well child care, adolescent health maintenance, safety and prevention, and exposure to a patient centered medical home. Special attention is paid to the role physical, cognitive, emotional, and developmental stages play in pediatric medicine. The core of this experience takes place on the pediatric inpatient service, at the Center for Pediatric Medicine, and the Newborn Nursery. Students will also be exposed to subspecialty pediatric services, community-based private pediatric practices, NICU, and Pediatric Emergency Medicine. The conclusion of the clerkship will include assessments via the Pediatrics NBME subject examination and an Objective Structured Clinical Evaluation (OSCE).

PEDI G701 - Clerkship Completion (0 Credits)
This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

PEDI G710 - Pediatric Hematology/Oncology Elective (2 Credits)
This rotation will allow 3rd year medical students to participate in the care of hematology and oncology patients in the hospital and clinic settings. Under the guidance of an attending hematologist/oncologist, the medical student will shadow and observe direct clinical care of pediatric hematology/oncology patients. By rotation end, they will perform history and physical exams; interpret basic laboratory tests; review peripheral blood and bone marrow aspirate smear; and participate in the planning of comprehensive whole-family care that is the hallmark of the pediatric hematology/oncology team, which consists of physicians, nurse practitioners, nurses, child life, chaplains, social workers and psychologists. Furthermore, the student will be expected to give a brief review of relevant hematology/oncology topics on a weekly basis. Also, bedside teaching occurs during rounds and during clinic visits, so that the student’s exposure to most of the common disorders in hematology/oncology will be complete.

PEDI G715 - Pediatric Neurology Elective (2 Credits)
The Pediatric Neurology elective is designed to expose the 3rd year student to a wide range of common neurologic problems of childhood, including epilepsy, headache, cerebral palsy, developmental delay, and tics. The student will work one-on-one with the pediatric neurologist in the outpatient setting. Students will learn the basics of taking the neurologic history and performing the neurologic examination.

PEDI G720 - NICU Elective (2 Credits)
This elective will present the student with the essential aspects of premature and sick newborn care. Students will have the opportunity to attend high risk deliveries. He/She will be assigned several new patients in the NICU and will be responsible for completing a history, physical, and maturity assessment on each. He/She will observe and participate in special treatment procedures performed on his/her patients, e.g., intravenous and intra-arterial catheter insertions, nasal continuous positive airway pressure, mechanical ventilation procedures, endotracheal intubations and resuscitation. In addition, the student may attend a weekly follow-up clinic for those infants discharged from the NICU. He/She will be responsible for talking with the infant’s parents with guidance from the attending. He/She will make work rounds with the house staff and teaching rounds with the attending physician daily and will participate in all regularly scheduled neonatal and perinatal conferences.

PEDI G725 - PICU Elective (2 Credits)
The purpose of the rotation is to provide students with an introduction to the evaluation and care of critically ill children. The student will function as a member of the pediatric team in the pediatric intensive care unit. Students will be expected to admit and work up patients assigned to them by the senior resident or PICU attending. These patients will be followed on a daily basis by the student. Students should be able to discuss the patient’s diagnosis and management plan under the supervision of a pediatric senior resident and the PICU attending. Educational material is presented via bedside didactic rounds and guided reading of the PICU notebook, a compilation of relevant critical care articles, etc. No night call is required.
The course offers firsthand experience with pediatric lung disease. Students will see new patients as often as possible, either independently or with attending faculty, or work with faculty initially in a shadowing role, striving to become capable of more independent patient interactions. This is the most effective way to broaden differential diagnostic skills, develop a basic understanding of subspecialty evaluation and treatment plans, and gain a familiarity with the variety of patients commonly referred for potential respiratory problems. Students will also be free to round with providers in the inpatient setting, perform interesting and educational new inpatient consultations, and attend flexible bronchoscopy cases as schedules and individual interests may allow.

**PEDI G735 - Pediatric Sleep Medicine Elective (2 Credits)**

Students will receive exposure to common respiratory and nonrespiratory sleep disorders which effect pediatric patients including but not limited to the following: obstructive sleep apnea, restless leg syndrome, narcolepsy, behavioral insomnia of childhood, circadian rhythm disorders, parasomnias, nocturnal enuresis, nocturnal seizures, periodic limb movement disorder. Students are expected to see patients in the clinic, present new patients to the attending, and shadow follow-up patients. Students will be expected to present on a topic of interest toward the end of the rotation. Students will spend at least one evening in the pediatric sleep lab to understand patients experiencing the pediatric sleep, this will be a 2 to three-hour experience. The student will also sit with a sleep medicine specialist while interpreting interpreting 1-2 polysomnograms. Evaluation will be based on enthusiasm, professionalism and how well the student meets the expectations of the rotation.

**PEDI G745 - Pediatric Community/Private Practice Elective (2 Credits)**

The focus of this elective is for the medical student to gain exposure to the practice of general pediatrics in a community setting. Students will see a variety of pediatric patients from birth to age 21 for well child care, continuing care for chronic medical issues, and acute sick visits. The well care includes check-ups, sports and college physicals, developmental screenings, behavioral management, parenting, anticipatory guidance, and immunizations. The student will gain an understanding of a Medical Home for Children by seeing how children with chronic issues such as asthma, obesity, ADHD, depression, and a variety of other issues, are cared for in a comprehensive manner. The acute sick visits include patients with fever, respiratory difficulties, gastrointestinal illnesses, unusual rashes, minor traumas, and a plethora of other issues. The student will also be able to see how a pediatric practice functions by observing how the practice manager, clerical, and nursing staff perform their various duties. The student may also have the opportunity to round with an attending in the nursery at either GMH or Greer. The goal of this elective is for the medical student to have not only an overview of general pediatric practice but also to have an understanding of the challenges and rewards that come with providing comprehensive medical care for pediatric patients.

**PEDI G750 - Pediatric Nephrology (2 Credits)**

Students will participate in care of children with pediatric nephrologic conditions likely to include urinary tract infections, vesicoureteral reflux, chronic kidney disease, nephritic & nephrotic syndromes and hypertension, as well as patients being screened for underlying pathological causes of hematuria, proteinuria and hypertension. While most of the experience will be in the outpatient setting, there may be an opportunity for an inpatient experience depending on consultations received during the 2 week block.
PEDI G785 - Pediatric Rheumatology (2 Credits)
Working in the pediatric rheumatology office allows the best exposure to the typical diseases and pathophysiology encountered by a pediatric rheumatologist. Inpatient consultation may also provide some exposure to these diseases. Students are expected to attend the outpatient pediatric rheumatology visits scheduled at the Patewood campus. Typically, patients are seen from 7:30 am to 5:00 pm on Monday / Tuesday / Thursday, from 7:30 - 12:30 on Wednesday, and from 8:30 - 12:30 on Friday. Students may leave clinic as needed to attend any required lunch lectures. If there are joint injections scheduled during the rotation then students may observe the procedures which take place at the main GMH campus on Wednesday afternoons. If desired, students may accompany faculty to the GMH main campus hospital for any inpatient consults that occur during the elective. Consult patients are also seen in the afternoons. The rotation will be primarily an observational experience. There are no overnight or weekend responsibilities. Because the clinic patient volumes are lower compared to other specialties, the student will be asked to prepare two short overview talks (one per week). One talk should cover JIA, the most common rheumatologic condition in childhood, and the second topic can be chosen based on the student’s interests.

PEDI G800 - Pediatric Wards Acting Internship (4 Credits)
This rotation is a four-week inpatient experience. Students will be assigned to one of the pediatric teaching services and serve as an active team member. Students will act as the primary physician for their assigned patients, under the direct supervision of an upper level pediatric or medicine-pediatric resident. Responsibilities will include admission and initial management of patients, daily rounding and discharge planning for established patients, observation of and participation in procedures on their patients, and transition of care communication for sign out and cross cover. Clinical learning will be supplemented by lectures, small group sessions, and self-directed learning. Students will take in-house call with their team every fourth night.

PEDI G801 - Neonatal Intensive Care Unit Acting Internship (4 Credits)
The content of this course is designed to present to the student the essential aspects of premature and sick newborn care. Students will get the opportunity to attend high risk deliveries. He/She will be assigned several new patients in the NICU and will be responsible for completing a history, physical, and maturity assessment on each. He/She will observe and participate in special treatment procedures performed on his/her patients, e.g., intravenous and intra-articular catheter insertions, nasal continuous positive airway pressure, mechanical ventilation procedures, endotracheal intubations and resuscitation. In addition, the student may attend a weekly follow-up clinic for those infants discharged from the NICU. He/She will be responsible for talking with the infant’s parents with guidance from the attending. He/She will make work rounds with the house staff and teaching rounds with the attending physician daily and will participate in all regularly scheduled neonatal and perinatal conferences.

PEDI G802 - Pediatric Intensive Care Unit Acting Internship (4 Credits)
The purpose of the rotation is to provide students with an introduction to the evaluation and care of critically ill children. The student will function as a member of the pediatric team and the primary / lead physician for their patient in the pediatric intensive care unit. Students will be expected to admit and work up patients assigned to them by the senior resident or PICU attending. These patients will be followed on a daily basis by the student. Students should be able to discuss the patient’s diagnosis and management plan under the supervision of a pediatric senior resident and the PICU attending. Educational material is presented via bedside didactic rounds and guided reading of the PICU notebook, a compilation of relevant critical care articles, etc. Night call will follow resident schedule.

PEDI G810 - Adolescent Medicine (2 Credits)
M-IV Students will have the opportunity to work at the Student Health Center at Furman University evaluating patients with a variety of physical complaints as well as chronic medical and/or emotional conditions. Students can expect to encounter patients with acute infectious disease, sexually transmitted diseases, orthopedic injuries, anxiety disorders, learning disorders, depression and eating disorders. Students will also be expected to complete assigned readings and a series of questions testing their knowledge of common problems encountered in the adolescent population.

PEDI G811 - Interprofessional Elective in Pediatrics (2 Credits)
This elective is designed to provide exposure to interprofessional disciplines in pediatrics including speech therapy, occupational therapy, physical therapy, respiratory therapy, child life and social work. During the two week elective, students will spend 1-2 days with representatives from these interprofessional disciplines. Typical days on the elective will be up to 8-5 and will not involve call or weekend duties. The student will be expected to participate in the evaluation/therapy sessions with patients, in diagnostic procedures performed by these teams and in communication back to the primary medical team. Inpatient services may be provided in the general wards, surgical ward, hematology/oncology or ICU settings. Depending on student interest, there may be an opportunity to work with interprofessionals focusing on subspecialties such as pulmonology/CF, gastroenterology, etc. This experience will improve student understanding of the evaluations and management of patients by these professionals and their role in the interprofessional team. They will also have the opportunity to evaluate communication between the consulted service and the primary medical team.

PEDI G812 - Pediatric Complex Care (2 Credits)
This elective rotation for 4th year medical students will serve as an introduction to the acute and maintenance care of the special needs child. Students will have the opportunity to work at the Ferlauto center where they will work with an attending in a single panel, multidisciplinary clinic with nursing, case management, and a dietician. Students will participate in direct patient care. Students can expect to encounter patients with a variety of chronic medical conditions such as cerebral palsy, seizures, hydrocephalus, chronic lung disease, congenital heart disease, metabolic syndrome, genetic conditions, and extreme prematurity. Students will develop comfort with interviewing and examining patients with needs that include gastrostomy tubes, tracheostomy tubes, central lines, ventilators, prosthesis, and other assistive devices in the outpatient setting.
Students will participate in care of children (and occasionally adults) with a wide range of allergic and other immunologic disease processes in a busy outpatient setting. Students will participate in direct patient care and one-on-one instruction. Students may be given written questions and quizzes to answer during the rotation as well as various high-yield articles of clinically significance in allergy and immunology to review during their self-directed learning.

**PEDI G814 - Pediatric Palliative Care (2 Credits)**

This course provides opportunities to develop knowledge and skills in the comprehensive care of patients and their families during various stages of life-limiting illness. Students will be partnered with the palliative care team in the inpatient setting. Students will identify periods of transition in illness, as well as appropriate interventions. Communication skills, decision-making, care coordination, family support interventions and management of symptoms will be emphasized. The course will include didactic and clinical time with members of the interdisciplinary team (physicians, nursing, psychology, chaplaincy, child-life specialists).

Students will engage in assessment, management recommendations for, and follow-up of patients, as well as a range of activities examining the clinical, ethical and research aspects of comprehensive palliative and end-of-life care. This elective is typically Monday through Friday during the day – night call is not required.

**PEDI G815 - Ambulatory Pediatrics (4 Credits)**

This elective is designed for the student who desires exposure to the ambulatory aspects of pediatric practice. Experience will be gained in well child care, behavioral pediatrics, and acute illnesses. The student will participate in daily morning rounds and teaching conferences. Emphases will be placed on interview techniques, parenting concepts, principles of preventive health care, and the diagnosis, differential diagnosis, treatment principles and follow-up care of common acute pediatric illnesses. Services Provided at CPM are: well child exams & health supervision, childhood immunizations & flu shots, same day appointments for sick children, care of chronic illnesses (i.e. asthma, diabetes), Attention Deficit Hyperactivity Disorder, sports physicals, pre-op dental physicals, developmental delays, behavioral issues, adolescent issues, Teen-mom program, Healthy Lifestyles, nutritional counseling.

**PEDI G817 - Pediatric Inpatient Elective (2 Credits)**

This course is a 2 week inpatient elective experience that does not include call. It is intended for students interested in improving skill and knowledge around admission, evaluation, management and disposition of patients in the inpatient pediatric setting. This rotation builds on the inpatient experience of the clerkship and offers the student additional opportunity to act as the primary physician for their assigned patients under the direct supervision of an upper level resident. Responsibilities will include admission and initial management of patients, daily rounding and discharge planning for established patients, observation of and participation in procedures on their patients, and transition of care communication for sign out and cross cover. Students taking the 4 week acting internship are not eligible to take this elective.

**PEDI G818 - Pediatric Pain Medicine (2 Credits)**

This 2-week rotation elective provides exposure to predominantly chronic and cancer pain patients. Clinical experience and didactics are under the supervision of the Director of Pediatric Pain Medicine. Medical students see pain patients predominantly at Pediatric Pain Clinic, Patwood Memorial Hospital, Patwood Outpatient Surgical Center, Kidnetics/Center for Developmental Services, Children's Hospital of Prisma Health-Upstate.

This 2 or 4-week medical student rotation in Developmental-Behavioral Pediatrics will provide an introduction to this subspecialty that focuses on the development of young children and the biological and environmental factors that can influence behavior and development. The student will observe the evaluation and management of children with developmental and behavioral concerns in an outpatient clinical setting and will have the opportunity to interact with members of the multidisciplinary team that includes physicians, psychologists, nurse practitioners, social workers and nurses. There will also be opportunity to learn about the outreach efforts and collaborative projects with community agencies that are focused on promoting healthy child development.

**PEDI G825 - Forensic Pediatrics (2 Credits)**

This elective rotation for 4th year medical students will serve as an introduction to the many facets of child abuse evaluation to include: inpatient consults, outpatient evaluation for child sexual abuse, multidisciplinary staffing, forensic interviewing, legal responses and the evaluation and care of children in foster care.

**PEDI G830 - Newborn Nursery (4 Credits)**

This rotation provides your best opportunity to learn about comprehensive care of the newborn. Our average daily census on the Pediatric Teaching Service is 23 babies; we care for newborns at or above 35 weeks’ completed gestational age. Each month, common diagnoses in our newborn population typically include heart murmurs, drug exposure, ABO incompatibility, jaundice, minor birth defects, tachypnea, and high-risk social situations. Every couple of months we also see clavicle fractures, Eb's palsy, Down syndrome, developmental hip dysplasia, cleft palate, hypospadias, and other less common newborn physical findings. Students will learn to perform routine circumcision during this rotation and are expected to be proficient by rotation end.

**PEDI G835 - Pediatric Cardiology (4 Credits)**

The medical student is expected to actively observe the evaluation, assessment, and disposition of pediatric cardiology patients. The rotating medical student will, at a minimum, read the chapter on pediatric cardiology in Nelson's Textbook of Pediatrics or Rudolph's Pediatrics (current edition) OR the collection of articles located on the Pediatric Cardiology Wiki Site (available from Dr. Malpass).

**PEDI G840 - Pediatric Endocrinology (4 Credits)**

Students will work with experienced pediatric endocrinologist in evaluation and management of patients with diabetes and variety of pediatric endocrine disorders. They will be expected to observe and participate in history, PE, assessment, laboratory evaluation, and treatment plan. Reading material will be provided on patients seen that session if desired by student. Review articles can be accessed through the Division's Wiki: http://ghspedendo.pbworks.com/w/page/85105726/Welcome%20to%20Pediatric%20Endocrinology.

**PEDI G845 - Pediatric Gastroenterology (4 Credits)**

Student will attend the outpatient pediatric gastroenterology visits scheduled in the Center for Digestive Health at Patwood campus of GHS. Typically, patients are seen from 8 am to 4 pm M-Th. Student will also be invited to attend outpatient GI procedures on any of the three procedure days, performed in the Outpatient GI Lab at the Patwood campus. At their discretion, the student will have the option to spend some of the rotation doing inpatient consultation afternoons with the on-call gastroenterologist. The rotation will be primarily an observational experience, where the student will observe outpatient visits. Time can be arranged to attend outpatient visits with the pediatric dietitian as well.
PEDI G850 - Pediatric Hematology/Oncology (4 Credits)
The course will provide 4th year medical students extensive exposure to the diagnosis and management of hematologic disorders and malignant diseases during childhood. Student can expect to become an integral member of comprehensive care team of children with chronic hematologic and oncology diseases (including the psychosocial aspects of their diseases) in the hospital and clinic settings. The student will perform history and physical exams; interpret basic laboratory tests; review peripheral blood; and participate in the planning of comprehensive whole-family care that is the hallmark of the pediatric hematology/oncology team, which consists of physicians, nurse practitioners, nurses, child life, chaplains, social workers and psychologists. By the end of the rotation, the student is expected to be able to better evaluate the child with anemia, leukopenia, or thrombocytopenia, and learn how common malignant disorders first present to the pediatrician. The student will also learn the complications of therapy and the effects on the immune system of these diseases and their treatments. He or she should be comfortable in evaluating a peripheral blood smear for more common disorders such as iron deficiency, sickle cell disease and mononucleosis. Furthermore, the student will be expected to give a brief review of relevant hematology/oncology topic prior to completion of the rotation. The student will attend pediatric morning report, pediatric grand rounds and tumor board presentations during their rotation.

PEDI G855 - Pediatric Infectious Disease (2-4 Credits)
Students will participate in care of children with a wide range of infectious disease processes in both inpatient and outpatient setting. Students will participate in direct patient care and one-on-one instruction. Students will prepare a short presentation focused on answering a specific clinical question using primary literature sources.

PEDI G860 - Pediatric Centering Elective (longitudinal) (4 Credits)
This elective represents a unique opportunity for students to develop longitudinal pediatric relationships spanning the first year of life. The student will be an active participant in the Pediatric Centering program in which a group of infants and their parents meet together with a facilitator (NP or MD) for their 2wk, 2mo, 4mo, 6mo, 9mo, and 12mo well child visits. During these group visits, the student will assist the facilitator with clinical assessments / exams as well as discussions of developmental milestones and routine infant care. The often lively discussions in these groups offer a spectrum of the common parenting questions encountered by the general pediatrician. Over the course of the year, students will be expected to attend at least 4 visits with each of their 2 assigned groups. Each visit will require ½ day and the student will need to be excused from other clinical duties for that time. Due to the longitudinal nature of the elective, the student must commit to making himself/herself available during their groups’ scheduled visits. The course coordinator can assist with notification of other rotations but the student must provide the dates prior to the start of each block. Additionally, students are expected to read the Pediatric Centering book provided by the clinic and the appropriate age section in Bright Futures prior to the visit. Finally, the student will take on the role of primary provider in the health maintenance for their panel of patients. Under the direction of the facilitator, the student will perform periodic chart review for sick visits, mommy calls, ER visits and hospitalizations, and specialist follow-ups.

PEDI G865 - Pediatric Nephrology (2-4 Credits)
Students will participate in care of children with pediatric nephrologic conditions likely to include urinary tract infections, vesicoureteral reflex, chronic kidney disease, nephritic & nephrotic syndromes and hypertension, as well as patients being screened for underlying pathological causes of hematuria, proteinuria and hypertension. While most of the experience will be in the outpatient setting, there may be an opportunity for an inpatient experience depending on consultations received during the 2 week block.

PEDI G870 - Pediatric Neurology (2-4 Credits)
The student will be exposed to outpatient pediatric neurology, including patients with epilepsy, headaches, developmental delay, tics, cerebral palsy, and other neurologic disorders. They will review neuroanatomy, neuropharmacology, and the neurologic exam in children. They will accompany the neurologist and will be allowed to initially evaluate the patient. They will be exposed to commonly used neurologic diagnostic tests, including EEG, MRI, and Nerve conduction studies.

PEDI G875 - Pediatric Pulmonology (4 Credits)
Welcome to the division of pediatric pulmonary medicine at Greenville Health System and Children's Hospital! We are very happy to welcome medical students on rotations with us, and look forward to the time you spend in clinic and in the hospital. We currently see patients in clinic every day except Friday afternoons typically. Every Tuesday morning we have CF clinic which includes multidisciplinary involvement of our nutritionist, social worker, and child life specialist. Typically several providers will be in clinic each day, including our nurse practitioner (who will see her own patients without residents or students). Our clinic schedule typically begins on a daily basis around 8:30 and it is expected that students will arrive in a timely fashion when free of other obligations such as required conferences, didactic lectures, or other events and meetings.

PEDI G880 - Pediatric Rheumatology (2 Credits)
Working in the pediatric rheumatology office allows the best exposure to the typical diseases and pathophysiology encountered by a pediatric rheumatologist. Inpatient consultation may also provide some exposure to these diseases. Students are expected to attend the outpatient pediatric rheumatology visits scheduled at the Patewood campus of GHS. Typically, patients are seen from 8:30 am to 12:30 pm Monday – Friday but students may leave clinic early to attend any required lunch lectures. If there are joint injections scheduled during the rotation then students may observe the procedures which take place at the main GHS campus in the afternoons. If desired, students may accompany faculty to the GHS main campus hospital for any inpatient consults that occur during the elective. Consult patients are also seen in the afternoons. The rotation will be primarily an observational experience. There are no overnight or weekend responsibilities. Because the clinic patient volumes are lower compared to other specialties, the student will be asked to prepare two short overview talks (one per week). One talk should cover JIA, the most common rheumatologic condition in childhood, and the second topic can be chosen based on the student's interests.
PEDI G885 - Pediatric Sleep Medicine (2 Credits)
Students will receive exposure to common respiratory and nonrespiratory sleep disorders which effect pediatric patients including but not limited to the following: obstructive sleep apnea, restless leg syndrome, narcolepsy, behavioral insomnia of childhood, circadian rhythm disorders, parasomnias, nocturnal enuresis, nocturnal seizures, periodic limb movement disorder. Students are expected to see patients in the clinic, present new patients to the attending, and shadow follow-up patients. Students will be expected to present on a topic of interest toward the end of the rotation. Students will spend at least one evening in the pediatric sleep lab to understand patients experiencing the pediatric sleep, this will be a 2 to three-hour experience. The student will also sit with a sleep medicine specialist while interpreting interpreting 1-2 polysomnograms. Evaluation will be based on enthusiasm, professionalism and how well the student meets the expectations of the rotation.

PEDI G890 - Pediatric Intensive Care Unit Elective (2 Credits)
The purpose of the rotation is to provide students with an introduction to the evaluation and care of critically ill children. The student will function as a member of the pediatric team in the pediatric intensive care unit. Students will be expected to admit and work up patients assigned to them by the senior resident or PICU attending. These patients will be followed on a daily basis by the student. Students should be able to discuss the patient's diagnosis and management plan under the supervision of a pediatric senior resident and the PICU attending. Educational material is presented via bedside didactic rounds and guided reading of the PICU notebook, a compilation of relevant critical care articles, etc. No night call is required.

PEDI G891 - Neonatal Intensive Care Unit Elective (2 Credits)
The content of this course is designed to present to the student the essential aspects of premature and sick newborn care. Students will get the opportunity to attend high risk deliveries. He/She will be assigned several new patients in the NICU and will be responsible for completing a history, physical, and maturity assessment on each. He/She will observe and participate in special treatment procedures performed on his/her patients, e.g., intravenous and intra-arterial catheter insertions, nasal continuous positive airway pressure, mechanical ventilation procedures, endotracheal intubations and resuscitation. In addition, the student may attend a weekly follow-up clinic for those infants discharged from the NICU. He/She will be responsible for talking with the infant’s parents with guidance from the attending. He/She will make work rounds with the house staff and teaching rounds with the attending physician daily and will participate in all regularly scheduled neonatal and perinatal conferences.

PEDI G895 - Pediatric Community Practice (4 Credits)
The focus of this elective is for the medical student to gain exposure to the practice of general pediatrics in a community setting. Students will see a variety of pediatric patients from birth to age 21 for well child care, continuing care for chronic medical issues, and acute sick visits. The well care includes check-ups, sports and college physicals, developmental screenings, behavioral management, parenting, anticipatory guidance, and immunizations. The student will get an understanding of a Medical Home for Children by seeing how children with chronic issues such as asthma, obesity, ADHD, depression, and a variety of other issues, are care for in a comprehensive manner. The acute sick visits include patients with fever, respiratory difficulties, gastrointestinal illnesses, unusual rashes, minor traumas, and a plethora of other issues. The student will also be able to see how a pediatric practice functions by observing how the practice manager, clerical, and nursing staff perform their various duties. The student may also have the opportunity to round with an attending in the nursery at either GMH or Greer. The goal of this elective is for the medical student to have not only an overview of general pediatric practice but also to have an understanding of the challenges and rewards that come with providing comprehensive medical care for pediatric patients.

PEDI G899 - Pediatrics Away Rotation (4 Credits)
The student will complete an intensive study of Pediatrics at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Phys Medicine & Rehab (PMDR)

PMDR G710 - Physical Medicine and Rehabilitation Elective (2 Credits)
This two-week clerkship provides students exposure to the scope of services provided by physical medicine and rehabilitation specialists. One week is spent on an inpatient service with exposure to spinal cord injury, brain injury, stroke, etc. and another week is spent in the outpatient clinic with exposure to musculoskeletal/sports, spasticity, and electrodiagnostics. On the inpatient service, students will be exposed to all aspects of rehabilitation, including physical, occupational, speech, and psychological therapies and assistive devices. On the outpatient side, students will work one-on-one with an attending and observe outpatient diagnostics and treatment. There is one 30 minute required case presentation at the end of the rotation.

PMDR G810 - Physical Medicine and Rehabilitation Elective (2-4 Credits)
After consultation with the Clerkship Director and Clerkship Coordinator, the student will be assigned to the area of practice to which he/she needs the most exposure before entering a residency program. Options include: time in a rehabilitation hospital working with patients who have spinal cord injuries, brain injuries, stroke, etc., and/or time in outpatient clinics gaining exposure to patients with chronic and acute musculoskeletal pain, sports medicine, interventional spine procedures and electrodiagnostics. On the inpatient service, students will be exposed to all aspects of rehabilitation, including physical, occupational, speech, and psychological therapies and assistive devices. On the outpatient side, students will work one-on-one with an attending and observe outpatient diagnostics and treatment.

PMDR G899 - Physical Medicine and Rehabilitation Away Rotation (4 Credits)
The student will complete an intensive study of Physical Medicine and Rehabilitation at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.
Radiology (RADI)

RADI G710 - Radiology Elective (2 Credits)
This clerkship is designed to impart a broad basic understanding of the role of radiology in diagnosis and management. Emphasis is placed on terminology, proper workup, the fundamentals of diagnostic image interpretation, and clinical indications for imaging examinations and interventional radiology procedures. Instruction occurs through didactic lectures, problem-based learning exercises, computer tutorials, conferences, self-learning exercises, observation of film interpretation, and observation of special procedures. The indications and contraindications for radiologic examination as well as the benefits and limitations of radiological methods will be presented. In addition, the student has the opportunity of working closely with attending radiologists, observing and participating in all phases of their daily work.

RADI G810 - Radiology Elective (2 Credits)
This clerkship is designed to impart a broad basic understanding of the role of radiology in diagnosis and management. Emphasis is placed on terminology, proper workup, the fundamentals of diagnostic image interpretation, and clinical indications for imaging examinations and interventional radiology procedures. Instruction occurs through didactic lectures, problem-based learning exercises, computer tutorials, conferences, self-learning exercises, observation of film interpretation, and observation of special procedures. The indications and contraindications for radiologic examination as well as the benefits and limitations of radiological methods will be presented. In addition, the student has the opportunity of working closely with attending radiologists, observing and participating in all phases of their daily work.

RADI G815 - Interventional Radiology (2 Credits)
The M4 Interventional Radiology Elective will introduce the medical students to the most common interventional procedures in special procedures. The students will learn the pertinent arterial and venous anatomy. The students will participate in the assessment, diagnosis, management and treatment of patients for interventional services. Students will observe and participate in IR procedures, imaging interpretation and interactions with patients and referring physicians.

RADI G899 - Radiology Away Rotation (4 Credits)
The student will complete an intensive study of Radiology at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.

Surgery (SURG)

SURG G700 - Surgery Clerkship (8 Credits)
The Surgery Clerkship is a required rotation for third-year medical students consisting of primarily inpatient and also outpatient experiences. The overall goal of the clerkship is to provide relevant experiences for the student in the care of the patients with both acute and elective surgical problems. Under the supervision of attending staff physicians and residents, students spend variable amounts of time on general surgery and its subspecialties. Students continue to develop skills in medical history-taking, physical examination, and the use of laboratory data in an organized fashion to understand surgical diseases. During this clerkship, students should develop an understanding of the metabolic and physiologic effects of injury and trauma; correlate disordered physiology with the surgical pathologic process; recognize surgical illness and the place of operative intervention in treatment of diseases; understand the impact of surgery on the patient and family, including the psychological and socioeconomic changes that result from an operation; and acquire surgical techniques and skills basic to all physicians, including wound care, suture technique, and the ability to assist in the operating room. Primary methods of instruction include self-directed study, case-based discussion/presentation, conferences, small-group discussion, and teaching rounds. Student teaching on the wards is provided by direct interaction with all level of the staff, including faculty, senior and junior house staff. Students should expect to scrub on cases. They should meet patients they have operated on daily. They should strive to write orders with resident supervision. Students are also expected to attend the weekly surgery clinic, morbidity and mortality conference, and grand rounds, as appropriate. The conclusion of the clerkship includes the Surgery NBME subject examination and an Oral Board/OSAT.

SURG G701 - Clerkship Completion (0 Credits)
This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

SURG G710 - Multidisciplinary Oncology Elective (2 Credits)
This elective is meant to introduce clinical surgical oncology, radiation oncology and medical oncology to medical students. This rotation is ideal for both students interested in pursuing a career in one of these fields and for those simply interested in learning about oncology. The majority of students’ time will be spent on the surgical oncology team with appropriate outreach to radiation oncology and medical oncology. The main focus of the rotation will be to understanding the multidisciplinary center concept of tumor management, including the demanding complexities of integrating multiple specialties in a timely and effective manner to maximize patient management based on nationally based cancer guidelines and clinical trial options. Students will have the opportunity to participate in surgery and medical therapies as well.
SURG G715 - Neurosurgery Elective (2 Credits)
This elective introduces medical students to diseases of the nervous system amenable to surgical treatment. The students will participate in outpatient office evaluations, emergency room consultations, hospital-based patient care activities, didactic conferences, and operating room procedures to achieve the course objectives. Students will present new cases to Attending Neurosurgeons, prepare presentations for academic conferences, participate in clinical research activities, and scrub in the operating room, with assigned activities commensurate with the student’s academic level. Evaluations are based on achievement of the six course objectives. Completion of core surgery and neurology clerkships are strongly encouraged.

SURG G720 - Ophthalmology Elective (2 Credits)
This two week rotation is designed for medical students who wish to become familiar with ophthalmology as a medical and surgical specialty. During the rotation, students are expected to learn the principles of the ophthalmic history and physical examination. Students will become familiar with the most common ophthalmic conditions including cataracts, glaucoma, diabetic retinopathy, and strabismus. They will also have the opportunity to work with subspecialists within the field of ophthalmology. Students will see a wide variety of ophthalmic pathology and become familiar with all that ophthalmology has to offer as a career. The students will be given the opportunity to use specialized ophthalmic instruments including direct and indirect ophthalmoscopes, slit lamps, tonometers, and ultrasounds. They will be exposed to advanced testing performed in the office and observe surgery if interested. For students interested in an ophthalmology residency, this rotation will be a stepping stone on that path. For students not interested in an ophthalmology residency, the rotation will provide invaluable insight into ophthalmology as it relates to primary care as well as other specialties. The focus is integrative care of the patient.

SURG G730 - Otolaryngology Elective (2 Credits)
This elective is appropriate for both students interested in head and neck aspects of primary care (pediatrics, family, internal medicine), as well as students interested in head and neck surgery as a career. Students will have exposure to the operating room, the inpatient service, and the outpatient clinic. Students will spend approximately 50% of their time in the operating room.

SURG G735 - Plastic Surgery Elective (2 Credits)
What is Plastic Surgery? Plastic Surgery is a specialized branch of surgery that is defined by the treatment of deformities of the face and body. Plastic surgery is founded in restoring form and function to all areas of the body. Historically, plastic surgery has been predicated on the tradition of innovation in problem solving. Only plastic surgeons are trained to operate on the human body from head to toe. Plastic surgery, therefore, is equally vested in reconstructive and cosmetic procedures. Whether deformity is caused by trauma, cancer, congenital abnormality, previous surgery, or age, plastic surgeons are uniquely trained to restore the normal. GHS Plastic Surgery & Aesthetics is dedicated to these principles that founded the specialty of plastic surgery. The student should expect to learn the basic principles of Plastic Surgery. The student will participate in a vast range of procedures including facial reconstruction, craniofacial/plastic surgery, microsurgery, breast reconstruction, body contouring, cosmetic surgery, and oculoplastic surgery. The student will spend most of the time in the operating room with some time in clinic. There are no call responsibilities.

SURG G740 - Urology Elective (2 Credits)
Students will gain exposure to the broad, overall concepts of urologic disease and the practice of urology in the hospital and office setting. Students will focus on basic diagnostic procedures and treatment of male and female patients with diseases of the genitourinary system. Students are expected to actively participate in diagnostic and therapeutic endeavors under staff members’ directions. Emphasis is placed on developing case presentation skills and organizing patient data in a concise, presentable fashion. Students will assist at surgery and attend related conferences.

SURG G745 - Pediatric Surgery Elective (2 Credits)
Students will achieve objectives by direct experience in care of pediatric surgical patients by participating as a member of the pediatric surgical team in daily patient care meeting, rounds, operations and clinic sessions.

SURG G750 - Pediatric Urology Elective (2 Credits)
This rotation emphasizes the diagnosis and management of pediatric urology patients. During this elective, students will be exposed to all aspects of pediatric urology. The experience includes outpatient clinical evaluations, in-office procedures, and operative cases. This rotation offers the opportunity for a supervised extensive hands-on experience as well as ability to work one-on-one with a physician and/or nurse practitioner.

SURG G755 - Adult Cardiac Surgery (2 Credits)
This elective introduces third year medical students to pre and post-operative patients with acute/chronic cardiac surgical problems. Students spend 2 weeks working during the day. Residents and faculty will supervise all student activities. The students’ exposure will include patient encounters on the surgical floors, ICU, cath and electrophysiology lab, operating room and office. Students will also work with physician assistants during the rotation. Education material is presented through resident and attending rounds, didactic lectures, surgery conferences, morbidity/mortality conference and simulation training. Students are expected to give one presentation during the two week period.

SURG G760 - General Thoracic (2 Credits)
This third year 2 week rotation provides an in depth comprehensive experience in the diagnosis and surgical treatment of patients benign and malignant thoracic disease. The student will participate in inpatient and outpatient surgery, thoracic surgery office, and thoracic multidisciplinary clinic (MDC).

SURG G765 - Colorectal Surgery (2 Credits)
This rotation emphasizes the diagnosis and management of colorectal patients. During this elective, students will be exposed to all aspects of colorectal health. The experience includes outpatient clinical evaluations, in-office procedures, and operative cases. This rotation offers the opportunity for a supervised extensive hands-on experience as well as ability to work one-on-one with a physician.

SURG G770 - Endocrine Surgery (2 Credits)
This third-year, two-week rotation emphasizes the diagnosis and management of thyroid, parathyroid and adrenal diseases. The experience includes outpatient clinical evaluations, ultrasound-guided thyroid fine needle aspiration biopsy, and operative cases. This rotation offers the opportunity for a supervised extensive hands-on experience as well as ability to work one-on-one with a physician through all aspects of the care of the endocrine surgery patient.
SURG G775 - Vascular Medicine (2 Credits)
The vascular medicine clinical rotation will provide the medical students with an introduction to the diagnostic, therapeutic, and preventative approaches to all peripheral vascular diseases. The field of vascular medicine routinely uses non-invasive vascular testing to quantify disease and then determines if medical management is appropriate; and if not, assists in the application of more invasive therapies. The medical student will be introduced to the clinical characteristics of many vascular diseases, including arterial, venous and lymphatic, as they occur at peripheral, aortic, renal, mesenteric, coronary, cerebral, pulmonary, and other sites. Students will get a glimpse into the extensive knowledge base that is essential in understanding the pathogenesis of vascular diseases including PAD, aneurysms, vasculitis, arteriovenous fistulas, lipid disorders, essential hypertension, renovascular hypertension, arterial and venous thrombosis, pulmonary embolism, varicose veins, venous insufficiency (CVI), lymphedema and vasospastic disorders.

SURG G800 - Acute Care Surgery Acting Internship (4 Credits)
Students on the ACS/Trauma rotation serve as junior surgical house officers to patients with acute surgical problems and trauma. Students spend two weeks working during the day and two weeks at night. Residents and faculty will supervise all student activities. The students’ exposure will include patient encounters on the surgical floors, emergency room, trauma bay, and clinic. M4 students will also be expected to teach M3 medical students rotating through their surgical clerkships. Education material is presented through resident and attending rounds, didactic lectures, surgery conferences, morbidity/mortality conference and simulation training. M4 students are expected to give one presentation during the four week period and take the NBME Advanced Clinical Exam in Surgery.

SURG G801 - Trauma Acting Internship (4 Credits)
Students on the Trauma rotation serve as junior surgical house officers to patients with acute trauma. Students spend two weeks working during the day and two weeks at night. Students will work the Saturday and Sunday in between the day weeks. This means rounding on Saturday and Sunday with the Interns. Residents and faculty will supervise all student activities. The students’ exposure will include patient encounters in the emergency room, trauma bay, and clinic. M4 students will also be expected to teach M3 medical students rotating through their surgical clerkships. Education material is presented through resident and attending rounds, didactic lectures, surgery conferences, morbidity/mortality conference and simulation training. M4 students are expected to give one presentation during the four week period.

SURG G802 - Neurosurgery Acting Internship (4 Credits)
This intensive rotation is intended for qualified students applying for neurosurgical residency training. This 4-week experience provides advanced exposure to transition students toward intern level responsibilities for patient care. The students will participate in outpatient office evaluations, emergency room consultations, hospital-based patient care activities, didactic conferences, and operating room procedures to achieve the course objectives. Students will present new cases to Attending Neurosurgeons, prepare oral presentations for academic conferences, participate in clinical research activities, and scrub in the operating room. Students will participate in overnight neurosurgical call in accordance with ACGME Duty Hours standards. Evaluations are based on achievement of the six course objectives.

SURG G810 - Pediatric Surgery (4 Credits)
This rotation offers the student an opportunity to work closely with pediatric surgeons in the office and hospital practice using the preceptor method to provide an exemplary approach to the management of problems in surgical pediatrics. The main emphasis of the course is to provide a basis for the comprehensive care of children requiring surgical intervention. The student will be exposed to the basic surgical techniques and be given the opportunity to participate during certain procedures. Patients presenting with complaints ranging from management of parasurgical congenital anomalies will be seen in this setting. The student will work as part of a team of the pediatric surgery service, participating in preoperative, intraoperative, and postoperative care. The patient population will consist of age groups from the premature newborn to the young adolescent. Exposure to a broad spectrum of cases needing surgical intervention, and/or management, will be provided. Hospital rounds, lectures, and conferences will be scheduled for the student to parallel the surgeon. Students will spend two weeks working during the day and two weeks working at night.

SURG G811 - Vascular Surgery (2-4 Credits)
This 4th year clerkship will provide students a comprehensive experience in the diagnosis and management of patients with vascular disease, including arterial, venous, and lymphatic disorders. They will participate in all aspects of patient care including the inpatient and outpatient setting. Students will be treated as an intern and participate in both open surgical and endovascular treatment of patients on the vascular service. Under supervision of the attending surgeon and/or vascular surgical resident, the student will also be involved in performing a history and physical, writing notes, instituting care, evaluating problems, planning therapy and seeing consultations. A daily vascular conference takes place after morning report starting at 7 AM.

SURG G812 - Oconee Surgical Elective (2-4 Credits)
Apprenticeship style rotation where medical student will have the opportunity to work directly with a practicing general surgeon in rural practice. This will include shadowing the physician in the office, seeing consult patients in the emergency department, and operating with the surgeon on elective and emergent cases. Oconee does not have residents, which gives M4 medical students the unique opportunity to work directly with an attending physician.

SURG G813 - Colorectal Surgery (2-4 Credits)
This rotation emphasizes the diagnosis and management of colorectal patients. During this elective, students will be exposed to all aspects of colorectal health. The experience includes outpatient clinical evaluations, in-office procedures, and operative cases. This rotation offers the opportunity for a supervised extensive hands-on experience as well as ability to work one-on-one with a physician.

SURG G814 - Multidisciplinary Surgical Oncology (2 Credits)
This elective will introduce medical students to clinical surgical oncology, radiation oncology, and medical oncology. This rotation is ideal for students interested in pursuing a career in one of these fields or for those simply interested in learning about oncology. The majority of the students’ time will be spent on the surgical oncology team with appropriate outreach to radiation and medical oncology. The main focus of the rotation will be to understand the multidisciplinary center concept of tumor management, including the demanding complexities of integrating multiple specialties in a timely and effective manner to maximize patient management based on national cancer guidelines and clinical trial options. Students have the opportunity to participate in surgery and medical therapies as well. There will be no night or weekend duties.
SURG G815 - Surgical Intensive Care Unit (4 Credits)
The surgical critical care rotation will provide M4 students with experience in the clinical concepts and procedures used in surgical critical care. Under the supervision of faculty and residents students provide comprehensive ICU care for complex trauma, vascular, neurosurgical and general surgery patients. Students will also participate in trauma resuscitations in the trauma bay. Students are expected to be an integral part of the ICU team and assist in daily rounds, evaluating new consults, coordinating care with the pulmonary team and performing procedures. Students are expected to present two brief oral reports on assigned topics for critical care teaching rounds. Students will spend two weeks working during the day and two weeks working at night.

SURG G820 - Urology (2 Credits)
Students will gain exposure to the broad, overall concepts of urologic disease and the practice of urology in the hospital and office setting. Students will focus on basic diagnostic procedures and treatment of male and female patients with diseases of the genitourinary system. Students are expected to actively participate in diagnostic and therapeutic endeavors under staff members' directions. Emphasis is placed on developing case presentation skills and organizing patient data in a concise, presentable fashion. Students will assist at surgery and attend related conferences.

SURG G825 - Neurosurgery (2 Credits)
This elective introduces medical students to diseases of the nervous system amenable to surgical treatment. The students will participate in outpatient office evaluations, emergency room consultations, hospital-based patient care activities, didactic conferences, and operating room procedures to achieve the course objectives. Students will present new cases to Attending Neurosurgeons, prepare presentations for academic conferences, participate in clinical research activities, and scrub in the operating room, with assigned activities commensurate with the student’s academic level. Evaluations are based on achievement of the six course objectives. Completion of core surgery and neurology clerkships are strongly encouraged.

SURG G830 - Ophthalmology (4 Credits)
This four week rotation is designed for medical students who wish to become familiar with ophthalmology as a medical and surgical specialty and may be leaning towards this field for residency. During the rotation, students are expected to learn the principles of the ophthalmic history and physical examination. Students will become familiar with the most common ophthalmic conditions including cataracts, glaucoma, diabetic retinopathy, and strabismus. They will also have the opportunity to work with subspecialists within the field of ophthalmology. Students will see a wide variety of ophthalmic pathology and become familiar with all that ophthalmology has to offer as a career. The students will be given the opportunity to use specialized ophthalmic instruments including direct and indirect ophthalmoscopes, slit lamps, tonometers, and ultrasounds. They will be exposed to advanced testing performed in the office and observe surgery if interested. For students interested in an ophthalmology residency, this rotation will be a stepping stone on that path. The students will also be exposed to interesting inpatient consults and emergency room patients. They will also have the option to come in with the ophthalmologist on call on certain nights. For students not interested in an ophthalmology residency, the rotation will provide invaluable insight into ophthalmology as it relates to primary care as well as other specialties. The goal is to have the students become proficient with the direct ophthalmoscope, the slit lamp and comfortable working up ophthalmology patients. The focus is integrative care of the patient. Students will be expected to work up and present patients to the attending physicians by the end of the rotation.

SURG G835 - Otolaryngology Head and Neck Surgery (2 Credits)
This elective is appropriate for both students interested in head and neck aspects of primary care (pediatrics, family, internal medicine), as well as students interested in head and neck surgery as a career. Students will have exposure to the operating room, the inpatient service, and the outpatient clinic. Students will spend approximately 50% of their time in the operating room.

SURG G840 - Pediatric Neurosurgery (2 Credits)
This 2 week rotation will provide an introduction to the preoperative, operative and post-operative care of infants and children. The student will have the opportunity to round with the attending pediatric neurosurgeon, evaluate and present consults, perform history and physicals and scrub in on cases in the operating room. The student will also see patients in the outpatient setting.

SURG G845 - Plastic Surgery (2 Credits)
What is Plastic Surgery? Plastic Surgery is a specialized branch of surgery that is defined by the treatment of deformities of the face and body. Plastic surgery is founded in restoring form and function to all areas of the body. Historically, plastic surgery has been predicated on the tradition of innovation in problem solving. Only plastic surgeons are trained to operate on the human body from head to toe. Plastic surgery, therefore, is equally vested in reconstructive and cosmetic procedures. Whether deformity is caused by trauma, cancer, congenital abnormality, previous surgery, or age, plastic surgeons are uniquely trained to restore the normal. GHS Plastic Surgery & Aesthetics is dedicated to these principles that founded the specialty of plastic surgery. The student should expect to learn the basic principles of Plastic Surgery. The student will participate in a vast range of procedures including facial reconstruction, craniofacial/pediatric plastic surgery, microsurgery, breast reconstruction, body contouring, cosmetic surgery, and ocuoplasty surgery. The student will spend most of the time in the operating room with some time in clinic. There are no call responsibilities.

SURG G850 - Pediatric Urology (2 Credits)
This rotation emphasizes the diagnosis and management of pediatric urology patients. During this elective, students will be exposed to all aspects of pediatric urology. The experience includes outpatient clinical evaluations, in-office procedures, and operative cases. This rotation offers the opportunity for a supervised extensive hands-on experience as well as ability to work one-on-one with a physician and/or nurse practitioner.

SURG G855 - Vascular Medicine (2-4 Credits)
The vascular medicine clinical rotation will provide the medical students with an introduction to the diagnostic, therapeutic, and preventative approaches to all peripheral vascular diseases. The field of vascular medicine routinely uses non-invasive vascular testing to quantify disease and then determines if medical management is appropriate; and if not, assists in the application of more invasive therapies. The medical student will be introduced to the clinical characteristics of many vascular diseases, including arterial, venous and lymphatic, as they occur at peripheral, aortic, renal, mesenteric, coronary, cerebral, pulmonary, and other sites. Students will get a glimpse into the extensive knowledge base that is essential in understanding the pathogenesis of vascular diseases including PAD, aneurysms, vasculitis, arteriovenous fistulas, lipid disorders, essential hypertension, renovascular hypertension, arterial and venous thrombosis, pulmonary embolism, varicose veins, venous insufficiency (CVI), lymphedema and vasospastic disorders.
SURG G860 - Wound Care (2 Credits)
This 2 week rotation is designed to expose medical students to the assessment and management of various chronic wounds in a multidisciplinary setting. Students will spend the majority of their time at the Wound Healing Center of GHS at the Patewood Campus where they will round with the attending physician. Experience evaluating venous ulcerations, diabetic foot wounds, as well as unusual wounds such as vasculitic wounds will be provided. Hands on experience will include basic wound debridement, basic wound dressing, multilayer compression wraps and off-loading techniques. In addition, there will be opportunity to rotate at Greenville Memorial Hospital with the wound care team. The schedule will typically be 8 am to 5pm Monday through Thursday with no call or weekend duties.

SURG G865 - Adult Cardiac Surgery (2-4 Credits)
This elective introduces fourth year medical students to pre and post-operative patients with acute/chronic cardiac surgical problems. Students spend 2-4 weeks working during the day. Residents and faculty will supervise all student activities. The students’ exposure will include patient encounters on the surgical floors, ICU, cath and electrophysiology lab, operating room and office. Students will also work with physician assistants during the rotation. Education material is presented through resident and attending rounds, didactic lectures, surgery conferences, morbidity/mortality conference and simulation training. Students are expected to give one presentation during the four week period.

SURG G870 - Breast Surgery (2 Credits)
This fourth year 2 week rotation provides an in-depth comprehensive experience in the diagnosis and surgical treatment of patients with both benign and malignant breast disease. The student will participate in inpatient and outpatient surgery, breast health center office, and breast multidisciplinary center (MDC). At the MDC, the student will participate in the evaluation of breast cancer patients as part of the team including surgeon, radiation oncologist, medical oncologist, radiologist, pathologist, nurse navigator, lymphedema specialist, and research nurse. Breast tumor board meets on the first Thursday of the month at 7 am in CC2. The student should plan to attend this if the rotation falls during this time.

SURG G875 - Minimally Invasive Surgery (4 Credits)
This rotation will allow students to experience the breadth of surgical practice in three very common conditions: Hernia, reflux and obesity. The rotation will be divided into two blocks. The first two weeks will be spent with the GHS Hernia Center under the guidance of Drs. Cobb, Carbonell and Warren. The following two weeks will be spent with the GHS Bariatric service, under the guidance of Drs. Scott, Eichorn, Rapp and Bour. The course will include experience in the operating room, outpatient setting, and inpatient care.

SURG G880 - Endovascular Neurosurgery/Neurology (2 Credits)
Two week elective for motivated 4th year medical students in Endovascular Neurosurgery/Neurology. Targeted students would include those interested in pursuing Radiology, Neurology, or Neurosurgery as residents seeking additional exposure to particular disease states such as cerebral AVM/AV fistula, cerebral aneurysm, ischemic stroke, subarachnoid hemorrhage, and cerebral angioma. Students will receive exposure to minimally invasive procedures using image guidance and catheter based approaches such as cere-bral angiograms, mechanical thrombectomies, cerebral coiling, and/or embolizations to treat vascular neurologic diseases. Students will be participating primarily on inpatient wards with one of our two endovascular specialists and his/her nurse practitioner, and will also have some experience with outpatient clinic. Opportunities such as placing central venous catheters and arterial lines may be available during inpatient portions of the rotation. It is strongly recommended that students participate in one night of call per week to see additional cases that may not be available during regular hours, most notably mechanical thrombectomies for acute ischemic stroke and coiling/clipping of aneurysms. Students will be expected to attend any conference that faculty regularly attend, such as monthly M&M. Evaluation will be determined by performance during daily rounds with faculty and each student will be required to give a presentation at the end of the 2 week rotation based on a topic given by the faculty member.

SURG G885 - Bariatric Surgery (2 Credits)
This fourth year 2 week rotation provides an in-depth comprehensive experience in the diagnosis and surgical treatment of patients who suffer from the disease of obesity. The student will participate in inpatient and outpatient surgery, observe patients in the bariatric clinic, and work with the dietitians at the bariatric office. In the clinic, the student will participate in the evaluation of the patient with obesity, observe the preoperative discussion that lead to interventions, and prepare patients for surgery. In the operating room, the student will observe cutting edge laparoscopic techniques and become familiar with techniques that keep obese patients safe in the OR. In addition, students will become familiar with the epidemiology of obesity, proper nutrition in post bariatric patients, and preferred surgical methods for treating the disease process.

SURG G890 - Endocrine Surgery (2-4 Credits)
This fourth year rotation emphasizes the diagnosis and management of thyroid, parathyroid and adrenal diseases. The experience includes outpatient clinical evaluations, ultrasound-guided thyroid fine needle aspiration biopsy, and operative cases. This rotation offers the opportunity for a supervised extensive hands-on experience as well as ability to work one-on-one with a physician through all aspects of the care of the endocrine surgery patient.

SURG G895 - General Thoracic Surgery (2-4 Credits)
This fourth year 2 or 4 week rotation provides an in-depth comprehensive experience in the diagnosis and surgical treatment of patients benign and malignant thoracic disease. The student will participate in inpatient and outpatient surgery, thoracic surgery office, and thoracic multidisciplinary clinic (MDC).

SURG G899 - Surgery Away Rotation (2-4 Credits)
The student will complete an intensive study of Surgery at another hospital or practice. This course must be approved through the VSAS application service or office of the M3/M4 Director.
**Fees and Refunds**

**Graduate Fee Schedule**

Complete details about fees, payments, tax credits, loans, late changes, and related information may be found at the bursar's Web site, [www.sc.edu/bursar](http://www.sc.edu/bursar). For the complete graduate fee schedule, visit [www.sc.edu/bursar/studentfees.html](http://www.sc.edu/bursar/studentfees.html). Tuition and fees are approved by the Board of Trustees and subject to change at any time.

For information about non-academic fees, charges, and regulations, visit the Web sites below.

- University Housing: [www.housing.sc.edu](http://www.housing.sc.edu)
- Carolina Dining Services: [www.sc.edu/dining](http://www.sc.edu/dining)
- Thomson Student Health Center: [www.sa.sc.edu/shs/tshc/](http://www.sa.sc.edu/shs/tshc/)
- Vehicle Management and Parking Services: [www.sc.edu/vmps](http://www.sc.edu/vmps/)

**Checks, Money Orders, and Credit Cards**

The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina ([https://my.sc.edu/](https://my.sc.edu/)) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by E-check, UofSC's preferred method of payment, when using Self-Service Carolina or payment by check or money order through the mail.

**Legal Residency Requirements for Fee and Tuition Purposes**

The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one's resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

**Code of Laws Governing Residence**

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

**Definitions**

- **“Academic Session”** is defined as a term or semester of enrollment.
- **“Continue to be Enrolled”** is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.
- **“Dependent Person”** is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person's college education. A dependent person's residency is based upon the residency of the person upon whom they are dependent.
- **“Domicile”** is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.
- **“Family’s Domicile in this State is Terminated”** is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.
- **“Full time employment”** is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.
- **“Guardian”** is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.
- **“Immediately Prior”** is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.
- **“Independent Person”** is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for
twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

"Minor" is defined as a person who has not attained the age of eighteen years. An "emancipated minor" shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

"Non-resident Alien" is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status "non-resident aliens" generally do not have the capacity to establish domicile in South Carolina.

"Parent" is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

"Reside" is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

"Resident" for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has become domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, notwithstanding other provisions of the Statute.

"Spouse" is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

"Temporary Absence" is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

"Terminal Leave" is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

"United States Armed Forces" is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

"Trust" is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents

Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled "Establishing the Requisite Intent to Become a South Carolina Domiciliary". The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person's support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily
regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence
A person’s temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver’s license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

Effect of Change of Residency
Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

Effect of Marriage
In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

Exceptions
Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. “Military Personnel and their Dependents.” Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and whose dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in state tuition and fees.
2. **“Faculty and Administrative Employees with Full Time Employment and their Dependents”** Full time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. **“Residents with Full Time Employment and their Dependents”** Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary (p. 354).”)

4. **“Retired Persons and their Dependents”** Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

**Application for Change of Resident Status**

Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

**Incorrect Classification**

Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

**Inquiries and Appeals**

Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-4060

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person's situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

**Academic Fees**

**Application Fees**

Every new graduate student will be charged a nonrefundable application fee of $50. All applications must be accompanied by the application fee. International students pay an enrollment fee of $500.

**Matriculation Fee**

A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students.

**Free Tuition**

(This includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. **S.C. Code Ann. § 59-111-110 (Law Co-op. 1976)** No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, as defined herein, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty (on or after July 1, 1964).

2. **S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984)** Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or non-credit purposes on a space available basis; provided, however, that neither such persons nor their spouses receive compensation as full-time employees.

**Examination Fees**

**Graduate Record Examination**

1. General Test ($60)
2. Subject Test ($60)

Revalidation examinations intended to revalidate USC courses, obsolete under the statute of limitations. Per hour, $25.
Refund Policy

Policies

The University will refund a part of academic fees in certain cases:

1. Changes in a student’s status, which may require a refund:
   a. Change in a full-time student’s schedule which results in reclassification to part-time (Less than 12 credit hours).
   b. Change in a part-time student’s schedule which results in fewer credit hours.

2. Situations which may require a refund:
   a. Course or courses dropped.
   b. Drop/Withdrawal from the University.
   c. Cancellation of a class by the University.

Procedures

The refund procedures for the School of Medicine Greenville reflect those of the University as a whole and use the same calculation procedures to determine a percentage of refund for each Part of Term in which a student is enrolled. In cases where a student has not begun a particular Part of Term, the student will receive a full refund for courses within that Part of Term.

1. Refund Requests
   All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term.

   Refunds may be requested at any time during the academic year in which the applicable term occurs.

2. Determining the Refundable Portion Procedure
   Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped-withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus the refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

3. Drop/Withdrawal Refund Policy
   Standard refund procedures for dropping/withdrawal from the School of Medicine Greenville:

   Standard refund procedures for dropping/withdrawal from the university.

   All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar’s Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund.
   a. 100 percent if the student’s official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
   b. 70 percent if the student’s official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
   c. 50 percent if the student’s official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
   d. 20 percent if the student’s official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

4. Refund Schedules
   The University Registrar maintains the official refund schedules for all programs at the University. When a medical student seeks to withdraw from the University, s/he must first contact the Sr. Asst. Director of Financial Aid and Student Records to discuss the amount and procedure for a refund. As medical student schedules are very complicated, no refund calculation can be completed until the student decides on a date for withdrawal.

5. Refund Rate
   Owing to the fact that the School of Medicine Greenville has a flat tuition rate, there is no traditional “part-time” rate for enrollment that the USC Banner system can use for the calculation of refunds. For this purpose, a partial tuition rate must be created for sole use in the calculation of refunds. Both medical schools of USC have decided upon the following equation to establish the refund rate:

6. Return of Title IV Funds
   a. Refunds Policy for Students Who Have Received Title IV Funds
      And Withdraw From The University. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from school.
   b. Title IV Refund Distribution
      i. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the funds that are distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of
assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
- Unsubsidized Federal Stafford
- Federal PLUS Loan
- Federal Iraq/Afghanistan Service Grant

ii. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

iii. Exit interviews are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Exit interviews can be completed at: http://www.sc.edu/financialaid/loan_counseling/default.html.

Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

7. Appeals Process
A process for appeals exists for students who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal.

The Withdrawal Refund Appeals Committee for each campus reviews and act on all appeals:

Withdrawal Refund Appeals Committee
Office of the Registrar
University of South Carolina
Columbia, SC 29208
803-777-5555

Housing Fees
1. Students in the following categories are eligible for refunds in accordance with the terms shown in their Residence Hall contract:
   a. newly admitted students who do not attend the University of South Carolina
   b. students who graduate from school at the end of the fall semester
   c. students who are suspended for academic reasons
   d. students who get married.

2. Check the contract or call University Housing for deadline dates and other information.

3. Tenants who do not withdraw from the University but desire release from their contracts will be placed on a contract release waiting list with University Housing. Releases will be granted only when all other space is filled and the space can be rented for the balance of the year to another tenant. Students will be notified upon release and appropriate refunds will be made.

Withdrawal Refunds
All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members of the Office of the University Registrar are available to assist students in completing the withdrawal process. In addition, staff from the Student Ombudsman Office located in the Osborne Administration building can provide counseling. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should see their college dean.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

University Withdrawal Refund Appeal Procedures
The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University's published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Office of the University Registrar and will be considered only in written form. A standardized appeal form must be submitted.

2. All requests for appeal must be submitted directly by the student through the Office of the University Registrar and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official's advice, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.

3. The appeal must be initiated during the semester for which the refund is requested.

4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.

5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.

6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of
a family member, close associate, or employee, and/or difficulty in family-operated businesses, are excluded from consideration.

7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chair. The student will be informed of the outcome of the appeal by letter from the Office of the Associate Vice President for Student Life and Development.
At the University of South Carolina College of Pharmacy, our mission is to prepare the next generation of innovative and collaborative pharmacists and health scientists while pioneering clinical, entrepreneurial, and research endeavors to improve health outcomes for residents of South Carolina and beyond. Our faculty and staff are personally invested in your development as a health care leader.

**Academic Information & Curriculum**

**Curricular Philosophy**

The University of South Carolina College of Pharmacy recognizes that individual students learn and develop in a variety of unique ways. We foster an inclusive culture with support from our dedicated faculty, empowering our students to become collaborative, innovative pharmacists who will transform healthcare delivery through practice and groundbreaking research. Our curriculum utilizes educational outcomes to build strong foundations in relevant disciplines, with particular emphasis on biomedical, pharmaceutical, social, administrative and clinical sciences. Faculty serve as facilitators, guiding students to develop problem-solving, critical-thinking and evidence-based practice skills. The college incorporates didactic, interprofessional, laboratory-based, and experiential educational opportunities to create a rich, diverse learning environment. Additionally, students catalyze their own academic and professional growth by participating in a variety of co-curricular and community engagement activities. Upon completion of our Pharm.D. program, graduates are able to practice patient-centered care with proficiency and professionalism, optimize health outcomes, and advance the pharmacy profession.

**Pharm.D. Curriculum for Students Entering Program in Fall 2020 and Beyond**

Elective hours can range 1-3 credits. See bullet point below for details.

### Spring
- PHMY 823 Pathophysiology and Pharmacology IV: 2 credits
- PHMY 861 Clinical Applications VI: 1 credit
- PHMY 874 Pharmacotherapy IV: 5 credits
- PHMY 885 Pharmacy Law and Ethics: 3 credits
- PHMY 895 Clinical Assessment: 3 credits
- Elective: 2 credits

Elective hours can range 1-3 credits. See footnote below for details.

Students must complete 8 hours of electives by the end of the third professional Pharm.D. year. See footnote below.

### Summer
- APPE x 1-4: 12 credits

### Fourth Year

#### Fall
- APPE x 1-4: 12 credits
- PHMY 999 Grand Rounds: 1 credit

#### Spring
- APPE x 1-4: 12 credits

### Educational Outcomes

#### Educational Outcomes for the Doctor of Pharmacy Graduate

**Domain 1 – Foundational Knowledge**
- Learner (Learner) - Develop, integrate, and apply knowledge from the foundational sciences (i.e., pharmaceutical, social/behavioral/administrative, * and clinical sciences) to evaluate the scientific literature, explain drug action, solve therapeutic problems, and advance population health and patient-centered care.

**Domain 2 – Essentials for Practice and Care**
- Patient-centered care (Caregiver) - Provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities).
- Medication use systems management (Manager) - Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.
- Health and wellness (Promoter) - Design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness.
- Population-based care (Provider) - Describe how population-based care influences patient-centered care and influences the development of practice guidelines and evidence-based best practices.

**Domain 3 - Approach to Practice and Care**
- Problem Solving (Problem Solver) – Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution.
- Educator (Educator) – Educate all audiences by determining the most effective and enduring ways to impart information and assess understanding.
- Patient Advocacy (Advocate) - Assure that patients’ best interests are represented.
- Interprofessional collaboration (Collaborator) – Actively participate and engage as a healthcare team member by demonstrating mutual respect, understanding, and values to meet patient care needs.
- Cultural sensitivity (Include) - Recognize social determinants of health to diminish disparities and inequities in access to quality care.
- Communication (Communicator) – Effectively communicate verbally and nonverbally when interacting with an individual, group, or organization.

Typically, electives range from 1 to 3 credit hours. Students must complete 8 hours of electives by the end of the third professional Pharm.D. year.
Domain 4 – Personal and Professional Development

- **Self-awareness (Self-aware)** – Examine and reflect on personal knowledge, skills, abilities, beliefs, biases, motivation, and emotions that could enhance or limit personal and professional growth.
- **Leadership (Leader)** - Demonstrate responsibility for creating and achieving shared goals, regardless of position.
- **Innovation and Entrepreneurship (Innovator)** - Engage in innovative activities by using creative thinking to envision better ways of accomplishing professional goals.
- **Professionalism (Professional)** - Exhibit behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society.

*Terms that are bolded and italicized are defined in the glossary of the Center for the Advancement of Pharmacy Education (CAPE) Educational Outcomes 2013 at: https://www.aacp.org/sites/default/files/2017-10/CAPEoutcomes2013%20%281%29.pdf

Interprofessional Education

The College of Pharmacy requires Doctor of Pharmacy students to participate in interprofessional education (IPE) and experiences with UofSC students enrolled in the following colleges: Medicine, Nursing, Social Work, and Public Health to include at least 11 different health professions. This occurs through coursework, professional organizations, pharmacy practice experiences, and other activities.

Mission of UofSC Interprofessional Education for the Health Sciences

The mission of UofSC Interprofessional Education for the Health Sciences is to be leaders in preparing health professionals skilled in effective interprofessional practice through synergistic educational and experiential activities that enhance the interprofessional learning of students in the health sciences at the University of South Carolina to improve the health and quality of care for the diverse populations we serve.

Interprofessional Education Goals

The goals of the UofSC Interprofessional Education for the Health Sciences are to:

Graduate excellent interdisciplinary health practitioners: the UofSC Interprofessional Education committee aims to graduate health professionals capable and competent to enter any health care system and communicate and work with other health professionals to improve the outcomes for patients and/or patient populations.

- Increase health sciences program enrollment
- Become a model of interprofessional innovation in education
- Obtain external funding for interprofessional education and research
- Provide meaningful community engagement and service opportunities

Pharmacy Practice Experiences

Pharmacy Intern Certificate

All accepted students will be required to obtain a Pharmacy Intern Certificate from the South Carolina Board of Pharmacy. This certificate will need to be obtained, at minimum, no later than the last day of classes for the 1st Professional year Spring semester. If a student's Pharmacy Intern Certificate is suspended, revoked, or voluntarily surrendered, the student may be suspended from the College of Pharmacy.

Pharmacy Practice Experience Policies

- Pharmacy students complete a minimum of 11 pharmacy practice experiences (rotations) which represents approximately 1/3 of the total pharmacy curriculum. Students must abide by both the University of South Carolina College of Pharmacy Academic Bulletin and Student Handbook and the respective IPPE or APPE rotation manuals.
- Each student is required to complete two Introductory Pharmacy Practice Experiences (IPPEs), one in Community Pharmacy and the other in a Hospital/Health System which take place during the summer months following the P1 and P2 curriculum years, respectively. During the P4 year of the program, each student completes 9 Advanced Pharmacy Practice Experiences (APPEs) with 5 rotations being in ACPE-required experiential categories and 4 being electives in a variety of settings.
- Rotations are scheduled by a computerized assignment process using an experiential rotation management system. Students may enter preferences for physical location, rotation sites, and preceptors, but preferences are not guaranteed. The Office of Experiential Education makes the final determination on each student’s rotation schedule.
- The Office of Experiential Education will attempt to place students at a site that is approximately one hour driving distance each way from their permanent or temporary residence in South Carolina. Students may be provided the opportunity to coordinate out of state rotations according to the policies provided by the Office of Experiential Education.
- Students are responsible for costs associated with onboarding at rotation sites which may include, but are not limited to, immunization and health screenings, drug screens, and additional background searches.
- Students must be prepared to arrange and pay for their own travel and housing for IPPEs and/or APPEs, due to limited rotation sites.

Student Advisement and Mentorship

Each professional class will be assigned a faculty class advisor. This class advisor will be actively involved in P1 Orientation and should actively promote professionalism within the class; the class advisor should also serve as a problem solver for the class. The advisor may meet with class officers to plan class events such as community outreach activities. The faculty advisor follows the class throughout their academic career in the College of Pharmacy. The class advisors are appointed by the Associate Dean for Student Affairs and Diversity and approved by the Chair of the department of the faculty member.

College of Pharmacy faculty, preceptors and alumni will be encouraged to serve as career mentors. Career mentors serve as a contact person and career advisor to aid students in exploring the various career paths available upon graduation. The Associate Dean for Student Affairs and Diversity will develop and maintain a current list of career mentors available in electronic format to students.

Each year, sessions embedded within courses or conducted independently from courses will be scheduled by Track and Combination
Degree Coordinators to showcase College of Pharmacy Tracks and Combination Degree Options. Elective sessions for each semester may be held by the Senior Associate Dean or Associate Dean for Student Affairs and Diversity via live, recording, or electronic posting methods. Information for Coordinators of College of Pharmacy Tracks, Combination degrees, and electives will be made readily available to students to provide detailed information and answer student questions. Course coordinators, teaching faculty, the faculty class advisor, and Deans of the College will be available to provide support to students if academic advice or additional student support is requested by the student.

P1, P2, and P3 students will attend annually an E-Portfolio review with a small group of students or individually lead by a faculty member. This review is utilized to discuss student progress and assessment of the academic year’s curriculum and experiences as well as future career direction. The faculty member will assist the students with relating their experiences to the ACPE Standards, CAPE Outcomes, and College-specific desired outcomes.

### Administration and Faculty

#### Administration

Stephen J. Cutler, Ph.D., Dean
Jennifer L. Baker, Pharm.D., Director of Experiential Programs
Kim E. Creek, Ph.D., Chair, Department of Drug Discovery and Biomedical Sciences, Associate Dean for Research
Brianne L. Dunn, Pharm.D., Associate Dean for Outcomes Assessment and Accreditation
Amy D. Grant, Pharm.D., M.B.A., Associate Dean for Student Affairs and Diversity
David Lorick, Assistant Dean for Finance
Doug Pittman, Ph.D., Director of Graduate Studies
“Gene” Reeder, Ph.D., Director of Outcomes Research and Special Counsel to the Dean
Julie M. Sease, Pharm.D., Senior Associate Dean
S. Scott Sutton, Pharm.D., Chair, Department of Clinical Pharmacy and Outcomes Sciences

#### Professors

Charles L. Bennett, M.D., Ph.D., University of Pennsylvania, 1981; Pardee RAND Graduate School, 1989
Kim E. Creek, Ph.D., Purdue University, 1980
Stephen J. Cutler, Ph.D., University of Georgia, 1989
Lorne J. Hofseth, Ph.D., Simon Fraser University, 1996
Hippokratiss Kiaris, Ph.D., University of Crete, 1997
Campbell McInnes, Ph.D., University of Edinburgh, 1991
Igor Roninson, Ph.D., Massachusetts Institute of Technology, 1982
Julie M. Sease, Pharm.D., University of South Carolina, 2003
S. Scott Sutton, Pharm.D., University of South Carolina, 1998
Michael D. Wyatt, Ph.D., University College London, 1996
Jun Zhu, M.D., Ph.D., Fujik Medical University, 1998

#### Associate Professors

Betsy W. Blake, Pharm.D., Medical University of South Carolina, 2000
P. Brandon Bookstaver, Pharm.D., University of South Carolina, 2004
Eugenia Broude, Ph.D., Ukrainian Academy of Sciences, 1990
Phillip J. Buckhaults, Ph.D., University of Georgia, 1996
Celeste R. Caulder, Pharm.D., University of North Carolina, 2004
Christina L. Cox, Pharm.D., University of South Carolina, 2006
Brianne L. Dunn, Pharm.D., Medical University of South Carolina, 2008
Patricia H. Fabel, Pharm.D., University of Rhode Island, 2006
Julie Ann Justo, Pharm.D., University of Florida, 2009
Bryan L. Love, Pharm.D., University of South Carolina, 1997
Kevin Lu, Ph.D., University of Maryland, 2011
Whitney Maxwell, Pharm.D., Medical University of South Carolina, 2008
Karen H. McGee, Pharm.D., University of South Carolina, 1989
Jill E. Michels, Pharm.D., Medical University of South Carolina, 1996
C. LeAnn B. Norris, Pharm.D., University of South Carolina, 2004
Cynthia M. Phillips, Pharm.D., University of Tennessee, 1991
Douglas Pittman, Ph.D., University of Iowa, 1996
Ozgur Sahin, Ph.D., University of Heidelberg, 2008
Michael Shuttman, Ph.D., Russian Cancer Research Center, 1996
Peisheng Xu, Ph.D., University of Wyoming, 2007

#### Assistant Professors

Michaela Almgren, Pharm.D., South Carolina College of Pharmacy, 2010
Caroline Asbill, Pharm.D., South Carolina College of Pharmacy, 2016
Jennifer L. Baker, Pharm.D., University of South Carolina, 2002
Reagan K. Barfield, Pharm.D., South Carolina College of Pharmacy, 2019
Chao Cai, M.S., Ph.D., University of Pittsburgh, 2003; University of South Carolina, 2013
Jordan Cooler, Pharm.D., South Carolina College of Pharmacy, 2016
Jing Fang, M.D., Ph.D., Shanghai Second Medical University, 2004
Amy D. Grant, Pharm.D., M.B.A., Medical University of South Carolina, 2004; University of South Carolina, 2013
Alexander V. Gasparian, Ph.D., N.N. Blokkin Cancer Research Center, Moscow, 2007
Tessa Hastings, M.S., Ph.D., University of Toledo, 2015; Auburn University, 2019
John W. Holladay, B.S. Pharm., Ph.D., University of South Carolina, 1992, 1997
Minou Khazan, Pharm.D., Tehran University of Medical Sciences, 1990
Joseph Magagnoli, MS, Texas A & M University, 2014
Yangmei Li, Ph.D., Zhejiang University, 2005
Sajish Mathew, Ph.D., Indian Institute of Technology Kanpur, 2009
Caitlin Mardis, Pharm.D., South Carolina College of Pharmacy, 2011
Kathy Quarles-Moore, B.S. Pharm., University of South Carolina, 1986
Chengwen Teng, Pharm.D., Ph.D., University of Oklahoma, 2017; University of Texas at San Antonio, 2019
Kyle A. Weant, Pharm.D., University of North Carolina, 2003
Hana Winders, Pharm.D., South Carolina College of Pharmacy, 2015
Ismaeel Yunusa, Pharm.D., Alexandria University, 2013; Massachusetts College of Pharmacy and Health Sciences, 2019.

#### Adjunct & Affiliate Faculty

Morgan Adams, Pharm. D., University of Pittsburgh, 2011
Courtney Alexander, Pharm. D., Auburn University Harrison School of Pharmacy, 2013
Majdi Al-Hassan, M.B.B.S., University of Jordan, 2000
Joshua Allen, Pharm. D., Campbell University, 2007
Jennifer Bair, Pharm.D., University of South Carolina, 1999; Prisma Health - Midlands Clinical Assistant Dean
Nicole K. Bookstaver, Pharm.D., University of South Carolina, 2009
Alyson Ghizzoni Burns, Pharm.D., University of Findlay, 2012
Chris Campen, Pharm.D., University of Illinois at Chicago, 2007
Kimberly Clark, Pharm.D., University of North Carolina, 2005
Nicholas Connors, M.D., Weill Medical College of Cornell University, 2008
Jenna L. Cox, Pharm.D., South Carolina College of Pharmacy, 2012
Carrie Curtis, Pharm.D., South Carolina College of Pharmacy, 2013
Robert Daniels, Pharm.D., University of South Carolina, 2005
Jennifer Endres, Pharm.D., The Ohio State University, 2008
Core Descriptions

College of Pharmacy Course Descriptions

Descriptions below provide an overview of the courses taught in the professional Pharm.D. curriculum. More in-depth descriptions will be provided in the course syllabi. The university adheres to the Integrated Postsecondary Education Data System definition of a credit hour as “a unit of measure representing the equivalent of an hour (50 minutes) of instruction per week over the entire term.” Therefore, each single course credit requires a minimum of 700 minutes of continuous and ongoing instructional time. A minimum of one calendar week of instruction with a cumulative total of at least 700 minutes is required for each credit offered. This time excludes breaks and final exams.

Core Courses

Descriptions below provide an overview of the courses taught in the professional Pharm.D. curriculum. More in-depth descriptions will be provided in the course syllabi.

Fall P1

PHMY 602 - Foundations of Pathophysiology and Pharmacology I (2 Credits)

An introduction to the basic principles and concepts of physiology, pathophysiology and pharmacology. 

Prerequisites: First professional year standing.

PHMY 607 - Dosage Forms and Drug Delivery Systems (4 Credits)

A study of the physiochemical principles of the formulation, preparation, properties, and performance of the pharmaceutical dosage forms. Clinical application of the various dosage forms in patient care will be discussed.  

Prerequisites: First professional year standing.

PHMY 615 - Pharmaceutical Biochemistry (3 Credits)

The course covers the molecular and biochemical basis of human biology and physiology. The properties and functions of biological molecules and biochemical pathways are covered. Emphasis is placed on the molecular basis of human physiology, causes of human diseases and how drugs produce biological effects.  

Prerequisites: First professional year standing.

Core Descriptions

Faculty Emeriti

Robert L. Beamer, Ph.D., Medical College of Virginia, 1959  
Sondra H. Berger, Ph.D., Roswell Park, State University of New York at Buffalo, 1982  
Wayne E. Buff, Pharm.D., University of South Carolina, 1997  
James M. Chapman, Ph.D., University of North Carolina, 1981  
Michael Dickson, Ph.D., The Ohio State University, 1972  
Joseph W. Kosh, Ph.D., University of Colorado, 1971  
Brooks C. Metts, Pharm.D., University of Tennessee, 1970  
“Gene” Reeder, Ph.D., University of South Carolina, 1983  
Joseph Roberts, Ph.D., McGill University, 1964  
Richard M. Schulz, Ph.D., University of North Carolina, 1983  
Joseph W. Sowell, Ph.D., University of Georgia, 1972  
John C. Voris, Pharm.D., University of Nebraska, 1979

Dean Emeriti

Julian H. Fincher, Ph.D., University of Connecticut, 1964  
Randall C. Rowen, Pharm.D., Northeastern University, 1983
PHMY 621 - Foundations of Medicinal Chemistry I (3 Credits)
This course includes an introduction to the basic principles and concepts of medicinal chemistry and pharmacogenomics including the relationships of molecular structure to drug absorption, distribution, metabolism and excretion. The chemical rationale for drug therapeutic actions and side effects as well as the pharmacogenomics basis for individualized drug therapy is discussed.
Prerequisites: First professional year standing.

PHMY 656 - Pharmacy Calculations (2 Credits)
This course develops the mathematical skills and knowledge required in various pharmacy practice settings. Problem solving skills will be developed as students become proficient in basic math skills used to solve pharmacy calculations based word problems which are commonly seen in a variety of practice settings, including community, compounding, hospital, and nuclear pharmacy. COP 04/26-2018.
Prerequisites: First professional year standing.

PHMY 671 - Pharmacy Skills Lab I: Compounding and Applied Pharmaceutics (1 Credit)
The art, science and technology of pharmacy compounding.
Prerequisites: First professional year standing.

Spring P1
PHMY 603 - Foundations of Pathophysiology and Pharmacology II (3 Credits)
This is the second course in the series addressing the basic principles and concepts of physiology, pathophysiology and pharmacology.
Prerequisites: PHMY 602; first professional year standing.

PHMY 618 - Genomics, Pharmacogenomics, and Personalized Medicine (3 Credits)
The course focuses on nucleic acids as the core theme and examines the pathways used for transmission and expression of genetic information. Topics also include the cell cycle (mitosis) and gametogenesis (meiosis). Students will learn to apply knowledge of human genetic variation that influences drug therapy decision making. Recombinant DNA technology is covered as applied to the study of human health such as personalized medicine, genetic testing, stem cell therapy, gene therapy, RNA silencing, and production of biopharmaceuticals. Antibodies are discussed from the perspective of their use in diagnostic testing, as well as the utilization of antibodies as therapeutics.
Prerequisites: First professional year standing.

PHMY 624 - Foundations of Medicinal Chemistry II (3 Credits)
In an integrated approach to first year pharmacy education, Foundations in Medicinal Chemistry II will serve as a complementary course to PHMY 618 Genomics, Pharmacogenomics, and Personalized Medicine. We will utilize the principles and concepts learned in general and organic chemistry and PHMY621 to introduce the general molecular properties of pharmaceutical agents. The course will consist of a survey of the medicinal chemistry of the remaining major drug classes not covered in PHMY 621. Pharmacogenomic information will be emphasized where known and applicable to help explain variations in both therapeutic and side effects due to receptor structure, metabolism and/or other pharmacokinetic properties.
Prerequisites: PHMY 621; first professional year standing.

PHMY 657 - Medical Terminology (1 Credit)
A thorough knowledge of medical terminology is an essential building block in pharmacy education. This web-based course will aid the student in learning the language and terminology used in other pharmacy courses and all areas of pharmacy practice.
Prerequisites: First professional year standing.

PHMY 661 - Clinical Applications II (1 Credit)
Case-based discussions that integrate and demonstrate applicability of other course material.
Prerequisites: First professional year standing.

PHMY 670 - Pharmacy Skill Lab II: Introduction to Community Pharmacy (1 Credit)
Interactive laboratory session designed to provide students with a thorough understanding of community pharmacy practice skills, to include the knowledge of prescription and drug order processing necessary to function in community pharmacy practice at a basic level.
Prerequisites: First professional year standing.

PHMY 690 - Transforming Healthcare (1 Credit)
The course goal is to lay the foundations for beginning health professions students to understand the complexities of the health care system and the role of interprofessional collaboration to improve the system. Through an interprofessional context, students will explore the art and science of teamwork and communication skills, cultural competency, ethical issues, healthcare disparities and social determinants of health, as well as develop ways to improve healthcare systems and patient safety. COP: 04/26/2018.
Prerequisites: First professional year standing.

PHMY 750 - Self-Care and Complementary Medicines (4 Credits)
A review of indications, contraindications, and cautions involved with the recommendation and dispensing of nonprescription (OTC) drug items and complementary medicines.
Prerequisites: First professional year standing.

Summer P1
PHMY 699 - Introductory Community Practice Pharmacy Experience (4 Credits)
Introduction to the practice of the pharmacy in the community pharmacy setting. Forty hours of directed experience per week for four weeks.
Prerequisites: First professional year standing.

Fall P2
PHMY 610 - Microbiology/Immunology (4 Credits)
Introduction to the role of immunology in human disease and the properties, resistance patterns, diagnostic tools and clinical pearls of common (and not so common) bacterial, viral, fungal and parasitic infectious agents.
Prerequisites: Second professional year standing.

PHMY 710 - Biopharmaceutics and Pharmacokinetics (3 Credits)
Study of the pharmacokinetics of drug absorption, distribution, and elimination (metabolism and excretion). Introductory application of pharmacokinetics to drug interactions and dosage regimen design and adjustment, selected disease states and special populations.
Prerequisites: PHMY 606; second professional year standing.
PHMY 722 - Pathophysiology and Pharmacology I (3 Credits)
The first course in a series that applies pathophysiology and pharmacology principles introduced in the foundations courses in the first year in an organ-based approach. The course is designed to integrate organ system pathophysiology and pharmacology with pharmacotherapy.
Prerequisites: Second professional year standing.

PHMY 760 - Clinical Applications III (1 Credit)
Case-based discussions that integrate and demonstrate applicability of other course material in patient care.
Prerequisites: Second professional year standing.

PHMY 772 - Pharmacotherapy I (4 Credits)
This course is the first in a 4-semester sequence of courses providing an organ-based approach to pharmaceutical care and disease management. Students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on preventing, identifying, and solving drug-related problems. This course is coordinated with Pathophysiology and Pharmacology I.
Prerequisites: Second professional year standing.

PHMY 790 - Pharmacy Skills Lab III: Introduction to Health-Systems Pharmacy (1 Credit)
Exposes students to the practice of pharmacy while also illustrating how theoretical concepts from the basic pharmaceutical sciences relate to daily pharmacy practice, especially in institutional settings. This lab focuses on understanding medical chart evaluation with emphasis on drug therapy monitoring and developing skills in different aspects of hospital pharmacy (sterile product preparation, unit dose, prepackaging and compounding, order entry and cart-fill).
Prerequisites: Second professional year standing.

Spring P2
PHMY 723 - Pathophysiology and Pharmacology II (2 Credits)
The second course in a series that applies pathophysiology and pharmacology concepts introduced in the foundations courses in the first year in an organ-based approach. The course is designed to integrate organ system pathophysiology and pharmacology with pharmacotherapy.
Prerequisites: PHMY 722; second professional year standing.

PHMY 761 - Clinical Applications IV (1 Credit)
Case-based discussions that integrate and demonstrate applicability of other course material in patient care.
Prerequisites: Second professional year standing.

PHMY 773 - Pharmacotherapy II (5 Credits)
This course is the second in a 4-semester sequence of courses providing a systems-based approach to pharmaceutical care and disease management. Students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on preventing, identifying, and solving drug-related problems. This course is coordinated with Pathophysiology and Pharmacology II.
Prerequisites: PHMY 772; second professional year standing.

PHMY 791 - Pharmacy Skills Lab IV: Applied Health-Systems Pharmacy (1 Credit)
Exposes students to the practice of pharmacy while also illustrating how theoretical concepts from the basic pharmaceutical sciences relate to daily pharmacy practice, especially in the institutional setting. Students must successfully complete media fill IV preparation.
Prerequisites: PHMY 790; second professional year standing.

PHMY 890 - Clinical Pharmacokinetics (3 Credits)
Clinical application of basic pharmacokinetic principles to safe and effective patient management with emphasis on design of dosage regimens, therapeutic monitoring, and adjustment of therapy. Application illustrated and practiced through discussions and case examples.
Prerequisites: PHMY 710; second professional year standing.

Summer P2
PHMY 798 - Introductory Institutional Practice Pharmacy Experience (4 Credits)
Introduction to the practice of the pharmacy in the institutional setting. Forty hours of directed experience per week for four weeks.
Prerequisites: Second professional year standing.

Fall P3
PHMY 771 - Pharmacy Skills Lab V: Applied Community Pharmacy (2 Credits)
Provide students with an advanced knowledge of prescription and drug order processing, and assist them in the development of appropriate skills necessary for provision of pharmaceutical care to patients in the community setting, through the use of medication profiles, patient counseling, personal interviews, and appropriate prescription and non-prescription drug information.
Prerequisites: PHMY 670; third professional year standing.

PHMY 822 - Pathophysiology and Pharmacology III (3 Credits)
This is the third in a 4-semester sequence of courses aimed at integrating the discussion of specific disease states and the mechanism of action of the pharmacologic agents used to treat those disease states. This knowledge will be integrated, utilized and applied in a parallel sequence of courses in Pharmacotherapy using an organ-system based approach emphasizing pharmaceutical care and disease management.
Prerequisites: PHMY 722, PHMY 723; third year professional standing.

PHMY 860 - Clinical Applications V (1 Credit)
Case-based discussions that integrate and demonstrate applicability of other course material in patient care.
Prerequisites: Third professional year standing.

PHMY 873 - Pharmacotherapy III (4 Credits)
This course is the third in a 4-semester sequence of courses providing a systems-based approach to pharmaceutical care and disease management. Students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on preventing, identifying, and solving drug-related problems. This course is coordinated with PHMY 822, Pathophysiology and Pharmacology III.
Prerequisites: PHMY 772, PHMY 773; third professional year standing.

Spring P3
PHMY 823 - Pathophysiology and Pharmacology IV (2 Credits)
This is the fourth in a 4-semester sequence of courses aimed at integrating the discussion of specific disease states and the mechanism of action of the pharmacologic agents used to treat those disease states. This knowledge will be integrated, utilized an applied in a parallel sequence of courses in Pharmacotherapy using an organ-system based approach emphasizing pharmaceutical care and disease management.
Prerequisites: PHMY 822; third year professional standing.
PHMY 861 - Clinical Applications VI (1 Credit)
A capstone course, where case studies of complex patients and additional application exercises will bring together concepts learned throughout the previous semesters in the professional program.
Prerequisites: Third professional year standing.

PHMY 874 - Pharmacotherapy IV (5 Credits)
This course is the fourth in a 4-semester sequence of courses providing a systems-based approach to pharmaceutical care and disease management. Students will learn about disease prevention and health promotion, as well as the drug and non-drug therapy of acute and chronic diseases seen in both hospitalized and ambulatory patients. Emphasis is placed on preventing, identifying, and solving drug-related problems. This course is coordinated with PHMY 823, Pathophysiology and Pharmacology IV.
Prerequisites: PHMY 873; third professional year standing.

PHMY 885 - Pharmacy Law and Ethics (3 Credits)
Federal and state laws and regulations governing the practice of pharmacy and introduction to the professional and ethical issues relevant to the practice of pharmacy.
Prerequisites: Third professional year standing.

PHMY 895 - Clinical Assessment (3 Credits)
Development of clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states.
Prerequisites: Third professional year standing.

Advanced Pharmacy Practice Experiences

Descriptions below provide an overview of the APPEs available in the professional Pharm.D. curriculum. Individual course syllabi should be referred to for site-specific expectations.

P4 APPEs

PHMY 963 - Acute/General Medicine Pharmacy Practice Experience I (4 Credits)
This required advanced pharmacy practice experience (APPE) provides clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: Fourth professional year standing.

PHMY 964 - Acute/General Medicine Pharmacy Practice Experience II (4 Credits)
This required advanced pharmacy practice experience (APPE) provides clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: Fourth professional year standing.

PHMY 965 - Acute/General Medicine Pharmacy Practice Experience III (4 Credits)
This required advanced pharmacy practice experience (APPE) provides clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: Fourth professional year standing.

PHMY 966 - Acute/General Medicine Pharmacy Practice Experience IV (4 Credits)
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: Fourth professional year standing.
PHMY 967 - Acute/General Medicine Pharmacy Practice Experience V (4 Credits)
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: fourth professional year standing.

PHMY 968 - Acute/General Medicine Pharmacy Practice Experience VI (4 Credits)
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: fourth professional year standing.

PHMY 969 - Acute/General Medicine Pharmacy Practice Experience VII (4 Credits)
This advanced pharmacy practice experience (APPE) provides additional clinical pharmacy activity on a variety of adult and pediatric medicine inpatient services including cardiology, critical care, emergency medicine, geriatrics, gastrointestinal, infectious disease, nephrology, OB-GYN, oncology, psychiatry, pulmonary and transplant. The APPE provides an exposure to a variety of disease states that allows the student to gain experience monitoring drug therapy and to participate in the therapeutic decision making process. Additional competencies to be achieved during this APPE include: (1) how to develop a problem list, (2) how to present a patient, (3) how to develop and implement a monitoring plan, (4) how to take a medication history, (5) how to respond to a drug information request, and (6) review the policies and procedures at the institution.
Prerequisites: fourth professional year standing.

PHMY 970 - Ambulatory Care Pharmacy Practice Experience I (4 Credits)
This required advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients.
Prerequisites: fourth professional year standing.

PHMY 971 - Ambulatory Care Pharmacy Practice Experience II (4 Credits)
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients.
Prerequisites: fourth professional year standing.

PHMY 972 - Ambulatory Care Pharmacy Practice Experience III (4 Credits)
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients.
Prerequisites: fourth professional year standing.

PHMY 973 - Ambulatory Care Pharmacy Practice Experience IV (4 Credits)
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients.
Prerequisites: fourth professional year standing.

PHMY 974 - Ambulatory Care Pharmacy Practice Experience V (4 Credits)
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients.
Prerequisites: fourth professional year standing.
PHMY 975 - Ambulatory Care Pharmacy Practice Experience VI (4 Credits)
This advanced pharmacy practice experience (APPE) involves the student in the daily provision of clinical pharmacy services in the ambulatory care setting including anticoagulation, geriatrics, HIV, Indian Health Services, oncology, pain management, and primary care. Responsibilities include providing drug therapy for disease states commonly encountered in the outpatient setting, providing drug regimen reviews, physical assessment and interviewing patients to elicit drug histories, health status, and adherence to therapy. A significant aspect of this rotation pertains to the long-term management of chronically ill patients.
Prerequisites: fourth professional year standing.

PHMY 976 - Community Pharmacy Practice I (4 Credits)
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides pharmacy experience in a variety of community settings including chain, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding.
Prerequisites: fourth professional year standing.

PHMY 977 - Community Pharmacy Practice II (4 Credits)
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides additional pharmacy experience in a variety of community settings including chain, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding.
Prerequisites: fourth professional year standing.

PHMY 978 - Community Pharmacy Practice III (4 Credits)
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides additional pharmacy experience in a variety of community settings including chain, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding.
Prerequisites: fourth professional year standing.

PHMY 979 - Community Pharmacy Practice IV (4 Credits)
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in community pharmacy. This APPE provides additional pharmacy experience in a variety of community settings including chain, clinic, compounding and independent. The emphasis is placed on patient counseling, immunizations, medication therapy management, and/or compounding.
Prerequisites: fourth professional year standing.

PHMY 980 - Hospital/Health System Pharmacy Practice Experience I (4 Credits)
This required advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in a hospital/health system setting. This APPE provides pharmacy experience in a variety of hospital/health system practice areas including regulatory compliance, human resources, patient care, informatics, and drug distribution process.
Prerequisites: fourth professional year standing.

PHMY 981 - Hospital/Health System Pharmacy Practice Experience II (4 Credits)
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in a hospital/health system setting. This additional APPE provides pharmacy experience in a variety of hospital/health system practice areas including regulatory compliance, human resources, patient care, informatics, and drug distribution process.
Prerequisites: fourth professional year standing.

PHMY 982 - Hospital/Health System Pharmacy Practice Experience III (4 Credits)
This advanced pharmacy practice experience (APPE) builds upon the introductory pharmacy practice experience in a hospital/health system setting. This APPE provides pharmacy experience in a variety of hospital/health system practice areas including regulatory compliance, human resources, patient care, informatics, and drug distribution process.
Prerequisites: fourth professional year standing.

PHMY 983 - Elective Pharmacy Practice Experience I (4 Credits)
Elective pharmacy practice experiences provide students with the opportunity to explore a variety of pharmacy practice settings outside of the four core curricular categories (acute/general medicine, ambulatory care, community, and hospital/health system). These elective experiences are typically in non-traditional pharmacy settings and include, but are not limited to, academia, administration, drug information, industry, informatics, international, investigational drug services, long term care, mail order, managed care, nuclear, poison center, research and veterinary medicine.
Prerequisites: fourth professional year standing.

PHMY 984 - Elective Pharmacy Practice Experience II (4 Credits)
Elective pharmacy practice experiences provide students with the opportunity to explore a variety of pharmacy practice settings outside of the four core curricular categories (acute/general medicine, ambulatory care, community, and hospital/health system). These elective experiences are typically in non-traditional pharmacy settings and include, but are not limited to, academia, administration, drug information, industry, informatics, international, investigational drug services, long term care, mail order, managed care, nuclear, poison center, research and veterinary medicine.
Prerequisites: fourth professional year standing.

PHMY 985 - Elective Pharmacy Practice Experience III (4 Credits)
Elective pharmacy practice experiences provide students with the opportunity to explore a variety of pharmacy practice settings outside of the four core curricular categories (acute/general medicine, ambulatory care, community, and hospital/health system). These elective experiences are typically in non-traditional pharmacy settings and include, but are not limited to, academia, administration, drug information, industry, informatics, international, investigational drug services, long term care, mail order, managed care, nuclear, poison center, research and veterinary medicine.
Prerequisites: fourth professional year standing.
Elective Courses

Elective courses are offered based on faculty availability, space availability, and sufficient enrollment.

P2
PHMY 786 - Pediatric Pharmacotherapy (2 Credits)
This challenging course is designed to provide the student with increased exposure to disease states, medication issues, and clinical decision-making skills specific to the pediatric population. Pediatrics is an integral component to most pharmacy careers, and gaining a greater understanding of the patient population’s challenges and nuances is necessary to become a confident and well-rounded practitioner. This elective also seeds to provide exposure to the pediatric pharmacy community, including experts in the subspecialty areas and organizations.
Prerequisites: second professional year standing.

PHMY 792 - Advanced Pharmacy Compounding I (1 Credit)
This course will build upon the knowledge acquired in the first professional year courses Dosage Forms/Drug Delivery Systems and Compounding/Applied Pharmaceutics lab. The course will provide emphasis on practical application in the evaluation of unique dosage forms, pharmacotherapy, and special pharmaceutical needs of various patient populations. This course is self-paced and delivered in an online format utilizing prerecorded lectures.
Prerequisites: second professional year standing.

PHMY 793 - Advanced Topics in Pharmacy Compounding II (1 Credit)
This course is an elective course that provides additional insight and understanding into a variety of pharmacy compounding topics, which include nutrient depletion, drug-induced nutrient depletion, metabolic demands of athletes, men’s health, and family medicine. This course is self-paced and delivered in an online format utilizing prerecorded lectures.
Prerequisites: second professional year standing.

PHMY 794 - Pharmacist Entrepreneurship (3 Credits)
This course provides an entrepreneurship overview, including, but not limited to 1) the characteristics, behaviors, and attitudes of successful entrepreneurs, 2) current topics in entrepreneurship, e.g., the lean startup methodology, 3) examination of how to create an entrepreneurial mindset, 4) entrepreneurship as it applies to pharmacy ownership and innovative patient care initiatives, 5) application of relevant business skills, e.g., accounting, marketing, and finance, 6) business planning and creation of a business proposition.
Prerequisites: second professional year standing; recommended that student has completed an accounting course.

P3
PHMY 776 - Developing a Medication Therapy Management Service (2 Credits)
This course will prepare students to develop and implement a pharmaceutical a pharmaceutical care service into a community pharmacy setting. The focus will be on designing a Medication Therapy Management service; however other clinical pharmacy services will be discussed. Students will apply basic principles of small business administration and development to the creation of a pharmacy service. Students will participate in interactive lectures, written assignments, and formal presentations.
Prerequisites: third professional year standing.

PHMY 851 - Acute Care Therapeutics (2 Credits)
A disease-oriented and organ-integrated approach to the care of patients with acute illnesses managed in the in-patient hospital setting. Students will learn common disease processes that affect the acutely ill hospitalized patient and the appropriate pharmacotherapy to treat these patients. This course focuses on developing critical thinking and problem solving skills, and integrating material from this course and previous courses in a case-based format.
Prerequisites: third professional year standing.

PHMY 857 - Community Pharmacy Practice and Operations (2 Credits)
This course is intended to provide a practical look at independent community pharmacy. The goal of the course is to expose students to the many aspects involved in starting, owning and running a business. Each session will focus on a unique aspect of independent pharmacy ownership or pharmacist driven business, along with management skills required to effectively operate the business. Students will learn to critically appraise and discuss independent store ownership/management or pharmacy related business through lectures, readings, discussions and projects.
Prerequisites: third professional year standing.

PHMY 858 - Drug Interactions (2 Credits)
This course is designed to prepare students to appropriately recognize, predict, assess, and manage drug interactions that are encountered in pharmacy practice.
Prerequisites: third professional year standing.
PHMY 859 - Design and Conduct of Clinical Research Studies (2 Credits)
This course is designed to provide students with exposure to clinical research. The demand for pharmacist researchers in a variety of settings continues to increase, and clinical pharmacists are often called upon to engage in some research activities. Residency training provides practical application of research; however, most residents lack an in-depth exposure to the varied aspects of research prior to graduation. This class will provide students with information related to various types of research, discuss the ethical considerations related to clinical research, and provide students with the opportunity to develop and present a clinical research protocol. This course will help prepare students for postgraduate (residency, fellowship, or PhD) research endeavors.
Prerequisites: third professional year standing.

PHMY 863 - Medication Safety Management (2 Credits)
This course is designed to teach students proper medication safety practices. As medications are prescribed, prepared, dispensed and administered safely and appropriately, patients’ lives are ultimately improved. However, health care providers are human and thereby fallible by nature. Knowledge of ways in which medication errors commonly occur and the modalities in place to prevent such errors is important to the practice of pharmacy. This course will allow students to learn the history of medication safety, institutional policies, and technological advances in medication safety.
Prerequisites: third professional year standing.

PHMY 879 - Patient-Centered Approach to Medication Therapy Management (2 Credits)
This elective prepares students to care for patients participating in medication therapy management. The focus will be on communicating with a patient during a MTM session to identify the patient's current medication therapy problems and prevent future medication therapy problems. Students will apply therapeutic principles learned in the curriculum to improve the patient’s overall care, as related to the patient's medication therapies.
Prerequisites: third professional year standing.

PHMY 881 - Senior Care Pharmacy Practice (2 Credits)
This course will introduce students to various topics related to the care of older patients in any setting. Course content will complement the PHMY curriculum in regard to geriatric pathophysiology, pharmacology, socioeconomic issues, regulations, and pharmacotherapeutics. In addition, it will expand upon the various practices of senior care pharmacy. Practicing consultants and other topic experts will serve as lecturers. In addition to class discussions and lectures, students will participate in a consultant pharmacist shadowing experience and will conduct an interview with a senior patient.
Prerequisites: third professional year standing.

PHMY 884 - Delivering MTM Services (2 Credits)
This course will utilize the “Delivering MTM Services in the Community” certificate training program developed by APhA and ASCP to provide students the essential skills necessary to become a successful MTM practitioner. Students will learn how to evaluate complicated medication regimens, identify medication-related problems, and make recommendations. Aspects of business development and management will also be discussed. Students will participate in interactive lectures, reading and writing assignments, critical thinking exercises, and patient counseling sessions.
Prerequisites: third professional year standing.

PHMY 886 - Pharmacotherapy Cases (2 Credits)
This challenging course is designed to provide the student with the opportunity to gather, analyze, and synthesize medical information from complex patient cases into complete pharmacotherapeutic treatment plans designed to improve patient outcomes. This process will enhance the student's ability to be an independent and active learner, foster the student's individual and group problem solving abilities, promote the critical examination of medical problems, and develop student's clinical skills and decision-making abilities.
Prerequisites: third professional year standing.

PHMY 898 - Telemental Health (3 Credits)
The objective of this course is to introduce nursing, pharmacy and social work students to direct telemental health practice in health settings – the use of telecommunications technology to provide behavioral health sciences. This course provides health professions students with a detailed examination of the use of telehealth processes to transform the provision of healthcare. Through an interprofessional context, students will learn the history and status of telemental health activities; engage with stimulated and live telemental health learning experiences; understand the use of telemental health to improve healthcare access and population health; and embrace the changing models of care resulting from advancing telemental health technologies.
Prerequisites: third professional year standing.

P2 or P3
PHMY 716 - Special Project, Dept. of Pharmaceutical & Biomedical Sciences (1-4 Credits)
An individualized program of study or research arranged by consultation between student and faculty member. Credit is variable and the course may be repeated for credit.
Prerequisites: second or third professional year standing or in fulfillment of graduate program requirement or honors thesis.

PHMY 717 - Cancer: Causes, Treatment, and Prevention (2 Credits)
An overview of basic concepts in cancer epidemiology, genetics, and biology, and the therapeutic approaches utilized in the prevention and treatment of cancer.
Prerequisites: second or third professional year standing.

PHMY 756 - Clinical Immunology and Transplant (2 Credits)
This course will introduce students to the principles of solid organ transplantation (SOT) and the role of a pharmacist in the continuum of care for transplant recipients through case-based learning and exposure to primary literature. Students will learn indications, common disease processes, and complications associated with kidney, pancreas, liver, lung, and heart transplantation in addition to the management of population-specific immunosuppression pharmacotherapy regimens.
Prerequisites: second or third professional year standing.

PHMY 757 - Special Project, Dept of Pharmacy and Outcome Sciences (1-4 Credits)
An individualized program of study or research arranged by consultation between student and faculty member. Credit is variable and the course may be repeated for credit.
Prerequisites: second or third professional year standing or in fulfillment of graduate program requirement or honors thesis.

PHMY 762 - Creating Pharmacy Leaders (2 Credits)
This course is designed to teach students the leadership skills needed to influence people and organizations in an effort to create positive change within the practice of pharmacy.
Prerequisites: second or third professional year standing.
PHMY 763 - Introduction to Pharmacy Pathways and Careers (3 Credits)
The course will emphasize aspects of pharmacy career development, to include understanding of the role of a professional, strategies in dealing with various types of patients, development of professional presentations, and familiarity with career pathways in pharmacy.
Prerequisites: second or third professional year standing.

PHMY 764 - Personal Finance (3 Credits)
This course is designed to provide the health care practitioner with the knowledge and skills to manage their personal finances in an effective manner. After successfully completing this course, the student will be able to understand the process for making personal financial decisions; establish personal financial goals; evaluate the factors that influence personal financial planning; and apply strategies for attaining personal financial goals.
Prerequisites: second or third professional year standing.

PHMY 766 - Alternative Medicine (2 Credits)
This course is designed to expose the student to a wide variety of herbal medicines and dietary supplements. Discussions will also include regulation of herbal supplements, evaluation of the alternative medicine literature, and disease-directed discussions with case studies.
Prerequisites: second or third professional year standing.

PHMY 784 - Post-graduate and Research Training (2 Credits)
This course is designed to prepare students for and promote post-graduate training, with an emphasis on residency training, but also including PhD and fellowship training. All elements of preparation for post-graduate training will be covered; the class will provide information related to various types of research, discuss the ethical considerations related to research and provide the opportunity to develop and present a research protocol.
Prerequisites: second or third professional year standing.

PHMY 788 - Interprofessional Prevention of Childhood Obesity (2 Credits)
This course introduces health professions students to concepts in community and public health focusing on childhood obesity. The course is in collaboration with the Junior Doctors of Health (JDOH) program. JDOH is an interprofessional service-learning program that works with children in low-income schools with the aim of long term prevention of childhood obesity. During the course, students will lead education and interactive sessions that are part of the JDOH curriculum to promote healthy diet and physical activity behaviors. Students from public health, social work, and pharmacy will participate in didactic class sessions together then will provide education regarding the prevention of childhood obesity as interprofessional teams to elementary students in local schools. Teams will then develop presentations regarding their experiences to present during the final class session.
Prerequisites: second or third professional year standing.

PHMY 855 - The What, Why, and How of Health Sciences Research (1 Credit)
Students will be exposed to the process of designing a research experiment from idea conception through manuscript submission, including protocol development, IRB approval, abstract submission, grant funding, and peer review. Students will also familiarize themselves with technology commonly used in data collection, analysis, and manuscript writing. Weekly opportunities to engage with accomplished health science researchers will allow the student to be exposed to numerous research designs. The overall goal of this course is to make the student prepared to step in and work in a faculty mentored research study.
Prerequisites: second or third professional year standing.

PHMY 856 - Evidence Based Medicine (2 Credits)
This course is designed to instruct students on the proper approach to critical evaluation of the medical literature. An evidence based approach to patient care hinges on the medical team’s ability to utilize the most current literature available. Students will learn the keys to critiquing the medical literature, including basic statistical and analytical concepts, in an open forum style, with application of literature information to clinical scenarios.
Prerequisites: second or third professional year standing.

PHMY 882 - Integrated Pharmacy: Infectious Diseases Pharmacotherapy in Patient Care (2 Credits)
This course is an integrated approach to infectious diseases pharmacotherapy that builds upon required PHMY courses. At the conclusion of the course, the student will have a working knowledge of infectious diseases pharmacotherapy and be able to develop a complete patient care plan given an infectious diagnosis. Additionally, the course will stress important drug interactions with antimicrobials, adverse events associated with antimicrobials, and the prominent role of pharmacists in a HIV clinic, antimicrobial stewardship program, and/or medical crisis.
Prerequisites: second or third professional year standing.

PHMY 891 - Clinical Pharmacogenomics and Advanced Personalized Medicine (3 Credits)
This course will incorporate didactic teaching from both the basic sciences and pharmacotherapy realms to prepare students to effectively engage with commonly encountered questions and pharmacy practice dilemmas related to pharmacogenomics. The course will also provide active learning through longitudinal projects involving pharmacogenomic literature analysis, and solving pharmacogenetics-related pharmacotherapy selection problems.
Prerequisites: second or third professional year standing.

Degrees Offered

Bachelor of Science in Pharmaceutical Sciences

Beginning with the Class of 2019, students admitted to the University of South Carolina (UofSC) College of Pharmacy (COP) who completed pharmacy prerequisites but have not yet received a Bachelor’s degree in any discipline prior to entering the professional Doctor of Pharmacy (Pharm.D.) program may be eligible for the Bachelor’s degree in Pharmaceutical Sciences. A total of 128 hours (66 hours of undergraduate and 62 hours of professional program courses) are required for completion of the Bachelor’s degree in Pharmaceutical Sciences; a combination of undergraduate courses, Carolina Core course requirements, and first- and second-year professional COP Pharm.D. courses comprise this degree.
Doctor of Pharmacy
The Doctor of Pharmacy degree is offered as a full-time degree program requiring four professional level academic years, which includes introductory pharmacy practice experiences and some advanced pharmacy practice experiences that must be completed during the summer semesters. A total of 215 hours (66 hours of pharmacy prerequisites and 149 hours of professional program courses) are required for completion of the Doctor of Pharmacy degree.

The maximum length of time that will be allowed for a student to complete the four-year College of Pharmacy Doctor of Pharmacy professional degree program will be six consecutive academic years from the date of their original entry into the professional program. Any student who wishes to extend the time allowed for completion of the program beyond the six-year limitation will be required to submit a petition request to the College of Pharmacy Scholastic Standing and Petitions Committee; the petition will be reviewed and a decision for a time extension will be based on the individual student circumstances.

Important Information About Doctor of Pharmacy Degree Program and Licensure
Each state has its own pharmacy licensing board with its own state specific licensing requirements. The University of South Carolina College of Pharmacy Doctor of Pharmacy professional degree program is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), making its graduates eligible to sit for pharmacist licensure exams (e.g., NAPLEX and MPJE). Some states may have specific requirements that applicants for licensure must meet in addition to graduating from an ACPE-accredited program. The following link provides National Association of Boards of Pharmacy (NABP) information regarding individual state boards of pharmacy and licensure specific to individual states throughout the U.S. where a student may wish to become licensed following graduation: https://nabp.pharmacy/boards-of-pharmacy/. Additional information may be found at the Academic Programs Professional Licensure website: https://www.sc.edu/about/offices_and_divisions/provost/planning/academicprograms/state-authorization/professional-licensure-info.php

Combination Degree Programs
The College of Pharmacy offers a variety of combination degree programs with the Doctor of Pharmacy degree. Options include:

- Pharm.D./Master of Business Administration (MBA)
- Pharm.D./Master of Health Administration (MHA)
- Pharm.D./Master of Health Information Technology (MHIT)
- Pharm.D./Master of Public Health (MPH)
- Pharm.D./Doctor of Philosophy in Pharmaceutical Sciences (PhD)

For more information on these programs, please visit the UofSC College of Pharmacy website. Annual information sessions are provided to expose interested students to the various options.

Optional Academic Track Programs
The College of Pharmacy offers three optional academic track programs within the Doctor of Pharmacy curriculum. These programs include the:

- Business and Entrepreneurship Track
- Pre-Residency Track
- Walker Leadership Scholars Program

The tracks allow students to focus on co-curricular concepts outside of required professional courses to assist with skills and employment in particular pharmacy settings. The tracks provide activities that students can participate in outside the classroom (student organization activities, seminar programs, research projects, etc.) that will further develop professional skills applicable in these practice settings. If a student begins the Business and Entrepreneurship or Pre-Residency track programs, they are not obligated to complete the track and may discontinue their participation at any time. The Walker Leadership Scholars Program requires students to apply, interview, be selected and continue in the track for their second – fourth professional years.

Mission Statements

University of South Carolina Mission Statements

UofSC System Mission Statement
Approved by the Board of Trustees – October 11, 2019

Approved by the South Carolina Commission on Higher Education – December 5, 2019

The primary mission of the University of South Carolina System is the education of the state’s diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate’s, bachelor’s, master’s, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor’s and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

UofSC Columbia Mission Statement
Approved by the Board of Trustees – October 11, 2019

Approved by the South Carolina Commission on Higher Education – December 5, 2019
The primary mission of the University of South Carolina Columbia is the education of the state's citizens through teaching, research, creative activity, and community engagement. Among America's oldest and most comprehensive public universities, the University of South Carolina Columbia is the major research institution of the university system and its largest campus. At the heart of its mission lies the university's responsibility to state and society to promote the dissemination of knowledge, cultural enrichment, and an enhanced quality of life.

The University of South Carolina Columbia serves a diverse population of students with widely varying backgrounds, career goals, and levels of aspiration. The university offers over 320 degrees at the bachelor’s, master’s, doctoral, and professional program levels, affording students the most comprehensive array of educational programs in the state. Opportunities for personal and career development are provided to the citizens of South Carolina through outreach and continuing education activities. The university provides additional opportunities for associate degrees through Fort Jackson and through the oversight of regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work. The depth and breadth of its graduate programs distinguishes the University of South Carolina Columbia from all other institutions of higher learning in South Carolina.

Recognized by the Carnegie Foundation as a top research and community engaged institution, nationally ranked in start-up businesses, and conferring over 30% of all bachelor’s and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. As the flagship institution of the university system, the University of South Carolina Columbia leads the way in providing all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, community outreach, and artistic creation.

College of Pharmacy Purpose Statements

Vision
Our vision is to be the destination to empower pharmacy students, researchers, educators, and practitioners to transform healthcare, globally through:

• Rigorous education of students and practitioners
• Professional placement of students
• Diversity of professionals
• Successes in research and scholarly output
• National and international recognition of faculty and students
• Partnerships with outside entities
• International collaborations and strategic alliances
• Number of international students
• Entrepreneurship
• Success, growth and engagement of our alumni

Mission
Our mission is to prepare the next generation of innovative and collaborative pharmacists and health scientists while pioneering clinical, entrepreneurial, and research endeavors to improve health outcomes for residents of South Carolina and beyond.

We will accomplish this by:

• Continually building a culture of compassion, inclusiveness and collegiality
• Providing comprehensive pharmacy education
• Conducting and disseminating state of the art research
• Establishing optimal student experiences
• Engaging in community outreach
• Expanding pharmacy practice, post-graduate training, and business opportunities
• Growing alumni and partner relationships
• Fostering faculty and staff development

Policies and Regulations

Academic Policies

Grading Procedures

• The letter grades of A, B+, B, C+, and C represent passing grades in order from highest to lowest. The letter grades D+ and D allow progression to the next sequenced courses during the same academic year, but are not considered passing grades.
• Courses in which students earn grades of D+, D, F, or U must be repeated. A course may only be repeated one time; a second deficiency will result in dismissal from the Pharm.D. program.
• Per UofSC policy, S and U indicate, respectively, satisfactory (passing) and unsatisfactory (failing) performance in courses carried under the Pass-Fail option. The Pass-Fail option is only used for introductory pharmacy practice experiences and elective courses which are specified as PassFail.
• Per UofSC policy, W is assigned for student withdrawal from a course after the late registration period but before the drop date. A WF, which counts as an F in GPA calculation, is assigned for student withdrawal from a course after the drop date prescribed in the UofSC Academic Calendar. Students who must withdraw from all courses due to compelling circumstances may petition the Scholastic Standing and Petitions Committee to receive grades of W rather than WF in those cases where a WF is assigned. An “I” (Incomplete) is assigned at the discretion of the course coordinator when, in the course coordinator’s judgment, a student does not complete some portion of the assigned work in a course. Per UofSC policy, students must fulfill remaining course requirements within 12 months in order to replace the incomplete grade with a final grade. Failure to complete the remaining coursework within 12 months will result in a final grade of F for the course. A grade of Incomplete cannot be carried into the fourth professional year; requirements to remove the Incomplete and receive a final course grade must be fulfilled prior to the start of the pharmacy practice experiences in the fourth professional year.
• Some courses in the professional curriculum appear in a sequence (similar course names and sequential course numbers) when course material is similar, related and/or sequentially builds knowledge/skill in a given area. In some instances, mastery of material in one or more courses in such sequences are considered prerequisites to further courses in that sequence. A student receiving a grade of F in a prerequisite course cannot take the next course in that sequence when the first course has been designated as a prerequisite
to the affected course. The student must retake the failed course and receive a grade of C or better before taking the next sequenced course(s), which may delay a student’s progression.

- Students must have no course deficiencies and must meet all progression guidelines as defined under the College of Pharmacy Scholastic Standing Guidelines in order to begin their advanced pharmacy practice experiences at the end of the third professional year.

- The following grading scale will be utilized:
  - A 90–100.00
  - B+ 85–89.99
  - B 80–84.99
  - C+ 75–79.99
  - C 70–74.99
  - D+ 65–69.99
  - D 60–64.99
  - F < 59.99

- Course coordinators and course faculty will identify the specific course requirements, which will be utilized to determine student performance (i.e., tests, reports, class participation, group projects), and this should be provided to students in the syllabus at the beginning of the course.

- In cases where a student must repeat a course, both grades will remain in the student academic record and will be factored into the overall GPA.

**Academic Accommodations**

The UofSC Student Disability Resource Center grants reasonable student academic accommodations. Students requesting academic accommodations at UofSC should contact the Student Disability Resource Center (https://www.sc.edu/about/offices_and_divisions/student_disability_resource_center/) directly. Students on the Greenville campus must also utilize the UofSC Student Disability Resource Center in order to be granted accommodations.

Students who believe they may require accommodations are strongly suggested to meet with the Senior Associate Dean or Associate Dean for Student Affairs & Diversity prior to their meeting/communication with the UofSC Student Disability Resource Center. The purpose for this meeting is to equip the student with information regarding courses, including IPPes and APPes, that may be necessary to discuss with the UofSC Student Disability Resource Center as accommodations are being determined.

Once Faculty are notified by the UofSC Student Disability Resource Center of a student’s accommodations, they are required by the Americans with Disabilities Act to provide the approved accommodations for the student.

After accommodations are approved by the UofSC Student Disability Resource Center, the student is responsible for setting an appointment with EACH course coordinator of courses which the accommodations may be utilized in order to verify the receipt of documentation regarding the accommodations so that appropriate planning can be completed for the semester. This should occur prior to the first exam in which the student wishes to use the accommodation(s), but after the accommodation(s) has/have been electronically communicated to the course coordinators.

Students with accommodations will communicate directly with individual course coordinators to discuss use of accommodations within each specific course’s structure.

- Due to unique, hands-on, or experiential structure of many courses within the curriculum, situations may arise in which application of issued accommodations is challenging. If a course coordinator is unable to determine a method to honor accommodations within their course, the affected student must arrange a meeting with the Senior Associate Dean. The Senior Associate Dean will work with the student, faculty member, and UofSC Student Disability Resource Center to formulate a solution that assists the student, as well as meets the expectations and requirements for the course.

Students with accommodations involving exams must communicate directly with the course coordinator at least 5 business days prior to the exam in order to ensure that the faculty member knows that an accommodation will be utilized for the exam and the location at which the student will test (i.e., pharmacy classroom, virtually proctored testing environment [when applicable], or proctor room). It is the student’s responsibility to schedule exams requiring the use of the proctor room per the guidelines and scheduling processes of the UofSC Student Disability Resource Center. Failure to notify the course coordinator as described above or to schedule exams requiring use of the proctor room per the guidelines of the UofSC Student Disability Resource Center will result in inability to utilize accommodations for that exam.

- Students choosing NOT to utilize issued accommodations for an exam must notify the affected course coordinator at least 5 business days prior to the exam for planning purposes and exam security reasons. If the student has previously scheduled to take an exam at the university proctor room, they must also utilize UofSC Student Disability Resource Center policies regarding cancellation. A student who has previously scheduled to utilize the proctor room and has failed to notify the course coordinator within at least 5 business days advance notice must utilize the university proctor room for that particular exam.

Examinations will be taken during the regularly scheduled class time when possible. If a conflict exists, then:

- The examination will begin the class period prior (if possible) to the regularly scheduled time, or the examination will be taken the same day, at the first available time slot of the course coordinator or proctor room.
- The UofSC Student Disability Resource Center proctoring room may be utilized for students requiring accommodations. Due to capacity limits, the course coordinator may schedule separate times to test enrolled students with accommodations at the UofSC Student Disability Resource Center proctoring room, if necessary, after discussing with the center.

Accommodated students may elect to miss classes to begin an exam early or finish an exam late in the confines of their approved accommodations. Accommodated students may not miss a class with required attendance.

If accommodated students opt to take an exam at another time due to class schedule conflict, they are required to be present in the classes that conflict. If the student is found to not attend the classes that conflict, they will be referred to the UofSC Office of Student Conduct and/or
Student Policy & Professionalism Committee (College of Pharmacy) for sanctions.

Faculty are encouraged to have the accommodated student(s) attempt the exam in the same format as the entire class (computer or paper). The only exception is if the accommodation relates to the exam format administration (paper or computer).

Faculty should ensure that accommodated students who receive extra time on an exam are able to remain in one location for the entire time allotted per the accommodation if possible.

**Scholastic Standing Policies**

**Progression**

In order to be eligible for promotion and graduation, students must obtain at least a 2.0 (grade of C or better) in each professional course and maintain an overall GPA of at least 2.0 in all professional courses. Course grades of D+, D, I, F and U are considered deficiencies.

Students must remove any deficiencies by the beginning of each fall semester in order to be promoted to the next year. This may be accomplished by taking summer courses, if available. Any course in the Pharm.D. curriculum requiring remediation outside of the originally scheduled time period results in additional tuition charges, including pharmacy practice experiences. Requests to take classes outside of the College of Pharmacy and to receive credit for these classes will require the approval of the course coordinator, Senior Associate Dean, and Curriculum Committee.

It is not standard practice of the College of Pharmacy to offer summer school courses. Summer course offerings are not determined until the end of the academic year as the College as several factors must be evaluated to determine whether it is in the best interest of the student(s), faculty members, and College to do so.

Course withdrawals and leaves of absence require the approval of the Dean's Office. “Compelling circumstances” must be evident. Students who withdraw prior to the established UofSC drop date will receive a grade of W; students who withdraw from a course after the established UofSC drop date will receive a grade of WF, which calculates as a zero for purposes of computing a student’s GPA.

Students are required to register for and successfully complete all required and elective coursework in a specific professional year in order to register for courses and progress to the next professional year in the curriculum.

If a student fails to achieve a grade of C or better in an elective course, the student is encouraged, but not required, to re-take the elective course. However, the student must successfully complete a minimum of eight hours of electives by the end of the third professional year.

Students will not be allowed to attempt a course in a sequenced group of courses if they receive a grade of F or U in the previous course that has been designated a prerequisite to the latter course(s); a grade of D+ or D in the previous course will allow a student to attempt other courses in a sequenced group of courses, but the course deficiency must be removed prior to beginning the next professional year in the curriculum.

Sequenced courses in the College of Pharmacy curriculum in which one course in the sequence is considered a prerequisite for one or more of the other courses in the sequence are listed below; it should be noted that some sequenced courses are scheduled over multiple professional years:

- Foundations of Pathophysiology & Pharmacology I and II
- Foundations of Medicinal Chemistry I and II
- Introduction to Drug Information and Advanced Drug Information
- Pathophysiology & Pharmacology I, II, III, and IV
- Intro Community Pharmacy Laboratory and Applied Community Pharmacy Laboratory
- Intro Health Systems Laboratory and Applied Health Systems Laboratory
- Clinical Applications II, III, IV, V, and VI
- Pharmacotherapy I, II, III and IV
- Biopharmaceutics & Pharmacokinetics and Clinical Pharmacokinetics

For integrated/linked courses that are also delivered in sequence (such as Pharmacotherapy I-IV and Pathophysiology/Pharmacology I-IV), students will not be allowed to complete either of the two next courses in the sequence if they receive a grade of F in either of the two previous integrated courses. A grade of D+ or D in either course will allow a student to complete the next course in the sequence, but the course deficiency must be removed prior to beginning the next professional year in the curriculum.

Students will not be allowed to complete the Introductory Pharmacy Practice Experience (IPPE) Community Rotation (PHMY 699) if a student has a deficiency (obtains a D+, D, F, or U) in PHMY 670 and/or PHMY 671 (Pharmacy Skills Lab I – II) or in PHMY 750 Self-Care and Complementary Medicine. Students will not be allowed to complete IPPE Hospital/Health System Rotation (PHMY 798) if a student has a deficiency (obtains a D+, D, F, or U) in PHMY 790 and/or PHMY 791 (Pharmacy Skills Lab III – IV).

If a student has deficiencies (obtains a D+, D, F, or U) in more than four courses during any given academic year, he/she will be dismissed from the pharmacy program.

If a student has deficiencies (obtains a D+, D, F, or U) in more than two courses in any given academic year, he/she will be allowed to make any of those courses up during summer sessions and must repeat those courses during the next academic year. If the student is on probation, he/she will be suspended for one calendar year at the beginning of the next fall semester.

No student will be allowed to take more than two courses per summer session. A student may choose to self-suspend for an academic year instead of attempting two courses (if offered) during a summer session.

No student will be allowed to take a required course (except IPPE and APPEs) for the first attempt in a summer session.

Any IPPE and/or Advanced Pharmacy Practice Experience (APPE) experiential course deficiency must be remediated. Students with a deficiency in a required or elective introductory or advanced pharmacy practice experience must remediate the rotation at a site determined by the Experiential office. Students who elect to complete ten APPEs must complete an eleventh rotation in the event of a rotation deficiency.

Students with a deficiency (obtaining a D+, D, or F) in more than one APPE rotation will be dismissed from the program.
Students who earn a course deficiency in a Fall semester course will not be allowed to hold office in any professional organization or class at the College of Pharmacy or university level for the following Spring semester. Students who earn a course deficiency in a Spring semester course will not be allowed to hold office in any professional organization or class at the College of Pharmacy or university level for the following Fall semester. If you are a current or incoming student leader who falls under one of the above situations, you will be required to resign from your leadership position(s).

**Suspension**

Suspension means that a student will be prohibited from advancing in the curriculum for one academic year. Students will be suspended if they fail to remove any deficiencies by the beginning of the fall semester.

A suspended student may repeat required course(s) once in order to remove deficiencies and strengthen areas of weakness. (Additionally, the student may have up to 8 hours of electives to improve the overall GPA and strengthen areas of weakness during their academic matriculation.)

A suspended student who meets the requirements for promotion will be removed from suspension, placed on academic probation for one year (see definition within this document) and allowed to progress in the curriculum.

Suspended students will not be allowed to seek or hold office in any professional organization or class at the College of Pharmacy or university level.

Failure to remove all deficiencies and to attain a cumulative GPA of 2.0 or higher by the conclusion of a period of suspension will result in dismissal (see definition below) from the College of Pharmacy.

**Academic Probation**

Academic probation means the time period following return of a student to the professional program after suspension is complete.

Students on probation must demonstrate their ability to consistently and satisfactorily progress in the curriculum, by maintaining a minimum GPA of 2.0 and meeting promotion requirements for one academic year.

To enter the fourth professional year, all professional students must have successfully completed all professional course requirements, including elective courses, by the end of the spring semester of the third professional year.

Probationary students will not be allowed to seek or hold office in any professional organization or class at the College of Pharmacy or university level.

Failure to satisfy the terms of probation will result in dismissal.

**Dismissal**

Dismissal is the mandatory withdrawal of a student.

After dismissal, the college will not accept any course work from the student to complete the Doctor of Pharmacy program or final two years of the Bachelor of Science in Pharmaceutical Sciences degree.

Students will be dismissed if they fail to remove all deficiencies, fail to attain a cumulative GPA of 2.0 or higher by the conclusion of a period of suspension, or if they fail to satisfy the terms of academic or professional probation.

A student may repeat a course in the professional curriculum only once. Failure to remove the course deficiency after the second attempt will result in the student's dismissal.

If a student has deficiencies in more than four courses during any given academic year, he/she will automatically be dismissed from the program.

Students with a deficiency in more than one APPE rotation will be dismissed from the program.

Students may be dismissed for lack of professionalism and/or professional misconduct.

Students may be dismissed by the College of Pharmacy and/or the University of South Carolina dependent upon individual student situation.

**Petitions**

Any student seeking an exception to the academic standards may petition the College of Pharmacy Scholastic Standing and Petitions Committee. Students have 10 calendar days from the date they receive written notification of their deficiency, suspension, or dismissal to submit a petition to the Associate Dean for Student Affairs and Diversity, who will serve as liaison and provide all documents to the Chair of the committee. A petition may be approved or denied based on the merits of the individual situation. The petition process will be handled through the College of Pharmacy Scholastic Standing and Petitions Committee.

The College of Pharmacy Scholastic Standing and Petitions Committee does not have the authority to change grades assigned by faculty or preceptors.

The Senior Associate Dean will review and approve petition decisions as submitted by the College of Pharmacy Scholastic Standing and Petitions Committee. The Senior Associate Dean will issue final communication regarding the petition decision to the student.

Students whose petition was denied may petition a final time directly to the Dean in cases where new, substantial information has arisen following their hearing with the College of Pharmacy Scholastic Standing and Petitions Committee.

Students who separated from the College of Pharmacy while not in good academic and/or professional standing, whose absence has been more than 2 years but less than 10 years, may petition to return to the professional program by submitting a formal, written statement including the cause for their separation, reasons for their desire to return, and actions they have taken to ensure their readiness for return. Students whose separation from the College of Pharmacy has been greater than 10 years are ineligible to petition to return.

A petition for readmission must be submitted to the Associate Dean for Student Affairs and Diversity. The petition will be reviewed by the College of Pharmacy Scholastic Standing and Petitions Committee.

UofSC undergraduate pre-pharmacy students may petition the UofSC College of Pharmacy Scholastic Standing and Petitions Committee concerning suspension, dismissal, or readmission from/to the University of South Carolina.
Course Policies

Student Expectations & Attendance

Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in class discussions/group exercises.

Students must be physically present in class in order to receive credit for attendance, in-class quizzes, participation assignments, etc. In the case of synchronous web-based courses, students must be logged in prior to the start of class and remain present throughout the entirety of the class in order to receive credit for attendance, in-class quizzes, participation assignments, etc. Students who utilize methods to receive credit for in-class assignments while being physically located outside the classroom or not logged into the web-based course will be referred to the UofSC Office of Academic Integrity and provided grade sanctions as per individual course syllabi.

Attendance is expected for all classes. The course coordinator may choose to establish a specific attendance policy in an individual course and this policy, along with consequences of violation of this attendance policy, should be presented to students enrolled in the class at the beginning of the semester, as part of the course syllabus. The course coordinator may choose to exact a grade penalty for excessive absences as defined in the course specific attendance policy.

Students are required to attend 100 percent of laboratory course meetings.

The Associate Dean for Student Affairs and Diversity or Senior Associate Dean may excuse students for significant absences (usually related to health issues or family deaths). A medical excuse or other appropriate documentation is required to be submitted if the absence occurs on an exam day unless preapproved through the Dean's Office. All other class absences must be approved by the course coordinator.

The College of Pharmacy follows the University of South Carolina policy on observance of religious holy days.

Students may request approval from individual Faculty to be absent from class to attend a professional meeting or event. A student must provide at least 4 weeks’ advance notice to the Faculty member, who may or may not approve the request.

Severe Weather Policy

In the event of a weather emergency which might affect class schedules, the College of Pharmacy will follow the guidelines as provided by the University of South Carolina.

Students should access the UofSC website at www.sc.edu to determine if there has been an official announcement that classes have been cancelled or delayed. College of Pharmacy students may receive severe weather alerts from the university and should follow the guidelines of the university regarding cancellation or delay of classes.

The Dean will determine the specifics of how the College of Pharmacy will follow university guidelines and will inform the Director of Communications/IT Staff. The Director of Communications/IT Staff will be responsible for posting a notice on the front page of the College of Pharmacy Web site and via other electronic avenues of communication such as Facebook and Twitter. Students will receive an email notifying them of the effect on the College of Pharmacy.

The Greenville Campus Clinical Associate Dean or designee will notify students on the Greenville campus about any changes in class schedules due to inclement weather. Students should check the College of Pharmacy website for additional information.

In the event that the weather emergency affects only one campus, then classes/labs will occur at the unaffected campus, if lectures/labs were scheduled from the unaffected campus on that day. Lectures will either be recorded, provided via synchronous web-based instruction, or alternate arrangements made available to all College of Pharmacy students whose campus was affected.

The affected campus coordinator will determine lab make-up date(s) and time(s). If an exam was scheduled for the day, then the exam will be delayed on both campuses until another regular class meeting time or, when possible, delivered as scheduled using virtually proctored examination technology.

UofSC procedures in the event of severe weather do not apply during IPPEs and APPEs. Students are required to contact their preceptor to determine whether travel to rotation is safe and/or the rotation site is open. If inclement weather is predicted, the student should develop a plan with their preceptor in advance. Under no circumstances should the student ASSUME that they are not to report to rotation.

Temporary Student Attendance at an Alternate Campus

Students may request to temporarily transfer to an alternate campus for a limited time period (less than 1 semester). Reasons for the request may be self/family health issues or personal issues. The student must meet with the Associate Dean for Student Affairs and Diversity to discuss the circumstances. If the 24 Return to Table of Contents Associate Dean for Student Affairs and Diversity deems the request valid, the alternate campus will be contacted to determine if any space or other applicable issues prevent the student from completing this temporary transfer. Upon approval, the student must submit in writing a request for the transfer as well as the time period involved to the Associate Dean for Student Affairs and Diversity.

Greenville campus students may attend classes on the Columbia campus for an individual day at a time as needs may arise of which the student will be present on the Columbia campus for an extracurricular or co-curricular event that day. Individual day attendance in these situations does not require a written or pre-approval from the Associate Dean for Student Affairs and Diversity. However, the affected student is responsible for communicating with the course coordinators on both campuses for the day in advance to determine any complications of this temporary attendance (i.e. in cases of exams or group presentations).

Distance Education Policy

The College of Pharmacy may utilize distance education technology in the teaching of didactic courses during the professional program in regards to the third professional year offered at the Greenville Campus and any course-specific instances requiring such technology. Use of distance education is not a substitute for in-class attendance as the UofSC College of Pharmacy is not an online Pharm.D. program. The UofSC College of Pharmacy may utilize synchronous web-based instruction to deliver course content when live course meetings cannot be held due to weather, public health, or other emergencies.
**Student Honor Code Policy**

Policies regarding honor code and academic integrity for students enrolled in the College of Pharmacy are defined in the UofSC Honor Code, Carolinean Creed, and UofSC Office of Student Conduct and Academic Integrity website.

Any reports of potential Student Honor Code violation by faculty, staff, or students may be sent to the UofSC Office of Academic Integrity. The UofSC Office of Student Conduct and Academic Integrity website will provide the guidelines for dealing with these situations.

Students who receive a “Responsible” finding from an incident that was dealt with by the UofSC Office of Student Conduct and Academic Integrity are also subject to sanctions at the College of Pharmacy level, which are described in the Professionalism Policy housed in this document.

**Copyright Policy**

The College of Pharmacy seeks to aid enrolled students by offering limited (i.e. not offered for every course) electronic presentations and recordings of lectures as a study tool and to better meet individual learning needs. With the growing use of technology, students and faculty have the responsibility to understand and observe copyright law including educational fair use guidelines, obtain written permission, and to follow UofSC policy.

As supplemental tools, all material found in lectures is owned by the College of Pharmacy and is protected by United States Copyright laws. Lecture material is only available to students enrolled in the course where the content is available, and use is not permitted outside the scope of the course. Recorded lectures will only be posted to Blackboard and may not be distributed by students through any avenue (i.e., text, social media).

Material found in the lectures may not be photocopied, screen-shot, duplicated or distributed by any student without the express, written permission from the faculty member who created the material. Video, audio, or photographic recordings of course material are strictly prohibited. Recordings, course material, and lecture notes may not be reproduced verbatim nor uploaded to publicly accessible websites. Recordings and course material may not be exchanged nor distributed to a third party for compensation.

Recordings and course material may not be used for any purpose other than personal study and may not violate any policies herein. An individual may individually print copies of lecture material solely for personal use under the scope of the course. Duplication or dissemination of lecture materials without authorized use may violate federal or state law and UofSC University policies.

Failure to adhere to these policies is a violation of the College of Pharmacy Professionalism Policy and may result in disciplinary action under University guidelines. For any further assistance with copyright matters, faculty and students may seek guidance from the Library Staff or the Dean’s Office.

**Audience Response System**

Policy Students are required to purchase a multi-year (3 years) access of the Top Hat Audience Response System prior to P1 Orientation. This system will be utilized throughout courses in the didactic curriculum.

**Testing Policies**

**Test Scheduling**

A test is defined as a major examination of material in a course (usually administered no more frequently than every two weeks, except in summer sessions). A day is defined as the day of the week, not a 24-hour period. The Test Scheduling Policies do not apply to written report dates, scheduled oral presentations, or weekly quizzes.

No more than two tests in core courses will be given on the same day to the same class (e.g. P1, P2, etc.) Consequently, under this policy, two tests could be administered on Monday afternoon and two tests could be administered on Tuesday morning. No tests will be given during the week prior to final exams, except in the case of lab courses or when the last day of class is utilized to administer the final exam in a course.

A test schedule will be distributed to all students via posting to the College intranet and learning management system by the first day of class each semester at which time this test schedule is considered final. Students attending professional meetings may be excused from tests. In these cases, the course policy for excused test absences, as defined in the College of Pharmacy Course Policies, will be applied. Students who will miss class due to attendance at an event, which has been designated as a College of Pharmacy-sanctioned event, will be granted an excused absence. The course coordinator MUST be notified in writing (e-mail is fine) of the scheduled absence at least four (4) weeks in advance or on day one of the semester; professors may or may not approve the request. Students should follow the reporting process to the Associate Dean for Student Affairs and Diversity for professional meeting absences to obtain a Deans Office issued excused absence in addition to course level approval.

P1 and transfer students are required to attend an e-testing orientation and to confirm that the appropriate software is loaded onto their laptop. They are required to participate in an e-testing practice session prior to the first exam. Students are responsible for any lost time in completion of an exam due to inexperience with the process for running the security software and/or accessing the exam.

Final examinations will be scheduled in accordance with the College of Pharmacy final exam schedule.

This test policy may be suspended or altered due to severe weather or natural disaster to facilitate rescheduling of missed classes and tests.

For room scheduling purposes only, a 3-hour block of time will be allotted for final exams. Course coordinators will determine a reasonable length of time for completion of the final course exams. The course coordinators are not required to provide 3 hours for final exams if it is unreasonable given the exam structure.

If a scheduled test must be missed due to unforeseen circumstances, the student must notify the course coordinator by letter, phone, or e-mail, prior to the test, if possible, and the student must obtain an excuse from the Associate Dean for Student Affairs and Diversity or Senior Associate Dean.

If an absence is excused, the student will either be given a makeup exam or the other test grades will be increased proportionately to compensate for the missing grade. This decision will be at the discretion of the course coordinator.
After each major examination, students earning grades of D+, D, or F are strongly encouraged to contact and meet with respective course coordinators regarding their performance on the exam and mechanisms for improvement. At the midpoint of the semester, the professor of record for each required didactic and laboratory course will be asked to provide the names of students at risk for receiving grades of D+, D, or F within their course to the Dean's Office. This will allow the Dean's Office to identify students with academic problems in multiple courses. The Dean's Office will schedule academic progress conferences with students who have grade difficulties in multiple courses.

**Minimum Required Examination Procedures**

No examination materials (including scratch paper) are to be left in the room under any circumstances during the actual examination period or during an examination review. In the case of virtually proctored electronic examinations, no content from any examination may be copied, photographed, or replicated in any way during the actual examination period or during an examination review. Scratch paper must be destroyed immediately following the examination.

If print exams are administered, scantrons will be standardized. The following elements will be used: full name (first, middle initial, last), date, social security/identification number, version A or 1, version B or 2, version C or 3, or version D or 4, depending on the scantron used.

In the case of in-class examinations, book bags are to be placed at the front or sides of the classroom away from all students for the duration of the examination. The only items allowed at the student’s desk are: pencils, calculators, exams, scantron sheets, and scratch paper. If electronic exams are administered, only pencils, scratch paper, and laptops are allowed. Failure to bring a laptop to a scheduled exam is considered an unexcused absence. The policy of the College is to assign a grade of zero for the electronic exam of which a student fails to bring their personal laptop, unless the student has contacted the course coordinator regarding extenuating circumstances or the course coordinator or course syllabus has indicated an alternate policy.

If a student is late to an exam for an extenuating circumstance, proof must be provided to the Dean’s Office to prevent sanctions. If a student fails to bring their personal laptop, unless the student has contacted the course coordinator or course coordinator or course syllabus has indicated an alternate policy. In the case of virtually proctored electronic examinations, any student experiencing technical difficulties at the time of an exam is expected to contact the Dean’s Office via email at copit@cop.sc.edu and the course coordinator upon realizing that a problem exists.

Questions relating to exam content are strictly prohibited during the examination. Questions regarding suspected typing errors on the test (e.g., omissions, misnumbering, defective exam pages, etc.) are permitted, though may be addressed post-test in order to remain fair to students completing exams in alternate locations or on alternate dates.

Food or beverages are not allowed during examinations. All food containers and beverages should be placed at the front or sides of the classroom along with book bags or otherwise stored in a separate location from the test-taker.

Unauthorized use of any of the following during an examination will be considered a violation of the University of South Carolina Honor Code: cell phones, PDAs, iPods, computers, iPads, smart watches or any time-keeping devices, headphones, earbuds, or any similar electronic devices. These devices are to be turned off and stored separately from the student during examinations. During in-class examinations, these devices must be stored in book bags during the examinations as well as during exam review sessions and until exiting the room.

Calendars (when authorized to be used by course coordinator) must not be capable of storing equations, graphs, charts, etc. Only non-programmable calculators are allowed - no cell phones, PDAs, or similar devices are to be used as calculators during exams. No additional notes or written materials may be engraved, adhered, or otherwise attached to a calculator being used during an exam or to the student’s body. Students are to be seated with at least one empty chair between individuals when facilities and space allow during in-class examinations.

Hats are not to be worn during examinations. Exception: visors and baseball caps (or similarly brimmed caps) may be worn with the brim turned around backward.

Clocks will be maintained in each of the classrooms.

Students will be assigned a password to access electronic exams. It is highly recommended that students use a hardware connection to the internet for accessing electronic exams. If a student forgets his/her cable or simply wants to use Wi-Fi, he/she assumes responsibility for a lost wireless connection. For in-class examinations, a student who has technical problems in accessing or completing an electronic exam, a penalty may be given for providing him/her with a print copy. The penalty, if any, is specified in the course syllabus. In the case of virtually proctored electronic examinations, any student experiencing technical difficulties at the time of an exam is expected to contact the Dean’s Office via email at copit@cop.sc.edu and the course coordinator upon realizing that a problem exists.

Students are expected to arrive on time for scheduled exams. Students are expected to begin virtually proctored examinations at the respective course's start time or as instructed by the course coordinator. Arriving late to an exam or starting a virtually proctored examination late when not due to technical difficulties reported to the course coordinator and IT staff are unprofessional and considered in violation of the professionalism policy. Grade sanctions for students arriving late to an exam are specified in each course syllabus.

Students who are repeatedly late for exams will be referred to the Professionalism Committee. If a student is late to an exam for an extenuating circumstance, proof must be provided to the Associate Dean for Student Affairs and Diversity or Senior Associate Dean in order to prevent sanctions.

Food or beverages are not allowed during examinations. All food containers and beverages should be placed at the front or sides of the classroom along with book bags or otherwise stored in a separate location from the test-taker.

Restroom breaks are discouraged during in-class examinations and prohibited during virtually proctored examinations. If restroom breaks are needed during an in-class examination, only one student at a time will be allowed to leave the exam room and a same sex faculty member may accompany the student. Students must leave all belongings in the classroom along with book bags or otherwise stored in a separate location from the test-taker.
classroom in this situation to avoid perceived or real academic integrity incidences.

Cheating in any form is not allowed and will be considered an honor code violation and immediately referred to the UofSC Office of Student Conduct and Academic Integrity. Course coordinators may enact grade sanctions for the course dependent on the UofSC Office of Student Conduct and Academic Integrity resolutions.

Students should take all personal items and exit the exam room upon completion of in-class exams. Students are not permitted to reenter the exam room until all students have completed the exam.

Accreditation Policies and Student Rights

Southern Association of Colleges and Schools Commission on Colleges (SACS COC) Disclosure Statement

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master’s, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses’ accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

Accreditation Council for Pharmacy Education (ACPE) Disclosure Statement

The University of South Carolina College of Pharmacy’s Doctor of Pharmacy program has been granted accredited status by the Accreditation Council for Pharmacy Education, 135 S. LaSalle Street, Suite 4100, Chicago, IL 60603-4810, (312)664-3575; FAX (866)228-2631, web site www.acpe-accredit.org. In addition to the ACPE accreditation, the college has received accreditations from the American Society of Health-Systems Pharmacists (ASHP) and the American Association of Poison Control Centers (AAPCC). The South Carolina Commission on Higher Education has also approved the Pharm.D. program.

Accreditation Issue Procedures

Issues, questions, comments or complaints pertaining to accreditation should be directed to the Associate Dean for Outcomes Assessment and Accreditation. The College will keep a file of all communications related to accreditation. If issues or complaints have not been satisfactorily resolved at the College the Accreditation Council for Pharmacy Education’s (ACPE) may be contacted via email: csinfo@acpeaccredit.org. The Accreditation Council for Pharmacy Education has offices at 135 South LaSalle Street, Suite 4100, Chicago, IL. 60603-4810. They may be contacted by phone at (312)664-3575, by fax at (866) 228-2631, or via their Web site: www.acpe-accredit.org (https://academicbulletins.sc.edu/pharmacy/accreditation/www.acpe-accredit.org).

Notification of Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These include the following:

1. The right to inspect and review their education records within 45 days of the day the University receives a request for access.
   a. Students should submit written requests that identify the record(s) they wish to inspect to the registrar, dean, academic department head, or other appropriate official.
   b. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected.
   c. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request amendment of student education records that the student believes are inaccurate or misleading.
   a. Students may ask the University to amend a record that they believe is inaccurate or misleading. They should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading.
   b. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of the right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student with notification of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. The University of South Carolina will disclose information from a student’s education records only with the written consent of the student, except:
   a. to school officials with legitimate educational interests (A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted [such as an attorney, auditor, or collection agent]; a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting other school officials in performing their tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill a professional responsibility.)
   b. to officials of other institutions in which the student seeks or intends to enroll provided that the student has previously requested a release of the record
   c. to authorized representatives of the U.S. Department of Education, the comptroller general of the United States, state educational authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations
   d. in connection with a student’s application for, and receipt of, financial aid
   e. to comply with a judicial order or lawfully issued subpoena
f. to parents of dependent students as defined by the Internal Revenue Code, Section 152

g. to appropriate parties in a health or safety emergency

h. to the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.

The University of South Carolina has designated the following items as directory information: a student’s name; electronic mail address; local and permanent mailing addresses and telephone numbers; semesters of attendance; enrollment status (full- or part-time); date of admission; date of graduation; school; major and minor fields of study; whether or not currently enrolled; classification (freshman, etc.); type of degree being pursued; degrees; honors; and awards received (including scholarships and fellowships); weight and height of members of athletic teams; and whether the student has participated in officially recognized activities and sports sponsored by the University.

The University may disclose any of these items without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release directory information. Requests will be processed within 24 hours after receipt. Telephone directories are published during the summer; students eligible to enroll for the upcoming fall term will be listed in the printed directory unless the Office of the University Registrar is notified by May 31. The electronic directory is updated each weekend; requests for nondisclosure will be honored with the next update after the request is processed by the staff of the office of the University Registrar.

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202-4605.

Questions concerning this law and the University’s procedures for release of academic information may be directed to the Office of the University Registrar at 803-777-5555.

Admissions

Technical Standards Policy

One of the primary missions of the College of Pharmacy is to prepare outstanding pharmacists and pharmaceutical scientists to meet the health care needs of the state and society and to enhance the delivery of essential pharmacy services for all citizens. The faculty of the College of Pharmacy strive to deliver an education that will, through the graduates of the Doctor of Pharmacy Program, attain the highest levels of this goal. The professional program leading to the Doctor of Pharmacy degree and eligibility for pharmacist licensure requires a certain level of cognitive, behavioral, and technical skill and ability inherent in a professional education. These principles and standards hold for admission, progression, retention and completion of the program. The primary role of the pharmacist is to provide safe and effective health care to the patients served. Patient safety must be considered in the selection and education of student pharmacists. In order to foster patient safety, the College of Pharmacy requires all student pharmacists to demonstrate the ability to meet the minimum standards set forth herein. Standards are developed as criteria to achieve the Doctor of Pharmacy degree in preparation for licensure as a practicing pharmacist and for postgraduate professional training and education in any of the varied fields of pharmacy. Student pharmacists must reasonably contribute to a safe environment through their personal physical and mental health and social behavior. Students must complete the academic program in a reasonable length of time, must be able to acquire a pharmacist intern license by their first semester in the College and maintain the pharmacist intern license during their educational program, and must be eligible for a pharmacist license after they complete the Doctor of Pharmacy program. All students are expected to successfully fulfill the same core educational requirements. Reasonable education-related accommodations will be provided, where possible and within the guidelines of the College of Pharmacy. The five standards listed below describe the essential functions students must demonstrate in order to fulfill the requirements of a general pharmacy education, and thus are prerequisites for entrance to, continuation in, and graduation from the College of Pharmacy. A student must meet or exceed the required aptitude, abilities, and skills outlined below. Certain chronic or recurrent illnesses and problems may interfere with didactic studies, delivering or providing patient care, or compromising patient safety and may be incompatible with pharmacy training or practice.

Technical Standards

Observation: Observation necessitates the functional use of visual, auditory and somatic senses. Students must have the ability to observe and evaluate, in classrooms and patient care areas, demonstrations, experiments and patients, including performing physical assessments. Observation of the technical quality of pre-manufactured as well as compounded medications is essential.

Communication Skills: As appropriate for each stage of their education, student pharmacists must be able to communicate effectively and efficiently in oral and written English, to hear, and to listen to patients in order to elicit information; describe changes in mood, activity, and posture, and perceive verbal as well as non-verbal communications. Students must also communicate effectively and efficiently in oral and written English, to hear, and to listen to faculty, staff, other health care professionals, and preceptors. Communication includes not only speech, but also reading, writing, hearing, and computer literacy. They must be capable of completing professional communication activities in a timely manner.

Motor: Student pharmacists must have the coordination of muscular movement with accommodation if necessary, to undertake the preparation of all routine forms of medication orders, the use of diagnostic equipment for patient assessment, and the direct delivery of patient therapies. Such actions require coordination of both gross and fine muscular movement, equilibrium, and functional use of the senses of touch and vision.

Intellectual, Conceptual, Integrative and Quantitative Abilities: As appropriate for each stage of their education, student pharmacists must demonstrate a fundamental and continuing ability to use analytical reasoning to independently and in collaboration with a health care team synthesize knowledge, solve problems and explain health care situations. Information must be obtained, retrieved, evaluated and delivered in an efficient and timely manner. Students must be able to demonstrate good judgment in patient care and assessment and have the ability to incorporate new and changing information obtained from the practice environment.

Behavioral and Social Attributes: Student pharmacists must demonstrate professional and ethical demeanor appropriate to their educational level.
Students must be able to function within the regulatory and institutional limits of the educational environment and modify behaviors based on criticism. Students must demonstrate compassion and integrity and a concern for others. This requires responsibility for personal action and emotional stability under the stressful conditions that may come from their professional education. Individuals with questions or concerns about their ability to meet these standards are encouraged to contact the Associate Dean for Student Affairs and Diversity.

* A combination of separate Human Anatomy (3 hours) and Human Physiology (3 hours) courses will fulfill this requirement.

Note: All prerequisite courses must be successfully completed with a "C" or better by the start of P1 Orientation, which occurs directly prior to the Fall semester of professional year one.

Entrance Requirements

Traditional Admissions Pathway

Traditional admission to the College of Pharmacy Pharm.D. program is competitive and based on the applicant’s completion of Pharmacy prerequisite courses. GPA, academic record, letters of recommendation, interview evaluations, PCAT scores, honors/awards, extracurricular activities, pharmacy exposure, student personal statement concerning their goals for a career in pharmacy, (optional) diversity statement, and application(s). Applicants must complete the PCAT and have official scores reported to PharmCAS prior to the end of the application period, on or before the application deadline published on the UofSC College of Pharmacy website in the year of anticipated admission. Applicants will apply via the national PharmCAS system and UofSC College of Pharmacy Supplemental Application.

Applicants must provide an official copy of all college transcripts to PharmCAS at the time of application submission. A second transcript is required to be submitted to PharmCAS upon receipt of final fall semester grades. Subsequent transcripts are required to be submitted directly to the College of Pharmacy as indicated in the supplemental application upon receipt of final spring and summer grades. As a state-supported institution, preference will be given to in-state applicants. In-state students are defined as S.C. residents and any non-S.C. resident attending a S.C. college or university. In-state status as defined here only applies to the admission process. Residency for the purpose of tuition will be determined by the University of South Carolina Legal Residency Office. All accepted students will be required to submit to a criminal background review and drug screen prior to matriculation into the program.

Early Assurance Program Admissions Pathway

Admission to the Gamecock Pharmacy Assurance (GPA) program is competitive and based on the applicant’s admittance into the B.S. in Pharmaceutical Sciences (Pre-Pharmacy) major at the Columbia campus of the University of South Carolina, ACT/SAT scores, high school weighted core grade point average, letters of recommendation, interview evaluations, honors/awards, extracurricular activities, pharmacy exposure, student personal statement concerning their goals for a career in pharmacy, (optional) diversity statement, and application(s).

Candidates admitted into this program that successfully complete the maintenance requirements are expected to complete progression applications and matriculate into the UofSC College of Pharmacy Pharm.D. program at the beginning of their third collegiate year. All accepted students will be required to submit to a criminal background review and drug screen prior to matriculation into the Pharm.D. program.

International Admissions to the Pharm.D. Program Policy

The College of Pharmacy is welcoming to international students within the policy described below. Individual Doctor of Pharmacy program applicants who meet these requirements may apply. The College of Pharmacy also considers a limited number of international applicants to the doctor of pharmacy program who have completed at least a 5-year bachelor of science in pharmacy degree and when there is a prior written agreement between the College of Pharmacy and an international sponsoring university, government, or agency (International Partnership Program).

Individual International Applicant Requirements

- At least 42 hours of Pharm.D. program prerequisite courses must have been completed at a college or university accredited in the United States excluding courses delivered via electronic media, including English language prerequisites.
- An international student admitted to the College must be proficient in English with a score of at least 550 on the Test of English as a Foreign Language (TOEFL) paper-based exam, 77 on the internet-based TOEFL, or 210 on the computer-based TOEFL.
- Applicants must be eligible to receive a Pharmacy Intern Certificate based on the South Carolina Board of
Pharmacy requirements. The Pharmacy Intern Certificate is a requirement for students to complete Introductory and Advanced Pharmacy Practice Experiences portions of the Pharm.D. curriculum.

- Applicants who have attended post-secondary educational institutions, colleges or universities outside of the United States are required to submit a professional credential evaluation of all work completed. This is generally referred to as a course-by-course transcript evaluation. A course-by-course transcript evaluation should be sent directly to the College of Pharmacy Admissions Office from the evaluation service, which must be a member of the National Association of Credential Evaluation Services (NACES). The web address is www.naces.org. A fee from the applicant is required for the evaluation of credentials. The payment and all contact regarding this process is done directly with the evaluation service of your choice.

- Applicants currently enrolled in a term or semester should contact the evaluation service for a partial evaluation. A final evaluation will be required prior to enrollment. A fee from the applicant is required for the evaluation of credentials. The payment and all contact regarding this process is done directly with the evaluation service of your choice. Below is the contact information of two companies that frequently provide us with evaluations:

Josef Silny & Associates, Inc.
International Educational Consultants
7101 SW 102 Avenue Miami, FL 33173
Web: www.jsilny.com
Phone: 305-273-1616 305-273-1616

World Education Services, Inc.
P.O. Box 5087
Bowling Green Station New York, NY 10274-5087 Web: www.wes.org
Phone: 212-966-6311 212-966-6311

- Official documents (photocopies are acceptable) certifying that the student will have sufficient funding to attend the College of Pharmacy for one academic year are required. This evidence will be used to issue the student an immigration document (I-20 or DS-2019) which will be required to obtain the F-1 or J-1 student visa at a US embassy or consulate. Applicants who are permanent residents do not need to provide this information. International students may not be eligible for student loans through the FAFSA process. All international students will be considered out-of-state during the admissions processes and for tuition purposes.

- The applicant is responsible for obtaining a proper visa, if accepted.

- Applicants admitted to the Doctor of Pharmacy program must comply with all student policies and requirements as detailed in the College of Pharmacy Academic Bulletin & Student Handbook and all admission procedure requirements, including a background check and health/immunization policies and University requirements.

International Partnership Program Applicant Requirements

International Partnership Applicants to the College of Pharmacy Doctor of Pharmacy program may apply only after a written agreement between the UofSC and the international sponsoring university, government, or agency has been completed. The number of international partnership applicants admitted each year will be determined by the College of Pharmacy, and a signed partnership agreement does not guarantee admission of individual applicants. For admission of international BS degree pharmacists, applicants must meet admission criteria shown below. The College of Pharmacy may grant advanced status, depending on the individual’s academic record or practice experience. International applicants must have graduated within 10 years of the date of application.

- An international partnership program student admitted to the College must be proficient in English with a score of at least 550 on the Test of English as a Foreign Language (TOEFL) paper-based exam, 77 on the internet-based TOEFL, or 210 on the computer-based TOEFL.

- Applicants must be eligible to receive a Pharmacy Intern Certificate based on the South Carolina Board of Pharmacy requirements. The Pharmacy Intern Certificate is a requirement for students to complete Introductory and Advanced Pharmacy Practice Experiences portions of the Pharm.D. curriculum.

- Applicants who have attended post-secondary educational institutions, colleges or universities outside of the United States are required to submit a professional credential evaluation of all work completed. This is generally referred to as a course-by-course transcript evaluation. A course-by-course transcript evaluation should be sent directly to the College of Pharmacy Admissions Office from the evaluation service, which must be a member of the National Association of Credential Evaluation Services (NACES). The web address is www.naces.org. A fee from the applicant is required for the evaluation of credentials. The payment and all contact regarding this process is done directly with the evaluation service of your choice.

- Official documents (photocopies are acceptable) which certify that the applicant will have sufficient funding to attend the College of Pharmacy for one academic year are required. This evidence will be used to issue the student an immigration document (I-20 or DS-2019) which will be required to obtain the F-1 or J-1 student visa at a US embassy or consulate. Applicants who are permanent residents do not need to provide this information. International students may not be eligible for student loans through the FAFSA process. All international students will be considered out-of-state during the admissions processes and for tuition purposes.

- The applicant is responsible for obtaining a proper visa, if accepted.

- Applicants admitted to the Doctor of Pharmacy program must comply with all student policies and requirements as detailed in the College of Pharmacy Academic Bulletin & Student Handbook and all admission procedure requirements, including a background check and health/immunization policies and University requirements.
Transfer Policies

Admission to the Doctor of Pharmacy Program from another College of Pharmacy

Applications for transfer students from an accredited professional pharmacy program into the UofSC College of Pharmacy professional Pharm.D. program will be evaluated on an individual basis. The student applying for transfer must be in good standing in their current Pharm.D. program, the student must complete at least two years of study at the UofSC College of Pharmacy and space must be available in the Pharm.D. program for any application to be considered.

Process to Request Transfer:

Step 1: The following information is required to be submitted to the UofSC College of Pharmacy Director of Admission to begin the transfer evaluation process:

- Letter outlining the reason for the transfer request and desired entrance level into the program (i.e., 2nd year, 3rd year, etc.)
- Unofficial college transcripts from all institutions attended for all college coursework completed including Pharm.D. program prerequisite courses and Pharm.D. courses Official PCAT scores (must include writing score)
- Resume/CV
- Three letters of recommendation
- UofSC College of Pharmacy Supplemental Application
- Interview with the Director of Admissions to discuss transfer intent

The Admissions Committee may require a face-to-face interview as part of the transfer student application.

Step 2: Upon approval by the Admissions Committee to move forward with the transfer request after receipt of initial documentation, the following information is required to be submitted to the UofSC College of Pharmacy Director of Admission to determine potential professional year placement:

- Current program’s Pharm.D. curriculum
- Course descriptions and syllabi for all completed Pharm.D. courses

Step 3: If the student chooses to continue with a transfer request after notification of professional year placement that would result from a transfer acceptance, the following information must be submitted to the UofSC College of Pharmacy Director of Admissions:

- Letter from current pharmacy school Dean’s Office stating the student is in good academic and professional standing
- Seat Fee
- Submission of a criminal background review and drug screen

Step 4: The Admissions Committee will evaluate all submitted documentation to determine whether a transfer acceptance will be extended.

Transfer to Greenville (Prisma Health - Upstate) Campus

A campus located in Greenville, South Carolina is available for student transfer for the third and fourth professional years. Beginning with Fall 2017 entering students, Greenville campus transfer approval is designated upon acceptance to the Pharm.D. program. This transfer is binding and documented in a second acceptance letter from the UofSC College of Pharmacy. Students transferring to the Greenville campus are still considered UofSC students for the purposes of tuition, curriculum, and other academic and professional policies. Extracurricular and co-curricular opportunities are available on the Greenville campus, but may differ from those available on the Columbia campus. Not all opportunities on the respective campuses are available to students residing on the distant campus. Students electing to transfer to the Greenville campus should seek guidance from the Associate Dean of Student Affairs and Diversity regarding these opportunities prior to committing to a Columbia campus-based academic, co-curricular, or extracurricular opportunity. A required campus-specific orientation will occur prior to each Fall semester.

Professionalism Policies and Procedures

Professionalism Policies & Procedures

The faculty of our College has approved curricular outcome competencies that each student is expected to master. One of the most important is the demonstration of personal values and ethical principles in all professional and social contexts. Most students come into our program with a well-developed value system that is further refined as they grow through their college experience in general and their professional education. As a result, there is little emphasis on disciplinary procedures. However, to minimize ambiguity with regard to unprofessional and unacceptable behaviors, professionalism policies are presented here in some detail.

Professional Standards

The foremost privilege and responsibility of the profession of pharmacy is to selflessly serve humanity, follow state and federal rules and regulations with regards to the pharmacy profession, and to promote the public health and welfare. Given such important privilege and responsibility, pharmacy students are expected to present and conduct themselves in a manner commensurate with a health care professional.

Expected professional behavior includes but is not limited to the following:

Student attendance for rotations, lectures, laboratory sessions, and meetings is expected and students must adhere to attendance policies enacted by the course syllabus and this document. Students are expected to be punctual and to remain present until the conclusion of the activity. For courses or meetings in which attendance is mandatory, no student may sign in for another student for class attendance purposes.

Signing in for another student or using a method to portray you are present in class or the meeting when you are not is considered a Honor Code violation and will be referred to the UofSC Office of Student Conduct and Academic Integrity.

In all in-person and virtual academic and professional settings, students are expected to be alert and prepared to handle all assigned tasks and duties. When students are assigned to work with others, it is expected that the student will participate and complete their responsibilities with regard to the project.

In all in-person and virtual academic, professional, and social settings, it is expected that students will be courteous, respectful, non-disruptive, and display positive demeanor.
The expression of criticism or issues, either in person, in writing (letter or email), or telephone will be done in a non-threatening, non-abusive, and positive manner. Students should follow the College of Pharmacy Student Grievance Policy in regards to individual or class issues.

In in-person and virtual professional settings, students will always dress in accordance with the College of Pharmacy Dress Code.

In all in-person and virtual academic, professional, and public settings, it is expected that students will display the highest level of honesty and ethics. If a student suspects that another student has committed a form of academic dishonesty, there is an obligation on the student to report the violation in accordance with the UofSC Honor Code.

As healthcare professionals in training, students are expected conduct themselves so that the health of their colleagues, faculty, and patients is not at risk due to their behaviors. Students are expected to self-report diagnosis of any highly communicable disease to the College of Pharmacy upon discovery per the appropriate method. Students will not be penalized for missing classroom, laboratory or experiential activities due to a documented medical illness because of which they cannot be around others.

A pharmacy student is required to uphold the dignity and honor of the profession, and to accept its ethical principles. Students shall not engage in any activity that will discredit the profession. Students are expected to follow and uphold all local, state and federal laws at all times.

**Criminal Background Check & Student Arrest Policy**

The College of Pharmacy will conduct Criminal Background Checks for all students accepted to the professional program. In addition, the College of Pharmacy will conduct Criminal Background Checks prior to pharmacy practice experiential rotations. The College of Pharmacy may provide the results of these Criminal Background Checks to the UofSC Office of Student Conduct and Academic Integrity, the South Carolina Board of Pharmacy, and/or the pharmacy practice sites participating in experiential rotations. Students are responsible for clearing any issues reported in background checks. In the event an incident is not expunged from a background report, the College of Pharmacy will make a reasonable effort to place a student at a practice site for practice experiences, but placement is not guaranteed.

Any student who is arrested or convicted for violation of federal, state, or local laws is subject to appropriate disciplinary action by the University of South Carolina, and/or the South Carolina Board of Pharmacy. The College of Pharmacy Dean's office may immediately suspend a student from participating in experiential rotations until their case can be reviewed by UofSC Office of Student Conduct and Academic Integrity, and/or South Carolina Board of Pharmacy. Each of these entities may review the student’s case and may impose appropriate disciplinary action.

In addition, the College of Pharmacy Dean's office may immediately suspend a student from participating in experiential rotations if the Dean's office feels a student may pose a risk to public safety due to criminal background check results, arrests, or convictions. If the student believes that the background check results are in error and can provide proof, the student will be given the opportunity to produce this proof.

All students will be required to sign a consent form which allows the College of Pharmacy to provide all background check reports to the South Carolina Board of Pharmacy and Experiential Rotation Preceptor(s)/site.

All arrests or convictions must be reported to the Associate Dean for Student Affairs and Diversity within 2 university business days of the event. The arrest or conviction may be reported to the South Carolina Board of Pharmacy by the College of Pharmacy. Additionally, students must notify the UofSC Office of Student Conduct and Academic Integrity within 72 hours of the event. Any student with an arrest or conviction may be placed on professional conduct probation by the Dean's office. Depending on the severity of the charges, the Dean may suspend the arrested or convicted student immediately until the charges have been resolved. The student case will be reviewed by the College of Pharmacy Student Policy & Professionalism Committee and a recommendation for resolution will be provided to the Dean.

If an arrested student fails to report the arrest or conviction within 2 university business days, then he/she may be subject to immediate suspension or dismissal from the College of Pharmacy.

Any official documentation related to arrests or convictions must be reported to the College of Pharmacy within 2 university business days of receipt. The Deans Office will maintain documentation of Background Check reports and any documentation provided by the student. This documentation will be maintained in a file separate from the student’s academic file.

Any student arrested or convicted for drug or alcohol related offenses may be required to seek counseling and/or educational services at the Recovering Professionals Program (RPP) and/or UofSC Student Health Services Counseling and Psychiatry Office. The student may be required to sign a release statement authorizing the College of Pharmacy Associate Dean for Student Affairs and Diversity to verify that the student has been compliant with attendance and therapy requirements developed by the case manager. If a student is required to perform random drug screening(s), then the student must report a copy of the results to the College of Pharmacy within 72 hours of receipt. Any expense incurred for the drug screenings will be the responsibility of the student.

If a student’s pharmacy intern certificate is suspended, revoked, or voluntarily surrendered, the student may be suspended from the College of Pharmacy immediately.

Further requirements that may be imposed upon the student can be found in the Chemical Impairment Policy.

**Chemical Impairment Policy**

The specific policies for alcohol and other drug abuse prevention and intervention for students enrolled in the College of Pharmacy are defined in the University of South Carolina Academic Bulletin and Student Handbook. The UofSC Office of Student Conduct and Academic Integrity website provides additional guidelines, including notification of student rights under FERPA and other mandated notifications.

Chemical dependency is defined as psychological or physiological dependence on a psychoactive substance. Potential substances include alcohol, prescription and OTC drugs (obtained legally or illegally), and street drugs.

The purpose of this policy is to facilitate the identification of a student who may be chemically impaired, to promote appropriate treatment and recovery of these individuals, and to prevent patient harm from occurring.
Procedures:

College of Pharmacy students who suspect that they may be chemically impaired are encouraged to voluntarily report themselves to the Associate Dean for Student Affairs and Diversity.

The Dean’s Office may conduct random drug screenings of students throughout their time in the program. Any expense incurred for the drug screen(s) will be the responsibility of the student.

It is the professional responsibility of all College of Pharmacy faculty, staff, and students to report or intervene in cases when they suspect a student to be chemically impaired. The Associate Dean for Student Affairs and Diversity should be notified in those cases where student impairment is suspected. Conduct that may suggest chemical impairment includes but is not limited to:

- a decline in academic performance
- changes in behavior
- failure to carry out professional responsibilities
- repeated tardiness or absenteeism
- psychomotor deficiencies
- observed intoxication

The Dean’s Office will refer students suspected of chemical impairment for an immediate drug screen to occur within 24 hours of notification. Any expense incurred for the drug screen(s) will be the responsibility of the student. The student will also be referred to one or more of the following as appropriate: the Recovering Professional Program (RPP) and/or UofSC Student Health Services Counseling and Psychiatry Office.

The College of Pharmacy Dean’s office may immediately suspend a chemically impaired student from participating in experiential rotations due to the risk posed to public safety.

Referred students will be required to sign a statement allowing the College of Pharmacy to contact the recovery or counseling program in order to verify that the student has sought the service. In addition, the statement will allow the recovery or counseling program to discuss with the College of Pharmacy Deans appropriate recommendations for potential re-entry into the College of Pharmacy program by the student (if student is suspended).

A file separate from the student file in the Dean’s Office will be kept on the chemically impaired student. The Associate Dean for Student Affairs and Diversity will maintain this separate file.

Some of these counseling and educational services are offered at no cost to the student. If there is a cost associated with any of the services, it is the responsibility of the student.

The chemical impairment counselor will monitor the student’s ongoing recovery and will notify the College of Pharmacy Associate Dean for Student Affairs and Diversity immediately should a student fail to comply with any aspect of his/her recovery and monitoring program. Ongoing monitoring will continue until such time as the student graduates or otherwise leaves the College of Pharmacy. If a student does not comply with the monitoring requirements or tests positive for the substance(s) for which he/she is being monitored (including alcohol, illegal drugs or prescription drug), the College of Pharmacy will take appropriate action based on discussions between the program counselor and the Associate Dean for Student Affairs and Diversity. This action may include suspension or dismissal from the College of Pharmacy.

Participation in a recovery program does not make the chemically impaired pharmacy student immune to legal proceedings for criminal acts involving drug misuse, or illegal use.

The academic standing of a chemically impaired pharmacy student will not change while the student is on a leave of absence for therapy. If the student is academically ineligible to continue in the pharmacy curriculum, participation in the rehabilitation program will not preclude administrative action for dismissal from the College of Pharmacy for academic reasons.

If a student’s pharmacy intern certificate is suspended, revoked, or voluntarily surrendered, the student may be suspended from the College of Pharmacy.

Student Sexual Harassment Policy

The College of Pharmacy will follow the policies of the University of South Carolina regarding sexual harassment for students. The UofSC website provides additional guidelines, including notification of student rights under FERPA and other mandated notifications.

Student Dress Code Policy

The College of Pharmacy student dress code is mandatory for all practice laboratories, all introductory and advanced pharmacy practice experiences, grand rounds/seminars, and professional events held in any location where students are representing the College of Pharmacy.

Students must adhere to individual course/pharmacy rotation site policies regarding site-specific ID badges.

All students are expected to be clean, neatly groomed and dressed in a professional (conservative) manner for experiential rotations and laboratory experiences. Students not wearing clothing deemed appropriate by a laboratory instructor will be warned at the first offense. A second offense may result in dismissal from lab, grade reduction, or grade of zero issued for that lab session (please see specific laboratory syllabi for penalties related to inappropriate dress). In the experiential setting, students may be dismissed immediately if dressed inappropriately and asked to return in appropriate dress. Students will be required to make up this time away from rotation (refer to the attendance policies in the experiential manuals).

All students must adhere to any temporary or permanent clothing or garbing items needed to mitigate public health concerns and/or maintain the aseptic nature of laboratory, classroom and experiential rotation settings. These requirements may be issued by the university or college and may include, but are not limited to, face coverings, masks, gloves, gowns, etc. Students are expected to remain up-to-date on these requirements as they may change throughout the academic year and may vary between learning areas.

The following guidelines are appropriate for dress during laboratory and experiential rotations: students are required to wear a white, long sleeved jacket-length lab coat and UofSC College of Pharmacy ID badge attached at the collar or chest pocket of the lab coat. Non-UofSC College of Pharmacy/commercial logos and badges are not permitted on lab coats. Men are required to wear a dress shirt with tie, dress slacks, or a dress and close-toed dress shoes. Women are required to wear a dress blouse or sweater with skirt or dress slacks, or a dress and close-toed dress shoes. Skirts and dresses are required to be of a length no more than 2 inches above the knee. In order to portray a professional appearance, hair color should be subdued and not be bold or bright colored (i.e., purple, blue, green). Piercings must be small and tasteful. Piercings worn in laboratory and experiential settings are limited to the ears (students
requiring piercings in other visible body parts should seek the advice of the faculty member for accommodations. No attire (e.g., short skirts or dresses, tight fitting clothing, low-cut blouses), accessories (e.g., large jewelry, sunglasses) or behaviors (e.g., chewing gum, wearing excessive cologne or perfume) that may be deemed unsafe or distracting to other students, instructors, preceptors, health care team members or patients will be permitted.

Please note that individual practice sites may have a more rigorous dress code requirement. Students must adhere to specific preceptor/site requirements.

Appropriate dress is also expected in the classroom. Attire that may be deemed distracting to students, faculty or others (e.g., short shorts, skirts or dresses, tight fitting clothing, low-cut blouses, halter tops, midriffs) should not be worn in the classroom. Students wearing inappropriate attire may be dismissed from class and/or reported to the Dean's Office for a professionalism violation.

Students attending national, state, or regional conferences or events where they represent the UofSC College of Pharmacy and the pharmacy profession are expected to abide by this policy. Students not adhering to this policy in these settings may be reported to the Dean's Office for a professionalism violation and may lose travel reimbursement from the College of Pharmacy and/or be referred to the Student Policy and Professionalism Committee.

Social Media Policy

The College of Pharmacy recognizes that social networking websites are popular means of communication. Students who use these websites must be aware that posting certain information is illegal. Violations of existing statutes and administrative regulations may expose the offender to criminal and civil liability, and the punishment for violations may include fines and imprisonment. Offenders also may be subject to adverse academic actions up to and including dismissal. Please be advised that the following actions are forbidden (i.e., are considered violations of the College of Pharmacy Student Professionalism Policy):

- You may not discuss the personal health information of other individuals. Removal of an individual's name does not alone constitute proper de-identification of protected health information. Inclusion of data such as age, gender, race, diagnosis, date of evaluation, or type of treatment or the use of a highly specific medical photograph (such as a before/after photograph of a patient having surgery or a photograph of a patient from a medical outreach trip) may still allow the reader to recognize the identity of a specific individual.
- You may not report private (protected) academic information of another student or trainee.
- You may not present yourself as an official representative or spokesperson for the institution.
- You may not access another person's online accounts without his/her permission.
- You may not represent yourself as another person, real or fictitious, or otherwise attempt to obscure your identity as a means to circumvent any prohibitions listed in the Student Professionalism Policy.

In addition to these actions, the College of Pharmacy Student Professionalism Policy includes the following violations relevant to the use of social media:

- knowingly distributing false information, statements, or accusations against another student, preceptor, or faculty/staff member
- using electronic channels of communication to disseminate inappropriate or unprofessional comments regarding peers, preceptors, faculty, staff, patients, or participants in College of Pharmacy projects
- verbal, written or electronic insults to College of Pharmacy administration, faculty, preceptors, staff, students, patients, or participants in College of Pharmacy projects
- threats or acts of physical violence to College of Pharmacy administration, faculty, preceptors, staff, students, patients, or participants in College of Pharmacy projects
- harassment, in any form, of College of Pharmacy administration, faculty, staff, preceptors, students, patients, or participants in College of Pharmacy projects
- violating the confidentiality of a college committee by an appointed student representative serving on that committee
- sharing of passwords for protected sites

Due to the prevalence of and types of information that can be displayed through social media (Facebook™, Twitter™, Instagram™, blogs, etc.) in today's society, the College offers the following social media use guidelines for students.

Avoid any activity on social media sites that could portray you, the College, the faculty and/or preceptors, the University or the pharmacy profession negatively. Some of the strongly discouraged actions include, but are not limited to:

- the unprofessional display of vulgarity through written comments, photos, and/or affiliations
- the unprofessional display of language or photos that indicate discriminatory bias against any individual or group because of age, race, gender, ethnicity, national origin, or sexual orientation
- the unprofessional display of photos or language that condone the irresponsible use of alcohol, substance abuse, or sexual promiscuity
- posting of inflammatory or unprofessional material on another individual's website
- display of any language that degrades or disrespects patients

Those actions may be interpreted as violations of the College of Pharmacy Student Professionalism Policy. Furthermore, per HIPAA regulations, patient privacy must be maintained at all times regardless of the communication medium. This policy should not be construed to impair any constitutionally protected activity, including speech, protest or assembly.

Procedures for Professionalism Policy Violations

Any student, faculty, staff member, or individual associated with the College's academic programs may report a student for lack of professional behavior to the Associate Dean for Student Affairs and Diversity. Under usual circumstances, the incident should have been brought to the student's attention and resolution attempted before reporting the incident to the Associate Dean. Upon receiving a report regarding unprofessional behavior, the Associate Dean for Student Affairs and Diversity will determine the legitimacy of the report in accordance with his/her understanding of professional standards for behavior, the severity of the incident, and the urgency by which it needs to be addressed. Depending on the nature of the behavior, the Associate Dean for Student Affairs and Diversity may act on a single behavioral report or wait to act until he/she receives multiple reports of unprofessional behavior. In cases where the Associate Dean for Student Affairs and Diversity makes the decision to forgo disciplinary action(s), he/she will
inform the student of the complaint of unprofessional behavior and that future complaints may result in disciplinary action. He/she will document each complaint, such that the information remains confidential. If the Associate Dean for Student Affairs and Diversity determines that disciplinary action is warranted, each case will be addressed in the following manner:

The Associate Dean for Student Affairs and Diversity will meet with the student to counsel him/her on the importance of professionalism and strategies to correct the unprofessional behavior. These strategies may include referral to the university student counseling services and adherence to any treatment plan that is recommended. The Associate Dean for Student Affairs and Diversity will also discuss the potential consequences for unprofessional behavior with the student. If a written warning is indicated, the student and Associate Dean for Student Affairs and Diversity will sign and date a Notification of Professionalism Policy Violation acknowledging the student’s behavior and his/her awareness of the potential consequences for similar behavior in the future. This document will be placed in the student’s file.

If the Associate Dean for Student Affairs and Diversity determines that the behavior may warrant a more stringent penalty, he/she will refer the student to the College of Pharmacy Student Policy & Professionalism Committee, where the incident will be discussed further. The Committee will provide disciplinary recommendation(s) to the Senior Associate Dean. These recommended penalties may include but are not limited to a written warning, placement on professional conduct probation, and suspension from the College of Pharmacy for up to one year, or dismissal from the College of Pharmacy. The Senior Associate Dean will then enforce the final penalty.

Professional conduct probation is defined as a designated time during which a student is under an official warning that subsequent violations of the professionalism policy or University rules, regulations, or policies are likely to result in a more severe sanction which may include suspension or dismissal from the program. While on professional conduct probation, a student may be considered to be “not in good standing” and may face specific limitations, which may include but are not limited to:

- ineligibility for College of Pharmacy scholarships
- ineligibility to hold leadership positions in student organizations, class officer positions in the College of Pharmacy, or any university-wide leadership positions
- ineligibility to receive financial support from the College of Pharmacy
- to attend professional organization meetings
- ineligibility for assignment to practice sites considered Specialty Rotations by the Experiential Education Office. Students who are put on professional conduct probation after receiving a specialty rotation assignment may be removed from the rotation.

If the Student Policy and Professionalism Committee recommends suspension, the student may be suspended from the College of Pharmacy for up to one year. The same penalties for professional conduct probation apply to a student who is suspended for academic reasons. In addition, further issues with unprofessional behavior may result in dismissal from the College of Pharmacy. If the committee recommends dismissal, the student may be dismissed immediately from the College of Pharmacy.

Students may appeal the decision of the Student Policy and Professionalism Committee to suspend or dismiss the student to the Senior Associate Dean. A final appeal can be made to the Dean of the College of Pharmacy. The Dean’s decision is final. Appeals must be received in writing within 30 days of the notification of the sanction. In some instances, policies of the university may override or carry more stringent penalties based on the violation than the policies stated in this document. University policies will be enforced in these cases.

**Eligibility for Federal Financial Aid & Scholarships**

Students found in violation of the Arrest and/or Chemical Impairment policy may jeopardize their ability to receive federal financial aid for which they might otherwise be eligible. In addition, students found in violation of any College of Pharmacy policies may be prohibited from receiving a scholarship from the College of Pharmacy.

**Student Grievance Policies**

**Individual Problems**

1. When a student is experiencing a problem with any member of the college’s faculty or administration, the following process should be carried out. Prior to each step in the process, the student should seek advice from his or her class faculty advisor.

2. Make an appointment with the individual with whom the problem exists, explain the problem, and try to resolve it.

3. If the problem cannot be resolved directly, the student should then contact the individual’s supervisor.

4. If the problem is still unresolved, the student should make an appointment to meet with the Senior Associate Dean. The Senior Associate Dean will review the complaint and intervene if college or university policies have been violated. The Senior Associate Dean will maintain a file of all such reported grievances and their outcomes.

5. Situations that have not been resolved by the Senior Associate Dean will be referred to the College of Pharmacy Grievance Committee for final review and action.

**Class Problems**

When a class feels that there is a problem affecting the class as a whole, the following process should be carried out. Prior to each step in the process, the class president should seek advice from the class faculty advisor.

1. The president should announce and hold a class meeting. Identify the problem(s), clearly reduce them to writing, and ensure that the class is in agreement by simple majority vote. If so, the class president should forward this written statement to the individual(s) involved and request a meeting. If the class president is unsure of whom to contact, he/she should consult the Associate Dean for Student Affairs and Diversity.

2. If a satisfactory understanding or solution is not obtained at this level, the class president should then contact the individual’s supervisor.

3. If the problem is still unresolved, the class president should make an appointment to meet with the Senior Associate Dean. The Senior Associate Dean will review the complaint and intervene if college or university policies have been violated. The Senior Associate Dean will maintain a file of all such reported grievances and their outcomes.

4. Situations that have not been resolved by the Senior Associate Dean will be referred to the College of Pharmacy Grievance Committee for final review and action.
Student Services

Student Services Communication

Incoming P1 Student Onboarding Process
Incoming P1 students will receive a series of detailed modules, emails, and other communications from the UofSC COP Student Affairs/Admissions Offices regarding University of South Carolina processes, SC Board of Pharmacy documents, College of Pharmacy computer requirement, College of Pharmacy immunization requirements and communication methods going forward, including the College website, that students need to be aware of prior to P1 Orientation. Failure to complete these items in entirety may result in referral to the Student Policy & Professionalism Committee and/or rescinding of acceptance into the Pharm.D. program.

P1 Orientation
All incoming P1 students will attend a required orientation that will provide students with University of South Carolina resources/offices, College of Pharmacy student processes and longitudinal co-curricular requirements, engagement with faculty and current pharmacy students, technology resources, the College of Pharmacy curriculum, and optional academic tracks/combination degrees/Kennedy Pharmacy Innovation Center opportunities. Failure to attend all sessions of P1 Orientation in their entirety and may result in referral to the Student Policy & Professionalism Committee and/or rescinding of acceptance into the Pharm.D. program.

Annual College Updates Presentation for Returning Students
Returning students are required to attend an annual College Updates presentation that addresses any new, revised, or reemphasized policies and procedures for College of Pharmacy students, reminders of cocurricular requirements, important dates for the academic year, and any additional information from Administrators or Faculty.

Bi-Annual Registration Instruction Email
Prior to the registration period, students will receive an extensive email with step-by-step instructions to register for classes, including tuition information, financial aid information, and elective offerings and details. This information is then housed on the internal College intranet.

Course Registration
Registration for College of Pharmacy students occurs through the University of South Carolina Self Service Carolina system. All students will have access to this system once appropriate documents are submitted to the University, including but not limited to: Citizenship Form, Proof of Legal Residency Form, and Immunization Documentation. For more information, refer to http://www.my.sc.edu.

Tuition and Payments
The College of Pharmacy utilizes the University of South Carolina Bursar’s Office for the assessment and collection of tuition and fees. For more information, contact (803) 777-4233.

Financial Aid
The College of Pharmacy utilizes the University of South Carolina Office of Student Financial Aid & Scholarships for all processes relating to scholarship awards and loans. Pharmacy students are considered “professional” students for the purpose of all loan applications. For more information, contact (803) 777-8134.

Health Insurance
Students at UofSC-Columbia are required to show proof of health insurance as a condition of enrollment. Students must either enroll in the student Health Insurance Plan or waive the plan by showing proof of their own health insurance.

Questions about the Student Health Insurance Plan benefits, the waiver process or waiver status are addressed on the “Required Health Insurance” section of the Student Health Services website (https://sc.edu/about/offices_and_divisions/student_health_services/).

Student Health Services
The College of Pharmacy utilizes the University of South Carolina Student Health Services to provide services such as Allergy & Immunization Clinic, Physical Therapy, Nutritionist, Psychiatric Services, and General Medicine. The College of Pharmacy does not mandate the provider of health services. For more information on general Student Health Services contact (803) 777-3175, Counseling Services contact (803) 777-5223, and Psychiatric Services contact (803) 777-1833.

Student Disability Resource Center
The College of Pharmacy utilizes the University of South Carolina Student Disability Resource Center to assess and provide necessary accommodations for learning, physical, and psychiatric disabilities. For more information, contact (803) 777-6142.

Division of Law Enforcement and Safety
The College of Pharmacy utilizes the University of South Carolina Division of Law Enforcement and Safety to provide crime prevention and safety resources regarding theft, dating violence, behavioral intervention, self-defense workshops, etc. For more information, contact (803) 777-4215.

Library Services
The College of Pharmacy utilizes the University of South Carolina Thomas Cooper Library and online resources to provide services such as retrieving hardcopy and electronic literature and tertiary resources, borrowing electronic devices, reserving study rooms and lockers, providing research consultations, and allowing for an extensive study space for students. For more information, contact (803) 777-3142.

Student Success Center
The College of Pharmacy utilizes the Student Success Center as a supplement for academic support services, including study skills and financial awareness. For more information, contact (803) 777-1000. College of Pharmacy students are encouraged to communicate/meet with individual Faculty members, Course Coordinators, Administrators, and attend College tutoring services as needed for Pharm.D. course assistance.

Parking
Parking on campus is available in specified University of South Carolina areas to all students whose vehicle displays a valid parking permit. Permits and information regarding parking locations are available through Parking Services. For more information, contact (803) 777-5160.

Housing
The College of Pharmacy does not specify the location that students must reside. The University of South Carolina University Housing and
Residential Services provides limited on campus apartments and married student housing. Several public/private and apartment options are located in close proximity to the College of Pharmacy. For more information, contact (803) 777-4283.

**Carolina Card**

Students attending the College of Pharmacy are required to obtain a Carolina Card through the University of South Carolina that allows for access to College of Pharmacy study areas after hours, checking out library materials, using fitness facilities, obtaining athletic event tickets, purchasing meal plans, and receiving discounts at various local on and off campus retail and restaurant locations. There is no cost to obtain an initial Carolina Card. For more information, contact (803) 777-1708.
UOFSC LANCASTER

Welcome to the UofSC Lancaster Academic Bulletin

The UofSC Lancaster Academic Bulletin is the official document of record concerning academic programs and regulations.

This bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina. The University reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Bulletin Updates and Corrections

Noncurricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the University Registrar (bulletin@sc.edu) on the Columbia Campus. Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletin.

Printing Portions of the Online Bulletins

The academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

Additional Information

Registration at the University of South Carolina assumes the students' acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement.

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost on the Columbia campus.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton St.
Columbia, South Carolina
telephone 803-777-3854

The University

UofSC System Mission Statement

Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The primary mission of the University of South Carolina System is the education of the state's diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate's, bachelor's, master's, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

UofSC Lancaster Mission Statement

Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The Lancaster regional Palmetto College campus is a branch campus of the University of South Carolina Columbia. Lancaster has as its mission to provide higher education and intellectual leadership to its service area. At the heart of this mission is a teaching faculty of high quality dedicated to excellence in instruction, scholarship, public and professional service, and creative endeavor which enrich the classroom experience. The Lancaster regional Palmetto College campus offers a varied curriculum grounded in the liberal arts and focused on preparing students to continue their education in the University of South Carolina System and throughout life.

The Lancaster regional Palmetto College campus recruits students prepared to succeed in completing a baccalaureate-level education. While the institution does not offer remedial instruction, it is nonetheless able to admit most students who apply due to the close working relationship between students and faculty. The Lancaster regional Palmetto College campus was established to encourage higher education in the counties of Chester, Chesterfield, Fairfield, Kershaw, Lancaster, and York. The original design of the institution incorporated a flexibility that has allowed
changes in institutional capability with increasing educational demands of constituents.

Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, the institution awards the Associate in Arts and Associate in Science degrees and provides for the completion of selected bachelor’s degrees on campus through cooperative agreements and delivery structures with other University of South Carolina System institutions. The Lancaster regional Palmetto College campus also provides general education and upper division coursework applicable to baccalaureate degree programs offered through colleges and universities nationwide. In addition to academic coursework, the mission of the campus includes noncredit courses, seminars, and workshops made available to the community for cultural enrichment and professional development.

The traditions of cultural diversity and freedom of thought are valued at the Lancaster regional Palmetto College campus. In a learning environment that develops respect for racial, geographical, intellectual, and economic diversity and an awareness of individual, societal, and global responsibilities, Lancaster promotes courses, activities, and attitudes which influence the life of the mind in men and women and instills in them a thirst to continue learning throughout life.

The Lancaster regional Palmetto College campus emphasizes the development of the whole person and especially seeks to foster in students the disciplines essential to an educated citizenry. Core competencies, including the ability to communicate through effective writing and articulate speech; computational and quantitative mastery; creative and critical thinking; and the duties of citizenship are strategically integrated within the curriculum. Classroom experiences, student activities, and physical education programs also provide opportunities for cultural enrichment, leadership development, intellectual growth and interpersonal relationships, all contributing to a sense of self-reliance and a joy of learning.

**Accreditation**

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master’s, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses’ accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

**UofSC System Officers**

Robert L. “Bob” Caslen Jr., President
William F. “Bill” Tate IV, Executive Vice President for Academic Affairs and Provost
Ed Walton, Senior Vice President for Administration
Mark Bieger, Chief of Staff
Caroline Agardy, Vice President for Human Resources
Doug Foster, Vice President for Information Technology and Chief Information Officer
Prakash Nagarkatti, Vice President for Research
Dennis Pruitt, Vice President for Student Affairs and Vice Provost for Academic Support
Larry Thomas, Vice President for Communications
Will Elliott, Interim Chief Development Officer

Ray Tanner, Director of Athletics
Julian R. Williams, Vice President for Diversity, Equity and Inclusion
Bill Kirkland, Executive Director of the Office of Innovation, Partnership, and Economic Engagement
Walter “Terry” Parham, General Counsel and Executive Director of Compliance Programs

**Lancaster County Commission for Higher Education**

Charles A. Bundy, Chair
Thomas T. Barnes Sr.
Lisa T. Bridges
Bruce A. Brumfield
Stanley D. Johnson
R. Gene Moore, Superintendent, Lancaster County Schools, ex officio
John Catalano, Dean, UofSC Lancaster, ex officio

**UofSC Lancaster Administration**

John Catalano, Ph.D., Dean
M. Ron Cox Jr., Ph.D., Associate Dean for Academic and Student Affairs
Walter P. Collins, III, Ph.D., Acting Assistant Dean of Students
Thelathia Barnes-Bailey, M.P.A., Director of TRIO Programs
Kenneth Cole, B.A., Director of Financial Aid
Shana Dry, M.B.A., Director of Public Information
Shari L. Eliades, M.L., Head Librarian
Blake Faulkenberry, B.S., Director of Information Resource Management
Karen Faile, M.Ed., Director of Enrollment Management
Laura Humphrey, M.S., Director of Student Life
Sarah Hunt, Ph.D., Director of Gregory Health and Wellness Center
W. Ralph Garris, M.A., Director of Development and Criminal Justice
Lorene B. Harris, M.L., Associate Librarian
Paul Johnson, B.B.A., C.P.A., Business Manager
Butch Lucas, Director of Custodial Services
Tracey Mobley, M.A., Human Resources Specialist
William F. Riner Jr., Ph.D., Director of Health Services
John Rutledge, Ph.D., Director of Law Enforcement and Security

**UofSC Lancaster Academic Support Staff**

Jimmy Abbott, M.A., Physical Therapist, Dr. W.L. McDow Physical Therapy Clinic
Cosonja Allen, B.A., Administrative Assistant, Opportunity Scholars Program
Mark Ammons, BAIS, Business Manager for TRIO Programs
Lynn V. Baker, R.N., Health Fitness Clinic Nurse
Max Bonek, B.S., Academic Specialist, Opportunity Scholars Program
Ross Bryson, B.S., Information Resource Coordinator, Information Technology
Terri Camp, BAIS, Clerical Specialist for TRIO Programs
Avis Clyburn, A.S., Administrative Assistant, Human Resources Office
Tracey Craig, M.A., Disabilities Coordinator
Kent Deese, M.P.H., Fitness Program Coordinator, Gregory Health and Wellness Center
Margaret Dixon, B.A., Administrative Assistant, Counseling Center
Tammy Dove, Administrative Specialist, Business Office
Rose-Ellen Eckberg, M.L.A., Office Manager, Medford Library
Pam Ellis, A.S., Administrative Specialist, Academic and Student Affairs
Amanda English, M.Ed., Records Officer, Records Office
Dianne Evans, M.S., S.S.P., School Psychologist
Karen Greer, A.S., Administrative Assistant, Development Office
Antonio Mackey, B.A., Career/Cultural Specialist, Upward Bound Program
Trina McFadden, A.S., Administrative Coordinator, Dean’s Office
Cathy McGriff, A.S., Administrative Assistant, Upward Bound Program
Thomas Monroe, B.S., Academic Specialist, Upward Bound Program
Caleb Morrison, B.S., Assistant Business Manager, Business Office
Lori Moseley, MSN, Nurse Practitioner, Diabetes Education Clinic
Dia Robinson, B.A., Coordinator, GEAR-UP Program
Theron Robinson, B.S., Fiscal Technician, Business Office
Kevin Russell, B.S., Fiscal Technician, Business Office
Alexis Sanders, ABD, Staff Therapist
Anne Small, B.S., Aquatics Director, Gregory Health and Wellness Center
Renee Steele, A.S., Accounting Technician, Business Office
Kelly Steen, B.S., Program Assistant, Gregory Health and Wellness Center
Megan Stevenson, M.Ed., Student Services Program Coordinator, Admissions
Rosalind Stevenson, B.S., Financial Aid Counselor, Financial Aid
Sharon Stratford, Fiscal Technician, Carole Ray Dowling Health Services Center
Brandi Thompson, B.A., Financial Aid Counselor, Financial Aid
Amanda Truesdale, B.S., Office Manager, Gregory Health and Wellness Center
Susan Vinson, B.A., Student Services Program Coordinator, Admissions
Matherline Williamson, BAIS, Career/Cultural Specialist, Opportunity Scholars Program

UofSC Lancaster Faculty
Shemsi Alhaddad, Assistant Professor, Mathematics, Ph.D., University of North Texas
John R. Arnold, Dean Emeritus and Professor, History, M.A., Marshall University
Lynn Baker, Lecturer, Physical Education, University 101, BSN, University of Maryland
Thelathia Barnes-Bailey, Lecturer, Political Science, M.P.A., Texas Southern University
Peter N. Barry, Distinguished Professor Emeritus, History, Ph.D., Wayne State University
David Blackwell, Lecturer, Business Law, B.A., Wofford College, J.D., University of South Carolina
Richard R. Blaskowitz, Lecturer, Psychology, M.Ed., Winthrop University
Michael Bohonak, Lecturer, University 101, Physical Education, M.S., University of Tennessee, Martin
Noni Bohonak, Associate Professor, Computer Science, Ph.D., Nova Southeastern University
Max Bonek, Lecturer, University 101, M.S., University of Wisconsin
James Bradley, Lecturer, Business Administration, C. Phil., University of North Carolina
Dwayne C. Brown, Instructor, Mathematics, Ph.D., University of South Carolina
Christopher Bundrick, Assistant Professor, English, Ph.D., University of Mississippi
Robert Bundy, Instructor, Biology and Chemistry, Lab Manager, B.S., University of South Carolina, M.Ed., Southern Wesleyan University
W. Brent Burgin, Instructor/Archivist, M.L.I.S., University of South Carolina
Fernanda Burke, Assistant Professor, Biology and Chemistry, Ph.D., University of Michigan
Steven Campbell, Assistant Professor, Political Science, Ph.D., University of South Carolina
John Catalano, Dean, Professor, Philosophy, Ph.D., University of South Carolina
Courtney Catledge, Instructor, Nursing, Doctor of Nursing Practice, University of South Carolina
Brian Clark, Lecturer, Physical Education, M.S., University of Memphis
Mark Coe, Assistant Professor, Clinical Psychology, Ph.D., DePaul University
Robert H. Collins, Instructor, Economics, M.A., University of South Carolina
Walter P. Collins, III, Associate Professor, French and English, Ph.D., University of South Carolina
Kimberly K. Covington, Instructor, English, M.A., Winthrop University, M.Ed., Bob Jones University
M. Ron Cox Jr., Associate Professor, History, Ph.D., University of South Carolina
Tracey Craig, Lecturer, Clinical Psychology, M.A., Western Carolina University
Stephen Criswell, Assistant Professor, English, Ph.D., University of Louisiana
Arthur J. Currence, Distinguished Professor Emeritus, Mathematics, Ph.D., University of South Carolina
Nathalie Davaut, Instructor, Foreign Languages, Ph.D., University of Missouri-Columbia
Kent Deese, Lecturer, Physical Education, M.P.H., University of South Carolina
David Donegan, Jr., Lecturer, Electrical Engineering, M.S., M.B.A., Clarkson University
Brenda Dry, Lecturer, Business, M.A., University of South Carolina
Shana Dry, Lecturer, University 101, M.B.A., Winthrop University
William Dysard, Lecturer, Religious Studies, S.T.M., Yale University
Shari Eliades, Librarian, M.L., University of South Carolina
Stan Emanuel, Instructor, Business Administration, M.B.A., University of South Carolina
Amanda English, Lecturer, University 101, M.Ed., University of South Carolina
Dianne T. Evans, Professor Emerita/Counselor, Psychology, S.S.P., M.S., Winthrop University
Danny Faulkner, Professor, Astronomy/Physics, Ph.D., Indiana University
W. Ralph Garris, Professor Emeritus, Criminal Justice, M.A., University of South Carolina
Donna Gillespie, Lecturer, Business Education, M.S., Winthrop University
Annette Golonka, Assistant Professor, Biology, Ph.D., Duke University
Mark Grier, Lecturer, Business Law, J.D., University of South Carolina
Nancy Hazam, Professor Emerita, Anthropology, Ph.D., Southern Methodist University
A. Kate Holland, Assistant Professor, Psychology, Ph.D., Virginia Polytechnic Institute and State University
Timothy Holland-Davis, Lecturer, Math, M.M., University of South Carolina
Stacy Holloway, Assistant Professor, Theatre and Speech, M.F.A., Rhode Island College
Lisa Hammond, Professor, English, Ph.D., University of Alabama
Lorene B. Harris, Librarian, M.L., University of South Carolina
Darris Hassell, Instructor, Spanish, M.A., University of South Carolina
Claudia Heinemann-Priest, Instructor, English, M.A., University of South Carolina, M.L.A., Winthrop University
Gerald Hensley, Lecturer, Physical Education, Ph.D., Florida State University
Jason Holt, Assistant Professor, Mathematics, Ph.D., University of North Carolina Charlotte
Lauren Humphrey, Lecturer, University 101, M.S., University of Tennessee
Sarah Hunt, Assistant Professor, Exercise Science, Ph.D., University of Pittsburgh
Catherine Jackson, Instructor, Mathematics, M.M., University of South Carolina
Bettie Johnson, Assistant Professor, Chemistry, Ph.D., Georgia Institute of Technology
Denise Jordan, Lecturer, Business Education, M.A.T., Winthrop University
Randy Jordan, Lecturer, Physical Education, B.S. Coastal Carolina
Christopher Judge, Instructor, Anthropology/Public Service Archeology, M.A., University of South Carolina
Erin Moon-Kelly, Lecturer, Music, M.M., Converse College
Howard Kingkade, Associate Professor, Theater, M.F.A., English, Ph.D., University of South Carolina
David Knight, Lecturer, Journalism, M.A.T., University of South Carolina
Judy Langston, Lecturer, Spanish, M.A., Winthrop University
Keli Lathan, Lecturer, Physical Education, B.S., University of South Carolina
Nicholas Lawrence, Assistant Professor, English, Ph.D., Texas A & M University
V. Pernell Lewis, Instructor, Zoology, Ph.D., North Carolina State University
Dianne Mahaffee, Lecturer, Art, M.A.E., Winthrop University
Lynnette Martek, Instructor, Geology, M.S., Emporia State University
Daniel Merle, Lecturer, Business Administration, M.B.A., Ashland University
Tracey A. Mobley, Lecturer, University 101, M.A., Webster University
Govan Myers, III, Lecturer, Business Law, B.A., Wofford College, J.D., St. Thomas Law School
Bruce G. Nims, Professor, English, Ph.D., University of Florida
Thomas Noonan, Lecturer, Physics, Ph.D., California Institute of Technology
Teresa Ormand, Lecturer, Social Work, M.S.W., University of South Carolina
Phillip T. Parker, Instructor, Business Administration/Finance, CPA, Master of Accountancy, University of South Carolina
Suzanne Penuel, Assistant Professor, English, Ph.D., University of Texas at Austin
Theresa Polenski, Instructor, Educational/Developmental Psychology, Ph.D., University of Pittsburgh
Babette Protz, Lecturer, Criminal Justice, M.S., University of North Carolina Charlotte
Melissa Reen, Lecturer, English, M.A., University of South Carolina
Kim Richardson, Assistant Professor, History, Ph.D., Texas Tech University
William F. Riner Jr., Distinguished Professor Emeritus, Exercise Science, Ph.D., University of Illinois
Darlene Roberts, Professor Emerita, Business Education, M.A.T., Winthrop University
David Roberts, Assistant Professor, Philosophy, Ph.D., Southern Illinois University at Carbondale
Freddie Robinson, Lecturer, Physical Education
Bertha Maxwell Rodkey, Lecturer, African American Studies, Ph.D., Union Graduate School, Cincinnati
John E. Rutledge, Instructor, Criminal Justice, Ph.D., Capella University
Alexis Sanders, Instructor, Psychology, ABD, University of Cincinnati
Todd Scarlatt, Associate Professor, Zoology, Ph.D., Washington State University
Ann Scott, Instructor, Nursing, M.S.N., University of Virginia
Mike Sherrill, Lecturer, Finance, M.B.A., University of South Carolina
Anne H. Small, Lecturer, Physical Education, B.S., University of South Carolina
Janie Smith, Lecturer, Equestrian
Kelly Steen, Lecturer, Physical Education, B.S., College of Charleston
Keta Stogner, Lecturer, Business Education, M.A.T., Winthrop University
Brittany Taylor, Instructor, Art, MFA, Union Institute and University
Wayne D. Thurman, Professor Emeritus, Business Administration, M.A., M.B.A., University of South Carolina
Richard Van Hall, Professor, History, Ph.D., University of South Carolina
L. Brooks Walker, Lecturer, Music, Ph.D., Erskine Theological Seminary
Rick Walters, Lecturer, Physical Education, B.S., Coastal Carolina
Suzanne Williams, Instructor, Nursing, M.S.N., University of Phoenix, M.Ed., University of South Carolina
Tania Wolochwianski, Instructor, Foreign Languages, M.A., University of North Carolina Charlotte
Karen Worthy, Instructor, Nursing, M.S.N., University of South Carolina, M.P.H., University of South Carolina
Andy Yingst, Assistant Professor, Mathematics, Ph.D., University of North Texas

Programs and Services

To accomplish its mission, UofSC Lancaster provides the following programs and services and will develop additional programs to serve the growing need for university education in the region:

- at least the first two years of most University of South Carolina baccalaureate programs
- Opportunity Scholars Program for first-generation college students
- the Associate of Arts and Associate of Science degrees and career-oriented associate's degree programs in the fields of business, criminal justice, and nursing
- Bachelor of Arts in Liberal Studies and Bachelor of Arts in Organizational Leadership offered through the Palmetto Programs and Bachelor of Science in Nursing offered through the College of Nursing, UofSC Columbia
- live and televised graduate courses in a number of areas, including business administration, education, and other selected programs of study
- academic advisement, career and personal counseling, an academic success center, and extracurricular activities
- a library collection including a government documents division and services to support academic offerings and to serve the community
- extensive health-fitness programs and recreational offerings at USC Lancaster's Gregory Health and Wellness Center
- continuing education and public service through health-related activities, lectures, cultural events, conferences, workshops, short courses, televised instruction, and faculty assistance
- cross-registration opportunities at member institutions of the Charlotte Area Educational Consortium
- Upward Bound opportunities for area high-school students.

In serving the region, UofSC Lancaster is also committed to providing a number of special opportunities for students and members of the community.

- For academically gifted and talented students the campus provides academic scholarships, a college honors program, and college-credit courses at selected area high schools.
- For underprepared students who wish to pursue university study, tutoring through the Academic Success Center is provided.

The University of South Carolina Lancaster is dedicated to providing a student-centered university education that will contribute to the enlightenment and productivity of citizens in our region.

Physical Facilities

UofSC Lancaster currently consists of seven modern buildings that house classrooms, faculty and administrative offices, laboratories, auditoriums, an academic success center, computer labs, extensive athletic facilities,
a campus bookstore, a library with online database research capabilities and a government documents collection.

**Hubbard Hall**
Opened in 1965, Hubbard Hall originally housed the entire campus operation. It is now the home of several administrative offices, a gallery, the computer labs, nursing labs, an art lab, the public relations office, and faculty offices.

**Starr Hall**
The second building constructed, Starr Hall, contains a student center, the Office of Admissions and Records, the Office of Financial Aid and the Business Office, the Human Resources Office, the Office of Disability Services, a bookstore and campus shop, and faculty offices.

**Medford Library**
Medford Library houses the print and audiovisual collections of UofSC Lancaster and has provided space for classrooms, the Academic Success Center, multimedia lab, TRIO Programs, and academic offices.

**Gregory Health and Wellness Center**
The Gregory Health and Wellness Center provides students access to a state-of-the-art fitness facility. The center contains a gymnasium that can accommodate basketball and volleyball, an indoor walking/jogging track, a 25-meter pool, racquetball/handball courts, and a free-weight room. Also within the center is the Khoury Health Fitness Area, containing Nautilus equipment for resistance training as well as recumbent and upright bikes, elliptical trainers, step trainers, and treadmills for cardiovascular training. The cardiovascular area is equipped with CARDIOTHEATER audio/video service. Exercise physiologists are available to help students establish exercise programs.

Adjacent to the center is the J.P. Richards Recreation Complex, providing tennis courts.

**James Bradley Arts and Sciences Building**
The James Bradley Arts and Sciences Building, includes a 400-seat auditorium, a banquet/conference area, classrooms, and science and art labs. Several multimedia classrooms are also available in the facility.

**Carole Ray Dowling Health Services Center**
The newest addition to the campus, the Carole Ray Dowling Health Services Center, is located across the street from the Gregory Health and Wellness Center. Health Services consists of the Cardiac Rehabilitation, Diabetes Education, and Physical Therapy/Speech Therapy Clinics. The Community Room in the Carole Ray Dowling Center seats 100 people at maximum capacity. The Center also houses the office of the director of Health Services and an area used by students for seminars and research.

**Institutional Services**
Various campus offices and centers provide a full range of academic, personal, and recreational opportunities designed to meet the needs of both current and future students.

**Medford Library**
The University of South Carolina Lancaster has recently completed the renovation and expansion of the Medford Library (http://usclancaster.sc.edu/library/), which has served the campus since 1974. The renovation/expansion project has more than doubled the facility's size and maximized the use of technology to enhance library research. Some features of the new library include additional square footage for collections, technology, and seating; a new computer lab that also houses library instruction and academic support services; a quiet reading area; increased points of Internet access; and laptop ports.

Medford Library serves the students and faculty of UofSC Lancaster and is also open to the public (high-school age and above). The online USCAN Web library catalog serves as an index to the entire UofSC libraries’ collections, including books, government publications, and periodical holdings. In addition, the Medford Library provides access to many Web-based databases, including InfoTrac (Expanded Academic Index, Custom Newspapers [New York Times, Greenville News, Charleston Post & Courier], General Reference Center, Health Reference Center, Health & Wellness Resource Center, Business and Company Databases, Legaltrack, Onefile), FirstSearch (Worldcat, ArticleFirst, MLA, WilsonSelectPlus, Electronic Collections Online, ERIC, GPO), MEDLINE, PapersFirst, Proceedings, Union Lists, World Almanac, online encyclopedias, Biography Resource Center, SIRS (Social Issues Resources), Global Books in Print, JSTOR, Science Direct, Oxford English Dictionary, Web of Science, and Literature Resource Center and America: History and Life, Historical Abstracts. Some of these databases are provided through DISCUS state library funding (Digital Information for South Carolina Users). Many of these databases can be accessed from home or office using a valid library charge ID (bar code) number or the appropriate user name and password (available at the library). Most library materials circulate for a loan period of three weeks; fines of 25 cents per day per book apply to overdue materials. Reference materials, periodicals, and audiovisual media may be used only in the library. A coin-operated photocopier is available. Any patron needing a book, government publication, or article for scholarly purposes that Medford Library does not own may request it through the library's online Interlibrary Loan service, known as ILL Express!

**Student Center**
Located in Starr Hall, the student lounge provides a comfortable setting for relaxation between classes. Vending machine products are available. Pool tables, cable television, and table tennis provide diversion and friendly competition.

**The Student Government Office**
Located in Starr Hall, the Student Government Association’s (SGA) elected and appointed members meet on a regular basis to discuss student issues. SGA members also serve on a number of University committees.

**Bookstore and Campus Shop**
In addition to offering new and used textbooks, the UofSC Campus Shop provides many other services. Gamecock and UofSC Lancaster shirts, jerseys, jackets, decals, school supplies, and many other items are available. Dissecting kits, laboratory aprons, and other academic items are offered along with a wide array of gift items in all price ranges.

**Counseling Services**
Counselors at UofSC Lancaster provide academic, career, and personal counseling. A variety of services are offered:

- assessment of and response to freshman needs
- evaluation and selection of academic program(s)
- evaluation and selection of career(s)
- evaluation of and response to academic and personal concerns
- computerized assessment of interests, personality, values.
- computerized career information
• confidential and individualized appointments.
• assessment of and response to academic needs of students with disabilities

Disability Services
The Office of Disability Services (ODS) operates under the provisions of Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (ADA). Any student who prefers to be registered as a student with a disability must be registered with the Office of Disability Services. Disability status is not retroactive; therefore the University does not recognize an individual as someone with a disability during a time period in which he/she was not registered with the Office of Disability Services. Because disability status is not retroactive, it is important for any disabled student who prefers to register as a student with a disability to register for these services prior to his/her first semester of attendance. Required documentation is necessary for registration and accommodations, and the timeliness of registration is dependent upon the speed at which Disability Services is provided with the required documentation. Students can only register with disability services after they are admitted to the University.

The Office of Disability Services will make every effort to provide reasonable accommodations for qualified students with disabilities; however, registration as a student with a disability does not automatically guarantee accommodations. Accommodations are approved with appropriate documentation on a case by case basis.

In order to register as a student with a disability and apply for accommodations, students must first complete the "UofSC Lancaster Disability Services Office Request for Services" form. Students must also provide documentation of their disability to the Office of Disability Services. Documentation requirements are specific to the disability, but in general documentation must be from a physician, licensed psychologist, or other person(s) licensed to make the appropriate diagnosis. Guidelines for documentation are provided by the ODS. These guidelines are used to determine whether a student is eligible to register as a student with a disability and also to determine what accommodations, if any, will be made based on the disability and its impact on the student's major life functions. Documentation requirements, as well as the Online Disability Services Request for Services form, can be accessed at the Disability Services page on UofSC Lancaster's website. In order to ensure that you obtain the specific documentation required, the Office of Disability Services recommends that you print the online guidelines and present them to the qualified professional providing your documentation. Students who have accessibility concerns with the online registration links should contact the Office of Disability Services at 313-7448 or visit Starr Hall 125a for assistance. Students may also e-mail the office at lancods@mailbox.sc.edu.

For a complete list of policies regarding disability services at UofSC Lancaster, you may refer to the Disability Services website (http://usclancaster.sc.edu/academics/Disability.pdf).

Laboratories
Science and engineering majors will find the latest equipment at the Lancaster campus. The campus has well-equipped astronomy, biology, chemistry, and physics labs. Equipment includes a double beam recording U.V.-visible spectrophotometer, dual column gas chromatograph, Column chromatography apparatus with fraction collector, double-beam infrared spectro photometer, preparative polyacrylamide gel electrophoresis, analytical polyacrylamide gel electrophoresis, cellulose acetate strip electrophoresis, high-pressure liquid chromatography apparatus, fluorimeter, Warburg respirometer, polarimeter, refrigerated superspeed centrifuge polarimeter, refractometer, freeze drying apparatus, sonic dismembrator, Orion ion meter, Wild M-20 research microscope (equipped for bright field, dark field, phase contrast, immuno fluorescence, and photomicrography), helium-neon gas laser, 10-inch Newtonian reflecting telescope, Millikan oil droplet apparatus, and E/M apparatus. General chemistry labs are taught using the Vernier Lab Pro and TI 83-plus calculators.

Academic Centers
The Success Center offers special tutoring and self-study services in a number of disciplines for all students who wish to improve their academic performance. Computer facilities are available for UofSC Lancaster students outside of regular class meetings. Writing assistants in the Writing Center are available to help students with their papers.

Special Opportunities
Honors Program
The UofSC Lancaster honors program was created to provide an enrichment opportunity for students who have potential for superior academic performance and who seek added challenge and scope in their studies. The honors program emerges out of our commitment to academic excellence and a belief that quality education must center on helping students achieve their full potential. The honors program presents an opportunity for outstanding students to obtain challenging and stimulating interdisciplinary course work in a supportive academic environment.

Aside from the obvious privileges of a unique educational experience, certain other advantages are offered. The director of the honors program cooperates with the director of financial aid to assist in obtaining a wide variety of scholarships and financial aid for incoming honors students. Honors students may serve on the Honors Council, the administrative body of the program. Additionally, honors program participants will be recognized by special regalia at commencement.

Eligibility: SAT of at least 1000 and high-school GPA of 3.00 or top 10 percent. Students who do not meet these criteria, but believe that they may have the motivation and self-discipline to succeed, are invited to apply, and the honors director will decide on a case-by-case basis. Honors participants must take at least two honors courses each semester, for a total of four semesters, and have a cumulative GPA of 3.00 to receive special recognition at commencement.

Academic Support and Student Services Program
This program offers a comprehensive approach designed to meet the needs of traditional and nontraditional students. The UofSC Lancaster program provides instruction in the Academic Success Center in such areas as English, mathematics, reading, and study skills. This instruction is combined with academic, career, and personal counseling. Students who have completed the program have experienced significant improvement in many aspects of academic and personal growth. Our success in this area compares most favorably with postsecondary institutions throughout the United States.

Evening Program
For the benefit of those whose schedules make morning attendance impossible or impractical, UofSC Lancaster offers numerous courses in the late afternoon and evening. Some 16-week courses are offered in those academic areas where skill development requires substantial time and practice. All other courses are offered as part of the two eight-week
sessions offered every semester. Most eight-week classes run from 5:30 to 8 p.m. or from 8:15 to 10:45 p.m. two evenings a week. Sixteen-week evening classes follow the same format as day sections.

**Off-Campus Classes**

USC Lancaster High School Dual Enrollment Program offers two dual-credit programs taught on-site in high schools. The first is a cooperative effort between UofSC Lancaster professors and high school teachers to offer courses which are customized for each school with rigorous emphasis on quality control. In the second program, faculty members travel from the Lancaster campus or may come from the communities where the courses are taught to deliver the course. These programs are based on instructor availability and are conducted in strict compliance with UofSC guidelines.

**Charlotte Area Educational Consortium (CAEC)**

UofSC Lancaster participates in the Charlotte Area Educational Consortium, which includes 24 colleges and universities in the Charlotte area. Under this consortium, a full-time undergraduate student at UofSC Lancaster may be allowed to enroll in an additional course on a space-available basis at a member school at no additional academic fee charge.

Participating institutions are Belmont Abbey College, Cabarrus College of Health Services, Carolinas College of Health Sciences, Catawba College, Catawba Valley Community College, Central Piedmont Community College, Cleveland Community College, Davidson College, Gardner-Webb University, Gaston College, Gordon-Conwell Theological Seminary-Charlotte, Johnson C. Smith University, Lenoir-Rhyne College, Livingstone College, Mitchell Community College, Pfeiffer University, Queens University of Charlotte, South Piedmont Community College, Stanly Community College, University of North Carolina at Charlotte, University of South Carolina Lancaster, Wingate University, Winthrop University, and York Technical College. Qualified students may also participate in the following program through CAEC:

**Air Force ROTC Program**

To prepare themselves to serve as commissioned officers in the Air Force, students may participate in the Air Force Reserve Officer Training Corps (ROTC) offered by UNC Charlotte Department of Aerospace Studies.

Special permission is granted to qualified students to participate in the consortium program with the advance approval of the academic advisor, academic dean, and registrar. Additional information and forms are available in the Office of Admissions and Records, Starr Hall.

**Independent Learning by Correspondence**

Independent learning courses are designed for students who are unable to attend classes on campus. Teachers and persons in business fields often find these courses useful for professional development, and many take courses for self-improvement.

**Admission**

Independent learning courses may begin at any time. Formal admission to the University is not required. However, degree-seeking students are responsible for determining that courses are applicable for their purposes. An application must be completed for enrollment. Textbooks are available online through the University Bookstore from MBS Direct.

**Academic Regulations**

The courses offered through independent learning meet the same University standards of prerequisites, sequence, etc., that are required in residence work. The maximum time for completion of a course is 12 months from the date of enrollment. The minimum time limit for completion for a college-level course is two months from the date of enrollment.

University of South Carolina students who wish to enroll in independent learning courses must secure the approval of the dean of the school or college in which they are registered. Completion of the AS-30 form (available at the Office of Admissions and Records) will initiate the approval process for permission to enroll in a correspondence course. Students planning to transfer independent learning credits to another institution should secure the approval of that institution prior to enrollment. A maximum of 30 semester hours earned through independent learning may be applied toward a degree. Students who wish to take independent learning courses during the last 15 semester hours of degree credits must petition for permission through the dean.

**Examinations**

Examinations must, when possible, be taken at the University. Otherwise, the examination must be supervised by an official approved by the Office of Distance Education. In order to receive credit for an independent learning course, a student must make a passing grade on the final examination. Students are expected to maintain a passing average on all written assignments, but the assignment grades will not be counted toward the final grade unless the student passes the final examination.

**Teacher Certification**

Independent learning credits may be applicable for educator certificate renewal. Specific questions concerning South Carolina certification or renewal of teaching credentials should be directed to:

Division of Teacher Quality
Office of Teacher Certification
South Carolina Department of Education
3700 Forest Drive
Suite 500
Columbia, SC 29204

Call them at 803-734-8466, or visit them at www.scteachers.com (http://www.scteachers.com). Teachers in other states should contact their respective Departments of Education. For further information, contact:

Office of Distance Education
915 Gregg Street
803-777-7210

toll free: 800-922-2577

**Technology-Assisted Learning**

The Office of Distance Education coordinates for various academic units courses offered with the assistance of technology. Courses are offered each fall, spring, and summer semester. Students interested in courses offered through distance education must be admitted through undergraduate admissions or The Graduate School of the University. All courses meet the same University standards of prerequisites, sequence, etc., that are required in residence work and are subject to the same academic regulations. For further information, contact:

Office of Distance Education
915 Gregg Street
803-777-7210

toll-free: 800-922-2577
University 101
University 101 is a three-hour seminar course, open for credit only to freshmen and to other undergraduate students in their first semester at UofSC Columbia (i.e., transfer students). This course provides an introduction to the nature and importance of university education and a general orientation to the functions and resources of the University.

The course helps new students adjust to the University, develop a better understanding of the learning process, and acquire essential academic survival skills. It also provides students a support group in a critical year by examining problems common to the new-student experience. Extensive reading and writing assignments relevant to the student's college experience are required.

Organized in small groups of 20-25 students, University 101 is taught by faculty members and administrative personnel who have a special interest in working with new students. The course may be taken as part of a student's regular load or as an overload. Course credit is awarded on a letter-grade basis. Credit is applicable as elective credit toward almost all baccalaureate degrees offered by the University.

Baccalaureate Degree Course Work
The Lancaster campus of the University of South Carolina offers courses that may be applied toward baccalaureate degrees offered by other institutions. Students may choose from a number of major fields of study. For a complete list of academic programs offered at UofSC Lancaster, see “Academic Program”. Students can also complete the Bachelor of Arts in Liberal Studies, Bachelor of Arts in Organizational Leadership (through Palmetto Programs, UofSC Columbia) and the Bachelor of Science in Nursing (through a partnership with the College of Nursing, UofSC Columbia).

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton Street
Columbia, South Carolina
telephone 803-777-3854

Admissions
General Information
The University of South Carolina Lancaster strives to provide an opportunity to any student who shows promise of successfully completing a college education. The University encourages all qualified persons to apply. Equal educational opportunities are offered to students regardless of race, sex, religion, color, or national origin.

An application for admission must be submitted and approved and an official notification of acceptance issued by the Office of Admissions and Records before any person may enroll. Before action can be taken on an application for admission, all credentials required by University policy must be received by the admissions office, which has responsibility for evaluation of credentials for the purpose of admission.

Applications must be accompanied by a nonrefundable application fee specified on the application for admission. Applications may be obtained from the Office of Admissions and Records located in Starr Hall 123, or online (http://usclancaster.sc.edu/admissions/apply.htm).

Applications submitted more than one year in advance of the anticipated date of enrollment will be acknowledged, but no action will be taken until admission standards for the year in question have been established. The number of students admitted and enrolled in any year will be determined by the capacity of the institution to provide for the educational and other needs of the students, and by budgetary or other appropriate considerations. Admissions policies and procedures are subject to continuous review by the admissions staff and the Admissions, Petitions, and Grade Change Committee, and may be changed without notice.

The University reserves the right to place conditions on the admission of any student. In the event such action is taken, the conditions will be clearly explained in the letter of acceptance.

Proof of immunity to measles, mumps and rubella (MMR) is required before a student will be allowed to enroll in classes at the University of South Carolina Lancaster. The meningitis vaccine is recommended for all first-year students (entering freshmen 24 years of age and younger). If you decline the meningitis vaccine, your signature and date are required on a meningitis vaccine waiver form. A parent's signature is required for students less than 18 years of age.

Campus visits may be arranged online (http://usclancaster.sc.edu/admissions/campusTour/tour.php) or by contacting the Office of Admissions and Records at (803) 313-7073 or uscladms@mailbox.sc.edu.

Freshman Admission
A freshman applicant is a person who has not attended a regionally accredited college or university after high school graduation. Applicants who attended a postsecondary institution while still in high school are classified as freshmen, but must submit official transcripts of their college work (regardless of whether credit was or will be received).

Requirements
Freshman applicants must have either a high school diploma from a recognized regionally accredited association or its equivalent (GED) prior to enrolling. Accepted applicants must submit senior grades and a verification of graduation as soon as they are available. Applicants who did not graduate from high school must submit a copy of a GED certificate or satisfactory GED test scores.

Freshman applicants must submit:

- Completed admissions application
- Specified nonrefundable application fee
- Official high school transcript complete up to the time of application
- Official entrance examination scores (either SAT or ACT - scores will only be considered official if they are sent directly from the testing service)

College Preparatory Course Prerequisite Requirements
Prospective students must have adequate preparation for the curriculum in which they plan to enroll. At a minimum, applicants for admission are required to complete a college preparatory program with units distributed among the following academic subjects:
English (4 units): At least two units must have strong grammar and composition components, at least one must be in English literature, and at least one must be in American literature. Completion of College Preparatory English I, II, III, and IV will meet this requirement.

Mathematics (4 units): The four units of mathematics must include Algebra I (for which Applied Mathematics I and II may count together as a substitute, if a student successfully completes Algebra II), Algebra II, and Geometry. A fourth higher-level mathematics course should be selected from among Algebra III/trigonometry, pre-calculus, calculus, statistics, discrete mathematics, or a capstone course and should be taken during the senior year.

Laboratory Science (3 units): Two units must be taken in two different fields and selected from among biology, chemistry, or physics. The third unit may be from the same field as one of the first two units (biology, chemistry, or physics) or from any laboratory science for which biology and/or chemistry is a prerequisite. Courses in earth science, general physical science, or introductory or general environmental science for which biology and/or chemistry is not a prerequisite will not meet this requirement. It is strongly recommended that students take physical science (taught as a laboratory science) as a prerequisite to the three required units of laboratory science outlined in this section. It is also strongly recommended that students desiring to pursue careers in science, mathematics, engineering or technology take one course in all three fields.

Foreign Language (2 units): The two units of foreign language must be in the same language.

Social Studies (3 units): One unit of U.S. History is required; a half unit of economics and a half unit in government are strongly recommended.

Fine Arts (1 unit): One unit in appreciation of, history of, or performance in one of the fine arts.

Academic Elective (1 unit): A college preparatory course in computer science (i.e., one involving significant programming content, not simply keyboarding) is strongly recommended for this elective. Other acceptable electives include college preparatory courses in English; fine arts; foreign languages; social science; humanities; laboratory science (excluding those for which biology and/or chemistry is not a prerequisite); or mathematics above the level of Algebra.

Physical Education: One unit of physical education or ROTC is required.

Total Units: 19

Applicants must complete additional units to meet or exceed state and local high school graduation requirements. In choosing these electives, students should consider the recommendations given in the preceding listing for specific prospective majors.

Freshman applicants are encouraged to apply in the fall prior to the fall for which they seek admission. Applicants must apply for and take the required entrance examinations well in advance of the term for which they seek admission, and they are responsible for having the results of these examinations sent to the University directly from the testing service. Applicants over the age of 21 may not be required to submit entrance examination results; however, they must submit other credentials which give evidence of reasonable academic potential. Entrance examination scores may be required in the absence of satisfactory credentials or evidence of potential. Some programs may require entrance test scores for all students, regardless of age.

Other Admissions Opportunities

CAP Students
The Conditional Admission Program (CAP) is a special admissions program open to students who do not meet the regular requirements for pre-baccalaureate admission as described above. Depending on their high school curriculum and/or entrance examination scores (ACT or SAT), students may still be eligible for admission through CAP. For complete details about eligibility and requirements, students should contact the Office of Admissions and Records at (803) 313-7073 or uscladms@mailbox.sc.edu. Most students in this program must complete 30 semester hours at UofSC Lancaster with a 2.00 GPA or higher to attend one of the UofSC four-year campuses.

Admission as a Nondegree Seeking Candidate
Applicants who wish to attend the University for one semester or on some limited basis may be approved to do so upon submitting an application. The admissions office reserves the right to determine the proper category of admission and to determine what credentials may be required.

Special Students
This category is for part-time applicants who are not interested in earning a degree at UofSC. A maximum of 30 semester hours may be earned in this category. Applicants who have been officially denied admission as degree-seeking students are not eligible for admission as non-degree students. Courses completed by special students carry full University credit; however, none of the hours are applicable toward a degree until the student applies and qualifies for admission to a degree program. Usually no credentials are required if the applicant has no plan to seek a degree. Visiting or transient students are required to submit a transient permission form from their home institution that includes verification of good academic standing.

Senior Citizens
A senior citizen (age 60 or above) may be eligible to enroll in courses at UofSC Lancaster tuition-free, on a space available basis. In order to be eligible, a person must be admitted to the University of South Carolina Lancaster and have been a resident of South Carolina for at least 12 months. A special form documenting eligibility must be obtained from the Office of Admissions and Records.

Please note that senior citizens are responsible for all charges which are not tuition. This includes, but is not limited to, the application fee and any applicable course fees.

Concurrent
High school juniors and seniors who have excelled in their studies may enroll in appropriate courses at the University upon recommendation of their school counselor or principal, and with approval of the academic department in which courses are to be taken. Interested students must submit a high school transcript verifying their eligibility and demonstrating exceptional ability to undertake college-level coursework. Admission exceptions may be granted for freshman or sophomore students at the request of the high school principal, his or her designee, or the designee of the governing school association. Concurrent students must have a cumulative high school GPA of 3.0 or higher.
Auditor
An auditor may apply as a special student (see above). Classes that are audited at UofSC may not be retaken for credit towards a degree later.

Military Special
Certification of active duty military status is required.

Persons attending the University in any of these categories will be non-degree candidates. Credit earned while attending as a non-degree candidate may be used toward a degree only after the student has applied for and been accepted into a degree program. An applicant denied admission to any degree category is not eligible for admission as a non-degree student. The period of enrollment in these categories is limited by either time or number of allowable credits. The official acceptance letter explains all enrollment restrictions for the category in question. Non-degree students are not eligible for financial aid or veteran's benefits.

Readmission of Former Students
An application for readmission must be submitted by any former student who wishes to return to the University after missing a major (fall or spring) semester. Summer sessions do not count as a major semester in this instance. Applications for readmission are available online (http://uscslancaster.sc.edu/admissions/apply.htm) or may be obtained from the Office of Admissions and Records. Readmission to the University and to the program in which the student was previously enrolled is not automatic.

Students who attend the University as special students (including probationary or non-degree candidates) are not considered for "readmission" because these students were not fully admitted to the University originally. If special students wish to return to the University as degree-seeking candidates, they must apply for regular admission as freshmen or transfer students, furnishing all official transcripts and any entrance test scores which may be required.

Students who leave the University in good standing, miss one or more major semesters, and attend another institution while away must submit the application for readmission and official transcripts of all college-level work attempted during their absence from the University. Such applicants must meet the same requirements as transfer students.

A student who leaves the University on suspension must apply for readmission upon completion of the period of suspension and qualify for readmission to the major program requested. To attempt to return to the University prior to the completion of the suspension period requires:

- An application for readmission and a petition for reinstatement if a major semester has been missed; or
- A petition for reinstatement if the attempt is being made after notification of suspension but prior to missing a major semester. The petition for reinstatement is made to the Admissions, Petitions, and Grade Change Committee.

If students attend another college-level institution while suspended from the University, they must maintain a satisfactory average at that institution in order to retain the privilege of being considered for readmission at the conclusion of their suspension. The University does not transfer credit earned during a period of suspension, but the quality of grades could affect the decision on readmission.

Applications should be submitted before these deadlines:

- Fall term: August 1
- Spring term: December 1
- Summer terms: Two weeks prior to registration for the term.

Note: These deadlines are subject to change at any time.

Summer School Admission
New students entering the University for the first time in a summer term who expect to continue studying toward a degree submit only one application. They must meet all requirements for admission as degree-seeking students before the beginning of the summer term. These students should not submit a separate application for the summer term.

Summer Attendance Only
Students who wish to attend the University for the summer only should refer to the "Admission as a Non-degree Seeking Candidate" paragraph included in this section. Students enrolled in degree programs at another college or university who wish to take summer courses at UofSC as transients should seek written approval to take specific courses from a dean or department chair at their home institution.

Transfer Admission
An applicant who, having graduated from high school, has attended another regionally accredited postsecondary institution and attempted one or more courses is a transfer student, regardless of credit earned. If fewer than 30 semester hours (45 quarter hours) of college-level work have been attempted, the applicant must meet both transfer and freshman entrance requirements.

Transfer applicants for admission must submit:

- Completed admissions application
- Specified nonrefundable application fee
- Complete official transcripts from postsecondary institutions through the time of application; these must be supplemented by final transcripts that reflect complete academic work prior to beginning classes at the University.
- Complete high school records including entrance exam results if less than 30 semester hours (45 quarter hours) of college-level work have been attempted at a regionally accredited college or university.

Applications should be submitted before these deadlines:

- Fall term: August 1
- Spring term: December 1
- Summer terms: Two weeks prior to the start of each term.

Note: These deadlines are subject to change at any time.

All applicants for transfer admission must be eligible to return to the last institution attended as a degree-seeking student.

The applicant must submit official transcripts of all previous college courses attempted whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit. An official transcript must be sent directly to the admissions office from every institution attended. Failure to report all attempted college courses may constitute sufficient cause for later dismissal from the University.

In addition to the general requirements for admission outlined in this section, some departments within the University set additional requirements that may be higher than the University's minimum
For the purpose of admission, a transfer grade point average is calculated using all credits attempted and all grades earned on college-level courses (e.g. non-developmental, non-remedial) at other institutions. These credits and grades also will be included in calculating honors for graduation from the University. Colleges within the University have the right to consider all attempted college-level work in determining admission to particular programs and/or advancement into upper-division or professional-level courses. Transfer students should consult the section of this bulletin for the program in which the student plans to study for further information about the use of credits and grades from previous college work. For regulations on graduation with honors, see "Academic Regulations."

Regardless of the point in an academic career at which students enter the University, all must complete the final year (the last 30 semester hours before graduation) enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted.

Students who expect to receive an associate’s degree from UofSC Lancaster must complete the final 15 hours enrolled in classes at the Lancaster campus.

Evaluation of Transfer Credits

Transfer credits to UofSC must be from regionally accredited institutions for academic courses completed with grades of C- or better. Applicability of credits toward a particular degree is determined by the degree program in which the student enrolls. The number of credits acceptable to the University and the number which may apply toward a particular degree may differ.

Original records are required for courses exempted at a previous college. Exemption credit or acceptance of transfer credit by another college has no bearing on the evaluation of transfer credit at the University of South Carolina.

Students transferring to the University from another college or university must, before enrolling in class at the University, have their transcripts evaluated by the University. It is only in the light of such evaluation that students will know definitively the transferability and equivalency of each transfer course.

Transferability refers to the conditions under which the University accepts credit for inclusion in the student’s record. Transfer courses must have been taken at a regionally accredited post-secondary institution, or, if taken at a foreign post-secondary institution, have been recommended by a NACES - member external evaluation service. Coursework classified as remedial by the University will appear on the student’s record, but will not be used to determine admission eligibility or a transfer GPA. Exceptions to this rule may be made by the Office of the Registrar when state scholarship eligibility rules require inclusion.

Equivalency entails equating transfer credit, both in hours and content, to University of South Carolina coursework. The Registrar’s Office works with UofSC colleges and schools to coordinate the process of transfer evaluation to equate transfer courses directly to courses in the UofSC course catalog; to subject codes which represent subjects not offered at UofSC; or to subject codes that identify courses as remedial/technical/non-accredited coursework.

Applicability of credit toward a degree refers to the prerogative of academic divisions to count specific credit toward the fulfillment of a student's degree requirements. The student’s college, school or campus of enrollment is responsible for determining applicability.

However, a transfer course is generally not applicable towards any University of South Carolina academic program or degree if:

- The transfer course was occupational or technical in nature (examples: welding, paralegal, radiography courses).
- The transfer course was essentially remedial in nature (example: Developmental English).
- A grade lower than 2.0 on a 4 point scale, or equivalent, was earned in the transfer course.
- The transfer course was taken by a degree-seeking University of South Carolina student without prior approval as described in the Earning Credit in Transient Status section of this bulletin.
- The transfer course was taken while a student was on an academic suspension from a University of South Carolina campus.
- The student received any grade other than W in an equivalent course at this university, unless the student was enrolled full-time at least one year at the transfer institution.

Exceptions to this rule may be made only by the designated academic official(s) on the campus where the student is majoring and only in specific cases where such courses are judged to be uniquely relevant to the student's degree program.

A maximum of 76 semester hours may be transferred for degree credit from a junior college or two-year institution which is accredited by a regional association such as the Southern Association of Colleges and Schools.

A maximum of 30 semester hours of credit by correspondence and credit awarded for educational experiences in the military may be applied toward meeting the requirements for a baccalaureate degree. The 30 semester hours of credit which may be awarded for educational experiences in the military should be in accordance with recommendations published by the American Council on Education and be consistent with University policy on the transfer of credit but will only be applied to a degree program upon the approval of the dean of the college or campus from which the degree is to be awarded.

Veteran students may receive credit toward graduation for training received under many of the armed forces college training programs. University credit also may be given for specialized and technical training done under the auspices of the armed forces and for courses taken through the United States Armed Forces Institute/DANTES. This training may be accepted by the University for credit only if it is at the college level, if it is approved by the University, and if it is appropriate to the particular University course of study in which the student enrolls. Armed forces training will not be evaluated until the applicant has been accepted for admission; however, credentials should be submitted with the admission application. No credit is given for high-school or college-level GED tests.

(Information regarding educational benefits to veterans and the children of deceased or disabled veterans may be found in the section on financial aid. Additional information for veterans is available from the Office of Financial Aid, University of South Carolina Lancaster.)
A maximum of 30 semester hours of credit earned while classified as a non-degree special student at the University may be applied toward meeting the requirements for a baccalaureate degree.

A student planning to pursue work at other institutions or through correspondence must complete this work before attaining senior classification (90 semester hours).

Courses completed at any institution while the student is suspended by the University will not be accepted toward a degree at USC, but may be used to evaluate a student’s eligibility for readmission.

**Transfer: State Policy and Procedures**

**Background**

Section 10-C of the South Carolina School-to-Work Transition Act (1994) stipulated that the Council of College and University Presidents and the State Board for Technical and Comprehensive Education, operating through the Commission on Higher Education, develop better articulation of associate and baccalaureate degree programs. To comply with this requirement, the commission upon the advice of the Council of Presidents established a Transfer Articulation Policy Committee composed of four-year institutions’ vice presidents for academic affairs and the Associate Director for Instruction of the State Board for Technical and Comprehensive Education. The principal outcomes derived from the work of that committee and accepted by the Commission on Higher Education on July 6, 1995, were:

- An expanded list of 86 courses which transfer to four-year public institutions of South Carolina from the two-year public institutions;
- A statewide policy document on good practices in transfer to be followed by all public institutions of higher education in the State of South Carolina, which was accepted in principle by the Advisory Committee on Academic Programs and the commission;
- Six task forces on statewide transfer agreements, each based in a discipline or broad area of the baccalaureate curriculum.

In 1995 the General Assembly passed Act 137 which stipulated that the South Carolina Commission on Higher Education “notwithstanding any other provision of law to the contrary, shall have the following additional duties and functions with regard to the various public institutions of higher education.” These duties and responsibilities include the commission’s responsibility “to establish procedures for the transferability of courses at the undergraduate level between two-year and four-year institutions or schools.” This same provision is repeated in the legislation developed from the Report of the Joint Legislative Study Committee.

Act 137 directed the commission to adopt the following procedures for the transfer of courses from all two-year public to all four-year public institutions of higher education in South Carolina.

**Statewide Articulation of 86 Courses**

1. The Statewide Articulation Agreement of 86 courses already approved by the South Carolina Commission on Higher Education for transfer from two- to four-year public institutions shall be applicable to all public institutions, including two-year institutions and institutions within the same system. In instances where an institution does not have synonymous courses to ones on this list, it shall identify comparable courses or course categories for acceptance of general education courses on the statewide list.

### Admissions Criteria, Course Grades, GPAs, Validations

2. All four-year public institutions shall issue annually in August a transfer guide covering at least the following items:

   a. The definition of a transfer student and requirements for admission both to the institution and, if more selective, requirements for admission to particular programs.

   b. Limitations placed by the institution or its programs for acceptance of standardized examinations (e.g., SAT, ACT) taken more than a given time ago, for academic course work taken elsewhere, for course work repeated due to failure, for course work taken at another institution while the student is academically suspended at his/her home institution, and so forth.

   c. Institutional and, if more selective, programmatic maximums of course credits allowable in transfer.

   d. Institutional procedures used to calculate student applicants’ GPAs for transfer admission. Such procedures shall describe how nonstandard grades (withdrawal, withdrawal failing, repeated course, etc.) are evaluated; and they shall also describe whether all course work taken prior to transfer or just course work deemed appropriate to the student’s intended four-year program of study is calculated for purposes of admission to the institution and/or programmatic major.

   e. Lists of all courses accepted from each technical college (including the 72 courses in the Statewide Articulation Agreement) and the course equivalencies (including “free elective” category) found on the home institution for the courses accepted.

   f. Lists of all articulation agreements with any public South Carolina two-year or other institution of higher education, together with information about how interested parties can access these agreements.

   g. Lists of the institution’s Transfer Officer(s) personnel together with telephone and fax numbers and office address.

   h. Institutional policies related to “academic bankruptcy” (i.e., removing an entire transcript or parts thereof from a failed or underachieving record after a period of years has passed) so that re-entry into the four-year institution with course credit earned in the interim elsewhere is done without regard to the student’s earlier record.

   i. “Residency requirements” for the minimum number of hours required to be earned at the institution for the degree.

3. Course work (individual courses, transfer blocks, statewide agreements) covered within these procedures shall be transferable if the student has completed the course work with a “C” grade (2.00 on a 4.00 scale) or above, but transfer of grades does not relieve the student of the obligation to meet any GPA requirements or other admissions requirements of the institution or program to which application has been made.

   a. Any four-year institution which has institutional or programmatic admissions requirements for transfer students with cumulative grade point averages (GPAs) higher than 2.00 on a 4.00 scale shall apply such entrance requirements equally to transfer students from regionally accredited South Carolina public institutions regardless of whether students are transferring from a four-year or two-year institution.

   b. Any multi-campus institution or system shall certify by letter to the commission that all course work at all of its campuses applicable to a particular degree program of study is fully acceptable in transfer to meet degree requirements in the same degree program at any other of its campuses.
4. Any course work (individual courses, transfer blocks, statewide agreements) covered within these procedures shall be transferable to any public institution without any additional fee and without any further encumbrance such as a "validation examination," "placement examination/instrument," "verification instrument," or any other stricture, notwithstanding any institutional or system policy, procedure, or regulation to the contrary.

Transfer Blocks, Statewide Agreements, Completion of the A.A./A.S. Degree

5. The following Transfer Blocks/Statewide Agreements taken at any two-year public institution in South Carolina shall be accepted in their totality toward meeting baccalaureate degree requirements at all four-year public institutions in relevant four-year degree programs, as follows:
   • Arts, Humanities, and Social Sciences: Established curriculum block of 46-48 semester hours
   • Business Administration: Established curriculum block of 46-51 semester hours
   • Engineering: Established curriculum block of 33 semester hours
   • Arts and Sciences, curriculum II: Established curriculum block of 48-51 semester hours
   • Teacher Education: Established curriculum block of 38-39 semester hours for early childhood, elementary, and special education students only. Secondary education majors and students seeking certification who are not majoring in teacher education should consult the Arts, Humanities, and Social Sciences or the Math and Science transfer blocks, as relevant, to assure transferability of course work
   • Nursing: By statewide agreement, at least 60 semester hours shall be accepted by any public four-year institution toward the baccalaureate completion program (BSN) from graduates of any associate degree program in nursing (ADN), provided that the program is accredited by the National League of Nursing and that the graduate has successfully passed the National Licensure Examination (NCLEX) and is a currently licensed registered nurse

6. Any "unique" academic program not specifically or by extension covered by one of the statewide transfer blocks/agreements listed in #4 above shall either create its own transfer block of 35 or more credit hours with the approval of CHE staff or shall adopt either the Arts/Social Science/Humanities or the Science/Mathematics block by September 1996. The institution at which such program is located shall inform the staff of the CHE and every institutional president and vice president for academic affairs about this decision.

7. Any student who has completed either an Associate of Arts or Associate of Science degree program at any public two-year South Carolina institution which contains within it the total course work found in either the Arts/Social Sciences/Humanities Transfer Block or the Math/Science Transfer Block shall automatically be entitled to junior-level status or its equivalent at whatever public senior institution to which the student might have been admitted. (Note: As agreed by the Committee on Academic Affairs, junior status applies only to campus activities such as priority order for registration for courses, residence hall assignments, parking, athletic event tickets, etc., and not in calculating academic degree credits.)

Related Reports and Statewide Documents

8. All applicable recommendations found in the commission's report to the General Assembly on the School-to-Work Act (approved by the commission and transmitted to the General Assembly on July 6, 1995) are hereby incorporated into the procedures for transfer of course work among two- and four-year institutions.

9. The policy paper entitled State Policy on Transfer and Articulation, as amended to reflect changes in the numbers of transfer blocks and other Commission action since July 6, 1995, is hereby adopted as the statewide policy for institutional good practice in the sending and receiving of all course credits to be transferred.

Assurance of Quality

10. All claims from any public two- or four-year institution challenging the effective preparation of any other public institution's course work for transfer purposes shall be evaluated and appropriate measures shall be taken to reassure that the quality of the course work has been reviewed and approved on a timely basis by sending and receiving institutions alike. This process of formal review shall occur every four years through the staff of the Commission on Higher Education, beginning with the approval of these procedures.

Statewide Publication and Distribution of Information on Transfer

11. The staff of the Commission on Higher Education shall print and distribute copies of these Procedures upon their acceptance by the commission. The staff shall also place this document and the Appendices on the commission's Home Page on the Internet under the title "Transfer Policies."

12. By September 1 of each year, all public four-year institutions shall on their own Home Page on the Internet under the title "Transfer Policies":
   a. Print a copy of this entire document (without appendices).
   b. Print a copy of their entire transfer guide.
   c. Provide to the staff of the commission in satisfactory format a copy of their entire transfer guide for placing on the commission's Home Page on the Internet.

13. By September 1 of each year, the staff of the State Board for Technical and Comprehensive Education shall on its Home Page on the Internet under the title "Transfer Policies":
   a. Print a copy of this document (without appendices).
   b. Provide to the commission staff in format suitable for placing on the commission's Home Page of the Internet a list of all articulation agreements that each of the sixteen technical colleges has with public and other four-year institutions of higher education, together with information about how interested parties can access those agreements.

14. Each two-year and four-year public institutional catalog shall contain a section entitled "Transfer: State Policies and Procedures." Such section at a minimum shall:
   a. Publish these procedures in their entirety (except Appendices)
   b. Designate a chief Transfer Officer at the institution who shall
      • Provide information and other appropriate support for students considering transfer and recent transfers
      • Serve as a clearinghouse for information on issues of transfer in the State of South Carolina
      • Provide definitive institutional rulings on transfer questions for the institution's students under these procedures
      • Work closely with feeder institutions to assure ease in transfer for their students.
   c. Designate other programmatic Transfer Officer(s) as the size of the institution and the variety
   d. Refer interested parties to the institutional Transfer Guide of the state's four-year institutions
e. Refer interested parties to the institution's and the Commission on Higher Education's Home Pages on the Internet for further information regarding transfer.

Admission of International Students

The University welcomes the applications of qualified international students. At least six months before the beginning of the semester they wish to enter, and in the case of freshman applicants, at least nine months beforehand, students must send a complete application, including standardized test scores, school records, and financial statements, to the Office of Admissions and Records. Students who have attended colleges and universities outside of the United States are required to submit a professional credential evaluation of all work completed.

International applicants must be proficient in the English language. A score of 550 or above on the paper version of the TOEFL (Test of English as a Foreign Language) is required (a score of 210 on the computerized version is required, and a score of 77 on the Internet version is required). TOEFL scores are not required for international students from countries where the primary language of instruction is English nor from graduates of high schools in the United States.

An English proficiency test will be administered to international students, except those from English-speaking countries, upon arrival at the University. All international students must demonstrate sufficient proficiency in written and oral English to progress at the University level. Students who are not proficient in English will be required to take noncredit, concentrated English language training until proficiency is demonstrated.

In addition, freshman applicants must have completed a level of education equivalent to that of students entering from accredited secondary schools in the United States and have superior grades on their school work. Applicants who seek to enter from another college or university in the United States must meet transfer admission requirements.

International applicants will not be allowed to enroll in classes until they establish their ability to pay education expenses. The policies of certain countries have created financial difficulties for their citizens studying at the University. Applicants from these countries will be so notified and required to make an advance deposit of expenses. Applicants from other nations must submit certification of financial support to satisfy this requirement. International students should not expect to obtain any financial assistance from the University.

Advanced Placement by Examination

Baccalaureate degree candidates may qualify for degree credit and/or advanced placement through successful completion of the following exams:

- The College Entrance Examination Board Advanced Placement Examinations are offered in American government and politics, American history, art history, art studio (drawing 2D and 3D), biology, chemistry, comparative government and politics, computer science (A and AB), economics (macro and micro), English language and composition, English composition and literature, environmental science, European history, foreign languages (French, German, Latin, and Spanish), human geography, mathematics-calculus (AB and BC), music (theory and listening and literature), physics (B, C part 1, C part 2), psychology, and statistics. Questions concerning credit awards should be referred to the Office of Admissions and Records in Room 126, Starr Hall.
- International Baccalaureate (IB) Higher Level Examinations in biology, business and organization, chemistry, computer science, economics, English, French, geography, German, history, Latin, mathematics, music, physics, psychology, social anthropology, Spanish, theatre arts, and visual arts. Questions concerning credit awards should be referred to the Office of Admissions and Records.
- Tests in foreign languages and mathematics are required for all new freshmen. Transfer students may be required to take the same tests. Information regarding these placement examinations may be obtained by contacting the Office of Student Life at (803) 313-7066.

Candidates who do not pass a particular test are not permitted to repeat that test. The required credits must be obtained instead by enrollment and satisfactory completion of the course(s) involved. Specific information about test content and policies may be obtained from the appropriate department.

Proof of Citizenship

UofSC Lancaster students must present proof of citizenship or lawful presence in the U.S. prior to enrolling. This policy has been adopted by the University in order to comply with section 59-101-430 of the South Carolina Code of Laws, as amended, which requires that lawful presence in the United States is verified before enrollment at any public institution of higher education. Verification of immigration status for non-citizens will be conducted by international student officials. For other students, a proof of citizenship verification process has been adopted to deter and prevent false claims of citizenship by unlawful aliens attempting to evade the eligibility requirements of section 59-101-430. All students must present proof of citizenship in the form of one of the following acceptable documents:

- Copy of the South Carolina driver's license if the student first became a licensed driver in the state after January 1, 2002;
- A Certified Birth Certificate indicating that you were born in the United States or a territory of the United States
- Current U.S. Passport or U.S. Passport that has not been expired more than 10 years
- Certificate of Naturalization - USCIS Form (N-550 or N-570)
- U.S. government issued Consular Report of Birth Abroad
- Certificate of Citizenship (N-560 or N-561)
- Unexpired U.S. Active Duty/Retiree/Reservist Military ID Card (DOD DD-2)
The University can accept photocopies of birth certificates and other citizenship documents, but reserves the right to request production of the certified original in the event that there are questions about whether the copy is true and accurate, or if any of the information on the provided copy is illegible.

For more information:

**Academic Regulations**

As the chief governing body of the University, the Board of Trustees delegates the powers of the president and the faculty in accord with its policies. Subject to the review of the president and the Board of Trustees, the faculty retains legislative powers in all matters pertaining to the standards of admission, registration, instruction, research, extracurricular activities, requirements for and granting of degrees, the curricula, the discipline of students, the educational policies and standards of the University, and all other matters affecting the conduct of academic affairs.

The University reserves the right to make changes in curricula, degree requirements, course offerings, and all academic regulations whenever, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Registration at the University of South Carolina assumes the students' acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement such as the Medical School Bulletin, Law School Bulletin, Graduate Studies Bulletin, the University Master Schedule of Classes, or the Carolina Community. Official policies of the University listed below are published in the Carolina Community, which is available online as well as through the Student Government Office or the Office of the Vice President for Student Affairs.

1. Student Rights and Freedoms within the Academic Community
2. Rule of Academic Responsibility and Academic Disciplinary Procedures
3. Grievance Policy and Procedures for Non-Academic Areas
4. University Policy on Use of Alcohol
5. University Policy on Campus Solicitation
6. University Policy on Student Patent and Copyright Matters
7. Student Right to Know

Unforeseen circumstances may interfere with the scheduling of a course or degree offering. Students must accept such developments even if doing so will mean a delay in some of their academic goals or a modification of those goals. The departments concerned will work closely with students facing such problems in an effort to resolve them with a minimum of difficulty.

The University reserves the right to withdraw any course because of inadequate enrollment. Additional courses may be offered upon application of a sufficient number of students; a minimum of 10 applicants is the usual requirement. Registration in any course may be closed when the maximum enrollment for efficient work has been reached.

**Bulletin Rights and Exclusions**

**Bulletin Rights**

An undergraduate student may choose to obtain a degree in accordance with the curricular requirements in force for the particular degree at the time the student first enrolls as a degree-seeking student at any University campus, or under subsequent requirements published while the student is enrolled.

**Bulletin Exclusions**

The student's choice is restricted to a specific bulletin and the curricular requirements described therein. Undergraduate students have a period of eight years, inclusive and continuous, in which to claim the rights of a specific bulletin.

Within the eight-year limit, an undergraduate student who is absent from the University for no longer than three years, and who returns to complete the program of study, shall have the right to continue under the bulletin in effect at the time of the student's original enrollment as a degree-seeking student. Alternatively, the student may elect the degree requirements under the bulletin in effect at the time of return. If the period of absence is longer than three years, the student will be subject to the curricular requirements in force at the time of return. Under no circumstances will students be allowed to appeal to short-lived rules and regulations which were adopted and abandoned during the period of their absence.

If drastic revisions of curricula or program requirements have occurred during a student's absence (even if for less than three years), or during the period between the student's original enrollment as a degree-seeking student and the eventual movement to a different degree program or campus within the University, a reasonable effort will be made by the academic dean to permit the student to undertake a transitional program that is equivalent to the educational experience intended under the bulletin in force at the time of the student's original enrollment as a degree-seeking student.

**Academic Calendar Policies**

**Academic Calendar**

The University follows an early Semester Calendar, with Fall semester beginning the Thursday of the third full week in August and ending in December before the winter break. Spring classes begin the second Monday of January, provided neither Monday is a holiday (New Years or MLK). For Fall and Spring semesters, there are 70 class days with a minimum of 2100 minutes of instruction for a standard 3 hour class-28 Tuesday and Thursday classes of 75 minutes per class meeting and 42 Monday, Wednesday, Friday classes of 50 minutes per class meeting. All nonstandard one or two day per week classes must meet the minutes of instruction requirements as part of the calendar.

**Summer Term**

The summer term consists of multiple course sessions between the spring and fall terms.

Students regularly enrolled in the University may take work applicable to their degree during the summer term. Regulations governing the regular academic year also pertain to the summer term.

A complete listing of all courses offered in the summer term will be available by April 1 on the registrar's Web site under “Master Schedule.” Course sessions and times may vary.
Please refer to the registration calendars on the registrar's Web site for more detailed information.

Advisement Policies

Academic Advising

When students are accepted into the University, they are assigned an academic advisor. Students are expected to arrange to meet with their advisor at least once a semester to plan their course of study for the following semester. Students who do not know their assigned advisor should obtain this information from the appropriate departmental or academic dean's office.

Information, advice, and interpretations of University policies offered by advisors do not supersede the official statement of policies and academic regulations described in the University Undergraduate Studies Bulletin. Exceptions to University regulations cannot be made by academic advisors. Any exceptions to the policies and regulations set forth in the University Undergraduate Studies Bulletin must be made by the appropriate College Scholastic Standards and Petitions Committee or by the dean of the college.

Records of academic progress may be kept by advisors and deans, but the only official student records are maintained by the Office of the University Registrar.

Classification of Students

Classification is based on the total number of semester credit hours earned: A student must have earned 30 hours to be classified as a sophomore, 60 for classification as a junior, and 90 for senior classification. Students are classified at the beginning of each semester and maintain that classification until the next semester begins.

Undeclared Freshmen

For various reasons it may be impossible or inappropriate for a student to declare a major. Nevertheless, all students will receive advisement in the college most closely related to their interests and abilities. Transient students are subject to the rules of their home institution and may take course work at the University of South Carolina without a declared major. University courses are open to those seeking career advancement or life enrichment and who meet stated course prerequisites. Freshmen who have been accepted by the University, but who are unsure of academic or career goals, may need a period in which to establish their major interest. To accommodate students in these categories, courses which are usually open to students with 30 or fewer hours (freshmen) are open to all students who meet prerequisites published in the University's Undergraduate Studies Bulletin. Students who have earned 30 semester hours and wish to continue their studies at the University of South Carolina must declare a major in a program in which they meet entrance or progression requirements.

Course of Studies

Students are expected to follow the programs outlined by their school or college as closely as possible, particularly in the first two years when satisfying basic degree requirements and prerequisites for advanced work. Students must pursue required courses in the prescribed sequence. Failure to do so may lead to future schedule difficulties, and students may find that the subjects for which they wish to enroll are either not available or are closed to students with advanced standing. Students who fail to complete successfully all freshman requirements may not enroll in courses in their major field beyond the sophomore level. Students ineligible to continue courses in their major field may take electives until the deficiency is removed. Students who enroll in classes for which prerequisites or other defined requirements have not been met may be removed from these classes. Learning-disabled students who wish to take advantage of University-approved program accommodations must have an academic advisory plan on file with the Office of Student Disability Services and the dean of the college. This plan will be formulated by the student's academic advisor with the assistance of the Office of Student Disability Services and will contain recommended accommodations which specifically relate to and are consistent with the student's diagnosed disability. A copy of the student's academic advisory plan must be provided to the course instructor for the student to be eligible for a particular accommodation. Any substitutions for degree requirements recommended in the student's academic advisory plan must be referred to the Scholastic Standards and Petitions Committee of the student's college for action.

Changes in Curriculum

Undergraduate students interested in changing majors should contact the college or school offering the new curriculum the student intends to follow. Once all necessary permissions are obtained, the college or school that offers the new curriculum will notify the Office of the University Registrar to update the student's record. Curriculum changes can affect loan deferment, scholarship eligibility, athletic participation eligibility, tuition and fee assessment, and international student VISA regulations. For this reason, all curriculum changes must be completed before the end of the free drop/add period in Fall and Spring Terms (in Part of Term 30), and prior to June 1 during the Summer Term. Curriculum change requests that arrive at the Office of the University Registrar after these deadlines will be processed for the following term. Exceptions to this rule may be made in the event that a change request is being made in the semester that student is graduating from the University.

Course Substitutions

Only under unavoidable and exceptional circumstances will the faculty permit substitution for or exemption from the prescribed curricula. When it becomes necessary to request a deviation from the prescribed course of study, students should consult the dean of their college or the head of the department in which they are majoring before preparing a petition listing the substitutions or exemptions sought and the reasons for the request. Petitions are submitted on forms obtainable from the Scholastic Standards and Petitions Committee of the particular college, and must be returned to the dean of the college in which the student is enrolled. Deviations from degree requirements published in the bulletin must be approved by the student's dean and the head of the student's major department. The Scholastic Standards and Petitions Committee of each college functions as an appeal board in cases where agreement between the dean, department head, and the student cannot be reached.

Course and Academic Credit Policies

Course Numbering

Courses numbered from 101 to 699 are available at different levels for undergraduate credit. Courses numbered from 700 to 899 may be taken for graduate credit only and are described in the Graduate Studies Bulletin. All courses numbered from 101 to 499 are for four-year baccalaureate degree candidates. Courses numbered from 500 to 699 may be taken by advanced undergraduate and graduate students for undergraduate or graduate credit, respectively. A 500- to 600-level course taken for undergraduate credit cannot later be awarded graduate credit.
Course Credit

The credit value of each course is usually determined by the amount of formal instructional time per week for one semester. At least 700 minutes of instruction (and at least twice that for laboratory time) can be expected per credit hour. The semester hour credit for each course is included in each course description.

No student suspended from the University of South Carolina for any reason may earn academic credit during the period of suspension, whether by residence elsewhere or by correspondence courses of any origin.

Remedial courses (courses numbered 100 or below) may not be used to meet degree requirements.

Credit by Examination

Currently enrolled students may obtain credit by examination in a course in which they have had no class attendance or semester standing; permission must, however, be obtained from the dean of the college or department chair in which the course is offered. A grade of not less than B on the examination is necessary in order to receive credit for the course. Examinations are not permitted in courses in which a student previously has been enrolled regularly or as an auditor. The applicant must pay to the Office of Financial Services in advance of the examination a fee of $25 per semester hour; this fee is not refundable. The Office of Financial Services will issue a receipt which must be shown to the head of the department conducting the examination, who shall immediately report the results of the examination to the Office of the University Registrar. Credits earned under this regulation are recorded with hours earned only.

Transfer Credit

Students transferring to the University from another college or university must, before enrolling in class at the University, have their transcripts evaluated by the University. It is only in the light of such evaluation that students will know definitively the transferability and equivalency of each transfer course. Degree applicability will be determined by the college or school in which the student is enrolled.

Transferability refers to the conditions under which the University accepts credit for inclusion in the student’s record. Transfer courses must have been taken at a regionally accredited post-secondary institution, or, if taken at a foreign post-secondary institution, have been recommended by a NACES member external evaluation service. Coursework classified as remedial by the University will appear on the student’s record, but will not be used to determine admission eligibility or a transfer GPA. Exceptions to this rule may be made by the Office of the Registrar when state scholarship eligibility rules require inclusion.

Equivalency entails equating transfer credit, both in hours and content, to University of South Carolina coursework. The Registrar’s Office works with UofSC colleges and schools to coordinate the process of transfer evaluation to equate transfer courses directly to courses in the USC course catalog; to subject codes which represent subjects not offered at UofSC; or, to subject codes that identify courses as remedial/technical/non-accredited coursework. A list of transfer equivalencies for the Columbia catalog of courses can be found on the Office of the University Registrar’s website (http://www.sc.edu/about/offices_and_divisions/registrar/transfer_credits/course_equivalency.php).

Applicability of credit toward a degree refers to the prerogative of academic divisions to count specific credit toward the fulfillment of a student’s degree requirements. The student’s college or school of enrollment is responsible for determining applicability.

However, a transfer course is not applicable towards any University of South Carolina academic program or degree if:

1. The transfer course was essentially remedial in nature (example: Developmental English).
2. The transfer course was occupational or technical in nature (examples: welding, paralegal, or radiography courses).
3. A grade lower than 2.0 on a 4 point scale, or equivalent, was earned in the transfer course.
4. The transfer course was taken by a degree-seeking University of South Carolina student without prior approval as described in the Earning Credit in Transient Status section of this bulletin.
5. The transfer course was taken while a student was on an academic suspension from the university.
6. The student received any grade other than W in an equivalent course at this university, unless the student was enrolled full time at least one year at the transfer institution.

Exceptions to the rules of applicability may be made only by petition to the dean for undergraduate studies of the College or School in which the student is majoring.

Effective Summer 2017 for all newly admitted and readmitted students, transfer grade points and GPAs will no longer appear on the UofSC record. Transfer course equivalencies, grades, attempted hours, and earned hours will appear on students’ advising transcript in Self Service Carolina, while only transfer earned hours will appear on the official transcript.

Earning Credit in Transient Status

Since the University is accountable for the integrity of its degrees, it is essential that degree programs be closely monitored by University faculty. Therefore, students entering the University to seek a degree should expect to complete the majority of their academic work at the University of South Carolina. Normally students who wish to earn more than a semester of credit at another institution should meet all requirements and transfer to that institution. In some programs, and with the permission of the academic dean, students may take up to 18 semester hours of courses in transient status provided they have a 2.00 UofSC grade point average; the courses are approved in advance by the academic advisor and dean; and the other institution is fully accredited and the course work meets University specifications for transfer credits.

Study abroad or in special academic programs within the United States may be of particular benefit to students, and the University cooperates in a variety of national and international exchange programs in which students may pursue up to a year of academic work at another institution. Special permission is granted to students in these programs with the advance approval of the academic advisor and dean.

Course Load

Maximum credit limits, published in the Master Schedule of Classes, also vary according to college policy. Students will not be permitted to register for a semester load in excess of that prescribed for their program of study unless they earned an average of B or better on all courses for which they were enrolled (minimum 12 semester hours) for the preceding semester. New students are eligible for an extra course if they submit to the academic dean satisfactory evidence of equivalent academic achievement. Students eligible for an additional course on this basis
must obtain prior approval for each course addition from the dean of their college. No course may be added after the last date to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site. (Note: This regulation does not apply to aerospace studies, Army or naval science courses, which may be added to a course program during the regular registration period without special approval.)

Undergraduate students who are enrolled in 12 semester hours or more for the fall, spring, or summer semester are considered full-time for academic purposes. Students who have been verified as learning disabled by the Office of Student Disability Services must be enrolled in 9 semester hours or more for the fall, spring or summer semesters to be considered full-time students with regard to access to University residence halls and eligibility for financial aid, provided this is consistent with their academic advisory plan.

Graduate students who are enrolled in 9 semester hours or more for the fall, spring, or summer semester are considered full-time for academic purposes.

Full-time fees for undergraduate students are calculated on 12 to 16 semester hours. Full-time status for graduate students with assistantships is determined by the dean of Graduate Studies.

Full-time benefits for veterans are determined by the Office of Veterans Services.

Auditing
A student must be admitted to the University and go through the regular registration process to be eligible for auditing any course. All auditors must be admitted to the University and go through the regular registration process. Those who are not full-time students will be charged the same fees as for courses taken for academic credit.

Auditing a course consists of attending classes and listening without responsibility for any assignments or examinations. An auditor is not responsible for any assignments or examinations. No record of audit shall appear on a transcript unless a student attends 75 percent of the classes.

No credit may be earned in an audited course by examination or otherwise. No audited course may be repeated for credit at a later date except by those students who have been verified as learning disabled by the Office of Student Disability Services and whose academic advisory plan recommends auditing a specific course before it is taken for credit.

The applicant must complete the prescribed procedure for enrollment through the Office of the University Registrar before class attendance will be permitted.

Students who have registered for a course on an audit basis and who wish to change their registration to take the course for credit (or who wish to change from credit to audit) must do so no later than the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site.

Independent Study
The purpose of the independent study option is to allow the student to pursue an area of academic interest not adequately covered by the regular course structure. The experience shall involve an academic product that is consistent with the student’s program of study.

Prior to enrolling in an undergraduate independent study course, a student must complete an Independent Study Contract (AS-6). The approval of the instructor, advisor, department chair, and student’s dean is required. Students then present their approved copy to the Office of the University Registrar before registering for the course. Only students who take independent study as part of their major or minor or cognate program may receive grade-point credit for independent study. All other students will receive Pass-Fail credit. Students who take independent study on a Pass-Fail basis cannot later receive grade points, even if the student transfers to another major, minor, or cognate otherwise qualifying the course work as appropriate for grade points. This ruling is not reversible by petition.

A grade point average of 2.50 or greater is required to enroll in independent study courses. The amount of credit for independent study per semester is limited to 6 hours. Independent study credits applied toward any undergraduate degree may account for no more than 10 percent of the total required credit hours for that degree.

Repetition of Course Work
When a course is repeated, both grades will be entered on the student’s permanent academic record and included in the grade point average, unless the grade forgiveness policy is applied. Course credit toward graduation will be given only once, unless otherwise stipulated in the course description. Many academic programs restrict the number of times a course may be repeated. Consult the college and department section of the bulletin for such restrictions.

International Courses (INTL) / Study Abroad
- 501 — Study Abroad—UofSC Exchange. (1-16) This course keeps a UofSC student active while on a pre-approved UofSC exchange program.
- 502 — Study Abroad—Non-UofSC Program. (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program.
- 503 — Study Abroad—Through Another U.S. Institution. (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program through another U.S. institution of higher education.

Senior Privilege - Enrollment in Graduate Courses
A special provision to earn graduate credit is available for UofSC undergraduate seniors in their final semester who need less than a normal course load to complete baccalaureate requirements. Overload enrollment that includes one or more courses under senior privilege is not allowed. Courses for graduate credit under senior privilege cannot be used toward undergraduate degree requirements. For senior privilege consideration, undergraduate seniors with a 3.00 GPA should submit to The Graduate School, for the graduate dean's approval, form GS19 endorsed by the student's advisor, the chair of the department offering the course, and the academic dean for that department. This action should be taken before registration.

Accelerated Degree Programs
Certain academic units offer accelerated programs whereby an undergraduate student with a GPA of 3.40 and 90 or more hours toward the baccalaureate degree may apply graduate credits to a baccalaureate program. Admission can be requested by students in consultation with their academic advisor, their undergraduate dean, and the graduate director of the proposed master’s program. An application form and associated guidelines may be obtained from The Graduate School.
Several of the University’s colleges and schools are involved with a variety of accelerated degree programs. For more information, contact:

Office of Undergraduate Admissions
University of South Carolina
Columbia, SC 29208
phone 803-777-7700

Registration Policies

Registration
To be officially enrolled in the University students must be academically eligible, complete the registration process with the Office of the University Registrar, and possess a receipt issued by the Office of Financial Services for payment of current academic fees.

Students are expected to complete registration (including the payment of all required fees) by the dates prescribed in the registration calendars on the registrar’s Web site to avoid cancellation of classes and payment of a late registration fee of $3 per day ($350 maximum).

Changes in Enrollment
Adding a course, changing from credit to audit or audit to credit, changing from one section to another, and changing the number of credits in any variable credit course must be completed by the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site. Electing or revoking the Pass-Fail option must be completed no later than the last day for dropping a course with a grade of W, as published in the academic and refund calendars on the registrar’s Web site.

Dropping Courses and Withdrawal
Free Drop/Add Period
During the Free Drop/Add period, undergraduate students have the ability to add and remove courses from their schedule through Self Service Carolina. For each course, the Free Drop/Add period begins during the official first day of the course and extends to a minimum of 6% of the Part of Term in which the course is scheduled. Courses removed during the Free Drop/Add period will not be recorded on a student’s transcript. Details regarding Free Drop/Add dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from dropping or adding courses during the Free Drop/Add Period if they have an active registration hold on their record.

Free Drop/Add dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Course Withdrawal Fail Period
During the Withdrawal Fail Period, undergraduate students have the ability to withdraw from a course with a penalty grade through Self Service Carolina. For each course, the Withdrawal Fail Period begins after the Withdrawal Period and extends up to 100% of the Part of Term in which the course is scheduled. Courses from which a student withdraws with a grade of WF during this period are treated as an F in the evaluation of academic standing, computation of grade point average, and graded hours. Details regarding course Withdrawal Fail dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Fail Period if they have an active registration hold on their record.

Course Withdrawal Fail Period
During the Withdrawal Fail Period, undergraduate students have the ability to withdraw from a course with a penalty grade through Self Service Carolina. For each course, the Withdrawal Fail Period begins after the Withdrawal Period and extends up to 100% of the Part of Term in which the course is scheduled. Courses from which a student withdraws with a grade of WF during this period are treated as an F in the evaluation of academic standing, computation of grade point average, and graded hours. Details regarding course Withdrawal Fail dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Fail Period if they have an active registration hold on their record.

Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Hardship Withdrawal
During and after the Withdrawal Fail Period, it may be necessary for a student to withdraw from all courses for the semester due to a significant personal hardship (e.g., medical or family emergency, prolonged illness, other medical or traumatic event). In these situations, students are able to petition for a Hardship Withdrawal from courses through the Office of the Dean of Students or the Hardship Withdrawal Committee. Each Palmetto College Campus has an equivalent hardship withdrawal process for managing petitions from students enrolled on their campus.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted during the Withdrawal Fail Period until the last day of courses for the semester will be reviewed by the Office of the Dean of Students. Approved petitions will be submitted to the Office of the Registrar for grade assignments of W for all courses that semester on the student’s transcript.

The Office of the Dean of Students will notify the student’s instructors and their home college of the withdrawal.
Hardship Withdrawal petitions, including verified documentation of hardship, submitted after the last day of courses for the semester will be reviewed by the Hardship Withdrawal Committee that must include faculty and college/school representation. Approved petitions will be submitted to the Office of the Registrar for grade assignments of W for all courses that semester on the student's transcript.

Prior to a Hardship Withdrawal decision being made, all documentation is subject to verification by the Office of the Dean of Students and/or the Hardship Withdrawal Committee, including but not limited to class attendance, class participation, or supporting documentation. If false documentation or misrepresented information is submitted, students will be referred for alleged violation of the UofSC Honor Code and the Hardship Withdrawal request will be denied.

A Hardship Withdrawal to selectively withdraw from some courses, while remaining enrolled in other courses, will be permitted only under exceptional circumstances and must be approved by the Office of the Dean of Students in consultation with appropriate colleges/schools. The Office of the Dean of Students will submit a report of selective withdrawal decisions for verification to the Hardship Withdrawal Committee at the end of each semester.

Information regarding the University's Withdrawal Refund Appeals procedures can be found in the Fees and Refunds section of the bulletin.

**Title IX Obligations**
Information contained in Hardship Withdrawal petitions is private and not shared with instructors, departments, or colleges/schools outside of the Hardship Withdrawal Committee. However, in accordance with the provisions of Title IX of the Education Amendments Act of 1972 and University policy, if sexual misconduct information is included in a student’s petition, the Office of the Dean of Students and/or the Hardship Withdrawal Committee is obligated to report the matter to UofSC’s Title IX coordinator.

**Withdrawing via Self-Service Carolina**
Students can withdraw for the semester by withdrawing from all courses on Self Service Carolina. Students are encouraged to consider the Hardship Withdrawal Process if they are withdrawing during the Withdrawal Fail Period.

**Active Duty Military Withdrawal**
Students in the National Guard or armed forces reserves who are placed on active duty by order of the president of the United States or the governor of their state should pursue withdrawal from courses according to the provisions of the University’s policy titled “Withdrawal of Students Called to Active Military Service” (ACAF 3.05 (http://www.sc.edu/policies/ppm/acaf305.pdf)). Active duty military personnel who are reassigned during an academic term may also invoke the provisions of this policy.

1 Specific dates for each Part of Term may be found on the Office of the Registrar website.

**Indebtedness**
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

**Attendance Policy**

**Class Attendance**
Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in whatever class discussion may occur.

Absence from more than 10 percent of the scheduled class sessions, whether excused or unexcused, is excessive and the instructor may choose to exact a grade penalty for such absences. It is of particular importance that a student who anticipates absences in excess of 10 percent of the scheduled class sessions receives prior approval from the instructor before the last day to change schedule as published in
the academic and refund calendars on the registrar's website (http://registrar.sc.edu/).

It must be emphasized that the "10 percent rule" stated above applies to both excused and unexcused absences. Faculty members should notify classes, specifically in the course syllabi, of the attendance policy which they intend to follow in each class, but it cannot be more restrictive than the "10 percent rule". It is also recommended that the faculty include a policy statement in their syllabi requesting students to meet with the instructor early in the semester to discuss the consequences of potential excessive absences due to participation in University-sponsored events.

Faculty should consider the following events or circumstances as potentially excusable absences:

- participation in an authorized University activity (such as musical performances, academic competitions, or varsity athletic events in which the student plays a formal role in a University sanctioned event)
- required participation in military duties
- mandatory admission interviews for professional or graduate school which cannot be rescheduled
- participation in legal proceedings or administrative duties that require a student's presence
- death or major illness in a student's immediate family
- illness of a dependent family member
- religious holy day if listed on www.interfaithcalendar.org (http://www.interfaithcalendar.org)
- illness that is too severe or contagious for the student to attend class
- weather-related emergencies

The Student Ombudsperson in the Division of Student Affairs is available to assist faculty members with obtaining or verifying documentation when necessary. The faculty member has complete discretion regarding the specific nature of any accommodation offered in the event of an excused absence. Students should notify faculty members at least two weeks prior to the absence when possible. In all cases, students must contact the faculty member to request an accommodation upon return to class.

**Examination Policies**

**Final Examinations**

Final examinations for spring and fall semesters are held during a seven-day period at the close of each semester. Summer examinations are held during a two-day period at the close of each session. Semester examination schedules are published on the registrar's Web site under the "Calendar" link. The results of these examinations, combined with the grades for class performance, determine the reports given at the end of the semester. No final examination may be held outside of the stated time without the special permission of the dean of the college concerned. Reading Day is specified in the University calendar and no exams, quizzes or required class attendance may be scheduled for that day.

In any course or laboratory which meets two or three times per week, no quiz, test, or examination may be given during the last two class meetings prior to the regularly scheduled examination period. In any course or laboratory which meets once a week, no quiz, test, or examination may be given during the last two class meetings prior to the regularly scheduled examination period. In any course or laboratory which meets once a week, no quiz, test, or examination may be given during the last three class meetings prior to the regular examination period. Self-paced courses are exempt from this regulation.

If an instructor teaches more than one section of the same course, students may transfer from one examination section to another with the instructor's permission.

Students who are absent from any final examination will be given the grade of F on the course if they have not offered an excuse acceptable to the instructor. If excused, they will be assigned a grade of I (see "I" entry under "Grading System"), and may complete the course under the conditions specified by the instructor in the "Assignment of Incomplete Grade" form.

Re-examinations for the purpose of removing an F or raising a grade are not permitted.

**Graduating Seniors**

No early examinations are given for graduating seniors. Students who have submitted a degree application may attend the graduation ceremony. Diplomas are mailed after final examinations and after a student's dean has verified that all degree requirements have been met.

**Deferred Examinations**

A student with excused absences from final examinations in one semester has the privilege of deferred or special examinations and may take the deferred examination at the next regular examination period, with credit for semester standing provided the examination is taken at the convenience of the professor. The examination must be taken within one calendar year from the time that the absence was incurred. Deferred examinations will be granted only in case of absence certified as unavoidable because of sickness or other cause, rendering attendance at final examinations impossible.

**Grading Policies**

**Grading System**

Enrollment in a course obligates the student not only for prompt completion of all work assigned but also for punctual and regular attendance and for participation in whatever class discussion may occur. It is the student's responsibility to keep informed concerning all assignments made. Absences, whether excused or unexcused, do not absolve the student from this responsibility.

Students' grades in their courses are determined by class standing and examination grade, combined in such proportion as the professor may decide.

Class standing is determined by the quality of a student's work and the regularity of attendance in lectures and laboratory sessions or other exercises of the course. Grading systems in graduate and professional schools are described in the appropriate bulletins.

A, B, C, D represent passing grades in order from highest to lowest. B+, C+, D+ may also be recorded. F represents failing performance.

S and U indicate, respectively, satisfactory (passing) and unsatisfactory (failing) performance in courses carried under the Pass-Fail option. The S/U designation is used also for some research courses, workshops, and seminars in which the regular academic grades are not used. The use of the Pass-Fail grading option in such courses is indicated in their bulletin descriptions. No course carried under the Pass-Fail option will affect a student's grade point average or the evaluation of suspension conditions.
FN (Failure-Non Attendance) and UN (Unsatisfactory-Non Attendance) grades are assigned to students who never attended or have stopped attending class but have not officially dropped or withdrawn. Faculty are required to provide a last date of attendance when assigning this grade. The grade and the last date of attendance are used in determining the recalculation of awarded funds for financial aid recipients. Reporting the last date of attendance is critical to avoid potential financial liability for the institution.

FN and UN grades are displayed and calculated as F and U grades on the official transcript.

WF is assigned for student withdrawal from a course after the penalty deadline prescribed in the academic and refund calendars on the registrar's Web site. (See section on "Dropping A Course.") The grade of WF is treated as an F in the evaluation of suspension conditions and grade point average computation.

W is assigned for student withdrawal from a course after the late registration period but before the penalty date. Courses dropped during the late registration period (as published in the academic and refund calendars on the registrar's Web site) will not be recorded on a student's permanent record. In exceptional cases, the grade W will be used after the first seven weeks of a semester, primarily in cases of withdrawal from the University or from a course for medical reasons. (See section on "Dropping A Course.") A grade of W will not enter into the evaluation of suspension conditions or in grade point average computation but will be recorded on a student's permanent record.

I, Incomplete, is assigned at the discretion of the instructor when, in the instructor's judgment, a student is unable to complete some portion of the assigned work in a course because of an unanticipated illness, accident, work-related responsibility, family hardship, or verified learning disability. The grade of I is not intended to give students additional time to complete course assignments unless there is some indication that the specified condition or event prevented the student from completing course assignments on time. By arrangement with the instructor, the student will have up to 12 months in which to complete the work before a permanent grade is recorded. Re-enrolling in the course will not make up an Incomplete. An Assignment of Incomplete Grade form (AS-5) must be completed by the instructor and submitted to the Office of the University Registrar explaining the reason for the I and conditions for make-up. A grade of I is not computed in calculating a student's grade point average. After 12 months an I that has not been made up is changed to a grade of F or to the back-up grade indicated by the faculty member on the Assignment of Incomplete Grade form.

T, a Graduate School symbol, is assigned to indicate enrollment in Thesis Preparation (799) and Dissertation Preparation (899). Courses with this symbol will be counted as hours attempted and hours earned only. Grade points will not be awarded. For unsatisfactory work the grade of U should be assigned. The grade of I cannot be assigned in courses numbered 799 and 899.

AUD indicates a course was carried on an audit basis. (See section on "Auditing" for more information.)

NR, No Record, is assigned in the event that the grade is not available at the time final grades are submitted. It is a temporary mark on the transcript and must be replaced by a grade. If replacement does not occur before the last week of the spring or fall semester following the term for which the grade was recorded, a grade of F will be assigned. The NR is ignored in computing the GPA.

Academic Honor Code Violation
A transcript notation on the graded course in which the violation occurred denotes “Honor Code Violation.”

Pass-Fail Grading
The Pass-Fail program is designed to encourage students to investigate fields outside of their major curriculum in which they have a specific personal interest without affecting their grade point average. The only grades assigned on courses taken under the Pass-Fail option are S and U; a grade of S indicates satisfactory performance, a grade of U indicates unsatisfactory progress. A student will be given credit for courses in which the grade of S is earned, but these courses will not affect the computation of the grade point average.

Specific provisions of the Pass-Fail program are as follows:
1. The Pass-Fail grading system is in effect for an indefinite period of time, subject to periodic review.
2. The Pass-Fail option is not available to undergraduate students whose semester or cumulative GPA is less than 2.00.
3. Students are permitted to exercise the Pass-Fail option only on free elective courses.
4. Students are permitted to take no more than eight courses on a Pass-Fail basis during their undergraduate career.
5. A student wishing to exercise the option must have the permission of the dean of the college and the student's academic advisor. The Pass-Fail Option form (AS-20) is used for this purpose.
6. The option may be elected or revoked by the student no later than the last date for withdrawing from the course without a penalty.
7. Normal prerequisites may be waived for students taking a course on a Pass-Fail basis.
8. Courses taken under this option will be excluded from the calculation of the grade point average.
9. A grade of S will be entered by the Office of the University Registrar for a regularly assigned passing grade; a failing grade will be registered as U.
10. No course carried on a Pass-Fail basis will be counted toward the hours required for either the President's or the Dean's Honor List.
11. A verified learning-disabled student may take on a Pass-Fail basis an elective or required course which is not in the major if the academic advisory plan so recommends the Pass-Fail option for that course. A student who desires use of this option must apply to the dean of the college at the beginning of the semester. With the approval of the academic dean, learning-disabled students may meet specific degree requirements with a satisfactory grade.

Spring 2020 Undergraduate Pass-Fail Grading
Approved by the UofSC Faculty Senate on April 1, 2020

To address complications presented by the COVID-19 pandemic, the Faculty Senate Steering Committee approved the following grading accommodations for undergraduate students enrolled in Spring 2020.

• All courses will be graded as originally planned according to grading criteria in course syllabi. After grades are submitted at the end of the semester, undergraduates can choose, on a course-by-course basis, to request a pass/fail grade for the Spring 2020 semester with the exception of Graduate or professional school courses, which can be taken as pass/fail only when deemed appropriate by the program or school Dean.
The following pass/fail scale will be used: Earned grades of A, B+, B, C+, and C will be replaced with S+, earned grades of D+ and D will be replaced with S, and an earned grade of F will be replaced with U.

If students select the S+/S/U grading scale for a course, points will not be factored into the GPA. Courses with S+ and S will count towards earned semester hours.

Courses graded with the S+/S/U scale, under this exception for Spring 2020, will count towards applicable curricular major, continuation, and graduation requirements. For example, if a course requires a C or better in a prerequisite, students selecting this alternative grading scale would need an S+ in the prerequisite course.

Faculty members will not be aware of students who select the pass/fail grading option when entering final grades. Grades will be entered in the format for which the course was approved.

Students who previously decided to take a course on a pass/fail basis will continue on a pass/fail basis using the University’s established S/U system (e.g., S is earned if the grade is D or above and U is earned for grades below D).

For the Spring 2020 semester, undergraduate students who choose to replace a course letter grade with the S+/S/U option must do so no later than July 1, 2020.

This process will occur through the Office of the University Registrar. A form will be available on the University Registrar website for the student to request that a letter grade be replaced with the S+/S/U scale.

UofSC will include a transcript note on all academic records, regardless of grading basis, indicating the extraordinary circumstances of the global public health emergency during Spring 2020.

Because some graduate and professional programs require letter grades to be reflected on transcripts, when necessary, students will be able to request an official letter attesting to the letter grade earned in any classes that were converted to S+/S/U. This letter would attest only to grades, not to GPA. We will ensure that those who need evidence of your academic achievements this spring will be able to get it. A form will be available on the University’s website for students to request these letters.

Students will be allowed to retake undergraduate courses in which they earned an S+, S, or U during Spring 2020. Any undergraduate courses retaken under this provision will not count towards the number of courses currently allowed by the current course grade forgiveness policy. In addition, students who were retaking a class for grade forgiveness in Spring 2020 can retake the class another semester, without penalty.

**Course Grade Forgiveness**

It is the policy of the University of South Carolina that every currently enrolled, fully admitted, degree-seeking undergraduate earning a D+, D, F, or WF in a University course may take up to two undergraduate courses for a second time for the purpose of grade forgiveness. Both the first and second grades shall appear on the University permanent record, but only the second grade will be used in computing the University of South Carolina cumulative grade point average. An explanatory notice will appear on the record. Once grade forgiveness is applied to a repeated course, the action may not be revoked.

An eligible student wishing to apply the course grade forgiveness policy to a course enrollment may do so at any time during his/her undergraduate enrollment, but no applications will be honored after the degree is awarded. Grade forgiveness can only be applied once per course for a maximum of two courses (not to exceed 8 credits) on a student’s undergraduate academic record, without regard to the number of degrees sought. Under the grade forgiveness policy, the forgiven and repeated class must be taken at the University of South Carolina-Columbia campus or a Regional campus. Courses transferred from other institutions are excluded from this policy.

This policy does not preclude students from repeating classes multiple times, in accordance with program requirements, but only the second attempt at the class may forgive the original grade of D+, D, F, or WF. Only a regular letter grade can replace a forgiven grade. Grades of W, I, S, U, or AUDIT may not replace previous grades. Grades carrying an honor code violation sanction of X are not eligible for grade forgiveness.

Established requirements for repeating classes, admission to, or progression in, specific academic programs of the University take precedence over the grade forgiveness policy. Program or progression grade point averages are not affected by this policy. Refer to the guidelines for each program for specific requirements. Courses intended to be repeated for additional credit, such as research or applied music, are not eligible for grade forgiveness. Semester honors (dean’s or president’s honor list), or academic standing (scholastic deficiency, probation, suspension), or previous grade point totals will not change retroactively as a result of applying this policy.

Students who have been granted academic forgiveness to reset the grade point average after readmission are not eligible for course grade forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

An eligible student wishing to apply the grade forgiveness policy (http://www.sc.edu/about/offices_and_divisions/registrar/transcripts_and_records/grade_forgiveness/) may begin the process by reading the criteria which must be met and completing the necessary documentation in order to apply grade forgiveness.

Note that Academic Forgiveness is not the same as Grade Forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

**Grade Reports**

Students’ grades are reported on Self Service Carolina. Students can also access grade reports in person at the Office of the University Registrar.

**Grade Change Policy**

Grade changes based on transcription or computation errors shall be reported directly to the Office of the University Registrar on the appropriate grade change form signed by the instructor and the head
of the student’s academic unit. Any request for a grade change must be submitted by the instructor no later than one calendar year from the date on which the grade was reported. Beyond this period, grade changes will be considered only in exceptional circumstances and must be handled through the petition procedure of the student’s college. Any other grade change request resulting from enrollment discrepancies, medical withdrawals, or perceived administrative errors (changes to W, WF, audit, credit, S/U, or I) must be submitted on the appropriate forms with signatures and documentation to the dean of the student’s college for review through the petition procedure. This does not apply to the routine makeup and extension of an I (incomplete) and posting of a permanent grade to replace the recorded NR mark. An I turns into a grade of F after one year; an NR turns into a grade of F after one semester. Special makeup work or examinations to change grades already recorded are not permitted.

Academic Standards Policies

Academic Standards
The following standards for continuing at the Columbia and regional campuses of the University of South Carolina apply to all undergraduate students who first enroll at the Columbia and regional campuses of the University in the fall 2008 semester or thereafter, are admitted to the Columbia and regional campuses of the University in an undergraduate degree program in the fall 2008 or thereafter, or are enrolled in the fall 2010 semester or thereafter, regardless of when first enrolled at the University. Administration of these regulations is the responsibility of the academic deans, who are not empowered to waive any of the provisions.

Academic Review
The record of every undergraduate student will be reviewed at the end of each fall and spring semester. Many of the individual colleges of the University have higher academic requirements for students to continue in their degree programs. However, no student will be suspended academically from the University unless he/she fails to meet the standards specified here.

Academic Standing
A student’s academic standing is based on his/her “Total Institutional GPA” and “Total Institutional GPA Hours” which can be viewed in Self Service Carolina at the end of a student’s “Unofficial Academic Transcript” under the heading, “Transcript Totals (Undergraduate).”

Academic Probation
When a student’s Total Institutional GPA at the end of any semester is less than a 2.00, he or she is placed on academic probation.

First-year Freshmen Academic Recovery Program
First-year freshmen who have less than a 2.00 Total Institutional GPA at the end of their first semester of collegiate enrollment are considered at risk. During the first six weeks of their second semester, these students must participate in an academic coaching session before being eligible to register for courses for the third semester. These sessions will provide students with assistance in academic planning, general advisement, major exploration, degree audit, self-assessments, and success strategies. This requirement is in addition to any made by the student’s college, school, or academic program.

Removal from Academic Probation
When a student’s Total Institutional GPA at the end of any semester is a 2.00 or above, he or she is not on academic probation.

Continuing on Academic Probation
Any student who is on probation at the beginning of a fall or spring semester must achieve a certain Total Institutional GPA at the end of that semester in order to avoid suspension. A student may also continue on probation and avoid suspension if the semester grade point average is 2.50 or greater. Standards for continuing on probation are based on the cumulative grade hours the student has attempted at UofSC. The chart below shows the grade point averages required in order to avoid suspension.

<table>
<thead>
<tr>
<th>Total Institutional GPA Hours</th>
<th>Placed on Probation</th>
<th>Continue on Probation (avoid suspension)</th>
<th>Removed from Probation</th>
</tr>
</thead>
<tbody>
<tr>
<td>12-35</td>
<td>below 2.00 Total Institutional GPA</td>
<td>1.500 or higher Total Institutional GPA</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
<tr>
<td>36-71</td>
<td>below 2.00 Total Institutional GPA</td>
<td>1.800 or higher Total Institutional GPA</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
<tr>
<td>72+</td>
<td>below 2.00 Total Institutional GPA</td>
<td>only with semester reprieve (see below) or by college petition</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
</tbody>
</table>

Semester Reprieve: Regardless of the Total Institutional GPA, a student may continue on probation and avoid suspension if the Current Term grade point average is 2.50 or greater.

First Suspension
Students unable to meet the standards shown above are suspended from the University of South Carolina for one fall or spring semester and the contiguous summer (approximately eight months). Students have the right to appeal their suspension to the petitions committee of the college or school in which they were enrolled when suspended.

Returning After First Suspension
After the suspension has been served, a student will be considered for readmission by the college or school to which the student is seeking admission. A student readmitted following suspension continues on probation and is reviewed for suspension at the end of each fall and spring semester. A Current Term grade point average of 2.50 or higher must be achieved each semester until the Total Institutional GPA reaches the level above which suspension would occur (see chart).

During the first six weeks after returning from a first suspension, students must participate in an academic coaching session before being eligible to register for courses for the following semester. These sessions will provide students with the resources they need to meet their academic goals.

Returning after Subsequent Suspension
The duration of the second suspension is indefinite, and the student can be considered for readmission only after being approved for reinstatement by action of the petitions committee of the college or school to which the student is seeking admission. A favorable decision by the committee is unlikely within two years of the suspension.

Earning Academic Credit While on Suspension
A student on suspension is given an opportunity to reorder priorities and reassess his or her situation before returning. While serving suspension, a
student may not be admitted to, or continue in, any academic program of the University. Credit earned at any other institution while a student is on suspension from the University may not be applied toward a degree from UofSC, unless approved by the Standards and Petitions Committee of the college to which the student is readmitted. Prior approvals for transient study will be revoked for suspended students.

Retention in Degree Programs

Students are reminded that the above regulations are for all undergraduate students in the University. Many colleges and schools offer degree programs that have more stringent requirements for retention in those programs. Failure to meet the academic requirements of those degree programs may result in the student being asked to leave that program. Students should consult the colleges and schools section of the Academic Bulletin to review the specific degree retention requirements.

Academic Progression and Program Dismissal

Students dismissed from a program for failing to meet academic progression requirements will be reassigned to Undergraduate Studies and will be advised by the University Advising Center. Students assigned to Undergraduate Studies will have a maximum of two semesters before declaring a new program of study. At the conclusion of two semesters enrolled at full-time status, students who have not declared a major/program within a degree-granting college will have a registration hold placed and will be unable to enroll in coursework.

Petition Procedures

In addition to previously specified provisions by which a student may petition to waive the application of this suspension policy, a student suspended by this policy has the right to petition to the appropriate college scholastic standards and petitions committee to waive the application of the suspension rule at any time. Students placed on first suspension who wish to petition for a waiver of the suspension rule may petition only the committee of the college in which they were enrolled at the time of suspension.

Academic Forgiveness Policy

Academic Forgiveness for Former UofSC Students with Less than a 2.00 Cumulative GPA

Under certain conditions undergraduate students may apply for academic forgiveness. Academic forgiveness allows for a recalculation of the GPA to permit a student to graduate or pursue a specific academic program. In order to apply for academic forgiveness all of the following conditions must be met:

1. The student has not been enrolled at any campus of the University of South Carolina for at least 48 months.
2. The student must have been readmitted to a degree program at the University of South Carolina and must have completed at least 24 hours of approved graded course work prior to applying for academic forgiveness.
3. After readmission the student must have earned a cumulative GPA of at least 2.00 and met the progression requirements of the degree program.
4. The student must never before have been granted academic forgiveness.

A student who has met these conditions and desires academic forgiveness must submit a written request for academic forgiveness to the dean of the college in which the student is enrolled. After verification of the student’s eligibility, the dean shall inform the registrar that academic forgiveness has been granted to the student.

Once academic forgiveness has been granted, the following apply to the student’s academic record:

1. All curriculum requirements will be in accordance with those in force at the time of or subsequent to the student’s readmission.
2. The student may not receive Academic Honors upon graduation.
3. The student’s grade point average is recalculated beginning with the semester in which the student was readmitted to the University. All academic hours attempted at USC will be calculated toward the GPA. The student’s GPA will be recalculated using the GPA after readmission and a 2.00 on all grade hours taken prior to readmission.
4. Courses in which the student received a passing grade prior to readmission may, at the discretion of the dean, be applied toward the degree.
5. The following statement shall appear on the academic record and transcript of any student granted academic forgiveness: “This student was granted academic forgiveness under the University of South Carolina Academic Forgiveness Program. The GPA has been recalculated under the criteria of this program to allow for eligibility for graduation.”
6. The permanent academic record will remain an unmodified record of all work attempted at the University of South Carolina.

Academic Honors Policies

Honor Lists

Each semester academic achievement is recognized by entering on the President’s Honor List or the Dean’s Honor List the names of students who, at the end of the previous semester, attained the following standards:

President’s Honor List: a grade point average of 3.50 or higher earned on a minimum of 12 credited semester hours.

Dean’s Honor List: a grade point average of 3.00 or higher earned on a minimum of 12 credited semester hours.

No course carried on a Pass-Fail basis, by examination, correspondence, or exemption will be counted toward the 12 hours required for either the President’s or Dean’s Honor List.

Graduation with Honors

Graduation with honors will be based on a student’s Total Institutional GPA. Honors designators are determined at the time of graduation and may not be applied retroactively.

To graduate with such honors, a student must have earned at least 60 credit hours applicable toward the degree in residence at the University, 30 credit hours for an associate degree. The following designations indicate a consistently high level of academic achievement at UofSC.

Baccalaureate Degree Designations
• Summa Cum Laude: a cumulative GPA of 3.95-4.00
• Magna Cum Laude: a cumulative GPA of 3.75-3.949
• Cum Laude: a cumulative GPA of 3.50-3.749

Associate Degree Designations

• Highest Honors: a cumulative GPA of 3.95-4.00
• High Honors: a cumulative GPA of 3.75-3.949
• Honors: a cumulative GPA of 3.50-3.749

With Honors from South Carolina Honors College: Any student who completes the requirements of the Honors College, regardless of the major or undergraduate degree, is awarded that degree “With Honors from South Carolina Honors College.”

With Distinction: Any student who earns an undergraduate degree and completes the appropriate requirements will be awarded graduation “With Distinction in [that major].” For details, refer to the degree requirements of specific majors

With Leadership Distinction: Any undergraduate student who completes Leadership Distinction requirements in community service, diversity and social advocacy, global learning, professional and civic engagement, and/or research as specified by the Provost’s Office, regardless of the major or undergraduate degree, is awarded that degree “With Leadership Distinction in [that track].” For further details, contact the Office of USC Connect.

Degree Conferral and Graduation Policies

In-residence Requirement

The last 25% of a student’s degree must be completed in residence at the University, and at least half of the hours in the student’s major courses and in the student’s minor courses (if applicable) must be taken at the University.

The chart below shows the minimum number of hours required to be completed in residence based on to the total number of hours required for a degree.

<table>
<thead>
<tr>
<th>Total Number of Hours Required for Degree</th>
<th>Minimum Number of In-residence Hours</th>
</tr>
</thead>
<tbody>
<tr>

<td>35 Hours</td>
</tr>
<tr>
<td>141-144 Hours</td>
<td>36 Hours</td>
</tr>
</tbody>
</table>

Some programs impose greater student residence and/or major requirements.

Regardless of when students enter the University, they must complete the last 25% of the degree before graduation enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted. In addition, all degree applicants are urged to confer with the deans of their respective colleges about their programs and degree requirements prior to the beginning of their last semester of residence at the University.

“In residence” means that the student was regularly enrolled at UofSC; completed courses offered by Columbia or one of the other campuses of the University; was a member of a class which was supervised by a regular faculty member of UofSC; attended classes on a regular, pre-established schedule; and in other ways conformed to the requirements which are normally connoted by the term “in residence.” In-residence requirements may not be met by courses for which credit is earned by exemption or exam, courses taken by correspondence, or courses for which transfer credit was awarded. Courses taken under the Pass-Fail option meet in-residence requirements. If the student has not established credit for the prescribed number of hours in residence, then the student is not eligible either for graduation with honors or for graduation on the basis of having completed 25% of the degree during the final semesters at the University.

Application Process

All candidates for degrees and certificates must file formal applications during the last academic term before graduation with the deans of their respective colleges on forms obtained at the Office of the University Registrar or the appropriate dean’s office. Applications must be filed by the third week of the fall or spring semester in which the degree is to be awarded or within the first 10 days of the first summer session. If the student is not enrolled during the first summer session, the application must be filed within the first week of the second summer session for the student to graduate at the summer commencement.

Graduation Requirements

In order to be eligible for graduation, students must meet all course requirements, be in good academic standing, meet any departmental or program requirements, and have a cumulative GPA of at least 2.00 on all work attempted at UofSC.

Second Baccalaureate Degree

At times the University confers a second baccalaureate degree upon candidates who have completed requirements for the second degree.

The following specifications for a second baccalaureate degree apply:

1. The student must meet admission and progression requirements for the second degree, and must have received formal approval to pursue the second degree from both deans.
2. All requirements for the second degree must be fulfilled.
3. The additional requirements for the second degree must include a minimum of 24 semester hours beyond those required for the first degree.
4. No course that satisfies a general education, major, minor, cognate, or requirement other than a free elective for the first degree may be applied to the major field of the second degree.
5. The student must file a separate degree application for the second degree with the appropriate college or school.

Under this policy a student may apply for two degrees at one time or separately. In either case, the student receives two diplomas. It should be noted that a second major does not by itself lead to the conferral of a second degree.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.
Second Major
In some degree programs, a student may elect a second major. Normally, second majors are possible only in degree programs with similar general education requirements. The second major option is not available in all colleges.

1. The student must meet admission and progression requirements for the second major.
2. The student must have received approval from both deans for a second major.
3. All requirements for the second major must be fulfilled.
4. All general education and special departmental requirements normally associated with the second major must be fulfilled.
5. In cases where the first major and the second major lead to different degrees, the student must designate one as the official degree of record. A second major eliminates the cognate requirement; however, special departmental requirements normally completed as part of the cognate are not waived.

Fulfillment of the requirements for a second major are indicated on the student’s official transcript upon graduation. No notation for a second major is placed on the official transcript for course work completed after graduation.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

Indebtedness
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

Records, Transcript, and Enrollment Certification Policies
Change of Name or Address
It is the obligation of every student to notify the Office of the University Registrar of any change in name or address (including electronic address). Failure to do so can cause serious delay in the handling of student records and in notification of emergencies. Change of name may only be accomplished by presenting proper legal documentation.

Transcripts
A transcript of a student’s record carries the following information: current status; a detailed statement of the scholastic record showing courses pursued with semester hours carried, semester hours earned, grades, grade points, grade point average, and system of grading; a permanent record of all failures, incomplete grades, and penalties (such as suspension); cumulative UofSC grade totals; and references to other college or universities attended, dates attended, and the total transfer credits accepted by the University of South Carolina.

Any student who needs a transcript or a certified copy of the end-of-semester grade report may complete a Transcript Request form or send a signed and dated letter containing all pertinent identifying information to the Office of the University Registrar. Official transcripts may also be requested online through Self Service Carolina (http://my.sc.edu). Without the exception of copies made for internal use, no copy of a student’s permanent record (transcript) will be released to anyone without the student’s written consent. In addition to the written consent, each transcript request should include full name or names used, student number, current mailing address, dates of attendance, location of attendance, and date of birth to assure proper identification of the record requested.

No transcript will be issued to a student who is indebted to the University.

No partial transcript will be issued.

The nonrefundable transcript processing fee is $12.

Enrollment Certification
Certification of enrollment is based upon the total number of credit hours for which a student is registered at the time of the certification request. Beginning and ending dates reported in enrollment certification conform to the official USC academic calendar dates for the term requested.

Indebtedness
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

Notification of Student Rights under FERPA
The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.

A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the University discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent. The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release
The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, service provider or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

- A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.
- To officials of other institutions in which the student seeks or intends to enroll provided that the student had previously requested a release of his/her record;
- To authorized representatives of the U.S. Department of Education, U.S. Department of Defense (Solomon Amendment), U.S. Attorney General, the Comptroller General of the United States, state education authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations; to the Department of Homeland Security (DHS) and its Immigration and Customs Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.
- In connection with a student’s application for, and receipt of, financial aid;
- To comply with a judicial order or lawfully issued subpoena;
- To parents of dependent students as defined by the Internal Revenue Code, Section 152;
- To appropriate parties in a health or safety emergency; or
- To the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.
- The University may disclose the result of a disciplinary proceeding to a parent or guardian so long as the student is under the age of 21 at the time of the incident and the proceeding has resulted in a violation of University drug or alcohol policies, or any federal, state, or local law.
- To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.

**Release of Directory Information**

In accordance with section 99.7 of the Family Educational Rights and Privacy Act (FERPA), the University of South Carolina provides students annual notification of their FERPA rights. The University of South Carolina has designated certain items as Directory Information. At the University of South Carolina, these items are as follows:

- Name
- Dates of Attendance
- Campus
- College or School
- Classification
- Primary Program of Study
- Full-time or Part-time Status
- Degree(s) Awarded Including Dates
- Honors and Award Including Dean’s and President’s List
- University Email Address
- City, State, and Zip Code Associated with a Student’s Permanent Address

The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information.

A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA.

**Academic Assessment Policy**

Assessment, in a university or college setting, can be interpreted to mean several things. Assessment can be the process of evaluating the success of a university in meeting its mission and goals (institutional assessment), or it can be the processes associated with evaluating student outcomes in relation to stated program goals (program assessment), or it can be course-embedded assessment techniques used to deliver information and/or evaluate student learning by observing students’ skills and abilities.

The University of South Carolina is committed to offering programs and activities that encourage students to develop both academically and socially. In order to evaluate the effectiveness of our efforts, faculty, administrators, and staff conduct ongoing assessments. The Office of Institutional Planning and Assessment assists the faculty, administration, and other staff in gathering and analyzing assessment data. Assessment, therefore, is the ongoing process of self-improvement through analyzing and evaluating all of our functions and activities.
Students, faculty, and staff play critical roles in the assessment process. Consequently, participation in assessment activities is a University priority and responsibility. The information gleaned from assessment activities is used for planning and program improvement. Many of the University’s assessment activities are mandated by external agencies. Therefore, all students wishing to receive a degree from the University of South Carolina must complete procedures required for the assessment of general education and those required by their major and/or area of concentration. If a student fails to participate in a required assessment activity, a hold may be placed on the student’s records.

Primary responsibility for the assessment of academic programs within the major or area of concentration is with the faculty of each academic unit. Information pertinent to assessment of the major or area of concentration is provided to students by the department from which the degree will be granted.

Primary responsibility for coordinating the assessment of general education is with the Office of Institutional Assessment and Compliance (http://www.ipr.sc.edu/). The faculty is actively involved in planning assessment and using the results of assessment to evaluate the effectiveness of general education. The assessment of general education is administered through the use of exams, interviews, surveys, questionnaires, or other instruments as developed by the faculty and Office of Institutional Assessment and Compliance.

The results of any activities used for program or general education assessment may not be used for promotion and/or tenure files or for annual performance evaluations or for the evaluation of any student's progress in a course or progress toward a degree. Assessment activities, however, are integral to the processes of teaching and learning.

For more information contact the Office of Institutional Assessment and Compliance (http://www.ipr.sc.edu/).

Student Life
Overview
An important aspect of university life, sometimes overlooked by students, is the rich opportunity to participate in and contribute to the extracurricular life of the campus. UofSC Lancaster encourages and fosters the growth and development of student organizations, clubs, publications, and student activities in general. Our campus provides the opportunity for every student to make important and noticeable contributions. Your ideas, contributions, hard work, and participation in student activities on this campus will be visible and deeply appreciated.

The following is a brief description of current or recently active organizations, clubs, and publications.

Student Activities and Organizations
Arts and Letters Society
The purpose of the society is to provide cultural activities on campus and sponsor trips to off-campus cultural events.

Baptist Collegiate Ministry
The purpose of the Baptist Collegiate Ministry (BCM) is to encourage students in their Christian faith through Bible study, prayer, and fellowship. Students are also encouraged to live out this faith through witness and service to others through missions. The BCM meets weekly and is open to students of any denomination.

Black Awareness Group
The Black Awareness Group provides an opportunity for any UofSC Lancaster student to plan and to participate in functions and activities directed toward promoting and creating a better understanding of African-American culture and its great heritage.

Campus Crusade for Christ
Campus Crusade for Christ exists to provide regular opportunities to study and discuss the Bible, worship, and pray in a group setting. This gives members chances for fellowship, encouragement, and spiritual development. Campus Crusade has an open-door policy. Everyone in the UofSC Lancaster community is welcome, and there are no "members" in the sense of meeting certain requirements or being accepted into membership.

Campus News
Campus News is a weekly newsletter containing information about campus events. The newsletter prints official communications and commentaries prepared by USCL students, faculty, or staff members. Student participation in this publication is strongly encouraged.

Gamma Beta Phi
The UofSC Lancaster chapter of the Gamma Beta Phi Society was chartered on November 22, 2002. Gamma Beta Phi is an honor and service organization for students in colleges and universities across the United States. It is nonsecret, nonprofit, and coeducational, and membership therein does not exclude a student from membership in any other organization. Only students meeting the minimum GPA requirement set by UofSC Lancaster are invited into the Gamma Beta Phi Society. Inductions are held in fall and spring. Gamma Beta Phi sponsors at least three educational service projects per year in order to fulfill the Gamma Beta Phi motto of progressus per eruditioneum (progress through education).

Honors Program
The UofSC Lancaster Honors Program was created to provide an enrichment opportunity for students who have potential for superior academic performance and who seek added challenge and scope in their studies. This program emerges out of our commitment to academic excellence and a belief that quality education must center on helping individual students to achieve their full potential. The honors program presents an opportunity for outstanding students to obtain challenging and stimulating interdisciplinary course work in a supportive environment.

Intramurals/Informal Recreation
Intramural and club sports activities at UofSC Lancaster afford all students the opportunity to enjoy athletic competition. The intramural program provides frequent events for teams and individuals. Clubs and organizations on campus are encouraged to enter representatives in these activities. Volleyball and basketball have been popular in the past. The Gregory Health and Wellness Center provides students, faculty, and staff with a variety of informal recreational activities, including: swimming, racquetball, volleyball, jogging, weight training, indoor soccer, and basketball. Students, faculty, and staff may use the center at no additional cost.

Peer Advisor at Lancaster
Peer Advisor at Lancaster (PAL) is the organization involved with new student orientation. PALs acquaint new students with campus services and activities. They work with the orientation director, faculty members,
staff, and administration during various projects and events. PALs receive a stipend each semester that pays a portion of their tuition. PAL applications are available in January. Selection of PALs is completed by February 28. The appointment is for one year.

Rotaract
Rotaract clubs are part of a global effort to bring peace and understanding to the world on the community level. Rotaract clubs organize a variety of projects and activities, depending on the interests of club members. Members gain professional business and leadership experience. Rotaract meets the first and third Wednesdays of every month.

Student Government Association
The Student Government Association (SGA) is composed of all registered students of the University of South Carolina Lancaster. Membership upon payment of semester fees (full- or part-time) is automatic. Members of the SGA are elected by the student body in two separate elections held in the fall and spring. Officers and representatives of SGA work closely with the administration and faculty to represent student interests and viewpoints. The SGA provides various programs and functions throughout the year, as well as chartering clubs and organizations and preparing, submitting, and administering the budget for student clubs, organizations, publications, and athletics. SGA meetings are held on a regular basis and all students are welcome to attend.

Social and Cultural Events
The Student Government Association funds a wide range of student activities each year.

Activities include picnics, dances, movies, ping-pong, and pool tournaments. SGA also sponsors several community service projects, including blood drives, recycling days, and Christmas and Easter parties for the UofSCL Child Development Center.

UofSC Lancaster also sponsors the annual Performance Series along with the Lancaster County Council of the Arts. Special guest lecturers, authors, and performers are often invited to appear for book signings and special engagements. Hubbard Hall Gallery exhibits the work of artists from the surrounding areas and other states. Exhibits change every four to six weeks. Black History month, sponsored by various campus and community organizations, is celebrated with a lineup of activities lasting throughout February.

Services

Academic Success Center
The Academic Success Center (ASC) is located on the second floor of Medford Library. The ASC’s hours are Monday-Thursday, 8 a.m.-9 p.m., Friday, 8 a.m.-4:30 p.m., and Saturday 2-6 p.m.

Students who use the ASC will have access to its tutors and a state-of-the-art computer lab featuring 24 Pentium 4 processor computers, which are available to students for course-specific or independent work.

Designed to help UofSC Lancaster students attain academic success, the ASC provides students with a variety of resources to support their academic pursuits, including one-on-one tutoring, computer-assisted instruction, instructional videotapes, supplementary handbooks and texts, and workbooks. The ASC works closely with faculty members to provide assistance that is linked to particular courses and offers discipline- and course-specific tutoring in math, foreign languages, and English. Peer writing consultants are available to work with students on writing assignments for any UofSC course, at any stage of the writing process. Students can also use the resources of the ASC to improve study and time-management skills.

Available free of charge to all UofSCL students, the services of the ASC are designed to help students make the most of their educational opportunities.

Bookstore and Campus Shop
In addition to offering new and used textbooks, the UofSC Lancaster Campus Shop provides many other services. Gamecock and UofSC Lancaster shirts, jerseys, jackets, decals, and many other items are available. Dissecting kits, laboratory aprons, and other academic items are offered along with a wide array of gift items in all price ranges.

Counseling Services
All currently enrolled students are eligible for counseling services. The goal of Counseling Services is to assist students in clarifying and resolving issues of personal, educational, and career concerns. All counseling is conducted in a confidential and supportive setting, providing students the opportunity to explore and evaluate information central to the helping process. Students may schedule an appointment by calling Counseling Services at 803-313-7112.

Office of Disability Services (ODS)
The Office of Disability Services operates under the provisions of Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (ADA). Any student who prefers to be registered as a student with a disability must be registered with the Office of Disability Services.

Disability status is not retroactive; therefore the University does not recognize an individual as someone with a disability during a time period in which he/she was not registered with the Office of Disability Services. Because disability status is not retroactive, it is important for any disabled student who prefers to register as a student with a disability to register for these services prior to his/her first semester of attendance. Required documentation is necessary for registration and accommodations, and the timeliness of registration is dependent upon the speed at which Disability Services is provided with the required documentation. Students can only register with disability services after they are admitted to the University.

The Office of Disability Services will make every effort to provide reasonable accommodations for qualified students with disabilities; however, registration as a student with a disability does not automatically guarantee accommodations. Accommodations are approved with appropriate documentation on a case by case basis.

In order to register as a student with a disability and apply for accommodations, students must first complete the “UofSCL Lancaster Disability Services Office Request for Services” form. Students must also provide documentation of their disability to the Office of Disability Services. Documentation requirements are specific to the disability, but in general documentation must be from a physician, licensed psychologist, or other person(s) licensed to make the appropriate diagnosis. Guidelines for documentation are provided by the ODS. These guidelines are used to determine whether a student is eligible to register as a student with a disability and also to determine what accommodations, if any, will be made based on the disability and its impact on the student’s major life functions. Documentation requirements, as well as the Online Disability Services Request for Services form, can be accessed at the Disability
Services page on UofSC Lancaster's website. In order to ensure that you obtain the specific documentation required, the Office of Disability Services recommends that you print the online guidelines and present them to the qualified professional providing your documentation. Students who have accessibility concerns with the online registration links should contact the Office of Disability Services at 313-7448 or visit Starr Hall 125a for assistance. Students may also e-mail the office at lancods@mailbox.sc.edu.

For a complete list of services regarding disability services at UofSC Lancaster, you may refer to the Disability Services website (http://uscblancaster.sc.edu/academics/Disability.pdf).

Campus Health Services

Campus Health Services (CHS) is housed in the J.M. White Clinic in the Carole Ray Dowling Health Services Center. Services are available to students, faculty, and staff and stress education and the development of decision-making skills relative to preventive medicine and wellness. Other services will be made available as needs are determined and funds are available.

Details regarding any of the services may be obtained from the health services office in the J.M. White Clinic.

Services currently available (fees apply to some services)

- blood pressure screening and follow-up
- cholesterol screening and follow-up
- diabetes screening
- total lipid profile (when indicated)
- nutritional counseling and weight control
- cardiopulmonary evaluation
- exercise program development
- coronary risk factor management

Gregory Health and Wellness Center

The Gregory Health and Wellness Center, located through the wooded area beside Hubbard Hall, offers free membership to all UofSC Lancaster students. In order to take advantage of this membership, students must bring proof of payment for the current semester to the Membership Services Office and complete a release forms. After all paperwork is completed, students will receive a membership card to access the facility. Students must show this membership card each time they enter the Gregory Health and Wellness Center. Special summer memberships are also available.

Student membership gives you access to a basketball court, indoor track, four racquetball courts, a 25-meter pool, free-weight room, aerobic equipment, and the Khoury Health Fitness Area. Exercise programs are available by appointment with one of our exercise specialists. Located outside the facility are six tennis courts. Exercise consultations are available by appointment by contacting the center office.

Basketballs and racquetball racquets are available for checkout at the entry desk. Racquetball courts are available by reservation.

Participants must supply their own towel and lock. Lockers are available on a daily basis or leased by the semester.

The center offers employment opportunities in the following areas: office, entry control, and pool.

Student Conduct Statement

Recognizing that freedom of individuals is never absolute but is subject to reasonable restrictions, this statement is intended to set forth general principles of student conduct. A student is any person who is admitted, enrolled, or registered for study at the University of South Carolina for any academic period. Persons who are not officially enrolled for a particular term but who have a continuing student relationship with the University of South Carolina are considered students.

All members of the University community share a common and often heavy responsibility to maintain a climate suitable to a community of scholars and to refrain from conduct which obstructs the work of the University, interferes with the lawful exercise of rights by other persons, endangers the safety or security of other persons or their property, prevents the proper use of the facilities of the University, or impairs the maintenance of an environment that is essential to the operation of an institution of higher learning.

Those individuals who refuse to conduct themselves in a manner consistent with the above statement may be subject to criminal and/or civil proceedings, as well as the following University sanctions.

Permanent Suspension: Dismissal from the University without leave to apply for readmittance.

Suspension for a Period of Time: Denial of enrollment, attendance, and other privileges at the University for a given period; leave to reapply for admission at termination of the period may be granted with or without qualifications.

Interim Suspension: Interim suspension is an action requiring that a student immediately leave the campus and University property. It may be imposed by the dean when there is reasonable cause to believe, based on available facts, that the student is an immediate threat to the safety of self, other members of the University community, or University property. Any student who is suspended on an interim basis and returns to the campus or University property during the suspension shall be subject to further University action and may be treated as a trespasser. When a student is suspended on an interim basis, the student is given notice containing the reasons for the suspension, the duration and any special conditions that apply, and a copy of the interim suspension policy.

Policy Statements

Academic Disturbance Policy

Disturbances during classes, labs, field trips, lectures, presentations, and other academic activities may result in one or more of the following sanctions: verbal reprimand, written warning, permanent dismissal from class, suspension from the University for a period of time, or permanent suspension from the University. If a student is dismissed from a class after the last day to withdraw from classes, the student will receive a grade of F in the class. A student may appeal verbal reprimand, written warning, or permanent dismissal from the class to the associate dean for academic affairs. The student may appeal suspension from the University for a period of time or permanent suspension from the University to the vice provost for regional campuses.

Alcohol Policy

The facilities, grounds, and parking lots at UofSC Lancaster are patrolled as public areas where open containers, sale, consumption, or underage possession of alcohol is illegal unless otherwise designated by permit. Persons not in compliance with the law are subject to arrest, prosecution, and loss of use of University facilities. Students are also subject to
University sanctions for noncompliance. In order to comply with South Carolina alcohol legislation, the UofSC Lancaster Student Government Association does not permit or otherwise provide alcohol at student activities.

Crime Statistics Policy
The crime statistics policy is available in the UofSC Lancaster Student Handbook. The policy details accident, incident, and security procedures.

Drug Policy
Use, possession, sale, or purchase of drugs on or adjacent to University property may result in criminal prosecution and University sanctions, including, but not limited to, permanent expulsion from the University. University and community services to assist individuals with alcohol and drug dependency problems are available: USC Lancaster Counseling Services, 803-313-7112, or Counseling Services of Lancaster 114 S. Main Street 285-6911

Physical Disabilities Statement
Mobility impaired persons whose disabilities substantially interfere with their ability to attend University-sponsored, public, ticketed events should provide a request for special accommodations as soon as possible but no later than two days before the scheduled date of the event. Such persons may be required to provide medical documentation if the disability is not obvious. Requests for special accommodations should be provided to: Tracey Craig (803-313-7448) for events at UofSC Lancaster, and the University of South Carolina Equal Opportunity Office (803-777-3854) for other facilities of the University of South Carolina. Every effort will be made to honor requests for special accommodations; however, if tickets to an event are unavailable to the general public, the University may not be able to honor the request.

Smoking Policy
Under the Clean Indoor Air and Promotion of Public Health Act it is unlawful for anyone to possess or smoke lighted smoking material in any form in schools, state government buildings, and other public areas. In accordance with this act, and with University of South Carolina policy, smoking and use of all tobacco products is prohibited in all UofSC-owned or leased buildings, buildings on university-owned land, all university vehicles and within 25 feet of a building or an air intake unit/opening. Violation of this policy and law may result in criminal prosecution and University sanctions.

Student Publication Policy
All student organizations, including student publications, must be recognized by the UofSC Lancaster Student Government Association, recommended by the acting Assistant Dean of Students, and approved by the Dean of UofSC Lancaster. Decisions regarding the content of student publications are the joint responsibility of the student editor and faculty/staff advisor and should adhere to South Carolina libel laws and community standards regarding published materials. In addition, all student publications must be approved by the Office of Public Information.

Parking Regulations
These regulations pertain to students, faculty, and staff of UofSC Lancaster.

Packing permits or decals must be displayed on vehicles of all students, faculty, and staff. Permits are issued during registration in the Business Office in Starr Hall.

Campus speed limit is 10 mph unless otherwise posted.

Fines will be imposed for the following violations:
- Parking improperly, $20.00
- Parking permit or decal not displayed, $10.00
- Parking in “No Parking” area, $20.00
- Parking in loading or service zone, $20.00
- Blocking sidewalk or driveway, $20.00
- Failure to register vehicle, $20.00
- Parking in or blocking “Handicap” space, (1st- $25.00, 2nd-$50.00, 3rd-$100.00, 4th-boot on vehicle)
- Boot removal fee, $50.00

Fines should be paid in the Business Office or mailed to the same within four school days of the violation. After four days, the fine will be increased by $1 and an additional $1 for each week thereafter.

Students with unpaid fines will not be allowed to register at any UofSC campus until the fines are paid. Student records will not be transmitted from the Registrar’s Office until fines are paid.

Initial questions regarding fines should be directed to the Business Office. Fines may be appealed, but the appeal must be made within four school days of the violation by notifying the Associate Dean for Student Services. The payment of fines is to be suspended until the appeal decision is rendered. During the time of an appeal, fines will not be subject to the $1 increase.

The income from the collection of fines will be deposited into the general University account to provide safety and security services.

Additional information can be found in UofSC Lancaster’s Student Handbook (http://usclancaster.sc.edu/studentlife/2010-2011StudentHandbook.pdf).

Carolina Creed
The community of scholars at the University of South Carolina is dedicated to personal and academic excellence.
Choosing to join the community obligates each member to a code of civilized behavior.

As a Carolinian...
I will practice personal and academic integrity;
I will respect the dignity of all persons;
I will respect the rights and property of others;
I will discourage bigotry, while striving to learn from differences in people, ideas and opinions;
I will demonstrate concern for others, their feelings, and their need for conditions which support their work and development.

Allegiance to these ideals requires each Carolinian to refrain from and discourage behaviors which threaten the freedom and respect every individual deserves.
**Expenses**

**Overview**

The University reserves the right to alter any of the following charges without notice. All charges are due and payable on the date that they are incurred or the due date indicated on the ticket, invoice, or statement. Checks or credit cards for the exact amount of the total charges should be made payable to the University of South Carolina.

Any student who has failed to pay all required registration fees on or before the last date to change course schedules (as indicated in the University calendar) may be dropped from class rolls. Any student who fails to relieve any other indebtedness to the University or to any of its auxiliary agencies on the date such obligations become due may not be permitted to remain in University residence halls or be issued a transcript, diploma, or degree.

**Legal Residency**

**Free Tuition**

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the code are reproduced below. Please note that these laws include free tuition only. Other academic fees and mandatory fees are still the responsibility of the student.

   a. A child of a wartime veteran, upon application to and approval by the South Carolina Department of Veterans Affairs, may be admitted to any state-supported college, university, or post high school technical education institution free of tuition so long as his work and conduct are satisfactory to the governing body of the institution, if the veteran was a resident of this state at the time of entry into service and during service or has been a resident of this state for at least one year and still resides in this state or, if the veteran is deceased, resided in this state for one year before his death, and provided the veteran served honorably in a branch of the military service of the United States during a war period, as those periods are defined by Section 101 of Title 38 of the United States Code and:
      i. was killed in action
      ii. died from other causes while in the service
      iii. died of disease or disability resulting from service
      iv. was a prisoner of war as defined by Congress or Presidential proclamation during such war period
      v. is permanently and totally disabled, as determined by the Veterans Administration from any cause
      vi. has been awarded the Congressional Medal of Honor
      vii. is missing in action, or
      viii. the applicant is the child of a deceased veteran who qualified under item (4) and (5).
   b. The provisions of this section apply to a child of a veteran who meets the residency requirements of Chapter 112 of this title, is 26 years of age or younger, and is pursuing any type of undergraduate degree.

2. **S.C. Code Ann. § 59-111-110 (Law Co-op. 1976)** No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty on or after July 1, 1964.

3. **S.C. Code Ann. § 59-111-10 (Law Co-op. 1976)** The first-place winner of the essay contest sponsored by the Governor’s Committee on the Employment of the Physically Handicapped, provided that he is qualified and in financial need, may receive a four-year scholarship. This scholarship may be cancelled if the recipient fails to maintain general scholastic and conduct standards established by the University.

4. **S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984)** Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or noncredit purposes on a space available basis without the required payment of tuition if these persons do not receive compensation as full-time employees.

**Academic Fees**

These fees reflect the actual costs for the 2010-2011 academic year. For current fee information please contact the UofSC Lancaster Business Office. The University reserves the right to alter any of the following charges without notice.

**Fall and Spring Semester Academic Fees**

**Twelve or More Semester Hours**

1. South Carolina residents, per semester ($2,748 for students who have earned less than 75 hours); ($4,067 for students who have earned 75 or more hours)
2. Nonresident, per semester ($6,876 for students who have earned less than 75 hours); ($8,151 for students who have earned 75 or more hours)

**Fewer than 12 Semester Hours**

1. South Carolina resident, per semester hour ($229 for students who have earned less than 75 hours); ($353 for students who have earned 75 or more hours)
2. Nonresident, per semester hour ($573 for students who have earned less than 75 hours); ($706 for students who have earned 75 or more hours)

**Summer Session Academic Fees**

The following fees are payable in full at the beginning of each summer term and should not be sent in advance. Students bringing checks from home should have separate checks in the exact amount to cover the expenses.

1. South Carolina resident, per semester hour ($229 for students who have earned less than 75 hours); ($353 for students who have earned 75 or more hours)
2. Nonresident, per semester hour ($573 for students who have earned less than 75 hours); ($706 for students who have earned 75 or more hours)

**Course Auditing**

Residents and nonresidents pay the same rate as they would pay for courses taken for credit.

**Correspondence Course Fees**

1. Course fee (college level, without video component), per semester hour ($125)
2. Courses including videocassette work will be assessed an additional charge.

**Application Fee**

Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. The fee for readmission applications is $10. The fee for non-degree seeking application is $10.

Fee waiver forms are accepted only by those who are eligible as follows:

- If you are a South Carolina resident who is currently enrolled in high school and you receive a fee waiver for the SAT or ACT. A fee waiver form, obtainable from your high-school guidance counselor, must be submitted with the admission application.
- If you are a high school senior who is a dependent of a full-time USC Lancaster faculty or staff member.

**Matriculation Fee**

A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students.

**Technology Fee**

Full time, $196; part time, $15 per hour.

**Challenge Examinations**

To establish undergraduate college credit without class attendance or to validate credits from a non-regionally accredited college-per semester hour, $25

**Cross-Campus Enrolled Students**

Courses originating from other UofSC campuses are made available to students enrolled at UofSC Lancaster. Students who enroll in courses originating from more than one campus pay fees based upon the originating campus’s fee schedule. Please refer to the Business Office website (http://usclancaster.sc.edu/busoffic/) to determine fees or log on to http://www.my.sc.edu to view your fees.

**Refund Policy**

1. **Policy**

   The University will refund a part of academic fees in certain cases:
   a. Changes in a student’s status, which may require a refund.
      i. Change in a full-time student’s schedule, which results in reclassification to part-time status
      ii. Change in a part-time student’s schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Drop/Withdrawal from the University
      iii. Cancellation of a class by the University

2. **Procedure**

   a. **Refund Requests**

      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

   b. **Determining the Refundable Portion Procedure**

      Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

   c. **Drop/Withdrawal Refund Policies**

      **Standard Refund Policy For Dropping/Withdrawal From The University**

      All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar’s Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund

      i. 100 percent if the student’s official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
      ii. 70 percent if the student’s official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
      iii. 50 percent if the student’s official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
      iv. 20 percent if the student’s official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

   d. **Refund Schedules**

      Refund schedules are relocated under the important deadlines on the Registrar’s website (http://usclancaster.sc.edu/busoffic/).

   e. **Return of Title IV Funds**

      Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University

      i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals.
Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.

ii. Title IV Refund Distribution

1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
   - Unsubsidized Federal Stafford
   - Subsidized Federal Stafford
   - Federal Perkins
   - Federal PLUS Loan
   - Federal Pell Grant
   - Federal Supplemental Education Opportunity Grant
   - Federal TEACH Grant
   - Federal Iraq/Afghanistan Service Grant
2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.
3. Exit interviews (http://www.sc.edu/financialaid/loan_counseling/default.html) are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

f. Appeals Process

A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal.

The Withdrawal Refund Appeals Committee reviews and acts on all appeals. Address appeals to:

Withdrawal Refund Appeals Committee
(Columbia Campus Only)
Office of the Registrar
University of South Carolina
Columbia, SC 29208
803-777-5555

Withdrawal Refunds

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes.

Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student’s withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

University Withdrawal Refund Appeal Procedures

The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University's published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Business Office and will be considered only in written form. A standardized appeal form must be submitted.
2. All requests for appeal must be submitted directly by the student through the Business Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official’s advice, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.
3. The appeal must be initiated during the semester for which the refund is requested.
4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.
5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.

6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.

7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Business Office.

Financial Aid and Scholarships

The financial aid programs of the University of South Carolina Lancaster make it possible for many students to attend the University who could not do so if left entirely to their own resources. Scholarships, grants, loans, and part-time employment are available to qualified undergraduate students.

Eligibility for most types of aid except academic scholarships depends on the applicant's financial circumstances. The University uses the Free Application for Federal Student Aid (FAFSA) to determine the amount of assistance each applicant is eligible to receive. We recommend that you complete the FAFSA via the Web at www.fafsa.ed.gov (http://www.fafsa.ed.gov); however, paper applications may still be obtained from most high-school guidance offices or any financial aid office.

General Guidelines for Financial Aid

1. The student should have applied and been accepted for admission to UofSC Lancaster as a regular student working toward a degree.
2. The student must have a high-school diploma or a General Education Development (GED) certificate.
3. Each applicant should complete the Free Application for Federal Student Aid (FAFSA) indicating the University of South Carolina Lancaster as the school of attendance.
4. A Student Aid Report (SAR) will be sent from the U.S. Department of Education to the student.
5. If corrections are necessary, the corrections should be made on the Web at www.fafsa.ed.gov. (http://www.fafsa.ed.gov.)
6. Information concerning the other federal financial aid programs, Federal Work-Study, Federal Pell Grant, Federal Perkins Loans, Federal Stafford Direct Loans, and Federal Direct PLUS Loans may be obtained from the UofSC Lancaster financial aid office.
7. The student must be making satisfactory academic progress toward completing a degree or certificate program.
8. The student must sign a statement of educational purpose/certification statement on refunds and default.
9. Awards of financial assistance are made in the summer prior to the beginning of the fall semester. An award notification will be sent to the student once the file is complete.
10. In order to be considered for some types of federal financial assistance, a student must be enrolled at least half-time (6 semester hours); the Pell Grant program is an exception to this requirement.

Financial Aid and the Extended Graduate Campus Program

Financial aid for graduate students who are admitted and registered through The Graduate School on the University's Columbia campus will have their financial aid administered by the Columbia campus financial aid office regardless of the student's campus location. As such, graduate students in this category should list the University of South Carolina Columbia as their school of choice on the Free Application for Federal Student Aid form. All financial aid related correspondence should be directed to the Columbia campus financial aid office.

Satisfactory Academic Progress

All students receiving federal financial aid must adhere to the University's policy on satisfactory progress. The intent of this policy is to ensure that students who are receiving federal and/or state financial aid for their education are making measurable progress toward completion of a degree in a reasonable period of time.

Undergraduate students are considered to be making satisfactory progress if they:

1. are admitted and enrolled as degree-seeking students;
2. meet the University standards for continued enrollment;
3. complete requirements for a degree within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any post-secondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree.
   b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed the equivalent of 180 hours for a four-year degree or 90 hours for a two-year degree.
4. earn no fewer than 67% of all coursework if enrolled as a full time student. The academic year for Satisfactory Academic Progress is comprised of the fall, spring, and summer terms.
5. maintain a cumulative grade point average (GPA) of 2.00 on all coursework.

Explanation

Under these standards, students will be ineligible to receive federal financial aid funds if any of the following occurs:

1. The total number of semesters of enrollment as a full-time student (12 or more semester hours attempted) exceeds 180 hours for a four-year degree or 90 hours for a two-year degree. These limits include all work done at any post-secondary institution, whether or not financial aid was received.

2. The total number of earned hours falls below the prescribed number based upon enrollment in undergraduate or graduate study.

3. Complete requirements for a degree or certificate within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any postsecondary institution does
not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.

b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.

4. The cumulative GPA falls below 2.00.

In other words, students who accumulate a yearly or cumulative GPD that subjects them to suspension, who have been enrolled for more than the equivalent of 10 full-time semesters for a four-year degree program, who do not maintain a cumulative GPA of 2.00 after attempting 48 credit hours, or who do not earn the minimum number of semester hours required will become ineligible to receive federal financial aid funds. This determination applies without regard to any financial aid award letter that may have been sent or received prior to the time the determination is made.

Financial Aid Programs Covered by These Standards
• Federal Pell Grant
• Federal Work-Study
• Federal Supplemental Educational Opportunity Grants
• Federal Perkins Loan
• William D. Ford Federal Direct Loan Program:
  • Direct Subsidized Loan
  • Direct Unsubsidized Loan
• Federal PLUS
• South Carolina LIFE Scholarship
• South Carolina Lottery Tuition Assistance Program
• South Carolina Need-Based Grant
• Other federal or state programs as required
• Some select private loans (as determined by the lender)

Appeals
Students who are ruled ineligible for financial aid may appeal this determination under specifically prescribed conditions. Deadlines for receipt of appeals are 20 days prior to the end of the semester for which aid is requested. Information concerning the appeal process is available in the financial aid office.

Reinstatement
Students shall be reinstated for financial aid eligibility at such time as they successfully complete sufficient hours and have a sufficient grade point average to meet the minimum requirements for eligibility as set forth in this policy.

Academic Forgiveness
The Satisfactory Academic Progress policy standards will not automatically apply to any hours forgiven under the University of South Carolina Academic Forgiveness Program. However, if you have been granted academic forgiveness under this policy you must contact the Financial Aid Office for further assessment.

Grants
Federal Pell Grant
The Federal Pell Grant is the largest federally funded student financial aid grant program. It serves as the foundation upon which all other undergraduate aid is awarded. Typically, it is available only to undergraduate students who have not earned a baccalaureate degree.

Federal Pell Grant eligibility is determined according to federal law and is based on the financial information you and your family provided on your FAFSA.

You are notified of your possible eligibility to receive a Federal Pell Grant via the Student Aid Report (SAR). The financial aid office will receive this information directly from the processor and determine the amount of your Federal Pell Grant. You should carefully review the information on your SAR and, if it is correct, keep it for your records. If you discover mistakes, follow the instructions and submit corrections as soon as possible.

If you or your family experiences a major change in your financial situation after your Pell Grant eligibility has been determined, you should notify the financial aid office immediately. A counselor will be able to determine if you qualify for an adjustment of your Pell Grant award and/or other financial aid.

Federal Supplemental Educational Opportunity Grant (FSEOG)
The FSEOG is a grant that does not need to be repaid. The financial aid office awards UoSC’s limited allocation of FSEOG funds. Recipients must be undergraduates who have not already earned a baccalaureate degree and who demonstrate exceptional financial need. FSEOG recipients must be eligible to receive a Pell Grant and have the lowest EFC’s from among those students being considered for an award.

South Carolina Educational Resources
State Need-Based Grant Program (SNBG)
The South Carolina Need-Based Grant is a state-funded grant for undergraduates attending public and independent colleges and universities within South Carolina. Recipients may not have already earned a baccalaureate degree. To be considered, you must be a South Carolina resident, be admitted or currently enrolled with a minimum GPA of 2.00, complete the FAFSA, demonstrate financial need, be of good moral character, and have no felony and/or alcohol or drug convictions for a period of one year. Additionally, to renew a state grant award, you must maintain an annual 2.00 GPA and complete 24 semester hours during the fall and spring semesters if enrolled full time or an equivalent number of hours based on enrollment if less than full time. Awards are made for the entire academic year (fall and spring semesters) only. The State Need-Based Grant does not need to be repaid.

South Carolina Legislative Incentives for Future Excellence Scholarship
The South Carolina Legislative Incentives for Future Excellence Scholarship (LIFE) was established by the General Assembly during the 1998 legislative session. To be eligible for a LIFE Scholarship, you must have graduated from a high school located in South Carolina on or after May 1995 and be a full-time, undergraduate, degree-seeking student. You must be a South Carolina resident for in-state tuition purposes at the time of enrollment and have no felony, alcohol, or drug convictions. If, however, you have been judged delinquent or have been convicted or pled guilty or nolo contendere to an alcohol or drug misdemeanor, you are ineligible for one calendar year from the date of the conviction. You must also be a U.S. citizen or a permanent resident under state laws. You may not be in default or owe a refund on any federal or state financial aid program.
If you are a first-time entering freshman, you must have graduated from high school with a minimum 3.00 cumulative grade point average (GPA) on a 4.00 scale.

For initial LIFE Scholarship eligibility, if a currently enrolled student, you must have earned a cumulative 3.00 UofSC GPA at the end of the academic year. You must also have earned a minimum of 30 credit hours, or the annual equivalent at all institutions attended, for the previous academic year if completing your first year; 60 credit hours must have been earned if completing your second year; and, 90 credit hours must have been earned if completing your third year. Students at UofSC Regional Campuses are only eligible to receive the LIFE Scholarship for four consecutive semesters.

You may receive the LIFE scholarship for not more than eight semesters for a four-year degree or 10 semesters for a five-year degree. Funds from this program may not be used for remedial courses or continuing education classes. If you are receiving South Carolina’s Palmetto Fellows Scholarship, you are not eligible for a LIFE Scholarship.

To retain the LIFE Scholarship you must earn an average of 30 credit hours for each academic year and earn a 3.00 cumulative UofSC GPA by the end of the academic year. The financial aid office, using data from the admissions and records offices, is responsible for awarding LIFE Scholarships.

Please note that the LIFE Scholarship statutes and regulations are subject to change by the South Carolina Legislature.

**South Carolina Lottery Tuition Assistance Program**

During the 2002 legislative session, the South Carolina General Assembly established the Lottery Tuition Assistance Program. Its purpose is to provide resources that supplement, not supplant, existing resources for educational purposes to South Carolina’s students. The program assists students who wish to attend two-year public or independent college in the state. In calculating the amount awarded, any and all federal grants and need-based grants must first be awarded before determining the amount a student is eligible to receive. A student may receive up to the cost of tuition minus Pell, SEOG, and SNBG. The college at which the student is enrolled will notify each student of the exact award amount.

In order to qualify for lottery tuition assistance, a student must meet the following requirements:

- file the Free Application for Federal Student Aid (FAFSA) and complete the process to determine eligibility for federal student aid each academic year
- be a legal resident of South Carolina as defined in applicable state statues governing the determination of residency for tuition and fee purposes
- be enrolled at the time of the grant disbursement in a minimum of 6 credit hours for the term and be making satisfactory academic progress toward an associate’s degree
- verify that the student does not owe a refund or repayment on a state grant, Federal Pell Grant, or Federal Supplemental Educational Opportunity Grant (FSEOG) and is not in default on a loan under the Federal Perkins Loan or Federal Stafford Loan programs
- must not be eligible for or a recipient of the LIFE scholarship.

To retain program funds, a student must have a 2.00 GPA by the end of the academic year.

In addition, students shall not be eligible to receive lottery tuition assistance for more than one certificate, diploma, or degree earned within any five-year period.

The financial aid office administers the South Carolina Lottery Tuition Assistance Program, and the exact award amount is dependent upon the number of eligible recipients and the amount of funding each academic year. Please note that program statutes and regulations are subject to change by the S.C. Legislature.

**Loans**

**The Federal Direct Stafford Loan Program (Subsidized and Unsubsidized)**

The Federal Direct Stafford Loan Program provides low-interest, long-term loans to eligible students through the U.S. Department of Education.

Subsidized Stafford Loans are awarded based on financial need. The federal government pays the interest on these loans while the student is enrolled in school at least half-time (6 semester hours), during the grace period and during deferment periods.

Unsubsidized Stafford Loans are not based on financial need. Interest begins accruing after the first disbursement. Students have the option of paying the interest monthly or quarterly while in school and during the grace period, or can have the interest capitalized and added to the principal amount of the loan upon entering repayment.

**Maximum Loan Amounts**

<table>
<thead>
<tr>
<th>Classification</th>
<th>Loan Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshmen</td>
<td>$5500 for dependent students (maximum $3500 subsidized)</td>
</tr>
<tr>
<td>Sophomore</td>
<td>$6500 for dependent students (maximum $4500 unsubsidized)</td>
</tr>
<tr>
<td>Junior and Beyond</td>
<td>$7500 for dependent students (maximum $5500 subsidized)</td>
</tr>
<tr>
<td>Graduate</td>
<td>$138,500 (maximum $65,500 subsidized)</td>
</tr>
</tbody>
</table>

**Aggregate Loan Limits**

<table>

<td>$31,000 for dependent students (maximum $23,000 subsidized)</td>
</tr>
<tr>
<td>Graduate</td>
<td>$138,500 (maximum $65,500 subsidized)</td>
</tr>
</tbody>
</table>

The graduate limit includes Stafford Loans received for undergraduate study.

**Federal Direct Parent Loan for Undergraduate Students (PLUS)**

Federal Direct Parent Loan for Undergraduate Students (PLUS) provides long-term loans to parents for their dependents through the U.S. Department of Education. Loan amounts under this program are limited to the student’s cost of education minus other financial aid awards.
Parents may be denied a PLUS loan due to adverse credit history. If the PLUS Loan is denied, the student is eligible for an additional Unsubsidized Loan.

The repayment period for each Direct PLUS Loan begins on the date the final loan disbursement is made. There is no grace period for Direct PLUS Loans. Parents have the option of postponing payments until six months after the student ceases to be enrolled at least half time. Parents must contact the Direct Loan Servicing Center to request a postponement of payments. Interest will accrue during the postponement period. The loans have a fixed rate of 7.9%. PLUS Loan funds will be disbursed in two equal payments, one at the beginning of each semester (Fall - August, Spring - January). One semester loans are disbursed at the beginning of the semester for the full loan amount.

South Carolina Teacher Loan Program
This program is available only to residents of South Carolina who are attending college for the purpose of becoming certified teachers employed in the state's school system in areas of critical need as defined by the State Board of Education. For loan recipients who become certified and teach in an area of critical need, the loan shall be cancelled at the rate of 20 percent for each full year of teaching, up to 100 percent. Loan recipients who do not become certified and/or do not teach in an area of critical need shall be responsible for repaying the entire amount of loan funds borrowed plus interest. Contact the Office of Student Financial Aid and Scholarships for application information and deadlines.

Federal Perkins Loan
The Perkins Loan Program is a low-interest (5 percent), long-term educational loan program available to both undergraduate and graduate students demonstrating exceptional financial need. This is a loan and must be repaid. Undergraduates may borrow up to $4,000 for each year of study and up to $20,000 to complete an undergraduate degree. Interest is not charged and repayment does not begin until nine months after your enrollment drops below half-time status. If you receive your first Perkins Loan on or after October 1, 1992, your minimum payment will be $40 per month. In all cases, repayment may extend up to 10 years depending upon the total amount borrowed. If you have outstanding National Direct Student Loan (NDSL) balances and you are receiving a Federal Perkins Loan now, you must review your NDSL Promissory Note to determine the terms and conditions that apply to your loan. Under certain conditions of reenrollment, employment, or extenuating circumstances, payments may be deferred or cancelled. Further information concerning repayment is available in the Office of Financial Services, 516-518 South Main Street.

Work Opportunities
Federal Work-Study Program
The Federal Work-Study Program provides part-time employment for needy students to meet their educational expenses. To be eligible for employment under this federal program, a student must be enrolled in the University or fully accepted for admission and demonstrate financial need.

Students who are enrolled at least half-time work an average of 12 to 20 hours per week. During vacation periods it is sometimes possible to work up to 40 hours per week. Pay rates vary with the job assignment.

Refunds and Financial Aid
The official University policy and procedure concerning refunding of University tuition and fees which result from withdrawal or reduction in hours is contained in the "Fees and Refunds (p. 1723)" section of this bulletin. Students who withdraw or reduce hours may be eligible to receive a refund as provided by the official University policy; however, recipients of financial aid generally do not receive the refund.

When students who are recipients of federal financial aid withdraw from all classes, they are only entitled to retain a percentage of the federal financial aid received that is proportional to the time they remained enrolled. If, for example, a student withdraws after completing 30 percent of the semester or summer term, they can only retain 30 percent of the federal financial aid they received. The balance, 70 percent, must be returned to the financial aid programs. The Office of the Bursar performs this calculation and students are notified by mail of the outcome.

When funds are applied back to the federal financial aid programs, loan funds are always returned first, thereby reducing the student's repayment obligation. If funds remain after repaying federal loans, they are then repaid to the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant (FSEOG) programs. After all federal funds are repaid, state-sponsored grant programs then receive any remaining payments.

Veterans Benefits
The following policies and procedures are of primary concern to veterans, servicepersons, members of guard and selected reserves, and other eligible persons who receive VA educational benefits while enrolled at the University.

Please note: Academic standards of progress and attendance are covered under school standards of progress as specified by the South Carolina Commission on Higher Education, License Division, and are required by the U.S. Department of Veterans Affairs (VA).

Enrollment Certification
Certification by the University VA certifying official in the Office of Financial Aid, Scholarships, and Veterans Affairs is required for eligible students who wish to receive VA educational benefit checks. Students must initiate their own requests for enrollment certification. The certifying official will complete certifications and forward other forms to the VA only for those students who have made such requests and have completed the necessary paperwork.

Normally, the VA requires that eligible students must have completed full University admissions requirements and matriculation into degree-seeking status before they may receive VA educational benefits. However, those students admitted as “Provisional,” “Military Special,” or “Transient,” or students enrolling for prerequisite courses required for admission into a professional degree program or school may request VA certification if they provide appropriate documentation. Any VA students in these categories should contact the VA certifying official for details. In these and all other admissions categories, only the federal VA has the final authority to award or to deny military educational benefits.

Undergraduate veterans or servicepersons should contact the Office of Admissions for consideration of receiving college credit for military schools.

Students can best ensure receipt of benefits by informing the school VA office of their intent to register for classes and by supplying the number of credit hours for which they will enroll each session. Eligible VA students may request certification on a semester basis and should recertify for each new semester at least 45 days prior to the first day of class of their next semester.
Normally, VA payments are authorized only for those courses which are required by the academic department for the student’s current degree program. All students receiving educational benefit checks from the VA are responsible for notifying the VA certifying official of any changes in their degree programs and/or course loads during a semester, to include drop/add, withdrawal, changing from credit to audit status, invoking the Pass-Fail option in a course, or enrolling in any distance education course, independent study, internship, or practicum.

Appropriate forms and benefits-related information are available at the Office of Financial Aid, Scholarships, and Veterans Affairs. Each student request will be handled individually according to their VA benefit program and enrollment status at the University.

**Academic Scholarships**

**Who Should Apply**
Scholarship recipients are selected by the Student Scholarships and Special Awards Committee of the University of South Carolina Lancaster. Completed applications must be submitted no later than February 1. Scholarships are awarded on the basis of high-school records, SAT scores, and other qualifications as established by the selection committee. Admissions acceptance is required before consideration may be given to a scholarship applicant. These scholarships range in value from $200 to more than $9,000 and are awarded to students who show outstanding academic achievement and talent and/or demonstrate significant leadership ability. Students must maintain the required standards in order to retain their scholarship. This includes but is not limited to participation in the honors program.

**How To Apply**
Submit an application for undergraduate admission to UofSC Lancaster and a UofSC Lancaster Academic Scholarship Application.

**When To Apply**
Completed applications must be submitted no later than February 1 for the fall semester and December 1 for the spring semester.

**Where To Apply**
Applications should be mailed to:
Office of Admissions and Records
UofSC Lancaster
P.O. Box 889
Lancaster, SC 29721

or hand delivered to the Office of Admissions and Records, Starr Hall, at UofSC Lancaster.

**University of South Carolina Lancaster Academic Scholarships**
The following scholarships are available to students at UofSC Lancaster.

**Abitibi Bowater Inc. Scholarship.** Established in 1997. Awarded to a residents of Lancaster, Chester, York, Kershaw, or Chesterfield County with financial need who shows promise and interest in the paper products field. Preference is given to Catawba Operations employees or dependents.

**Eugenia Adams Memorial Scholarship.** Awarded to a Lancaster County resident. The scholarship was endowed in 1984 in memory of Eugenia Adams.

**Mr. And Mrs. William F. Adams Scholarship.** The scholarship was established in 2000 by Mr. And Mrs. William F. Adams.

**James Preston Allison and Edward C. Allison Memorial Scholarship.** The scholarship was endowed in 1993 in memory of James P. Allison and Edward C. Allison.

**Robert Barnwell Allison and Lois Marion Allison Memorial Scholarship.** Two scholarships awarded to students of the region. The scholarships were endowed in 1978 in memory of Robert Barnwell Allison and Lois Marion Allison.

**Robert Erasmus Allison and Mary Chambers Allison Memorial Scholarship.** The scholarship was endowed in 1993 in memory of Robert E. Allison and Mary C. Allison.

**John M. Barnes Scholarship.** Endowed by Mrs. John M. Barnes in 2006 in memory of her husband. The scholarship is to be awarded to a student with financial need.

**Theodore Roosevelt Barnes and Emma McMullen Barnes Scholarship.** Established in 1998. Recipient must be a Lancaster County resident. Recipient must be African American and show promise/interest in majoring in and pursuing a career in education.

**The Barry Family Scholarship.** The scholarship was established in 2004 and endowed in 2007.

**The Peter and Mary Barry Academic Scholarship.** The scholarship was established in 2009.

**Colonel Andrew Frank and Claire Brooks Bauer Scholarship.** Established in June 2008. Awarded to a full-time UofSC Lancaster student who plays on either the men’s or women’s tennis team. The recipient must maintain a cumulative GPA of at least 2.5.

**The Oscar Hyatt Bell and Ella Roddey Bell Trust Fund.** Endowed in 2009 by the Dr. E. Cooper Bell Estate in memory of her parents, Oscar Hyatt Bell and Ella Roddey Bell. Awarded to a deserving student of Lancaster County.

**William T. Biggerstaff Scholarship.** Established and endowed in 2006 in memory of Bill Biggerstaff by his family and friends. Recipient must be a non-traditional student from Lancaster County with financial need. Preference is given to a nursing student.

The Ruth Wimmer Smith Scholarship. Awarded to graduates of Fort Mill high schools based on academic merit and financial need.

Mary Elizabeth (Betsy) Stevens Memorial Scholarship. Awarded to a graduate of Buford High School. The scholarship was established in 1989 in memory of Betsy Stevens. 2.5 GPA or better is required for retention. Awarded to a well-rounded student with good moral character. Recipient is required to have a good academic record, but SAT scores and class standing are not to be given highest priority in the awarding decision.

The Hazel Calhoun Strange Memorial Scholarship. Awarded to a student of the region. The scholarship was endowed in 1986 in memory of Hazel Calhoun Strange.

The Art Swain Scholarship. The scholarship is a book scholarship established in 2010 in memory of Art Swain. Restricted to an average, continuing student from Lancaster, Lexington, or Chesterfield Counties. Student must have financial need.

Blake E. and Ann S. Taylor Scholarship. Endowed in 1999. Recipient must be a resident of Heath Springs, South Carolina. (must have a Heath Spring, South Carolina mailing address). Based on financial need.

The Fred Thomas Scholarship. Established and endowed in 2009 by Fred Thomas to help Lancaster County male students at UofSC.

The W. Carlton Thompson Memorial Scholarship. Established in 2006 in memory of Carlton Thompson by his family and friends.

Thompson & Davis Scholarship. Awarded to a deserving, well-rounded Lancaster County or Great Falls high-school graduate with first preference to an employee or dependent of an employee of Thompson & Davis. Preference is also given to a student enrolled in a four year program. The scholarship was established in 1993 by W. Carlton Thompson and James K. Davis.

UofSC Lancaster Faculty and Staff Scholarship. Awarded to a deserving student of the region. The scholarship was established by UofSC Lancaster faculty and staff in 1975 and is underwritten annually by their contributions.

UofSC Lancaster Gamecock Big Thursday Scholarship. Created in 2000 by supporters of UofSC Lancaster. Financial need is a critical factor in the selection of the scholarship recipient. Award Restricted to a Lancaster County resident.

UofSCL Valedictorian/Salutatorian Award. Awarded to entering freshmen who are graduates of South Carolina public and or private high schools and who ranked first or second in their class.

Richard Edwin Walters Memorial Scholarship. Established in May 2006 by Allen and Nancy Walters in honor of their son, the late U.S. Army Lt. Richard Edwin “Ricky” Walters. Ricky was a UofSC student from 1965 to 1967. He was killed in action on November 19, 1969 in Vietnam. Recipient must be a graduate of Lancaster County schools. Financial need is required.

D. Glenn Yarborough Scholarship. Awarded to a freshman of the region. The scholarship was endowed in 1979 by friends of D. Glenn Yarborough.

Fees and Refunds

Checks, Money Orders, and Credit Cards

The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina (https://my.sc.edu/) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by E-check, USC’s preferred method of payment, when using Self-Service Carolina or payment by check or money order through the mail.

Legal Residency

The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one's resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

Legal Residency Requirements for Fee and Tuition Purposes

Code of Laws Governing Residence

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions

"Academic Session" is defined as a term or semester of enrollment.
“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person’s college education. A dependent person’s residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“Full time employment” is defined as employment that consists of at least thirty seven and one half hours a week in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

“Immediately Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

“Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents
Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month
residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled "Establishing the Requisite Intent to Become a South Carolina Domiciliary." The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person's support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver's license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver's license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina;
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence

A person's temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person's absence from the State. The burden is on the person to show retention of South Carolina residence during the person's absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver's license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

Effect of Change of Residency

Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina
The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

Incorrect Classification

Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

Inquiries and Appeals

Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-4060

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the
residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person’s situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

**Academic Fees**

**Application Fees**

Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls.

**Matriculation Fee**

A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $500 matriculation fee.

**Free Tuition**

(This includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. S.C. Code Ann. § 59-111-110 (Law Co-op. 1976) No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, as defined herein, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty (on or after July 1, 1964).

2. S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984) Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or non-credit purposes on a space available basis; provided, however, that neither such persons nor their spouses receive compensation as full-time employees.

**Examination Fees**

**Graduate Record Examination**

1. General Test ($60)
2. Subject Test ($60)

Revalidation examinations intended to revalidate UofSC courses, obsolete under the statute of limitations. Per hour, $25.

Note: Revalidation examinations require permission of the dean of The Graduate School. The fee must be paid in advance, and is nonrefundable, once the student is presented to the instructor for the examination.

**Refund Policy**

1. **Policy**

The University will refund a part of academic fees in certain cases:

a. Changes in a student’s status, which may require a refund
   i. Change in a full-time student’s schedule, which results in reclassification to part-time status
   ii. Change in a part-time student’s schedule, which results in fewer credit hours.

b. Situations, which may require a refund.
   i. Course or courses dropped
   ii. Drop/Withdrawal from the University
   iii. Cancellation of a class by the University

2. **Procedure**

   a. **Refund Requests**

      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

   b. **Determining the Refundable Portion Procedure**

      Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

   c. **Drop/Withdrawal Refund Policies**

      Standard Refund Policy For Dropping/Withdrawal From The University.

      All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar’s Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund

      i. 100 percent if the student's official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
      ii. 70 percent if the student's official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
      iii. 50 percent if the student's official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
Refund Schedules

Refund schedules are relocated under the important deadlines on the Registrar's website (http://registrar.sc.edu/).

Return of Title IV Funds

Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University

i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.

ii. Title IV Refund Distribution

1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
   • Unsubsidized Federal Stafford
   • Subsidized Federal Stafford
   • Federal Perkins
   • Federal PLUS Loan
   • Federal Pell Grant
   • Federal Supplemental Education Opportunity Grant
   • Federal TEACH Grant
   • Federal Iraq/Afghanistan Service Grant

2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

3. Exit interviews (http://www.sc.edu/financialaid/loan_counseling/default.html) are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

Appeals Process

A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal. The Withdrawal Refund Appeals Committee reviews and act on all appeals. Address appeals to:

Withdrawal Refund Appeals Committee
(Columbia Campus Only)
Office of the Registrar
University of South Carolina
Columbia, SC 29208
803-777-5555

Withdrawal Refunds

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student’s withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

University Withdrawal Refund Appeal Procedures

The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University’s published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:
1. The appeal must be submitted in writing to the Business Office and will be considered only in written form. A standardized appeal form must be submitted.

2. All requests for appeal must be submitted directly by the student through the Business Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official’s advice, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.

3. The appeal must be initiated during the semester for which the refund is requested.

4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.

5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.

6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.

7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Business Office.

Learning Outcomes for Associate’s Degree Programs

Graduates will be able to:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through writing.
- Apply the methods of mathematical, statistical, or analytical reasoning to critically evaluate data, solve problems, and effectively communicate findings verbally and graphically.
- Apply the principles and language of the natural sciences and associated technologies to historical and contemporary issues.
- Communicate in more than one language.
- Use the principles of historical thinking to understand past human societies.
- Use the principles of the social sciences to explore diverse cultural identities and to analyze political and environmental issues.
- Create or interpret literary, visual or performing arts.

and be able to demonstrate at least one of the following:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through speaking.
- Collect, manage and evaluate information using technology, and communicate findings.
- Examine different kinds of social and personal values, analyzing the ways in which these are manifested in communities as well as individual lives.

Carolina Core - 15 Hours

These serve as general education requirements common to all associate degrees.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours) Must be passed with a grade of C or higher
- SCI: Scientific Literacy (3 Hours)
- GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
- GSS: Global Citizenship and Multicultural Understanding: Social Sciences (3 Hours)

Associate of Arts Degree Curriculum - 60 Hours

1. Basic Requirements (including 15 hours of Carolina Core stated above) (37-38 Hours)

All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours) Must be passed with a grade of C or higher
- ARP: Analytical Reasoning and Problem-Solving (3 Hours) Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics
- SCI: Scientific Literacy (7-8 Hours) Must include at least 1 laboratory science course
- GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours) One 3-hour language course at any level or score of “2” on placement exam

Academic Programs

Associate’s Degree Programs

The University of South Carolina offers the Associate in Arts degree and the Associate in Science degree at the Lancaster campus to those students who have earned 60 hours of credit and completed the following requirements:

- Learning Outcomes
- Carolina Core - All Associates
- Associate of Arts Degree Curriculum
- Associate of Science Degree Curriculum
- Other Requirements
- Second Associate’s Degree
• GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
• GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)
• AIU: Aesthetic and Interpretive Understanding (6 Hours)
• Choose one of the following three options (3 Hours minimum):
  • CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
  • INF: Information Literacy (3 Hours)
  • VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (22-23 Hours)
   Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. USC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a USC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate's degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Associate of Science Degree Curriculum - 60 Hours
1. Basic Requirements (including 15 hours of Carolina Core stated above) (38-42 Hours)
   All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.
   • CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
     Must be passed with a grade of C or higher
   • ARP: Analytical Reasoning and Problem-Solving (6 Hours)
     Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics
   • SCI: Scientific Literacy (8-12 Hours)
     Must include at least 2 laboratory science courses
   • GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
     One 3-hour language course at any level or score of “2” on placement exam
   • GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
   • GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)
   • AIU: Aesthetic and Interpretive Understanding (6 Hours)
   • Choose one of the following three options (3 Hours minimum):
     • CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
     • INF: Information Literacy (3 Hours)
     • VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (18-22 Hours)
   Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. USC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a USC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate's degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Other Requirements
In addition to the requirements for the A.A. and A.S. degrees stated above, the following stipulations also apply:
• Students must have an institutional GPA of 2.00 or better (does not include course grades earned by challenge examinations).
• The final 15 semester hours must be earned at USC Lancaster.
• No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees.
• Pass-Fail option on elective courses is allowed.
• No more than 15 hours of nontraditional credits, which include DANTES, CLEP, and military experience.
• No more than 3 1-hour PEDU activity courses may count toward meeting Associate's degree requirements (any track).

Second Associate’s Degree
At times the University of South Carolina Lancaster confers a second associate's degree upon candidates who have completed all requirements for the second degree, provided that the additional requirements for the second degree include a minimum of 12 semester hours beyond those required for the first degree earned at USC Lancaster and a minimum of 72 semester hours total. Under this policy a student may apply for two degrees at one time or separately. In either case the student would receive two diplomas.

Baccalaureate Degree Programs
Palmetto College
Palmetto College combines the resources of the University of South Carolina system with the flexibility of course delivery formats including on-campus, traditional classes, two-way video classes, and online classes.

Faculties from Lancaster, Salkehatchie, Sumter, and Union, as well as Extended University in Columbia, use two-way interactive video to teach students at multiple sites simultaneously as well as fully online, asynchronous instruction. These delivery mechanisms give students access to many more course options than are available face-to-face on their campuses.

• Liberal Studies, B.A.
• Organizational Leadership, B.A.

Other Associate’s Degrees
In addition to the Associate in Arts and the Associate in Science degrees, USC Lancaster offers associate degrees in the following fields: business, technical nursing, and criminal justice. Students must also meet the following criteria:
1. 2.00 GPA or better (does not include course grades earned by challenge examinations);
2. final 15 semester hours must be earned at USC Lancaster;
3. grade of C or above in ENGL 101 Critical Reading and Composition and ENGL 102 Rhetoric and Composition.

**Associate in Science in Business**

The Associate in Science in Business degree seeks to provide educational opportunities that will prepare students for careers in business and industry as well as meet many of the preliminary requirements for a Bachelor of Arts in Organizational Leadership (BOL) through Palmetto College, or for the Integrated Information Technology Program (ITT) offered at the University of South Carolina Columbia, or for a baccalaureate program in business.

**Learning Outcomes**

- Accounting and Financial Skills: Students completing the Associate of Science in Business degree program at USC Lancaster will be able to perform the basic functions of business financial operations, such as interpreting basic financial statements and reconciling accounts.
- Knowledge of Basic Legal Concepts: Students completing the Associate of Science in Business degree program at USC Lancaster will be able to describe basic legal concepts and the judicial system, with emphasis on business law.
- Management Skills: Students completing the Associate of Science in Business degree program at USC Lancaster will be able to describe basic legal concepts and the judicial system, with emphasis on business law.
- Effective Communication: Students completing the Associate of Science in Business degree program at USC Lancaster will be able to communicate effectively for a business environment.
- Economics and economic theory: Students completing the Associate of Science in Business degree program at USC Lancaster will understand and be able to apply basic macro and micro economic principles and theories in a business environment.

The associate degree business program is accredited by the Accreditation Council for Business Schools and Programs.

Total Credit Hours 15

^ Credit cannot be received for both ECON 224 Introduction to Economics and either ECON 221 Principles of Microeconomics or ECON 222 Principles of Macroeconomics.

Electives
Sufficient credit to have earned 60 hours total. No more than three (3) hours PEDU credit may count.

Other Requirements
1. 2.00 GPA (minimum) required on all work attempted at USC.
2. Final 15 semester hours must be earned at USC Lancaster

Total: 60

In addition to the requirements stated above, students must also meet the following criteria for an Associate in Science in Business degree:

1. 2.00 GPA or better (does not include course grades earned by challenge examinations);
2. final 15 semester hours earned at USC Lancaster.

Associate Degree Nursing Program
The Associate Degree Nursing Program is a cooperative program between York Technical College and the University of South Carolina Lancaster and is approved by:

Board of Nursing for South Carolina
Synergy Business Park
Kingstree Drive

fax: (404) 975-5020

The Associate Degree Nursing Program prepares men and women for the practice of registered nursing to provide direct client care across the life span. The practice of the associate degree nurse is primarily directed toward clients who have health needs and require assistance to maintain or restore their optimum state of health or support to die with dignity. The associate degree nurse is prepared to address acute and chronic health care needs and common well-defined health care problems in hospitals, long-term care facilities, and certain community health agencies.

The graduate of an associate degree nursing program functions in three basic roles within the health care delivery system: provider of care, manager of care, and member within the discipline of nursing. Graduates of the program are eligible to take the Computer Adaptive Testing of the National Council Licensing Examination for Registered Nurses. Graduates who successfully pass the National Council Licensing Examination for Registered Nurses are eligible to apply for licensure to practice as a registered nurse in any of the 50 states or U.S. territories.

There are legal limitations for state licensure in South Carolina for graduates with prior convictions and/or disciplinary action. The policy from the Board of Nursing for South Carolina will be distributed to all applicants by Student Services/Office of Admissions. The policy is also in the Nursing Student Manual, which is distributed the first day of class. Clinical facilities may require drug screens and/or background checks before allowing students to participate in clinical rotations. Students participating in clinicals may be required to have a drug screen at any time during their rotation. Students will be required to attend multiple clinical facilities throughout the curriculum. Students accepted to the program must be eligible to attend clinical at all facilities.

Learning Outcomes

• Client Assessment: Each student will demonstrate setting appropriate client care priorities based on initial and focused client assessment.
• Medication Administration: Each student will demonstrate safe medication administration related to the rights (patient, route, time, dose, medication, reason, and documentation).
• Professional Writing: Each student will demonstrate professional writing skills.
• Critical Thinking: Each student will demonstrate critical thinking strategies appropriate to the class level.
• Nursing Literacy: New graduate will be able to demonstrate foundational understanding of nursing practices and skills sufficient for passing the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

Admissions Criteria
Applicants for admission to the Associate Degree Nursing Program must meet the entrance requirements of the parent institution. Admission to the Associate Degree Nursing Program requires the student to be a high-school graduate or equivalent. Students must complete one course of
high-school, college-preparatory general chemistry with a minimum grade of C or complete one college chemistry course with a minimum grade of C prior to acceptance into the nursing program.

And one of the following:

1. SAT scores of 480 critical reading and 540 math or ACT scores of 21 reading and 23 math. Students must have a minimum GPA of 2.0 or higher. SAT/ACT scores must be no more than 5 years old at the time a student seeks admission to the ADN program.

or

2. Completion of all approved courses (below) with a GPA of 2.50 or higher.

Total Credit Hours: 33

Note: Students must achieve a grade of "C" or better on the 1st or 2nd attempt of Anatomy and Physiology I, Anatomy and Physiology I Lab, Anatomy and Physiology II, Anatomy and Physiology II Lab, Microbiology and Microbiology Lab (or the equivalent courses from other institutions) to meet the admission and curriculum requirement for the ADN program. Grades of "W", "D", "F", or "WF" are considered unsuccessful attempts.

Required science courses that are more than seven years old must be repeated or the student has the option to exempt the courses through testing on content.

1 Students are expected to graduate from the school where the initial nursing course is taken.

To enhance potential for success in the program, the faculty recommends completion of a Certified Nursing Assistant (CNA) Program and work experience as a CNA.

Admission by Transfer
Transfer credit may be granted for courses taken in another associate or baccalaureate degree nursing program to a student meeting the following criteria:

1. The student must meet present admission criteria to the Associate Degree Nursing Program.
2. The student must submit a letter from the previous school attended stating that he/she left in good standing and is eligible for readmission.
3. The student must be required to provide the nursing department manager chair with a detailed course syllabus showing course and unit objectives and a clinical evaluation tool indicating criteria met in the clinical component of the courses. Courses for which transfer credit is given must meet the objectives of the comparable York Technical College/University of South Carolina Lancaster courses.
4. The student must demonstrate competencies in the course to be transferred either by exam, by previous grade and documentation, or both.
5. The Nursing Evaluation Committee will review requests for transfer credit and will make a recommendation for official action to the Registrar/Admissions Officer.
6. The York Technical College/University of South Carolina Lancaster Cooperative Nursing Program is considered by the State Board of Nursing for South Carolina to be one nursing program administered jointly by York Technical College and the University of South Carolina Lancaster. Transfers will only be considered from nursing students who are currently in good standing in the nursing program at the college in which they were previously enrolled.
7. Admission by transfer is on a space-available basis.

Note: Students must achieve a grade of "C" or better on the 1st or 2nd attempt of Anatomy and Physiology I, Anatomy and Physiology I Lab, Anatomy and Physiology II, Anatomy and Physiology II Lab, Microbiology and Microbiology Lab (or the equivalent courses from other institutions) to meet the admission and curriculum requirement for the ADN program. Grades of "W", "D", "F", or "WF" are considered unsuccessful attempts.

LPN Advanced Placement
Students will be admitted based on the South Carolina Statewide Articulation Model.

Direct Transfer
A minimum of 15 semester hours of nursing credit will be awarded without educational mobility testing or validation if the applicant meets the following criteria:

1. graduate from an NLNAC-accredited school of nursing
2. has a current, active LPN license
3. meets admission and progression requirements of York Technical College and the University of South Carolina Lancaster.

Individual Validation
Individual validation of credit awarded will be determined by the receiving institution through exemption testing if the applicant meets the following criteria:

1. graduate from a non-NLNAC-accredited program
2. graduate from a non-credit bearing program.

A minimum of 15 semester hours of nursing credit will be awarded upon completion of validation if the applicant meets the following criteria:

1. has a current, active license
2. meets admission requirements of York Technical College and the University of South Carolina Lancaster.

Other Requirements
1. Must have completed health form.
3. Proof of health insurance.
5. Criminal background check required for clinical rotation.
6. LPN’s admitted to the ADN program are required to enroll in LANU L299 and complete the course with a grade of “C” or better.
Candidates may take LANU L299 before the first nursing course or simultaneously with the first nursing courses taken.

Program of Study
In order to receive an Associate in Science degree in technical nursing, students must complete 70 semester hours of study.

1 Courses that require a minimum grade of “C”.

Nursing classes include campus and clinical laboratory hours. Students are required to drive to a variety of clinical agencies to complete the clinical component of the nursing courses. Students are expected to drive to either campus for classes according to the class schedule.

A student must have a “C” or better in each nursing course to progress in the program. Required science courses that are more than seven years old must be repeated or the student has the option to exempt the courses through testing on the content. Required nursing courses more than three years old must be repeated.

Students may be assigned to a morning, afternoon, or evening clinical anywhere in the tri-county area. Clinical experience may range from four to twelve hours per clinical day.

Students must have a completed health form and criminal background check. Current CPR certification for children, infants and adults is required. Students must have proof of health insurance. Liability insurance is also required (through York Technical College).

Practical Nurse (PN) Exit option—Students successfully completing the first three semesters are eligible to apply for the National Council Licensure Examination (NCLEX-PN) and for licensure as a PN.

ADN Progression—Students may apply for NCLEX-PN after three semesters and continue on in the program to complete the last two semesters. Students successfully completing all semesters are eligible to apply for licensure as a registered nurse (RN) and for NCLEX-RN.

Retention and Promotion Policy
For retention and promotion in the nursing program, the student must, in the judgment of the faculty, satisfy the requirements of health, conduct, and scholastic achievement. In addition to meeting the established criteria of the parent institutions, the student:

1. Upon admission to the nursing program students must complete courses in the sequence as outlined in the Program of Study in the University of South Carolina Lancaster Academic Bulletin;
2. Must achieve a cumulative 2.00 grade point average on all courses that count toward graduation in the program;
3. Must make a grade of “C” or better in theory in each nursing course attempted and receive a clinical evaluation of “Satisfactory”;
4. A student who receives a “D”, “F”, “W” or “WF” in any required nursing course may repeat that course one time only. A maximum of one nursing course may be repeated. In order to repeat a nursing course, the student must follow the readmission policy for the nursing program, found in the current Nursing Student Manual. Readmission will depend on space available in the course to be repeated.
5. Must achieve a grade of “C” or better in ENGL 101 Critical Reading and Composition, ENGL 102 Rhetoric and Composition, MATH 111 Basic College Mathematics, and all science courses.
6. Students will be eligible for academic forgiveness five years after the last nursing course attempted and may apply for readmission to the first nursing course. Required science courses that are more than seven years old must be repeated.

Associate in Science in Criminal Justice
The criminal justice curriculum is designed to prepare students for careers in law enforcement, investigation, corrections, law enforcement management, probation and parole, the court system, jail administration, juvenile rehabilitation, insurance investigations, and community service.

Learning Outcomes
Knowledge of Justice Systems: Students will be able to identify the core components of the criminal justice system, including local, state, and federal agencies related to delinquency, law enforcement, the criminal courts system, and/or corrections.

Effective Communication: Students will be able to effectively communicate criminal justice concepts and issues.
Utilization of Technology: Students will be able to utilize technology to locate relevant information on criminal justice issues and problems.

In order to receive an Associate in Science in Criminal Justice, students must complete 60 semester hours of required courses as outlined in the criminal justice curriculum.

**Natural Science**

One lab science course from ASTR, BIOL, CHEM, ENV, GEOG 201, GEOG 202, GEOL, MSCI, or PHYS.

**History and Political Science**

Two courses from HIST or POLI.

**Numerical and Analytical Reasoning**

Select one of the following options: 6-8

**Option 1 - Mathematics**

Select one of the following options:

Option A:

- MATH 111 Basic College Mathematics
- And next higher MATH

Option B:

- MATH 115 Precalculus Mathematics (and next higher MATH)

Option C:

- MATH 122 Calculus for Business Administration and Social Sciences
- or MATH 141 Calculus I
- And next higher MATH

Option D:

- MATH 122 Calculus for Business Administration and Social Sciences
- or MATH 141 Calculus I

Select one of the following:

PHIL 114 Introduction to Formal Logic I

STAT 110 Introduction to Statistical Reasoning

STAT 201 Elementary Statistics

MATH 141 Calculus I

**Option 2 - Computer Science, Logic, Statistics**

Select one of the following:

Two CSCE courses

- PHIL 114 Introduction to Formal Logic I
- PHIL 111 Introduction to Logic II
- STAT 110 Introduction to Statistical Reasoning
- STAT 201 Elementary Statistics

**Social and Behavioral Sciences**

Two courses from AFRO, ANTH, ECON, GEOG, POLI, PSYC, SOCY, or WGST

Total Credit Hours 60

In addition to the requirements stated above, students must also meet the following criteria for an Associate in Science in Criminal Justice degree:

1. 2.00 GPA or better (does not include course grades earned by challenge examinations);
2. final 15 semester hours earned at USC Lancaster.

### Baccalaureate Degree Programs

Many students who enter the Associate in Arts or the Associate in Science degree programs intend to apply these credits toward a baccalaureate degree awarded by another institution. These students are advised to work closely with their advisor to outline a program of study for the first two years that will meet preliminary requirements of the four-year major they wish to pursue.

These students are also strongly advised to obtain and use the bulletin for the Columbia campus when determining specific degree requirements. Preliminary course work toward the following USC baccalaureate degree programs may be completed at USC Lancaster:

### Arts and Sciences

- African American Studies
- Anthropology
- Art Education
- Art History
- Art Studio
- Biological Sciences
- Cardiovascular Technology
- Chemistry
- Classics
• Comparative Literature
• Criminology and Criminal Justice

• Statistics
• Women’s and Gender Studies

Business Administration
• Accounting
• Business Economics
• Finance
• Insurance and Risk Management
• Management
• Management Science
• Marketing
• Pre-International Business (Subject to separate admission after the freshman year.)
• Real Estate

Education
• Early Childhood Education
• Elementary Education
• Middle Level Education
• Physical Education (Athletic Training)
• Physical Education (Teacher Preparation)
• (Students interested in secondary education (grades 9-12) should earn a major in the specific subject area they wish to teach and a cognate/component in education. Upon earning an undergraduate BA or BS degree, students pursue a Master of Teaching (MT) degree through which teacher certification requirements are met. Students wishing to earn secondary certification should select a subject area major under one of the colleges or schools. Students interested in K-12 programs in art education (College of Arts and Sciences), music education (School of Music), or physical education (College of Education) can earn a bachelor’s degree in one of these areas and meet teacher certification requirements.)

Engineering and Computing
• Biomedical Engineering
• Chemical Engineering
• Civil Engineering

Accounting (ACCT)

ACCT 225 - Introduction to Financial Accounting (3 Credits)
User-oriented approach to the study of financial accounting and reporting topics related to business decisions.

ACCT 226 - Introduction to Managerial Accounting (3 Credits)
User-oriented approach to the study of managerial accounting topics related to business decisions.

Prerequisites: ACCT 225.

ACCT 324 - Survey of Commercial Law (3 Credits)
Basic legal concepts and the judicial system, with emphasis on business law.

ACCT 335 - Survey of Federal Taxation (3 Credits)
Federal tax law and preparation of individual income tax returns. Not allowed as an upper-division elective by accounting majors and not open for students who received credit for ACCT 403.

African Amer Studies (AFAM)

AFAM 201 - Introduction to African American Studies: Social and Historical Foundations (3 Credits)
Introduction to the key debates, figures, and concepts that are fundamental to the interdisciplinary study of the historical, political, and social development of black life in America.

Carolina Core: GSS

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 202 - Introduction to African-American Studies (3 Credits)
Introduction to the analysis and discussion of creative works and traditions by and about African Americans through folklore, music, art, dance, and literature.

Carolina Core: AIU

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

AFAM 335 - The American Civil Rights Movement (3 Credits)
Examination of the origins of Jim Crow and the multi-faceted struggle against it, and other forms of racial inequality, in the American South and the rest of the US since the early 20th century.

Cross-listed course: HIST 455

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
Anthropology (ANTH)

ANTH 101 - Primates, People, and Prehistory (3 Credits)
An exploration of human origins, human evolution, human prehistory, and cultural existence from its less complex forms to early civilizations. An introduction to the concepts, methods, and data of physical, biological, and archaeological anthropology.
Carolina Core: AIU

ANTH 102 - Understanding Other Cultures (3 Credits)
An exploration and comparison of selected contemporary cultures, including their languages. An introduction to the concepts, methods, and data of socio-cultural anthropology and anthropological linguistics.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 206 - Anthropology of Magic and Religion (3 Credits)
A comparative examination of such topics as ritual, cosmology, revitalization movements, magic, witchcraft, myth, and possession.
Cross-listed course: RELG 260

ANTH 207 - Gender and Culture (3 Credits)
Anthropological study of gender, with emphasis on cross-cultural investigation of the interaction of biological, cultural, and environmental factors including intersections of race, social class, and sexuality as influences gender behavior. 03 07/05/2019.
Cross-listed course: WGST 207
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ANTH 209 - Introduction to Folklore (3 Credits)
Folk expression as shaped by various cultures; fieldwork methodology and anthropological theory.

ANTH 236 - Cultures of Africa (3 Credits)
A comparative study of ethnicographic data on African cultures with emphasis upon its significance for broader anthropological theory.

ANTH 319 - Principles of Archaeology (3 Credits)
Introduction to principles, methods, and theory of archaeology, including prehistoric and historic case studies.

ANTH 320 - Archaeology Theory (3 Credits)
This course charts the history of ideas in archaeology, over the past century, as a means of understanding current directions in archaeological thinking and current applications in archaeological practice.
Prerequisites: ANTH 319.

ANTH 321 - South Carolina Archaeology (3 Credits)
Prehistoric and historic archaeology of South Carolina.

ANTH 353 - Anthropology of Law and Conflict (3 Credits)
Understanding human behavior through the examination of cultural norms, mechanisms of social control, and social conflict.
Graduation with Leadership Distinction: GLD: Global Learning

Art Education (ARTE)

ARTE 101 - Introduction to Art (3 Credits)
Introduction to art appreciation. Elements and principles of the visual arts, with examples from the history of art.
Carolina Core: AIU

ARTE 260 - Interdisciplinary Relationships in the Arts (3 Credits)
The study of relationships among visual arts, music, theatre, and dance.
Carolina Core: AIU

Art History (ARTH)

ARTH 105 - History of Western Art (3 Credits)
The visual arts from Paleolithic times to the Renaissance.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 106 - History of Western Art (3 Credits)
The visual arts from the Renaissance to the present.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 340 - History of American Art I (3 Credits)
A survey of the history of art in America from colonial times to 1860.

ARTH 341 - History of American Art II (3 Credits)
A survey of art in America from 1860 to the present.

ARTH 342 - Contemporary American Art (3 Credits)
Recent trends in painting and sculpture.

Art Studio (ARTS)

ARTS 102 - Introduction to Visual Arts Computing (3 Credits)
A foundations level course in the use of personal computers and discipline-related software as aids in visual design.

ARTS 103 - Fundamentals of Art (3 Credits)
Introduction to visual thinking and principles of two-dimensional design.
Carolina Core: AIU

ARTS 104 - 3-Dimensional Design I (3 Credits)
Introduction to visual thinking and principles of three-dimensional design.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Research

ARTS 107 - Color and Composition (3 Credits)
Color, color theory, and compositional systems.
Prerequisites: ARTS 103.

ARTS 111 - Basic Drawing I (3 Credits)
Introduction to the materials and basic techniques of drawing.

ARTS 210 - Introduction to Painting (4 Credits)
An introductory course in the materials and techniques of painting.
Carolina Core: AIU

ARTS 220 - Beginning Ceramics (4 Credits)
An introduction to the materials and techniques of ceramics through hand-building and throwing on the wheel.

ARTS 235 - Introduction to Fiber Arts (4 Credits)
An introductory course in the materials and processes of fiber arts.

ARTS 241 - Color for Design (4 Credits)
Color theory, systems, and applications in visual communications.
Graduation with Leadership Distinction: GLD: Research

ARTS 245 - Graphic Design I (4 Credits)
The basics of visual communication, including formal issues, fundamental communication principles, image development, and relevant digital applications.
Prerequisites: C or better in ARTS 102.

ARTS 246 - Graphic Design II (4 Credits)
Typography, word/image relationships, relevant digital applications.
Prerequisites: C or better in ARTS 102.
ARTS 260 - Photography for Non-Majors (3 Credits)
Photographic history, theory, and practice with emphasis on developing a personal vision through the use of digital still cameras.

ARTS 330 - Intermediate Drawing I (4 Credits)
Enhancing graphic richness in drawings with intellectual and visual perception as content.
Prerequisites: C or better in ARTS 230.

ARTS 331 - Intermediate Drawing II (4 Credits)
Contemporary cultural stimuli as the content for drawing projects. Emphasis on intellectual and emotive approaches.
Prerequisites: C or better in ARTS 230.

ARTS 512 - Introduction to Watercolor (3 Credits)
Introduction to traditional and experimental transparent watercolor technique. Encompasses field work at off campus locations.

ARTS 520 - Ceramics I (6 Credits)
Further development of a personal approach to the ceramic process, supported by an investigation of ceramic history.
Prerequisites: ARTS 421.

Biology (BIOL)
BIOL 101 - Biological Principles I (3 Credits)
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology.
Carolina Core: SCI

BIOL 101A - Biological Principles I (3 Credits)
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology. Three lecture hours per week. Restricted to students who have credit for BIOL 101L but lack the lecture.
Prerequisites: BIOL 101L.

BIOL 101L - Biological Principles I Laboratory (1 Credit)
(Recommended concurrent with BIOL 101). Experimental examination of basic principles of cell biology, genetics and metabolism. Three hours per week.
Carolina Core: SCI

BIOL 102 - Biological Principles II (3 Credits)
Introductory survey of plant and animal development, physiology, ecology, and evolution. Three lecture hours per week.
Prerequisites: C or better in BIOL 101.
Corequisite: BIOL 102L.
Carolina Core: SCI

BIOL 102L - Biological Principles II Laboratory (1 Credit)
Experimental examination of structure and function of plant and animal systems, biodiversity, ecology. BIOL 101, 102, 101L and 102L must be completed prior to enrolling in 300-level or above Biology courses.
Prerequisites: C or better in BIOL 101 and BIOL 101L; recommended concurrent with BIOL 102.
Carolina Core: SCI

BIOL 110 - General Biology (4 Credits)
Basic biological concepts and issues for non-biology majors. Credit may not be given for both this course and BIOL 120. Three lecture, two laboratory hours per week.
Carolina Core: SCI

BIOL 120 - Human Biology (3 Credits)
Fundamental principles of human biology. Credit may not be given for both BIOL 110 and BIOL 120. Three lecture hours per week. Not for major credit.
Carolina Core: SCI

BIOL 120L - Laboratory in Human Biology (1 Credit)
Exercises dealing with basic concepts of human biology. Not for major credit.
Prerequisite or Corequisite: BIOL 120.
Carolina Core: SCI

BIOL 200 - Plant Science (3 Credits)
An introduction to plant science for the non-major. This course does not carry major credit, and is not designed as a Plant development, physiology, genetics, evolution, and ecology will be considered. Three lecture hours per week.
Prerequisites: for other biology courses.

BIOL 200L - Plant Science Laboratory (1 Credit)
Laboratory exercises, demonstrations, and audio-visual supplements to BIOL 200. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 200.

BIOL 206 - Genetics and Society (3 Credits)
(Designed for non-major students.) Genetic principles, emphasizing human heredity. Relevance of recent advances in genetics. Three lecture hours per week.
Carolina Core: SCI

BIOL 243 - Human Anatomy and Physiology I (3 Credits)
Functional anatomy and physiology of the human body, including the integumentary, skeletal, muscular, and nervous systems. Not available for biology major credit. Three lecture hours per week.
Carolina Core: SCI

BIOL 243L - Human Anatomy and Physiology Laboratory I (1 Credit)
The principles of anatomy and physiology as demonstrated by microscopic studies, animal dissection, and physiological experiments. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 243.
Carolina Core: SCI

BIOL 244 - Human Anatomy and Physiology II (3 Credits)
Functional anatomy and physiology of the human body, including the cardiovascular, endocrine, excretory, reproductive, digestive, and respiratory systems. Not available for biology major credit. Three lecture hours per week.
Prerequisites: BIOL 243.
Carolina Core: SCI

BIOL 244L - Human Anatomy and Physiology Laboratory II (1 Credit)
A continuation of BIOL 243L. One three-hour laboratory per week.
Corequisite: BIOL 244
Carolina Core: SCI
BIOL 250 - Microbiology (3 Credits)
An introduction to bacteria and viruses, emphasizing structure, metabolism, and pathogenesis. Discussion of infectious diseases, antigen-antibody relationships, and anti-microbial agents in chemotherapy. Not available for biology major credit. Three lecture hours per week.
Prerequisites: College-level Biology and Chemistry.
Corequisite: BIOL 250L.

BIOL 250L - Microbiology Laboratory (1 Credit)
Not available for biology major credit. Three hours per week.
Prerequisite or Corequisite: BIOL 250.

BIOL 260 - Physiology (3 Credits)
Physiology of human systems especially susceptible to disturbance: immunobiology, circulation, excretion, metabolism, endocrinology, and muscle physiology. Not for biology major credit. Intended for pharmacy students.
Prerequisites: BIOL 102.

BIOL 270 - Introduction to Environmental Biology (3 Credits)
Basic ecological principles and the impacts of human population growth and technology. Not for major credit.
Carolina Core: SCI

BIOL 270L - Introduction to Environmental Biology Laboratory (1 Credit)
Demonstrations, data analyses, discussions, and films relating to human ecology, resource use, and environmental impact. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 270.

Carolina Core: SCI

BIOL 301 - Ecology and Evolution (3 Credits)
Concepts of evolution, populations, and population interactions; communities and ecosystems. Three lecture hours per week.
Prerequisites: BIOL 102 or MSCI 311.

Graduation with Leadership Distinction: GLD: Research

BIOL 301L - Ecology and Evolution Laboratory (1 Credit)
Experiments, exercises, and demonstrations. Three hours per week.
Prerequisite or Corequisite: BIOL 301.

BIOL 302 - Cell and Molecular Biology (3 Credits)
Principles of eukaryotic cell structure, molecular organization, and physiology. Genome organization and expression. Cell growth, division, and cell-cell interactions. Three lecture hours per week.
Prerequisites: BIOL 102 or MSCI 311.
Prerequisite or Corequisite: CHEM 333.

Graduation with Leadership Distinction: GLD: Research

BIOL 302L - Cell and Molecular Biology Laboratory (1 Credit)
Experiments, exercises, and demonstrations. Three hours per week.
Prerequisite or Corequisite: BIOL 302.

BIOL 303 - Fundamental Genetics (3 Credits)
Basic principles of transmission and molecular genetics; quantitative inheritance; recombination; biochemical aspects of gene function and regulation; developmental genetics and population genetics. Three lecture hours per week.
Prerequisites: BIOL 102 or MSCI 311.

BIOL 398 - Laboratory Teaching Experience (1 Credit)
Participation in preparation and teaching of undergraduate biological sciences laboratories.
Experiential Learning: Experiential Learning Opportunity

Chemistry (CHEM)

CHEM 102 - Fundamental Chemistry II (4 Credits)
An introductory survey of organic and biochemistry. Three lecture, one recitation, and two laboratory hours per week.
Prerequisites: 1 year high-school chemistry, CHEM 101, CHEM 111, or equivalent.

Carolina Core: SCI

CHEM 105 - Chemistry and Modern Society I (4 Credits)
A conceptual and qualitative approach to chemistry, its evolution, achievements, and goals and its impact on technology, the environment, and modern life and thought. (Specifically designed for non-science majors.) Three lecture and three laboratory hours per week.
Carolina Core: SCI

CHEM 106 - Chemistry and Modern Society II (3 Credits)
A continuation of Chemistry 105. Three lecture hours per week.
Prerequisites: C or higher in CHEM 105.

CHEM 106L - Chemistry and Modern Society II Laboratory (1 Credit)
Laboratory associated with CHEM 106. Three hours of laboratory per week.
Prerequisites: CHEM 105.

Corequisite: CHEM 106.

CHEM 107 - Forensic Chemistry (4 Credits)
Surveys chemical aspects of criminal investigation and adjudication including drug, arson, DNA, paint, and fiber identification. Three lecture and three laboratory hours per week.

Carolina Core: SCI

CHEM 111 - General Chemistry I (3 Credits)
Survey of the principles that underlie all chemistry with applications illustrating these principles. Three lecture and one recitation hours per week.
Prerequisites: C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math (or by placement score into MATH 122, MATH 141 or higher math).

Corequisite: CHEM 111L (unless grade of C or higher in CHEM 111L earned previously).

Carolina Core: SCI

CHEM 112 - General Chemistry II (3 Credits)
Continuation of CHEM 111. Special emphasis on chemical equilibrium. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 111 and C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math.

Corequisite: CHEM 112L.

CHEM 118 - Computational Chemistry I (1 Credit)
Introduction to the use of computers in solving chemical problems. One discussion and two laboratory hours per week.
Corequisite: CHEM 112 and CHEM 112L or CHEM 142 (unless a grade of C or higher earned previously).
CHEM 321 - Quantitative Analysis (3 Credits)
Gravimetric, volumetric, and introductory instrumental analysis. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 112 and CHEM 112L or in CHEM 142.
Corequisite: CHEM 321L.

CHEM 321L - Quantitative Analysis Laboratory (1 Credit)
Three laboratory hours per week. Credit cannot be received for both CHEM 321L and CHEM 322L.
Corequisite: CHEM 321.

CHEM 331L - Essentials of Organic Chemistry Laboratory I (1 Credit)
Laboratory safety, syntheses, separation, and purification of carbon compounds. For non-majors.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 332L - Essentials of Organic Chemistry Laboratory II (1 Credit)
Continuation of CHEM 331L. Spectroscopic identification of carbon compounds. For non-majors. Three lab hours per week.
Prerequisites: C or higher in CHEM 331L.

CHEM 333 - Organic Chemistry I (3 Credits)
Contemporary theories, nomenclature, reactions, mechanisms, and syntheses of carbon compounds. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 112 or in CHEM 142.

CHEM 333L - Comprehensive Organic Chemistry Laboratory I (2 Credits)
Laboratory safety, synthesis, separation, and purification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 334 - Organic Chemistry II (3 Credits)
Continuation of CHEM 333. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 333.

CHEM 334L - Comprehensive Organic Chemistry Laboratory II (2 Credits)
Continuation of CHEM 333L. Spectroscopic identification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
Prerequisites: C or higher in CHEM 333L.
Corequisite: CHEM 334 (unless grade of C or higher in CHEM 334 earned previously).

Comp Sci & Comp Engr (CSCE)

CSCE 101 - Introduction to Computer Concepts (3 Credits)
History, application, and social impact of computers; problem-solving, algorithm development, applications software, and programming in a procedural language.
Carolina Core: ARP

CSCE 102 - General Applications Programming (3 Credits)
Introduction to systematic computer problem-solving and programming for a variety of applications.
Carolina Core: ARP

CSCE 145 - Algorithmic Design I (4 Credits)
Problem-solving, algorithmic design, and programming. Three lectures and two laboratory hours per week.
Prerequisite or Corequisite: MATH 111 or MATH 115.
Carolina Core: ARP

CSCE 146 - Algorithmic Design II (4 Credits)
Continuation of CSCE 145. Rigorous development of algorithms and computer programs; elementary data structures. Three lecture hours and two laboratory hours per week.
Prerequisites: C or better in CSCE 145.
Prerequisite or Corequisite: MATH 122 or MATH 141.

CSCE 190 - Computing in the Modern World (1 Credit)
An introduction to the field of computing: trends in computing technology, the profession, and careers; subdisciplines in computing; the nature of research and development.
Corequisite: CSCE 145, CSCE 204, CSCE 205, CSCE 206 or equivalent.

CSCE 201 - Introduction to Computer Security (3 Credits)
Introduction to the theory and practice of computer security, including security policies, authentication, digital certificates, firewalls, malicious code, legal and ethical issues, and incident handling.
Prerequisite or Corequisite: CSCE 101 or CSCE 102 or CSCE 145.

CSCE 204 - Program Design and Development (3 Credits)
Fundamental algorithms and processes used in business information systems. Development and representation of programming logic. Introduction to implementation using a high-level programming language.
Prerequisites: CSCE 101 or MGSC 290 or ITEC 264.

Cross-listed course: ITEC 204, MGSC 298

CSCE 205 - Business Applications Programming (3 Credits)
Introduction to computer applications in business. Programming exercises in COBOL.
Prerequisites: MGSC 290 or CSCE 101 or above.

CSCE 206 - Scientific Applications Programming (3 Credits)
Introduction to computer applications in science and engineering. Programming exercises in a high-level language.
Prerequisites: MATH 122 or MATH 141.

CSCE 207 - UNIX System Administration (3 Credits)
The Unix programming environment: I/O programming, Unix processes, fork, exec, pipes and signals, and tools.
Prerequisites: CSCE 145 or CSCE 206.

CSCE 209 - Special Topics in Computer Programming (1-4 Credits)
Programming and application development using selected programming languages. Course content varies and will be announced in the schedule of classes by title.

CSCE 210 - Computer Hardware Foundations (3 Credits)
Number representation, data formats, CPU and memory organization, assembly language, I/O and peripherals, computer networks.
Prerequisites: CSCE 145, CSCE 204, CSCE 205, CSCE 206, or CSCE 207.
Advocacy

Graduation with Leadership Distinction:

Cross-listed course:

CRJU 341 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.
Cross-listed course: SOCY 353
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 351 - Juvenile Delinquency (3 Credits)
Social factors in the development, identification, and treatment of delinquents.
Prerequisites: CRJU 101 OR SOCY 101.
Cross-listed course: SOCY 350
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and Office of Academic Programs is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

CRJU 421 - Victimization (3 Credits)
Causes and consequences of criminal victimization and public policy responses to victimization issues.

CRJU 423 - Street Gangs: Structure, Activity, and Response (3 Credits)
Course covers the theoretical and empirical work on gangs, gang members, and gang activity along with insight on these issues from a practitioner perspective. It then examines the variety of policy responses from government and community organizations.

CRJU 426 - Criminal Justice and Mental Health (3 Credits)
Interface between the mental health sciences and the criminal justice system.

CRJU 491 - Special Topics (3 Credits)
Topics in criminology and criminal justice. Individual topics to be announced by title. May be repeated once with consent of advisor.

Early Childhood Educ (EDEC)

EDEC 250 - Play and Early Learning (3 Credits)
Theory and practice related to children's play and early learning in family, community, and educational settings.

Economics (ECON)

ECON 123 - The American Economy (3 Credits)
Basic concepts, institutional foundations, structure of the private and public sector, labor markets; major economic problems.

ECON 221 - Principles of Microeconomics (3 Credits)
The study of supply and demand, pricing and cost concepts, firm and consumer decision-making, market structure, and government policies.

ECON 222 - Principles of Macroeconomics (3 Credits)
The study of gross domestic product, business cycles, economic growth, inflation, unemployment, and monetary and fiscal policy.

ECON 224 - Introduction to Economics (3 Credits)
The study of supply and demand, markets, household and firm decision-making, gross domestic product, inflation, unemployment, and government policies. Open to all students except business administration and economics majors.

ECON 301 - Money and Banking (3 Credits)
The role of money in the market economy. Commercial banks, the Federal Reserve System, and monetary policy. Cannot be used to satisfy major requirements. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.
Carolina Core:
- and expository essays. Designed for English majors.

Prerequisites: ENGL 221 and ENGL 222, or ENGL 224.

ECON 329 - American Economic History (3 Credits)
Growth and development of the American economy; applications of economic theory to economic history.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 364 - Financial Institutions (3 Credits)
A study of the functions and operations of financial institutions and their relationships to the commercial banking system and the general economy. Attention is devoted to savings institutions, insurance companies, rural and urban real estate credit, consumer credit, and associated topics. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

Edu Foundations & Inq (EDFI)
EDFI 300 - Schools in Communities (3 Credits)
Social, political, and historical aspects of diverse educational institutions in American culture with an emphasis on families, schools, and communities. Sophomore standing.
Graduation with Leadership Distinction: GLD: Community Service

Educational Psychology (EDPY)
EDPY 333 - Introduction to Child Growth and Development (3 Credits)
Basic course designed to familiarize the prospective teacher with the patterns of social, emotional, physical, and intellectual growth of the individual. Development of these growth patterns from the prenatal stage to the onset of adolescence.
EDPY 334 - Introduction to Adolescent Growth and Development (3 Credits)
Basic course designed to familiarize the prospective junior and senior high school teacher with the pattern of social, emotional, physical, and intellectual growth of the individual during his adolescent years. Recommendation of the advisor(s) required.
EDPY 335 - Introduction to Educational Psychology (3 Credits)
Applications of the psychology of learning and development. Special attention to basic statistics and the behavior of the school child.
EDPY 401 - Learners and the Diversity of Learning (3 Credits)
Overview of psychological theories and research as it applies to education, including theories of learning, child and adolescent development, cognitive processes, classroom practices, individual differences/student diversity, and motivation.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

English (ENGL)
ENGL 101 - Critical Reading and Composition (3 Credits)
Instruction in strategies for critically reading and analyzing literature and non-literary texts; structured, sustained practice in composing expository and analytical essays.
Carolina Core: CMW

ENGL 102 - Rhetoric and Composition (3 Credits)
Instruction and intensive practice in researching, analyzing, and composing written arguments about academic and public issues.
Prerequisites: C or better in ENGL 101 or equivalent credit.
Carolina Core: CMW, INF

ENGL 270 - World Literature (3 Credits)
Selected masterpieces of world literature from antiquity to present.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Cross-listed course: CPLT 270
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 282 - Special Topics in Fiction (3 Credits)
Special topics in fiction from several countries and historical periods, illustrating the nature of the genre. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 283 - Special Topics in British Literature (3 Credits)
Special topics in British literature exemplifying persistent themes of British culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and 102 or equivalent.
Carolina Core: AIU

ENGL 284 - Drama (3 Credits)
Drama from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and 102 or equivalent.
Carolina Core: AIU

ENGL 285 - Special Topics in American Literature (3 Credits)
Special topics in American literature exemplifying persistent themes of American culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and 102 or equivalent.
Carolina Core: AIU

ENGL 286 - Poetry (3 Credits)
Poetry from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and 102 or equivalent.
Carolina Core: AIU

ENGL 287 - American Literature (3 Credits)
An introduction to American literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU
ENGL 288 - English Literature (3 Credits)
An introduction to English literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.  
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 381 - The Renaissance (3 Credits)
Literature of the Renaissance, in its cultural contexts, explored through representative works.  
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: CPLT 381

ENGL 382 - The Enlightenment (3 Credits)
Literature of the Enlightenment in its cultural contexts, explored through representative works.  
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: CPLT 382

ENGL 384 - Realism (3 Credits)
Literature of Realism in its cultural contexts, explored through representative works.  
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: CPLT 384

ENGL 387 - Introduction to Rhetoric (3 Credits)
Theories of human communication useful for understanding and informing the everyday work of writers. Emphasis on intensive analysis and writing.  
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: SPCH 387

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 427 - Southern Literature (3 Credits)
Representative works of Southern writers.  
Prerequisites: ENGL 101 and ENGL 102.

ENGL 429 - Topics in American Literature (3 Credits)
Intensive study of selected topics. May be repeated for credit under a different title.  
Prerequisites: ENGL 101 and ENGL 102.

ENGL 435 - The Short Story (3 Credits)
The characteristics of the short story and its historical development in America and Europe.  
Prerequisites: ENGL 101 and ENGL 102.

ENGL 437 - Women Writers (3 Credits)
Representative works written by women.  
Prerequisites: C or higher in both ENGL 101 and ENGL 102.

Cross-listed course: WGST 437

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 438A - South Carolina Writers (3 Credits)
Authors and literary forms representative of South Carolina.  
Prerequisites: ENGL 101 and ENGL 102.

ENGL 460 - Advanced Writing (3 Credits)
Extensive practice in different types of nonfiction writing.  
Prerequisites: ENGL 101 and ENGL 102.

ENGL 463 - Business Writing (3 Credits)
Extensive practice in different types of business writing, from brief letters to formal articles and reports.  
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research

ENGL 465 - Fiction Workshop (3 Credits)
Workshop in writing fiction.  
Prerequisites: C or higher in both ENGL 101 and ENGL 102.

Engr and Computing (ENCP)

ENGL 101 - Introduction to Engineering I (3 Credits)
Engineering problem solving using computers and other engineering tools.

ENCP 101 - Introduction to Engineering I (3 Credits)
Prerequisites:
- ENGL 101 and ENGL 102.

ENCP 102 - Introduction to Engineering II (3 Credits)
Principles and practice of visualization and graphical representation using modern computer-aided design tools.

ENCP 200 - Statics (3 Credits)
Introduction to the principles of mechanics. Equilibrium of particles and rigid bodies. Distributed forces, centroids, and centers of gravity. Moments of inertia of areas. Analysis of simple structures and machines. A study of various types of friction.

Prerequisites: MATH 141.

ENCP 210 - Dynamics (3 Credits)
Kinematics of particles and rigid bodies. Kinetics of particles with emphasis on Newton's second law; energy and momentum methods for the solution of problems. Applications of plane motion of rigid bodies.

Prerequisites: ENCP 200 or ECIV 200 or EMCH 200.

Environment (ENVR)

ENVR 101 - Introduction to the Environment (3 Credits)
Analysis of environmental issues and the role of science in their identification and resolution.

Carolina Core: SCI

ENVR 101L - Introduction to the Environment Lab (1 Credit)
Demonstrations, field trips, data analyses, and discussion relating to environmental issues, such as sustainability, resource management, and pollution control.

Prerequisite or Corequisite: ENVR 101.

Carolina Core: SCI

ENVR 202 - Environmental Science and Policy II (4 Credits)
Continuing interdisciplinary and multidisciplinary exploration of relations between environment and society for majors in the Environment and Sustainability Program. Case studies raise issues, challenges, and strategies to achieving sustainability. Sophomore standing.

Prerequisites: ENVR 201.

Exercise Science (EXSC)

EXSC 191 - Physical Activity and Health (3 Credits)
Conceps of exercise, nutrition, behavior changes, and skills to promote lifelong physical activity and health.
EXSC 223 - Anatomy and Physiology I (3 Credits)
The structure and functions of the human body; tissues, integument, skeletal, muscular, respiratory, and reproductive systems, and regulation of eating and metabolism.
Prerequisites: ENGL 102; BIOL 102; CHEM 111; MATH 122 or MATH 141.

EXSC 224 - Anatomy and Physiology II (3 Credits)
The structure and functions of the human body: nervous, cardiovascular, digestive, immune, urinary, and endocrine systems.
Prerequisites: C or better in EXSC 223 and EXSC 223L.

EXSC 343 - Practicum in Exercise Science (1-3 Credits)
Supervised practicum in a research or clinical setting for scientific-foundations track. Departmental special permission required.
Prerequisites: EXSC 223, EXSC 224.

EXSC 395 - Research Seminar in Exercise Science (3 Credits)
The research process in exercise science; participation in, presentation and discussion of current research.
Prerequisites: EXSC 223, EXSC 224.

Graduation with Leadership Distinction: GLD: Research

EXSC 499 - Independent Study (1-3 Credits)
Enrollment and topic to be approved in advance by advisor and instructor.
Prerequisites: EXSC 223, EXSC 224.

Graduation with Leadership Distinction: GLD: Research

Film and Media Studies (FAMS)

FAMS 240 - Film and Media Analysis (3 Credits)
Introduction to the critical study of film and media. Students will closely analyze moving images and develop written arguments about film and media.
Carolina Core: AIU

Finance (FINA)

FINA 301 - Money and Banking (3 Credits)
The role of money in the market economy. Commercial banks, the Federal Reserve System, and monetary policy. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

FINA 341 - Management of Risk and Insurance (3 Credits)
Introduction to decision making under uncertainty and overview of how various markets allow individuals and organizations to diversify risk. Includes measurement of risk, behavioral bias in decision making under uncertainty; diversification of risk, the role of capital in ensuring performance, moral hazard, adverse selection, insurance pricing, and applications to public policy issues such as health care, catastrophe risk, and safety regulation.
Prerequisite or Corequisite: FINA 363.

FINA 363 - Introduction to Finance (3 Credits)
Basic concepts of finance related to decision making.
Prerequisites: ECON 221, ACCT 225, and STAT 206.

FINA 364 - Financial Institutions (3 Credits)
A study of the functions and operations of financial institutions and their relationships to the commercial banking system and the general economy. Attention is devoted to savings institutions, insurance companies, rural and urban real estate credit, consumer credit, and associated topics. 03: 07/05/2019.

FINA 366 - Introduction to Real Estate and Urban Development (3 Credits)
Real estate analysis and administration; basic principles, concepts, terminology, and institutional factors related to real estate decisions in the urban environment. This course fulfills a pre-examination requirement of the South Carolina Real Estate licensing law (30-hour approved course).
Prerequisites: FINA 363.

FINA 369 - Personal Finance (3 Credits)
Life insurance, health insurance, wills, trusts, Social Security, stocks, bonds, real estate, mutual funds, and other uses of funds.

FINA 467 - Real Estate Finance (3 Credits)
The nature and importance of credit in real estate development and operations; legal framework, sources of mortgage funds, role of public and private financial institutions.
Prerequisites: FINA 366 or FINA 469.

French (FREN)

FREN 109 - Beginning French I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Admission to FREN 109 is restricted to those who have never studied French, who have not studied French in the previous five years, or who have a score of F-1 on the placement test.
Carolina Core: GFL

FREN 110 - Beginning French II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Admission to 110 is restricted to those who have completed FREN 109. Credit may be received only for one of the following: FREN 109/FREN 110 or FREN 121.
Prerequisites: FREN 109.
Carolina Core: GFL

FREN 121 - Elementary French (3 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in French. Admission to FREN 121 is restricted to those who have a score of F-2 on the placement test. Credit may be received for only one of the following: FREN 109/FREN 110 or FREN 121.

Carolina Core: GFL

FREN 122 - Basic Proficiency in French (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: FREN 110, FREN 121 or placement score of F-3.
Carolina Core: GFL

Geology (GEOL)

GEOL 101 - Introduction to the Earth (4 Credits)
Origin and nature of the earth with emphasis on internal processes and phenomena such as earthquakes, volcanoes, and mountain building; surface processes, including landform evolution. Three lectures and three laboratory hours each week.
Carolina Core: SCI

GEOL 102 - Fossils and the Evolution of Life on Earth (4 Credits)
Basic overview of fossils, including dinosaurs, and their importance for understanding earth history and the evolution of life. Three lectures and three laboratory hours each week.
GEOL 103 - Environment of the Earth (4 Credits)
Analysis of basic energy cycles of the earth. Interaction of human activity with earth processes to affect the environment. Three lectures and three laboratory hours each week. Field trips required.
Carolina Core: SCI

GEOL 110 - Cultural Geology (3 Credits)
The growth of geological concepts, scientific and non-scientific. The impact of geological factors on human affairs. The role of time and evolution (biological and physical). Restricted to non-science majors.
Carolina Core: SCI

History (HIST)

HIST 101 - European Civilization from Ancient Times to the Mid-17th Century (3 Credits)
The rise and development of European civilization from its Mediterranean origins through the Renaissance and Reformation.
Carolina Core: GHS

HIST 102 - European Civilization from the Mid-17th Century to the Present (3 Credits)
European development and expansion from the mid-17th century to the present.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 109 - Introduction to Latin American Civilization (3 Credits)
A discussion of the political, cultural, and economic forces which have conditioned the development of institutions and ideas in Spanish and Portuguese America.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 111 - United States History to 1865 (3 Credits)
A general survey of the United States from the era of discovery to 1865, emphasizing major political, economic, social, and intellectual developments.
Carolina Core: GHS

HIST 112 - United States History since 1865 (3 Credits)
A general survey of the United States from 1865 to the present, emphasizing major political, economic, social, and intellectual developments. Honors sections are available for students in the honors program.
Carolina Core: GHS

HIST 312 - French Revolution and Napoleon (3 Credits)
The changes in France and Europe during the revolutionary decade, the rise of Napoleon, and the establishment of French hegemony over the Continent.

HIST 316 - Nineteenth-Century Europe (3 Credits)
Political, social, economic, and intellectual developments from 1815-1900, which brought European culture to its zenith and contributed to Europe's global domination.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 317 - Contemporary Europe from World War I to World War II (3 Credits)
The Great War, revolution, and reconstruction; the rise of authoritarian and totalitarian regimes and the coming of World War II.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 318 - Europe from World War II to the Present (3 Credits)
The Second World War and its origins; the Cold War; European recovery; a divided continent and Europe in the Global Era.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 104 - Civil War and Reconstruction, 1860-1877 (3 Credits)
The political, military, and social history of the War and the reorganization which followed.

HIST 405 - The Rise of Industrial America, 1877-1917 (3 Credits)
A survey of recent United States history with emphasis on the economic, social, and literary developments from 1877 to 1917.

HIST 406 - The United States and a World at War, 1917-1945 (3 Credits)
The United States and a World at War, 1917-1945.

HIST 407 - United States History Since 1945 (3 Credits)
A survey of the political, economic, social, and cultural developments in the period after World War II.

HIST 410 - History of South Carolina Since 1865 (3 Credits)
A survey of recent South Carolina history with emphasis on social and institutional development.

HIST 413 - History of Canada (3 Credits)
A survey of Canadian development from colony to modern nation.

HIST 442 - The Old South (3 Credits)
Development of Southern society and of the forces that made the South a distinctive section of the United States.

HIST 443 - The New South (3 Credits)
Reconstruction, the Bourbon era, agrarian revolt, industrial revolution, racial problems, and the changes resulting from the impact of two world wars and the New Deal (1865-1946).
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HIST 449 - American Popular Culture Since 1890 (3 Credits)
A history of the contributions of the popular aspects of American culture and their interactions with American institutions.

Hlth Promo Educ & Beh (HPEB)

HPEB 321 - Personal and Community Health (3 Credits)
Psychosocial health, stress management, leading infectious and noninfectious diseases, nutrition, physical fitness, sexuality, consumer health and health care access, environmental health, aging, and death.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HPEB 331 - Health Education for the Elementary School (3 Credits)
Methods and materials for elementary schools. Integration and correlation of materials with school subjects. Sample content developed for primary, intermediate, and upper grades.
Hotel Rest Tourism Mgmt (HRTM)
HRTM 344 - Personnel Organization and Supervision (3 Credits)
Recruitment, selection, utilization, and development of human resources; role of supervisors in management and personnel administration.
Cross-listed course: RETL 344

Integrated Info Tech (ITEC)
ITEC 143 - Advanced Business Document Preparation (3 Credits)
Emphasis on production and versatility in preparing business documents. Not for TSTM majors. For business teacher certification.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
ITEC 233 - Introduction to Computer Hardware and Software (3 Credits)
Understanding of current computer hardware and software through computer building, repairing, and troubleshooting.
ITEC 243 - Word Processing Concepts and Technology (3 Credits)
Introduction to word processing concepts and applications.
Prerequisites: keyboarding.
ITEC 245 - Introduction to Networking (3 Credits)
Understanding the essential concepts of computer networks, including standards, topologies, security, media, switching, routing, and more.
Prerequisites: C or better in ITEC 233.
ITEC 264 - Computer Applications in Business I (3 Credits)
Survey of core skills and techniques for spreadsheet design and analysis of business problems.
ITEC 270 - Records Control (3 Credits)
Analysis and control of office records including creation, processing, maintenance, protection, and disposition.
Prerequisites: ITEC 264.

Journalism (JOUR)
JOUR 101 - Media and Society (3 Credits)
Principles, history, philosophies, theories of the mass media and allied professions and their societal role and impact.

Management (MGMT)
MGMT 371 - Principles of Management (3 Credits)
A comprehensive survey of the basic principles of management applicable to all forms of business. The course provides the student with a basis for thinking about complex business situations in the framework of analysis of the management process.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
MGMT 374 - Strategic Human Resource Management (3 Credits)
A survey of the major approaches used in managing human resources. Covers selection, compensation, legal compliance, discipline, organizational restructuring, TQM, motivation, labor relations, and performance management.
Prerequisites: MGMT 371.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Management Science (MGSC)
MGMT 376 - Employee Engagement (3 Credits)
Introduction to human behavior in organizations. Emphasis on factors that contribute to the effectiveness of individuals and groups in organizations.
Prerequisites: MGMT 371.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
MGMT 472 - Entrepreneurship and Small Business (3 Credits)
This course is an introduction to the ownership and management of small firms, emphasizing their role in the U.S. economy, their particular demands on owners, and the effects of newness and smallness on their managers' decisions.
Prerequisites: MGMT 371.
MGMT 478 - Strategic Management (3 Credits)
A study of the formulation and application of functionally integrated business policy by top management. Emphasis is on decision making in the face of changing conditions.
Prerequisites: MKTG 350, FINA 363, MGMT 371.

Marine Science (MSCI)
MSCI 101 - The Ocean Environment (4 Credits)
Origin and evolution of the oceans, plate tectonics, ocean circulation, waves and tides, seawater and sediment composition, and influences on biology. Three lecture and three laboratory hours per week. Scheduled field trips required.
Carolina Core: SCI
MSCI 102 - The Living Ocean (4 Credits)
Origin, evolution, and diversity of marine life, biological production, trophic dynamics, nutrient cycles, marine resources, and environmental concerns. Three lecture and three laboratory hours per week. Scheduled field trips required.
Carolina Core: SCI
MSCI 210 - Oceans and Society (3 Credits)
A nontechnical introduction to human interactions with the marine environment: marine organisms, marine systems, and the physical and chemical characteristics of oceans and estuaries. Not available for marine science major credit.
Carolina Core: SCI
MSCI 210L - Oceans and Society Laboratory (1 Credit)
Experiments and exercises which illustrate how specific components of
marine environments are structured, function, and can be measured. Two
laboratory hours per week. Not available for marine science major credit.
Attendance on designated field trips may be required.
Prerequisite or Corequisite: MSCI 210.

Carolina Core: SCI

MSCI 215 - Coastal Environments of the Southeastern U.S. (3 Credits)
Coastal zones of South Carolina and neighboring states, including
geologic history, geomorphology, stratigraphy, hydrogeology, shoreline
processes, environmental issues, and effect of man. Three lecture hours
each week plus optional field trips. Not available for marine science major
credit.
Prerequisite or Corequisite: MSCI 215.

Cross-listed course: GEOL 215L
Carolina Core: SCI

Marketing (MKTG)

MKTG 350 - Principles of Marketing (3 Credits)
Principles and concepts underlying marketing functions, including the
conception, pricing, promotion, and distribution of products and services
and the role of marketing in society. A. major sections; ECON 224,
ACCT 222 for non-B.A. major sections.
Prerequisites: ECON 221/ECON 222, ACCT 225/ACCT 226 for B.

MKTG 351 - Consumer Behavior (3 Credits)
The consumer decision process, with emphasis on consumer decision
making, satisfaction/dissatisfaction factors, perception, learning, group
influences, and marketing strategy implications.
Prerequisites: MKTG 350.

MKTG 457 - Personal Selling and Sales Management (3 Credits)
Examines fundamentals of personal selling and sales management and
the development of communication and selling skills that yield desired
sales results.
Prerequisites: MKTG 350.

Mathematics (MATH)

MATH 111 - Basic College Mathematics (3 Credits)
Basic college algebra; linear and quadratic equations, inequalities,
functions and graphs of functions, exponential and logarithmic functions,
systems of equations.
Prerequisites: placement through Algebra version of the Mathematics
Placement Test.

MATH 111I - Intensive Basic College Mathematics (4 Credits)
An intensive treatment of the topics covered in MATH 111.
Prerequisites: placement through Algebra version of the Mathematics
Placement Test.

MATH 112 - Trigonometry (2 Credits)
Topics in trigonometry specifically needed for MATH 141, MATH 142,
MATH 241. Circular functions, analytic trigonometry, applications
of trigonometry. Credit may not be received for both MATH 112 and
MATH 115.
Prerequisites: C or better in MATH 111 or MATH 111I, or placement
through Algebra version of the Mathematics Placement Test.

MATH 115 - Precalculus Mathematics (4 Credits)
Topics in algebra and trigonometry specifically needed for MATH 141,
MATH 142, MATH 241. Subsets of the real line, absolute value;
polynomial, rational, inverse, logarithmic, exponential functions; circular
functions; analytic trigonometry.
Prerequisites: C or better in MATH 111 or MATH 111I, or placement
through Precalculus version of the Mathematics Placement Test.

MATH 122 - Calculus for Business Administration and Social
Sciences (3 Credits)
Derivatives and integrals of elementary algebraic, exponential, and
logarithmic functions. Maxima, minima, rate of change, motion, work,
area under a curve, and volume.
Prerequisites: C or better in MATH 111, MATH 111I or MATH 115 or
placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 141 - Calculus I (4 Credits)
Functions, limits, derivatives, introduction to integrals, the Fundamental
Theorem of Calculus, applications of derivatives and integrals. Four
classroom hours and one laboratory hour per week.
Prerequisites: C or better in Math 112, MATH 115, or MATH 116, or
placement through Precalculus version of the Mathematics Placement
Test.

Carolina Core: ARP

MATH 142 - Calculus II (4 Credits)
Methods of integration, sequences and series, approximations. Four
classroom hours and one laboratory hour per week.
Prerequisites: C or better in MATH 141.

Carolina Core: ARP

MATH 151 - Calculus Workshop I (2 Credits)
Small study group practice in applications of calculus. For elective credit
only.
Corequisite: MATH 141.

MATH 152 - Calculus Workshop II (2 Credits)
Small study group practice in applications of calculus. For elective credit
only.
Corequisite: MATH 142.

MATH 170 - Finite Mathematics (3 Credits)
Elementary matrix theory; systems of linear equations; permutations and
combinations; probability and Markov chains; linear programming and
game theory.
Prerequisites: C or better in MATH 111 or MATH 111I or MATH 122, or
placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP
MATH 172 - Mathematical Modeling for the Life Sciences (3 Credits)
Biological modeling with differential and difference equations; techniques of model modifications; analytic, numerical, and graphical solution methods; equilibria, stability, and long-term system behavior; geometric series; vectors, matrices, eigenvalues, and eigenvectors. Applications principally to population dynamics and compartment models.
Prerequisites: C or better in MATH 122 or MATH 141.

Carolina Core: ARP

MATH 174 - Discrete Mathematics for Computer Science (3 Credits)
Logic, number theory, sequences, series, recursion, mathematical induction, set theory, enumeration, functions, relations, graphs and trees. Connections to computers and to programming are emphasized when possible.
Prerequisites: C or better in MATH 115, MATH 116, MATH 122, or MATH 141, or placement through the pre-calculus version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 198 - Introduction to Careers and Research in the Mathematical Sciences (1 Credit)
An overview of different areas of mathematical research and career opportunities for mathematics majors. Pass/fail only.
Prerequisites: C or better in MATH 141.

Graduation with Leadership Distinction: GLD: Research

MATH 221 - Basic Concepts of Elementary Mathematics I (3 Credits)
The meaning of number, fundamental operations of arithmetic, the structure of the real number system and its subsystems, elementary number theory. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 111 or MATH 111I or placement through Algebra version of the Mathematics Placement Test.

MATH 222 - Basic Concepts of Elementary Mathematics II (3 Credits)
Informal geometry and basic concepts of algebra. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 221.

MATH 241 - Vector Calculus (3 Credits)
Vector algebra, geometry of three-dimensional space; lines, planes, and curves in space; polar, cylindrical, and spherical coordinate systems; partial differentiation, max-min theory; multiple and iterated integration, line integrals, and Green's theorem in the plane.
Prerequisites: C or better in MATH 142.

MATH 242 - Elementary Differential Equations (3 Credits)
Ordinary differential equations of first order, higher order linear equations, Laplace transform methods, series methods; numerical solution of differential equations. Applications to physical sciences and engineering.
Prerequisites: C or better in MATH 142.

MATH 374 - Discrete Structures (3 Credits)
Propositional and predicate logic; proof techniques; recursion and recurrence relations; sets, combinatorics, and probability; functions, relations, and matrices; algebraic structures.
Prerequisites: C or better in both MATH 142 and CSCE 146.

MATH 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

Music (MUSC)

MUSC 110 - Introduction to Music (3 Credits)
Perceptive listening and appreciation of musical elements, forms and style periods, including composers' lives, individual styles and representative works. Emphasis on classical music; jazz and American popular music included.
Carolina Core: AIU

MUSC 114 - Introduction to Music Theory (3 Credits)
Carolina Core: AIU

MUSC 140 - Jazz and American Popular Music (3 Credits)
Development of jazz and American popular music through the study of important soloists, ensembles, arrangers, and composers.
Carolina Core: AIU

Nursing (LANU)

LANU 104 - Nursing Care Management I (4 Credits)
This course focuses on the knowledge, skills, and abilities that are fundamental to nursing practice with application in acute or extended care settings.
Prerequisites: Admission to the nursing program

Corequisite: BIOL 243, BIOL 243L; ENGL 101; LANU 206, LANU 106

LANU 106 - Pharmacologic Basics (2 Credits)
This introductory course outlines the basic concepts of pharmaceutics, pharmacokinetics, pharmacodynamics, and pharmacotherapeutics. The process of clinical calculations is introduced, as well as the major drug classifications.
Prerequisites: Admission to the nursing program; LANU 159, LANU 211

Corequisite: BIOL 243, BIOL 243L; ENGL 101, ENGL 102; LANU 104, LANU 206

LANU 159 - Nurse Care Management II (6 Credits)
Focuses on the delivery of nursing care to an increasing number of individuals experiencing health problems emphasizing selected physiological systems.
Prerequisites: LANU 104, LANU 106, LANU 206

Corequisite: BIOL 244, BIOL 244L; PSYC 101; LANU 211

LANU 206 - Clinical Skills Application (2 Credits)
Involves the application of knowledge, skills, and abilities in a clinical setting.
Prerequisites: Admission to the nursing program

Corequisite: BIOL 243, BIOL 243L; ENGL 101; LANU 104, LANU 106

LANU 209 - Nursing Management III (5 Credits)
Focuses on the delivery of nursing care to an increasing number of individuals experiencing health problems emphasizing selected physiological systems.
Prerequisites: LANU 159, LANU 211

Corequisite: ENGL 102
LANU 211 - Care of the Childbearing Family (4 Credits)
This course facilitates the application of the nursing process to assist in meeting the needs of the childbearing and child-rearing family. Focus is on both normal and abnormal aspects.
**Prerequisites:** LANU 104, LANU 106, LANU 206
**Corequisite:** LANU 159; PSYC 101; BIOL 244, BIOL 244L

LANU 214 - Mental Health Nursing (4 Credits)
This course facilitates the utilization of the nursing process to assist in meeting the needs of patients with common mental health problems. Focus is on the dynamics of human behavior, ranging from normal to extreme.
**Prerequisites:** LANU 229
**Corequisite:** LANU 219, humanities/fine arts elective, elective

LANU 219 - Nursing Management and Leadership (4 Credits)
This course prepares the student for the professional nursing role through the introduction of management skills required to care for small groups of individuals and to function as a leader of a nursing team.
**Prerequisites:** LANU 214

LANU 229 - Nursing Care Management IV (6 Credits)
This course focuses on the delivery of nursing care to clients throughout the lifespan who are experiencing complex, multi-system health problems.
**Prerequisites:** LANU 209
**Corequisite:** BIOL 330, BIOL 330L; MATH 111

**Nursing (NURS)**

NURS 212 - Evolution of Nursing Science (2 Credits)
Historical imperatives for nursing are explored to aid in understanding the scientific base of nursing. Internal and external factors influencing the evolution of nursing as a profession, science, art, and practice discipline are discussed. Sophomore nursing students.

NURS 216 - Biophysical Pathology (3 Credits)
Pathology associated with biophysical alterations.
**Prerequisites:** CHEM 102; BIOL 243 and BIOL 244 or EXSC 224 and accompanying labs.

NURS 220 - Clinical Nutrition (3 Credits)
Principles of normal and therapeutic nutrition, and the role of the nurse in nutritional care.
**Prerequisites:** NURS 216.

**Palmetto College (PCAM)**

PCAM 104 - Foundations of Composition (3 Credits)
A course in writing skills with practice in composing essays, including intensive review of grammar, punctuation, and mechanics.

PCAM 105 - Contemporary College Mathematics (3 Credits)
Linear and quadratic equations and models, functions, exponential models, logarithms, systems of equations, fundamentals of probability and statistics.

PCAM 106 - Foundations of College Algebra (3 Credits)
Operations on real numbers, linear equations and inequalities, quadratic equations, factoring, absolute value equations, exponential and radical expressions, graphs, and functions. Additional topics may include math study skills, logarithms, exponential functions, probability, statistics, systems of equations, polynomial division, and mathematical modeling.
**Prerequisites:** C or better in PCAM 106 students must pass the math placement test (MPT) with a minimum score of MB1 or MA2.

PCAM 141 - Introduction to Computer Keyboarding (3 Credits)
Keyboarding using the touch method, inputting, editing, and printing. Designed for students without keyboarding skills. Elective credit only. This course might not apply toward associate’s degrees or Columbia baccalaureate degrees.

PCAM 151 - Computer Literacy and Applications (3 Credits)

PCAM 201 - Introduction to Internet Research (3 Credits)
Developing the means by which students may learn to access the Internet through mainframe and PC connections to accomplish specific research needs. This course might not apply toward associate's degrees or Columbia baccalaureate degrees.
**Prerequisites:** CSCE 101.

PCAM 205 - Foundations of Leadership (3 Credits)
This course combines leadership theory with practical application, equipping students with the knowledge and skills needed to work more effectively with people, become better leaders, and reach their professional goals.
**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

PCAM 299 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and academic dean is required for undergraduate studies. May be taken for elective credit only. May be repeated for up to 6 credits hours.

**Palmetto Programs (PALM)**

PALM 493 - South Carolina Studies (3 Credits)
Reading and writing about South Carolina from the perspective of multiple disciplines, incorporating elements of the student's major and cognate.

PALM 494 - Internship (3 Credits)
Supervised immersion and exploration in a field related to the major, with a career, cultural, or community focus.
**Prerequisites:** C or better in PALM 493.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Internships

PALM 495 - Service-Learning (3 Credits)
An exploration of theories of service-learning with application of practical solutions to meet community needs.
**Prerequisites:** C or better in PALM 493.

**Experiential Learning:** Experiential Learning Opportunity

**Philosophy (PHIL)**

PHIL 101 - Special Topics in Philosophy (3 Credits)
Topics selected by the instructor for specialized study. Course content varies and will be announced in the schedule of classes by title.
PHIL 102 - Introduction to Philosophy (3 Credits)
An introduction to the main problems of philosophy and its methods of inquiry, analysis, and criticism. Works of important philosophers will be read. Honors section offered.

PHIL 111 - Introduction to Logic II (3 Credits)
Philosophical foundations of inductive inference, including probability, statistics, and decision theory; application of the methods and results of inductive inference to philosophical problems such as the problem of rationality, epistemology, theory confirmation, social and political philosophy.
Prerequisites: At least one of the following: PSYC 227; SOCY 220; STAT 110, STAT 112, STAT 201, STAT 205, or STAT 206; MGSC 291.

Carolina Core: ARP

PHIL 114 - Introduction to Formal Logic I (3 Credits)
Formal logic, including foundational logical concepts, syntax and semantics of first-order logic; derivations; applications.
Carolina Core: ARP

PHIL 210 - Philosophical Themes in Literature (3 Credits)
Selected philosophical problems as they are presented in imaginative and theoretical literature. Works of fiction and philosophical treatments of issues involved in them will be read and discussed.

PHIL 211 - Contemporary Moral Issues (3 Credits)
Moral issues confronting men and women in contemporary society. Topics will vary but may include discussion of problems related to abortion, drugs, euthanasia, war, social engineering, and punishment of criminals.
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 301 - Ancient Philosophy (3 Credits)
An introduction to the work of ancient philosophers, with special emphasis on Plato and Aristotle.
Cross-listed course: CLAS 301

PHIL 302 - Greek and Roman Philosophy after Aristotle (3 Credits)
Problems such as hedonism, providence, belief and evidence, and mysticism, as they appear in the writings of Epicureans, Stoics, Sceptics, and Plotinus.
Cross-listed course: CLAS 302

PHIL 303 - History of Medieval Philosophy (3 Credits)
Major philosophical traditions in the Middle Ages.

PHIL 304 - Seventeenth and Eighteenth-Century Philosophy (3 Credits)
An introduction to Continental and British philosophy running roughly from Descartes through Kant.

PHIL 305 - Nineteenth and Twentieth-Century Philosophy (3 Credits)
An introduction to Continental and British philosophy since Kant through study of the works of representative philosophers. Particular emphasis is placed on the development of Idealism, Marxism, Existentialism and Phenomenology, and analytic philosophy.

PHIL 310 - American Philosophy (3 Credits)
The principal movements of philosophical thought from Colonial times to the present, with special emphasis on the 19th and 20th centuries.

PHIL 311 - Existentialism (3 Credits)
An introduction to existentialist themes in contemporary philosophy, literature, psychology, and religion. The writings of existentialists such as Kierkegaard, Nietzsche, Camus, Sartre, Buber, May, and Binswanger will be read and discussed.

PHIL 320 - Ethics (3 Credits)
A study of the moral principles of conduct and the basic concepts underlying these principles, such as good, evil, right, wrong, justice, value, duty, and obligation. The ethical works of influential philosophers are analyzed in terms of these concepts.
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 324 - Business Ethics (3 Credits)
Ethical problems in business; application to business situations of philosophical theories of individual, corporate, and governmental rights and responsibilities.
Carolina Core: VSR
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 330 - Social and Political Philosophy (3 Credits)
An overview of major themes in political philosophy such as the nature of politics, obligation, community, representation, freedom, equality, and justice.
Cross-listed course: POLI 300
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PHIL 341 - Philosophy and Film (3 Credits)
Selected philosophical problems as they are presented in feature and documentary films.

Physical Education (PEDU)

PEDU 104 - Personal Fitness and Weight Control (1 Credit)
Advanced techniques for controlling weight and improving fitness through exercise, lectures, and self-evaluation.

PEDU 105 - Weight Training (1 Credit)
Fundamentals of progressive resistance exercise training.

PEDU 106 - Advanced Weight Training (1 Credit)
Advanced techniques.
Prerequisites: PEDU 105.

PEDU 107 - Group Exercise (1 Credit)
Cardio-respiratory fitness, flexibility, muscular strength and endurance, and agility through various group exercise formats while utilizing a variety of equipment.

PEDU 108 - Fitness Swimming (1 Credit)
Individualized physical conditioning through lap swimming and aquatic calisthenics, games, and activities.
Prerequisites: PEDU 140.

PEDU 110 - Orientation to Physical Education (1 Credit)
Experiences in a variety of physical-activity areas.

PEDU 112 - Basketball (1 Credit)
Fundamental skills of game performance. Strategy, rules, and basic offenses and defenses.

PEDU 113 - Bowling (1 Credit)
Fundamental skills and techniques of bowling.

PEDU 114 - Golf (1 Credit)
Basic strokes, rules, and strategy of golf.

PEDU 116 - Handball (1 Credit)
Fundamentals, strategy, and rules of handball.
PEDU 117 - Karate (1 Credit)
Fundamentals.

PEDU 119 - Soccer (1 Credit)
Fundamental skills for game performance; history, rules, and game strategy.

PEDU 120 - Softball (1 Credit)
Fundamental skills for game performance; history, rules, and game strategy.

PEDU 121 - Beginning Tennis (1 Credit)
Basic strokes, history, rules, and strategy of the game.

PEDU 122 - Volleyball (1 Credit)
Recreational and competitive volleyball skills.

PEDU 129 - Racquetball (1 Credit)
Fundamental skills, rules, and terminology.

PEDU 132 - Intermediate Tennis (1 Credit)
Intermediate skills and strategies.
Prerequisites: PEDU 121.

PEDU 136 - Yoga (1 Credit)
Fundamental skills and terminology.

PEDU 140 - Beginning Swimming (1 Credit)
Skills for safety and recreation.

PEDU 141 - Intermediate Swimming (1 Credit)
Prerequisite: PEDU 140.

PEDU 142 - Lifeguard Training (1 Credit)
Skills of lifesaving.
Prerequisites: swim 500 yards, tread water for one minute, and swim 20 feet underwater.

PEDU 143 - Water Safety Instructor Certification (1 Credit)
Skills, methods, and techniques to teach Red Cross Swimming and Life Saving.
Prerequisites: 17 years of age; sound physical condition; possession of the Red Cross Advanced Lifesaving Certificate, a Red Cross Swimmer Certificate, or the ability to perform the Swimmer Course.

PEDU 148 - Team Water Sports (1 Credit)
Fundamental skills, rules, and strategies for participation in team water sports.
Prerequisites: intermediate swimming skills.

PEDU 149 - Survival Swimming (1 Credit)
Skills and techniques for survival under adverse conditions.
Prerequisites: swim 100 yards, tread water for one minute, and swim 20 feet underwater.

PEDU 170 - Beginning Latin Dance (1 Credit)
Introductory course to multiple styles of social Latin dancing including Salsa, Merengue and Bachatta. Designed to develop the skills and techniques necessary for social level Latin dancing. Emphasis will be placed on basic social elements of dance, patterns, music, and leading and following.

PEDU 181 - Equestrian (1 Credit)
English hunter-style riding for intermediate students.

PEDU 182 - Backpacking (1 Credit)
Living in the out-of-doors; gear selection, map and compass reading, backpacking, hiking, and camping.

PEDU 183 - Canoeing (1 Credit)
Fundamentals of lake, river, and whitewater canoeing.

PEDU 184 - Snow Skiing (1 Credit)
Fundamental skills and techniques.

Physics (PHYS)

PHYS 201 - General Physics I (3 Credits)
First part of an introductory course sequence. Topics include mechanics, and selections from wave motion, sound, fluids, and heat. No previous background in physics is assumed.
Prerequisites: C or better in MATH 111, MATH 111L, MATH 112, MATH 115, MATH 116, MATH 122, MATH 141, or by placement score into MATH 122, MATH 141, or higher.

Carolina Core: SCI

PHYS 201L - General Physics Laboratory I (1 Credit)
Prerequisite or Corequisite: PHYS 201.

Carolina Core: SCI

PHYS 202 - General Physics II (3 Credits)
Continuation of PHYS 201; includes electromagnetism, relativity, quantum physics, atomic and nuclear physics.
Prerequisites: C or better in PHYS 201.

Carolina Core: SCI

PHYS 202L - General Physics Laboratory II (1 Credit)
Prerequisite or Corequisite: PHYS 202.

Carolina Core: SCI

PHYS 211 - Essentials of Physics I (3 Credits)
Classical mechanics and wave motion. Calculus-level course for students of science and engineering.
Prerequisites: C or better in MATH 141.
Corequisite: PHYS 211L.

Carolina Core: SCI

PHYS 211L - Essentials of Physics I Lab (1 Credit)
Prerequisite or Corequisite: PHYS 206 or PHYS 211.

Carolina Core: SCI

PHYS 212 - Essentials of Physics II (3 Credits)
Classical electromagnetism and optics.
Prerequisites: C or better in PHYS 211 and MATH 142.
Corequisite: PHYS 212L.

Carolina Core: SCI

PHYS 212L - Essentials of Physics II Lab (1 Credit)
Prerequisite or Corequisite: PHYS 207 or PHYS 212.

Carolina Core: SCI
Political Science (POLI)

**POLI 101 - Introduction to Global Politics (3 Credits)**
Introduction to theories about global politics. Issues and controversies central to global politics.

Carolina Core: GSS

**Graduation with Leadership Distinction:** GLD: Global Learning

**POLI 105 - Introduction to Politics (3 Credits)**
Concepts and problems involved in human relationship with governments, the nation-state, and political change.

**POLI 201 - American National Government (3 Credits)**
The formation and development of the national government, its organization and powers. Overlay Course.

Carolina Core: GSS, VSR

**POLI 341 - Contemporary United States Foreign Policy (3 Credits)**
A critical analysis of selected problems of United States foreign policy.

**Graduation with Leadership Distinction:** GLD: Global Learning

**POLI 357 - Film, Politics, and Social Change (3 Credits)**
Critical analysis of film as expression and agent of political cultural, ideology, and change.

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy

**POLI 362 - Politics and the Mass Media (3 Credits)**
Survey of the role in American politics of mass communications media, including the press and electronic news reporting; influence of mass media on the conduct of political campaigns, political leadership style, and public opinion.

**POLI 365 - State Government (3 Credits)**
A study of state-federal relations, relations among states, state constitutions, and the structure and functions of the three branches of government. Emphasis is given to South Carolina.

**POLI 368 - Interest Groups and Social Movements (3 Credits)**
The mobilization, organization, tactics, and results of group-based politics, including latent interests and the suppression of interests.

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**POLI 370 - Introduction to Public Administration (3 Credits)**
A study of the basic principles and theory of administrative structure, responsibility, and control in relation to policy making in the modern state.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

**POLI 406 - The State of American Politics (3 Credits)**
Major factors that affect the state of contemporary American politics, including the Constitution, the Congress, the courts, the presidency, the states, federalism, political parties, special-interest groups, and the electoral process.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

**PSYC 226 - Research Methods in Psychology (3 Credits)**
Basic principles and methodology.

**Prerequisites:** PSYC 101 or SCHC 130.

**Graduation with Leadership Distinction:** GLD: Research

**PSYC 227 - Psychological Statistics (3 Credits)**
Introduction to statistical methods essential for psychological research.

**Prerequisites:** PSYC 226 and MATH 111 or placement out of MATH 111.

**PSYC 228 - Laboratory in Psychology (2 Credits)**
Laboratory in psychology in which research methods and statistical methods are integrated. One lecture and one two-hour laboratory per week.

**Prerequisites:** PSYC 226 and PSYC 227.

**PSYC 301 - Psychology of Marriage (3 Credits)**
The psychological, physiological, and social characteristics of marriage.

**Cross-listed course:** WGST 301

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences

**PSYC 400 - Survey of Learning and Memory (3 Credits)**
Research and applications concerning the acquisition of new behavior and knowledge, including accounts based on classical and instrumental conditioning and on information-processing models.

**Prerequisites:** PSYC 101 or SCHC 130.

**PSYC 405 - Cognitive Psychology (3 Credits)**
Research and theories on sensory memory, attention, short-term and working memory, human learning and forgetting, imagery, long-term memory, speech perception, reading, language, thinking and problem solving, and decision making.

**PSYC 410 - Behavioral and Mental Disorders (3 Credits)**
Covers the classification, diagnosis, etiological theories, and treatments of the major mental and emotional disorders.

**Prerequisites:** PSYC 101 or SCHC 130.

**PSYC 420 - Survey of Developmental Psychology (3 Credits)**
Psychological development from conception to late adulthood. Topics include physical, cognitive, and social processes associated with development at each stage of the life cycle.

**Prerequisites:** PSYC 101 or EDPY 335 or SCHC 130.

Religious Studies (RELG)

**RELG 101 - Exploring Religion (3 Credits)**
Beliefs and practices of the world’s religions and the methods scholars use to study them.

Carolina Core: GSS

**RELG 120 - Comparative Religion (3 Credits)**
Issues, theories, and debates that shape global religious traditions, cultures, and communities; examination of historical contexts and development, applying social scientific inquiry and methods to analyze relevant current circumstances and concerns.

**RELG 201 - Religion and Culture (3 Credits)**
Exploration of the dynamic relationships between selected religions and cultures.

**Graduation with Leadership Distinction:** GLD: Professional and Civic Engagement Leadership Experiences
RELG 240 - Introduction to Christianity (3 Credits)
Introduction to the Christian religion, with emphasis on the history of the major traditions and movements that have shaped the multicultural practices and social impact of modern global Christianity.

RELG 301 - Hebrew Bible (Old Testament) (3 Credits)
Modern study of the Hebrew Bible from historical, literary, and archeological points of view. Reading and analysis of texts in translation. Cross-listed course: JSTU 301

RELG 302 - New Testament (3 Credits)
Historical and critical study of the New Testament writings, with emphasis on origins, production, and transmission.

RELG 311 - Gospel Literature and the Formation of Christianity (3 Credits)
Gospels about Jesus from the 1st and 2nd centuries CE; analysis with attention to canonical texts as well as those not contained in today's major canonical collections; assessment of gospel literature in competing configurations of Christianity during its formative years.

RELG 312 - The Life and Letters of Paul (3 Credits)
A critical study in the life and thought of Paul, his letters to the early Christian churches, his role in the expansion of the Christian movement, and his continuing influence today.

RELG 412 - Faith, Doubt, and God (3 Credits)
Judeo-Christian views of God; modern criticism and contemporary responses.

Retailing (RETL)

RETL 261 - Principles of Accounting I (3 Credits)
A study of the accounting cycle with emphasis on preparation and analysis of financial statements.

RETL 262 - Principles of Accounting II (3 Credits)
A study of the preparation and interpretation of corporate financial statements with an emphasis on analysis and decision making techniques. Prerequisites: RETL 261.

RETL 351 - Retail Entrepreneurship (3 Credits)
Essentials of creating and operating a new retail venture in physical and virtual environments.

Social Work (SOWK)

SOWK 303 - Social Welfare Services for Children and Youth (3 Credits)
Social welfare services available to children and youth and the referral processes involved. Prerequisites: PSYC 101, or SOCY 101, or SOWK 201.

SOWK 304 - Social Welfare Services to Older Adults and Their Families (3 Credits)
Social welfare services available to families, ranging from counseling services to specialized services for aged citizens. Prerequisites: PSYC 101 or SOCY 101 or SOWK 201.

SOWK 305 - Social Welfare Services for Women and Minorities (3 Credits)
Social welfare services available to women and minorities and the forces that shape these services. Prerequisites: C or better in PSYC 101, or SOCY 101, or SOWK 201.

Cross-listed course: WGST 306
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

Sociology (SOCY)

SOCY 101 - Introductory Sociology (3 Credits)
An introduction to sociological facts and principles: an analysis of group-making processes and products. Carolina Core: GSS

Spanish (SPAN)

SPAN 109 - Beginning Spanish I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have never studied Spanish or placed by examination into SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121. Carolina Core: GFL

SPAN 110 - Beginning Spanish II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have completed SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121. Carolina Core: GFL

SPAN 121 - Elementary Spanish (3 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in Spanish. Admission only by proficiency examination. Credit may be received only for one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121. Carolina Core: GFL

SPAN 122 - Basic Proficiency in Spanish (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills. Prerequisites: SPAN 109, SPAN 110, SPAN 111, or SPAN 121 or by placement examination. Carolina Core: GFL

Speech (SPCH)

SPCH 140 - Public Communication (3 Credits)
Introduction to theory and practice of oral communication in public, social, and institutional contexts. Includes foundational and cumulative training in the invention, performance, and critical analysis of oral communication, with emphasis on argumentation, persuasion, audience analysis, delivery, and ethical forms of engagement. Carolina Core: CMS
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
**Sport & Entertnmnt Mgmt (SPTE)**

**SPTE 240 - Business Law (3 Credits)**
Formation of contracts and their operation as they apply to business; promissory notes and checks; agency and employment.

**Statistics (STAT)**

**STAT 110 - Introduction to Statistical Reasoning (3 Credits)**
A course in statistical literacy. Topics include data sources and sampling, concepts of experimental design, graphical and numerical data description, measuring association for continuous and categorical variables, introduction to probability and statistical inference, and use of appropriate software. Credit given only for STAT 110 or STAT 112.
*Carolina Core: ARP*

**STAT 112 - Statistics and the Media (3 Credits)**
Statistics and the Media. (3) Statistical and information literacy. Experimental and survey design; descriptive statistics; basic probability; simple confidence intervals and hypothesis tests; statistical software; collection, management, and evaluation of information; and presentation of statistics in the media. Credit given for only STAT 110 or STAT 112.
*Carolina Core: ARP, INF*

**STAT 201 - Elementary Statistics (3 Credits)**
Introduction to the fundamentals of modern statistical methods, including descriptive statistics, probability, random sampling, simple linear regression, correlation, tests of hypotheses, and estimation.
*Prerequisites: MATH 111 or MATH 115 or STAT 110.*

*Carolina Core: ARP*

**STAT 205 - Elementary Statistics for the Biological and Life Sciences (3 Credits)**
Introduction to fundamental statistical methods with applications in the biological and life sciences. Includes descriptive statistics; probability; one and two-sample models for population means; contingency tables (including relative risk, odds ratios, case-control studies, and estimation of sensitivity and specificity); linear regression; logistic regression; aspects of survival analysis, and ANOVA.
*Prerequisites: MATH 111 or higher.*

**Theatre (THEA)**

**THEA 120 - Laboratory Theatre Production (1 Credit)**
Procedures for implementation of processes involved in the Laboratory Theatre Production Program. Supervised preparation of all performance and production elements involved in the collaborative process of theatre production. Course content varies according to season production program. Permission of Instructor or by audition. May be repeated for credit.

**THEA 121 - Theatre Running Crew Laboratory. (1 Credit)**
Procedures and processes of running crews for the Mainstage Theatre Production Program. Collaborative teamwork through supervised participation in various theatre production running crews (management, scenic, lighting, sound, costumes and makeup). Course content varies according to season production program. May be repeated for credit.

**THEA 122 - Theatre Performance Laboratory (1 Credit)**
Preparation and procedures of the rehearsal and performance processes for the Mainstage Theatre Production Program. Collaborative teamwork through supervised participation in an acting company. Course content varies according to season production program. By audition only. May be repeated for credit.
*Prerequisites: THEA 120.*

**THEA 123 - Theatre Production Studio (1 Credit)**
Procedures and processes for the Mainstage Theatre Production Program. Collaborative teamwork through supervised participation in various theatre production student crews (scenic, lighting, sound, costume, makeup, and promotions). Course content varies according to season production program.
*Prerequisites: THEA 121.*

**THEA 170 - Fundamentals of Acting (3 Credits)**
Introduction to the art and craft of acting. Practical exploration through improvisation and scripted scene work. Includes a brief history of the development of modern acting techniques.
*Carolina Core: AIU*

**THEA 200 - Understanding and Appreciation of Theatre (3 Credits)**
An introduction to the understanding and appreciation of theatrical experience. Attendance at theatrical performances required.
*Carolina Core: AIU*

**THEA 201 - Introduction to Theatre Studies (3 Credits)**
Introduction to methods of analyzing and interpreting drama, with emphasis on play structure, genre, and style. Designed for the theatre major in preparation for theatre scholarship, performance, production, and design.
*Graduation with Leadership Distinction: GLD: Research*

**THEA 240 - Beginning Voice and Speech (3 Credits)**
Study and practical application of voice and speech fundamentals in performance. Emphasis on speaking with ease, power and clarity to impact an audience.
*Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences*

**THEA 270 - Beginning Acting (3 Credits)**
An exploration of the acting process through scene study. Focus will be on developing the actor's personal technique, emphasizing emotional truthfulness and authenticity.
*Prerequisites: THEA 170 or declaration of major.*

**THEA 340 - Literature and Performance (3 Credits)**
Introduction to the study of literature through performance; reading, analysis, and performance of prose, poetry, nonfiction, and drama.
*Cross-listed course: SPCH 340*

**THEA 370 - Intermediate Acting (3 Credits)**
Development of acting skills through study of acting techniques emphasizing emotional truthfulness and authenticity. Application to scene study, monologues and auditions. Intensive script analysis for character development.
*Prerequisites: THEA 170 or THEA 270.*

**University Experience (UNIV)**

**UNIV 101 - The Student in the University (3 Credits)**
The purposes of higher education and potential roles of the student within the university. Open to freshmen. Also open to other undergraduate students in their first semester of enrollment.
UOFSC SALKEHATCHIE

Welcome to the UofSC Salkehatchie Bulletin
The USC Salkehatchie Academic Bulletin is the official document of record concerning academic programs and regulations.

This bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina. The University reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Bulletin Updates and Corrections
Noncurricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the Registrar (bulletin@sc.edu) on the Columbia Campus. Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletins.

Printing Portions of the Online Bulletins
The academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

Additional Information
Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement.

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost on the Columbia campus.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton St.
Columbia, South Carolina
telephone 803-777-3854

The University
UofSC System Mission Statement
Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023
The primary mission of the University of South Carolina System is the education of the state's diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate's, bachelor's, master's, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

UofSC Salkehatchie Mission Statement
Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023
The Salkehatchie regional Palmetto College campus is a branch campus of the University of South Carolina Columbia. Salkehatchie has as its mission to provide higher education and intellectual leadership for its service area. At the heart of this mission is a teaching faculty of high quality dedicated to excellence in instruction, scholarship, public and professional service and creative endeavor which enrich the classroom experience. The Salkehatchie regional Palmetto College campus offers a varied curriculum grounded in the liberal arts and focused on preparing students to continue their education in the University of South Carolina System and throughout life.

The Salkehatchie regional Palmetto College campus recruits students prepared to succeed in completing a baccalaureate-level education. While the institution does not offer remedial instruction, it nonetheless able to admit most students who apply due to the close working relationship between students and faculty. The Salkehatchie regional Palmetto College campus was established to encourage higher education in the counties of Allendale, Bamberg, Barnwell, Colleton and Hampton. The original design of the institution incorporated a flexibility that has allowed...
changes in institutional capability with increasing educational demands of constituents.

Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, the institution awards the Associate in Arts and Associate in Science degrees and provides for the completion of selected bachelor's degrees on campus through cooperative agreements and delivery structures with other University of South Carolina System institutions. The Salkehatchie regional Palmetto College campus also provides general education and upper division coursework applicable to baccalaureate degree programs offered through colleges and universities nationwide. In addition to academic coursework, the mission of the campus includes non-credit courses, seminars, and workshops made available to the community for cultural enrichment and professional development.

The traditions of cultural diversity and freedom of thought are valued at the Salkehatchie regional Palmetto College campus. In a learning environment that develops respect for racial, geographical, intellectual, and economic diversity and an awareness of individual, societal, and global responsibilities, Salkehatchie promotes courses, activities, and attitudes which influence the life of the mind in men and women and instill in them a thirst to continue learning throughout life.

The Salkehatchie regional Palmetto College campus emphasizes the development of the whole person and especially seeks to foster in students the disciplines essential to an educated citizenry. Core competencies, including the ability to communicate through effective writing and articulate speech; computational and quantitative mastery; creative and critical thinking; and the duties of citizenship are strategically integrated within the curriculum. Classroom experiences, student activities, and physical education programs also provide opportunities for cultural enrichment, leadership development, intellectual growth and interpersonal relationships, all contributing to a sense of self-reliance and a joy of learning.

Accreditation

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master's, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses' accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

UofSC System Officers

Robert L. “Bob” Caslen Jr., President
William F. “Bill” Tate IV, Executive Vice President for Academic Affairs and Provost
Ed Walton, Senior Vice President for Administration
Mark Bieger, Chief of Staff
Caroline Agardy, Vice President for Human Resources
Doug Foster, Vice President for Information Technology and Chief Information Officer
Prakash Nagarkatti, Vice President for Research

C. Bryan Love, Associate Professor, English, Ph.D., University of Maryland
Magellan Mambou, Adjunct Instructor, Math, M.A., World Education Services
Frank Martín, Adjunct Instructor, Art History, M.A., CUNY Hunter College
Joslyn M. McCully, Adjunct Instructor, English, M.A., Clemson University
Duncan McDowell, Adjunct Instructor, English, M.A., Texas Tech University
Martha McKeVlin, Senior Instructor, Biology, Ph.D., University of Washington
John Reaves McLeod, Adjunct Instructor, Political Science, J.D., University of South Carolina
Conrad C. Mehlenbacher, Professor, Art and Theater, M.F.A., University of South Carolina
Sarah E. Miller, Associate Professor, History, Ph.D., University of Toledo
Daniel W. Milligan, Adjunct Instructor, Sociology, M.S., Indiana State University
Fidele Ngwane, Associate Professor, Mathematics, Ph.D., Auburn University
Chester Palmer, Adjunct Professor, Political Science, University of Northern Colorado
Curtis M. Parker, Adjunct Professor, Math, M.S., Syracuse University
John Peek, Senior Instructor, Criminal Justice, M.S., University of South Carolina
Melissa J. Rack, Assistant Professor, English, Ph.D., University of Tennessee
Brian Reid, Adjunct Professor, Biology, M.A., The Citadel
William A. Sandifer, Instructor, University life, Ph.D., South Carolina State University
Larry J. Saunders, Adjunct Professor, Criminal Justice, B.A., University of South Carolina
Deborah J. Seabrook, Adjunct Professor, Psychology, M.Ed., The Citadel
Martin L. Shealy, Adjunct Professor, Biology, Doctor of Chiropractic, Life University
Joseph B. Siren, Senior Instructor, History, M.A., Auburn University
Rodney Steward, Associate Professor, History, Ph.D., Auburn University
Tammy B. Washington, Adjunct Instructor, Public Health, Masters of Public Health, University of South Carolina
Ashley-Ann D. Woods, Adjunct Instructor, English, M.A., University of New Orleans
Benjamin J. Wooster, Adjunct Instructor, Philosophy, Ph.D., University of Oregon
Margaret B. Young, Adjunct Instructor, Foreign Language, Spanish, M.A., University of South Carolina
Hussein Zeidan, Associate Professor, Chemistry, Ph.D., University of Mississippi
Pauline Zidlick, Adjunct Instructor, English, M.A.T., The Citadel

Emeriti Faculty
Arthur H. Mitchell, Distinguished Professor Emeritus, History, Ph.D., University of Dublin
John D. Spooner, Distinguished Professor Emeritus, Biology, Ph.D., University of Florida
Lawrence D. Strong, Distinguished Professor Emeritus, Mathematics, Ph.D., University of Mississippi
Hussein Zeidan, *Distinguished Professor Emeritus*, Chemistry, Ph.D.,
University of Mississippi

**History**

UofSC Salkehatchie was established in 1965 as a regional center of the University of South Carolina. Its origins lay in the prior year’s passionate, well-organized appeal for greater access to higher education from a group of residents in Allendale, Bamberg, and Hampton counties. In response, the General Assembly of South Carolina created the Western Carolina Higher Education Commission, composed of two representatives from each of the participating counties. (Over time the commission was expanded beyond the original three counties: Barnwell County joined the compact in 1967, followed by Colleton County in 1984.) The commission contracted with the University of South Carolina's Board of Trustees to provide the facilities for a regional center for the University, while the University provided administrative and academic support.

The center was eventually named UofSC Salkehatchie after the river that runs through all five counties that support the campus, but initially it was named after its first location, Allendale. A former elementary school in Allendale provided the first building for the new campus and the institution’s academic program was launched in the fall of 1965 with eight part-time faculty and 76 students. From these beginnings the campus quickly grew. The following year student enrollment nearly doubled, and soon community leaders persuaded the legislature to provide additional support. The University appointed a regional provost and took several additional measures to strengthen all of its regional campuses. Campus directors were given power to formulate budgets, and the state legislature began to provide a per-student contribution. At UofSC Salkehatchie, residents’ needs and dedicated recruiting efforts led to a steady increase in student numbers. Now over 1,100 students enroll yearly at the campus.

The first non-University review of the campus came in the fall of 1968, when a team from the Southern Association of Colleges and Schools traveled to Salkehatchie for an accreditation visit. The committee expressed a positive view of the efforts being made to develop both the programs and the facilities at the new institution.

Expansion of facilities began in June 1972 when the Allendale Hut Complex, two historic log-cabin structures erected during the Works Progress Administration movement, was deeded to the campus by Allendale County. UofSC Salkehatchie also took ownership of facilities adjacent to its original building; these facilities now house faculty and administration offices. To provide for future expansion, the campus commission purchased 65 acres of adjoining land in February 1975. A master plan for expansion of the campus was developed. The Science/Administration Building was built in 1981, and the campus added the Salkehatchie Civic Arts Center in 1983. Next a 29,500 square-foot Library/Computer Science Building was built near the Science/Administration Building in 1991. That same year the Sarah T. Winthrop Foundation donated an additional 94 acres adjacent to the original location.

Beginning in 1978, UofSC Salkehatchie reached out to Walterboro by offering six courses there for the convenience of Colleton County residents. In the fall of 1982, the former Walterboro High School building and support facilities became vacant, allowing Salkehatchie to establish a permanent second location to its campus holdings. In 1991 the campus commission purchased additional acreage, providing a permanent site for UofSC in the historic district of downtown Walterboro. In 1994, the campus opened the Peden McLeod Library. This library, located near the main building, is named after strong UofSC supporter, Walterboro resident, and former state Senator Peden McLeod. In 2004, Colleton County donated two additional buildings to the campus that are now the Walterboro Science Building and the Walterboro Research Center Building. With expansion, UofSC Salkehatchie’s total holdings surpassed 200 acres. Today, nearly 100 courses are offered in Walterboro each semester, enabling residents of that area to work toward a variety of college degrees.

Beyond the addition of a second location, UofSC Salkehatchie consistently has expanded its educational reach. In September 1976 an evening program of courses began at Salkehatchie with a total of ten classes offered. Community response resulted in the rapid expansion of evening class offerings. Additionally, Salkehatchie began a highly impactful outreach program that offers courses in local high schools for academically-talented seniors.

Moreover, two four-year degrees serving the needs of the region have been offered at UofSC Salkehatchie though partnerships with other campuses. The Bachelor of Arts in Elementary Education program is conducted in partnership with UofSC Aiken. The core requirements are completed as UofSC Salkehatchie courses. Upper-level courses, administered through UofSC Aiken and taught by its faculty, can also be completed at the UofSC Salkehatchie campus. The Bachelor of Science in Nursing is conducted in partnership with the College of Nursing at UofSC Columbia. General education and lower-level courses (the first two years of the degree program) are completed as UofSC Salkehatchie courses. Upper-level nursing courses are offered on the UofSC Salkehatchie campus through UofSC Columbia with most clinical practice in local hospitals and clinics.

Yet another enhancement in academic opportunities came with the development of a University program called Palmetto Programs, which expanded course offerings across the regional campuses via technologically-advanced “smart classrooms” and provided opportunities for students to work toward select multidisciplinary four-year degrees on the Salkehatchie campus. Then, in 2012 the University and legislature enthusiastically moved forward with the creation of Palmetto College, an online-degree-completion program. Palmetto College was envisioned as a way for students whose college work had been interrupted by various life circumstances to complete their UofSC degrees without having to be near a brick-and-mortar campus, but it also created numerous new avenues for students at or near UofSC’s two-year campuses to earn four-year degrees without relocating. Soon an administration, headed by a Palmetto College Chancellor, was set up to oversee this innovative effort.

By design, UofSC’s two-year regional campuses were brought under the umbrella of Palmetto College, with the new administration blended with the regional campuses’ existing administration, governing body, and committees. With this change, UofSC Salkehatchie officially became a Palmetto College campus with expanded course offerings and degree opportunities.

One key way UofSC Salkehatchie fulfills its mission is through its library system. Students and faculty use the Salkehatchie libraries in Allendale and Walterboro tens of thousands of times each year. Additionally, community residents are permitted to check out books from the print collection. To meet the needs of all of its patrons, the library provides a wide variety of services. In addition to being able to check out many of the more than 61,000 books, patrons have online access to more than 325,000 electronic books. Moreover, Salkehatchie library users may access music, movies, and other multimedia and educational materials. For example, the library holds a large collection of classical music CDs, and it holds a good collection of classic movies, screen versions of plays, documentaries, and educational materials on DVD. Patrons have access...
to numerous print and online journals and magazines, as well as local, state, and national newspapers. Patrons also have access to various research aids, including online full-text databases and general Internet access for research and investigation.

Beyond the classroom, UofSC Salkehatchie has thriving intercollegiate sports teams that compete at the National Junior College Athletic Association (NJCAA) level. Organized athletics at UofSC Salkehatchie began in 1972 with club-sport basketball. By 1976 a basketball team entered NJCAA competition. Today USC Salkehatchie fields six teams that compete at the NJCAA level: baseball, men’s basketball, men’s soccer, softball, women’s soccer, and women’s volleyball. These programs contribute to the diversity of the student body, and home games are events to which many local residents enthusiastically rally.

UofSC Salkehatchie is deeply committed to the economic growth and development of its five-county service area. To this end, the UofSC Salkehatchie Leadership Institute opened in 1998 as a result of the cooperative efforts of the University of South Carolina, the Allendale County Chamber of Commerce, BellSouth, South Carolina State University, Clemson University, United States Rural Development, the South Carolina Commission on Minority Affairs, the South Carolina Department of Commerce, the South Carolina Downtown Development Association, and Leadership South Carolina. The mission of the institute is to provide programs for leadership development and to serve as a catalyst for community and economic development in the region. The Leadership Institute has been instrumental in generating grant funding for county programs and providing leadership training for county officials and citizens of the area. Additionally, the institute’s workforce development activities strive to ready workers for tomorrow’s opportunities. Through a grant funded by the United States Department of Energy, the Leadership Institute conducts programs geared toward UofSC Salkehatchie students as well as K-12 students preparing for higher education. One focus is retaining local talent for STEM (Science, Technology, Engineering, and Math) jobs forecasted to be available over the next 20 years.

UofSC Salkehatchie is proud of its contributions to the communities that support it. Since 1965 it has provided opportunities in higher education to thousands of students who might otherwise have missed the chance for a college education. As the campus has grown, so has its educational, cultural, and economic impact. Today the campus boasts an intellectually and culturally diverse faculty dedicated to providing quality educational experiences to students. The campus also sponsors lecture series, workshops, seminars, and other programs of community interest. Through a broad range of activities, Salkehatchie has demonstrated an unwavering commitment to supporting and improving the communities in its footprint.

**Academic Organization**

The highest academic officer on the Salkehatchie campus is the associate dean for academic affairs ("academic dean"). The faculty is organized in four divisions: Social Sciences, Arts and Languages, Mathematics and Science, and Professional Studies.

The division of Social Sciences includes the disciplines of geography, government, history, philosophy, political science, psychology, religion, and sociology. Arts and Languages includes the disciplines of art, English, foreign languages, music, speech, and theater. Mathematics and Science includes biology, chemistry, geology, mathematics, and statistics. And Professional Studies includes accounting, business administration, computer science, economics, education, nursing, office administration, and physical education.

Current officers are:

- Academic Dean: C. Bryan Love, Ph.D
- Chair of Social Sciences: Rodney Steward, Ph.D
- Chair of Arts and Languages: Thomas Bragg, Ph.D
- Chair of Mathematics and Science: Eran Kilpatrick, Ph.D
- Chair of Professional Studies: John Peek, M.S.

**General Education Goals**

Upon completing core curriculum requirements, UofSC Salkehatchie degree-seeking students will possess the following skills and demonstrate knowledge in the following content areas.

**Skills**

1. Oral and Written Communication
   - orally communicate clearly and effectively
   - write compositions that are sufficiently coherent, unified, and developed
   - write prose that is clear, understandable, and free from such errors in grammar and mechanics as would obstruct reader comprehension
   - have knowledge of library research methods and mechanics
   - read with understanding

2. Computational and Numerical
   - make good consumer decisions
   - read and interpret mathematical information contained in newspapers and magazines
   - demonstrate calculator competency
   - solve problems using the basic properties and operations of mathematics
   - demonstrate computer competency

3. Critical Thinking
   - use inductive and deductive reasoning to draw conclusions
   - recognize bias in reasoning
   - recognize inconsistencies in reasoning

**Content Areas**

1. Humanities
   - understand the basic elements of fiction, poetry, and drama
   - analyze works of literature in the three major genres of fiction, poetry, and drama

2. Natural Sciences
   - understand the scientific method
   - understand the application of scientific principles to daily life

3. Social and Behavioral Sciences
   - understand and critically analyze the behavior of individuals, groups, and institutions in society
   - understand the cultural, political, economic, or social contexts and developments that shape people’s lives

Students who attend UofSC Salkehatchie with the intent of transferring to a baccalaureate degree granting institution without earning an associate’s degree will possess the knowledge and skills to do upper-level work at those institutions.
Service Goals for UofSC Salkehatchie

- to increase the availability of a variety of cultural and recreational experiences to students and the community
- to provide increased opportunities to community members for enrollment in credit and noncredit continuing education offerings
- to increase links between UofSC Salkehatchie and the area business community
- to encourage increased usage of library services by members of the community

Special Programs and Opportunities

Nondegree Seeking Students

Students who wish to take courses for personal interest and who are not interested in pursuing a degree may apply to UofSC Salkehatchie as nondegree seeking students and be admitted for no more than 30 credit hours through a simplified admissions process.

Palmetto College

Palmetto College is part of the UofSC system, offering convenient campus locations and online bachelor's degree completion programs for all South Carolina students.

Students will begin on one of our four Palmetto College campuses, where they will receive their first two years of college credit. UofSC Lancaster and UofSC Union in the northern part of the state, UofSC Salkehatchie in the low country and UofSC Sumter in between are all options to complete the first 45 credit hours.

Finish Online

Once the student has 45 credit hours from any accredited college, he or she can complete his or her bachelor's degree online. And because Palmetto College is part of the UofSC system, a Palmetto college diploma will carry the same credibility and weight as any other four-year degree from the University of South Carolina.

This is the complete list of the 14 Palmetto College Majors:

- Business Administration with an Accounting Concentration
- Business Administration with a Management Concentration
- Criminal Justice
- Elementary Education
- Engineering Technology Management
- Health Informatics
- Public Health
- Hospitality Management
- Human Services
- Information Management and Systems
- Liberal Studies
- Organizational Leadership
- RN-BSN Nursing
- Special Education

Opportunity Scholars

The Opportunity Scholars Program at UofSC Salkehatchie is a Student Support Services program funded by a federal TRIO grant. The program provides eligible students with services such as tutoring, academic advisement, and financial-aid advisement. The ultimate goal of all these services is to help students earn their baccalaureate degree.

For more information, contact the office at 803-584-3446, extension 251, or stop by the Opportunity Scholars Program office on either campus.

University 101

University 101 is a three-hour seminar course open for credit only to freshmen and other undergraduate students (i.e. transfer students) in their first semester at UofSC Salkehatchie. This course provides an introduction to the nature and importance of university education and a general orientation to the functions and resources of the University.

The course helps new students adjust to the University, develop a better understanding of the learning process, and acquire essential academic survival skills. It also provides students a support group in a critical year by examining problems common in the new-student experience. Extensive reading and writing assignments relevant to the student's college experience are required.

Organized in small groups of 20-25 students, University 101 is taught by faculty members and administrative personnel who have a special interest in working with new students. The course may be taken as part of a student’s regular load or as an overload. Course credit is awarded on a letter-grade basis. Credit is applicable as elective credit toward almost all baccalaureate degrees offered by the University.

Baccalaureate Degree Course Work

The Salkehatchie campus of the University of South Carolina offers courses that may be applied toward a baccalaureate degree awarded by other institutions. Students may choose from a number of major fields of study. For a complete list of academic programs offered at Salkehatchie, see Academic Programs.

Community Outreach

Salkehatchie Leadership Institute

The UofSC Salkehatchie Leadership Institute was created in 1998 by a collaborative of local, state, and federal entities. The primary mission is to stimulate economic development in the rural counties of Allendale, Bamberg, Barnwell, Colleton, and Hampton in South Carolina. The Institute has continued to build partnerships and coalitions locally, regionally, and on a statewide basis to facilitate leadership development, community development, and economic development. Since its inception, the Institute has served over 2000 youth and adults through leadership training and workshops and has been instrumental in generating over $14 million in grant funding for county, community, and economic development programs. The Center also serves as an ambassador for rural counties, with representatives serving on numerous local and regional boards as a voice for the needs of rural communities. Since 1998, the legislature has provided recurring below the line funding that partially funds personnel for the Institute. This investment has been extremely beneficial for the area served. Other major funding has been provided by USDA Rural Development.

Goals

- Serve as a catalyst for economic development in the five-county region.
- Provide leadership training for high school students, adults, and local officials.
- Provide small business development training and technical assistance through a referral relationship with the Small Business Administration.
- Provide technical assistance to local governments and non-profit organizations, to assist with sustainability and project development.
• Support economic development through job creation.
• Collaborate with community organizations and UofSC team leaders to make this a successful model project for other rural communities.

Program Description
The Institute operates through three Centers to carry out its mission.

1. Center for Business Development
   Goal - Serve as a catalyst for economic development for the region. Successful small businesses are the basis for a stable and vigorous economy. The Center coordinates small business training and technical assistance to current and prospective business owners. Services include small business classes, hands-on business counseling, and assistance with applications.

2. Center for Leadership Development
   Goal - Strengthen Leadership and Building Human Capacity
   Dynamic Leadership is essential for the creation and sustainability of economic development. The Center now provides 9 leadership programs that serve more than 100 people annually. These programs serve both youth and adults ranging from basic leadership training for emerging leaders to advanced training for existing leaders. Basic to these programs is the emphasis on community involvement and connectivity.

3. Center for Community Development
   Goal - Serve as a resource center for community development
   Coalitions and collaborations are essential for the best use of scarce resources. • The center serves as a resource center and a central point of reference for groups and organizations to facilitate community development in the five-county region. The center builds and maintains partnerships and collaborations to work on solutions for community problems and to strengthen fund-seeking efforts.

Speaker’s Bureau
Salkehatchie faculty and administration have formed a speaker’s bureau, with all members of faculty and administration available to speak on their individual disciplines or special interests. Listings of speakers are available to schools, civic groups, and the general public through the academic dean’s office.

Admissions
Providing access to a quality university education is of paramount importance to the University of South Carolina Salkehatchie. Part of that commitment is making sure that all prospective students know how to apply for admission, how their admissions application will be evaluated, and what is expected of them once they matriculate at the campus. The admissions policies align with those of the larger university, while adhering to the expectation that regional Palmetto College campuses provide alternate points of entry into the UofSC system.

Consistent with its mission “to provide higher education and intellectual leadership for its service areas,” UofSC Salkehatchie establishes the following policies:

• The Executive Director of Enrollment Management plans, develops, and implements processes, along with his staff, to effectively recruit and enroll quality students, by utilizing technological resources and strategies to maximize student engagement. During the year UofSC Salkehatchie participates in various recruiting events, including SCCANGO Application Month and Carolina Association of Collegiate Registrars and Admissions Officers (CACRAO) events throughout the state of South Carolina. While recruitment staff travel extensively to area high schools, the Executive Director maintains partnerships with local businesses, community leaders, and seeks to cultivate new partnerships. The Executive Director and Director of Recruiting is responsible for training admissions and recruitment staff. Student Ambassadors, Student Retention, Advisors, and orientations are a collaborative effort between various departments facilitated by the Executive Director of Enrollment Management.

• UofSC Salkehatchie is committed to the financial literacy of our students. The office of Financial Aid conducts financial literacy sessions at high schools in the institution’s service area. With continued focus on providing affordable course offerings, UofSC Salkehatchie offers application fee waivers throughout the year to prospective students, as needed.

• Marketing and advertising are strategically targeted to maximize the UofSC Salkehatchie brand awareness. Various marketing channels are used to include, web-based marketing, print media, social media, local radio and newspapers, and finally in-house creative content.

General Information
The University of South Carolina Salkehatchie strives to provide an opportunity to any student who is capable of benefiting from a college education and shows promise of successfully completing that education. The University encourages all qualified persons to apply. Equal educational opportunities are offered to students regardless of race, sex, religion, color, or national origin.

General Admissions Requirements
An application for admission must be submitted and approved and an official notification of acceptance issued by the Office of Undergraduate Admissions before any person may enroll in an undergraduate course. Before action can be taken on an application for admission, all credentials required by University policy must be received by the admissions office, which has responsibility for evaluation of credentials for the purpose of admission.

First-time applications must be accompanied by a nonrefundable application fee specified on the application form. Application forms may be obtained from the Office of Admissions.

Applications submitted more than one year in advance of the anticipated date of enrollment will be acknowledged, but no action will be taken until admission standards for the year in question have been established. The number of students admitted and enrolled in any year will be determined by the capacity of the institution to provide for the educational and other needs of the students and by budgetary or other appropriate considerations. Undergraduate admissions policies and procedures are subject to continuous review by the admissions staff and the Faculty Admissions Committee and may be changed without notice.

Selected applicants who present evidence of special talents for University programs requiring such special talents may be evaluated on the basis of these talents as well as high-school grades and entrance examination scores. The University reserves the right to place conditions on the admission of any student. In the event such action is taken, the conditions will be clearly explained in the letter of acceptance.

Additionally, the campus follows state Commission on Higher Education (CHE) guidelines for dual enrollment students (Section II).

In its recruitment efforts, the University of South Carolina Salkehatchie ensures that all materials accurately represent the campus and its programs. These materials are reviewed on a regular basis by the Office
of Enrollment Services and changes are made as soon as program, personnel, and other changes go into effect. Changes to any academic programs trigger locally-made revisions to the UofSC Salkehatchie website. Changes to the UofSC Salkehatchie Academic Bulletin are processed by the University’s Registrar’s Office upon request. The bulletin is reviewed periodically by the UofSC Salkehatchie Executive Council.

Categories of Admission

The categories of admission are outlined below. Applicants for admission must meet the requirements of one of these categories.

Freshman Admission

A freshman applicant is a person who has not attended a regionally accredited college or university after high-school graduation.

Requirements

Freshman applicants must have either a high-school diploma or its equivalent (GED) prior to enrolling. Accepted applicants must have senior grades and a verification of graduation sent as soon as they are available. Applicants who did not graduate from high school must send transcripts of all available work and a copy of a GED certificate or satisfactory GED test scores.

Freshman applicants must submit:

1. completed application
2. specified nonrefundable application fee
3. official high-school record complete up to the time of application
4. official entrance examination scores (either SAT or ACT).

Prospective students must have adequate preparation for the curriculum in which they plan to enroll. At a minimum, applicants for admission are required to complete a college preparatory program with units distributed among the following academic subjects:

College Preparatory Course Prerequisite Requirements

Four Units of English: At least two units must have strong grammar and composition components, at least one must be in English literature, and at least one must be in American literature. Completion of College Preparatory English I, II, III, and IV will meet this criterion.

Four Units of Mathematics: These include Algebra I (for which Applied Mathematics I and II may count together as a substitute, if a student successfully completes Algebra II), Algebra II, and Geometry. A fourth higher-level mathematics course should be selected from among Algebra III/trigonometry, precalculus, calculus, statistics, discrete mathematics, or a capstone mathematics course and should be taken during the senior year.

Three Units of Laboratory Science: Two units must be taken in two different fields of the physical or life sciences and selected from among biology, chemistry, or physics. The third unit may be from the same field as one of the first two units (biology, chemistry, or physics) or from any laboratory science for which biology and/or chemistry is a prerequisite. Courses in earth science, general physical science, or introductory or general environmental science for which biology and/or chemistry is not a prerequisite will not meet this requirement. It is strongly recommended that students take physical science (taught as a laboratory science) as a prerequisite to the three required units of laboratory science outlined in this section. It is also strongly recommended that students desiring to pursue careers in science, mathematics, engineering or technology take one course in all three fields.

Two Units of the Same Foreign Language

Three Units of Social Science: One unit of U.S. History is required; a half unit of Economics and a half unit in Government are strongly recommended.

One Unit of Fine Arts: One unit in Appreciation of, History of, or Performance in one of the fine arts.

Elective: One unit must be taken as an elective. A college preparatory course in Computer Science (i.e., one involving significant programming content, not simply keyboarding) is strongly recommended for this elective. Other acceptable electives include college preparatory courses in English; fine arts; foreign languages; social science; humanities; laboratory science (excluding earth science, general physical science, general environmental science, or other introductory science courses for which biology and/or chemistry is not a prerequisite); or mathematics above the level of Algebra II.

One Unit of Physical Education or ROTC

Total Units: 19

In addition to completion of the above units, students must meet requirements based on entrance examination scores and weighted core GPA.

Applicants must complete additional units to meet or exceed state and local high-school graduation requirements. In choosing these electives, students should consider the recommendations given in the preceding listing for specific prospective majors.

Freshman applicants are encouraged to apply in the fall prior to the fall for which they seek admission. Applications will be considered after January 1 only if places are available in the incoming class.

Applicants must apply for and take the required entrance examinations well in advance of the term for which they seek admission, and they are responsible for having the results of these examinations sent to the University. Applicants over the age of 25 may not be required to submit entrance examination results; however, they must submit other credentials which give evidence of reasonable academic potential. Entrance examination scores may be required in the absence of satisfactory credentials or evidence of potential. Some programs require entrance test scores for all students, regardless of age.

Proof of immunization, residency, and citizenship are required before enrolling at UofSC Salkehatchie. Instructions will be provided after admission takes place.

Proof of Citizenship

UofSC students must present proof of citizenship or lawful presence in the U.S. before enrolling. This policy has been adopted by the University in order to comply with section 59-101-430 of the South Carolina Code of Laws, as amended, which requires that lawful presence in the United States is verified before enrollment at any public institution of higher education. Verification of immigration status for non-citizens will be conducted by International student officials. For other students, a proof of citizenship verification process has been adopted to deter and prevent false claims of citizenship by unlawful aliens attempting to evade the eligibility requirements of section 59-101-430. Students who are not verified as citizens during the Federal financial aid application (FAFSA) process must present proof of citizenship in the form of one of the following acceptable documents:
• Copy of the South Carolina driver’s license if the student first became a licensed driver in the state after January 1, 2002;
• A Certified Birth Certificate indicating that you were born in the United States or a territory of the United States.
• Current U.S. Passport or U.S. Passport that has not been expired more than 10 years;
• Certificate of Naturalization USCIS Form (N-550 or N-570);
• U.S. government issued Consular Report of Birth Abroad;
• Certificate of Citizenship (N-560 or N-561);
• Unexpired U.S. Active Duty/Retiree/Reservist Military ID Card (DOD DD-2).

The University can accept photocopies of birth certificates and other citizenship documents so long as we reserve the right to demand production of the certified original in the event we have any questions about whether the copy is true and accurate, or in the event any of the information on the copy is unreadable. For more information: http://registrar.sc.edu/html/citizenshipverification.stm.

Assessment of Academic Records
Freshman applicants who satisfy the course requirements listed above will be evaluated on the basis of high-school grades, class rank, and entrance examination scores. These factors will be used to determine the applicant’s probability of completing the requirements for the desired degree. Applicants who have earned a cumulative average of C+ on the defined preparatory courses listed above and who score 1200 on the SAT or 27 on the ACT normally will be admitted to USC. Higher grades may offset lower entrance examination scores and higher examination scores may offset lower grades. Exception to admission requirements will be considered for applicants who present extenuating circumstances.

Other Admissions Opportunities

High School Certificate and Non-High-School Graduates
Admission in this category is based upon satisfactory CEEB-SAT (or ACT) scores.

Candidates who are 25 years or older may be considered for admission without SAT scores. They must, however, submit all other credentials and show reasonable potential for academic success.

Non-high-school graduates must have a South Carolina or other state high-school equivalency certificate. Students who have attended any portion of high school should have a transcript submitted from that school.

Admission as a Nondegree Candidate
Applicants who wish to attend the University for one semester or on some limited basis may be approved to do so upon submitting a nondegree seeking application. The admissions office reserves the right to determine the proper category of admission and to determine what credentials may be required.

Special Students
This category is for part-time applicants who are not interested in earning a degree at UofSC. A maximum of 30 semester hours may be earned in this category. Applicants who have been officially denied admission as degree-seeking students are not eligible for admission as special students. Courses completed as special students carry full University credit; however, none of the hours is applicable to a degree until the student applies and qualifies for admission to a degree program. Usually no credentials are required if the applicant has no plan to seek a degree.

Senior Citizens
A senior citizen (age 60 or above) may enroll in courses at UofSC Salkehatchie tuition-free on a space available basis. They must pay the application fee and technology fee and purchase textbooks. A special form documenting their eligibility must be obtained from the Registrar’s Office.

Concurrent
High-school juniors and seniors who have excelled in their studies may enroll in appropriate courses at the University upon recommendation of their counselors or principal and with approval of the UofSC department in which courses are to be taken. Interested students must submit high-school records that show exceptional performance.

Auditor
An auditor may apply as a special student (see above).

Military Special
Certification of active duty military status is required.

Persons attending the University in any of these categories will be nondegree candidates. Credit earned while attending as a nondegree candidate may be used toward a degree only after the student has applied for and been accepted into a degree program. An applicant denied admission to any degree category is not eligible for admission as a special student. The period of enrollment in these categories is limited by either time or number of allowable credits. The official acceptance letter explains all enrollment restrictions for the category in question. Nondegree students are not eligible for financial aid, veterans benefits, or on-campus housing during the fall or spring terms. Rooms on the campus may be available to students in the summer whether or not they are working for degrees.

Readmission of Former Students
An application for readmission must be submitted by any former student who wishes to return to the University after missing a major (fall or spring) semester. Summer sessions do not count as a major semester in this instance. Students applying for readmission with a GPA below 2.0 must file an appeal with the Faculty Petitions Committee to be considered for acceptance. Applications for readmission are obtained from the Office of Undergraduate Admissions and when completed should be returned to the admissions office at the campus where the student expects to enroll. Readmission to the University and to the program in which the student was previously enrolled is not automatic. An interview may be requested and some basis for a favorable decision may be required.

Students who attend the University as special students (including probationary or nondegree candidates) are not considered for “readmission” because these students were not fully admitted to the University originally. If special students wish to return to the University as degree-seeking candidates, they must apply for regular admission as freshmen or transfer students, furnishing all official transcripts and any entrance test scores which may be required.

Students who leave the University in good standing, miss one or more major semesters, and attend another institution while away must submit the application for readmission and official transcripts of all college-level
work attempted during their absence from the University. Such applicants must meet the same requirements as transfer students.

A student who leaves the University on suspension must apply for readmission upon completion of the period of suspension and qualify for readmission to the major program requested. To attempt to return to the University prior to the completion of the suspension period requires:

1. an application for readmission and a petition for reinstatement if a major semester has been missed; or
2. a petition for reinstatement if the attempt is being made after notification of suspension but prior to missing a major semester.
A petition for reinstatement is made to the University college from which the student was suspended.

If students attend another college-level institution while suspended from the University, they must maintain a satisfactory average at that institution in order to retain the privilege of being considered for readmission at the conclusion of their suspension. The University does not transfer credit earned during a period of suspension, but the quality of grades could affect the decision on readmission.

Applications should be submitted before these deadlines:

- fall term: August 1
- spring term: December 1
- summer terms: two weeks prior to registration for the term.

**Transfer Admission**

An applicant who, having graduated from high school, has attended another regionally accredited postsecondary institution and attempted one or more courses is a transfer student, regardless of credit earned. If fewer than 30 semester hours (45 quarter hours) of college-level work have been attempted, the applicant must meet both transfer and freshman entrance requirements.

Transfer applicants for admission must submit:

1. completed application forms
2. specified nonrefundable application fee
3. complete official transcripts from postsecondary institutions through the time of application; these must be supplemented by final transcripts that reflect complete academic work prior to beginning classes in the University
4. complete high-school records including entrance exam results if less than 30 semester hours (45 quarter hours) of college-level work have been attempted in a regionally accredited college or university

Applications should be submitted before these deadlines:

- Fall term: August 1
- Spring term: December 1
- Summer terms: two weeks prior to registration for the term.

All applicants for transfer admission must be eligible to return to the last institution attended as a degree-seeking student.

The applicant must submit official transcripts of all previous college courses attempted whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit. An official transcript must be sent directly to the admissions office from each institution attended. Failure to report all attempted college courses may constitute sufficient cause for later dismissal from the University.

Transfer applicants from regionally accredited colleges and universities are required to have a minimum grade point average of 2.25 (on a 4.00 scale) on all college-level courses attempted.

**Branch Transfer Students**

This is a special admissions program open to students at the regional campuses of UofSC. Students who do not meet the regular transfer admissions requirements for prebaccalaureate admission as described above may still be eligible for admission in the Branch Program. For complete details about eligibility and requirements, students should contact the Office of Admissions at Salkehatchie. Students in this program must normally complete 30 semester hours at the Salkehatchie campus with a 2.00 GPA as well as meet the GPA requirements of the particular college in order to move to the Columbia campus.

In addition to the general requirements for admission outlined in this section, some departments and colleges within the University set additional requirements that may be higher than the University's minimum standards. For more specific information concerning entrance requirements for individual colleges and departments, refer to the program section of this bulletin.

For the purpose of admission, a transfer grade point average is calculated using all credits attempted and all grades earned on college-level courses at other institutions. These credits and grades also will be included in calculating honors for graduation from the University. Colleges within the University have the right to consider all attempted college-level work in determining admission to particular programs and/or advancement into upper-division or professional-level courses. Transfer students should consult the section of this bulletin for the college in which the student plans to study for further information about the use of credits and grades from previous college work. For regulations on graduation with honors, see “Academic Regulations.”

Regardless of the point in an academic career at which students enter the University, all must complete the final year (the last 30 semester hours before graduation) enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted. Some UofSC colleges require half of all degree credits to be earned while enrolled at this University.

**Evaluation of Transfer Credits**

Transfer credits to UofSC must be from regionally accredited institutions for academic courses completed with grades of C- or better. Applicability of credits toward a particular degree is determined by the college or major in which the student enrolls. The number of credits acceptable to the University and the number which may apply toward a particular degree may differ.

Students transferring from nonaccredited colleges may be allowed to validate credit after admission to the University. Details of the validation procedure vary and may be obtained from the dean's office of the college in which the student is enrolled.

Original records are required for courses exempted at a previous college. Exemption credit or acceptance of transfer credit by another college has no bearing on the evaluation of transfer credit at the University of South Carolina.
Generally, credits earned in courses that fall into one or more of the following categories are not acceptable in transfer to the University.

1. courses that are occupational or technical in nature
2. courses that are essentially remedial in nature
3. courses from a two-year institution which are considered upper division or upper level at the University
4. courses from a two-year institution that are not listed as part of that institution's college parallel program.

Exceptions to this rule may be made only by the designated academic official(s) on the campus where the student is majoring and only in specific cases where such courses are judged to be uniquely relevant to the student's degree program.

A maximum of 76 semester hours may be transferred for degree credit from a junior college or two-year institution which is accredited by a regional association such as the Southern Association of Colleges and Schools.

A maximum of 30 semester hours of credit by correspondence and credit awarded for educational experiences in the military may be applied toward meeting the requirements for a baccalaureate degree. The 30 semester hours of credit which may be awarded for educational experiences in the military should be in accordance with recommendations published by the American Council on Education and be consistent with University policy on the transfer of credit but will only be applied to a degree program upon the approval of the dean of the college from which the degree is to be awarded.

Veteran students may receive credit toward graduation for training received under many of the armed forces college training programs. University credit also may be given for specialized and technical training done under the auspices of the armed forces and for courses taken through the United States Armed Forces Institute/DANTES. This training may be accepted by the University for credit only if it is at the college level, if it is approved by the University, and if it is appropriate to the particular University course of study in which the student enrolls. Armed forces training will not be evaluated until the applicant has been accepted for admission; however, credentials should be submitted with the admission application. No credit is given for high-school or college-level GED tests.

(Information regarding educational benefits to veterans and the children of deceased or disabled veterans may be found in the section on financial aid. Additional information for veterans is available from the Office of Veteran Student Services, University of South Carolina Columbia.)

A maximum of 30 semester hours of credit earned while classified as a nondegree special student in the University may be applied toward meeting the requirements for a baccalaureate degree.

A student planning to pursue work at other institutions or through correspondence must complete this work before attaining senior classification (90 semester hours). Courses completed at any institution while the student is suspended by the University will not be accepted toward a degree at UofSC.

Transfer: State Policy and Procedures

Background

Section 10-C of the South Carolina School-to-Work Transition Act (1994) stipulated that the Council of College and University Presidents and the State Board for Technical and Comprehensive Education, operating through the Commission on Higher Education, develop better articulation of associate and baccalaureate degree programs. To comply with this requirement, the commission upon the advice of the Council of Presidents established a Transfer Articulation Policy Committee composed of four-year institutions’ vice presidents for academic affairs and the Associate Director for Instruction of the State Board for Technical and Comprehensive Education. The principal outcomes derived from the work of that committee and accepted by the Commission on Higher Education on July 6, 1995, were:

- An expanded list of 86 courses which transfer to four-year public institutions of South Carolina from the two-year public institutions;
- A statewide policy document on good practices in transfer to be followed by all public institutions of higher education in the State of South Carolina, which was accepted in principle by the Advisory Committee on Academic Programs and the commission;
- Six task forces on statewide transfer agreements, each based in a discipline or broad area of the baccalaureate curriculum.

In 1995 the General Assembly passed Act 137 which stipulated further that the South Carolina Commission on Higher Education “notwithstanding any other provision of law to the contrary, shall have the following additional duties and functions with regard to the various public institutions of higher education.” These duties and responsibilities include the commission's responsibility “to establish procedures for the transferability of courses at the undergraduate level between two-year and four-year institutions or schools.” This same provision is repeated in the legislation developed from the Report of the Joint Legislative Study Committee.

Act 137 directed the commission to adopt the following procedures for the transfer of courses from all two-year public to all four-year public institutions of higher education in South Carolina.

Statewide Articulation of 86 Courses

1. The Statewide Articulation Agreement of 86 courses already approved by the South Carolina Commission on Higher Education for transfer from two- to four-year public institutions shall be applicable to all public institutions, including two-year institutions and institutions within the same system. In instances where an institution does not have synonymous courses to ones on this list, it shall identify comparable courses or course categories for acceptance of general education courses on the statewide list.

Admissions Criteria, Course Grades, GPAs, Validations

2. All four-year public institutions shall issue annually in August a transfer guide covering at least the following items:
   a. The definition of a transfer student and requirements for admission both to the institution and, if more selective, requirements for admission to particular programs.
   b. Limitations placed by the institution or its programs for acceptance of standardized examinations (e.g., SAT, ACT) taken more than a given time ago, for academic course work taken elsewhere, for course work repeated due to failure, for course work taken at another institution while the student is academically suspended at his/her home institution, and so forth.
   c. Institutional and, if more selective, programmatic maximums of course credits allowable in transfer.
   d. Institutional procedures used to calculate student applicants’ GPAs for transfer admission. Such procedures shall describe how
nonstandard grades (withdrawal, withdrawal failing, repeated course, etc.) are evaluated; and they shall also describe whether all course work taken prior to transfer or just course work deemed appropriate to the student's intended four-year program of study is calculated for purposes of admission to the institution and/or programmatic major.

e. Lists of all courses accepted from each technical college (including the 72 courses in the Statewide Articulation Agreement) and the course equivalencies (including “free elective” category) found on the home institution for the courses accepted.

f. Lists of all articulation agreements with any public South Carolina two-year or other institution of higher education, together with information about how interested parties can access these agreements.

g. Lists of the institution's Transfer Officer(s) personnel together with telephone and fax numbers and office address.

h. Institutional policies related to “academic bankruptcy” (i.e., removing an entire transcript or parts thereof from a failed or underachieving record after a period of years has passed) so that re-entry into the four-year institution with course credit earned in the interim elsewhere is done without regard to the student’s earlier record.

i. “Residency requirements” for the minimum number of hours required to be earned at the institution for the degree.

3. Course work (individual courses, transfer blocks, statewide agreements) covered within these procedures shall be transferable if the student has completed the course work with a “C” grade (2.00 on a 4.00 scale) or above, but transfer of grades does not relieve the student of the obligation to meet any GPA requirements or other admissions requirements of the institution or program to which application has been made.

a. Any four-year institution which has institutional or programmatic admissions requirements for transfer students with cumulative grade point averages (GPAs) higher than 2.00 on a 4.00 scale shall apply such entrance requirements equally to transfer students from regionally accredited South Carolina public institutions regardless of whether students are transferring from a four-year or two-year institution.

b. Any multi-campus institution or system shall certify by letter to the commission that all course work at all of its campuses applicable to a particular degree program of study is fully acceptable in transfer to meet degree requirements in the same degree program at any other of its campuses.

4. Any course work (individual courses, transfer blocks, statewide agreements) covered within these procedures shall be transferable to any public institution without any additional fee and without any further encumbrance such as a “validation examination,” “placement examination/instrument,” “verification instrument,” or any other stricture, notwithstanding any institutional or system policy, procedure, or regulation to the contrary.

Transfer Blocks, Statewide Agreements, Completion of the A.A./A.S. Degree

5. The following Transfer Blocks/Statewide Agreements taken at any two-year public institution in South Carolina shall be accepted in their totality toward meeting baccalaureate degree requirements at all four-year public institutions in relevant four-year degree programs, as follows:

- Arts, Humanities, and Social Sciences: Established curriculum block of 46-48 semester hours
- Business Administration: Established curriculum block of 46-51 semester hours
- Engineering: Established curriculum block of 33 semester hours
- Arts and Sciences, curriculum II: Established curriculum block of 48-51 semester hours
- Teacher Education: Established curriculum block of 38-39 semester hours for early childhood, elementary, and special education students only. Secondary education majors and students seeking certification who are not majoring in teacher education should consult the Arts, Humanities, and Social Sciences or the Math and Science transfer blocks, as relevant, to assure transferability of course work
- Nursing: By statewide agreement, at least 60 semester hours shall be accepted by any public four-year institution toward the baccalaureate completion program (BSN) from graduates of any associate degree program in nursing (ADN), provided that the program is accredited by the National League of Nursing and that the graduate has successfully passed the National Licensure Examination (NCLEX) and is a currently licensed registered nurse.

6. Any “unique” academic program not specifically or by extension covered by one of the statewide transfer blocks/agreements listed in #4 above shall either create its own transfer block of 35 or more credit hours with the approval of CHE staff or shall adopt either the Arts/Social Sciences/Humanities or the Science/Mathematics block by September 1996. The institution at which such program is located shall inform the staff of the CHE and every institutional president and vice-president for academic affairs about this decision.

7. Any student who has completed either an Associate of Arts or Associate of Science degree program at any public two-year South Carolina institution which contains within it the total course work found in either the Arts/Social Sciences/Humanities Transfer Block or the Math/Science Transfer Block shall automatically be entitled to junior-level status or its equivalent at whatever public senior institution to which the student might have been admitted. (Note: As agreed by the Committee on Academic Affairs, junior status applies only to campus activities such as priority order for registration for courses, residence hall assignments, parking, athletic event tickets, etc., and not in calculating academic degree credits.)

Related Reports and Statewide Documents

8. All applicable recommendations found in the commission’s report to the General Assembly on the School-to-Work Act (approved by the commission and transmitted to the General Assembly on July 6, 1995) are hereby incorporated into the procedures for transfer of course work among two- and four-year institutions.

9. The policy paper entitled State Policy on Transfer and Articulation, as amended to reflect changes in the numbers of transfer blocks and other Commission action since July 6, 1995, is hereby adopted as the statewide policy for institutional good practice in the sending and receiving of all course credits to be transferred.

Assurance of Quality

10. All claims from any public two- or four-year institution challenging the effective preparation of any other public institution's course work for transfer purposes shall be evaluated and appropriate measures shall be taken to reassure that the quality of the course work has been reviewed and approved on a timely basis by sending and receiving institutions alike. This process of formal review shall occur every
Admissions

Statewide Publication and Distribution of Information on Transfer

11. The staff of the Commission on Higher Education shall print and distribute copies of these Procedures upon their acceptance by the commission. The staff shall also place this document and the Appendices on the commission's Home Page on the Internet under the title "Transfer Policies."

12. By September 1 of each year, all public four-year institutions shall on their own Home Page on the Internet under the title "Transfer Policies":
   a. Print a copy of this entire document (without appendices).
   b. Print a copy of their entire transfer guide.
   c. Provide to the staff of the commission in satisfactory format a copy of their entire transfer guide for placing on the commission's Home Page on the Internet.

13. By September 1 of each year, the staff of the State Board for Technical and Comprehensive Education shall on its Home Page on the Internet under the title "Transfer Policies":
   a. Print a copy of this document (without appendices).
   b. Provide to the commission staff in format suitable for placing on the commission's Home Page of the Internet a list of all articulation agreements that each of the sixteen technical colleges has with public and other four-year institutions of higher education, together with information about how interested parties can access those agreements.

   a. Publish these procedures in their entirety (except Appendices)
   b. Designate a chief Transfer Officer at the institution who shall
      • provide information and other appropriate support for students considering transfer and recent transfers
      • serve as a clearinghouse for information on issues of transfer in the State of South Carolina
      • provide definitive institutional rulings on transfer questions for the institution's students under these procedures
      • work closely with feeder institutions to assure ease in transfer for their students.
   c. Designate other programmatic Transfer Officer(s) as the size of the institution and the variety
   d. Refer interested parties to the institutional Transfer Guide of the state's four-year institutions
   e. Refer interested parties to the institution's and the Commission on Higher Education's Home Pages on the Internet for further information regarding transfer.

Summer School Admission

New undergraduate students entering the University for the first time in a summer term who expect to continue studying toward a degree submit only one application. They must meet all requirements for admission as degree-seeking students before the beginning of the summer term. These students should not submit a separate application for the summer term.

Special Opportunities

Veterans

Veteran students may apply to receive credit toward graduation for training received under any of the armed forces college training programs. University credit may also be given for specialized and technical training done under the auspices of the armed forces and for courses taken through the United States Armed Forces Institute. This training may be accepted by the University for credit only if it is at the collegiate level, if it is approved by the University, and if it is appropriate to the particular University course of study in which the student enrolls.

Admission of International Students

The University of South Carolina welcomes the applications of qualified international students. At least 90 days before the beginning of the semester they wish to enter, students must send a complete application, including standardized test scores, school records, and financial statements, to the Office of Undergraduate Admissions.

International applicants must be proficient in the English language. International students will be carefully advised for their initial semester at UofSC Salkehatchie. At the end of their first semester, a grade point average of 2.0 or higher will be considered demonstration of proficiency in English and the students will then be allowed and encouraged to register for any classes at UofSC Salkehatchie they choose.

In addition, freshman applicants must have completed a level of education equivalent to that of students entering from accredited secondary schools in the United States and have superior grades on their school work. Applicants who seek to enter from another college or university in the United States must meet transfer admission requirements.

International applicants will not be allowed to enroll in classes until they establish their ability to pay education expenses (approximately $22,750 for each year of study). The policies of certain countries have created financial difficulties for their citizens studying at the University. Applicants from these countries will be so notified and required to make an advance deposit of expenses. Applicants from other nations must submit certification of financial support to satisfy this requirement. International students should not expect to obtain any financial assistance from the University.

1 Applicants who are not citizens or permanent residents of the United States.
Please note: Academic standards of progress and attendance are covered under school standards of progress as specified by the South Carolina Commission on Higher Education, License Division, and are required by the U.S. Department of Veterans Affairs (VA).

**Enrollment Certification**
Certification by the University VA certifying official in the Office of Veterans Services is required for eligible students who wish to receive VA educational benefit checks. Students must initiate their own requests for enrollment certification. The certifying official will transmit certifications and other forms to the VA only for those students who have made such requests and have completed the necessary paperwork.

Normally, the VA requires that eligible students have completed full University admissions requirements and matriculation into degree-seeking status before they may receive VA educational benefits. However, those students admitted as “Provisional,” “Military Special,” or “Transient,” or students enrolling for prerequisite courses required for admission into a professional degree program or school may request VA certification if they provide appropriate documentation. Any VA students in these categories should contact the University Office of Veterans Services for details. In these and all other admissions categories, only the federal VA has the final authority to award or to deny military educational benefits.

Students can best ensure receipt of benefits by informing the school VA office of their intent to register for classes and by supplying the number of credit hours for which they will enroll each semester. Eligible VA students may request certification on an annual basis and should recertify for each new academic year at least 45 days prior to the first day of class of their next semester. However, pursuant to federal law, servicepersons, and VA students who are enrolled for less than one-half time must request certification on a semester-by-semester basis.

Normally, VA payments are authorized only for those courses which are required by the academic department for the student’s current degree program. All students receiving educational benefit checks from the VA are responsible for notifying the Office of Veterans Services of any changes in their degree programs and/or course loads during a semester, to include drop/add, withdrawal, changing from credit to audit status, invoking the Pass-Fail option in a course, or enrolling in any distance education course, independent study, internship, or practicum.

Undergraduate veterans or servicepersons should contact the associate dean for student services for information about forms, benefits, consideration of receiving college credit for military schools, or any other VA-related topics.

**Advanced Placement by Examination**
Baccalaureate degree candidates may qualify for degree credit and/or advanced placement through successful completion of the following exams:

1. The College Entrance Examination Board Advanced Placement Examinations are offered in American government and politics, American history, art history, art studio (drawing and general), biology, chemistry, comparative government and politics, computer science (A and AB), economics (macro and micro), English language and composition, English composition and literature, environmental science, European history, foreign languages (French, German, Latin, and Spanish), human geography, mathematics-calculus (AB and BC), music (theory and listening and literature), physics (B, C part 1, C part 2), psychology, and statistics.

2. The College Level Examination Program (CLEP) subject examinations are offered in accounting (introductory), American government, American history, American literature, general biology, business law (introductory), calculus with elementary functions, chemistry (general), college algebra, college algebra-trigonometry, educational psychology, English literature, freshman college composition, information systems and computer applications, literature (analysis and interpretation), management (principles), marketing (principles), psychology (general), trigonometry, and Western civilization. CLEP examinations cannot be repeated. No credit is given for CLEP general or foreign language examinations.

3. Departmental examinations for chemistry and music, among others, are offered to new students prior to fall and spring registration. Contact the appropriate department for test schedule and information.

**Academic Regulations**
As the chief governing body of the University, the Board of Trustees delegates the powers of the president and the faculty in accord with its policies. Subject to the review of the president and the Board of Trustees, the faculty retains legislative powers in all matters pertaining to the standards of admission, registration, instruction, research, extracurricular activities, requirements for and granting of degrees, the curricula, the discipline of students, the educational policies and standards of the University, and all other matters affecting the conduct of academic affairs.

The University reserves the right to make changes in curricula, degree requirements, course offerings, and all academic regulations whenever, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement such as the Medical School Bulletin, Law School Bulletin, Graduate Studies Bulletin, the University Master Schedule of Classes, or the Carolina Community. Official policies of the University listed below are published in the Carolina Community, which is available online as well as through the Student Government Office or the Office of the Vice President for Student Affairs.

1. Student Rights and Freedoms within the Academic Community
2. Rule of Academic Responsibility and Academic Disciplinary Procedures
3. Grievance Policy and Procedures for Non-Academic Areas
4. University Policy on Use of Alcohol
5. University Policy on Campus Solicitation
6. University Policy on Student Patent and Copyright Matters
7. Student Right to Know

Unforeseen circumstances may interfere with the scheduling of a course or degree offering. Students must accept such developments even if doing so will mean a delay in some of their academic goals or a modification of those goals. The departments concerned will work closely with students facing such problems in an effort to resolve them with a minimum of difficulty.

The University reserves the right to withdraw any course because of inadequate enrollment. Additional courses may be offered upon application of a sufficient number of students; a minimum of 10
Bulletin Rights and Exclusions

Bulletin Rights
An undergraduate student may choose to obtain a degree in accordance with the curricular requirements in force for the particular degree at the time the student first enrolls as a degree-seeking student at any University campus, or under subsequent requirements published while the student is enrolled.

Bulletin Exclusions
The student's choice is restricted to a specific bulletin and the curricular requirements described therein. Undergraduate students have a period of eight years, inclusive and continuous, in which to claim the rights of a specific bulletin.

Within the eight-year limit, an undergraduate student who is absent from the University for no longer than three years, and who returns to complete the program of study, shall have the right to continue under the bulletin in effect at the time of the student's original enrollment as a degree-seeking student. Alternatively, the student may elect the degree requirements under the bulletin in effect at the time of return. If the period of absence is longer than three years, the student will be subject to the curricular requirements in force at the time of return. Under no circumstances will students be allowed to appeal to short-lived rules and regulations which were adopted and abandoned during the period of their absence.

If drastic revisions of curricula or program requirements have occurred during a student's absence (even if for less than three years), or during the period between the student's original enrollment as a degree-seeking student and the eventual movement to a different degree program or campus within the University, a reasonable effort will be made by the academic dean to permit the student to undertake a transitional program that is equivalent to the educational experience intended under the bulletin in force at the time of the student's original enrollment as a degree-seeking student.

Academic Calendar Policies

Academic Calendar
The University follows an early Semester Calendar, with Fall semester beginning the Thursday of the third full week in August and ending in December before the winter break. Spring classes begin the second Monday of January, provided neither Monday is a holiday (New Years or MLK). For Fall and Spring semesters, there are 70 class days with a minimum of 2100 minutes of instruction for a standard 3 hour class-28 Tuesday and Thursday classes of 75 minutes per class meeting and 42 Monday, Wednesday, Friday classes of 50 minutes per class meeting. All nonstandard one or two day per week classes must meet the minutes of instruction requirements as part of the calendar.

Summer Term
The summer term consists of multiple course sessions between the spring and fall terms.

Students regularly enrolled in the University may take work applicable to their degree during the summer term. Regulations governing the regular academic year also pertain to the summer term.

A complete listing of all courses offered in the summer term will be available by April 1 on the registrar's Web site under "Master Schedule." Course sessions and times may vary.

Please refer to the registration calendars on the registrar's Web site for more detailed information.

Advisement Policies

Academic Advising
When students are accepted into the University, they are assigned an academic advisor. Students are expected to arrange to meet with their advisor at least once a semester to plan their course of study for the following semester. Students who do not know their assigned advisor should obtain this information from the appropriate departmental or academic dean's office.

Information, advice, and interpretations of University policies offered by advisors do not supersede the official statement of policies and academic regulations described in the University Undergraduate Studies Bulletin. Exceptions to University regulations cannot be made by academic advisors. Any exceptions to the policies and regulations set forth in the University Undergraduate Studies Bulletin must be made by the appropriate College Scholastic Standards and Petitions Committee or by the dean of the college.

Records of academic progress may be kept by advisors and deans, but the only official student records are maintained by the Office of the University Registrar.

Classification of Students
Classification is based on the total number of semester credit hours earned: A student must have earned 30 hours to be classified as a sophomore, 60 for classification as a junior, and 90 for senior classification. Students are classified at the beginning of each semester and maintain that classification until the next semester begins.

Undeclared Freshmen
For various reasons it may be impossible or inappropriate for a student to declare a major. Nevertheless, all students will receive advisement in the college most closely related to their interests and abilities. Transient students are subject to the rules of their home institution and may take course work at the University of South Carolina without a declared major. University courses are open to those seeking career advancement or life enrichment and who meet stated course prerequisites. Freshmen who have been accepted by the University, but who are unsure of academic or career goals, may need a period in which to establish their major interest. To accommodate students in these categories, courses which are usually open to students with 30 or fewer hours (freshmen) are open to all students who meet prerequisites published in the University's Undergraduate Studies Bulletin. Students who have earned 30 semester hours and wish to continue their studies at the University of South Carolina must declare a major in a program in which they meet entrance or progression requirements.

Course of Studies
Students are expected to follow the programs outlined by their school or college as closely as possible, particularly in the first two years when satisfying basic degree requirements and prerequisites for advanced work. Students must pursue required courses in the prescribed sequence. Failure to do so may lead to future schedule difficulties, and students may find that the subjects for which they wish to enroll are either not
available or are closed to students with advanced standing. Students who fail to complete successfully all freshman requirements may not enroll in courses in their major field beyond the sophomore level. Students ineligible to continue courses in their major field may take electives until the deficiency is removed. Students who enroll in classes for which prerequisites or other defined requirements have not been met may be removed from these classes. Learning-disabled students who wish to take advantage of University-approved program accommodations must have an academic advisory plan on file with the Office of Student Disability Services and the dean of the college. This plan will be formulated by the student’s academic advisor with the assistance of the Office of Student Disability Services and will contain recommended accommodations which specifically relate to and are consistent with the student's diagnosed disability. A copy of the student’s academic advisory plan must be provided to the course instructor for the student to be eligible for a particular accommodation. Any substitutions for degree requirements recommended in the student’s academic advisory plan must be referred to the Scholastic Standards and Petitions Committee of the student’s college for action.

Changes in Curriculum

Undergraduate students interested in changing majors should contact the college or school offering the new curriculum the student intends to follow. Once all necessary permissions are obtained, the college or school that offers the new curriculum will notify the Office of the University Registrar to update the student’s record. Curriculum changes can affect loan deferment, scholarship eligibility, athletic participation eligibility, tuition and fee assessment, and international student VISA regulations. For this reason, all curriculum changes must be completed before the end of the free drop/add period in Fall and Spring Terms (in Part of Term 30), and prior to June 1 during the Summer Term. Curriculum change requests that arrive at the Office of the University Registrar after these deadlines will be processed for the following term. Exceptions to this rule may be made in the event that a change request is being made in the semester that student is graduating from the University.

Course Substitutions

Only under unavoidable and exceptional circumstances will the faculty permit substitution for or exemption from the prescribed curricula. When it becomes necessary to request a deviation from the prescribed course of study, students should consult the dean of their college or the head of the department in which they are majoring before preparing a petition listing the substitutions or exemptions sought and the reasons for the request. Petitions are submitted on forms obtainable from the Scholastic Standards and Petitions Committee of the particular college, and must be returned to the dean of the college in which the student is enrolled. Deviations from degree requirements published in the bulletin must be approved by the student’s dean and the head of the student’s major department. The Scholastic Standards and Petitions Committee of each college functions as an appeal board in cases where agreement between the dean, department head, and the student cannot be reached.

Course and Academic Credit Policies

Course Numbering

Courses numbered from 101 to 699 are available at different levels for undergraduate credit. Courses numbered from 700 to 899 may be taken for graduate credit only and are described in the Graduate Studies Bulletin. All courses numbered from 101 to 499 are for four-year baccalaureate degree candidates. Courses numbered from 500 to 699 may be taken by advanced undergraduate and graduate students for undergraduate or graduate credit, respectively. A 500- to 600-level course taken for undergraduate credit cannot later be awarded graduate credit.

Course Credit

The credit value of each course is usually determined by the amount of formal instructional time per week for one semester. At least 700 minutes of instruction (and at least twice that for laboratory time) can be expected per credit hour. The semester hour credit for each course is included in each course description.

No student suspended from the University of South Carolina for any reason may earn academic credit during the period of suspension, whether by residence elsewhere or by correspondence courses of any origin.

Remedial courses (courses numbered 100 or below) may not be used to meet degree requirements.

Credit by Examination

Currently enrolled students may obtain credit by examination in a course in which they have had no class attendance or semester standing; permission must, however, be obtained from the dean of the college or department chair in which the course is offered. A grade of not less than B on the examination is necessary in order to receive credit for the course. Examinations are not permitted in courses in which a student previously has been enrolled regularly or as an auditor. The applicant must pay to the Office of Financial Services in advance of the examination a fee of $25 per semester hour; this fee is not refundable. The Office of Financial Services will issue a receipt which must be shown to the head of the department conducting the examination, who shall immediately report the results of the examination to the Office of the University Registrar. Credits earned under this regulation are recorded with hours earned only.

Transfer Credit

Students transferring to the University from another college or university must, before enrolling in class at the University, have their transcripts evaluated by the University. It is only in the light of such evaluation that students will know definitively the transferability and equivalency of each transfer course. Degree applicability will be determined by the college or school in which the student is enrolled.

Transferability refers to the conditions under which the University accepts credit for inclusion in the student’s record. Transfer courses must have been taken at a regionally accredited post - secondary institution, or, if taken at a foreign post-secondary institution, have been recommended by a NACES - member external evaluation service. Coursework classified as remedial by the University will appear on the student’s record, but will not be used to determine admission eligibility or a transfer GPA. Exceptions to this rule may be made by the Office of the Registrar when state scholarship eligibility rules require inclusion.

Equivalency entails equating transfer credit, both in hours and content, to University of South Carolina coursework. The Registrar’s Office works with UofSC colleges and schools to coordinate the process of transfer evaluation to equate transfer courses directly to courses in the UofSC course catalog; subject codes which represent subjects not offered at UofSC or to subject codes that identify courses as remedial/technical/non-accredited coursework. A list of transfer equivalencies for the Columbia catalog of courses can be found at: http://www.sc.edu/about/offices_and_divisions/registrar/transfer_credits/course_equivalency.php
Applicability of credit toward a degree refers to the prerogative of academic divisions to count specific credit toward the fulfillment of a student's degree requirements. The student's college or school of enrollment is responsible for determining applicability.

However, a transfer course is not applicable towards any University of South Carolina academic program or degree if:

1. The transfer course was essentially remedial in nature (example: Developmental English).
2. The transfer course was occupational or technical in nature (examples: welding, paralegal, or radiography courses).
3. A grade lower than 2.0 on a 4 point scale, or equivalent, was earned in the transfer course.
4. The transfer course was taken by a degree-seeking University of South Carolina student without prior approval as described in the Earning Credit in Transient Status section of this bulletin.
5. The transfer course was taken while a student was on an academic suspension from the university.
6. The student received any grade other than W in an equivalent course at this university, unless the student was enrolled full time at least one year at the transfer institution.

Exceptions to the rules of applicability may be made only by petition to the dean for undergraduate studies of the College or School in which the student is majoring.

Effective Summer 2017 for all newly admitted and readmitted students, transfer grade points and GPAs will no longer appear on the UofSC record. Transfer course equivalencies, grades, attempted hours, and earned hours will appear on students' advising transcript in Self Service Carolina, while only transfer earned hours will appear on the official transcript.

Earning Credit in Transient Status

Since the University is accountable for the integrity of its degrees, it is essential that degree programs be closely monitored by University faculty. Therefore, students entering the University to seek a degree should expect to complete the majority of their academic work at the University of South Carolina. Normally students who wish to earn more than a semester of credit at another institution should meet all requirements and transfer to that institution. In some programs, and with the permission of the academic dean, students may take up to 18 semester hours of courses in transient status provided they have a 2.00 UofSC grade point average; the courses are approved in advance by the academic advisor and dean; and the other institution is fully accredited and the course work meets University specifications for transfer credits.

Study abroad or in special academic programs within the United States may be of particular benefit to students, and the University cooperates in a variety of national and international exchange programs in which students may pursue up to a year of academic work at another institution. Special permission is granted to students in these programs with the advance approval of the academic advisor and dean.

Course Load

Maximum credit limits, published in the Master Schedule of Classes, also vary according to college policy. Students will not be permitted to register for a semester load in excess of that prescribed for their program of study unless they earned an average of B or better on all courses for which they were enrolled (minimum 12 semester hours) for the preceding semester. New students are eligible for an extra course if they submit to the academic dean satisfactory evidence of equivalent academic achievement. Students eligible for an additional course on this basis must obtain prior approval for each course addition from the dean of their college. No course may be added after the last date to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar's Web site. (Note: This regulation does not apply to aerospace studies, Army or naval science courses, which may be added to a course program during the regular registration period without special approval.)

Undergraduate students who are enrolled in 12 semester hours or more for the fall, spring, or summer semester are considered full-time for academic purposes. Students who have been verified as learning disabled by the Office of Student Disability Services must be enrolled in 9 semester hours or more for the fall, spring or summer semesters to be considered full-time students with regard to access to University residence halls and eligibility for financial aid, provided this is consistent with their academic advisory plan.

Graduate students who are enrolled in 9 semester hours or more for the fall, spring, or summer semester are considered full time for academic purposes.

Full-time fees for undergraduate students are calculated on 12 to 16 semester hours. Full-time status for graduate students with assistantships is determined by the dean of Graduate Studies.

Full-time benefits for veterans are determined by the Office of Veterans Services.

Auditing

A student must be admitted to the University and go through the regular registration process to be eligible for auditing any course. All auditors must be admitted to the University and go through the regular registration process. Those who are not full-time students will be charged the same fees as for courses taken for academic credit.

Auditing a course consists of attending classes and listening without responsibility for any assignments or examinations. An auditor is not responsible for any assignments or examinations. No record of audit shall appear on a transcript unless a student attends 75 percent of the classes.

No credit may be earned in an audited course by examination or otherwise. No audited course may be repeated for credit at a later date except by those students who have been verified as learning disabled by the Office of Student Disability Services and whose academic advisory plan recommends auditing a specific course before it is taken for credit.

The applicant must complete the prescribed procedure for enrollment through the Office of the University Registrar before class attendance will be permitted.

Students who have registered for a course on an audit basis and who wish to change their registration to take the course for credit (or who wish to change from credit to audit) must do so no later than the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar's Web site.

Independent Study

The purpose of the independent study option is to allow the student to pursue an area of academic interest not adequately covered by the
regular course structure. The experience shall involve an academic product that is consistent with the student’s program of study.

Prior to enrolling in an undergraduate independent study course, a student must complete an Independent Study Contract (AS-6). The approval of the instructor, advisor, department chair, and student’s dean is required. Students then present their approved copy to the Office of the University Registrar before registering for the course. Only students who take independent study as part of their major or minor or cognate program may receive grade-point credit for independent study. All other students will receive Pass-Fail credit. Students who take independent study on a Pass-Fail basis cannot later receive grade points, even if the student transfers to another major, minor, or cognate otherwise qualifying the course work as appropriate for grade points. This ruling is not reversible by petition.

A grade point average of 2.50 or greater is required to enroll in independent study courses. The amount of credit for independent study per semester is limited to 6 hours. Independent study credits applied toward any undergraduate degree may account for no more than 10 percent of the total required credit hours for that degree.

**Repetition of Course Work**

When a course is repeated, both grades will be entered on the student’s permanent academic record and included in the grade point average, unless the grade forgiveness policy is applied. Course credit toward graduation will be given only once, unless otherwise stipulated in the course description. Many academic programs restrict the number of times a course may be repeated. Consult the college and department section of the bulletin for such restrictions.

**International Courses (INTL) / Study Abroad**

- 501 — Study Abroad—UofSC Exchange. (1-16) This course keeps a UofSC student active while on a pre-approved UofSC exchange program.
- 502 — Study Abroad—Non-UofSC Program. (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program.
- 503 — Study Abroad—Through Another U.S. Institution. (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program through another U.S. institution of higher education.

**Senior Privilege - Enrollment in Graduate Courses**

A special provision to earn graduate credit is available for UofSC undergraduate seniors in their final semester who need less than a normal course load to complete baccalaureate requirements. Overload enrollment that includes one or more courses under senior privilege is not allowed. Courses for graduate credit under senior privilege cannot be used toward undergraduate degree requirements. For senior privilege consideration, undergraduate seniors with a 3.00 GPA should submit to The Graduate School, for the graduate dean’s approval, form GS19 endorsed by the student’s advisor, the chair of the department offering the course, and the academic dean for that department. This action should be taken before registration.

**Accelerated Degree Programs**

Certain academic units offer accelerated programs whereby an undergraduate student with a GPA of 3.40 and 90 or more hours toward the baccalaureate degree may apply graduate credits to a baccalaureate program. Admission can be requested by students in consultation with their academic advisor, their undergraduate dean, and the graduate director of the proposed master’s program. An application form and associated guidelines may be obtained from The Graduate School.

Several of the University’s colleges and schools are involved with a variety of accelerated degree programs. For more information, contact:

Office of Undergraduate Admissions
University of South Carolina
Columbia, SC 29208
phone 803-777-7700

**Registration Policies**

**Registration**

To be officially enrolled in the University students must be academically eligible, complete the registration process with the Office of the University Registrar, and possess a receipt issued by the Office of Financial Services for payment of current academic fees.

Students are expected to complete registration (including the payment of all required fees) by the dates prescribed in the registration calendars on the registrar’s Web site to avoid cancellation of classes and payment of a late registration fee of $5 per day ($350 maximum).

**Changes in Enrollment**

Adding a course, changing from credit to audit or audit to credit, changing from one section to another, and changing the number of credits in any variable credit course must be completed by the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site. Electing or revoking the Pass-Fail option must be completed no later than the last day for dropping a course with a grade of W, as published in the academic and refund calendars on the registrar’s Web site.

**Dropping Courses and Withdrawal**

**Free Drop/Add Period**

During the Free Drop/Add period, undergraduate students have the ability to add and remove courses from their schedule through Self Service Carolina. For each course, the Free Drop/Add period begins during the official first day of the course and extends to a minimum of 6% of the Part of Term in which the course is scheduled. Courses removed during the Free Drop/Add period will not be recorded on a student’s transcript. Details regarding Free Drop/Add dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from dropping or adding courses during the Free Drop/Add Period if they have an active registration hold on their record.

**Course Withdrawal Period**

During the Withdrawal Period, undergraduate students have the ability to withdraw from a course with no grade penalty through Self Service Carolina. For each course, the Withdrawal Period begins after the Free Drop/Add Period and extends to a minimum of 72% of the Part of
Term\(^1\) in which the course is scheduled. Courses from which a student withdraws during this period are recorded on a student's transcript as a W; however, the semester hours will not be calculated in the computation of grade point average, count towards earned hours, or count towards graded hours. Courses that have a recorded grade of W will count towards attempted hours. Details regarding course Withdrawal dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Period if they have an active registration hold on their record.

1 Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Course Withdrawal Fail Period
During the Withdrawal Fail Period, undergraduate students have the ability to withdraw from a course with a penalty grade through Self Service Carolina. For each course, the Withdrawal Fail Period begins after the Withdrawal Period and extends up to 100% of the Part of Term\(^1\) in which the course is scheduled. Courses from which a student withdraws with a grade of WF during this period are treated as an F in the evaluation of academic standing, computation of grade point average, and graded hours. Details regarding course Withdrawal Fail dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Fail Period if they have an active registration hold on their record.

1 Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Hardship Withdrawal
During and after the Withdrawal Fail Period, it may be necessary for a student to withdraw from all courses for the semester due to a significant personal hardship (e.g., medical or family emergency, prolonged illness, other medical or traumatic event). In these situations, students are able to petition for a Hardship Withdrawal from courses through the Office of the Dean of Students or the Hardship Withdrawal Committee. Each Palmetto College Campus has an equivalent hardship withdrawal process for managing petitions from students enrolled on their campus.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted during the Withdrawal Fail Period until the last day of courses for the semester will be reviewed by the Office of the Dean of Students. Approved petitions will be submitted to the Office of the Registrar for grade assignments of W for all courses that semester on the student's transcript.

The Office of the Dean of Students will notify the student's instructors and their home college of the withdrawal.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted after the last day of courses for the semester will be reviewed by the Hardship Withdrawal Committee that must include faculty and college/school representation. Approved petitions will be submitted to the Office of the Registrar for grade assignments of W for all courses that semester on the student's transcript.

Prior to a Hardship Withdrawal decision being made, all documentation is subject to verification by the Office of the Dean of Students and/or the Hardship Withdrawal Committee, including but not limited to class attendance, class participation, or supporting documentation. If false documentation or misrepresented information is submitted, students will be referred for alleged violation of the USC Honor Code and the Hardship Withdrawal request will be denied.

A Hardship Withdrawal to selectively withdraw from some courses, while remaining enrolled in other courses, will be permitted only under exceptional circumstances and must be approved by the Office of the Dean of Students in consultation with appropriate colleges/schools. The Office of the Dean of Students will submit a report of selective withdrawal decisions for verification to the Hardship Withdrawal Committee at the end of each semester.

Information regarding the University’s Withdrawal Refund Appeals procedures can be found in the Fees and Refunds section of the bulletin.

Title IX Obligations
Information contained in Hardship Withdrawal petitions is private and not shared with instructors, departments, or colleges/schools outside of the Hardship Withdrawal Committee. However, in accordance with the provisions of Title IX of the Education Amendments Act of 1972 and University policy, if sexual misconduct information is included in a student’s petition, the Office of the Dean of Students and/or the Hardship Withdrawal Committee is obligated to report the matter to USC’s Title IX coordinator.

Withdrawing via Self-Service Carolina
Students can withdraw for the semester by withdrawing from all courses on Self Service Carolina. Students are encouraged to consider the Hardship Withdrawal Process if they are withdrawing during the Withdrawal Fail Period.

Active Duty Military Withdrawal
Students in the National Guard or armed forces reserves who are placed on active duty by order of the president of the United States or the governor of their state should pursue withdrawal from courses according to the provisions of the University’s policy titled “Withdrawal of Students Called to Active Military Service” (ACAFAQ 3.05 (http://www.sc.edu/policies/ppm/acaFAQ05.pdf)). Active duty military personnel who are reassigned during an academic term may also invoke the provisions of this policy.

Withdrawal Period | 7-72% of classes | W grade will be recorded on transcript. W grade is not calculated in GPA. | • Financial Aid • Progression towards degree • Satisfactory Academic Progress

Withdrawal Fail Period | 73-100% of classes | WF grade will be recorded on transcript. WF grade is calculated as an F in GPA. | • Financial Aid • Progression towards degree • Academic Standing

Hardship Withdrawal Period | 73-100% of classes | W grades will be recorded for all courses for approved petitions. Petitions are subject to review by the Office of the Dean of Students | • Financial Aid • Refund Appeals Process

Hardship Withdrawal Period | After 100% of classes | W grades will be recorded for all courses for approved petitions. Petitions are subject to review by the Hardship Withdrawal Committee | • Financial Aid • Refund Appeals Process

1 Specific dates for each Part of Term may be found on the Office of the Registrar website

Indebtedness

It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

Attendance Policy

Class Attendance

Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in whatever class discussion may occur.

Absence from more than 10 percent of the scheduled class sessions, whether excused or unexcused, is excessive and the instructor may choose to exact a grade penalty for such absences. It is of particular importance that a student who anticipates absences in excess of 10 percent of the scheduled class sessions receives prior approval from the instructor before the last day to change schedule as published in the academic and refund calendars on the registrar’s website (http://registrar.sc.edu/).

It must be emphasized that the “10 percent rule” stated above applies to both excused and unexcused absences. Faculty members should notify classes, specifically in the course syllabi, of the attendance policy which they intend to follow in each class, but it cannot be more restrictive than the “10 percent rule”. It is also recommended that the faculty include a policy statement in their syllabi requesting students to meet with the instructor early in the semester to discuss the consequences of potential excessive absences due to participation in University-sponsored events.

Faculty should consider the following events or circumstances as potentially excusable absences:

- participation in an authorized University activity (such as musical performances, academic competitions, or varsity athletic events in which the student plays a formal role in a University sanctioned event)
- required participation in military duties
- mandatory admission interviews for professional or graduate school which cannot be rescheduled
- participation in legal proceedings or administrative duties that require a student’s presence
- death or major illness in a student’s immediate family
- illness of a dependent family member
- religious holy day if listed on www.interfaithcalendar.org (http://www.interfaithcalendar.org)
- illness that is too severe or contagious for the student to attend class
- weather-related emergencies

The Student Ombudsperson in the Division of Student Affairs is available to assist faculty members with obtaining or verifying documentation when necessary. The faculty member has complete discretion regarding the specific nature of any accommodation offered in the event of an excused absence. Students should notify faculty members at least two weeks prior to the absence when possible. In all cases, students must contact the faculty member to request an accommodation upon return to class.

Examination Policies

Final Examinations

Final examinations for spring and fall semesters are held during a seven-day period at the close of each semester. Summer examinations are held during a two-day period at the close of each session. Semester examination schedules are published on the registrar’s Web site under the “Calendar” link. The results of these examinations, combined with the grades for class performance, determine the reports given at the end of the semester. No final examination may be held outside of the stated time without the special permission of the dean of the college concerned. Reading Day is specified in the University calendar and no exams, quizzes or required class attendance may be scheduled for that day.

In any course or laboratory which meets two or three times per week, no quiz, test, or examination may be given during the last two class meetings prior to the regularly scheduled examination period. In any course or laboratory which meets once a week, no quiz, test, or examination may be given during the last class meeting prior to the regular examination period. In any course or laboratory which meets more than three times per week, no quiz, test, or examination may be given...
during the last three class meetings prior to the regular examination period. Self-paced courses are exempt from this regulation.

If an instructor teaches more than one section of the same course, students may transfer from one examination section to another with the instructor's permission.

Students who are absent from any final examination will be given the grade of F on the course if they have not offered an excuse acceptable to the instructor. If excused, they will be assigned a grade of I (see “I” entry under “Grading System”), and may complete the course under the conditions specified by the instructor in the “Assignment of Incomplete Grade” form.

Re-examinations for the purpose of removing an F or raising a grade are not permitted.

Graduating Seniors
No early examinations are given for graduating seniors. Students who have submitted a degree application may attend the graduation ceremony. Diplomas are mailed after final examinations and after a student’s dean has verified that all degree requirements have been met.

Deferred Examinations
A student with excused absences from final examinations in one semester has the privilege of deferred or special examinations and may take the deferred examination at the next regular examination period, with credit for semester standing, provided the examination is taken at the convenience of the professor. The examination must be taken within one calendar year from the time that the absence was incurred. Deferred examinations will be granted only in case of absence certified as unavoidable because of sickness or other cause, rendering attendance at final examinations impossible.

Grading Policies
Grading System
Enrollment in a course obligates the student not only for prompt completion of all work assigned but also for punctual and regular attendance and for participation in whatever class discussion may occur. It is the student’s responsibility to keep informed concerning all assignments made. Absences, whether excused or unexcused, do not absolve the student from this responsibility.

Students’ grades in their courses are determined by class standing and examination grade, combined in such proportion as the professor may decide.

Class standing is determined by the quality of a student’s work and the regularity of attendance in lectures and laboratory sessions or other exercises of the course. Grading systems in graduate and professional schools are described in the appropriate bulletins.

A, B, C, D represent passing grades in order from highest to lowest. B+, C +, D+ may also be recorded. F represents failing performance.

S and U indicate, respectively, satisfactory (passing) and unsatisfactory (failing) performance in courses carried under the Pass-Fail option. The S/U designation is used also for some research courses, workshops, and seminars in which the regular academic grades are not used. The use of the Pass-Fail grading option in such courses is indicated in their bulletin descriptions. No course carried under the Pass-Fail option will affect a student’s grade point average or the evaluation of suspension conditions.

FN (Failure-Non Attendance) and UN (Unsatisfactory-Non Attendance) grades are assigned to students who never attended or have stopped attending class but have not officially dropped or withdrawn. Faculty are required to provide a last date of attendance when assigning this grade. The grade and the last date of attendance are used in determining the recalculation of awarded funds for financial aid recipients. Reporting the last date of attendance is critical to avoid potential financial liability for the institution.

FN and UN grades are displayed and calculated as F and U grades on the official transcript.

WF is assigned for student withdrawal from a course after the penalty deadline prescribed in the academic and refund calendars on the registrar's Web site. (See section on “Dropping A Course.”) The grade of WF is treated as an F in the evaluation of suspension conditions and grade point average computation.

W is assigned for student withdrawal from a course after the late registration period but before the penalty date. Courses dropped during the late registration period (as published in the academic and refund calendars on the registrar’s Web site) will not be recorded on a student’s permanent record. In exceptional cases, the grade W will be used after the first seven weeks of a semester, primarily in cases of withdrawal from the University or from a course for medical reasons. (See section on “Dropping A Course.”) A grade of W will not enter into the evaluation of suspension conditions or in grade point average computation but will be recorded on a student’s permanent record.

I, Incomplete, is assigned at the discretion of the instructor when, in the instructor’s judgment, a student is unable to complete some portion of the assigned work in a course because of an unanticipated illness, accident, work-related responsibility, family hardship, or verified learning disability. The grade of I is not intended to give students additional time to complete course assignments unless there is some indication that the specified condition or event prevented the student from completing course assignments on time. By arrangement with the instructor, the student will have up to 12 months in which to complete the work before a permanent grade is recorded. Re-enrolling in the course will not make up an Incomplete. An Assignment of Incomplete Grade form (AS-I) must be completed by the instructor and submitted to the Office of the University Registrar explaining the reason for the I and conditions for make-up. A grade of I is not computed in calculating a student’s grade point average. After 12 months an I that has not been made up is changed to a grade of F or to the back-up grade indicated by the faculty member on the Assignment of Incomplete Grade form.

T, a Graduate School symbol, is assigned to indicate enrollment in Thesis Preparation (799) and Dissertation Preparation (899). Courses with this symbol will be counted as hours attempted and hours earned only. Grade points will not be awarded. For unsatisfactory work the grade of U should be assigned. The grade of I cannot be assigned in courses numbered 799 and 899.

AUD indicates a course was carried on an audit basis. (See section on “Auditing” for more information.)

NR, No Record, is assigned in the event that the grade is not available at the time final grades are submitted. It is a temporary mark on the transcript and must be replaced by a grade. If replacement does not occur before the last week of the spring or fall semester following the term for which the grade was recorded, a grade of F will be assigned. The NR is ignored in computing the GPA.
Academic Honor Code Violation
A transcript notation on the graded course in which the violation occurred denotes “Honor Code Violation.”

Pass-Fail Grading
The Pass-Fail program is designed to encourage students to investigate fields outside of their major curriculum in which they have a specific personal interest without affecting their grade point average. The only grades assigned on courses taken under the Pass-Fail option are S and U: a grade of S indicates satisfactory performance, a grade of U indicates unsatisfactory progress. A student will be given credit for courses in which the grade of S is earned, but these courses will not affect the computation of the grade point average.

Specific provisions of the Pass-Fail program are as follows:
1. The Pass-Fail grading system is in effect for an indefinite period of time, subject to periodic review.
2. The Pass-Fail option is not available to undergraduate students whose semester or cumulative GPA is less than 2.00.
3. Students are permitted to exercise the Pass-Fail option only on free elective courses.
4. Students are permitted to take no more than eight courses on a Pass-Fail basis during their undergraduate career.
5. A student wishing to exercise the option must have the permission of the dean of the college and the student’s academic advisor. The Pass-Fail Option form (AS-20) is used for this purpose.
6. The option may be elected or revoked by the student no later than the last date for withdrawing from the course without a penalty.
7. Normal prerequisites may be waived for students taking a course on a Pass-Fail basis.
8. Courses taken under this option will be excluded from the calculation of the grade point average.
9. A grade of S will be entered by the Office of the University Registrar if the student earned an S+, S, or U during Spring 2020. Any undergraduate student who earned an S+, S, or U during Spring 2020 will count towards earned semester hours.
10. No course carried on a Pass-Fail basis will be counted toward the hours required for either the President’s or the Dean’s Honor List.
11. A verified learning-disabled student may take on a Pass-Fail basis an elective or required course which is not in the major if the academic advisory plan so recommends the Pass-Fail option for that course. A student who desires use of this option must apply to the dean of the college at the beginning of the semester. With the approval of the academic dean, learning-disabled students may meet specific degree requirements with a satisfactory grade.

Spring 2020 Undergraduate Pass-Fail Grading
Approved by the UofSC Faculty Senate on April 1, 2020

To address complications presented by the COVID-19 pandemic, the Faculty Senate Steering Committee approved the following grading accommodations for undergraduate students enrolled in Spring 2020.

• All courses will be graded as originally planned according to grading criteria in course syllabi. After grades are submitted at the end of the semester, undergraduates can choose, on a course-by-course basis, to request a pass/fail grade for the Spring 2020 semester with the exception of Graduate or professional school courses, which can be taken as pass/fail only when deemed appropriate by the program or school Dean.

• The following pass/fail scale will be used: Earned grades of A, B+, B, C+, and C will be replaced with S+, earned grades of D+ and D will be replaced with S, and an earned grade of F will be replaced with U.

• If students select the S+/S/U grading scale for a course, points will not be factored into the GPA. Courses with S+ and S will count towards earned semester hours.

• Courses graded with the S+/S/U scale, under this exception for Spring 2020, will count towards applicable curricular, major, continuation, and graduation requirements. For example, if a course requires a C or better in a prerequisite, students selecting this alternative grading scale would need an S+ in the prerequisite course.

• Faculty members will not be aware of students who select the pass/fail grading option when entering final grades. Grades will be entered in the format for which the course was approved.

• Students who previously decided to take a course on a pass/fail basis will continue on a pass/fail basis using the University’s established S/U system (e.g., S is earned if the grade is D or above and U is earned for grades below D).

• For the Spring 2020 semester, undergraduate students who choose to replace a course letter grade with the S+/S/U option must do so no later than July 1, 2020.

• This process will occur through the Office of the University Registrar. A form will be available on the University Registrar website for the student to request that a letter grade be replaced with the S+/S/U scale.

• UofSC will include a transcript note on all academic records, regardless of grading basis, indicating the extraordinary circumstances of the global public health emergency during Spring 2020.

• Because some graduate and professional programs require letter grades, students will be able to request an official letter attesting to the letter grade earned in any classes that were converted to S+/S/U. This letter would attest only to grades, not to GPA. We will ensure that those who need evidence of your academic achievements this spring will be able to get it. A form will be available on the University’s website for students to request these letters.

• Students will be allowed to retake undergraduate courses in which they earned an S+, S, or U during Spring 2020. Any undergraduate courses retaken under this provision will not count towards the number of courses currently allowed by the current course grade forgiveness policy. In addition, students who were retaking a class for grade forgiveness in Spring 2020 can retake the class another semester, without penalty.

Grade Point Average
The grade point average is computed on the basis of all semester hours attempted for credit, except for credit hours carried under the Pass-Fail or audit options. Courses in which a grade of S, U, AUD, T, or W was earned are not considered in computing the GPA.

The grade points earned in any course carried with a passing grade (A, B+, B, C+, C, D+, D) are computed by multiplying the number of semester hour credits assigned to the course by a factor determined by the grade. For courses in which the grade of A was earned, the factor is 4; for B+, 3.5; for B, 3; for C+, 2.5; for C, 2; for D+, 1.5; for D, 1. The grade point average is determined by dividing the total number of semester grade points earned by the total number of semester hours attempted for credit (excepting hours carried on a Pass-Fail or audit basis). No grade points are assigned to the symbols F, S, U, WF, W, I, AUD, T, or NR.
Course Grade Forgiveness

It is the policy of the University of South Carolina that every currently enrolled, fully admitted, degree-seeking undergraduate earning a D+, D, F, or WF in a University course may take up to two undergraduate courses for a second time for the purpose of grade forgiveness. Both the first and second grades shall appear on the University permanent record, but only the second grade will be used in computing the University of South Carolina cumulative grade point average. An explanatory notice will appear on the record. Once grade forgiveness is applied to a repeated course, the action may not be revoked.

An eligible student wishing to apply the course grade forgiveness policy to a course enrollment may do so at any time during his/her undergraduate enrollment, but no applications will be honored after the degree is awarded. Grade forgiveness can only be applied once per course for a maximum of two courses (not to exceed 8 credits) on a student’s undergraduate academic record, without regard to the number of degrees sought. Under the grade forgiveness policy, the forgiven and repeated class must be taken at the University of South Carolina-Columbia campus or a Regional campus. Courses transferred from other institutions are excluded from this policy.

This policy does not preclude students from repeating classes multiple times, in accordance with program requirements, but only the second attempt at the class may forgive the original grade of D+, D, F, or WF. Only a regular letter grade can replace a forgiven grade. Grades of W, I, S, U, or AUDIT may not replace previous grades. Grades carrying an honor code violation sanction of X are not eligible for grade forgiveness.

Established requirements for repeating classes, admission to, or progression in, specific academic programs of the University take precedence over the grade forgiveness policy. Program or progression grade point averages are not affected by this policy. Refer to the guidelines for each program for specific requirements. Courses intended to be repeated for additional credit, such as research or applied music, are not eligible for grade forgiveness. Semester honors (dean’s or president’s honor list), or academic standing (scholastic deficiency, probation, suspension), or previous grade point totals will not change retroactively as a result of applying this policy.

Students who have been granted academic forgiveness to reset the grade point average after readmission are not eligible for course grade forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

An eligible student wishing to apply the grade forgiveness policy (http://www.sc.edu/about/offices_and_divisions/registrar/transcripts_and_records/grade_forgiveness/) may begin the process by reading the criteria which must be met and completing the necessary documentation in order to apply grade forgiveness.

Note that Academic Forgiveness is not the same as Grade Forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former USC Students with Less Than a 2.00 Cumulative GPA.

Grade Reports

Students’ grades are reported on Self Service Carolina. Students can also access grade reports in person at the Office of the University Registrar.

Grade Change Policy

Grade changes based on transcription or computation errors shall be reported directly to the Office of the University Registrar on the appropriate grade change form signed by the instructor and the head of the student’s academic unit. Any request for a grade change must be submitted by the instructor no later than one calendar year from the date on which the grade was reported. Beyond this period, grade changes will be considered only in exceptional circumstances and must be handled through the petition procedure of the student’s college. Any other grade change request resulting from enrollment discrepancies, medical withdrawals, or perceived administrative errors (changes to W, WF, audit, credit, S/U, or to I) must be submitted on the appropriate forms with signatures and documentation to the dean of the student’s college for review through the petition procedure. This does not apply to the routine makeup and extension of an I (incomplete) and posting of a permanent grade to replace the recorded NR mark. An I turns into a grade of F after one year; an NR turns into a grade of F after one semester. Special makeup work or examinations to change grades already recorded are not permitted.

Academic Standards Policies

Academic Standards

The following standards for continuing at the Columbia and regional campuses of the University of South Carolina apply to all undergraduate students who first enroll at the Columbia and regional campuses of the University in the fall 2008 semester or thereafter, are admitted to the Columbia and regional campuses of the University in an undergraduate degree program in the fall 2008 or thereafter, or are enrolled in the fall 2010 semester or thereafter, regardless of when first enrolled at the University. Administration of these regulations is the responsibility of the academic deans, who are not empowered to waive any of the provisions.

Academic Review

The record of every undergraduate student will be reviewed at the end of each fall and spring semester. Many of the individual colleges of the University have higher academic requirements for students to continue in their degree programs. However, no student will be suspended academically from the University unless he/she fails to meet the standards specified here.

Academic Standing

A student’s academic standing is based on his/her “Total Institutional GPA” and “Total Institutional GPA Hours” which can be viewed in Self Service Carolina at the end of a student’s “Unofficial Academic Transcript” under the heading, “Transcript Totals (Undergraduate).”

Academic Probation

When a student’s Total Institutional GPA at the end of any semester is less than a 2.00, he or she is placed on academic probation.

First-year Freshmen Academic Recovery Program

First-year freshmen who have less than a 2.00 Total Institutional GPA at the end of their first semester of collegiate enrollment are considered at risk. During the first six weeks of their second semester, these students must participate in an academic coaching session before being eligible to register for courses for the third semester. These sessions will provide students with assistance in academic planning, general advisement, major exploration, degree audit, self-assessments, and success strategies. This requirement is in addition to any made by the student’s college, school, or academic program.

Removal from Academic Probation

When a student’s Total Institutional GPA at the end of any semester is a 2.00 or above, he or she is not on academic probation.
Continuing on Academic Probation

Any student who is on probation at the beginning of a fall or spring semester must achieve a certain Total Institutional GPA at the end of that semester in order to avoid suspension. A student may also continue on probation and avoid suspension if the semester grade point average is 2.50 or greater. Standards for continuing on probation are based on the cumulative grade hours the student has attempted at UofSC. The chart below shows the grade point averages required in order to avoid suspension.

<table>
<thead>
<tr>
<th>Total Institutional GPA Hours</th>
<th>Placed on Probation</th>
<th>Continue on Probation (avoid suspension)</th>
<th>Removed from Probation</th>
</tr>
</thead>
<tbody>
<tr>
<td>12.35</td>

<td>72+</td>
<td>below 2.00 Total Institutional GPA</td>
<td>only with semester reprieve Total Institutional GPA (see below) or by college petition</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
</tbody>
</table>

Semester Reprieve: Regardless of the Total Institutional GPA, a student may continue on probation and avoid suspension if the Current Term grade point average is 2.50 or greater.

First Suspension

Students unable to meet the standards shown above are suspended from the University of South Carolina for one fall or spring semester and the contiguous summer (approximately eight months). Students have the right to appeal their suspension to the petitions committee of the college or school in which they were enrolled when suspended.

Returning After First Suspension

After the suspension has been served, a student will be considered for readmission by the college or school to which the student is seeking admission. A student readmitted following suspension continues on probation and is reviewed for suspension at the end of each fall and spring semester. A Current Term grade point average of 2.50 or higher must be achieved each semester until the Total Institutional GPA reaches the level above which suspension would occur (see chart).

During the first six weeks after returning from a first suspension, students must participate in an academic coaching session before being eligible to register for courses for the following semester. These sessions will provide students with the resources they need to meet their academic goals.

Returning after Subsequent Suspension

The duration of the second suspension is indefinite, and the student can be considered for readmission only after being approved for reinstatement by action of the petitions committee of the college or school to which the student is seeking admission. A favorable decision by the committee is unlikely within two years of the suspension.

Earning Academic Credit While on Suspension

A student on suspension is given an opportunity to reorder priorities and reassess his or her situation before returning. While serving suspension, a student may not be admitted to, or continue in, any academic program of the University. Credit earned at any other institution while a student is on suspension from the University may not be applied toward a degree from UofSC, unless approved by the Standards and Petitions Committee of the college to which the student is readmitted. Prior approvals for transient study will be revoked for suspended students.

Retention in Degree Programs

Students are reminded that the above regulations are for all undergraduate students in the University. Many colleges and schools offer degree programs that have more stringent requirements for retention in those programs. Failure to meet the academic requirements of those degree programs may result in the student being asked to leave that program. Students should consult the colleges and schools section of the Academic Bulletin to review the specific degree retention requirements.

Academic Progression and Program Dismissal

Students dismissed from a program for failing to meet academic progression requirements will be reassigned to Undergraduate Studies and will be advised by the University Advising Center. Students assigned to Undergraduate Studies will have a maximum of two semesters before declaring a new program of study. At the conclusion of two semesters enrolled at full-time status, students who have not declared a major/program within a degree-granting college will have a registration hold placed and will be unable to enroll in coursework.

Petition Procedures

In addition to previously specified provisions by which a student may petition to waive the application of this suspension policy, a student suspended by this policy has the right to petition to the appropriate college scholastic standards and petitions committee to waive the application of the suspension rule at any time. Students placed on first suspension who wish to petition for a waiver of the suspension rule may petition only the committee of the college in which they were enrolled at the time of suspension.

Academic Forgiveness Policy

Academic Forgiveness for Former UofSC Students with Less than a 2.00 Cumulative GPA

Under certain conditions undergraduate students may apply for academic forgiveness. Academic forgiveness allows for a recalculation of the GPA to permit a student to graduate or pursue a specific academic program. In order to apply for academic forgiveness all of the following conditions must be met:

1. The student has not been enrolled at any campus of the University of South Carolina for at least 48 months.
2. The student must have been readmitted to a degree program at the University of South Carolina and must have completed at least 24 hours of approved graded course work prior to applying for academic forgiveness.
3. After readmission the student must have earned a cumulative GPA of at least 2.00 and met the progression requirements of the degree program.
4. The student must never before have been granted academic forgiveness.

A student who has met these conditions and desires academic forgiveness must submit a written request for academic forgiveness to
the dean of the college in which the student is enrolled. After verification of the student's eligibility, the dean shall inform the registrar that academic forgiveness has been granted to the student.

Once academic forgiveness has been granted, the following apply to the student's academic record:

1. All curriculum requirements will be in accordance with those in force at the time of or subsequent to the student's readmission.
2. The student may not receive Academic Honors upon graduation.
3. The student's grade point average is recalculated beginning with the semester in which the student was readmitted to the University. All academic hours attempted at USC will be calculated toward the GPA. The student's GPA will be recalculated using the GPA after readmission and a 2.00 on all grade hours taken prior to readmission.
4. Courses in which the student received a passing grade prior to readmission may, at the discretion of the dean, be applied toward the degree.
5. The following statement shall appear on the academic record and transcript of any student granted academic forgiveness: "This student was granted academic forgiveness under the University of South Carolina Academic Forgiveness Program. The GPA has been recalculated using the criteria of this program to allow for eligibility for graduation."
6. The permanent academic record will remain an unmodified record of all work attempted at the University of South Carolina.

**Academic Honors Policies**

**Honor Lists**
Each semester academic achievement is recognized by entering on the President's Honor List or the Dean's Honor List the names of students who, at the end of the previous semester, attained the following standards:

- **President's Honor List**: a grade point average of 4.00 earned on a minimum of 12 credited semester hours.
- **Dean's Honor List**: a grade point average of 3.50 or higher earned on a minimum of 12 credited semester hours.

No course carried on a Pass-Fail basis, by examination, correspondence, or exemption will be counted toward the hours required for either the President's or Dean's Honor List

**Graduation with Honors**
Graduation with honors will be based on a student's Total Institutional GPA. Honors designators are determined at the time of graduation and may not be applied retroactively.

To graduate with such honors, a student must have earned at least 60 credit hours applicable toward the degree in residence at the University, 30 credit hours for an associate degree.

The following designations indicate a consistently high level of academic achievement at UofSC:

- **Baccalaureate Degree Designations**
  - Summa Cum Laude: a cumulative GPA of 3.95-4.00
  - Magna Cum Laude: a cumulative GPA of 3.75-3.949
  - Cum Laude: a cumulative GPA of 3.50-3.749

- **Associate Degree Designations**
  - Highest Honors: a cumulative GPA of 3.95-4.00
  - High Honors: a cumulative GPA of 3.75-3.949
  - Honors: a cumulative GPA of 3.50-3.749

**With Honors from South Carolina Honors College**: Any student who completes the requirements of the Honors College, regardless of the major or undergraduate degree, is awarded that degree "With Honors from South Carolina Honors College."

**With Distinction**: Any student who earns an undergraduate degree and completes the appropriate requirements will be awarded graduation "With Distinction in [that major]." For details, refer to the degree requirements of specific majors.

**With Leadership Distinction**: Any undergraduate student who completes Leadership Distinction requirements in community service, diversity and social advocacy, global learning, professional and civic engagement, and/or research as specified by the Provost's Office, regardless of the major or undergraduate degree, is awarded that degree "With Leadership Distinction in [that track]." For further details, contact the Office of UofSC Connect.

**Degree Conferral and Graduation Policies**

**In-residence Requirement**
The last 25% of a student's degree must be completed in residence at the University, and at least half of the hours in the student's major courses and in the student's minor courses (if applicable) must be taken at the University.

The chart below shows the minimum number of hours required to be completed in residence based on the total number of hours required for a degree.

<table>
<thead>
<tr>

</tbody>
</table>

Some programs impose greater student residence and/or major requirements.

Regardless of when students enter the University, they must complete the last 25% of the degree before graduation enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted. In addition, all degree applicants are urged to confer with the deans of their respective colleges about their programs and degree requirements prior to the beginning of their last semester of residence at the University.

"In residence" means that the student was regularly enrolled at UofSC; completed courses offered by Columbia or one of the other campuses
of the University; was a member of a class which was supervised by a regular faculty member of UofSC; attended classes on a regular, pre-established schedule; and in other ways conformed to the requirements which are normally connotated by the term "in residence." In-residence requirements may not be met by courses for which credit is earned by exemption or exam, courses taken by correspondence, or courses for which transfer credit was awarded. Courses taken under the Pass-Fail option meet in-residence requirements. If the student has not established credit for the prescribed number of hours in residence, then the student is not eligible either for graduation with honors or for graduation on the basis of having completed 25% of the degree during the final semesters at the University.

Application Process
All candidates for degrees and certificates must file formal applications during the last academic term before graduation with the deans of their respective colleges on forms obtained at the Office of the University Registrar or the appropriate dean’s office. Applications must be filed by the third week of the fall or spring semester in which the degree is to be awarded or within the first 10 days of the first summer session. If the student is not enrolled during the first summer session, the application must be filed within the first week of the second summer session for the student to graduate at the summer commencement.

Graduation Requirements
In order to be eligible for graduation, students must meet all course requirements, be in good academic standing, meet any departmental or program requirements, and have a cumulative GPA of at least 2.00 on all work attempted at UofSC.

Second Baccalaureate Degree
At times the University confers a second baccalaureate degree upon candidates who have completed requirements for the second degree.

The following specifications for a second baccalaureate degree apply:

1. The student must meet admission and progression requirements for the second degree, and must have received formal approval to pursue the second degree from both deans.
2. All requirements for the second degree must be fulfilled.
3. The additional requirements for the second degree must include a minimum of 24 semester hours beyond those required for the first degree.
4. No course that satisfies a general education, major, minor, cognate, or requirement other than a free elective for the first degree may be applied to the major field of the second degree.
5. The student must file a separate degree application for the second degree with the appropriate college or school.

Under this policy a student may apply for two degrees at one time or separately. In either case, the student receives two diplomas. It should be noted that a second major does not by itself lead to the conferral of a second degree.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

Second Major
In some degree programs, a student may elect a second major. Normally, second majors are possible only in degree programs with similar general education requirements. The second major option is not available in all colleges.

1. The student must meet admission and progression requirements for the second major.
2. The student must have received approval from both deans for a second major.
3. All requirements for the second major must be fulfilled.
4. All general education and special departmental requirements normally associated with the second major must be fulfilled.
5. In cases where the first major and the second major lead to different degrees, the student must designate one as the official degree of record. A second major eliminates the cognate requirement; however, special departmental requirements normally completed as part of the cognate are not waived.

Fulfillment of the requirements for a second major are indicated on the student’s official transcript upon graduation. No notation for a second major is placed on the official transcript for course work completed after graduation.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

Indebtedness
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

Records, Transcript, and Enrollment Certification Policies
Change of Name or Address
It is the obligation of every student to notify the Office of the University Registrar of any change in name or address (including electronic address). Failure to do so can cause serious delay in the handling of student records and in notification of emergencies. Change of name may only be accomplished by presenting proper legal documentation.

Transcripts
A transcript of a student’s record carries the following information: current status; a detailed statement of the scholastic record showing courses pursued with semester hours carried, semester hours earned, grades, grade points, grade point average, and system of grading; a permanent record of all failures, Incomplete grades, and penalties (such as suspension); cumulative USC grade totals; and references to other college or universities attended, dates attended, and the total transfer credits accepted by the University of South Carolina.

Any student who needs a transcript or a certified copy of the end-of-semester grade report may complete a Transcript Request form or send a signed and dated letter containing all pertinent identifying information to the Office of the University Registrar. Official transcripts may also be requested online through Self Service Carolina (http://my.sc.edu). With the exception of copies made for internal use, no copy of a student’s permanent record (transcript) will be released to anyone without the student’s written consent. In addition to the written consent, each transcript request should include full name or names used, student number, current mailing address, dates of attendance, location of
attendance, and date of birth to assure proper identification of the record requested.

No transcript will be issued to a student who is indebted to the University.

No partial transcript will be issued.

The nonrefundable transcript processing fee is $12.

**Enrollment Certification**

Certification of enrollment is based upon the total number of credit hours for which a student is registered at the time of the certification request. Beginning and ending dates reported in enrollment certification conform to the official USC academic calendar dates for the term requested.

**Indebtedness**

It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

**Notification of Student Rights under FERPA**

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.

   A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

   If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

   A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

   If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the University discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent. The University may disclose Directory Information without consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

   • The University discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, service provider or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

   • A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.

   • To officials of other institutions in which the student seeks or intends to enroll provided that the student had previously requested a release of his/her record;

   • To authorized representatives of the U.S. Department of Education, U.S. Department of Defense (Solomon Amendment), U.S. Attorney General, the Comptroller General of the United States, state education authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations; to the Department of Homeland Security (DHS) and its Immigration and Customs Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.

   • In connection with a student’s application for, and receipt of, financial aid;

   • To comply with a judicial order or lawfully issued subpoena;

   • To parents of dependent students as defined by the Internal Revenue Code, Section 152;

   • To appropriate parties in a health or safety emergency; or

   • To the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.

   • The University may disclose the result of a disciplinary proceeding to a parent or guardian so long as the student is under the age of 21 at the time of the incident and the proceeding has resulted in a violation of University drug or alcohol policies, or any federal, state, or local law.

   • To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.

**Release of Directory Information**

In accordance with section 99.7 of the Family Educational Rights and Privacy Act (FERPA), the University of South Carolina provides students annual notification of their FERPA rights. The University of South Carolina has designated certain items as Directory Information. At the University of South Carolina, these items are as follows:

- To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.
activities is used for planning and program improvement. Many of the 

Students, faculty, and staff play critical roles in the assessment process. 

and evaluating all of our functions and activities. 

therefore, is the ongoing process of self-improvement through analyzing 

and other staff in gathering and analyzing assessment data. Assessment, 

Institutional Planning and Assessment assists the faculty, administration, 

administrators, and staff conduct ongoing assessments. The Office of 

students to the administration of the University. In addition, they serve as 

statewide events. Another responsibility is the planning and execution of 

students to the administration of the University. In addition, they serve as 

dances to cookouts, there is an activity for everyone!

In addition, there are six intercollegiate athletic teams on campus: men's 

baseball, women's softball, men's and women's soccer, men's basketball, 

and women's volleyball. With their varying seasons throughout the school 

year, there is always an athletic event to attend.

Student Government Association

Students are encouraged to become involved in the Student Government 

Association. There are two houses of Student Government: an Allendale 

house and a Walterboro house. A president is elected each spring for 

the following year to preside over both houses jointly. Each spring, each 

house elects a vice president, secretary, treasurer, and parliamentarian 

to serve for the following year. At the beginning of each fall, senators are 

elected for that year for both houses. Students are encouraged to run for 

of the offices or senate seats.

The Student Government Association represents the interests of the 

students to the administration of the University. In addition, they serve as 

student ambassadors for the UofSC Salkehatchie campus at local and 

statewide events. Another responsibility is the planning and execution of 

student activities for both Allendale and Walterboro. Student government 

decides the type of student activities and schedules and conducts 

them. As another responsibility, the Student Government Association
participates in community service activities in the Salkehatchie area such as the March of Dimes, Relay for Life, and other community events.

**Education Majors Club**

The Education Majors Club was founded in fall 2003, and membership is open to any student seeking a degree in education. The purpose of the club is to provide education majors with opportunities for growth and enhancement in the field of education and community service as well as to keep members informed of changes that may occur in program requirements and testing deadlines. The advisor is Buddy Phillips.

**Nursing Club**

A nursing club was organized in the 2008 academic year, and membership is open to any student seeking a degree in nursing. The purpose of the club will be to provide nursing majors with information and community service in the field of nursing as well as to keep members informed of changes that may occur in program requirements and deadlines. The advisor is Cindy McClure.

**History Club**

The History Club is a student run organization. Activities have included discussion, presentations, movies, and trivia as determined and planned by the students. History Club meets about once a month. The advisor is Dr. Sarah Miller.

**Student Centers**

The student centers provide recreational services as well as lounge and study areas where students may eat lunch, study or chat. The West Campus student center is in the Student Center building on Highway 301. The East Campus student center is in the Student Center building adjacent to the Walterboro Main Building.

**Fitness Centers**

Both the West and East Campuses have fitness centers open to faculty, staff and students. The West Campus fitness center is located in the fitness center building between the baseball and softball fields. The East Campus fitness center is located in the Student Center building adjacent to the Walterboro Main Building.

**International Student Organization**

An international student organization was founded to provide support and social activities for international students on the USC Salkehatchie Campus. Besides international students, anyone with an international background or who is interested in international culture is welcome to join. The advisor is Dr. Wei-Kai Lai.

**Fellowship of Christian Athletes**

Fellowship of Christian Athletes has been challenging coaches and athletes on college campuses to use the powerful medium of athletics to impact the world for Jesus Christ. FCA focuses on serving local communities by equipping, empowering and encouraging people to make a difference for Christ. The Campus Ministry is a certified ministry that is comprised by student-athletes, sponsored by coaches, supported by staff, established on our college campuses and meets on a regular basis. The advisor is Jake Williams.

**Intercollegiate Athletics**

The UofSC Salkehatchie campus is a member of the National Junior College Athletic Association and competes in Region X, which includes the states of North Carolina, Virginia, South Carolina, and West Virginia. The Indians field teams in men's baseball, women's softball, men's and women's soccer, men's basketball, and women's volleyball. The advisor is Dr. Wei-Kai Lai. The advisor is Jake Williams.

**Student Housing**

UofSC Salkehatchie does not own any student housing. However, The Reserve at Salkehatchie is a privately owned student housing complex located adjacent to the West Campus in Allendale. Living at The Reserve provides a great opportunity to strengthen your bonds with the Salkehatchie community. It’s also incredibly convenient for accessing campus resources and events. For more information about The Reserve visit their website at reserveatSalk.com (http://reserveatSalk.com).

**Student Academic Responsibility**

Infractions of academic discipline in the undergraduate schools and colleges will be dealt with in accordance with this code of student academic responsibility.

Definitions-Infractions of academic discipline include, but are not limited to:

1. **Cheating**-This refers to conduct during quizzes and examinations which shall include utilizing written information not specifically permitted by the instructor. It shall also include receiving written or oral information from any person other than the instructor. It shall further include stealing, buying, selling, or using any copy of an examination before it has been administered.
2. **Plagiarism**-This refers to submitting, as a student's own work, material obtained from another source without indicating the source from which it was obtained. It further includes letting another person compose or rewrite a student's written assignment.
3. **Illegal Use of Old Laboratory Reports**-This comprises the copying of an old report belonging to another person and submitting the work as one's own.

A student who assists in a form of dishonesty mentioned above shall be considered equally as guilty as the student who accepted such assistance.

A student who possesses evidence that one of the offenses listed above has been committed and who does not report the offense to the appropriate authority shall be considered guilty of an infraction of academic discipline.

Enforcement of Student Academic Responsibility-Students who have committed infractions of the student academic responsibility principle will be heard before the Academic Affairs Committee.

Reporting Procedures-Infractions of academic discipline may be reported in writing to the chair or any member of the committee by the student.
committing the infraction, any student observing the infraction, or the faculty member observing the infraction.

It shall be the duty of any member to whom report of an infraction has been made to submit the same in writing to the chair of the committee as soon as possible.

Hearing Procedures:

1. Committee-
   a. The Academic Affairs Committee shall conduct hearings when circumstances warrant such action and determine appropriate penalties.
   b. The chair shall be responsible for conducting the hearing, insuring that proper records are kept, informing the accused of the decision, and reporting the decision to the dean and to the associate dean whose responsibility it shall be to insure that proper record notations are made.
   c. The student charged with infractions will be sent written notice, by the chair, of the charges against at least seven days before the time scheduled for the hearing. This notice will include the specific charges; the time and place of the hearing; notice of rights to bring witnesses, question witnesses, and have representation, if desired; notice of the right to appeal to the dean, the president of the University and then the Board of Trustees in that order.

2. Hearing-
   a. The accused will be present for all testimony, be permitted to bring witnesses, to question the witnesses against, and to make any statement desired bearing on the matter being discussed.
   b. The decision as to guilt (unless admitted) and the penalty will be made in closed session and then the accused will be informed by the committee in open session of its decision.
   c. All hearing proceedings will be kept confidential.

3. Post-Hearing-
   a. The chair will inform the dean and the associate dean of the penalty imposed whenever a student has been found guilty.
   b. The associate dean will be responsible for notifying the student in writing of the decision of the committee, informing the appropriate administrative officials, and for making the proper record entries and taking the appropriate action on the penalty.

Penalties-The following action may be taken against a student who is found guilty of an infraction of academic discipline for the first time:

1. Warning-not entered on permanent academic record
2. Probation-entered on permanent academic record
3. Recommendation to professor that F be awarded in course.

In serious cases even a first offender may be suspended. A student guilty of an infraction of academic responsibility for a second time, shall, except in extraordinary cases, be suspended from the University.

Note: A student who has violated or who has been charged with the violation of any regulation of the University may not be permitted to withdraw from the University without the permission of the chair of the committee. A notation of the circumstances under which the accused student was permitted to withdraw shall be entered in the minutes of the committee. The withdrawal of a student with or without such approval shall not deprive the committee of the power to hear charges, and in the event the student be found guilty, the committee may restrict readmission on such terms or under such circumstances as it may prescribe.

Student Responsibility-

1. Each student is responsible for abiding by the Code of Student Academic Responsibility at all times. In the classroom, it applies in all academic activities, whether a faculty member is involved or not.
2. Any student who observes or learns of another student's violation of the Code of Student Academic Responsibility may request the student to report to the instructor of the course, and if this is not done, shall report the matter to the instructor of the course or the chair of the Academic Affairs Committee.

Faculty Responsibility-Each faculty member also has responsibilities with respect to this code. These responsibilities include, but are not limited to:

1. The promotion of conduct conducive to the effective functioning of the code. Primarily, the faculty member should conduct classes and examinations in such manner as to minimize opportunities and temptations for cheating.
2. A clear exposition to students of the values as well as the obligation of the code.
3. A demonstration of interest in the proper functioning of the code.
4. The use of uniform procedures in handling violations of the code, including the submission of all violations to the Committee on Student Responsibility.

Additional Rules-The committee shall make such additional rules as are necessary, so long as they do not contravene any of the provisions of this code, to carry out its function, with the approval of the University-wide committee.

Student Rights and Freedoms

The statement of student rights and responsibilities has been approved by the Board of Trustees of the University.

General Understanding

1. The statement in no way intends to abrogate the legal powers invested in the Board of Trustees under American corporate law and the laws of the State of South Carolina.
2. The statement is recognized as a statement of principles only and that the interpretation of these statements, principles, and procedures is a continuing joint process.
3. The statement is clearly understood as not giving complete autonomy to any sector of the academic community but promotes a community approach to those problems which are of proper concern to the University as a whole.

Preamble

Academic institutions exist for the transmission of knowledge, the pursuit of truth, the development of students and the general well-being of society. Free inquiry and free expression are indispensable to the attainment of these goals. As members of the academic community, students should be encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search for truth. Institutional procedures for achieving these purposes may vary from campus to campus, but the minimal standards of academic freedom of students outlined below are essential to any community of scholars.

Freedom to teach and freedom to learn are inseparable facets of academic freedom. The freedom to learn depends upon appropriate
opportunities and conditions in the classroom, on the campus and in the larger community. Students should exercise their freedom with responsibility.

The responsibility to secure and to respect general conditions conducive to the freedom to learn is shared by all members of the academic community. The University has a duty to develop policies and procedures which provide and safeguard this freedom. Such policies and procedures should be developed within the framework of general standards with the broadest possible participation of the members of the academic community. The purpose of this statement is to enumerate the essential provisions for student freedom to learn.

Section I: Freedom of Access to Higher Education

The admission policies of the University are a matter of institutional choice provided that the University makes clear the characteristics and expectations of the students which it considers relevant to success in the institutional program. Under no circumstances should a student be barred from admission on the basis of race, creed, or national origin. Thus, within the limits of its facilities, the University should be open to all students who are qualified according to its admission standards.

Section II: In the Classroom

The professor in the classroom and in conference should encourage free discussion, inquiry, and expression. Student performances should be evaluated solely on an academic basis, not on opinions or conduct in matters unrelated to academic standards.

1. Protection of freedom of expression-Students should be free to take reasoned exceptions to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study for which they are enrolled.
2. Protection against improper disclosure-Information about student views, beliefs, and political associations which professors acquire in the course of their work as instructors, advisors, and counselors should be considered confidential. Protection against improper disclosure is a serious professional obligation. Judgments of ability and character may be provided under appropriate circumstances, normally with the knowledge and consent of the student.

Section III: Student Records

The University should have a carefully considered policy as to the information which should be part of a student’s permanent record and as to the conditions of its disclosure. To minimize the risk of improper disclosure, academic and disciplinary records should be separate, and the conditions of access to each should be set forth in an explicit policy statement. Final transcripts or academic records should contain only information about academic status. Information from disciplinary files should not be available to unauthorized persons on campus, or to any person off campus without the express consent of the student involved except under legal compulsion or for security clearance. No permanent records should be kept which reflect the political activities or beliefs of students. Administrative staff and faculty members should respect as confidential such information which they acquire in the course of their work. Counseling files should not be available to any person without the consent of the student except under legal compulsion. Authorized counselors should not, without the consent of the student, disclose any information obtained while counseling any student unless failure to disclose the information may result in physical or emotional harm to the student or others.

Section IV: Student Affairs

In student affairs certain standards must be maintained if the academic freedom of students is to be preserved.

1. Student organizations-Students bring to the campus a variety of interests previously acquired and develop many new interests as members of the academic community. They should be free to organize and join associations to promote their common interests.
   a. Affiliation with an extramural organization should not disqualify recognition of a student organization.
   b. Each organization should be free to choose its own campus advisor. Members of the faculty serve the college community when they accept the responsibility to advise and consult with student organizations; they should not have the authority to control the policy of such organizations.
   c. Student organizations may be required to submit a statement of purpose, criteria for membership, rules of procedures, and a current list of officers. They should not be required to submit a membership list as a condition of institutional recognition other than an initial list of members on formation of an organization.
   d. Campus organizations, including those affiliated with an extramural organization, should be open to all students without respect to race, creed, or national origin.
   e. The membership, policies and actions of a student organization usually will be determined by vote of only those persons who hold bona fide status in the University community.

2. Freedom of inquiry and expression
   a. Students and student organizations should be free to examine and to discuss all questions of interest to them and to express opinions publicly and privately. They should be free to support causes by lawful and orderly means which do not disrupt the regular and essential operation of the institution and which do not interfere with the rights of others. At the same time, it should be made clear to the academic and larger community that sponsorship of guest speakers does not necessarily imply approval or endorsement of the views expressed, either by the sponsoring group or the institution.
   b. Students should be allowed to invite and to hear any person of their own choosing subject to those routine procedures provided for off-campus speakers. These procedures should be designed only to insure that there is orderly scheduling of facilities and adequate preparation for the event, that the occasion is conducted in a manner appropriate to an academic community, and that the safety of individuals, the University, and the community are not endangered. While the University is properly concerned with the prevention of unlawful conduct, the institutional control of campus facilities should not be used as a device of censorship of ideas. It should be made clear to the academic and large community that sponsorship of guest speakers does not necessarily imply approval or endorsement of the views expressed, either by the sponsoring group or the institution.

3. Student participation in institutional government-As constituents of the academic community, students should be free, individually and collectively, to express their views on issues of general interest to the student body. The student body should have clearly defined means to participate in the formulation and application of institutional policy affecting academic and student affairs. The role of the student government and both its general and specific responsibilities should be made explicit, and the student government within the areas of its jurisdiction should be reviewed only through orderly and
prescribed procedures. The University should provide sufficient governing freedom and sufficient financial autonomy for the student government to maintain its integrity of purpose as elected representatives of the student body.

4. Student publications-Student publications and the student press are a valuable aid in establishing and maintaining an atmosphere of free and responsible discussion and of intellectual exploration on the campus. They are means of bringing student concerns to the attention of the faculty and the institutional authorities and of formulating student opinions on various issues on the campus and in the world at large.

In the delegation of editorial responsibility to students the University must provide sufficient editorial freedom and sufficient financial autonomy for the student publications to maintain their integrity of purpose as vehicles for free inquiry and free expression in an academic community.

Institutional authorities, in consultation with students and faculty, have a responsibility to provide written clarification of the role of the student publications, the standards to be used in their evaluation, and the limitations on external control of their operation. At the same time, the editorial freedom of student editors and managers entails corollary responsibilities to be governed by the canons of responsible journalism, such as the avoidance of libel, indecency, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo. As safeguards for the editorial freedom of student publications, the following provisions are necessary:

1. The student press should be free of censorship and advance approval of copy, and its editors and managers should be free to develop their own editorial policies and news coverage.

2. Editors and managers of student publications should be protected from arbitrary suspension and removal because of student, faculty, administrative, or public disapproval of editorial policy or content. Only for proper and stated causes should editors and managers be subject to removal and then by orderly and prescribed procedures. The agency responsible for appointment of editors and managers should be the agency responsible for their removal.

3. All University published and financed student publications should explicitly state on the editorial page that the opinions there expressed are not necessarily those of the University or the student body.

Section V: Off-Campus Freedom of Students

1. University students are both citizens and members of the academic community. As citizens, students should enjoy the same freedom of speech, peaceful assembly, and right of petition that other citizens enjoy, and, as members of the academic community, they are subject to the obligations which accrue to them by virtue of this membership. Faculty members and administrative officials should insure that institutional powers are not employed to inhibit such intellectual and personal development of students as is often promoted by their exercise of the rights of citizenship both on and off campus.

2. Activities of students may upon occasion result in violation of law. Students who violate the law may incur penalties prescribed by civil authorities, but institutional authority should never be used merely to duplicate the function of general laws. Only when the institution's interests as an academic community are distinct and clearly involved should the special authority of the institution be asserted. The student who incidentally violates institutional regulations in the course of off-campus activity, such as those relating to class attendance, should be subject to no great penalty than would normally be imposed. Institutional action should be independent of community pressure.

Section VI: Procedural Standards in Disciplinary Proceedings

Educational institutions have a duty and the corollary disciplinary powers to protect their educational purpose through the setting of standards of scholarship and conduct for the students who attend them and through the regulation of the use of institutional facilities. In developing responsible student conduct, disciplinary proceedings play a role substantially secondary to counseling, guidance and admonition. In the exceptional circumstances when these preferred means fail to resolve problems of student conduct, proper procedural safeguards should be observed the protect the student from unfair imposition of serious penalties. The following are set forth as proper safeguards in such proceedings:

1. Standards of conduct expected of students-The institution has an obligation to clarify those standards of behavior which it considers essential to its educational mission and its community life. These general behavioral expectations and the resultant specific regulations should represent a reasonable regulation of student conduct, but the student should be as free as possible from imposed limitations that have no direct relevance to their education. Offenses should be as clearly defined as possible and interpreted in a manner consistent with the aforementioned principles of relevancy and reasonableness. Disciplinary proceedings should be instituted only for violations of standards of conduct formulated with significant student participation and published in advance through such means as a student handbook or a generally available body of institutional regulations.

a. Except under circumstances where delay may create a risk of harm to property or students, premises occupied by students and the personal possessions of students should not be searched unless appropriate authorization has been obtained. For premises such as residence halls controlled by the institution, an appropriate and responsible official should be designated to whom application should be made before a search other than a routine inspection is to be conducted. During routine inspections only items in plain sight can be seized and used as evidence. Any application to search should specify the reasons for the search and the object or information sought. The official should keep an accurate record including the time, date and reason for the search. The student should be present, if possible, during the search. For premises not controlled by the institution, the ordinary requirements for lawful search should be followed.

b. Students detected or arrested for allegedly committing serious violations of institutional regulations, or infractions of ordinary law, should be informed of their rights. While interrogation may be conducted, no form of harassment should be used by institutional representatives to coerce admission of guilt or information about conduct of other suspected persons.

c. Pending action on the charges, the status of a student should not be altered, or the right to be present on the campus and to attend classes suspended except where the administration determines such action is necessary for the student's physical or emotional safety and well-being, or for the safety of students, faculty, or University property.

2. The formality of the procedure to which a student is entitled in disciplinary cases should be proportionate to the gravity of the offense and the sanctions which may be imposed. Matters involving
minor infractions of the University regulations where suspension is not contemplated may be handled by the administration in an informal manner. Where misconduct may result in suspension, the student should have the right to a hearing before the Student Discipline Committee.

3. The Student Discipline Committee-
   a. The committee should include faculty members and student members. No member of the committee who is otherwise interested in the case should sit in judgment during the proceedings.
   b. The student should be informed, in writing, of the reasons for the proposed disciplinary action with sufficient particularity and in sufficient time, to ensure opportunity to prepare for the hearing.
   c. The student appearing before the committee should have the right to be assisted in defense by an advisor of choice.
   d. The burden of proof should rest upon the officials bringing the charge.
   e. The student should be given the opportunity to testify and to present evidence and witnesses. The student should have an opportunity to hear and question adverse witnesses. In no case should the committee consider statements against the student unless the student has been advised of their content and of the names of those who made them, and unless the student has been given an opportunity to refute unfavorable inferences which might otherwise be drawn.
   f. All matters upon which the decision may be based must be introduced into evidence at the proceeding before the committee. The decision should be based solely upon such matters. Improperly acquired evidence should not be admitted.
   g. There should be, where possible, a verbatim record, such as a tape recording, of the hearing.
   h. In the event that the student is disciplined other than by the regularly constituted Student Discipline Committee, the student shall have the right to a complete hearing before the committee. The decision of the committee shall be final, subject to the student’s right of appeal to the president of the University and to the Board of Trustees of the University.

Code of Student Conduct

Introduction
This chapter extends and applies the general principles of the Statement of Student Rights and Freedoms to specific actions and responsibilities of students at the University of South Carolina Salkehatchie. It accepts the proposition that “academic institutions exist for the transmission of knowledge, the pursuit of truth, the development of students, and the general well-being of society,” and that “free inquiry and free expression are indispensable to the attainment of these goals.” This chapter establishes rules, regulations, policies and disciplinary guidelines under the duty and corollary powers inherent in educational institutions to protect their educational purposes through the setting of standards of student conduct and scholarship and through the regulation of the use of University facilities.

Students have a right to expect enforcement of these rules and regulations. The University also has a right to expect students to abide by them as befits the responsibilities lodged in students as members of the University community. Knowledge of these rules and regulations can prove most beneficial to students in utilizing and protecting their guarded rights. It is important to add, however, that unfamiliarity with institutional regulations or rules is no grounds for excusing infractions.

Application of Laws
1. Students should be aware that educational institutions are not sanctuaries from the reach of the civil and criminal laws of the communities and states wherein such institutions exist. While the rules and regulations of the University of South Carolina Salkehatchie are not meant to duplicate general laws, there are some respects in which the lawful interests of the institution as an academic community coincide with the broader public interests treated in general laws. Students who commit offenses against the laws of municipalities, states, or the United States, are subject to prosecution by those authorities as well as liable for disciplinary action under University rules when their conduct violates institutional standards.

2. Students, no less than other citizens, are entitled to be secure in their persons, lodging, papers and effects against unreasonable searches and seizures. This does not prohibit normal inspections of University housing or other facilities for maintenance, health, or safety purposes. Nor does it preclude searches and seizures properly authorized by administrators in emergency situations where the welfare and safety of persons or property is involved. Approval for such procedures will be granted in strict accord with required legal standards. Searches and seizures by outside law enforcement personnel incident to investigations or arrests are conducted only under proper warrant and are not the responsibility of the University.

3. Students enjoy the same freedoms of speech and peaceable assembly that accrue to other citizens, but students are under certain legal obligations in the exercise of these freedoms by virtue of their membership in the University community. Expression may be subjected to reasonable regulations of time, place, number of persons, and form under established regulations. Expression in the form of action which materially interferes with the normal activities of the rights of free speech and assembly and will invoke appropriate legal and disciplinary sanctions when necessary in pursuit of this goal.

4. Students who are apprehended and charged by law enforcement agencies with criminal conduct on or off campus may not continue as students without approval by the Academic Affairs Committee or in certain cases, approval by the dean. Students under such charges are required to keep the University informed of their trial status.

General Conduct Regulations
1. Introduction
Responsibility for good conduct rests with students as individuals. All members of the academic community are expected to use reasonable judgment in their daily campus life and to show due concern for the welfare and rights of others. When breaches of good conduct occur, they are considered jointly by students, faculty, and administrators on the Student Discipline Committee. Responsibility for maintaining discipline is vested in the dean; under him, administration of the system for handling misconduct is the duty of the associate dean for student services.

2. Conduct Rules
The following statements constitute the official record of all general conduct rules and regulations at the University of South Carolina Salkehatchie. Students are expected to abide by these rules and administrators are required to enforce them. (Note: Additional rules and regulations may be promulgated during the year; when this happens, announcements will be made upon adoption of the changes or additions.)
a. Damage to Property
Acts of vandalism such as damage to or destruction of property owned or controlled by the University or its members is prohibited.

b. Firearms and Other Deadly Weapons
The unauthorized possession or use, in any way, of firearms or weapons of any kind, such as dirks, slingshots, metal knuckles, razors, or any other deadly weapons, is prohibited.

c. Flammable Materials and Fireworks
The possession, ignition or detonation of any object or article which could cause damage by fire or other means to person or property, or possession of any substance which could be considered fireworks, is prohibited on any property owned or operated by the University.

d. Arson
No person shall start a fire or be in any way responsible for starting a fire on University property without authorization.

e. False Fire Alarms and Misuse of Fire Equipment
No person shall make, or cause to be made, a false fire alarm. No person shall tamper with fire safety equipment.

f. Theft or Misappropriation
Theft of any kind, including seizing, receiving or concealing property with knowledge that it has been stolen, is forbidden. Sale or possession of any property, including USC Salkehatchie property, without owner's permission is also prohibited.

g. Disorderly Conduct
Individual or group behavior which unnecessarily disturbs individuals or groups is prohibited. Such conduct includes (but is not necessarily limited to) physical assault or threat of assault, hazing, and boisterous conduct which is unreasonable for the area in which it occurs.

h. Sale of Textbooks
The sale by any student of a textbook that does not belong to them is prohibited unless they have prior written authorization from the owner of the book. (Books which are found should be turned in to the Lost and Found department in the Dean's Office.)

i. Forgery
Forgery and the alteration or misuse of University documents or records are forbidden.

j. Keys
No one may use or have in their possession any University key without proper authorization. No student is allowed under any conditions to have a University key duplicated.

k. Misuse of Telephone
No student shall abuse telephone privileges.

l. Disruption of Normal Activity
No one may interfere with or disrupt the normal activity and operations of students, faculty, administrations or staff of this institution or its buildings or facilities. Any form of expression which materially interferes with such activities and operations or invades the rights of persons may be proscribed or prohibited.

Note: To remain in the vicinity of activity which threatens to disrupt or is disrupting normal University functions may have serious legal and disciplinary implications. Bystanders as well as more active participants may be charged with jointly engaging in an enterprise which is prohibited by law. Students should accordingly avoid the scene of any disruption or potential disruption. In any case, failure to leave when asked to disperse by University or law enforcement officials will result in disciplinary and/or legal action.

Note: In any case where students or employees of the University of South Carolina Salkehatchie are involved in action which is disruptive of the normal activities of the institution or its personnel, or which exceeds the bounds of normal internal discipline in its impact, the Board of Trustees may exercise its right to name a special hearing board, committee, or officer to investigate the questioned action and to initiate appropriate disciplinary or other measures.

m. Drugs
Possession, except on a physician's or dentist's prescription, of stimulant, depressant, narcotic, or hallucinogenic drugs and other agents having potential for abuse violates University rules and is prohibited. The selling, bartering, exchanging, and giving away of such drugs to any person not intended to possess them is also prohibited.

Note: The University always stands ready to do everything within its power to help any students who want help in breaking an involvement with drugs. See also the University policy below.

n. Alcohol Policy
i. It is the policy of this campus of the University of South Carolina that alcohol (beer, wine, distilled spirits) will not be included in any student activity, i.e., club events, student government activities, or athletics and field events, whether on or off the immediate campus.

ii. Beer or wine or distilled spirits may not be carried in a state vehicle.

iii. Special events that relate to the greater community such as luncheons, support gatherings, theater events, shall be exempt from the above listed policies upon the approval of the dean of the campus. However, monitoring of those attending who drink must be assured to make sure all South Carolina state laws are followed. No one under the age of 21 shall be served alcohol at any event.

iv. For special events, those beverages included may not be sold; however, a "contribution" may be taken at the point of delivery.

Carolinian Creed
The community of scholars at the University of South Carolina is dedicated to personal and academic excellence.

Choosing to join the community obligates each member to a code of civilized behavior.

As a Carolinian...

I will practice personal and academic integrity;
I will respect the dignity of all persons;
I will respect the rights and property of others;
I will discourage bigotry, while striving to learn from differences in people, ideas and opinions;
I will demonstrate concern for others, their feelings, and their need for conditions which support their work and development.

Allegiance to these ideals requires each Carolinian to refrain from and discourage behaviors which threaten the freedom and respect every individual deserves.
University Smoking Policy

The University of South Carolina is deeply committed to the well-being of our students, faculty, staff and visitors. To provide a safe, healthy environment in which our community can flourish, and in accordance with the university's commitment to public health and sustainability, the University of South Carolina Salkehatchie will be a completely tobacco-free campus. This policy expands the tobacco-free policy to cover all university property. The intent of this policy is to create an environment that is conducive to quitting tobacco, promoting the prevention of tobacco use and preventing the risks associated with exposure to secondhand smoke. This will be a cultural change within the university campus and will be supported by ongoing communications and cessation programs for those who desire to quit or abstain from tobacco. Enforcement for the policy is the responsibility of each member of the Salkehatchie community. Faculty, staff and students are expected to enforce the policy for their facilities and/or sponsored activities.

1. Covered Individuals
   The provisions of this policy apply 24 hours a day, seven days a week to all students, faculty, staff, visitors, volunteers, contractors and vendors.

2. Definitions
   a. “Tobacco and smoking products” include all tobacco-derived or containing products, including but not limited to cigarettes (i.e. clove, bidis, kreteks), electronic cigarettes, cigars and cigarillos, pipes, water pipes, smokeless tobacco products or substitutions (spit and spit less, chew, pouches, snuff) or any other device intended to simulate smoked tobacco. This does not apply to nicotine replacement therapy, which is designed to assist tobacco users to quit tobacco.
   b. “University property” includes all buildings, facilities, grounds and spaces leased, owned or controlled by the University of South Carolina Salkehatchie Campus, whether or not signs are posted. This includes, but is not limited to, buildings on university-owned land, offices, classrooms, laboratories, elevators, stairwells, walkways, decks, restrooms, sidewalks, parking areas/lots, meeting rooms, hallways, outdoor passageways and entrances, lobbies, common areas and athletic venues.

3. Use of Tobacco Products
   a. The use of tobacco products is prohibited on university property. No ashtrays, receptacles or smoking shelters will be permitted.
   b. The use of tobacco products is prohibited in university-owned, operated or leased vehicles.
   c. The university discourages the use of tobacco products by all covered individuals on properties adjacent to the campus.

4. Support of Tobacco Products
   a. All tobacco industry promotions and marketing activities are prohibited on university property.
   b. The sale of tobacco products and tobacco-related merchandise (including logo items) is prohibited on all university property and at university-sponsored events, regardless of the operating vendor.
   c. The distribution or sampling of tobacco and associated products is prohibited on all university property and at university-sponsored events, regardless of the venue.
   d. Tobacco industry and related company sponsorship of athletic events is prohibited.

5. Communication of Policy

This policy will be communicated to the campus community as follows:

a. News and information will be posted on the Tobacco-Free UoSC website (http://uscsalkehatchie.sc.edu/).

b. References to this policy will be added to student handbooks, orientation communications and other publications as appropriate.

c. Communication tips for community members to use in helping to enforce the policy will be available at the Tobacco-Free UoSC website (http://uscsalkehatchie.sc.edu/).

d. “Tobacco-Free” signs will be posted throughout the university. Each building will display a “Tobacco-Free” decal and additional signs as appropriate.

6. Tobacco Cessation Resources

The university will offer resources and support to assist those tobacco users who desire to quit or abstain from using tobacco. Tobacco cessation resources and programs will be promoted or offered for university students, faculty and staff. Many of these programs are offered at little or no cost. Referrals may be made to the Quit4Life program through the state health plan at 1-866-QUIT.4.LIFE (866-784-8454) and Deer Oaks Employee Assistance Program at 1-866-327-2400 for faculty/staff. Students may be directed to the state quit line - 1-800-QUIT-NOW (784-8669). Additional resources are outlined on the Tobacco-Free UoSC website (http://uscsalkehatchie.sc.edu/).

7. Enforcement and Compliance

a. The university will provide Tobacco-Free Campus Policy information cards to facilitate education about and enforcement of the policy.

b. Enforcement for the policy is the responsibility of each member of the Salkehatchie community. Faculty, staff and volunteers are expected to enforce the policy for their facilities and/or sponsored activities. Each individual should assume leadership roles by adhering to the policy provisions and by reminding others who aren’t in compliance of the policy provisions.

c. In the event a community member does not respond to a reminder, UoSC faculty, staff, students and volunteers will assist in the enforcement of this policy by reporting repeated violations to the appropriate body, as described in the provisions below.

i. Students - Complaints regarding students will be directed to and handled by the Dean of Students.

ii. Faculty - Complaints regarding faculty will be directed to the appropriate department head.

iii. Staff - Complaints regarding staff will be directed to and handled by the immediate supervisor in accordance with Human Resources practices HR 1.39

iv. Volunteers, Visitors and Affiliates - Complaints about volunteers and visitors may be addressed by any university official. Repeated violations may be handled by Campus Security. Complaints about affiliates will be directed to and addressed by their sponsoring departments in accordance with appropriate policies and practices.

v. Contractors and Vendors - Complaints regarding contractors and vendors will be addressed by Campus Security. Failure by contractors/vendors or their employees to comply with the
provisions of this policy could result in the termination of the contract.

University Drug Policy

The relationship of a university to its students is one which has as one of its basic purposes the creation of an environment conducive to the pursuit and dissemination of knowledge. A portion of this relationship involves the interaction between the student’s personal welfare and academic achievement. Since there are numerous means by which the use and abuse of drugs may adversely affect this relationship, it is incumbent upon the University to issue to all members of its community a clear statement of its policy concerning drugs.

The University’s primary obligation in dealing with the drug problem is to educate the academic community. A full and comprehensive educational program should be offered including formal and informal courses, lectures and discussions which cover drugs and drug problems. It is considered most important that students also receive up-to-date and accurate information about drug laws and medical findings. The University should also conduct research and offer its expertise as a public service in drug matters.

Another responsibility is to promote an atmosphere where students who have a problem with drug abuse can feel free to seek help. Students must feel that they can obtain help without fear of legal reprisal and in order to accomplish this, the University will consider situations where a student initiates the contact as completely confidential. In accordance with state law, students may now receive counseling and advice, legally sanctioned as confidential, from the Counseling Office.

The University must maintain its primary function as a center of learning. At the same time, it must be clear that local, state, and federal laws apply equally on campus as well as off campus.

Grievance Policy

Preface

The University of South Carolina is committed to a policy of treating all members of the University community fairly in regard to their personal and professional concerns. In order to ensure that students know what to do when they need to resolve a problem, this procedure is provided.

Purpose

The primary objective of the student grievance procedure is to ensure that concerns are promptly dealt with and resolutions reached in a fair and just manner. It is essential that each student be given an adequate opportunity to bring complaints and problems to the attention of the University administration with the assurance that each will be given fair treatment.

Definition

A grievance is defined as dissatisfaction occurring when a student feels that any condition affecting him or her is unjust, inequitable, or creates unnecessary hardship. Such grievances include, but are not limited to the following: mistreatment by any University employee; wrongful assessment of processing of fees, records, and registration errors; racial discrimination in student employment.

Procedure

Initiating a Grievance-
on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person's college education. A dependent person's residency is based upon the residency of the person upon whom they are dependent.

"Domicile" is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

"Family's Domicile in this State is Terminated" is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

"Full time employment" is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

"Guardian" is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

"Immediately Prior" is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

"Independent Person" is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

"Minor" is defined as a person who has not attained the age of eighteen years. An "emancipated minor" shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

"Non-resident Alien" is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status "non-resident aliens" generally do not have the capacity to establish domicile in South Carolina.

"Parent" is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

"Reside" is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

"Resident" for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

"Spouse" is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

"Temporary Absence" is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

"Terminal Leave" is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

"United States Armed Forces" is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

"Trust" is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents

Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled "Establishing the Requisite Intent to Become a South Carolina Domiciliary." The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person's support and claims or, only in the case of those individuals who...
are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

**Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents**

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

**Establishing the Requisite Intent to Become a South Carolina Domiciliary**

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver's license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver's license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

**Maintaining Residence**

A person's temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person's absence from the State. The burden is on the person to show retention of South Carolina residence during the person's absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver's license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

**Effect of Change of Residency**

Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family's domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for
classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

**Effect of Marriage**

In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

**Exceptions**

Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class for which payment of in state tuition and fees is requested.

The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. "Military Personnel and their Dependents": Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month "physical presence" requirement for them or their dependents to qualify to pay in state tuition and fees.

2. "Facultly and Administrative Employees with Full Time Employment and their Dependents": Full time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. "Residents with Full Time Employment and their Dependents": Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled ("Establishing the Requisite Intent to Become a South Carolina Domiciliary").

4. “Retired Persons and their Dependents.” Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

**Application for Change of Resident Status**

Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

**Incorrect Classification**

Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

**Inquiries and Appeals**

Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-4060

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person's situation and a statement which specifies the residency provision under which the person feels he or she qualifies to
pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

**Academic Fees**

**Application Fees**

Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls.

**Matriculation Fee**

A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $500 matriculation fee.

**Technology Fee**

All students enrolled on campus are charged a technology fee per semester of $196 for full-time students and $15 per credit hour for part-time students.

**Laboratory Fee**

A lab fee for all courses with laboratories is charged in the amount of $40 per lab for science laboratories and $60 per lab for MATH 141 Calculus I and MATH 142 Calculus II.

**Examination Fees**

$30 Achievement Test. (ACT) May be taken once only.

$15 Challenge Examination. This test is used to establish undergraduate college credit without class attendance or to validate credits from a nonregionally accredited college. Per semester hour.

**Fall and Spring Semester Academic Fees**

Current Academic Fees may be found at uscsalkehatchie.sc.edu (http://uscsalkehatchie.sc.edu).

**Cross-Campus Enrolled Students**

Courses originating from other UofSC campuses are made available to students enrolled at UofSC Salkehatchie. Students who enroll in courses originating from more than one campus pay fees based upon the originating campus’s fee schedule. Refer to the originating campus’s Master Schedule of Classes to determine fees.

**Free Tuition**

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the code are reproduced below. Please note that these laws include free tuition only. Other academic fees and mandatory fees are still the responsibility of the student.

   a. A child of a wartime veteran, upon application to and approval by the South Carolina Department of Veterans Affairs, may be admitted to any state-supported college, university, or post high school technical education institution free of tuition so long as his work and conduct are satisfactory to the governing body of the institution, if the veteran was a resident of this state at the time of entry into service and during service or has been a resident of this state for at least one year and still resides in this state or, if the veteran is deceased, resided in this state for one year before his death, and provided the veteran served honorably in a branch of the military service of the United States during a war period, as those periods are defined by Section 101 of Title 38 of the United States Code and:
      i. was killed in action
      ii. died from other causes while in the service
      iii. died of disease or disability resulting from service
      iv. was a prisoner of war as defined by Congress or Presidential proclamation during such war period
      v. is permanently and totally disabled, as determined by the Veterans Administration from any cause
      vi. has been awarded the Congressional Medal of Honor
      vii. is missing in action, or
      viii. the applicant is the child of a deceased veteran who qualified under item (4) and (5).

b. The provisions of this section apply to a child of a veteran who meets the residency requirements of Chapter 112 of this title, is 26 years of age or younger, and is pursuing any type of undergraduate degree.

2. **S.C. Code Ann. § 59-111-110 (Law Co-op. 1976)** No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty on or after July 1, 1964.

3. **S.C. Code Ann. § 59-111-10 (Law Co-op. 1976)** The first-place winner of the essay contest sponsored by the Governor’s Committee on the Employment of the Physically Handicapped, provided that he is qualified and in financial need, may receive a four-year scholarship. This scholarship may be cancelled if the recipient fails to maintain general scholastic and conduct standards established by the University.

4. **S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984)** Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or noncredit purposes on a space available basis without the required payment of tuition if these persons do not receive compensation as full-time employees.

**Refund Policy**

1. **Policy**
   The University will refund a part of academic fees in certain cases:
   a. Changes in a student’s status, which may require a refund.
      i. Change in a full-time student’s schedule, which results in reclassification to part-time status
      ii. Change in a part-time student’s schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Drop/Withdrawal from the University
      iii. Cancellation of a class by the University

2. **Procedure**
Refund Schedules

Refund Requests
All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

b. Determining the Refundable Portion Procedure
Student refunds for tuition are calculated based on the student's liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered, plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

c. Drop/Withdrawal Refund Policies
Standard Refund Policy For Dropping/Withdrawal From The University:
All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar's Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
i. 100 percent if the student's official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
ii. 70 percent if the student's official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
iii. 50 percent if the student's official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
iv. 20 percent if the student's official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

d. Refund Schedules
Refund schedules are relocated under the important deadlines on the Registrar's website (http://registrar.sc.edu/).

e. Return of Title IV Funds
Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University
i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.

ii. Title IV Refund Distribution
1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
   • Unsubsidized Federal Stafford
   • Subsidized Federal Stafford
   • Federal Perkins
   • Federal PLUS Loan
   • Federal Pell Grant
   • Federal Supplemental Education Opportunity Grant
   • Federal TEACH Grant
   • Federal Iraq/Afghanistan Service Grant
2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.
3. Exit interviews (http://www.sc.edu/financialaid/loan_counseling/default.html) are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

f. Appeals Process
A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal.
The Withdrawal Refund Appeals Committee reviews and act on all appeals. Address appeals to:
Withdrawal Refund Appeals Committee
(Columbia Campus Only)
Office of the Registrar
University of South Carolina
Columbia, SC 29208
803-777-5555

Withdrawal Refunds

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should
follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student's withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

**University Withdrawal Refund Appeal Procedures**

The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University’s published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Business Office and will be considered only in written form. A standardized appeal form must be submitted.
2. All requests for appeal must be submitted directly by the student through the Business Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official’s advice, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.
3. The appeal must be initiated during the semester for which the refund is requested.
4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.
5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.
6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.
7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Business Office.

**Financial Aid and Scholarships**

The financial aid programs of the University of South Carolina Salkehatchie make it possible for many students to attend the University who could not do so if left entirely to their own resources. Scholarships, grants, loans, and part-time employment are available to qualified undergraduate students.

Eligibility for most types of aid except academic scholarships depends on the applicant's financial circumstances. The University uses the Free Application for Federal Student Aid (FAFSA) to determine the amount of assistance each applicant is eligible to receive. We recommend that you complete the FAFSA via the Web at www.fafsa.ed.gov (http://www.fafsa.ed.gov); however, paper applications may still be obtained from most high-school guidance offices or any financial aid office.

**General Guidelines for Financial Aid**

1. The student should have applied and been accepted for admission to UofSC Salkehatchie as a regular student working toward a degree.
2. The student must have a high-school diploma or a General Education Development (GED) certificate.
3. Each applicant should complete the Free Application for Federal Student Aid (FAFSA) indicating the University of South Carolina Salkehatchie as the school of attendance (Title IV code: 003426).
4. A Student Aid Report (SAR) will be sent from the U.S. Department of Education to the student.
5. If corrections are necessary, the corrections should be made on the Web at www.fafsa.ed.gov (http://www.fafsa.ed.gov).
6. Information concerning federal financial aid programs, such as Federal Work-Study (FWS), Federal Perkins Loans, Federal Direct Loans (DL), and Federal Direct Plus Loans, may be obtained from the financial aid office.
7. The student must be making satisfactory academic progress toward completing a degree or certificate program.
8. The student must sign an educational purpose/certification statement on refunds and defaults as part of the FAFSA.
9. Awards of financial assistance are made in the spring prior to the beginning of the fall semester. An award notification will be sent by email to the student once the file is complete.

10. In order to be considered for most types of federal financial assistance, a student must be enrolled at least half time (6 semester hours); the Federal Pell Grant program is an exception to this requirement.

11. Awards will be based only on a student’s enrollment status during the official registration period.

12. The financial aid office staff is available for counseling with students and parents concerning any financial aid program.

**Satisfactory Academic Progress**

All students receiving federal financial aid must adhere to the University’s policy on satisfactory progress. The intent of this policy is to ensure that students who are receiving federal and/or state financial aid for their education are making measurable progress toward completion of a degree in a reasonable period of time.

Undergraduate students are considered to be making satisfactory progress if they:

1. are admitted and enrolled as degree-seeking students;
2. meet the University standards for continued enrollment;
3. complete requirements for a degree within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any post-secondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree.
   b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed the equivalent of 180 hours for a four-year degree or 90 hours for a two-year degree.
4. earn no fewer than 67% of all coursework if enrolled as a full-time student. The academic year for Satisfactory Academic Progress is comprised of the fall, spring, and summer terms.
5. maintain a cumulative grade point average (GPA) of 2.00 on all coursework.

**Explanation**

Under these standards, students will be ineligible to receive federal financial aid funds if any of the following occurs:

1. The total number of semesters of enrollment as a full-time student (12 or more semester hours attempted) exceeds 180 hours for a four-year degree or 90 hours for a two-year degree. These limits include all work done at any post-secondary institution, whether or not financial aid was received.
2. The total number of earned hours falls below the prescribed number based upon enrollment in undergraduate or graduate study.
3. Complete requirements for a degree or certificate within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any post-secondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.
   b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.
4. The cumulative GPA falls below 2.00.

In other words, students who accumulate a yearly or cumulative GPD that subjects them to suspension, who have been enrolled for more than the equivalent of 10 full-time semesters for a four-year degree program, who do not maintain a cumulative GPA of 2.00 after attempting 48 credit hours, or who do not earn the minimum number of semester hours required will become ineligible to receive federal financial aid funds. This determination applies without regard to any financial aid award letter that may have been sent or received prior to the time the determination is made.

**Financial Aid Programs Covered by These Standards**

- Federal Pell Grant
- Federal Work-Study
- Federal Supplemental Educational Opportunity Grants
- Federal Perkins Loan
- William D. Ford Federal Direct Loan Program:
  - Direct Subsidized Loan
  - Direct Unsubsidized Loan
  - Federal PLUS
- South Carolina LIFE Scholarship
- South Carolina Lottery Tuition Assistance Program
- South Carolina Need-Based Grant
- Other federal or state programs as required
- Some select private loans (as determined by the lender)

**Appeals**

Students who are ruled ineligible for financial aid may appeal this determination under specifically prescribed conditions. Deadlines for receipt of appeals are 20 days prior to the end of the semester for which aid is requested. Information concerning the appeal process is available in the financial aid office.

**Reinstatement**

Students shall be reinstated for financial aid eligibility at such time as they successfully complete sufficient hours and have a sufficient grade point average to meet the minimum requirements for eligibility as set forth in this policy.

**Academic Forgiveness**

The Satisfactory Academic Progress policy standards will not automatically apply to any hours forgiven under the University of South Carolina Academic Forgiveness Program. However, if you have been granted academic forgiveness under this policy you must contact the Financial Aid Office for further assessment.

**Grants**

**Federal Pell Grant**

The Federal Pell Grant is the largest federally funded student financial aid grant program. It serves as the foundation upon which all other undergraduate aid is awarded. Typically, it is available only to undergraduate students who have not earned a baccalaureate degree. Federal Pell Grant eligibility is determined according to federal law and is
based on the financial information you and your family provided on your FAFSA.

You are notified of your possible eligibility to receive a Federal Pell Grant via the Student Aid Report (SAR). The financial aid office will receive this information directly from the federal processor and determine the amount of your Federal Pell Grant. You should carefully review the information on your SAR and, if it is correct, keep it for your records. If you discover mistakes, follow the instructions and submit corrections as soon as possible.

If you or your family experiences a major change in your financial situation after your Pell Grant eligibility has been determined, you should notify the financial aid office immediately. A counselor will be able to determine if you qualify for an adjustment of your Pell Grant award and/or other financial aid.

**Federal Supplemental Educational Opportunity Grant (FSEOG)**

The FSEOG is a grant that does not need to be repaid. The financial aid office awards UofSC’s limited allocation of FSEOG funds. Recipients must be undergraduates who have not already earned a baccalaureate degree and who demonstrate exceptional financial need. FSEOG recipients must be eligible to receive a Pell Grant and have the lowest EFC’s from among those students being considered for an award.

**South Carolina Educational Resources**

**State Need-Based Grant Program (SNBG)**

The South Carolina Need-Based Grant is a state-funded grant for undergraduates attending public and independent colleges and universities within South Carolina. Recipients may not have already earned a baccalaureate degree. To be considered, you must be a South Carolina resident, be admitted or currently enrolled with a minimum GPA of 2.00, complete the FAFSA, demonstrate financial need, be of good moral character, and have no felony and/or alcohol or drug convictions for a period of one year. Additionally, to renew a state grant award, you must maintain an annual 2.00 GPA and complete 24 semester hours during the fall and spring semesters if enrolled full time or an equivalent number of hours based on enrollment if less than full time. Awards are made for the entire academic year (fall and spring semesters) only. The State Need-Based Grant does not need to be repaid.

**South Carolina Legislative Incentives for Future Excellence Scholarship**

The South Carolina Legislative Incentives for Future Excellence Scholarship (LIFE) was established by the General Assembly during the 1998 legislative session. To be eligible for a LIFE Scholarship, you must have graduated from a high school located in South Carolina on or after May 1995 and be a full-time, undergraduate, degree-seeking student. You must be a South Carolina resident for in-state tuition purposes at the time of enrollment and have no felony, alcohol, or drug convictions. If, however, you have been judged delinquent or have been convicted or pled guilty or nolo contendere to an alcohol or drug misdemeanor, you are ineligible for one calendar year from the date of the conviction. You must also be a U.S. citizen or a permanent resident under state laws. You may not be in default or owe a refund on any federal or state financial aid program.

If you are a first-time entering freshman, you must have graduated from high school with a minimum 3.00 cumulative grade point average (GPA) on a 4.00 scale.

For initial LIFE Scholarship eligibility, if a currently enrolled student, you must have earned a cumulative 3.00 USC GPA at the end of the academic year. You must also have earned a minimum of 30 credit hours, or the annual equivalent at all institutions attended, for the previous academic year if completing your first year; 60 credit hours must have been earned if completing your second year; and, 90 credit hours must have been earned if completing your third year. Students at UofSC Regional Campuses are only eligible to receive the LIFE Scholarship for four consecutive semesters.

You may receive the LIFE scholarship for not more than eight semesters for a four-year degree or 10 semesters for a five-year degree. Funds from this program may not be used for remedial courses or continuing education classes. If you are receiving South Carolina’s Palmetto Fellows Scholarship, you are not eligible for a LIFE Scholarship.

To retain the LIFE Scholarship you must earn an average of 30 credit hours for each academic year and earn a 3.00 cumulative UofSC GPA by the end of the academic year. The financial aid office, using data from the admissions and records offices, is responsible for awarding LIFE Scholarships.

Please note that the LIFE Scholarship statutes and regulations are subject to change by the South Carolina Legislature.

**South Carolina Lottery Tuition Assistance Program**

During the 2002 legislative session, the South Carolina General Assembly established the Lottery Tuition Assistance Program. Its purpose is to provide resources that supplement, not supplant, existing resources for educational purposes to South Carolina’s students. The program assists students who wish to attend two-year public or independent college in the state. In calculating the amount awarded, any and all federal grants and need-based grants must first be awarded before determining the amount a student is eligible to receive. A student may receive up to the cost of tuition minus Pell, SEOG, and SNBG. The college at which the student is enrolled will notify each student of the exact award amount.

In order to qualify for lottery tuition assistance, a student must meet the following requirements:

- file the Free Application for Federal Student Aid (FAFSA) and complete the process to determine eligibility for federal student aid each academic year
- be a legal resident of South Carolina as defined in applicable state statutes governing the determination of residency for tuition and fee purposes
- be enrolled at the time of the grant disbursement in a minimum of 6 credit hours for the term and be making satisfactory academic progress toward an associate’s degree
- verify that the student does not owe a refund or repayment on a state grant, Federal Pell Grant, or Federal Supplemental Educational Opportunity Grant (FSEOG) and is not in default on a loan under the Federal Perkins Loan or Federal Direct Loan programs
- must not be eligible for or a recipient of the LIFE scholarship.

To retain program funds, a student must have a 2.00 GPA by the end of the academic year.

In addition, students shall not be eligible to receive lottery tuition assistance for more than one certificate, diploma, or degree earned within any five-year period.
The financial aid office administers the South Carolina Lottery Tuition Assistance Program, and the exact award amount is dependent upon the number of eligible recipients and the amount of funding each academic year. Please note that program statutes and regulations are subject to change by the S.C. Legislature.

**Loans**

**The Federal Direct Stafford Loan Program (subsidized and unsubsidized)**

The Federal Direct Stafford Loan Program provides low-interest, long-term loans to eligible students through the U.S. Department of Education.

Subsidized Stafford Loans are awarded based on financial need. The federal government pays the interest on these loans while the student is enrolled in school at least half-time (6 semester hours), during the grace period and during deferment periods.

Unsubsidized Stafford Loans are not based on financial need. Interest begins accruing after the first disbursement. Students have the option of paying the interest monthly or quarterly while in school and during the grace period, or can have the interest capitalized and added to the principal amount of the loan upon entering repayment.

**Maximum Loan Amounts**

<table>
<thead>

<tr>
<td>Graduate</td>
<td>$138,500 (maximum $65,500 subsidized)</td>
</tr>
</tbody>
</table>

The graduate limit includes Stafford Loans received for undergraduate study.

**Federal Direct Parent Loan for Undergraduate Students (PLUS)**

Federal Direct Parent Loan for Undergraduate Students (PLUS) provides long-term loans to parents for their dependents through the U.S. Department of Education. Loan amounts under this program are limited to the student’s cost of education minus other financial aid awards. Parents may be denied a PLUS loan due to adverse credit history. If the PLUS Loan is denied, the student is eligible for an additional Unsubsidized Loan.

The repayment period for each Direct PLUS Loan begins on the date the final loan disbursement is made. There is no grace period for Direct PLUS Loans. Parents have the option of postponing payments until six months after the student ceases to be enrolled at least half time. Parents must contact the Direct Loan Servicing Center to request a postponement of payments. Interest will accrue during the postponement period. The loans have a fixed rate of 7.9%. PLUS Loan funds will be disbursed in two equal payments, one at the beginning of each semester (Fall — August, Spring — January). One semester loans are disbursed at the beginning of the semester for the full loan amount.

**South Carolina Teacher Loan Program**

This program is available only to residents of South Carolina who are attending college for the purpose of becoming certified teachers employed in the state's school system in areas of critical need as defined by the State Board of Education. For loan recipients who become certified and teach in an area of critical need, the loan shall be cancelled at the rate of 20 percent for each full year of teaching, up to 100 percent. Loan recipients who do not become certified and/or do not teach in an area of critical need shall be responsible for repaying the entire amount of loan funds borrowed plus interest. Contact the Office of Student Financial Aid and Scholarships for application information and deadlines.

**Federal Perkins Loan**

The Perkins Loan Program is a low-interest (5 percent), long-term educational loan program available to both undergraduate and graduate students demonstrating exceptional financial need. This is a loan and must be repaid. Undergraduates may borrow up to $4,000 for each year of study and up to $20,000 to complete an undergraduate degree. Interest is not charged and repayment does not begin until nine months after your enrollment drops below half-time status. If you receive your first Perkins Loan on or after October 1, 1992, your minimum payment will be $40 per month. In all cases, repayment may extend up to 10 years depending upon the total amount borrowed. If you have outstanding National Direct Student Loan (NDSL) balances and you are receiving a Federal Perkins Loan now, you must review your NDSL Promissory Note to determine the terms and conditions that apply to your loan. Under certain conditions of reenrollment, employment, or extenuating circumstances, payments may be deferred or cancelled. Further information concerning repayment is available in the Office of Financial Services, 516-518 South Main Street.

**Work Opportunities**

**Federal Work-Study Program**

The Federal Work-Study Program provides part-time employment for needy students to meet their educational expenses. To be eligible for employment under this federal program, a student must be enrolled in the University or fully accepted for admission and demonstrate financial need.

Students who are enrolled at least half-time work an average of 12 to 20 hours per week. During vacation periods it is sometimes possible to work up to 40 hours per week. Pay rates vary with the job assignment.

**Refunds and Financial Aid**

The official University policy and procedure concerning refunding of University tuition and fees which result from withdrawal or reduction in hours is contained in the “Fees and Refunds (p. 1804)” section of this bulletin. Students who withdraw or reduce hours may be eligible to receive a refund as provided by the official University policy; however, recipients of financial aid generally do not receive the refund.
When students who are recipients of federal financial aid withdraw from all classes, they are only entitled to retain a percentage of the federal financial aid received that is proportional to the time they remained enrolled. If, for example, a student withdraws after completing 30 percent of the semester or summer term, they can only retain 30 percent of the federal financial aid they received. The balance, 70 percent, must be returned to the financial aid programs. The Office of the Bursar performs this calculation and students are notified by mail of the outcome.

When funds are applied back to the federal financial aid programs, loan funds are always returned first, thereby reducing the student’s repayment obligation. If funds remain after repaying federal loans, they are then repaid to the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant (FSEOG) programs. After all federal funds are repaid, state-sponsored grant programs then receive any remaining payments.

Veterans Benefits

The following policies and procedures are of primary concern to veterans, servicepersons, members of guard and selected reserves, and other eligible persons who receive VA educational benefits while enrolled at the University.

Please note: Academic standards of progress and attendance are covered under school standards of progress as specified by the South Carolina Commission on Higher Education, License Division, and are required by the U.S. Department of Veterans Affairs (VA).

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veteran Affairs (VA) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent the student’s enrollment;
- Assess a late penalty fee to;
- Require student secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Provide Chapter 33 Certificate of Eligibility (or its equivalent) or for Chapter 31, VA VR&E’s contract with the school on VA Form 28-1905 by the first day of class.

Note: Chapter 33 students can register at the VA Regional Office to use E-Benefits to get the equivalent of a Chapter 33 Certificate of Eligibility. Chapter 31 student cannot get a completed VA Form 28-1905 (or any equivalent) before the VA VR&E case-manager issues it to the school.

- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

Disapproval of courses

(a)(1) Except as provided by paragraph (2), any course approved for the purposes of this chapter which fails to meet any of the requirements of this chapter shall be immediately disapproved by the Secretary or the appropriate State approving agency. An educational institution which has its courses disapproved by the Secretary or a State approving agency will be notified of such disapproval by a certified or registered letter of notification and a return receipt secured.

(2) In the case of a course of education that would be subject to disapproval under paragraph (1) solely for the reason that the Secretary of Education withdraws the recognition of the accrediting agency that accredited the course, the Secretary of Veterans Affairs, in consultation with the Secretary of Education, and notwithstanding the withdrawal, may continue to treat the course as an approved course of education under this chapter for a period not to exceed 18 months from the date of the withdrawal of recognition of the accrediting agency, unless the Secretary of Veterans Affairs or the appropriate State approving agency determines that there is evidence to support the disapproval of the course under this chapter. The Secretary shall provide to any veteran enrolled in such a course of education notice of the status of the course of education.

(b) Each State approving agency shall notify the Secretary of each course which it has disapproved under this section. The Secretary shall notify the State approving agency of the Secretary’s disapproval of any educational institution under chapter 31 of this title.

(c)(1) Notwithstanding any other provision of this chapter and subject to paragraphs (3) through (6), the Secretary shall disapprove a course of education provided by a public institution of higher learning if the institution charges tuition and fees for that course for covered individuals who are pursuing the course with educational assistance under chapter 30, 31, or 33 of this title while living in the State in which the institution is located at a rate that is lower than the rate the institution charges for tuition and fees for that course for residents of the State in which the institution is located, regardless of the covered individual’s State of residence.

(2) For purposes of this subsection, a covered individual is any individual as follows:

(A) A veteran who was discharged or released from a period of not fewer than 90 days of service in the active military, naval, or air service less than three years before the date of enrollment in the course concerned.

(B) An individual who is entitled to assistance under

(i) section 3311(b)(9) of this title; or

(ii) section 3319 of this title by virtue of the individual’s relationship to

(I) a veteran described in subparagraph (A); or

(II) a member of the uniformed services described in section 3319(b) of this title who is serving on active duty.

(C) An individual who is entitled to rehabilitation under section 3102(a) of this title.

(3) If after enrollment in a course of education that is subject to disapproval under paragraph (1) by reason of paragraph (2)(A), (2)(B), or (2)(C) a covered individual pursues one or more courses of education at the same public institution of higher learning while remaining continuously enrolled (other than during regularly scheduled breaks between courses, semesters or terms) at that institution of higher learning, any course so pursued by the covered individual at that institution of higher learning while so continuously enrolled shall also be subject to disapproval under paragraph (1).
(4) It shall not be grounds to disapprove a course of education under paragraph (1) if a public institution of higher learning requires a covered individual pursuing a course of education at the institution to demonstrate an intent, by means other than satisfying a physical presence requirement, to establish residency in the State in which the institution is located, or to satisfy other requirements not relating to the establishment of residency, in order to be charged tuition and fees for that course at a rate that is equal to or less than the rate the institution charges for tuition and fees for that course for residents of the State.

(5) The Secretary may waive such requirements of paragraph (1) as the Secretary considers appropriate.

(6) Disapproval under paragraph (1) shall apply only with respect to educational assistance under chapters 30, 31, and 33 of this title.

(d) Notwithstanding any other provision of this chapter, the Secretary or the applicable State approving agency shall disapprove a course of education described in paragraph (14) or (15) of section 3676(c) of this title unless the educational institution providing the course of education-

(1) publicly discloses any conditions or additional requirements, including training, experience, or examinations, required to obtain the license, certification, or approval for which the course of education is designed to provide preparation; and

(2) makes each disclosure required by paragraph (1) in a manner that the Secretary considers prominent (as specified by the Secretary in regulations prescribed for purposes of this subsection).

(e)(1) Notwithstanding any other provision of this chapter, beginning on August 1, 2019, a State approving agency, or the Secretary when acting in the role of the State approving agency, shall disapprove a course of education provided by an educational institution that has in effect a policy that is inconsistent with any of the following:

(A) A policy that permits any covered individual to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33 of this title and ending on the earlier of the following dates:

(i) The date on which the Secretary provides payment for such course of education to such institution.

(ii) The date that is 90 days after the date on which the educational institution certifies for tuition and fees following receipt from the student such certificate of eligibility.

(B) A policy that ensures that the educational institution will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement of a payment to be provided by the Secretary under chapter 31 or 33 of this title.

(2) For purposes of this subsection, a covered individual is any individual who is entitled to educational assistance under chapter 31 or 33 of this title.

(3) The Secretary may waive such requirements of paragraph (1) as the Secretary considers appropriate.

(4) It shall not be inconsistent with a policy described in paragraph (1) for an educational institution to require a covered individual to take the following additional actions:

(A) Submit a certificate of eligibility for entitlement to educational assistance not later than the first day of a course of education for which the individual has indicated the individual wishes to use the individual's entitlement to educational assistance.

(B) Submit a written request to use such entitlement

(C) Provide additional information necessary to the proper certification of enrollment by the educational institution

Rule of Construction

Pub. L. 115-407, title I, §103(c), Dec. 31, 2018, 132 Stat. 5370, provided that: “In a case in which an individual is unable to meet a financial obligation to an educational institution due to the delayed disbursement of a payment to be provided by the Secretary under chapter 31 or 33 of such title [title 38] and the amount of such disbursement is less than anticipated, nothing in section 3679(e) of such title, as added by subsection (a), shall be construed to prohibit an educational institution from requiring additional payment or imposing a fee for the amount that is the difference between the amount of the financial obligation and the amount of the disbursement.”

Enrollment Certification

Certification by the University VA certifying official in the Office of Financial Aid, Scholarships, and Veterans Affairs is required for eligible students who wish to receive VA educational benefit checks. Students must initiate their own requests for enrollment certification. The certifying official will complete certifications and forward other forms to the VA only for those students who have made such requests and have completed the necessary paperwork.

Normally, the VA requires that eligible students must have completed full University admissions requirements and matriculation into degree-seeking status before they may receive VA educational benefits. However, those students admitted as “Provisional,” “Military Special,” or “Transient,” or students enrolling for prerequisite courses required for admission into a professional degree program or school may request VA certification if they provide appropriate documentation. Any VA students in these categories should contact the VA certifying official for details. In these and all other admissions categories, only the federal VA has the final authority to award or to deny military educational benefits.

Undergraduate veterans or servicepersons should contact the Office of Admissions for consideration of receiving college credit for military schools.

Students can best ensure receipt of benefits by informing the school VA office of their intent to register for classes and by supplying the number of credit hours for which they will enroll each session. Eligible VA students may request certification on a semester basis and should recertify for each new semester at least 45 days prior to the first day of class of their next semester.

Normally, VA payments are authorized only for those courses which are required by the academic department for the student's current degree program. All students receiving educational benefit checks from the VA are responsible for notifying the VA certifying official of any changes in their degree programs and/or course loads during a semester, to include drop/add, withdrawal, changing from credit to audit status, invoking
the Pass-Fail option in a course, or enrolling in any distance education course, independent study, internship, or practicum.

Appropriate forms and benefits-related information are available at the Office of Financial Aid, Scholarships, and Veterans Affairs. Each student request will be handled individually according to their VA benefit program and enrollment status at the University.

Academic Scholarships
The following scholarships are available to students at UofSC Salkehatchie:

Achroma STEM Scholarship. A scholarship awarded to a student majoring in a STEM field.

The Doctors Riddick Ackerman Scholarship. A scholarship awarded to a student who is a resident of Colleton County and is a nursing major.

Allendale Academy Scholarship. A scholarship awarded to a former Allendale Academy student or his or her heirs with a second priority to a resident of Allendale County. Awarded on the basis of academic achievement.

David and Brenda Barnes Endowed Scholarship. Awarded to a student with financial need. Awarded to a student who is a resident of one of the five counties in Salkehatchie’s service area with preference to Allendale County or Hampton County.

Murray Bishop Memorial Scholarship. A scholarship awarded to a student who is a resident of Colleton County. Sponsored by the Walterboro Civitan Club.

Reid and Louise Boylston Endowed Scholarship. A scholarship awarded to a student from one of the five counties in Salkehatchie service area.

Clarence and Virginia Brabham Memorial Endowed Scholarship. A scholarship awarded to a Bamberg County resident who has financial need and academic promise.

Representative James B. and Mrs. Barbara T. Brandt Scholarship. A scholarship awarded based on academic achievement and financial need.

David and Maggie Cannon Scholarship. A scholarship awarded for academic achievement to a student from Barnwell County.

Barbara B. and Carl A. Clayton Scholarship. A scholarship awarded to a student from the five-county Salkehatchie service area.

William and Mary Clayton Endowed Scholarship. A scholarship awarded to a student attending UofSC Salkehatchie.

Colleton County Rice Festival Scholarship. A scholarship awarded to a student who is a resident of Colleton County.

J. Paul Detrick Scholarship. A scholarship awarded for academic achievement and financial need to a resident of Hampton or Allendale counties.

Vivia Peeples Eden Scholarship. A scholarship awarded on the basis of academic achievement to a student from one of the five counties served by UofSC Salkehatchie.

Harry Lee Foy Sr. Memorial Scholarship. A scholarship awarded to a student at UofSC Salkehatchie with preference to a resident of Barnwell, Hampton or Bamberg counties followed by a resident of Allendale or Colleton counties.

James D. Gruber Nursing Scholarship. A scholarship awarded to an Upper Division Nursing student who is a resident of Colleton County.

Dr. William O. Lamprecht Jr. Memorial Scholarship. A scholarship awarded to a student who is a science major.

Arthur H. and Marie J. Mitchell Endowed Scholarship. A scholarship awarded to a student in the five county service area.

Dick and Rose Ann Mixson Endowed Scholarship. A scholarship awarded to a resident of the five county service area but with a preference for Brunson first and then Hampton County.

The Killion-Waller Scholarship. A scholarship awarded to a Colleton County resident who will attend the UofSC Salkehatchie regional campus at Walterboro based on academic achievement.

“Luke” Laffitte Endowed Scholarship. A scholarship awarded to a resident of Allendale or Hampton County and resident must attend the Allendale campus.

Leadership Colleton Class of 2008 Scholarship. A scholarship awarded to a student who is a resident of Colleton County.

The Margaret W. Lewis Endowed Scholarship. Awarded to a resident of Fairfax, Sycamore or Ulmer, SC who is majoring in education or is a student worker in the west campus library.

Miles and Ann Loadholt Endowed Scholarship. Two or more scholarships awarded based on academic achievement with preference given to a student of Allendale, Bamberg, Barnwell, Colleton, or Hampton counties.

Manuel's Grocery and Barber Shop Scholarship. A scholarship awarded on the basis of academic merit and financial need to a resident of Allendale County.

Bob and Ginger McCully Endowed Scholarship. A scholarship awarded to a student who has financial need and who has demonstrated academic promise, with preference given to a Bamberg County resident.

The Cynthia and Ross McMillan Endowed Scholarship. A scholarship awarded to a resident of Allendale County.

Zita Mellon Scholarship. A scholarship awarded on the basis of academic achievement to an Allendale County resident with preference to an art or history major.

Randolph “Buster” Murdaugh Scholarship. A scholarship awarded to a resident of the South Carolina 14th Judicial District who is a worthy full-time student in need of financial assistance and has demonstrated academic excellence. Recipient must be a freshman. Student may receive the scholarship for the second year provided he or she maintains a 2.50 GPA. Scholarship will rotate between the USC regional campuses at Beaufort and Salkehatchie.

John and Julia Myers Scholarship. A scholarship awarded to a resident of Allendale County majoring in education.

John and Gale Peek Scholarship. A scholarship with no geographic restrictions but preference is given to a criminal justice major or a student considering a law enforcement field.
Fees and Refunds

Checks, Money Orders, and Credit Cards

The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina (https://my.sc.edu/) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by E-check, UofSC’s preferred method of payment, when using Self-Service Carolina or payment by check or money order through the mail.

Legal Residency

The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one’s resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

Legal Residency Requirements for Fee and Tuition Purposes

Code of Laws Governing Residence

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions

“Academic Session” is defined as a term or semester of enrollment.

“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person’s college education. A dependent person’s residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a

Martha and Holbrook Platts Scholarship. A scholarship awarded to a resident of Hampton County.

Butch Phillips Memorial Scholarship. A scholarship awarded for academic achievement to a graduate of Allendale-Fairfax High School.

President’s Commencement Scholarship. A $5000 scholarship awarded annually in honor of the commencement speaker.

Audrey F. Thomas and Peggy A. Morris Endowed Scholarship. A scholarship awarded to a student majoring in Nursing.

Billy Wade Memorial Scholarship. A scholarship awarded to a resident of the five county service area with preference given to resident of Allendale and Barnwell Counties.

Witsell R. Robertson and Josephine L. Robertson Endowed Scholarship. A scholarship awarded to a resident of Colleton County.

Salkehatchie Faculty-Staff Scholarship. One or more scholarships awarded on the basis of academic achievement.

Neil Sanders Scholarship. A scholarship to be awarded on the basis of academic achievement.

Joe Siren Endowed Scholarship. A scholarship awarded to a student in the five county service area with a preference for students who attended Allendale Fairfax High School or Barnwell High School.

D.L. Scurry Foundation Scholarship. Two or more scholarships awarded at the request of the foundation based on academic achievement and financial need.

Tharin Endowment Fund Scholarship. A scholarship awarded to a Salkehatchie student with a preference given to non-traditional students.

UofSC Salkehatchie International Student Scholarship. Two scholarships awarded to an international student attending UofSC Salkehatchie.

Walterboro Civitan Club Scholarship. A scholarship awarded on the basis of academic achievement to a resident of Colleton County.

Walterboro Rotary Club Scholarship. A scholarship awarded to a resident of Colleton County.

Baker T. Warren Scholarship. A scholarship awarded to a resident of Allendale County. Sponsored by the Adult Sunday School Class of Allendale Presbyterian Church.

Western Carolina Higher Education Commission Scholarship. Awarded to a student with financial need.

Alvin P. Weissenstein Memorial Scholarship. A scholarship for a disabled student from Colleton County. Sponsored by the Walterboro Civitan Club.

Henry A. White Education Scholarship. A scholarship awarded to a student majoring in education and residing in one of the five counties served by UofSC Salkehatchie with first preference given to Allendale County.

John Winthrop Archaeological Research Endowment Fund. A scholarship awarded by the History Committee.
place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“All full time employment” is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

“Immediately Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

“Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Resident” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents

Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person's support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the
person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence

A person’s temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver’s license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

Effect of Change of Residency

Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/hers family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

Effect of Marriage

In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South
Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

Exceptions
Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. “Military Personnel and their Dependents”: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in state tuition and fees.

2. “Faculty and Administrative Employees with Full Time Employment and their Dependents”: Full time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. “Residents with Full Time Employment and their Dependents”: Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary”).

4. “Retired Persons and their Dependents”: Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

Application for Change of Resident Status
Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

Incorrect Classification
Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

Inquiries and Appeals
Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-4060

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person’s situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

Academic Fees

Application Fees

Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be
accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls.

**Matriculation Fee**
A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $500 matriculation fee.

**Free Tuition**
(This includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. S.C. Code Ann. § 59-111-110 (Law Co-op. 1976) No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, as defined herein, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty (on or after July 1, 1964).

2. S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984) Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or non-credit purposes on a space available basis; provided, however, that neither such persons nor their spouses receive compensation as full-time employees.

**Examination Fees**

**Graduate Record Examination**
1. General Test ($60)
2. Subject Test ($60)

Revalidation examinations intended to revalidate UofSC courses, obsolete under the statute of limitations. Per hour, $25.

*Note: Revalidation examinations require permission of the dean of The Graduate School. The fee must be paid in advance, and is nonrefundable, once the student is presented to the instructor for the examination.*

**Refund Policy**

**1. Policy**
The University will refund a part of academic fees in certain cases:

a. Changes in a student's status, which may require a refund.
   i. Change in a full-time student's schedule, which results in reclassification to part-time status
   ii. Change in a part-time student's schedule, which results in fewer credit hours.

b. Situations, which may require a refund.
   i. Course or courses dropped
   ii. Drop/Withdrawal from the University
   iii. Cancellation of a class by the University

**2. Procedure**

a. **Refund Requests**
   All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

b. **Determining the Refundable Portion Procedure**
   Student refunds for tuition are calculated based on the student's liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

c. **Drop/Withdrawal Refund Policies**
   Standard Refund Policy For Dropping/Withdrawal From The University.
   All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar's Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
   i. 100 percent if the student's official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
   ii. 70 percent if the student's official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
   iii. 50 percent if the student's official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
   iv. 20 percent if the student's official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

d. **Refund Schedules**
   Refund schedules are relocated under the important deadlines on the Registrar's website (http://registrar.sc.edu/).

e. **Return of Title IV Funds**
   Refunds Policy For Students Who Have Received Title IV Funds
   And Withdraw From The University
   i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has
completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.

ii. Title IV Refund Distribution
   1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
      - Unsubsidized Federal Stafford
      - Subsidized Federal Stafford
      - Federal Perkins
      - Federal PLUS Loan
      - Federal Pell Grant
      - Federal Supplemental Education Opportunity Grant
      - Federal TEACH Grant
      - Federal Iraq/Afghanistan Service Grant
   2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.
   3. Exit interviews ([http://www.sc.edu/financialaid/loan_counseling/default.html](http://www.sc.edu/financialaid/loan_counseling/default.html)) are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

f. Appeals Process
   A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal. The Withdrawal Refund Appeals Committee reviews and acts on all appeals. Address appeals to: Withdrawal Refund Appeals Committee (Columbia Campus Only) Office of the Registrar University of South Carolina Columbia, SC 29208 803-777-5555

**Withdrawal Refunds**

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu ([https://my.sc.edu/](https://my.sc.edu/)) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student’s withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

**University Withdrawal Refund Appeal Procedures**

The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University’s published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Business Office and will be considered only in written form. A standardized appeal form must be submitted.
2. All requests for appeal must be submitted directly by the student through the Business Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official’s advice, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.
3. The appeal must be initiated during the semester for which the refund is requested.
4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.
5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.
6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.
7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Business Office.

**Academic Calendar**

The University of South Carolina’s academic year includes a fall semester beginning in August, a spring semester beginning in January and multiple summer sessions beginning in May. Access the full current academic calendar as well as future academic calendars to find key dates and information including holidays, registration dates, payment deadlines, drop or add dates, exams and commencement for each term.

University of South Carolina System Academic Calendar (http://www.sc.edu/about/offices_and_divisions/registrar/academic_calendars/)

**Academic Programs**

**Learning Outcomes for Associate’s Degree Programs**

Graduates will be able to:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through writing.
- Apply the methods of mathematical, statistical, or analytical reasoning to critically evaluate data, solve problems, and effectively communicate findings verbally and graphically.
- Apply the principles and language of the natural sciences and associated technologies to historical and contemporary issues.
- Communicate in more than one language.
- Use the principles of historical thinking to understand past human societies.
- Use the principles of the social sciences to explore diverse cultural identities and to analyze political and environmental issues.
- Create or interpret literary, visual or performing arts.

and be able to demonstrate at least one of the following:

- Collect, manage and evaluate information using technology, and communicate findings.
- Examine different kinds of social and personal values, analyzing the ways in which these are manifested in communities as well as individual lives.

**Carolina Core - 15 Hours**

These serve as general education requirements common to all associate degrees.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
  Must be passed with a grade of C or higher
- SCI: Scientific Literacy (3 Hours)
- GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
- GSS: Global Citizenship and Multicultural Understanding: Social Sciences (3 Hours)

**Associate of Arts Degree Curriculum - 60 Hours**

1. Basic Requirements (including 15 hours of Carolina Core stated above) (37-38 Hours)

<table>

</tbody>
</table>

   All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.

   - CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
     Must be passed with a grade of C or higher
   - ARP: Analytical Reasoning and Problem-Solving (3 Hours)
     Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Pre-calculus Mathematics
   - SCI: Scientific Literacy (7-8 Hours)
     Must include at least 1 laboratory science course
   - GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
     One 3-hour language course at any level or score of “2” on placement exam
   - GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
   - GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)
   - AIU: Aesthetic and Interpretive Understanding (6 Hours)
   - Choose one of the following three options (3 Hours minimum):  
     - CMW: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
     - INF: Information Literacy (3 Hours)
     - VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (22-23 Hours)

   Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. USC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a USC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within
the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate’s degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

 Associate of Science Degree Curriculum - 60 Hours
1. Basic Requirements (including 15 hours of Carolina Core stated above) (38-42 Hours)
All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.
• CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
  Must be passed with a grade of C or higher
• ARP: Analytical Reasoning and Problem-Solving (6 Hours)
  Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics
• SCI: Scientific Literacy (8-12 Hours)
  Must include at least 2 laboratory science courses
• GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
• One 3-hour language course at any level or score of “2” on placement exam
• GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
• GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)
• AIU: Aesthetic and Interpretive Understanding (6 Hours)
• Choose one of the following three options (3 Hours minimum):
  • CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
  • INF: Information Literacy (3 Hours)
  • VSR: Values, Ethics and Social Responsibility (3 Hours)
2. Electives for A.A. Degrees (18-22 Hours)
Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. USC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a USC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate’s degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Other Requirements
In addition to the requirements for the A.A. and A.S. degrees stated above, the following stipulations also apply:
• Students must have an institutional GPA of 2.00 or better (does not include course grades earned by challenge examinations).
• The final 15 semester hours must be earned at USC Salkehatchie.
• No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees.
• Pass-Fail option on elective courses is allowed.
• No more than 15 hours of nontraditional credits, which include DANTES, CLEP, and military experience.
• No more than 3 1-hour PEDU activity courses may count toward meeting Associate’s degree requirements (any track).

Second Associate’s Degree
At times the University of South Carolina Salkehatchie confers a second associate’s degree upon candidates who have completed all requirements for the second degree, provided that the additional requirements for the second degree include a minimum of 12 semester hours beyond those required for the first degree earned at USC Salkehatchie and a minimum of 72 semester hours total. Under this policy a student may apply for two degrees at one time or separately. In either case the student would receive two diplomas.

Course Descriptions
• Accounting (ACCT) (p. 1811)
• Art History (ARTH) (p. 1812)
• Biology (BIOL) (p. 1812)
• Chemistry (CHEM) (p. 1813)
• Comp Sci & Comp Engr (CSCE) (p. 1813)
• Economics (ECON) (p. 1813)
• English (ENGL) (p. 1813)
• Finance (FINA) (p. 1814)
• History (HIST) (p. 1814)
• Hlth Promo Educ & Beh (HPEB) (p. 1815)
• Management (MGMT) (p. 1815)
• Management Science (MGSC) (p. 1815)
• Marketing (MKTG) (p. 1815)
• Mathematics (MATH) (p. 1815)
• Music (MUSC) (p. 1816)
• Palmetto College (PCAM) (p. 1817)
• Palmetto Programs (PALM) (p. 1817)
• Physical Education (PEDU) (p. 1817)
• Physics (PHYS) (p. 1818)
• Political Science (POLI) (p. 1818)
• Psychology (PSYC) (p. 1818)
• Religious Studies (RELG) (p. 1819)
• Sociology (SOCY) (p. 1819)
• Spanish (SPAN) (p. 1819)
• Speech (SPCH) (p. 1820)
• Theatre (THEA) (p. 1820)
• University Experience (UNIV) (p. 1820)
• Women & Gender Studies (WGST) (p. 1820)

Accounting (ACCT)
ACCT 225 - Introduction to Financial Accounting (3 Credits)
User-oriented approach to the study of financial accounting and reporting topics related to business decisions.
Art History (ARTH)

ARTH 105 - History of Western Art (3 Credits)
The visual arts from Paleolithic times to the Renaissance.
Carolina Core: SCI
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 106 - History of Western Art (3 Credits)
The visual arts from the Renaissance to the present.
Carolina Core: SCI
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 399 - Independent Study (3-9 Credits)
Graduation with Leadership Distinction: GLD: Research

Biology (BIOL)

BIOL 101 - Biological Principles I (3 Credits)
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology.
Carolina Core: SCI

BIOL 102 - Biological Principles II (3 Credits)
Introductory survey of plant and animal development, physiology, ecology, and evolution. Three lecture hours per week.
Prerequisites: C or better in BIOL 101.
Corequisite: BIOL 102L.
Carolina Core: SCI

BIOL 102L - Biological Principles II Laboratory (1 Credit)
Experimental examination of structure and function of plant and animal systems, biodiversity, ecology. BIOL 101, 102, 101L and 102L must be completed prior to enrolling in 300-level or above Biology courses.
Prerequisites: C or better in BIOL 101 and BIOL 101L; recommended concurrent with BIOL 102.
Carolina Core: SCI

BIOL 110 - General Biology (4 Credits)
Basic biological concepts and issues for non-biology majors. Credit may not be given for both this course and BIOL 120. Three lecture, two laboratory hours per week.
Carolina Core: SCI

BIOL 110A - General Biology (Audio-Tutorial) (1 Credit)
Addendum to BIOL 110.

BIOL 200 - Plant Science (3 Credits)
An introduction to plant science for the non-major. This course does not carry major credit, and is not designed as a Plant development, physiology, genetics, evolution, and ecology will be considered. Three lecture hours per week.
Prerequisites: for other biology courses.

BIOL 200L - Plant Science Laboratory (1 Credit)
Laboratory exercises, demonstrations, and audio-visual supplements to BIOL 200. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 200.

BIOL 205 - Genetics and Society (3 Credits)
(Designed for non-major students.) Genetic principles, emphasizing human heredity. Relevance of recent advances in genetics. Three lecture hours per week.
Carolina Core: SCI

BIOL 243 - Human Anatomy and Physiology I (3 Credits)
Functional anatomy and physiology of the human body, including the integumentary, skeletal, muscular, and nervous systems. Not available for biology major credit. Three lecture hours per week.
Carolina Core: SCI

BIOL 243L - Human Anatomy and Physiology Laboratory (1 Credit)
The principles of anatomy and physiology as demonstrated by microscopic studies, animal dissection, and physiological experiments. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 243.
Carolina Core: SCI

BIOL 244 - Human Anatomy and Physiology II (3 Credits)
Functional anatomy and physiology of the human body, including the cardiovascular, endocrine, excretory, reproductive, digestive, and respiratory systems. Not available for biology major credit. Three lecture hours per week.
Prerequisites: BIOL 243.
Carolina Core: SCI

BIOL 244L - Human Anatomy and Physiology Laboratory (1 Credit)
A continuation of BIOL 243L. One three-hour laboratory per week.
Corequisite: BIOL 244.
Carolina Core: SCI

BIOL 250 - Microbiology (3 Credits)
An introduction to bacteria and viruses, emphasizing structure, metabolism, and pathogenesis. Discussion of infectious diseases, antigen-antibody relationships, and anti-microbial agents in chemotherapy. Not available for biology major credit. Three lecture hours per week.
Prerequisites: College-level Biology and Chemistry.
Corequisite: BIOL 250L.

BIOL 250L - Microbiology Laboratory (1 Credit)
Not available for biology major credit. Three hours per week.
Prerequisite or Corequisite: BIOL 250.

BIOL 270 - Introduction to Environmental Biology (3 Credits)
Basic ecological principles and the impacts of human population growth and technology. Not for major credit.
Carolina Core: SCI

BIOL 270L - Introduction to Environmental Biology Laboratory (1 Credit)
Demonstrations, data analyses, discussions, and films relating to human ecology, resource use, and environmental impact. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 270.
Carolina Core: SCI

BIOL 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department head is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research
Chemistry (CHEM)

CHEM 101 - Fundamental Chemistry I (4 Credits)
A science elective surveying inorganic and solution chemistry. First of a terminal two-semester sequence. Three lecture, one recitation, and two laboratory hours per week.
Carolina Core: SCI

CHEM 102 - Fundamental Chemistry II (4 Credits)
An introductory survey of organic and biochemistry. Three lecture, one recitation, and two laboratory hours per week.
Prerequisites: 1 year high-school chemistry, CHEM 101, CHEM 111, or equivalent.
Carolina Core: SCI

CHEM 111 - General Chemistry I (3 Credits)
Survey of the principles that underlie all chemistry with applications illustrating these principles. Three lecture and one recitation hours per week.
Prerequisites: C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math (or by placement score into MATH 122, MATH 141 or higher math).
Corequisite: CHEM 111L (unless grade of C or higher in CHEM 111L earned previously).
Carolina Core: SCI

CHEM 112 - General Chemistry II (3 Credits)
Continuation of CHEM 111. Special emphasis on chemical equilibrium. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 111 and C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math.
Corequisite: CHEM 112L.

CHEM 333 - Organic Chemistry I (3 Credits)
Contemporary theories, nomenclature, reactions, mechanisms, and syntheses of carbon compounds. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 112 or in CHEM 142.

CHEM 333L - Comprehensive Organic Chemistry Laboratory I (2 Credits)
Laboratory safety, synthesis, separation, and purification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 334 - Organic Chemistry II (3 Credits)
Continuation of CHEM 333. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 333.

CHEM 334L - Comprehensive Organic Chemistry Laboratory II (2 Credits)
Continuation of CHEM 333L. Spectroscopic identification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
Prerequisites: C or higher in CHEM 333L.
Corequisite: CHEM 334 (unless grade of C or higher in CHEM 334 earned previously).

CHEM 399 - Independent Study (1-3 Credits)
Contract Required.
Graduation with Leadership Distinction: GLD: Research

Comp Sci & Comp Engr (CSCE)

CSCE 101 - Introduction to Computer Concepts (3 Credits)
History, application, and social impact of computers; problem-solving, algorithm development, applications software, and programming in a procedural language.
Carolina Core: ARP

CSCE 102 - General Applications Programming (3 Credits)
Introduction to systematic computer problem-solving and programming for a variety of applications.
Carolina Core: ARP

Economics (ECON)

ECON 123 - The American Economy (3 Credits)
Basic concepts, institutional foundations, structure of the private and public sector, labor markets; major economic problems.

ECON 221 - Principles of Microeconomics (3 Credits)
The study of supply and demand, pricing and cost concepts, firm and consumer decision-making, market structure, and government policies.

ECON 222 - Principles of Macroeconomics (3 Credits)
The study of gross domestic product, business cycles, economic growth, inflation, unemployment, and monetary and fiscal policy.

ECON 301 - Money and Banking (3 Credits)
The role of money in the market economy. Commercial banks, the Federal Reserve System, and monetary policy. Cannot be used to satisfy major requirements. 03: 07/05/2019.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

ECON 363 - Business Finance (3 Credits)
The procurement and management of wealth by privately owned profit-seeking enterprises. 03: 07/05/2019.
Prerequisites: ECON 221, ACCT 225, and 3 hours of statistics at the 200-level.

ECON 379 - Government Policy Toward Business (3 Credits)
An analysis of public policy toward business in the United States. Emphasis is on the desirability of various policies in light of their consequences for the general welfare.
Prerequisites: ECON 221 and ECON 222, or ECON 224.

English (ENGL)

ENGL 101 - Critical Reading and Composition (3 Credits)
Instruction in strategies for critically reading and analyzing literature and non-literary texts; structured, sustained practice in composing expository and analytical essays.
Carolina Core: CMW

ENGL 102 - Rhetoric and Composition (3 Credits)
Instruction and intensive practice in researching, analyzing, and composing written arguments about academic and public issues.
Prerequisites: C or better in ENGL 101 or equivalent credit.
Carolina Core: CMW, INF
ENGL 282 - Special Topics in Fiction (3 Credits)
Special topics in fiction from several countries and historical periods, illustrating the nature of the genre. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 284 - Drama (3 Credits)
Drama from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and 102 or equivalent.

Carolina Core: AIU

ENGL 285 - Special Topics in American Literature (3 Credits)
Special topics in American literature exemplifying persistent themes of American culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and 102 or equivalent.

Carolina Core: AIU

ENGL 286 - Poetry (3 Credits)
Poetry from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and 102 or equivalent.

Carolina Core: AIU

ENGL 287 - American Literature (3 Credits)
An introduction to American literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 288 - English Literature (3 Credits)
An introduction to English literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 290 - Great Books of the Western World I (3 Credits)
European masterpieces from antiquity to the beginning of the Renaissance.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.
Cross-listed course: CPLT 301
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 291 - Great Books of the Western World II (3 Credits)
European masterpieces from the Renaissance to the present.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.
Cross-listed course: CPLT 302
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 292 - Professional and Civic Engagement Leadership Experiences
Graduation with Leadership Distinction: Cross-listed course:
Prerequisites: European masterpieces from the Renaissance to the present.

Carolina Core: AIU

ENGL 390 - Great Books of the Western World I (3 Credits)
European masterpieces from antiquity to the beginning of the Renaissance.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.
Cross-listed course: CPLT 301
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 391 - Great Books of the Western World II (3 Credits)
European masterpieces from the Renaissance to the present.
Prerequisites: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.
Cross-listed course: CPLT 302
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Research

ENGL 405 - Shakespeare's Tragedies (3 Credits)
Prerequisite: ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.

ENGL 406 - Shakespeare's Comedies and Histories (3 Credits)
Note: All Literature Courses 300 and above require ENGL 101, ENGL 102, and one course between ENGL 270-ENGL 292.

Finance (FINA)

FINA 363 - Introduction to Finance (3 Credits)
Basic concepts of finance related to decision making.
Prerequisites: ECON 221, ACCT 225, and STAT 206.

History (HIST)

HIST 101 - European Civilization from Ancient Times to the Mid-17th Century (3 Credits)
The rise and development of European civilization from its Mediterranean origins through the Renaissance and Reformation.
Carolina Core: GHS

HIST 102 - European Civilization from the Mid-17th Century to the Present (3 Credits)
European development and expansion from the mid-17th century to the present.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 109 - Introduction to Latin American Civilization (3 Credits)
A discussion of the political, cultural, and economic forces which have conditioned the development of institutions and ideas in Spanish and Portuguese America.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 111 - United States History to 1865 (3 Credits)
A general survey of the United States from the era of discovery to 1865, emphasizing major political, economic, social, and intellectual developments.
Carolina Core: GHS

HIST 112 - United States History since 1865 (3 Credits)
A general survey of the United States from 1865 to the present, emphasizing major political, economic, social, and intellectual developments. Honors sections are available for students in the honors program.
Carolina Core: GHS

HIST 311 - The Age of Absolutism, 1648-1789 (3 Credits)
A survey of European political, economic, and intellectual development from the age of Louis XIV to the eve of the French Revolution.

HIST 312 - French Revolution and Napoleon (3 Credits)
The changes in France and Europe during the revolutionary decade, the rise of Napoleon, and the establishment of French hegemony over the Continent.
**Management Science (MGSC)**

MGSC 290 - Computer Information Systems in Business (3 Credits)
An introduction to the effective use of information systems tools in day-to-day business communications, analysis, and decision making.

MGSC 291 - Applied Statistics for Business (3 Credits)
Descriptive statistics, topics in probability, statistical inference and modeling. Emphasis on the collection, summarization, analysis, and reporting of numerical findings relevant to business decisions and economic analysis.

**Prerequisites:** STAT 206.

**Marketing (MKTG)**

MKTG 350 - Principles of Marketing (3 Credits)
Principles and concepts underlying marketing functions, including the conception, pricing, promotion, and distribution of products and services and the role of marketing in society. A. major sections; ECON 224, ACCT 222 for non-B.A. major sections.

**Prerequisites:** ECON 221/ECON 222, ACCT 225/ACCT 226 for B.

**Mathematics (MATH)**

MATH 111 - Basic College Mathematics (3 Credits)
Basic college algebra; linear and quadratic equations, inequalities, functions and graphs of functions, exponential and logarithm functions, systems of equations.

**Prerequisites:** placement through Algebra version of the Mathematics Placement Test.

MATH 112 - Trigonometry (2 Credits)
Topics in trigonometry specifically needed for MATH 141, MATH 142, MATH 241. Circular functions, analytic trigonometry, applications of trigonometry. Credit may not be received for both MATH 112 and MATH 115.

**Prerequisites:** C or better in MATH 111 or MATH 111I, or placement through Algebra version of the Mathematics Placement Test.

MATH 115 - Precalculus Mathematics (4 Credits)
Topics in algebra and trigonometry specifically needed for MATH 141, MATH 142, MATH 241. Subsets of the real line, absolute value, polynomial, rational, inverse, logarithmic, exponential functions; circular functions; analytic trigonometry.

**Prerequisites:** C or better in MATH 111 or MATH 111I, or placement through Precalculus version of the Mathematics Placement Test.

MATH 122 - Calculus for Business Administration and Social Sciences (3 Credits)
Derivatives and integrals of elementary algebraic, exponential, and logarithmic functions. Maxima, minima, rate of change, motion, work, area under a curve, and volume.

**Prerequisites:** C or better in MATH 111, MATH 111I or MATH 115 or placement through Algebra version of the Mathematics Placement Test.

**Carolina Core:** ARP
MATH 141 - Calculus I (4 Credits)
Functions, limits, derivatives, introduction to integrals, the Fundamental Theorem of Calculus, applications of derivatives and integrals. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in Math 112, MATH 115, or MATH 116, or placement through Precalculus version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 142 - Calculus II (4 Credits)
Methods of integration, sequences and series, approximations. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in MATH 141.

Carolina Core: ARP

MATH 170 - Finite Mathematics (3 Credits)
Elementary matrix theory; systems of linear equations; permutations and combinations; probability and Markov chains; linear programming and game theory.
Prerequisites: C or better in MATH 111 or MATH 111I or MATH 122, or placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 174 - Discrete Mathematics for Computer Science (3 Credits)
Logic, number theory, sequences, series, recursion, mathematical induction, set theory, enumeration, functions, relations, graphs and trees. Connections to computers and to programming are emphasized when possible.
Prerequisites: C or better in MATH 115, MATH 116, MATH 122, or MATH 141, or placement through the pre-calculus version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 221 - Basic Concepts of Elementary Mathematics I (3 Credits)
The meaning of number, fundamental operations of arithmetic, the structure of the real number system and its subsystems, elementary number theory. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 111 or MATH 111I or placement through Algebra version of the Mathematics Placement Test.

MATH 222 - Basic Concepts of Elementary Mathematics II (3 Credits)
Informal geometry and basic concepts of algebra. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 221.

MATH 241 - Vector Calculus (3 Credits)
Vector algebra, geometry of three-dimensional space; lines, planes, and curves in space; polar, cylindrical, and spherical coordinate systems; partial differentiation, max-min theory; multiple and iterated integration, line integrals, and Green's theorem in the plane.
Prerequisites: C or better in MATH 142.

MATH 242 - Elementary Differential Equations (3 Credits)
Ordinary differential equations of first order, higher order linear equations, Laplace transform methods, series methods; numerical solution of differential equations. Applications to physical sciences and engineering.
Prerequisites: C or better in MATH 142.

Music (MUSC)

MUSC 101A - Secondary Applied Music/ Flute/ Piccolo (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101B - Secondary Applied Music/ Oboe/ English Horn (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101C - Secondary Applied Music/ Clarinet (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101D - Secondary Applied Music/ Bassoon (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101E - Secondary Applied Music/ Saxophone (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101F - Secondary Applied Music/ French Horn (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101G - Secondary Applied Music/ Trumpet (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101H - Secondary Applied Music/ Trombone (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101I - Secondary Applied Music/ Euphonium (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101J - Secondary Applied Music/ Tuba (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101K - Secondary Applied Music/ Percussion (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101L - Secondary Applied Music/ Harpsichord (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101N - Secondary Applied Music/ Classical Guitar (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101O - Secondary Applied Music/ Organ (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101P - Secondary Applied Music/ Piano (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101Q - Secondary Applied Music/ Harp (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101R - Secondary Applied Music/ Violin (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.
MUSC 101S - Secondary Applied Music/ Viola (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101T - Secondary Applied Music/ Violoncello (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101U - Secondary Applied Music/ Double Bass (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101V - Secondary Applied Music/ Voice (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101W - Secondary Applied Music/ Service Playing (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 101Z - Secondary Applied Music/ Jazz (1-2 Credits)
Course consists of individual instruction including individualized assignments and regular private instruction and review. Not Auditable.

MUSC 110 - Introduction to Music (3 Credits)
Perceptive listening and appreciation of musical elements, forms and style periods, including composers’ lives, individual styles and representative works. Emphasis on classical music; jazz and American popular music included.

Carolina Core: AIU

MUSC 310 - Selected Topics (3 Credits)
Course content varies by title. Intended for nonmajors unless otherwise indicated.

Carolina Core: AIU

Palmetto College (PCAM)

PCAM 104 - Foundations of Composition (3 Credits)
A course in writing skills with practice in composing essays, including intensive review of grammar, punctuation, and mechanics.

PCAM 105 - Contemporary College Mathematics (3 Credits)
Linear and quadratic equations and models, functions, exponential models, logarithms, systems of equations, fundamentals of probability and statistics.

PCAM 106 - Foundations of College Algebra (3 Credits)
Operations on real numbers, linear equations and inequalities, quadratic equations, factoring, absolute value equations, exponential and radical expressions, graphs, and functions. Additional topics may include math study skills, logarithms, exponential functions, probability, statistics, systems of equations, polynomial division, and mathematical modeling.

Prerequisites: C or better in PCAM 106 students must pass the math placement test (MPT) with a minimum score of MB1 or MA2.

PCAM 141 - Introduction to Computer Keyboarding (3 Credits)
Keyboarding using the touch method, inputting, editing, and printing. Designed for students without keyboarding skills. Elective credit only. This course might not apply toward associate's degrees or Columbia baccalaureate degrees.

PCAM 151 - Computer Literacy and Applications (3 Credits)

PCAM 201 - Introduction to Internet Research (3 Credits)
Developing the means by which students may learn to access the Internet through mainframe and PC connections to accomplish specific research needs. This course might not apply toward associate degrees or Columbia baccalaureate degrees.

Prerequisites: CSCE 101.

PCAM 205 - Foundations of Leadership (3 Credits)
This course combines leadership theory with practical application, equipping students with the knowledge and skills needed to work more effectively with people, become better leaders, and reach their professional goals.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PCAM 299 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and academic dean is required for undergraduate studies. May be taken for elective credit only. May be repeated for up to 6 credits hours.

Palmetto Programs (PALM)

PALM 493 - South Carolina Studies (3 Credits)
Reading and writing about South Carolina from the perspective of multiple disciplines, incorporating elements of the student’s major and cognate.

PALM 494 - Internship (3 Credits)
Supervised immersion and exploration in a field related to the major, with a career, cultural, or community focus.

Prerequisites: C or better in PALM 493.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

PALM 495 - Service-Learning (3 Credits)
An exploration of theories of service-learning with application of practical solutions to meet community needs.

Prerequisites: C or better in PALM 493.

Experiential Learning: Experiential Learning Opportunity

Physical Education (PEDU)

PEDU 103 - Jogging (1 Credit)
Exercise, lectures, and self-evaluation for weight control and fitness improvement.

PEDU 104 - Personal Fitness and Weight Control (1 Credit)
Advanced techniques for controlling weight and improving fitness through exercise, lectures, and self-evaluation.

PEDU 105 - Weight Training (1 Credit)
Fundamentals of progressive resistance exercise training.

PEDU 106 - Advanced Weight Training (1 Credit)
Advanced techniques.

Prerequisites: PEDU 105.

PEDU 107 - Group Exercise (1 Credit)
Cardio-respiratory fitness, flexibility, muscular strength and endurance, and agility through various group exercise formats while utilizing a variety of equipment.

PEDU 110 - Orientation to Physical Education (1 Credit)
Experiences in a variety of physical-activity areas.

PEDU 105 - Foundations of Leadership (3 Credits)
Supervised immersion and exploration in a field related to the major, with a career, cultural, or community focus.

Prerequisites: C or better in PALM 493.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

PALM 495 - Service-Learning (3 Credits)
An exploration of theories of service-learning with application of practical solutions to meet community needs.

Prerequisites: C or better in PALM 493.

Experiential Learning: Experiential Learning Opportunity

Physical Education (PEDU)

PEDU 103 - Jogging (1 Credit)
Exercise, lectures, and self-evaluation for weight control and fitness improvement.

PEDU 104 - Personal Fitness and Weight Control (1 Credit)
Advanced techniques for controlling weight and improving fitness through exercise, lectures, and self-evaluation.

PEDU 105 - Weight Training (1 Credit)
Fundamentals of progressive resistance exercise training.

PEDU 106 - Advanced Weight Training (1 Credit)
Advanced techniques.

Prerequisites: PEDU 105.

PEDU 107 - Group Exercise (1 Credit)
Cardio-respiratory fitness, flexibility, muscular strength and endurance, and agility through various group exercise formats while utilizing a variety of equipment.

PEDU 110 - Orientation to Physical Education (1 Credit)
Experiences in a variety of physical-activity areas.
Physics (PHYS)

PHYS 201 - General Physics I (3 Credits)
First part of an introductory course sequence. Topics include mechanics, and selections from wave motion, sound, fluids, and heat. No previous background in physics is assumed. 
Prerequisites: C or better in MATH 111, MATH 111I, MATH 112, MATH 115, MATH 116, MATH 122, MATH 141, or by placement score into MATH 122, MATH 141, or higher.

Carolina Core: SCI

PHYS 201L - General Physics Laboratory I (1 Credit)
Prerequisite or Corequisite: PHYS 201.

Carolina Core: SCI

PHYS 202 - General Physics II (3 Credits)
Continuation of PHYS 201; includes electromagnetism, relativity, quantum physics, atomic and nuclear physics. 
Prerequisites: C or better in PHYS 201.

Carolina Core: SCI

PHYS 202L - General Physics Laboratory II (1 Credit)
Prerequisite or Corequisite: PHYS 202.

Carolina Core: SCI

Psychology (PSYC)

PSYC 101 - Introduction to Psychology (3 Credits)
An introduction to and survey of the basic concepts and findings within the field of psychology. 
Carolina Core: GSS

PSYC 103 - Psychology of Adjustment (3 Credits)
Introduction to theories and processes underlying and facilitating human adjustment in the community, family, and workplace.

PSYC 226 - Research Methods in Psychology (3 Credits)
Basic principles and methodology. 
Prerequisites: PSYC 101 or SCHC 130.

Graduation with Leadership Distinction: GLD: Research

PSYC 227 - Psychological Statistics (3 Credits)
Introduction to statistical methods essential for psychological research. 
Prerequisites: PSYC 226 and MATH 111 or placement out of MATH 111.

PSYC 300 - Human Sexual Behavior (3 Credits)
Psychological, physiological, and sociological factors of human sexual behavior and attitudes.

PSYC 399 - Independent Study (1-6 Credits)
Closely supervised project or research experience in psychology. Approved contract required. May be repeated for up to six credits. Not for psychology major credit. 
Prerequisites: PSYC 101.

Graduation with Leadership Distinction: GLD: Research

PSYC 410 - Behavioral and Mental Disorders (3 Credits)
Covers the classification, diagnosis, etiological theories, and treatments of the major mental and emotional disorders. 
Prerequisites: PSYC 101 or SCHC 130.

PSYC 420 - Survey of Developmental Psychology (3 Credits)
Psychological development from conception to late adulthood. Topics include physical, cognitive, and social processes associated with development at each stage of the life cycle.
Prerequisites: PSYC 101 or EDPY 335 or SCHC 130.

PSYC 430 - Survey of Social Psychology (3 Credits)
Introduction to theory and research in social psychology from a psychological viewpoint. Topics include social perception, social cognition, attitudes, interpersonal relationships, aggression, prosocial behavior, and group processes. 
Prerequisites: PSYC 101 or SCHC 130.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
PSYC 465 - Health Psychology (3 Credits)
Application of psychological theories and assessment and treatment methodologies for health maintenance and the diagnosis and treatment of illness.
Prerequisites: PSYC 101 or SCHC 130

Religious Studies (RELG)

RELG 101 - Exploring Religion (3 Credits)
Beliefs and practices of the world's religions and the methods scholars use to study them.
Carolina Core: GSS

RELG 120 - Comparative Religion (3 Credits)
Issues, theories, and debates that shape global religious traditions, cultures, and communities; examination of historical contexts and development, applying social scientific inquiry and methods to analyze relevant current circumstances and concerns.

RELG 202 - Introduction to Reason and Faith (3 Credits)
Critical study of the intellectual strands leading to Western disconnections between reason and faith; the search for balance between belief and reason with emphasis on contemporary developments.

RELG 240 - Introduction to Christianity (3 Credits)
Introduction to the Christian religion, with emphasis on the history of the major traditions and movements that have shaped the multicultural practices and social impact of modern global Christianity.

RELG 301 - Hebrew Bible (Old Testament) (3 Credits)
Modern study of the Hebrew Bible from historical, literary, and archeological points of view. Reading and analysis of texts in translation. Cross-listed course: JSTU 301

RELG 302 - New Testament (3 Credits)
Historical and critical study of the New Testament writings, with emphasis on origins, production, and transmission.

Sociology (SOCY)

SOCY 101 - Introductory Sociology (3 Credits)
An introduction to sociological facts and principles: an analysis of group-making processes and products.
Carolina Core: GSS

SOCY 305 - Sociology of Families (3 Credits)
Sociological perspectives related to various aspects of family behaviors, roles, and values.
Prerequisites: SOCY 101.

Cross-listed course: WGST 305
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 307 - Sociology of Religion (3 Credits)
Sociological perspectives related to selected aspects of religious behavior. Includes references to non-Western religions.
Cross-listed course: RELG 338
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 308 - Community Organization (3 Credits)
An analysis of formal and informal organization, the interrelationships among public and private agencies, and means through which community action programs are initiated, coordinated, and maintained.
Graduation with Leadership Distinction: GLD: Community Service, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 353 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.
Prerequisites: SOCY 101.

Cross-listed course: CRJU 341
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

Spanish (SPAN)

SPAN 109 - Beginning Spanish I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have never studied Spanish or placed by examination into SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110; SPAN 111; or SPAN 121.
Carolina Core: GFL

SPAN 110 - Beginning Spanish II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have completed SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110; SPAN 111; or SPAN 121.
Carolina Core: GFL

SPAN 121 - Elementary Spanish (3 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in Spanish. Admission only by proficiency examination. Credit may be received for only one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121.
Carolina Core: GFL

SPAN 122 - Basic Proficiency in Spanish (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: SPAN 109, SPAN 110, SPAN 111, or SPAN 121 or by placement examination.
Carolina Core: GFL

SPAN 398 - Special Topics in Hispanic Studies (3 Credits)
Intensive study of selected topics of the Hispanic world. Course content varies and will be announced in the schedule of classes by title. May be repeated as content varies by title. Taught in English.

SPAN 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students. Department permission required for transfer students.
Prerequisites: B or better in SPAN 210 or SPAN 211; Placement at 300 level on Phase II placement exam.
Graduation with Leadership Distinction: GLD: Research
Speech (SPCH)

SPCH 140 - Public Communication (3 Credits)
Introduction to theory and practice of oral communication in public, social, and institutional contexts. Includes foundational and cumulative training in the invention, performance, and critical analysis of oral communication, with emphasis on argumentation, persuasion, audience analysis, delivery, and ethical forms of engagement.

Carolina Core: CMS
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Theatre (THEA)

THEA 170 - Fundamentals of Acting (3 Credits)
Introduction to the art and craft of acting. Practical exploration through improvisation and scripted scene work. Includes a brief history of the development of modern acting techniques.

Carolina Core: AIU

University Experience (UNIV)

UNIV 101 - The Student in the University (3 Credits)
The purposes of higher education and potential roles of the student within the university. Open to freshmen. Also open to other undergraduate students in their first semester of enrollment.

Women & Gender Studies (WGST)

WGST 112 - Introduction to Women's and Gender Studies (3 Credits)
A social science perspective of women in psychological, sociological, historical, anthropological, economic, and political contexts; the changing roles, images, and institutions.

Carolina Core: GSS, VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy

WGST 113 - Women's Health (3 Credits)
Basic functioning of the female body; effects of society on processes of health and disease. Not for natural sciences credit.

Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
**Welcome to the UofSC Sumter Bulletin**

The UofSC Sumter Academic Bulletin is the official document of record concerning academic programs and regulations.

This bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina. The University reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

**Bulletin Updates and Corrections**

Noncurricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the University Registrar (bulletin@sc.edu) on the Columbia Campus. Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletins.

**Printing Portions of the Online Bulletins**

The academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

**Additional Information**

Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement.

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost on the Columbia campus.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton St.
Columbia, South Carolina
telephone 803-777-3854

**UofSC Sumter Mission Statement**

Approved by the Board of Trustees- October 11, 2019

The primary mission of the University of South Carolina System is the education of the state's diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate's, bachelor's, master's, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

**UofSC Sumter Mission Statement**

Approved by the Board of Trustees- October 11, 2019

Next Board of Trustees Scheduled Review- January 2023

The Sumter regional Palmetto College campus is a branch campus of the University of South Carolina Columbia. Sumter has as its mission to provide higher education and intellectual leadership for its service area. At the heart of this mission is a teaching faculty of high quality dedicated to excellence in instruction, scholarship, public and professional service, and creative endeavor which enrich the classroom experience. The Sumter regional Palmetto College campus offers a varied curriculum grounded in the liberal arts and focused on preparing students to continue their education in the University of South Carolina System and throughout life.

The Sumter regional Palmetto College campus recruits students prepared to succeed in completing a baccalaureate-level education. While the institution does not offer remedial instruction, it is nonetheless able to admit most students who apply due to the close working relationship between students and faculty. The Sumter regional Palmetto College campus was established to encourage higher education in the counties of Clarendon, Lee, Kershaw, Sumter, and Williamsburg. The original design of the institution incorporated a flexibility that has allowed changes in institutional capability with increasing educational demands of constituents.

Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, the institution awards the Associate in Arts and Associate in Science degrees and provides for the completion of selected bachelor’s degrees on campus through cooperative agreements and delivery structures with other
University of South Carolina System institutions. The Sumter regional Palmetto College campus also provides general education and upper division coursework applicable to baccalaureate degree programs offered through colleges and universities nationwide. In addition to academic coursework, the mission of the campus includes non-credit courses, seminars, and workshops made available to the community for cultural enrichment and professional development.

The traditions of cultural diversity and freedom of thought are valued at the Sumter regional Palmetto College campus. In a learning environment that develops respect for racial, geographical, intellectual, and economic diversity and an awareness of individual, societal, and global responsibilities, Sumter promotes courses, activities, and attitudes which influence the life of the mind in men and women and instill in them a thirst to continue learning throughout life.

The Sumter regional Palmetto College campus emphasizes the development of the whole person and especially seeks to foster in students the disciplines essential to an educated citizenry. Core competencies, including the ability to communicate through effective writing and articulate speech; computational and quantitative mastery; creative and critical thinking; and the duties of citizenship are strategically integrated within the curriculum. Classroom experiences, student activities, and physical education programs also provide opportunities for cultural enrichment, leadership development, intellectual growth and interpersonal relationships, all contributing to a sense of self-reliance and a joy of learning.

Accreditation

The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master’s, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses’ accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

UofSC System Officers

Robert L. “Bob” Caslen Jr., President
William F. “Bill” Tate IV, Executive Vice President for Academic Affairs and Provost
Ed Walton, Senior Vice President for Administration
Mark Bieger, Chief of Staff
Caroline Agardy, Vice President for Human Resources
Doug Foster, Vice President for Information Technology and Chief Information Officer
Prakash Nagarkatti, Vice President for Research
Dennis Pruitt, Vice President for Student Affairs and Vice Provost for Academic Support
Larry Thomas, Vice President for Communications
Will Elliott, Interim Chief Development Officer
Ray Tanner, Director of Athletics
Julian R. Williams, Vice President for Diversity, Equity and Inclusion
Bill Kirkland, Executive Director of the Office of Innovation, Partnership, and Economic Engagement
Walter “Terry” Parham, General Counsel and Executive Director of Compliance Programs

Mid-Carolina Commission for Higher Education

Austin E. Floyd, Sumter County, Chair
William H. Price, Sumter County, Vice Chair
Robert B. Smith, Sumter County, Treasurer
August J. “G.G.” Cutter, Clarendon County
John M. Brabham, Jr., Sumter County
Isaac M. Carr, Sumter County
Kay Oldhouser Davis, Ph.D., Sumter County
Angus F. McDuffie, Sumter County
Grady A. Brown, Lee County

Sumter Partnership of the UofSC Educational Foundation

William Dwayne Chase, President
Bronwyn Kelson McElveen, Vice President
Paul E. Robbins, Treasurer
Charles B. Bostic, Jr.
William O. Buyck, Jr.
Alan S. Cannon
E. Lee Craig
Thaddeus Cortes Dickey, II.
Francis L. Hill, Jr.
Joyce H. Hodge
James E. (Jim) Jones
Spencer A. Jordan, Ph.D.
Ronald F. (Roby) Kelley, Jr. V
Amy Anders Land
Theo L. Lane, Jr.
Vonda K. Mociun
Delores Ditty Poston
Hennie van Bulck, Ph.D.
Melissa H. (Boo) White
Walter S. Wilson
Harris Pastides, Ph.D., President, UofSC, ex officio
Austin E. Floyd, Chair, Mid-Carolina Commission for Higher Education, ex officio
Michael E. Sonntag, Ph.D., Palmetto College Campus Dean, UofSC Sumter, and Director of Sumter Partnership of the UofSC Educational Foundation, ex officio
Vicki M. Singleton, Secretary/Assistant Treasurer, ex officio

UofSC Sumter Administration

Office of the Dean

Michael E. Sonntag, Ph.D. Palmetto College Campus Dean
Paula Epperson, Executive Assistant to the Dean

Academic Advisement

Hayes D. Hampton, Ph.D. Coordinator of Advisement

Academic Affairs

Eric M. Reisenauer, Ph.D., Executive Associate Dean for Academic and Student Affairs
Carol J. Reynolds, Administrative Assistant

Administrative and Financial Services

Hendrikus van Bulck, Ph.D., Interim Assistant Dean for Business and Administrative Management
Admissions Services
Keith E. Britton, Director
Darren Witt, Counselor/Recruiter
Carolyn June, Admissions Processor
Renee Cocklin, Admissions Processor

Educational Partnerships/Continuing Education
Lara Richardson, Director of Educational Partnerships and Continuing Education

Athletic Department
Adrienne N. Cataldo, Director of Athletics, Head Softball Coach
Hope Giordano, Head Women's Golf Coach
Timothy D. Medlin, Assistant Director of Athletics, Head Baseball Coach
Alex Poda, Head Tennis Coach
Christie Stutz, Donor Development and Fundraising Coordinator
Kendall Winge, Assistant Softball Coach
Skottowe Fox, Head Men's Soccer Coach

Kristopher E. Weissmann, Director of Student Life

University Advancement
Erin Duffie, Marketing and Public Relations Assistant

Development and Alumni Services
Vicki Singleton, Executive Director of Development and Alumni Services

Carolinian Creed
The community of scholars at the University of South Carolina is dedicated to personal and academic excellence.

Choosing to join the community obligates each member to a code of civilized behavior.

As a Carolinian...

- I will practice personal and academic integrity;
- I will respect the dignity of all persons;
- I will respect the rights and property of others;
- I will discourage bigotry, while striving to learn from differences in people, ideas and opinions;
- I will demonstrate concern for others, their feelings, and their need for conditions which support their work and development.

Allegiance to these ideals requires each Carolinian to refrain from and discourage behaviors which threaten the freedom and respect every individual deserves.

History and Facilities

History
The citizens of Sumter and adjacent counties saw a need to provide higher-education opportunities at an affordable price. In 1965, by an act of the state legislature, the Sumter County Commission for Higher Education was created and granted authority to establish in Sumter County facilities to offer standard freshman and sophomore courses and such other courses as were deemed desirable. To fulfill this purpose and objective, the commission entered into a long-term contract with Clemson University for the purpose of operating the new educational facilities.

A local bond issue was passed, and with federal assistance a physical plant, with capacity for 550 to 600 students, was erected on an attractive 35-acre tract of land located in the Palmetto Park area, made available jointly by the city and county of Sumter.

In August 1966 Clemson University at Sumter opened its doors to its first class, and in December 1968 the campus was officially accredited by the Southern Association of Colleges and Schools. The campus has retained its accreditation since that time.

On July 23, 1973, after negotiations between the Sumter County Commission for Higher Education and officials of Clemson University and the University of South Carolina, operations of the Sumter campus were transferred to the University of South Carolina. This change was recognized by the South Carolina Commission on Higher Education, and after evaluating a self-study and visiting the campus in 1975, the Southern Association of Colleges and Schools officially accepted the change. In 1996 the Sumter County Commission for Higher Education was restructured as the Mid-Carolina Commission for Higher Education.

In the fall of 1978, USC Sumter developed a new evening program of courses designed to meet the needs of adult students. This evening program consists of two eight-week sessions per semester and one eight-week summer session, thus enabling students to carry a full-time load solely with evening hours. An identical program is also offered primarily for military personnel at Shaw Air Force Base, but with an emphasis on upper-level courses not regularly taught at USC Sumter.

Facilities
The University of South Carolina Sumter is situated on 50 acres of beautifully landscaped grounds, with eight modern and attractive administrative and academic buildings.

The Administration Building houses the offices of the dean; associate dean for academic affairs; assistant dean for University advancement; assistant dean for administrative and financial services; assistant dean for student affairs; director of marketing and public relations; director of admissions, services, and recruitment; admissions; financial aid; records; business; advisement/counseling center; and others. It also has conference rooms and a faculty lounge.

The Business Administration Building contains classrooms and a computer instructional lab. It also houses the Opportunity Scholars Program.

The Science Building has three lecture rooms and fully equipped laboratory facilities for astronomy, chemistry, physics, botany, and zoology. Also in the Science Building are offices for the science faculty and a lobby with tables for group study.

The Anderson Library of the Sumter campus provides a pleasant setting for faculty and students to read and study. The 90,000-volume collection is especially selected to assist students in their undergraduate studies. Recreational reading is also provided. The library houses resources in many formats, including books, periodicals on microfilm, cassette lectures, microfilm readers, and a microfiche viewer. Services offered by the library include photocopying, microfilm copying, online indexes, databases, full-text journals, the online catalog, and bibliographic instruction for groups or individuals.

The Anderson Library also contains computer labs and two computer instructional labs. The Computer Services Division is also located in the library. Art displays can be seen in the University Gallery located off the main lobby. The Anderson Library also has private study rooms for students, a conference room, and a lounge area. The rear of the building contains six large classrooms and lobby space for studying.

The Student Union Building features the campus bookstore, a food court, and an open commons area with an adjacent outdoor terrace, as well as meeting rooms for student organizations. The commons area and terrace offer students a place where they may gather to eat, talk, or study. This commons area can also be used for dances and other recreational programs. The building also contains a lounge area for relaxation, reading, and viewing television.

The Schwartz Building houses the Division of Humanities, Social Sciences, and Education. It contains an enhanced classroom with two-
way compressed video and audio capabilities, as well as classrooms, faculty offices, and two conference rooms.

The Nettles Building contains the campus recreation and physical education department facilities, which include a wellness center, three racquetball/handball courts, a multiprogram gym, a first-aid facility, and a 500-seat auditorium.

The Arts and Letters building is the home of the Division of Arts and Letters. The building also contains a lecture hall/conference center with small break-out rooms, a banquet hall, and faculty offices, classrooms, and art labs.

Dormitory facilities are not available at the Sumter campus. Students whose homes are not in the Sumter area may find rooms in private homes or apartments.

A limited number of classrooms are also provided by the United States Air Force for USC Sumter’s use on Shaw AFB, as well as office facilities for the Shaw coordinator.

Admissions

General Information

The University of South Carolina Sumter strives to provide an opportunity to any student who is capable of benefiting from a college education and shows promise of successfully completing that education. The University encourages all qualified persons to apply. Equal educational opportunities are offered to students regardless of race, sex, religion, color, age, or national origin.

All admissions policies and procedures are subject to continuous review by the Faculty Admissions Committee and the admissions services office; and, although an effort will be made to publicize changes, these policies and procedures may be changed without notice.

Prospective students may obtain application forms from the admissions services office, located in the Administration Building. Application forms are also available at the Shaw office of UofSC Sumter. You may also apply for admission via the website (http://www.uscsumter.edu).

All interested persons should apply well in advance of the beginning of the term of entry. Dates for guaranteed processing of applications have been set and are published in the UofSC Sumter Master Schedule of Classes.

Applications should be submitted before these dates:

- Fall term: July 15
- Fall II term: September 15
- Spring term: November 15
- Spring II term: February 15
- Summer terms: three weeks prior to registration for the term.

Final determination of whether a student is accepted depends on final receipt and evaluation of all official credentials.

The University reserves the right to place conditions on the admission of any student. In the event such action is taken, the conditions will be clearly explained in the letter of acceptance.

Categories of Admission

Exemptions on the following policies may be made by the University on an individual basis. Contact the UofSC Sumter Admissions Services Office for details.

A student is any person who is admitted, enrolled, or registered for study at the University of South Carolina for any academic period. Persons who are not officially enrolled for a particular term but who have a continuing student relationship with the University of South Carolina are considered students.

Freshman Admission

A freshman applicant is a person who has not attended a regionally accredited college or university after high-school graduation.

Requirements

Freshman applicants must have either a high-school diploma or its equivalent (GED) prior to enrolling. Accepted applicants must have senior grades and a verification of graduation sent as soon as they are available.

Applicants who did not graduate from high school must send transcripts of all available work and a copy of a GED certificate or satisfactory GED test scores.

Freshman applicants must submit:

1. completed application
2. specified nonrefundable application fee
3. official high-school record complete up to the time of application
4. official entrance examination scores (either SAT or ACT).

Prospective students must have adequate preparation for the curriculum in which they plan to enroll. At a minimum, applicants for admission are required to complete a college preparatory program with units distributed among the following academic subjects:

College Preparatory Course Prerequisite Requirements

Four Units of English: At least two units must have strong grammar and composition components, at least one must be in English literature, and at least one must be in American literature. Completion of College Preparatory English I, II, III, and IV will meet this criterion.

Four Units of Mathematics: These include Algebra I (for which Applied Mathematics I and II may count together as a substitute, if a student successfully completes Algebra II), Algebra II, and Geometry. A fourth higher-level mathematics course should be selected from among Algebra III/trigonometry, precalculus, calculus, statistics, discrete mathematics, or a capstone mathematics course and should be taken during the senior year.

Three Units of Laboratory Science: Two units must be taken in two different fields of the physical or life sciences and selected from among biology, chemistry, or physics. The third unit may be from the same field as one of the first two units (biology, chemistry, or physics) or from any laboratory science for which biology and/or chemistry is a prerequisite.

Courses in earth science, general physical science, or introductory or general environmental science for which biology and/or chemistry is not a prerequisite will not meet this requirement. It is strongly recommended that students take physical science (taught as a laboratory science) as a prerequisite to the three required units of laboratory science outlined in this section. It is also strongly recommended that students desiring to
pursue careers in science, mathematics, engineering or technology take one course in all three fields.

**Two Units of the Same Foreign Language**

**Three Units of Social Science:** One unit of U.S. History is required; a half unit of Economics and a half unit in Government are strongly recommended.

**One Unit of Fine Arts:** One unit in Appreciation of, History of, or Performance in one of the fine arts.

**Electic:** One unit must be taken as an elective. A college preparatory course in Computer Science (i.e., one involving significant programming content, not simply keyboarding) is strongly recommended for this elective. Other acceptable electives include college preparatory courses in English; fine arts; foreign languages; social science; humanities; laboratory science (excluding earth science, general physical science, general environmental science, or other introductory science courses for which biology and/or chemistry is not a prerequisite); or mathematics above the level of Algebra II.

**One Unit of Physical Education or ROTC**

Total Units: 19

In addition to completion of the above units, students must meet requirements based on entrance examination scores and weighted core GPA.

Applicants must complete additional units to meet or exceed state and local high-school graduation requirements. In choosing these electives, students should consider the recommendations given in the preceding listing for specific prospective majors.

Applicants must apply for and take the required entrance examinations well in advance of the term for which they seek admission, and they are responsible for having the results of these examinations sent to the University. Applicants over the age of 23 may not be required to submit entrance examination results; however, they must submit other credentials which give evidence of reasonable academic potential. Entrance examination scores may be required in the absence of satisfactory credentials or evidence of potential. Some programs require entrance test scores for all students, regardless of age.

**Other Admissions Opportunities**

**GED**

Students who did not complete high school but who took the GED equivalency test must provide their GED certificate and high-school transcript through grade completed. An ACT/SAT score may be requested from applicants under the age of 23.

**Mature Students**

Candidates over the age of 23 may be considered for admission without ACT/SAT scores. They must, however, submit proof of high-school graduation or its state equivalency.

**Admission as a Nondegree Candidate**

Applicants who wish to attend the University for one semester or on some limited basis may be approved to do so upon submitting a nondegree seeking application. The admissions office reserves the right to determine the proper category of admission and to determine what credentials may be required.

**Basic Nondegree Students**

This category is for applicants who are not interested in earning a degree at UofSC. A maximum of 30 semester hours may be earned in this category. Applicants who have been officially denied admission as degree-seeking students are not eligible for admission as special students. Courses completed as special students carry full University credit; however, none of the hours is applicable to a degree until the student applies and qualifies for admission to a degree program.

**Senior Citizens**

A senior citizen (age 60 or above) may enroll in courses at UofSC Sumter tuition-free on a space available basis. They must pay the application fee, technology fee, other applicable fees, and purchase textbooks.

**Dual Enrollment**

High-school juniors and seniors who have excelled in their studies may enroll in appropriate courses at the University upon recommendation of their counselors or principal. Interested students must submit high-school records that show exceptional performance. Concurrent students must have a minimum SAT score of 900 (Evidenced Based Reading and Math Combined) (90 or better on the PSAT if SAT scores are not available) or a minimum ACT composite score of 19. In addition, students must have a cumulative high-school GPA of 3.00 or higher.

**Auditor**

An auditor may apply as a basic nondegree student (see above).

**Military Special**

Certification of active duty military status is required.

Persons attending the University in any of these categories will be nondegree candidates. Credit earned while attending as a nondegree candidate may be used toward a degree only after the student has applied for and been accepted into a degree program. An applicant denied admission to any degree category is not eligible for admission as a special student. The period of enrollment in these categories is limited by either time or number of allowable credits. Nondegree students are not eligible for financial aid or veterans benefits.

**Readmission of Former Students**

An application for readmission must be submitted by any former student who wishes to return to the University after missing a major (fall or spring) semester. Summer sessions do not count as a major semester in this instance. Applications for readmission are obtained from the Admissions Services Office or readmit students may apply online. Readmission to the University and to the program in which the student was previously enrolled is not automatic. An interview may be requested and some basis for a favorable decision may be required. The appropriate application fee must be paid.

Students who attend the University as special students (including probationary or nondegree candidates) are not considered for "readmission" because these students were not fully admitted to the University originally. If special students wish to return to the University as degree-seeking candidates, they must apply for regular admission as freshmen or transfer students, furnishing all official transcripts and any entrance test scores which may be required.
Students who leave the University in good standing, miss one or more major semesters, and attend another institution while away must submit the application for readmission and official transcripts of all college-level work attempted during their absence from the University. Such applicants must meet the same requirements as transfer students.

A student who leaves the University on suspension must apply for readmission upon completion of the period of suspension and qualify for readmission to the major program requested. To attempt to return to the University prior to the completion of the suspension period requires:

1. an application for readmission and a petition for reinstatement if a major semester has been missed; or
2. a petition for reinstatement if the attempt is being made after notification of suspension but prior to missing a major semester.
   A petition for reinstatement is made to the University college from which the student was suspended.

If students attend another college-level institution while suspended from the University, they must maintain a satisfactory average at that institution in order to retain the privilege of being considered for readmission at the conclusion of their suspension. The University does not transfer credit earned during a period of suspension, but the quality of grades could affect the decision on readmission.

### Transfer Admission

An applicant who, having graduated from high school, has attended another regionally accredited postsecondary institution and attempted one or more courses is a transfer student, regardless of credit earned. If fewer than 30 semester hours (45 quarter hours) of college-level work have been attempted, the applicant must meet both transfer and freshman entrance requirements if they graduated from high school within the last five years.

Transfer applicants for admission must submit:

1. completed application forms
2. specified nonrefundable application fee
3. complete official transcripts from postsecondary institutions through the time of application; these must be supplemented by final transcripts that reflect complete academic work prior to beginning classes in the University
4. complete high-school records including entrance exam results if less than 30 semester hours (45 quarter hours) of college-level work have been attempted in a regionally accredited college or university if they graduated from high school within the last five years.

Applications should be submitted before these deadlines:

- Fall term: July 15
- Spring term: November 15
- Summer terms: three weeks prior to registration for the term.

The applicant must submit official transcripts of all previous college courses attempted whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit. An official transcript must be sent directly to the admissions office from each institution attended. Failure to report all attempted college courses may constitute sufficient cause for later dismissal from the University.

Transfer applicants from regionally accredited colleges and universities are required to have a minimum grade point average of 2.25 (on a 4.00 scale) on all college-level courses attempted.

In addition to the general requirements for admission outlined in this section, some departments and colleges within the University set additional requirements that may be higher than the University’s minimum standards. For more specific information concerning entrance requirements for individual colleges and departments, refer to the program section of this bulletin.

For the purpose of admission, a transfer grade point average is calculated using all credits attempted and all grades earned on college-level courses at other institutions. These credits and grades also will be included in calculating honors for graduation from the University. Colleges within the University have the right to consider all attempted college-level work in determining admission to particular programs and/or advancement into upper-division or professional-level courses. Transfer students should consult the section of this bulletin for the college in which the student plans to study for further information about the use of credits and grades from previous college work. For regulations on graduation with honors, see “Academic Regulations (p. 1830).”

Regardless of the point in an academic career at which students enter the University, all must complete the final year (the last 30 semester hours before graduation) enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted. Some UofSC colleges require half of all degree credits to be earned while enrolled at this University.

Evaluation of transfer credits. Transfer credits to UofSC must be from regionally accredited institutions for academic courses completed with grades of C- or better. Applicability of credits toward a particular degree is determined by the college or major in which the student enrolls. The number of credits acceptable to the University and the number which may apply toward a particular degree may differ.

Students transferring from nonaccredited colleges may be allowed to validate credit after admission to the University. Details of the validation procedure vary and may be obtained from the dean's office of the college in which the student is enrolled.

Original records are required for courses exempted at a previous college. Exemption credit or acceptance of transfer credit by another college has no bearing on the evaluation of transfer credit at the University of South Carolina.

Generally, credits earned in courses that fall into one or more of the following categories are not acceptable in transfer to the University:

1. courses that are occupational or technical in nature
2. courses that are essentially remedial in nature
3. courses from a two-year institution which are considered upper division or upper level at the University
4. courses from a two-year institution that are not listed as part of that institution’s college parallel program.

Exceptions to this rule may be made only by the designated academic official(s) on the campus where the student is majoring and only in specific cases where such courses are judged to be uniquely relevant to the student’s degree program.

A maximum of 76 semester hours may be transferred for degree credit from a junior college or two-year institution which is accredited by a
A maximum of 30 semester hours of credit by correspondence and award for educational experiences in the military may be applied toward meeting the requirements for a baccalaureate degree. The 30 semester hours of credit which may be awarded for educational experiences in the military should be in accordance with recommendations published by the American Council on Education and be consistent with University policy on the transfer of credit but will only be applied to a degree program upon the approval of the dean of the college from which the degree is to be awarded.

Veteran students may receive credit toward graduation for training received under many of the armed forces college training programs. University credit also may be given for specialized and technical training done under the auspices of the armed forces and for courses taken through the United States Armed Forces Institute/DANTES. This training may be accepted by the University for credit only if it is at the college level, if it is approved by the University, and if it is appropriate to the particular University course of study in which the student enrolls. Armed forces training will not be evaluated until the applicant has been accepted for admission; however, credentials should be submitted with the admission application. No credit is given for high-school or college-level GED tests.

Information regarding educational benefits to veterans and the children of deceased or disabled veterans may be found in the section on financial aid. Additional information for veterans is available from the Office of Veteran Student Services, University of South Carolina Columbia.

A maximum of 30 semester hours of credit earned while classified as a nondegree special student in the University will not be accepted toward a degree at UofSC.

Transfer: State Policy and Procedures

Section 10-C of the South Carolina School-to-Work Transition Act (1994) stipulated that the Council of College and University Presidents and the State Board for Technical and Comprehensive Education, operating through the Commission on Higher Education, develop better articulation of associate and baccalaureate degree programs. To comply with this requirement, the commission upon the advice of the Council of Presidents established a Transfer Articulation Policy Committee composed of four-year institutions’ vice presidents for academic affairs and the Associate Director for Instruction of the State Board for Technical and Comprehensive Education. The principal outcomes derived from the work of that committee and accepted by the Commission on Higher Education on July 6, 1995, were:

- An expanded list of 86 courses which transfer to four-year public institutions of South Carolina from the two-year public institutions;
- A statewide policy document on good practices in transfer to be followed by all public institutions of higher education in the State of South Carolina, which was accepted in principle by the Advisory Committee on Academic Programs and the commission;
- Six task forces on statewide transfer agreements, each based in a discipline or broad area of the baccalaureate curriculum.

In 1995 the General Assembly passed Act 137 which stipulated further that the South Carolina Commission on Higher Education “notwithstanding any other provision of law to the contrary, shall have the following additional duties and functions with regard to the various public institutions of higher education.” These duties and responsibilities include the commission’s responsibility “to establish procedures for the transferability of courses at the undergraduate level between two-year and four-year institutions or schools.” This same provision is repeated in the legislation developed from the Report of the Joint Legislative Study Committee.

Act 137 directed the commission to adopt the following procedures for the transfer of courses from all two-year public to all four-year public institutions of higher education in South Carolina.

Statewide Articulation of 86 Courses

1. The Statewide Articulation Agreement of 86 courses already approved by the South Carolina Commission on Higher Education for transfer from two- to four-year public institutions shall be applicable to all public institutions, including two-year institutions and institutions within the same system. In instances where an institution does not have synonymous courses to ones on this list, it shall identify comparable courses or course categories for acceptance of general education courses on the statewide list.

Admissions Criteria, Course Grades, GPAs, Validations

2. All four-year public institutions shall issue annually in August a transfer guide covering at least the following items:
   a. The definition of a transfer student and requirements for admission both to the institution and, if more selective, requirements for admission to particular programs.
   b. Limitations placed by the institution or its programs for acceptance of standardized examinations (e.g., SAT, ACT) taken more than a given time ago, for academic course work taken elsewhere, for course work repeated due to failure, for course work taken at another institution while the student is academically suspended at his/her home institution, and so forth.
   c. Institutional and, if more selective, programmatic maximums of course credits allowable in transfer.
   d. Institutional procedures used to calculate student applicants’ GPAs for transfer admission. Such procedures shall describe how nonstandard grades (withdrawal, withdrawal failing, repeated course, etc.) are evaluated; and they shall also describe whether all course work taken prior to transfer or just course work deemed appropriate to the student’s intended four-year program of study is calculated for purposes of admission to the institution and/or programmatic major.
   e. Lists of all courses accepted from each technical college (including the 72 courses in the Statewide Articulation Agreement) and the course equivalencies (including “free elective” category) found on the home institution for the courses accepted.
   f. Lists of all articulation agreements with any public South Carolina two-year or other institution of higher education, together with information about how interested parties can access these agreements.
   g. Lists of the institution’s Transfer Officer(s) personnel together with telephone and fax numbers and office address.
h. Institutional policies related to “academic bankruptcy” (i.e., removing an entire transcript or parts thereof from a failed or underachieving record after a period of years has passed) so that re-entry into the four-year institution with course credit earned in the interim elsewhere is done without regard to the student’s earlier record.

i. “Residency requirements” for the minimum number of hours required to be earned at the institution for the degree.

3. Course work (individual courses, transfer blocks, statewide agreements) covered within these procedures shall be transferable if the student has completed the course work with a “C” grade (2.00 on a 4.00 scale) or above, but transfer of grades does not relieve the student of the obligation to meet any GPA requirements or other admissions requirements of the institution or program to which application has been made.

a. Any four-year institution which has institutional or programmatic admissions requirements for transfer students with cumulative grade point averages (GPAs) higher than 2.00 on a 4.00 scale shall apply such entrance requirements equally to transfer students from regionally accredited South Carolina public institutions regardless of whether students are transferring from a four-year or two-year institution.

b. Any multi-campus institution or system shall certify by letter to the commission that all course work at all of its campuses applicable to a particular degree program of study is fully acceptable in transfer to meet degree requirements in the same degree program at any other of its campuses.

4. Any course work (individual courses, transfer blocks, statewide agreements) covered within these procedures shall be transferable to any public institution without any additional fee and without any further encumbrance such as a “validation examination,” “placement examination/instrument,” “verification instrument,” or any other stricture, notwithstanding any institutional or system policy, procedure, or regulation to the contrary.

Transfer Blocks, Statewide Agreements, Completion of the A.A./A.S. Degree

5. The following Transfer Blocks/Statewide Agreements taken at any two-year public institution in South Carolina shall be accepted in their totality toward meeting baccalaureate degree requirements at all four-year public institutions in relevant four-year degree programs, as follows:

- Arts, Humanities, and Social Sciences: Established curriculum block of 46-48 semester hours
- Business Administration: Established curriculum block of 46-51 semester hours
- Engineering: Established curriculum block of 33 semester hours
- Arts and Sciences, curriculum II: Established curriculum block of 48-51 semester hours
- Teacher Education: Established curriculum block of 38-39 semester hours for early childhood, elementary, and special education students only. Secondary education majors and students seeking certification who are not majoring in teacher education should consult the Arts, Humanities, and Social Sciences or the Math and Science transfer blocks, as relevant, to assure transferability of course work
- Nursing: By statewide agreement, at least 60 semester hours shall be accepted by any public four-year institution toward the baccalaureate completion program (BSN) from graduates of any associate degree program in nursing (ADN), provided that the program is accredited by the National League of Nursing and that the graduate has successfully passed the National Licensure Examination (NCLEX) and is a currently licensed registered nurse.

6. Any “unique” academic program not specifically or by extension covered by one of the statewide transfer blocks/agreements listed in #4 above shall either create its own transfer block of 35 or more credit hours with the approval of CHE staff or shall adopt either the Arts/Social Science/Humanities or the Science/Mathematics block by September 1996. The institution at which such program is located shall inform the staff of the CHE and every institutional president and vice president for academic affairs about this decision.

7. Any student who has completed either an Associate of Arts or Associate of Science degree program at any public two-year South Carolina institution which contains within it the total course work found in either the Arts/Social Sciences/Humanities Transfer Block or the Math/Science Transfer Block shall automatically be entitled to junior-level status or its equivalent at whatever public senior institution to which the student might have been admitted. (Note: As agreed by the Committee on Academic Affairs, junior status applies only to campus activities such as priority order for registration for courses, residence hall assignments, parking, athletic event tickets, etc., and not in calculating academic degree credits.)

Related Reports and Statewide Documents

8. All applicable recommendations found in the commission’s report to the General Assembly on the School-to-Work Act (approved by the commission and transmitted to the General Assembly on July 6, 1995) are hereby incorporated into the procedures for transfer of course work among two- and four-year institutions.

9. The policy paper entitled State Policy on Transfer and Articulation, as amended to reflect changes in the numbers of transfer blocks and other Commission action since July 6, 1995, is hereby adopted as the statewide policy for institutional good practice in the sending and receiving of all course credits to be transferred.

Assurance of Quality

10. All claims from any public two- or four-year institution challenging the effective preparation of any other public institution’s course work for transfer purposes shall be evaluated and appropriate measures shall be taken to reassure that the quality of the course work has been reviewed and approved on a timely basis by sending and receiving institutions alike. This process of formal review shall occur every four years through the staff of the Commission on Higher Education, beginning with the approval of these procedures.

Statewide Publication and Distribution of Information on Transfer

11. The staff of the Commission on Higher Education shall print and distribute copies of these Procedures upon their acceptance by the commission. The staff shall also place this document and the Appendices on the commission’s Home Page on the Internet under the title “Transfer Policies.”

12. By September 1 of each year, all public four-year institutions shall on their own Home Page on the Internet under the title “Transfer Policies”:

a. Print a copy of this entire document (without appendices).

b. Print a copy of their entire transfer guide.

c. Provide to the staff of the commission in satisfactory format a copy of their entire transfer guide for placing on the commission’s Home Page on the Internet.
13. By September 1 of each year, the staff of the State Board for Technical and Comprehensive Education shall on its Home Page on the Internet under the title “Transfer Policies”:
   a. Print a copy of this document (without appendices).
   b. Provide to the commission staff in format suitable for placing on the commission’s Home Page of the Internet a list of all articulation agreements that each of the sixteen technical colleges has with public and other four-year institutions of higher education, together with information about how interested parties can access those agreements.

   a. Publish these procedures in their entirety (except Appendices)
   b. Designate a chief Transfer Officer at the institution who shall
      • provide information and other appropriate support for students considering transfer and recent transfers
      • serve as a clearinghouse for information on issues of transfer in the State of South Carolina
      • provide definitive institutional rulings on transfer questions for the institution’s students under these procedures
      • work closely with feeder institutions to assure ease in transfer for their students.
   c. Designate other programmatic Transfer Officer(s) as the size of the institution and the variety
   d. Refer interested parties to the institutional Transfer Guide of the state’s four-year institutions
   e. Refer interested parties to the institution’s and the Commission on Higher Education’s Home Pages on the Internet for further information regarding transfer.

Summer School Admission

New undergraduate students entering the University for the first time in a summer term who expect to continue studying toward a degree submit only one application. They must meet all requirements for admission as degree-seeking students before the beginning of the summer term. These students should not submit a separate application for the summer term.

Summer Attendance Only. Students who wish to attend the University for the summer only should apply as special students under the “Admission as a Nondegree Candidate (p. 1826)” paragraph included in this section. Students enrolled in degree programs in another college who wish to take summer courses at UofSC Sumter as transients should seek written approval to take specific UofSC courses from a dean or department chair in their home college.

Admission of International Students

International applicants are required to submit proof that they have sufficient funds to support them while attending UofSC Sumter.

Applicants currently in the United States must submit evidence of reasonable proficiency in English. This may be done by taking the Test of English as a Foreign Language (TOEFL) and achieving a satisfactory score (550 written, 213 computer). UofSC Sumter reserves the right to administer a writing proficiency test and have it evaluated by UofSC Sumter English department faculty before acceptance may be granted.

Applicants currently in the United States must also present a valid passport, copy of the I-94 form, copy of a valid visa, and a copy of a current I-20 form. Individuals who do not have a student visa or an immigrant visa must contact the UofSC Sumter Admissions Services Office.

Applicants residing in their home country must submit a TOEFL printed test score of at least 550 or at least 213 on the computer version. Applicants from English-speaking nations do not need to take the test.

Applicants under the age of 23 from English-speaking countries should take the American College Test (ACT) or the Scholastic Assessment Test (SAT) if they have less than 30 credit hours of University-level work. An institutional SAT may be arranged for such students.

Note: All international students must enroll on a full-time basis and must complete at least 30 semester hours with at least a C average on the UofSC Sumter campus before applying for transfer to another campus.

1. Applicants who are not citizens or permanent residents of the United States.

Veterans Program

Veteran students may apply to receive credit toward graduation for training received under any of the armed forces college training programs. University credit may also be given for specialized and technical training done under the auspices of the armed forces and for courses taken through the United States Armed Forces Institute. This training may only be accepted by the University for credit if it is at the collegiate level, if it is approved by the University, and if it is appropriate to the particular University course of study in which the student enrolls. Armed forces training will not be evaluated until the applicant has been accepted for admission as a degree candidate. No credit is given for high-school level GED tests.

Information regarding educational benefits to veterans and the children of deceased or disabled veterans may be obtained from the UofSC Sumter Office of Veterans Affairs.

Academic Regulations

As the chief governing body of the University, the Board of Trustees delegates the powers of the president and the faculty in accord with its policies. Subject to the review of the president and the Board of Trustees, the faculty retains legislative powers in all matters pertaining to the standards of admission, registration, instruction, research, extracurricular activities, requirements for and granting of degrees, the curricula, the discipline of students, the educational policies and standards of the University, and all other matters affecting the conduct of academic affairs.

The University reserves the right to make changes in curricula, degree requirements, course offerings, and all academic regulations whenever, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official
announcement such as the Medical School Bulletin, Law School Bulletin, Graduate Studies Bulletin, the University Master Schedule of Classes, or the Carolina Community. Official policies of the University listed below are published in the Carolina Community, which is available online as well as through the Student Government Office or the Office of the Vice President for Student Affairs.

1. Student Rights and Freedoms within the Academic Community
2. Rule of Academic Responsibility and Academic Disciplinary Procedures
3. Grievance Policy and Procedures for Non-Academic Areas
4. University Policy on Use of Alcohol
5. University Policy on Campus Solicitation
6. University Policy on Student Patent and Copyright Matters
7. Student Right to Know

Unforeseen circumstances may interfere with the scheduling of a course or degree offering. Students must accept such developments even if doing so will mean a delay in some of their academic goals or a modification of those goals. The departments concerned will work closely with students facing such problems in an effort to resolve them with a minimum of difficulty.

The University reserves the right to withdraw any course because of inadequate enrollment. Additional courses may be offered upon application of a sufficient number of students; a minimum of 10 applicants is the usual requirement. Registration in any course may be closed when the maximum enrollment for efficient work has been reached.

**Bulletin Rights and Exclusions**

**Bulletin Rights**

An undergraduate student may choose to obtain a degree in accordance with the curricular requirements in force for the particular degree at the time the student first enrolls as a degree-seeking student at any University campus, or under subsequent requirements published while the student is enrolled.

**Bulletin Exclusions**

The student’s choice is restricted to a specific bulletin and the curricular requirements described therein. Undergraduate students have a period of eight years, inclusive and continuous, in which to claim the rights of a specific bulletin.

Within the eight-year limit, an undergraduate student who is absent from the University for no more than three years, and who returns to complete the program of study, shall have the right to continue under the bulletin in effect at the time of the student’s original enrollment as a degree-seeking student. Alternatively, the student may elect the degree requirements under the bulletin in effect at the time of return. If the period of absence is longer than three years, the student will be subject to the curricular requirements in force at the time of return. Under no circumstances will students be allowed to appeal to short-lived rules and regulations which were adopted and abandoned during the period of their absence.

If drastic revisions of curricula or program requirements have occurred during a student’s absence (even if for less than three years), or during the period between the student’s original enrollment as a degree-seeking student and the eventual movement to a different degree program or campus within the University, a reasonable effort will be made by the academic dean to permit the student to undertake a transitional program that is equivalent to the educational experience intended under the bulletin in force at the time of the student’s original enrollment as a degree-seeking student.

**Academic Calendar Policies**

**Academic Calendar**

The University follows an early Semester Calendar, with Fall semester beginning the Thursday of the third full week in August and ending in December before the winter break. Spring classes begin the second Monday of January, provided neither Monday is a holiday (New Years or MLK). For Fall and Spring semesters, there are 70 class days with a minimum of 2100 minutes of instruction for a standard 3 hour class-28 Tuesday and Thursday classes of 75 minutes per class meeting and 42 Monday, Wednesday, Friday classes of 50 minutes per class meeting. All nonstandard one or two day per week classes must meet the minutes of instruction requirements as part of the calendar.

**Summer Term**

The summer term consists of multiple course sessions between the spring and fall terms.

Students regularly enrolled in the University may take work applicable to their degree during the summer term. Regulations governing the regular academic year also pertain to the summer term.

A complete listing of all courses offered in the summer term will be available by April 1 on the registrar’s Web site under "Master Schedule." Course sessions and times may vary.

Please refer to the registration calendars on the registrar’s Web site for more detailed information.

**Advisement Policies**

**Academic Advising**

When students are accepted into the University, they are assigned an academic advisor. Students are expected to arrange to meet with their advisor at least once a semester to plan their course of study for the following semester. Students who do not know their assigned advisor should obtain this information from the appropriate departmental or academic dean’s office.

Information, advice, and interpretations of University policies offered by advisors do not supersede the official statement of policies and academic regulations described in the University Undergraduate Studies Bulletin. Exceptions to University regulations cannot be made by academic advisors. Any exceptions to the policies and regulations set forth in the University Undergraduate Studies Bulletin must be made by the appropriate College Scholastic Standards and Petitions Committee or by the dean of the college.

Records of academic progress may be kept by advisors and deans, but the only official student records are maintained by the Office of the University Registrar.

**Classification of Students**

Classification is based on the total number of semester credit hours earned: A student must have earned 30 hours to be classified as a sophomore, 60 for classification as a junior, and 90 for senior classification. Students are classified at the beginning of each semester and maintain that classification until the next semester begins.
Undeclared Freshmen

For various reasons it may be impossible or inappropriate for a student to declare a major. Nevertheless, all students will receive advisement in the college most closely related to their interests and abilities. Transient students are subject to the rules of their home institution and may take course work at the University of South Carolina without a declared major. University courses are open to those seeking career advancement or life enrichment and who meet stated course prerequisites. Freshmen who have been accepted by the University, but who are unsure of academic or career goals, may need a period in which to establish their major interest. To accommodate students in these categories, courses which are usually open to students with 30 or fewer hours (freshmen) are open to all students who meet prerequisites published in the University’s Undergraduate Studies Bulletin. Students who have earned 30 semester hours and wish to continue their studies at the University of South Carolina must declare a major in a program in which they meet entrance or progression requirements.

Course of Studies

Students are expected to follow the programs outlined by their school or college as closely as possible, particularly in the first two years when satisfying basic degree requirements and prerequisites for advanced work. Students must pursue required courses in the prescribed sequence. Failure to do so may lead to future schedule difficulties, and students may find that the subjects for which they wish to enroll are either not available or are closed to students with advanced standing. Students who fail to complete successfully all freshman requirements may not enroll in courses in their major field beyond the sophomore level. Students ineligible to continue courses in their major field may take electives until the deficiency is removed. Students who enroll in classes for which prerequisites or other defined requirements have not been met may be removed from these classes. Learning-disabled students who wish to take advantage of University-approved program accommodations must have an academic advisory plan on file with the Office of Student Disability Services and the dean of the college. This plan will be formulated by the student’s academic advisor with the assistance of the Office of Student Disability Services and will contain recommended accommodations which specifically relate to and are consistent with the student’s diagnosed disability. A copy of the student’s academic advisory plan must be provided to the course instructor for the student to be eligible for a particular accommodation. Any substitutions for degree requirements recommended in the student’s academic advisory plan must be referred to the Scholastic Standards and Petitions Committee of the student’s college for action.

Changes in Curriculum

Undergraduate students interested in changing majors should contact the college or school offering the new curriculum the student intends to follow. Once all necessary permissions are obtained, the college or school that offers the new curriculum will notify the Office of the University Registrar to update the student’s record. Curriculum changes can affect loan deferment, scholarship eligibility, athletic participation eligibility, tuition and fee assessment, and international student VISA regulations. For this reason, all curriculum changes must be completed before the end of the free drop/add period in Fall and Spring Terms (in Part of Term 30), and prior to June 1 during the Summer Term. Curriculum change requests that arrive at the Office of the University Registrar after these deadlines will be processed for the following term. Exceptions to this rule may be made in the event that a change request is being made in the semester that student is graduating from the University.

Course Substitutions

Only under unavoidable and exceptional circumstances will the faculty permit substitution for or exemption from the prescribed curricula. When it becomes necessary to request a deviation from the prescribed course of study, students should consult the dean of their college or the head of the department in which they are majoring before preparing a petition listing the substitutions or exemptions sought and the reasons for the request. Petitions are submitted on forms obtainable from the Scholastic Standards and Petitions Committee of the particular college, and must be returned to the dean of the college in which the student is enrolled. Deviations from degree requirements published in the bulletin must be approved by the student’s dean and the head of the student’s major department. The Scholastic Standards and Petitions Committee of each college functions as an appeal board in cases where agreement between the dean, department head, and the student cannot be reached.

Course and Academic Credit Policies

Course Numbering

Courses numbered from 101 to 699 are available at different levels for undergraduate credit. Courses numbered from 700 to 899 may be taken for graduate credit only and are described in the Graduate Studies Bulletin. All courses numbered from 101 to 499 are for four-year baccalaureate degree candidates. Courses numbered from 500 to 699 may be taken by advanced undergraduate and graduate students for undergraduate or graduate credit, respectively. A 500- to 600-level course taken for undergraduate credit cannot later be awarded graduate credit.

Course Credit

The credit value of each course is usually determined by the amount of formal instructional time per week for one semester. At least 700 minutes of instruction (and at least twice that for laboratory time) can be expected per credit hour. The semester hour credit for each course is included in each course description.

No student suspended from the University of South Carolina for any reason may earn academic credit during the period of suspension, whether by residence elsewhere or by correspondence courses of any origin.

Remedial courses (courses numbered 100 or below) may not be used to meet degree requirements.

Credit by Examination

Currently enrolled students may obtain credit by examination in a course in which they have had no class attendance or semester standing; permission must, however, be obtained from the dean of the college or department chair in which the course is offered. A grade of not less than B on the examination is necessary in order to receive credit for the course. Examinations are not permitted in courses in which a student previously has been enrolled regularly or as an auditor. The applicant must pay to the Office of Financial Services in advance of the examination a fee of $25 per semester hour; this fee is not refundable. The Office of Financial Services will issue a receipt which must be shown to the head of the department conducting the examination, who shall immediately report the results of the examination to the Office of the University Registrar. Credits earned under this regulation are recorded with hours earned only.

Transfer Credit

Students transferring to the University from another college or university must, before enrolling in class at the University, have their transcripts
evaluated by the University. It is only in the light of such evaluation that students will know definitively the transferability and equivalency of each transfer course. Degree applicability will be determined by the college or school in which the student is enrolled.

Transferability refers to the conditions under which the University accepts credit for inclusion in the student's record. Transfer courses must have been taken at a regionally accredited post-secondary institution, or, if taken at a foreign post-secondary institution, have been recommended by a NACES-member external evaluation service. Coursework classified as remedial by the University will appear on the student's record, but will not be used to determine admission eligibility or a transfer GPA. Exceptions to this rule may be made by the Office of the Registrar when state scholarship eligibility rules require inclusion.

Equivalency entails equating transfer credit, both in hours and content, to University of South Carolina coursework. The Registrar's Office works with UofSC colleges and schools to coordinate the process of transfer evaluation to equate transfer courses directly to courses in the UofSC course catalog; to subject codes which represent subjects not offered at UofSC; or to subject codes that identify courses as remedial/technical/non-accredited coursework. A list of transfer equivalencies for the Columbia catalog of courses can be found at: http://www.sc.edu/about/offices_and_divisions/registrar/transfer_credits/course_equivalency.php

Applicability of credit toward a degree refers to the prerogative of academic divisions to count specific credit toward the fulfillment of a student's degree requirements. The student's college or school of enrollment is responsible for determining applicability.

However, a transfer course is not applicable towards any University of South Carolina academic program or degree if:

1. The transfer course was essentially remedial in nature (example: Developmental English).
2. The transfer course was occupational or technical in nature (examples: welding, paralegal, or radiography courses).
3. A grade lower than 2.0 on a 4 point scale, or equivalent, was earned in the transfer course.
4. The transfer course was taken by a degree-seeking University of South Carolina student without prior approval as described in the Earning Credit in Transient Status section of this bulletin.
5. The transfer course was taken while a student was on an academic suspension from the university.
6. The student received any grade other than W in an equivalent course at this university, unless the student was enrolled full time at least one year at the transfer institution.

Exceptions to the rules of applicability may be made only by petition to the dean for undergraduate studies of the College or School in which the student is majoring.

Effective Summer 2017 for all newly admitted and readmitted students, transfer grade points and GPAs will no longer appear on the UofSC record. Transfer course equivalencies, grades, attempted hours, and earned hours will appear on students' advising transcript in Self Service Carolina, while only transfer earned hours will appear on the official transcript.

Earning Credit in Transient Status

Since the University is accountable for the integrity of its degrees, it is essential that degree programs be closely monitored by University faculty. Therefore, students entering the University to seek a degree should expect to complete the majority of their academic work at the University of South Carolina. Normally students who wish to earn more than a semester of credit at another institution should meet all requirements and transfer to that institution. In some programs, and with the permission of the academic dean, students may take up to 18 semester hours of courses in transient status provided they have a 2.00 UofSC grade point average; the courses are approved in advance by the academic advisor and dean; and the other institution is fully accredited and the course work meets University specifications for transfer credits.

Study abroad or in special academic programs within the United States may be of particular benefit to students, and the University cooperates in a variety of national and international exchange programs in which students may pursue up to a year of academic work at another institution. Special permission is granted to students in these programs with the advance approval of the academic advisor and dean.

Course Load

Maximum credit limits, published in the Master Schedule of Classes, also vary according to college policy. Students will not be permitted to register for a semester load in excess of that prescribed for their program of study unless they earned an average of B or better on all courses for which they were enrolled (minimum 12 semester hours) for the preceding semester. New students are eligible for an extra course if they submit to the academic dean satisfactory evidence of equivalent academic achievement. Students eligible for an additional course on this basis must obtain prior approval for each course addition from the dean of their college. No course may be added after the last date to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar's Web site. (Note: This regulation does not apply to aerospace studies, Army or naval science courses, which may be added to a course program during the regular registration period without special approval.)

Undergraduate students who are enrolled in 12 semester hours or more for the fall, spring, or summer semester are considered full-time for academic purposes. Students who have been verified as learning disabled by the Office of Student Disability Services must be enrolled in 9 semester hours or more for the fall, spring or summer semesters to be considered full-time students with regard to access to University residence halls and eligibility for financial aid, provided this is consistent with their academic advisory plan.

Graduate students who are enrolled in 9 semester hours or more for the fall, spring, or summer semester are considered full time for academic purposes.

Full-time fees for undergraduate students are calculated on 12 to 16 semester hours. Full-time status for graduate students with assistantships is determined by the dean of Graduate Studies.

Full-time benefits for veterans are determined by the Office of Veterans Services.

Auditing

A student must be admitted to the University and go through the regular registration process to be eligible for auditing any course. All auditors must be admitted to the University and go through the regular registration process. Those who are not full-time students will be charged the same fees as for courses taken for academic credit.
Auditing a course consists of attending classes and listening without responsibility for any assignments or examinations. An auditor is not responsible for any assignments or examinations. No record of audit shall appear on a transcript unless a student attends 75 percent of the classes.

No credit may be earned in an audited course by examination or otherwise. No audited course may be repeated for credit at a later date except by those students who have been verified as learning disabled by the Office of Student Disability Services and whose academic advisory plan recommends auditing a specific course before it is taken for credit.

The applicant must complete the prescribed procedure for enrollment through the Office of the University Registrar before class attendance will be permitted.

Students who have registered for a course on an audit basis and who wish to change their registration to take the course for credit (or who wish to change from credit to audit) must do so no later than the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site.

**Independent Study**

The purpose of the independent study option is to allow the student to pursue an area of academic interest not adequately covered by the regular course structure. The experience shall involve an academic product that is consistent with the student’s program of study.

Prior to enrolling in an undergraduate independent study course, a student must complete an Independent Study Contract (AS-6). The approval of the instructor, advisor, department chair, and student’s dean is required. Students then present their approved copy to the Office of the University Registrar before registering for the course. Only students who take independent study as part of their major or minor or cognate program may receive grade-point credit for independent study. All other students will receive Pass-Fail credit. Students who take independent study on a Pass-Fail basis cannot later receive grade points, even if the student transfers to another major, minor, or cognate otherwise qualifying the course work as appropriate for grade points. This ruling is not reversible by petition.

A grade point average of 2.50 or greater is required to enroll in independent study courses. The amount of credit for independent study per semester is limited to 6 hours. Independent study credits applied toward any undergraduate degree may account for no more than 10 percent of the total required credit hours for that degree.

**Repetition of Course Work**

When a course is repeated, both grades will be entered on the student’s permanent academic record and included in the grade point average, unless the grade forgiveness policy is applied. Course credit toward graduation will be given only once, unless otherwise stipulated in the course description. Many academic programs restrict the number of times a course may be repeated. Consult the college and department section of the bulletin for such restrictions.

**International Courses (INTL) / Study Abroad**

- **501 — Study Abroad—UofSC Exchange.** (1-16) This course keeps a UofSC student active while on a pre-approved UofSC exchange program.
- **502 — Study Abroad—Non-UofSC Program.** (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program.
- **503 — Study Abroad—Through Another U.S. Institution.** (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program through another U.S. institution of higher education.

**Senior Privilege - Enrollment in Graduate Courses**

A special provision to earn graduate credit is available for UofSC undergraduate seniors in their final semester who need less than a normal course load to complete baccalaureate requirements. Overload enrollment that includes one or more courses under senior privilege is not allowed. Courses for graduate credit under senior privilege cannot be used toward undergraduate degree requirements. For senior privilege consideration, undergraduate seniors with a 3.00 GPA should submit to The Graduate School, for the graduate dean’s approval, form GS19 endorsed by the student’s advisor, the chair of the department offering the course, and the academic dean for that department. This action should be taken before registration.

**Accelerated Degree Programs**

Certain academic units offer accelerated programs whereby an undergraduate student with a GPA of 3.40 and 90 or more hours toward the baccalaureate degree may apply graduate credits to a baccalaureate program. Admission can be requested by students in consultation with their academic advisor, their undergraduate dean, and the graduate director of the proposed master’s program. An application form and associated guidelines may be obtained from The Graduate School.

Several of the University’s colleges and schools are involved with a variety of accelerated degree programs. For more information, contact: Office of Undergraduate Admissions University of South Carolina Columbia, SC 29208 phone 803-777-7700

**Registration Policies**

**Registration**

To be officially enrolled in the University students must be academically eligible, complete the registration process with the Office of the University Registrar, and possess a receipt issued by the Office of Financial Services for payment of current academic fees.

Students are expected to complete registration (including the payment of all required fees) by the dates prescribed in the registration calendars on the registrar’s Web site to avoid cancellation of classes and payment of a late registration fee of $5 per day ($350 maximum).

**Changes in Enrollment**

Adding a course, changing from credit to audit or audit to credit, changing from one section to another, and changing the number of credits in any variable credit course must be completed by the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site. Electing or revoking the Pass-Fail option must be completed no later than the last day for dropping a course with a grade of W, as published in the academic and refund calendars on the registrar’s Web site.
Dropping Courses and Withdrawal

Free Drop/Add Period
During the Free Drop/Add period, undergraduate students have the ability to add and remove courses from their schedule through Self Service Carolina. For each course, the Free Drop/Add period begins during the official first day of the course and extends to a minimum of 6% of the Part of Term in which the course is scheduled. Courses removed during the Free Drop/Add period will not be recorded on a student's transcript. Details regarding Free Drop/Add dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from dropping or adding courses during the Free Drop/Add Period if they have an active registration hold on their record.

Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Course Withdrawal Period
During the Withdrawal Period, undergraduate students have the ability to withdraw from a course with no grade penalty through Self Service Carolina. For each course, the Withdrawal Period begins after the Free Drop/Add Period extends to a minimum of 72% of the Part of Term in which the course is scheduled. Courses removed during this period are recorded on a student’s transcript as a ‘W’, however, the semester hours will not be calculated in the computation of grade point average, count towards earned hours, or count towards graded hours. Courses that have a recorded grade of ‘W’ will count towards attempted hours. Details regarding course Withdrawal dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Period if they have an active registration hold on their record.

Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Course Withdrawal Fail Period
During the Withdrawal Fail Period, undergraduate students have the ability to withdraw from a course with a penalty grade through Self Service Carolina. For each course, the Withdrawal Fail Period begins after the Withdrawal Period and extends up to 100% of the Part of Term in which the course is scheduled. Courses removed during this period are treated as an ‘F’ in the evaluation of academic standing, computation of grade point average, and graded hours. Details regarding course Withdrawal Fail dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Fail Period if they have an active registration hold on their record.

Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Hardship Withdrawal
During and after the Withdrawal Fail Period, it may be necessary for a student to withdraw from all courses for the semester due to a significant personal hardship (e.g., medical or family emergency, prolonged illness, other medical or traumatic event). In these situations, students are able to petition for a Hardship Withdrawal through the Office of the Dean of Students or the Hardship Withdrawal Committee. Each Palmetto College Campus has an equivalent hardship withdrawal process for managing petitions from students enrolled on their campus.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted during the Withdrawal Fail Period until the last day of courses for the semester will be reviewed by the Office of the Dean of Students. Approved petitions will be submitted to the Office of the Registrar for grade assignments of ‘W’ for all courses that semester on the student’s transcript.

The Office of the Dean of Students will notify the student’s instructors and their home college of the withdrawal.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted after the last day of courses for the semester will be reviewed by the Hardship Withdrawal Committee that must include faculty and college/school representation. Approved petitions will be submitted to the Office of the Registrar for grade assignments of ‘W’ for all courses that semester on the student’s transcript.

Prior to a Hardship Withdrawal decision being made, all documentation is subject to verification by the Office of the Dean of Students and/or the Hardship Withdrawal Committee, including but not limited to class attendance, class participation, or supporting documentation. If false documentation or misrepresented information is submitted, students will be referred for alleged violation of the UofSC Honor Code and the Hardship Withdrawal request will be denied.

A Hardship Withdrawal to selectively withdraw from some courses, while remaining enrolled in other courses, will be permitted only under exceptional circumstances and must be approved by the Office of the Dean of Students in consultation with appropriate colleges/schools. The Office of the Dean of Students will submit a report of selective withdrawal decisions for verification to the Hardship Withdrawal Committee at the end of each semester.

Information regarding the University’s Withdrawal Refund Appeals procedures can be found in the Fees and Refunds section of the bulletin.

Title IX Obligations
Information contained in Hardship Withdrawal petitions is private and not shared with instructors, departments, or colleges/schools outside of the Hardship Withdrawal Committee. However, in accordance with the provisions of Title IX of the Education Amendments Act of 1972.
and University policy, if sexual misconduct information is included in a student’s petition, the Office of the Dean of Students and/or the Hardship Withdrawal Committee is obligated to report the matter to UofSC’s Title IX coordinator.

**Withdrawing via Self-Service Carolina**
Students can withdraw for the semester by withdrawing from all courses on Self Service Carolina. Students are encouraged to consider the Hardship Withdrawal Process if they are withdrawing during the Withdrawal Fail Period.

**Active Duty Military Withdrawal**
Students in the National Guard or armed forces reserves who are placed on active duty by order of the president of the United States or the governor of their state should pursue withdrawal from courses according to the provisions of the University’s policy titled "Withdrawal of Students Called to Active Military Service" (ACAF 3.05 [http://www.sc.edu/policies/ppm/acaf305.pdf]). Active duty military personnel who are reassigned during an academic term may also invoke the provisions of this policy.

1 Specific dates for each Part of Term may be found on the Office of the Registrar website

**Indebtedness**
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

**Attendance Policy**

**Class Attendance**
Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in whatever class discussion may occur.

Absence from more than 10 percent of the scheduled class sessions, whether excused or unexcused, is excessive and the instructor may choose to exact a grade penalty for such absences. It is of particular importance that a student who anticipates absences in excess of 10 percent of the scheduled class sessions receives prior approval from the instructor before the last day to change schedule as published in the academic and refund calendars on the Registrar’s website (http://registrar.sc.edu/).

It must be emphasized that the “10 percent rule” stated above applies to both excused and unexcused absences. Faculty members should notify classes, specifically in the course syllabi, of the attendance policy which they intend to follow in each class, but it cannot be more restrictive than the “10 percent rule”. It is also recommended that the faculty include a policy statement in their syllabi requesting students to meet with the instructor early in the semester to discuss the consequences of potential excessive absences due to participation in University-sponsored events.

Faculty should consider the following events or circumstances as potentially excusable absences:
- participation in an authorized University activity (such as musical performances, academic competitions, or varsity athletic events in which the student plays a formal role in a University sanctioned event)
- required participation in military duties
- mandatory admission interviews for professional or graduate school which cannot be rescheduled
- participation in legal proceedings or administrative duties that require a student’s presence
- death or major illness in a student’s immediate family
- illness of a dependent family member
• religious holy day if listed on www.interfaithcalendar.org (http://www.interfaithcalendar.org)
• illness that is too severe or contagious for the student to attend class
• weather-related emergencies

The Student Ombudsperson in the Division of Student Affairs is available to assist faculty members with obtaining or verifying documentation when necessary. The faculty member has complete discretion regarding the specific nature of any accommodation offered in the event of an excused absence. Students should notify faculty members at least two weeks prior to the absence when possible. In all cases, students must contact the faculty member to request an accommodation upon return to class.

Examination Policies

Final Examinations

Final examinations for spring and fall semesters are held during a seven-day period at the close of each semester. Summer examinations are held during a two-day period at the close of each session. Semester examination schedules are published on the registrar’s Web site under the “Calendar” link. The results of these examinations, combined with the grades for class performance, determine the reports given at the end of the semester. No final examination may be held outside of the stated time without the special permission of the dean of the college concerned. Reading Day is specified in the University calendar and no exams, quizzes or required class attendance may be scheduled for that day.

In any course or laboratory which meets two or three times per week, no quiz, test, or examination may be given during the last two class meetings prior to the regularly scheduled examination period. In any course or laboratory which meets once a week, no quiz, test, or examination may be given during the last class meeting prior to the regular examination period. In any course or laboratory which meets more than three times per week, no quiz, test, or examination may be given during the last three class meetings prior to the regular examination period. Self-paced courses are exempt from this regulation.

If an instructor teaches more than one section of the same course, students may transfer from one examination section to another with the instructor’s permission.

Students who are absent from any final examination will be given the grade of F on the course if they have not offered an excuse acceptable to the instructor. If excused, they will be assigned a grade of I (see “I” entry under “Grading System”), and may complete the course under the conditions specified by the instructor in the “Assignment of Incomplete Grade” form.

Re-examinations for the purpose of removing an F or raising a grade are not permitted.

Graduating Seniors

No early examinations are given for graduating seniors. Students who have submitted a degree application may attend the graduation ceremony. Diplomas are mailed after final examinations and after a student’s dean has verified that all degree requirements have been met.

Deferred Examinations

A student with excused absences from final examinations in one semester has the privilege of deferred or special examinations and may take the deferred examination at the next regular examination period, with credit for semester standing, provided the examination is taken at the convenience of the professor. The examination must be taken within one calendar year from the time that the absence was incurred. Deferred examinations will be granted only in case of absence certified as unavoidable because of sickness or other cause, rendering attendance at final examinations impossible.

Grading Policies

Grading System

Enrollment in a course obligates the student not only for prompt completion of all work assigned but also for punctual and regular attendance and for participation in whatever class discussion may occur. It is the student’s responsibility to keep informed concerning all assignments made. Absences, whether excused or unexcused, do not absolve the student from this responsibility.

Students’ grades in their courses are determined by class standing and examination grade, combined in such proportion as the professor may decide.

Class standing is determined by the quality of a student’s work and the regularity of attendance in lectures and laboratory sessions or other exercises of the course. Grading systems in graduate and professional schools are described in the appropriate bulletins.

A, B, C, D represent passing grades in order from highest to lowest. B+, C+, D+ may also be recorded. F represents failing performance.

S and U indicate, respectively, satisfactory (passing) and unsatisfactory (failing) performance in courses carried under the Pass-Fail option. The S/U designation is used also for some research courses, workshops, and seminars in which the regular academic grades are not used. The use of the Pass-Fail grading option in such courses is indicated in their bulletin descriptions. No course carried under the Pass-Fail option will affect a student’s grade point average or the evaluation of suspension conditions.

FN (Failure-Non Attendance) and UN (Unsatisfactory-Non Attendance) grades are assigned to students who never attended or have stopped attending class but have not officially dropped or withdrawn. Faculty are required to provide a last date of attendance when assigning this grade. The grade and the last date of attendance are used in determining the recalculation of awarded funds for financial aid recipients. Reporting the last date of attendance is critical to avoid potential financial liability for the institution.

FN and UN grades are displayed and calculated as F and U grades on the official transcript.

WF is assigned for student withdrawal from a course after the penalty deadline prescribed in the academic and refund calendars on the registrar’s Web site. (See section on “Dropping A Course.”) The grade of WF is treated as an F in the evaluation of suspension conditions and grade point average computation.

W is assigned for student withdrawal from a course after the late registration period but before the penalty date. Courses dropped during the late registration period (as published in the academic and refund calendars on the registrar’s Web site) will not be recorded on a student’s permanent record. In exceptional cases, the grade W will be used after the first seven weeks of a semester, primarily in cases of withdrawal from the University or from a course for medical reasons. (See section on “Dropping A Course.”) A grade of W will not enter into the evaluation of
suspension conditions or in grade point average computation but will be recorded on a student’s permanent record.

I, Incomplete, is assigned at the discretion of the instructor when, in the instructor’s judgment, a student is unable to complete some portion of the assigned work in a course because of an unanticipated illness, accident, work-related responsibility, family hardship, or verified learning disability. The grade of I is not intended to give students additional time to complete course assignments unless there is some indication that the specified condition or event prevented the student from completing course assignments on time. By arrangement with the instructor, the student will have up to 12 months in which to complete the work before a permanent grade is recorded. Re-enrolling in the course will not make up an Incomplete. An Assignment of Incomplete Grade form (AS-5) must be completed by the instructor and submitted to the Office of the University Registrar explaining the reason for the I and conditions for make-up. A grade of I is not computed in calculating a student’s grade point average. After 12 months an I that has not been made up is changed to a grade of F or to the back-up grade indicated by the faculty member on the Assignment of Incomplete Grade form.

T, a Graduate School symbol, is assigned to indicate enrollment in Thesis Preparation (799) and Dissertation Preparation (899). Courses with this symbol will be counted as hours attempted and hours earned only. Grade points will not be awarded. For unsatisfactory work the grade of T should be assigned. The grade of T cannot be assigned in courses numbered 799 and 899.

AUD indicates a course was carried on an audit basis. (See section on “Auditing” for more information.)

NR, No Record, is assigned in the event that the grade is not available at the time final grades are submitted. It is a temporary mark on the transcript and must be replaced by a grade. If replacement does not occur before the last week of the spring or fall semester following the term for which the grade was recorded, a grade of F will be assigned. The NR is ignored in computing the GPA.

Academic Honor Code Violation

A transcript notation on the graded course in which the violation occurred denotes “Honor Code Violation.”

Pass-Fail Grading

The Pass-Fail program is designed to encourage students to investigate fields outside of their major curriculum in which they have a specific personal interest without affecting their grade point average. The only grades assigned on courses taken under the Pass-Fail option are S and U; a grade of S indicates satisfactory performance, a grade of U indicates unsatisfactory progress. A student will be given credit for courses in which the grade of S is earned, but these courses will not affect the computation of the grade point average.

Specific provisions of the Pass-Fail program are as follows:

1. The Pass-Fail grading system is in effect for an indefinite period of time, subject to periodic review.
2. The Pass-Fail option is not available to undergraduate students whose semester or cumulative GPA is less than 2.00.
3. Students are permitted to exercise the Pass-Fail option only on free elective courses.
4. Students are permitted to take no more than eight courses on a Pass-Fail basis during their undergraduate career.
5. A student wishing to exercise the option must have the permission of the dean of the college and the student’s academic advisor. The Pass-Fail Option form (AS-20) is used for this purpose.
6. The option may be elected or revoked by the student no later than the last date for withdrawing from the course without a penalty.
7. Normal prerequisites may be waived for students taking a course on a Pass-Fail basis.
8. Courses taken under this option will be excluded from the calculation of the grade point average.
9. A grade of S will be entered by the Office of the University Registrar for a regularly assigned passing grade; a failing grade will be registered as U.
10. No course carried on a Pass-Fail basis will be counted toward the hours required for either the President’s or the Dean’s Honor List.
11. A verified learning-disabled student may take on a Pass-Fail basis an elective or required course which is not in the major if the academic advisory plan so recommends the Pass-Fail option for that course. A student who desires use of this option must apply to the dean of the college at the beginning of the semester. With the approval of the academic dean, learning-disabled students may meet specific degree requirements with a satisfactory grade.

Spring 2020 Undergraduate Pass-Fail Grading

Approved by the UofSC Faculty Senate on April 1, 2020

To address complications presented by the COVID19 pandemic, the Faculty Senate Steering Committee approved the following grading accommodations for undergraduate students enrolled in Spring 2020.

• All courses will be graded as originally planned according to grading criteria in course syllabi. After grades are submitted at the end of the semester, undergraduates can choose, on a course-by-course basis, to request a pass/fail grade for the Spring 2020 semester with the exception of Graduate or professional school courses, which can be taken as pass/fail only when deemed appropriate by the program or school Dean.

• The following pass/fail scale will be used: Earned grades of A, B+, B, C+, and C will be replaced with S+, earned grades of D+ and D will be replaced with S, and an earned grade of F will be replaced with U.

• If students select the S+/S/U grading scale for a course, points will not be factored into the GPA. Courses with S+ and S will count towards earned semester hours.

• Courses graded with the S+/S/U scale, under this exception for Spring 2020, will count towards applicable curricular, major, continuation, and graduation requirements. For example, if a course requires a C or better in a prerequisite, students selecting this alternative grading scale would need an S+ in the prerequisite course.

• Faculty members will not be aware of students who select the pass/fail grading option when entering final grades. Grades will be entered in the format for which the course was approved.

• Students who previously decided to take a course on a pass/fail basis will continue on a pass/fail basis using the University’s established S/U system (e.g., S is earned if the grade is D or above and U is earned for grades below D).

• For the Spring 2020 semester, undergraduate students who choose to replace a course letter grade with the S+/S/U option must do so no later than July 1, 2020.

• This process will occur through the Office of the University Registrar. A form will be available on the University Registrar website for the
student to request that a letter grade be replaced with the S+/S/U scale.
• UofSC will include a transcript note on all academic records, regardless of grading basis, indicating the extraordinary circumstances of the global public health emergency during Spring 2020.
• Because some graduate and professional programs require letter grades to be reflected on transcripts, when necessary, students will be able to request an official letter attesting to the letter grade earned in any courses that were converted to S+/S/U. This letter would attest only to grades, not to GPA. We will ensure that those who need evidence of your academic achievements this spring will be able to get it. A form will be available on the University’s website for students to request these letters.
• Students will be allowed to retake undergraduate courses in which they earned an S+, S, or U during Spring 2020. Any undergraduate courses retaken under this provision will not count towards the number of courses currently allowed by the current course grade forgiveness policy. In addition, students who were retaking a class for grade forgiveness in Spring 2020 can retake the class another semester, without penalty.

Grade Point Average
The grade point average is computed on the basis of all semester hours attempted for credit, except for credit hours carried under the Pass-Fail or audit options. Courses in which a grade of S, U, AUD, T, or W was earned are not considered in computing the GPA.

The grade points earned in any course carried with a passing grade (A, B +, B, C+, C, D+, D) are computed by multiplying the number of semester hour credits assigned to the course by a factor determined by the grade. For courses in which the grade of A was earned, the factor is 4; for B +, 3.5; for B, 3; for C+, 2.5; for C, 2; for D+, 1.5; for D, 1. The grade point average is determined by dividing the total number of semester grade points earned by the total number of semester hours attempted for credit (excluding hours carried on a Pass-Fail or audit basis). No grade points are assigned to the symbols F, S, U, WF, W, I, AUD, T, or NR.

Course Grade Forgiveness
It is the policy of the University of South Carolina that every currently enrolled, fully admitted, degree-seeking undergraduate earning a D+, D, F, or WF in a University course may take up to two undergraduate courses for a second time for the purpose of grade forgiveness. Both the first and second grades shall appear on the University permanent record, but only the second grade will be used in computing the University of South Carolina cumulative grade point average. An explanatory notice will appear on the record. Once grade forgiveness is applied to a repeated course, the action may not be revoked.

An eligible student wishing to apply the course grade forgiveness policy to a course enrollment may do so at any time during his/her undergraduate enrollment, but no applications will be honored after the degree is awarded. Grade forgiveness can only be applied once per course for a maximum of two courses (not to exceed 8 credits) on a student’s undergraduate academic record, without regard to the number of degrees sought. Under the grade forgiveness policy, the forgiven and repeated class must be taken at the University of South Carolina-Columbia campus or a Regional campus. Courses transferred from other institutions are excluded from this policy.

This policy does not preclude students from repeating classes multiple times, in accordance with program requirements, but only the second attempt at the class may forgive the original grade of D+, D, F, or WF. Only a regular letter grade can replace a forgiven grade. Grades of W, I, S, U, or AUDIT may not replace previous grades. Grades carrying an honor code violation sanction of X are not eligible for grade forgiveness.

Established requirements for repeating classes, admission to, or progression in, specific academic programs of the University take precedence over the grade forgiveness policy. Program or progression grade point averages are not affected by this policy. Refer to the guidelines for each program for specific requirements. Courses intended to be repeated for additional credit, such as research or applied music, are not eligible for grade forgiveness. Semester honors (dean’s or president’s honor list), or academic standing (scholastic deficiency, probation, suspension), or previous grade point totals will not change retroactively as a result of applying this policy.

Students who have been granted academic forgiveness to reset the grade point average after readmission are not eligible for course grade forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

An eligible student wishing to apply the grade forgiveness policy (http://www.sc.edu/about/offices_and_divisions/registrar/transcripts_and_records/grade_forgiveness/) may begin the process by reading the criteria which must be met and completing the necessary documentation in order to apply grade forgiveness.

Note that Academic Forgiveness is not the same as Grade Forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

Grade Reports
Students’ grades are reported on Self Service Carolina. Students can also access grade reports in person at the Office of the University Registrar.

Grade Change Policy
Grade changes based on transcription or computation errors shall be reported directly to the Office of the University Registrar on the appropriate grade change form signed by the instructor and the head of the student’s academic unit. Any request for a grade change must be submitted by the instructor no later than one calendar year from the date on which the grade was reported. Beyond this period, grade changes will be considered only in exceptional circumstances and must be handled through the petition procedure of the student’s college. Any other grade change request resulting from enrollment discrepancies, medical withdrawals, or perceived administrative errors (changes to W, WF, audit, credit, S/U, or to I) must be submitted on the appropriate forms with signatures and documentation to the dean of the student’s college for review through the petition procedure. This does not apply to the routine makeup and extension of an I (incomplete) and posting of a permanent grade to replace the recorded NR mark. An I turns into a grade of F after one year; an NR turns into a grade of F after one semester. Special makeup work or examinations to change grades already recorded are not permitted.

Academic Standards Policies
Academic Standards
The following standards for continuing at the Columbia and regional campuses of the University of South Carolina apply to all undergraduate students who first enroll at the Columbia and regional campuses of the University in the fall 2008 semester or thereafter, are admitted to the Columbia and regional campuses of the University in an undergraduate
degree program in the fall 2008 or thereafter, or are enrolled in the fall 2010 semester or thereafter, regardless of when first enrolled at the University. Administration of these regulations is the responsibility of the academic deans, who are not empowered to waive any of the provisions.

**Academic Review**

The record of every undergraduate student will be reviewed at the end of each fall and spring semester. Many of the individual colleges of the University have higher academic requirements for students to continue in their degree programs. However, no student will be suspended academically from the University unless he/she fails to meet the standards specified here.

**Academic Standing**

A student’s academic standing is based on his/her “Total Institutional GPA” and “Total Institutional GPA Hours” which can be viewed in Self Service Carolina at the end of a student’s “Unofficial Academic Transcript” under the heading, “Transcript Totals (Undergraduate).”

**Academic Probation**

When a student’s Total Institutional GPA at the end of any semester is less than a 2.00, he or she is placed on academic probation.

**First-year Freshmen Academic Recovery Program**

First-year freshmen who have less than a 2.00 Total Institutional GPA at the end of their first semester of collegiate enrollment are considered at risk. During the first six weeks of their second semester, these students must participate in an academic coaching session before being eligible to register for courses for the third semester. These sessions will provide students with assistance in academic planning, general advisement, major exploration, degree audit, self-assessments, and success strategies. This requirement is in addition to any made by the student’s college, school, or academic program.

**Removal from Academic Probation**

When a student’s Total Institutional GPA at the end of any semester is a 2.00 or above, he or she is not on academic probation.

**Continuing on Academic Probation**

Any student who is on probation at the beginning of a fall or spring semester must achieve a certain Total Institutional GPA at the end of that semester in order to avoid suspension. A student may also continue on probation and avoid suspension if the semester grade point average is 2.50 or greater. Standards for continuing on probation are based on the cumulative grade hours the student has attempted at USC. The chart below shows the grade point averages required in order to avoid suspension.

**Probation Chart**

<table>
<thead>
<tr>
<th>Total Institutional GPA Hours</th>
<th>Placed on Probation</th>
<th>Continue on Probation (avoid suspension)</th>
<th>Removed from Probation</th>
</tr>
</thead>
<tbody>
<tr>
<td>12-35</td>
<td>below 2.00 Total Institutional GPA</td>
<td>1.500 or higher Total Institutional GPA</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
<tr>
<td>36-71</td>
<td>below 2.00 Total Institutional GPA</td>
<td>1.800 or higher Total Institutional GPA</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
</tbody>
</table>

**Semester Reprieve:** Regardless of the Total Institutional GPA, a student may continue on probation and avoid suspension if the Current Term grade point average is 2.50 or greater.

**First Suspension**

Students unable to meet the standards shown above are suspended from the University of South Carolina for one fall or spring semester and the contiguous summer (approximately eight months). Students have the right to appeal their suspension to the petitions committee of the college or school in which they were enrolled when suspended.

**Returning After First Suspension**

After the suspension has been served, a student will be considered for readmission by the college or school to which the student is seeking admission. A student readmitted following suspension continues on probation and is reviewed for suspension at the end of each fall and spring semester. A Current Term grade point average of 2.50 or higher must be achieved each semester until the Total Institutional GPA reaches the level above which suspension would occur (see chart).

During the first six weeks after returning from a first suspension, students must participate in an academic coaching session before being eligible to register for courses for the following semester. These sessions will provide students with the resources they need to meet their academic goals.

**Returning after Subsequent Suspension**

The duration of the second suspension is indefinite, and the student can be considered for readmission only after being approved for reinstatement by action of the petitions committee of the college or school to which the student is seeking admission. A favorable decision by the committee is unlikely within two years of the suspension.

**Earning Academic Credit While on Suspension**

A student on suspension is given an opportunity to reorder priorities and reassess his or her situation before returning. While serving suspension, a student may not be admitted to, or continue in, any academic program of the University. Credit earned at any other institution while a student is on suspension from the University may not be applied toward a degree from USC, unless approved by the Standards and Petitions Committee of the college to which the student is readmitted. Prior approvals for transient study will be revoked for suspended students.

**Retention in Degree Programs**

Students are reminded that the above regulations are for all undergraduate students in the University. Many colleges and schools offer degree programs that have more stringent requirements for retention in those programs. Failure to meet the academic requirements of those degree programs may result in the student being asked to leave that program. Students should consult the colleges and schools section of the Academic Bulletin to review the specific degree retention requirements.

**Academic Progression and Program Dismissal**

Students dismissed from a program for failing to meet academic progression requirements will be reassigned to Undergraduate Studies and will be advised by the University Advising Center. Students assigned
to Undergraduate Studies will have a maximum of two semesters before declaring a new program of study. At the conclusion of two semesters enrolled at full-time status, students who have not declared a major/program within a degree-granting college will have a registration hold placed and will be unable to enroll in coursework.

**Petition Procedures**

In addition to previously specified provisions by which a student may petition to waive the application of this suspension policy, a student suspended by this policy has the right to petition to the appropriate college scholastic standards and petitions committee to waive the application of the suspension rule at any time. Students placed on first suspension who wish to petition for a waiver of the suspension rule may petition only the committee of the college in which they were enrolled at the time of suspension.

**Academic Forgiveness Policy**

**Academic Forgiveness for Former UofSC Students with Less than a 2.00 Cumulative GPA**

Under certain conditions undergraduate students may apply for academic forgiveness. Academic forgiveness allows for a recalculation of the GPA to permit a student to graduate or pursue a specific academic program. In order to apply for academic forgiveness all of the following conditions must be met:

1. The student has not been enrolled at any campus of the University of South Carolina for at least 48 months.
2. The student must have been readmitted to a degree program at the University of South Carolina and must have completed at least 24 hours of approved graded course work prior to applying for academic forgiveness.
3. After readmission the student must have earned a cumulative GPA of at least 2.00 and met the progression requirements of the degree program.
4. The student must never before have been granted academic forgiveness.

A student who has met these conditions and desires academic forgiveness must submit a written request for academic forgiveness to the dean of the college in which the student is enrolled. After verification of the student's eligibility, the dean shall inform the registrar that the student has been granted the ability to apply for academic forgiveness.

Once academic forgiveness has been granted, the following apply to the student's academic record:

1. All curriculum requirements will be in accordance with those in force at the time of or subsequent to the student's readmission.
2. The student may not receive Academic Honors upon graduation.
3. The student’s grade point average is recalculated beginning with the semester in which the student was readmitted to the University. All academic hours attempted at USC will be calculated toward the GPA. The student's GPA will be recalculated using the GPA after readmission and a 2.00 on all grade hours taken prior to readmission.
4. Courses in which the student received a passing grade prior to readmission may, at the discretion of the dean, be applied toward the degree.
5. The following statement shall appear on the academic record and transcript of any student granted academic forgiveness: "This student was granted academic forgiveness under the University of South Carolina Academic Forgiveness Program. The GPA has been recalculated under the criteria of this program to allow for eligibility for graduation."
6. The permanent academic record will remain an unmodified record of all work attempted at the University of South Carolina.

**Academic Honors Policies**

**Honor Lists**

Each semester academic achievement is recognized by entering the student's name on the President's Honor List or the Dean's Honor List. For details, refer to the degree requirements of the degree.

- **President's Honor List**: a grade point average of 4.00 earned on a minimum of 12 credited semester hours.
- **Dean's Honor List**: a grade point average of 3.50 or higher earned on a minimum of 12 credited semester hours.

No course carried on a Pass-Fail basis, by examination, correspondence, or exemption will be counted toward the 12 hours required for either the President's or Dean's Honor List.

**Graduation with Honors**

Graduation with honors will be based on a student’s Total Institutional GPA. Honors designators are determined at the time of graduation and may not be retroactively applied.

- To graduate with such honors, a student must have earned at least 60 credit hours applicable toward the degree in residence at the University. 30 credit hours for an associate degree.
- The following designations indicate a consistently high level of academic achievement at UofSC:

**Baccalaureate Degree Designations**

- **Cum Laude**: a cumulative GPA of 3.50-3.749
- **Magna Cum Laude**: a cumulative GPA of 3.75-3.949
- **Summa Cum Laude**: a cumulative GPA of 3.95-4.00

**Associate Degree Designations**

- **Highest Honors**: a cumulative GPA of 3.95-4.00
- **High Honors**: a cumulative GPA of 3.75-3.949
- **Honors**: a cumulative GPA of 3.50-3.749

With Honors from South Carolina Honors College: Any student who completes the requirements of the Honors College, regardless of the major or undergraduate degree, is awarded that degree "With Honors from South Carolina Honors College."

With Distinction: Any student who earns an undergraduate degree and completes the appropriate requirements will be awarded graduation "With Distinction in [that major]." For details, refer to the degree requirements of specific majors.

With Leadership Distinction: Any undergraduate student who completes Leadership Distinction requirements in community service, diversity and social advocacy, global learning, professional and civic engagement, and/or research as specified by the Provost's Office, regardless of the major or undergraduate degree, is awarded that degree "With Leadership..."
Distinction in [that track]." For further details, contact the Office of UofSC Connect.

Degree Conferral and Graduation Policies

In-residence Requirement
The last 25% of a student’s degree must be completed in residence at the University, and at least half of the hours in the student’s major courses and in the student’s minor courses (if applicable) must be taken at the University.

The chart below shows the minimum number of hours required to be completed in residence based on to the total number of hours required for a degree.

In-residence Chart

Some programs impose greater student residence and/or major requirements.

Regardless of when students enter the University, they must complete the last 25% of the degree before graduation enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted. In addition, all degree applicants are urged to confer with the deans of their respective colleges about their programs and degree requirements prior to the beginning of their last semester of residence at the University.

"In residence" means that the student was regularly enrolled at UofSC; completed courses offered by Columbia or one of the other campuses of the University; was a member of a class which was supervised by a regular faculty member of UofSC; attended classes on a regular, pre-established schedule; and in other ways conformed to the requirements which are normally connoted by the term "in residence." In-residence requirements may not be met by courses for which credit is earned by exemption or exam, courses taken by correspondence, or courses for which transfer credit was awarded. Courses taken under the Pass-Fail option meet in-residence requirements. If the student has not established credit for the prescribed number of hours in residence, then the student is not eligible either for graduation with honors or for graduation on the basis of having completed 25% or 15 hours of the degree during the final semesters at the University.

Application Process
All candidates for degrees and certificates must file formal applications during the last academic term before graduation with the deans of their respective colleges on forms obtained at the Office of the University Registrar or the appropriate dean’s office. Applications must be filed by the third week of the fall or spring semester in which the degree is to be awarded or within the first 10 days of the first summer session. If the student is not enrolled during the first summer session, the application must be filed within the first week of the second summer session for the student to graduate at the summer commencement. Students whom are no longer enrolled at the University and wish to apply for their degree, please contact the Campus Registrar.

Graduation Requirements
In order to be eligible for graduation, students must meet all course requirements, be in good academic standing, meet any departmental or program requirements, and have a cumulative GPA of at least 2.00 on all work attempted at UofSC.

Second Baccalaureate Degree
At times the University confers a second baccalaureate degree upon candidates who have completed requirements for the second degree. The following specifications for a second baccalaureate degree apply:

1. The student must meet admission and progression requirements for the second degree, and must have received formal approval to pursue the second degree from both deans.
2. All requirements for the second degree must be fulfilled.
3. The additional requirements for the second degree must include a minimum of 24 semester hours beyond those required for the first degree.
4. No course that satisfies a general education, major, minor, cognate, or requirement other than a free elective for the first degree may be applied to the major field of the second degree.
5. The student must file a separate degree application for the second degree with the appropriate college or school.

Under this policy a student may apply for two degrees at one time or separately. In either case, the student receives two diplomas. It should be noted that a second major does not by itself lead to the conferral of a second degree.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

Second Major
In some degree programs, a student may elect a second major. Normally, second majors are possible only in degree programs with similar general education requirements. The second major option is not available in all colleges.

1. The student must meet admission and progression requirements for the second major.
2. The student must have received approval from both deans for a second major.
3. All requirements for the second major must be fulfilled.
4. All general education and special departmental requirements normally associated with the second major must be fulfilled.
5. In cases where the first major and the second major lead to different degrees, the student must designate one as the official degree of record. A second major eliminates the cognate requirement; however, special departmental requirements normally completed as part of the cognate are not waived.

Fulfillment of the requirements for a second major are indicated on the student’s official transcript upon graduation. No notation for a second
major is placed on the official transcript for course work completed after graduation.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

**Indebtedness**

It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

**Records, Transcript, and Enrollment Certification Policies**

**Change of Name or Address**

It is the obligation of every student to notify the Office of the University Registrar of any change in name or address (including electronic address). Failure to do so can cause serious delay in the handling of student records and in notification of emergencies. Change of name may only be accomplished by presenting proper legal documentation.

**Transcripts**

A transcript of a student's record carries the following information: current status; a detailed statement of the scholastic record showing courses pursued with semester hours carried, semester hours earned, grades, grade points, grade point average, and system of grading; a permanent record of all failures, Incomplete grades, and penalties (such as suspension); cumulative USC grade totals; and references to other college or universities attended, dates attended, and the total transfer credits accepted by the University of South Carolina.

Any student who needs a transcript or a certified copy of the end-of-semester grade report may complete a Transcript Request form or send a signed and dated letter containing all pertinent identifying information to the Office of the University Registrar. Official transcripts may also be requested online through Self Service Carolina (http://my.sc.edu). With the exception of copies made for internal use, no copy of a student's permanent record (transcript) will be released to anyone without the student's written consent. In addition to the written consent, each transcript request should include full name or names used, student number, current mailing address, dates of attendance, location of attendance, and date of birth to assure proper identification of the record requested.

No transcript will be issued to a student who is indebted to the University.

No partial transcript will be issued.

The nonrefundable transcript processing fee is $12.

**Enrollment Certification**

Certification of enrollment is based upon the total number of credit hours for which a student is registered at the time of the certification request. Beginning and ending dates reported in enrollment certification conform to the official USC academic calendar dates for the term requested.

**Indebtedness**

It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not

**Notification of Student Rights under FERPA**

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student's education records within 45 days of the day the University receives a request for access.

   A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

   If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the University discloses personally identifiable information from the student's education records, except to the extent that FERPA authorizes disclosure without consent.

   The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a "Confidentiality Indicator" on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

   - The University discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, service provider or collection agent); a
person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

- A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.
- To officials of other institutions in which the student seeks or intends to enroll provided that the student had previously requested a release of his/her record;
- To authorized representatives of the U.S. Department of Education, U.S. Department of Defense (Solomon Amendment), U.S. Attorney General, the Comptroller General of the United States, state education authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations; to the Department of Homeland Security (DHS) and its Immigration and Customs Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.
- In connection with a student’s application for, and receipt of, financial aid;
- To comply with a judicial order or lawfully issued subpoena;
- To parents of dependent students as defined by the Internal Revenue Code, Section 152;
- To appropriate parties in a health or safety emergency; or
- To the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.
- The University may disclose the result of a disciplinary proceeding to a parent or guardian so long as the student is under the age of 21 at the time of the incident and the proceeding has resulted in a violation of University drug or alcohol policies, or any federal, state, or local law.
- To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.

Release of Directory Information

In accordance with section 99.7 of the Family Educational Rights and Privacy Act (FERPA), the University of South Carolina provides students annual notification of their FERPA rights. The University of South Carolina has designated certain items as Directory Information. At the University of South Carolina, these items are as follows:

- Name
- Dates of Attendance
- Campus
- College or School
- Classification
- Primary Program of Study
- Full-time or Part-time Status
- Degree(s) Awarded Including Dates
- Honors and Award Including Dean’s and President’s List
- University Email Address
- City, State, and Zip Code Associated with a Student’s Permanent Address

The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a "Confidentiality Indicator" on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA.

Academic Assessment Policy

Assessment, in a university or college setting, can be interpreted to mean several things. Assessment can be the process of evaluating the success of a university in meeting its mission and goals (institutional assessment), or it can be the processes associated with evaluating student outcomes in relation to stated program goals (program assessment), or it can be course-embedded assessment techniques used to deliver information and/or evaluate student learning by observing students’ skills and abilities.

The University of South Carolina is committed to offering programs and activities that encourage students to develop both academically and socially. In order to evaluate the effectiveness of our efforts, faculty, administrators, and staff conduct ongoing assessments. The Office of Institutional Planning and Assessment assists the faculty, administration, and other staff in gathering and analyzing assessment data. Assessment, therefore, is the ongoing process of self-improvement through analyzing and evaluating all of our functions and activities.

Students, faculty, and staff play critical roles in the assessment process. Consequently, participation in assessment activities is a University priority and responsibility. The information gleaned from assessment activities is used for planning and program improvement. Many of the University’s assessment activities are mandated by external agencies. Therefore, all students wishing to receive a degree from the University of South Carolina must complete procedures required for the assessment of general education and those required by their major and/or area of concentration. If a student fails to participate in a required assessment activity, a hold may be placed on the student’s records.

Primary responsibility for the assessment of academic programs within the major or area of concentration is with the faculty of each academic unit. Information pertinent to assessment of the major or area of concentration is provided to students by the department from which the degree will be granted.

Primary responsibility for coordinating the assessment of general education is with the Office of Institutional Assessment and Compliance (http://www.ipr.sc.edu/). The faculty is actively involved in planning assessment and using the results of assessment to evaluate the effectiveness of general education. The assessment of general education is administered through the use of exams, interviews, surveys,
questionnaires, or other instruments as developed by the faculty and Office of Institutional Assessment and Compliance.

The results of any activities used for program or general education assessment may not be used for promotion and/or tenure files or for annual performance evaluations or for the evaluation of any student’s progress in a course or progress toward a degree. Assessment activities, however, are integral to the processes of teaching and learning.

For more information contact the Office of Institutional Assessment and Compliance (http://www.ipr.sc.edu/).

Expenses
Overview
The University reserves the right to alter any of the following charges without notice. All charges are due and payable on the date that they are incurred or the due date indicated on the ticket, invoice, or statement. Checks or credit cards for the exact amount of the total charges should be made payable to the University of South Carolina.

Any student who has failed to pay all required registration fees on or before the last date to change course schedules (as indicated in the University calendar) may be dropped from class rolls. Any student who fails to relieve any other indebtedness to the University or to any of its auxiliary agencies on the date such obligations become due may not be permitted to remain in University residence halls or be issued a transcript, diploma, or degree.

Checks, Money Orders, and Credit Cards
The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina (https://my.sc.edu/) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include electronic checks and payment by check or money order through the mail.

Legal Residency
The University of South Carolina is required by state law to determine the residency classification of applicants. The initial determination of one's resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

Legal Residency Requirements for Fee and Tuition Purposes
Code of Laws Governing Residence
Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions
"Academic Session" is defined as a term or semester of enrollment.

“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person’s college education. A dependent person’s residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“Full time employment” is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

“Immediately Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

“Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the
semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents
Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person’s support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents
Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary
Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily
regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence
A person’s temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver’s license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

Effect of Change of Residency
Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

Effect of Marriage
In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

Exceptions
Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. “Military Personnel and their Dependents”: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in state tuition and fees.
2. “Faculty and Administrative Employees with Full Time Employment and their Dependents”: Full time faculty and administrative
employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. “Residents with Full Time Employment and their Dependents.” Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary”).

4. “Retired Persons and their Dependents.” Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

Application for Change of Resident Status
Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

Incorrect Classification
Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

Inquiries and Appeals
Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-4060

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person’s situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

Note: Sumter Campus Students Please Refer to the Text in Bold Below

Inquiries regarding residency requirements and determinations should be directed to:

UofSC Sumter Admissions Services Office
200 Miller Road
Sumter, SC 29150
803-938-3717

Any person, following a decision on his or her resident classification, may appeal the decision to the Legal Residency Appeals Committee. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Officer informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person’s situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The Legal Residency Officer will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

Academic Fees

These fees reflect the actual costs for the 2010-2011 academic year. For current fee information, contact the UofSC Sumter admissions office.

Cross-Campus Enrolled Students

Courses originating from other USC campuses are made available to students enrolled at UofSC Sumter. Students who enroll in courses originating from more than one campus pay fees based upon the originating campus’s fee schedule. Refer to the originating campus’s Master Schedule of Classes to determine fees.

Fall and Spring Semester Academic Fees (Less than 75 Hours; 75 Hours or More)

Twelve or More Semester Hours
1. South Carolina residents, per semester ($3,474; $5,082)
2. Nonresident, per semester ($8,664; $10,182)
**Fewer than Twelve Semester Hours**
1. South Carolina resident, per semester hour ($289.50; $423.50)
2. Nonresident, per semester hour ($722; $848.50)

**Summer Session Academic Fees**
The following fees are payable in full at the beginning of each summer term and should not be sent in advance. Students bringing checks from home should have separate checks in the exact amount to cover the expenses.
1. South Carolina resident, per semester hour ($289.50; $423.50)
2. Nonresident, per semester hour ($722; $848.50)

**Course Auditing (Resident and Nonresident)**
Students pay the same rate as they would for classes taken for credit.

**Graduate Credit Fees**
Consult The Graduate School at USC Columbia for current charges.

**Correspondence Course Fees**
Consult USC Columbia's Office of the Bursar for current charges.

**Application Fees**
Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only.

**Readmit Fee**
Students who were enrolled in a previous semester but who have not been enrolled in any major semester must apply for readmission through the Admissions office. Students will be charged a readmit fee of $10.

**Matriculation Fee**
A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $500 matriculation fee.

**Technology Fee**
A technology fee of $200 per semester for full-time students ($15 per credit hour for part-time students) is assessed to all students of the University of South Carolina at every campus. This fee is used to provide and support instructional technology for student laboratories and classrooms.

**Laboratory Fee**
A lab fee of $40 per course is assessed to all students taking a science course with a lab. This fee is used to supply the lab with the necessary materials for lab work. A lab fee of $60 is assessed to all students taking MATH 141 Calculus I/MATH 142 Calculus II labs. A lab fee of $20 per course is assessed to all students taking a course in foreign language. A fee of $10 is assessed to all students enrolled in a PEDU activity course.

**Examination Fees**
$40 Scholastic Assessment Test. (SAT) May be taken only once.

$15 Challenge examinations. This test is used to establish undergraduate college credit without class attendance or to validate credits from a nonregionally accredited college. Per semester hour.

A foreign language lab fee of $20 applies to foreign language courses.

**Free Tuition**
Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the code are reproduced below. Please note that these laws include free tuition only. Other academic fees and mandatory fees are still the responsibility of the student.

   a. A child of a wartime veteran, upon application to and approval by the South Carolina Department of Veterans Affairs, may be admitted to any state-supported college, university, or post high school technical education institution free of tuition so long as his work and conduct are satisfactory to the governing body of the institution, if the veteran was a resident of this state at the time of entry into service and during service or has been a resident of this state for at least one year and still resides in this state or, if the veteran is deceased, resided in this state for one year before his death, and provided the veteran served honorably in a branch of the military service of the United States during a war period, as those periods are defined by Section 101 of Title 38 of the United States Code and:
      i. was killed in action
      ii. died from other causes while in the service
      iii. died of disease or disability resulting from service
      iv. was a prisoner of war as defined by Congress or Presidential proclamation during such war period
      v. is permanently and totally disabled, as determined by the Veterans Administration from any cause
      vi. has been awarded the Congressional Medal of Honor
      vii. is missing in action, or
      viii. the applicant is the child of a deceased veteran who qualified under item (4) and (5).
   b. The provisions of this section apply to a child of a veteran who meets the residency requirements of Chapter 112 of this title, is 26 years of age or younger, and is pursuing any type of undergraduate degree.

   No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty on or after July 1, 1964.

   The first-place winner of the essay contest sponsored by the Governor's Committee on the Employment of the Physically Handicapped, provided that he is qualified and in financial need, may receive a four-year scholarship. This scholarship may be cancelled if the recipient fails to maintain general scholastic and conduct standards established by the University.

   Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the
University may attend classes for credit or noncredit purposes on a space available basis without the required payment of tuition if these persons do not receive compensation as full-time employees.

Parking Fees
Every student (including evening students) at UofSC Sumter must have a current parking permit hanging on the rearview mirror of his/her vehicle while parking on the UofSC Sumter campus. Fees for parking permits will be included on the bill each semester at the following rates: $45 for fall, $45 for spring, $20 for summer I, and $20 for summer II. Vehicles improperly parked or parked without a permit will be subject to a parking ticket and fine. (See “Fines (p. 1850)) A copy of UofSC Sumter’s parking regulations is available in the UofSC Sumter Business Office.

Fines

Registration
1. Late enrollment or payment of fees (after prescribed registration day), $5 per day (Maximum $350)
2. Enrollment with check or credit card returned by the bank for any reason, $30, plus late fee above (Maximum $375)

Bad Checks
Check or credit card (other than one used for enrollment) returned by bank for any reason, $30.

Library
Twenty-five cents per day for regular late returns; $1 per day for the late return of a book on reserve; $1 per day for the late return of a book on interlibrary loan; and the replacement cost for each lost book from the regular collection plus a $10 service charge and all applicable fines.

Parking
In a disabled space without a permit, $30; all other fines are $15. Parking fines not paid within three days will increase incrementally.

Other fines may be imposed if warranted by circumstances.

Refund Policy

1. Policy
The University will refund a part of academic fees in certain cases:
   a. Changes in a student’s status, which may require a refund.
      i. Change in a full-time student’s schedule, which results in reclassification to part-time status
      ii. Change in a part-time student’s schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Drop/Withdrawal from the University
      iii. Cancellation of a class by the University

2. Procedure
   a. Refund Requests
      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs. Refund requests must be submitted in writing to the Registrar’s office with all necessary documentation.
   b. Determining the Refundable Portion Procedure

Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

c. Drop/Withdrawal Refund Policies
   Standard Refund Policy For Dropping/Withdrawal From The University:
   All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar’s Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
   i. 100 percent if the student’s official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
   ii. 70 percent if the student’s official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
   iii. 50 percent if the student’s official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
   iv. 20 percent if the student’s official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

d. Refund Schedules
   Refund schedules are relocated under the important deadlines on the Registrar’s website (http://registrar.sc.edu/).

e. Return of Title IV Funds
   Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University
   i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the
Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.

ii. Title IV Refund Distribution

1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
   - Unsubsidized Federal Stafford
   - Subsidized Federal Stafford
   - Federal PLUS Loan
   - Federal Pell Grant
   - Federal Supplemental Education Opportunity Grant
   - Federal TEACH Grant
   - Federal Iraq/Afghanistan Service Grant

2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

3. Exit interviews (http://www.sc.edu/financialaid/loan_counseling/default.html) are required before leaving the University of South Carolina for all students who withdraw and have received Stafford or Federal Nursing/Health Professions Loans. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

f. Appeals Process

A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal. The Withdrawal Refund Appeals Committee reviews and act on all appeals. Address appeals to:

Withdrawal Refund Appeals Committee
(Sumter Campus Only)
Office of the Registrar
University of South Carolina, Sumter
200 Miller Road
Sumter, SC 29150

Withdrawal Refunds

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student's withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

University Withdrawal Refund Appeal Procedures

The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University's published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Records Office and will be considered only in written form.

2. All requests for appeal must be submitted directly by the student through the Records Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student's family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official's advice, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.

3. The appeal must be initiated during the semester for which the refund is requested.

4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.

5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic
issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.

6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.

7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Records Office.

Financial Aid and Scholarships

The financial aid programs of the University of South Carolina Sumter make it possible for many students to attend the University who could not do so if left entirely to their own resources. Scholarships, grants, loans, and part-time employment are available to qualified undergraduate students.

Eligibility for most types of aid except academic scholarships depends on the applicant's financial circumstances. The University uses the Free Application for Federal Student Aid (FAFSA) to determine the amount of assistance each applicant is eligible to receive. We recommend that you complete the FAFSA via the Web at www.fafsa.ed.gov; however, paper applications may still be obtained from most high-school guidance offices or any financial aid office.

General Guidelines for Financial Aid

1. The student should have applied and been accepted for admission to UofSC Sumter as a regular student working toward a degree.
2. The student must have a high-school diploma or a General Education Development (GED) certificate.
3. Each applicant should complete the Free Application for Federal Student Aid (FAFSA) indicating the University of South Carolina Sumter as the school of attendance (Title IV code: 003426).
4. A Student Aid Report (SAR) will be sent from the U.S. Department of Education to the student.
5. If corrections are necessary, the corrections should be made on the Web at www.fafsa.ed.gov (http://www.fafsa.ed.gov).
6. Information concerning federal financial aid programs, such as Federal Work-Study (FWS), Federal Perkins Loans, Federal William D. Ford Direct Loans (DL), and Federal Grants, may be obtained from the financial aid office.
7. The student must be making satisfactory academic progress toward completing a degree or certificate program.
8. The student must sign an educational purpose/certification statement on refunds and defaults as part of the FAFSA.
9. Awards of financial assistance are made in the spring prior to the beginning of the fall semester. An award notification will be sent by email to the student once the file is complete.
10. In order to be considered for most types of federal financial assistance, a student must be enrolled at least half time (6 semester hours); the Federal Pell Grant program is an exception to this requirement.
11. Awards will be based only on a student’s enrollment status during the official registration period.
12. The financial aid office staff is available for counseling with students and parents concerning any financial aid program.

Financial Aid and the Extended Graduate Campus Program

Financial aid for graduate students who are admitted and registered through The Graduate School on the University's Columbia campus will have their financial aid administered by the Columbia campus financial aid office regardless of the student's campus location. As such, graduate students in this category should list the University of South Carolina Columbia as their school of choice on the Free Application for Federal Student Aid form. All financial aid related correspondence should be directed to the Columbia campus financial aid office.

Satisfactory Academic Progress

All students receiving federal financial aid must adhere to the University's policy on satisfactory progress. The intent of this policy is to ensure that students who are receiving federal and/or state financial aid for their education are making measurable progress toward completion of a degree in a reasonable period of time.

Undergraduate students are considered to be making satisfactory progress if they:
1. are admitted and enrolled as degree-seeking students;
2. meet the University standards for continued enrollment;
3. complete requirements for a degree within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any post-secondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree.
   b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed the equivalent of 180 hours for a four-year degree or 90 hours for a two-year degree.
4. earn no fewer than 67% of all coursework if enrolled as a full-time student. The academic year for Satisfactory Academic Progress is comprised of the fall, spring, and summer terms.
5. maintain a cumulative grade point average (GPA) of 2.00 on all coursework.

Explanation

Under these standards, students will be ineligible to receive federal financial aid funds if any of the following occurs:
1. The total number of semesters of enrollment as a full-time student (12 or more semester hours attempted) exceeds 180 hours for a four-year degree or 90 hours for a two-year degree. These limits include all work done at any post-secondary institution, whether or not financial aid was received.
2. The total number of earned hours falls below the prescribed number based upon enrollment in undergraduate or graduate study.
3. Complete requirements for a degree or certificate within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any postsecondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.
b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.

4. The cumulative GPA falls below 2.00.

In other words, students who accumulate a yearly or cumulative GPD that subjects them to suspension, who have been enrolled for more than the equivalent of 10 full-time semesters for a four-year degree program, who do not maintain a cumulative GPA of 2.00 after attempting 48 credit hours, or who do not earn the minimum number of semester hours required will become ineligible to receive federal financial aid funds. This determination applies without regard to any financial aid award letter that may have been sent or received prior to the time the determination is made.

Financial Aid Programs Covered by These Standards

- Federal Pell Grant
- Federal Work-Study
- Federal Supplemental Educational Opportunity Grants
- William D. Ford Federal Direct Loan Program:
  - Direct Subsidized Loan
  - Direct Unsubsidized Loan
- Federal PLUS
- South Carolina Lottery Tuition Assistance Program
- South Carolina Need-Based Grant
- Other federal or state programs as required
- Some select private loans (as determined by the lender)

Appeals

Students who are ruled ineligible for financial aid may appeal this determination under specifically prescribed conditions. Deadlines for receipt of appeals are 20 days prior to the end of the semester for which aid is requested. Information concerning the appeal process is available in the financial aid office.

Reinstatement

Students shall be reinstated for financial aid eligibility at such time as they successfully complete sufficient hours and have a sufficient grade point average to meet the minimum requirements for eligibility as set forth in this policy.

Academic Forgiveness

The Satisfactory Academic Progress policy standards will not automatically apply to any hours forgiven under the University of South Carolina Academic Forgiveness Program. However, if you have been granted academic forgiveness under this policy you must contact the Financial Aid Office for further assessment.

Grants

Federal Pell Grant

The Federal Pell Grant is the largest federally funded student financial aid grant program. It serves as the foundation upon which all other undergraduate aid is awarded. Typically, it is available only to undergraduate students who have not earned a baccalaureate degree. Federal Pell Grant eligibility is determined according to federal law and is based on the financial information you and your family provided on your FAFSA.

You are notified of your possible eligibility to receive a Federal Pell Grant via the Student Aid Report (SAR). The financial aid office will receive this information directly from the federal processor and determine the amount of your Federal Pell Grant. You should carefully review the information on your SAR and, if it is correct, keep it for your records. If you discover mistakes, follow the instructions and submit corrections as soon as possible.

If you or your family experiences a major change in your financial situation after your Pell Grant eligibility has been determined, you should notify the financial aid office immediately. A counselor will be able to determine if you qualify for an adjustment of your Pell Grant award and/or other financial aid.

Federal Supplemental Educational Opportunity Grant (FSEOG)

The FSEOG is a grant that does not need to be repaid. The financial aid office awards UofSC’s limited allocation of FSEOG funds. Recipients must be undergraduates who have not already earned a baccalaureate degree and who demonstrate exceptional financial need. FSEOG recipients must be eligible to receive a Pell Grant and have the lowest EFC’s from among those students being considered for an award.

South Carolina Educational Resources

State Need-Based Grant Program (SNBG)

The South Carolina Need-Based Grant is a state-funded grant for undergraduates attending public and independent colleges and universities within South Carolina. Recipients may not have already earned a baccalaureate degree. To be considered, you must be a South Carolina resident, be admitted or currently enrolled with a minimum GPA of 2.00, complete the FAFSA, demonstrate financial need, be of good moral character, and have no felony and/or alcohol or drug convictions for a period of one year. Additionally, to renew a state grant award, you must maintain an annual 2.00 GPA and complete 24 semester hours during the fall and spring semesters if enrolled full time or an equivalent number of hours based on enrollment if less than full time. Awards are made for the entire academic year (fall and spring semesters) only. The State Need-Based Grant does not need to be repaid.

South Carolina Legislative Incentives for Future Excellence Scholarship

The South Carolina Legislative Incentives for Future Excellence Scholarship (LIFE) was established by the General Assembly during the 1998 legislative session. To be eligible for a LIFE Scholarship, you must have graduated from a high school located in South Carolina on or after May 1995 and be a full-time, undergraduate, degree-seeking student. You must be a South Carolina resident for in-state tuition purposes at the time of enrollment and have no felony, alcohol, or drug convictions. If, however, you have been judged delinquent or have been convicted or pled guilty or nolo contendere to an alcohol or drug misdemeanor, you are ineligible for one calendar year from the date of the conviction. You must also be a U.S. citizen or a permanent resident under state laws. You may not be in default or owe a refund on any federal or state financial aid program.

If you are a first-time entering freshman, you must have graduated from high school with a minimum 3.00 cumulative grade point average (GPA) on a 4.00 scale.

For initial LIFE Scholarship eligibility, if a currently enrolled student, you must have earned a cumulative 3.00 UofSC GPA at the end of the academic year. You must also have earned a minimum of 30 credit hours, or who do not earn the minimum number of semester hours required will become ineligible to receive federal financial aid funds. This determination applies without regard to any financial aid award letter that may have been sent or received prior to the time the determination is made.

Financial Aid Programs Covered by These Standards

- Federal Pell Grant
- Federal Work-Study
- Federal Supplemental Educational Opportunity Grants
- William D. Ford Federal Direct Loan Program:
  - Direct Subsidized Loan
  - Direct Unsubsidized Loan
- Federal PLUS
- South Carolina Lottery Tuition Assistance Program
- South Carolina Need-Based Grant
- Other federal or state programs as required
- Some select private loans (as determined by the lender)

Appeals

Students who are ruled ineligible for financial aid may appeal this determination under specifically prescribed conditions. Deadlines for receipt of appeals are 20 days prior to the end of the semester for which aid is requested. Information concerning the appeal process is available in the financial aid office.

Reinstatement

Students shall be reinstated for financial aid eligibility at such time as they successfully complete sufficient hours and have a sufficient grade point average to meet the minimum requirements for eligibility as set forth in this policy.

Academic Forgiveness

The Satisfactory Academic Progress policy standards will not automatically apply to any hours forgiven under the University of South Carolina Academic Forgiveness Program. However, if you have been granted academic forgiveness under this policy you must contact the Financial Aid Office for further assessment.

Grants

Federal Pell Grant

The Federal Pell Grant is the largest federally funded student financial aid grant program. It serves as the foundation upon which all other undergraduate aid is awarded. Typically, it is available only to undergraduate students who have not earned a baccalaureate degree. Federal Pell Grant eligibility is determined according to federal law and is based on the financial information you and your family provided on your FAFSA.
hours, or the annual equivalent at all institutions attended, for the previous academic year if completing your first year; 60 credit hours must have been earned if completing your second year; and, 90 credit hours must have been earned if completing your third year. Students at UoS C Regional Campuses are only eligible to receive the LIFE Scholarship for four consecutive semesters.

You may receive the LIFE scholarship for not more than eight semesters for a four-year degree or 10 semesters for a five-year degree. Funds from this program may not be used for remedial courses or continuing education classes. If you are receiving South Carolina’s Palmetto Fellows Scholarship, you are not eligible for a LIFE Scholarship.

To retain the LIFE Scholarship you must earn an average of 30 credit hours for each academic year and earn a 3.00 cumulative UoS C GPA by the end of the academic year. The financial aid office, using data from the admissions and records offices, is responsible for awarding LIFE Scholarships.

Please note that the LIFE Scholarship statutes and regulations are subject to change by the South Carolina Legislature.

**South Carolina Lottery Tuition Assistance Program**

During the 2002 legislative session, the South Carolina General Assembly established the Lottery Tuition Assistance Program. Its purpose is to provide resources that supplement, not supplant, existing resources for educational purposes to South Carolina’s students. The program assists students who wish to attend two-year public or independent college in the state. In calculating the amount awarded, any and all federal grants and need-based grants must first be awarded before determining the amount a student is eligible to receive. A student may receive up to the cost of tuition minus Pell, SEOG, and SNBG. The college at which the student is enrolled will notify each student of the exact award amount.

In order to qualify for lottery tuition assistance, a student must meet the following requirements:

- file the Free Application for Federal Student Aid (FAFSA) and complete the process to determine eligibility for federal student aid each academic year
- be a legal resident of South Carolina as defined in applicable state statutes governing the determination of residency for tuition and fee purposes
- be enrolled at the time of the grant disbursement in a minimum of 6 credit hours for the term and be making satisfactory academic progress toward an associate’s degree
- verify that the student does not owe a refund or repayment on a state grant, Federal Pell Grant, or Federal Supplemental Educational Opportunity Grant (FSEOG) and is not in default on a loan under the Federal Perkins Loan or Federal Stafford Loan programs
- must not be eligible for or a recipient of the LIFE scholarship.

To retain program funds, a student must have a 2.00 GPA by the end of the academic year.

In addition, students shall not be eligible to receive lottery tuition assistance for more than one certificate, diploma, or degree earned within any five-year period.

The financial aid office administers the South Carolina Lottery Tuition Assistance Program, and the exact award amount is dependent upon the number of eligible recipients and the amount of funding each academic year. Please note that program statutes and regulations are subject to change by the S.C. Legislature.

**Loans**

The Federal Direct Stafford Loan Program (Subsidized and Unsubsidized)

The Federal Direct Stafford Loan Program provides low-interest, long-term loans to eligible students through the U.S. Department of Education.

Subsidized Stafford Loans are awarded based on financial need. The federal government pays the interest on these loans while the student is enrolled in school at least half-time (6 semester hours), during the grace period and during deferment periods.

Unsubsidized Stafford Loans are not based on financial need. Interest begins accruing after the first disbursement. Students have the option of paying the interest monthly or quarterly while in school and during the grace period, or can have the interest capitalized and added to the principal amount of the loan upon entering repayment.

The graduate limit includes Stafford Loans received for undergraduate study.

**Federal Direct Parent Loan for Undergraduate Students (PLUS)**

Federal Direct Parent Loan for Undergraduate Students (PLUS) provides long-term loans to parents for their dependents through the U.S. Department of Education. Loan amounts under this program are limited to the student’s cost of education minus other financial aid awards. Parents may be denied a PLUS loan due to adverse credit history. If the PLUS Loan is denied, the student is eligible for an additional Unsubsidized Loan.

The repayment period for each Direct PLUS Loan begins on the date the final loan disbursement is made. There is no grace period for Direct PLUS Loans. Parents have the option of postponing payments until six months.
after the student ceases to be enrolled at least half time. Parents must contact the Direct Loan Servicing Center to request a postponement of payments. Interest will accrue during the postponement period. The loans have a fixed rate of 7.9%. PLUS Loan funds will be disbursed in two equal payments, one at the beginning of each semester (Fall — August, Spring — January). One semester loans are disbursed at the beginning of the semester for the full loan amount.

**South Carolina Teacher Loan Program**

This program is available only to residents of South Carolina who are attending college for the purpose of becoming certified teachers employed in the state’s school system in areas of critical need as defined by the State Board of Education. For loan recipients who become certified and teach in an area of critical need, the loan shall be cancelled at the rate of 20 percent for each full year of teaching, up to 100 percent. Loan recipients who do not become certified and/or do not teach in a critical need shall be responsible for repaying the entire amount of loan funds borrowed plus interest. Contact the Office of Student Financial Aid and Scholarships for application information and deadlines.

**Work Opportunities**

**Federal Work-Study Program**

The Federal Work-Study Program provides part-time employment for needy students to meet their educational expenses. To be eligible for employment under this federal program, a student must be enrolled in the University or fully accepted for admission and demonstrate financial need.

Students who are enrolled at least half-time work an average of 12 to 20 hours per week. During vacation periods it is sometimes possible to work up to 40 hours per week. Pay rates vary with the job assignment.

**Refunds and Financial Aid**

The official University policy and procedure concerning refunding of University tuition and fees which result from withdrawal or reduction in hours is contained in the “Fees and Refunds (p. 1858)” section of this bulletin. Students who withdraw or reduce hours may be eligible to receive a refund as provided by the official University policy; however, recipients of financial aid generally do not receive the refund.

When students who are recipients of federal financial aid withdraw from all classes, they are only entitled to retain a percentage of the federal financial aid received that is proportional to the time they remained enrolled. If, for example, a student withdraws after completing 30 percent of the semester or summer term, they can only retain 30 percent of the federal financial aid they received. The balance, 70 percent, must be returned to the financial aid programs. The Office of the Bursar performs this calculation and students are notified by mail of the outcome.

When funds are applied back to the federal financial aid programs, loan funds are always returned first, thereby reducing the student’s repayment obligation. If funds remain after repaying federal loans, they are then repaid to the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant (FSEOG) programs. After all federal funds are repaid, state-sponsored grant programs then receive any remaining payments.

**Veterans Benefits**

The following policies and procedures are of primary concern to veterans, servicepersons, members of guard and selected reserves, and other eligible persons who receive VA educational benefits while enrolled at the University.

*Please note: Academic standards of progress and attendance are covered under school standards of progress as specified by the South Carolina Commission on Higher Education, License Division, and are required by the U.S. Department of Veterans Affairs (VA).*

**Enrollment Certification**

Certification by the University VA certifying official in the Office of Financial Aid, Scholarships, and Veterans Affairs is required for eligible students who wish to receive VA educational benefit checks. Students must initiate their own requests for enrollment certification. The certifying official will complete certifications and forward other forms to the VA only for those students who have made such requests and have completed the necessary paperwork.

Normally, the VA requires that eligible students must have completed full University admissions requirements and matriculation into degree-seeking status before they may receive VA educational benefits. However, those students admitted as “Provisional,” “Military Special,” or “Transient,” or students enrolling for prerequisite courses required for admission into a professional degree program or school may request VA certification if they provide appropriate documentation. Any VA students in these categories should contact the VA certifying official for details. In these and all other admissions categories, only the federal VA has the final authority to award or to deny military educational benefits.

Undergraduate veterans or servicepersons should contact the Office of Admissions for consideration of receiving college credit for military schools.

Students can best ensure receipt of benefits by informing the school VA office of their intent to register for classes and by supplying the number of credit hours for which they will enroll each session. Eligible VA students may request certification on a semester basis and should recertify for each new semester at least 45 days prior to the first day of class of their next semester.

Normally, VA payments are authorized only for those courses which are required by the academic department for the student’s current degree program. All students receiving educational benefit checks from the VA are responsible for notifying the VA certifying official of any changes in their degree programs and/or course loads during a semester, to include drop/add, withdrawal, changing from credit to audit status, invoking the Pass-Fail option in a course, or enrolling in any distance education course, independent study, internship, or practicum.

Appropriate forms and benefits-related information are available at the Office of Financial Aid, Scholarships, and Veterans Affairs. Each student request will be handled individually according to their VA benefit program and enrollment status at the University.

**Academic Scholarships**

The University of South Carolina Sumter offers scholarships to academically qualified students in numerous fields of study. Scholarships are available to full-time and part-time students. These scholarships are provided by individuals, organizations, clubs, and businesses in Sumter and surrounding areas. Interested students should complete the UofSC Sumter scholarship application, which is available in the Office of Financial Aid, Scholarships, and Veterans Affairs and online (http://www.uscsumter.edu/students/financial_aid/scholarships.shtml).
following scholarships are offered on an annual basis. Several are for a specific area of study or category of student.

**Access & Equity Scholarship.** Grant determines restrictions. Please contact the Office of Financial Aid, Scholarships, and Veterans Affairs for more information.

**Porter H. Adams Jr. Scholarship.** Must be awarded to a student in any discipline who is a U.S. citizen, with preference given to S.C. residents.

**Swamp Fox Chapter, Air Force Association/Boeing Aerospace Scholarship.** Must be awarded to an active-duty member or veteran of the U.S. Air Force or to a legal dependent of such a person.

**Alpha Kappa Alpha Sorority Inc. Scholarship.** Must be awarded to an African-American student majoring in education with a GPA of 2.50 or higher, preferably female; if no eligible applicant, then awarded to any African-American applicant.

**Father William Atkinson Scholarship.** Must be awarded to a student majoring in social work, psychology, physical/occupational therapy, art therapy, or education.

**BD Scholarship.** Must be awarded to a student enrolled in the 2+2 Engineering Program.

**Henry D. Barnett Memorial Scholarship.** Must be awarded to a Sumter County resident who has dyslexia or a sight or learning disability; if no eligible applicant, then awarded to a Sumter County resident.

**Dr. Michael S. Becker Memorial Endowed Scholarship.** Must be awarded to a student majoring in Business Administration with preference to a first-generation college student.

**Jane McKenzie Beebe Scholarship.** The scholarship will be awarded to a student majoring in education or pre-education who exhibits academic merit. If no such student meets these criteria, the award may be presented to any worthy student.

**Bishop Scholarship.** First preference to a student who intends to major in either Biology or Nursing.

**Louise L. and John M. Brabham Sr. Scholarship.** The scholarship will be awarded to any student who is a Sumter County resident and who exhibits academic merit attending the University of South Carolina Sumter.

**Ethel Burnett Memorial Scholarship.** Must be awarded to a student who is majoring in education and is a resident of Sumter County.

**Ethel Burnett Memorial Scholarship, Pilot Club of Sumter.** Must be awarded to a student who is majoring in education or an allied health field, is a resident of Sumter County, maintains a GPA of at least 2.50, and demonstrates financial need.

**Frank and Eleida Nexsen Burrows Scholarship.** Must be awarded to a student majoring in nursing.

**Carolina Coca-Cola Bottling Company Scholarship.** Must be awarded to a student majoring in education.

**Brian K. Costello Scholarship.** Must be awarded to a student who conveys a career interest in either medicine or physical therapy and intends to pursue a related preparatory education path. The student must maintain a 3.75 GPA. If no such student can be identified, then awarded to a student of high academic achievement pursuing a Science, Technology, Engineering or Math (STEM) education path.

**Robert C. Costello and Elizabeth D. Costello Scholarship.** Must be awarded to a student whose intended major is chemistry, biochemistry or mathematics and who either has recently demonstrated academic excellence or who is a non-traditional student who shows a strong promise of academic excellence.

**E. Lee Craig Education Scholarship.** Must be awarded to a student majoring in English Education or a student majoring in education or pre-education who exhibits academic merit. If no such student meets these criteria, the award may be presented to any worthy student.

**Alivia Burrows Davids Scholarship.** Must be awarded to a nontraditional student majoring in secondary education in mathematics; if no eligible applicant, then awarded to a secondary education major, or a mathematics or physical education major.

**William and Martha Dubose Scholarship.** First preference is given to a student majoring in English or journalism.

**David L. Evans and S. Anne Walker Scholarship.** Must be awarded to a student majoring in education. If no eligible student meets the criteria, the award may be presented to any eligible student.

**Farmers Telephone Cooperative (FTC) Scholarship.** Must be awarded to a student living in the FTC service area of Clarendon, lower Florence, Lee, Sumter, and Williamsburg counties whose parents or guardians are members of the Farmers Telephone Cooperative.

**Edward H. and Eola G. Fienning Memorial Scholarship.** Must be awarded to a Sumter County resident who has submitted an application for financial assistance.

**Christopher Laird Floyd Scholarship.** Must be awarded to one or more eligible underrepresented students to support education diversity consistent with its mission and admissions policy. If no such student meets the criteria, the award may be presented to any eligible student.

**Laurens W. Floyd Jr. and Charlene D. Floyd Clemson at Sumter Scholarship.** First preference to a student who indicates that he/she plans to transfer to Clemson University.

**Helen O. Freeman Scholarship.** Must be awarded to a Business Administration Major who is a first-generation college student. If no applicant is available, then award to a student majoring in Business Administration.

**Anne Bailey Geddings Scholarship.** Must be awarded to a first generation college student.

**Dr. Lea B. Givens Memorial Scholarship.** Must be awarded to a graduate of Sumter High School, Sumter, SC who is majoring in biology. If no such student meets the criteria, the award may be presented to any eligible student.

**Clifton C. Goodwin Jr. Memorial Scholarship.** Must be awarded to a Sumter County resident who has submitted an application for financial assistance.

**Mr. and Mrs. Robert E. Graham Scholarship.** Must be awarded to a student majoring in nursing, preferably to a student pursuing a bachelor’s degree.
Dr. Jean-Luc E. Grosso Memorial Scholarship. Must be awarded to a student who has declared Business as their major.

Janette Barnes Guiler Memorial Scholarship. Must be awarded to a student majoring in nursing.

Karen Sonya Harris-Sweetman and Mark D. Sweetman Scholarship. Must be awarded to a student majoring in education.

Ervin H. “Bud” Hickman, Jr. Memorial Scholarship. Must be awarded to a student who demonstrated financial need with preference to a resident of Sumter County.

J.B. and Elizabeth Hilton Scholarship. Must be awarded to a student from Thomas Sumter Academy in Dalzell, SC. If no such student meets this criteria, the award may be presented to any deserving student.

Joyce Holloman Hodge and Family Scholarship. Must be awarded to one or more students who are first generation students.

Laura W. and Oliver F. Hutchens Memorial Scholarship. Awarded to students attending USC Sumter who have demonstrated both academic proficiency and a need for financial assistance.

Fred A. “Larry” Lawrence Memorial Scholarship. First preference is given to a part-time student.

Ralph G. MacDonald Chemistry Scholarship. The scholarship will be awarded to a student majoring in chemistry. If there is no eligible student applicant, then the award will go to any student enrolled in chemistry classes.

Dr. Dинфord G. Maness Memorial Scholarship. Must be awarded to a student majoring in a program under the Division of Arts and Letters. If none available, then to any eligible student.

Coach Melvin L. McCormick and Janice B. McCormick Scholarship. Must be awarded to a student from Thomas Sumter Academy in Dalzell, SC. If no such student meets this criteria, the award may be presented to any worthy student.

Ross S. McKenzie Scholarship. Must be awarded to a student who desires a liberal arts education balanced with courses in science and business.

Ezra Pierson McLeod Scholarship. Must be awarded to a Sumter County, SC resident. If there is no eligible applicant, then award to any deserving student.

Mental Health Association of Sumter County Scholarship. Must be awarded to a Sumter County resident who is planning to pursue a career in a mental health field (through psychology, social work, counseling, nursing, or another related field) and who is planning to return to work in Sumter County for at least one year following graduation.

Mid-Carolina Chapter of Phi Delta Kappa International Scholarship. Must be awarded to a graduate from a public high school in Clarendon, Kershaw, Lee, Sumter or Williamsburg County who plans to major in education.

I. Harby Moses Scholarship. The scholarship will be awarded to a graduate of Wilson High School. If there is no eligible applicant, it may be awarded to any student attending the University of South Carolina Sumter.

Andrew W. Muller Scholarship. Must be awarded to a graduate of Sumter School District Two.

E. Whilden Nettles Jr. Memorial Scholarship. Must be awarded to a student who is the first in his/her family to attend college or is a non-traditional student and demonstrates significant financial need. Other factors include volunteer work, contributions made by the candidate to the Sumter community and other attributes (e.g., motivation, perseverance, resilience, work ethic). If no such student can be found, then award to any deserving student.

Ditty Poston Alumni Scholarship. Must be awarded to a student who is a Sumter County resident.

Joe Singleton Company, Inc., Scholarship. Must be awarded to a freshman who is a Sumter County resident.

Sonntag Family Scholarship. Must be awarded to a student who is the first in his/her family to attend college or is a non-traditional student (age 25+); must demonstrate significant financial need; and does not qualify for merit-based aid but demonstrates attributes (e.g., motivation, perseverance, resilience, work ethic) that will allow him/her to be successful at UofSC Sumter. If no such student can be found, it may be awarded to any deserving student.

A.T. and Jessie T. Sublette Memorial Scholarship. Must be awarded to a student majoring in nursing, premedicine, or other health-related fields.

Joseph Shepard and Janet Brunson Sublette Scholarship. Awarded to a student who intends to transfer to Clemson University. If no student meets this criteria, the award may be presented to any worthy student.
Sumter County Unit of the South Carolina Education Association Retired Scholarship. Must be awarded to a rising senior whose career goal is to teach.

Sumter County Fair Association Scholarship. Must be awarded to a Sumter County resident and dependent of a member of the American Legion or a veteran of the U.S. Armed Forces.

Sumter Lions Club Scholarship. Must be awarded to a student who is sight or hearing impaired or to a student majoring in special education for the sight or hearing impaired; if no eligible applicant, then awarded to any student.

Sumter Utilities and USC Sumter Shaw AFB Scholarship. Awarded to students at Shaw AFB who are enrolled at UofSC Sumter and Palmetto College. It covers active military, reservists, veterans, national guard and their families.

C. Talmadge Tobias, Jr. and Linda H. Tobias Scholarship. Must be awarded to a student majoring in Business Administration with preference to a first-generation college student.

UofSC Sumter Commencement Speaker Scholarship. Must be awarded to a UofSC Sumter student; if recipient changes campuses after receipt, they become ineligible; amount is in-state, full-time tuition at UofSC Sumter.

UofSC Sumter Division of Business Administration and Economics Scholarship. Must be awarded to a student majoring in business who exhibits academic merit.

UofSC Sumter Emerging Scholars Scholarship. Must be awarded to a student demonstrating sufficient academic qualifications and pursuing a major in any area offered at UofSC Sumter with the exception of Business.

UofSC Sumter Partnership Part-Time Scholarship. Must be awarded to students enrolled in at least six credit hours and no more than 11 credit hours.

Hendrikus E.M.J.L. van Bulck Endowed Scholarship. Must be awarded to a Business Administration Major who is a first-generation college student. If no such student is available, then award to a student majoring in Business Administration.

Verizon Foundation Scholarship. Must be awarded to a minority student.

Naomi Warner Business Scholarship. Must be awarded to an eligible student who is majoring in business.

Williams-Brice-Edwards Scholarship. Must be awarded to a Sumter County resident.

The following scholarships do not specify area of study or category of student:

American Legion Post 15 Memorial Scholarship
Jack C. Anderson, Jr. Dean's Endowed Scholarship
Arthur S. Bahnmueller Scholarship
Julie Abney Bailey Endowed Scholarship
Bank of America NA Scholarship
BB&T Scholarship
John M. Brabham Sr. Memorial/Black River Electric Cooperative Scholarship
G. Werber Bryan Scholarship
Roger Dale Bullard Memorial Scholarship

Albert L. and Nina O. Carpenter Scholarship
C. Leslie Carpenter Dean’s Scholarship
Mr. and Mrs. W.E. Covington Scholarship
Judith L. Croskey Scholarship
Dr. John J. Duffy Memorial Scholarship
Duke Energy Progress Scholarship
Mr. and Mrs. Curt Edens, Jr. Scholarship
ESE Marketing Scholarship
Danny R. Geddings Memorial Scholarship
Mr. and Mrs. Charles Gupton Scholarship
Carol Hallgren Scholarship
O.D. Harvin Scholarship
Mr. and Mrs. A.J. Hatfield Memorial Scholarship
Kiwanis Club of Sumter Scholarship
Linda Ann Epperhartz Lawrence Memorial Scholarship
Dan and Dotty Lyles Scholarship
Sara Davis McLendon Memorial Scholarship
NBSC-Lucille McKiever Memorial Scholarship
Major General Thomas R. Olsen, Ret USAF Memorial Scholarship
Rotary Club of Sumter Palmetto Scholarship
SAFE Federal Credit Union Bicentennial Scholarship
Rosa W. Schwartz Scholarship
D.L. Scarry Foundation Scholarship
Mr. and Mrs. R. Glenn Sharp Scholarship
Sumter Industrial Association Scholarship
Sumter Optimist Don Stein Memorial Friend of Youth Scholarship
UofSC Sumter Alumni Association "Big Wednesday" Scholarship
UofSC Sumter Alumni Association Scholarship
UofSC Sumter SGA Teacher of the Year Scholarship
Wells Fargo/UofSC Sumter Scholarship
Samuel M. Willis Founding Director's Scholarship
Wilson MacEwen and Co. Scholarship
Dr. Robert C. and Harriette Heath Wimberly Scholarship

Fees and Refunds
Checks, Money Orders, and Credit Cards
The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina (https://my.sc.edu/) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by E-check, UofSC’s preferred method of payment, when using Self-Service Carolina or payment by check or money order through the mail.

Legal Residency
The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one’s resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.
Legal Residency Requirements for Fee and Tuition Purposes

Code of Laws Governing Residence
Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions

“Academic Session” is defined as a term or semester of enrollment.

“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person's college education. A dependent person's residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“Full time employment” is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

“Immediatly Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

“Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving in-state tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.
“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents
Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person’s support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents
Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory domiciliary requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary
Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence
A person’s temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina vehicle registration;
3. Maintaining South Carolina driver’s license;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.
Effect of Change of Residency
Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

Effect of Marriage
In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

Exceptions
Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. "Military Personnel and their Dependents": Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in state tuition and fees.

2. “Faculty and Administrative Employees with Full Time Employment and their Dependents”: Full time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. “Residents with Full Time Employment and their Dependents” Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary”).

4. “Retired Persons and their Dependents”: Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

Application for Change of Resident Status
Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

Incorrect Classification
Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.
Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

Inquiries and Appeals
Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-5555

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person’s situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

Academic Fees
Application Fees
Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls.

Matriculation Fee
A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $500 matriculation fee.

Free Tuition
(This includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. S.C. Code Ann. § 59-111-110 (Law Co-op. 1976) No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, as defined herein, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty (on or after July 1, 1964).

2. S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984) Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or non-credit purposes on a space available basis; provided, however, that neither such persons nor their spouses receive compensation as full-time employees.

Refund Policy

1. Policy
The University will refund a part of academic fees in certain cases:
   a. Changes in a student’s status, which may require a refund.
      i. Change in a full-time student’s schedule, which results in reclassification to part-time status
      ii. Change in a part-time student’s schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Drop/Withdrawal from the University
      iii. Cancellation of a class by the University

2. Procedure
   a. Refund Requests
      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

   b. Determining the Refundable Portion Procedure
      Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

   c. Drop/Withdrawal Refund Policies
      Standard Refund Policy For Dropping/Withdrawal From The University.
      All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays,

Examination Fees

Graduate Record Fees
1. General Test ($60)
2. Subject Test ($60)

Revalidation examinations intended to revalidate UofSC courses, obselete under the statute of limitations. Per hour, $25.

Note: Revalidation examinations require permission of the dean of The Graduate School. The fee must be paid in advance, and is nonrefundable, once the student is presented to the instructor for the examination.

Revalidation Examinations Procedure

1. Determining the Refundable Portion Procedure
   a. Refund Requests
      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

   b. Determining the Refundable Portion Procedure
      Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

   c. Drop/Withdrawal Refund Policies
      Standard Refund Policy For Dropping/Withdrawal From The University.
      All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays,
**Refund Schedules**

Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar's Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund

i. 100 percent if the student’s official drop/withdraw calculation is within 6% of the enrollment period for which the student is liable.

ii. 70 percent if the student’s official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.

iii. 50 percent if the student’s official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.

iv. 20 percent if the student’s official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

**Refund Schedules**

Refund schedules are relocated under the important deadlines on the Registrar’s website (http://registrar.sc.edu/).

**Return of Title IV Funds**

Refunds Policy For Students Who Have Received Title IV Funds And Withdraw From The University

i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.

ii. Title IV Refund Distribution

1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
   - Unsubsidized Federal Stafford
   - Subsidized Federal Stafford
   - Federal Perkins

2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.

3. Exit interviews (http://www.sc.edu/financialaid/loan_counseling/default.html) are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

**f. Appeals Process**

A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal. The Withdrawal Refund Appeals Committee reviews and act on all appeals. Address appeals to:

Withdrawal Refund Appeals Committee
(Sumter Campus Only)
Records Office
University of South Carolina Sumter
200 Miller Road
Sumter, SC 29150

**Withdrawal Refunds**

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes. Students requesting withdrawal for extenuating circumstances after the penalty date (last day for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly
related to a student’s withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

University Withdrawal Refund Appeal Procedures
The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University’s published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Records Office and will be considered only in written form.
2. All requests for appeal must be submitted directly by the student through the Records Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official's advice, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.
3. The appeal must be initiated during the semester for which the refund is requested.
4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.
5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.
6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.
7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Records Office.

Learning Outcomes for Associate’s Degree Programs
Graduates will be able to:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through writing.
- Apply the methods of mathematical, statistical, or analytical reasoning to critically evaluate data, solve problems, and effectively communicate findings verbally and graphically.
- Apply the principles and language of the natural sciences and associated technologies to historical and contemporary issues.
- Communicate in more than one language.
- Use the principles of historical thinking to understand past human societies.
- Use the principles of the social sciences to explore diverse cultural identities and to analyze political and environmental issues.
- Create or interpret literary, visual or performing arts.

and be able to demonstrate at least one of the following:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through speaking.
- Collect, manage and evaluate information using technology, and communicate findings.
- Examine different kinds of social and personal values, analyzing the ways in which these are manifested in communities as well as individual lives.

Carolina Core - 15 Hours
These serve as general education requirements common to all associate degrees.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours) Must be passed with a grade of C or higher
- SCI: Scientific Literacy (3 Hours)
- GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
- GSS: Global Citizenship and Multicultural Understanding: Social Sciences (3 Hours)

Associate of Arts Degree Curriculum - 60 Hours
1. Basic Requirements (including 15 hours of Carolina Core stated above) (37-38 Hours)
All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
  Must be passed with a grade of C or higher

Academic Programs
Associate’s Degree Programs
The University of South Carolina offers the Associate in Arts degree and the Associate in Science degree at the Sumter campus to those students who have earned 60 hours of credit and completed the following requirements:

- Learning Outcomes
- Carolina Core - All Associates
- Associate of Arts Degree Curriculum
- Associate of Science Degree Curriculum
- Other Requirements
- Second Associate’s Degree
• ARP: Analytical Reasoning and Problem-Solving (3 Hours)
  Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics
• SCI: Scientific Literacy (7-8 Hours)
  Must include at least 1 laboratory science course
• GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
  One 3-hour language course at any level or score of “2” on placement exam
• GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
• GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)
• AIU: Aesthetic and Interpretive Understanding (6 Hours)
• Choose one of the following three options (3 Hours minimum):
  • CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
  • INP: Information Literacy (3 Hours)
  • VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (22-23 Hours)
Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. UofSC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a UofSC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate’s degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Associate of Science Degree Curriculum - 60 Hours
1. Basic Requirements (including 15 hours of Carolina Core stated above) (38-42 Hours)

All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.
• CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
  Must be passed with a grade of C or higher
• ARP: Analytical Reasoning and Problem-Solving (6 Hours)
  Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics
• SCI: Scientific Literacy (8-12 Hours)
  Must include at least 2 laboratory science courses
• GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
  One 3-hour language course at any level or score of “2” on placement exam
• GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)
• GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)
• AIU: Aesthetic and Interpretive Understanding (6 Hours)
• Choose one of the following three options (3 Hours minimum):
  • CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
  • INP: Information Literacy (3 Hours)
  • VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (18-22 Hours)
Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. UofSC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a UofSC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate’s degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Other Requirements
In addition to the requirements for the A.A. and A.S. degrees stated above, the following stipulations also apply:
• Students must have an institutional GPA of 2.00 or better (does not include course grades earned by challenge examinations).
• At least 15 hours earned at UofSC Sumter.
• No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees.
• Pass-Fail option on elective courses is allowed.
• No more than 15 hours of nontraditional credits, which include DANTES, CLEP, and military experience.
• No more than 3 1-hour PEDU activity courses may count toward meeting Associate’s degree requirements (any track).

Second Associate’s Degree
At times the University of South Carolina Sumter confers a second associate’s degree upon candidates who have completed all requirements for the second degree, provided that the additional requirements for the second degree include a minimum of 12 semester hours beyond those required for the first degree earned at UofSC Sumter and a minimum of 72 semester hours total. Under this policy a student may apply for two degrees at one time or separately. In either case the student would receive two diplomas.

Baccalaureate Degree Programs
Palmetto College
Palmetto College combines the resources of the University of South Carolina system with the flexibility of course delivery formats including on-campus, traditional classes, two-way video classes, and online classes.

Faculties from Lancaster, Salkehatchie, Sumter, and Union, as well as Extended University in Columbia, use two-way interactive video to teach students at multiple sites simultaneously as well as fully online, asynchronous instruction. These delivery mechanisms give students access to many more course options than are available face-to-face on their campuses.
UofSC Aiken Bachelor of Science Degree in Business Administration

Students must comply with the requirements of the UofSC Aiken bulletin for the B.S. in Business Administration. UofSC Aiken program requirements are reflected in the UofSC Sumter bulletin so far as publishing deadlines allow.

The mission of the School of Business at UofSC Aiken focuses on creating a caring learning environment in its accredited undergraduate program at multiple locations. The program prepares students to successfully meet the dynamic global, technological, and ethical challenges of business and society. The UofSC Aiken School of Business Administration is accredited by AACSB International, The Association to Advance Collegiate Schools of Business.

Curriculum

The School of Business Administration offers the Bachelor of Science in Business Administration degree. The area of concentration is management. To qualify for graduation, a student must meet general education requirements, business core requirements, and area of concentration requirements, as stated below. Students are encouraged to choose courses that will contribute to their educational development in the liberal arts as well as their development and preparation for particular careers. Students should become very familiar with the degree requirements under which they are to be graduated and seek proper advisement.

Admission Standards for the Professional Business Administration Program

The baccalaureate curriculum of the School of Business Administration is divided into two years of general education and two years of upper-level business course work, which constitute the School of Business Administration Professional Program. Students who fulfill the admission requirements of UofSC Sumter may enroll in any general education courses and any business courses at the 100 and 200 level provided they meet individual course prerequisites. They may also enroll in upper-level business courses provided they meet individual course prerequisites and have not been declined admission into the School of Business Administration Professional Program. At the end of each semester, the academic records of business students are audited to identify those students who meet the following criteria:

1. the student has declared a business administration major;
2. the student has earned at least 60 hours of credit toward the business administration degree.

Students who meet these criteria are admitted into the professional program if they have a cumulative collegiate GPA of 2.50 or higher and have passed MGSC 290 Computer Information Systems in Business or the Computer Applications Proficiency Exam with a grade of C or better. The assessment of academic records of students who enter UofSC Sumter with 60 or more credit hours toward a UofSC Aiken business administration degree is made at the end of the semester of entry.

Students denied admission into the professional program will not be permitted to register for upper-level business courses (300 and above). This enrollment restriction will remain in force until the student has a cumulative GPA of 2.50 or higher and has been admitted into the professional program. Students denied admission into the professional program may appeal the decision to the Professional Program Committee.

Students assessed and found to have an insufficient GPA for acceptance into the professional program will be notified of their status.

Requirements for the Bachelor of Science Degree in Business Administration

1. General Education Requirements (60 hours)
   - Skills and Competencies (15 hours)
     - ENGL 101 Critical Reading and Composition and ENGL 102 Rhetoric and Composition (6 hours)
     - MATH 170 Finite Mathematics and MATH 122 Calculus for Business Administration and Social Sciences (6 hours)
     - SPCH 140 Public Communication (3 hours)
     - Methods and History of Disciplines (35 hours)
   - Humanities: ENGL 101 European Civilization from Ancient Times to the Mid-17th Century or HIST 102 European Civilization from the Mid-17th Century (3 hours)
     - HIST 111 United States History to 1865 or HIST 112 United States History since 1865 or GINT 201 (3 hours)
     - English Literature 200 or above (3 hours)
   - Microeconomics
   - Social/Behavioral Sciences: ECON 221 Principles of Microeconomics and ECON 222 Principles of Macroeconomics (6 hours)
   - Psychology, sociology, anthropology, geography, or political science (6 hours)
   - Humanities: HIST 101 European Civilization from Ancient Times to the Mid-17th Century or HIST 102 European Civilization from the Mid-17th Century (3 hours)
   - HIST 111 United States History to 1865 or HIST 112 United States History since 1865 or GINT 201 (3 hours)
   - English Literature 200 or above (3 hours)
   - Microeconomics
   - Social/Behavioral Sciences: ECON 221 Principles of Microeconomics and ECON 222 Principles of Macroeconomics (6 hours)
   - Psychology, sociology, anthropology, geography, or political science (6 hours)

2. Business Core Requirement (36 hours)

3. Management Concentration Requirements (24 hours)
   - AMGT 374, AMGT 376, AMGT 473, AMFT 477 (12 hours)
   - Two courses from AMGT 378, AMGT 442, ABUS 380, ABUS 429 (6 hours)
   - Business electives: business or economics courses (300 or above) (6 hours)

Total hours required: 120 hours

1
At least three credit hours must be in non-Western world studies. A non-Western world studies course is any course which focuses substantially on the culture of regions of the world other than Europe or those areas in which the dominant culture is European, such as the United States, Canada, Australia, and New Zealand. Study of the cultures of the indigenous peoples of these countries may be acceptable, but this would not include the study of contemporary African Americans, Japanese Americans, and other assimilated ethnic categories.

All business administration majors are required to earn a C or higher in each course (business electives excepted) satisfying the area of concentration requirements. Each student in the School of Business must also earn at least a 2.00 average overall on business core and concentration area courses for graduation. At least 50 percent of the business administration credit hours required for the business administration degree must be earned through UofSC Aiken. Students must also complete assessment procedures as required by the school. The Inter-Curricular Enrichment requirement as detailed in the UofSC Aiken bulletin must also be met.

**Computer Application Proficiency Exam**

Students must demonstrate proficiency in computer applications either by passing MGSC 290 Computer Information Systems in Business or by earning a passing score on the Computer Application Proficiency Exam.

To take the proficiency exam, students must follow these steps:

1. Obtain a Proficiency Exam Form from the proficiency exam coordinator.
2. Complete the form and return it to the coordinator.
3. Pay the finance office (at either UofSC Aiken or UofSC Sumter) an examination fee of $30 and obtain a receipt for this amount.
4. Arrange with the coordinator a time for the exam.

Students who fail the exam must take MGSC 290 Computer Information Systems in Business.

**Proficiency Portfolio in Writing**

The Rising Junior Proficiency Portfolio in Writing serves two purposes:

1. to certify each student’s writing proficiency within the context of general education assessment;
2. to make all students aware of the necessity for developing and transferring their writing skills beyond the composition sequence.

To these ends, each student must submit a writing proficiency portfolio as soon as possible after the completion of 60 credit hours. Transfer students who have reached the 60-hour level through the accumulation of course credit at other institutions are given up to 30 hours in residency at UofSC Sumter to build their portfolios. The portfolio requirement must be satisfied before graduation. Failure to submit a portfolio will result in the placement of a hold on the student’s records.

Questions concerning this process should be addressed to the student’s advisor. The director of writing assessment or the director of the writing room (both at UofSC Aiken) may also be contacted for this purpose.

For this year’s schedule of submission deadlines, please consult the UofSC Aiken Undergraduate Calendar, obtainable from the student’s advisor.

Students are encouraged to complete the Rising Junior Proficiency Portfolio in Writing requirement prior to the semesters in which they expect to be graduated. Those students who do not pass the requirement prior to the semester in which they expect to be graduated may find themselves unable to complete the requirement in time and their graduation dates delayed for that reason. Students are encouraged to work with their advisors to complete this requirement on time. Advisors are encouraged to provide warning notices regarding the proper timing of the submission of the portfolio.

The Rising Junior Proficiency Portfolio in Writing is designed to allow students seeking a baccalaureate degree from USCA an opportunity to demonstrate their ability to apply the skills and competencies they began to develop in the composition sequence to University writing contexts beyond that level. It will consist of three course-related papers selected by students as examples of their best writing and one reflective essay annotating the various reasons for the selections.

The three course-related papers must include researched writing. Essays, extended essay exam answers, journals assigned for class, or other appropriate written assignments may be used. No more than one of these may come from the composition sequence. Since the portfolio is designed to show the range of a student’s writing, the student is encouraged to select work from a variety of courses. Papers produced through group work are discouraged in this portfolio review.

Each selection must be identified by course title, semester taken, and instructor’s name. All three papers may be rewritten to demonstrate the student’s current writing proficiency, for a paper deemed satisfactory at the freshman level may not adequately demonstrate proficiency at the rising-junior level. When a paper is rewritten, it must be accompanied by a copy of the original class paper and the course information listed above. The reflective essay will serve as a cover essay for the portfolio and should discuss the reasons the student selected each paper.

While papers from UofSC Aiken/UofSC Sumter classwork are preferred, transfer students may submit papers from other academic settings if the student is within the final 30 hours of course work for a degree.

Those students who have demonstrated competency in university-level writing will be certified as having satisfied UofSC Aiken’s expectations concerning writing proficiency within the context of general education requirements. Those students whose portfolios do not meet expectations will be advised to appeal or to enroll in and pass AEGL 201 Writing in the University.

**Academic Discipline or Grievances**

Students enrolled in the UofSC Aiken Business School Professional Program may continue judicial process initiated on the UofSC Sumter campus for either student academic discipline or student academic grievances by appeal to the vice chancellor for academic affairs at UofSC Aiken.

**Special Note**

Reinstatements, grade changes, and withdrawals due to extenuating circumstances must be submitted through the UofSC Aiken process once students seek UofSC Aiken baccalaureate degrees.

**Special Programs and Opportunities**

**University 101**

University 101 is a three-hour seminar course, open for credit only to freshmen and to other undergraduate students (i.e., transfer students).
in their first year at UofSC Sumter. This course provides an introduction to the nature and importance of university education and a general orientation to the functions and resources of the University.

The course helps new students adjust to the University, develop a better understanding of the learning process, and acquire essential academic survival skills. It also provides students a support group in a critical year by examining problems common to the new-student experience. Extensive reading and writing assignments relevant to the student's college experience are required.

Organized in small groups of 20-25 students, University 101 is taught by faculty members and administrative personnel who have a special interest in working with new students. The course may be taken as part of a student's regular load or as an overload. Course credit is awarded on a letter-grade basis. Credit is applicable as elective credit toward almost all baccalaureate degrees offered by the University.

Opportunity Scholars Program
The University of South Carolina Sumter offers the Opportunity Scholars Program (OSP), an academic support service for students. The purpose of OSP is to help students complete a baccalaureate degree. Students chosen to participate are those who have backgrounds that may make adjustment to college life more difficult than for their fellow students. Many of the OSP students come for specific help but find that OSP is a well-rounded program that offers free tutoring; an up-to-date computer lab; cultural enrichment activities; career search and counseling; staff mentors; workshops on resumes, writing, study skills, and time management; supplemental classes; and transfer help and advisement.

The success rate at OSP is very high, and we welcome qualified students when there is an opening. Our program has a maximum enrollment of 150, and everything is free to participants.

UofSC Columbia Baccalaureate Degree Programs
Many students who enter UofSC Sumter intend to apply their credits toward a baccalaureate degree. These students are advised to work closely with their advisor to outline a program of study for the first two years that will meet preliminary requirements of the four-year major they wish to pursue.

These students are also strongly advised to obtain and use a copy of the undergraduate bulletin (p. 17) for the Columbia campus when determining specific degree requirements.

Course Descriptions

A
• Accounting (ACCT) (p. 1869)
• Anthropology (ANTH) (p. 1869)
• Art Education (ARTE) (p. 1869)
• Art History (ARTH) (p. 1869)
• Art Studio (ARTS) (p. 1869)

B
• Biology (BIOL) (p. 1869)

C
• Chemistry (CHEM) (p. 1870)
• Comp Sci & Comp Engr (CSCE) (p. 1871)
• Criminal Justice (CRJU) (p. 1871)

E
• Economics (ECON) (p. 1871)
• Electrical Engineering (ELCT) (p. 1871)
• English (ENGL) (p. 1871)
• Engr and Computing (ENCP) (p. 1872)

F
• Film and Media Studies (FAMS) (p. 1873)

G
• Geography (GEOG) (p. 1873)

H
• History (HIST) (p. 1873)
• Hlth Promo Educ & Beh (HPEB) (p. 1874)

J
• Journalism (JOUR) (p. 1874)

M
• Management Science (MGSC) (p. 1874)
• Marine Science (MSCI) (p. 1874)
• Mathematics (MATH) (p. 1874)
• Music (MUSC) (p. 1875)

N
• Nursing (NURS) (p. 1875)

P
• Palmetto College (PCAM) (p. 1875)
• Palmetto Programs (PALM) (p. 1875)
• Philosophy (PHIL) (p. 1876)
• Physical Education (PEDU) (p. 1876)
• Physics (PHYS) (p. 1876)
• Political Science (POLI) (p. 1877)
• Psychology (PSYC) (p. 1877)

R
• Religious Studies (RELG) (p. 1878)

S
• Soc Advoc & Ethicl Life (SAEL) (p. 1878)
• Sociology (SOCY) (p. 1878)
• Spanish (SPAN) (p. 1878)
• Speech (SPCH) (p. 1879)
• Statistics (STAT) (p. 1879)
**Accounting (ACCT)**

**ACCT 225 - Introduction to Financial Accounting (3 Credits)**
User-oriented approach to the study of financial accounting and reporting topics related to business decisions.

**ACCT 226 - Introduction to Managerial Accounting (3 Credits)**
User-oriented approach to the study of managerial accounting topics related to business decisions.

**Prerequisites:** ACCT 225.

**Anthropology (ANTH)**

**ANTH 101 - Primates, People, and Prehistory (3 Credits)**
An exploration of human origins, human evolution, human prehistory, and cultural existence from its less complex forms to early civilizations. An introduction to the concepts, methods, and data of physical, biological, and archaeological anthropology.

**Carolina Core:** GSS

**ANTH 102 - Understanding Other Cultures (3 Credits)**
An exploration and comparison of selected contemporary cultures, including their languages. An introduction to the concepts, methods, and data of socio-cultural anthropology and anthropological linguistics.

**Carolina Core:** GSS

**Graduation with Leadership Distinction:** GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

**Art Education (ARTE)**

**ARTE 101 - Introduction to Art (3 Credits)**
Introduction to art appreciation. Elements and principles of the visual arts, with examples from the history of art.

**Carolina Core:** AIU

**Art History (ARTH)**

**ARTH 103 - Fundamentals of Art (3 Credits)**
Introduction to visual thinking and principles of two-dimensional design.

**Carolina Core:** AIU

**ARTH 105 - History of Western Art (3 Credits)**
The visual arts from the Renaissance to the present.

**Carolina Core:** AIU

**Graduation with Leadership Distinction:** GLD: Global Learning

**ARTH 106 - History of Western Art (3 Credits)**
The visual arts from Paleolithic times to the Renaissance.

**Carolina Core:** AIU

**Graduation with Leadership Distinction:** GLD: Global Learning

**ARTH 399 - Independent Study (3-9 Credits)**

**Graduation with Leadership Distinction:** GLD: Research

**Art Studio (ARTS)**

**ARTS 103 - Fundamentals of Art (3 Credits)**
Introduction to visual thinking and principles of two-dimensional design.

**Carolina Core:** AIU

**ARTS 104 - 3-Dimensional Design I (3 Credits)**
Introduction to visual thinking and principles of three-dimensional design.

**Carolina Core:** AIU

**Graduation with Leadership Distinction:** GLD: Research

**ARTS 107 - Color and Composition (3 Credits)**
Color, color theory, and compositional systems.

**Prerequisites:** ARTS 103.

**ARTS 111 - Basic Drawing I (3 Credits)**
Introduction to the materials and basic techniques of drawing.

**ARTS 210 - Introduction to Painting (4 Credits)**
An introductory course in the materials and techniques of painting.

**Carolina Core:** AIU

**ARTS 215 - Introduction to Printmaking (4 Credits)**
An introductory course in printmaking with emphasis on monotype, relief, and intaglio processes.

**ARTS 225 - Introduction to Three-Dimensional Studies (4 Credits)**
An introductory course in the concepts, materials, and techniques of three-dimensional media.

**Prerequisites:** C or better in ARTS 104.

**ARTS 235 - Introduction to Fiber Arts (4 Credits)**
An introductory course in the materials and processes of fiber arts.

**ARTS 310 - Intermediate Painting I (4 Credits)**
An exploration of painting as a means of multi-sensory expression through visual experience.

**ARTS 315 - Intermediate Printmaking I: Relief (4 Credits)**
Linoleum, woodblock printing, and other relief techniques including the execution of original works in these media.

**ARTS 399 - Independent Study (3-9 Credits)**

**Graduation with Leadership Distinction:** GLD: Research

**Biology (BIOL)**

**BIOL 101 - Biological Principles I (3 Credits)**
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology.

**Carolina Core:** SCI

**BIOL 101L - Biological Principles I Laboratory (1 Credit)**
(Recommended concurrent with BIOL 101). Experimental examination of basic principles of cell biology, genetics and metabolism. Three hours per week.

**Carolina Core:** SCI

**BIOL 102 - Biological Principles II (3 Credits)**
Introductory survey of plant and animal development, physiology, ecology, and evolution. Three lecture hours per week.

**Prerequisites:** C or better in BIOL 101.

**Corequisite:** BIOL 102L.

**Carolina Core:** SCI

**BIOL 102L - Biological Principles II Laboratory (1 Credit)**
Experimental examination of structure and function of plant and animal systems, biodiversity, ecology. BIOL 101, 102, 101L and 102L must be completed prior to enrolling in 300-level or above Biology courses.

**Prerequisites:** C or better in BIOL 101 and BIOL 101L; recommended concurrent with BIOL 102.

**Carolina Core:** SCI
BIOL 110 - General Biology (4 Credits)
Basic biological concepts and issues for non-biology majors. Credit may not be given for both this course and BIOL 120. Three lecture, two laboratory hours per week.
Carolina Core: SCI

BIOL 110A - General Biology (Audio-Tutorial) (1 Credit)
Addendum to BIOL 110.

BIOL 120 - Human Biology (3 Credits)
Fundamental principles of human biology. Credit may not be given for both BIOL 110 and BIOL 120. Three lecture hours per week. Not for major credit.
Carolina Core: SCI

BIOL 120L - Laboratory in Human Biology (1 Credit)
Exercises dealing with basic concepts of human biology. Not for major credit.
Prerequisite or Corequisite: BIOL 120.

Carolina Core: SCI

BIOL 243 - Human Anatomy and Physiology I (3 Credits)
Functional anatomy and physiology of the human body, including the integumentary, skeletal, muscular, and nervous systems. Not available for biology major credit. Three lecture hours per week.
Carolina Core: SCI

BIOL 243L - Human Anatomy and Physiology Laboratory (1 Credit)
The principles of anatomy and physiology as demonstrated by microscopic studies, animal dissection, and physiological experiments. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 243.

Carolina Core: SCI

BIOL 244 - Human Anatomy and Physiology II (3 Credits)
Functional anatomy and physiology of the human body, including the cardiovascular, endocrine, excretory, reproductive, digestive, and respiratory systems. Not available for biology major credit. Three lecture hours per week.
Prerequisites: BIOL 243.

Carolina Core: SCI

BIOL 244L - Human Anatomy and Physiology Laboratory (1 Credit)
A continuation of BIOL 243L. One three-hour laboratory per week.
Corequisite: BIOL 244

Carolina Core: SCI

BIOL 250 - Microbiology (3 Credits)
An introduction to bacteria and viruses, emphasizing structure, metabolism, and pathogenesis. Discussion of infectious diseases, antigen-antibody relationships, and anti-microbial agents in chemotherapy. Not available for biology major credit. Three lecture hours per week.
Prerequisites: College-level Biology and Chemistry.
Corequisite: BIOL 250L.

BIOL 250L - Microbiology Laboratory (1 Credit)
Not available for biology major credit. Three hours per week.
Prerequisite or Corequisite: BIOL 250.

BIOL 250 - Introduction to Environmental Biology (3 Credits)
Basic ecological principles and the impacts of human population growth and technology. Not for major credit.
Carolina Core: SCI

BIOL 270L - Introduction to Environmental Biology Laboratory (1 Credit)
Demonstrations, data analyses, discussions, and films relating to human ecology, resource use, and environmental impact. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 270.

Carolina Core: SCI

Chemistry (CHEM)

CHEM 101 - Fundamental Chemistry I (4 Credits)
A science elective surveying inorganic and solution chemistry. First of a terminal two-semester sequence. Three lecture, one recitation, and two laboratory hours per week.
Carolina Core: SCI

CHEM 102 - Fundamental Chemistry II (4 Credits)
An introductory survey of organic and biochemistry. Three lecture, one recitation, and two laboratory hours per week.
Prerequisites: 1 year high-school chemistry, CHEM 101, CHEM 111, or equivalent.
Carolina Core: SCI

CHEM 105 - Chemistry and Modern Society I (4 Credits)
A conceptual and qualitative approach to chemistry, its evolution, achievements, and goals and its impact on technology, the environment, and modern life and thought. (Specifically designed for non-science majors.) Three lecture and three laboratory hours per week.
Carolina Core: SCI

CHEM 111 - General Chemistry I (3 Credits)
Survey of the principles that underlie all chemistry with applications illustrating these principles. Three lecture and one recitation hours per week.
Prerequisites: C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math (or by placement score into MATH 122, MATH 141 or higher math).
Corequisite: CHEM 111L (unless grade of C or higher in CHEM 111L earned previously).
Carolina Core: SCI

CHEM 112 - General Chemistry II (3 Credits)
Continuation of CHEM 111. Special emphasis on chemical equilibrium. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 111 and C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math.
Corequisite: CHEM 112L.

CHEM 331L - Essentials of Organic Chemistry Laboratory I (1 Credit)
Laboratory safety, syntheses, separation, and purification of carbon compounds. For non-majors.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).
CHEM 332L - Essentials of Organic Chemistry Laboratory II (1 Credit)
Continuation of CHEM 331L. Spectroscopic identification of carbon compounds. For non-majors. Three lab hours per week.
Prerequisites: C or higher in CHEM 331L.
Corequisite: CHEM 334 (unless grade of C or higher in CHEM 334 earned previously).

CHEM 333 - Organic Chemistry I (3 Credits)
Contemporary theories, nomenclature, reactions, mechanisms, and syntheses of carbon compounds. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 112 or in CHEM 142.

CHEM 333L - Comprehensive Organic Chemistry Laboratory I (2 Credits)
Laboratory safety, synthesis, separation, and purification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 334 - Organic Chemistry II (3 Credits)
Continuation of CHEM 333. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 333.

Comp Sci & Comp Engr (CSCE)

CSCE 101 - Introduction to Computer Concepts (3 Credits)
History, application, and social impact of computers; problem-solving, algorithm development, applications software, and programming in a procedural language.
Carolina Core: ARP

CSCE 102 - General Applications Programming (3 Credits)
Introduction to systematic computer problem-solving and programming for a variety of applications.
Carolina Core: ARP

CSCE 145 - Algorithmic Design I (4 Credits)
Problem-solving, algorithmic design, and programming. Three lectures and two laboratory hours per week.
Prerequisite or Corequisite: MATH 111 or MATH 115.

Carolina Core: ARP

CSCE 146 - Algorithmic Design II (4 Credits)
Continuation of CSCE 145. Rigorous development of algorithms and computer programs; elementary data structures. Three lecture hours and two laboratory hours per week.
Prerequisites: C or better in CSCE 145.

Prerequisite or Corequisite: MATH 122 or MATH 141.

Criminal Justice (CRJU)

CRJU 101 - The American Criminal Justice System (3 Credits)
Survey of crime and societal responses to crime, including law enforcement, courts, corrections, and the juvenile justice system.
Carolina Core: GSS

CRJU 311 - Policing (3 Credits)
Current and historical perspectives on American policing.

CRJU 312 - Corrections (3 Credits)
Current and historical perspectives on incarceration and its alternatives.

CRJU 313 - Criminal Courts (3 Credits)
Structure and organization of the federal and state criminal court systems and personnel.

CRJU 314 - Criminal Law (3 Credits)
Origin and development of criminal law in America. Basic elements of crimes and defenses.

CRJU 341 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.

Cross-listed course: SOCY 353

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 351 - Juvenile Delinquency (3 Credits)
Social factors in the development, identification, and treatment of delinquents.

Prerequisites: CRJU 101 OR SOCY 101.

Cross-listed course: SOCY 350

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 440 - Homeland Security and Terrorism (3 Credits)
The nature of terrorism; its history; its methodology; and its application to criminological theory.

Economics (ECON)

ECON 221 - Principles of Microeconomics (3 Credits)
The study of supply and demand, pricing and cost concepts, firm and consumer decision-making, market structure, and government policies.

ECON 222 - Principles of Macroeconomics (3 Credits)
The study of gross domestic product, business cycles, economic growth, inflation, unemployment, and monetary and fiscal policy.

ECON 224 - Introduction to Economics (3 Credits)
The study of supply and demand, markets, household and firm decision-making, gross domestic product, inflation, unemployment, and government policies. Open to all students except business administration and economics majors.

Electrical Engineering (ELCT)

ELCT 221 - Circuits (3 Credits)
Analysis of linear ac circuits using complex variables. Nodal and mesh analysis, Thévenin and Norton transformations, linearity, superposition, use of math solvers, circuit simulators, and computer-interfaced instrumentation.

Prerequisites: C or better in MATH 142; C or better in ELCT 102; or C or better in AESP 265; or D or better in ELCT 220.

English (ENGL)

ENGL 101 - Critical Reading and Composition (3 Credits)
Instruction in strategies for critically reading and analyzing literature and non-literary texts; structured, sustained practice in composing expository and analytical essays.
Carolina Core: CMW
ENGL 101 - Rhetoric and Composition (3 Credits)
Instruction and intensive practice in researching, analyzing, and composing written arguments about academic and public issues.
Prerequisites: C or better in ENGL 101 or equivalent credit.
Carolina Core: CMW, INF

ENGL 270 - World Literature (3 Credits)
Selected masterpieces of world literature from antiquity to present.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Cross-listed course: CPLT 270
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engage Leadership Experiences

ENGL 282 - Special Topics in Fiction (3 Credits)
Special topics in fiction from several countries and historical periods, illustrating the nature of the genre. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 283 - Special Topics in British Literature (3 Credits)
Special topics in British literature exemplifying persistent themes of British culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ENGL 284 - Drama (3 Credits)
Drama from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 285 - Special Topics in American Literature (3 Credits)
Special topics in American literature exemplifying persistent themes of American culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 286 - Poetry (3 Credits)
Poetry from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 287 - American Literature (3 Credits)
An introduction to American literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 288 - English Literature (3 Credits)
An introduction to English literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 309 - Teaching Writing in One-to-One Sessions (3 Credits)
The study of theories and pedagogy of individualized writing instruction with intensive writing practice including hands-on one-on-one sessions. Recommended for prospective writing teachers.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Prerequisites: ENGL 101 and ENGL 102.
Cross-listed course: FAMS 350

ENGL 360 - Creative Writing (3 Credits)
Workshop course on writing original fiction, poetry, drama, and creative nonfiction.
Prerequisites: ENGL 101 and ENGL 102.
Graduation with Leadership Distinction: GLD: Research

ENGL 427 - Southern Literature (3 Credits)
Representative works of Southern writers.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 437 - Women Writers (3 Credits)
Representative works written by women.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.
Cross-listed course: WGST 437
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 460 - Advanced Writing (3 Credits)
Extensive practice in different types of nonfiction writing.
Prerequisites: ENGL 101 and ENGL 102.

Engr and Computing (ENCP)

ENCP 101 - Introduction to Engineering I (3 Credits)
Engineering problem solving using computers and other engineering tools.

ENCP 102 - Introduction to Engineering II (3 Credits)
Principles and practice of visualization and graphical representation using modern computer-aided design tools.
ENCP 200 - Statics (3 Credits)
Introduction to the principles of mechanics. Equilibrium of particles and rigid bodies. Distributed forces, centroids, and centers of gravity. Moments of inertia of areas. Analysis of simple structures and machines. A study of various types of friction.
Prerequisites: MATH 141.

ENCP 210 - Dynamics (3 Credits)
Kinematics of particles and rigid bodies. Kinetics of particles with emphasis on Newton's second law; energy and momentum methods for the solution of problems. Applications of plane motion of rigid bodies.
Prerequisites: ENCP 200 or ECIV 200 or EMCH 200.

**Film and Media Studies (FAMS)**

FAMS 180 - Film Culture (3 Credits)
How the film industry developed and the impact the movies have had on global popular culture. Does not count toward the film studies major.
Carolina Core: AIU

FAMS 240 - Film and Media Analysis (3 Credits)
Introduction to the critical study of film and media. Students will closely analyze moving images and develop written arguments about film and media.
Carolina Core: AIU

FAMS 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Cross-listed course: ENGL 350

**Geography (GEOG)**

GEOG 103 - Introduction to Geography (3 Credits)
Carolina Core: GSS

GEOG 121 - Globalization and World Regions (3 Credits)
Introduction to political, economic, social, and environmental processes of global integration and regional differentiation.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

GEOG 201 - Landform Geography (4 Credits)
Hydrology, soil science, and interpretation of physical features formed by water, wind, and ice, with emphasis on environmental change. Three hours of lecture and one two-hour laboratory per week.
Carolina Core: SCI

GEOG 202 - Weather and Climate (4 Credits)
Processes that influence weather and climate patterns on the earth. Three lectures and one two-hour laboratory per week.
Carolina Core: SCI

GEOG 224 - Geography of North America (3 Credits)
Physical and human geography of North America with emphasis on the United States.
Carolina Core: GSS

**History (HIST)**

HIST 101 - European Civilization from Ancient Times to the Mid-17th Century (3 Credits)
The rise and development of European civilization from its Mediterranean origins through the Renaissance and Reformation.
Carolina Core: GHS

HIST 102 - European Civilization from the Mid-17th Century (3 Credits)
European development and expansion from the mid-17th century to the present.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 104 - Introduction to the Civilization of the Islamic Middle East (3 Credits)
An analysis which treats the major cultural elements of traditional Islamic civilization and then concentrates upon the reactions of the Arabs, Turks, and Iranians to the problems of adjusting to the modern world.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 105 - Introduction to East Asian Civilization (3 Credits)
The evolution of social, political, and cultural patterns in East Asia, with emphasis on the development of philosophical, religious, and political institutions and their relationship to literary and artistic forms in China and Japan.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 106 - Introduction to African History (3 Credits)
An examination of several traditional sub-Saharan African societies and of their political and economic transformation in the modern, colonial, and post-independence periods.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 109 - Introduction to Latin American Civilization (3 Credits)
A discussion of the political, cultural, and economic forces which have conditioned the development of institutions and ideas in Spanish and Portuguese America.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 111 - United States History to 1865 (3 Credits)
A general survey of the United States from the era of discovery to 1865, emphasizing major political, economic, social, and intellectual developments.
Carolina Core: GHS

HIST 112 - United States History since 1865 (3 Credits)
A general survey of the United States from 1865 to the present, emphasizing major political, economic, social, and intellectual developments. Honors sections are available for students in the honors program.
Carolina Core: GHS

HIST 334 - The History of Russia from the Earliest Times to the Mid-19th Century (3 Credits)
The earliest life on the steppe, the Kievan State, the foundations of Moscow, and the Russian empire to the reign of Nicholas I.

HIST 335 - The History of Modern Russia and the Soviet Union (3 Credits)
The decline of Imperial Russia, the Revolution of 1917, Lenin, Stalin, and the Soviet Union since Stalin.
HIST 347 - The Middle East in Modern Times (3 Credits)
The impact of modern civilization upon the Middle East, including the
history of the Arab, Turkish, Iranian, and Israeli segments of the Middle
East during the 19th and 20th centuries.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 351 - Africa to 1800 (3 Credits)
Social, cultural, economic, and political developments, focusing on internally and externally generated changes.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 352 - Africa since 1800 (3 Credits)
Commercial and religious revolutions of the 19th century, imposition and ending of formal colonial rule, and post-colonial issues.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

Journalism (JOUR)

JOUR 101 - Media and Society (3 Credits)
Principles, history, philosophies, theories of the mass media and allied professions and their societal role and impact.

JOUR 201 - Principles of Public Relations (3 Credits)
Methods used by business, government, consumer groups, minorities, environmentalists, and others to influence public attitudes toward their activities.

JOUR 203 - Principles of Visual Communications (3 Credits)
Theory and history of visual communication in the mass media emphasizing informational and persuasive messages created by graphic, photographic, and multimedia processes.

Marine Science (MSCI)

MSCI 210 - Oceans and Society (3 Credits)
A nontechnical introduction to human interactions with the marine environment: marine organisms, marine systems, and the physical and chemical characteristics of oceans and estuaries. Not available for marine science major credit.
Carolina Core: SCI

MSCI 210L - Oceans and Society Laboratory (1 Credit)
Experiments and exercises which illustrate how specific components of marine environments are structured, function, and can be measured. Two laboratory hours per week. Not available for marine science major credit. Attendance on designated field trips may be required.
Prerequisite or Corequisite: MSCI 210.
Carolina Core: SCI

Mathematics (MATH)

MATH 111 - Basic College Mathematics (3 Credits)
Basic college algebra; linear and quadratic equations, inequalities, functions and graphs of functions, exponential and logarithm functions, systems of equations.
Prerequisites: placement through Algebra version of the Mathematics Placement Test.

MATH 111I - Intensive Basic College Mathematics (4 Credits)
An intensive treatment of the topics covered in MATH 111.
Prerequisites: placement through Algebra version of the Mathematics Placement Test.

MATH 115 - Precalculus Mathematics (4 Credits)
Topics in algebra and trigonometry specifically needed for MATH 141, MATH 142, MATH 241. Subsets of the real line, absolute value; polynomial, rational, inverse, logarithmic, exponential functions; circular functions; analytic trigonometry.
Prerequisites: C or better in MATH 111 or MATH 111I, or placement through Precalculus version of the Mathematics Placement Test.

MATH 122 - Calculus for Business Administration and Social Sciences (3 Credits)
Derivatives and integrals of elementary algebraic, exponential, and logarithmic functions. Maxima, minima, rate of change, motion, work, area under a curve, and volume.
Prerequisites: C or better in MATH 111, MATH 111I or MATH 115 or placement through Algebra version of the Mathematics Placement Test.
Carolina Core: ARP

MATH 141 - Calculus I (4 Credits)
Functions, limits, derivatives, introduction to integrals, the Fundamental Theorem of Calculus, applications of derivatives and integrals. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in Math 112, MATH 115, or MATH 116, or placement through Precalculus version of the Mathematics Placement Test.
Carolina Core: ARP

Management Science (MGSC)

MGSC 290 - Computer Information Systems in Business (3 Credits)
An introduction to the effective use of information systems tools in day-to-day business communications, analysis, and decision making.

MGSC 291 - Applied Statistics for Business (3 Credits)
Descriptive statistics, topics in probability, statistical inference and modeling. Emphasis on the collection, summarization, analysis, and reporting of numerical findings relevant to business decisions and economic analysis.
Prerequisites: STAT 206.
MATH 142 - Calculus II (4 Credits)
Methods of integration, sequences and series, approximations. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in MATH 141.

Carolina Core: ARP

MATH 170 - Finite Mathematics (3 Credits)
Elementary matrix theory; systems of linear equations; permutations and combinations; probability and Markov chains; linear programming and game theory.
Prerequisites: C or better in MATH 111 or MATH 111I or MATH 122, or placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 221 - Basic Concepts of Elementary Mathematics I (3 Credits)
The meaning of number, fundamental operations of arithmetic, the structure of the real number system and its subsystems, elementary number theory. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 111 or MATH 111I or placement through Algebra version of the Mathematics Placement Test.

MATH 222 - Basic Concepts of Elementary Mathematics II (3 Credits)
Informal geometry and basic concepts of algebra. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 221.

MATH 241 - Vector Calculus (3 Credits)
Vector algebra, geometry of three-dimensional space; lines, planes, and curves in space; polar, cylindrical, and spherical coordinate systems; partial differentiation, max-min theory; multiple and iterated integration, line integrals, and Green's theorem in the plane.
Prerequisites: C or better in MATH 142.

MATH 242 - Elementary Differential Equations (3 Credits)
Ordinary differential equations of first order, higher order linear equations, Laplace transform methods, series methods; numerical solution of differential equations. Applications to physical sciences and engineering.
Prerequisites: C or better in MATH 142.

MATH 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

Music (MUSC)

MUSC 110 - Introduction to Music (3 Credits)
Perceptive listening and appreciation of musical elements, forms and style periods, including composers' lives, individual styles and representative works. Emphasis on classical music; jazz and American popular music included.
Carolina Core: AIU

MUSC 140 - Jazz and American Popular Music (3 Credits)
Development of jazz and American popular music through the study of important soloists, ensembles, arrangers, and composers.
Carolina Core: AIU

Nursing (NURS)

NURS 212 - Evolution of Nursing Science (2 Credits)
Historical imperatives for nursing are explored to aid in understanding the scientific base of nursing. Internal and external factors influencing the evolution of nursing as a profession, science, art, and practice discipline are discussed. Sophomore nursing students.

Palmetto College (PCAM)

PCAM 104 - Foundations of Composition (3 Credits)
A course in writing skills with practice in composing essays, including intensive review of grammar, punctuation, and mechanics.

PCAM 105 - Contemporary College Mathematics (3 Credits)
Linear and quadratic equations and models, functions, exponential models, logarithms, systems of equations, fundamentals of probability and statistics.

PCAM 106 - Foundations of College Algebra (3 Credits)
Operations on real numbers, linear equations and inequalities, quadratic equations, factoring, absolute value equations, exponential and radical expressions, graphs, and functions. Additional topics may include math study skills, logarithms, exponential functions, probability, statistics, systems of equations, polynomial division, and mathematical modeling.
Prerequisites: C or better in PCAM 106 students must pass the math placement test (MPT) with a minimum score of MB1 or MA2.

PCAM 141 - Introduction to Computer Keyboarding (3 Credits)
Keyboarding using the touch method, inputting, editing, and printing. Designed for students without keyboarding skills. Elective credit only. This course might not apply toward associate's degrees or Columbia baccalaureate degrees.

PCAM 151 - Computer Literacy and Applications (3 Credits)

PCAM 201 - Introduction to Internet Research (3 Credits)
Developing the means by which students may learn to access the Internet through mainframe and PC connections to accomplish specific research needs. This course might not apply toward associate degrees or Columbia baccalaureate degrees.

PCAM 205 - Foundations of Leadership (3 Credits)
This course combines leadership theory with practical application, equipping students with the knowledge and skills needed to work more effectively with people, become better leaders, and reach their professional goals.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PCAM 299 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and academic dean is required for undergraduate studies. May be taken for elective credit only. May be repeated for up to 6 credits hours.

Palmetto Programs (PALM)

PALM 493 - South Carolina Studies (3 Credits)
Reading and writing about South Carolina from the perspective of multiple disciplines, incorporating elements of the student's major and cognate.
Graduation with Leadership Distinction:

for undergraduate students.

Contract approved by instructor, advisor, and department chair is required.

PHIL 399 - Experiences

Advocacy, GLD: Professional and Civic Engagement Leadership

Graduation with Leadership Distinction:

Carolina Core:

analyzed in terms of these concepts.

A study of the moral principles of conduct and the basic concepts underlying these principles, such as good, evil, right, wrong, justice, value, duty, and obligation. The ethical works of influential philosophers are analyzed in terms of these concepts.

Carolina Core: ARP

Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 320 - Ethics (3 Credits)

A study of the moral principles of conduct and the basic concepts underlying these principles, such as good, evil, right, wrong, justice, value, duty, and obligation. The ethical works of influential philosophers are analyzed in terms of these concepts.

Carolina Core: VSR

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PHIL 399 - Independent Study (3-9 Credits)

Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

Physical Education (PEDU)

PEDU 104 - Personal Fitness and Weight Control (1 Credit)
Advanced techniques for controlling weight and improving fitness through exercise, lectures, and self-evaluation.

PEDU 105 - Weight Training (1 Credit)
Fundamentals of progressive resistance exercise training.

PEDU 106 - Advanced Weight Training (1 Credit)
Advanced techniques.

Prerequisites: PEDU 105.

PEDU 107 - Group Exercise (1 Credit)
Cardio-respiratory fitness, flexibility, muscular strength and endurance, and agility through various group exercise formats while utilizing a variety of equipment.

PEDU 113 - Bowling (1 Credit)
Fundamental skills and techniques of bowling.

PEDU 129 - Racquetball (1 Credit)
Fundamental skills, rules, and terminology.

PEDU 174 - Social Dance (1 Credit)
Fundamental skills and terminology.

PEDU 182 - Backpacking (1 Credit)
Living in the out-of-doors; gear selection, map and compass reading, backpacking, hiking, and camping.

PEDU 187 - Rock Climbing (1 Credit)
Fundamentals of rock and mountain climbing including gear selection and use, knots and rope management, anchoring systems, belaying, rappelling, climbing techniques, and safety considerations.

PEDU 275 - Functional Musculoskeletal Anatomy (3 Credits)
Knowledge and skill of orthopedic anatomy relative to muscle, ligament, and tendon origin, insertion, innervation, and action.

Physics (PHYS)

PHYS 101 - The Physics of How Things Work I (3 Credits)
A practical introduction to physics and science in everyday life—from concrete examples to basic physical principles.

Carolina Core: SCI

PHYS 101L - The Physics of How Things Work I Lab (1 Credit)
Experiments, exercises, and demonstrations to accompany PHYS 101.

Prerequisite or Corequisite: PHYS 101.

Carolina Core: SCI

PHYS 201 - General Physics I (3 Credits)
First part of an introductory course sequence. Topics include mechanics, and selections from wave motion, sound, fluids, and heat. No previous background in physics is assumed.

Prerequisites: C or better in MATH 111, MATH 111L, MATH 112, MATH 115, MATH 116, MATH 122, MATH 141, or by placement score into MATH 122, MATH 141, or higher.

Carolina Core: SCI

PHYS 201L - General Physics Laboratory I (1 Credit)
Prerequisite or
Corequisite: PHYS 201.

Carolina Core: SCI
PHYS 202 - General Physics II (3 Credits)
Continuation of PHYS 201; includes electromagnetism, relativity, quantum physics, atomic and nuclear physics.
Prerequisites: C or better in PHYS 201.
Carolina Core: SCI

PHYS 202L - General Physics Laboratory II (1 Credit)
Prerequisite or Corequisite: PHYS 202.
Carolina Core: SCI

PHYS 211 - Essentials of Physics I (3 Credits)
Classical mechanics and wave motion. Calculus-level course for students of science and engineering.
Prerequisites: C or better in MATH 141.
Corequisite: PHYS 211L.
Carolina Core: SCI

PHYS 211L - Essentials of Physics I Lab (1 Credit)
Prerequisite or Corequisite: PHYS 206 or PHYS 211.
Carolina Core: SCI

PHYS 212 - Essentials of Physics II (3 Credits)
Classical electromagnetism and optics.
Prerequisites: C or better in PHYS 211 and MATH 142.
Corequisite: PHYS 212L.
Carolina Core: SCI

PHYS 212L - Essentials of Physics II Lab (1 Credit)
Prerequisite or Corequisite: PHYS 207 or PHYS 212.
Carolina Core: SCI

PHYS 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

Political Science (POLI)

POLI 111 - Controversies in American Politics (3 Credits)
An introduction to the analysis of key issues in contemporary American politics focusing on the arguments, the groups involved, and the political factors that influence the outcome of the debate.

POLI 201 - American National Government (3 Credits)
The formation and development of the national government, its organization and powers. Overlay Course.
Carolina Core: GSS, VSR

POLI 357 - Film, Politics, and Social Change (3 Credits)
Critical analysis of film as expression and agent of political cultural, ideology, and change.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

POLI 399A - Independent Study in Political Science (1-6 Credits)
Prior approval of and individualized contract by the director of undergraduate studies in political science and the instructor who will supervise the project required.
Graduation with Leadership Distinction: GLD: Research

POLI 399B - Independent Study in International Studies (1-6 Credits)
Prior approval of an individualized contract by the director of undergraduate studies in international studies and the instructor who will supervise the project required.
Graduation with Leadership Distinction: GLD: Research

Psychology (PSYC)

PSYC 101 - Introduction to Psychology (3 Credits)
An introduction to and survey of the basic concepts and findings within the field of psychology.
Carolina Core: GSS

PSYC 226 - Research Methods in Psychology (3 Credits)
Basic principles and methodology.
Prerequisites: PSYC 101 or SCHC 130.
Graduation with Leadership Distinction: GLD: Research

PSYC 300 - Human Sexual Behavior (3 Credits)
Psychological, physiological, and sociological factors of human sexual behavior and attitudes.

PSYC 310 - Psychology of Women (3 Credits)
Women's experiences: childhood and adolescence, work, family, cultural images, adjustment, and social change.
Cross-listed course: WGST 310
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PSYC 370 - Psychology of Consciousness (3 Credits)
Theories, controversies, and research findings on the nature of various states of consciousness; topics such as sleep/dreams, hypnosis, drug-induced states, and psychic phenomena.

PSYC 399 - Independent Study (1-6 Credits)
Closely supervised project or research experience in psychology. Approved contract required. May be repeated for up to six credits. Not for psychology major credit.
Prerequisites: PSYC 101.
Graduation with Leadership Distinction: GLD: Research

PSYC 400 - Survey of Learning and Memory (3 Credits)
Research and applications concerning the acquisition of new behavior and knowledge, including accounts based on classical and instrumental conditioning and on information-processing models.
Prerequisites: PSYC 101 or SCHC 130.

PSYC 410 - Behavioral and Mental Disorders (3 Credits)
Covers the classification, diagnosis, etiological theories, and treatments of the major mental and emotional disorders.
Prerequisites: PSYC 101 or SCHC 130.

PSYC 420 - Survey of Developmental Psychology (3 Credits)
Psychological development from conception to late adulthood. Topics include physical, cognitive, and social processes associated with development at each stage of the life cycle.
Prerequisites: PSYC 101 or EDPY 335 or SCHC 130.
**Religious Studies (RELG)**

**RELG 120 - Comparative Religion (3 Credits)**
Issues, theories, and debates that shape global religious traditions, cultures, and communities; examination of historical contexts and development, applying social scientific inquiry and methods to analyze relevant current circumstances and concerns.

**Religious Studies (RELG)**

**RELG 120 - Comparative Religion (3 Credits)**
Issues, theories, and debates that shape global religious traditions, cultures, and communities; examination of historical contexts and development, applying social scientific inquiry and methods to analyze relevant current circumstances and concerns.

**Soc Advoc & Ethicl Life (SAEL)**

**SAEL 200 - Social Advocacy and Ethical Life (3 Credits)**
Introduction to nature and relationship of ethics and oral forms of advocacy. Includes foundational training in ethical theory and its relevance to socio-political expression and training in the principles and performance of ethical oral communication, with emphasis on argumentation and audience engagement.

**Carolina Core:** CMS, VSR

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**Sociology (SOCY)**

**SOCY 101 - Introductory Sociology (3 Credits)**
An introduction to sociological facts and principles: an analysis of group-making processes and products.

**Carolina Core:** GSS

**SOCY 305 - Sociology of Families (3 Credits)**
Sociological perspectives related to various aspects of family behaviors, roles, and values.

**Prerequisites:** SOCY 101.

**Cross-listed course:** WGST 305

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**SOCY 320 - Individual and Society (3 Credits)**
Selected theoretical orientations, methodological procedures, and illustrative substantive data pertaining to the relations between the individual and society.

**SOCY 323 - Sociology of Deviant Behavior (3 Credits)**
Theories, methodology, and substantive issues in the study of social deviance.

**SOCY 340 - Introduction to Social Problems (3 Credits)**
Contemporary social issues such as poverty, health, the criminal justice system, globalization and the environment, their causes and possible solutions.

**Carolina Core:** GSS

**Graduation with Leadership Distinction:** GLD: Community Service, GLD: Diversity and Social Advocacy

**SOCY 350 - Juvenile Delinquency (3 Credits)**
Social factors in the development, identification, and treatment of delinquents.

**Prerequisites:** SOCY 101.

**Cross-listed course:** CRJU 351

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy

**SOCY 353 - Sociology of Crime (3 Credits)**
Social factors in the development, identification, and treatment of criminals.

**Prerequisites:** SOCY 101.

**Cross-listed course:** CRJU 341

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy

**SOCY 355 - Race and Ethnic Relations (3 Credits)**
Theoretical and empirical approaches related to race/ethnicity and the current state of race relations in America, with some attention to global issues.

**Cross-listed course:** AFAM 355

**Carolina Core:** GSS

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**SOCY 357 - Sociology of Education (3 Credits)**
Analysis of educational institutions, organizations, processes, and their effects in contemporary society.

**Cross-listed course:** EDFI 357

**Graduation with Leadership Distinction:** GLD: Diversity and Social Advocacy

**Spanish (SPAN)**

**SPAN 109 - Beginning Spanish I (3 Credits)**
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have never studied Spanish or placed by examination into SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110; SPAN 111; or SPAN 121.

**Carolina Core:** GFL

**SPAN 110 - Beginning Spanish II (3 Credits)**
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have completed SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110; SPAN 111; or SPAN 121.

**Carolina Core:** GFL
SPAN 121 - Elementary Spanish (3 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in Spanish. Admission only by proficiency examination. Credit may be received for only one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121.
Carolina Core: GFL

SPAN 122 - Basic Proficiency in Spanish (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: SPAN 108, SPAN 110, SPAN 111, or SPAN 121 or by placement examination.

Carolina Core: GFL

SPAN 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students. Department permission required for transfer students.
Prerequisites: B or better in SPAN 210 or SPAN 211; Placement at 300 level on Phase II placement exam.

Graduation with Leadership Distinction: GLD: Research

Speech (SPCH)

SPCH 140 - Public Communication (3 Credits)
Introduction to theory and practice of oral communication in public, social, and institutional contexts. Includes foundational and cumulative training in the invention, performance, and critical analysis of oral communication, with emphasis on argumentation, persuasion, audience analysis, delivery, and ethical forms of engagement.
Carolina Core: CMS
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SPCH 145 - Online Public Communication (3 Credits)
Introduction to theory and practice of live and recorded online spoken communication in public, social, and institutional contexts. Training in invention, performance, and critical analysis of online spoken communication, including audience analysis, persuasion, delivery, and ethical engagement. Includes significant practice in preparing and presenting live online public communication.
Carolina Core: CMS, INF

SPCH 331 - Organizational Communication (3 Credits)
Examines communication behavior and networks within organizations through the study of major theories of organizational communication, identifies and defines primary concepts, and applies them to organizational scenarios and case studies.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Statistics (STAT)

STAT 110 - Introduction to Statistical Reasoning (3 Credits)
A course in statistical literacy. Topics include data sources and sampling, concepts of experimental design, graphical and numerical data description, measuring association for continuous and categorical variables, introduction to probability and statistical inference, and use of appropriate software. Credit given only for STAT 110 or STAT 112.
Carolina Core: ARP

STAT 201 - Elementary Statistics (3 Credits)
Introduction to the fundamentals of modern statistical methods, including descriptive statistics, probability, random sampling, simple linear regression, correlation, tests of hypotheses, and estimation.
Prerequisites: MATH 111 or MATH 115 or STAT 110.
Carolina Core: ARP

University Experience (UNIV)

UNIV 101 - The Student in the University (3 Credits)
The purposes of higher education and potential roles of the student within the university. Open to freshmen. Also open to other undergraduate students in their first semester of enrollment.

UNIV 401 - Senior Capstone Experience (1-3 Credits)
Integration of major program of study and general education; issues of transition into graduate school and/or employment; group project, intensive writing/speaking.

Women & Gender Studies (WGST)

WGST 112 - Introduction to Women's and Gender Studies (3 Credits)
A social science perspective of women in psychological, sociological, historical, anthropological, economic, and political contexts; the changing roles, images, and institutions.
Carolina Core: GSS, VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy

WGST 113 - Women's Health (3 Credits)
Basic functioning of the female body; effects of society on processes of health and disease. Not for natural sciences credit.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
Welcome to the UofSC Union Bulletin
The UofSC Union Academic Bulletin is the official document of record concerning academic programs and regulations.

This bulletin is for information purposes only and does not constitute any contractual agreement between a student and the University of South Carolina. The University reserves the right to make changes in curricula, degree requirements, course offerings, or academic regulations at any time when, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Bulletin Updates and Corrections
Noncurricular information (i.e., faculty listings, contact information, college or departmental descriptive text) can be updated by contacting the Office of the University Registrar (bulletin@sc.edu) on the Columbia Campus. Any material pertaining to course descriptions or curriculum changes must have the approval of the Faculty Senate, Graduate Council, Board of Trustees, and/or S.C. Commission on Higher Education before it can be published in the bulletins.

Printing Portions of the Online Bulletins
The academic bulletins are available online only. However, you may produce hard copy of any portion or all of an online bulletin using your local printer.

Additional Information
Registration at the University of South Carolina assumes the students' acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement.

The University has established procedures to certify that all classroom activities are conducted by individuals with spoken and written proficiency in the English language at a suitable level. Student complaints concerning the English proficiency of an individual with classroom responsibilities should follow the grievance procedures available from the Office of the Provost on the Columbia campus.

The University of South Carolina provides equal opportunity in education and employment for all qualified persons regardless of race, color, religion, sex, national origin, age, disability, or veteran status. The University of South Carolina has designated as the ADA Title II, Section 504 and Title IX coordinator the Executive Assistant to the President for Equal Opportunity Programs. The Office of the Executive Assistant to the President for Equal Opportunity Programs is located in:

Suite 805
1600 Hampton St.
Columbia, South Carolina
telephone 803-777-3854

The University
UofSC Union Bulletin Review
August 12, 2020

UofSC System Mission Statement
Approved by the Board of Trustees – October 11, 2019

Next Board of Trustees Scheduled Review – January 2023

The primary mission of the University of South Carolina System is the education of the state's diverse citizens through teaching, research, creative activity, and community engagement. This public university system serves students from its flagship Columbia campus, three comprehensive universities (Aiken, Beaufort, and Upstate), and four regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union).

The University of South Carolina System offers degree programs at the associate's, bachelor's, master's, and doctoral levels. Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, degree programs are offered in the following areas: arts and sciences; business; education; engineering and computing; hospitality, retail, and sport management; information and communications; law; medicine; music; nursing; pharmacy; public health; and social work.

With a flagship campus recognized by the Carnegie Foundation as a top research and community engaged institution and nationally ranked in start-up businesses, and an eight-campus system that confers nearly 40% of all bachelor's and graduate degrees awarded at public institutions in South Carolina, the university has a profound relevance, reach, and impact on the people of the state. The University of South Carolina System provides all students with the highest-quality education, including the knowledge, skills, and values necessary for success and responsible citizenship in a complex and changing world through engagement in nationally and internationally ranked research, scholarship, service, and artistic creation.

UofSC Union Mission Statement
Approved by the Board of Trustees – October 11, 2019

Next Board of Trustees Scheduled Review – January 2023

https://www.sc.edu/about/offices_and_divisions/institutional_research_assessment_and_analytics/about_us/mission_statements/usc_campus_mission_statements.php

The University regional Palmetto College campus, is a branch campus of the University of South Carolina Columbia. Union has as its mission to provide higher education and intellectual leadership for its service area. At the heart of this mission is a teaching faculty of high quality dedicated to excellence in instruction, scholarship, public and professional service, and creative endeavor which enrich the classroom experience. UofSC Union offers a varied curriculum grounded in the liberal arts and focused on preparing students to continue their education in the University and throughout life.

The University regional Palmetto College campus recruits students prepared to succeed in completing a baccalaureate level education. While the institution does not offer remedial instruction, it is nonetheless able to admit most students who apply due to the close working relationship between students and faculty. The Union Regional Palmetto College campus was established to encourage higher education in the counties of Chester, Cherokee, Fairfield, Laurens, Union, and York. The original design of the institution incorporated a flexibility that has allowed changes in institutional capability with increasing educational demands of constituents.
Through classroom and laboratory instruction delivered in a variety of face-to-face and distance learning formats and modalities, the institution awards the Associate in Arts and Associate in Science degrees and provides for the completion of selected bachelor's degrees on campus through cooperative agreements and delivery structures with other University of South Carolina System institutions. The Union regional Palmetto College campus also provides general education and upper division coursework applicable to baccalaureate degree programs offered through colleges and universities nationwide. In addition to academic coursework, the mission of the campus includes noncredit courses, seminars, and workshops made available to the community for cultural enrichment and professional development.

The traditions of cultural diversity and freedom of thought are valued at the Union regional Palmetto College campus. In a learning environment that develops respect for racial, geographical, intellectual, and economic diversity and an awareness of individual, societal, and global responsibilities, Union promotes courses, activities, and attitudes which influence the life of the mind in men and women and instill in them a thirst to continue learning throughout life.

The Union regional Palmetto College campus emphasizes the development of the whole person and especially seeks to foster in students the disciplines essential to an educated citizenry. Core competencies, including the ability to communicate through effective writing and articulate speech; computational and quantitative mastery; creative and critical thinking; and the duties of citizenship are strategically integrated within the curriculum. Classroom experiences, student activities, and physical education programs also provide opportunities for cultural enrichment, leadership development, intellectual growth and interpersonal relationships, all contributing to a sense of self-reliance and a joy of learning.

Accreditation
The University of South Carolina Columbia is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, master’s, and doctoral degrees. The regional Palmetto College campuses (Lancaster, Salkehatchie, Sumter, and Union) are branch campuses of the University of South Carolina Columbia; the branch campuses’ accreditation is dependent on the continued accreditation of the University of South Carolina Columbia. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of the University of South Carolina Columbia.

Student Objectives
The University is dedicated to providing all undergraduate students with a common core of knowledge, skill, and academic experience. This general education curriculum provides the foundation for subsequent specialized study in the student’s major discipline area. The University of South Carolina is in the process of updating this curriculum, ensuring that it remains current and prepares students for productive and meaningful engagement as world citizens equipped for life-long learning. The shared common academic foundation of all University of South Carolina students, the Carolina Core, has 10 core components, each with learning outcomes and credit hour requirements. A description of these components can be found at: https://www.sc.edu/our_leadership/offices_and_divisions/provost/academicpriorities/undergradstudies/carolinacore/requirements/

History
Similar to the other UofSC regional campuses, the Union campus was established as a result of local initiative. The Union County Commission for Higher Education was created by an act of the state legislature in the spring of 1965, and a contract was immediately signed by that commission with the University of South Carolina, an arrangement which guaranteed University-quality education at a low cost for area students within commuting distance of the campus. A former public secondary-school building was secured by the commission, and local funds were made available to renovate the structure. Scheduled classes began in September 1965 for the original freshman class of 51 students. In September 1967, 160 students registered at the campus, and enrollment has continued to climb.

Centrally located near the downtown business district, UofSC Union occupies a seven-acre tract fronting the east side of Main Street. Established to meet the educational needs of Union, Laurens, Cherokee, York, Chester, Fairfield, and Newberry counties, the campus has grown to its present enrollment of approximately 1100 and a physical plant consisting of eight buildings, which house administrative offices, classrooms, laboratories, a library, a campus shop, and a gymnasium. The Union campus has traditionally focused on offering the first two years of courses for most University curricula, and the campus continues that tradition today. As a consequence of its expanding role as a unit of UofSC, upper-level courses are increasingly available, including both junior- and senior-level courses, as well as graduate courses.

Union-area residents realize the beneficial aspects of a local regional campus and have been enthusiastic supporters of both the campus and its programs. Both the city and county governments have generously increased their support of the campus and have provided much-needed funds for both physical-plant and equipment needs. Several local organizations provide scholarships for UofSC Union students, and the campus has been the recipient of numerous gifts of goods and services. The campus and the surrounding area have continually maintained this mutually supporting relationship, the result of which has been a high-quality, comprehensive program of higher education for area citizens.

Facilities
The physical plant consists of eight buildings.
Main Building. The Main Building was a secondary public school originally constructed in 1909, renovated in 1965, and completely restored in 1991. It currently houses classrooms; an auditorium; administrative and faculty offices; biology, chemistry, and computer science laboratories; a student lounge; disability services; and the Student Academic Success Center.

Whitener Building. Listed on the National Register of Historic Places, the Central Building was built in 1891 as the first modern public-school building in Union County. After several additions and incursions as a high school, middle school, and elementary school, it was secured for UofSC Union by the Union County Commission for Higher Education in 1975. Renovations were completed on the Whitener Building in the fall of 1988 and it now houses administrative and faculty offices, classrooms, telecommunications instruction classrooms, and a community room for meetings and receptions. UofSC Union library services are provided by the Union County Carnegie Library.

Bookstore. The University of South Carolina Union Bookstore is located at 311 East Main Street. The bookstore sells a variety of Carolina-themed products which include clothing for adults and children, tailgating products, jewelry, miscellaneous items, snacks and non-alcoholic beverages. Students can purchase or rent their textbooks, or obtain their Carolina cards. Textbook buy back is held at the end of each semester. UofSC Bantam clothing, memorabilia, and UofSC-Union clothing are also available for purchase. Store hours are Mondays-Thursdays from 8 a.m. to 5 p.m. and Fridays from 8 a.m. to 2 p.m.

Student Center. The Student Center, which is located at the rear of the Bookstore, is a fun area for students to gather before or after class. Students can enjoy television, pool tables, air hockey, video games, ping pong, and vending machines.

The Bobby and Barbara Rippy Courtyard. Located behind the Student Center, the courtyard is a pleasant outdoor area for reading and relaxation. Power stations are located near the seating areas where students can charge their phones or tablets.

Truluck Activity Center. Completed in 1969, the activity center provides space for athletic and social activities. The center contains a basketball court, office space, and physical-fitness equipment. The center has a seating capacity of 500.

Founders House. The former Child Development Center, renamed Founders House to honor local leaders who have had a special relationship with UofSC Union, has recently undergone a complete renovation. Much of the Athletic Department is housed there. The house has private and shared office space.

Fine Arts Building. A newly-purchased building on Main Street will house additional university facilities in the near future, including a dedicated Fine Arts area with faculty offices, classrooms, and art studio space, as well as some storage space and maintenance offices.

Science and Nursing Building. The new Science and Nursing Building on Main Street, across the street from the Bookstore, will house a new state-of-the-art virtual reality science lab/classroom, as well as faculty offices, and meeting space.

Student Services Building. The new Student Services Building located on Main Street next to the bookstore will house the admissions, financial aid, and student life offices.

Special Events Extracurricular Activities

From its beginning, UofSC Union has recognized the importance of developing all facets of the individual. In keeping with this goal, the campus has offered a wide array of extracurricular activities, including the Student Government Association, the African American Alliance, numerous other clubs, a competitive athletics (NJCAA and club) program, service organizations, and frequent social functions.

Admissions

General Information

1. An application for admission must be submitted and approved and an official notification of acceptance issued by the Office of Undergraduate Admissions before any person may enroll in an undergraduate course. Before action can be taken on an application for admission, all credentials required by University policy must be received by the Admissions Office, which has responsibility for evaluation of credentials for the purpose of admission.

2. First-time applications must be accompanied by a nonrefundable application fee specified on the application form. Application forms may be obtained from the Admissions Office or completed online through the UofSC Union website.

3. Selected applicants who present evidence of special talents for University programs requiring such special talents may be evaluated on the basis of these talents as well as high-school grades and entrance examination scores. The University reserves the right to place conditions on the admission of any student. In the event such action is taken, the conditions will be clearly explained in the letter of acceptance.

Proof of immunization as well as proof of U.S. citizenship or qualification as an international student is required before enrolling at UofSC Union.

Campus visits can be arranged through the Admissions Office. The Admissions Office is usually open year-round except for Independence Day, Labor Day, Thanksgiving day and the following Friday, and 10 days at Christmas.

Categories of Admission

In keeping with its mission to provide accessible higher education to students in a seven-county service area (Cherokee, Chester, Fairfield, Laurens, Newberry, Union, and York counties), UofSC Union is committed to an admissions policy which ensures access while only admitting students who have a reasonable chance of academic success. As a means to this end, we have developed specific policies to govern admission to the various admissions categories.

Freshman Admissions

Freshman applicants must have either a high-school diploma or its equivalent (GED) prior to enrolling. Accepted applicants must have senior grades and a verification of graduation sent as soon as they are available. Applicants who did not graduate from high school must send transcripts of all available work and a copy of a GED certificate or satisfactory GED test scores.

Freshman applicants must submit:
1. completed application
2. specified nonrefundable application fee
3. official high-school record complete up to the time of application
4. official entrance examination scores (either SAT or ACT).

Prospective students must have adequate preparation for the curriculum in which they plan to enroll. At a minimum, applicants for admission are required to complete a college preparatory program with units distributed among the following academic subjects:

Transfer Admissions
An applicant who, having graduated from high school, has attended another regionally accredited postsecondary institution and attempted one or more courses is a transfer student, regardless of credit earned. If fewer than 30 semester hours (45 quarter hours) of college-level work have been attempted, the applicant must meet both transfer and freshman entrance requirements.

Transfer applicants for admission must submit:
1. completed application forms
2. specified nonrefundable application fee
3. complete official transcripts from postsecondary institutions through the time of application; these must be supplemented by final transcripts that reflect complete academic work prior to beginning classes in the University
4. complete high-school records including entrance exam results if less than 30 semester hours (45 quarter hours) of college-level work have been attempted in a regionally accredited college or university.

Applications should be submitted before these deadlines:
- Fall term: August 1
- Spring term: December 1
- Summer terms: two weeks prior to registration for the term.

All applicants for transfer admission must be eligible to return to the last institution attended as a degree-seeking student.

The applicant must submit official transcripts of all previous college courses attempted whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit. An official transcript must be sent directly to the admissions office from each institution attended. Failure to report all attempted college courses may constitute sufficient cause for later dismissal from the University.

Students transferring from nonaccredited colleges may be allowed to validate credit after admission to the University. Details of the validation procedure may be obtained from the admissions office.

Original records are required for courses exempted at a previous college. Exemption credit or acceptance of transfer credit by another college has no bearing on the evaluation of transfer credit at the University of South Carolina.

Generally, credits earned in courses that fall into one or more of the following categories are not acceptable in transfer to the University:
1. courses that are occupational or technical in nature
2. courses that are essentially remedial in nature
3. courses from a two-year institution which are considered upper division or upper level at the University

4. courses from a two-year institution that are not listed as part of that institution’s college parallel program.

Exceptions to this rule may be made only by the designated academic official(s) on the campus where the student is majoring and only in specific cases where such courses are judged to be uniquely relevant to the student’s degree program.

Assurance of Quality
All claims from any public two- or four-year institution challenging the effective preparation of any other public institution’s course work for transfer purposes shall be evaluated and appropriate measures shall be taken to reassure that the quality of the course work has been reviewed and approved on a timely basis by sending and receiving institutions alike. This process of formal review shall occur every four years through the staff of the Commission on Higher Education, beginning with the approval of these procedures.

Other Admissions Opportunities
A variety of admissions opportunities are available for those students who do not meet regular freshman or transfer requirements stated above. Please see the Admissions Office for complete details (https://www.sc.edu/about/system_and_campuses/union/apply/index.php (https://www.sc.edu/about/system_and_campuses/union/apply/)).

Admission as a Nondegree Candidate
Applicants who wish to attend the University for one semester or on some limited basis may be approved to do so upon submitting an application accompanied by an explanation of their educational goals. The admissions office reserves the right to determine the proper category of admission and to determine what credentials may be required.

Non-degree Seeking Students. This category is for part-time applicants who are not interested in earning a degree at UofSC. A maximum of 30 semester hours may be earned in this category. Applicants who have been officially denied admission as degree-seeking students are not eligible for admission as special students. Courses completed as special students carry full University credit; however, none of the hours is applicable to a degree until the student applies and qualifies for admission to a degree program. Usually no credentials are required if the applicant has no plan to seek a degree.

Senior Citizens. A senior citizen (age 60 or above) may enroll in courses at UofSC Union tuition-free on a space available basis. They must pay the application fee and technology fee and purchase textbooks. A special form documenting their eligibility must be obtained from the Registrar’s Office.

Concurrent. High-school juniors and seniors who have excelled in their studies may enroll in appropriate courses at the University upon recommendation of their counselors or principal and with approval of the UofSC department in which courses are to be taken. Interested students must submit high-school records that show exceptional performance. Concurrent students must have a minimum high-school GPA of 3.0.

Auditor. An auditor may apply as a special student (see above).

Military Special. Certification of active duty military status is required.

Persons attending the University in any of these categories will be nondegree candidates. Credit earned while attending as a nondegree candidate may be used toward a degree only after the student has applied for and been accepted into a degree program. An applicant
denied admission to any degree category is not eligible for admission as a special student. The period of enrollment in these categories is limited by either time or number of allowable credits. The official acceptance letter explains all enrollment restrictions for the category in question. Nondegree students are not eligible for financial aid, veterans’ benefits, or on-campus housing during the fall or spring terms. Rooms on the campus may be available to students in the summer whether or not they are working for degrees.

**Readmission of Former Students**

An application for readmission must be submitted by any former student who wishes to return to the University after missing a major (fall or spring) semester. Summer sessions do not count as a major semester in this instance. Applications for readmission are obtained from the Office of Undergraduate Admissions and when completed should be returned to the admissions office at the campus where the student expects to enroll. Readmission to the University and to the program in which the student was previously enrolled is not automatic. An interview may be requested and some basis for a favorable decision may be required.

Students who attend the University as special students (including probationary or nondegree candidates) are not considered for “readmission” because these students were not fully admitted to the University originally. If special students wish to return to the University as degree-seeking candidates, they must apply for regular admission as freshmen or transfer students, furnishing all official transcripts and any entrance test scores which may be required.

Students who leave the University in good standing, miss one or more major semesters, and attend another institution while away must submit the application for readmission and official transcripts of all college-level work attempted during their absence from the University. Such applicants must meet the same requirements as transfer students.

A student who leaves the University on suspension must apply for readmission upon completion of the period of suspension and qualify for readmission to the major program requested. To attempt to return to the University prior to the completion of the suspension period requires:

1. an application for readmission and a petition for reinstatement if a major semester has been missed; or
2. a petition for reinstatement if the attempt is being made after notification of suspension but prior to missing a major semester.

A petition for reinstatement is made to the University college from which the student was suspended.

If students attend another college-level institution while suspended from the University, they must maintain a satisfactory average at that institution in order to retain the privilege of being considered for readmission at the conclusion of their suspension. The University does not transfer credit earned during a period of suspension, but the quality of grades could affect the decision on readmission.

**Admission of International Students**

The University of South Carolina welcomes the applications of qualified international students. At least 90 days before the beginning of the semester they wish to enter, students must send a complete application, including standardized test scores, school records, and financial statements, to the Office of Undergraduate Admissions.

International applicants must be proficient in the English language. A score of 550 or above on the paper version of the TOEFL (Test of English as a Foreign Language) is required (a score of 210 on the computerized version is required). TOEFL scores are not required for international students from countries where the primary language of instruction is English nor from graduates of high schools in the United States.

An English proficiency test will be administered to international students, except those from English-speaking countries, upon arrival at the University. All international students must demonstrate sufficient proficiency in written and oral English to progress at the University level. Students who are not proficient in English will be required to take noncredit, concentrated English language training until proficiency is demonstrated.

In some of our University programs, minimum Scholastic Assessment Test (SAT) scores are required for admission. It is therefore recommended that international students take the SAT before applying to the University.

In addition, freshman applicants must have completed a level of education equivalent to that of students entering from accredited secondary schools in the United States and have superior grades on their school work. Applicants who seek to enter from another college or university in the United States must meet transfer admission requirements.

International applicants will not be allowed to enroll in classes until they establish their ability to pay education expenses (approximately $22,750 for each year of study). The policies of certain countries have created financial difficulties for their citizens studying at the University. Applicants from these countries will be so notified and required to make an advance deposit of expenses. Applicants from other nations must submit certification of financial support to satisfy this requirement. International students should not expect to obtain any financial assistance from the University.

---

1 Applicants who are not citizens or permanent residents of the United States.

**Academic Regulations**

As the chief governing body of the University, the Board of Trustees delegates the powers of the president and the faculty in accord with its policies. Subject to the review of the president and the Board of Trustees, the faculty retains legislative powers in all matters pertaining to the standards of admission, registration, instruction, research, extracurricular activities, requirements for and granting of degrees, the curricula, the discipline of students, the educational policies and standards of the University, and all other matters affecting the conduct of academic affairs.

The University reserves the right to make changes in curricula, degree requirements, course offerings, and all academic regulations whenever, in the judgment of the faculty, the president, or the Board of Trustees, such changes are in the best interest of the students and the University.

Registration at the University of South Carolina assumes the students’ acceptance of all published regulations, including both those which appear in this document and all others as applicable in any official announcement such as the Medical School Bulletin, Law School Bulletin, Graduate Studies Bulletin, the University Master Schedule of Classes, or the Carolina Community. Official policies of the University listed below are published in the Carolina Community, which is available online as well as through the Student Government Office or the Office of the Vice President for Student Affairs.
1. Student Rights and Freedoms within the Academic Community
2. Rule of Academic Responsibility and Academic Disciplinary Procedures
3. Grievance Policy and Procedures for Non-Academic Areas
4. University Policy on Use of Alcohol
5. University Policy on Campus Solicitation
6. University Policy on Student Patent and Copyright Matters
7. Student Right to Know

Unforeseen circumstances may interfere with the scheduling of a course or degree offering. Students must accept such developments even if doing so will mean a delay in some of their academic goals or a modification of those goals. The departments concerned will work closely with students facing such problems in an effort to resolve them with a minimum of difficulty.

The University reserves the right to withdraw any course because of inadequate enrollment. Additional courses may be offered upon application of a sufficient number of students; a minimum of 10 applicants is the usual requirement. Registration in any course may be closed when the maximum enrollment for efficient work has been reached.

Bulletin Rights and Exclusions

Bulletin Rights
An undergraduate student may choose to obtain a degree in accordance with the curricular requirements in force for the particular degree at the time the student first enrolls as a degree-seeking student at any University campus, or under subsequent requirements published while the student is enrolled.

Bulletin Exclusions
The student’s choice is restricted to a specific bulletin and the curricular requirements described therein. Undergraduate students have a period of eight years, inclusive and continuous, in which to claim the rights of a specific bulletin.

Within the eight-year limit, an undergraduate student who is absent from the University for no longer than three years, and who returns to complete the program of study, shall have the right to continue under the bulletin in effect at the time of the student’s original enrollment as a degree-seeking student. Alternatively, the student may elect the degree requirements under the bulletin in effect at the time of return. If the period of absence is longer than three years, the student will be subject to the curricular requirements in force at the time of return. Under no circumstances will students be allowed to appeal to short-lived rules and regulations which were adopted and abandoned during the period of their absence.

If drastic revisions of curricula or program requirements have occurred during a student’s absence (even if for less than three years), or during the period between the student’s original enrollment as a degree-seeking student and the eventual movement to a different degree program or campus within the University, a reasonable effort will be made by the academic dean to permit the student to undertake a transitional program that is equivalent to the educational experience intended under the bulletin in force at the time of the student’s original enrollment as a degree-seeking student.

Academic Calendar Policies

Academic Calendar
The University follows an early Semester Calendar, with Fall semester beginning the Thursday of the third full week in August and ending in December before the winter break. Spring classes begin the second Monday of January, provided neither Monday is a holiday (New Years or MLK). For Fall and Spring semesters, there are 70 class days with a minimum of 2100 minutes of instruction for a standard 3 hour class-28 Tuesday and Thursday classes of 75 minutes per class meeting and 42 Monday, Wednesday, Friday classes of 50 minutes per class meeting. All nonstandard one or two day per week classes must meet the minutes of instruction requirements as part of the calendar.

Summer Term
The summer term consists of multiple course sessions between the spring and fall terms.

Students regularly enrolled in the University may take work applicable to their degree during the summer term. Regulations governing the regular academic year also pertain to the summer term.

A complete listing of all courses offered in the summer term will be available by April 1 on the registrar’s Web site under “Master Schedule.” Course sessions and times may vary.

Please refer to the registration calendars on the registrar’s Web site for more detailed information.

Advisement Policies

Academic Advising
When students are accepted into the University, they are assigned an academic advisor. Students are expected to arrange to meet with their advisor at least once a semester to plan their course of study for the following semester. Students who do not know their assigned advisor should obtain this information from the appropriate departmental or academic dean’s office.

Information, advice, and interpretations of University policies offered by advisors do not supersede the official statement of policies and academic regulations described in the University Undergraduate Studies Bulletin. Exceptions to University regulations cannot be made by academic advisors. Any exceptions to the policies and regulations set forth in the University Undergraduate Studies Bulletin must be made by the appropriate College Scholastic Standards and Petitions Committee or by the dean of the college.

Records of academic progress may be kept by advisors and deans, but the only official student records are maintained by the Office of the University Registrar.

Classification of Students
Classification is based on the total number of semester credit hours earned: A student must have earned 30 hours to be classified as a sophomore, 60 for classification as a junior, and 90 for senior classification. Students are classified at the beginning of each semester and maintain that classification until the next semester begins.

Undeclared Freshmen
For various reasons it may be impossible or inappropriate for a student to declare a major. Nevertheless, all students will receive advisement in the college most closely related to their interests and abilities. Transient
students are subject to the rules of their home institution and may take course work at the University of South Carolina without a declared major. University courses are open to those seeking career advancement or life enrichment and who meet stated course prerequisites. Freshmen who have been accepted by the University, but who are unsure of academic or career goals, may need a period in which to establish their major interest. To accommodate students in these categories, courses which are usually open to students with 30 or fewer hours (freshmen) are open to all students who meet prerequisites published in the University's Undergraduate Studies Bulletin. Students who have earned 30 semester hours and wish to continue their studies at the University of South Carolina must declare a major in a program in which they meet entrance or progression requirements.

Course of Studies
Students are expected to follow the programs outlined by their school or college as closely as possible, particularly in the first two years when satisfying basic degree requirements and prerequisites for advanced work. Students must pursue required courses in the prescribed sequence. Failure to do so may lead to future schedule difficulties, and students may find that the subjects for which they wish to enroll are either not available or are closed to students with advanced standing. Students who fail to complete successfully all freshman requirements may not enroll in courses in their major field until the deficiency is removed. Students who enroll in classes for which prerequisites or other defined requirements have not been met may be removed from these classes. Learning-disabled students who wish to take advantage of University-approved program accommodations must have an academic advisory plan on file with the Office of Student Disability Services and the dean of the college. This plan will be formulated by the student's academic advisor with the assistance of the Office of Student Disability Services and will contain recommended accommodations which specifically relate to and are consistent with the student's diagnosed disability. A copy of the student's academic advisory plan must be provided to the course instructor for the student to be eligible for a particular accommodation. Any substitutions for degree requirements recommended in the student's academic advisory plan must be referred to the Scholastic Standards and Petitions Committee of the student's college for action.

Changes in Curriculum
Undergraduate students interested in changing majors should contact the college or school offering the new curriculum the student intends to follow. Once all necessary permissions are obtained, the college or school that offers the new curriculum will notify the Office of the University Registrar to update the student's record. Curriculum changes can affect loan deferment, scholarship eligibility, athletic participation eligibility, tuition and fee assessment, and international student VISA regulations. For this reason, all curriculum changes must be completed before the end of the free drop/add period in Fall and Spring Terms (in Part of Term 30), and prior to June 1 during the Summer Term. Curriculum change requests that arrive at the Office of the University Registrar after these deadlines will be processed for the following term. Exceptions to this rule may be made in the event that a change request is being made in the semester that student is graduating from the University.

Course Substitutions
Only under unavoidable and exceptional circumstances will the faculty permit substitution for or exemption from the prescribed curricula. When it becomes necessary to request a deviation from the prescribed course of study, students should consult the dean of their college or the head of the department in which they are majoring before preparing a petition listing the substitutions or exemptions sought and the reasons for the request. Petitions are submitted on forms obtainable from the Scholastic Standards and Petitions Committee of the particular college, and must be submitted to the dean's office and the head of the student's major department. The Scholastic Standards and Petitions Committee of each college functions as an appeal board in cases where agreement between the dean, department head, and the student cannot be reached.

Course and Academic Credit Policies

Course Numbering
Courses numbered from 101 to 699 are available at different levels for undergraduate credit. Courses numbered from 700 to 899 may be taken for graduate credit only and are described in the Graduate Studies Bulletin. All courses numbered from 101 to 499 are for four-year baccalaureate degree candidates. Courses numbered from 500 to 699 may be taken by advanced undergraduate and graduate students for undergraduate or graduate credit, respectively. A 500- to 600-level course taken for undergraduate credit cannot later be awarded graduate credit.

Course Credit
The credit value of each course is usually determined by the amount of formal instructional time per week for one semester. At least 700 minutes of instruction (and at least twice that for laboratory time) can be expected per credit hour. The semester hour credit for each course is included in each course description.

No student suspended from the University of South Carolina for any reason may earn academic credit during the period of suspension, whether by residence elsewhere or by correspondence courses of any origin.

Remedial courses (courses numbered 100 or below) may not be used to meet degree requirements.

Credit by Examination
Currently enrolled students may obtain credit by examination in a course in which they have had no class attendance or semester standing; permission must, however, be obtained from the dean of the college or department chair in which the course is offered. A grade of not less than B on the examination is necessary in order to receive credit for the course. Examinations are not permitted in courses in which a student previously has been enrolled regularly or as an auditor. The applicant must pay to the Office of Financial Services in advance of the examination a fee of $25 per semester hour; this fee is not refundable. The Office of Financial Services will issue a receipt which must be shown to the head of the department conducting the examination, who shall immediately report the results of the examination to the Office of the University Registrar. Credits earned under this regulation are recorded with hours earned only.

Transfer Credit
Students transferring to the University from another college or university must, before enrolling in class at the University, have their transcripts evaluated by the University. It is only in the light of such evaluation that students will know definitively the transferability and equivalency of each
transfer course. Degree applicability will be determined by the college or school in which the student is enrolled.

**Transferability** refers to the conditions under which the University accepts credit for inclusion in the student’s record. Transfer courses must have been taken at a regionally accredited post-secondary institution, or, if taken at a foreign post-secondary institution, have been recommended by a NACES-member external evaluation service. Coursework classified as remedial by the University will appear on the student’s record, but will not be used to determine admission eligibility or a transfer GPA. Exceptions to this rule may be made by the Office of the Registrar when state scholarship eligibility rules require inclusion.

**Equivalency** entails equating transfer credit, both in hours and content, to University of South Carolina coursework. The Registrar’s Office works with UofSC colleges and schools to coordinate the process of transfer evaluation to equate transfer courses directly to courses in the UofSC course catalog; to subject codes which represent subjects not offered at UofSC; or to subject codes that identify courses as remedial/technical/non-accredited coursework. A list of transfer equivalencies for the Columbia catalog of courses can be found at: [http://www.sc.edu/about/offices_and_divisions/registrar/transfer_credits/course_equivalency.php](http://www.sc.edu/about/offices_and_divisions/registrar/transfer_credits/course_equivalency.php)

**Applicability** of credit toward a degree refers to the prerogative of academic divisions to count specific credit toward the fulfillment of a student’s degree requirements. The student’s college or school of enrollment is responsible for determining applicability.

However, a transfer course is not applicable towards any University of South Carolina academic program or degree if:

1. The transfer course was essentially remedial in nature (example: Developmental English).
2. The transfer course was occupational or technical in nature (examples: welding, paralegal, or radiography courses).
3. A grade lower than 2.0 on a 4 point scale, or equivalent, was earned in the transfer course.
4. The transfer course was taken by a degree-seeking University of South Carolina student without prior approval as described in the Earning Credit in Transient Status section of this bulletin.
5. The transfer course was taken while a student was on an academic suspension from the university.
6. The student received any grade other than W in an equivalent course at this university, unless the student was enrolled full time at least one year at the transfer institution.

Exceptions to the rules of applicability may be made only by petition to the dean for undergraduate studies of the College or School in which the student is majoring.

Effective Summer 2017 for all newly admitted and readmitted students, transfer grade points and GPAs will no longer appear on the UofSC record. Transfer course equivalencies, grades, attempted hours, and earned hours will appear on students’ advising transcript in Self Service Carolina, while only transfer earned hours will appear on the official transcript.

**Earning Credit in Transient Status**

Since the University is accountable for the integrity of its degrees, it is essential that degree programs be closely monitored by University faculty. Therefore, students entering the University to seek a degree should expect to complete the majority of their academic work at the University of South Carolina. Normally students who wish to earn more than a semester of credit at another institution should meet all requirements and transfer to that institution. In some programs, and with the permission of the academic dean, students may take up to 18 semester hours of courses in transient status provided they have a 2.00 UofSC grade point average; the courses are approved in advance by the academic advisor and dean; and the other institution is fully accredited and the course work meets University specifications for transfer credits.

Study abroad or in special academic programs within the United States may be of particular benefit to students, and the University cooperates in a variety of national and international exchange programs in which students may pursue up to a year of academic work at another institution. Special permission is granted to students in these programs with the advance approval of the academic advisor and dean.

**Course Load**

Maximum credit limits, published in the Master Schedule of Classes, also vary according to college policy. Students will not be permitted to register for a semester load in excess of that prescribed for their program of study unless they earned an average of B or better on all courses for which they were enrolled (minimum 12 semester hours) for the preceding semester. New students are eligible for an extra course if they submit to the academic dean satisfactory evidence of equivalent academic achievement. Students eligible for an additional course on this basis must obtain prior approval for each course addition from the dean of their college. No course may be added after the last date to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site. (Note: This regulation does not apply to aerospace studies, Army or naval science courses, which may be added to a course program during the regular registration period without special approval.)

Undergraduate students who are enrolled in 12 semester hours or more for the fall, spring, or summer semester are considered full-time for academic purposes. Students who have been verified as learning disabled by the Office of Student Disability Services must be enrolled in 9 semester hours or more for the fall, spring or summer semesters to be considered full-time students with regard to access to University residence halls and eligibility for financial aid, provided this is consistent with their academic advisory plan.

Graduate students who are enrolled in 9 semester hours or more for the fall, spring, or summer semester are considered full time for academic purposes.

Full-time fees for undergraduate students are calculated on 12 to 16 semester hours. Full-time status for graduate students with assistantships is determined by the dean of Graduate Studies.

Full-time benefits for veterans are determined by the Office of Veterans Services.

**Auditing**

A student must be admitted to the University and go through the regular registration process to be eligible for auditing any course. All auditors must be admitted to the University and go through the regular registration process. Those who are not full-time students will be charged the same fees as for courses taken for academic credit.

Auditing a course consists of attending classes and listening without responsibility for any assignments or examinations. An auditor is not responsible for any assignments or examinations. No record of audit
shall appear on a transcript unless a student attends 75 percent of the classes.

No credit may be earned in an audited course by examination or otherwise. No audited course may be repeated for credit at a later date except by those students who have been verified as learning disabled by the Office of Student Disability Services and whose academic advisory plan recommends auditing a specific course before it is taken for credit.

The applicant must complete the prescribed procedure for enrollment through the Office of the University Registrar before class attendance will be permitted.

Students who have registered for a course on an audit basis and who wish to change their registration to take the course for credit (or who wish to change from credit to audit) must do so no later than the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site.

Independent Study

The purpose of the independent study option is to allow the student to pursue an area of academic interest not adequately covered by the regular course structure. The experience shall involve an academic product that is consistent with the student’s program of study.

Prior to enrolling in an undergraduate independent study course, a student must complete an Independent Study Contract (AS-6). The approval of the instructor, advisor, department chair, and student’s dean is required. Students then present their approved copy to the Office of the University Registrar before registering for the course. Only students who take independent study as part of their major or minor or cognate program may receive grade-point credit for independent study. All other students will receive Pass-Fail credit. Students who take independent study on a Pass-Fail basis cannot later receive grade points, even if the student transfers to another major, minor, or cognate otherwise qualifying the course work as appropriate for grade points. This ruling is not reversible by petition.

A grade point average of 2.50 or greater is required to enroll in independent study courses. The amount of credit for independent study per semester is limited to 6 hours. Independent study credits applied toward any undergraduate degree may account for no more than 10 percent of the total required credit hours for that degree.

Repetition of Course Work

When a course is repeated, both grades will be entered on the student’s permanent academic record and included in the grade point average, unless the grade forgiveness policy is applied. Course credit toward graduation will be given only once, unless otherwise stipulated in the course description. Many academic programs restrict the number of times a course may be repeated. Consult the college and department section of the bulletin for such restrictions.

International Courses (INTL) / Study Abroad

- 501 — Study Abroad—UofSC Exchange. (1-16) This course keeps a UofSC student active while on a pre-approved UofSC exchange program.
- 502 — Study Abroad—Non-UofSC Program. (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program.
- 503 — Study Abroad—Through Another U.S. Institution. (1-16) This course keeps a UofSC student active while on a pre-approved non-UofSC study abroad program through another U.S. institution of higher education.

Senior Privilege - Enrollment in Graduate Courses

A special provision to earn graduate credit is available for UofSC undergraduate seniors in their final semester who need less than a normal course load to complete baccalaureate requirements. Overload enrollment that includes one or more courses under senior privilege is not allowed. Courses for graduate credit under senior privilege cannot be used toward undergraduate degree requirements. For senior privilege consideration, undergraduate seniors with a 3.00 GPA should submit to The Graduate School, for the graduate dean’s approval, form GS19 endorsed by the student’s advisor, the chair of the department offering the course, and the academic dean for that department. This action should be taken before registration.

Accelerated Degree Programs

Certain academic units offer accelerated programs whereby an undergraduate student with a GPA of 3.40 and 90 or more hours toward the baccalaureate degree may apply graduate credits to a baccalaureate program. Admission can be requested by students in consultation with their academic advisor, their undergraduate dean, and the graduate director of the proposed master’s program. An application form and associated guidelines may be obtained from The Graduate School.

Several of the University’s colleges and schools are involved with a variety of accelerated degree programs. For more information, contact:

Office of Undergraduate Admissions
University of South Carolina
Columbia, SC 29208
phone 803-777-7700

Registration Policies

Registration

To be officially enrolled in the University students must be academically eligible, complete the registration process with the Office of the University Registrar, and possess a receipt issued by the Office of Financial Services for payment of current academic fees.

Students are expected to complete registration (including the payment of all required fees) by the dates prescribed in the registration calendars on the registrar's Web site to avoid cancellation of classes and payment of a late registration fee of $5 per day ($350 maximum).

Changes in Enrollment

Adding a course, changing from credit to audit or audit to credit, changing from one section to another, and changing the number of credits in any variable credit course must be completed by the last day to change course schedule or drop without a grade of W being recorded, as published in the academic and refund calendars on the registrar’s Web site. Electing or revoking the Pass-Fail option must be completed no later than the last day for dropping a course with a grade of W, as published in the academic and refund calendars on the registrar's Web site.

Dropping Courses and Withdrawal

Free Drop/Add Period

During the Free Drop/Add period, undergraduate students have the ability to add and remove courses from their schedule through Self Service
Carolina. For each course, the Free Drop/Add period begins during the official first day of the course and extends to a minimum of 6% of the Part of Term\(^1\) in which the course is scheduled. Courses removed during the Free Drop/Add period will not be recorded on a student's transcript.

Details regarding Free Drop/Add dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from dropping or adding courses during the Free Drop/Add Period if they have an active registration hold on their record.

\(^1\) Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Course Withdrawal Period

During the Withdrawal Period, undergraduate students have the ability to withdraw from a course with no grade penalty through Self Service Carolina. For each course, the Withdrawal Period begins after the Free Drop/Add Period and extends to a minimum of 72% of the Part of Term\(^1\) in which the course is scheduled. Courses from which a student withdraws during this period are recorded on a student's transcript as a W; however, the semester hours will not be calculated in the computation of grade point average, count towards earned hours, or count towards graded hours. Courses that have a recorded grade of W will count towards attempted hours. Details regarding course Withdrawal dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Period if they have an active registration hold on their record.

\(^1\) Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Course Withdrawal Fail Period

During the Withdrawal Fail Period, undergraduate students have the ability to withdraw from a course with a penalty grade through Self Service Carolina. For each course, the Withdrawal Fail Period begins after the Withdrawal Period and extends up to 100% of the Part of Term\(^1\) in which the course is scheduled. Courses from which a student withdraws with a grade of WF during this period are treated as an F in the evaluation of academic standing, computation of grade point average, and graded hours. Details regarding course Withdrawal Fail dates (https://my.sc.edu/codes/) can be found on the Self Service Carolina log-in page under the “Academics” sections.

Students are prevented from withdrawing from courses during the Withdrawal Fail Period if they have an active registration hold on their record.

\(^1\) Part of Term: Each course is associated with a specific part of the term for the semester or a specific date range in which the course is held. For example, Part of Term can refer to Full Term courses that run the full major semester (fall or spring) or Half Term courses that run only half of a major semester. Each Part of Term has specific drop/add, withdrawal, and withdrawal fail dates. Details regarding Part of Term dates can be found on the Self Service Carolina log-in page under the “Academics” sections.

Hardship Withdrawal

During and after the Withdrawal Fail Period, it may be necessary for a student to withdraw from all courses for the semester due to a significant personal hardship (e.g., medical or family emergency, prolonged illness, other medical or traumatic event). In these situations, students are able to petition for a Hardship Withdrawal from courses through the Office of the Dean of Students or the Hardship Withdrawal Committee. Each Palmetto College Campus has an equivalent hardship withdrawal process for managing petitions from students enrolled on their campus.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted during the Withdrawal Fail Period until the last day of courses for the semester will be reviewed by the Office of the Dean of Students. Approved petitions will be submitted to the Office of the Registrar for grade assignments of W for all courses that semester on the student’s transcript.

The Office of the Dean of Students will notify the student’s instructors and their home college of the withdrawal.

Hardship Withdrawal petitions, including verified documentation of hardship, submitted after the last day of courses for the semester will be reviewed by the Hardship Withdrawal Committee that must include faculty and college/school representation. Approved petitions will be submitted to the Office of the Registrar for grade assignments of W for all courses that semester on the student’s transcript.

Prior to a Hardship Withdrawal decision being made, all documentation is subject to verification by the Office of the Dean of Students and/or the Hardship Withdrawal Committee, including but not limited to class attendance, class participation, or supporting documentation. If false documentation or misrepresented information is submitted, students will be referred for alleged violation of the UofSC Honor Code and the Hardship Withdrawal request will be denied.

A Hardship Withdrawal to selectively withdraw from some courses, while remaining enrolled in other courses, will be permitted only under exceptional circumstances and must be approved by the Office of the Dean of Students in consultation with appropriate colleges/schools. The Office of the Dean of Students will submit a report of selective withdrawal decisions for verification to the Hardship Withdrawal Committee at the end of each semester.

Information regarding the University’s Withdrawal Refund Appeals procedures can be found in the Fees and Refunds section of the bulletin.

Title IX Obligations

Information contained in Hardship Withdrawal petitions is private and not shared with instructors, departments, or colleges/schools outside of the Hardship Withdrawal Committee. However, in accordance with the provisions of Title IX of the Education Amendments Act of 1972 and University policy, if sexual misconduct information is included in a student’s petition, the Office of the Dean of Students and/or the Hardship
Withdrawal Committee is obligated to report the matter to UofSC's Title IX coordinator.

**Withdraw via Self-Service Carolina**

Students can withdraw for the semester by withdrawing from all courses on Self Service Carolina. Students are encouraged to consider the Hardship Withdrawal Process if they are withdrawing during the Withdrawal Fail Period.

**Active Duty Military Withdrawal**

Students in the National Guard or armed forces reserves who are placed on active duty by order of the president of the United States or the governor of their state should pursue withdrawal from courses according to the provisions of the University's policy titled "Withdrawal of Students Called to Active Military Service" (ACAF 3.05 [http://www.sc.edu/policies/ppm/acaf305.pdf]). Active duty military personnel who are reassigned during an academic term may also invoke the provisions of this policy.

1 Specific dates for each Part of Term may be found on the Office of the Registrar website

**Indebtedness**

It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

**Attendance Policy**

**Class Attendance**

Students are obligated to complete all assigned work promptly, to attend class regularly, and to participate in whatever class discussion may occur.

Absence from more than 10 percent of the scheduled class sessions, whether excused or unexcused, is excessive and the instructor may choose to exact a grade penalty for such absences. It is of particular importance that a student who anticipates absences in excess of 10 percent of the scheduled class sessions receives prior approval from the instructor before the last day to change schedule as published in the academic and refund calendars on the Registrar’s website [http://registrar.sc.edu/](http://registrar.sc.edu/).

It must be emphasized that the “10 percent rule” stated above applies to both excused and unexcused absences. Faculty members should notify classes, specifically in the course syllabi, of the attendance policy which they intend to follow in each class, but it cannot be more restrictive than the “10 percent rule”. It is also recommended that the faculty include a policy statement in their syllabi requesting students to meet with the instructor early in the semester to discuss the consequences of potential excessive absences due to participation in University-sponsored events.

Faculty should consider the following events or circumstances as potentially excusable absences:

- participation in an authorized University activity (such as musical performances, academic competitions, or varsity athletic events in which the student plays a formal role in a University sanctioned event)
- required participation in military duties
- mandatory admission interviews for professional or graduate school which cannot be rescheduled
- participation in legal proceedings or administrative duties that require a student’s presence
- death or major illness in a student’s immediate family
- illness of a dependent family member
• religious holy day if listed on www.interfaithcalendar.org (http://www.interfaithcalendar.org)
• illness that is too severe or contagious for the student to attend class
• weather-related emergencies

The Student Ombudsperson in the Division of Student Affairs is available to assist faculty members with obtaining or verifying documentation when necessary. The faculty member has complete discretion regarding the specific nature of any accommodation offered in the event of an excused absence. Students should notify faculty members at least two weeks prior to the absence when possible. In all cases, students must contact the faculty member to request an accommodation upon return to class.

Examination Policies

Final Examinations

Final examinations for spring and fall semesters are held during a seven-day period at the close of each semester. Summer examinations are held during a two-day period at the close of each session. Semester examination schedules are published on the registrar’s Web site under the “Calendar” link. The results of these examinations, combined with the grades for class performance, determine the reports given at the end of the semester. No final examination may be held outside of the stated time without the special permission of the dean of the college concerned. Reading Day is specified in the University calendar and no exams, quizzes or required class attendance may be scheduled for that day.

In any course or laboratory which meets two or three times per week, no quiz, test, or examination may be given during the last two class meetings prior to the regularly scheduled examination period. In any course or laboratory which meets once a week, no quiz, test, or examination may be given during the last class meeting prior to the regular examination period. In any course or laboratory which meets more than three times per week, no quiz, test, or examination may be given during the last three class meetings prior to the regular examination period. Self-paced courses are exempt from this regulation.

If an instructor teaches more than one section of the same course, students may transfer from one examination section to another with the instructor’s permission.

Students who are absent from any final examination will be given the grade of F on the course if they have not offered an excuse acceptable to the instructor. If excused, they will be assigned a grade of I (see “I” entry under “Grading System”), and may complete the course under the conditions specified by the instructor in the “Assignment of Incomplete Grade” form.

Re-examinations for the purpose of removing an F or raising a grade are not permitted.

Graduating Seniors

No early examinations are given for graduating seniors. Students who have submitted a degree application may attend the graduation ceremony. Diplomas are mailed after final examinations and after a student’s dean has verified that all degree requirements have been met.

Deferred Examinations

A student with excused absences from final examinations in one semester has the privilege of deferred or special examinations and may take the deferred examination at the next regular examination period, with credit for semester standing, provided the examination is taken at the convenience of the professor. The examination must be taken within one calendar year from the time that the absence was incurred. Deferred examinations will be granted only in case of absence certified as unavoidable because of sickness or other cause, rendering attendance at final examinations impossible.

Grading Policies

Grading System

Enrollment in a course obligates the student not only for prompt completion of all work assigned but also for punctual and regular attendance and for participation in whatever class discussion may occur. It is the student’s responsibility to keep informed concerning all assignments made. Absences, whether excused or unexcused, do not absolve the student from this responsibility.

Students’ grades in their courses are determined by class standing and examination grade, combined in such proportion as the professor may decide.

Class standing is determined by the quality of a student’s work and the regularity of attendance in lectures and laboratory sessions or other exercises of the course. Grading systems in graduate and professional schools are described in the appropriate bulletins.

A, B, C, D represent passing grades in order from highest to lowest. B+, C+, D+ may also be recorded. F represents failing performance.

S and U indicate, respectively, satisfactory (passing) and unsatisfactory (failing) performance in courses carried under the Pass-Fail option. The S/U designation is used also for some research courses, workshops, and seminars in which the regular academic grades are not used. The use of the Pass-Fail grading option in such courses is indicated in their bulletin descriptions. No course carried under the Pass-Fail option will affect a student’s grade point average or the evaluation of suspension conditions.

FN (Failure-Non Attendance) and UN (Unsatisfactory-Non Attendance) grades are assigned to students who never attended or have stopped attending class but have not officially dropped or withdrawn. Faculty are required to provide a last date of attendance when assigning this grade. The grade and the last date of attendance are used in determining the recalculation of awarded funds for financial aid recipients. Reporting the last date of attendance is critical to avoid potential financial liability for the institution.

FN and UN grades are displayed and calculated as F and U grades on the official transcript.

WF is assigned for student withdrawal from a course after the penalty deadline prescribed in the academic and refund calendars on the registrar’s Web site. (See section on “Dropping A Course.”) The grade of WF is treated as an F in the evaluation of suspension conditions and grade point average computation.

W is assigned for student withdrawal from a course after the late registration period but before the penalty date. Courses dropped during the late registration period (as published in the academic and refund calendars on the registrar’s Web site) will not be recorded on a student’s permanent record. In exceptional cases, the grade W will be used after the first seven weeks of a semester, primarily in cases of withdrawal from the University or from a course for medical reasons. (See section on “Dropping A Course.”) A grade of W will not enter into the evaluation of
Specific provisions of the Pass-Fail program are as follows:

1. The Pass-Fail grading system is in effect for an indefinite period of time, subject to periodic review.
2. The Pass-Fail option is not available to undergraduate students whose semester or cumulative GPA is less than 2.00.
3. Students are permitted to exercise the Pass-Fail option only on free elective courses.
4. Students are permitted to take no more than eight courses on a Pass-Fail basis during their undergraduate career.
5. A student wishing to exercise the option must have the permission of the dean of the college and the student’s academic advisor. The Pass-Fail Option form (AS-20) is used for this purpose.
6. The option may be elected or revoked by the student no later than the last date for withdrawing from the course without a penalty.
7. Normal prerequisites may be waived for students taking a course on a Pass-Fail basis.
8. Courses taken under this option will be excluded from the calculation of the grade point average.
9. A grade of S will be entered by the Office of the University Registrar for a regularly assigned passing grade, a failing grade will be registered as U.
10. No course carried on a Pass-Fail basis will be counted toward the hours required for either the President's or the Dean's Honor List.
11. A verified learning-disabled student may take on a Pass-Fail basis an elective or required course which is not in the major if the academic advisory plan so recommends the Pass-Fail option for that course. A student who desires use of this option must apply to the dean of the college at the beginning of the semester. With the approval of the academic dean, learning-disabled students may meet specific degree requirements with a satisfactory grade.

Spring 2020 Undergraduate Pass-Fail Grading
Approved by the UofSC Faculty Senate on April 1, 2020

- To address complications presented by the COVID-19 pandemic, the Faculty Senate Steering Committee approved the following grading accommodations for undergraduate students enrolled in Spring 2020.
- All courses will be graded as originally planned according to grading criteria in course syllabi. After grades are submitted at the end of the semester, undergraduates can choose, on a course-by-course basis, to request a pass/fail grade for the Spring 2020 semester with the exception of Graduate or professional school courses, which can be taken as pass/fail only when deemed appropriate by the program or school dean.
- The following pass/fail scale will be used: Earned grades of A, B+, B, C+, and C will be replaced with S+, earned grades of D+ and D will be replaced with S, and an earned grade of F will be replaced with U.
- If students select the S+/S/U grading scale for a course, points will not be factored into the GPA. Courses with S+ and S will count towards earned semester hours.
- Courses graded with the S+/S/U scale, under this exception for Spring 2020, will count towards applicable curricular, major, continuation, and graduation requirements. For example, if a course requires a C or better in a prerequisite, students selecting this alternative grading scale would need an S+ in the prerequisite course.
- Faculty members will not be aware of students who select the pass/fail grading option when entering final grades. Grades will be entered in the format for which the course was approved.
- Students who previously decided to take a course on a pass/fail basis will continue on a pass/fail basis using the University’s established S/U system (e.g., S is earned if the grade is D or above and U is earned for grades below D).
- For the Spring 2020 semester, undergraduate students who choose to replace a course letter grade with the S+/S/U option must do so no later than July 1, 2020.
- This process will occur through the Office of the University Registrar. A form will be available on the University Registrar website for the
UofSC will include a transcript note on all academic records, regardless of grading basis, indicating the extraordinary circumstances of the global public health emergency during Spring 2020.

- Because some graduate and professional programs require letter grades to be reflected on transcripts, when necessary, students will be able to request an official letter attesting to the letter grade earned in any courses that were converted to S+/S/U. This letter would attest only to grades, not to GPA. We will ensure that those who need evidence of your academic achievements this spring will be able to get it. A form will be available on the University's website for students to request these letters.

- Students will be allowed to retake undergraduate courses in which they earned an S+, S, or U during Spring 2020. Any undergraduate courses retaken under this provision will not count towards the number of courses currently allowed by the current course grade forgiveness policy. In addition, students who were retaking a class for grade forgiveness in Spring 2020 can retake the class another semester, without penalty.

**Grade Point Average**

The grade point average is computed on the basis of all semester hours attempted for credit, except for credit hours carried under the Pass-Fail or audit options. Courses in which a grade of S, U, AUD, T, or W was earned are not considered in computing the GPA.

The grade points earned in any course carried with a passing grade (A, B+, B, C+, C, D+, D) are computed by multiplying the number of semester hour credits assigned to the course by a factor determined by the grade. For courses in which the grade of A was earned, the factor is 4; for B+, 3.5; for B, 3; for C+, 2.5; for C, 2; for D+, 1.5; for D, 1. The grade point average is determined by dividing the total number of semester grade points earned by the total number of semester hours attempted for credit (excluding hours carried on a Pass-Fail or audit basis). No grade points are assigned to the symbols F, S, U, WF, W, I, AUD, T, or NR.

**Course Grade Forgiveness**

It is the policy of the University of South Carolina that every currently enrolled, fully admitted, degree-seeking undergraduate earning a D+, D, F, or WF in a University course may take up to two undergraduate courses for a second time for the purpose of grade forgiveness. Both the first and second grades shall appear on the University permanent record, but only the second grade will be used in computing the University of South Carolina cumulative grade point average. An explanatory notice will appear on the record. Once grade forgiveness is applied to a repeated course, the action may not be revoked.

An eligible student wishing to apply the course grade forgiveness policy to a course enrollment may do so at any time during his/her undergraduate enrollment, but no applications will be honored after the degree is awarded. Grade forgiveness can only be applied once per course for a maximum of two courses (not to exceed 8 credits) on a student’s undergraduate academic record, without regard to the number of degrees sought. Under the grade forgiveness policy, the forgiven and repeated class must be taken at the University of South Carolina-Columbia campus or a Regional campus. Courses transferred from other institutions are excluded from this policy.

This policy does not preclude students from repeating classes multiple times, in accordance with program requirements, but only the second attempt at the class may forgive the original grade of D+, D, F, or WF. Only a regular letter grade can replace a forgiven grade. Grades of W, I, S, U, or AUDIT may not replace previous grades. Grades carrying an honor code violation sanction of X are not eligible for grade forgiveness.

Established requirements for repeating classes, admission to, or progression in, specific academic programs of the University take precedence over the grade forgiveness policy. Program or progression grade point averages are not affected by this policy. Refer to the guidelines for each program for specific requirements. Courses intended to be repeated for additional credit, such as research or applied music, are not eligible for grade forgiveness. Semester honors (Dean’s or president’s honor list), or academic standing (scholastic deficiency, probation, suspension), or previous grade point totals will not change retroactively as a result of applying this policy.

Students who have been granted academic forgiveness to reset the grade point average after readmission are not eligible for course grade forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

An eligible student wishing to apply the grade forgiveness policy (http://www.sc.edu/about/offices_and_divisions/registrar/transcripts_and_records/grade_forgiveness/) may begin the process by reading the criteria which must be met and completing the necessary documentation in order to apply grade forgiveness.

Note that Academic Forgiveness is not the same as Grade Forgiveness. Please refer to the bulletin entry titled Academic Forgiveness for Former UofSC Students with Less Than a 2.00 Cumulative GPA.

**Grade Reports**

Students’ grades are reported on Self Service Carolina. Students can also access grade reports in person at the Office of the University Registrar.

**Grade Change Policy**

Grade changes based on transcription or computation errors shall be reported directly to the Office of the University Registrar on the appropriate grade change form signed by the instructor and the head of the student’s academic unit. Any request for a grade change must be submitted by the instructor no later than one calendar year from the date on which the grade was reported. Beyond this period, grade changes will be considered only in exceptional circumstances and must be handled through the petition procedure of the student’s college. Any other grade change request resulting from enrollment discrepancies, medical withdrawals, or perceived administrative errors (changes to W, WF, audit, credit, S/U, or to I) must be submitted on the appropriate forms with signatures and documentation to the dean of the student’s college for review through the petition procedure. This does not apply to the routine makeup and extension of an I (incomplete) and posting of a permanent grade to replace the recorded NR mark. An I turns into a grade of F after one year; an NR turns into a grade of F after one semester. Special makeup work or examinations to change grades already recorded are not permitted.

**Academic Standards Policies**

**Academic Standards**

The following standards for continuing at the Columbia and regional campuses of the University of South Carolina apply to all undergraduate students who first enroll at the Columbia and regional campuses of the University in the fall 2008 semester or thereafter, are admitted to the Columbia and regional campuses of the University in an undergraduate...
degree program in the fall 2008 or thereafter, or are enrolled in the fall 2010 semester or thereafter, regardless of when first enrolled at the University. Administration of these regulations is the responsibility of the academic deans, who are not empowered to waive any of the provisions.

**Academic Review**

The record of every undergraduate student will be reviewed at the end of each fall and spring semester. Many of the individual colleges of the University have higher academic requirements for students to continue in their degree programs. However, no student will be suspended academically from the University unless he/she fails to meet the standards specified here.

**Academic Standing**

A student’s academic standing is based on his/her “Total Institutional GPA” and “Total Institutional GPA Hours” which can be viewed in Self Service Carolina at the end of a student’s “Unofficial Academic Transcript” under the heading, “Transcript Totals (Undergraduate).”

**Academic Probation**

When a student’s Total Institutional GPA at the end of any semester is less than a 2.00, he or she is placed on academic probation.

**First-year Freshmen Academic Recovery Program**

First-year freshmen who have less than a 2.00 Total Institutional GPA at the end of their first semester of collegiate enrollment are considered at risk. During the first six weeks of their second semester, these students must participate in an academic coaching session before being eligible to register for courses for the third semester. These sessions will provide students with assistance in academic planning, general advisement, major exploration, degree audit, self-assessments, and success strategies. This requirement is in addition to any made by the student’s college, school, or academic program.

**Removal from Academic Probation**

When a student’s Total Institutional GPA at the end of any semester is a 2.00 or above, he or she is not on academic probation.

**Continuing on Academic Probation**

Any student who is on probation at the beginning of a fall or spring semester must achieve a certain Total Institutional GPA at the end of that semester in order to avoid suspension. A student may also continue on probation and avoid suspension if the semester grade point average is 2.50 or greater. Standards for continuing on probation are based on the cumulative grade hours the student has attempted at UofSC. The chart below shows the grade point averages required in order to avoid suspension.

**Prohibition Chart**

<table>
<thead>
<tr>
<th>Total Institutional GPA Hours</th>
<th>Placed on Probation</th>
<th>Continue on Probation (avoid suspension)</th>
<th>Removed from Probation</th>
</tr>
</thead>
<tbody>
<tr>
<td>12-35</td>
<td>below 2.00 Total Institutional GPA</td>
<td>1.500 or higher Total Institutional GPA</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
<tr>
<td>36-71</td>
<td>below 2.00 Total Institutional GPA</td>
<td>1.800 or higher Total Institutional GPA</td>
<td>2.00 or higher Total Institutional GPA</td>
</tr>
</tbody>
</table>

**Semester Reprieve**: Regardless of the Total Institutional GPA, a student may continue on probation and avoid suspension if the Current Term grade point average is 2.50 or greater.

**First Suspension**

Students unable to meet the standards shown above are suspended from the University of South Carolina for one fall or spring semester and the contiguous summer (approximately eight months). Students have the right to appeal their suspension to the petitions committee of the college or school in which they were enrolled when suspended.

**Returning After First Suspension**

After the suspension has been served, a student will be considered for readmission by the college or school to which the student is seeking admission. A student readmitted following suspension continues on probation and is reviewed for suspension at the end of each fall and spring semester. A Current Term grade point average of 2.50 or higher must be achieved each semester until the Total Institutional GPA reaches the level above which suspension would occur (see chart).

During the first six weeks after returning from a first suspension, students must participate in an academic coaching session before being eligible to register for courses for the following semester. These sessions will provide students with the resources they need to meet their academic goals.

**Returning after Subsequent Suspension**

The duration of the second suspension is indefinite, and the student can be considered for readmission only after being approved for reinstatement by action of the petitions committee of the college or school to which the student is seeking admission. A favorable decision by the committee is unlikely within two years of the suspension.

**Earning Academic Credit While on Suspension**

A student on suspension is given an opportunity to reorder priorities and reassess his or her situation before returning. While serving suspension, a student may not be admitted to, or continue in, any academic program of the University. Credit earned at any other institution while a student is on suspension from the University may not be applied toward a degree from UofSC, unless approved by the Standards and Petitions Committee of the college to which the student is readmitted. Prior approvals for transient study will be revoked for suspended students.

**Retention in Degree Programs**

Students are reminded that the above regulations are for all undergraduate students in the University. Many colleges and schools offer degree programs that have more stringent requirements for retention in those programs. Failure to meet the academic requirements of those degree programs may result in the student being asked to leave that program. Students should consult the colleges and schools section of the Academic Bulletin to review the specific degree retention requirements.

**Academic Progression and Program Dismissal**

Students dismissed from a program for failing to meet academic progression requirements will be reassigned to Undergraduate Studies and will be advised by the University Advising Center. Students assigned
to Undergraduate Studies will have a maximum of two semesters before declaring a new program of study. At the conclusion of two semesters enrolled at full-time status, students who have not declared a major/program within a degree-granting college will have a registration hold placed and will be unable to enroll in coursework.

Petition Procedures
In addition to previously specified provisions by which a student may petition to waive the application of this suspension policy, a student suspended by this policy has the right to petition to the appropriate college scholastic standards and petitions committee to waive the application of the suspension rule at any time. Students placed on first suspension who wish to petition for a waiver of the suspension rule may petition only the committee of the college in which they were enrolled at the time of suspension.

Academic Forgiveness Policy

Academic Forgiveness for Former UofSC Students with Less than a 2.00 Cumulative GPA
Under certain conditions undergraduate students may apply for academic forgiveness. Academic forgiveness allows for a recalculation of the GPA to permit a student to graduate or pursue a specific academic program. In order to apply for academic forgiveness all of the following conditions must be met:

1. The student has not been enrolled at any campus of the University of South Carolina for at least 48 months.
2. The student must have been readmitted to a degree program at the University of South Carolina and must have completed at least 24 hours of approved graded course work prior to applying for academic forgiveness.
3. After readmission the student must have earned a cumulative GPA of at least 2.00 and met the progression requirements of the degree program.
4. The student must never before have been granted academic forgiveness.

A student who has met these conditions and desires academic forgiveness must submit a written request for academic forgiveness to the dean of the college in which the student is enrolled. After verification of the student’s eligibility, the dean shall inform the registrar that the student was granted academic forgiveness under the University of South Carolina Academic Forgiveness Program.

The GPA has been recalculated under the criteria of this program to allow for eligibility for graduation.

6. The permanent academic record will remain an unmodified record of all work attempted at the University of South Carolina.

Academic Honors Policies

Honor Lists
Each semester academic achievement is recognized by entering on the President’s Honor List or the Dean’s Honor List the names of students who, at the end of the previous semester, attained the following standards:

President’s Honor List: a grade point average of 4.00 earned on a minimum of 12 credited semester hours.

Dean’s Honor List: a grade point average of 3.50 or higher earned on a minimum of 12 credited semester hours.

No course carried on a Pass-Fail basis, by examination, correspondence, or exemption will be counted toward the 12 hours required for either the President’s or Dean’s Honor List

Graduation with Honors
Graduation with honors will be based on a student’s Total Institutional GPA. Honors designators are determined at the time of graduation and may not be applied retroactively.

To graduate with such honors, a student must have earned at least 60 credit hours applicable toward the degree in residence at the University, 30 credit hours for an associate degree.

The following designations indicate a consistently high level of academic achievement at UofSC:

Baccalaureate Degree Designations

- Summa Cum Laude: a cumulative GPA of 3.95-4.00
- Magna Cum Laude: a cumulative GPA of 3.75-3.949
- Cum Laude: a cumulative GPA of 3.50-3.749

Associate Degree Designations

- Highest Honors: a cumulative GPA of 3.95-4.00
- High Honors: a cumulative GPA of 3.75-3.949
- Honors: a cumulative GPA of 3.50-3.749

With Honors from South Carolina Honors College: Any student who completes the requirements of the Honors College, regardless of the major or undergraduate degree, is awarded that degree “With Honors from South Carolina Honors College.”

With Distinction: Any student who earns an undergraduate degree and completes the appropriate requirements will be awarded graduation “With Distinction in [that major].” For details, refer to the degree requirements of specific majors

With Leadership Distinction: Any undergraduate student who completes Leadership Distinction requirements in community service, diversity and social advocacy, global learning, professional and civic engagement, and/or research as specified by the Provost’s Office, regardless of the major or undergraduate degree, is awarded that degree “With Leadership Distinction.”
Distinction in [that track]. For further details, contact the Office of USC Connect.

Degree Conferral and Graduation Policies

In-residence Requirement

The last 25% of a student’s degree must be completed in residence at the University, and at least half of the hours in the student’s major courses and in the student’s minor courses (if applicable) must be taken at the University.

The chart below shows the minimum number of hours required to be completed in residence based on to the total number of hours required for a degree.

In-residence Chart

</tbody>
</table>

Some programs impose greater student residence and/or major requirements.

Regardless of when students enter the University, they must complete the last 25% of the degree before graduation enrolled in classes approved by the appropriate dean of the college, school, or campus from which the degree will be granted. In addition, all degree applicants are urged to confer with the deans of their respective colleges about their programs and degree requirements prior to the beginning of their last semester of residence at the University.

“In residence” means that the student was regularly enrolled at UofSC; completed courses offered by Columbia or one of the other campuses of the University; was a member of a class which was supervised by a regular faculty member of USC; attended classes on a regular, pre-established schedule; and in other ways conformed to the requirements which are normally connoted by the term “in residence.” In-residence requirements may not be met by courses for which credit is earned by exemption or exam, courses taken by correspondence, or courses for which transfer credit was awarded. Courses taken under the Pass-Fail option meet in-residence requirements. If the student has not established credit for the prescribed number of hours in residence, then the student is not eligible either for graduation with honors or for graduation on the basis of having completed 25% of the degree during the final semesters at the University.

Application Process

All candidates for degrees and certificates must file formal applications during the last academic term before graduation with the deans of their respective colleges on forms obtained at the Office of the University Registrar or the appropriate dean’s office. Applications must be filed by the third week of the fall or spring semester in which the degree is to be awarded or within the first 10 days of the first summer session. If the student is not enrolled during the first summer session, the application must be filed within the first week of the second summer session for the student to graduate at the summer commencement.

Graduation Requirements

In order to be eligible for graduation, students must meet all course requirements, be in good academic standing, meet any departmental or program requirements, and have a cumulative GPA of at least 2.00 on all work attempted at USC.

Second Baccalaureate Degree

At times the University confers a second baccalaureate degree upon candidates who have completed requirements for the second degree.

The following specifications for a second baccalaureate degree apply:

1. The student must meet admission and progression requirements for the second degree, and must have received formal approval to pursue the second degree from both deans.
2. All requirements for the second degree must be fulfilled.
3. The additional requirements for the second degree must include a minimum of 24 semester hours beyond those required for the first degree.
4. No course that satisfies a general education, major, minor, cognate, or requirement other than a free elective for the first degree may be applied to the major field of the second degree.
5. The student must file a separate degree application for the second degree with the appropriate college or school.

Under this policy a student may apply for two degrees at one time or separately. In either case, the student receives two diplomas. It should be noted that a second major does not by itself lead to the conferral of a second degree.

Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

Second Major

In some degree programs, a student may elect a second major. Normally, second majors are possible only in degree programs with similar general education requirements. The second major option is not available in all colleges.

1. The student must meet admission and progression requirements for the second major.
2. The student must have received approval from both deans for a second major.
3. All requirements for the second major must be fulfilled.
4. All general education and special departmental requirements normally associated with the second major must be fulfilled.
5. In cases where the first major and the second major lead to different degrees, the student must designate one as the official degree of record. A second major eliminates the cognate requirement; however, special departmental requirements normally completed as part of the cognate are not waived.

Fulfillment of the requirements for a second major are indicated on the student’s official transcript upon graduation. No notation for a second major is placed on the official transcript for course work completed after graduation.
Students who submit two degree applications for the same degree in the same college for a double major will receive one diploma.

Indebtedness
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

Records, Transcript, and Enrollment Certification Policies

Change of Name or Address
It is the obligation of every student to notify the Office of the University Registrar of any change in name or address (including electronic address). Failure to do so can cause serious delay in the handling of student records and in notification of emergencies. Change of name may only be accomplished by presenting proper legal documentation.

Transcripts
A transcript of a student’s record carries the following information: current status; a detailed statement of the scholastic record showing courses pursued with semester hours carried, semester hours earned, grades, grade points, grade point average, and system of grading; a permanent record of all failures, incomplete grades, and penalties (such as suspension); cumulative USC grade totals; and references to other college or universities attended, dates attended, and the total transfer credits accepted by the University of South Carolina.

Any student who needs a transcript or a certified copy of the end-of-semester grade report may complete a Transcript Request form or send a signed and dated letter containing all pertinent identifying information to the Office of the University Registrar. Official transcripts may also be requested online through Self Service Carolina (http://my.sc.edu). With the exception of copies made for internal use, no copy of a student’s permanent record (transcript) will be released to anyone without the student’s written consent. In addition to the written consent, each transcript request should include full name or names used, student number, current mailing address, dates of attendance, location of attendance, and date of birth to assure proper identification of the record requested.

No transcript will be issued to a student who is indebted to the University.

No partial transcript will be issued.

The nonrefundable transcript processing fee is $12.

Enrollment Certification
Certification of enrollment is based upon the total number of credit hours for which a student is registered at the time of the certification request. Beginning and ending dates reported in enrollment certification conform to the official USC academic calendar dates for the term requested.

Indebtedness
It is expected that students will discharge any indebtedness to the University as quickly as possible. No diploma, certificate, enrollment verification, or transcript will be issued to or for students who have not made satisfactory settlement with the Office of Financial Services for all of their indebtedness to the University.

Notification of Student Rights under FERPA
The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access.

A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the University discloses personally identifiable information from the student’s education records, except to the extent that FERPA authorizes disclosure without consent. The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

- The University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position; a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, service provider or collection agent); a person serving on the Board of Trustees; or a student serving on an
official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

- A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.
- To officials of other institutions in which the student seeks or intends to enroll provided that the student had previously requested a release of his/her record;
- To authorized representatives of the U.S. Department of Education, U.S. Department of Defense (Solomon Amendment), U.S. Attorney General, the Comptroller General of the United States, state education authorities, organizations conducting studies for or on behalf of the University, and accrediting organizations; to the Department of Homeland Security (DHS) and its Immigration and Customs Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.
- In connection with a student’s application for, and receipt of, financial aid;
- To comply with a judicial order or lawfully issued subpoena;
- To parents of dependent students as defined by the Internal Revenue Code, Section 152;
- To appropriate parties in a health or safety emergency; or
- To the alleged victim of any crime of violence of the results of any disciplinary proceedings conducted by the University.
- The University may disclose the result of a disciplinary proceeding to a parent or guardian so long as the student is under the age of 21 at the time of the incident and the proceeding has resulted in a violation of University drug or alcohol policies, or any federal, state, or local law.
- To students currently registered in a particular class, the names and email addresses of others on the roster may be disclosed in order to participate in class discussion.

Release of Directory Information

In accordance with section 99.7 of the Family Educational Rights and Privacy Act (FERPA), the University of South Carolina provides students annual notification of their FERPA rights. The University of South Carolina has designated certain items as Directory Information. At the University of South Carolina, these items are as follows:

- Name
- Dates of Attendance
- Campus
- College or School
- Classification
- Primary Program of Study
- Full-time or Part-time Status
- Degree(s) Awarded Including Dates
- Honors and Award Including Dean’s and President’s List
- University Email Address
- City, State, and Zip Code Associated with a Student’s Permanent Address

The University may disclose Directory Information without prior written consent, unless the student has submitted a written request to the Office of the University Registrar not to release Directory Information pertaining to him or her. Students are notified annually, both in the academic bulletins and via email, of their rights under FERPA and are provided with instructions on how to request a “Confidentiality Indicator” on their academic record which prevents the disclosure of Directory Information. A Confidentiality Indicator will be placed on the release of Directory Information filed with the University Registrar, which will remain in effect until the student files a written request to remove it. A request not to disclose Directory Information applies to the entire category of such information and cannot be selective with regard to specific items defined as Directory Information. Similarly, a request not to disclose Directory Information applies to all individuals and cannot be selective with regard to specific individuals or organizations.

The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University of South Carolina to comply with the requirements of FERPA.

Academic Assessment Policy

Assessment, in a university or college setting, can be interpreted to mean several things. Assessment can be the process of evaluating the success of a university in meeting its mission and goals (institutional assessment), or it can be the processes associated with evaluating student outcomes in relation to stated program goals (program assessment), or it can be course-embedded assessment techniques used to deliver information and/or evaluate student learning by observing students’ skills and abilities.

The University of South Carolina is committed to offering programs and activities that encourage students to develop both academically and socially. In order to evaluate the effectiveness of our efforts, faculty, administrators, and staff conduct ongoing assessments. The Office of Institutional Planning and Assessment assists the faculty, administration, and other staff in gathering and analyzing assessment data. Assessment, therefore, is the ongoing process of self-improvement through analyzing and evaluating all of our functions and activities.

Students, faculty, and staff play critical roles in the assessment process. Consequently, participation in assessment activities is a University priority and responsibility. The information gleaned from assessment activities is used for planning and program improvement. Many of the University’s assessment activities are mandated by external agencies. Therefore, all students wishing to receive a degree from the University of South Carolina must complete procedures required for the assessment of general education and those required by their major and/or area of concentration. If a student fails to participate in a required assessment activity, a hold may be placed on the student’s records.

Primary responsibility for the assessment of academic programs within the major or area of concentration is with the faculty of each academic unit. Information pertinent to assessment of the major or area of concentration is provided to students by the department from which the degree will be granted.

Primary responsibility for coordinating the assessment of general education is with the Office of Institutional Assessment and Compliance (http://www.ipr.sc.edu/). The faculty is actively involved in planning assessment and using the results of assessment to evaluate the effectiveness of general education. The assessment of general education is administered through the use of exams, interviews, surveys,
questionnaires, or other instruments as developed by the faculty and Office of Institutional Assessment and Compliance.

The results of any activities used for program or general education assessment may not be used for promotion and/or tenure files or for annual performance evaluations or for the evaluation of any student’s progress in a course or progress toward a degree. Assessment activities, however, are integral to the processes of teaching and learning.

For more information contact the Office of Institutional Assessment and Compliance (http://www.ipr.sc.edu/).

Student Life
Overview
The purpose of the student services program at UofSC Union is to contribute to the total development of the student as an individual. This is accomplished through services and activities designed to supplement students’ academic programs, as well as to assist in their physical, emotional, and social growth.

A student is any person who is admitted, enrolled, or registered for study at the University of South Carolina for any academic period. Persons who are not officially enrolled for a particular term but who have a continuing student relationship with the University of South Carolina are considered students.

An orientation and preregistration program is conducted by the Student Affairs Office each summer for new freshmen and for transfer students. In addition, extended orientation is provided to new students throughout their first year through UNIV 101.

Academic advisement and placement testing are coordinated by the associate dean, with assistance from the Admissions Office. Each student is assigned an academic advisor upon enrolling. Advisors are faculty members and administrators; they help students select courses which satisfy the requirements of their degree programs and empathetically assist students to resolve problems they experience during the course of their academic programs.

The University provides a balanced student-life program, which contributes significantly to students’ educational experiences. Students are encouraged to participate in a variety of extracurricular activities, which are designed to enhance their sense of community responsibility and their capacity for leadership.

Services for Students with Disabilities
Students with disabilities are assisted through the Disability Services Office, with the help of the Columbia Office of Educational Support Services. The professionally trained staff works toward accessibility for all University programs, services, and activities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. Some of the services offered include orientation, priority registration, library access, test proctoring, classroom adaptations, and academic, personal, and vocational counseling.

Student Lounge/Bookstore
A comfortable lounge area is available for students to study, socialize, or eat. The facility includes snack and drink machines, dining tables, cable television, magazines, and sofas and chairs.

Adjacent to the lounge is the campus bookstore. Students may purchase course textbooks, some school supplies, and Carolina clothing and memorabilia. If the bookstore does not have an item, the staff will try to obtain it from another bookstore. Book buy-back is normally held at the end of each semester.

Student Identification Cards
UofSC Union students receive picture ID cards. The cards are made during registration periods and must be used for voting, admission to campus events, access to the library, and other programs. Students who lose their ID cards may lose some student privileges until a replacement is obtained. A fee is charged for replacement cards. Cards are revalidated each semester.

Student Organizations
Since it recognizes that extracurricular activities form an important part of the overall educational experience of students at the University, UofSC Union promotes and regulates the activities of student organizations. The institution provides the use of its name and physical facilities, contributes faculty time for advice and counsel, and encourages development of student government and organization.

A student organization is defined as any group or organization that admits UofSC Union students to its membership, whose program or activities affect student welfare, and that uses campus facilities in the operation of its program.

Student Government Association
The Student Government Association (SGA) is composed of all registered undergraduate students of the University of South Carolina Union. Upon payment of semester fees, students are automatically considered members of this organization. Student Government Association senators are elected by the student body and the president and vice-president are elected by the senators. The officers and senators comprise the governing council of the SGA.

The purpose of the SGA is to represent the student body both academically and socially. The SGA schedules and directs a wide variety of activities.

Clubs and Extracurricular Activities
Contact the Student Affairs Office to join or start a new club. Your active participation in the clubs and other organizations at UofSC Union will greatly

Campus Security
UofSC Union is committed to providing a safe environment in which students and faculty can interact and learn. The director of Health/Safety and Security, answering directly to the dean, is responsible for maintaining safety and security. Any emergency, crime, accident, or other disturbance should be reported directly to the Office of the Dean or to any other available campus official. After regular office hours, this report can be made to the library or to appropriate officials using the emergency telephone numbers posted on all major entrances to campus buildings. The dean or other designated official will then evaluate the situation and notify the city police or other emergency personnel as appropriate.

The maintenance and custodial personnel work on rotating shifts, providing security for the campus from 7 a.m. to 10 p.m. daily and are on call and make routine checks on the weekends. Local law enforcement officers are used during special events for further security when necessary. The security team also has an employee on campus until closing and all events that occur on the UofSC Union campus.
UofSC Union requires that all faculty, staff, and students have photo IDs when on campus. These IDs are checked when necessary by campus personnel or by city police to be sure that authorized personnel are using campus facilities. Faculty, staff, and students are also required to have vehicles registered and parking decals in place when on campus. Parking lots are regularly monitored for security purposes.

UofSC Union does not authorize off-campus activities by student organizations. All campus activities are supervised and monitored by campus officials, and local law enforcement is used for certain campus activities.

UofSC Union has established specific procedures to prevent sex offenses and to follow-up when any sex offense has occurred. The campus provides information on rape, date rape, and other sex offenses through the use of special programs, University 101 classes, and literature that is available to all students. In the event of a sexual assault on campus, those involved should inform the dean or security office. The victim will be assisted in reporting the incident to local law enforcement officials, will be required to preserve all evidence as proof of a criminal assault, and will be aided in further handling the situation in accordance with the disciplinary procedures published elsewhere in this bulletin. The victim will also be informed of opportunities for counseling and other services, both on campus and elsewhere in the community, and will be further informed of available options for changing academic and living situations after an alleged sexual assault if requested.

**Student Rights and Freedoms**

**Preamble**

Academic institutions exist for the transmission of knowledge, and the pursuit of truth, the development of students, and the general well-being of society. Free inquiry and free expression are indispensable to the attainment of these goals. As members of the academic community, students should be encouraged to develop the capacity for critical judgment and to engage in a sustained and independent search of truth.

Freedom to teach and freedom to learn are inseparable facets of academic freedom. The freedom to learn depends upon appropriate opportunities and conditions in the classroom, on the campus and in the larger community. Students should exercise their freedom with responsibility.

This responsibility to secure and to respect general conditions conducive to the freedom to learn is shared by all members of the academic community. The University has a duty to develop policies, and procedures should be developed within the framework of general standards with the broadest possible participation of the members of the academic community. The purpose of this statement is to enumerate the essential provisions for student freedom to learn.

**Section I-Freedom of Access to Higher Education**

Under no circumstances should a student be barred from admission on the basis of race, creed, or natural origin. Thus, within the limits of its facilities, the University should be open to all students who are qualified according to its admission standards.

**Section II-In the Classroom**

The professor in the classroom and in conference should encourage free discussion, inquiry, and expression. Student performance should be evaluated solely on an academic basis.

Students should be free to take reasoned exceptions to the data or views offered in any course of study and to reserve judgment about matters of opinion, but they are responsible for learning the content of any course of study in which they are enrolled.

Students should have protection through orderly procedures against prejudiced or capricious academic evaluation. At the same time, they are responsible for maintaining standards of academic performance established for each course in which they are enrolled.

Information about views, beliefs, and political associations which professors acquire in the course of their work as instructors, advisors, and counselors should be considered confidential.

**Section III-Student Records**

To minimize the risk of improper disclosure, academic and disciplinary records should be separate. Final transcripts or academic records should contain only information about academic status. Information from disciplinary files should not be available to any unauthorized persons. No permanent records should be kept which reflect the political activities or beliefs of students. Authorized counselors should not, without the consent of the student, disclose any information obtained while counseling any student unless failure to disclose the information may result in physical or emotional harm to the student or others.

**Section IV-Student Affairs**

In student affairs certain standards must be maintained if the academic freedom of students is to be preserved.

Students bring to the campus a variety of interests previously acquired and develop many new interests as members of the academic community. They should be free to organize and join associations to promote their common interests. Campus organizations, including those affiliated with an extramural organization, should be open to all students without respect to race, creed, or national origin.

Students and student organizations should be free to examine and to discuss all questions of interest to them and to express opinions publicly and privately. At the same time, it should be made clear that in their public expressions or demonstrations, students or organizations speak only for themselves. Students should be allowed to invite and to hear any person of their own choosing, subject to those routine procedures provided for off-campus speakers.

As constituents of the academic community, students should be free, individually and collectively, to express their views on issues of general interest to the student body. The student body should have clearly defined means to participate in the formulation and application of institutional policy affecting academic and student affairs.

Student publications and the student press are a valuable aid in establishing and maintaining an atmosphere of free and responsible discussion and of intellectual exploration on the campus. Institutional authorities have a responsibility to provide written clarification of the role of the student publications, of the standards to be used in their evaluation, and the limitations on external control of their operation. At the same time, the editorial freedom of student editors entails corollary responsibilities to be governed by the canons of responsible journalism.

**Section V-Off-Campus Freedom of Students**

University students are both citizens and members of the academic community. As citizens, students should enjoy the same freedom of speech, peaceful assembly, and right of petition that other citizens enjoy.
and, as members of the academic community, they are subject to the obligations which accrue to them by virtue of this membership. Faculty members and administrative officials should ensure that institutional powers are not employed to inhibit such intellectual and personal development of students as is often promoted by their exercise of the rights of citizenship both on and off campus.

Code of Student Conduct

Students should be aware that educational institutions are not sanctuaries from the reach of the civil and criminal laws of the communities and states wherein such institutions exist. Students who commit offenses against the laws of municipalities, states, or the United States are subject to prosecution by those authorities as well as liable for disciplinary action under University rules when their conduct violates institutional standards.

The University has an obligation to clarify those standards of behavior which it considers essential to its educational mission and its community life. These general behavioral expectations and the resultant specific regulations should represent a reasonable guide for student conduct, but the student should be free as possible from imposed limitations that have no direct relevance to his or her education.

Students are expected to abide by the following conduct regulations, and administration and faculty are required to enforce them.

General Conduct Regulations

Damage to Property
Acts of vandalism, such as damage to or destruction of property owned by the University or its members, are prohibited.

Firearms and Other Deadly Weapons
The unauthorized possession or use, in any way, of firearms or weapons of any kind, such as dirks, slingshots, metal knuckles, razors, or any other deadly weapon, is prohibited.

Flammable Materials and Fireworks
The possession, ignition, or detonation of any object or article which could cause damage by fire or other means to person or property is prohibited.

Arson
No person shall start a fire or be in any way responsible for starting a fire on University property.

False Fire Alarms and Misuse of Fire Equipment
No person shall make, or cause to be made, a false alarm. No person shall tamper with fire safety equipment.

Theft or Misappropriation
Theft of any kind, including seizing, receiving, or concealing property with the knowledge that it has been stolen, is forbidden.

Disorderly Conduct
Individual or group behavior which unnecessarily disturbs individuals or groups is prohibited. Such conduct includes physical assault or threat of assault and boisterous conduct which is unreasonable for the area in which it occurs.

Sale of Textbooks
The sale by any student of a textbook that does not belong to that student is prohibited.

Forgery
Forgery and the alteration or misuse of university documents or records is forbidden.

Keys
No one may use or have in possession any University key without proper authorization.

Misuse of Telephone
No student shall make or assist in making annoying telephone calls.

Cell Phones
Cell phones are to be turned off and out of sight in the classroom.

Disruption of Normal Activity
No one may interfere with or disrupt the normal activity and operations of students, faculty, administration, or staff of this institution or its buildings or facilities.

Drugs
Possession, except on a physician’s or dentist's prescription, of stimulant, depressant, narcotic, or hallucinogenic drugs and other agents having potential for abuse violates University rules and is prohibited.

Alcoholic Beverages
Consumption of alcoholic beverages on campus is prohibited.

Attendance and Tardiness
Regardless of the UofSC or classroom attendance policies, when a student is to arrive on time and stay for the duration of the class.

Academic Conduct Regulations

Infractions of academic discipline include, but are not limited to:

Cheating
This refers to conduct during quizzes and examinations, which shall include using electronic, oral, or written information not specifically permitted by the instructor. It shall also include receiving or using electronic, oral, or written information from any person other than the instructor. It shall further include stealing, buying, selling, or using any copy of an examination before it has been administered.

Plagiarism
This refers to submitting, as a student's own work, material obtained from another source without indicating the source from which it was obtained. It further includes letting another person compose or rewrite a student's assignment.

A student who assists in the forms of dishonesty mentioned above shall be considered equally as guilty as the student who cheated or plagiarized.

Student Responsibility

Each student is responsible for abiding by the Code of Student Conduct at all times. The Code of Student Conduct applies inside and outside the classroom whether a faculty member is present or not.

Faculty Responsibility

Each faculty member also has responsibilities with respect to the Code of Student Conduct. These responsibilities include, but are not limited to, the promotion of conduct conducive to the effective functioning of the Code, a clear exposition to students of the values as well as the obligations of the Code, a demonstration of the faculty member's own
interest in the proper functioning of the Code, and the use of uniform procedures in handling violations of the Code.

Carolinian Creed
The community of scholars at the University of South Carolina is dedicated to personal and academic excellence.

Choosing to join the community obligates each member to a code of civilized behavior.

As a Carolinian...
I will practice personal and academic integrity;
I will respect the dignity of all persons;
I will respect the rights and property of others;
I will discourage bigotry, while striving to learn from differences in people, ideas and opinions;
I will demonstrate concern for others, their feelings, and their need for conditions which support their work and development.

Allegiance to these ideals requires each Carolinian to refrain from and discourage behaviors which threaten the freedom and respect every individual deserves.

Penalties
Students should be aware of the range of penalties which may be assessed for infraction of rules and regulations. All penalties may be imposed either singly or in combination.

Permanent Suspension
Dismissal from the University without leave to reapply for admittance.

Suspension for a Period of Time
Denial of enrollment, attendance, and other privileges at the University for a given period; leave to reapply for admission at termination of the period may be granted with or without qualifications.

Suspension Held in Abeyance
A probationary sentence in which a student is allowed to continue to be enrolled for a period; continuance as a student is conditional on good citizenship for the period, and any serious violation of rules, regulations, or laws results in suspension for a period of time.

Probation
A period during which a student is under an official warning that his or her conduct is in violation of University rules, regulations, or policies.

Restriction
Limitations upon a student's privileges for a period of time.

Reprimand
An official rebuke making misconduct a matter of record in University files for a period of time which may extend throughout a student's enrollment for a degree.

Procedural Standards in Disciplinary Proceedings
It is UofSC-Union policy that disruptive behavior will not be tolerated in the classroom or other Campus areas. Such behavior may result in removal from the classroom or the premises by Security or other Staff or by the Police, depending on the severity of the incident. If a student is asked to leave or forcibly removed from class or campus, the student will not be allowed to return without permission from the Dean or the Dean's Designee.

The formality of the procedure to which a student is entitled in disciplinary cases should be proportionate to the gravity of the offense and the sanctions which may be imposed. Matters involving minor infractions of the Code of Student Conduct where suspension is not contemplated may be handled by the administration in an informal manner. Where misconduct may result in suspension, the student has the right to a hearing before an appropriate disciplinary panel. Pending action on the charges, the status of the student should not be altered, or his or her right to be present on the campus and to attend classes suspended except where the administration determines such action is necessary.

Students detected or arrested for allegedly committing violations of the Code of Student Conduct, or infractions of statutory law, should be informed of their University rights. No form of harassment should be used by University representatives to coerce the admission of guilt.

Where a breach of the General Conduct Regulations may result in suspension, the student has the right to a hearing before a Judicial Board comprised of the Associate/Academic Dean, and two members of the Faculty Organization. The respective Dean will serve as chair. The Associate/Academic Dean will designate a chair in the event of his or her absence. The faculty members are elected each year by the Faculty Organization.

Where a breach of the Academic Conduct Regulations may result in suspension, the student has the right to a hearing before the Student Affairs Committee comprised of both faculty members and student members. The faculty members are elected each year by the Faculty Organization.

In either case, the hearing is to be regulated by the following procedures.

1. the student should be informed, in writing, of the reasons for the proposed disciplinary action with sufficient particularity and in sufficient time to ensure opportunity to prepare for the hearing. Also, he or she should be informed of the time and place of the hearing;
2. the student appearing before the committee should have the right to be assisted in his or her defense by an advisor of his or her choice, subject to the proposed advisor's consent. The advisor must be a fellow student, or member of the staff or faculty.
3. the burden of proof should rest upon the officials bringing the charge;
4. the student should be given the opportunity to testify and to present evidence and witnesses. The student should have an opportunity to hear and question adverse witnesses. In no case should the committee consider statements against the student unless he or she has been given an opportunity to refute unfavorable conclusions which might otherwise be drawn;
5. all matter upon which the decision may be based must be introduced into evidence at the proceeding before the committee. The decision should be based solely upon such matter. Improperly acquired evidence should not be admitted;
6. there should be, where possible, a verbatim record, such as a tape recording, of the hearing. All proceedings will be confidential.

Appeals
Decisions finding a student responsible for violation of the Code of Student Conduct are final, subject to the student's right to appeal. Appeals must be submitted in writing to the appropriate disciplinary
panel. It can be noted that appealing any such decision is distinct from filing a grievance against University personnel.

A formal appeal of decisions made in an informal manner by the administration regarding minor infractions may be made to the appropriate disciplinary panel.

Decisions by the Judicial Board may be appealed to the Dean of the University. The Dean of the University may either:

1. affirm the original findings of the Judicial Board;
2. remand the case to the Judicial Board for further proceedings-for example, to attend to procedural errors or new evidence.

In extraordinary circumstances, the Dean of the University may direct a new hearing with a new disciplinary panel. The Academic Affairs Committee shall serve as the new hearing committee. If a student wishes to appeal the decision of the Judicial Board after re-visititation, an appeal once again can be made to the Dean of the University at which time he / she either affirms, amends, or vacates the decision of the disciplinary panels.

Decisions by the Student Affairs Committee may be appealed to the Associate/Academic Dean. Upon appeal, the Associate/Academic Dean may either:

1. affirm the original findings of the Student Affairs Committee;
2. remand the case to the Student Affairs Committee for further proceedings-for example, to attend to procedural errors or new evidence.

In extraordinary circumstances, the Associate/Academic Dean may direct a new hearing with a new disciplinary panel. The Academic Affairs Committee shall serve as the new hearing committee. If a student wishes to appeal the decision of the Student Affairs Committee and affirmed by the Associate/Academic Dean, or to appeal the decision of the Student Affairs Committee after re-visititation, an appeal can be made to the Dean of the University at which time he / she either affirms, amends, or vacates the decision of the disciplinary panels.

In all appellate cases, the decision of the Dean of the University is final, with no further appeal available at the local campus level. Any further appeal must be made to the Vice Provost and Executive Dean for Extended University in Columbia.

Grievance Policy

Preface

The University of South Carolina Union is committed to a policy of treating all members of the University community fairly in regard to their personal and professional concerns. In order to ensure that students know what to do when they need to resolve a problem, this procedure is provided.

Purpose

The primary objective of the grievance procedure is to ensure that concerns are promptly dealt with and resolutions reached in a fair and just manner. It is essential that each student be given an adequate opportunity to bring complaints and problems to the University administration with assurance that each will be given fair treatment.

Definition

A grievance is defined as dissatisfaction occurring when a student thinks that any condition affecting him or her is unjust, inequitable, or creates unnecessary hardship. Such grievances include, but are not limited to, the following problems: mistreatment by any UofSC Union employee, wrongful assessment and processing of fees, records and registration errors, racial discrimination, sex discrimination, and handicapped discrimination, as they relate to nonacademic areas in the University.

One exception to this definition of grievance is that the procedures herein shall not extend to matters of grading student work where the substance of a complaint is simply the student’s disagreement with the mark or grade placed on the work. Such matters shall be discussed by the student and the teacher; final authority shall remain with the teacher.

Procedure

Initiating a grievance. The initial phase of the student grievance procedure requires an oral discussion between the student and the person(s) alleged to have caused the grievance. This discussion must take place within 10 working days of the incident which constituted the grievance.

First appeal. If the student wishes to file a formal grievance, a written appeal must be prepared that includes the name, address, and phone number of the grievant; the name of the person against whom the grievance is being filed; the nature of the grievance; a description of the desired solution; a description of the actions taken by the grievant to date; and all pertinent written documentation. This file must be completed and presented to the immediate supervisor of the person alleged to have caused the grievance within five working days of the initial discussion referred to in the above paragraph.

The supervisor shall immediately acknowledge receipt of the grievance and shall begin an investigation of the incident at once. The supervisor shall respond in writing of the decision to the student (with a copy to the dean) within three working days of the conclusion of the investigation.

If the student feels the grievance has been resolved, the process is complete. If not, an appeal may be brought before the Student Affairs Committee.

Appeal to the Student Affairs Committee

If the grievance is unresolved, the student may bring the grievance before the Student Affairs Committee by presenting a written statement within five working days of the date of the supervisor’s decision. This statement shall be forwarded to the dean in a sealed envelope and shall

1. state the grievance,
2. state why the response is unacceptable, and
3. request a hearing before a grievance panel.

Any related materials (including a copy of the grievance file and the written response from the supervisor) must accompany the letter. The dean shall immediately notify the chair of the Student Affairs Committee of the appeal.

Upon receipt of the appeal, the chair shall send a copy of the appeal to the members of the committee and the major parties involved. The major parties include the person(s) against whom the grievance was initiated, the supervisor of that individual(s), and the appropriate administrator. The chair of the committee shall ask the major parties to respond in writing to the appeal within five working days.
At the end of the five working day period, the chair shall meet with the Student Affairs Committee to examine the request for an appellate hearing and the replies. A hearing shall be granted if a majority of the quorum finds that grounds for the appeal have been substantiated. A tie vote shall result in a hearing being granted. The chair shall notify all involved parties of the decision of the committee to either hear or not hear the grievance.

The hearing shall be conducted no sooner than five working days after the decision to grant the request for the hearing and no later than 15 working days after the decision to grant the request for the hearing.

A postponement may be granted by the chair upon written request of either party. The request shall state why the postponement should be granted.

**Conduct of the Hearing**

The chair of the Student Affairs Committee shall open the hearing by reading the request for an appeal and informing the parties involved of the jurisdiction of the committee and its procedures. The chair shall ascertain that all the parties involved are aware of their rights, answer any questions they have in regard to these matters, and conduct the meeting.

All hearings shall be closed to the public, unless all parties agree that the hearing be opened to members of the UofSC Union community.

A tape recording shall be made of the proceedings.

All parties involved in a hearing shall maintain in the strictest confidence the identity of the individuals appearing before the committee, as well as the information presented to the committee.

Hearings shall be conducted in an informal manner. The taking of statements from the parties to the grievance (and from witnesses, if any) may be done by discussion format, though each individual appearing before the committee may be subject to cross-examination. Witnesses shall be present only during the time they are testifying. The major parties involved in the grievance shall be required to attend all hearings of the committee.

At the conclusion of the hearing, each party shall submit a proposed solution of the grievance to the committee.

After receiving the proposed solutions to the grievance, the chair shall dismiss all individuals who are not members of the Student Affairs Committee. The committee shall reach its decision based on the information presented during the hearing and according to the statement of student rights and responsibilities.

The committee shall decide by a majority vote the solution of the grievance. In the case of a tie, the chair shall vote and thus break the tie. The chair (or designee) shall forward a copy of the committee's decision to the major parties involved and to the dean within five working days of the conclusion of the hearing.

Decisions of the committee shall be final, subject to the student's right to appeal directly to the dean and to the vice provost for regional campuses.

The decision of the committee shall be kept on file in the dean's office.

**The Grievance Committee**

At UofSC Union, the Student Affairs Committee acts as the Grievance Committee and shall be composed of seven members as appointed by the faculty organization.

Expenses

The University reserves the right to alter any of the following charges without notice. All charges are due and payable on the date that they are incurred or the due date indicated on the ticket, invoice, or statement. Checks or credit cards for the exact amount of the total charges should be made payable to the University of South Carolina.

Any student who has failed to pay all required registration fees on or before the last date to change course schedules (as indicated in the University calendar) may be dropped from class rolls. Any student who fails to relieve any other indebtedness to the University or to any of its auxiliary agencies on the date such obligations become due may not be permitted to remain in University residence halls or be issued a transcript, diploma, or degree.

**Checks, Money Orders, and Credit Cards**

The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina at (http://my.sc.edu) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include electronic checks and payment by check or money order through the mail.

**Legal Residency**

The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one's resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

**Legal Residency Requirements for Fee and Tuition Purposes**

**Code of Laws Governing Residence**

Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

**Definitions**

"Academic Session" is defined as a term or semester of enrollment.
“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments from a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person’s college education. A dependent person’s residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“Full time employment” is defined as employment that consists of at least thirty seven and one half hours a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.

“Immediately Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

“Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving instate tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents

Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month
residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled "Establishing the Requisite Intent to Become a South Carolina Domiciliary." The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person's support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

**Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents**

Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

**Establishing the Requisite Intent to Become a South Carolina Domiciliary**

Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

**Maintaining Residence**

A person’s temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver’s license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

**Effect of Change of Residency**

Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina
colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

**Effect of Marriage**

In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently be eligible for or to retain eligibility for South Carolina residency.

**Exceptions**

Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category on or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. “Military Personnel and their Dependents”: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their dependents) may also be eligible to pay in state tuition and fees as long as they are continuously enrolled after their discharge from the military, provided they have demonstrated an intent to establish a permanent home in South Carolina and they have resided in South Carolina for a period of at least twelve months immediately preceding their discharge. Military personnel who are not stationed in South Carolina and/or former military personnel who intend to establish South Carolina residency must fulfill the twelve month “physical presence” requirement for them or their dependents to qualify to pay in state tuition and fees.

2. “Faculty and Administrative Employees with Full Time Employment and their Dependents”: Full time faculty and administrative employees of South Carolina state supported colleges and universities and their dependents are eligible to pay in state tuition and fees.

3. “Residents with Full Time Employment and their Dependents”:

   Persons who reside, are domiciled, and are full time employed in the State and who continue to work full time until they meet the twelve month requirement and their dependents are eligible to pay in state tuition and fees, provided that they have taken steps to establish a permanent home in the State. Steps an independent person must take to establish residency in South Carolina are listed in Section 62-605 entitled (“Establishing the Requisite Intent to Become a South Carolina Domiciliary”).

4. “Retired Persons and their Dependents.” Retired persons who are receiving a pension or annuity who reside in South Carolina and have been domiciled in South Carolina as prescribed in the Statute for less than a year may be eligible for in state rates if they maintain residence and domicile in this State. Persons on terminal leave who have established residency in South Carolina may be eligible for in state rates even if domiciled in the State for less than one year if they present documentary evidence from their employer showing they are on terminal leave. The evidence should show beginning and ending dates for the terminal leave period and that the person will receive a pension or annuity when he/she retires.

South Carolina residents who wish to participate in the Contract for Services program sponsored by the Southern Regional Education Board must have continuously resided in the State for other than educational purposes for at least two years immediately preceding application for consideration and must meet all other residency requirements during this two year period.

**Application for Change of Resident Status**

Persons applying for a change of resident classification must complete a residency application/petition and provide supporting documentation prior to a reclassification deadline as established by the institution.

The burden of proof rests with those persons applying for a change of resident classification who must show required evidence to document the change in resident status.

**Incorrect Classification**

Persons incorrectly classified as residents are subject to reclassification and to payment of all non-resident tuition and fees not paid. If incorrect classification results from false or concealed facts, such persons may be charged tuition and fees past due and unpaid at the out of state rate. The violator may also be subject to administrative, civil, and financial penalties. Until these charges are paid, such persons will not be allowed to receive transcripts or graduate from a South Carolina institution.

Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

**Inquiries and Appeals**

Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-5555

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the
residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person's situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

**Academic Fees**

Academic fees at the University of South Carolina Union are established by the University of South Carolina Board of Trustees and are subject to change. These fees reflect the actual costs for the 2007-2008 academic year. Because the Board of Trustees sets fee schedules during its summer meeting, costs for the 2008-2009 and 2009-2010 academic years were not available at the time of publication. For current fee information, please contact the UofSC Union Records Office.

The following fees are payable in full at the beginning of each term. Students bringing checks from home should have separate checks in the exact amount to cover the expenses.

**Application Fees**

Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls.

**Matriculation Fee**

A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $375 matriculation fee.

**Free Tuition**

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the code are reproduced below.

   a. A child of a wartime veteran, upon application to and approval by the South Carolina Department of Veterans Affairs, may be admitted to any state-supported college, university, or post high school technical education institution free of tuition so long as his or her parent was a resident of this state at the time of entry into service and during service or has been a resident of this state for at least one year and still resides in this state or, if the veteran is deceased, resided in this state for one year before his death, and provided the veteran served honorably in a branch of the military service of the United States during a war period, as those periods are defined by Section 101 of Title 38 of the United States Code and:
      i. was killed in action
      ii. died from other causes while in the service
   b. A nonrefundable matriculation fee of $50 is assessed to all current residence halls.

2. S.C. Code Ann. § 59-111-110 (Law Co-op. 1976) No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty on or after July 1, 1964.

3. S.C. Code Ann. § 59-111-10 (Law Co-op. 1976) The first-place winner of the essay contest sponsored by the Governor’s Committee on the Employment of the Physically Handicapped, provided that he is qualified and in financial need, may receive a four-year scholarship. This scholarship may be cancelled if the recipient fails to maintain general scholastic and conduct standards established by the University.

4. S.C. Code Ann. § 59-111-320 (Law Co-op. Supp. 1984) Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or noncredit purposes on a space available basis without the required payment of tuition if these persons do not receive compensation as full-time employees.

**Fees**

http://www.sc.edu/bursar/schedule_regional.shtml (http://www.sc.edu/bursar/schedule_regional.shtml/)

**Twelve to 19 Semester Hours**

1. South Carolina resident per semester with less than 75 credit hours ($2,568)
2. Nonresident per semester with less than 75 credit hours ($6,456)
3. South Carolina resident per semester with more than 75 credit hours ($3,850)
4. Nonresident per semester with more than 75 credit hours ($7,716)
5. Additional academic fees for all hours over 19 semester hours (not applicable/no additional fees are charged-approval required from dean to allow student overload)
6. Technology fee ($196)
7. Lab Fee ($40; $60 for mathematics)

**Fewer than 12 Semester Hours**

1. South Carolina resident per semester hour with less than 75 hours ($214)
2. Nonresident per semester hour with less than 75 hours ($538)
3. South Carolina resident per semester hour with more than 75 hours ($334)
4. Nonresident per semester hour with more than 75 hours ($663)
5. Technology fee per semester hour ($15)

Summer Fees
1. South Carolina resident per semester hour with less than 75 hours ($214)
2. Nonresident per semester hour with less than 75 hours ($538)
3. South Carolina resident per semester hour with more than 75 hours ($334)
4. Nonresident per semester hour with more than 75 hours ($663)
5. Technology fee per semester hour ($15)

Course Auditing (resident and nonresident) same rate as courses taken for credit.
6. Technology fee per semester hour ($15)

Graduate Credit Fees
http://www.sc.edu/bursar/schedule_allcampuses.shtml (http://www.sc.edu/bursar/schedule_allcampuses.shtml/)

Course Fee
1. South Carolina resident per semester hour ($484)
2. Certified teacher per semester hour ($320)
3. Parking fee per year ($15)-Union

Cross-Campus Enrolled Students
Courses originating from other UofSC campuses are made available to students enrolled at UofSC Union. Students who enroll in courses originating from more than one campus pay fees based upon the originating campus’s fee schedule. Refer to the originating campus’s Master Schedule of Classes to determine fees.

Fines

Registration
1. Late enrollment or payment of fees (after prescribed registration day); $5 per day (Maximum $350)
2. Enrollment with check or credit card returned by the bank for any reason, $30, plus late fee above (Maximum $380)

Bad checks. Check or credit card (other than one used for enrollment) returned by bank for any reason, $30.

Refund Policy

a. Refund Requests
All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.

b. Determining the Refundable Portion Procedure
Student refunds for tuition are calculated based on the student’s liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be applied to the student account.

c. Drop/Withdrawal Refund Policies
Standard Refund Policy For Dropping/Withdrawal From The University:
All refunds will be based solely on the percentage of time (in days) between the first day of a part-of-term and the last day of a part-of-term. The percentage (in days) will include all Saturdays, Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar’s Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
i. 100 percent if the student’s official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
ii. 70 percent if the student’s official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
iii. 50 percent if the student’s official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
iv. 20 percent if the student’s official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

d. Refund Schedules
Refund schedules are relocated under the important deadlines on the Registrar’s website (http://registrar.sc.edu/).

e. Return of Title IV Funds
Refunds Policy For Students Who Have Received Title IV Funds
And Withdraw From The University
i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students “earn” a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of “unearned” financial aid funds that must be returned. Once a student has
completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from school.

ii. Title IV Refund Distribution
1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current Federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
   - Unsubsidized Federal Stafford
   - Subsidized Federal Stafford
   - Federal Perkins
   - Federal PLUS Loan
   - Federal Pell Grant
   - Federal Supplemental Education Opportunity Grant
   - Federal TEACH Grant
   - Federal Iraq/Afghanistan Service Grant
2. Any remaining balance will first be used to repay any outstanding university charges and any subsequent balances will be refunded to the student/parent.
3. Exit interviews are required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Exit interviews can be completed at http://www.sc.edu/financialaid/loan_counseling/default.html (https://academicbulletins.sc.edu/union/expenses/re required before leaving the University of South Carolina for all students who withdraw and have received Stafford, Perkins or Federal Nursing/Health Professions Loans. Exit interviews can be completed at http://www.sc.edu/financialaid/loan_counseling/default.html. Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.html). Questions regarding exit counseling should be referred to the appropriate campus Financial Aid and Scholarships Office.

3. Appeals Process
A process for appeals exists for students or parents who believe circumstances warrant exceptions from published policy. The student must be fully withdrawn from the University in order to apply for an appeal. The Withdrawal Refund Appeals Committee reviews and act on all appeals. Address appeals to:
Withdrawal Refund Appeals Committee (Columbia Campus Only)
Office of the Registrar
University of South Carolina
Columbia, SC 29208
803-777-5555

Withdrawal Refunds
Students seeking to fully withdraw from the University (drop all classes) during an academic semester must complete a withdrawal form at the Admissions Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Student Development Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student’s withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Student Development Office will inform the student of the appeal process and advise the student of the necessary procedures.

University Withdrawal Refund Appeal Procedures
The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University’s published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:
1. The appeal must be submitted in writing to the Student Development Office and will be considered only in written form. A standardized appeal form must be submitted.
2. All requests for appeal must be submitted directly by the student through the Student Development Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official’s advice, or the official’s interpretation of the text of a University
Financial Aid and Scholarships

The financial aid programs of the University of South Carolina Union make it possible for many students to attend the University who could not do so if left entirely to their own resources. Scholarships, grants, loans, and part-time employment are available to qualified undergraduate students.

Eligibility for most types of aid except academic scholarships depends on the applicant's financial circumstances. The University uses the Free Application for Federal Student Aid (FAFSA) to determine the amount of assistance each applicant is eligible to receive. We recommend that you complete the FAFSA via the Web at www.fafsa.ed.gov; however, paper applications may still be obtained from most high-school guidance offices or the Financial Aid Office. Your application must be received by the application processor by June 30.

General Guidelines for Financial Aid

1. The student should have applied and been accepted for admission to UofSC Union as a regular student working toward a degree.
2. The student must have a high-school diploma or a General Education Development (GED) certificate.
3. Each applicant should complete the Free Application for Federal Student Aid indicating the University of South Carolina Union as the school of attendance.
4. A Student Aid Report (SAR) will be sent from the U.S. Department of Education to the student.
5. If corrections are necessary, they should be made in the Financial Aid Office. Corrections are electronically transmitted. An ISAR (Institutional Student Aid Report) with the updated information will be sent to the student.
6. Information concerning federal financial aid programs, such as Federal Work-Study (FWS), Federal Perkins Loans, Federal William D. Ford Direct Loans (DL), and Federal Grants, may be obtained from the financial aid office.
7. The student must be making satisfactory academic progress toward completing a degree or certificate program.
8. The student must sign a statement of purpose/certification statement on refunds and default.
9. Awards of financial assistance are made in the summer prior to the beginning of the fall semester. An award notification will be sent to the student once the file is complete.
10. In order to be considered for some type of federal financial assistance, a student must be enrolled at least half time (6 semester hours); the Pell Grant program is an exception to this requirement.
11. Awards will be based only on a student's enrollment status during the official registration period.
12. The Financial Aid Office staff is available for counseling with students and parents concerning any financial aid program.

Financial Aid and the Extended Graduate Campus Program

Financial aid for graduate students who are admitted and registered through The Graduate School on the University's Columbia campus will have their financial aid administered by the Columbia campus financial aid office regardless of the student's campus location. As such, graduate students in this category should list the University of South Carolina Columbia as their school of choice on the Free Application for Federal Student Aid form. All financial aid related correspondence should be directed to the Columbia campus financial aid office.

Satisfactory Academic Progress

All students receiving federal financial aid must adhere to the University's policy on satisfactory progress. The intent of this policy is to ensure that students who are receiving federal and/or state financial aid for their education are making measurable progress toward completion of a degree in a reasonable period of time.

Undergraduate students are considered to be making satisfactory progress if they:
1. are admitted and enrolled as degree-seeking students;
2. meet the University standards for continued enrollment;
3. complete requirements for a degree within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any post-secondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree.
   b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed the equivalent of 180 hours for a four-year degree or 90 hours for a two-year degree.
4. earn no fewer than 67% of all coursework if enrolled as a full time student. The academic year for Satisfactory Academic Progress is comprised of the fall, spring, and summer terms.
5. maintain a cumulative grade point average (GPA) of 2.00 on all coursework.

Explanation

Under these standards, students will be ineligible to receive federal financial aid funds if any of the following occurs:
1. The total number of semesters of enrollment as a full-time student (12 or more semester hours attempted) exceeds 180 hours for a four-year degree or 90 hours for a two-year degree. These limits include all...
work done at any post-secondary institution, whether or not financial aid was received.

2. The total number of earned hours falls below the prescribed number based upon enrollment in undergraduate or graduate study.

3. Complete requirements for a degree or certificate within a reasonable length of time as specified below:
   a. The total number of semesters of full-time enrollment (12 or more semester hours attempted) at any postsecondary institution does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.
   b. The total number of semesters of part-time enrollment (less than 12 semester hours attempted) does not exceed 180 hours for a four-year degree or 90 hours for a two-year degree or certificate.

4. The cumulative GPA falls below 2.00.

In other words, students who accumulate a yearly or cumulative GPA that subjects them to suspension, who have been enrolled for more than the equivalent of 10 full-time semesters for a four-year degree program, who do not maintain a cumulative GPA of 2.00 after attempting 48 credit hours, or who do not earn the minimum number of semester hours required will become ineligible to receive federal financial aid funds. This determination applies without regard to any financial aid award letter that may have been sent or received prior to the time the determination is made.

Financial Aid Programs Covered by These Standards

- Federal Pell Grant
- Federal Work-Study
- Federal Supplemental Educational Opportunity Grants
- Federal Perkins Loan
- William D. Ford Federal Direct Loan Program:
  - Direct Subsidized Loan
  - Direct Unsubsidized Loan
- Federal PLUS
- South Carolina LIFE Scholarship
- South Carolina Lottery Tuition Assistance Program
- South Carolina Need-Based Grant
- Other federal or state programs as required
- Some select private loans (as determined by the lender)

Appeals

Students who are ruled ineligible for financial aid may appeal this determination under specifically prescribed conditions. Deadlines for receipt of appeals are 20 days prior to the end of the semester for which aid is requested. Information concerning the appeal process is available in the financial aid office.

Reinstatement

Students shall be reinstated for financial aid eligibility at such time as they successfully complete sufficient hours and have a sufficient grade point average to meet the minimum requirements for eligibility as set forth in this policy.

Academic Forgiveness

The Satisfactory Academic Progress policy standards will not automatically apply to any hours forgiven under the University of South Carolina Academic Forgiveness Program. However, if you have been granted academic forgiveness under this policy you must contact the Financial Aid Office for further assessment.

Grants

Federal Pell Grant

The Federal Pell Grant is the largest federally funded student financial aid grant program. It serves as the foundation upon which all other undergraduate aid is awarded. Typically, it is available only to undergraduate students who have not earned a baccalaureate degree. Federal Pell Grant eligibility is determined according to federal law and is based on the financial information you and your family provided on your FAFSA.

You are notified of your possible eligibility to receive a Federal Pell Grant via the Student Aid Report (SAR). The financial aid office will receive this information directly from the federal processor and determine the amount of your Federal Pell Grant. You should carefully review the information on your SAR and, if it is correct, keep it for your records. If you discover mistakes, follow the instructions and submit corrections as soon as possible.

If you or your family experiences a major change in your financial situation after your Pell Grant eligibility has been determined, you should notify the financial aid office immediately. A counselor will be able to determine if you qualify for an adjustment of your Pell Grant award and/or other financial aid.

Federal Supplemental Educational Opportunity Grant (FSEOG)

The FSEOG is a grant that does not need to be repaid. The financial aid office awards UofSC’s limited allocation of FSEOG funds. Recipients must be undergraduates who have not already earned a baccalaureate degree and who demonstrate exceptional financial need. FSEOG recipients must be eligible to receive a Pell Grant and have the lowest EFC’s from among those students being considered for an award.

South Carolina Educational Resources

State Need-Based Grant Program (SNBG)

The South Carolina Need-Based Grant is a state-funded grant for undergraduates attending public and independent colleges and universities within South Carolina. Recipients may not have already earned a baccalaureate degree. To be considered, you must be a South Carolina resident, be admitted or currently enrolled with a minimum GPA of 2.00, complete the FAFSA, demonstrate financial need, be of good moral character, and have no felony and/or alcohol or drug convictions for a period of one year. Additionally, to renew a state grant award, you must maintain an annual 2.00 GPA and complete 24 semester hours during the fall and spring semesters if enrolled full time or an equivalent number of hours based on enrollment if less than full time. Awards are made for the entire academic year (fall and spring semesters) only. The State Need-Based Grant does not need to be repaid.

South Carolina Legislative Incentives for Future Excellence Scholarship

The South Carolina Legislative Incentives for Future Excellence Scholarship (LIFE) was established by the General Assembly during the 1998 legislative session. To be eligible for a LIFE Scholarship, you must have graduated from a high school located in South Carolina on or after May 1995 and be a full-time, undergraduate, degree-seeking student. You must be a South Carolina resident for in-state tuition purposes at the time...
of enrollment and have no felony, alcohol, or drug convictions. If, however, you have been judged delinquent or have been convicted or pled guilty or nolo contendere to an alcohol or drug misdemeanor, you are ineligible for one calendar year from the date of the conviction. You must also be a U.S. citizen or a permanent resident under state laws. You may not be in default or owe a refund on any federal or state financial aid program.

If you are a first-time entering freshman, you must have graduated from high school with a minimum 3.00 cumulative grade point average (GPA) on a 4.00 scale.

For initial LIFE Scholarship eligibility, if a currently enrolled student, you must have earned a cumulative 3.00 UofSC GPA at the end of the academic year. You must also have earned a minimum of 30 credit hours, or the annual equivalent at all institutions attended, for the previous academic year if completing your first year; 60 credit hours must have been earned if completing your second year; and, 90 credit hours must have been earned if completing your third year. Students at UofSC Regional Campuses are only eligible to receive the LIFE Scholarship for four consecutive semesters.

You may receive the LIFE scholarship for not more than eight semesters for a four-year degree or 10 semesters for a five-year degree. Funds from this program may not be used for remedial courses or continuing education classes. If you are receiving South Carolina’s Palmetto Fellows Scholarship, you are not eligible for a LIFE Scholarship.

To retain the LIFE Scholarship you must earn an average of 30 credit hours for each academic year and earn a 3.00 cumulative UofSC GPA by the end of the academic year. The financial aid office, using data from the admissions and records offices, is responsible for awarding LIFE Scholarships.

Please note that the LIFE Scholarship statutes and regulations are subject to change by the South Carolina Legislature.

South Carolina Lottery Tuition Assistance Program

During the 2002 legislative session, the South Carolina General Assembly established the Lottery Tuition Assistance Program. Its purpose is to provide resources that supplement, not supplant, existing resources for educational purposes to South Carolina’s students. The program assists students who wish to attend two-year public or independent college in the state. In calculating the amount awarded, any and all federal grants and need-based grants must first be awarded before determining the amount a student is eligible to receive. A student may receive up to the cost of tuition minus Pell, SEOG, and SNBG. The college at which the student is enrolled will notify each student of the exact award amount.

In order to qualify for lottery tuition assistance, a student must meet the following requirements:

- file the Free Application for Federal Student Aid (FAFSA) and complete the process to determine eligibility for federal student aid each academic year
- be a legal resident of South Carolina as defined in applicable state statues governing the determination of residency for tuition and fee purposes
- be enrolled at the time of the grant disbursement in a minimum of 6 credit hours for the term and be making satisfactory academic progress toward an associate’s degree
- verify that the student does not owe a refund or repayment on a state grant, Federal Pell Grant, or Federal Supplemental Educational Opportunity Grant (FSEOG) and is not in default on a loan under the Federal Perkins Loan or Federal Stafford Loan programs

- must not be eligible for or a recipient of the LIFE scholarship

To retain program funds, a student must have a 2.00 GPA by the end of the academic year.

In addition, students shall not be eligible to receive lottery tuition assistance for more than one certificate, diploma, or degree earned within any five-year period.

The financial aid office administers the South Carolina Lottery Tuition Assistance Program, and the exact award amount is dependent upon the number of eligible recipients and the amount of funding each academic year. Please note that program statutes and regulations are subject to change by the S.C. Legislature.

Loans

The Federal Direct Stafford Loan Program (Subsidized and Unsubsidized)

The Federal Direct Stafford Loan Program provides low-interest, long-term loans to eligible students through the U.S. Department of Education.

Subsidized Stafford Loans are awarded based on financial need. The federal government pays the interest on these loans while the student is enrolled in school at least half-time (6 semester hours), during the grace period and during deferment periods.

Unsubsidized Stafford Loans are not based on financial need. Interest begins accruing after the first disbursement. Students have the option of paying the interest monthly or quarterly while in school and during the grace period, or can have the interest capitalized and added to the principal amount of the loan upon entering repayment.

The graduate limit includes Stafford Loans received for undergraduate study.
Federal Direct Parent Loan for Undergraduate Students (PLUS)

Federal Direct Parent Loan for Undergraduate Students (PLUS) provides long-term loans to parents for their dependents through the U.S. Department of Education. Loan amounts under this program are limited to the student’s cost of education minus other financial aid awards. Parents may be denied a PLUS loan due to adverse credit history. If the PLUS Loan is denied, the student is eligible for an additional Unsubsidized Loan.

The repayment period for each Direct PLUS Loan begins on the date the final loan disbursement is made. There is no grace period for Direct PLUS Loans. Parents have the option of postponing payments until six months after the student ceases to be enrolled at least half time. Parents must contact the Direct Loan Servicing Center to request a postponement of payments. Interest will accrue during the postponement period. The loans have a fixed rate of 7.9%. PLUS Loan funds will be disbursed in two equal payments, one at the beginning of each semester (Fall - August, Spring - January). One semester loans are disbursed at the beginning of the semester for the full loan amount.

South Carolina Teacher Loan Program

This program is available only to residents of South Carolina who are attending college for the purpose of becoming certified teachers employed in the state’s school system in areas of critical need as defined by the State Board of Education. For loan recipients who become certified and teach in an area of critical need, the loan shall be cancelled at the rate of 20 percent for each full year of teaching, up to 100 percent. Loan recipients who do not become certified and/or do not teach in an area of critical need shall be responsible for repaying the entire amount of loan funds borrowed plus interest. Contact the Office of Student Financial Aid and Scholarships for application information and deadlines.

Federal Perkins Loan

The Perkins Loan Program is a low-interest (5 percent), long-term educational loan program available to both undergraduate and graduate students demonstrating exceptional financial need. This is a loan and must be repaid. Undergraduates may borrow up to $4,000 for each year of study and up to $20,000 to complete an undergraduate degree. Interest is not charged and repayment does not begin until nine months after your enrollment drops below half-time status. If you receive your first Perkins Loan on or after October 1, 1992, your minimum payment will be $40 per month. In all cases, repayment may extend up to 10 years depending upon the total amount borrowed. If you have outstanding National Direct Student Loan (NDSL) balances and you are receiving a Federal Perkins Loan now, you must review your NDSL Promissory Note to determine the terms and conditions that apply to your loan. Under certain conditions of reenrollment, employment, or extenuating circumstances, payments may be deferred or cancelled. Further information concerning repayment is available in the Office of Financial Services, 516-518 South Main Street.

Work Opportunities

Federal Work-Study Program

The Federal Work-Study Program provides part-time employment for needy students to meet their educational expenses. To be eligible for employment under this federal program, a student must be enrolled in the University or fully accepted for admission and demonstrate financial need.

Students who are enrolled at least half-time work an average of 12 to 20 hours per week. During vacation periods it is sometimes possible to work up to 40 hours per week. Pay rates vary with the job assignment.

Refunds and Financial Aid

The official University policy and procedure concerning refunding of University tuition and fees which result from withdrawal or reduction in hours is contained in the “Fees and Refunds” section of this bulletin. Students who withdraw or reduce hours may be eligible to receive a refund as provided by the official University policy; however, recipients of financial aid generally do not receive the refund.

When students who are recipients of federal financial aid withdraw from all classes, they are only entitled to retain a percentage of the federal financial aid received that is proportional to the time they remained enrolled. If, for example, a student withdraws after completing 30 percent of the semester or summer term, they can only retain 30 percent of the federal financial aid they received. The balance, 70 percent, must be returned to the financial aid programs. The Office of the Bursar performs this calculation and students are notified by mail of the outcome.

When funds are applied back to the federal financial aid programs, loan funds are always returned first, thereby reducing the student’s repayment obligation. If funds remain after repaying federal loans, they are then repaid to the Federal Pell Grant and the Federal Supplemental Educational Opportunity Grant (FSEOG) programs. After all federal funds are repaid, state-sponsored grant programs then receive any remaining payments.

Veterans Benefits

The following policies and procedures are of primary concern to veterans, servicepersons, members of guard and selected reserves, and other eligible persons who receive VA educational benefits while enrolled at the University.

Please note: Academic standards of progress and attendance are covered under school standards of progress as specified by the South Carolina Commission on Higher Education, License Division, and are required by the U.S. Department of Veterans Affairs (VA).

Enrollment Certification

Certification by the University VA certifying official in the Office of Financial Aid, Scholarships, and Veterans Affairs is required for eligible persons who receive VA educational benefits while enrolled at the University.

Normally, the VA requires that eligible students must have completed full University admissions requirements and matriculation into degree-seeking status before they may receive VA educational benefits. However, those students admitted as “Provisional,” “Military Special,” or “Transient,” or students enrolling for prerequisite courses required for admission into a professional degree program or school may request VA certification if they provide appropriate documentation. Any VA students in these categories should contact the VA certifying official for details. In these and all other admissions categories, only the federal VA has the final authority to award or to deny military educational benefits.
Undergraduate veterans or servicepersons should contact the Office of Admissions for consideration of receiving college credit for military schools.

Students can best ensure receipt of benefits by informing the school VA office of their intent to register for classes and by supplying the number of credit hours for which they will enroll each session. Eligible VA students may request certification on a semester basis and should recertify for each new semester at least 45 days prior to the first day of class of their next semester.

Normally, VA payments are authorized only for those courses which are required by the academic department for the student’s current degree program. All students receiving educational benefit checks from the VA are responsible for notifying the VA certifying official of any changes in their degree programs and/or course loads during a semester, to include drop/add, withdrawal, changing from credit to audit status, invoking the Pass-Fail option in a course, or enrolling in any distance education course, independent study, internship, or practicum.

Appropriate forms and benefits-related information are available at the Office of Financial Aid, Scholarships, and Veterans Affairs. Each student request will be handled individually according to their VA benefit program and enrollment status at the University.

UofSC Union Scholarships
For detailed information and an updated listing of scholarships, go to: https://www.sc.edu/about/system_and_campuses/union/apply/scholarships/index.php (https://academicbulletins.sc.edu/union/financial-aid-scholarships/For detailed information and an updated listing of scholarships, go to: https://www.sc.edu/about/system_and_campuses/union/apply/scholarships/)

Fees and Refunds
Checks, Money Orders, and Credit Cards
The University assesses a credit-card convenience fee for all students paying fees by credit card. If you decide to pay with a credit card, this nonrefundable fee will be added to your bill to cover the cost being charged to the University. Since the majority of students find Self-Service Carolina (https://my.sc.edu/) a convenient way to pay, it will present you with an option to accept this fee or decline the transaction. If you decline, you must select another method of payment. Alternative methods include payment by E-check, UofSC’s preferred method of payment, when using Self-Service Carolina or payment by check or money order through the mail.

Legal Residency
The University of South Carolina is required by state law to determine the residence classification of applicants. The initial determination of one’s resident status is made at the time of admission. The determination made at that time, and any determination made thereafter, prevails for each subsequent semester until information becomes available that would impact the existing residency status and the determination is successfully challenged. The burden of proof rests with the students to show evidence as deemed necessary to establish and maintain their residency status.

Legal Residency Requirements for Fee and Tuition Purposes
Code of Laws Governing Residence
Rules regarding the establishment of legal residence for tuition and fee purposes for institutions of higher education are governed by Title 59, Chapter 112, of the 1976 South Carolina Code of Laws, as amended.

Definitions
“Academic Session” is defined as a term or semester of enrollment.

“Continue to be Enrolled” is defined as continuous enrollment without an interruption that would require the student to pursue a formal process of readmission to that institution. Formal petitions or applications for change of degree level shall be considered readmissions.

“Dependent Person” is defined as one whose predominant source of income or support is from payments a parent, spouse, or guardian, who claims the dependent person on his/her federal income tax return. In the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, a dependent person can be defined as one who qualifies as a dependent or exemption on the federal income tax return of the parent, spouse, or guardian. A dependent person is also one for whom payments are made, under court order, for child support and the cost of the dependent person’s college education. A dependent person’s residency is based upon the residency of the person upon whom they are dependent.

“Domicile” is defined as the true, fixed, principal residence and place of habitation. It shall indicate the place where a person intends to remain, or to where one expects to return upon leaving without establishing a new domicile in another state. For purposes of this section, one may have only one legal domicile. One is presumed to abandon automatically an old domicile upon establishing a new one. Housing provided on an academic session basis for student at institutions shall be presumed not to be a place of principal residence, as residency in such housing is by its nature temporary.

“Family’s Domicile in this State is Terminated” is defined as an employer directed transfer of the person upon whom the student is dependent and is not construed to mean a voluntary change in domicile. Also included is a relocation of the person upon whom the student is dependent who is laid off through no fault of their own, e.g., plant closure, downsizing, etc., who accepts employment in another state prior to relocating.

“Full time employment” is defined as employment that consists of at least thirty seven and one hour half weeks a week on a single job in a full time status, with gross earnings of at least minimum wage. However, a person who works less than thirty seven and one half hours a week but receives or is entitled to receive full time employee benefits shall be considered to be employed full time if such status is verified by the employer. A person who meets the eligibility requirements of the Americans with Disabilities Act must present acceptable evidence that they satisfy their prescribed employment specifications in order to qualify as having full time employment.

“Guardian” is defined as one legally responsible for the care and management of the person or property of a minor child based upon the five tests for dependency prescribed by the Internal Revenue Service; provided, however, that where circumstances indicate that such guardianship or custodianship was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or dependent person, it shall not be given such effect.
“Immediately Prior” is defined as the period of time between the offer of admission and the first day of class of the term for which the offer was made, not to exceed one calendar year.

“Independent Person” is defined as one in his/her majority (eighteen years of age or older) or an emancipated minor, whose predominant source of income is his/her own earnings or income from employment, investments, or payments from trusts, grants, scholarships, commercial loans, or payments made in accordance with court order. An independent person must provide more than half of his or her support during the twelve months immediately prior to the date that classes begin for the semester for which resident status is requested. An independent person cannot claim the domicile of another individual as their own for the purposes of establishing intent to become a South Carolina resident. An independent person must have established his/her own domicile for twelve months prior to receiving in-state tuition and fees. An independent person cannot be claimed as a dependent or exemption on the federal tax return of his or her parent, spouse, or guardian for the year in which resident status is requested.

“Minor” is defined as a person who has not attained the age of eighteen years. An “emancipated minor” shall mean a minor whose parents have entirely surrendered the right to the care, custody and earnings of such minor and are no longer under any legal obligation to support or maintain such minor.

“Non-resident Alien” is defined as a person who is not a citizen or permanent resident of the United States. By virtue of their non-resident status “non-resident aliens” generally do not have the capacity to establish domicile in South Carolina.

“Parent” is defined as the father, mother, stepfather, stepmother, foster parent or parent of a legally adopted child.

“Reside” is defined as continuous and permanent physical presence within the State, provided that absences for short periods of time shall not affect the establishment of residence. Excluded are absences associated with requirements to complete a degree, absences for military training service, and like absences, provided South Carolina domicile is maintained.

“Resident” for tuition and fee purposes is defined as an independent person who has abandoned all prior domiciles and has been domiciled in South Carolina continuously for at least twelve months immediately preceding the first day of class of the term for which resident classification is sought and for whom there is an absence of domiciliary evidence in other states or countries, not withstanding other provisions of the Statute.

“Spouse” is defined as the husband or wife of a married person in accordance with Title 20, Chapter 1 of the 1976 South Carolina Code of Laws, as amended.

“Temporary Absence” is defined as a break in enrollment during a fall or spring semester (or its equivalent) during which a student is not registered for class. (62-606.A)

“Terminal Leave” is defined as a transition period following active employment and immediately preceding retirement (with a pension or annuity), during which the individual may use accumulated leave.

“United States Armed Forces” is defined as the United States Air Force, Army, Marine Corps, Navy, and Coast Guard.

“Trust” is defined as a legal entity created by a grantor for the benefit of designated beneficiaries under the laws of the state and the valid trust instrument. However, that where circumstances indicate that such trust was created primarily for the purpose of conferring South Carolina domicile for tuition and fee purposes on such child or independent person, it shall not be given such effect.

Citizens and Permanent Residents
Independent persons who have physically resided and been domiciled in South Carolina for twelve continuous months immediately preceding the date the classes begin for the semester for which resident status is claimed may qualify to pay in state tuition and fees. The twelve month residency period starts when the independent person establishes the intent to become a South Carolina resident per Section 62-605 entitled “Establishing the Requisite Intent to Become a South Carolina Domiciliary.” The twelve month residency period cannot start until the absence of indicia in other states is proven. Absences from the State during the twelve month period may affect the establishment of permanent residence for tuition and fee purposes.

The resident status of a dependent person is based on the resident status of the person who provides more than half of the dependent person’s support and claims or, only in the case of those individuals who are supported by family members who do not earn enough reportable income for taxation purposes, qualifies to claim the dependent person as a dependent for federal income tax purposes. Thus, the residence and domicile of a dependent person shall be presumed to be that of their parent, spouse, or guardian.

In the case of divorced or separated parents, the resident status of the dependent person may be based on the resident status of the parent who claims the dependent person as a dependent for tax purposes; or based on the resident status of the parent who has legal custody or legal joint custody of the dependent person; or based on the resident status of the person who makes payments under a court order for child support and at least the cost of his/her college tuition and fees.

Non-Resident Aliens, Non-Citizens, and Non-Permanent Residents
Except as otherwise specified in this section or as provided in Section 62-609 (1) & (2), independent non-citizens and non-permanent residents of the United States will be assessed tuition and fees at the non-resident, out of state rate. Independent non-resident aliens, including refugees, asylees, and parolees may be entitled to resident, in state classification once they have been awarded permanent resident status by the U.S. Department of Justice and meet all the statutory residency requirements provided that all other domiciliary requirements are met. Time spent living in South Carolina immediately prior to the awarding of permanent resident status does not count toward the twelve month residency period. Certain non resident aliens present in the United States in specified visa classifications are eligible to receive in state residency status for tuition and fee purposes as prescribed by the Commission on Higher Education. They are not, however, eligible to receive state sponsored tuition assistance/scholarships.

Title 8 of the Code of Federal Regulations (CFR) serves as the primary resource for defining visa categories.

Establishing the Requisite Intent to Become a South Carolina Domiciliary
Resident status may not be acquired by an applicant or student while residing in South Carolina for the sole primary purpose of enrollment in an institution or for access to state supported programs designed to serve South Carolina residents. An applicant or student from another
state who comes to South Carolina usually does so for the purpose of attending school. Therefore, an applicant or student who enrolls as a non-resident in an institution is presumed to remain a non-resident throughout his or her attendance and does not qualify under any of the residency provisions.

If a person asserts that his/her domicile has been established in this State, the individual has the burden of proof. Such persons should provide to the designated residency official of the institution to which they are applying any and all evidence the person believes satisfies the burden of proof. The residency official will consider any and all evidence provided concerning such claim of domicile, but will not necessarily regard any single item of evidence as conclusive evidence that domicile has been established.

For independent persons or the parent, spouse, or guardian of dependent persons, examples of intent to become a South Carolina resident may include, although any single indicator may not be conclusive, the following indicia:

1. Statement of full time employment;
2. Designating South Carolina as state of legal residence on military record;
3. Possession of a valid South Carolina driver’s license, or if a non-driver, a South Carolina identification card. Failure to obtain this within 90 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until a South Carolina driver’s license is obtained;
4. Possession of a valid South Carolina vehicle registration card. Failure to obtain this within 45 days of the establishment of the intent to become a South Carolina resident will delay the beginning date of residency eligibility until the applicant obtains a South Carolina vehicle registrations card;
5. Maintenance of domicile in South Carolina;
6. Paying South Carolina income taxes as a resident during the past tax year, including income earned outside of South Carolina from the date South Carolina domicile was claimed;
7. Ownership of principal residence in South Carolina; and
8. Licensing for professional practice (if applicable) in South Carolina.

The absence of indicia in other states or countries is required before the student is eligible to pay in state rates.

Maintaining Residence
A person’s temporary absence from the State does not necessarily constitute loss of South Carolina residence unless the person has acted inconsistently with the claim of continued South Carolina residence during the person’s absence from the State. The burden is on the person to show retention of South Carolina residence during the person’s absence from the State. Steps a person should take to retain South Carolina resident status for tuition and fee purposes include:

1. Continuing to use a South Carolina permanent address on all records;
2. Maintaining South Carolina driver’s license;
3. Maintaining South Carolina vehicle registration;
4. Satisfying South Carolina resident income tax obligation. Individuals claiming permanent residence in South Carolina are liable for payment of income taxes on their total income from the date that they established South Carolina residence. This includes income earned in another state or country.

Effect of Change of Residency
Notwithstanding other provisions of this section, any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated immediately prior to his/her enrollment may enroll at the in state rate. Any dependent person of a legal resident of this state who has been domiciled with his/her family in South Carolina for a period of not less than three years and whose family’s domicile in this state is terminated after his/her enrollment may continue to receive in state rates, however, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters. Transfers within or between South Carolina colleges and universities of a student seeking a certificate, diploma, associate, baccalaureate, or graduate level degree does not constitute a break in enrollment.

If a dependent or independent person voluntarily leaves the state, and information becomes available that would impact the existing residency status, eligibility for in state rates shall end on the last day of the academic session during which domicile is lost. Application of this provision shall be at the discretion of the institution involved. However, a student must continue to be enrolled and registered for classes (excluding summers) in order to maintain eligibility to pay in state rates in subsequent semesters.

Effect of Marriage
In ascertaining domicile of a married person, irrespective of gender, such a review shall be determined just as for an unmarried person by reference to all relevant evidence of domiciliary intent.

If a nonresident marries a South Carolina resident, the nonresident does not automatically acquire South Carolina resident status. The nonresident may acquire South Carolina resident status if the South Carolina resident is an independent person and the nonresident is a dependent of the South Carolina resident.

Marriage to a person domiciled outside South Carolina shall not be solely the reason for precluding a person from establishing or maintaining domicile in South Carolina and subsequently becoming eligible or continuing to be eligible for residency.

No person shall be deemed solely by reason of marriage to a person domiciled in South Carolina to have established or maintained domicile in South Carolina and consequently to be eligible for or to retain eligibility for South Carolina residency.

Exceptions
Persons in the following categories qualify to pay in state tuition and fees without having to establish a permanent home in the state for twelve months. Persons who qualify under any of these categories must meet the conditions of the specific category or before the first day of class of the term for which payment of in state tuition and fees is requested. The following categories apply only to in state tuition and do not apply to State supported scholarships and grants. Individuals who qualify for in state tuition and fees under the following exceptions do not automatically qualify for LIFE, SC HOPE or Palmetto Fellows Scholarships.

1. “Military Personnel and their Dependents”: Members of the United States Armed Forces who are permanently assigned in South Carolina on active duty and their dependents are eligible to pay in state tuition and fees. When such personnel are transferred from the State, their dependents may continue to pay in state tuition and fees as long as they are continuously enrolled. Such persons (and their
Residents whose resident status changes are responsible for notifying the Residency Official of the institution attended of such changes.

Inquiries and Appeals
Inquiries regarding residency requirements and determinations should be directed to:

Legal Residency Office
University Of South Carolina
Columbia, SC 29208
803-777-5555

Any person, following a decision on his or her resident classification, may appeal the decision to the University Committee on Legal Residence. The committee, however, is bound by the same laws and regulations as the residency officials, so its purpose is only to review the facts and details of any case brought before it to evaluate the correctness of the decision may by residency officials. Neither the committee nor residency officials may waive the provisions of the law or regulations.

Persons who appeal residency decisions must provide a letter to the Legal Residency Office informing the office that they want to appeal the decision made by the residency official. The letter must also include a summary of the person's situation and a statement which specifies the residency provision under which the person feels he or she qualifies to pay in-state fees. The director of legal residency will then schedule a hearing as soon as possible for the committee to hear the appeal.

The residency requirements are subject to change without notification.

Academic Fees

Application Fees
Every new student will normally be charged a nonrefundable application fee of $40; exceptions to, or relief from, this charge may be made for certain special categories of admission. All applications must be accompanied by the application fee. This fee is for admission application only. A separate application fee is charged for space in University residence halls.

Matriculation Fee
A nonrefundable matriculation fee of $50 is assessed to all current degree-seeking students on a one-time basis. This fee is also assessed to entering (or re-entering) degree-seeking students. International students pay a $500 matriculation fee.

Free Tuition
(This includes tuition only—all other academic and mandatory fees are the responsibility of the student.)

Certain exemptions from tuition fees have been established under South Carolina Law. Relevant sections of the Code are reproduced below:

1. S.C. Code Ann. §§ 59-111-110 (Law Co-op. 1976) No tuition shall be charged for a period of four school years by any state-supported college or university or any state-supported vocational or technical school for children of firemen, both regularly employed and members of volunteer organized units, organized rescue squad members, members of the Civil Air Patrol, law enforcement officers or correction officers, as defined herein, including reserve and auxiliary units of counties or municipalities, who become totally disabled or are killed in line of duty (on or after July 1, 1964).
2. S.C. Code Ann. § 59-111-320 (Law Co-op Supp. 1984) Legal residents of South Carolina who have attained the age of sixty (60) and meet admission and other standards deemed appropriate by the University may attend classes for credit or non-credit purposes on a space available basis; provided, however, that neither such persons nor their spouses receive compensation as full-time employees.

Examination Fees
Graduate Record Examination
1. General Test ($60)
2. Subject Test ($60)

Revalidation examinations intended to revalidate UofSC courses, obsolete under the statute of limitations. Per hour, $25.

Note: Revalidation examinations require permission of the dean of The Graduate School. The fee must be paid in advance, and is nonrefundable, once the student is presented to the instructor for the examination.

Refund Policy
1. Policy
The University will refund a part of academic fees in certain cases:
   a. Changes in a student's status, which may require a refund.
      i. Change in a full-time student's schedule, which results in reclassification to part-time status
      ii. Change in a part-time student's schedule, which results in fewer credit hours.
   b. Situations, which may require a refund.
      i. Course or courses dropped
      ii. Drop/Withdrawal from the University
      iii. Cancellation of a class by the University

2. Procedure
   a. Refund Requests
      All requests for refunds must be received during the academic year for which the fees were paid. The academic year begins with the fall term and ends with the summer term. Refunds may be requested at any time during the academic year in which the applicable term occurs.
   b. Determining the Refundable Portion Procedure
      Student refunds for tuition are calculated based on the student's liable hours after the drop/withdrawal. Liable hours are calculated as the total hours a student is still registered plus the liable portion of the dropped/withdrawn course(s). The liable portion is computed by taking the number of dropped hours times the liability rate (which is 100 percent minus refund percentage). The refund amount is determined to be the difference of the original assessment and the assessment based on the new liable hours. For students whose liable hours are 12 or above, no refunds are processed. Other academic fees are non-refundable after the 100 percent refund percentage. For students activated for full-time military service during an academic term, the University follows state law in Section 59-101-395. Any refund calculated will be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
      i. 100 percent if the student's official drop/withdrawal calculation is within 6% of the enrollment period for which the student is liable.
      ii. 70 percent if the student's official withdrawal calculation is between the period specified in (1) or before the end of the 10 percent period of enrollment for which the student is liable.
      iii. 50 percent if the student's official withdrawal calculation is between the period specified in (2) or before the end of the 16 percent period of enrollment for which the student is liable.
      iv. 20 percent if the student's official withdrawal calculation is between the period specified in (3) or before the end of the 25 percent period of enrollment for which the student is liable.

   d. Refund Schedules
      Refund schedules are relocated under the important deadlines on the Registrar's website (http://registrar.sc.edu/).

   e. Return of Title IV Funds
      Refund Policy For Students Who Have Received Title IV Funds And Withdraw From The University
      i. Federal financial aid funds are awarded with the expectation that students will complete the entire period of enrollment. Students "earn" a percentage of the funds that are disbursed with each day of class attendance. When a student who has received federal aid funds (Title IV Funds) leaves school before the end of the semester or period of enrollment, federal regulations require the University of South Carolina to calculate the percentage and amount of "unearned" financial aid funds that must be returned. Once a student has completed more than 60 percent of the enrollment period, they are considered to have earned all funding received. This calculation may have the effect of requiring the student who withdraws before this time frame to repay funds that have already been disbursed to the student or credited towards their current account for tuition, fees, housing and/or meals. Students are encouraged to meet with a counselor in the Office of Student Affairs, or the appropriate office on their campus, prior to making the decision to withdraw from.
  
      ii. Title IV Refund Distribution
      1. For fully withdrawn students receiving federal and/or state funds, the refund will be governed by the current federal Title IV refund policy. The Office of Student Financial Aid and Scholarships determines the amount of the refund that is distributed back to Title IV, HEA Programs or other Financial Aid sources. For students and their parents who have received student loans or other forms of financial aid, funds will be returned in the order prescribed by federal regulations. The institution must return the funds to the financial aid program other than College Work Study, up to the amount of assistance that the student received from those programs. Funds are to be distributed to the financial aid programs in the following order:
         • Unsubsidized Federal Stafford
         • Subsidized Federal Stafford
         • Federal Perkins

Sundays, and holidays between the start and end dates of each part-of-term. Exceptions to this rule may only be made by the Bursar's Office. In these instances, any change in the refund percentage would be moved out to the next closest business day. Courses fewer than six days long, first day = 100% refund, remaining days = no refund
Withdrawal Refunds

All full- or part-time students wishing to withdraw from the University or to discontinue enrollment from all courses for the semester should follow the instructions online at my.sc.edu (https://my.sc.edu/) when they request to drop their last course. Staff members in the Office of Admissions and Records are available to assist students in completing the withdrawal process. In addition, staff from the Office of Financial Aid can provide financial counseling concerning withdrawing from classes. Students requesting withdrawal for extenuating circumstances after the penalty date (last date for W grade) should consult with staff in the Admissions and Records Office.

In establishing a diminishing-scale refund process for withdrawals, the University operates on the philosophy that many of the basic costs of instruction are incurred at the end of the first week of classes or within an equivalent period for nonstandard semesters. The assignment of a classroom seat to an individual student precludes any other student from occupying that seat. In addition, an instructor is assigned and the costs of instruction are encumbered on the first day of classes.

A student who withdraws from the University after the first week of classes has already occupied a classroom seat that cannot be reassigned. As a result, the University cannot both maintain its financial integrity and also provide a full refund. Accordingly, the University has established a series of refund deadlines commensurate with student progress into the semester.

It is the responsibility of the Business Office to administer the withdrawals process on a daily basis and to apply the published refund schedule to routine withdrawals. On those rare occasions when it can be documented that unanticipated and extenuating circumstances directly related to a student’s withdrawal warrant exceptional consideration, and the amount of the refund due is contested, the Business Office will inform the student of the appeal process and advise the student of the necessary procedures.

University Withdrawal Refund Appeal Procedures

The University Withdrawals Refund Appeal Committee is authorized to consider appeals and approve extraordinary exceptions to the University's published withdrawal refund schedule due to humanitarian and due-process considerations.

Guidelines for committee consideration of withdrawal appeals are:

1. The appeal must be submitted in writing to the Business Office and will be considered only in written form. A standardized appeal form must be submitted.

2. All requests for appeal must be submitted directly by the student through the Business Office and must meet one or more of the following criteria to be considered and approved by the appeals committee:
   a. Documentation of an accident, illness, injury, or incident which could not be influenced, predicted, planned for, or prevented by the student or the institution. This provision specifically excludes conditions or chronic illnesses known to the student at the time of enrollment.
   b. Demonstration that the application of the published refund policy would result in a specific and substantial personal hardship to the student. This provision specifically excludes circumstances or effects which would simply inconvenience the student or the student’s family.
   c. Documentation of substantiated circumstances where a student has in good faith relied upon the veracity of a University official's advice, or the official's interpretation of the text of a University document or publication, and was consequently misled or mistaken about the terms of the published refund policy.

3. The appeal must be initiated during the semester for which the refund is requested.

4. The appeal must involve a total withdrawal from the University. No partial withdrawals will be considered.

5. Appeals will only address whether or not a refund will be granted. No consideration will be given to grade assignment or other academic issues. Students must address such issues directly with the faculty members and the college. If applicable, requests for Extenuating Circumstances Withdrawals for grade change purposes must be resolved prior to deliberations by this committee.

6. Grounds for consideration of an appeal will be restricted to only those circumstances personally experienced by the enrolled individual with whom the University has a direct relationship. Loss or illness of a family member, close associate, or employee, and/or difficulty in family-operated businesses are excluded from consideration.

7. Decisions will be made by a simple majority vote of the committee membership and documented in writing by the chairperson. The student will be informed of the outcome of the appeal by letter from the Business Office.

Academic Programs

Associate’s Degree Programs

The University of South Carolina offers the Associate in Arts degree and the Associate in Science degree at the Union campus to those...
students who have earned 60 hours of credit and completed the following requirements:

- Learning Outcomes
- Carolina Core - All Associates
- Associate of Arts Degree Curriculum
- Associate of Science Degree Curriculum
- Other Requirements
- Second Associate's Degree

Learning Outcomes for Associate's Degree Programs

Graduates will be able to:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through writing.
- Apply the methods of mathematical, statistical, or analytical reasoning to critically evaluate data, solve problems, and effectively communicate findings verbally and graphically.
- Apply the principles and language of the natural sciences and associated technologies to historical and contemporary issues.
- Communicate in more than one language.
- Use the principles of historical thinking to understand past human societies.
- Use the principles of the social sciences to explore diverse cultural identities and to analyze political and environmental issues.
- Create or interpret literary, visual or performing arts.

and be able to demonstrate at least one of the following:

- Identify and analyze issues, develop logical and persuasive arguments, and communicate ideas clearly for a variety of audiences and purposes through speaking.
- Collect, manage and evaluate information using technology, and communicate findings.
- Examine different kinds of social and personal values, analyzing the ways in which these are manifested in communities as well as individual lives.

Carolina Core - 15 Hours

These serve as general education requirements common to all associate degrees.

CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours) Must be passed with a grade of C or higher

SCI: Scientific Literacy (3 Hours)

GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)

GSS: Global Citizenship and Multicultural Understanding: Social Sciences (3 Hours)

Associate of Arts Degree Curriculum - 60 Hours

1. Basic Requirements (including 15 hours of Carolina Core stated above) (37-38 Hours)

All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)

Must be passed with a grade of C or higher

- ARP: Analytical Reasoning and Problem-Solving (3 Hours)
  Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics

- SCI: Scientific Literacy (7-8 Hours)
  Must include at least 1 laboratory science course

- GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
  One 3-hour language course at any level or score of “2” on placement exam

- GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)

- GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)

- AIU: Aesthetic and Interpretive Understanding (6 Hours)

- Choose one of the following three options (3 Hours minimum):
  - CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
  - INF: Information Literacy (3 Hours)
  - VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (22-23 Hours)

Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. UofSC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a UofSC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate's degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Associate of Science Degree Curriculum - 60 Hours

1. Basic Requirements (including 15 hours of Carolina Core stated above) (38-42 Hours)

All course selections are from the approved Carolina Core Learning Outcomes list unless otherwise specified.

- CMW: Effective, Engaged and Persuasive Communication: Writing (6 Hours)
  Must be passed with a grade of C or higher

- ARP: Analytical Reasoning and Problem-Solving (6 Hours)
  Choose from MATH, CSCE, PHIL, STAT including MATH 111 Basic College Mathematics or MATH 115 Precalculus Mathematics

- SCI: Scientific Literacy (8-12 Hours)
  Must include at least 2 laboratory science courses

- GFL: Global Citizenship and Multicultural Understanding: Foreign Language (0-3 Hours)
  One 3-hour language course at any level or score of “2” on placement exam

- GHS: Global Citizenship and Multicultural Understanding: Historical Thinking (3 Hours)

- GSS: Global Citizenship and Multicultural Understanding: Social Sciences (6 Hours)

- AIU: Aesthetic and Interpretive Understanding (3 Hours)
• Choose one of the following three options (3 Hours minimum):
  • CMS: Effective, Engaged and Persuasive Communication: Speech (3 Hours)
  • INF: Information Literacy (3 Hours)
  • VSR: Values, Ethics and Social Responsibility (3 Hours)

2. Electives for A.A. Degrees (18-22 Hours)

Electives may be any additional courses not used to fulfill the previously stated requirements. Students who intend to apply these credits toward a baccalaureate degree awarded by another campus or institution are advised to work closely with an academic advisor to choose electives that will meet preliminary requirements of the four-year major they wish to pursue. Of particular importance is completion of general education requirements. UofSC Columbia requires a minimum of 31 general education credit hours and a student planning to pursue a UofSC Columbia baccalaureate degree must complete these hours. These hours can be incorporated within the 60 hours required for an AA or AS degree when electives are carefully selected. Applying for an associate’s degree does not in any manner affect eligibility to apply for a baccalaureate degree, and vice versa.

Other Requirements

In addition to the requirements for the A.A. and A.S. degrees stated above, the following stipulations also apply:

• Students must have an institutional GPA of 2.00 or better (does not include course grades earned by challenge examinations).
• A minimum of 15 semester hours must be earned at UofSC Union.
• No courses of a remedial, developmental, skill-acquiring, or vocational nature may apply as credit toward degrees.
• Pass-Fail option on elective courses is allowed.
• No more than 15 hours of nontraditional credits, which include DANTES, CLEP, and military experience.
• No more than 3 1-hour PEDU activity courses may count toward meeting Associate’s degree requirements (any track).

Second Associate’s Degree

At times the University of South Carolina Union confers a second associate’s degree upon candidates who have completed all requirements for the second degree, provided that the additional requirements for the second degree include a minimum of 12 semester hours beyond those required for the first degree earned at UofSC Union and a minimum of 72 semester hours total. Under this policy a student may apply for two degrees at one time or separately. In either case the student would receive two diplomas.

Baccalaureate Degree Programs

Palmetto College

Palmetto College combines the resources of the University of South Carolina system with the flexibility of course delivery formats including on-campus, traditional classes, two-way video classes, and online classes.

Faculties from Lancaster, Salkehatchie, Sumter, and Union, as well as Extended University in Columbia, use two-way interactive video to teach students at multiple sites simultaneously as well as fully online, asynchronous instruction. These delivery mechanisms give students access to many more course options than are available face-to-face on their campuses.

• Liberal Studies, B.A.
• Organizational Leadership, B.A.

University 101

University 101 is a three-hour seminar course, open for credit only to freshmen and to other undergraduate students (i.e., transfer students) in their first year at UofSC Union. This course provides an introduction to the nature and importance of university education and a general orientation to the functions and resources of the University.

The course helps new students adjust to the University, develop a better understanding of the learning process, and acquire essential academic survival skills. It also provides students a support group in a critical year by examining problems common to the new-student experience. Extensive reading and writing assignments relevant to the student’s college experience are required.

Organized in small groups of 20-25 students, University 101 is taught by faculty members and administrative personnel who have a special interest in working with new students. The course may be taken as part of a student’s regular load or as an overload. Course credit is awarded on a letter-grade basis. Credit is applicable as elective credit toward almost all baccalaureate degrees offered by the University.

Evening Classes

For the benefit of those whose personal or work schedules make day attendance impossible or impractical, UofSC Union offers numerous courses after 5 p.m., in two different formats: one hour and 15 minute classes meet twice per week in the early evening, and 2 hour and 45 minute classes meet once per week in the later evening.

Off-Campus/Laurens Classes

UofSC Union offers a variety of courses in Laurens at the Laurens location. This program offers area citizens the opportunity to begin their postsecondary education career near home. Students may expect to complete their freshman year before having to commute to Union or other area institutions to complete their degree. The local phone number is 864-983-1517.

Distributed Learning Courses

UofSC offers a variety of beginning and upper-division courses through the Office of Distributed learning. Courses are taught via live streaming video, DVD and hybrid formats.

Independent Study

These courses, numbered 399, are available for advanced students who wish to engage in additional study and research in specific areas of interest. Students work under the supervision of a UofSC Union professor, and a contract approved by the instructor, advisor, and academic dean is required.

Continuing Education

The University of South Carolina Union provides, based on need-available resources, a program of continuing education for the people of the region. The continuing education program consists of short courses, workshops, seminars, and activities covering a variety of topics. The purpose of continuing education is to allow people to increase their general knowledge, learn a skill, or satisfy a long-held curiosity. Participants in this program do not receive traditional grades but may be awarded
continuing education units (CEUs) in recognition of satisfactorily completing a UofSC nondegree program.

**Baccalaureate Degree Programs**

Many students who enter the Associate in Arts or the Associate in Science degree programs intend to apply these credits toward a baccalaureate degree awarded by another institution. These students are advised to work closely with their advisor to outline a program of study for the first two years that will meet preliminary requirements of the four-year major they wish to pursue.

These students are also strongly advised to obtain and use the bulletin for the Columbia campus when determining specific degree requirements. Preliminary general education course work toward the following UofSC degree programs may be taken at UofSC Union.

**Course Descriptions**

**A**
- Accounting (ACCT) (p. 1923)
- African Amer Studies (AFAM) (p. 1924)
- Anthropology (ANTH) (p. 1924)
- Art Education (ARTE) (p. 1924)
- Art History (ARTH) (p. 1924)
- Art Studio (ARTS) (p. 1924)

**B**
- Biology (BIOL) (p. 1925)

**C**
- Chemistry (CHEM) (p. 1925)
- Comp Sci & Comp Engr (CSCE) (p. 1926)
- Criminal Justice (CRJU) (p. 1926)

**E**
- Economics (ECON) (p. 1927)
- Education (EDUC) (p. 1927)
- Educational Psychology (EDPY) (p. 1927)
- English (ENGL) (p. 1927)
- Exercise Science (EXSC) (p. 1929)

**F**
- Film and Media Studies (FAMS) (p. 1929)
- French (FREN) (p. 1929)

**G**
- Geology (GEOL) (p. 1929)

**H**
- History (HIST) (p. 1929)
- Hlth Promo Educ & Beh (HPEB) (p. 1930)
- Hlth Serv Policy Mgmt (HSPM) (p. 1930)

**I**
- Instr and Teacher Educ (EDTE) (p. 1930)
- Integrated Info Tech (ITEC) (p. 1930)

**J**
- Journalism (JOUR) (p. 1930)

**L**
- Library & Info Science (SLIS) (p. 1930)

**M**
- Management (MGMT) (p. 1930)
- Management Science (MGSC) (p. 1931)
- Marine Science (MSCI) (p. 1931)
- Marketing (MKTG) (p. 1931)
- Mathematics (MATH) (p. 1931)
- Music (MUSC) (p. 1932)

**P**
- Palmetto College (PCAM) (p. 1932)
- Palmetto Programs (PALM) (p. 1932)
- Philosophy (PHIL) (p. 1933)
- Physical Education (PEDU) (p. 1933)
- Political Science (POLI) (p. 1933)
- Portuguese (PORT) (p. 1934)
- Psychology (PSYC) (p. 1934)

**R**
- Religious Studies (RELG) (p. 1935)

**S**
- Sociology (SOCY) (p. 1935)
- Spanish (SPAN) (p. 1936)
- Speech (SPCH) (p. 1937)
- Sport & Entertnmnt Mgmt (SPTE) (p. 1937)
- Statistics (STAT) (p. 1937)

**T**
- Theatre (THEA) (p. 1937)

**U**
- University Experience (UNIV) (p. 1937)

**W**
- Women & Gender Studies (WGST) (p. 1938)

**Accounting (ACCT)**

ACCT 225 - Introduction to Financial Accounting (3 Credits)

User-oriented approach to the study of financial accounting and reporting topics related to business decisions.
ACCT 226 - Introduction to Managerial Accounting (3 Credits)
User-oriented approach to the study of managerial accounting topics related to business decisions.
Prerequisites: ACCT 225.

ACCT 324 - Survey of Commercial Law (3 Credits)
Basic legal concepts and the judicial system, with emphasis on business law.

African Amer Studies (AFAM)
AFAM 201 - Introduction to African American Studies: Social and Historical Foundations (3 Credits)
Introduction to the key debates, figures, and concepts that are fundamental to the interdisciplinary study of the historical, political, and social development of black life in America.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

Anthropology (ANTH)
ANTH 101 - Primates, People, and Prehistory (3 Credits)
An exploration of human origins, human evolution, human prehistory, and cultural existence from its less complex forms to early civilizations. An introduction to the concepts, methods, and data of physical, biological, and archaeological anthropology.
Carolina Core: GSS

ANTH 102 - Understanding Other Cultures (3 Credits)
An exploration and comparison of selected contemporary cultures, including their languages. An introduction to the concepts, methods, and data of socio-cultural anthropology and anthropological linguistics.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ANTH 206 - Anthropology of Magic and Religion (3 Credits)
A comparative examination of such topics as ritual, cosmology, revitalization movements, magic, witchcraft, myth, and possession.
Cross-listed course: RELG 260

Art Education (ARTE)
ARTE 101 - Introduction to Art (3 Credits)
Introduction to art appreciation. Elements and principles of the visual arts, with examples from the history of art.
Carolina Core: AIU

Art History (ARTH)
ARTH 105 - History of Western Art (3 Credits)
The visual arts from Paleolithic times to the Renaissance.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 106 - History of Western Art (3 Credits)
The visual arts from the Renaissance to the present.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ARTH 346 - African Art (3 Credits)
Sculpture, painting, architecture of Sub-Saharan Africa.

ARTH 399 - Independent Study (3-9 Credits)
Graduation with Leadership Distinction: GLD: Research

Art Studio (ARTS)
ARTS 103 - Fundamentals of Art (3 Credits)
Introduction to visual thinking and principles of two-dimensional design.
Carolina Core: AIU

ARTS 104 - 3-Dimensional Design I (3 Credits)
Introduction to visual thinking and principles of three-dimensional design.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Research

ARTS 107 - Color and Composition (3 Credits)
Color, color theory, and compositional systems.
Prerequisites: ARTS 103.

ARTS 111 - Basic Drawing I (3 Credits)
Introduction to the materials and basic techniques of drawing.

ARTS 210 - Introduction to Painting (4 Credits)
An introductory course in the materials and techniques of painting.
Carolina Core: AIU

ARTS 215 - Introduction to Printmaking (4 Credits)
An introductory course in printmaking with emphasis on monotype, relief, and intaglio processes.

ARTS 225 - Introduction to Three-Dimensional Studies (4 Credits)
An introductory course in the concepts, materials, and techniques of three-dimensional media.
Prerequisites: C or better in ARTS 104.

ARTS 235 - Introduction to Fiber Arts (4 Credits)
An introductory course in the materials and processes of fiber arts.

ARTS 310 - Intermediate Painting I (4 Credits)
An exploration of painting as a means of multi-sensory expression through visual experience.

ARTS 311 - Intermediate Painting II (4 Credits)
An exploration of the depiction of space and form in painting with a continued emphasis on materials and techniques combined with individual creative expression.

ARTS 315 - Intermediate Printmaking I: Relief (4 Credits)
Linoleum, woodblock printing, and other relief techniques including the execution of original works in these media.

ARTS 399 - Independent Study (3-9 Credits)
Graduation with Leadership Distinction: GLD: Research

ARTS 410 - Advanced Painting I (4 Credits)
Advanced development of individual direction in painting the human figure from a live model. Special emphasis on material selection and formal principles of painting as applied toward individual goals.
Prerequisites: C or better in ARTS 310 or ARTS 311.

ARTS 411 - Advanced Painting II (4-6 Credits)
Advanced development of individual direction in painting and skills in the representation of the human figure working observationally from the live model. Special emphasis on material selection and formal principles of painting as applied toward individual goals.
Prerequisites: C or better in ARTS 310 or ARTS 311.
Biology (BIOL)

BIOL 101 - Biological Principles I (3 Credits)
Introductory survey of macromolecules, cell structure and function, genetics, and molecular biology.
Carolina Core: SCI

BIOL 101L - Biological Principles I Laboratory (1 Credit)
(Recommended concurrent with BIOL 101). Experimental examination of basic principles of cell biology, genetics and metabolism. Three hours per week.
Carolina Core: SCI

BIOL 102 - Biological Principles II (3 Credits)
Introductory survey of plant and animal development, physiology, ecology, and evolution. Three lecture hours per week.
Prerequisites: C or better in BIOL 101.
Corequisite: BIOL 102L.
Carolina Core: SCI

BIOL 110 - General Biology (4 Credits)
Basic biological concepts and issues for non-biology majors. Credit may not be given for both this course and BIOL 120. Three lecture, two laboratory hours per week.
Carolina Core: SCI

BIOL 110A - General Biology (Audio-Tutorial) (1 Credit)
Addendum to BIOL 110.

BIOL 120 - Human Biology (3 Credits)
Fundamental principles of human biology. Credit may not be given for both BIOL 110 and BIOL 120. Three lecture hours per week. Not for major credit.
Carolina Core: SCI

BIOL 120L - Laboratory in Human Biology (1 Credit)
Exercises dealing with basic concepts of human biology. Not for major credit.
Prerequisite or Corequisite: BIOL 120.
Carolina Core: SCI

BIOL 206 - Genetics and Society (3 Credits)
(Designed for non-major students.) Genetic principles, emphasizing human heredity. Relevance of recent advances in genetics. Three lecture hours per week.
Carolina Core: SCI

BIOL 208 - Our Hungry World from Malthus to McDonalds (3 Credits)
Scientific and social issues concerning the interrelationship of culture and agricultural biotic diversity and technology, climate change, resources management, food security, and human health.
Carolina Core: SCI, VSR

BIOL 243 - Human Anatomy and Physiology I (3 Credits)
Functional anatomy and physiology of the human body, including the integumentary, skeletal, muscular, and nervous systems. Not available for biology major credit. Three lecture hours per week.
Carolina Core: SCI

BIOL 243L - Human Anatomy and Physiology Laboratory (1 Credit)
The principles of anatomy and physiology as demonstrated by microscopic studies, animal dissection, and physiological experiments. One three-hour laboratory per week.
Prerequisite or Corequisite: BIOL 243.
Carolina Core: SCI

BIOL 244 - Human Anatomy and Physiology II (3 Credits)
Functional anatomy and physiology of the human body, including the cardiovascular, endocrine, excretory, reproductive, digestive, and respiratory systems. Not available for biology major credit. Three lecture hours per week.
Prerequisites: BIOL 243.

Carolina Core: SCI

BIOL 244L - Human Anatomy and Physiology Laboratory (1 Credit)
A continuation of BIOL 243L. One three-hour laboratory per week.
Corequisite: BIOL 244
Carolina Core: SCI

BIOL 250 - Microbiology (3 Credits)
An introduction to bacteria and viruses, emphasizing structure, metabolism, and pathogenesis. Discussion of infectious diseases, antigen-antibody relationships, and anti-microbial agents in chemotherapy. Not available for biology major credit. Three lecture hours per week.
Prerequisites: College-level Biology and Chemistry.
Corequisite: BIOL 250L.

BIOL 250L - Microbiology Laboratory (1 Credit)
Not available for biology major credit. Three hours per week.
Prerequisite or Corequisite: BIOL 250.

BIOL 270 - Introduction to Environmental Biology (3 Credits)
Basic ecological principles and the impacts of human population growth and technology. Not for major credit.
Carolina Core: SCI

BIOL 270L - Introduction to Environmental Biology Laboratory (1 Credit)
Demonstrations, data analyses, discussions, and films relating to human ecology, resource use, and environmental impact. Not for major credit. Two hours per week.
Prerequisite or Corequisite: BIOL 270.
Carolina Core: SCI

Chemistry (CHEM)

CHEM 101 - Fundamental Chemistry I (4 Credits)
A science elective surveying inorganic and solution chemistry. First of a terminal two-semester sequence. Three lecture, one recitation, and two laboratory hours per week.
Carolina Core: SCI
CHEM 102 - Fundamental Chemistry II (4 Credits)
An introductory survey of organic and biochemistry. Three lecture, one recitation, and two laboratory hours per week.
Prerequisites: 1 year high-school chemistry, CHEM 101, CHEM 111, or equivalent.

Carolina Core: SCI

CHEM 105 - Chemistry and Modern Society I (4 Credits)
A conceptual and qualitative approach to chemistry, its evolution, achievements, and goals and its impact on technology, the environment, and modern life and thought. (Specifically designed for non-science majors.) Three lecture and three laboratory hours per week.
Carolina Core: SCI

CHEM 107 - Forensic Chemistry (4 Credits)
Surveys chemical aspects of criminal investigation and adjudication including drug, arson, DNA, paint, and fiber identification. Three lecture and three laboratory hours per week.
Carolina Core: SCI

CHEM 111 - General Chemistry I (3 Credits)
Survey of the principles that underlie all chemistry with applications illustrating these principles. Three lecture and one recitation hours per week.
Prerequisites: C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math (or by placement score into MATH 122, MATH 141 or higher math).

Corequisite: CHEM 111L (unless grade of C or higher in CHEM 111L earned previously).

Carolina Core: SCI

CHEM 111L - General Chemistry I Lab (1 Credit)
Introduction to the principles and techniques of experimental chemistry with emphasis on formula investigations, equations, elementary statistics, and chemical reactivity.
Prerequisites: MATH 111 or MATH 115 or higher.
Prerequisite or Corequisite: CHEM 111.

Carolina Core: SCI

CHEM 112 - General Chemistry II (3 Credits)
Continuation of CHEM 111. Special emphasis on chemical equilibrium. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 111 and C or higher in MATH 111, MATH 115, MATH 122, MATH 141 or higher math.

Corequisite: CHEM 112L.

CHEM 112L - General Chemistry II Lab (1 Credit)
Continuation of CHEM 111L with emphasis on solution properties, kinetics, equilibrium, acids and bases, and qualitative analysis.
Prerequisites: C or higher in CHEM 111 and CHEM 111L or CHEM 141.
Prerequisite or Corequisite: CHEM 112.

CHEM 331L - Essentials of Organic Chemistry Laboratory I (1 Credit)
Laboratory safety, syntheses, separation, and purification of carbon compounds. For non-majors.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 332L - Essentials of Organic Chemistry Laboratory II (1 Credit)
Continuation of CHEM 331L. Spectroscopic identification of carbon compounds. For non-majors. Three lab hours per week.
Prerequisites: C or higher in CHEM 331L.

Corequisite: CHEM 334 (unless grade of C or higher in CHEM 334 earned previously).

CHEM 333 - Organic Chemistry I (3 Credits)
Contemporary theories, nomenclature, reactions, mechanisms, and syntheses of carbon compounds. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 112 or in CHEM 142.

CHEM 333L - Comprehensive Organic Chemistry Laboratory I (2 Credits)
Laboratory safety, synthesis, separation, and purification of carbon compounds. Required for chemistry majors. Six laboratory hours per week.
Corequisite: CHEM 333 (unless grade of C or higher in CHEM 333 earned previously).

CHEM 334 - Organic Chemistry II (3 Credits)
Continuation of CHEM 333. Three lecture and one recitation hours per week.
Prerequisites: C or higher in CHEM 333.

Comp Sci & Comp Engr (CSCE)

CSCE 101 - Introduction to Computer Concepts (3 Credits)
History, application, and social impact of computers; problem-solving, algorithm development, applications software, and programming in a procedural language.

Carolina Core: ARP

CSCE 102 - General Applications Programming (3 Credits)
Introduction to systematic computer problem-solving and programming for a variety of applications.

Carolina Core: ARP

CSCE 145 - Algorithmic Design I (4 Credits)
Problem-solving, algorithmic design, and programming. Three lectures and two laboratory hours per week.
Prerequisite or Corequisite: MATH 111 or MATH 115.

Carolina Core: ARP

CSCE 146 - Algorithmic Design II (4 Credits)
Continuation of CSCE 145. Rigorous development of algorithms and computer programs; elementary data structures. Three lecture hours and two laboratory hours per week.
Prerequisites: C or better in CSCE 145.

Prerequisite or Corequisite: MATH 122 or MATH 141.

Criminal Justice (CRJU)

CRJU 101 - The American Criminal Justice System (3 Credits)
Survey of crime and societal responses to crime, including law enforcement, courts, corrections, and the juvenile justice system.
Carolina Core: GSS

CRJU 311 - Policing (3 Credits)
Current and historical perspectives on American policing.
CRJU 312 - Corrections (3 Credits)
Current and historical perspectives on incarceration and its alternatives.

CRJU 313 - Criminal Courts (3 Credits)
Structure and organization of the federal and state criminal court systems and personnel.

CRJU 314 - Criminal Law (3 Credits)
Origin and development of criminal law in America. Basic elements of crimes and defenses.

CRJU 322 - Drugs and Crime (3 Credits)
Overview of criminal justice system responses to illegal substances. Relationship between substance abuse and crime.

CRJU 323 - Violence in America (3 Credits)
Historical overview of violence in American society, including theoretical perspectives on the causes and prevention of violence.

CRJU 341 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.
Cross-listed course: SOCY 353
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 351 - Juvenile Delinquency (3 Credits)
Social factors in the development, identification, and treatment of delinquents.
Prerequisites: CRJU 101 OR SOCY 101.
Cross-listed course: SOCY 350
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

CRJU 421 - Victimization (3 Credits)
Causes and consequences of criminal victimization and public policy responses to victimization issues.

CRJU 422 - Alternatives to Incarceration (3 Credits)
Correctional alternatives to imprisonment including probation, parole, and various community correctional programs.

CRJU 426 - Criminal Justice and Mental Health (3 Credits)
Interface between the mental health sciences and the criminal justice system.

CRJU 440 - Homeland Security and Terrorism (3 Credits)
The nature of terrorism; its history; its methodology; and its application to criminological theory.

CRJU 491 - Special Topics (3 Credits)
Topics in criminology and criminal justice. Individual topics to be announced by title. May be repeated once with consent of advisor.

Economics (ECON)

ECON 221 - Principles of Microeconomics (3 Credits)
The study of supply and demand, pricing and cost concepts, firm and consumer decision-making, market structure, and government policies.

ECON 222 - Principles of Macroeconomics (3 Credits)
The study of gross domestic product, business cycles, economic growth, inflation, unemployment, and monetary and fiscal policy.

ECON 224 - Introduction to Economics (3 Credits)
The study of supply and demand, markets, household and firm decision-making, gross domestic product, inflation, unemployment, and government policies. Open to all students except business administration and economics majors.

Education (EDUC)

Educational Psychology (EDPY)

EDPY 401 - Learners and the Diversity of Learning (3 Credits)
Overview of psychological theories and research as it applies to education, including theories of learning, child and adolescent development, cognitive processes, classroom practices, individual differences/student diversity, and motivation.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

English (ENGL)

ENGL 101 - Critical Reading and Composition (3 Credits)
Instruction in strategies for critically reading and analyzing literature and non-literary texts; structured, sustained practice in composing expository and analytical essays.
Carolina Core: CMW

ENGL 102 - Rhetoric and Composition (3 Credits)
Instruction and intensive practice in researching, analyzing, and composing written arguments about academic and public issues.
Prerequisites: C or better in ENGL 101 or equivalent credit.
Carolina Core: CMW, INF

ENGL 200 - Creative Writing, Voice, and Community (3 Credits)
Workshop course on creative writing with a focus on values, ethics, and social responsibility.
Prerequisites: ENGL 101 and ENGL 102.
Carolina Core: AIU, VSR

ENGL 270 - World Literature (3 Credits)
Selected masterpieces of world literature from antiquity to present.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Cross-listed course: CPLT 270
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 282 - Special Topics in Fiction (3 Credits)
Special topics in fiction from several countries and historical periods, illustrating the nature of the genre. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.
Carolina Core: AIU

ENGL 283 - Special Topics in British Literature (3 Credits)
Special topics in British literature exemplifying persistent themes of British culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and 102 or equivalent.
Carolina Core: AIU
Graduation with Leadership Distinction: GLD: Global Learning

ENGL 284 - Drama (3 Credits)
Drama from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and 102 or equivalent.
Carolina Core: AIU
ENGL 285 - Special Topics in American Literature (3 Credits)
Special topics in American literature exemplifying persistent themes of American culture. May be repeated for credit. Content varies by title and semester.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 286 - Poetry (3 Credits)
Poetry from several countries and historical periods, illustrating the nature of the genre.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 287 - American Literature (3 Credits)
An introduction to American literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 288 - English Literature (3 Credits)
An introduction to English literary history, emphasizing the analysis of literary texts, the development of literary traditions over time, the emergence of new genres and forms, and the writing of successful essays about literature. Designed for English majors.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Carolina Core: AIU

ENGL 289 - Teaching Writing in One-to-One Sessions (3 Credits)
The study of theories and pedagogy of individualized writing instruction with intensive writing practice including hands-on one-on-one sessions. Recommended for prospective writing teachers.
Prerequisites: ENGL 101 and ENGL 102 or equivalent.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: FAMS 350

ENGL 360 - Creative Writing (3 Credits)
Workshop course on writing original fiction, poetry, drama, and creative nonfiction.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Community Service

ENGL 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Research

ENGL 411 - British Romantic Literature (3 Credits)
Poetry and prose of the English Romantic period.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 420 - American Literature to 1830 (3 Credits)
Colonial, Revolutionary, and early Romantic poetry and prose.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 425A - The American Novel to 1914 (3 Credits)
Representative novels from the 18th century to World War I.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 425B - The American Novel Since 1914 (3 Credits)
Representative novels from 1914 to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 427 - Southern Literature (3 Credits)
Representative works of Southern writers.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 428A - African-American Literature I: to 1903 (3 Credits)
Representative of African-American writers to 1903.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: AFAM 428A
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 428B - African-American Literature II: 1903 – Present (3 Credits)
Representative works of African-American writers from 1903 to the present.
Prerequisites: ENGL 101 and ENGL 102.

Cross-listed course: AFAM 428B
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

ENGL 429 - Topics in American Literature (3 Credits)
Intensive study of selected topics. May be repeated for credit under a different title.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 436 - Science Fiction Literature (3 Credits)
Representative masterworks of science fiction from the beginnings of the genre to the present.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 437 - Women Writers (3 Credits)
Representative works written by women.
Prerequisites: C or higher in both ENGL 101 and ENGL 102.

Cross-listed course: WGST 437
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ENGL 460 - Advanced Writing (3 Credits)
Extensive practice in different types of nonfiction writing.
Prerequisites: ENGL 101 and ENGL 102.

ENGL 463 - Business Writing (3 Credits)
Extensive practice in different types of business writing, from brief letters to formal articles and reports.
Prerequisites: ENGL 101 and ENGL 102.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences, GLD: Research
Exercise Science (EXSC)

EXSC 191 - Physical Activity and Health (3 Credits)
Concepts of exercise, nutrition, behavior changes, and skills to promote lifelong physical activity and health.

Film and Media Studies (FAMS)

FAMS 180 - Film Culture (3 Credits)
How the film industry developed and the impact the movies have had on global popular culture. Does not count toward the film studies major.
Carolina Core: AIU

FAMS 240 - Film and Media Analysis (3 Credits)
Introduction to the critical study of film and media. Students will closely analyze moving images and develop written arguments about film and media.
Carolina Core: AIU

FAMS 350 - Introduction to Comics Studies (3 Credits)
Scholarly study of the formal and aesthetic evolutions of graphic novels, comic books, and other related forms.
Cross-listed course: ENGL 350

French (FREN)

FREN 290 - French Literature in Translation (3 Credits)
Readings and discussion in English, with consideration of the cultural context.
Carolina Core: AIU

Geology (GEOL)

GEOL 101 - Introduction to the Earth (4 Credits)
Origin and nature of the earth with emphasis on internal processes and phenomena such as earthquakes, volcanoes, and mountain building; surface processes, including landform evolution. Three lectures and three laboratory hours each week.
Carolina Core: SCI

History (HIST)

HIST 101 - European Civilization from Ancient Times to the Mid-17th Century (3 Credits)
The rise and development of European civilization from its Mediterranean origins through the Renaissance and Reformation.
Carolina Core: GHS

HIST 102 - European Civilization from the Mid-17th Century to the Present (3 Credits)
European development and expansion from the mid-17th century to the present.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 104 - Introduction to the Civilization of the Islamic Middle East (3 Credits)
An analysis which treats the major cultural elements of traditional Islamic civilization and then concentrates upon the reactions of the Arabs, Turks, and Iranians to the problems of adjusting to the modern world.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 105 - Introduction to East Asian Civilization (3 Credits)
The evolution of social, political, and cultural patterns in East Asia, with emphasis on the development of philosophical, religious, and political institutions and their relationship to literary and artistic forms in China and Japan.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 106 - Introduction to African History (3 Credits)
An examination of several traditional sub-Saharan African societies and of their political and economic transformation in the modern, colonial, and post-independence periods.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 109 - Introduction to Latin American Civilization (3 Credits)
A discussion of the political, cultural, and economic forces which have conditioned the development of institutions and ideas in Spanish and Portuguese America.
Carolina Core: GHS
Graduation with Leadership Distinction: GLD: Global Learning

HIST 111 - United States History to 1865 (3 Credits)
A general survey of the United States from the era of discovery to 1865, emphasizing major political, economic, social, and intellectual developments.
Carolina Core: GHS

HIST 112 - United States History since 1865 (3 Credits)
A general survey of the United States from 1865 to the present, emphasizing major political, economic, social, and intellectual developments. Honors sections are available for students in the honors program.
Carolina Core: GHS

HIST 334 - The History of Russia from the Earliest Times to the Mid-19th Century (3 Credits)
The earliest life on the steppe, the Kievan State, the foundations of Moscow, and the Russian empire to the reign of Nicholas I.

HIST 335 - The History of Modern Russia and the Soviet Union (3 Credits)
The decline of Imperial Russia, the Revolution of 1917, Lenin, Stalin, and the Soviet Union since Stalin.

HIST 347 - The Middle East in Modern Times (3 Credits)
The impact of modern civilization upon the Middle East, including the history of the Arab, Turkish, Iranian, and Israeli segments of the Middle East during the 19th and 20th centuries.
Graduation with Leadership Distinction: GLD: Global Learning, GLD: Professional and Civic Engagement Leadership Experiences

HIST 351 - Africa to 1800 (3 Credits)
Social, cultural, economic, and political developments, focusing on internally and externally generated changes.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 352 - Africa since 1800 (3 Credits)
Commercial and religious revolutions of the 19th century, imposition and ending of formal colonial rule, and post-colonial issues.
Graduation with Leadership Distinction: GLD: Global Learning
HIST 385 - The Expansion of Christianity (3 Credits)
Critical epochs in the spread of Christianity. Consideration of the great crises that shaped the structure and form of Christianity during the last 20 centuries: the Hellenistic world; the medieval syntheses; the breakup of Western Christian unity; the transition to worldwide mission activity in the industrial age.
Graduation with Leadership Distinction: GLD: Global Learning

HIST 399 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

HIST 423 - History of Mexico (3 Credits)
Mexico from the pre-conquest period to the present, with an emphasis on modern Mexico.
Cross-listed course: LASP 442

HIST 442 - The Old South (3 Credits)
Development of Southern society and of the forces that made the South a distinctive section of the United States.

HIST 443 - The New South (3 Credits)
Reconstruction, the Bourbon era, agrarian revolt, industrial revolution, racial problems, and the changes resulting from the impact of two world wars and the New Deal (1865-1946).
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HIST 451 - The History of American Medicine (3 Credits)
The development of the art and science of medicine as practiced in the United States from colonial times to Medicare. Emphasis on the social history of American medicine.

HIST 452 - The History of Science in America (3 Credits)
The development of science in America from colonial times to the present. Special attention will be given to defining those factors, scientific, economic, and social, which have raised American science to its commanding position in the 20th century.

Hlth Promo Educ & Beh (HPEB)

HPEB 321 - Personal and Community Health (3 Credits)
Psychosocial health, stress management, leading infectious and noninfectious diseases, nutrition, physical fitness, sexuality, consumer health and health care access, environmental health, aging, and death.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

HPEB 502 - Applied Aspects of Human Nutrition (3 Credits)
Application of nutrition principles including functions of food and nutrients in health and disease prevention throughout the life cycle. Applied topics include weight management, food safety, and other contemporary issues.
Graduation with Leadership Distinction: GLD: Community Service

Hlth Serv Policy Mgmt (HSPM)

HSPM 412 - Health Economics (3 Credits)
Designed to serve as an introduction to economic principles and applications used in the health sector. The role economics plays in various aspects of health care, demand-side and supply-side factors and issues, how various health care systems are impacted.

Instr and Teacher Educ (EDTE)

EDTE 201 - Issues and Trends in Teaching and Learning (3 Credits)
Introduces and examines current issues and trends in teaching and learning.

Integrated Info Tech (ITEC)

ITEC 242 - Business Communications (3 Credits)
Theory and processes in written business communications; composing effective business letters and reports.
Prerequisites: C or better in both ENGL 101 and ENGL 102.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

ITEC 264 - Computer Applications in Business I (3 Credits)
Survey of core skills and techniques for spreadsheet design and analysis of business problems.

Journalism (JOUR)

JOUR 101 - Media and Society (3 Credits)
Principles, history, philosophies, theories of the mass media and allied professions and their societal role and impact.

JOUR 201 - Principles of Public Relations (3 Credits)
Methods used by business, government, consumer groups, minorities, environmentalists, and others to influence public attitudes toward their activities.

JOUR 203 - Principles of Visual Communications (3 Credits)
Theory and history of visual communication in the mass media emphasizing informational and persuasive messages created by graphic, photographic, and multimedia processes.

Library & Info Science (SLIS)

SLIS 201 - Introduction to Information Science (3 Credits)
Major concepts, principles, theories, issues, and trends in the development of Information Science.

SLIS 202 - Introduction to Information Literacy and Technology (3 Credits)
An introduction to the basic information technologies used in all types of information organizations and the essential concepts and skills needed for information literacy.
Carolina Core: INF

Management (MGMT)

MGMT 371 - Principles of Management (3 Credits)
A comprehensive survey of the basic principles of management applicable to all forms of business. The course provides the student with a basis for thinking about complex business situations in the framework of analysis of the management process.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences
MGMT 374 - Strategic Human Resource Management (3 Credits)
A survey of the major approaches used in managing human resources. Covers selection, compensation, legal compliance, discipline, organizational restructuring, TQM, motivation, labor relations, and performance management.
Prerequisites: MGMT 371.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

MGMT 376 - Employee Engagement (3 Credits)
Introduction to human behavior in organizations. Emphasis on factors that contribute to the effectiveness of individuals and groups in organizations.
Prerequisites: MGMT 371.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

MGMT 401 - Negotiation and Conflict in the Workplace (3 Credits)
This course is designed to improve students' knowledge and skills in the areas of workplace conflict resolution and negotiations.
Prerequisites: MGMT 371.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

MGMT 406 - International Human Resource Management (3 Credits)
This course examines how human resources are managed within a global context. It examines how human resources are managed within global firms as well as across different cultural settings.
Prerequisites: MGMT 374.

Cross-listed course: IBUS 406
Graduation with Leadership Distinction: GLD: Global Learning

Management Science (MGSC)

MGSC 290 - Computer Information Systems in Business (3 Credits)
An introduction to the effective use of information systems tools in day-to-day business communications, analysis, and decision making.

MGSC 291 - Applied Statistics for Business (3 Credits)
Descriptive statistics, topics in probability, statistical inference and modeling. Emphasis on the collection, summarization, analysis, and reporting of numerical findings relevant to business decisions and economic analysis.
Prerequisites: STAT 206.

Marine Science (MSCI)

MSCI 210 - Oceans and Society (3 Credits)
A nontechnical introduction to human interactions with the marine environment: marine organisms, marine systems, and the physical and chemical characteristics of oceans and estuaries. Not available for marine science major credit.
Carolina Core: SCI

MSCI 210L - Oceans and Society Laboratory (1 Credit)
Experiments and exercises which illustrate how specific components of marine environments are structured, function, and can be measured. Two laboratory hours per week. Not available for marine science major credit. Attendance on designated field trips may be required.
Prerequisite or Corequisite: MSCI 210.
Carolina Core: SCI

Marketing (MKTG)

MKTG 350 - Principles of Marketing (3 Credits)
Principles and concepts underlying marketing functions, including the conception, pricing, promotion, and distribution of products and services and the role of marketing in society. A. major sections; ECON 224, ACCT 222 for non-B.A. major sections.
Prerequisites: ECON 221/ECON 222, ACCT 225/ACCT 226 for B.

Mathematics (MATH)

MATH 111 - Basic College Mathematics (3 Credits)
Basic college algebra; linear and quadratic equations, inequalities, functions and graphs of functions, exponential and logarithm functions, systems of equations.
Prerequisites: placement through Algebra version of the Mathematics Placement Test.

MATH 1111 - Intensive Basic College Mathematics (4 Credits)
An intensive treatment of the topics covered in MATH 111.
Prerequisites: placement through Algebra version of the Mathematics Placement Test.

MATH 115 - Precalculus Mathematics (4 Credits)
Topics in algebra and trigonometry specifically needed for MATH 141, MATH 142, MATH 241. Subsets of the real line, absolute value; polynomial, rational, inverse, logarithm, exponential functions; circular functions; analytic trigonometry.
Prerequisites: C or better in MATH 111 or MATH 111I or placement through Precalculus version of the Mathematics Placement Test.

MATH 122 - Calculus for Business Administration and Social Sciences (3 Credits)
Derivatives and integrals of elementary algebraic, exponential, and logarithmic functions. Maxima, minima, rate of change, motion, work, area under a curve, and volume.
Prerequisites: C or better in MATH 111, MATH 111I or MATH 115 or placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 141 - Calculus I (4 Credits)
Functions, limits, derivatives, introduction to integrals, the Fundamental Theorem of Calculus, applications of derivatives and integrals. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in Math 112, MATH 115, or MATH 116, or placement through Precalculus version of the Mathematics Placement Test.
Carolina Core: ARP

MATH 142 - Calculus II (4 Credits)
Methods of integration, sequences and series, approximations. Four classroom hours and one laboratory hour per week.
Prerequisites: C or better in MATH 141.
Carolina Core: ARP
MATH 170 - Finite Mathematics (3 Credits)
Elementary matrix theory; systems of linear equations; permutations and combinations; probability and Markov chains; linear programming and game theory.
Prerequisites: C or better in MATH 111 or MATH 111I or MATH 122, or placement through Algebra version of the Mathematics Placement Test.

Carolina Core: ARP

MATH 221 - Basic Concepts of Elementary Mathematics I (3 Credits)
The meaning of number, fundamental operations of arithmetic, the structure of the real number system and its subsystems, elementary number theory. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 111 or MATH 111I or placement through Algebra version of the Mathematics Placement Test.

MATH 222 - Basic Concepts of Elementary Mathematics II (3 Credits)
Informal geometry and basic concepts of algebra. Open only to students in elementary or early childhood teacher certification.
Prerequisites: C or better in MATH 221.

MATH 241 - Vector Calculus (3 Credits)
Vector algebra, geometry of three-dimensional space; lines, planes, and curves in space; polar, cylindrical, and spherical coordinate systems; partial differentiation, max-min theory; multiple and iterated integration, line integrals, and Green's theorem in the plane.
Prerequisites: C or better in MATH 142.

MATH 242 - Elementary Differential Equations (3 Credits)
Ordinary differential equations of first order, higher order linear equations, Laplace transform methods, series methods; numerical solution of differential equations. Applications to physical sciences and engineering.
Prerequisites: C or better in MATH 142.

MATH 399 - Independent Study (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.
Graduation with Leadership Distinction: GLD: Research

Music (MUSC)

MUSC 110 - Introduction to Music (3 Credits)
Perceptive listening and appreciation of musical elements, forms and style periods, including composers' lives, individual styles and representative works. Emphasis on classical music; jazz and American popular music included.
Carolina Core: AIU

MUSC 114 - Introduction to Music Theory (3 Credits)
Carolina Core: AIU

MUSC 140 - Jazz and American Popular Music (3 Credits)
Development of jazz and American popular music through the study of important soloists, ensembles, arrangers, and composers.
Carolina Core: AIU

Palmetto College (PCAM)

PCAM 104 - Foundations of Composition (3 Credits)
A course in writing skills with practice in composing essays, including intensive review of grammar, punctuation, and mechanics.

PCAM 105 - Contemporary College Mathematics (3 Credits)
Linear and quadratic equations and models, functions, exponential models, logarithms, systems of equations, fundamentals of probability and statistics.

PCAM 106 - Foundations of College Algebra (3 Credits)
Operations on real numbers, linear equations and inequalities, quadratic equations, factoring, absolute value equations, exponential and radical expressions, graphs, and functions. Additional topics may include math study skills, logarithms, exponential functions, probability, statistics, systems of equations, polynomial division, and mathematical modeling.
Prerequisites: C or better in PCAM 106 students must pass the math placement test (MPT) with a minimum score of MB1 or MA2.

PCAM 141 - Introduction to Computer Keyboarding (3 Credits)
Keyboarding using the touch method, inputting, editing, and printing. Designed for students without keyboarding skills. Elective credit only. This course might not apply toward associate's degrees or Columbia baccalaureate degrees.

PCAM 151 - Computer Literacy and Applications (3 Credits)

PCAM 201 - Introduction to Internet Research (3 Credits)
Developing the means by which students may learn to access the Internet through mainframe and PC connections to accomplish specific research needs. This course might not apply toward associate’s degrees or Columbia baccalaureate degrees.
Prerequisites: CSCE 101.

PCAM 205 - Foundations of Leadership (3 Credits)
This course combines leadership theory with practical application, equipping students with the knowledge and skills needed to work more effectively with people, become better leaders, and reach their professional goals.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PCAM 299 - Independent Study (1-6 Credits)
Contract approved by instructor, advisor, and academic dean is required for undergraduate studies. May be taken for elective credit only. May be repeated for up to 6 credits hours.

Palmetto Programs (PALM)

PALM 401 - Palmetto Senior Capstone Experience (3 Credits)
Integration of interdisciplinary program of study and general education; intensive writing and research project.
Prerequisites: PALM 493 and PALM 494 or PALM 495.

PALM 493 - South Carolina Studies (3 Credits)
Reading and writing about South Carolina from the perspective of multiple disciplines, incorporating elements of the student's major and cognate.
**Philosophy (PHIL)**

**PHIL 102 - Introduction to Philosophy** (3 Credits)
An introduction to the main problems of philosophy and its methods of inquiry, analysis, and criticism. Works of important philosophers will be read. Honors section offered.

**PHIL 111 - Introduction to Logic II** (3 Credits)
Philosophical foundations of inductive inference, including probability, statistics, and decision theory; application of the methods and results of inductive inference to philosophical problems such as the problem of rationality, epistemology, theory confirmation, social and political philosophy.

Prerequisites: At least one of the following: PSYC 227; SOCY 220; STAT 110, STAT 112, STAT 201, STAT 205, or STAT 206; MGSC 291.

**Carolina Core:** ARP

**PHIL 114 - Introduction to Formal Logic I** (3 Credits)
Formal logic, including foundational logical concepts, syntax and semantics of first-order logic; derivations; applications.

**Carolina Core:** ARP

**PHIL 211 - Contemporary Moral Issues** (3 Credits)
Moral issues confronting men and women in contemporary society. Topics will vary but may include discussion of problems related to abortion, drugs, euthanasia, war, social engineering, and punishment of criminals.

**Carolina Core:** VSR

Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**PHIL 302 - Greek and Roman Philosophy after Aristotle** (3 Credits)
Problems such as hedonism, providence, belief and evidence, and mysticism, as they appear in the writings of Epicureans, Stoics, Sceptics, and Plotinus.

Cross-listed course: CLAS 302

**PHIL 310 - American Philosophy** (3 Credits)
The principal movements of philosophical thought from Colonial times to the present, with special emphasis on the 19th and 20th centuries.

**PHIL 320 - Ethics** (3 Credits)
A study of the moral principles of conduct and the basic concepts underlying these principles, such as good, evil, right, wrong, justice, value, duty, and obligation. The ethical works of influential philosophers are analyzed in terms of these concepts.

**Carolina Core:** VSR

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

**PHIL 324 - Business Ethics** (3 Credits)
Ethical problems in business; application to business situations of philosophical theories of individual, corporate, and governmental rights and responsibilities.

**Carolina Core:** VSR

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

**PHIL 399 - Independent Study** (3-9 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students.

Graduation with Leadership Distinction: GLD: Research

**Physical Education (PEDU)**

**PEDU 104 - Personal Fitness and Weight Control** (1 Credit)
Advanced techniques for controlling weight and improving fitness through exercise, lectures, and self-evaluation.

**PEDU 105 - Weight Training** (1 Credit)
Fundamentals of progressive resistance exercise training.

**PEDU 106 - Advanced Weight Training** (1 Credit)
Advanced techniques.

*Prerequisites: PEDU 105.*

**PEDU 107 - Group Exercise** (1 Credit)
Cardio-respiratory fitness, flexibility, muscular strength and endurance, and agility through various group exercise formats while utilizing a variety of equipment.

**PEDU 113 - Bowling** (1 Credit)
Fundamental skills and techniques of bowling.

**PEDU 129 - Racquetball** (1 Credit)
Fundamental skills, rules, and terminology.

**PEDU 153 - Cardiopulmonary Resuscitation** (1 Credit)
Knowledge and skills in providing artificial respiration, first aid for foreign body obstruction, one and two rescuer CPR for adults, infants, and children.

**PEDU 174 - Social Dance** (1 Credit)
Fundamental skills and terminology.

**PEDU 182 - Backpacking** (1 Credit)
Living in the out-of-doors; gear selection, map and compass reading, backpacking, hiking, and camping.

**PEDU 187 - Rock Climbing** (1 Credit)
Fundamentals of rock and mountain climbing including gear selection and use, knots and rope management, anchoring systems, belaying, rappelling, climbing techniques, and safety considerations.

**PEDU 190 - Introduction to the Description and Analysis of Human Movement** (2 Credits)
Analysis and performance of fundamental motor skills.

**PEDU 275 - Functional Musculoskeletal Anatomy** (3 Credits)
Knowledge and skill of orthopedic anatomy relative to muscle, ligament, and tendon origin, insertion, innervation, and action.

**Political Science (POLI)**

**POLI 111 - Controversies in American Politics** (3 Credits)
An introduction to the analysis of key issues in contemporary American politics focusing on the arguments, the groups involved, and the political factors that influence the outcome of the debate.
POLI 201 - American National Government (3 Credits)
The formation and development of the national government, its organization and powers. Overlay Course.
Carolina Core: GSS, VSR

POLI 357 - Film, Politics, and Social Change (3 Credits)
Critical analysis of film as expression and agent of political cultural, ideology, and change.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

POLI 365 - State Government (3 Credits)
A study of state-federal relations, relations among states, state constitutions, and the structure and functions of the three branches of government. Emphasis is given to South Carolina.

POLI 368 - Interest Groups and Social Movements (3 Credits)
The mobilization, organization, tactics, and results of group-based politics, including latent interests and the suppression of interests.
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

POLI 370 - Introduction to Public Administration (3 Credits)
A study of the basic principles and theory of administrative structure, responsibility, and control in relation to policy making in the modern state.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

POLI 374 - Public Policy (3 Credits)
Process of and major approaches to making public policy particularly, in the United States. Case study materials will focus on such major policies as welfare, health care, national security, and resource management.

POLI 399A - Independent Study in Political Science (1-6 Credits)
Prior approval of and individualized contract by the director of undergraduate studies in political science and the instructor who will supervise the project required.
Graduation with Leadership Distinction: GLD: Research

POLI 399B - Independent Study in International Studies (1-6 Credits)
Prior approval of an individualized contract by the director of undergraduate studies in international studies and the instructor who will supervise the project required.
Graduation with Leadership Distinction: GLD: Research

POLI 463 - The American Chief Executive (3 Credits)
Constitutional, statutory and political powers and roles of the American chief executive.

POLI 465 - Psychology and Politics (3 Credits)
The role of psychology in political attitudes and behavior. Examination of individual psycho-political relationships and aggregate typologies. Particular emphasis on the psychological roots of the need for or the rejection of political authority.
Prerequisites: PSYC 101.

POLI 570 - South Carolina Government and Politics (3 Credits)
South Carolina state and local government in the context of South Carolina history and U.S. state and local government.

Portuguese (PORT)

PORT 121 - Elementary Portuguese (3 Credits)
Grammar and practical vocabulary necessary for fundamental communication skills. Assumes no prior experience in the language.
Carolina Core: GFL

PORT 122 - Basic Proficiency in Portuguese (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: PORT 121.
Carolina Core: GFL

Psychology (PSYC)

PSYC 101 - Introduction to Psychology (3 Credits)
An introduction to and survey of the basic concepts and findings within the field of psychology.
Carolina Core: GSS

PSYC 226 - Research Methods in Psychology (3 Credits)
Basic principles and methodology.
Prerequisites: PSYC 101 or SCHC 130.

Graduation with Leadership Distinction: GLD: Research

PSYC 300 - Human Sexual Behavior (3 Credits)
Psychological, physiological, and sociological factors of human sexual behavior and attitudes.

PSYC 301 - Psychology of Marriage (3 Credits)
The psychological, physiological, and social characteristics of marriage.
Cross-listed course: WGST 301
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PSYC 310 - Psychology of Women (3 Credits)
Women's experiences: childhood and adolescence, work, family, cultural images, adjustment, and social change.
Cross-listed course: WGST 310
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PSYC 330 - Psychology and the African-American Experience (3 Credits)
Psychological theory and research as it applies to African Americans. Explores Africentric and other perspectives and roles of culture, racism, and historical phenomena.
Cross-listed course: AFAM 330
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

PSYC 350 - Industrial Psychology (3 Credits)
Psychological techniques applied to various industrial problem areas, such as management and supervision, morale, efficiency, training, personnel selection and placement, and relations among personnel.

PSYC 360 - Applied Psychology (3 Credits)
Uses of psychological knowledge and techniques in practical contexts; clinical, school, industrial, consumer, and environmental psychology.

PSYC 370 - Psychology of Consciousness (3 Credits)
Theories, controversies, and research findings on the nature of various states of consciousness; topics such as sleep/dreams, hypnosis, drug-induced states, and psychic phenomena.
PSYC 380 - Sport Psychology (3 Credits)
The role of sports in socialization, personality development and competence, including: spectator-performer interactions, motivation, competition effects; and the application of psychological techniques to performance enhancement.

PSYC 399 - Independent Study (1-6 Credits)
Closely supervised project or research experience in psychology. Approved contract required. May be repeated for up to six credits. Not for psychology major credit.
Prerequisites: PSYC 101.

Graduation with Leadership Distinction: GLD: Research

PSYC 400 - Survey of Learning and Memory (3 Credits)
Research and applications concerning the acquisition of new behavior and knowledge, including accounts based on classical and instrumental conditioning and on information-processing models.
Prerequisites: PSYC 101 or SCHC 130.

PSYC 405 - Cognitive Psychology (3 Credits)
Research and theories on sensory memory, attention, short-term and working memory, human learning and forgetting, imagery, long-term memory, speech perception, reading, language, thinking and problem solving, and decision making.

PSYC 410 - Behavioral and Mental Disorders (3 Credits)
Covers the classification, diagnosis, etiological theories, and treatments of the major mental and emotional disorders.
Prerequisites: PSYC 101 or SCHC 130.

PSYC 420 - Survey of Developmental Psychology (3 Credits)
Psychological development from conception to late adulthood. Topics include physical, cognitive, and social processes associated with development at each stage of the life cycle.
Prerequisites: PSYC 101 or EDPY 335 or SCHC 130.

PSYC 430 - Survey of Social Psychology (3 Credits)
Introduction to theory and research in social psychology from a psychological viewpoint. Topics include social perception, social cognition, attitudes, interpersonal relationships, aggression, prosocial behavior, and group processes.
Prerequisites: PSYC 101 or SCHC 130.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

PSYC 440 - Survey of Personality (3 Credits)
Covers the major theories and research on personality and the dynamics of human motivation.
Prerequisites: PSYC 101 or SCHC 130.

Graduation with Leadership Distinction: GLD: Research

PSYC 455 - Introduction to Neuroscience (3 Credits)
Function of the brain including basic neuroanatomy, neurophysiology and neurochemistry, neural systems, and psychopharmacology as it relates to behavior.

PSYC 460 - Brain and Behavior (3 Credits)
How the brain mediates simple and complex behavior and how we can apply basic research about the brain to real world problems.
Prerequisites: PSYC 101 or SCHC 130.

PSYC 501 - Human Factors Psychology (3 Credits)
Application of research in experimental psychology to ergonomics, the design of human-environment systems, with emphasis on work settings.
Prerequisites: PSYC 101 and 9 hours of upper-level courses all in psychology, business, engineering, or nursing.

PSYC 520 - Psychology of Child Development (3 Credits)
Examination of development from conception through older childhood. Specific cognitive and social processes will be given in-depth study.
Prerequisites: PSYC 420.

Religious Studies (RELG)

RELG 120 - Comparative Religion (3 Credits)
Issues, theories, and debates that shape global religious traditions, cultures, and communities; examination of historical contexts and development, applying social scientific inquiry and methods to analyze relevant current circumstances and concerns.

RELG 201 - Religion and Culture (3 Credits)
Exploration of the dynamic relationships between selected religions and cultures.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

RELG 270 - Religion and the Arts (3 Credits)
Literary, visual, and/or performance art associated with religious discourse and practice.
Carolina Core: AIU

RELG 301 - Hebrew Bible (Old Testament) (3 Credits)
Modern study of the Hebrew Bible from historical, literary, and archeological points of view. Reading and analysis of texts in translation.
Cross-listed course: JSTU 301

RELG 361 - Psychology of Religion (3 Credits)
The development of the religious consciousness and its various expressions, the psychological dynamics of growth and conversion, response to crisis, and the relation of spiritual practice to health and wholeness.
Cross-listed course: PSYC 320

RELG 372 - Religion and Existentialism (3 Credits)
Existentialist thought as adapted by theologians to interpret religious experience and the biblical message. The movement from philosophical protest against essentialism into imaginative description of existence revealed under stress.

RELG 412 - Faith, Doubt, and God (3 Credits)
Judeo-Christian views of God; modern criticism and contemporary responses.

Sociology (SOCY)

SOCY 101 - Introductory Sociology (3 Credits)
An introduction to sociological facts and principles: an analysis of group-making processes and products.
Carolina Core: GSS

SOCY 220 - Elementary Statistics for Sociologists (3 Credits)
An introduction to concepts and application of quantitative methods, including descriptive and inferential statistics. Emphasis on analysis of empirical sociological data.
SOCY 304 - Race, Class, Gender, and Sexuality (3 Credits)
Historical and contemporary power relationships in race, social class, gender, and sexual orientation.
Prerequisites: SOCY 101.

Cross-listed course: POLI 305, WGST 304

Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 305 - Sociology of Families (3 Credits)
Sociological perspectives related to various aspects of family behaviors, roles, and values.
Prerequisites: SOCY 101.

Cross-listed course: WGST 305

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 311 - Ecology of Human Social Systems (3 Credits)
Relationships among and changes in populations, social organization, technology, and the environment.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SOCY 320 - Individual and Society (3 Credits)
Selected theoretical orientations, methodological procedures, and illustrative substantive data pertaining to the relations between the individual and society.

SOCY 322 - Sociology of Deviant Behavior (3 Credits)
Theories, methodology, and substantive issues in the study of social deviance.

SOCY 340 - Introduction to Social Problems (3 Credits)
Contemporary social issues such as poverty, health, the criminal justice system, globalization and the environment, their causes and possible solutions.
Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy

SOCY 350 - Juvenile Delinquency (3 Credits)
Social factors in the development, identification, and treatment of delinquents.
Prerequisites: SOCY 101.

Cross-listed course: CRJU 351

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 353 - Sociology of Crime (3 Credits)
Social factors in the development, identification, and treatment of criminals.
Prerequisites: SOCY 101.

Cross-listed course: CRJU 341

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

SOCY 354 - Collective Behavior (3 Credits)
An analysis of crowds, publics, social movements, and the mass society in terms of their institutional and social psychological consequences.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SOCY 355 - Race and Ethnic Relations (3 Credits)
Theoretical and empirical approaches related to race/ethnicity and the current state of race relations in America, with some attention to global issues.

Cross-listed course: AFAM 355

Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences

SOCY 357 - Sociology of Education (3 Credits)
Analysis of educational institutions, organizations, processes, and their effects in contemporary society.

Cross-listed course: EDFI 357

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy

Spanish (SPAN)

SPAN 109 - Beginning Spanish I (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have never studied Spanish or placed by examination into SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121.
Carolina Core: GFL

SPAN 110 - Beginning Spanish II (3 Credits)
Introduction to grammar and practical vocabulary necessary for fundamental communication skills. Restricted to those who have completed SPAN 109. Credit may be received only for one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121.
Carolina Core: GFL

SPAN 121 - Elementary Spanish (3 Credits)
Grammar and vocabulary necessary for fundamental communication skills. Assumes prior experience in Spanish. Admission only by proficiency examination. Credit may be received for only one of the following: SPAN 109, SPAN 110, SPAN 111, or SPAN 121.
Carolina Core: GFL

SPAN 122 - Basic Proficiency in Spanish (3 Credits)
Practice and further development of essential listening, reading, speaking, and writing skills.
Prerequisites: SPAN 109, SPAN 110, SPAN 111, or SPAN 121 or by placement examination.
Carolina Core: GFL

SPAN 399 - Independent Study (3-6 Credits)
Contract approved by instructor, advisor, and department chair is required for undergraduate students. Department permission required for transfer students.
Prerequisites: B or better in SPAN 210 or SPAN 211; Placement at 300 level on Phase II placement exam.
Graduation with Leadership Distinction: GLD: Research
Speech (SPCH)

SPCH 140 - Public Communication (3 Credits)
Introduction to theory and practice of oral communication in public, social, and institutional contexts. Includes foundational and cumulative training in the invention, performance, and critical analysis of oral communication, with emphasis on argumentation, persuasion, audience analysis, delivery, and ethical forms of engagement.
Carolina Core: ARP
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

SPCH 145 - Online Public Communication (3 Credits)
Introduction to theory and practice of live and recorded online spoken communication in public, social, and institutional contexts. Training in invention, performance, and critical analysis of online spoken communication, including audience analysis, persuasion, delivery, and ethical engagement. Includes significant practice in preparing and presenting live online public communication.
Carolina Core: CMS, INF

SPCH 331 - Organizational Communication (3 Credits)
Examines communication behavior and networks within organizations through the study of major theories of organizational communication, identifies and defines primary concepts, and applies them to organizational scenarios and case studies.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

Sport & Entertnmnt Mgmt (SPTE)

Statistics (STAT)

STAT 110 - Introduction to Statistical Reasoning (3 Credits)
A course in statistical literacy. Topics include data sources and sampling, concepts of experimental design, graphical and numerical data description, measuring association for continuous and categorical variables, introduction to probability and statistical inference, and use of appropriate software. Credit given only for STAT 110 or STAT 112.
Carolina Core: ARP

STAT 201 - Elementary Statistics (3 Credits)
Introduction to the fundamentals of modern statistical methods, including descriptive statistics, probability, random sampling, simple linear regression, correlation, tests of hypotheses, and estimation.
Prerequisites: MATH 111 or MATH 115 or STAT 110.
Carolina Core: ARP

Theatre (THEA)

THEA 120 - Laboratory Theatre Production (1 Credit)
Procedures for implementation of processes involved in the Laboratory Theatre Production Program. Supervised preparation of all performance and production elements involved in the collaborative process of theatre production. Course content varies according to season production program. Permission of Instructor or by audition. May be repeated for credit.

THEA 170 - Fundamentals of Acting (3 Credits)
Introduction to the art and craft of acting. Practical exploration through improvisation and scripted scene work. Includes a brief history of the development of modern acting techniques.
Carolina Core: AIU

THEA 172 - Basic Stage Makeup (1 Credit)
The study and application of the principles of the art of makeup for the theatre.

THEA 181 - Shakespeare in Performance (3 Credits)
Introduction to Shakespeare's works on page, stage, and screen. Emphasis placed on performances of scripts. History of Shakespeare's works/productions, stage/screen technique. Viewings of film adaptations required.
Carolina Core: AIU

THEA 200 - Understanding and Appreciation of Theatre (3 Credits)
An introduction to the understanding and appreciation of theatrical experience. Attendance at theatrical performances required.
Carolina Core: AIU

THEA 201 - Introduction to Theatre Studies (3 Credits)
Introduction to methods of analyzing and interpreting drama, with emphasis on play structure, genre, and style. Designed for the theatre major in preparation for theatre scholarship, performance, production, and design.
Graduation with Leadership Distinction: GLD: Research

THEA 230 - Make-up Design for Theatre and Film (3 Credits)
Theory and practice of make-up design for theatre and film. The application of analytical and research skills in the visual development of the character.

THEA 240 - Beginning Voice and Speech (3 Credits)
Study and practical application of voice and speech fundamentals in performance. Emphasis on speaking with ease, power and clarity to impact an audience.
Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Leadership Experiences

THEA 270 - Beginning Acting (3 Credits)
An exploration of the acting process through scene study. Focus will be on developing the actor's personal technique, emphasizing emotional truthfulness and authenticity.
Prerequisites: THEA 170 or declaration of major.

THEA 280 - Elements of Design for Theatre Production (3 Credits)
Foundational application of design principles and vocabulary as applied to the creative process in production design for theatre. Play analysis, creative and visual thinking, and graphic representation.

THEA 340 - Literature and Performance (3 Credits)
Introduction to the study of literature through performance; reading, analysis, and performance of prose, poetry, nonfiction, and drama.
Cross-listed course: SPCH 340

University Experience (UNIV)

UNIV 101 - The Student in the University (3 Credits)
The purposes of higher education and potential roles of the student within the university. Open to freshmen. Also open to other undergraduate students in their first semester of enrollment.

UNIV 401 - Senior Capstone Experience (1-3 Credits)
Integration of major program of study and general education; issues of transition into graduate school and/or employment; group project, intensive writing/speaking.
Women & Gender Studies (WGST)

WGST 112 - Introduction to Women's and Gender Studies (3 Credits)
A social science perspective of women in psychological, sociological, historical, anthropological, economic, and political contexts; the changing roles, images, and institutions.

Carolina Core: GSS, VSR
Graduation with Leadership Distinction: GLD: Community Service, GLD: Diversity and Social Advocacy

WGST 113 - Women's Health (3 Credits)
Basic functioning of the female body; effects of society on processes of health and disease. Not for natural sciences credit.

Carolina Core: GSS
Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Professional and Civic Engagement Leadership Experiences
