

PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER, M.S.N.

The Psychiatric Mental Health Nurse Practitioner (PMHNP) program is designed to prepare graduates to provide holistic, mental health care integrating neuroscientific principles of behavior, experience and psychopharmacology with psychotherapy, consultation and trauma-related care across the lifespan. The PMHNP will be prepared to practice in diverse settings including nurse-managed clinics, inpatient psychiatric facilities, home health, private psychiatric practices, addiction centers, general ambulatory clinics and schools.

This curriculum prepares nurses to sit for national certification as Psychiatric Mental Health Nurse Practitioner.

Learning Outcomes

- Apply theoretical knowledge to the practice of advanced nursing roles.
- Utilize evidence to address population health problems.
- Demonstrate professionalism at the advanced nursing level in the clinical setting.
- Pursue quality, effectiveness, and innovation in shared leadership of interprofessional health teams.

Requirements for Earning the M.S.N. Degree Include the Following

1. completion of an approved program of study;
2. completion of an applied research course, NURS 791 (3), or a thesis, NURS 799 (6);
3. a GPA of 3.00 (on a 4.00 scale) on all courses attempted for graduate credit and all courses numbered 700 and above;
4. a GPA of 3.00 (on a 4.00 scale) on all courses on the approved program of study;
5. and passing a comprehensive assessment during the last semester of the program.

Course Requirements

Total program 47-50 credit hours.

Course	Title	Credits
NURS 700	Theoretical and Conceptual Foundation for Nursing	3
