

MARINE SCIENCE, M.S.

Learning Outcomes

1. Students will conduct independent scientific research at the graduate level.
2. Students will demonstrate teaching skills.
3. Students will communicate orally to demonstrate their ability to present scientific results clearly, logically, and critically.
4. Students will communicate in writing to demonstrate their ability to present scientific results clearly, logically, and critically.
5. Students will apply scientific methodology, quantitative problem-solving, and experimental techniques within the core areas of marine science.
