GEOGRAPHY

Department Website (http://www.cas.sc.edu/geog/)

The Department of Geography offers training in fundamental geographic skills and the opportunity for advanced study and research in a variety of fields within the discipline. Areas of faculty interest and competence include economic, human-environmental, physical, political, and urban geography; geographic education; geographic information science; global positioning systems; and remote sensing. Programs of study lead to the Ph.D., M.A., and M.S. in geography. The department has a strong record of success in graduate placement in private- and public-sector careers as well as in the academic sphere. To assist in its educational role, the department administers the Center for GIS and Remote Sensing, the Hazards Research Laboratory, the Center for Excellence in Geographic Education, and the climate and decision-making program, the Carolinas Integrated Sciences and Assessments.

Admissions

For the master's degree programs, the department does not require an applicant to have an undergraduate major in geography; rather, it requires evidence of general intellectual ability and a compelling interest in geography. For the Doctor of Philosophy program, a master's degree in geography is normally required. Applicants for all degree programs must reply to a series of questions about preparation and career goals and probable field(s) of study; at least two letters of recommendation from individuals who have personal knowledge of the applicant's academic experience and abilities; transcripts of all previous academic work; and a Graduate Application Summary form, available from the department. Applicants whose native language is not English are also required to submit a satisfactory score on the TOEFL, the IELTS International Academic Course Type 2 exam, or the PTE Academic English proficiency tests. Information on scores is available through the Graduate School Admissions page (https://www.sc.edu/study/colleges_schools/graduate_school/apply/international_applicants/). The Graduate School does not require TOEFL scores for students who have completed or working on an undergraduate or graduate-level degree from a U.S. university; however, the department prefers to see scores if they are available. Students are encouraged to enter the program at the beginning of the fall. Applicants requesting financial aid beginning in the fall semester must submit completed applications by January 15; Spring admissions are considered under exceptional circumstances no later than October 15th. Details concerning admission can be obtained from the department's graduate director or electronically by accessing the department's webpage (https://www.sc.edu/study/colleges_schools/artsandsciences/geography/). A discussion-based seminar course that examines nature-society relations in coastal regions globally. The course will use social theory to understand how uneven development processes shaped — and continue shaping — current coastlines. We will explore key topics including coastal capitalism, delta ecologies, and climate justice via several global case studies.

Cross-listed course: ENVR 517

GEOG 521 - Landscapes of South Carolina (3 Credits)
An examination of the factors responsible for creating the contemporary South Carolina cultural landscape.

GEOG 525 - Geographical Analysis of Transportation (3 Credits)
Analysis of transportation systems and the application of geographic tools to transportation planning.

GEOG 530 - Environmental Hazards (3 Credits)
Human and environmental contributions to the generation and management of hazards originating from extreme natural events to technological failures. Contemporary public policy issues at the national and international level.

GEOG 531 - Quantitative Methods in Geographic Research (3 Credits)
A survey of basic quantitative approaches for handling and interpreting geographically related data; univariate and bivariate procedures applicable to a variety of problems.

GEOG 535 - Hazards Analysis and Planning (3 Credits)
Examination of the geo-spatial aspects of hazards analysis and planning with specific reference to disaster preparedness, recover, mitigation, and resilience.

Prerequisites: GEOG 363 and GEOG 530, or equivalents.

GEOG 538 - Global Food Politics (3 Credits)
Political, social, and cultural landscapes of food and farming around the world; issues of agricultural production, trade, consumption, and food security.

Cross-listed course: ENVR 538

GEOG 541 - Advanced Cartography (3 Credits)
Planning, compiling, constructing, and evaluating thematic maps. Theory and practice in scribing, separation and screening, color proofing, and map reproduction. Discussions of the process of map communication and the ways the cartographer can improve that communication.

Prerequisites: GEOG 341.

Programs

• Geography, M.A. (https://academicbulletins.sc.edu/graduate/arts-sciences/geography/geography-ma/)
• Geography, M.S. (https://academicbulletins.sc.edu/graduate/arts-sciences/geography/geography-ms/)
• Geography, Ph.D. (https://academicbulletins.sc.edu/graduate/arts-sciences/geography/geography-phd/)

Courses

GEOG 510 - Special Topics in Geographic Research (3 Credits)
Selected topics of special interest in geography. May be repeated as content varies by title.

GEOG 512 - Migration and Globalization (3 Credits)
A survey of the political, economic, and social causes and consequences of migration. Topics include immigration policy, border control, settlement patterns, transnationalism, multiculturalism, and integration. Selected contemporary and historical cases.

Prerequisites: GEOG 210.

GEOG 515 - Political Geography (3 Credits)
Concepts of space and power and their relationship to politics, geopolitics, identities, law, economics, populations, and civil society.

GEOG 516 - Coastal Zone Management (3 Credits)
Analysis of the competing demands for limited resources in the coastal zone with emphasis on the role of management in the resolution of conflicts over resource use.

Graduation with Leadership Distinction: GLD: Professional and Civic Engagement Internships

GEOG 517 - Socionatural Coastlines in Global Perspective (3 Credits)
A discussion-based seminar course that examines nature-society relations in coastal regions globally. The course will use social theory to understand how uneven development processes shaped — and continue shaping — current coastlines. We will explore key topics including coastal capitalism, delta ecologies, and climate justice via several global case studies.

Cross-listed course: ENVR 517

GEOG 521 - Landscapes of South Carolina (3 Credits)
An examination of the factors responsible for creating the contemporary South Carolina cultural landscape.

GEOG 525 - Geographical Analysis of Transportation (3 Credits)
Analysis of transportation systems and the application of geographic tools to transportation planning.

GEOG 530 - Environmental Hazards (3 Credits)
Human and environmental contributions to the generation and management of hazards originating from extreme natural events to technological failures. Contemporary public policy issues at the national and international level.

GEOG 531 - Quantitative Methods in Geographic Research (3 Credits)
A survey of basic quantitative approaches for handling and interpreting geographically related data; univariate and bivariate procedures applicable to a variety of problems.

GEOG 535 - Hazards Analysis and Planning (3 Credits)
Examination of the geo-spatial aspects of hazards analysis and planning with specific reference to disaster preparedness, recover, mitigation, and resilience.

Prerequisites: GEOG 363 and GEOG 530, or equivalents.

GEOG 538 - Global Food Politics (3 Credits)
Political, social, and cultural landscapes of food and farming around the world; issues of agricultural production, trade, consumption, and food security.

Cross-listed course: ENVR 538

GEOG 541 - Advanced Cartography (3 Credits)
Planning, compiling, constructing, and evaluating thematic maps. Theory and practice in scribing, separation and screening, color proofing, and map reproduction. Discussions of the process of map communication and the ways the cartographer can improve that communication.

Prerequisites: GEOG 341.
GEOG 542 - Dynamic Cartography (3 Credits)
Theories and principles of interactive and animated cartographic design.  
Prerequisites: GEOG 341.

GEOG 544 - Geography of the City (3 Credits)  
The influence of political boundaries, historical forces, settlement patterns, and transportation processes on urban life.

GEOG 545 - Synoptic Meteorology (4 Credits)  
Analysis of synoptic-scale circulation using weather maps, soundings, cross sections, thermodynamic diagrams, numerical models, and imagery.  
Prerequisites: GEOG 202 or equivalent.

GEOG 546 - Applied Climatology (4 Credits)  
Analysis of climate applications in natural and human-modified environments. Content may include water resources, solar energy, urban planning, air quality, agriculture, and tourism. Course work includes lab and field experimentation.

GEOG 547 - Fluvial Geomorphology (3 Credits)  
Introduction to landforms and processes associated with flowing water at the earth’s surface. Hydrology, sedimentology, and theories of channel formation and drainage basin evolution.

GEOG 549 - Water and Watersheds (3 Credits)  
Spatial variation of hydrology, water quality, and water-related hazards, including runoff generation, soil erosion, sedimentation, and flood hazards. Emphasizes a watershed perspective using geographic data and methods.  
Prerequisites: GEOG 347, GEOL 371, or ECIV 360.

GEOG 551 - Principles of Remote Sensing (3 Credits)  
Introduction to remote sensing. A variety of imaging systems including black and white, color, and high altitude color infrared photographs, LANDSAT, thermal infrared, and active microwave. Use of remote sensing for studying the extra-terrestrial environment and earth weather systems.

GEOG 552 - LiDARgrammetric and Photogrammetric Digital Surface Mapping (3 Credits)  
Introduction to fundamental concepts used to map topographic and planimetric Earth surface features using digital LiDAR (LiDARgrammetric) and digital soft-copy photogrammetry (Photogrammetric).  
Prerequisites: GEOG 363 or GEOG 341 or GEOG 345 or GEOG 551 or GEOG 563.

GEOG 554 - Spatial Programming (3 Credits)  
Computer programming of spatial problems; spatial statistical analysis, interactive graphics, and computer maps.

GEOG 556 - WebGIS (3 Credits)  
Web-based Geographic Information Systems (WebGIS), including concepts and principles of WebGIS, web programming fundamentals, web-based mapping techniques, and developing WebGIS applications.  
Prerequisites: GEOG 363.

GEOG 560 - Source Materials for Geographic Instruction (3 Credits)  
Introduction to selected materials available for all levels of instruction in geography. Emphasis on the substantive nature of the materials.  
Cross-listed course: EDSE 505

GEOG 561 - Contemporary Issues in Geography Education (3 Credits)  
Key concepts of geography and current approaches to teaching geography with specific attention to classroom materials, curriculum reform, cross-curricular integration, learning theory, and the use of geospatial/instructional technology.

GEOG 562 - Satellite Mapping and the Global Positioning System (3 Credits)  
Technology and use of Global Positioning Systems (GPS). GPS space segment, receiver technologies, range observables, and positioning accuracy. Applications to large/medium scale mapping, remote sensing, and aerial photography.  
Prerequisites: GEOG 345 or GEOG 363 or GEOG 551.

GEOG 563 - Advanced Geographic Information Systems (3 Credits)  
Theory and application of geographic information systems including discussions of automated input, storage, analysis, integration, and display of spatial data. Use of an operational geographic information system.

GEOG 564 - GIS-Based Modeling (3 Credits)  
Geographical information systems for modeling physical/human processes in space and time using raster and vector data. Cartographic modeling concepts, embedded models, and GIS-model coupling.

GEOG 565 - Geographic Information System (GIS) Databases and Their Use (3 Credits)  
Representation, construction, maintenance, and analysis of spatial data in a geographic information system (GIS) database.  
Prerequisites: GEOG 363 or GEOG 341 or GEOG 551 or GEOG 563.

GEOG 566 - Social Aspects of Environmental Planning and Management (3 Credits)  
Geographical approach to environmental problems.  
Prerequisites: GEOG 343.

GEOG 567 - Long-Term Environmental Change (3 Credits)  
Climatic changes of the past and their impact on the physical landscape, with an emphasis on the Quaternary period.  
Prerequisites: A 200-level course in physical geography or geology or equivalent.

Cross-listed course: GEOG 567

GEOG 568 - Human Dimensions of Global Environmental Change (3 Credits)  
Consequences of increasing anthropogenic changes on environmental systems including the sources of change, regional impacts, and social and policy responses.  
Prerequisites: GEOG 343.

GEOG 569 - International Development and the Environment (3 Credits)  
Intersections of international development and environmental change; study of general theoretical perspectives balanced with case studies from the Global South.  
Cross-listed course: ANTH 569

Graduation with Leadership Distinction: GLD: Diversity and Social Advocacy, GLD: Global Learning

GEOG 570 - Geography of Public Land and Water Policy (3 Credits)  
Geography of public land, water, and related public trust resources (wildlife, timber, minerals, fuels, recreation, wetlands, coastal zones, wilderness); historical geography of policy; spatial aspects of current research and management.

GEOG 571 - Microclimatology (4 Credits)  
Field techniques and processes in the atmospheric boundary layer including radiation, soil heat fluxes, turbulence, momentum, latent and sensible heat fluxes, moisture, and evaporation.  
Prerequisites: GEOG 202.
GEOG 734 - Field Seminar in Third World Development Projects (6 Credits)
The student works in a developing country for two to four months on projects designed by instructor and funded by the host country.

GEOG 735 - Seminar in Political Geography (3 Credits)

GEOG 737 - Seminar in Spatial Cognition (3 Credits)
Selected topics in spatial cognition.

GEOG 740 - Research Trends in Geography (1 Credit)
Seminar on research trends and writing research proposals in geography.

GEOG 741 - Seminar in Cartography (3 Credits)
A seminar to familiarize students with current experimental techniques, literature, and research topics in cartography.

GEOG 746 - Seminar in Climatology (3 Credits)
Major theories, measures of climatic change and variability, climate models, statistical analysis, and climate impacts.

GEOG 747 - Seminar in Physical Geography (3 Credits)
Investigation of physical systems and processes at the earth's surface. Topics vary; landforms, hydrology, pedology, biogeography, quaternary science, human impacts on physical systems.

GEOG 751 - Digital Techniques of Remote Sensing (3 Credits)
Introduction to the fundamental principles and methods of digital image processing of remotely sensed data. Algorithms are discussed for preprocessing, enhancement, and classification mapping of digital data for agricultural, urban, geological, and environmental problems.

GEOG 755 - Remote Sensing Modeling and Analysis (3 Credits)
Satellite-based information extraction; programming skills for digital image processing; self-developed modeling approaches; quantitative analysis of remote sensing data.

GEOG 766 - Urban Geography (3 Credits)
An investigation into the concepts of the urban field and the urban region.
GEOG 763 - Seminar in Geographic Information Systems (3 Credits)
Theory and application of modern automated approaches to handling geographic data. Includes computer oriented procedures for the input, analysis and display of spatial data. Areas covered range from census address matching to statewide natural resource systems.
Prerequisites: GEOG 563.

GEOG 799 - Thesis Preparation (1-9 Credits)

GEOG 801 - Historical and Contemporary Geographic Thought (3 Credits)
A survey of (1) the philosophical and intellectual foundations of Geography as a discipline, and (2) contemporary ideas and debates in major subfields of geographic research.

GEOG 805 - Advanced Directed Individual Studies in Geography (1-3 Credits)
Advanced directed research by a PhD student on geographical topics to be individually supervised by graduate faculty. This course may be taken for 1-3 credit hours of independent study by a student working closely with a faculty member on a specific research project to be defined and agreed upon between the student and a supervising faculty member.

GEOG 810 - Advanced Seminar in Human Geography (3 Credits)
Reading intensive seminar focused on conceptual frontiers and methodological debates in contemporary human geography with a secondary emphasis on intradisciplinary and cross-disciplinary affinities.
Prerequisites: any 700-level GEOG seminar course.

GEOG 811 - Advanced Seminar in Regional Geography (3 Credits)
Advanced reading and discussion of the physical, economic, social and/or cultural geography of major selected world regions.

GEOG 830 - Advanced Seminar in Environmental Geography (3 Credits)
A research seminar where students critically evaluate relevant literature, develop a research proposal, and complete a related research project in environmental geography.
Prerequisites: GEOG 730.

GEOG 841 - Advanced Seminar in Cartography (3 Credits)
A topic central to cartography will be studied. Students will critically evaluate pertinent literature, develop a research proposal, and complete a related research project.

GEOG 847 - Advanced Seminar in Physical Geography (3 Credits)
Research and discussion on various topics in physical geography. Literature varies with seminar topic but will include prevailing theories, data types, and modeling strategies in climatology, meteorology, hydrology, biogeography, soils, or geomorphology.
Prerequisites: GEOG 547 or GEOG 746.

GEOG 851 - Advanced Seminar in Remote Sensing (3 Credits)
Advanced reading and discussion in the following areas - 1) the theoretical bases of remote sensing; 2) remote sensing of biophysical variables such as plant and soil temperatures and moisture content; 3) advanced principles of optical and digital image processing; and 4) economic aspects of remote sensing of the environment.

GEOG 863 - Advanced Seminar in Geographic Information Systems (3 Credits)
A research seminar in which students conduct a detailed analysis of specific aspects of geographical data handling. This will include the design, implementation, and management of an operational geographical information system.

GEOG 899 - Dissertation Preparation (1-12 Credits)
