

# LINGUISTICS, PH.D.

---

The mission of the Ph.D. Program in Linguistics is to train students to pursue research and teach in the areas of general linguistics and a chosen subfield. The Ph.D. in Linguistics at USC typically involves a much broader range of coursework than what is found at more traditional Linguistics Departments and Programs in the United States. The program does not focus on the training of theoretical linguists, but instead sees its mission as that of training historical linguists, language acquisition specialists, sociolinguists, and others, who can apply linguistic theory to the pursuit of their research. Thus, it is typical for a student in this program to use current syntactic theory in investigations into language contact or language variation, or to apply phonological theory to research on second language acquisition.

The Ph.D. course requirements (see degree requirements) involve six core courses, plus a primary field of study of at least 12 hours, and either a secondary field of 9-12 hours or at least 9 hours breadth requirement outside the primary field. **Approved special fields are the following: linguistic anthropology, English/French/German/Spanish linguistics, historical linguistics, philosophy of language, phonological theory, psycholinguistics, second/foreign language acquisition, sociolinguistics, syntactic theory, and teaching English as a second/foreign language.**

The secondary field may consist entirely of LING-designated courses; however, it also could include both LING-designated courses and courses from other departments. A student may also choose a secondary field made up entirely of courses from a cooperating department. Examples include English Composition and Rhetoric, Medieval and Early Modern English Literature, Experimental Psychology, Philosophy, or Communication Sciences and Disorders. It is possible for all credit hours earned in a graduate certificate program in TESOL at USC to apply to this degree. Please speak to an advisor to see how these hours apply in your situation.

## Learning Outcomes

1. Students will demonstrate knowledge of theory and research in core areas of linguistics.
2. Students will demonstrate advanced knowledge in a subdiscipline in the field of linguistics.
3. Students will demonstrate the ability to formulate and conduct a plan of linguistic research that advances the state of knowledge in the area of inquiry.
4. Students will progress through the program in a timely manner and find suitable employment in the field of linguistics (or in a profession where their linguistic skills are being meaningfully used) at the completion of their doctoral degree.
