

PHYSICS, M.S.

Learning Outcomes

1. Students will demonstrate their ability to master material of the major fundamental branches of physics and their applications.
2. Students will apply and interpret standard physics models when completing a MS thesis.
3. Students will arrange material in a coherent manner and illustrate scientific details in an understandable fashion for a scientific audience.

Degree Requirements (30 Hours)

The requirements for the Master of Science degree include 30 semester hours of course work, a thesis, and an oral comprehensive examination.
