

BIOMEDICAL ENGINEERING, PH.D.

Admissions

Requirements for admission to graduate degree programs in biomedical engineering include the general admission requirements of The Graduate School as well as more stringent program requirements. In general, the admissions process is highly competitive. Admissions decisions are based on the quality of the applicant's previous university-level academic work (as reflected by grade point average, or GPA), letters of recommendation (at least two letters are required for evaluation), GRE scores, and other evidence of past accomplishments. Admission to graduate studies is granted by the Graduate School, in consultation with the Biomedical Engineering program.

More information about admissions is available from the Biomedical Engineering program.
