LAWH 732	Medicare Quality Compliance	3
LAWH 734	Healthcare Fraud & Abuse Compliance	2
LAWH 736	Third Party Billing Compliance	2

Comprehensive Assessment

All candidates for a Master's degree must complete a comprehensive assessment in the major field of study that is distinct from program course requirements. A comprehensive assessment is one that requires a student to synthesize and integrate knowledge acquired in coursework and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice or research in the discipline. It must be used as a means by which faculty judge whether the student has mastered the body of knowledge and can demonstrate proficiency in the required competencies. Many different models are possible, including written and oral comprehensive examinations, portfolios, supervised practice placements with comprehensive evaluation, a major written paper such as a thesis or an applied research project, or development of case studies. Students may complete a project related to an elective course of their choice or an externship (if externships are a part of the program). Projects must reflect significant work in addressing a hypothetical or real issue involving legal compliance or health law or policy.
