

HEALTH SERVICES POLICY AND MANAGEMENT, M.P.H.

The M.P.H. program prepares students for management in the public health sector, such as federal, state, and local health agencies. Some M.P.H. graduates work in the private sector.

Learning Outcomes

- Students will be able to apply operations management concepts to address organizational performance issues in health service organizations.
- Students will be able to describe legal perspectives on health policy and management issues, including assessment of legal and regulatory environments in the context of public health.
- Students will be able to apply economic principles for allocating and mobilizing resources for public health interventions and programs.
- Students will be able to apply the principles and tools of budgeting, resource management, and financial analysis to improve efficiency of public health and health care delivery organizations.
- Students will be able to develop policy options for the achievement of an agency's or program's objectives.

Practice Experience and Capstone Requirements (5 Hours)

Course	Title	Credits
HSPM 788	Public Health Practice Experience	3
HSPM 796	Health Services Policy and Management MPH Capstone Course	2
Total Credit Hours		5

Final Examination

The final grant proposal and grant proposal presentation included in the HSPM MPH Capstone Course (HSPM 799) which is required for all HSPM MPH students will serve as the comprehensive final exam assessment for the HSPM MPH degree. The final grant proposal will be reviewed by at least two HSPM faculty members. The grant proposal presentations in face-to-face classes will be attended and reviewed by at least two HSPM faculty members. Distance students' presentations will be recorded and reviewed by at least two HSPM faculty members. Faculty reviewers will be provided with a comprehensive assessment rubric which will identify the essential required elements for both the grant proposal and presentation.

Graduate Assistantship

All full-time M.P.H. students are encouraged to work as graduate assistants in health service organizations in the community to acquire work experience and enrich the learning process through on-the-job application of concepts and techniques learned in the classroom. To qualify for an assistantship, a student must be fully admitted to a degree program, be enrolled as a full-time student, and maintain a 3.00 GPA.

Dual Degrees

The Department of Health Services Policy and Management and the College of Social Work, and Department of Political Science offer coordinated programs that lead to a dual degree. The requirements for the M.P.H. portion of each dual degree program are the same as shown above. The M.P.A. and M.S.W. portions of the dual degree programs are determined by the respective schools and college. Some courses do fulfill requirements for both portions of the dual degree. A dual degree program thus typically requires fewer semester hours in total than if the two programs were taken separately.
