

NEUROPSYCHIATRY (NPSY)

NPSY G700 - Neurology and Psychiatry Clerkship (8 Credits)

The Neurology & Psychiatry Clerkship is designed to teach students the skills that are required for any competent physician regardless of specialty. Half of the clerkship will be within Psychiatry and the other half within Neurology, as described below. Throughout the entire clerkship, the formal didactic curriculum will build from the M1 and M2 knowledge of neurosciences and will include case-based clinical education. At the conclusion of the clerkship, students will be expected to demonstrate ability in conducting an appropriate evaluation/examination, obtaining a history, and developing referral and treatment plans of patients at the level expected of a general medical practitioner, as well as demonstrate ability to localize the lesion and develop a differential diagnosis. The conclusion of the clerkship will include assessments via the Psychiatry and Neurology NBME subject examinations and a combined Objective Structured Clinical Evaluation (OSCE). The Psychiatry portion of the clerkship will incorporate both inpatient and outpatient experiences including exposure to areas integral to the optimal management of psychiatric diseases, both in the inpatient and outpatient settings. In addition to rotational exposure, students will have required experiences at an AA meeting and in electroconvulsive therapy. None of the required Clinical Psychiatry portion of the clerkship will fall on a weekend. The Neurology portion of the clerkship will incorporate both inpatient and outpatient experiences including exposure to areas integral to the optimal management of neurological disease such as rehabilitation, palliative care, and neurosurgery. Students will work with inpatient neurology, including time with both the Neuro ICU and the inpatient consult service, as well as outpatient neurology. Students should note that the inpatient neurology component will conclude with Saturday and Sunday work hours. During the Neurology portion of the clerkship, students will also work one day on either neuro-rehab, neuro pain-management, or neurosurgery.

NPSY G701 - Clerkship Completion (0 Credits)

This course allows completion of required M-III Clerkships where normal enrollment for those courses crosses academic years. It is valued at zero credits to reflect enrollment, but all graded material is taken into account in the G700 clerkship grade. Successful completion of required hours results in a passing grade.

NPSY G702 - Psychiatry Clinical Skills Remediation (1-8 Credits)

This course is assigned to students who are required to remediate their clinical performance in a given clerkship / AI / elective (M3 or M4 year). Enrollment in this course will allow students to receive a clinical schedule and capture clinical performance evaluations for their required remediation in a clinical department.

NPSY G710 - Focus in Psychiatry Elective (2 Credits)

Inpatient and outpatient opportunities exist for electives in Psychiatry and subspecialties in child/adolescent and geropsychiatry. The content of this course is designed to provide the student a broader experience in comprehensive psychiatric patient evaluation and treatment. He/she will be assigned to a practicing psychiatrist within a variety of inpatient, outpatient, emergency and consultative fields. The presenting problems of patients include personality disorders, acute psychotic disorders, mood disorders, anxiety disorders, schizophrenia, psychosomatic illness, organic brain syndrome and substance abuse disorders. The student will be responsible for intake assessments, to include a mental status examination. He/she will also participate in the decision-making processes and in continuity of care. Additional assignments will be made to specialized treatment programs including individual and family psychotherapy. The student may see outpatients being treated at the Brownell Center collocated with Marshall I. Pickens Hospital. Additionally, rotations may occur at the Piedmont Mental Health Center located in Simpsonville, near Hillcrest Hospital. Additional inpatient rotations may be at Marshall I. Pickens Hospital or Harris Psychiatric Hospital in Anderson. Consultation and emergency services are located at Greenville Memorial Medical Center. The course is designed to provide the student with maximum patient contact. Reviews of interviewing techniques and the principles of general psychiatry with the introduction of individual and family psychotherapy techniques will complement the student's clinical contact with patients. The student will be evaluated by both his/her preceptors and the Clerkship Director for Psychiatry or his designee. Input will be obtained from the other health professionals with whom the student has worked. Additionally, successful completion of the stated objectives will be required to pass this course.

NPSY G800 - Psychiatry Acting Internship (4 Credits)

This course offers a brief, intensive exposure to a typical psychiatry practice, both for students considering a career in this area and those who are entering other allied specialties. Students may be placed in a variety of clinical environments with exposure to the inpatient, and subspecialty care of patients.

NPSY G810 - Advanced Focus in Psychiatry (4 Credits)

After consultation with the Clerkship Director, the student will be assigned to the area of practice to which he/she needs the most exposure before entering a residency program. Options include inpatient, outpatient, emergency, substance abuse, and consultative fields. The presenting problems of patients may include personality disorders, acute psychotic disorders, mood disorders, anxiety disorders, schizophrenia, psychosomatic illness, organic brain syndrome and substance abuse disorders. The student will be responsible for intake assessments, including a mental status examination. He/she will also participate in the decision-making processes and in continuity of care. Additional assignments will be made to specialized treatment programs including individual psychotherapy.

NPSY G811 - Focus in Psychiatry (2 Credits)

The content of this course is designed to provide the student a broader experience in comprehensive psychiatric patient evaluation and treatment. Inpatient and outpatient opportunities exist for electives in Psychiatry and sub-specialties in child/adolescent and geropsychiatry. After consultation with Clerkship Director, the student will be assigned to a practicing psychiatrist within a variety of inpatient, outpatient, emergency, and/or consultative fields. The presenting problems of patients may include personality disorders, acute psychotic disorders, mood disorders, anxiety disorders, schizophrenia, psychosomatic illness, organic brain syndrome and substance abuse disorders. The student will be responsible for intake assessments including a mental status examination. He/she will also participate in the decision-making processes and in continuity of care. Additional assignments will be made to specialized treatment programs including individual psychotherapy. The student may see outpatients being treated at the Brownell Center collocated with Marshall I. Pickens Hospital, Greater Greenville Mental Health Centers, PrismaHealth Greer, or Prismahealth Patewood clinics. Inpatient rotations may be at Marshall I. Pickens Hospital or Harris Psychiatric Hospital in Anderson. Consultation and Emergency services are located at Greenville Memorial Medical Center. The course is designed to provide the student with maximum patient contact. Reviews of interviewing techniques and the principles of general psychiatry with the introduction of individual psychotherapy techniques will complement the student's clinical contact with patients. The student will be evaluated by both his/her preceptors and the Clerkship Director for Psychiatry or his designee. Input will be obtained from any other health professionals with whom the student has worked. Additionally, successful completion of the stated objectives will be required to pass this course.

NPSY G815 - Academic Psychiatry (2 Credits)

Students will review a variety of virtual material that has been made available by the course director to develop teachable resources for the department of psychiatry. Additional material, such as various articles for review and additional online learning modules may also be included for review. Upon the completion of their review, students will submit to the course director a detailed presentation as to how these resources would supplement the NPSY clerkship or the current psychiatry electives and how they might best be used to aid in students' knowledge and competency in the field of psychiatry. The student would then develop the resource into a delivery module such as an SLM. The majority of the course requirements (modules and readings) will be completed online and can be completed asynchronously. Students will be expected to complete all modules and assignments by the posted deadlines. Each week, discussions will be held via phone or in person. Students must complete all reading prior to these discussions.

NPSY G820 - Screen and Psyches (4 Credits)

The content of this course is designed to provide the student a broader experience in critically thinking about media in relationship to patients, advocacy, community education and their own professional growth. Digital literacy has been a significant issue in undergraduate medical education to the point that the AAMC has developed a Digital Literacy Toolkit. Additionally, the ACGME requires that a component of Medical Knowledge in psychiatry residency includes familiarity with aspects of American cultures and subcultures, with a focus on the cultural elements of the relationship between the resident and patient (ACGME, 2023). Media, in all its iterations, is an integral part of that culture. Literature, cinema, and social media profoundly impact our lives and the lives of our patients. Media also carries both potential risks and rewards, particularly in the context of mental health. This course will explore the various ways in which media does this. Specifically, the course will focus on three units: the effect of media on the mental health of the consumer; the portrayal of mental health in the media; and the place of media as a tool for professional development, advocacy and community education with regards to mental health. This model curriculum provides students with a pathway to develop the knowledge to critically assess various forms of media, and how they represent psychiatry and mental health (MK1, MK2, MK4). It encourages learners to actively take steps (PBL2) to engage with media for advocacy purposes (SBP3), and to think about their relationship with media and the impact it has on their well-being (PROF1, PROF3). Additionally, it asks students to take this knowledge one step further in applying what they learn to patient care and formulation. The student will be evaluated by the Course Director. Learners will also be asked to complete pre- and post- elective surveys to evaluate their own knowledge. Additionally, successful completion of a project and of the stated objectives will be required to pass this course.

NPSY G825 - Focus in Reproductive Psychiatry (2 Credits)

The content of this course is designed to provide students with advanced exposure to psychiatric illness during time of reproductive transition, with a particular focus on the perinatal period. Students will gain experience in treating patients during the perinatal period and other times of reproductive transition for psychiatric illness in a variety of settings, including outpatient, consultation-liaison, integrated clinics, and psychiatric day treatment programs. Presenting conditions may include perinatal mood and anxiety disorders, including perinatal depression, perinatal obsessive-compulsive disorder, postpartum psychosis, and substance use disorders in the perinatal period. Clinical work will occur at Prisma Health Greenville Memorial Hospital, the Behavioral Health and Wellness Pavillion, Greer Center for Psychiatry, other locations as needed. This elective would be of benefit to students planning to pursue a career in OB/GYN, psychiatry, or women's health. Students will be responsible for patient intake and initial assessment including mental status examination, and ongoing management, treatment planning, group psychotherapy, and psychoeducation for patients. The student will participate in the decision-making process. Responsibilities will also include clinical documentation related to patient encounters. Students will be expected to present a short, clinically relevant journal article review or clinical presentation to the treatment team on the final day of the rotation. The student will be evaluated by both his/her preceptors and the Rotation Director for Psychiatry or his designee. Input will be obtained from any other health professionals with whom the student has worked. Additionally, successful completion of the stated objectives will be required to pass this course.

NPSY G830 - Advanced Focus in Reproductive Psychiatry (4 Credits)

The content of this course is designed to provide students with advanced exposure to psychiatric illness during time of reproductive transition, with a particular focus on the perinatal period. Students will gain experience in treating patients during the perinatal period and other times of reproductive transition for psychiatric illness in a variety of settings, including outpatient, consultation-liaison, integrated clinics, and psychiatric day treatment programs.
