ECONOMICS, B.S.

The Bachelor of Science in Economics is ideal for students who want to develop advanced quantitative skills useful in economic forecasting, finance, public policy analysis and other forms of mathematically intensive research. In addition to a standard course load that teaches the foundations of economic systems, monetary policy, inflation, price determination, competition, and other economic concepts, the B.S. includes additional coursework in mathematics, statistics and computer science. This degree prepares graduates for careers and advanced study in law, business, social sciences and public policy.

Learning Outcomes
1. Our graduates will understand core microeconomic theories and concepts.
2. Our graduates will understand core macroeconomic theories and concepts.
3. Our graduates will be able to solve basic equations to find equilibrium outcomes and use graphs to understand and interpret economic relationships.
4. Our graduates will be able to demonstrate their understanding of economic concepts and quantitative knowledge and use these concepts and knowledge to analyze real-world problems.
