

INTERDISCIPLINARY STUDIES, B.A.I.S. (COLLEGE OF ARTS AND SCIENCES)

Learning Outcomes

- Students will identify interdisciplinary approaches to scholarship through thematic or problem-focused study. They will demonstrate the ability to use information, concepts, analytical approaches, and methods involved in at least two related fields.
- Students in the BAIS and BSIS programs will synthesize a personalized set of outcomes and independently work towards achieving them.
- Students in the BAIS or BSIS program will be admitted to graduate/professional school or will be hired in entry-level positions in their fields within three (3) years of graduation.
