Learning Outcomes

1. Provide evidence-based, culturally sensitive, clinically competent care across the continuum of care.
2. Use information and health care technologies to assist in making clinical judgments using reflection, critical thinking, and problem-solving skills for effective health care delivery.
3. Exhibit professional behavior while working as a member of an interprofessional healthcare team and in all other settings.
4. Perform the professional roles of care provider, care coordinator, leader, member of a profession, and life-long learner.
